Purpose of the proposal and its anticipated effects, including any changes in existing rules:

The Board is proposing an update to chapter 246-110 WAC to improve clarity and assure the list of contagious diseases that may affect children in schools and/or childcare centers are consistent with best public health practice and the notifiable conditions listed in chapter 246-101 WAC. This proposal removes two common conditions (Pediculosis or body lice, and Conjunctivitis or pink eye) and adds two new contagious diseases (Shiga toxin-producing Escherichia coli and Cryptosporidiosis). In addition to assuring consistency with chapter 246-101 WAC, and reflecting current best public health practice, the proposed changes will assure that local health officers will have up to date rules that will help prevent transmission of communicable disease to children, students, and staff in childcare and school settings.

Reasons supporting proposal:

These rules have not been reviewed or updated since 1992. The proposed rule has been rewritten to improve clarity and to assure consistency with other state rules and best public health practices, so that schools, child care centers and local health jurisdictions can easily identify the types of contagious diseases that they need to work together to control and prevent.
