### Chapter 246-105 WAC Immunization of Child Care and School Against Certain Vaccine Preventable Diseases

Dec 23 2013 9:05AM

Hello Mr Wise, My comment as a child care center licenser for DEL is: That I have had centers licensed that are less than 13 capacity. Hopefully there is some authority still for requiring full immunization in child care centers less than 13 capacity. Is there authority for licensed family home child care programs to require immunizations as this is written? Is there authority for "certified" child care programs to require immunizations as this is written? DEL does distinguish three types of licensed facilities: family home child care WAC 170-296A child care center WAC 170-295 school aged child care WAC 170-297 This rule then only applies to child care centers with capacity over 12? Is that correct? Thank you, Linda Robertson DEL Child Care Center Licenser
