Subject: Doh/ needles

Dear Board members I recently reached out to the Seattle N precinct as well as the mayors office in Seattle. I asked for a response and to date have not heard back .

I would appreciate your thoughts on the subject of training the local public to pick up needles.

It is my opinion this is not safe !

It should be left up to city trained workers. There can be no question this is a biohazard !

Iam very concerned .

Hopefully you all can advise the Seattle local dept of health stop this training in mid February . See the photo below of the flyer that has been circulating .

Thanks

Sincerely

Jennifer Aspelund
