RE: June 11, 2014 – Keeping of Animals

The proposal, as I understand, is to remove the Board of Health's oversight of the environmental and health effects of the keeping of animals.

It's really very simple. It's very obvious to everyone who looks that the goal of the animal ag. industry is profit. If they can remove any oversight of their environmental destruction, they don't have to spend money on it. It's really pretty ridiculous that it's even being proposed. But, as you know, they have immense power and regularly get away with ridiculous things. Please don't allow this one.
