2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Subject: No to Covid V mandate for children.

External Email

Dear SBOH,

Please do not force people who would be more harmed than helped to get vaccinations that do not even affect their age group. Having children get immunized for a disease that has virtually 0% death rate for but the vaccination has an increased chance of causing myocarditis and other terrible side effects (www.CanadianCovidCareAlliance.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.canadiancovidcarealliance.org>>) is irresponsible at best, and criminal at worst on your part if you pass this as a mandate.

This applies to all people who are immune to covid from having contracted the disease and are now immune to it. The risks of the vaccine far outweigh any public good that the vaccine has shown to do. Please do not add covid to the list of communicable diseases that warrant such extreme measures.

Please stand behind and protect parents rights to choose what is best for their children. Please respect freedom of choice. Please respect bodily autonomy and informed consent by saying NO to mandating the Covid vaccine for our children.

Thank you for your time,

Nicole K

I am strongly urging you to vote NO for vaccine mandates for our children and schools. Please resist the public hysteria and Big Pharma lobbying machines, look at the science and data for kids, and ask yourself why would we force such a thing on our precious children? FACT - zero kids 5-11 in the Pfizer clinical trial, either vaccinated or in the control group, had severe Covid symptoms. Zero. FACT - per the CDC data, less than 1/10th of 1 percent (<0.10%) of people hospitalized with (not because of) COVID were kids 0-17, and even fewer died. FACT - vaccinated people can spread the disease - look at what's happening now. FACT - we don't know the long-term side effects of this vaccine; it's just too early. FACT - the drug companies cannot be sued for any deaths or adverse reactions to their products; ask yourself why? Given all of this, how could you even consider mandating a vaccine on our children? Let the parents and their doctors decide!!!!

Also, consider also that the least vaccinated portion of our population are minorities. What message will this send if you vote yes?

Subject: NO to Mandatory Covid 19 shot for kids

External Email

WA Board of Health,

I want to let you know that as a resident of Bellevue in WA state I do not support mandatory Covid vax for kids because as statistic show children are at an extremely low risk of getting Covid, and that the vax is still under emergency use authorization. Long term risk has not fully realized.

It should be under the supervision of the child parents and their doctor. It should not be mandatory.

Thank you for listening to my opinion and taking it into consideration.

Subject: NO vaccination requirement for school aged children

External Email

Hello,

I am writing to strongly demand that WA State NOT impose mandatory covid-19 vaccinations for school aged children. I'm actually baffled that I even have to write you this email, and that this topic is even on the agenda for your next meeting. The ignorance of such a proposal is actually jarring.

- 1) A mandate is not the law. To force people to comply with a mandate is criminal.
- 2) The vaccines are STILL (all of them) experimental drugs under emergency order. You cannot mandate this for schools or detain persons or families involuntarily who do not wish to comply. This is illegal and unethical.
- 3) Mass-vaccinating children for covid-19 is not a clinical necessity, as the real science has clearly shown! More injuries and adverse reactions (even just the small percentage of reported ones in the VAERS system) come from the vaccine than covid itself. The miniscule number of reported children who struggled with covid had other comorbidities that affected their outcome.
- 4) There is currently a 99.9% survival rate of covid-19 infections in the United States and the survival rate is even higher for school-aged children, who RARELY have problems, or even symptoms, of this infection. To mandate vaccinations on a populace with a greater than 99.9% survival rate shows a complete lack of common sense and critical thinking prowess.
- 5) If the goal of mass-vaccination of children is to reduce transmission to others, I strongly urge this "Board of Health" to look at the data and observe how an alarming amount of current covid infections are in fully vaccinated individuals, who, believing they were protected, got infected and have been spreading it to others. This Board should be focused on THAT alarming trend, not on mass-vaccination of children who don't need it.

I look forward to the January 12th meeting!

Warmly,

JDW

Subject: No Vaccine Mandates for Kids!

External Email

To whom it concerns,

- Children are at extremely low risk for Covid
- the "vaccine" it is still only in the emergency use authorized stage
- no long term history of the safety of this "vaccine"
- studies document that vaccines and unvaccinated people can still spread Covid therefore the "vaccine" does not stop the spread of Covid

Please from one very scared Momma Bear to anyone who will please listen to us let us parents who love and adore our children and want to still have the right to protect our children the way we feel is best as a parent please do not mandate this "vaccine" for our children. This will keep our kids from having normalcy in their lives.

My heart is so broken as my whole family lives here in Washington and if this passes... we will be having to make a hard choice move away from our whole family to a state so our children can live a normal childhood but be away from the ones they love or home school. Which homeschooling is not ideal as I want my children around other kids in a school environment.

Please hear our voice! I believe all should have a choice.

One very concerned mom,

Nicole Duncan (Washington Resident and voter)

To whom it may concern:

I am a parent, grandparent and member of the community. I implore you to please stop the push to require Covid 19 vaccinations for ANY child in child care or school. Covid vaccines should NOT be a requirement for our children! Children are at an extremely low risk for Covid 19. The Covid vaccines have no long-term testing on adults and they have even less testing on children. Covid 19 vaccines are not stopping the virus as many with the vaccine are contracting and spreading Covid 19. The vaccine has not been tested enough to ensure its efficacy and safety in children. Requiring this vaccine does not protect our children!

The disease burden in this case does not meet your criteria. There is NOT a significant morbidity and/or mortality in at least some sub-set of the population. The survival rate is well over 90% and even the long term effects of Covid 19 do not represent a significant amount. Additionally, this vaccine is not meeting your criteria because it is not reducing the risk of person-to-person transmission.

As for the criteria of implementation, the vaccine is NOT acceptable to the medical community and the public. There is an extremely large amount of both the medical and the general public who do not accept this vaccine as safe.

Please protect our children by NOT requiring Covid 19 vaccinations to attend child care or school.

Thank you,

Subject: No to the New vaccine requirement

External Email

Hello, I just find out about the proposal of including the so called Covid vaccine to be in the list of required inoculations for kids in school age.

The kids are the less affected by this virus and it's variants, and lately we have seen more cases of people who are double vaccinated which also received boosters, that are the ones getting infected.

I don't think it is the right time to think on forcing parents to give kids this new shot that still has not enough research of secondary effects.

I will be more comfortable as a mom of kids in school age, that this proposal will be postponed until better knowledge of the consequences of the vaccine on minors and how the variants of virus are evolving.

Our kids are our future, they shouldn't be forced to this new shot.

Thanks.

Subject: NO to COVID WAC Codes

External Email

Good Morning,

I am a Washington state resident that is deeply concerned regarding the discussion of implementing COVID WAC codes that blatantly violate the constitutional rights of all Washington residents. It is very clear that, if one does their research or does any thinking for oneself, that if we just let COVID run its course herd immunity will be obtained, be it through vaccination or natural immunity. It should be a person's choice as to how they choose to live their life.

The mRNA vaccine is ineffective at preventing infection and transmission of the virus. I know many many people who are fully vaccinated, mask everywhere they go, and have still come down with COVID. The science shows this. Breakthrough infections are a real thing and they happen often.

Numerous studies have shown that natural immunity is just as good, if not superior to that of the vaccine, in protecting individuals from reinfection and transmission of the virus. One the largest case studies conducted by MedRxiv in Israel concludes, "This study demonstrated that natural immunity confers longer lasting and stronger protection against infection, symptomatic disease and hospitalization caused by the Delta variant of SARS-CoV-2, compared to the BNT162b2 two-dose vaccine-induced immunity.

Individuals who were both previously infected with SARS-CoV-2 and given a single dose of the vaccine gained additional protection against the Delta variant."

If vaccinated individuals can also become infected and transmit the virus then what purpose is it to acquire "immunity" by means of force through a medical procedure that doesn't achieve what is intended to be accomplished, immunity? Why can we not also acknowledge natural immunity as a viable option?

I've attached the previously referred to study at the end of this email.

I pray you have peace of heart and clarity of mind as you move forward with such heavy decisions to be made that will impact thousands of lives. I in no way envy the position that any of you are in, especially in such times as these. Please hear the voice of the people though, we do not want to give up our freedom of choice because if it's this now, what will be next? It's time to draw the line in the sand. Please stand for what is right.

Warm Regards,

Elyse Newcomb

Abstract

Background:

Reports of waning vaccine-induced immunity against COVID-19 have begun to surface. With that, the comparable long-term protection conferred by previous infection with SARS-CoV-2 remains unclear.

Methods:

We conducted a retrospective observational study comparing three groups: (1)SARS-CoV-2-naïve individuals who received a two-dose regimen of the BioNTech/Pfizer mRNA BNT162b2 vaccine, (2)previously infected individuals who have not been vaccinated, and (3)previously infected *and* single dose vaccinated individuals. Three multivariate logistic regression models were applied. In all models we evaluated four outcomes: SARS-CoV-2 infection, symptomatic disease, COVID-19-related hospitalization and death. The follow-up period of June 1 to August 14, 2021, when the Delta variant was dominant in Israel.

Results:

SARS-CoV-2-naïve vaccinees had a 13.06-fold (95% CI, 8.08 to 21.11) increased risk for breakthrough infection with the Delta variant compared to those previously infected, when the first event (infection or vaccination) occurred during January and February of 2021. The increased risk was significant ($P<0.001$) for symptomatic disease as well. When allowing the infection to occur at any time before vaccination (from March 2020 to February 2021), evidence of waning natural immunity was demonstrated, though SARS-CoV-2 naïve vaccinees had a 5.96-fold (95% CI, 4.85 to

7.33) increased risk for breakthrough infection and a 7.13-fold (95% CI, 5.51 to 9.21) increased risk for symptomatic disease. SARS-CoV-2-naïve vaccinees were also at a greater risk for COVID-19-related-hospitalizations compared to those that were previously infected.

Conclusions:

This study demonstrated that natural immunity confers longer lasting and stronger protection against infection, symptomatic disease and hospitalization caused by the Delta variant of SARS-CoV-2, compared to the BNT162b2 two-dose vaccine-induced immunity. Individuals who were both previously infected with SARS-CoV-2 and given a single dose of the vaccine gained additional protection against the Delta variant.

Introduction

The heavy toll that SARS-CoV-2 infection has been taking on global health and

healthcare resources has created an urgent need to estimate which part of the

population is protected against COVID-19 at a given time in order to set healthcare

policies such as lockdowns and to assess the possibility of herd immunity.

To date, there is still no evidence-based, long-term correlate of protection¹. This lack

of correlate of protection has led to different approaches in terms of vaccine resource

allocation, namely the need for vaccine administration in recovered patients, the need

for booster shots in previously vaccinated individuals or the need to vaccinate low-

risk populations, potentially previously exposed.

The short-term effectiveness of a two-dose regimen of the BioNTech/Pfizer

BNT162b2 mRNA COVID-19 vaccine was demonstrated in clinical trials² and in

observational settings^{3,4}. However, long term effectiveness across different variants is

still unknown, though reports of waning immunity are beginning to surface, not

merely in terms of antibody dynamics over time⁵⁻⁷, but in real-world settings as well⁸.

Alongside the question of long-term protection provided by the vaccine, the degree

and duration to which previous infection with SARS-CoV-2 affords protection against

repeated infection also remains unclear. Apart from the paucity of studies examining

long-term protection against reinfection⁹, there is a challenge in defining reinfection

as opposed to prolonged viral shedding¹⁰. While clear-cut cases exist, namely two

separate clinical events with two distinct sequenced viruses, relying solely on these

cases will likely result in an under-estimation of the incidence of reinfection.

Different criteria based on more widely-available information have been suggested¹¹,

the Centers for Disease Control and Prevention's (CDC) guidelines refer to two

positive SARS-CoV-2 polymerase chain reaction (PCR) test results at least 90 days

apart.¹² Using similar criteria, population-based studies demonstrated natural immunity^{13,14} with no signs of waning immunity for at least 7 months, though protection was lower for those aged 65 or older⁹.

The Delta (B.1.617.2) Variant of Concern (VOC), initially identified in India and today globally prevalent, has been the dominant strain in Israel since June 2021. The recent surge of cases in Israel¹⁵, one of the first countries to embark on a nationwide vaccination campaign (mostly with the BioNTech/Pfizer BNT162b2 vaccine), has raised concerns about vaccine effectiveness against the Delta variant, including official reports of decreased protection¹⁶. Concomitantly, studies have demonstrated only mild differences in short-term vaccine effectiveness¹⁷ against the Delta variant, as well as substantial antibody response¹⁸. Apart from the variant, the new surge was also explained by the correlation found between time-from-vaccine and breakthrough infection rates, as early vaccinees were demonstrated to be significantly more at risk than late vaccinees⁸. Now, when sufficient time has passed since both the beginning of the pandemic and the deployment of the vaccine, we can examine the long-term protection of natural immunity compared to vaccine-induced immunity.

To this end, we compared the incidence rates of breakthrough infections to the incidence rates of reinfection, leveraging the centralized computerized database of Maccabi Healthcare Services (MHS), Israel's second largest Health Maintenance Organization.

Methods

Study design and population

A retrospective cohort study was conducted, leveraging data from MHS' centralized computerized database. The study population included MHS members aged 16 or older who were vaccinated prior to February 28, 2021, who had a documented SARS-CoV-2 infection by February 28, 2021, or who had both a documented SARS-CoV-2 infection by February 28, 2021 *and* received one dose of the vaccine by May 25, 2021, at least 7 days before the study period. On March 2, 2021, The Israeli Ministry of Health revised its guidelines and allowed previously SARS-CoV-2 infected individuals to receive one dose of the vaccine, after a minimum 3-month-interval from the date of infection

Data Sources

Anonymized Electronic Medical Records (EMRs) were retrieved from MHS' centralized computerized database for the study period of March 1, 2020 to August 14, 2021.

MHS is a 2.5-million-member, state-mandated, non-for-profit, second largest health fund in Israel, which covers 26% of the population and provides a representative sample of the Israeli population. Membership in one of the four national health funds is mandatory, whereas all citizens must freely choose one of four funds, which are prohibited by law from denying membership to any resident. MHS has maintained a centralized database of EMRs for three decades, with less than 1% disengagement rate among its members, allowing for a comprehensive longitudinal medical follow-up. The centralized dataset includes extensive demographic data, clinical measurements, outpatient and hospital diagnoses and procedures, medications

dispensed, imaging performed and comprehensive laboratory data from a single central laboratory.

Data extraction and definition of the study variables

COVID-19-related data

COVID-19-related information was captured as well, including dates of the first and second dose of the vaccine and results of any polymerase chain reaction (PCR) tests for SARS-CoV-2, given that all such tests are recorded centrally. Records of COVID-19-related hospitalizations were retrieved as well, and COVID-19-related mortality was screened for. Additionally, information about COVID-19-related symptoms was extracted from EMRs, where they were recorded by the primary care physician or a certified nurse who conducted in-person or phone visits with each infected individual.

Exposure variable: study groups

The eligible study population was divided into three groups: (1) fully vaccinated and SARS-CoV-2-naïve individuals, namely MHS members who received two doses of the BioNTech/Pfizer mRNA BNT162b2 vaccine by February 28, 2021, did not receive the third dose by the end of the study period and did not have a positive PCR test result by June 1, 2021; (2) unvaccinated previously infected individuals, namely MHS members who had a positive SARS-CoV-2 PCR test recorded by February 28, 2021 and who had not been vaccinated by the end of the study period; (3) previously infected *and* vaccinated individuals, including individuals who had a positive SARS-CoV-2 PCR test by February 28, 2021 and received one dose of the vaccine by May 25, 2021, at least 7 days before the study period. The fully vaccinated group was the comparison (reference) group in our study. Groups 2 and 3, were matched to the

comparison group 1 in a 1:1 ratio based on age, sex and residential socioeconomic status.

Dependent variables

We evaluated four SARS-CoV-2-related outcomes, or second events: documented RT-PCR confirmed SARS-CoV-2 infection, COVID-19, COVID-19-related hospitalization and death. Outcomes were evaluated during the follow-up period of June 1 to August 14, 2021, the date of analysis, corresponding to the time in which the Delta variant became dominant in Israel.

Covariates

Individual-level data of the study population included patient demographics, namely age, sex, socioeconomic status (SES) and a coded geographical statistical area (GSA, assigned by Israel's National Bureau of Statistics, corresponds to neighborhoods and is the smallest geostatistical unit of the Israeli census). The SES is measured on a scale from 1 (lowest) to 10, and the index is based on several parameters, including household income, educational qualifications, household crowding and car ownership. Data were also collected on last documented body mass index (BMI) and information about chronic diseases from MHS' automated registries, including cardiovascular diseases¹⁹, hypertension²⁰, diabetes²¹, chronic kidney disease²², chronic obstructive pulmonary disease, immunocompromised conditions, and cancer from the National Cancer Registry²³.

Statistical analysis

Two multivariate logistic regression models were applied that evaluated the four aforementioned SARS-CoV-2-related outcomes as dependent variables, while the study groups were the main independent variables.

Model 1—previously infected vs. vaccinated individuals, with matching for time of first event

In model 1, we examined natural immunity and vaccine-induced immunity by comparing the likelihood of SARS-CoV-2-related outcomes between previously infected individuals who have never been vaccinated and fully vaccinated SARS-CoV-2-naïve individuals. These groups were matched in a 1:1 ratio by age, sex, GSA and time of first event. The first event (the preliminary exposure) was either the time of administration of the second dose of the vaccine *or* the time of documented infection with SARS-CoV-2 (a positive RT-PCR test result), both occurring between January 1, 2021 and February 28, 2021. Thereby, we matched the “immune activation” time of both groups, examining the long-term protection conferred when vaccination or infection occurred within the same time period. The three-month interval between the first event and the second event was implemented in order to capture reinfections (as opposed to prolonged viral shedding) by following the 90-day guideline of the CDC.

Model 2

In model 2, we compared the SARS-CoV-2 naïve vaccinees to unvaccinated previously infected individuals while intentionally *not* matching the time of the first event (i.e., either vaccination or infection), in order to compare vaccine-induced immunity to natural immunity, regardless of time of infection. Therefore, matching

was done in a 1:1 ratio based on age, sex and GSA alone. Similar to the model 1, either event (vaccination or infection) had to occur by February 28, to allow for the 90-day interval. The four SARS-CoV-2 study outcomes were the same for this model, evaluated during the same follow-up period.

Model 3

Model 3 examined previously infected individuals vs. previously-infected-and-once-vaccinated individuals, using “natural immunity” as the baseline group. We matched the groups in a 1:1 ratio based on age, sex and GSA. SARS-CoV-2 outcomes were the same, evaluated during the same follow-up period.

In all three models, we estimated natural immunity vs. vaccine-induced immunity for each SARS-CoV-2-related outcome, by applying logistic regression to calculate the odds ratio (OR) between the two groups in each model, with associated 95% confidence intervals (CIs). Results were then adjusted for underlying comorbidities, including obesity, cardiovascular diseases, diabetes, hypertension, chronic kidney disease, cancer and immunosuppression conditions.

Analyses were performed using Python version 3.73 with the stats model package.

$P \leq 0.05$ was considered statistically significant.

Ethics declaration

This study was approved by the MHS (Maccabi Healthcare Services) Institutional Review Board (IRB). Due to the retrospective design of the study, informed consent was waived by the IRB, and all identifying details of the participants were removed before computational analysis.

Data availability statement

According to the Israel Ministry of Health regulations, individual-level data cannot be shared openly. Specific requests for remote access to de-identified community-level data should be directed to KSM, Maccabi Healthcare Services Research and Innovation Center.

Code availability

Specific requests for remote access to the code used for data analysis should be referred to KSM, Maccabi Healthcare Services Research and Innovation Center.

Results

Overall, 673,676 MHS members 16 years and older were eligible for the study group of fully vaccinated SARS-CoV-2-naïve individuals; 62,883 were eligible for the study group of unvaccinated previously infected individuals and 42,099 individuals were eligible for the study group of previously infected and single-dose vaccinees.

Model 1 – previously infected vs. vaccinated individuals, with matching for time of first event

In model 1, we matched 16,215 persons in each group. Overall, demographic characteristics were similar between the groups, with some differences in their comorbidity profile (Table 1a).

During the follow-up period, 257 cases of SARS-CoV-2 infection were recorded, of which 238 occurred in the vaccinated group (breakthrough infections) and 19 in the previously infected group (reinfections). After adjusting for comorbidities, we found a statistically significant 13.06-fold (95% CI, 8.08 to 21.11) increased risk for breakthrough infection as opposed to reinfection ($P < 0.001$). Apart from age ≥ 60 years, there was no statistical evidence that any of the assessed comorbidities significantly affected the risk of an infection during the follow-up period (Table 2a).

As for symptomatic SARS-COV-2 infections during the follow-up period, 199 cases were recorded, 191 of which were in the vaccinated group and 8 in the previously infected group. Symptoms for all analyses were recorded in the central database within 5 days of the positive RT-PCR test for 90% of the patients, and included chiefly fever, cough, breathing difficulties, diarrhea, loss of taste or smell, myalgia, weakness, headache and sore throat. After adjusting for comorbidities, we found a 27.02-fold risk (95% CI, 12.7 to 57.5) for symptomatic breakthrough infection as

opposed to symptomatic reinfection ($P < 0.001$) (Table 2b). None of the covariates were significant, except for age ≥ 60 years.

Nine cases of COVID-19-related hospitalizations were recorded, 8 of which were in the vaccinated group and 1 in the previously infected group (Table S1). No COVID-19-related deaths were recorded in our cohorts.

Model 2 –previously infected vs. vaccinated individuals, without matching for time of first event

In model 2, we matched 46,035 persons in each of the groups (previously infected vs. vaccinated). Baseline characteristics of the groups are presented in Table 1a. Figure 1 demonstrates the timely distribution of the first infection in reinfected individuals.

When comparing the vaccinated individuals to those previously infected at any time (including during 2020), we found that throughout the follow-up period, 748 cases of SARS-CoV-2 infection were recorded, 640 of which were in the vaccinated group (breakthrough infections) and 108 in the previously infected group (reinfections).

After adjusting for comorbidities, a 5.96-fold increased risk (95% CI, 4.85 to 7.33) increased risk for breakthrough infection as opposed to reinfection could be observed ($P < 0.001$) (Table 3a). Apart from SES level and age ≥ 60 , that remained significant in this model as well, there was no statistical evidence that any of the comorbidities significantly affected the risk of an infection.

Overall, 552 symptomatic cases of SARS-CoV-2 were recorded, 484 in the vaccinated group and 68 in the previously infected group. There was a 7.13-fold (95% CI, 5.51 to 9.21) increased risk for symptomatic breakthrough infection than symptomatic reinfection (Table 3b). COVID-19 related hospitalizations occurred in 4 and 21 of the reinfection and breakthrough infection groups, respectively. Vaccinated

individuals had a 6.7-fold (95% CI, 1.99 to 22.56) increased to be admitted compared to recovered individuals. Being 60 years of age or older significantly increased the risk of COVID-19-related hospitalizations (Table S2). No COVID-19-related deaths were recorded.

Model 3 - previously infected vs. vaccinated and previously infected individuals

In model 3, we matched 14,029 persons. Baseline characteristics of the groups are presented in Table 1b. Examining previously infected individuals to those who were both previously infected and received a single dose of the vaccine, we found that the latter group had a significant 0.53-fold (95% CI, 0.3 to 0.92) (Table 4a) decreased risk for reinfection, as 20 had a positive RT-PCR test, compared to 37 in the previously infected and unvaccinated group. Symptomatic disease was present in 16 single dose vaccinees and in 23 of their unvaccinated counterparts. One COVID-19-related hospitalization occurred in the unvaccinated previously infected group. No COVID-19-related mortality was recorded.

We conducted a further sub-analysis, compelling the single-dose vaccine to be administered *after* the positive RT-PCR test. This subset represented 81% of the previously-infected-and-vaccinated study group. When performing this analysis, we found a similar, though not significant, trend of decreased risk of reinfection, with an OR of 0.68 (95% CI, 0.38 to 1.21, P -value=0.188).

Discussion

This is the largest real-world observational study comparing natural immunity, gained through previous SARS-CoV-2 infection, to vaccine-induced immunity, afforded by the BNT162b2 mRNA vaccine. Our large cohort, enabled by Israel's rapid rollout of the mass-vaccination campaign, allowed us to investigate the risk for additional infection – either a breakthrough infection in vaccinated individuals or reinfection in previously infected ones – over a longer period than thus far described.

Our analysis demonstrates that SARS-CoV-2-naïve vaccinees had a 13.06-fold increased risk for breakthrough infection with the Delta variant compared to those previously infected, when the first event (infection or vaccination) occurred during January and February of 2021. The increased risk was significant for a symptomatic disease as well.

Broadening the research question to examine the extent of the phenomenon, we allowed the infection to occur at any time between March 2020 to February 2021 (when different variants were dominant in Israel), compared to vaccination only in January and February 2021. Although the results could suggest waning natural immunity against the Delta variant, those vaccinated are still at a 5.96-fold increased risk for breakthrough infection and at a 7.13-fold increased risk for symptomatic disease compared to those previously infected. SARS-CoV-2-naïve vaccinees were also at a greater risk for COVID-19-related-hospitalization compared to those who were previously infected.

Individuals who were previously infected with SARS-CoV-2 seem to gain additional protection from a subsequent single-dose vaccine regimen. Though this finding corresponds to previous reports^{24,25}, we could not demonstrate significance in our cohort.

The advantageous protection afforded by natural immunity that this analysis demonstrates could be explained by the more extensive immune response to the SARS-CoV-2 proteins than that generated by the anti-spike protein immune activation conferred by the vaccine^{26,27}. However, as a correlate of protection is yet to be proven^{1,28}, including the role of B-Cell²⁹ and T-cell immunity^{30,31}, this remains a hypothesis.

Our study has several limitations. First, as the Delta variant was the dominant strain in Israel during the outcome period, the decreased long-term protection of the vaccine compared to that afforded by previous infection cannot be ascertained against other strains. Second, our analysis addressed protection afforded solely by the BioNTech/Pfizer mRNA BNT162b2 vaccine, and therefore does not address other vaccines or long-term protection following a third dose, of which the deployment is underway in Israel. Additionally, as this is an observational real-world study, where PCR screening was not performed by protocol, we might be underestimating asymptomatic infections, as these individuals often do not get tested.

Lastly, although we controlled for age, sex, and region of residence, our results might be affected by differences between the groups in terms of health behaviors (such as social distancing and mask wearing), a possible confounder that was not assessed. As individuals with chronic illness were primarily vaccinated between December and February, confounding by indication needs to be considered; however, adjusting for obesity, cardiovascular disease, diabetes, hypertension, chronic kidney disease, chronic obstructive pulmonary disease, cancer and immunosuppression had only a small impact on the estimate of effect as compared to the unadjusted OR. Therefore, residual confounding by unmeasured factors is unlikely.

This analysis demonstrated that natural immunity affords longer lasting and stronger protection against infection, symptomatic disease and hospitalization due to the Delta variant of SARS-CoV-2, compared to the BNT162b2 two-dose vaccine-induced immunity. Notably, individuals who were previously infected with SARS-CoV-2 and given a single dose of the BNT162b2 vaccine gained additional protection against the Delta variant. The long-term protection provided by a third dose, recently administered in Israel, is still unknown.

Subject: No to WAC to include Covid-19

External Email

Washington State Board of Health,
I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!
Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.
In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Sincerely,
Jennifer Nicholson

Subject: No to children's vaccine mandate

External Email

To whom it may concern:

As grandparents, we are extremely concerned about mandating COVID vaccines for children. Studies have shown that children have robust immunity. A Johns Hopkins study of 48,000 children who were infected with COVID showed an astonishing ZERO DEATHS among children with no pre-existing medical conditions!

(<http://stateofthenation.co/?p=75990>

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fstateofthenation.co%2F%3Fp%3D75990>

). COVID has extremely low danger for children. The vaccine, on the other hand, has close to one million adverse events recorded in the VAERS system. Many of these events are severe, even life-altering, including a large number of deaths.

According to J. Patrick Whelan, MD PhD:

"I am a pediatric specialist caring for children with the multisystem inflammatory syndrome (MIS-C). I am concerned about the possibility that the new vaccines aimed at creating immunity against the SARS-CoV-2 spike protein (including the mRNA vaccines of Moderna and Pfizer) have the potential to cause microvascular injury to the brain, heart, liver, and kidneys in a way that does not currently appear to be assessed in safety trials of these potential drugs."

After citing different studies, Whelan goes on to say, "Is it possible the spike protein itself causes the tissue damage associated with Covid-19? ...While there are pieces to this puzzle that have yet to be worked out, it appears that the viral spike protein that is the target of the major SARS-CoV-2 vaccines is also one of the key agents causing the damage to distant organs that may include the brain, heart, lung, and kidney. Before any of these vaccines are approved for widespread use in humans, it is important to assess in vaccinated subjects the effects of vaccination on the heart ... As important as it is to quickly arrest the spread of the virus by immunizing the population, it would be vastly worse if hundreds of millions of people were to suffer long-lasting or even permanent damage to their brain or heart microvasculature as a result of failing to appreciate in the short-term an unintended effect of full-length spike protein-based vaccines on these other organs.

"Particular caution will be required with regard to the potential widespread vaccination of children before there are any real data on the safety or effectiveness of these vaccines in pediatric trials that are only now beginning."

(<https://www.regulations.gov/document/FDA-2020-N-1898-0246>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.regulations.gov%2Fdocument%2Fdocument%2F1898-0246&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C10bdf5aaef1b483002a208d9d196e8a4%7C11d0e211-4540-4242-9000-000000000000>

)

Additionally, and VERY importantly, we would like to voice that any child's health is primarily the concern of their parents and their physician, and should not be directed by heavy-handed, one-size-fits-all draconian mandates from the government. Therefore, we believe that these experimental drugs, which are not officially approved for use (not even the Pfizer vaccine that we have available in the US) and are being distributed only under EUA, should not be forced upon anyone, least of all children!

Thank you for taking seriously our concerns,

Jeff and Linda Tatarsky

Subject: No Vaccine Mandates

External Email

Dear WA Department of Health,

I want to put on the record that we (my husband and I, and many friends) are opposed to any kind of vaccine mandate for children. (We're opposed to mandates for adults, also.)

Vaccines have been a great blessing to the world, and every vaccine also comes with risks for individuals. For many, they're safe. For a few, they can be destructive. This is why every person has the right to be fully informed and consenting to any vaccine, and parents especially have the right to make that decision for their children.

Children are at very low risk from the Covid virus. We don't yet know the risks (particularly long term) from the vaccines. It is wrong and harmful to mandate them.

Sincerely,
--

Subject: No to involuntary isolation and school vaccine mandates

External Email

To Whom it May Concern,

I adamantly oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. No one should be taken from their own home, when they can stay in their own home without impacting others. Parents should be able to care for their children, spouses able to care for each other, and people be allowed to sleep in their own bed! Providing a place for those who choose to go because they no other place to be... fine. By force.. absolutely not!!!

I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools. Again... Voluntarily choosing the vaccine... fine. Forcing children in order to go to school??? Absolutely not.

Please do not implement these unconstitutional mandates. This type of government is not what our country was founded on. This is taking away the freedoms that we were founded on and fought so hard to keep.

Thank you!
Kathy

Hello!

I'm writing to you to please stop forcing the mandates for the Covid virus shot. As a American we as a nation are going backwards with these mandates! As Abraham Lincoln said, That this nation, under God, shall have a new birth of FREEDOM - and that government of the people, for the people, shall not perish from the Earth. The people are standing up and saying we DO NOT WANT THE MANDATES ON OUR CHILDREN AND FOR US! Enough is enough, if a person wants to get the Covid shot, that's their CHOICE! But DON'T FORCE OR DISCRIMINATE a human for their God given personal choice for choosing not to get the Covid shot! Especially when they can lose their job!!! As a state you are discriminating many citizens and now there is segregation where many citizens can not go to places. If that doesn't show HATRED then you have no compassion. This is not the USA land of the FREE if you continue this nonsense. And now you the Board of Washington Health want to have ALL children take this Covid shot! You have no right to put your personal decision on other citizens children!! Shame on you.
Thank you for listening from a concerned Wa citizen, Gayle Morgan

Dear Washington State Board of Health,
As a parent and as a previous health care provider, I understand the importance of keeping our most vulnerable populations safe. I have worked hard at that for all my 30 years of parenting. As you may be aware though, Covid is not a danger to our children. The chance of death in this population is less than 0%. The vaccine, put for under Emergency Authorization and without full testing, IS an unknown to our children and their future. We have always been able to make health decisions for our children, even for the other "mandated" vaccines to enter school. Please do not come down on the side of taking away that decision from individuals. If you take away our health freedoms, what will be next?

Sincerely,
Moira Hahner

Please, do not consider requiring vaccines for school age children. Like all other decisions regarding their children parents should have the final say about what's best. It should be up to parents to choose.

As an educator, ministry leader and parent I whole heartedly disagree with enforcing mandates on citizens. I also believe that the masks and face covering requirements are doing more harm than good to school aged children and students and should be lifted immediately!

In service to my community,

Mrs. Laurice Warthan

Subject: No Vaccine Requirement for Kids

External Email

Our children are at virtually no risk from suffering serious effects of COVID-19 - less than half as serious as the common flu, and less than 1,000 times that of old adults. However, they do suffer the risk of myocarditis from the vaccine. There is no reason at all to require that they be vaccinated for it. Please do not require them to be vaccinated.

Thank you!

Subject: NO TO COVID 19 VACCINE MANDATE FOR OUR CHILDREN

External Email

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. It is not effective at stopping the student from spreading the disease. The Covid injection does not stop the child from transmitting the disease. It does not really protect the person medicated with mRNA concoction. It is not effective.
2. It is not effective at stopping contraction of the disease. The Covid injection does not stop the child from contracting the disease. It is not effective.
3. It is not approved for mandatory use in anyone by the FDA. The Covid injection is only Authorized for Emergency Use. You have no legal right to require the intake of this experimental drug. The alleged Covid medication/injection that was approved by the FDA is not even available in the United States, if anywhere. It is not legal to require submission to this medication.
4. The injection is demonstrably unsafe. There are no studies of the safety of this drug, long or short term. However, there are tens of thousands of adverse reactions and unexplained early injuries and deaths, in the VAERS database, due to heart and organ damage. When H1Ni vaccine had 59 adverse reaction, the vaccine was removed from the market. It is insane to push forward with this insistence by the current political administration on the Federal and State levels in light of the vast number of injuries and deaths proximate to the time of the infection. Many of the adverse reactions occur within the first two weeks. Therefore, CDC 'arbitrarily' decided that no adverse reactions occurring within two weeks of injection are 'deemed' by them to be unrelated to the injection. This is a ridiculous appeal to superstition and does not serve our children, or anyone else. It is not safe.
5. It is not necessary. Children have a recovery rate of better than 99.995. There are more child deaths per year from automobile accidents or pedestrians walking . If this recovery rate is too low to suit you, then we need to outlaw automobiles and walking, rather than adding this dangerous medical regimen to the child's risk load. It is unnecessary and unsafe.

Cordially,

Lisa Adolphson

I am a parent, grandparent and member of the community. I implore you to please stop the push to require Covid 19 vaccinations for ANY child in child care or school. Covid vaccines should NOT be a requirement for our children! Children are at an extremely low risk for Covid 19. The Covid vaccines have no long-term testing on adults and they have even less testing on children. Covid 19 vaccines are not stopping the virus as many with the vaccine are contracting and spreading Covid 19. The vaccine has not been tested enough to ensure its efficacy and safety in children. Requiring this vaccine does not protect our children!

The disease burden in this case does not meet your criteria. There is NOT a significant morbidity and/or mortality in at least some sub-set of the population. The survival rate is well over 90% and even the long term effects of Covid 19 do not represent a significant amount. Additionally, this vaccine is not meeting your criteria because it is not reducing the risk of person-to-person transmission.

As for the criteria of implementation, the vaccine is NOT acceptable to the medical community and the public. There is an extremely large amount of both the medical and the general public who do not accept this vaccine as safe.

Please protect our children by NOT requiring Covid 19 vaccinations to attend child care or school.

Thank you,

Kim Bentz

Dear Caitlin,

Please say NO to this terrible idea. Please add my name to the list of those pleading against this travesty. Please do NOT require Covid vaccines for children to attend school. Children are at extremely low risk for Covid. The risks hugely outweigh the benefits. Vaccines are STILL only authorized for EMERGENCY USE ONLY. They are not verified. We have absolutely NO long-term studies to demonstrate safety. Studies DO show that both vaccinated and unvaccinated can both transmit Covid. Therefore, the vaccine apparently does NOT stop the spread of the virus. There is a HUGE risk and no benefit. Please, consider the needs of the children. They do NOT need the vaccine! Please vote NO! No Covid shots for children!!!

Respectfully,

Alex

Subject: NO to Vaccine Mandates in Washington Public Schools

External Email

Dear members of the Washington State Board of Health,

It has come to our attention that the BoH is discussing the possibility of vaccine mandates for Washington State Public Schools. As parents of two young children in the Peninsula School District, we are steadfastly against this.

My wife and I both received the Covid-19 vaccine due to employer requirements. It was essentially not our choice – get vaccinated or lose a career. This requirement came despite working for over a year and a half in the covid environment with no ill effects. Despite the overwhelming evidence that the Covid-19 vaccines will do little to stop the spread of the virus in public and private settings. We have multiple family members who have contracted Covid despite being fully vaccinated and boosted.

Now you want to foist this requirement onto our young children, despite the complete lack of knowledge of the long term impact of these vaccines? You want to hold our childrens' education hostage to this same requirement?

For any of you to say that our children are at serious risk from this virus goes against all known evidence, which says otherwise.

In 2018, there were 186 pediatric deaths from the influenza virus(es) in the US. A recent high point of pediatric influenza deaths was the 2009 flu season, in which 358 pediatric deaths were recorded. (Source: <https://www.cdc.gov/flu/about/season/flu-season-2017-2018.htm>)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fflu%2Fabout%2Fseason-2017-2018.htm&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C51cddc65d29a4018a2bd08d9d1fdbfd8%7C11d>

)

Compare that to the total number of pediatric deaths from Covid-19, of which 578 deaths in the age range of 5-18 have occurred as of 1/6/2022. (Source: <https://data.cdc.gov/NCHS/Provisional-COVID-19-Deaths-Focus-on-Ages-0-18-Yea/nr4s-juj3>)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdata.cdc.gov%2FNCHS%2FProvisiCOVID-19-Deaths-Focus-on-Ages-0-18-Yea%2Fnr4s-juj3&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C51cddc65d29a4018a2bd08d9d1fdbfd8%7C11d0e217>
)

Is the number higher than the total number of influenza deaths in 2018? Yes.. However is it sufficient cause to mandate the Covid-19 vaccine for all students in Washington Public Schools, especially given the lack of long term data regarding the possible side effects of the vaccines in children – especially the possibility of myocarditis cases in young males? Is it sufficient to warrant what is being deemed an emergency response in lieu of the Omicron variant, which is very explicitly less deadly than the initial variants of Covid, despite being more readily transmissible?

You stand the chance of shutting out public education to millions of families in Washington who will refuse to administer the Covid-19 vaccine to their children, for a virus that is marginally more deadly to children than the seasonal flu.

We have dealt with masking, social distancing, remote learning, and our children have already been asked to do too much. My wife and I, who frequently enjoyed volunteering in our children's school, have been shut out of such activities. Our children have remained remarkably resilient and upbeat, but frankly we are tired of our children being constantly cajoled into a state of perpetual fear of this virus. This is the last straw for us. If vaccine mandates enter our public schools, we will either be removing our children from Washington Public Schools until a time when sanity in leadership has returned, or we will simply leave Washington – a state that both of our families have made a home in for generations - and take our ample tax dollars with us to a state where these requirements will not ever be in place.

At this point, Covid-19 is beyond your control. It is time that we come to terms with this and begin moving back to normalcy, not enacting more emergency mandates and requirements in an attempt to curb a virus that, frankly, is here to stay forever.

Thank you for your time,

Jeff and Jessica Wyman

Subject: NO to Covid 19 vaccine for schools

External Email

Let me start off by saying that we will be pulling our children from public school if the covid-19 vaccine becomes a requirement. Getting the covid 19 vaccine should be a choice made by each individual family depending upon their health and beliefs just like the flu vaccination.

The death rate for Children under 18 who are infected with covid19 is less than 0.01 percent. This is straight from the CDC website. There have been a total of 694 child deaths "involving" covid 19, in the last TWO years in America. This is less than car accidents per one year.

The side effects from the covid-19 vaccine that we are seeing in children and adults is alarming. The biggest concern that we are seeing in children is Myocarditis, (inflammation of the heart muscle) and pericarditis . This should be scary enough to make everyone rethink the decision of giving their children the covid vaccine especially when the death rate for covid is less than 0.01 percent. Covid 19 vaccines are different from any other vaccine that we have ever used. We do not know anything about what the long term effects of the vaccine are yet. Other vaccines took 10 to 20 years of studies before they are even considered to be approved and here we are being asked to give this vaccine to our children.

There are stories after stories of children and adults having side effects and death due to the covid vaccine. Many people that I know become very ill for weeks after getting the vaccine and continue to have side effects from getting the vaccine.

The risk of the covid-19 vaccine is so much greater than actually getting covid for children. There is only risk and zero benefit. There isn't even the benefit of not getting covid. Everyone I know that currently has covid has been vaccinated, some even with a booster. Again there is only risk and no benefit to our children.

Thank you,
Nicole Cecotti

The vaccines are more dangerous to children than the virus. The people do not want any more restrictions or infringements on our freedom and personal choices and will not take it any more. The "science" is against the safety and effectiveness of C19 vaccination on kids. More adverse effects and death from the vaccine than from Covid.

You will see an exodus from the public school system if these proposed requirements are enforced.

Subject: No to Mandatory Vaccines for Children

External Email

Dear Washington State Board of Health:

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Kristina Gervais RN BSN

I am writing to oppose the notion of mandating the Covid vaccine as one of the school entry requirements in the state of Washington.

Data has shown the impact of covid hospital and death toll on children under 16 years is close to 0%, Furthermore, we don't know the long term side effects can inflict by covid vaccine while the short term effects have crippled many including myocarditis among youth Many studies indicated Covid vaccine is not safe to inoculate children at a massive scale, it is still an experimental remedy that is only needed by a very few with compromised immune systems or existing medical conditions.

It is not sensible nor ethical to even consider making the Covid vaccine a requirement to enter school.

Please, do not consider requiring vaccines for school age children. Like all other decisions regarding their children parents should have the final say about what's best. It should be up to parents to choose.

As an educator, ministry leader and parent I whole heartedly disagree with enforcing mandates on citizens. I also believe that the masks and face covering requirements are doing more harm than good to school aged children and students and should be lifted immediately!

In service to my community,

Mrs. Laurice Warthan

To the Department of Health:

I vehemently oppose mandatory COVID vaccination as a requirement for school children. Given the infinitesimal risk of the disease for children and the vaccine's inability to prevent infection or transmission, requiring the injection is an unnecessary burden for students and an ineffective means for quelling the spread of the disease.

The school system - funded by parental taxpayers - serves at the behest of parents, not the other way around. The school system must serve and honor parental autonomy above all. It is the parents' responsibility to make health decisions for the children. This responsibility does not lie with school boards, teachers, or any other governing body, including the Governor and the Department of Health. The decision to vaccinate should remain between parents and their doctors.

DO NOT add the COVID vaccine to the current list of WAC 246-105. If the mandate does take effect, large numbers of parents will simply remove their children from the public school system.

Subject: No Vaccine Mandates for K-12

External Email

Dear Board of Health,

As a parent of a 5th grader, I am writing to voice my concerns over the talks of mandating children to get vaccinated to attend school. This would be a huge mistake and I'm confident would do more harm than good. PLEASE, do not consider mandating children to get vaccinated to attend public schools.

Statistically this virus poses no real threat to children. This would be like forcing healthy people or people who don't suffer from diabetes to take insulin.

We do NOT know the long term side effects from this vaccine yet and there are viable treatment options now days which do not justify a mandate of this magnitude. What we do know is the reported adverse events from the Covid vaccine are far more serious and deadly than the virus itself in regards to children. Also, what we do know is the vaccine does not prevent someone from getting or spreading Covid, the current vaccine is not even effective on the latest strain omicron. We don't even have real data yet that supports the vaccine lessens the symptoms. Why are we even considering this mandate?

If you enforce this mandate you will lose hundreds of thousands of currently enrolled children in the Washington state public school districts and you will lose even more faithful Washingtonians pursuing medical freedom. STOP THE MANDATE PLEASE!!!

Sincerely,

Jon Williams

External Email

To whom it may concern:

I am writing to ask that the state board of health REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. Vaccines DO NOT prevent, nor stop the spread of COVID-19
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19
4. The COVID-19 vaccine is new. Many parents do not feel comfortable giving this to children without years of testing, studies and long term effects being known.

I personally will remove ALL my children from Washington state public schools before I will comply to a COVID-19 vaccine mandate for my children.

Subject: NO to mandatory vaccines!

External Email

To Whom It May Concern:

My name is Kati Haviland and I have a 6 year old daughter. I am writing because I do NOT support making vaccines mandatory for school admission, specifically the COVID-19 vaccine. Let me be very clear that I am not against vaccines. What I am against is forcing people to do something against their will. The COVID vaccine is in emergency use, therefore we do not know the long term effects it will have on anyone. It also does not stop people from getting COVID and there's no guarantee it will make symptoms better. There is so much talk about "follow the science." From the science I have seen, this virus is very survivable, kids in particular. There has been NOTHING to educate people on how to take care of their bodies. Why is there no focus on taking care of mental health, eating healthy foods, exercising, taking the correct vitamins and supplements, etc?? Why is there so much focus and fear on this one virus? COVID does not kill everyone! There are many other viruses and diseases out there that can be deadly to some but not all people such as the flu, cancer, and pneumonia. The fear has to stop!!! This virus is not going away and we have to learn to live with it.

My daughter was ripped out of her pre-k class in March 2020 because of the shutdowns. She then spent her entire kindergarten year doing online school. Do you know how difficult that is for any child? The first part of this school year, we tried homeschooling but it was not good for her. She is now back to in-person school in 1st grade and she is THRIVING. If you make this vaccine mandatory, you will be responsible for a huge exodus of children from the public school system and you will be responsible for the negative effects this has on them. I am asking you to have some empathy and PLEASE do NOT do this to these kids. They have been through enough!

☐ Dear Board member,

☐

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Rubin, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit

analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>
)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Kim Pham

The risks to children (and possibly adults up to a certain age) far outweigh the benefits from what little data Pfizer has provided in their studies.

The ARR vs RRR is under 1%, If you don't already know what ARR you can ask an epidemiologist in the state or any medical researcher to review, but it is the absolute risk reduction vs the relative risk reduction. The Pfizer vaccines, were touted with the ARR, which is not real world data, (and in fact the efficacy has waned to under 50%) and knowing that taking this biologic only reduces your outcome by 1% when the adverse effects statistically outweigh for any healthy child and most likely adult would be inadvisable by any common sense strategy to recommend into a state much less school requirement.

You know that under 2,000 children were enrolled in these trials ? And that the clinical trials are ongoing through 2023. Not only do we not know the mid or long term risks to anyone, much less children, but the evidence is a preponderance of high risks in the little that has been released from Pfizer.

This chart attached is from the VAERS reporting system in September 2021. VAERS was set up as an early warning system to signal to the medical community of medical adverse risks and death. The injuries and death reported to VAERS is astronomical and if this were any other medicine would have been pulled from the shelves as the swine flu vaccine was for under 50 deaths. This data is underreported by over 10x, in a study by Harvard Pilgrim Healthcare. Ignoring this data and the many scientific journal and even claims data more recently by Kaiser Permanente Northwest is not only concerning its downright criminal.

These are our kids and no experimental medication or vaccine should be recommended or added to a state requirement when it doesn't meet the minimum efficacy for such a requirement and would do untold harm without serious review of the safety data that is presenting extensive medical damage not only for adults but for children.

Dear SBOH,

Please do not force people who would be more harmed than helped to get vaccinations that do not even affect their age group. Having children get immunized for a disease that has virtually 0% death rate for but the vaccination has an increased chance of causing myocarditis and other terrible side effects (www.CanadianCovidCareAlliance.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.canadiancovidcarealliance.org>>) is irresponsible at best, and criminal at worst on your part if you pass this as a mandate.

This applies to all people who are immune to covid from having contracted the disease and are now immune to it. The risks of the vaccine far outweigh any public good that the vaccine has shown to do. Please do not add covid to the list of communicable diseases that warrant such extreme measures.

Please stand behind and protect parents rights to choose what is best for their children. Please respect freedom of choice. Please respect bodily autonomy and informed consent by saying NO to mandating the Covid vaccine for our children.

Thank you for your time,

Nicole K

Subject: No to Mandatory Covid-19 Vaccines for School Children

External Email

To whom it may concern,
I am a concerned citizen of Washington state as well as a mother to two young children. It has come to my attention that the Washington State Board of Health is considering making Covid-19 vaccines mandatory for daycare and school children in Washington. This is a very bad idea for many different reasons.

Children are not at high risk from dying of Covid-19. Covid-19 is different from other diseases that affect children such as pertussis, measles, mumps, rubella, polio, etc. Those diseases are very dangerous for children, whereas Covid-19 has an extremely low mortality rate for children. Far more children die from the flu or pneumonia than from Covid-19. In addition, the vaccines mentioned above have been in use for decades so there are decades of research and outcomes for parents to make informed decisions, which is not the case for the new Covid-19 vaccines.

In addition, there are serious concerns about the long-term effects of the current Covid-19 vaccines. We simply do not know what the long-term outcomes of these vaccinations will be, especially in regard to myocarditis in young men and fertility in young women.

I support parents' rights to weigh the risks and benefits of the Covid-19 vaccines for their own children in consultation with their pediatricians. The state should not force or coerce children to receive these new vaccines.

Kind regards,

Margaret Weeks

Hello,

I am writing to strongly demand that WA State NOT impose mandatory covid-19 vaccinations for school aged children. I'm actually baffled that I even have to write you this email, and that this topic is even on the agenda for your next meeting. The ignorance of such a proposal is actually jarring.

- 1) A mandate is not the law. To force people to comply with a mandate is criminal.
- 2) The vaccines are STILL (all of them) experimental drugs under emergency order. You cannot mandate this for schools or detain persons or families involuntarily who do not wish to comply. This is illegal and unethical.
- 3) Mass-vaccinating children for covid-19 is not a clinical necessity, as the real science has clearly shown! More injuries and adverse reactions (even just the small percentage of reported ones in the VAERS system) come from the vaccine than covid itself. The miniscule number of reported children who struggled with covid had other comorbidities that affected their outcome.
- 4) There is currently a 99.9% survival rate of covid-19 infections in the United States and the survival rate is even higher for school-aged children, who RARELY have problems, or even symptoms, of this infection. To mandate vaccinations on a populace with a greater than 99.9% survival rate shows a complete lack of common sense and critical thinking prowess.
- 5) If the goal of mass-vaccination of children is to reduce transmission to others, I strongly urge this "Board of Health" to look at the data and observe how an alarming

amount of current covid infections are in fully vaccinated individuals, who, believing they were protected, got infected and have been spreading it to others. This Board should be focused on THAT alarming trend, not on mass-vaccination of children who don't need it.

I look forward to the January 12th meeting!

Warmly,

JDW

Dear Board Member,

I am sure you have had a lot of comments going both ways on view and opinions of what is best for the situation at hand. Never in the history has a vaccine been pushed like this and for what reason to curb the fear of others? We CAN NOT allow this emotion to cloud what is right to each of us and our choice to what we put in our bodies. We have been given that right to have the option to choose what is best for our own bodies and for what is best for our children. The depression, the drugs, the bullying in our children's schools are way more critical to address than a coerced vaccine that is not wanted. We have already survived and while many have not, they had underlining conditions. A healthy person does not need to take medicines and as already proven there is no way to isolate sickness that will obviously remain present. I choose to trust in natural immunity which is still a real proven science and allow each parent to choose what route works best for them.

I AM OPPOSED TO FORCED VACCINES

I Pray to the Lord daily for His Protection, guidance, Love and Justice in this situation.

I thank you for taking the time to read this letter.

I am strongly urging you to vote NO for vaccine mandates for our children and schools. Please resist the public hysteria and Big Pharma lobbying machines, look at the science and data for kids, and ask yourself why would we force such a thing on our precious children? FACT - zero kids 5-11 in the Pfizer clinical trial, either vaccinated or in the control group, had severe Covid symptoms. Zero. FACT - per the CDC data, less than 1/10th of 1 percent (<0.10%) of people hospitalized with (not because of) COVID were kids 0-17, and even fewer died. FACT - vaccinated people can spread the disease - look at what's happening now. FACT - we don't know the long-term side effects of this vaccine; it's just too early. FACT - the drug companies cannot be sued for any deaths or adverse reactions to their products; ask yourself why? Given all of this, how could you even consider mandating a vaccine on our children? Let the parents and their doctors decide!!!!

Also, consider also that the least vaccinated portion of our population are minorities. What message will this send if you vote yes?

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

I support the petition for rulemaking (item 11 on the Jan 12 agenda). I support establishing a new rule that prohibits adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Honorable board,

I stand against these proposed WAC's: WAC 246-100-070,
WAC 246-100-045, WAC 246-100-040, WAC 246-100,
WAC 246-105.

Do not mandate Covid vaccinations and involuntary detainment for children and citizens of any age in this USA.

Medical professionals in the field of vaccinations who do not have a financial stake in it are voicing medical concerns caused by the Covid-19 vaccine.

A) proven side effects known to date:

1. Reproductive problems
2. Alterations in menstruation
3. Birth defects and miscarriages
4. Premature menopause starting as early as 36 years old
5. Those who are post menopausal now starting to menstruate again
6. Lipid molecules thought to stay in the arm location are now known to be penetrating every cell in the body; bone marrow and ovaries to name two.

So, this 'one-sided push to mandate this vaccination is dangerous to The good people of our state let alone worldwide.

Also, it is destroying the professional field of medicine and science disciplines.

True science welcomes all findings, all studies and takes time to evaluate. This is not happening in regards to COVID-19.

NO VACCINATION MANDATES FOR CHILDREN OR CITIZENS OF ANY AGE.

Please! NO VACCINATION MANDATES FOR CHILDREN OR CITIZENS OF ANY AGE.

Thank you,

Theresia McClimans

Subject: No to vaccine mandate for children

External Email

I am writing to ask you to allow parents the freedom to make medical decisions for their children with regards to the covid vaccine. Research has shown that the number of children dying from covid is extremely small. More children have drowned over these past two years than died of covid. We have not prohibited all water related activities for children even though there is some risk. Yet for a disease that barely affects children, we have dramatically impacted their lives.

Now that all people 12 and older have the opportunity to be vaccinated, the burden of this disease should not rest on the shoulders of children. If parents want their children vaccinated, they should be allowed to. If parents do not want their children vaccinated, that should also be their choice.

Forcing vaccination for covid on children would be a great overreach of government. It can't even be rationalized since the evidence is clear that being vaccinated does not prevent one from spreading the disease, so we can't blame the unvaccinated for the continuation of this pandemic. Children should not be forced to get a vaccine for a disease that has so little impact on children in order to have access to education.

Thank you for considering the rights of parents to make decisions about their children's health.

Dear State Board Member,

Please, Please, DO NOT recommend mandatory vaccinations for our children. Children are NOT at risk and there has been NO long term studies. More children have died and been injured from this vaccine than from the virus. This would truly be a crime to experiment on our children and blackmail our parents who would not choose this for their children, but would feel compelled because of not having education for their children.

This is the WRONG thing to do. Please, I beg you to protect our children and NOT recommend mandatory vaccination.

Respectfully,
Maureen Dunaway

Subject: No Vaccine Mandate for Children

External Email

To Whom it May Concern:

I am a lawyer and journalist with an undergraduate degree in environmental science and political science from Columbia University. I also am a published author of children's biology reference books. I also am a mother of a school-aged child in the public school system. I am writing to urge you to NOT mandate vaccines for children for school entry. Children are at practically no risk for hospitalizations and/or deaths from Covid. Almost all the children who have experienced hospitalization and/or death from Covid are children with severe co-morbidities. Amongst those co-morbidities, include a majority of children with obesity.

The WSBOH would better serve the health and safety of the children and workers in our schools by implementing stricter standards for preventing and addressing obesity in children through better diet and more opportunities for mandatory exercise. Such an approach would get to the root of the Covid problem in schools much more efficiently than forcing the majority of the students who are in good health and have good immunity to undergo a VERY RISKY MEDICAL PROCEDURE for which the long term effects have yet to be ascertained.

Furthermore, it is possible the WSBOH is not aware of the possible risks from this vaccine because the pharmaceutical companies sponsor all the mainstream news outlets and as a result, the WSBOH may be heavily relying on paid advertisements for their information on the necessity or efficacy of the Covid vaccine. These same entities that are sponsoring and controlling the dissemination of information are actively suppressing opportunities to hear about negative reactions from the vaccines in order to secure their financial interests.

The decision of whether to vaccinate a child should be left up to each parent and their chosen doctors. Parents should not be forced to choose between their children's education and a vaccine that may negatively and permanently impact their children's health.

Thank you for your consideration of my deep concerns on this matter.

Sincerely,

Judith Yablonski

Subject: NO to mandatory covid vaccines for children

External Email

Please do not mandate covid vaccines for children who statistically have a higher chance of having an adverse reaction to the vaccine than they do the disease. These shots are under EUA and absolutely should not be mandated on anyone let alone an innocent child. The best thing that could happen to a child is to mount natural immunity in childhood. There are no long term studies on these shots and most of the trial information is hidden from the public. Let parents make an informed decision for their own children.

Subject: NO Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

I support the petition for rulemaking (item 11 on the Jan 12 agenda). I support establishing a new rule that prohibits adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are the proposing this plan should be charged with treason.

Sincerely,

Jana Taft

Subject: NO TO FORCED VACCINES ON SCHOOL CHILDREN

External Email

Dear Board Member,

I am sure you have had a lot of comments going both ways on view and opinions of what is best for the situation at hand. Never in the history has a vaccine been pushed like this and for what reason to curb the fear of others? We CAN NOT allow this emotion to cloud what is right to each of us and our choice to what we put in our bodies. We have been given that right to have the option to choose what is best for our own bodies and for what is best for our children. The depression, the drugs, the bullying in our children's schools are way more critical to address than a coerced vaccine that is not wanted. We have already survived and while many have not, they had underlining conditions. A healthy person does not need to take medicines and as already proven there is no way to isolate sickness that will obviously remain present. I choose to trust in natural immunity which is still a real proven science and allow each parent to choose what route works best for them.

I AM OPPOSED TO FORCED VACCINES

I Pray to the Lord daily for His Protection, guidance, Love and Justice in this situation.

I thank you for taking the time to read this letter.

Subject: NO to COVID Vaccination Requirements

External Email

To WA State Board of Health,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

WAC 246-105-030 currently identifies a list of 11 "vaccine-preventable diseases" required before attending school or child-care facilities. The COVID-19 vaccines are not "preventing" the acquisition or transmission of the virus, and are simply considered to lessen the impact of the virus on the individual. Children are statistically at almost zero risk of dying from COVID – given the lack of long-term studies of the vaccine, questionable safety and long-term effects, it's apparent waning effectiveness over a short time frame, why would we want to subject our children to be test subjects? If the answer were clear, I may be in more support but given the risks I see on both sides, I don't see that the risks of the vaccine are worth the "benefit", not even close.

I object to the vaccine for multiple reasons and given my own/close experience with adverse effects following the vaccination, I WILL NOT subject my own children to it.

I will also support the petition by Informed Choice of WA to prohibit requiring an EUA or other such approved product that has not thoroughly and adequately completed Phase 3 trials.

I urge you to take a hard look at ALL of the information in front of us and make a decision that is best for our children and a healthy future. Perhaps their god-given immune systems, supported by a healthy lifestyle actually work??

Sincerely,

Katie Jones

Hello,

I am writing to strongly demand that WA State NOT impose mandatory covid-19 vaccinations for school aged children. I'm actually baffled that I even have to write you this email, and that this topic is even on the agenda for your next meeting. The ignorance of such a proposal is actually jarring.

- 1) A mandate is not the law. To force people to comply with a mandate is criminal.
- 2) The vaccines are STILL (all of them) experimental drugs under emergency order. You cannot mandate this for schools or detain persons or families involuntarily who do not wish to comply. This is illegal and unethical.
- 3) Mass-vaccinating children for covid-19 is not a clinical necessity, as the real science has clearly shown! More injuries and adverse reactions (even just the small percentage of reported ones in the VAERS system) come from the vaccine than covid itself. The miniscule number of reported children who struggled with covid had other comorbidities that affected their outcome.
- 4) There is currently a 99.9% survival rate of covid-19 infections in the United States and the survival rate is even higher for school-aged children, who RARELY have problems, or even symptoms, of this infection. To mandate vaccinations on a populace with a greater than 99.9% survival rate shows a complete lack of common sense and critical thinking prowess.
- 5) If the goal of mass-vaccination of children is to reduce transmission to others, I strongly urge this "Board of Health" to look at the data and observe how an alarming

amount of current covid infections are in fully vaccinated individuals, who, believing they were protected, got infected and have been spreading it to others. This Board should be focused on THAT alarming trend, not on mass-vaccination of children who don't need it.

I look forward to the January 12th meeting!

Warmly,

JDW

External Email

To whom it may concern,

I am writing as a concerned parent about the possibility of COVID vaccine mandates for school attendance. Data has consistently shown children to be at low risk for severe disease from COVID. Adults can choose to be vaccinated to protect themselves from severe disease. Current virus strains are showing to evade vaccines. And given there is no long term data on the efficacy or side effects of these vaccines in children, one has the right to weigh risks to benefits and decide what right for their childrens health. Using the comparison of currently required vaccines is not appropriate with this EUA vaccine. Again, there is no long term data or listed potential side effects.

I also would like you to think about this. Are you prepared to compensate parents of children that are vaccine injured should that prove to be the case? And is the district able to handle budget cuts should there be a reduction in student enrollment.

As a parent I don't feel comfortable giving this vaccine to my young sons and will pull them from public school if this mandate is implemented.

Thank you for your consideration

Subject: No to the Proposed Covid Policies

External Email

Good morning,

I wanted to share my thoughts on the proposed Covid policies. I am completely against them all as they are over reaching and immoral: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105. This would completely go against the Nuremberg Code.

Plus, when it comes to Covid treatments, many are oblivious when it comes to science-based (not fake science, but actual peer-reviewed clinical trials), safe alternate solutions for not only preventing Covid, but reducing viral load and sick time: reducing obesity, insulin resistance, supplements, diet. PubMed

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fpubmed.ncbi.nlm.nih.gov%2F&da>>
is a great resource.

Subject: No Vaccine

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>)

Subject: NO Vaccine Mandate for Children

External Email

Dear Washington State Board of Health members,

I am writing you today to express my opposition and concerns regarding potential vaccine mandates for school children.

I plead to your sense of morality and justness and ask you to oppose any and all vaccine requirements for school children in Washington state, particularly the Covid vaccine(s) which are still under Emergency Use Authorization (EUA) and have not been adequately researched, tested and truly proven safe for use. It would be a travesty to force WA state children to receive these vaccines in order to attend school.

DO NOT MAKE COVID VACCINES MANDATORY FOR WASHINGTON STATE CHILDREN !!!

Sincerely
Elizabeth Molitor

Subject: No Vaccine Mandate

External Email

Hi All,

Thank you for taking the time to read this...I will keep it short and to the point.

I would ask that you NOT mandate the vaccine for school age children.

2 points to consider:

1. The fact is, there is little data on the long term effects the vaccine will have on our childrens bodies/health.
2. Respecting personal choice when it comes to our bodies, is crucial. This is a slippery slope.

Thank you for your time.

Sincerely,
Nikki Anderson

I am writing to oppose the notion of mandating the Covid vaccine as one of the school entry requirements in the state of Washington.

Data has shown the impact of covid hospital and death toll on children under 16 years is close to 0%, Furthermore, we don't know the long term side effects can inflict by covid vaccine while the short term effects have crippled many including myocarditis among youth Many studies indicated Covid vaccine is not safe to inoculate children at a massive scale, it is still an experimental remedy that is only needed by a very few with compromised immune systems or existing medical conditions.
It is not sensible nor ethical to even consider making the Covid vaccine a requirement to enter school.

Sincerely, Lily

Hi Board Members!

The proposed rule giving DOH powers to involuntarily quarantine or inject US citizens is in violation of federal law.

Under Title 21 CFR (Code of Federal Regulations) Section 50.23 & 50.24 It is illegal to exercise coercion when administering experimental medical treatments. Coercing any US citizen to receive medical treatment against their will constitutes an act of domestic terrorism, which is a felony. Any attempted enforcement of such an unlawful rule would expose anyone enforcing it to charges of domestic terrorism. Since the proposed rule will be UNLAWFUL by definition and will also violate WA State Constitution, Article 1 Section 7 - right to privacy - there is only one option. Abolish consideration of such a rule or face criminal charges (Domestic Terrorism and/or Conspiracy to commit Domestic Terrorism).

Here is David Martin's video that has the information

https://www.instagram.com/p/CYVSfl2KkSF/?fbclid=IwAR1Ivec598G-DDf93zt2kyHcglJXj2aj8zR314TaGev6uEinsK76M_XV8OM
<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.instagram.com%2Fp%2FCYVSfl2KkSF/?fbclid=IwAR1Ivec598G-DDf93zt2kyHcglJXj2aj8zR314TaGev6uEinsK76M_XV8OM&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C>

You must not do this! Risk vs benefit on this Vaccine that is really an experimental procedure is not there.

Nuremburg 2.0 will happen and anyone harming our kids and families will be held accountable by a legal trial. This is constructive notice.

I know of a 5 year that just died right after the shot! No, no,no!!

Thank you,

NO!

Absolutely NO!

This is not a tried and true vaccine. Children with a normal immune system do very well getting through Covid19.

This is an overreach and SHOULD NOT BE INSTITUTED!

PLEASE do not include this in the list of required vaccines. It is still under EUA (Biotechnology is not the approved vax) and needs to be proven safe long term, not to mention that it isn't as effective as we were led to believe.

My children all received ALL required vaccines, as have their children. This one should be at the discretion of the adults in charge. (I am not Anti-Vaccine... just anti this experimental jab.)

Subject: Jan 12- 3:00pm Board of Health Mandatory Vaccines for children and forced quarantine
To: wsboh@sboh.wa.gov <mailto:wsboh@sboh.wa.gov> <wsboh@sboh.wa.gov
<mailto:wsboh@sboh.wa.gov> >

My comments as requested:

Dear Board of Health,

My comments regarding:

WAC 246-100-070)

WAC 246-100-045

WAC 246-100-040

WAC 246-100

WAC 246-105

I am adamantly against forced/mandatory vaccines. The government has NO business and NO right to mandate an injection into any person. It is a parental responsibility and right to care for our own children and ourselves. As you can easily find information on; children are extremely low risk for Covid, (way less than 1% mortality) so low, which I'm sure you all know. And the vaccines are still in the experimental stage-EUA (Emergency use authorization). I will not give my GOD given Freedoms – Liberties! over to bureaucrats or the state.

I also adamantly oppose involuntarily detainment of a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) This is unconstitutional and therefore illegal. These are our bodies and our choice. The state cannot illegally kidnap people for detainment based on illegal mandates.

Hundreds of medical staff are testifying that hospitals are near empty - evidence that there is no emergency. The PCR test already proved itself as not accurate, not effective in counting Covid cases and deaths. Covid has been shown, with the right early treatment, to have a recovery rate of 100%. And Omnicron although contagious barely lasts a day. Herd immunity has and is happening.

You may not have heard about the incredible success in Uttar Kadesh, India w/a population of 241 million people! They started all 241 million people on preventative anti-viral therapies and their case rate was minuscule and so were their deaths!

Please! Each one of you! Do your own research! Search for the truth and make ethical decisions, sound / logical discussions and listen to the PEOPLE Of Washington State.

I say NO to mandatory vaccines and NO to illegal detainment (kidnapping).

Thank you for your attention to this.

Very Sincerely,

Kim Wolcott.

I'm writing this in hopes it reaches someone that will stand with us and saying no, absolutely not mandatory covid vaccine for my child. No one should tell me what my child needs eye we'll decide that. Yes I have vaccinated my child care with all the other required vaccinations because I believe that they have been tested they have been needed and those diseases to me we're a lot more life-threatening and scary. At this time I do not feel that there is a need for mandatory covid vaccination. I will homeschool my child if this is what it comes down to. Thank you for listening

I absolutely do not stand for the vaccine mandate nor do I stand for any form of force against Americans that choose not to be vaccinated due to religious beliefs or medical reasons. Forcing unvaccinated Americans into quarantine holding facilities is not only unconstitutional but absolutely disturbing and disgusting. The majority of people now testing positive for COVID are those that have been vaccinated. I am 100% opposed of quarantine facilities for unvaccinated. It is an absolute violation and should never happen anywhere in the United States.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Rubin, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. The fact that you as individuals would even consider such a heinous, evil and morally bankrupt approach is beyond a lack of moral character,

it borders on a level of evil that is unprecedented.

This goes beyond any political decision, it is a decision point for you all as individuals that will follow you for the rest of your lives.

In conclusion, (all of this data is well researched and available – and you all know this):

- The data is empirically proven that these vaccines do NOT prevent anyone from getting or transmitting covid to others.
- The data is empirically proven that these vaccines do NOT create ANY safety for anyone else, beyond the undetermined and temporary reduction of individual symptoms.
- The data is empirically proven that children have an almost zero statistical risk of covid symptoms.
- The data is empirically proven that children do not have high transmission rates to pass on covid to adults, in fact the transmission rates are far lower than the flu.
- There is ZERO long term testing on the impacts of these vaccines on children. By definition, we have no longitudinal studies on side effects or long term health impacts.

In addition, what we see across the world, are that those places with lockdowns and vaccines mandates show no measurable difference in covid rates at all.

So, what we have are three factors:

1. The vaccines do not prevent transmission.
2. The vaccines have no long term testing for side effects and health impacts.
3. Children have almost no risk from covid in any rate.

Our role as adults and parents is to protect our children. They are not to be used as political pawns in misguided and ill conceived political stances.

Forcing these shots will put you in direct violation of the Nuremberg Code which is still in

effect. As you know, that code was created to prevent things like experimental drugs and treatments from being forced onto people. These shots are still experimental. They also do not keep people from getting the new variant (which has basically the same symptoms as a cold). I know a handful of friends all over the country who have all their shots and booster and currently have the virus. I had the virus, and my kids, in the very early days of the virus before it was considered a pandemic. It took about a month to not feel super tired and some things still taste weird but I haven't gotten anything since. Washington was one of the first states to have the virus in the US. Guaranteed, due to how viruses work, we as Washington residents, probably all have had the original virus before any vaccine came out. I understand your desire to get over all of this virus but, viruses have always been around and they always mutate into less dangerous variants to stay around. Why have all these testing sites but completely ignore the testing of natural immunity? Natural immune response, has been proven by many viral infection specialists, to be the best and longest lasting way to stop viral spread in society.

I hope you think long and hard about this, and do the right thing for our children's future.

Sincerely,

Kristen Counts

To: WA State Board of Health
RE: Jan. 12th at 9:30 AM – 3:30 PM, the WA State Board of Health will discuss applying current infectious disease WAC codes to include Covid-19 for all WA State residents.

PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Why are you even considering INVOLUNTARY QUARANTINE? This is not Germany and the Holocaust all over again!

Have you looked at the data that shows that over 50% of the States that do not have Mandatory Restrictions are doing well and thriving. Unlike the handful of States (West Coast and NY) which are not doing well. What seem to be the problem. . .?

Why include the Covid vaccine as part of the school immunization requirements - if you see the data most people (children too) that have received the vaccine up to 80% have come down with Covid or the variants. This should be a choice not a requirement.

Sincerely,

Joyce Spores

Vaxinations for school age children with the covid 19 should not be allowed. If this committee was up to date on research involving adverse affects to children from this EUA you would have no other option to refuse mandatory vaxes for our children. Consider the legalities of US Code and our state Constitution that were derived from the Nurenberg Code to protect against using experimental medicine without informed consent. The Phiser studies are now to be released throughout the next 8 months per Federal Court order. No information covering adverse effects, has been published by pharmaceutical companies. The giving of these shots are a felony. In no way should these shots be given to children or adults.

Re: vaccine mandate for children

To the Dept. of Health

Substantial research conducted on Covid-19 demonstrates that there is absolutely no reason for vaccinating anyone under 18 as their statistical a death rate from Covid-19 is approximately 1 in 1 million (66 deaths in the past year, half of them with serious comorbidities, out of an approximated cohort of 60 million).

This new vaccine technology has not been thoroughly tested and was rushed into distribution using an emergency use authorization. There is mounting evidence suggesting that micro embolic events may occur as well as cardiac inflammatory syndromes, particularly affecting youth and teens, and much more scientific investigation is required before the vaccine is mandated or recommended for children and teenagers.

Under these circumstances, to force this procedure upon our children who are undeniably at low risk for this disease quite possibly endangers those you are sworn to protect. Therefore, I urge you to decline to mandate vaccines for children at this time and recommend that this be tabled until a later date when more scientific studies are available for consideration. At this time, the focus should be on a healthy lifestyle: healthy diet, vitamins, exercise, and getting enough sleep, and the Washington State Board of Health could do a great deal to promote by working with community organizations, doctors, and schools.

Thank you,
Lisa M. Burt

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

I support the petition for rulemaking (item 11 on the Jan 12 agenda). I support establishing a new rule that prohibits adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,

Leisa Manning

My name is Jaya Fowler. I'm a newly elected school board member in Kettle Falls WA. I want to know what happened to our 14th amendment? In case you don't know what it is, let me enlighten you.

"The State cannot deny to any individual the right to exercise a reasonable choice in the method of treatment of his ills."

My understanding is you're giving the option of religious and medical exemptions? Why? When you're going to treat the unvaxxed with an unfair bias. We have had vaxxed students around the same people who have tested positive. But, yet the vaxxed get to go about their life (as long as they're symptom free), when the unvaxxed are having their rights taken away. Our religious and medical treatment is NONE of your business. This goes the same with our teachers and staff. The majority of the ill have had their "covid" shot. When our staff have to take leave because they chose to exercise their constitutional right, as an AMERICAN, they are forced to use their own leave and then after that runs out they go without pay. If this job is so protective then why are most of the vaxxed getting the virus? Plus, the survival rate is substantially higher of even the flu and kids aren't getting it, to any percent of adults.

How I choose to live my shouldn't be used on a piece of paper to get me out of doing something I know is wrong and harmful to my children as well as myself!" I'm not against vaccinations, that been tested and proven over a PROLONGED period of time.

I want my kids back in school without a fear of being segregated . I urge you make the ethical choice in allowing the parents to make their best choices for their families. It's my job as a parent to raise my children not the government's.

Good morning,

As a public school teacher who chose to be vaccinated with the Pfizer mRNA vaccine, I am commenting on the recommendation of requiring public school children to be vaccinated with the Covid 19 mRNA vaccine, before the Washington State Board of Health Meeting is held on January 12, 2021.

I have concerns about the safety of the Covid Vaccine, especially on children's developing organs. The current Covid Vaccine research is limited in terms of time, clinical trials, and studies. I am apprehensive of the long-term side effects, which have yet to be determined.

Secondly, making parents choose between the right to a free public education for their children or the right to govern the bodily autonomy and personal health of their children is a threat to our democracy and personal freedom. How can I continue to pledge allegiance to the flag every morning? Shall we take out the "...with liberty...for all" part? Prior to making a decision regarding the recommendation of requiring school children to be vaccinated with the Covid 19 mRNA vaccine, please consider the points I have made, as well the data available to us that shows that children have a very low risk of dying from Covid or complications from long Covid.

Thank you for your time in reading my testimony.

Sincerely,
Maggie LaRiviere

To the Washington State Board of Health,

I am COMPLETELY against any of the proposed COVID policies that are overreaching and immoral.

My family and I stand against these proposed WAC's:

WAC 246.100.070

WAC 246.100.045

WAC 246.100.040

WAC 246.100

WAC 246.105

Respectfully,

Johnny Rivera Rodriguez

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools. C-19 vaccine is not the same as the vaccines we already give our children. We have a God given right to choose and raise our children the way they should be raised. This is a Free country and a Free state and the over reach of our state and country Dictators overwhelming. They work for us! If you look at any country that became a socialist/communism country failed. It doesn't work and this is what the left is trying to do. They take a little freedom at a time to make the sheep feel safe. Enough is enough!

We the People oppose WAC 246-100

To whom it may concern,

I previously emailed about the proposed vaccine mandate for children to go to school, in which I disagree wholeheartedly.

But I also want to make a stance against the proposed laws allowing involuntary detainment of any person in regards to Covid-19. It should be unlawful. This is government over reach and it will create enormous issues with the state of our union.

I firmly disagree with all proposed WAC codes being discussed today January 7th.

To Whom It May Concern:

I am opposed to any mandating of the current CoVid 19 vaccines for schoolchildren.

I am not opposed to vaccines, however, there is not enough information given to the public regarding long-term side effects, and currently they are seemingly requiring more and more boosters to be effective.

I believe this is harmful to a child's growing immune system.

I will personally never comply with my child receiving any sort of medical treatment I deem harmful or unnecessary.

I ask you to not make these shots mandatory.

Whom will be responsible for adverse effects that these Emergency Use shots will have on our children? (Since our children and ourselves will become the study subjects) The pharmaceutical companies have over 70 years to release their data. If this is a requirement to inject a experimental shot, then the ones requiring it, should they be held liable; since the pharmaceutical companies are exempt.

Dear Board of Health Members,

I am writing to urge that you do not mandate the Sars-CoV-2 vaccine as a condition of either attending daycare or public school in the State of Washington. This would place an undue hardship on families who only want the quality childcare and/or the fine public education that taxpayers fund here in the State of Washington.

Proceeding with caution is warranted. There is so much that is unknown about these products, and I am deeply concerned that in 5, 10, or 20 years, we will know much more and perhaps regret this rush to mandate. While we keep hearing that these vaccines are allegedly "safe," we really do not know. It's simply too soon to tell (particularly for autoimmunity, which can take years to develop). Moreover, with hundreds of thousands of injuries and thousands of deaths reported potentially associated with the vaccines, the claim of safety certainly deserves more investigation, as do the injury and death reports. What will the Board do if a student is permanently injured, or worse, because they were compelled to receive this injection? There will be continued legal challenges to mandates and likely there will be legal challenges to licensure as well and, in those contexts, it is possible for a court to find that these vaccines are experimental.

I know that you all take the health and well-being of students incredibly seriously. In the spirit of wanting to do the right thing, I hope you will consider these facts:

- Almost 100% of kids don't suffer from severe COVID. In fact, many have no symptoms at all. Thus, they may have already had COVID, which is another excellent reason not to get the vaccine.
- The World Health Organization (WHO) has announced that young people should not take the vaccine.
- A concerning number of young people, especially those under 30, are suffering from myocarditis (heart inflammation), blood clots, low platelets and more following COVID-19 vaccination.
- The risks of COVID-19 vaccination adverse outcomes certainly outweigh the benefits to children and young adults who are considered low risk populations.
- Parents deserve the right to make informed decisions regarding their children's medical interventions, including vaccines.
- Some scientists have raised concerns that the safety risk of COVID-19 vaccinations have been underestimated. As of October 29th, there have been 856,919 vaccine injuries including 18,078 deaths following COVID-19 vaccination.
- Clinical trials in children and young adults are ongoing and will not be completed for at least one year.
- Not a single published study has demonstrated that patients who have had a prior COVID-19 infection benefit from the vaccination. So why recommend all kids get the shot?

The bottom-line message is this: a mandate is not legal now because the products are Emergency Use Authorization (and thus by definition experimental and investigational) and should not be mandated even after licensure.

Best,
Jennica Mjelde

Listen up!

You people WORK FOR US, we are not your subjects! We will never allow you to require an experimental product to be FORCED on our children to attend the public schools THAT WE PAY FOR! THE PEOPLE OF THIS STATE OPPOSE AGENDA ITEM #8 AND WE ALWAYS WILL. You bastards will rot in hell if you try forcing this on our kids. The mothers WILL NOT STAND FOR IT!!!!

As for quarantine camps - SCREW YOU. Will will never comply and neither will the police force that you're trying to weaponize against American citizens. Do you really think you can pull off "Australia" on American soil? THINK AGAIN. The citizens of this country and state will NOT stand for it!!!

The Washington state legislature has gone off the rails. We the people will not allow it any longer. You do not run our lives, you are there to SERVE US. Covid is essentially over, and we're all going to go back to normal, like it or not. You will NOT stand in our way.

We also support agenda item #11, establishing a rule the keep you bastards from requiring an EUA product for school attendance.

Lora B.

Message from VERY concerned parents:

I will say what I have to say because I'm a person exactly like you and you need to hear and listen and be forced, if that's the case, just like you are trying to do to every single person that is attending a Mead school. What leaves you exempt from having to be forced to do something that is illegal, or that you won't do because of factual information that you are basing a choice on, which is the case here, and or beliefs. Just because you are in a leadership position it's all the more reason for you to do everything in your power to stand for other people as you would for yourself. Just because you put letters to make what you are trying to do with this vaccine mandate look like it's legal, it isn't. It is unconstitutional and the constitution is what has been taught for years in schools. It also goes in direct opposition to the justice system of the U.S. When the schools were closed March of 2019 the factual information about the virus was that there is a 99.97 survival rate for children and teens and they weren't the "at risk" group of people that information has not changed. Also, I heard news directly that there wasn't going to be a vaccine ready before the year was over. Yet, there was and there has not been enough testing on the vaccine for it to be administered the way they are doing now. "Dr. Robert Malone invented the vaccine" and he has said do not give it to children. It is harmful to them. The vaccines have toxic substances in them and they have been proven to harm the brain, blood vessels, and reproductive organs John stockton, a well known individual here in Spokane is standing for this information from Robert Malone and is backing Families against mandates. A doctor here in Spokane has seen so many patients that have had serious adverse reactions from the vaccine. Lumps in the breasts, brain issues, blood clotting and have had patients that have died. My neighbor died a week after getting the vaccine booster, 3rd in her series of vaccinations, without having any terminal health issues. She had seen her doctor a week prior to dying. They revived her heart at sacred heart but her lungs had been affected from an emblem. I'm standing for my freedom and yours. You are no different than me.

Please mandate Covid 19 vaccine for all school children. Our kids need to be able to go back to normal school in the fall. The last 2 years have been incredibly difficult for our children and they deserve a normal school experience. Covid-19 vaccines have been proven to be safe and should be added to the required vaccines for children to attend schools in Washington state

Dear Washington State Board of Health members,

This is in regards to the Immunization Criteria for Child Care and School Entry. Please allow ample time so that there will be accurate historical data for parents and health care providers to make good decisions about the Covid 19 vaccines for children. Children's mental health has suffered the most from the Covid 19 pandemic. Please protect their overall health and not make decisions based on the last two years.

Thank you,
Karen Brown

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

I support the petition for rulemaking (item 11 on the Jan 12 agenda). I support establishing a new rule that prohibits adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

To The Washington State Board of Health,

I strongly oppose WAC-246-100 that would expand any authority to involuntarily quarantine individuals against their will.

I also strongly oppose adding a Covid-19 gene therapy-based vaccine to the WAC 246-105 as a requirement for children to attend school.

- * Covid is a disease that disproportionately affects individuals primarily by age.
- * Half of our country's children have had the disease, most showing no symptoms at all.
- * Vaccinating them is completely unscientific. Immunizing the already immune only adds risk and provides zero benefit. For example, a seminal paper recently published in Nature Medicine December 14, 2021 demonstrates that myocarditis is far more prevalent in the vaccinated <40 cohort than from the disease itself.
- * The universal one-size-fits-all policies are not appropriate for this disease. Many medical professors (i.e. Vinay Prasad at UCSF) have argued since last Summer that if anything, young men especially should only get a single dose. Nearly all side effects are seen in the 2nd dose. Let's not mandate something we still have yet to reach scientific consensus on.

Once a person has had Covid-19, they should be resuming life as normal. This isn't something we will need to be continually vaccinating against like the flu. There are now 144 articles on robust and durable immunity post-infection. We need to recognize this if we are ever to end this pandemic.

Hi,

I want to state that I am not an anti-vaxxer. I am someone who researches, talks to many people who have had their children vaccinated and keeps an open mind. I live near Kirkland, Wa and also moved to Sun Valley, Idaho during the early days of the pandemic. I happened to be in two of the early hot spots. I observed many friends get covid including my whole family. I had flu and cold symptoms and was tired for a few weeks. The rest of my family had such mild symptoms, that we would not have even really noticed had we not been looking. Having had covid early and had many friends who had covid early, I was not fearful like my friends who had not had it yet. I come at the requirement for children to be vaccinated from a reality standpoint, not a fearful standpoint. We have lost friends in the last two years to cancer, heart disease and suicide, but not a single one to covid. The reality is unless a child has underlying conditions, they have literally no chance of dying or even having more than a mild cold/flu from covid. To mandate a vaccine that does cause issues (I've seen the issues personally) and has no long-term studies on children for a flu/cold that does not cause issues for most children is a crime against humanity. My other point is if this vaccine actually worked, I would agree with the mandate, however, even after boosters, almost all of my friends that had not had covid, have gotten covid in the last month. It doesn't stop the spread and those of us that have had covid know you are lying when you say the vaccine was the reason they had a mild case. So many people I know personally had mild cases before the vaccine. I am just a common sense person here and the facts are not adding up. I agree the hospitals are over run. I'm not sure why with 21 months now of prep time, we have not planned for this winter of cold/flu/covid season. Covid is here to stay. We need to look at other options rather than boosters every 3 months.

Thank you,
Krista Hughes

I sincerely that you do not force vaccine on children. Covid been going on for two years and forcing mandates has been the only way the government has dealt with it. With our wonderful intelligent and creative leaders I'm disappointed that this is the best that they do; surely there are solutions to this that do not require that the public being forced into mandates which are not normally legal. I know the argument is that children have to have other vaccines to go to school, but those vaccines actually work and have years a study behind them. The covid vaccine is too new and we do not know the long-term effects; the vaccine does not work well anyway. Certainly it may prevent serious illness or death but vaccinated people are still getting sick. Children are not the segments of society that are at risk for complications from covid. The time and energy should not be focused on trying to protect the whole society from a virus, which is impossible --it'll probably will be with us always like the cold and the flu. But the covid campaigns should be focused on protecting the vulnerable-- the sick and the-- which it has failed to do. Forcing mandates only stirs up Rebellion. It is best to seek cooperation rather than Force. Please do not force vaccines on kids. Sincerely,
Maxie Simmons, Colville Washington

Regarding mandatory COVID-19 vaccines as part of the immunization requirements for school, I oppose. This is a violation of personal rights provided under our constitution. Parents know their child's medical history and they should decide. Especially with an experimental vaccine.

I also strongly oppose any involvement in our Washington State health department being allowed to use police officers to involuntarily detain any person or persons regarding WAC246-100-70. This is also a flagrant violation of our constitutionally protected personal rights.

I oppose the proposed covid vac changes. I do not feel like it is appropriate to force vaccines that have not been adequately tested, on children. Making this a requirement takes away a parents right to make the decision and puts parents in a very difficult position. The American people have been through enough economic struggle for the last 2 years, forcing vaccine requirements will only add to this. Furthermore, allowing law enforcement officials to detain the population based on vaccine status is a gross over-use of "power". It is unethical and these topics should not even be considered.

Many virologist and immunologist are coming fourth and explained the risks of children receiving an mRNA vaccine that has not had sufficient testing. Dr. Robert Malone, the inventor of the mRNA technology is now considered a whistleblower because he came clean about the risks of children receiving a gene reconstructing vaccine. This vaccine has not had sufficient testing and it's the first vaccine that has been put on the market with less than 5 years of study. They are calling us the biggest human experience in history. Why put our children at an unnecessary risk when their demographic is NOT experiencing life threatening or even severe Covid symptoms IF they become infected. The ones pushing it on the youth are the some biggest stock holders in the funding of the vaccine. (RWJF AKA JOHNSON AND JOHNSON) I will not allow my child to get the vaccine and I WILL, and many other parents/guardians WILL figure out other accommodations and home schooling if we are not able to get this mandate completely irradiated.

Please don't do this to our children. It is not necessary. Yes people are dying and that is tragic for so many, but children are not at risk of hardly any complications. There is NO REASON to subject them to this vaccine and could harm them later in life. While we know there is minimal risk to our children from COVID, we DON'T KNOW the ramifications of vaccinating them long term.

I Tanya Martinez oppose any and all motion to vaccinate our children until they can give consent.

I am absolutely against all of these PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

In a free society these should not even be a consideration.

The involuntary quarantine of individuals is detention and imprisonment pure and simple. The DOH is not part of the justice system. Involuntary quarantine would quickly be used for political goals to detain individuals for anything that is deemed a current health crisis and circumvent the rule of law. This is Soviet Era political tactics at it's worst and should never be allowed.

I live in Puyallup. I am a law enforcement officer. I am completely opposed to mandates for COVID-19. I have no issue with people getting vaccinated who choose to. I am completely against children getting vaccinated as there is no need, and most children have most likely had COVID, didn't know it and now have natural immunity.

Law enforcement has no business being involved in for I guess vaccinations, detaining people who have not been vaccinated or being in any way involved in the enforcement of what is already a government overreach in the State of Washington.

I will in no way support any candidate for office that believes in mandatory COVID vaccinations, forcing children to be vaccinated, or interning people who are not vaccinated.

This is America. This is NOT what this country was founded on.

As a mother, a healthcare provider and educator, I am alarmed and dismayed at the discussion of the Covid -19 vaccine to be included in Chapter 246-105 WAC.

The forcing of parents and families to make a healthcare choice that they are not comfortable with is a significant and unnecessary overreach by the state government. Including a vaccine so very new to approval in the 5 – 11-year-old age range, as a requirement to attend school is irresponsible and shortsighted. Especially given that data shows the very population being forced to take the vaccine is so insignificantly affected by the virus.

As you know, the issues that public schools face are different in each region and it has been more evident than ever in the case of the Covid-19 pandemic. The state mandates and regulations have already caused a significant burden on school staff, administrators, and Board of Directors. These unmet burdens have led to a lack of trust.

Our goal is to educate students in an environment where they will thrive and become confident, develop and achieve their potential so they may become active, self-sustaining members of society capable of critically thinking, not living in fear, masked, anticipating the next pandemic.

It is no secret that Washington public schools have already lost over 55,000 students this academic year. How can we justify this new barrier when we know it is extremely politically charged and that it provides minimal medical protection for this sub-set of the population?

For these reasons,I strongly implore this board to not include the Covid19 vaccine in Chapter 246-105 WAC.

However, if they do not, then please inform yourselves on the written law already in place that secures our individual rights.

Respectfully,
Kimberly De Lisle

**CONSTRUCTIVE NOTICE AND WARNING TO ALL WASHINGTON STATE
EMPLOYERS, NOTICE TO PRINCIPAL IS NOTICE TO ALL AGENT(S), AND
NOTICE TO AGENT IS NOTICE TO ALL PRINCIPAL(S)**

To all Employers, and all Business Owners, and/or to whom it may concern, this legal informational flyer is meant to provide you advance constructive and actual “legal notice” that I am under no legal obligation to wear a mask or be Vaccinated for the Covid-19 Virus or PCR-Tested in your place of business which is a place of “Public Accommodation” under both Federal Laws (28 CFR § 36.202) and Washington State Law as codified at RCW 49.60.030 and RCW 49.60.215. It is undisputed that there is no statute or law in existence that requires me to be vaccinated, tested or masked or that allows any Employer in the State of Washington to grant or deny the continued employment or new employment of any person based upon whether or NOT they have received a Covid-19 Vaccination or PCR Test. I have a “vested” Constitutional Right to my continued employment under the common law pursuant to RCW 4.04.010; RCW 9A.04.060; CrR 1.1; 1 Sutherland Statutory Construction (3d ed.), p 525, § 2043.

Washington State Governor Jay Inslee, and the Chief Medical Officer Dr. Kathy Lofy only have the power granted by statute. Hoppe v. King County, 95 Wn.2d 332, 337, 622 P.2d 845 (1980); 63 Am. Jur. 2d, Public Officers and Employees, section 263 (1972); Neither officer can make laws on their own motion without violating “The Separation of Powers Doctrine.” State v. Osloond, 60 Wash. App. 584, at 587, 805 P(2d) 263 (1991); Myers v. United States, 272 U.S. 52, 47 S.Ct. 21, 71 L.Ed. 160 (1926). Only the legislature can make laws. “A flat prohibition against regulation of a matter in one direction does not give Congress power to regulate the matter in another direction.” Powe vs United States, 109 F.2d 140 (1940). **Neither officer can re-delegate any authority or power to Employers to hire or fire any employee for refusal to be vaccinated or masked in their work place without violating “The Non-Delegation Doctrine.”** Noe v. Edmonds Sch. Dist. 15, 83 Wn.2d 97, 515 P.2d 977 (1973); Ledgering v. State, 63 Wn.2d 94, 385 P.2d 522 (1963). What the Legislature is forbidden to do directly, certainly [the Governor and Chief Medical Officer] cannot [illegally solicit or recruit Employers] to do indirectly.” The City of Seattle v. Filson, 98 Wn.2d 66 (Nov. 1982).

Any Employer who gives False Legal advice is subject to being charged with and prosecuted for “unauthorized practice of law” pursuant to RCW 2.48.180 et seq, or “practicing medicine without a license” in violation of RCW 18.130.190. This notice is also to inform you that “forced vaccinations or forced masking” violates my Constitutional Rights under both Constitutions, State and Federal, the laws of the State, the laws of the United States, and the 1964 Civil Rights Act, which are

enforceable via Title 42, Section 1983.

It is undisputed pursuant to CR 8(d), that the Social Security Act as codified in Federal law at Title 42, Chapter 7, Subchapter XIX, Section 1396 (f), cited hereafter as “42 U.S.C. § 1396f”, which provides a “**religious exemption**” from all unwanted vaccinations and provides that no one is required by law to undergo any medical screening, examination, diagnosis, or treatment or to accept any other health care or services provided under such plan for any purpose if such person objects (or, in case such person is a child, his parent or guardian objects) thereto on religious grounds.

Washington law at RCW 7.70.050; RCW 7.70.030; RCW 7.70.040, and W. PROSSER, LAW OF TORTS 165 (4th ed. 1971), indicates that the Chief Medical Officer of this State Dr. Kathy Lofy has a duty to disclose that 21 U.S.C. § 360bbb-3, requires that all Doctors and Employers are to provide the appropriate conditions designed to ensure that individuals to whom the Covid-19 Vaccine or PCR Test is administered are informed . . . **“of the option to accept or refuse administration of the [medical] product, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefit and risks”** as clearly stated in subsection (e)(1)(A)(ii)(III) of 21 U.S.C. § 360bbb-3, and as required by the “**Doctrine of Informed Consent**” whose main purpose is to protect the patient from being given “Unauthorized Treatments or PCR Tests” without the patients knowledgeable permission. If any physician performs any treatments or tests on any patient without fully informing the patient of his or her “option to accept or refuse administration” of any “Emergency Use Authorization” of any PCR Test and/or any Covid-19 Vaccination under 21 U.S.C. § 360bbb-3 (e)(1)(A)(ii)(III), he has committed an **assault and battery** against that patient for failure to obtain the patients knowledgeable permission. All vaccine-mandating employers could be sued. Holt v. Nelson, 11 Wn.App. 230 (1974); Miller v. Kennedy, 11 Wn.App. 272 (1974); Miller v. Kennedy, 85 Wn.2d 151 (1975); Gates v. Jenson, 92 Wn.2d 246 (1979); ZeBarth v. Swedish Hosp. Med. Center, 81 Wn.2d 12 (1972); Harris v. Groth, 99 Wn.2d 438 (1983); Smith v. Shannon, 100 Wn.2d 26 (1983); Watkins v. Parpala, 2 Wn.App. 484 (1970); Canterbury v. Spence, 464 F.2d 772 (D.C.Cir.), cert. denied, 409 U.S. 1064 (1972).

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I find it shocking that this is even being discussed. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools. The federal and state governments have not done their due diligence to promote early treatment, yet they are engaging in an unprecedented power grab to force experimental vaccines on everyone and force closures that destroy livelihoods. I am a public school employee and can attest to the severe academic and mental health damage school closures have created for children. I have lost complete trust in my government. Stop the power grab.

To the Board of Health of Washington State,

I strongly oppose and encourage this board not to support the proposed requirement by Washington State or any other government to enforce or make mandatory any medical procedure or device worn on or put into any living being.
There is strong evidence that statistically these injections will do more harm and in no way reduces than the risk of contracting the virus especially in children. Who will be held accountable for the consequences?

Most concerning is in regards to the Proposed Policies statement to;: "Allow local health officers to use law enforcement (WAS 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040)".

The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, over-reaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved, as to enable him to make an understanding and enlightened decision.

Should The Board of Health of Washington State pursue this endeavor it shall be held accountable and will be recorded for all history as:
Committing a crime against humanity by breaking the Nuremberg Code – The Nuremberg Code for Crimes Against Humanity by the International Military Tribunal at Nuremberg, Germany 1947.
Treason – By going against the Constitution for the United States of America; specifically the 1st, 4th and 14th Amendments.
Breaking the ADA and HIPAA Laws of Washington state.
Breaking the Civil Rights Act.

I never would have imagined the extreme situation we find ourselves in, for simply residing in the State of Washington (45 years).
Respectfully,
Jo Ann Root

Hi, there is absolutely no science to support a vaccine mandate for children. Children are at very low risk of severe disease and science shows they are not the source of transmission. In addition to that, many children have already had Covid I, including my 8 year old son, and now have natural immunity. This vaccine is experimental with no studies showing potential long term effects. Mandating the vaccine for children should not even be on the table up for debate. The children are in masks already and even vaccinated children/adults are contracting and transmitting covid. Anyone who wants to vaccinate their child has that option. I am a parent will not be forced to vaccinate my child if I don't feel it's in his best interest.

The current vaccines being distributed in the USA are NOT WORKING along with the fact that EUA devices, interventions, etc cannot be mandated. Even if a Covid shot is decided to be added to the list of vaccines for school admittance it would be unconstitutional and illegal therefore unenforceable so please stop using our tax dollars on unconstitutional, unethical and immoral reasons. The best immunity is natu immunity. Please stop with the mandates.

I am writing to ask you not to make it Required/ mandatory for children to be covid vaccinated to attend school or childcare. I am a parent of two girls. Age 11 and 6. I would like the opportunity to make the choice that is best for our kids and not forced to by the state. There is no evidence that shows that these vaccines protect our children. We are seeing a huge increase in people who are covid vaccinated getting sick from covid. What we do know is we do not know enough about the long lasting impacts of the vaccine on our children's bodies and brain development. The decision to vaccinate our children is irreversible and there are issues we need to look at. With the mRNA vaccine a viral gene is inserted into the children's cells. The gene forces a child's body to make toxic spike proteins they often cause permanent damage in the child's major organs including their brain, their nervous system, heart, blood vessels, their reproductive system, and this vaccine can trigger changes to their immune system and how it responds. This is not a risk we are willing to take. We do not want to risk our kids having long term health problems because a vaccine you force upon them because the damages are irreversible. You can't repair them. You can't fix the lesions in their brain or repair heart scarring. The fact that this vaccine can cause reproductive issues that impact not only our kids but future generations. Also this vaccine has not been adequately tested. It takes at least 5 years to research the vaccine or any medicine to fully see the risks. We won't see all these problems and issues the vaccine has caused in our children until years later. I do not want my children involved in a science experiment. If the state requires us to vaccinate our children than we will pull our kids from all public school or any school that requires it and home school. We will leave this state. We will not vaccinate our children with a vaccine we do not know enough about. Let it be our choice.

Sincerely,
Melissa Kruse

Email sent: I am completely against any of the proposed Covid Policies and I feel that are over reaching and immoral. I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105. "

PROPOSED POLICIES:

- Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from (WAC 246-100).
- Including the Covid-19 injections as part of school immunization requirements using (WAC 246-105.)

I will not support or allow our medical freedoms and right to choose for my self and my children be stripped away from us.

Thank you,
Jason Detwiler

I am writing to voice my opposition to mandating the Covid shot for school children. This is overstepping of authority on an issue that should be decided by parents. It is an abuse of the power that has been seized under the guise of an emergency.

To: WA State Board of Health,

RE: On Jan. 12th at 9:30 AM – 3:30 PM, the WA State Board of Health will discuss applying current infectious disease WAC codes to include Covid-19 for all WA State residents.

We would like to ask why are you considering INVOLUNTARY QUARANTINE ? This is beginning to sound like the Holocausts in Germany all over again – this is wrong.

Have you seen the data that shows the handful of States (West Coast and NY) that have major shut downs and mandatory requirements are doing worse than more than 50% of the rest of the States that have no mandatory requirements and are working fine.

Also, do we really need to require Covid vaccine for school immunization? Studies are not fully out regarding that it helps with protection. Actually the opposite if you look at the data – that 80% of the people with the vaccine have come down with Covid or the variant.

PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Sincerely,

Joyce Spores

This is regarding mandating the Covid vaccination on my child. I'm extremely livid on how poorly our state has handled this Covid situation. Coercing or forcing this vaccine on me and let alone my child is absolute insanity.

There's no liability to the manufacturer if something happens to my child so is the state of Washington going to pay up?

Where is our freedom? Body sovereignty? This isn't about our health and you assholes know that. It's about control and money.

The vaccines only prevent symptoms after contracting the virus. It doesn't prevent from getting it or giving it to someone else.

It is not the solution to our health crisis. Exercise, proper nutrition, and actually being informed what's not good and good for one's individuals body.

All our bodies are different this is not a one size fits all.

I have a right to what does in and out my body and my child's body.

I shouldn't be penalized or my child penalized because I have concerns about a vaccine that doesn't even help.

Begging please don't mandate this on the kids.

To Whom it may concern:

Absolutely NO mandatory vaccinations for children should be imposed while these COVID-19 vaccines are under emergency use authorization.

Remove the EUA, finish the studies, allow questioning of the scientific process, and only then, determine if the vaccines pass muster. No mandates for experimental vaccines!

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

I support the petition for rulemaking (item 11 on the Jan 12 agenda). I support establishing a new rule that prohibits adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

To the Washington State Board of Health,

I am a concerned parent writing to oppose the school mandate of the COVID-19 vaccine.

I understand that in times of uncertainty, it is tempting to succumb to such measures. However, with a new vaccine without long term research, it must be left to the parents as to whether to partake.

Medical rights are a huge ethical question of our time. Whether the belief is for or against the efficacy of the COVID-19 vaccine or whether it is detrimental to health is moot. A medical mandate is contrary to personal freedoms- only in an atmosphere of intense fear would it even be a consideration. Decisions should never be made in such an atmosphere.

Individual freedom is a cornerstone of our federal government and I have never felt this impediment in our wonderful state... until now.

I urge you, regardless of your opinion of the vaccine, to reject this mandate based on this principle.

With my faith and hope in your decision,
Krystal Gibbs

I am OPPOSED to the proposed policies of applying current infectious disease WAC codes to include Covid-19 for all Washington residents.

EUA vaccines should not be added for several reasons:

Experimental vaccines should be optional for all

Kids are not at risk

Vaccines do not stop spread or infection

Parents should be making these decisions for their children, not the Department of Health. It is unconstitutional to force people to take vaccines not proven and especially not allowing exemptions.

I oppose the following proposed policies. No need for enforcement. I've seen the vaccinated and unvaccinated test positive, have the same symptoms and recover with no hospitalizations. Give people freedom of choice according to our US Constitution.

I do agree with vaccinated/unvaccinated to stay home when they are sick unless they require hospitalization of course.

PROPOSED POLICIES:

- Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Our family has natural immunity from COVID-19. There's no evidence that vaccine would protect us any further. If our children are required get COVID-19 vaccine in order to attend public schools, they are being stripped away right to education. The mandate would require our children to risk their health with vaccine that has caused more painful, long lasting side effects than Covid-19 itself in children. Who will benefit from this mandate? Who does it intent to protect? Our children's safety, health and education should be everyone's number one interest. Right to education should not be based on vaccine status!

To whom it may concern:

I oppose the Board's formation of a Technical Advisory Group to discuss vaccine mandates for school. I oppose COVID-19 shot mandates in general. I believe this will create a major issue with equity as the majority of diverse and underserved communities in our region are unvaccinated, as I know you are aware of since I see this issue discussed all over the WA DOH page. Mandates are not the way to break down barriers in vaccine hesitancy, they are simply authoritarian.

I support Informed Choice Washington's Petition for Rulemaking.

Thank you,

Dear State Board of Health:

I am writing in opposition to requiring students in the K-12 system to get the Covid vaccine.

As a concerned grandparent I believe that more research needs to be done before this is considered.

It has been shown children have low rates of hospitalization and death whereas more vulnerable groups have access to vaccines to protect them from severe illness and hospitalization, In addition it has been shown the vaccine does not prevent transmission. Implementing a vaccine requirement will not stop the spread or severity of the disease in vulnerable populations.

As a grandparent involved in the public system I have seen the mitigation practices put in place by our schools. I believe this is enough to significantly stop the spread of the disease among this population. Teachers, administration, parents and caregivers alike take these procedures very seriously. Adding a vaccine and the possibilities of side effects among such a young population seems reckless and ill thought out.

I am asking that you do not implement a Covid Vaccine requirement for Washington schools.

Sincerely,

Linda McMillin

Dear Washington State Board of Health,
I am writing to express my concern over legislation that would allow local health officers to use law-enforcement to force emergency order to detain anyone to a isolation or quarantine camp if they refuse to be tested or vaccinated. I am shocked that this legislation is even in place after we've seen what has happened with this kind of legislation throughout history. I just finished reading a biography of Dietrich BonHoeuffer and got the details of what these kinds facilities did to their inmates. This is unAmerican and completely unconstitutional. There will be opposition from all sides vaccinated or not. Isn't that what makes America distinctive from other countries is it right for personal freedom? Isn't that what the Nuremberg trials were all about? Please reconsider any type of legislation like this and vote it down.
Many freedom groups are rising up and law abiding respectful people will not stand for such immoral legislation.
Respectfully,
Janet Scarth

I feel like this is a very horrendous consideration and I am beyond appalled at how the enforcement on something that is not deemed as being 100% safe nor effective is even thought of. I do not trust something that has clearly not had enough time to even be proven to not harm our bodies. Even with things being "safe" after adequate time there are always some sort of side effects AND they even end up stop being used because of the harm/death they caused.

I strive for the absolute best of health for myself and my children. We steer clear of as many toxins and unnatural products as we are able to.

I cannot even fathom the idea of putting something so unknown and uncertain into our bodies. It breaks my heart to know that so many people do and are willing to risk their children's lives and well being for this harmful injection, even for themselves.

It is very alarming to the extent of which this world coming to.

What happened to us having the freedom of choice?

I trust and believe that this sickness is something that can be healed from more than the media is leading everyone to believe.

It is all about taking care of yourself and your health the best that you can to keep your own natural immune system fighting strong.

This world needs to stop taking the easy way out on everything and put in the work that is needed for self care and the future generations to come.

I hope and pray that you all think deeply, and as hard as you ever had looking into this situation whole heartedly and know that there are millions of other people in this world that are not on board with this form of injustice and incrimination.

Thank you very much for your time and I wish you and your families many blessings.

To members of the WA State Board of Health,

I want to thank you as a parent and resident of Auburn, WA for your public service.

I'm writing with regards to item #11 on your agenda to voice my opposition to mandating COVID-19 vaccination shots for children. Considering 1) the science that has demonstrated the resilience of children to the coronavirus and 2) the erosion of public trust in governments, I believe that such decisions are much better made at the discretion of local school boards. Many across the state would view a mandate from the state board to be a grasping of power similar to other situations that has eroded public trust in governments, such as the federal government's surveillance powers that it obtained via the Patriot Act.

Rather, I am very much in favor of the state board modeling self-restraint to the rest of the country by refraining from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to a mandated vaccination list that the state board puts forth for schools. To issue a statewide mandate for a medical product that has incomplete trials studies would be unwise in light of the past years that have demonstrated the resilience of children to the coronavirus. In other words, I am in favor of Informed Choice Washington's Petition for Rulemaking (agenda item #11) on medical grounds and so that you may maintain the public trust.

Respectfully,
John Montgomery

As a citizen, parent and grandparent here in Washington state, I request it be noted that I do firmly disagree with the "laws" in the WAC being proposed regarding the applications for the "vaccine" and those who chose bodily autonomy.

Those who oppose the mandates and the lack of time tested safety of this so-called vaccine and protocol should be considered as this could be a costly mistake, especially for the children.

Given time and an honest look at the effectiveness of such mandates could change the course of wellness for all.

Sincerely
Mrs Russell

Dear Board Members,

As one parent among thousands, I come to you to say we will not stand for mandatory vaccines for our children. We the parents will not relinquish our rights to parent our own children.

I am also adamantly against forced quarantine, as are thousands of other people. The people will not stand for such a gross violation of our rights. The people are fed up! We will not comply!

Re: meeting on Wednesday, January 12th
Agenda item: Immunization Criteria for Child Care and School Entry

I, as a parent of a school aged children, am very concerned about this potential requirement. Covid shots should NOT be a requirement for our children - it is proven that children are not at risk for Covid-19. The vaccines are not yet FDA approved for children, only EUA and have not been properly tested - I will not allow my child to be injected with something that's risks far outweighs the reward at this time.

I grew up in Washington and have loved living here but as a parent it is my responsibility to protect my children. If this becomes a requirement my children will NOT attend school in WA state.

Respectfully,
Jennifer Ssebagala

To the Washington State Health Department:

Re: Involuntary Quarantine – January 7, 2022, 10:25 am PST

I do not believe using law enforcement to force an emergency order to involuntarily detain a person or group of persons to be isolated in a quarantine facility if they refuse to have medical exams, testing, treatment, counseling, or vaccinations should be part of a free republic. Particularly when doing so is an arbitrary decision not based on solid scientific fact. This is being done to force people to have immunizations against their will – with vaccines that do not work to prevent Covid-19 and variants from being transmitted. For the vast majority of people, Covid-19 is not much worse than the common cold, or similar to the flu, particularly in young children. There are no mandates in regards to colds or the flu. It is an individual decision as to how you deal with it. Nor has having had a case of Covid-19 been taken into consideration for the antibodies people gain. It is just discounted.

I am not an anti-vaxxer. I have had my Covid vaccines and booster. But from what I am seeing now, I might have chosen not to. But it was my choice. Forcing people involuntarily into quarantine facilities turns us into a police state. That was not what the USA was founded upon!

Sincerely,

Jessica Camp

P.S. I am sure you have seen or had access to both pro and con stands and scientific presentations on this issue. There are many physicians and scientists who would agree with me 100%. Listen to them.

Dear Washington State Board of Health,

Our state government should in NO way enforce emergency orders to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, or vaccination.

This is an over reach by our local government. Medical decisions should be made between a person and their local medical provider!

Sincerely,

A concern citizen

☐ To whom it may concern:

I have reviewed the January 12, 2022 agenda to be discussed regarding changing the rules regarding Department of Health codes in relation to "communicable disease". This is my attempt to dissuade you from taking any action to require COVID vaccinations for school children. I implore you to continue to support citizen's rights and a parent's rights when it comes to the children, over their own bodies and medical choices by NOT considering a change to the immunization criteria.

Please do NOT consider refusal to provide equal education services to those abstaining from COVID-19 vaccination for school aged individuals.

PLEASE DO NOT APPROVE THESE CHANGES TO THE HEALTH CODE ENFORCEMENT.

Thank you,

Concerned Voting, Tax Paying Citizen & Parent

To whom it may concern,

I object to this he proposed policies to be discussed in the Washington State Board of Health Meeting on Wednesday, January 12, 2022.

The audacity of thinking that it would be okay to force a medical procedure on anyone and if they decide they do not wish the procedure use law enforcement to, "Involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccinations. Including the Covid-19 injections as part of school immunization requirements" is not okay. This is wrong. Parents should have the sole right and discretion to choose what vaccinations they think their child/children need.

1. These vaccinations are an experiment, and it needs to be optional. We do not know yet what side effects these vaccinations will have and that is why it should be an individual's decision if they are an adult, and it should be the sole responsibility and discretion of the parent(s) to decide what they want for their children.
2. Kids are not at risk. (if you would like me to provide resources stating facts and findings regarding my statements, I would be more than happy to do so)
3. Vaccines don't stop the spread or infection. I personally know people who have been fully vaccinated and have tested positive for covid.

By forcing any and all who have chosen not to get the vaccine for personal, medical or religious reasons you are taking their religious freedoms and violating the Bill of Rights. My question for you would be are we still a free country? This is absolutely ridiculous. I am disgusted and outraged that we even have to be making a public comment on something like this. This should never have even been put forward in the agenda to be discussed.

I am opposed/ fully against the proposed policies to be discussed in the Washington State Board of Health Meeting on Wednesday, January 12, 2022.

Thank you for taking the time to read my comment.

Washington State Board of Health members,

I am opposed to making C O V I D-1 9 shots mandatory for school admission or childcare in our State for the following Reasons:

During the October 26th FDA advisory committee meeting, 16 of the 18 members were very clear that they believed "otherwise healthy" children do NOT need this injection. It was specifically stated in their closing comments that they were recommending approval so that "high risk children in conjunction with their parents and doctors" could have it available. They also noted that though some states may try to "mandate" it, they couldn't let that deter them from making it available to high risk kids that may need it.

Federal Emergency Use Authorization statutes prohibit school mandates of EUA products. The only FDA approved version is not yet available in the United States. Phase 3 clinical trials of COVID-19 vaccines are not yet completed. C4591007—the main clinical trial in children and young adults with BNT162b2—has an estimated completion date of May 5, 2026. Source:<https://clinicaltrials.gov/ct2/show/NCT04816643>

The vaccine formulation now being given to U.S. children aged 5-11 is NOT the same formulation used in the clinical trials, and NOT the same formulation that has been administered to all other age groups under EUA. So even when current ongoing clinical trials are complete, the results cannot be assumed to be relevant to the safety or effectiveness of the new formulation.

Not having language that recognizes and acknowledges innate immunity of the C I9 recovered is irresponsible medicine and employs a one size fits all medical approach that does not take into account the individual health needs of children.

Children are the least affected by this virus regarding severity and most at risk of unknown long term effects.

Thank you for your consideration in this matter.

WSBOH Members,

We appose the mandate to have our children vaccinated with the COVID vaccine.

I am considered in the slightly higher risk category due to an autoimmune disease and needing to take immune suppressant medication. I have chosen (working very closely with my healthcare provider) to get the vaccine for myself as an adult. What I want you to take from information is that I am working with my healthcare provider who knows my history and knows me best. Not everyone does well with this experimental vaccine, me included.

My husband and I have had several conversations with our children's healthcare providers and we do not feel it should be up to anyone other than their doctors and us as parents to make this decision.

Our children's health, both long term and immediate, is our top priority. The risk for long term health problems, in addition to cardiomyopathy, after receiving the Covid vaccine are unknown and a risk we are not willing to take by giving this experimental vaccine to our children.

My husband and I, along with our healthcare providers, we say NO to this mandate for our children.

Respectfully,

Kristyn Ballew

I am emailing my concern on the matters below. In regards to the Washington State Board of Health (WSBOH) having it's January meeting on Wednesday, January 12th. On the agenda: Immunization Criteria for Child Care and School Entry. (making Covid shots mandatory for child care and school admission) and to enforce emergency order to involuntarily detain a person or group of persons to be isolated in a quarantine facility following refusal to voluntarily comply with the requests for medical examination, testing, treatment, counseling, vaccination.

I have never been hesitant to get a vaccine or to give my children one recommended until now. As we all know, we are still learning more about the virus, it's many variants, the vaccine, and the effects of it all. There is no way to assure us that we know the effects until many years (10+) have been used to study this matter and the effects on both adults and children.

The CDC has changed their minds several times on the "science" which effects us all both in private and public aspects of life. We do not know the long term effects of the vaccine and how that may alter ones DNA, child's development, etc. The CDC stated that 0.6 percent of 5-11 year olds hospitalized with Covid have died from the disease. That's a very small number to then stress a mandate in order to go to school, have a job, etc. Dr. James L. Marcum M.D. stated that he sees the risks of getting vaccinated outweighing the reward. Especially for children. Mentioning that there are studies showing heart inflammation and other severe illness. As well as fertility concerns. Why risk such concerns when children's survival rate with Covid is 99.9 %. Another doctor, Dr. Tommy Redwood M.D. refused to get vaccinated due to the possible troubling side effects. Also stating, it's too soon to know the long term effects of getting the vaccine.

Aside from the science that clearly needs more time to be studied on this matter our religious beliefs that one has are being ignored and not validated. As a family, we have prayed on this and don't feel at peace with the idea of the vaccine at this time. The Bible states, "Man has the right to act in conscience and in freedom so as personally to make moral decisions. He must not be forced to act contrary to his conscience" (CCC #1782). How can this be ignored? Time will tell. We need more time! Years, years before anyone with any authority can honestly and confidently say they know and understand the effects of the vaccine for both adults and children.

At this time, there hasn't been enough time to understand it all to push such strong agendas. Not to mention, the vaccine started with only needing one, then two, then a booster, now what is it? 3+? And there is talk about needing an additional booster in another 6 months. Isn't this enough to question that these vaccines haven't been studied enough to understand the effects, and "coverage" so to speak in order to protect you from the virus. Since the vaccines have been pushed globally more people have tested positive for it. Seems that the vaccinated are the "super spreaders". They often are asymptomatic in comparison to those who are not vaccinated. I would rather know I have it and do my part to avoid spreading it than to unknowingly spread it to others. When is enough, enough? The flu shot is only given once annually and it is optional. The news have recently reported that scientists can't differentiate between the flu and Covid on tests. Hmm, that's interesting! Didn't people question that as a possibility before and now we are being told that this is in fact true. Yet, our lives are being controlled and altered to such a magnitude that our freedoms are being taken from us. No! We are not Australia! This is the United States of America! We are the land of the free! Our constitution is being disregarded. This is not what our country is made up of! This is not

for the peoples well being. What about "my body, my choice" ? The government respects that in regards to abortion but not in regards to opting out of a vaccine at this time until more time has past ? It doesn't add up! We need time, we need studies, we need our constitutional, moral, and religious beliefs honored and respected. We pray that you honor our rights and help to keep our country the land of the free and the brave. God bless us all!

Best Regards,
Jessica Reguindin

Subject: Vaccine requirement k-12

External Email

To Whom It May Concern-

As a resident of Olympia, WA I ask that you reconsider mandating the Covid vaccine for K-12 students. The statistics do not support the need for this to be mandated and this vaccine has not had studies for enough years for me to feel comfortable giving it to my children. Just like the flu shot is not required, neither should this vaccine. This is not the solution. You would be contributing to more mothers needing to quit their jobs to home school.... Messing with their livelihood... more of a decline in the mental health of the children as well as every one. We do not know enough about this vaccine and the long term effects!

Thank you for your time.

Subject: Vaccines for school kids in Washington

External Email

Washington board of health,

I do not believe school kids should be required to get an experimental vaccine to attend public school. Covid is not effecting children like it does adults, if you follow the true science. The vaccine is more harmful to them, with all the side effects, than getting covid and recovering. To make this mandatory would do more harm than good. My child will be taken out of the public school system if this mandate happens.

Thank you,
Arden Anderson

Subject: Vaccines

External Email

Dear Everyone,

Say no to mandating vaccines as a requirement for EVERYONE/ANYONE. This covid19 vaccine is only in its second year of human trials, and is only approved for emergency use. Mandating this vaccine (or any vaccine for that matter) takes away personal freedoms especially My Body My Choice! Law enforcement has no place to fine or otherwise detain someone for their medical choices. Say YES to personal choice and NO to mandates. These decisions should be between a doctor and patient not government and citizen. No one should be forced to make a medical decision that isn't good their own body.

A concerned citizen,
Heather

Subject: Vaccine Mandates For School Children?

External Email

Insane and very, very dangerous.

Plenty of solid evidence is developing that children, as already well documented, have a near 0 chance of getting COVID-19. In fact, plenty of scientific facts now show, children are at a higher risk of developing and possibly dying from the vaccine's potential adverse affects (such as cardiac issues) than COVID-19 itself. If this occurs upon our children under a government mandate, how will history document this?

Thank you for your time in this important manner.

Matthew Thimgan

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>>)

)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Dear Washington State Department of Health staff,

Please do not require school children and preschoolers to be inoculated with a Covid "vaccine" in order to attend school in our state!

Why the Pfizer vaccine for Covid 19 Does More Harm Than Good

Source: www.CanadianCovidCareAlliance.org
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.canadiancovidcarealliance.org>>

The Pfizer trial only used:

- 1) Unexposed & inoculated, and
- 2) Unexposed & not inoculated.

They should have also included:

- 1) Exposed & inoculated, and
- 2) Exposed and not inoculated (aka natural immunity from having had Covid).

The fact that they avoided the latter 2 shows that they thought their Pfizer vax wouldn't perform well in those categories. A study should show how those exposed and not inoculated fare vs. inoculated & exposed. It didn't.

The clinical endpoints of the trial should have been: Do people who take the Pfizer vax have less illness and death? (It wasn't) Choosing the proper endpoint is well-known, as a result of testing of cancer drugs. In cancer drug testing, they had to switch to all-point mortality, and Pfizer should have done so.

They could easily have included biomarkers, but they didn't. We need to know how people exposed, but not inoculated compare with the exposed and inoculated. This is natural immunity, and we need to know how those with natural immunity fared.

They should have tested for: de-dimer levels (micro-clotting) before and after.

Other biomarkers Pfizer should have and easily could have tested for: inflammation, barrier permeability, hypoxia, cardiac damage, predisposition to Alzheimer's, predisposition to autoimmune disease.

They should have had biomarkers for thrombotic disease. This is a condition which would take time to surface, but could have been measured before & after in biomarkers. Many doctors are reporting thrombotic conditions in vaccinated patients.

Vaccine passports: The Pfizer vaccine was not tested for spread reduction: No evidence at all that they reduce transmission and disease, and that was never one of the endpoints of the study. All they measured for was, "Do people who take the vaccine test positive for Covid-19 less often?" and the study was designed so that they would get few "no" answers, and they then proceeded to a vax rollout.

Testing failures: Subjective testing: The study did not test all patients for Covid-19! Instead, they only tested for the Covid-19 symptom, and then left it up to the discretion of their investigators to decide what that was. So that means that asymptomatic infection would be missed entirely. And it introduced a high level of subjectivity to the trial, because an investigator could actually decide whether to test or not to test. This lack of systematic testing actually makes the results of the trial unreliable. All participants should have been tested.

There is considerable missing data in the study. The endpoint is all Covid cases: 8 inoculated vs 162 placebo. But it's such a small # of participants to begin with. But there are 80 lost follow-up subjects in the inoculated group! They don't know whether they got sick or not, or even died. They don't know. That's 10x more than the # of Covid cases they had in the inoculated group. So if a significant proportion of those 80 had been positive, it would have dramatically changed the results. Also, all the suspected but unconfirmed cases: 1594 in the inoculated group, 1816 in the placebo. This means they were symptomatic, but the investigator never followed up with a Covid test! These are huge numbers compared to the confirmed cases! The fact that the suspected cases which weren't tested were significantly larger than the endgame results means that this data is unreliable. The study should not have been accepted.

What about the placebo group? There were also many unconfirmed cases. If all these cases, inoculated and placebo, were positive, the relative risk reduction would then only be 19%. That's not a high enough percentage to gain approval.

Adolescents: The inoculation is really all risk and no benefit.

Teens are statistically at 0% risk of death from Covid-19. But the vaccine does pose risk of serious events. But the study was not designed to find serious adverse events. A serious event that occurred at a rate of 1/800 might not even show up in a sample of 1,005 people.

In the tests, there was a serious event in at least one subject who was inoculated. A 12-year-old girl. She experienced multiple serious effects, including lost feeling from the waist down, lost bowel and bladder control, menstrual cycle issues, seizures, verbal and motor tics, dizziness, fainting, headaches, brain fog, erratic blood pressure, and more. And the last 10 months, she is wheel chair bound and fed by a feeding tube. Pfizer labelled her case "functional abdominal pain."

5-11 year olds: The inoculation is an unacceptable risk to this group. Pfizer, using predictive modelling, acknowledges that their inoculations WILL cause myocarditis, but optimistically claims there will be zero deaths from myocarditis in any of their modelled scenarios. It's speculative. Still, there's no justification for giving children myocarditis. But the government has actually normalized myocarditis in kids, publishing Sick Kids brochures of how to deal with myocarditis in kids. But how to deal with it is to not cause myocarditis in kids! It's very serious. It causes permanent damage. Severe myocarditis weakens your heart so that the rest of your body doesn't get enough blood. Blood clots can form in your heart, leading to a stroke or heart attack. And the mortality rate is up to 20% at 6.5 years. The risk of 4 in 20 children who contract myocarditis dying within 6.5 years is unequivocally an unacceptable risk for children. But the FDA maintains that it is an acceptable risk for children. They have actually abandoned the "do no harm" principle.

Dr Eric Rubin of the New England Journal of Medicine (NEJM) has said that the way to find if they do harm is by doing a roll-out on the population. He voted to roll out inoculations for ages 5-11, and suggested that a population level roll out as an appropriate way to test for adverse events. Of note, the NEJM is also the publisher of the Pfizer reports.

Governments are proclaiming the inoculations to be safe, yet the data is not there to back that up. Pfizer admits that their long term immune response, efficacy & safety data is limited and that their studies weren't powered to find "rare" side effect, as only about 1500 kids were in the testing group which received the inoculation. The law of informed consent says that parents should be told about these risks, but it's not happening.

On Nov 2, the British Medical Journal released an article about their investigation into Ventavia, one of the research companies Pfizer hired to conduct the trials. A whistleblower who was a Regional Director reported to the FDA that Ventavia: falsified data, unblinded participants, did not follow up and test participants who reported symptoms, and mislabeled some specimens. Several other employees backed up the Whistleblower's account. But Pfizer never disclosed the problems in its EUA application, and in fact, Pfizer has now hired the same researcher, Ventavia, to run more Covid-19 clinical trials.

So it's not surprising that we are seeing the issues we are in the 6-month report.

Manipulation of Data Cohorts: Pfizer took the results from their adult trial, which started July 27, 2020, and then added in the results from the 12-15 year olds' trial, despite the fact that the adolescent trial started four months later. Since it's well known that the efficacy wanes over time, this gives a false boost to the efficacy numbers. The efficacy of the two groups should have been reported separately, not presented as one combined result.

Pfizer trials did not prove safety. They proved harm. The endpoints of the trial should have been illness and death, not a positive or negative Covid-19 test. But their test actually showed harm. They used younger, healthier groups than the vaccine would eventually be rolled out to. Here are some results of Pfizer's own randomized control trial: Related adverse event, +300% over placebo group; severe adverse event, +75% over placebo group; any serious adverse event, +10% over placebo group. Deaths in the vaccinated group: 20; placebo group, 14.

How is this harm playing out in the real world? Governments are assuring us that they are monitoring safety and will let the public know if there are problems. But once the vaccine was rolled out at the population level, the surveillance method for reporting is called "passive." It's difficult and time-consuming for overworked doctors and health workers to file the harm reports, and then it goes thru several levels of bureaucratic approval before the case is accepted as a vaccine-related injury.

"Active" surveillance was used for trial participants. They were given a phone app with choices of adverse events they experienced. 78% reported adverse reports, and 5% were serious. There was also journal entry options for the participants, and 30% reported adverse events thru that, and 2% were serious. But when the reporting method was switched to passive for the general population rollout the reporting fell way down.

But some news is getting out: For example, the risk of myocarditis is becoming known. And it's occurring in younger, healthy population where there was previously a very low rate of myocarditis.

On Nov. 17, the FDA released the first batch of data to satisfy a Freedom of Information request. This is data used by the FDA to approve Pfizer's covid-19 vaccine. One report in which Pfizer tracked adverse events in the first 2.5 months after the EUA, reported 1,200

deaths and over 25,000 nervous system adverse events. Under "Safety Concerns" Pfizer listed Anaphylaxis and Vaccine-Associated Enhanced Disease. This document should be incriminating for any agency who saw it and called the vaccine "safe."

Pfizer's criminal past includes lying about a heart valve which fractured and killed hundreds; conducting clinical trials on African children without their parents' consent, after which some of the children died; bribing doctors; suppressing research; manipulating studies; withholding information that its products caused cancer; fraudulent marketing, and many more. They've literally paid billions in fines and settlements for their actions. So they are not a highly ethical corporation.

The CDC has redefined "vaccine" to suit political & pharmaceutical interests. The new definition of vaccine by the CDC is "A preparation that is used to stimulate the body's immune response against diseases." The new definition does not indicate there is any actual benefit derived from a vaccine.

Subject: Vaccine Mandates and Forced Quarantine

External Email

Hello,

Concerned citizen and parent and lifelong resident of Washington State asking you to please not to move forward with the agenda of forceful quarantine by law enforcement and mandatory school vaccinations. This pandemic is quickly becoming endemic and as we've seen the vaccines are not effective as they were sold to the American public.

This is a slippery slope, and I urge you to revisit history regarding isolating groups of people against their will. This is simply unconstitutional.

Lastly, please remember you represent us, the tax paying citizens of this fine state, to uphold our freedoms and the Constitution of the United States.

I stand against these WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

Subject: Vaccine Mandates for Schools

External Email

Dear WSBOH,

Please do not move to make Covid 19 vaccines mandatory for all children to attend school or daycare in Washington State.

With the low and waning efficacy of the vaccines, the lack of long-term safety data, the low risk of Covid-19 for the majority of children, and the inability of the vaccines to accomplish the alleged purpose: stopping the spread, there is no benefit in mandating the injection for school children.

Mandating the vaccine would be a highly inappropriate invasion of what should be a personal medical decision for every child and their family.

There have been 11 documented deaths in our state in children this past year due to Covid 19 (from January 1, 2021 to December 31, 2021). There are 1,885,561 children in Washington State between the ages of 0-19. This puts the Covid death rate among children at 0.006%. This number undermines any possible rationale that might be put forth to justify a Covid 19 vaccine mandate among children. The virus is absolutely not an imminent threat for children in the 0-19 age range. Mandating the vaccine for children in school and daycare is not justified by statistics or logic.

Thank you,

Melissa Neuharth

I don't think it is a good idea to include the Covid Vaccine as a required vaccine for K-12 school kids. I have the luxury of getting time off to take my children to their pediatrician so he and I can discuss vaccination for my kids (they carry a rare genetic disease that I have). There are a lot of small groups of people that don't have the luxuries that I do (indigenous people, people of color, etc). I can't see this as being a good move to help include those that are farthest from equity.

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. The CDC says that the Covid hospitalization risk for children is about the same risk of the flu. We literally cannot know the long term consequences of taking this vaccine. It is not the job of children to make adults safe. It is our job to make sure they are safe.

Tens of thousands of doctors around the world warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time.
Jane Tornatore, PhD, Seattle

Good Morning,

These vaccines are ineffective and dangerous for our children. There is no upside, no "benefit" to experimenting on our most vulnerable population. However, the costs of this overreach are innumerable. There is no doubt that even a cursory glance at the stacks and stack of data prove these vaccines and all other child-related mitigations are morally wrong, physically and emotionally dangerous and entirely unnecessary. Everyday, there is mounting evidence of fraud, bias and abuse in the process that brought us to this sad point in time. If you choose to mandate these vaccines or continue with ANY other Covid protocols, I will remove my children from school. You do not and will not control MY children.

Further and according to your own criteria, a vaccine must be fully FDA approved in order to make it mandatory for school attendance. The current Pfizer vaccine in use for children in this country is still an Emergency Use Authorization only vaccine, so beyond the logical arguments made above, the vaccine does not meet Board of Health requirements. I demand the vaccine be removed from consideration until and unless it proves immunity to stop transmission like other common vaccines do- which was the requirement under consideration in the 1905 Jacobson vs. Massachusetts SCOTUS case in which it stated mandates could only be considered which "prevent the spread of contagious disease." So far, it is evident that this vaccine does not stop transmission and, therefore, I am certain these mandates are illegal.

Yours in deep sincerity,

Gar Hansen

(childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long-term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Rubin, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you!

Jan Yokers

Subject: Vaccine Mandates for school children

External Email

Dear Washington State Board of Health Board Members,

I am writing in follow up with a question related to the first Technical Advisory Group (TAG) meeting held on December 29th, 2021 and considering Covid-19 for inclusion in WAC 246-105.

During that meeting, as staff was briefing the participants using a PowerPoint presentation, they indicated that the group was at the point of the fourth box in the process as shown on the below included slide. My question for Board of Health members is how is it that the TAG has progressed to step four when step one of the processes has not yet been met. Step one states that the Advisory Committee on Immunization Practice recommends a fully FDA approved immunization against a specific antigen for the school aged population.

The only fully FDA approved Covid 19 vaccine at this time is the Pfizer-BioNTech vaccine, marketed as Comirnaty, for individuals 16 years of age and older. There are currently no fully FDA approved immunizations for the majority of school aged children.

How is it that the Board of Health has ignored its own process to move this forward to the point of convening a technical advisory group? How can the public trust a process established by the Board of Health that is not followed by the Board of Health? How can the citizens of Washington, in particular parents of school aged children, have confidence that the Board of Health and the TAG are fairly assessing and judging the information and criteria? I believe that in ignoring step one of this process and moving forward at a brisk pace, the Board has already "showed its hand" related to this critical decision.

There are many who believe as I do that it is far too early and there is not enough data and scientific evidence to ensure safety of the Covid 19 immunizations for children. A decision to require a Covid-19 immunization for school entry will be catastrophic and both inhumane and unethical. I implore you to not include the Covid-19 vaccine among those required for school attendance.

Children are not having significant issues with covid 19. Based on the most recent VAERS report, there are far more health risks associated with the covid 19 experimental shots without significant results in any actual immunization to covid 19. It is unclear why any person can, at this point in time, decide to mandate a shot that only has emergency use authorization AND a proven track record for causing more harm than good.

There is so much 'talk', and only talk, about following the science. However, just because those words are spoken, doesn't make them fact. The swine flu vaccine was withdrawn after 25 deaths were reported. The latest VAERS report shows over 20,000 deaths reported plus thousands of side effects and disabilities caused by the covid shots. That

would be science worth looking into before deciding on mandating this experimental shot, especially to children.

I implore you as a grandparent and great-grandparent to think about the future of our children that have already lived through the last 2 years of inaccurate, ever-changing information that has impacted their lives already. Suicide is a very real health issue that needs to be dealt with by adults that actually look into all sides before making this decision. The medical community itself does not agree with each other and maybe it's time to find out why.

A decision to require a covid 19 experimental shot labeled as a vaccine for school entry will be catastrophic, inhumane, unethical, and downright wrong.

You might ask yourself why Pfizer has asked the FDA for nearly 50 years before they are required to release their data about these experimental covid 19 shots.

Sincerely,

Anne Lennon

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way,

their risk of dying with COVID is less than 2 in every 1,000,000 children. Dear Washington State Health Board Members,

I am writing to respectfully request that you do NOT pass any bill, legislation, recommendation requiring children to be vaccinated. This is an overreach in every way. Children are the least likely to suffer lasting health consequences and the jury is still out on the impacts of the chemicals that are to be injected.

Do the right thing for our children and do not allow this to become a mandate of any kind.

Thank you for your time and consideration. I wholeheartedly believe you will not be swayed by public information or fear. That is no way to live.

Subject: Vaccine Requirements

External Email

I, Kati Spencer, a registered Voter and resident of Spokane WA wholeheartedly oppose any and all CoVID vaccine requirements for any minor child in WA state. I oppose any medical treatment, medical examination or counseling (WAC 246-100) without parental consent. I will not allow local health officials to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC-246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040) This includes the requirement of the covid-19 injection as a part of school immunization requirements using WAC 246-105.

It is an infringement on our rights as citizens and our ability to do what is best for our children and ourselves. The government doesn't have the right to tell us as parents or US citizens what we can and cannot do with our own bodies. We have the right to medical autonomy and it needs to stay that way. The government needs to get out of our medical decisions.

This is an atrocious abuse of power and we will not stand for it.

Subject: Vaccine vote

External Email

To whom it may concern,

I have been informed as members of the board you will be voting next week on a few matters regarding whether or not to enforce the vaccine mandates. I cannot believe I am sitting here having to write this email to you right now. Your job is to keep the community safe and your attempting to propose a unsafe and unproven vaccine on the masses. The fact that I can garentee this isn't your only email from a concerned and pissed off parent should make you feel so ashamed and embarrassed. You have no right to force this unconstitutional and unethical change to our given rights.

I suggest you each take a mere 30 seconds of your pitiful days to look at the VAERS website and ask yourself, is that really good enough odds to chance your kids life? Your grandchildren's lives? In case you can't be bothered, I have highlighted some of the details here for you.

VAERS data released today by the CDC included a total of 875,653 reports of adverse events from all age groups following COVID vaccines, including 18,461 deaths and 135,400 serious injuries between Dec. 14, 2020, and Nov. 5, 2021.

The moment you require this to be added to the list of immunizations required for school age kids is the exact moment you have hundreds of thousands of parents standing up to YOU. This is absolutely wrong. And you know that. But in order to make your politcal point, your sacrificing so many incident lives. Those deaths will be on you. Hopefully the logical parents will pull their children from the public school system first, dwindling your state funds enough to prove OUR point.

I haven't even brought up the other item your voting on... allowing police to detain individuals and families who aren't complaint? Seriously... the cops in this state can't even handle their normal case load and you want them to arrest me for deciding to not get a USELESS vaccine?

Out of the 10 people I know that CURRENTLY have covid, 6 people SIXTY PERCENT were fully vaccinated and boosted. Clearly this isn't going according to plan?

Good luck..

To whom it may concern,

I strongly disagree with mandating the covid-19 vaccine in k-12 schools.

In the event that mandating of the vaccine is put into effect, antibody tests and proof of previous positive covid test should be suitable alternatives. To force a child to get a very new vaccine when covid-19 is so low risks to children without other underlying health conditions, and especially to require it for a child who has already been exposed to the virus, is very unnecessary and I would argue even reckless.

Subject: Vaccine Requirements for Children

External Email

To The Washington State Board of Health:

I am not writing to convince anyone to share my point of view. I am not an "anti-vaxxer" but I am anti-COVID19 vaccine as it is still considered "experimental" by the language used in publications by the CDC, WHO, and NIH. There are many statistics and credible sources out there about the effectiveness, or lack of, for this vaccine and the potential side effects. I trust at this point, we have all done research, examined from both sides of the issue, and come to our own conclusions determining what is right for ourselves and families. That is our right and I support medical freedom for all.

I am not interested in injecting my children (or myself) with a substance associated with side-effects, including death, that may or may not prevent an illness with a 99% recovery rate. Should this vaccine become mandatory for children to receive public education in the state of Washington, please be advised that our three children will be removed from the public institution as well as the removal of our tax dollars.

Sincerely,
Lindsey Hobbs

I am aware that you are considering the vaccine requirement for school aged children next week.

I vehemently oppose this.

Children are at a VERY low risk from covid-19 and the vaccine is still too early to know the long term effects.

To make this requirement would CLEARLY be an abuse of power.

I am positive that hoards of parents would remove their children from public school if this were to move forward.

Please listen to parents and do not make this a mandatory requirement.

Thank you for your consideration,

Lindsey Rude

Subject: Vaccine Mandates - Board meeting for January 12, 2022

External Email

Good Evening,

I am alarmed to find the following policies are being considered by your Board on Wednesday, January 12, 2022:

PROPOSED POLICIES:

1. • Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
2. • Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

I strongly oppose any consideration of the above policies and changes to the WAC 246.

The policies to use law enforcement to force isolation are unthinkable! We can't keep shoplifters, drug dealers and the homeless under control, yet you want to take control from parents!? This is serious government over-reach directly in violation of both the 14th Amendment of the United States Constitution but also Article 1, Sections 2 & 3 of the Washington State Constitution.

The policies to consider Covid-19 injections as part of school immunization requirements are un-just as these experimental injections - they have only been approved as an emergency measure by the FDA!! The most recent fast tracking of any vaccine was the mumps and that still took 4 years!!!

Parents, NOT the State are responsible for making medical decisions on behalf of their children. The amount of potential risk to our young children's bodies far outweighs the limited risk - more children died last year due to car accidents (per the CDC!!!!).

Please listen to reason and stop the fear-mongering. This is a virus running its course and has already started to mitigate itself with less severe symptoms...nothing that requires such broad strokes removing the sacred care and judgement that only a parent should provide!

Respectfully,
Nicole Shaw

Re.: PROPOSED POLICIES:

1. Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

2. Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Bottom Line: A long-time WA resident, I am adamantly opposed to official's forcing involuntary detention for responsible citizens who exercise their right to determine what they will/won't inject into their own bodies. You propose "involuntary" detention for "voluntary" noncompliance. Sadly, these two mutually-exclusive descriptors ("involuntary" and "voluntary") belie the subplot of what's being advanced. And I object to it.

As a retired educator, I am equally appalled at the thought of forcing experimental injections into the arms of children and youth. Too many questions are yet unanswered. A FDA advisor reminds us that there is no expectation that the lower dose in children will behave similarly to the higher adult dose. This, of course, begs the question: Do we really want to experiment on our children?

One of the most academically cited American epidemiologists alive today says he would pull a healthy child out of public school before he administered this vaccine. Harvard University professor of medicine, Martin Kulldorff, agrees with Dr. Harvey Risch. Data and scientific studies he's reviewed show that children are more likely to contract serious disease or die from the annual influenza, or the flu, than COVID-19.

Covid injections are experimental. Simple as that. Dr. Eric Rubin, who sits on the administration's vaccine advisory panel, said in part, "We're never going to learn about how safe this vaccine is unless we start giving it. That's just the way it goes. That's how we found out about rare complications of other vaccines, like the rotavirus vaccine."

Never mind that safety data are lacking! Rep. (and Doctor) Greg Murphy (NC) responded rightly in noting that Ruben's comment "is literally the most dangerous statement" he had ever heard in medicine." I agree.

Re.: Too many questions are yet unanswered.

The CDC openly acknowledges that for 30 years since creation of the VAERS reporting system, reporting of adverse vaccine DEATH reports remained very low and constant. However, beginning in December 2020 with the first COVID19 vaccines hitting the open market, and escalating every day since, the adverse event DEATH reports have skyrocketed to levels never before seen in 30- years of vaccine adverse event reporting. Before mass-enforcing an experimental injection, especially on children, these questions (and countless more) must be answered (with peer-reviewed science):

1. The CDC admits there are no peer-reviewed studies, yet it's okay to take these injections deemed "safe and effective." But by what standard? There is no longitudinal history from which to draw.

2. Just what's in these injections? We know that the mRNZ Moderna experiment injection contains SM-102 designated "for research use only, not for human or veterinary use" (See: Cayman Chemical Safety Data Sheet acc: OSHA HCS. Trade Name: SM-102.) What else is in these injections, and why pump them into humans (especially children)?

3. Salk researchers confirmed that the main damage from Covid is caused by the clot-generating spike protein, not the virus. It's unclear how long these potentially lethal proteins remain trapped in the lining of the blood vessels, or what damage they might eventually do, so why inject people with a substance that teaches their cells to make spike proteins?

4. Why the Covid surge (which, on a per-capita basis, was higher than the surge that devastated India) in 4 out of 5 of the most vaccinated countries (Forbes)?

5. Why did more people die in 2021 (January through August) despite the rollout of COVID shots in December 2020?

6.

7. Researchers noted: "Overall, our data provide strong evidence that SARS-CoV-2 infection in humans robustly establishes the two arms of humoral immune memory: long-lived B cells and memory B cells." This is perhaps the best available evidence of long-lasting immunity. Yet natural immunity is downplayed in the media narrative. Why?

8. To encourage pharmaceutical companies to manufacture ground-breaking new medicine, governments use no-fault indemnity against lawsuits. Where's the protection for individuals injured from the vaccine?

9. Cardiovascular, neurological and immunological adverse events are all being reported at rates never even remotely seen before. Shouldn't the magnitude of side effects compared to other vaccination programs concern us? This is especially true in that adverse events are broadly known to be seriously under reported!

10. One's right to informed consent mustn't be bypassed. But the mainstream media narrative is quite silent about adverse effects. According to the CDC, Myocarditis, a rare condition, is occurring at a higher than expected rate in vaccinated individuals. Researchers used data from the Vaccine Safety Datalink, run by the CDC, to find 21 potential cases, 11 of which were confirmed, of Guillain-Barré syndrome (GBS) in people who got the shot. Autoimmunity and the opposing condition, metabolic syndrome, are well known adverse events caused by vaccines. The Covid injection is also paired with Creutzfeldt-Jakob (prion) disease. Shouldn't the public be fully informed of these risks and, then, decide for themselves?

A local ABC News Station posted a request on Facebook for people to share their stories. In five days, over

200K people

posted comments, all of which addressed vaccinated loved ones who died shortly after being

injected, or who are permanently disabled. Shouldn't this at the very least be looked into?

The Informed Consent Action Network (ICAN) reported that a study showed that the actual number of anaphylaxis is

50 to 120 times higher than claimed by the CDC.

Re.: Include the Covid-19 injections as part of school immunization requirements using WAC

246-105.

In September, the Singapore government awarded a teen \$225K for having a heart attack following a Pfizer shot. Over in Taiwan, second doses of the Pfizer-BioNTech jab for children, aged 12 to 17, have been temporarily halted due to myocarditis concerns. Meanwhile, in America, the director of the CDC advocates approving the jab for children, aged 11 to 15 years old; and WA wants to include Covid-19 injections as part of school immunization requirements.

So why inject healthy children when their risk is statistically insignificant? Metrics among the unvaccinated rise across

age groups, but data clearly illustrate that younger, healthy people are at little risk from the disease. Fact is, unvaccinated 18- to 29-year-olds saw deaths lower than most fully-vaccinated age groups.

Most Covid patients (70.6 percent) have one or more underlying health conditions.

Nearly 36 percent infected are obese. 31 percent suffer from chronic lung disorders, and just over 14 percent suffer neurologic disorders. COVID-19- associated hospitalization rates in children were found to be overcounted when, in fact, 45 percent of the patients

admitted to Lucile Packard Children's Hospital in California were not about Covid. There is no logical reason for forcing risky, untested injections on healthy children. Consider instead the youth who are vaccinated. In June, the CDC reported higher-than-expected rates of myocarditis among vaccinated (not

unvaccinated) youth. There were 117 cases among males 12 to 15 (when no more than five were expected).

Dr. Nicola Klein of the Kaiser Permanente Vaccine Study Center presented data regarding post-vaccination heart inflammation from the Vaccine Safety Datalink, a database from the CDC, and nine other healthcare groups, including five Kaiser Permanente facilities.

Data also showed higher than expected cases among youth following vaccination.

Yet we are expected to ignore facts and summarily dismiss legitimate concerns, as these, as misinformation perpetrated by quacks. Even if such claims ring true, who gets to decide? The answer is best found in the cliché, "Follow the money." Throughout the pandemic, nine new billionaires have been hatched. Pfizer alone estimates to profit at least 33.5 billion dollars from the Covid injections; and many medical professionals receive financial incentives to promote injections. In the United Kingdom, for example, nurses get

£10 per needle they put into a child.

Our charge is to protect children, not to use them for monetary gain. They are not guinea pigs, nor should they be treated as such.

Hello board members and anyone else it may concern,

As parents in Washington state, we say please do not mandate a vaccine to go to school!

Children are at extremely low risk for Covid.

The vaccines are still only EUA.

There are no long term studies to document any history of safety.

Studies DO now document that vaccinated and unvaccinated can both transmit Covid.

The vaccine apparently does NOT stop the spread of Covid.

The risk of injury from the vaccine is not worth it when it doesn't even stop the spread to begin with.

A mandate doesn't make any sense!

Thank you,
Katie and Josh McGuire

Hello,

I am writing to you to share my position on the policy regarding the COVID vaccine being added to current law that, as I understand it, to be a condition of attending public schools in our state. I am a longtime resident of our beautiful state of Washington as well as a taxpayer, and a constituent.

My stance on what the Board of Health will be voting on for one, I am vehemently opposed to this being added to current laws for the following reasons,

1. The vaccines are still under the EUA.
2. Families should be whom make these decisions, not the government of Washington State, the BOH, OR the Education Department.
3. The vaccines made by Moderna, Pfizer and Johnson and Johnson, have NOT been thoroughly tested as compared to other vaccines approved by the FDA that children are prescribed to take.

a. Disturbing reports of healthy individuals INCLUDING CHILDREN in OUR state have been "vaxx injured," including death, should be considered BEFORE ENFORCING upon healthy individuals, regardless of age.

I have family in this state (of all ages) who have had COVID AND survived. This includes children. I am thankful to say that NONE of them have suffered any type of medical issues and I'd really like for them to CONTINUE to be healthy, and again, for THEIR PARENTS to be whom makes those decisions how to best manage their health, not by someone in our government on whether they can go to school or not.

Thank you for your time and consideration,

Sheri Horton

To the Washington State Department of Health,

As a resident, parent, and healthcare professional I have been grieved at the handling of Covid mandates and the extreme abuse of power by our elected Governor. Covid has not and still does not pose any significant threat to children, but the lockdowns, masking and vaccines have and will continue to. Before you make more extreme decisions that will for generations affect our most precious and vulnerable, I want you to look at our states suicide rates, influenza deaths and actual deaths from SARS Co-V2 (not deaths of those who happened to have Covid-19 when they passed), reported deaths from the Covid-19 vaccine of children 18 years of age and younger.

As a nurse I am disgusted with my profession and the handling of Covid-19 in the state of Washington, as well as the deliberate fear mongering that has been perpetrated by the department of health.

You know the statistics and for every adverse effect or for all the unforeseen effects down the road, this decision should be a no brainer. The Washington State Department of Health is supposed to be non partisan entity, but it is obvious that the idolatry of the progressive left has infiltrated our health department.

The vaccine for Covid, like all other vaccines, is a decision between the parent-child and their physician.

Do better.

Subject: VACCINES IN WA SCHOOLS

External Email

Good Evening,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval.

All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization.

The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org)

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>
> Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Rubin, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>
>

Force vaccinating healthy children for a disease that doesn't affect them is plainly wrong .
Once again I want to express my strong opposition to implementing this vaccine for our
school kids in Washington state. Please do the right thing and do not require these
vaccinations for school age children.

Thank you,

7. You may “enjoy” reading this analysis from a person who does risk-benefit analyses for a living. It is estimated that, even if 28 million children are vaccinated against COVID, at most 45 lives might be saved. And there are potentially huge long term risks. What is the Number Needed to Vaccinate (NNTV) to prevent a single COVID-19 fatality in kids 5 to 11 based on the Pfizer EUA application? (substack.com

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ffacebook.com%2F.php%3Fu%3vJQzjohfru9FqayW3bRUBvM8ut5C0KTAem-xovI%26h%3DAT0DVJWg_ODDAQ6Ycs9be9DUZHYIeGRL4FMUhfq3oD7SDQ2uC0oPkGknWDU4h7AIyWvXX-S3My_t482mX6kzp3tILqJe0jNVHuJKPPIh2mJMnU_-8LpEgZFqTqWGF9kgfSs0sewgdlLS0hv2g%26__tn__%3D-UK-R%26c%5B0%5D%3DAT28I2o42t-UGQDMRgxqpTZGNf-piAFqvVedn0VrrpwefHLQWBEQR8O3WH8AtdWrgLeJW7fZkvr5BPALzpyXwhCTbC_X--BUroMqMTfGwS29wrx1O3x9vZkugoiSzWcsT0I9x8_dNIMHTctYvVTjkY5YOTXWxGzxt0o9yfo-aM7MQFIiU_OjUs9ckBakREm4RHFIPFL6Qf_BKRA7yg&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C7b8d

8. In Pfizer's initial study for older 12-17 year old kids, adverse side effects were hidden. You may or may not be familiar with the story of Maddie De Garay who volunteered to be part of the initial trial because she wanted to do her part. She is now in a wheelchair with a feeding tube and likely will be for the rest of her life. Her side effects were hidden and listed as “abdominal pain”. Even if there's an infinitesimal chance of this happening to another child, why take the risk? Comcast Censors Vaccine Paralyzed 13-Year-Old Girl (rumble.com

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ffacebook.com%2F.php%3Fu%3hJGzFr3T2h1b1pVVeAFu8uiR5bjFTXamwPKaGaY%26h%3DAT1mxk_2RodRgRRfrz99lgBAju5qf_UbZWxkTp9cPI8-OgKQ4FQbV54n4F_0xMRzoanw6lw-VzjmpRyf6TgyeNQ4pn16HHFnoI86N9A5VTKX29d1qmCasMloj3WzkOPfXQ%26__tn__%3D-UK-R%26c%5B0%5D%3DAT28I2o42t-UGQDMRgxqpTZGNf-piAFqvVedn0VrrpwefHLQWBEQR8O3WH8AtdWrgLeJW7fZkvr5BPALzpyXwhCTbC_X--BUroMqMTfGwS29wrx1O3x9vZkugoiSzWcsT0I9x8_dNIMHTctYvVTjkY5YOTXWxGzxt0o9yfo-aM7MQFIiU_OjUs9ckBakREm4RHFIPFL6Qf_BKRA7yg&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C7b8d

9. It is impossible for someone to give informed consent when side effects from the vaccines are hidden. Perhaps before you make a decision that you'll regret, you should visit this website. Adverse Reactions | Real Not Rare These are real people. Their stories are real. At a minimum, why are these being hidden and why isn't Pfizer investigating why people have these types of reactions? If you only have time to watch one of these, how about this one: Ernest Ramirez (17 yr old son) (realnotrare.com

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ffacebook.com%2F.php%3Fu%3Zj8jNALkwjIkDZCpNVaamDYb2G97DQBHIREKR2THoVuBgb8YpiCROME0vP3Y6UeCxCHFE0VXilwITIak_OxaulUK-R%26c%5B0%5D%3DAT28I2o42t-UGQDMRgxqpTZGNf-piAFqvVedn0VrrpwefHLQWBEQR8O3WH8AtdWrgLeJW7fZkvr5BPALzpyXwhCTbC_X--BUroMqMTfGwS29wrx1O3x9vZkugoiSzWcsT0I9x8_dNIMHTctYvVTjkY5YOTXWxGzxt0o9yfo-aM7MQFIiU_OjUs9ckBakREm4RHFIPFL6Qf_BKRA7yg&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C7b8d

) Do you really want to force these injections on innocent children? Do you want to cause this kind of pain to parents?

I've listened to hours and hours of testimony and information from people on both sides of this issue and the only support I've heard from adults in support of COVID vaccines for children is that they will allow us to move past this pandemic and allow a return to

normalcy.

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you,
Leoni

Hello -

I am a mother of two kids in public school, ages 5 and 8. I do not see the need to vaccinate them. Kids are not getting sick - or very few are. I have seen worse effects from the vaccine on kids than from the virus. Also, I am not interested in my child being the guinea pig for if these vaccines are harmful. If I am required to vaccinate my child. I will pull them from school and attempt to home school them although, both my husband and I work full time, so that will be tough.

I wanted to share my thoughts, as I know there is a meeting coming up to discuss.

Thanks!

To put it simply:

1. It is illegal to require an experimental vaccine.
2. Children are being damaged or killed by the Covid vaccine
3. You will be held personally liable and accountable for each and every child adversely affected by this vaccine.
4. The FDA is not willing to release their findings on the Covid Vaccine for 75 years – any guess why that would be?

I could fill this page with links to supporting statistics and data available proving the Covid 'vaccine' is not safe. You should be aware of all of this information. If not, you need to immediately step down from your position.

Dear Board Members

In regards to your upcoming January 12th meeting discussing Covid-19 injections as part of school immunization requirements, I am confident that you will follow the 'do no harm' approach when making recommendations that will affect both the mental and physical well being of the children of Washington State.

Mental Health

We have learned so much over the past 22 months from policy failures that resulted in much more harm than good in regards to our children's mental well being as a result of school closures nationwide. I hope that this valuable lesson lets us avoid doing more harm to our children from this point forward. Most parents I know will not keep their children in public school if this particular vaccine is mandated as a requirement to attend school without reasonable exemptions - as used to be allowed of all immunizations in the past. So by mandating this vaccine, you will be effectively closing school again - but permanently - for many children in Washington State. You as a public health official do not need me to send the endless references supporting the benefits of attending school in person and the harmful long term outcomes of keeping them home. A mandate of this vaccine, particularly as this pandemic has turned endemic, is clearly without question an act of 'doing more harm' to our children's mental health.

Physical Health

I entrust that you are up to date on risks and physical effects/outcomes related to children, both recovered from Covid-19 and the vaccine intended to reduce hospitalization and death. Data has strongly supported probably no deaths (certainly near zero) of healthy children. The FDA approval of the vaccine is a blessing to have as an option for children with comorbidities, but mandating a vaccine with no clear benefits to healthy patients would be public health malpractice (at the least). Current papers clearly indicate that this vaccine is more harmful than good for my sons who are very healthy adolescent males. Current papers indicate a higher incidence of myocarditis after vaccination than after infection with Covid-19 in this age group. And we have no long term data on what that means for all of these boys (and girls) years from now, as this vaccine was prematurely released (normally taking at least 10 years) to aid in the fight of a global pandemic, now arguably endemic and no longer an emergency. The current strain/variant of Covid-19 is by far the least concerning of all variants with regards to hospitalization and death, even in adults. So there is no justification in requiring this injection in healthy children. The vaccine effectiveness in reducing transmission is very weak, and certainly does not stop the spread of the virus. The most vaccinated countries in the world are spreading the virus rapidly, so stopping spread cannot be a justification for mandating this vaccine. The research supporting the adverse effect of myocarditis, particularly in my sons, is staggering. And the odds of getting myocarditis are worsening with each study. Plus the likelihood increases with each injection. This doesn't even take into account the children who have already recovered from Covid over the past year, who are at increased risk of adverse effects of myocarditis if given even one injection. Those already 'vaccinated' by the virus should certainly be exempt.

Closing Statement

Society worldwide has lost trust in public health authorities, as a result of mandates and

evolving science that has proven many of those mandate decisions to have been wrong. Part of that includes not allowing adults to make adult decisions, and this includes decisions as parents for our own children, who we know much better than the State Board of Health. Trust has even been lost towards those we once trusted most in our medical community. You have the opportunity to make recommendations to society that will be much more impactful towards public health, if you make those recommendations from a position of trust. You can gain that trust by allowing parents to have options. An example of such options has been a part of immunizations throughout Washington State history by allowing exemptions from immunizations for medical, religious and philosophical differences prior to 2020. If you feel compelled to make Covid-19 immunizations a requirement, then at a minimum allow those exemption options for parents like myself who have done extensive research into this particular vaccine, as we have with all immunizations in the past. Let us decide on appropriate immunizations with our provider that we have known and trusted for 20 years.

Thank you,
Sheila Sanders

Dear Michelle,

I cannot believe that I am even having to send this email regarding mandatory experimental "vaccinations" that have proven NOT to work, to protect children and future generations.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Proper research outside of the mainstream media will lead you to the same conclusion as

I have come to. These "vaccines" are complete unnecessary. It is government overreach to assume that all people would be okay with injecting their children with an unknown serum. It is even worse to assuming that forcing the injection will fly with citizens of the United States of America.

In a few years, once you see the repurcussions of the mystery serum, you will be happy that you chose not to force it on CHILDREN.

Respectfully,

Julie Ford

Subject: Vaccine Requirement

External Email

To whom it may concern,

I believe that a vaccine requirement for school aged children is against our American and parental rights. Being forced to inject something into our children when we don't know the long term effects on even adults would be putting our children in potential danger.

This vaccine hasn't been studied long enough for many adults to feel comfortable getting it so forcing us to give it to our children is just flat out wrong. If this vaccine requirement passes I wouldn't be surprised if you lose a ton of students. Which would also mean losing a ton of funding if I'm not mistaken and a lot of schools are understaffed already. This decision could be detrimental to the districts and our children. I'm asking, begging actually, for this not to be passed. We shouldn't have to decide between sending our children to school or exposing them to something with unknown long term effects. Not every one can homeschool and those that can't find other solutions will be forced to do something they don't agree with. Look at the recent issues with firing people due to not getting the vaccine. Struggling to find bus drivers, road workers, government departments are understaffed. Even the teachers. The same will happen here if it's forced on our children and they're the ones that will suffer the most.

Thank you for your consideration,

Lila Bliss

External Email

I am aware that you are considering the vaccine requirement for school aged children next week.

I vehemently oppose this.

Children are at a VERY low risk from covid-19 and the vaccine is still too early to know the long term effects.

To make this requirement would CLEARLY be an abuse of power.

I can guarantee that hoards of parents would remove their children from public school if this were to move forward.

Please listen to parents and do not make this a mandatory requirement.

Thank you for your consideration,

Lindsey Rude

Subject: Vaccines for students

External Email

As an educator, I do not see the benefits of inoculating students for the COVID-19. mRNA vaccines -products have been known to trigger the body's immune system to cause inflammation for the heart muscle and the lining outside the heart. These experimental vaccines have caused myocarditis and pericarditis in children. There is no safety of efficacy data for individuals 18 years and younger.

These shots wear off in 6 months and causes damage for 15 months as the body continuously produces toxic spike protein. The spike protein causes blood clots, myocarditis and pericarditis, strokes, heart attacks and neurological damage, just to name a few. Children aged 12 to 17 are five times more likely to be hospitalized with COVID jab-induced myocarditis than they are to be hospitalized for COVID-19 infection. Children have a natural immunity. That is not even being considered! Or how about early treatment if the student does become infected?

Vaccine makers are immune from liability. They are not responsible for any adverse events or deaths their products cause. Will you be responsible?

These vaccines don't stop transmission or infection. They don't stop the spreading of the virus. Getting vaccinated doesn't mean you won't get COVID.

And then there is the issue of consent. You are completely disregarding bioethics. These mandates of an experimental vaccine are explicitly illegal and inconsistent with the Nuremberg Code.

Why not build our future students with better nutritional lunches? Why not help keep their natural immunity strong?

Bottom line, as a teacher, I do not want to see my students suffer or die from these vaccines. Invest in humanity---not genocide.

As a mother of 5 school aged children, I do not support mandating vaccines that have not gone through all phases of testing. A vaccine authorized for emergency use that poses a higher risk to children than the disease itself should not be required to attend public school. If the vaccine is required, I will have no other choice but to remove my children from the WA state public school system.

Please don't make vaccinations mandatory for all school children. There are numerous sincerely held reasons parents don't want their children vaccinated that are VERY important to them. They will be forced to take their children out of school if the mandate is imposed. Children have suffered enough because of this pandemic. Please don't make it worse.

The National Vaccine Injury Compensation Program is in place for those who may be injured by a lot of vaccines and The Countermeasures Injury Compensation Program is in place to compensate people injured by the Covid-19 vaccine in particular (which is not a vaccine in the way all other vaccines that I have ever heard of are). Since Covid-19, especially the Omicron variant which is the main variant at this time, has such low incidence of injury to children; I believe the vaccine may well be more dangerous than the disease. Where there is a risk there should be a choice.

It makes me SHUDDER to think the federal government can force people to make medical decisions they don't believe are good for them. Being forced to wear a mask is bad enough but being forced to have your children injected with something that has a potential for harm is just too much. Where have our rights to make medical decisions gone? You can't see people's medical records because of HIPPA regulations but you can demand whether or not they have had an injection, and how many. It does not make sense, it seems to me it should be illegal.

Sincerely,

Rosina Robbins

Subject: Vaccine mandate for school children is a crime!

External Email

Dear Bureaucrats,

As a retired Pediatric Allergist and grandfather of 8, I must object to the proposed WA Board of Health mandate for immunizing all school age children against COVID-19.

First of all, children are at least risk for COVID-19 infection in the general population.

Secondly, the "vaccines" only have EUA approval, without the prolonged observation necessary to ensure effectiveness.

Lastly, the safety profiles of the various "vaccines" is far from settled! There is evidence of collusion and conflict of interest by the various pharmaceutical producers of the vaccines, and suspicion that the VAERS program has been very ineffective in collecting ALL reports of adverse effects of vaccine administration.

Our children depend on their responsible adults for keeping them safe, and the vaccines are not the mechanism for protection from COVID-19.

Please reject this proposal.

Vision

Equity and optimal health for all.

Mission

The Department of Health works with others to protect and improve the health of all people in Washington state.

Values

Good organizations know what they do and how they do it. Great organizations know what they do, how they do it, and why they do it. Our values are:

- * Human-centered: We see others as people who matter like we do and take into account their needs, challenges, contributions, and objectives. (NOT JUST THOSE THAT AGREE WITH YOU)
- * Equity: We are committed to fairness and justice to ensure access to services, programs, opportunities, and information for all.
- * Collaboration: We seek partnership and collaboration to maximize our collective impact. We cannot achieve our vision alone.(WHICH SHOULD MEAN YOU INCORPORATE THE OPINIONS AND VALID CONCERNS OF THOSE THAT DO NOT AGREE WITH YOU)
- * Seven Generations: Inspired by Native American culture, we seek wisdom from those who came before us to ensure our current work protects those who will come after us.(THERE IS NO SAFETY DATA RELEASED ON THESE VACCINES FOR AT LEAST 8 MONTHS-THE MANUFACTURERS WANT 75 YEARS TO RELEASE! WHAT COULD THIS BE DOING TO OUR CHILDREN??)
- * Excellence: We strive to demonstrate best practices, high performance, and compelling value in our work every day.

Thank you for your consideration,
Linda

Hello, I am an Eatonville School District employee with 3 children attending public school here. I am begging that a mandatory vaccine is not put into place for children and adults. We've already been put through enough stress at the beginning of this school year with employees. My children will not be vaccinated against Covid of any variant and will be homeschooling if it is mandated to attend. This is an unnecessary thing to put on families. We have friends in Tennessee whose children don't wear masks to school and honestly don't speak of Covid. We all need to get back to normal and mandating people get vaccinated against something that they can still get is ridiculous.

Thank you for your time,

To Caitlin Lang,

Vaccine Mandate Opposition Letter

To The Washington State Board of Health,

This letter is to inform you that I strongly oppose the proposed vaccine mandate in Pierce County. I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. There is absolutely NO COVID vaccine available in the United States has received FDA approval. ALL available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. This fear monger approach by the State of Washington and the Federal Government to force American citizens to inject an experimental drug AGAINST THE LAW and is the subject of numerous lawsuits! A Federal Judge recently rejected Pfizer's claim that the two products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable'

• Children's Health Defense (childrenshealthdefense.org)

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>

) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Targeting our children is simply another tactic to accomplish the goal of 100% of vaccination. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is

less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID! I challenge the Washington State Board of Health to show medical records for even one child who has died of COVID without co-morbidities.

3. NO ONE knows the long term risks of these vaccines. One of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM. The studies Pfizer conducted were woefully underpowered. This is an analysis of the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors. (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>) It concludes the risks DO NOT outweigh the benefits, therefore more research MUST be done before being administered to children or anyone else!

Forced vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity.

Our hospitals have more vaccinated COVID positive patients than unvaccinated, THE VACCINES ARE NOT WORKING!

If the Washington State Board of Health rules in favor of this mandate you can be absolutely certain to face legal action immediately, as this is constitutional, against the law and will be stopped!

Thank you for your careful consideration of this matter,

Kama Bigbee, PhD.

I absolutely do NOT believe that the Covid 19 vaccine should be required for children to gain entry to child care or school! PLEASE vote 'NO' on the states effort to mandate the vaccine for children. It is currently only an EUO {Emergency Use Only}, and quite clearly not efficient or effective for stopping Covid; the possible dangerous side effects resulting in permanent disability & even death, {Listen to the people who have experienced deep loss after loved ones have taken the vaccine in good faith!!}, create the need for people to make their own medical decisions in regards to any medicine put into their bodies & the bodies of the children they are charged to protect! Thank you for your time!

Subject: Vaccines for children in WA state

External Email

January 7, 2022

To whomever is considering requiring COVID-19 vaccines for children in WA state to receive schooling or childcare:

Please protect children's civil rights in WA state, I implore you to say NO to mandating COVID-19 vaccines for children in order to receive schooling and childcare. I am a WA resident, citizen, parent, and teacher. I am against your proposed discrimination against children in the worst form- stopping a child's education and ability to advance in society simply based on their vaccine status.

What WA State Board of Health is proposing, is outright discrimination against children to receive education and childcare services in WA state based on their parent's informed and rightful healthcare decision. I am against discrimination of ALL kinds- including discrimination of COVID-19 vaccine status. Denying a child an education based on any kind of status is unethical treatment of people and I stand against it. Forcing children to have a vaccine to be educated would be a systemic discrimination bully tactic, to squeeze parents to decide on a vaccine that still has potential unknown risks and does not prevent the transmission of COVID-19.

We are the moms and dads, as moms, we gave birth to these children that happen to reside in WA state. As parents we are the ones that love and care for them- it is not the place of the state to force any healthcare decision upon parents for their children.

Policies and decisions can have unintended consequences. Furthermore, what will be next? Shall a child be prevented from participating in any part of society unless they have this particular vaccine? Let's face it, WA state has a bigger problem that needs immediate attention, WA state is failing in many areas of public education in basic areas of math, science, language arts - students are graduating without basic grade level understanding of basic subjects (<https://washingtonstatereportcard.ospi.k12.wa.us/> <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwashingtonstatereportcard.ospi.k12.wa.us/>>). WA state was failing children in their education before the pandemic, I cannot imagine how over a year of children on a computer has improved these numbers and now pushing this decision. There are teacher and substitute shortages- I am actually certified teacher in the schools and if you mandate this, I would have to consider other alternatives, if you forced this mandate. Have you thought of the implications of this decision on hiring staff for schools in the future? The staffing pipeline you will not have as a result? Parents, educators and school staff, they didn't sign up for what you are

proposing. Perhaps you may want to consider the teachers and staff that will leave WA schools because of this policy, and those potential staff that will never consider teaching in your schools because of your policies.

Consider basic civil in America: Check out HHS.gov- from their website as of January 6, 2022: "What are civil rights?"

Civil rights are personal rights guaranteed and protected by the U.S. Constitution and federal laws enacted by Congress, such as the Civil Rights Act of 1964 and the Americans with Disabilities Act of 1990. Civil rights include protection from unlawful discrimination. The HHS Office for Civil Rights (OCR) enforces civil rights laws that prohibit discrimination on the basis of race, color, national origin, disability, age, religion, and sex (including pregnancy, sexual orientation, and gender identity) by certain health care and human services entities:

state and local social and health services agencies, hospitals, clinics, nursing homes, insurers who are participating in the Marketplaces and receiving premium tax credits, and other entities receiving federal financial assistance from HHS.

Under these laws, all persons in the United States have a right to receive health care and human services in a nondiscriminatory manner. For example, you cannot be denied services or benefits simply because of your race, color, national origin, or disability. For more information about these laws and our authority under them, see our Civil Rights home page."

Also, "The Civil Rights Act of 1964 is the nation's benchmark civil rights legislation, and it continues to resonate in America. Passage of the Act ended the application of "Jim Crow" laws, which had been upheld by the Supreme Court in the 1896 case Plessy v. Ferguson, in which the Court held that racial segregation purported to be "separate but equal" was constitutional. The Civil Rights Act was eventually expanded by Congress to strengthen enforcement of these fundamental civil rights."

(<https://www.dol.gov/agencies/oasam/civil-rights-center/statutes/civil-rights-act-of-1964>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.dol.gov%2Fagencies%2Foasam%2Fcivil-rights-center%2Fstatutes%2Fcivil-rights-act-of-1964&data=04%7C01%7CNathaniel.Thai%40sboh.wa.gov%7Cc4730e51abf34fd5e7c208d9d2230aaf%7C1>

Not only will you be segregating children due to their COVID-19 vaccine status, you will be excluding them from an education altogether. This will be a shameful stain on WA state's history should you enact this. Please refer to WAC 246-105-030

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapps.leg.wa.gov%2FWAC%2Fdefault.aspx?path=246-105-030&data=04%7C01%7CNathaniel.Thai%40sboh.wa.gov%7Cc4730e51abf34fd5e7c208d9d2230aaf%7C1>

. Despite getting the COVID-19 vaccine, the disease will still be transmissible, it is not preventable: "Vaccine-preventable diseases children must be protected against for full

immunization. In accordance with the conditions of this chapter, a child is required to be vaccinated against, or show proof of acquired immunity for, the following vaccine-preventable diseases before attending school or a childcare center)."

What happened to informed consent? Parents can make informed decisions for their children and if you disagree with it, that is okay, this is a free state in a free country, we are free people to decide what we want for ourselves and our children. We are the healthcare decision makers for our children. Parents have valid concerns to choose against the COVID-19 vaccine for their child and it is their family business what they decide. There is still little research on the long-term effects that could occur in children, this is a valid concern for parents, and they should be allowed to give pause to this decision. When I talked to a local pediatrician it is clear not much is known about the vaccine and children who have already had COVID-19. This, along with a host of other factors influence decision-making and these factors must remain private and respected. Parents do not need to give a reason why or "exemption status", it is a personal decision. We are still learning about adverse effects in adults, some parents are not willing to risk vaccine injury or adverse effects for their children- and this should be okay like any other healthcare decision a parent makes with informed consent.

I implore you to stop the overreach into people's lives and allow parents to make informed healthcare decisions freely for their children. Please respond and let me know you received this communication and that you will consider it when you make your decision.

Sincerely,

Michelle Hutcheson

I am writing to comment on the boards upcoming decision on the Immunization Criteria for Child Care and School Entry.

This is absolutely uncalled for since children are at a very low risk of getting serious covid symptoms. This virus is no more harmful to children than any other virus that they have brought home and spread around the schools for decades, none of which ever required a vaccine. Everyone knows this is experimental and has not been used long enough or had any form of a long term study done. We have all seen that these vaccines don't stop transmission, or keep a vaccinated person from getting the virus. It should only be up to a child's parents whether they want their children to be part of this experiment.

Thank you. I hope you make the choice to do the right thing.

To put it simply:

1. It is illegal to require an experimental vaccine.
2. Children are being damaged or killed by the Covid vaccine
3. You will be held personally liable and accountable for each and every child adversely affected by this vaccine.
4. The FDA is not willing to release their findings on the Covid Vaccine for 75 years – any guess why that would be?

I could fill this page with links to supporting statistics and data available proving the Covid 'vaccine' is not safe. You should be aware of all of this information. If not, you need to immediately step down from your position.

Vaccine Mandate/Quarantine Facility Opposition Letter

To The Washington State Board of Health,

This letter is to inform you that I strongly oppose the proposed vaccine mandate and quarantine facility propositions for Pierce County. I would like to express my extreme opposition to implementation of the UNLAWFUL COVID 19 vaccine requirement for schools in Washington State and the quarantine facility in this or any area.

1. There is absolutely NO COVID vaccine available in the United States has received FDA approval. ALL available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. This fear monger approach by the State of Washington and the Federal Government to force American citizens to inject an experimental drug AGAINST THE LAW and is the subject of numerous lawsuits! A Federal Judge recently rejected Pfizer's claim that the two products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable'

• Children's Health Defense (childrenshealthdefense.org
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&>
>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Targeting our children is simply another tactic to accomplish the goal of 100% of vaccination. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID! I challenge the Washington State

Board of Health to show medical records for even one child who has died of COVID without co-morbidities.

3. NO ONE knows the long term risks of these vaccines. One of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM. The studies Pfizer conducted were woefully underpowered. This is an analysis of the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors. (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>) It concludes the risks DO NOT outweigh the benefits, therefore more research MUST be done before being administered to children or anyone else!

Forced vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity.

Our hospitals have more vaccinated COVID positive patients than unvaccinated, THE VACCINES ARE NOT WORKING!

Furthermore, real science is showing an abundance of evidence proving that this virus and all its variance are completely treatable with proven positive results when early treatment with the correct protocols are implemented. There is absolutely no reason to INVOLUNTARY FORCE persons or groups of people/families into isolation in quarantine facilities, which will inevitably further exacerbate the problem and death tolls. This is an extreme and blatant abuse of civil liberties and will not succeed!

We stand firmly against ANY AND ALL of these proposed WAC: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105,

If the Washington State Board of Health rules in favor of these mandates you can be absolutely certain to face legal action immediately, as this is constitutional, against the law and will be stopped!

Thank you for your careful consideration of this matter,

Kama Bigbee, PhD.

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets the vaccine, one group gets a placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine. The exact text from 21 U.S. Code Sec.360bbb-3(e)(1)(A)(ii)(III) reads "of the option to accept or refuse administration of the product, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks".

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccine adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Consider additionally, the greater alienation of a growing population of Washington

homeschoolers this decision could bring. Our children need a government and health officials they can trust to put their best interest first. How will families who choose to homeschool because of this proposed COVID vaccine mandate be supported in their freedom to opt-out of public school? So far I have personally only encountered red tape and a general lack of concern for the education of any child whose parent un-enrolls them from the public school system.

It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time.

Good evening!

I'm writing you to ask that you please consider my plea. Children are at no grave risk of this virus- not enough to warrant a vaccine!

Please leave this choice up to parents. Please keep schools a diverse place - where opinions and parents choosing what is right for THEIR family is honored.

The fear has gotten so bad that we are forgetting the facts!! Please no mandatory vaccines!!!

Good afternoon,

I SUPPORT Informed Choice Washington's Petition for Rulemaking -the petition is item 11 on the January 12th agenda. It was filed by Xavier Figueroa, PhD, on behalf of ICWA, and asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

NO ONE SHOULD CONTROL WHAT GOES IN TO MY CHILD BESIDES ME!

Sincerely,

Marissa Bollinger

Hello I would like to comment on your proposed vaccine mandates for children and teens. Very few children die of covid. More young people die of fentanyl ODs than covid. We do not know the side effects of the vaccines. Please don't force these children to take something they don't need, this should be up to the parents not the government. Thank you Irene Randall

How can anyone possibly subject children to an experimental vaccine that has not gone through the established protocol and trials to ensure the safety of these children? Especially when these drug companies and the FDA asked for a 75 year delay on releasing the vaccine ingredients.

A federal judge on Thursday ordered the U.S. Food and Drug Administration to produce, at a rate of 55,000 pages per month, the documents it relied on to license the Pfizer-BioNTech COVID-19 vaccine

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fm.theepochtimes.com%2Ft-covid-19-vaccine&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C3f8e1efd944a4182c94608d9d1fec4fd%7C11d0e21720>>
.

The rate of 55,000 pages a month would mean the FDA

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fm.theepochtimes.com%2Ft-fda&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C3f8e1efd944a4182c94608d9d1fec4fd%7C11d0e21720>>
has just over eight months to fully produce all of Pfizer's pre-licensure safety data. That is much faster than the 500 pages-per-month rate the FDA proposed in December 2021
<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fm.theepochtimes.com%2Ft-fda-says-it-now-needs-75-years-to-fully-release-pfizer-covid-19-vaccine-data_4145410.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C3f8e1efd944a4182c94608d9d1fec4fd%7C11d0e21720>
. That rate would have effectively given the agency roughly 75 years to fully produce the data, Aaron Siri, a lawyer working on the case, previously observed
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.sirillp.com%2Fwp-doubles-down-asks-federal-judge&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C3f8e1efd944a4182c94608d9d1fec4fd%7C11d0e21720>>
.

U.S. District Judge Mark Pittman ordered the FDA to produce more than 12,000 pages on or before Jan. 31, which was what the FDA had proposed in part. Pittman then ordered the agency to "produce the remaining documents at a rate of 55,000 pages every 30 days, with the first production being due on or before March 1, 2022, until production is complete."

"Here, the court recognizes the 'unduly burdensome' challenges that this FOIA

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fm.theepochtimes.com%2Ft-foia&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C3f8e1efd944a4182c94608d9d1fec4fd%7C11d0e21720>>
request may present to the FDA ... But, as expressed at the scheduling conference, there may not be a 'more important issue at the Food and Drug Administration ... than the pandemic, the Pfizer vaccine, getting every American vaccinated, [and] making sure that the American public is assured that this was not rush[ed] on behalf of the United States.

"Accordingly, the court concludes that this FOIA request is of paramount public importance," Pittman wrote in the order (pdf

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.sirillp.com%2Fwp->

content%2Fuploads%2F2022%2F01%2FORDER_2022_01_06-9e24e298ae561d16d68a3950ab57077b.pdf&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C3f8e1efd944a).
)

The FDA did not immediately respond to a request for comment on the latest ruling.

"To Whom it may concern,

I'm not fully vaccinated and that was my choice. After seeing the ineffectiveness of the vaccine first hand, I question this push and what's behind it. The vaccine is NOT FDA approved because it hasn't gone through the rigorous testing necessary for approval. In addition, never in the history of vaccine approval has one been approved with less than a 50% effectiveness. In addition, mandating unapproved vaccines to children K-12, who have a 99.9995% survival rate without having had the vaccine, is unthinkable and negligent.

New information from VERS shows us that negative reactions to the vaccine are much higher than previously reported, especially in children and young adults, and most independent virologists believe those numbers are still underreported by as much as 80%. Dump this irresponsible idea and start working with scientific evidence instead of following political incentives. The unforeseen consequences of your actions to mandate will be on your heads and we will hold you responsible for the repercussions."

Covid shots should NOT be a requirement for children attending public OR private school in Washington state. Covid is not a danger to young children, and the shot is still only authorized under emergency use. I am concerned for the health of our children if this becomes a requirement for children to attend school. Please do NOT make the covid shot a requirement!

Sincerely,

Katie

To whom it may concern -

This is my public comment for the upcoming meeting on adding the Covid Vaccine to the line of up required vaccines for K-12 education.

According to the Board of Health's own criteria, a vaccine must be fully FDA approved in order to make it mandatory for school attendance. The current Pfizer vaccine in use for children in this country is still an Emergency Use Authorization only vaccine, so I do not see how this meets the Board of Health requirements. I recommend against mandating for school until the vaccine proves immunity to stop transmission like other common vaccines do, which was the requirement under consideration in the 1905 Jacobson vs. Massachusetts SCOTUS case in which it stated mandates could only be considered which "prevent the spread of contagious disease." So far, it is evident that this vaccine does not stop transmission and, therefore, should NOT be added to the list of vaccines needed.

More and more parents are pulling their children from public school due to the mandates and vaccine requirements. I know I'm just one person but what goes in my body and my children's body is my choice. Please consider our children and that they determine our future. Vaccine mandates will lead to unhealthy children and thus an unhealthy adult population.

Thank you for your time.

I think it would be extremely imprudent to force a vaccine on Children considering they are at extremely low risk of getting covid and if they do get it they have very mild cases. Please don't turn our children into involuntary lab rats. We do know young men are experiencing heart health issues associated with the shot. Error on the side of caution.

Dear Board Members,

It has come to my attention that WA Board of Health will be discussing Covid-19 shot mandates for schools and recommendations for forcible quarantine and/or detention of those that disagree with policies. As a parent to 7 children in this State, I request that you abandon the plan of forming a technical advisory group to explore COVID19 mandates and adopt a new rule of requiring products to have completed Phase 3 clinical trials before they can be added to list of school requirements.

For almost 2 years we have attempted to follow the health recommendations of washing, masking, distancing, testing, isolating and vaccinating. By now it is apparent that the virus is "gonna virus" regardless of measures attempted. Thankfully, SARS CoV2 is acting in similar manner as all other viral pandemics and becoming more "virulent" (spreads easier) but less deadly. Real immunity is achieved with exposure and recovery as is evidenced by fact that those infected with SARS in 2002/3 cannot become infected with SARS CoV2 today! In contrast, Covid19 has managed to find a way to escape the vaccine as is evidenced by the incredibly high numbers of vaccinated and even boosted individuals getting sick and testing positive. Surely this fact has not escaped your knowledge!

As Health Board members, you are obligated to provide us with facts that support any and all recommendations or requirements.

- 1) what is the current rate of mortality for COVID19 infection and stratified according to age groups?
- 2) point to ANY measures that have reduced the numbers of fatalities (cases are not fatalities).
- 3) what is rate of all cause mortality in WA in 2020 and 2021?.....did the measures imposed reduce the number of deaths from prior year?
- 4) provide evidence of asymptomatic spread of SARS CoV2.
- 5) provide safety studies for masking children and randomized clinical trials for masks preventing spread of lab-confirmed upper respiratory viruses (not modeling of masks on mannequins).
- 6) make public the accuracy of testing - what is the rate of false positives and false negatives of tests and were results determined by manufacturers of the tests or unbiased 3rd party investigators?
- 7) provide evidence that the vaccines prevent infection and transmission and that they improve health of individuals who receive them compared to those who do not.
- 8) explain why so much focus on eliminating this 1 virus when human immune systems have successfully protected our growing population since the beginning of time? Are you aware that some viruses are beneficial for humans and can protect against various forms of cancers and heart issues? Did you know that your human virome contains over 380 TRILLION viruses?

I do not doubt that as members of WA State Health Board that you truly desire to improve the health of Washingtonians. However, I do not trust that you have carefully investigated and logically determined adequate and measurable health remedies for which you are able to provide evidence. Before doubling down on measures that seem to HARM more than they HELP the overall health of citizens, please determine and make

public the evidence to justify any policies.

Regarding mandating shots, know that the clinical trials will not be completed until 2023. Know that WA State has a legal definition of a vaccine that the C19 shots do not fulfill as they were never part of a living microorganism nor do they prevent transmission or infection of disease.

"Vaccine" means a preparation of killed or attenuated living microorganisms, or fraction thereof, that upon administration stimulates immunity that protects against disease and is approved by the federal food and drug administration as safe and effective

<https://app.leg.wa.gov/RCW/default.aspx?cite=70.290.010>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx?cite=RCW%2F9A.04.010&context=1&ad=US&as=US&lang=en>

Finally, what is the real rate of adverse effects following these EUA products and how can you determine if the safety studies have yet to be completed and there is no transparency of adverse event reporting?

Furthermore, how necessary or even safe is it to give a vaccine to a person who already has immunity to the pathogen? Most children by now have been exposed to the virus and have developed immunity without difficulty. Why consider a mandate for those not at high risk for adverse outcome should they become infected but who carry unknown risks of adverse reaction with getting the shot?

I look forward to hearing these concerns addressed and evidence for any and all recommendations to be presented when I tune into your meeting on January 12.

Thank you,
Jennifer Gould

Hello there,

I am the parent of a 6 year old healthy, intelligent, wonderful little boy who means the entire world to me and our family. He will not be getting this experimental Covid vaccine. This vaccine has NOT been shown or proven to be needed for young healthy immune systems like his. If forced by our Washington governor, who I believe has completely overreached his "emergency power", we will be moving out of state. Period. This state will lose revenue, the school attendance will drop even more that it has. We are among the higher percentage of parents who will not allow experiments on our children. Please, OPPOSE mandating the Covid vaccine on our children!

A very concerned parent,
Kylie J. Zepp

To Whom it May Concern;

I am emailing everyone here due to the vaccine mandates. I hear its now coming down the line to our school aged children. I am hear to tell you now that if this is something you think that public schools need to do, you may want to think twice about that. Public schools are supported by a large part of our tax paying dollars. I will tell you now that if this is implemented into schools, there will be a lot of people out of jobs because there is a larger part of our communities that do not believe in vaccinating our children then you even think!

What happened to my body my choice...does that now only apply if we are picking our genders?

Trying to force this upon OUR children is sickening. They say history repeats itself well you all better read up on past history and trying to control people and segregate them. Instead of religion or race, now its by vaccination status!

There are lots of unknowns with this vaccine, we need at least 5 years to testing/research before we can really understand any risks. Peoples immunities after getting COVID, is critical to saving lives from this disease. I am telling you that there are a lot of parents who will not their child/children to part of the most radical medical experiment in human history. I'm willing and my family is willing to risk it because the analysis isn't even close to being done. There is no way anyone is going to force their beliefs on my child!

There is going to be a lot of schools without students!

Thank you for your time,
Jamie Fernald, Concerned parent

Science tells us that school aged children experience little or no symptoms with any of the Covid-19 variants. Decisions as to the requirements of a vaccine are the responsibilities of the parents. Every child's case should and is based on that individual child.

If you mandate an experimental vaccine on school age children you will be held personally responsible for violating civil rights laws and federal laws that regulate forcing experimental vaccines onto children.

You are not protected by your job decisions when you act in negligence.

Thank you, Mark Greene

Subject: Vaccine mandates for WA schools is WRONG

External Email

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets the vaccine, one group gets a placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine. The exact text from 21 U.S. Code Sec.360bbb-3(e)(1)(A)(ii)(III) reads "of the option to accept or refuse administration of the product, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks".

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccine adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Consider additionally, the greater alienation of a growing population of Washington

homeschoolers this decision could bring. Our children need a government and health officials they can trust to put their best interest first. How will families who choose to homeschool because of this proposed COVID vaccine mandate be supported in their freedom to opt-out of public school? So far I have personally only encountered red tape and a general lack of concern for the education of any child whose parent un-enrolls them from the public school system.

It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time.

I am writing as a resident of Washington state to let you know my feelings on this unconstitutional and tyrannical overreach of power you think you have. Gov Inslee has obviously led you to believe you're more powerful than you actually are.

You have no right deciding what is best for our children. You are not the parent, grand parent or guardian. You are a public servant, hired and paid for by the people. and guess what, you're doing a very poor job and really pissing the people of Washington off.

Children have a 99.9% chance of surviving covid. They do NOT need an experimental drug injected into their innocent bodies due to your crazy beliefs that you are protecting them. AGAIN, not your job! Covid is being spread by both the vaxxed and unvaxxed, so what's the point? You're falling into the tyrannical beliefs of our government, leading you to false thinking that you're doing the best for everyone, when time and time again, it's proven to be not the case.

Over the years, many experimental drugs have been pulled off the market due to lack of study, illness or even death. But we don't like to talk about that because it might upset someone and cause them to think on their own. Nope, definitely don't want the people to do that!

Give this shot 10-20 years of long term effect studies and bring this idea back to the table. Our children are not guinea pigs and I refuse to allow you to act as if they are.

To date, 55000 children have been pulled out of public schools here. If this ridiculous idea is pushed through, I believe you will see a mass exodus from public schools and Washington state. At \$17000.00 dollars per enrolled child, do you really want to push it and see how many more will leave the public system?

We the people have the power to bankrupt your school system and I'm really not sure you want to see how far we will go to protect our children.

Please reconsider and drop this ridiculous notion of protecting our children. You're doing just the opposite.

Sincerely,
A concerned parent and tax payer.

Please do what is best for our children and vote no to Covid vaccines being required to attend school. Parents should be able to make these choices for & with their kids. It should not be made mandatory.

1. COVID vaccines remain under Emergency Use Authorization. This is not a proven vaccine. We don't know what all the side effects will be in 3, 5 or 10 years. We have already witnessed some terrible reactions & deaths in adults & children.
2. Children under the age of 18 have a 99.995% survival rate from COVID infection. Covid does not react the same way with kids. Why would you give your kids a vaccine that has unknown & harmful side effects, when they have a 99.995% survival rate from Covid.
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19. Plus the unknown & already known side effects & deaths.

I am a retired teacher & I would absolutely not be part of giving this vaccine to students. This is not the schools job. I would not want to be responsible for these side effects or even deaths to our children. This decision should be made by the individual families.

Thank You for your time & please do what is best for our kids. Vote no to this mandatory vaccine rule for our kids to attend school. I'm expecting to see many home school families, if this requirement goes through. I hate for kids to miss out on learning experiences & the fun of their school days.

I strongly oppose vaccine requirements for children. It is so totally contrary to science—that ubiquitous catch phrase. Not only are children at extremely low risk for Covid, the vaccine itself is still not fully proven. I see this as another heavy-handed attempt to force government control on a non-compliant public.

Sincerely, Mark Sartori

Subject: Vaccine Rules Considerations

External Email

To SBOH and Board Members.

I would like to submit a comment concerning the WAC 246-100 series (5) and also requirements or 'recommendations' related to public school children receiving the coronavirus 19 shot as a requirement to attend school.

The 'Covid -19 "vaccine" as it is being called is Experimental and Under Emergency Use Authorization, is an mRNA gene therapy (all iterations including Janssen which is more traditional) and is in it's third stage of trial, of we, the public citizens being the third stage test subjects. As such, every person who is eligible to receive such injections must be made aware of the potential side effects, adverse reactions and/or death that can occur, and cannot be coerced against their will to take such injections, since they are/would be participating in an *experiment* of which we do not know the long term outcomes.

Therefore, children should not be required to have the shots for school entry nor should any citizen be detained against their will for not taking said injection if that is the mindset of the State Board of Health, the Washington State Dept of Health or any County boards of health.

Nor should any citizen or individual of Washington State be detained against their will. Education about self isolation and self care (staying home when sick) is much more effective and the best way to go (ads by the Ad Council in public places?). All of this just comes down to grandma's basic common sense.

At present, the outdated injections are completely ineffective for the current strain of coronavirus - Omicron;

Have a *HUGE* amount of adverse events including deaths associated with them;

Are now well known to cause myocarditis and pericarditis in young adults, particularly males;

Don't stop people from catching the virus because the injection fails after three months;

Don't stop people from spreading the virus;

Cause those injected to develop antibody dependent enhancement making them more prone to the coronavirus

As mentioned at the top of the list, the injections are obsolete.

Thank you for considering this matter, please feel free to forward my comments to any concerned parties.

Subject: Vaccine requirements

External Email

My family strongly opposes requiring the Covid-19 vaccine to attend school. All other required vaccines have had a MINIMUM of 10 years of studying for efficacy, and side-effects before becoming a required vaccine.

The small pox vaccine was first developed in the late 1700's, and was not mandated for almost 200 years later, in the mid 1900's.

Polio took nearly 50 years.

We simply do not know any longterm effects this vaccine will have on our children. I personally know a 14 year old girl who lives in Spokane, who days after receiving her second shot fell to her knees screaming in pain that her heart felt like it was going to explode, while she was playing basketball. She is now unable to play her favorite sport.

There are MANY reports of adverse reactions to the vaccine in children, including myocarditis, seizures, paralysis, etc.

More children have been harmed by the vaccine than have been by the virus itself.

If the vaccine becomes a requirement for school, we will pull all of our children out of the Peninsula School District.

Please do NOT vote to make this vaccine a requirement to attend school, and do not vote

for the state to have the power to forcefully quarantine, separate families, and administer vaccinations against people's will.

Hello,

I am writing to you to share my position on the policy regarding the COVID vaccine being added to current law that, as I understand it, to be a condition of attending public schools in our state. I am a longtime resident of our beautiful state of Washington as well as a taxpayer, and a constituent.

My stance on what the Board of Health will be voting on for one, I am vehemently opposed to this being added to current laws for the following reasons,

1. The vaccines are still under the EUA.
2. Families should be whom make these decisions, not the government of Washington State, the BOH, OR the Education Department.
3. The vaccines made by Moderna, Pfizer and Johnson and Johnson, have NOT been thoroughly tested as compared to other vaccines approved by the FDA that children are prescribed to take.

a. Disturbing reports of healthy individuals INCLUDING CHILDREN in OUR state have been "vaxx injured," including death, should be considered BEFORE ENFORCING upon healthy individuals, regardless of age.

I have family in this state (of all ages) who have had COVID AND survived. This includes children. I am thankful to say that NONE of them have suffered any type of medical issues and I'd really like for them to CONTINUE to be healthy, and again, for THEIR PARENTS to be whom makes those decisions how to best manage their health, not by someone in our government on whether they can go to school or not.

Thank you for your time and consideration,

Sheri Horton

Dear representatives,

I have only recently been informed that there's an upcoming meeting regarding WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, and WAC 246-105. It is entirely likely that many people will not be made aware of this upcoming meeting and so while I rarely take it upon myself to voice my concerns in a public manner I feel it my duty since many may not be able to submit their concerns in time. WAC 246-100-070 reading something to the effect of " Allow law enforcement officers to INVOLUNTARILY DETAIN PERSON OR GROUP OF PEOPLE TO BE ISOLATED IN A QUARANTINE FACILITY". The reason for the capitalized letters is to stress the significance of this type of language. I'm a bit shocked at both the idea of people and families being detained involuntarily and that someone thinks this would actually be helpful for our state right now, seriously?. At this point it is not sounding like a health issue and more like a constitutional issue. I really hope that everyone involved in this process can read the room and realize that this is not just a divisive option, but one that, at least in my opinion after nearly two years of a pandemic, is not going to yield many health benefits, but will certainly create further political, economic, and governmental division and strife. I think it would be likely that not only would Washongtonian be adversely impacted but it would begin to involve the federal government as well. If this proves to be the case I will be pulling my four kids out of public school, moving my business, and be leaving Washington. I have lived in Washington my whole life and have issues with some policies as anyone would have, but I have never considered leaving until now. I pray you have wisdom and guidance because I know it's not an easy position to be in. God bless!

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.
 2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.
 3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)
- Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you,
Nancy Decker

To put it simply:

1. It is illegal to require an experimental vaccine.
2. Children are being damaged or killed by the Covid vaccine
3. You will be held personally liable and accountable for each and every child adversely affected by this vaccine.
4. The FDA is not willing to release their findings on the Covid Vaccine for 75 years – any guess why that would be?

I could fill this page with links to supporting statistics and data available proving the Covid 'vaccine' is not safe. You should be aware of all of this information. If not, you need to immediately step down from your position.

Sincerely,
Nancie Thorne

Subject: Vaccine Mandate for Children

External Email

To the WA State Board of Health,

You have no business making vital decisions about our children's lives with an experimental drug. Given that there is an overall 99.8% survival rate for anyone who does become ill, it is beyond me that you are trying to justify and force an unapproved COVID-19 shot that has proven to be ineffective. Pfizer, Moderna and J&J don't have a vaccine that works and should not be forced on anyone! How about if you fight for our children and demand further studies on the so-called vaccines and look into alternative and preventative protocols.

If there was an actual vaccine that worked like the MMR, Chickenpox, Tdap and HPV this would be a different conversation. Unfortunately, all these knee jerk reactions are costing a lot of division and mistrust.

Sincerely,
Nancy Duvall

Subject: Vaccine mandates for WA schools is WRONG

External Email

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets the vaccine, one group gets a placebo. More people died in the Pfiizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

21 US Code 360BBB protects one's right to refuse any emergency use authorized medial products, therefore it is illegal to mandate an EUA vaccine. The exact text from 21 U.S. Code Sec.360bbb-3(e)(1)(A)(ii)(III) reads "of the option to accept or refuse administration of the product, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks".

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccines adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Consider additionally, the greater alienation of a growing population of Washington homeschoolers this decision could bring. Our children need a government and health officials they can trust to put their best interest first. How will families who choose to homeschool because of this proposed COVID vaccine mandate be supported in their freedom to opt-out of public school? So far I have personally only encountered red tape and a general lack of concern for the education of any child whose parent un-enrolls them from the public school system.

It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time.

I am writing as a resident of Washington state to let you know my feelings on this unconstitutional and tyrannical overreach of power you think you have. Gov Inslee has obviously led you to believe you're more powerful than you actually are.

You have no right to decide what is best for our children. You are not the parent, grandparent, or guardian. You are a public servant, hired and paid for by the people. You are doing a very poor job!! The state of Washington is getting pissed off!!

Children have a 99.9% chance of surviving covid. They do NOT need an experimental drug injected into their innocent bodies due to your crazy beliefs that you are protecting them. AGAIN, not your job! Covid is being spread by both the vaccinated and unvaccinated, so what's the point? You're falling into the tyrannical beliefs of our government, leading you to false thinking that you're doing the best for everyone. When time and time again, it's proven to be not the case.

Over the years, many experimental drugs have been pulled off the market due to lack of study, illness, or even death. But we don't like to talk about that because it might upset someone and cause them to think on their own. You definitely don't want the people to do that!!

Please give this shot 10-20 years of long-term effect studies and bring this idea back to the table. Our children are not guinea pigs and I refuse to allow you to act as if they are.

To date, 55000 children have been pulled out of public schools here. If this ridiculous idea is pushed through, I believe you will see a mass exodus from public schools and Washington state. At \$17,000.00 dollars per enrolled child, do you really want to push it and see how many more will leave the public system?

We the people have the power to bankrupt your school system and I'm really not sure you want to see how far we will go to protect our children.

Please reconsider and drop this ridiculous notion of protecting our children. You're doing just the opposite.

Sincerely,
A concerned parent and tax payer.

Subject: Vaccine mandate/ involuntary quarantine WAC 246-100 And WAC 246-105

External Email

I oppose WAC 246-100 Rule that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

This is a violation of human rights and I strongly oppose the inception of this rule. Our children have gone through enough struggles through this pandemic and being forced to inject something into their bodies without our consent sends a message to our children that they no longer have a choice over what happens to their bodies. Let me make a stand on my own independent thoughts and retain my choice to participate in what can and has been a life changing decision for many who are no longer with us or still suffering adverse reactions of this vaccine.

Please hear the voice of those that wish to maintain freedom of choice!

Sincerely,

Angela Anderson

To Kelsie Kahler,

Vaccine Mandate Opposition Letter

To The Washington State Board of Health,

This letter is to inform you that I strongly oppose the proposed vaccine mandate in Pierce County. I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. There is absolutely NO COVID vaccine available in the United States has received FDA approval. ALL available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. This fear monger approach by the State of Washington and the Federal Government to force American citizens to inject an experimental drug AGAINST THE LAW and is the subject of numerous lawsuits! A Federal Judge recently rejected Pfizer's claim that the two products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable'

• Children's Health Defense (childrenshealthdefense.org)

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>

) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Targeting our children is simply another tactic to accomplish the goal of 100% of vaccination. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is

less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID! I challenge the Washington State Board of Health to show medical records for even one child who has died of COVID without co-morbidities.

3. NO ONE knows the long term risks of these vaccines. One of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM. The studies Pfizer conducted were woefully underpowered. This is an analysis of the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors. (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>) It concludes the risks DO NOT outweigh the benefits, therefore more research MUST be done before being administered to children or anyone else!

Forced vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity.

Our hospitals have more vaccinated COVID positive patients than unvaccinated, THE VACCINES ARE NOT WORKING!

If the Washington State Board of Health rules in favor of this mandate you can be absolutely certain to face legal action immediately, as this is constitutional, against the law and will be stopped!

Thank you for your careful consideration of this matter,

Kama Bigbee, PhD.

This is an email to strongly encourage you to vote NO on any mandate for children regarding the covid vaccine. It has not been studied enough for children and children do not need this so-called vaccine to protect them. They have done quite well if they have tested positive.

Also, I would strongly encourage a NO vote for any mandate that would quarantine against someone's will! That is blatantly against our civil rights and our constitution! It will only encourage violence and increase the distrust in the government of this state. The recovery rate for someone who has contracted covid-19 or one of its variants is almost 100%! There is no reason to be so heavy-handed against the people of this state.

Thank you,

Kim Spain

Our family is 100% against requiring any COVID vaccination in order to attend school. Everyone in our family has had Covid with very mild symptoms but for those members of our immediate and extended family that have had the vaccine, the reactions have been significant. These vaccinations have proven that they do not limit the spread of COVID. These Covid vaccines should absolutely not be required in order to attend public schools unless the schools are going to be held 100% liable and any and all adverse reactions from the vaccinations. Mandating these vaccines is only putting corporate pharmaceutical profit over public health which is particularly abhorrent when we place that above the health of our children.

Should this be a requirement, we are prepared to leave Washington state as it will become absolutely clear that in Washington State, fear outweighs science.

To the members of the BOH,
I appreciate the job you have to do. When considering vaccine mandates for children--or ANYONE--please keep in mind that you do not know the personal medical history of each and every person. What is good for one person, is not necessarily good for another. Our family had covid, as we have had many other illnesses. We are fine. If you focus on vaccines rather than living healthy lifestyles, which benefits everyone, we will pull our children from school and move away from this state.
Regards,
Lisa Evans

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

The Moral Case Against the Mandate

Reflections on the Mandate to Receive the COVID Vaccine—~~an~~**fram** Ethical Perspective.

INTRODUCTION

Allow me to introduce myself. Alutiiq. Poet. Mother. Amateur philosopher. By all means not a scientist or researcher. As a person who has spent the last 45 years learning from various spiritual paths, I want to speak of morality and ethics, the sacred and the spiritual. I am by no means an expert on these as well, but I have come to certain conclusions and truths on my spiritual journey. These are my opinions alone and do not represent any organization, endeavor, or person I may be associated with.

Most importantly, I am judging no one. I understand this is a matter of life and death and do not stand as any authority. Most of us work for a living. Many of us make decisions based on benefit to our children. People just cannot be faulted by making decisions to the best of their ability. I do not even judge the world leadership but simply state the old adage, there but for the grace of God go I.

This article will only deal with those dimensions with which I am familiar. I leave the veracity of current science to those experts. I believe in the truth of science and that it will always continue to progress and grow as we humans learn more, and continue to question the world we live in.

So my reason for this article is simple. I want to delineate the reasons I believe the mandate to receive a vaccination is not a moral directive. Explain why it is unethical. To try to write about why it is unspiritual. I believe in the end, it can really be called an immoral command. The vaccine may or may not be helpful and I am not touching on that. That is really far beyond my expertise. I am just writing about the morality of these mandates and frankly, I never thought my obscure long-term study of various religions and spiritual paths would ever be relevant--but live and learn. I guess it seems pretty relevant now. These are my sincere opinions and perhaps not a single soul will share them but I am fine with that.

THE PHILOSOPHY OF COLLATERAL DAMAGE

To truly understand the mindset of those who lead civilization, I think it is important to understand one phrase: "Collateral Damage." In most world affairs, if leadership has to sacrifice an individual, they will for the good of the system. A child in Syria accidentally killed. Civilian deaths in war. People killed by stray police bullets. Now those we know of some who suffer reactions to being vaccinated, whether many or few. All of it seems excused as "Collateral Damage" by leadership.

I personally feel the leadership does not wish people harm but they make the decisions

they do because of cost effectiveness and keeping the "system" intact and running. If someone inadvertently gets harmed they shrug their shoulders. "Oh well. What can you do?" or "We really don't have a choice--it's the only way to move forward."

My argument is that we should never allow a few individuals to be harmed for the good of the order. We need to seek other methods that don't involve harm to people. This is just plain wrong. Immoral and unethical. Evil...as it were.

NECESSARY LOSSES

I assert there can be no sacrificed people or "necessary losses" in a moral system. What I mean by this is it is not okay to give permission for someone to be hurt in order to avoid another hurt. This seems to be what we are doing with the vaccine mandate. The idea is, "Since many people are helped, a few people can be sacrificed." Even one person forced to take something that eventually harms them is too many. We must do better.

Granted, a moral system might seem too expensive or cumbersome to many in charge. But that in itself does not make anything right. It just means it is harder. More difficult. Requires a bigger effort to figure out a way to deal with the problem. To rather figure out a way to deal with the pandemic without forcing anyone into a harmful position. But to leadership that would be too expensive. It would change the nature of society. Most world leaders probably cannot even imagine what that would be like.

One answer is to remove mandates and instead allow each person to determine risk for themselves. Instead it is "my way, or the highway, and if you are one of the few that comes to harm it is a necessary loss." I say no. That is just not right. That is evil. We cannot throw away anyone. We can do better.

RUGGED INDIVIDUALISM

The answer is not rugged Individualism—every person for themselves. The answer is not the opposite either, a mandate that will help a majority but harm a minority. That is not a moral way to proceed. How then?

I cannot say and don't have the answer. I just know that a mandate like it is enacted is not moral and the people involved have got to come together and be honest that "first do no harm" applies to everyone, not just physicians. I've spent my life trying to determine what morality is and I am still not there. However, I am certain of one thing. This is not it.

ALL BEINGS ARE SACRED

Most sacred texts and spiritual paths assert that all people are sacred. Some go further and assert all beings are sacred, such as Buddhism. A few even assert all living things are sacred, such as in some older indigenous religions. If it follows that all people are sacred, then that means we cannot put a few people in the category of expendable.

One of my favorite texts from the new testament is Luke 12:6: "Are not five sparrows sold for two pennies? Yet not one of them is forgotten by God." For me this text tells of a Divine Spirit in which even a small sparrow is important. This small bird's life matters to the divine. In the world of the sacred it matters.

For me, the mandate seems to be contrary to the philosophy that holds life sacred found in this verse. The mandate implies that a few are expendable. That a few people's deaths are okay as long as a greater goal is reached. For me, I am incredulous about this, because it seems leadership wants us to move past a concern for individuals. I just do not see this attitude that some people are expendable for a greater good as right. I just do not. Further, this choice of the "least harm" seems to be the province of serial killers

and sociopaths. People who see the world not as a multitude of sacred beings but rather a bunch of cars, or a machine that can be taken apart and put back together with ease.

SCAPEGOATING

I've noticed scapegoating of those against the mandate. "They are horrid Trump supporters." "Deplorables." "Uneducated." "Don't understand anything." "Don't believe in Science." "Don't care about their fellow humans." I see a whole group of people has been scapegoated. Dehumanized. The mandate only reinforces this hateful mindset. This mindset is pretty simplistic to be honest. It is never okay to wish death or harm on our fellow humans. Even if one is scared. Maybe especially if one is scared.

CENSORSHIP

I'm also noticing censorship. From the beginning I have sought out all scientific writing and testimony—even information not approved to run on mainstream media. I wanted to try and understand the complexities and will still try and understand the science now and as it continues to emerge. But I have a moral problem with a clamp-down of discussion. This is paternalism.

Yes I know that if we open discussion we will have those without education and those interested in conspiracy theories involved in the conversation. But if we completely clamp down conversation we are no better than any state attempting to silence true discourse. How can something like that be justified, even in a pandemic like we have. For me, the current censorship seems immoral.

A CIVILIZATION BASED ON BULLYING

Another factor to consider is whether the current system in place is even moral to begin with? In a quick look at our nation, we started by enslaving Africans and committing genocide on the Native American inhabitants of the land. We continue to bomb other nations and were the only country to have dropped a nuke on two cities. It is really hard to see a moral backdrop to our youthful nation. Maybe freedom is a good thing but it should never be at the expense of others. Never.

THE NUMBER OF THE BEAST

I've also seen a lot of people being ridiculed online for quoting Revelation 13: 16-17: "It also forced all people, great and small, rich and poor, free and slave, to receive a mark on their right hands or on their foreheads, so that they could not buy or sell unless they had the mark, which is the name of the beast or the number of its name." First there is no cause to ridicule these people who have sincere belief.

Myself, I see the passage as figurative, not literal. For me it represents a system that has gone wrong, a system that does not have regard for human life. It so aptly describes the conflict between a dehumanizing regime and an individual. So in that sense I do believe that the mandate, and the government behind it can be seen as the "Beast."

For me, this conflict is becoming very real with many having to choose between their jobs or taking a health risk. To mandate that people must be forced to take that risk could be seen as this kind of evil. In this case the government completely disregards individual situations, individual needs to stay alive to care for children, and other important directions in these lives. In a sense it really is the number of the beast. Given modern history, it does not seem too far a stretch.

GREED AND PROFIT

I am going to guess that the main reason the government does not look at other options

rather than the mandate are because it will cost too much and be too difficult. People would have to stay home for a while. Business could not run as usual. It would just cost too much to be feasible in our current system. The cost to save everyone is too much.

I agree that the system cannot survive without the mandate. But that only means the system must change so that everyone has an equal chance. Another of my favorite passages is Matthew 19:24 "Again I say to you, it is easier for a camel to go through the eye of a needle, than for a rich man to enter the kingdom of God" and Matthew 6:24 "No one can serve two masters. Either you will hate the one and love the other, or you will be devoted to the one and despise the other. You cannot serve both God and money." To me it is clear that the current system and the current mandate is based on keeping a financial system going rather than caring for each individual as a sacred person.

CONCLUSION

These are just a few moral arguments against the current mandate. I am an avowed person of peace, and hope that these ideas will catch on with a few people. However, even if not, I believe the way forward is not in bullying, name calling, or imperialism and using force to get our goals met. I truly believe education, human decency, and compassion are the only paths forward.

Covid shots should NOT be a requirement for children attending public OR private school in Washington state. Covid is not a danger to young children, and the shot is still only authorized under emergency use. I am concerned for the health of our children if this becomes a requirement for children to attend school. Please do NOT make the covid shot a requirement!

Sincerely,

Katie

Please let parents decide what is best for their children's medical needs. Public schools have proven the steps already in place can keep Covid 19 transmission out of the classroom! Don't require something for kids that has yet to be fully studied in the medical community. The current vaccines required in school have been proven safe and effective in children for the last 40 years. Don't require children to take an experimental vaccine that has yet to be studied for long term effects in children. Families should not have to choose between a quality education for their children and the child's health. Let the parents decide what's best.

Greetings,

I am a certified teacher in Washington State.

I am also running against Suzane Del Bene.

We have plenty of proof her husband Kurt was(?) trying to bring Pfizer in to direct the China Virus response.

Pfizer who brought us the opioid crises.

There are three general reasons for my opposition.

The Vaccine has proven no effect whatsoever in prevent the virus, but does ensure its mutation and spread.

There is no evidence to prove the virus is fatal to children except in a very low percentage.

The vaccine causes way more problems that we know of than the virus itself.

Because I dont want to repeat myself, I have included my link to two blogs.

One way or another Inslee is going to jail.

The only question is which one of you dirtbags child killers is going with him?

If you insist on vaccinating and killing innocent children, there is no place on earth you will be safe.

Next week we will meet in Olympia to develop a strategy to take back the elections.

Once we do, you will be held accountable.

When are you going to start making health decisions based on real science (ie: natural immunity/antibodies, greater than 99% survival rate) vs science paid for by the very people loading their pockets with every vaccine given?

If you haven't done so, please listen to the interview Dr. Robert Malone took part in. If you aren't familiar, he is one of the main scientists who helped create the mRNA vaccine. If he is telling us not to vaccinate our kids, then what makes you think all of you should get to make that decision? I don't coparent with the government. You don't make health decisions for my children.

Schools are funded based on enrollment numbers. If you pass this vaccine requirement for public schools, you will have a dent in enrollment numbers and therefore funding.

Listen to the people. Stop making fear based decisions. We can't live like this forever.

Please tell us what the end goal is here ? Covid isn't going anywhere !!!

I OPPOSE THE VACCINE REQUIREMENT FOR CHILDREN FOR PUBLIC SCHOOLING!!!

If this passes, I promise I will unenroll my child from public school and not follow a single Covid mandate again.

Subject: Vaccine requirement for school aged children

External Email

I am writing in to voice my opinion on the push for school aged children to be vaccinated. I highly oppose this agenda, it is dangerous and completely unnecessary. I demand you show the proof that children are highly affected by this virus and by proof, I want legitimate evidence, not a child that went into the hospital for say a broken arm and tested positive for a virus they have less than a 1% chance of dying from.

Children are not at risk from this virus and they're of no risk to the population either. If anything we need their immunity going forward to end this garbage! This poison will destroy their natural immune system and has the ability to cause irreparable damage to their brain, heart, lungs, nervous system and reproductive system. Please stop focusing on fear and use some common sense, this is not necessary and the damage can never be reversed if this is forced through.

To whom it may concern,

As a Washington resident I am writing to have my statement included in the upcoming board decision on requiring Covid Vaccines for children attending public school. I am in strong disapproval of the mandate for children under the age of 18 to be required to receive the Covid Vaccine. I believe children should have the right to access public education without being required to receive a vaccination that is still in emergency use standing, and does not have sufficient long term data to provide parents with adequate safety and efficacy information. Please make the moral and right decision to allow parents to decide whether or not to provide their child with a COVID-19 Vaccination.

Sincerely
Joshua Gay

Re.: PROPOSED POLICIES:

1. Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

2. Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Bottom Line: A long-time WA resident, I am adamantly opposed to official's forcing involuntary detention for responsible citizens who exercise their right to determine what they will/won't inject into their own bodies. You propose "involuntary" detention for "voluntary" noncompliance. Sadly, these two mutually-exclusive descriptors ("involuntary" and "voluntary") belie the subplot of what's being advanced. And I object to it.

As a retired educator, I am equally appalled at the thought of forcing experimental injections into the arms of children and youth. Too many questions are yet unanswered. A FDA advisor reminds us that there is no expectation that the lower dose in children will behave similarly to the higher adult dose. This, of course, begs the question: Do we really want to experiment on our children?

One of the most academically cited American epidemiologists alive today says he would pull a healthy child out of public school before he administered this vaccine. Harvard University professor of medicine, Martin Kulldorff, agrees with Dr. Harvey Risch. Data and scientific studies he's reviewed show that children are more likely to contract serious disease or die from the annual influenza, or the flu, than COVID-19.

Covid injections are experimental. Simple as that. Dr. Eric Rubin, who sits on the administration's vaccine advisory panel, said in part, "We're never going to learn about how safe this vaccine is unless we start giving it. That's just the way it goes. That's how we found out about rare complications of other vaccines, like the rotavirus vaccine." Never mind that safety data are lacking! Rep. (and Doctor) Greg Murphy (NC) responded rightly in noting that Ruben's comment "is literally the most dangerous statement" he had ever heard in medicine." I agree.

Re.: Too many questions are yet unanswered.

The CDC openly acknowledges that for 30 years since creation of the VAERS reporting system, reporting of adverse vaccine DEATH reports remained very low and constant. However, beginning in December 2020 with the first COVID19 vaccines hitting the open market, and escalating every day since, the adverse event DEATH reports have skyrocketed to levels never before seen in 30- years of vaccine adverse event reporting. Before mass-enforcing an experimental injection, especially on children, these questions (and countless more) must be answered (with peer-reviewed science):

1. The CDC admits there are no peer-reviewed studies, yet it's okay to take these

injections deemed "safe and effective." But by what standard? There is no longitudinal history from which to draw.

2. Just what's in these injections? We know that the mRNA Moderna experiment injection contains SM-102 designated "for research use only, not for human or veterinary use" (See: Cayman Chemical Safety Data Sheet acc: OSHA HCS. Trade Name: SM-102.) What else is in these injections, and why pump them into humans (especially children)?

3. Salk researchers confirmed that the main damage from Covid is caused by the clot-generating spike protein, not the virus. It's unclear how long these potentially lethal proteins remain trapped in the lining of the blood vessels, or what damage they might eventually do, so why inject people with a substance that teaches their cells to make spike proteins?

4. Why the Covid surge (which, on a per-capita basis, was higher than the surge that devastated India) in 4 out of 5 of the most vaccinated countries (Forbes)?

5. Why did more people die in 2021 (January through August) despite the rollout of COVID shots in December 2020?

6.

7. Researchers noted: "Overall, our data provide strong evidence that SARS-CoV-2 infection in humans robustly establishes the two arms of humoral immune memory: long-lived B cells and memory B cells." This is perhaps the best available evidence of long-lasting immunity. Yet natural immunity is downplayed in the media narrative. Why?

8. To encourage pharmaceutical companies to manufacture ground-breaking new medicine, governments use no-fault indemnity against lawsuits. Where's the protection for individuals injured from the vaccine?

9. Cardiovascular, neurological and immunological adverse events are all being reported at rates never even remotely seen before. Shouldn't the magnitude of side effects compared to other vaccination programs concern us? This is especially true in that adverse events are broadly known to be seriously under reported!

10. One's right to informed consent mustn't be bypassed. But the mainstream media narrative is quite silent about adverse effects. According to the CDC, Myocarditis, a rare condition, is occurring at a higher than expected rate in vaccinated individuals. Researchers used data from the Vaccine Safety Datalink, run by the CDC, to find 21 potential cases, 11 of which were confirmed, of Guillain-Barré syndrome (GBS) in people who got the shot. Autoimmunity and the opposing condition, metabolic syndrome, are well known adverse events caused by vaccines. The Covid injection is also paired with Creutzfeldt-Jakob (prion) disease. Shouldn't the public be fully informed of these risks and, then, decide for themselves?

A local ABC News Station posted a request on Facebook for people to share their stories.

In five days, over

200K people

posted comments, all of which addressed vaccinated loved ones who died shortly after being injected, or who are permanently disabled. Shouldn't this at the very least be looked into?

The Informed Consent Action Network (ICAN) reported that a study showed that the actual number of anaphylaxis is 50 to 120 times higher than claimed by the CDC.

Re.: Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

In September, the Singapore government awarded a teen \$225K for having a heart attack following a Pfizer shot. Over in Taiwan, second doses of the Pfizer-BioNTech jab for children, aged 12 to 17, have been temporarily halted due to myocarditis concerns. Meanwhile, in America, the director of the CDC advocates approving the jab for children, aged 11 to 15 years old; and WA wants to include Covid-19 injections as part of school immunization requirements.

So why inject healthy children when their risk is statistically insignificant? Metrics among the unvaccinated rise across

age groups, but data clearly illustrate that younger, healthy people are at little risk from the disease. Fact is, unvaccinated 18- to 29-year-olds saw deaths lower than most fully-

vaccinated age groups.

Most Covid patients (70.6 percent) have one or more underlying health conditions.

Nearly 36 percent infected are obese. 31 percent suffer from chronic lung disorders, and just over 14 percent suffer neurologic disorders. COVID-19- associated hospitalization rates in children were found to be overcounted when, in fact, 45 percent of the patients admitted to Lucile Packard Children's Hospital in California were not about Covid.

There is no logical reason for forcing risky, untested injections on healthy children.

Consider instead the youth who are vaccinated. In June, the CDC reported higher-than-expected rates of myocarditis among vaccinated (not

unvaccinated) youth. There were 117 cases among males 12 to 15 (when no more than five were expected).

Dr. Nicola Klein of the Kaiser Permanente Vaccine Study Center presented data regarding post-vaccination heart inflammation from the Vaccine Safety Datalink, a database from the CDC, and nine other healthcare groups, including five Kaiser Permanente facilities.

Data also showed higher than expected cases among youth following vaccination.

Yet we are expected to ignore facts and summarily dismiss legitimate concerns, as these, as misinformation perpetrated by quacks. Even if such claims ring true, who gets to decide? The answer is best found in the cliché, "Follow the money." Throughout the pandemic, nine new billionaires have been hatched. Pfizer alone estimates to profit at least 33.5 billion dollars from the Covid injections; and many medical professionals receive financial incentives to promote injections. In the United Kingdom, for example, nurses get

£10 per needle they put into a child.

Our charge is to protect children, not to use them for monetary gain. They are not guinea pigs, nor should they be treated as such.

This is an email to strongly encourage you to vote NO on any mandate for children regarding the covid vaccine. It has not been studied enough for children and children do not need this so-called vaccine to protect them. They have done quite well if they have tested positive.

Also, I would strongly encourage a NO vote for any mandate that would quarantine against someone's will! That is blatantly against our civil rights and our constitution! It will only encourage violence and increase the distrust in the government of this state. The recovery rate for someone who has contracted covid-19 or one of its variants is almost 100%! There is no reason to be so heavy-handed against the people of this state.

Thank you,
Kim Spain

The mandates have long since gotten out of control! Families do not want the government trying to take over our health care and the health care of our children! The American public no longer trusts the media, CDC, DOH, BOH or Governor Inslee for accurate, truthful and unbiased information. We have taken it upon ourselves to investigate the truth about vaccines, including risks and side effects from medical doctors of our choice. "Our Body, Our Choice" - right?

If these unconstitutional controls should be deemed appropriate to mandate, WA State will see outrage like never before!

Sincerely,
Janine Magnussen

To Christy Hoff,

Vaccine Mandate Opposition Letter

To The Washington State Board of Health,

This letter is to inform you that I strongly oppose the proposed vaccine mandate in Pierce County. I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. There is absolutely NO COVID vaccine available in the United States has received FDA approval. ALL available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. This fear monger approach by the State of Washington and the Federal Government to force American citizens to inject an experimental drug AGAINST THE LAW and is the subject of numerous lawsuits! A Federal Judge recently rejected Pfizer's claim that the two products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable'

• Children's Health Defense (childrenshealthdefense.org)

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&>

) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Targeting our children is simply another tactic to accomplish the goal of 100% of vaccination. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is

less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID! I challenge the Washington State Board of Health to show medical records for even one child who has died of COVID without co-morbidities.

3. NO ONE knows the long term risks of these vaccines. One of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM. The studies Pfizer conducted were woefully underpowered. This is an analysis of the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors. (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>) It concludes the risks DO NOT outweigh the benefits, therefore more research MUST be done before being administered to children or anyone else!

Forced vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity.

Our hospitals have more vaccinated COVID positive patients than unvaccinated, THE VACCINES ARE NOT WORKING!

If the Washington State Board of Health rules in favor of this mandate you can be absolutely certain to face legal action immediately, as this is constitutional, against the law and will be stopped!

Thank you for your careful consideration of this matter,

Kama Bigbee, PhD.

Subject: Vaccine requirements for school age children

External Email

Dear Washington State Board of Health,

I am writing regarding the January 12 meeting to requirement vaccination for school aged children. May of my friends have children in the public school and most of those children are vaccinated, but not all of them. They aren't vaccinated for various reasons, including concerns about long term effects and their child's particular medical issues. I do not believe we should mandate the covid vaccine for children. It will divide people further, remove more children from public schools and not really be effective against controlling Covid. If you could take a moment to watch this pro-vaccine dr discuss omicron and why mandates aren't a good choice I would appreciate it

<https://youtu.be/5QyV6trMPvs>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fyoutu.be%2F5QyV6trMPvs&data=>

He describes why I think we should not mandate much better than I can. Thank you, and please oppose any vaccination requirements for school age kids.

Sincerely,

Kate

Subject: Vaccine Mandate for School Age Children

External Email

To Whom it May Concern,

I am writing to implore you to not mandate the Covid Vaccine for children attending public School. I do not believe anyone should be making those choices for other people's children. If the vaccines work, then those who choose it will be protected, but we do not yet know the long term effects they will have. Parents that do not want this for their children will pull their kids from school, which will result in less funding for those who remain. Likely, many teachers will then need to be laid off due to lack of attendance which will then further negatively impact the economy which is already dire.

Please put the health and welfare of our children before the adult paranoia and fear.

Thank you for your time and consideration,

Jennifer Nicholson

I am NOT in support of mandating Covid vaccines for children. Public schools are paid for through our taxes and must remain inclusive to all, regardless of medical decisions.

While the media continues to spread fear and panic, actual health data supports the following claim: Covid and its variants in no way pose a health emergency to our kids, but Covid vaccines may be detrimental to their health as they have not been proven safe or even effective. It would be criminal to force families to allow medical experiments on their children in order to receive a public education.

I am in support of ICWA's petition for a rule change.

Subject: Vaccine Policy

External Email

I stand against the covid vaccine being included in 246-105-030 and feel it should NOT be required for children to attend school. The flu vaccine is not a requirement to attend school nor should the covid vaccine. Without knowing the long term side effects this has on our children I do not feel comfortable allowing them to receive. It is unfortunate that if this does pass many children will not be attending public school moving forward and will be looking into other methods of education.

I am completely against any of the proposed Covid 19 policies that are over reaching and immoral. I OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose COVID-19 shot mandates, period. I do SUPPORT Informed Choice Washington's Petition for Rulemaking (see below) — our petition is item 11 on the January 12th agenda. It was filed by Xavier Figueroa, PhD, on behalf of ICWA, and asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Subject: Vaccine rules for schools

External Email

Dear WA St Board of Health

I am writing to you today to submit my opinion on vaccine mandates in schools. Please DON'T do it. Kids have enough vaccines given in a short amount of years. The symptoms related to Covid in children has been mild, and the incidence of survival rate from the CDC website is 99.99815%. The incident of vaccine events is higher than the rate of death by the virus. What about our children that have had Covid? Studies are out there that show antibodies against Covid remain in the system still after a year. I am currently fighting a host of allergies in my teenager that has had a mild case of Covid prior to any vaccines and don't wish to add additional allergens to the equation. Parents and there Pediatricians should have the right to make individual decisions based on the situation.

Thanks Mary Nelson

Subject: Vaccine mandates for WA schools is WRONG

External Email

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets the vaccine, one group gets a placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine. The exact text from 21 U.S. Code Sec.360bbb-3(e)(1)(A)(ii)(III) reads "of the option to accept or refuse administration of the product, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks".

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccine adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Consider additionally, the greater alienation of a growing population of Washington

homeschoolers this decision could bring. Our children need a government and health officials they can trust to put their best interest first. How will families who choose to homeschool because of this proposed COVID vaccine mandate be supported in their freedom to opt-out of public school? So far I have personally only encountered red tape and a general lack of concern for the education of any child whose parent un-enrolls them from the public school system.

It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time.

Subject: Vaccine mandate for children in school

External Email

Good morning,

I am Jazmin. I'm a mom of 2 boys who go to school in a tiny town in Washington called, Yacolt. When I was told about this possibility of having the COVID vaccine become a mandate for children to go to school I was shocked but not surprised that it was be considered. Now I know I am just one person speaking out against this possible mandate. But I am a mom and as a mom protecting my children is important. Now my children are vaccinated and I'm not against vaccines. This COVID vaccine on the other hand just came out. Not a whole lot of studies and still so much to be learned. The vaccines my children have been studied for so many years that I can feel more at ease about injecting into my children's body. I understand the vaccine has been used to get the studies it requires but to mandate? To force parents to inject that vaccine into their child? Especially if they don't comfortable or have no other option because they are a single parent or the situation/financial reason calls for no other way. That's un American. Let's be honest even with being vaccinated you can still get COVID and you can still infect someone else. That will never change. I'm regards to the symptoms will be less that is debatable. Everyone is different on how it affects. People who are unvaccinated have experience being asymptomatic or very little symptoms while people being vaccinated have had more symptoms. It just depends on the person but we as parents should have a choice and unfortunately if this comes to pass the choice you will make for us is to take our children out of public school. And how many parents will do the exact same? Probably more then you think. There are many ways to gain an education. I am a mother who loves her children and will always fight for them.

I hope this can give you another way of thinking.

I stand against this mandate.

Jazmin.

I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>>)

)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Teresa Johnston

Subject: Vaccines for Children WA

External Email

January 7, 2022

To whomever is considering requiring COVID-19 vaccines for children in WA state to receive schooling or childcare:

Please protect children's civil rights in WA state, I implore you to say NO to mandating COVID-19 vaccines for children in order to receive schooling and childcare. I am a WA resident, citizen, parent, and teacher. I am against your proposed discrimination against children in the worst form- stopping a child's education and ability to advance in society simply based on their vaccine status.

What WA State Board of Health is proposing, is outright discrimination against children to receive education and childcare services in WA state based on their parent's informed and rightful healthcare decision. I am against discrimination of ALL kinds- including discrimination of COVID-19 vaccine status. Denying a child an education based on any kind of status is unethical treatment of people and I stand against it. Forcing children to have a vaccine to be educated would be a systemic discrimination bully tactic, to squeeze parents to decide on a vaccine that still has potential unknown risks and does not prevent the transmission of COVID-19.

We are the moms and dads, as moms, we gave birth to these children that happen to reside in WA state. As parents we are the ones that love and care for them- it is not the place of the state to force any healthcare decision upon parents for their children.

Policies and decisions can have unintended consequences. Furthermore, what will be next? Shall a child be prevented from participating in any part of society unless they have this particular vaccine? Let's face it, WA state has a bigger problem that needs immediate attention, WA state is failing in many areas of public education in basic areas of math, science, language arts - students are graduating without basic grade level understanding of basic subjects (<https://washingtonstatereportcard.ospi.k12.wa.us/> <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwashingtonstatereportcard.ospi.k12.wa.us/>>). WA state was failing children in their education before the pandemic, I cannot imagine how over a year of children on a computer has improved these numbers and now pushing this decision. There are teacher and substitute shortages- I am actually certified teacher in the schools and if you mandate this, I would have to consider other alternatives, if you forced this mandate. Have you thought of the implications of this decision on hiring staff for schools in the future? The staffing pipeline you will not have as a result? Parents, educators and school staff, they didn't sign up for what you are

proposing. Perhaps you may want to consider the teachers and staff that will leave WA schools because of this policy, and those potential staff that will never consider teaching in your schools because of your policies.

Consider basic civil in America: Check out HHS.gov- from their website as of January 6, 2022: "What are civil rights?"

Civil rights are personal rights guaranteed and protected by the U.S. Constitution and federal laws enacted by Congress, such as the Civil Rights Act of 1964 and the Americans with Disabilities Act of 1990. Civil rights include protection from unlawful discrimination. The HHS Office for Civil Rights (OCR) enforces civil rights laws that prohibit discrimination on the basis of race, color, national origin, disability, age, religion, and sex (including pregnancy, sexual orientation, and gender identity) by certain health care and human services entities:

state and local social and health services agencies, hospitals, clinics, nursing homes, insurers who are participating in the Marketplaces and receiving premium tax credits, and other entities receiving federal financial assistance from HHS.

Under these laws, all persons in the United States have a right to receive health care and human services in a nondiscriminatory manner. For example, you cannot be denied services or benefits simply because of your race, color, national origin, or disability. For more information about these laws and our authority under them, see our Civil Rights home page."

Also, "The Civil Rights Act of 1964 is the nation's benchmark civil rights legislation, and it continues to resonate in America. Passage of the Act ended the application of "Jim Crow" laws, which had been upheld by the Supreme Court in the 1896 case Plessy v. Ferguson, in which the Court held that racial segregation purported to be "separate but equal" was constitutional. The Civil Rights Act was eventually expanded by Congress to strengthen enforcement of these fundamental civil rights."

(<https://www.dol.gov/agencies/oasam/civil-rights-center/statutes/civil-rights-act-of-1964>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.dol.gov%2Fagencies%2Foasam%2Fcivil-rights-center%2Fstatutes%2Fcivil-rights-act-of-1964&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C113bb79fafda44daa3b508d9d220d996%7C11d0e217>

Not only will you be segregating children due to their COVID-19 vaccine status, you will be excluding them from an education altogether. This will be a shameful stain on WA state's history should you enact this. Please refer to WAC 246-105-030

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapps.leg.wa.gov%2FWAC%2Fdefault.aspx?nodeid=105-030&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C113bb79fafda44daa3b508d9d220d996%7C11d0e217>

. Despite getting the COVID-19 vaccine, the disease will still be transmissible, it is not preventable: "Vaccine-preventable diseases children must be protected against for full

immunization. In accordance with the conditions of this chapter, a child is required to be vaccinated against, or show proof of acquired immunity for, the following vaccine-preventable diseases before attending school or a childcare center)."

What happened to informed consent? Parents can make informed decisions for their children and if you disagree with it, that is okay, this is a free state in a free country, we are free people to decide what we want for ourselves and our children. We are the healthcare decision makers for our children. Parents have valid concerns to choose against the COVID-19 vaccine for their child and it is their family business what they decide. There is still little research on the long-term effects that could occur in children, this is a valid concern for parents, and they should be allowed to give pause to this decision. When I talked to a local pediatrician it is clear not much is known about the vaccine and children who have already had COVID-19. This, along with a host of other factors influence decision-making and these factors must remain private and respected. Parents do not need to give a reason why or "exemption status", it is a personal decision. We are still learning about adverse effects in adults, some parents are not willing to risk vaccine injury or adverse effects for their children- and this should be okay like any other healthcare decision a parent makes with informed consent.

I implore you to stop the overreach into people's lives and allow parents to make informed healthcare decisions freely for their children. Please respond and let me know you received this communication and that you will consider it when you make your decision.

Sincerely,

Michelle Hutcheson

Subject: Vaccine mandate hearing - Hold in person regional sessions in state

External Email

Why do you not break this up into regional events throughout the state for the citizens to voice their thoughts in person eye to eye with you board members! At the very least hold virtual town halls across the state with a 2 minute public input with full voice and audio with a sign up ahead of time. This email to voice your opinion is complete garbage and show you all really do not want to here from the tax paying citizens! I horribly disgusted by the state of WA approach since the beginning of COVID while the state is still a train wreck. You know that this is true so quite trying to act like you now care and want public input after two years of complete failure and repeating the same messages that are not working. Where were you when the schools were shut down???? Not one peep from you in the mental and physical health of our kids!!! Just stay home and sit and waste away for your own health. Not any fight to get the kids back into school and encouraging exercise, eating healthier. The citizens are very disappointed and feel attacked and bullied by yourselves and your governor!!! Please stop trying to bully us and terrorize us any more. We are beat down and tired of living every day in fear from the WA DOH and governor. Just remember what pain and punishment you are going to inflict on our families and kids. You think you are doing good, but in fact causing great fear and anxiety among the citizens!!!

Board Members,

Please do not try to implement these detainment camps. It is disgusting that it's even being considered. Historically those who are proponents of such camps have always been looked back at for the inhumane atrocities they've done. Please take the righteous path, please allow the people to have freedom of choice, we're more capable of common sense and critical thought than some of those in seats of government may think. I'm sure that some of your honk these detainment camps would be the right thing to do..I assure you, they're not. If detainment camps are implemented then you have aligned yourselves among the wicked and evil doers. It will be the final blow to hope for unity and peace. Do you really want to perpetuate fear, despair, pain, suffering and divisiveness? Now more than ever should be a time of repentance, forgiveness, love and unity. Pointing a finger of blame at folks for mistrusting "the science" that has yet to be proven clear or concise is insanity. Non of these companies producing these products have operated openly or honestly with their findings. They have masked truth, skewed statistics, ignored injuries or correlating deaths. This is absolutely wrong and appalling. This fact alone is clearly not allowing the public to have true informed consent which is criminal. I could go on listing tons of reasons why this is wrong and concerning but for the purpose of time I will leave you with just a question for contemplation. How would you respond to your loved ones being torn away from you and placed into a detainment camp based on skewed "science" from people and companies with unsavory track records for truth or honest practice? Your children, parents, wives or husbands, siblings, aunts or uncles... would you be happy knowing that those you love have been ripped away and placed in harms way based off the words from known liars that care more about profits and control over the people and the human soul?

Hello, I am a mother of three and I would like to say I vote NOT to mandate children for the Covid vaccine. We don't know the long term affects of these vaccines nor does the "science" show proof that they are safe. Mask also need to be pulled as they aren't healthy and are teaching our children to be fearful of one another. We as human need one another, not to be fearful of each other. Please remember we live in a free country that we have fought very hard for and that all things should be a CHOICE. Thank you for you time.

God Bless,
Nicole Caseday

To whom it may concern.

I am writing on behalf of my family who lives in Washington State and where my children attend school. I DO NOT support the forcing of children to get vaccinated from covid 19 to attend school. My children have already had it and have natural immunity and will not take an experimental vaccine for something they already have antibodies for. I also believe it is sickening and against all our freedoms and civil liberties to be possibly quarantined and forced to be vaccinated as stated by the infectious disease WAC. You cannot put people into isolation when they are sick and force them to be vaccinated against their will. This is disgusting and will be met with great opposition by the people of Washington state. You should be ashamed for even considering something like this. People will rise up and you will have bigger issues at hand than who is vaccinated with an experimental medicine that quite frankly doesn't even work as the vaccinated are getting sick at the same rates as the unvaccinated. I beg you to find your moral compass and shut this crap down. Thank you for your time

I am writing to express opposition to involuntary quarantine for Covid 19 and requiring vaccination for children. This violates personal rights and does not take into the account the individual needs of each person. Studies indicate that children are at an extremely low risk for hospitalization or death from Covid 19. There have, however, been concerning adverse events according to VAERS including such events as myocarditis and pericarditis which can effect the child's health for the rest of his or her life. Multiple other adverse events have been reported. This can create an undo hardship on parents if their child has a life changing reaction as there is no liability. Approximately 99% of people who develop Covid 19 recover on their own. Early treatment and lifestyle choices which support the health of the immune system have been shown to support recovery and decrease the length and severity of the illness. The PCR test is amplified to a higher rate than what necessary indicates an infection and could just be "dead viral nucleotides" in the nose according to Dr. Fauci. Involuntarily quarantining people can lead to unnecessary quarantines and shut down the economy even further with large numbers of people off of work. Haven't small businesses suffered enough?

To Whom It May Concern:

This is an egregious overreach of power. It is the right of the parents, not the Board of Health, to determine whether or not a medical procedure is right for their children. It is also worth noting that the EUA approved "vaccines" have not been fully tested, with the FDA requiring a five year study into myocarditis for juvenile recipients. Also worth noting is that Comirnaty is not currently on the market as such and judges around the country are throwing out mandates because of this technicality, citing that one cannot mandate a product that is not available.

The parents in Washington will be a squeaky wheel and we will make sure that you hear our voices. Our children deserve better. Data shows that children are less likely to suffer serious cases or side effects from Covid-19 and its variants. The biggest risk at this point is an over-stepping group of unelected bureaucrats who see it as their responsibility to usurp the sovereign right of the parent.

Thank you for your time in reading this and I hope you hear us. We want what is best for our children. Please do the right thing and do not mandate the COVID-19 vaccine until there is more solid data.

Thank you,

Dear Committee Members,
Are the below "Proposed Policies" true?
If so, I believe this is very concerning and shows a clear overreach of our local Government.
These types of policies are a slippery slope into outright tyrannical governments. This is what our "Greatest Generation" fought so hard against. Involuntarily detaining people for periods of time with no due process is NOT the way America governs and polices itself. And State agencies should always have very limited power.
If the State of Washington and the DOH really want to help. Then push for more approved Therapeutics, Allow monoclonal treatments. Allow an individual's Doctor to say whether an individual requires or should have a vaccine. Incarcerate Drug dealers and heavy users.
DO NOT strip hard working tax paying citizens of their Freedoms and Liberties!
I encourage you to educate yourself with the US Constitution and the Bill of Rights. As well as many historical books on Germany, Latvia, China, Cuba etc.
You will find that sacrificing Freedom for Security always ends up providing neither.
Sincerely,
Very concerned Veteran Citizen.
Michael Avila

PROPOSED POLICIES:

* Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

* Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

We urge the board to not require the Covid vaccine for children to attend school. The vaccine is still only authorized for emergency use and long term effects are still unknown. We strongly feel this should be a decision made by the parents and the child and their doctors. In addition, this group is a very low risk category.

To Whom it May Concern,

I am extremely concerned about the idea of mandating COVID vaccines for children to attend public school. I urge you to vote against these mandates on 1/12/22 for the following reasons:

- children are at extremely low risk for serious complications from COVID-19
- it is NOT children's responsibility to protect adults (teachers, family members)
- the data shows that BOTH vaccinated AND unvaccinated individuals are still contracting and spreading COVID-19, as well as its variants, so apparently the vaccine isn't very effective
- if the virus continues to mutate we will be stuck in a never-ending cycle of boosters and variant vaccines. It doesn't make sense.
- The known health risks to children with this vaccine should outweigh all other considerations
- There are no long term studies to determine the safety of this vaccine
- The state should not be allowed to supersede my rights as a parent to make health decisions for my children. It's wrong.

Thank you for considering my thoughts on this matter. May God grant you wisdom as you move forward on this matter.

Sincerely,
Joanna Butenschoen

The Constitution of the United States of America and the constitution of Washington state will be infringed upon passing any such enforcement. This will be considered by many as complete government overreach. If such unlawful policies are implemented may God have mercy on your souls! Please reconsider any enforcement on something that will infringe on someone's personal choices. You allow people to inject harmful substances in to their bodies in parks and injection sights knowing full well it's harmful to them and others by the fact that many of those who are under such substances cause harm and are a danger to society! We have made it 2 years through this "pandemic" without such tyrannical policies as these. There is no evidence of any variant of any disease being more harmful than the original in all of history. Vast majority of people are more susceptible to major health issues from diabetes than to covid and any variant. Yet you do nothing for the actual health of the people. So please reconsider any such policies that would do more harm to our society than good. May the Living God be with you all.

Sincerely,
John & Roberta Alcorn

Regarding the issue of whether or not to mandate the COVID-19 injection, I would ask where is the proof that it is necessary for the age groups in question. What statistics are you using to show that it is needed? Children have almost zero chance of getting this virus, and even less chance of spreading it to others.

Regarding the injection specifically, it is not proven by any means and especially not proven necessary for administering to children. These children would be the test groups for this injection. If you would argue that there are many other injections that are mandated, I would ask you to look at the original samples for these shots pertaining to the disease states and what the mortality and morbidity rates were. High deaths, and high rates of illness among groups. Thousands of kids dead. Through the first few phases of each injection trial and that was for disease states that actually killed people who acquired it.

This is unnecessary and an intrusion into the lives of our children.

Thank you.

Mark Hammons

Covid 19 injections should NOT be mandatory for anyone! It should NOT be part of the school requirement Immunizations! Law enforcement should not be involved. It is unbelievable to me that this is even being considered. To unlawfully detain anyone in a Quarantine facility is absolutely outrageous and appalling. As a parent of a child that has already had covid 19 there is absolutely zero reason she needs to have an injection. This is by far the biggest government over reach yet in Washington state. Shut this down before it gets further out of control!

Sincerely

Jennifer Amond

For many reasons that I'm sure you will be given in great length in emails from other people, I would like to voice my opposition of mandatory covid vaccines for school age children. For one, these have not been around long enough for long term consequences. For two, there has already been plenty of documentation of harm done to children after receiving this "vaccine". Children are at such a low risk of dying from Covid, we can safely let their immune systems fight it off and quit this nonsense of injecting them with such a new "vaccine".

I also strongly oppose allowing local officials to involuntarily detain persons to an isolation camp. This is wrong on so many levels. For one, there is no reason someone cannot isolate at home while they recover. For two, it just brings up so many problems and violations of our rights as a free people. For three, let's be honest, it's just a terrible insane idea to try to implement.

It is high time we learn to live with covid with prevention, early treatment and get back to living life as normally as possible.

After two years of trying to mitigate all risk, and harming our children and our society as a whole, it is high time we stop this nonsense and get back to common sense. We need to get on with our lives.

Nothing should be forced upon the public by the government. This is tyrannical and unconstitutional. Any efforts to utilize police force to detain and encamp the free individuals of this country will be met with ultimate resistance. We will not submit, we will not surrender. In times of war it is the duty of every POW to escape from their captors and these actions are nothing short of an act of war against the public.

This is triple my thoughts on anything that is forced upon children without parental consent.

Stop to fear, end the madness.

Regarding Agenda Item 11, I object to any requirement to list the Covid vaccination as a mandatory vaccine for children to be in childcare or for school admission, or for any other purpose for that matter. Science supports the very low risk of adverse outcomes for children if infected with Covid. The vaccinations and boosters are still under emergency use and have not been proven safe and effective to prevent infection.

Sincerely, Mike Romine

To whom it may concern,

It is highly concerning that Washington state would even consider involuntary quarantine of its citizens. You are going to cause huge issues within the state. People will ride up and fight this. Under no circumstance will the good people of Washington state allow you to involuntarily test us, vaccinate us, or quarantine us.

Also, mandating vaccines for children for a disease that they are not at risk for is unacceptable. They are more at risk from adverse reactions from the vaccine than they are at risk from the disease. This is absolutely unacceptable and highly concerning. This government overreach must stop.

Sincerely,

A concerned wife, mother and public educator

Dear Members of the WSBOH,

* Covid shots should absolutely NOT be a requirement for our children to attend school or childcare.

- * Children are at extremely low risk for Covid.
- * The vaccines are still only EUA (emergency use authorized)
- * There are no long- term studies to document any history of safety
- * Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore, the vaccine apparently does not stop the spread of the disease

For these reasons I would appreciate your consideration to SAY NO to state mandated Covid-19 shots for children in Washinton State.

Sincerely,

Harolee Fairley

To Whom it may concern,

As a teacher and a mother of two school aged children in the Washington public school system I ask that you DO NOT make the Covid vaccine a required vaccine for children.

There is not enough research behind the long term effects of this vaccine or any mRNA vaccine in children. Parents need to be able to research and make their own informed choice about what is right for their children without worrying about whether their decision will exclude their child from school.

If this vaccine is required I personally will be pulling my children from the public schools and I know MANY other families who will do the same. With only 20% of 5-11 year olds fully vaccinated many parents are choosing to hold off on allowing their children to be vaccinated with this new type of vaccine. The amount of students who will possibly be pulled could detrimentally impact the funding required for meeting the needs of our state's students. It will also lead to a generation of homeschooled children educated by many parents who are not prepared or passionate about homeschooling their children. This will have a lasting impact for our state's economy in the future.

Again I ask, please do not make the covid vaccine a required vaccine to attend school in our state.

Thank you for your consideration,

Mandi Goodman

I am completely against the proposed policies and I will NOT comply. You should be ashamed of yourselves for even considering putting these into effect. Why don't you stop wasting everyone's time and money and work on the BIG issues our state has.. I don't know when the last time you were out of your house but homelessness and drug use are running rampant! Our government is an embarrassment!

* Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

* Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

To whom it may concern,
Vaccination mandates are unconstitutional anywhere for anyone. Parents have a right to choose what they feel is best and safe for their children, someone in an office hundreds of miles away can not tell me what is best for my children. We are turning America the free into something it is not. Covid vaccination have not even been around for 2 years and with the amount of heart problems being reported in younger people it is appalling that more research isn't being done to look into the side effects of this. No to mandate and no to overreaching government.

I am completely against any of the proposed Covid Policies that are over reaching and immoral. We stand against these proposed WAC's: WAC 246-100-070 <tel:246-100-070> , WAC 246-100-045 <tel:246-100-045> , WAC 246-100-040 <tel:246-100-040> , WAC 246-100, WAC 246-105. Forcing anything on free Americans protected by the Constitution is asking for strife and dissension. We will hold the line against tyrannical mandates and proposed polices that violate our civil liberties and fundamental rights as human beings. I stand with the Constitution - will you? I stand with the Word of God:

"Praise the name of God forever and ever, for he has all wisdom and power. He controls the course of world events; he removes kings and sets up other kings. He gives wisdom to the wise and knowledge to the scholars. He reveals deep and mysterious things and knows what lies hidden in darkness, though he is surrounded by light."

□□Daniel 2:22□□

Whether you stand with the Word or not, It's Everlasting, Unshakable, and pierces the soul with Truth.

I call on you to represent the population of those whom you swore to be a voice for to reject all such aforementioned policies.

"Speak up for those who cannot speak for themselves; ensure justice for those being crushed."

□□Proverbs 31:8□□

"Ensure justice" - isn't that the key to the position you are in?

Kind Regards,

Angela Shank

Hello,

My name is Choyce Moon and I served in the US Military / US Army. I believe that these vaccine mandates and involving law enforcement to detain people against their will for public health issues goes not only against the US Constitution, but also against the spirit of the Nuremberg code. Hitler, Hitler's doctors and the Nazi Public Health officials did the exact same thing to the Jewish Germans (and war prisoners) in the 1930's and during WWII with the following extremely alarming parallels:

1. The Jewish Germans were falsely accused of being "spreaders of disease"; however, it was not until the Allies won WWII that this ridiculous lie was found to be just that -- a lie. Currently, the unvaccinated people are also being falsely accused of being "spreaders of Covid" -- which is as a lie. The most Covid vaccinated states and countries in the United States and the world -- Vermont, New York, England, Australia and Israel, for example, have amongst the highest Covid infection rates in the world, while Florida and India (who are focusing less on these experimental vaccines and more in early Covid treatments) have the lowest Covid cases.

2. The Jewish Germans were banned from public places such as restaurants, movie theaters, and businesses where the public gather because the complacent citizens of Nazi Germany believed in the lie stated above. Right now this same type of tyranny is happening in King County where people must "show papers" to enter into public gathering places, again also based in the lie that the unvaccinated pose a danger to the vaccinated.

3. The Jewish Germans were coerced into taking experimental medications as Hitler ordered the doctors of Nazi Germany and the Nazi Public Health officials to administer such experimental drugs upon the Jewish Germans People and WWII war prisoners. Later on, those Nazi doctors and Nazi Public Health officials were tried and convicted of war crimes for such the atrocities. Today, people are also being coerced into taking experimental vaccines (as all the Covid vaccines are still experimental because there is no way anyone can know the mid to long-term adverse effects) because their very livelihoods/jobs/careers (their very means to support their families) are being threatened if they do not comply to tyranny. Coercion is not informed consent.

4. As described in #3 (above) Hitler had the Jewish German's businesses boycotted which eventually lead to the Jewish Germans on not being able to support their families. The exact same thing is happening to unvaccinated people as some of them are having their livelihoods/jobs/careers threatened if they do not submit to the unlawful vaccine mandates.

And now,

Potentially 5. Hitler had the Jewish Germans put into Ghettos and concentration camps. This is what the current legislation is proposing to do to the unvaccinated people. Under no circumstances must this ever happen in the United States.

Please note that if there were an actual pandemic and the Covid vaccines actually

worked:

1. People would be pounding down the doors to vaccination clinics begging to receive the vaccine. This includes all people -- even the ones to which a mandate does not apply.

2. People would not have to be threatened, coerced, shamed, bribed or reminded to get a safe and working vaccine.

3. Over 20,000 people (and counting according to VAERS) would not have died from the Covid vaccines which is more deaths in the past 12 months than all the other vaccines (flu, polio, tetanus, etc) COMBINED since their inceptions! Also, the swine flu "vaccine" was taken off market after less than 40 deaths, yet these experimental Covid vaccines are being coerced upon people after tens of thousands of deaths (and the 20,000 deaths is considered way lower than the actual Covid vaccine deaths as only about 10% of the Covid vaccine deaths are reported to VAERS). These experimental Covid vaccines are not safe as advertised, and where death is a possibility -- free and unforced informed consent is required. Anything other than informed consent is criminal.

Thank you for reading my very sincere comments as to why the current responses to a Covid virus that had a 99.98% survival rate (without the help of ineffective, experimental Covid "vaccines") are tyrannical in nature and totally unlawful here in the United States of America. I can expect these types of measures in Iraq under the reign of Saddam Hussein or North Korea, but certainly not here.

Thank you,

Choyce Moon

As a concerned Washington State citizen that votes and pays taxes please vote against the following proposed policies:

* Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

* Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

It is clear that our immune systems and the Covid 19 have unknown components that deserve individual choices. Medical decisions should be between an individual and their personal medical providers, not mostly unelected government officials making broad scoping policies for complicated issues. This includes a parent's right to make medical decisions for their children.

I am a health care provider who has worked in person throughout the majority of time of COVID, including closely with patients before we were able to get masks and now with larger numbers and limited to no ability to test, even with an exposure, because of the lack of rapid tests and being unable to secure an appointment online.

Last year I had COVID the same week I was supposed to get my first immunization, which spread to my whole family, and came from someone who will never choose to get vaccinated. Do I wish they would? Of course. I and my husband were out of work for a month because of this and I had to worry about loved ones close to me, including my parents and kids and two autoimmune family members, who also got it. I've had to quarantine a few times due to clients coming in with Covid and no vaccination. My point is, I have been affected by Covid and Covid precautions the last almost two years. I am vaccinated against COVID and just about anything you can be vaccinated against as a health care provider. I have helped Spanish speaking patients especially find appointments, knowing they are at greater risk and less likely to have the resources to do this themselves.

But, despite all this, I would never ever ever wish them to be forcibly detained or forced into anything.

I choose to be vaccinated before the mandate but am also furious that after so many have had to deal with getting Covid and all the stress of working in health care especially recently that we don't even get to choose what goes into our bodies.

My kids, who have had Covid and have such a low risk of anything bad happening to them even if they get it again, and are up to date on all their vaccines, will not be getting the Covid vaccine when they turn 5. If this is forced through as a school mandate I'm more likely to homeschool, pulling myself out of the already strained health care work force, or move out of state.

If any of this goes through I may move out of state, not because it would likely affect my family personally, since we are vaccinated and do seek treatment and testing as needed, because the question is... what's next?

Do we force blood pressure medications on those that have higher BPs or contain them to change their diet to limit their chances of stroke? Do we force people into concentration camps for daily exercise if they are obese and at risk for complications? Do we force a woman to have a baby or not have a baby based on what seems better for public health? Do we force mental health medications on those that don't wish to use them, whether that's schizophrenia or depression, because they can be a huge burden to society?

Many underprivileged people don't seek medical services at all or until it's too late, because they don't trust the health care system. I would argue they should trust us... unless these measures are the answer. My trust is already starting to deteriorate just by reading about these potential responses.

Especially when, living off Aurora, I see the prostitution and stolen good deals, and

shooting up, and living in tents in horrid conditions, etc. These are all "okay" but someone having a say in their medical treatment of their body is not?

Why are we understanding of a mother aborting her own child when so many have infertility, or of a drug user that can't kick the habit and would benefit from clean needles, or of a homeless patient whose afraid of doctors not coming into the hospital with their foot problem until they need an amputation, or of someone who just can't kick the carbs and is now having vision problems because of their diabetes... we sympathize, we treat them, we understand that they are still human beings to be treated with dignity, yet not someone whose afraid of a new vaccine during a stressful time, or someone who knows or believes they've had issues with other vaccines, etc. Why are they no longer allowed to have a choice and could be forcibly removed from their homes / forcibly quarantined?

I'm more scared at 8 months pregnant of defending myself from a drug user or my kids getting hit on their scooters by those going 40 on a 20, etc. then of someone at a grocery store or restaurant having Covid.

There are many worse health conditions that have a much greater burden on our health care system. If this were something like the plague, that's more contagious and much much more deadly, I could see having a more militaristic response... but really? We actually have vaccines and boosters and masks and sanitation and now a milder version spreading for more likely natural immunity that's more like a cold. That's what Covid should become in the long run, just another cold. This response by the state wouldn't be taking into account the history of how diseases spread and doesn't even take into account our current numbers of those hospitalized / dying / having prolonged symptoms.

In summary, as a vaccinated person whose worked in healthcare for 8 years (including Harborview), I'm strongly opposed to using force in regards to covid for testing, medical treatment, vaccination, etc.

Continue educating, continue having vaccines and testing available (way more testing, please), but do not use such extreme measures and pave the way towards a militaristic health care future, which could spread (pun intended?) to other choices in health care. Our state is going to be just fine without these measures but it ultimately won't be with them.

Sincerely,

Kyrstin Szewczyk

As a constituent and community members of the State of Washington, I strongly urge the Washington State Board of Health (WSBOH) REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

Thank you
Matt Yates

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

Do the right thing as stated on our constitution! Stop government overstepping!

I am 100% against having the Covid19 shot as one of the mandatory vaccines required for school children.

The full safety data is not yet available. The risks far out way the benefits in this age group.

Kids are not the ones at risk for this disease and the shot has not done well preventing transmission.

No, No, No...do not make this shot mandatory!

Dear Committee Members:

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools. Individual health is just that, an individual choice and parents get to make the decisions for their child's health.

Thank you,
Halee Austin

Why are you mandating a vaccination for children when they are at the lowest risk of getting covid that also has a 99% survival rate. Enough of the control over the people and the scare tactics. You also need to remember you work for us and you are not listening to the people.

I request NO on state mandate for Covid-19 vaccines for children, of any age!

The risk from Covid-19 for kids is low.

The risk of side effects of the EUA Covid shot can be life debilitating, life threatening and devastating. Who is held accountable for that outcome as a state mandate?

A family knows their child best and is allowed to make their own best decision about the risk of taking or not taking a medicine for their child, and have the option of building a strong immune system or using other protections against a disease.

Thank you.

To Whom It May Concern,

I am writing to express my deepest concerns regarding mandatory covid-19 vaccinations for school aged children. My children are all current on their vaccines but I in no way consider the covid-19 vaccine to be among the list that are meant to keep them safe and healthy. What we are facing is a virus that VERY rarely causes life-threatening complications for children. Not to mention how many boosters are now being recommended.

Parents will not subject their children to repeated experimental vaccines in order to keep them in school. I will be homeschooling for as long as it takes for mask and vaccine mandates to cease. Please do not hinder parents' decisions regarding their child's health and force us into an ultimatum, covid-19 shots or no public school. Our children deserve better and this parent won't stand for it.

No more masks, no mandatory vaccinations. Leave our children alone or there won't be a need for public education, we will rise and educate them at home and in co-ops with likeminded parents who put their children first.

Thank you for your time and consideration,
A Concerned Parent

To whom it may concern,

I recently heard that the Jan 12th meeting was to address was to talk about vaccine mandates on our children to attend school. I am against this wholeheartedly. Our children have great immune systems and my child tested positive and quarantined with me while I was sick but never had any symptoms. There is natural immunity being discounted and not properly addressed. The rate of death in children is even less than the flu and that was not mandatory. With MRNA breaking into our DNA to target genetic code for our immune system we do not know the long term effects or the further dependency on a "vaccine." And lastly, I do not want my child being used as a political pawn in this partisan state.

Sincerely,

Jeff Rennie

Good Evening -

I OPPOSE the vaccine mandate for school children ages 5-18. If a mandate is imposed I will be pulling my 3 elementary aged children from the public school setting and initiating a homeschool curriculum immediately.

I would like to share some brief facts with you surrounding Covid-19.

* It should be noted that children have a nearly 100% survival rate from Covid-19.

* Dr. Eric Rubin, physician at Boston's Brigham and Women's Hospital, Adjunct Professor of Immunology and Infectious Diseases at Harvard University, Editor-in-Chief of the New England Journal of Medicine:

* On October 26, 2021, as a voting member of the FDA advisory panel on the Pfizer vaccine for kids ages 5-11, Dr. Eric Rubin stated, "It's really going to be a question of what the prevailing conditions are but we're never going to learn about how safe this vaccine is unless we start giving it. That's just the way it goes. That's how we found out about rare complications of other vaccines like the rotavirus vaccine."

* Harvey A Risch, MD, PHD, Professor of Epidemiology at Yale School of Public Health:

* Dr. Risch stated during an interview that he would homeschool his children if public schools mandated the vaccine. Additionally, he would only recommend the vaccine to children if they have some kind of chronic illness.

* Per CDC statistics, during the 12-month period October 2, 2020 through October 3, 2021, there were 66 COVID-19 associated deaths in children 5-11, making COVID the eighth leading cause of death for this age group, behind accidents (969 deaths); malignant neoplasms (525); Congenital malformations, deformations and chromosomal abnormalities (274); assault/homicide (207); heart disease (115); chronic lower respiratory diseases (107); influenza and pneumonia (84); intentional self-harm/suicide

(also 66 deaths).

* Children are almost seven times more likely to die in a car accident than from COVID-19. They are almost eight times more likely to drown.

* Per John Hopkins University, a typical vaccine development timeline is 5-10 years versus the accelerated Covid-19 track of 1-2 years.

Again, if this vaccine is mandated we will be forced to pull our children from our school district. Homeschooling is less than ideal given that two of our children have IEP's. However, we believe the unknown long-term risks of the vaccination far outweigh any damage I may do to their education. Our children are role models to their peers and their absence would be a loss to their district.

Thank you -

Nichole Hurley

Immunization Criteria for Child Care and School Entry:

Children should not be required to get covid-19 vaccines in order to return to school/child care. Children are not at risk for covid. Parents are also responsible for making wise healthcare decisions for their children. The vaccine is only EUA, emergency use authorization. Therefore, the government does not have grounds to force all children to be vaccinated in order to return to school or child care. Frankly, this would be discrimination.

As a resident and voter in WA state, I would like to state the following:

1. I OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose COVID-19 shot mandates, period!
2. I SUPPORT Informed Choice Washington's Petition for Rulemaking (see below) — our petition is item 11 on the January 12th agenda. It was filed by Xavier Figueroa, PhD, on behalf of ICWA, and asks the Board to establish a new rule that prohibits adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

As noted in the Petition Filing, we are requesting the WA State Board of Health adopt a new, permanent rule prohibiting the Board from adding to the daycare or school requirements any Emergency Use Authorized (EUA) product or any licensed product formulation which has not yet completed Phase 3 clinical trials. This new rule request pertains to any and all avenues through which the Board has authority to add medical intervention requirements, including through regular or emergency rule-making.

We are requesting this Rule because despite the absence of an FDA licensed COVID-19 vaccine formulation with completed Phase 3 trial studies in children, and despite CDC-acknowledged risks of myocarditis and blood clots and the data showing children are not at high risk of severe disease or death from COVID-19, the BOH has gathered a Technical Advisory Group (TAG) to examine adding COVID-19 vaccines to daycare & school requirements. This new rule is needed immediately to ensure that federal EUA regulations are upheld & to protect fully informed consent, which prohibits the use of coercion or undue influence, such as can be exerted by state requirements.

Thank you for your consideration.

Margaret Wilfley

Hello WSBOH,

I have heard a rumor that you are beginning a meeting to discuss "rounding up" people who don't comply with vaccine orders. Despite my desire to call the people who proposed this all sorts of nasty names, I know that isn't productive so I will refrain, but please understand I am extremely upset by this.

America is built on personal liberties. More so then that, deciding what to put in one's own body is a HUMAN RIGHT, not just an American right. It has nothing to do with "does the vax work or not." It could be a miracle cure, or turn people into frogs it's still a medical choice for educated adults to make with the guidance of their healthcare professionals. Not the business of the government! Period.

Governments who detain people for not complying with what they demand have never once been on the correct side of history. When we choose to be ignorant to past events, we're bound to repeat them.

My husband and I are currently going through training to become foster parents. So much emphasis is put on not steam rolling kids into your culture and accepting and encouraging them to continue to engage in their culture. I just can't believe a government that is so empathetic to respecting the needs of children would turn around and then force it's citizens to "obay" and "comply" a vaccine order. Hypocritical.

In closing, me and my family, both vaxed and un vaxed, will never, NEVER vote for anyone who passes laws like this. They are unacceptable in every way.

In frustration and disappointment,

Erica Davie

This is ABSOLUTELY INSANE and DISGUSTING!! You are violating our freedom by trying to force us to inject something into our bodies that we the public, really don't even know what's in it. Clearly the vaccine doesn't work and you guys are fucking morons for even considering a mandate for children to go and be educated. Why would you take that away from them? Why would you force a child to get injected with poison or take away their learning. Shame on you. If you pass this you can all burn in hell.

Sincerely,
Your biggest fan

We the constituents and community members of the State of Washington, DEMAND the Washington State Board of Health (WSBOH) REFUSE the proposed policies. These policies are over reaching, immoral and against our rights.

- Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from (WAC 246-100).
- Including the Covid-19 injections as part of school immunization requirements using (WAC 246-105.)

1/6/2022

To the Washington State Board of Health,

I am writing in regards to the Proposed Policies that are on the agenda for your January 12th meeting. I am 100% AGAINST including the Covid-19 injections as part of the school immunization requirements. My husband and I have two children currently enrolled in Washington State public schools and one who is scheduled to be enrolled for the 2022-23 school year. If the Covid-19 injection requirement is adopted, we will be withdrawing all of our children from public school. This injection does not have any long term research information available, therefore cannot yet be considered "safe." And from what I've witnessed, cannot be considered effective. In addition, the injection has SERIOUS side effects, especially for young males, which are far more hazardous for healthy individuals than the virus itself. And what of the children who have already dealt with the virus? Why do they need to risk being injected with a substance that hasn't proven to be effective or safe, when they have already shown their bodies can handle the virus properly and they now have natural immunity? As far as effectiveness, when 40% of the people testing positive for Covid have had the injection, it does not seem to be doing it's job well. And with the current variant of the virus seeming to 'evade' the injection, why does the injection continue to be pushed? If it's not proven safe, and not proven effective, why would it become a requirement for our children to receive it in order to go to public school? If this proposed policy is adopted, the public school system is going to lose A LOT of enrollments and, in turn, will lose A LOT of funding. I highly encourage you to take all of this into consideration and leave the decision of whether or not to give children the injection up to the parents of said children.

When it comes to the proposed policy of using law enforcement to force emergency orders to involuntarily detain people in quarantine facilities, that is completely unacceptable. Washington State is barely allowing their law enforcement officers to do their job now, yet they want to turn around and utilize them for forcing people into quarantine facilities? The people of Washington State are perfectly capable of staying home when they're sick, as they have been doing for the past two years. This is an unacceptable and asinine use of our men and women in law enforcement.

I appreciate you taking the time to read this and have faith that you will make wise decisions that will benefit and show respect towards the people of Washington.

Marley Kunz

I am writing to oppose the idea of making Covid vaccines mandatory for children in order to attend child care and public schools. This is absolutely ridiculous! Vaccines are a personal and religious choice. I do not know of one child in our school district or other nearby districts who was even been hospitalized for having Covid. However, I have heard of children who have had severe adverse reactions to the vaccine.

Those with the vaccine, are still getting Covid. This vaccine has not and will not end the virus.

I beg of you to please STOP the craziness and do NOT make this vaccine mandatory. You will be forcing many families to find alternative ways to educate their children.

Thank you,
Tanya Scheib

I imagine you'll be swamped by parents although with good intentions, will oppose vaccinations and masking for their kids.

I am in full support of mandatory masks and vaccination for all people including kids eligible to receive one unless there is an overwhelming medical reason for exemption.

I also support refusing entrance to any public place for those who are unvaccinated even if they are exempted.

It's my hope that a vaccine will be approved for young children soon.

I will maintain these views until the science shows we can relax our guard.

Thank you.

It is unclear to me if this is real, but the claim online is that the State Board of Health is considering whether to "Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100." Legal issues aside, (and pre 2020, most legal scholars were strangely opposed to tyrannical systems of government) it would be stupid at this point to even attempt this. Seattle, which has been apparently doing everything right, just tested it's kids in public school and 1 in 25 tested positive. That's 2000 kids - plus their families - with Covid nobody even knew about prior.

The only way out of this is through it. Surely that has been proven by now. Everyone in my family works as front line healthcare workers and they're all sick and tired of the myopic focus of try to stop the spread in this pandemic.

As to mandating vaccination for kids, if the school board votes for it that's legally fine. Worse things have been upheld (like Arkansas 1964 law taking children from their parents and putting them in foster care until they were vaccinated).

Whether the unelected health board gets to mandate that is where I have a problem. What do I know. I'm just a lawyer married to a the business developer of medicaid assisted living communities

I would like leadership to inspire collective courage and common purpose. Now is the time to build up our social immune system by expanding access to healthcare, not depriving it to tens of millions of people by these ridiculous policies that will surely only further deplete the medical workforce (savaged already by school closures and mandates). Improving the quality of work conditions and encouraging shorter hours in the work place, expanding access to child care and improving mental health will ultimately prove more successful at saving lives than anything that has thus far been mandated or recommended.

But even if I'm wrong about that, and you are willing to erode still more individual rights and freedoms and protections in the name of saving your life - what evidence do you see to suggest they would be more competent at using this authority to achieve the result than the rest of the governments around the world?

German Efficiency didn't beat the virus

Israeli militarism didn't defeat the virus

Dutch Engineering didn't beat the virus

South Korea's mass testing didn't beat the virus

Even nations who benefit from natural isolation like New Zealand still are struggling to hold off the virus. And to what end if it will never go away and the promised vaccine isn't expected to do much for those with preexisting conditions?

I would further note that trial by jury remains suspended in much if not most of this state right now. I have one client who has been waiting since December of 2020 for a jury trial and the court still is too afraid to even set him a date. How we can propose to use law enforcement to enforce quarantine without giving someone their day in court is extremely problematic

I am wholeheartedly against any mandate from any public office (State or Federal) that requires anyone (of any age) in the United States or the world to inject any form of matter (Covid 19 or anything else) into their body unless it's being done of their own accord and not being done by threats and coercion such as what is occurring now. If the govt is allowed to mandate this then what comes next? Shots to cure us from believing in god, shots to make us sterile, shots to make us whatever the govt wants? I SAY NO, and I MEAN NO! Stop this insanity, stop the threats, stop the destruction of hard working middle class Americans that are affected most by the stupid mandates.

These are comments related to the upcoming Jan 12, 2022 meeting to consider adding COVID-19 vaccine to the list of vaccines required for children to join a public school.

1. Why is this necessary? COVID does not affect healthy children. According to the CDC (<https://data.cdc.gov/NCHS/Provisional-COVID-19-Deaths-by-Sex-and-Age/9bhg-hcku>) there have been 678 (as of 12/29/2021) COVID related deaths in people under the age of 18. The population under 18 is about 73,570,000 (<https://www.census.gov/data/datasets/time-series/demo/popest/2020s-national-detail.html>) (<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdata.cdc.gov%2FNCHS%2FProvisional-COVID-19-Deaths-by-Sex-and-Age%2F9bhg-hcku&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C231fde9f276147b6770708d9d20a4f1e%7C11d0e211>)). The probability of someone under 18 dying from COVID is $678/73,570,000 = .00093\%$. BTW 65 and over make up 75.6% of all COVID deaths (see CDC data).
2. Many children have had COVID already giving them more immunity than the vaccinations provide. Most children show few if any symptoms when they are infected.
3. Omicron will infect pretty much everyone, vaccinated and unvaccinated. This will lead to herd immunity and therefore no need for COVID vaccinations.
4. COVID vaccinations are especially dangerous to young males. Even the CDC admits this.
5. The most vaccinated and locked down country on earth, Australia is having massive new cases, proving all this hand wringing, worry and tyrannical behavior is not going to change the outcome.

All of this is to point out it is not necessary to mandate COVID vaccinations, especially for school age kids. Please do not overreach/over react to a situation that is being used to create fear and therefore government overreach.

Sincerely,

Keith Pool

To Washington state board of health,
I am an educator and mom of four. I am deeply concerned with your desire to force Covid 19 on all children. This is completely unnecessary as the chance of a child dieing from Covid is lower than a child struck by lightening. This is an overreach of the government and a violation of the Nurnberg Code. We should have learned something from history and not repeat what took place in Germany with using people as science experiments. To think that people have stooped so low they would offer a student pizza in exchange for being vaccinated without parental concentration is horrific. It seems ironic and that there has to be another agenda that this would be mandated right when the death rate is so low right now. You were chosen to represent your people and not abuse power. Please consider honestly legislating your people.
Sincerely,
Janet Scarth

In regard to the proposed Immunization Criteria for Child Care and School Entry:

Covid-19 shots should not be required for school-aged children. Medical choices are up to the parents, and the vaccines are still only being used under EUA, emergency use authorization. Children are at low risk for covid, and besides that, their medical choices are still up to their parents, according to the Fourteenth Amendment's protection of personal freedom of medical choices. The government does not have the right to dictate people's medical decisions. Therefore, this requirement for children to be immunized in order to go to school or child care is not right and should not be allowed.

Dear Washington State Board of Health,

I have two children enrolled in Washington State public schools. They are both up to date on all currently required vaccinations. I am not against vaccinations, however, I am against mandating an experimental shot for children. With regard to the Covid-19 shot, it is not the responsibility of our state government to make medical decisions for my children. That is my responsibility as their parent.

When considering requiring a vaccine to attend public schools the Board of Health must complete the process for reviewing antigens for potential inclusion in WAC 246-105-030 by determining if the 9 criteria in evaluating antigens are met. My lack of support for a mandate stems from the below criteria not being met under sections I, II, and III

I. Criteria on the effectiveness of the vaccine

2. The vaccine containing this antigen is effective as measured by immunogenicity and population-base prevention data in Washington State, as available.

As of January 3, 70.6% of Washingtonians 5 and older are fully vaccinated, yet we're seeing record setting cases. Studies show that the vaccinated are actually more likely to contract, and therefore, transmit the virus. The CDC identified 4 of the top 5 fully vaccinated counties as "high" transmission counties.

II. Disease Burden Criteria

5. The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population.

6. Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting or activity being given the highest priority.

Studies have shown that vaccinated individuals can and do continue to transmit the virus and carry the same viral load as an unvaccinated individual. Skyrocketing cases in our state among the vaccinated show that this vaccine does NOT prevent disease. In fact,

the fully vaccinated are asymptotically transmitting the virus, exposing more people unknowingly until they themselves become symptomatic.

III. Implementation of the Criteria

7.The vaccine containing this antigen is acceptable to the medical community and the public.

While the vaccine may be acceptable to the medical community (although even within the medical community, the vaccination rate was not acceptable enough to deter a forced mandate), we cannot dismiss the fact that public acceptance does not represent a strong majority. Under 51% of Spokane County residents are vaccinated and less than 40% of kids ages 12-17 are vaccinated. Only 36% of the entire black community in Spokane County is vaccinated. A vaccine mandate in schools would disproportionately affect students of color in Spokane County schools.

The Covid-19 shot is widely available to any age group now. The current vaccination rates reflect individual health choices that absolutely must be protected. It must also be acknowledged that individuals can and should be allowed to continue to make their own health decisions for themselves and their families. There is simply no need for forcing someone to get vaccinated. I cannot and will not support a Covid-19 vaccine mandate for our children and neither should you.

It has been brought to my attention that a meeting is being held to discuss mandating the Covid vaccine for public school students.

This is so wrong on so many levels.

If smart people follow the science with this virus (or any virus) you can't really flu shot away a virus. Viruses have to run their course, at least that's what Dr.'s have said to me my whole adult life. This thing has to run its course. No shot, no lockdown, no mask, no quarantine, no mandate will get rid of this virus.

You have to have faith that humans are smart enough to apply basics learned at a young age. If you're sick, stay home. Wash your hands. Cover your mouth when you cough. A mandate makes people feel forced, not have the right to choose. This causes anger and division that our state and country surely doesn't need anymore of.

I would like you to look at the numbers (if they are even reported) as to how Many vaccinated or vaccinated and also bolstered people are still getting Covid and spreading Covid. The vaccine makes it so you should have little to no symptoms. If you don't know you're sick and you're out and about, aren't you spreading this virus the same? At least if you feel sick you know to stay home?

Kids have never been the problem. They are really not getting sick or dying. There is no need to mandate that they all be given an unnecessary shot that does not eliminate the virus. Covid is not a disease, cancer is. Covid is a virus.

And if we're all smart, a vaccine is typically 1 shot to eliminate the disease. Sometimes years down the road you may need a 10 year booster or something of the nature? But the Covid shot is not a vaccine, it's a flu shot. Not to eliminate but lessen the symptoms. You can still get the virus though. And you can still Spread the virus, yes. So why mandate? And what are we going to do? Get a booster every 6 months for ever?

This will eventually variant down. We may have to just be smart people and learn how to live with this and do life. With business open and masks off. Some may want a shot and some may not. It should always be a choice. When you force and threaten it feels counter productive. We have managed to put one another against each other. The vaxed against the unvaxed. It has caused horrible destruction.

The fallout and future damage of this virus that has a 99% survival rate, read that again, 99%. That is off the CDC site. Doesn't require all of this.

Search annual death rate of cancer, obesity, diabetes, heart disease, stroke and now drug use and suicide. We have much bigger health problems than Covid. Politics and money have convoluted this entire virus.

Kids can't wear masks any longer. Surgical masks don't work. They are not worn properly nor are they meant to stop a virus partial from spreading. They do not work. But they do delay the emotional development of babies, toddlers, school aged kids and even pose emotional damage to adults and elderly. The damage of not seeing facial expressions and also not being able to hear or understand what people are saying is causing further communication problems. As if these kids need more troubles learning to communicate and be vocal as they are all Living in their phones and video games. Living a life of non human interaction already, so let's just add to that. Our future children are going to have some major barriers to overcome with todays modern world and now the social and emotional damage of Covid. People have got to wake up and recognize what we are doing to people and our kids. Our poor children.

No shot will stop this. We have made mandates for many, leave our children alone. This

will not stop the spread.

Please do more research and you will find this will not be your answer. We will loose kids attending public schools, states will loose their funding for schools, the mandate will be disastrous.

I am ignorant to think my email will be read, heard or considered but I feel better having a say in protecting my children. I often wonder how so many intelligent leaders cannot see the damage this is all causing. And to know they have the authority to prevent it, is absolutely mind blowing that it continues.

Sincerely- A smart Washington resident mom with 3 kids.

Kids do not need this vaccine. No one needs it. It is not helping control the spread, but especially not kids. The risk from vaccine side effects is higher than the risk of dying from Covid. The vaccines are experimental at this point. Very dangerous to think it's ok to be injecting into kids, let alone mandating it. Follow the science and see that kids are not at risk. Quit taking away our freedoms.

Thanks,
Jackie

I am writing this because me and my family strongly oppose two items you are considering in your meeting on the 12th of this month. First, the possible mandate for children to take the experimental COVID19 shot in order to attend school. Please do not support or implement this mandate, it will only cause significant reduction in enrollment and drive even more families out of our beautiful state. Furthermore, you should just drop the mask mandates on kids, WA is one of only 5 states in this country forcing these ridiculous mandates that, compared to other states, has done nothing but cause mental damage to our kids. Our cases are no better or worse than states that allow kids to go to school maskless.

Regarding the proposal that would allow quarantine camps, that would be an unbelievable infringement on our rights and freedoms for a virus that has a 99.9% survival rate, especially when treated with proven safe and effective treatments. This final step, if implemented, will guarantee many hard working, tax paying Americans will leave this state and never return for fear that you will take their kids and lock them up for simply for making a medical decision on what to put in their and their kids bodies. And, since it's been proven that the shot does not prevent the spread of this illness, it will do no good in stopping anything. It will just cause irreparable harm to the families you intend to separate.

If I were you I would be more concerned about the liability implications if you continue with any of these plans and someone is injured, just as the nearly 1 million people that have been so far according to the VAERS reports. Or, more importantly the tax dollars you will lose as you will run many people out of the school Systems and out of this state.

Sincerely, one very concerned citizen,

Kasi O'Leary

I wanted to take a moment and express my deep concern regarding the application of the WAC in relation to enforced isolation, enforced quarantine, and enforced vaccination this current virus.

We are all well aware that this virus is now mutated to a point it replicates too fast to be contained much less mitigated. The previous efforts over the past two years with less transmissible strains has not managed to contain this virus. Nor did you attempt to apply enforced isolation at a time when both the severity of the clinical outcome was a higher and the potential of the lower transmission made it more possible to mitigate. You do not have a situation where the transmissibility as well as clinical severity is high, a condition you need according to the CEMP.

We are all aware that the vaccines available are non-sterilizing vaccines and that according to the CDC, vaccinated people can spread this virus to others. Neither the vaccine nor the vaccinated will not stop the spread of this virus. We also know that Washington State had one of the lowest excess death rates in the nation last year, even though other states masked first and/or shut down sooner/opened later, etc. Washingtonians are responsible, independent people who take care of their neighbors and their health.

With those things in view, looking to implement these measures at this time appears to be nothing but an attempt of an authoritarian government to coerce and control the people in a desperate last attempt at power before the pandemic is finally at an end. It is anti-science and must stop.

To whom it may concern. This is in regards to the January 12 meeting on mandatory vaccines for children in school.□

I strongly oppose mandating vaccines for school children. Not only are the risks from Covid-19 extremely low for them, the vaccine is still under an EUA approval and the 3rd phase trials are not yet complete. We should not be mandating something that has not been proven to be fully safe. Beyond the safety issues, these vaccines are not doing what they were purported to do, to stop the spread. Vaccinated people are still spreading Covid and still getting Covid. So in this case the risk far outweighs the benefit for kids. I strongly oppose any mandates.

Thank you for your time.

I do not support the following proposed policies:

Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

I feel that these proposed policies are unconstitutional. This is not the role of the Health Department.

To whom it may concern,

As a parent and aunt of four children who attend school in the White River school district I wanted to let you know that if these vaccines are mandated, they will be pulled from school. This to me is so saddening. Our children have a right to education without segregation because of a personal medical decision and our freedoms as an American citizens. We have been taught to teach our children "My body, my choice" in regards to medical treatments or consent to body autonomy. How is this any different? Let us raise our children the way that we see fit as their parents, just as we let you do with your own. If you want them to have it great! Your choice. And that is what it should be, a choice. Thank you.

Naomi Richmond

Comment r/t Rulemaking Petition – Chapter 246-105 WAC, Immunization Criteria, Child Care and School Entry
—Possible Action

I am against the possibility of a COVID-19 vaccine mandate for children 18 years and younger as a stipulation to be able to attend school, both public and private. A vaccine by definition is a suspension of weakened or inactive organisms that stimuli are immunity to form. This mRNA vaccine is Not a treatment for COVID-19, but rather a preventative measure to minimize adverse effects of natural COVID-19 infection though it has come to light that this vaccine does not stop the vaccinated from getting or spreading the infection. Schools have not proven to be high transmission sites. Children are low risk for adverse reactions to natural COVID infection, with the exception of children who have health issues such as cancer. At this time, Those high risk children should be vaccinated only if parental and health care providers find the vaccine to be beneficial to that specific child due to health issues and after informed consent is given. Informed consent indicates that the patient has participated in their health care decisions after being provided with accurate and complete information about the procedure/medication/vaccine, that the patient and their legal guardian have been provided with accurate information about risks/benefits and that all questions and concerns are adequately answered or described prior to any procedure or administration of any vaccine or medication. Patients have the right to refuse to participate in clinical research, which is the case with the COVID-19 vaccine at this time under EUA. Improper obtainment of legal and ethical informed consent can lead to charges of negligence, malpractice, or assault and battery. Due to the COVID-19 vaccine still being under emergency use authorization, vaccines can not ethically be mandated to any age group due to lack of true informed consent related to adverse reactions to the vaccine and long term effects of the vaccine are still unknown so recipients are technically the research group for the effects and the efficacy of the COVID-19 vaccine. Known side effects of the vaccine, such as myocarditis, may often cause more serious health issues than natural infection of the virus.

While I believe that it is the right of each patient/family to make their own decision, I do not think that the COVID-19 vaccine can be ethically mandated to children at this time due to incomplete long term data safety and unreleased data safety from the manufacturers. Any mandated COVID-19 vaccination, not immunization as it does not immunize you from getting the virus, should come with financial and legal responsibility by the mandating party for all short- and long term side effects that may occur in each individual.

Thank you for your time and consideration,
Kayla Hitchcock

Yo whom it may concern:

I highly suggest you Vote against agenda #11 Immunization Criteria for Child Care and School Entry making covid vaccines mandatory for children to go to school. Children are at low risk for covid. These vaccines are still under emergency use authorization. The research on long term effects hasn't been done yet. So I urge you not to make the covid vaccine mandatory for children at this time.

Thank you.
Jessica

Dear Public Health Committee,

I thank you for considering the well being of our children during this pandemic. It is certainly a concerning time and your efforts to help keep people, especially our children, safe is appreciated.

I do have concerns regarding mandating vaccinations and forcing children to be vaccinated. I have a special needs child. There has not been any testing, research or data on special needs children regarding the vaccines. I am not opposed to vaccines. Our daughter is fully vaccinated and in compliance with the states vaccines. There are other ways for parents to protect their children, the teachers and other students. The vaccine is not the only option. It is also not fully vetted for ALL children. To mandate the vaccine could give adverse side affects. Given this possibility should give you reasonable doubt to why mandatory vaccines are a good idea.

Again, I do appreciate your intentions, however in the best interest of ALL children I hope you will wait to know how the vaccines will impact our special needs community.

Best,
Marikay Cuthill

Please keep Washington free. Do not make rules that further invade on the liberty of our people. We have seen this affect on Australia. Emergency orders should not give permission for people to be arrested at will. Out of suspicion or perceived risk.

We have a right to refuse something being injected in our bodies and our childrens' bodies. We cannot know what possible long term effects this new vaccine could have on our children and their reproductive health. Those who don't want to subject their children to this experiment shouldn't have to. Please stop the authoritarianism rule making that is unamerican.

First of all it is not voluntary if you do not have the freedom of choice to refuse the vaccination so that is a contradiction of terms. The last time I checked we still lived in the United States of america where we live under the rule of law governed by the constitution. a set of laws, rules and amendments written by our forefathers to protect us against tyrannical rulers who are power hungry and in office for their own self interest. I strongly oppose any mandates vaccine or otherwise. What happened to my body my choice? Thankfully we do not live in Nazi Germany at least I hope we dont.

I am strongly opposed to adding covid vaccine for children to the WAC-246-105-030

Covid vaccines remain under emergency use authorization and the rules that apply to that status

Children under 18 yr have extremely low clinical risk from covid infection

Children have a much higher risk of adverse event to the vaccine- including life long health issues

Research supporting child vaccinations safety is flawed by the methods used to collect it
Covid vaccines do NOT prevent getting it or transmitting it

DO NOT subject our children's health to a failed vaccine and the future unknown risks it may cause

This idea that WSBOH would even consider idea/discussion sending, apprehending arresting, people to quarantine, is more insane than the virus itself.

Does anyone understand how tyrannical and unconstitutional this is? Do they assume people of the state will comply?

The WSBOH has no authority for such madness.

Have they sought true legal council regarding the state constitution laws that prohibit such actions?

They might want to real soon or We The People will.

I vote No on the proposed agenda

This comments are for the meeting scheduled 1/12 regarding Covid-19 and the possibility of making the vaccine a requirement for school aged children.

I'd like to start by saying I'm not anti-vax. My husband and I have both received the vaccine and our almost 1 year old daughter is up to date on the normal vaccine schedule. However- mandating this new coronavirus vaccine for school aged children just does not make sense if you break down the numbers. Straight from the CDC website you can see that in an entire year 66 children passed away from Covid ages 5-11. That's less than the flu, heart disease, accidents and even less than committed suicide in that same age group. If you further delve into the numbers you'll find that each child that passed away had multiple co-morbidities. Taking that all into account Covid-19 is extremely low risk to healthy children and "safe and effective" or not the vaccines are still in emergency use only and STILL undergoing clinical trials. Subjecting our children to an experimental drug for a virus that poses little threat to them does not make sense scientifically. Parents need to be able to maintain control over this decision for their kids without the fear of having to pull them from school. Vaccines are designed to cause an autoimmune response in the person receiving them, so when exposed your body is able to fight the virus fast and hard. They are not designed to prevent you from contracting or spreading the virus, in which case there is no argument that vaccinating the kids is to protect teachers and other adults. Those adults need to take their own health into their hands and receive the vaccine IF they're worried about how they may suffer Covid. Thanks for your time and attention to the matter.

Please submit the following comment to the Board of Health for consideration before the January 12th public hearing on proposed changes to the infectious diseases guidelines/codes:

The language in these proposed changes is dangerously vague, and will lead to broad abuses of the public. Not only that, changes like this will further lessen what tiny amount of trust the public has left in state and federal government.

The suggestion that local health officials be allowed to use law enforcement to force entire groups of people into quarantine facilities because they will not comply with medical testing, treatment, examinations, counseling, and vaccinations is criminal. It's absolutely criminal.

Who decides who's taken and why? With the vague language used you could justify taking someone who hasn't received a chicken pox vaccine. Where does it stop? Will children be taken from their families? Will grandmothers or grandfathers be taken from their families? Will those with physical or mental disabilities be taken? Where is the line drawn?

Do NOT approve these changes to the existing guidelines. This is not Germany in the 1940's, and we've already seen how illegal medical experimentation and quarantining of entire groups of people turns out. People always ask "How could the Germans let that happen?". This right here...this kind of thing is how it happens. Don't do it— don't put our state through this.

☐ I'm writing to you as a very concerned parent. The proposed policies on your upcoming agenda are very disturbing. The government in WA state has already stepped on so many of our freedoms as Americans that I am appalled to see a proposed policy to use law enforcement to detain individuals based on their medical status. This is absolutely absurd. My husband spent 20+ years serving for this amazing country and protecting our freedoms. We will not continue to be a land of the free if this continues. In addition, the proposed policy to include the Covid immunization as a required school immunization is equally wrong. We do not know the long term effects of this vaccine that has not yet moved past phase 3 of FDA trials and is still in emergency status, and our children should not be used as lab rats. I have educated myself on both sides of this vaccine and truly believe this vaccine will cause more harm than good for our children. Adults that want to be vaccinated should absolutely do so, but our children should not be forced into it. My children have had the Delta variant and had only minor symptoms. The science shows there is more harm done to children from the Covid vaccine than actual Covid. I, too, had the Delta variant as a fully vaccinated adult, and my symptoms were far worse than my unvaccinated children's. I also think it is very important to consider the fact that the Omicron variant is showing the least serious complications of the variants, especially for children, and the vaccine does not protect against getting it. They are telling us that the vaccine keeps us from getting seriously ill, but, again, children do not typically have the serious complications from Covid that adults sometimes do. Forcing a mandate like this will only further divide this state when we need healing in all areas. I implore you to think for yourselves after first doing your own research on both sides of this topic. Scientific FACTS may be challenging to find as they do not fit the narrative that is being pushed on everyone, but they are out there if you truly care to dig for them.

Respectfully,
Lindsey Lewis

The choice to vaccinate children with a shot known to have adverse side effects in adults not limited to strokes, blood clots, and enlarged hearts should lie with the parents.

For the school system to take an extraordinary step to require this knowing the health risks of the shot itself is an overreach.

Parents pay taxes for teachers to educate their children. They do not pay taxes for teachers or education boards to force medical advice or requirements on children.

A child's autonomy and what medical practices takes place on a child lies with the parents and nobody else.

It is both mine and my families belief that this is unconstitutional, unethical, and find it hard to believe it is being attempted. As a healthcare worker, I understand sickness, but I was taught a code of ethics and freedom of choice is included in that book. We are all patients at some point, to which we have the choice to live our lives and choose care as needed. The past two years have shown me how flawed our healthcare system is, but the majority of those flaws arise from higher up, from government and managerial policies. The people on the front line, the ones that truly care about those they are helping are doing everything they can. This will only make matters worse.

This will cause an uproar that will further segregate people, and forcing a vaccine on children for public education targets the very socioeconomic populations that are so publicly discriminated against. It is families that have no other option, time wise, financially, etc who will cave and send their child to be vaccinated when there are no long term studies on children's reaction to this vaccine. They are the ones who will be the study results in the years to come. Those people will suffer more than they have been since the start of all of this.

I believe in healthcare, I believe in science, and I actually understand the research available. That is why this move in government is so astonishing. Not to mention the core of the American constitution and basic human rights being violated.

Please, do not make an already scary world worse by threatening a forced isolation, or a forced vaccine on children so that they can go to public school. Public school that was founded to ensure that every child has the opportunity to learn in this country.

It is not in anyone's best interest to pass laws such as these.

Meeting on 1/12/22

I only have one simple thought or comment to express. If the state goes forward with mandating the COVID-19 vaccine for K through 12 students, this will be a sure way for at least my family to pull their kids out of public school. There is no research or time to know what this vaccine will do to our children and it is inhumane to make it mandatory at this point.

Thank you,
Nicole Huppert

The domino effect that this will have on the residents in the state of Washington will cause so much damage to everyone. The mandated vaccine has cause such a shortage of nurses and other staff in our healthcare system. Currently patients who need life saving cancer surgeries are not able to have them because the hospitals are full, full meaning the amount of nurses available to care for people. Some of these nurse still working are unvaccinated with approved exemption. So you want to lock away the essential workers in our state I am not just speaking on healthcare. The entire state will soon look like downtown Seattle everywhere. As a tax paying citizen of this state which funds our leaders pay, the school systems, etc we are the stockholders in these policies you are trying to be put in to place against us. You lock us up or take away the education for our children the funds that come from the tax payers will stop and eventually you will feel that as well. Again the domino effect. This is taking away human rights at the very basic level that you do not have the right to do. You work for us please don't forget that.

Thank you a concerned citizen

Dear WSBOH Members,

I am a resident of Port Angeles, Washington and would like you to consider my comments regarding your department's proposed policies about quarantines/isolation and vaccinations. I am not against vaccinations, when found appropriate by proper scientific method/procedures. The current Covid vaccines available in the United States have not received the full testing and evaluation usually used with vaccines as they were developed using emergency procedures. Vaccines were previously described as preventing illness but that prevention aspect does not apply to current U.S. approved Covid vaccines. You should not establish Covid procedures unless they are of a temporary nature with set termination dates or requirements.

I have learned that you are considering adopting Covid procedures that are not supported by science and you are using national guidelines in implementing your policies. Covid procedures/recommendations are not established by the President but rather by agencies already in place to make these decisions, i.e. the CDC. I have been hearing conflicting recommendations from them and do not feel it is appropriate for you to set policies until the situation has stabilized.

Science does not support the policies proposed in WAC 246-100-070, WAC 246-100 - 045, WAC 246-100-040, You are considering permitting local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040).

You have already approved my County Health Officer's edict to require proof of vaccination for indoor food/beverage consumption. This is in addition to maintaining social distancing. Why doesn't HIPAA protect this information from disclosure as vaccination status does not protect a person from contracting Covid?

You are also including the Covid-19 injections as part of school immunization requirements using (WAC 246-105.) although young people have developed illnesses after being vaccinated. There is no recourse for their families because of the emergency development of these vaccines which protects the developing pharmaceutical companies from liability. By establishing this school immunization requirement the State should be considered liable for any health issues arising from compliance. As a Washington State taxpayer, I do not want to be assigned liability because I permitted this requirement to be put in place.

Please consider my comments before making your policy decision.

I am saying no to forcing people and children to take the vaccine and also no to allowing law enforcement to take people in custody for not complying.

Simple FACTS to know....

97 to over 99% survival rate.

Omicron "cases" is meaningless. Fauci admitted this the other day when he said the actual numbers should reflect actual deaths and/or hospitalizations.

CDC admitted they are not differentiating between "cases" of children who are in the hospital for other things and THEN test positive for Covid. They are calling everything Covid.

Africa stopped following Omicron as it is nothing to worry about and their Health Minister SAID THIS to to entire world.

VACCINE IS not SAFE...Over 20,000 vaccine related deaths in 1.5 years since vaccine rolled out. (Deaths from ALL vaccines last 30 years = 300 avg. Per year)

VACCINE NOT EFFECTIVE... you can still get, transmit, and/or be hospitalized after getting vaccine.

Vaccine is NOT approved and is sill in trial stages. Forcing citizens to become part of an experimental drug group is a violation of national and international laws. (Nuremberg comes to mind)

VAERS database already has about 200,000 adverse effects reported? From blindness to seizures, to blood clots, to heart problems...etc. (VAERS is a voluntary reporting system and only 1 to 5% of doctors report adverse effects so you KNOW the death and adverse effects are much higher.

Board Members,

I am a healthcare worker in WA state and a mother of 2 young children. Upon reading WAC 246-100, I was absolutely appalled at the verbiage written and the fact that my children are growing up in a state where this is in place.

We are not cattle to be herded to an 'undisclosed location', we are American citizens. The way this Administrative Code is currently written is absolutely abhorrent. It disregards the rights of the people (ex parte), it is subject to abuse of power and it should absolutely not be utilized for covid-19 or any other communicable disease for that matter.

The health and safety of Washingtonians is, of course, important. But, this subjective process needs better transparency and checks and balances. If a person is a true threat, have an open hearing with notice to get all the facts, from both sides, before a judicial officer enters an order.

As a concerned citizen, your consideration of the aforementioned points is imperative and appreciated.

Re: Proposed Mandatory Immunization of Children in Schools

Dear members of the WSBOH,

I would like to voice my opinion and my request that you do NOT mandate vaccines for children. They are not high risk for covid, and the adverse affects of the vaccines make it terribly unwise to vaccinate children. The statistics of many children having myocarditis and thrombosis after receiving the vaccines should be enough evidence that children should not be forced to take the vaccines.

Thank you for considering the health and safety of our previous children when making your decision.

Sincerely,
Maureen Bensch

Dear Board Members,

I have seen the true figures, data, and some of the harmful ingredients in the vaccines. We know there's no pandemic, we know the rate of death in 2020 was the same for any other year. We know scientists have proven covid to be influenza A and influenza B. Sharing this data with Stanford, Oxford and the CDC. We know they don't want that knowledge out and refused to acknowledge it. We know the vaccinated are now the sick as you have decimated their white blood cells among other nefarious actions.

As an RN since 1994, I know the truth about masks. I KNOW why you force them. I know what masks do and don't do. I know masks don't do what you've taught the public. Have a person who vapes, blow out while vaping through all the different kinds of masks. It's a great visual to show. Masks don't hold back your breath or anything in it. Masks increase carbon dioxide to levels that encourage cancer cells and bacterial infections to grow.

If you vote for these new bills into WAC, you are going along with a nefarious agenda. We know. And as more true information is shared and learned. More of the public knows how sick and disgusting Boards of Health, as well as most government agencies are.

Vote No on telling the police to involuntarily take people to your concentration camps. You may call it quarantine centers. We know the truth. We know you will change the 10 and 30 day maximums to whatever you please.

Vote No on forcing covid "vaccinations" on public school children. We know your trying to hurt, and kill the children. We know if they don't die, that they will be patented. They will be traceable and controllable when you hook them up with even more. A chip in their hand and a credit score to decide if they can access anything. We know this is your plan for all humans. Patented and controlled. Vote No on forcing children and adults to being vaccinated. WE DONT WANT TO BE PATENTED! Microsoft owns the patent. Go look it up! Vaccines change your DNA just enough to not be fully natural and therefore patentable.

Vote No for any controlling action related to covid or a health "crisis".

Only Vote yes to the one thing that gives parents control over whether any medical treatment is given to themselves or their children.

We know.

This is ridiculous to even be considering. This is not what Americans have fought and lost their lives for. They fought and died for individual rights and choices. Locking citizens up when their beliefs differ from our government is not democracy. Stop this madness!

I urge you to not put this policy forward. The harm this will do to our children now and is far greater than the protection it will cause. The micro clotting the vaccine causes, the myocarditis in young males, possible fertility issues long term. These school age kids have a strong immune system and are not even effected by the virus. Why weaken their immune system even more and possibly cause irreversible damage. Please keep the mandatory vaccine out of our schools and allow parents to make that decision for what's best for their children.

Regarding the law enforcement getting involved to send some one to a quarantine camp if refusal if test, vax, or refusal to self quarantine, over our American dead bodies will we comply with that tyranny. You implement this kind of policy and your asking for an all out physical war to take place on our home land. 2nd amendment rights will protect every man woman and child from that kind of tyrannical policy taking over. This would be domestic terrorism and is not ok The science you say is science but has been cherry picked, and others censored to fit the narrative is not going to control and dictate us and we kindly ask you to not allow it.

This is a misinformed, misguided gross violation of rights, should you seek to pass the proposed COVID 19 WAC codes. There is no scientific based reason to pass sweeping vaccine requirements ESPECIALLY in a youth population that's has an almost zero fatality rate, but the vaccine immediately puts them at some unknown rate of risk. There are enough studies to show this. Furthermore, this country was not built nor will it continue to thrive at the hands of totalitarian or authoritarian style leadership! Your plan is to hold people against their will for a survivable illness?! You are in danger of seriously overstepping your duties with a radical lack of understanding of biology and of the freedoms we have in this country. Passing these will be a tremendous mistake and will do NOTHING to help stop Covid if that's even the goal here, which I doubt. It seems to me it's about power and control. You will answer to your creator some day, be mindful.

When did it become the government's job to worry about my health? If it is your job to force "protection" on people why don't you start with making it illegal to sell processed foods, GMO's, and foods drown with chemicals that are killing people just on a slower more painful rate. I do not want your forced "protection" as we only put in our bodies clean things. We go through a lot of work to take care of our bodies and because of that when we got COVID it was no big deal for our family. We also know many other families(not related to us) who eat this way that didn't have a problem with it. We are not anti vax as our children have had some vaccines. We just look at the benefits vs the risk and then we decide. You do not know other people's medical history so requiring something like this is would be asinine. A close family member of ours just moved to Florida due to the mandate. This family member almost died of a vaccine while serving in the military and he was required to get the COVID-19 vaccine for work. If he applied for a medical exemption he would then have to be on disability where he would only make a fraction of his income. He is not even 40 and couldn't fathom having to live off other peoples work when he is fully capable but the government told him he can't provide for his family. You are not protecting people by this. You are actually killing them. The stress of all this you have to get the vaccine and people trying to decide what to do is causing suicide, depression, anger issues (resulting in domestic violence), heart attacks. The only number that people are looking at is the COVID-19 death rate. Everyone really needs to look at how much the death rate for everything else has gone up because of the stress. If you as the Washington State Board of Health really want to protect people you need to encourage people to eat healthy and actually teach them what is healthy. I can't figure out for the life of me why during this no one has mentioned changing your lifestyle to protect yourself. If a person is that worried about it than they should take all action steps to protect themselves. It is our own job to protect our health as no one care about our health as much as we do. Would you hand your kid over to some random stranger and trust them to take care of them like you would? NO WAY! My health just like my children are my responsibility and everyone else just needs to stay out of our house!

To the members of the WSBOH committee,
I would like to urge you not to force children to be vaccinated. There are many unknowns as to the long term effects or complications that could arise from it in the future. Covid-19 provides very little risk to children, therefore the vaccine could endanger them more than the disease itself. In addition, it should be the right and responsible of the parents to choose what is best for their children, not the government or members of the health department.
Thank you for taking into consideration my comments.
Sincerely, Janet Solares

Greetings to those who will be deciding the future health of Washington State's children.

I am not a nurse. I am a Dental Hygienist of 47 years, a mother and a grandmother here in Washington. My training has taught me to not only "follow the science", but to "follow those that KNOW the science". I will site statements from a couple of the many world renowned COVID19 experts in their fields. Much of this scientific information a person has to seek out on their own. These Dr's are just beginning to make mainstream appearances, however, they have treated thousands of Covid patients successfully. Which is how I would like to see the children of Washington State continue: Healthy, Happy, Socialized and with a future of Optimism in front of them.

Dr. Robert Malone: globalcovidsummit.org "Before your child is injected . . . "
"Before you vaccinate your child, which is irreversible and potentially permanently damaging, find out why 15,000 physicians and medical scientists around the world signed a declaration publicly declaring that healthy children should NOT be vaccinated for Covid19. On behalf of these MD's and PhD's, Dr. Robert Malone, who has devoted his career to vaccine development, provides parents a clear statement outlining the scientific facts behind this decision."

(Video/Full Text at this site)

"There are three issues parents need to understand:

The first is that a viral gene will be injected into your children's cells. This gene forces your child's body to make toxic spike proteins. These proteins often cause permanent damage in children's critical organs, including

Their: brain and nervous system with lesions

heart and blood vessels, including blood clots and heart tissue scarring

. . . at least 5 years of testing/research before we can really understand the risks.

reproductive system damage, and

This vaccine can trigger fundamental changes to their immune system

Your children represent no danger to their parents or grandparents."

"As a parent and grandparent, my recommendation to you is to RESIST and FIGHT to PROTECT YOUR CHILDREN!"

Dr. Peter McCullough youobserver.com OPINION: Do not vax your children

"McCullough is recognized in medical circles as a leading U.S. cardiologist and epidemiologist."

As Dr. John Littell of Ocala . . . "because no one knows the long-term affects these vaccines will have on children."

"What's more, these doctors and researchers who have hands-on evidence that early-treatment regimens are effectively preventing hospitalizations and saving lives."

"Dr. Robert Malone . . . under no condition must a child be vaccinated with these vaccines. Because children bring near statistical zero risk to the table."

The article goes on to state . . . Children have natural immunity in their noses. If you bypass this mechanism with a shot directly into the blood stream, now you have put that child at great risk of getting infected. Essentially.

(Please read the rest of the article. Only about 3 minutes long.)

Dr. Jane Orient (and Dr. McCullough) citizensjournal.com Covid vaccine for kids

Web site has graphs for all ages and myocarditis statistics. Talks about the VAERS information, also. From 2020(week 26 - 37) and 2021(week 26 - 37) there has been a 38.1% increase in deaths. Relating to vaccine being more widely given in that time frame. All age ranges are talked about and shown on graphs. (About a 3 minute read)

Dr. Peter McCullough europe.reloaded.com Dr. Peter McCullough: "Stop This Reckless Vaccine Roll Out Now" (VIDEOS)

"The Vaccinated Are More At Risk Due to ADE"

"We NEVER Expose Children to Danger to Protect Others"

"Studies from Israel and France, and in clinical practice, show that after the 1st mRNA vaccine, patients have a greater risk of developing Covid-19, the real infection. And this Antibody Dependent Enhancement, where the acquired antibodies make encountering the next variant more dangerous. People need to know this when they're given the 1st injection."

(This article is also about a 3 minute read, but very informative about the actions and reactions of the virus, vaccine and the population.)

I hope this information sets the scientific, factual reasons why I vote for NO Vaccines or mask wearing for Covid 19. Children AND adults don't handle masks properly and they are a huge cause for all kinds of infections. As was stated in the articles, treatment packs can now be obtained. I can supply you with several sources upon request. One that a lot of people use is Seven Cells. Look on the internet, they can help. Also for more info go to FLCCC.net. Print outs are terrific. Look up "Rogan and Malone: The Most Important Interview of Our Time". Another site that is very helpful is "Front Line Dr's".com.

I very much hope that this information has been a help to all of you. It has been invaluable to me to help me understand about Covid and to vax or not.

I pray that you will see all these souls as I see my family, and you will decide to let us all live in our own way. Our individual choice - no mandates.

Thank you for your consideration and time.

I would like my voice heard on these matters. I do NOT support these policies. We should NOT accept the over reach that these policies clearly demonstrate. There should be no involuntary detaining of any person, family or group for simply not taking the vaccine, testing, medical exams, counseling treatment. The public has been deceived about this vaccine and about what we now know about Covid-19. The government should not have the right to essentially imprison anyone for not complying with their wishes when it comes to experimental vaccines. Vaccines that have major issues. Issues like we have not seen before. This is a violation of the Nuremberg Code. There is clear evidence that these vaccine cause issues in the ovaries as well as things like myocarditis in young boys especially. There are suddenly kids passing out and some even dying while on the field or courts for sports. You have young women entering into menopause far too early. And some who are in menopause that begin me starting again. Natural immunity should be recognized. It is proven to be far superior than the vaccine. It is also true that you cannot get Covid twice (Dr. Peter McCullough). What is this world coming to? We can not let our freedoms be taken away. Stand up!

Best,
MacKenzie Rademaker

Greetings,

As a resident and voter in WA state, I would like to state the following:

1. I OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose COVID-19 shot mandates, period!
2. I SUPPORT Informed Choice Washington's Petition for Rulemaking (see below) — our petition is item 11 on the January 12th agenda. It was filed by Xavier Figueroa, PhD, on behalf of ICWA, and asks the Board to establish a new rule that prohibits adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

As noted in the Petition Filing, we are requesting the WA State Board of Health adopt a new, permanent rule prohibiting the Board from adding to the daycare or school requirements any Emergency Use Authorized (EUA) product or any licensed product formulation which has not yet completed Phase 3 clinical trials. This new rule request pertains to any and all avenues through which the Board has authority to add medical intervention requirements, including through regular or emergency rule-making.

We are requesting this Rule because despite the absence of an FDA licensed COVID-19 vaccine formulation with completed Phase 3 trial studies in children, and despite CDC-acknowledged risks of myocarditis and blood clots and the data showing children are not at high risk of severe disease or death from COVID-19, the BOH has gathered a Technical Advisory Group (TAG) to examine adding COVID-19 vaccines to daycare & school requirements. This new rule is needed immediately to ensure that federal EUA regulations are upheld & to protect fully informed consent, which prohibits the use of coercion or undue influence, such as can be exerted by state requirements.

Thank you for your consideration.

Sincerely,

Joe Hess

Dear Committee,

I have a concern for the proposed change for allowing the use of law enforcement to force people into quarantine facilities. This is not Nazi Germany. People can make the best choices for themselves. I am horrified to hear that we are even contemplating this in civilized society.

Given that the recent covid strain is only causing cold like symptoms, there is no need for panic. This is complete over reach.

M Farrell

I strongly disagree and appose such Communist mandates, nothing you've done since this Scamdemic started makes any sense at all, but then you're making up the rules as you go, except for the names of the "variants" of the so called viruses.

There is a list of your so called variants that was created long before they came out which tells us this is all part of your redicolous plan to control every aspect of our lives all in the Agenda of covid 19.

I find it very interesting that adults and children can walk into a restaurant with a mask on and once seated they are safe to remove it, bahahaha really I mean really!

Businesses had to close by 10:00 pm because somehow that sneaky little virus knows how old you are, what time it is in any time zone, and best of all WASHINGTON STATE LIQUOR STORES WERE OPEN THE WHOLE TIME WHILE YOU SHUT DOWN SMALL BUSINESSES!!! Why? Because of the tax revenue, do you really believe they were essential??? Hogwash!

And to top it off at the same time children whom you say are less likely to get the virus have to wear a mask at all times in school!

Perhaps you can explain why there was no sign of influenza A or B during covid19, of course not because all along it was the influenza A & B.

We are not easily fooled like so many who are brainwashed by the media, I don't base my decisions on what the media tells me nor do I believe one iota of this Scamdemic and there are millions more like me.

Not taking the poison you are mandating!

"We The People" will fight back!

To whom it may concern,
Per the CDC and our top health professionals, no Covid 19 vaccine prevents transmission. The data is also clear that children are neither at high risk of death nor are they major carriers of Covid 19. With the limited long term safety data we have for the vaccines, and the factors of risk vs. reward in giving it to children, it is morally reprehensible to deny a child their education if a parent is unsure that getting a covid vaccine is right for their child. Also, I Washingtonians have generally been very respectful towards one another throughout the pandemic in regards to efforts to stop the spread whether or not they believe the efforts will be effective. Our own governor stated we "Won the Super Bowl of the pandemic" in comments on the news. WAC246-100 in regards to covid 19 is unnecessary and it will not have a positive effect.
Thank you for considering my comments.

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

External Email

I hope this email finds you and your family well.

A few days ago, during a WA State Board of Health meeting, the advisory group spoke of whether they should recommend adding Covid vaccination to the current WA vaccine schedule for school and daycare entry. Unfortunately public comments were not allowed. The advisory group would be making a recommendation for our children without hearing from the parents.

I oppose the Covid vaccine being added to the school and daycare schedule. Children have mild to no symptoms from the virus, and are thus the safest. Covid Vaccine inserts are none existent to the public, leaving us without a knowledgeable and informed choice. Pharmacists themselves do not have access to a vaccine insert. We are told to believe and take the plunge yet so many have had horrible and evenly deadly complications from these vaccines. Please urge the advisory group to be cautious and not make recommendations for the Covid vaccine to be added to the school and daycare schedule. Thank you for taking the time to read my opposition and concerns. I look forward to reading your reply.

Subject: Covid-19 and WACs

External Email

Dear Kelie Kahler,

Please do not create a police state with requirements or even allowances for law-enforced quarantining, isolation, medical exams, treatments, or vaccinations in regard to Covid-19.

There are still no long term studies to show Covid vaccines are safe. Let people decide whether to vaccinate for themselves.

Furthermore, the vaccines clearly aren't working to prevent disease and the idea that one's infection is less severe is dubious at best- afterall, how can one know how severe it would have been had they been unvaccinated? And that, especially when so many unvaccinated have such non-severe infections.

Please do not take away parental freedom for healthcare decisions for children. This should be a personal decision for each parent. And children are at very low risk of developing severe Covid.

The vaccine does not stop the spread of this disease as studies show both the vaccinated and unvaccinated are spreading it.

Finally, I find it shocking, unscientific and discriminatory that provision for those who have natural immunity never seems to be considered. If any new rules are made, PLEASE address natural immunity.

Sincerely,

Rebecca L Hageman. RN

Subject: RE: covid vax as a school requirement

External Email

Ladies and Gentlemen,

I would like to add a voice of STRONG dissent on the issue of making the Covid Vaccine required for school attendance.

While I could expound ad nauseam in long paragraphs of objection, for the sake of time and attention span, I'll address this issue in bullet points:

- * The vaccine does NOT prevent catching Covid, example all the break through cases. Even a 100% vaccine rates, would NOT eliminate this virus.
- * The vaccine does NOT prevent spread.
- * The vaccine is inconclusive at mitigating the extremes in symptoms. Following the "scientific method" of ALL things being equal EXCEPT with or without the vaccine is impossible, therefore to say it reduces symptoms is merely speculation.
- * The vaccine (all of them) DO contain cell lines of aborted fetal tissues which is objectionable to be used and injected into the body for those individuals with RELIGIOUS BELIEFS that guides them into a Pro-Life stance. Requiring a vaccine of this nature FORCES A VIOLATION OF RELIGIOUS FREEDOM.
- * The vaccine is NOT FDA APPROVED for regular use, only EMERGENCY.... WHEN NO OTHER COURSE IS AVAILABLE. There are other courses available.
- * Several other countries, if observed, have pulled vaccines from use in general, or by age specific because of the side effects tracked in their countries.
- * Per the BROAD spread and SEVERE side effects tracked in VAERS, if it was any other vaccine, it would have already been pulled from the market.
- * Children at the LEAST AFFECTED demographic of all those who get Covid. It is illogical to mandate a vaccine onto a demographic of people that is minimally effected by a virus.... yet THE RECORDED SIDE EFFECTS of the VACCINE are FAR MORE HARMFUL.
- * PARENTS HAVE THE RIGHT TO RETAIN DECISION MAKING OVER THEIR OWN CHILDREN!!! You can't possibly know each child's needs/beliefs to accommodate, nor bear the responsibility of the liability that a mandate would bring.

I sincerely hope that you heed the voices which say NO to a MANDATE, that you err on the side of maintaining the freedom of CHOICE, to include maintaining sovereignty over our own personal beliefs, and subsequently our bodies. This country has written in the founding documents and is known for FREEDOM; people flock to the country for this treasured characteristic, so don't chisel away at liberty one chip at a time, one issue at a time.

Should this vaccine become a requirement, I WILL pull the rest of my children from the public education system.

Dear WA State Board of Health,

As a proud resident of the great State of Washington am completely against any of the proposed Covid policies as they are a government overreach and should be left as a personal choice. Specifically I am against WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

Sincerely,

Lawrence Badillo

To whom it may concern,

As a Washington resident and civic minded individual, I must voice my concern over any government vaccine mandate.

The Covid vaccination should NOT be required for children or teens for school attendance and childcare, the state government should not be forcing medical procedures on people, I believe it violates our rights.

I personally am pro vaccine, but that does not mean I am pro vaccine mandate.

On the safety side things of the vaccine does not have long-term safety data for children. In addition these vaccines currently have only emergency use authorization from the FDA.

I personally do not think it wise to mass vaccinate children until further studies have been done on the long term effects of the vaccine.

Thank you,

Matthew Halpin

Subject: Covid Vaccine School Mandate

External Email

Dear Ms. Melanie Hisaw:

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested.

No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity.

Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Patty Ballestrasse

Good morning,

I am writing today to sincerely ask you not to require the covid shot for school-aged children. Beyond the obvious facts of covid continuing to have a 99% survival rate and variants becoming less and less deadly is the absolute that this requirement would be a gross violation of human rights. It is up to the individual or parent to determine what is best for him/herself or his/her child. No one else should have authority over this God-given right to body autonomy. Please read the Nuremburg Code and please vote NO.

Also, vote NO on the policy to FORCE individuals or groups of persons into a quarantine facility AGAINST THEIR WILL. That is a direct violation of human rights and our Constitution.

Please vote NO on both policies.

Thank you for your time,

Janell Wheatley

Subject: COVID Vaccine for Children - Dangerous

External Email

Good Afternoon:

I wanted to voice my concern about the danger of COVID vaccines for children. The COVID vaccine is different from the vaccine for measles, mumps, etc. The COVID vaccine is not licensed and is experimental. There is a high risk for myocarditis when boys especially are vaccinated. The Nuremberg trials established that we would not force people to take experimental medical treatments. The risk benefit for children is inverted. The COVID vaccine is more dangerous to children than having the disease itself. Children face better outcomes without the vaccine. The government has created financial incentives for Covid-19 treatments and deaths. The inventor of the MRNA technology, Malone, posited that only the most vulnerable should have been vaccinated. He hypothesized that we would have breakthrough variants. Fauci and others had email communication that they would silence epidemiologists and others who questioned the lockdowns and other measures. Most children who have been hospitalized with COVID have actually been hospitalized for other reasons (appendicitis, cancer treatment, broken bones, etc.) and have been found to have COVID - hence, counted as a COVID hospitalization. There is no scientific proof or study that proves children can give COVID to adults - it is the other way around. The jury is still out about the side effects from the MRNA vaccine. The health of our State's children is in your hands - it is prudent to wait, not act, especially with this less virulent strain now sweeping our state.

I also wanted to voice my horror at the prospect of forcibly detaining Washington citizens who refuse to comply with COVID mandates. This is a direct violation of our freedoms under the Constitution. We are a free country, not a socialist or communist nation. This idea sounds like what China is doing and has done to its citizens. Have we not learned anything from the rounding up of the Japanese citizens into detention camps during WWII? Please stop and think about what you are proposing. Look at the actual death rate from COVID not for people who died of something else and happened to have COVID. We are overreacting as a society to COVID, especially this new variant.

Thank you for reading my comments and passing them on the the Board, as I work and will be unable to attend the ZOOM meeting January 12.

Sincerely,

Kimberly Hart

External Email

I am opposed to requiring COVID shots for children to attend school. It has been well-established that children have essentially zero risk of serious illness or death from COVID-19, especially now with a much less virulent strain now the primary version of COVID-19. They are under greater threat of dying in a car on their way to school. The long term effects of the COVID shots on children are unknown. The CDC themselves have stated that the COVID shots do not prevent infection or transmission. Please do all in your power to prevent this requirement from hurting our kids.

would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

I know someone personally who has had the injections and now has to see a doctor every 4-5 weeks to see if there is any progress to reverse the adverse reaction due to the Covid-19 shot.

I have a child in preschool. It is my responsibility as the parent to choose what is best for my child. If an adult can have adverse reaction to this injection why on earth would we want to give this to a child?!

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. To Whom It may Concern,

I am a father of 3 children in Bellevue WA and I fully reject the notion that we need to mandate the COVID-19 vaccine for children. Based on the criteria set by the state, a COVID-19 vaccine does not meet the criteria for reviewing antigens in WAC 246-105-030.

Criteria #4: Experience to date with the vaccine containing this antigen demonstrates that it is safe and has an acceptable level of side effects

As per the FDA advisory Committee 10/26/21 public hearing at the

At the 6hr.50min mark

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fyoutu.be%2FflaaL0_xKmma%3Ft%3D100>, While discussing the vaccine Dr. Eric Rubin said "We're never gonna learn about how safe the vaccine is until we start giving it". That is after saying "not everyone should get it". Whether a child gets the vaccine should really come down to whether they are at risk and clearly it should be a personal choice. There are certainly kids that should be vaccinated but they are at risk with serious underlying health conditions.

Furthermore, there is information concerning myocarditis developing in young males. This was mentioned as a concern during that FDA advisory committee hearing and is well documented.

CDC - Myocarditis in Young Males

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fcoronavirus%2Fncov%2Fvaccines%2Fsafety%2Fmyocarditis.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C503e4a3d10e44ede3a3308d9d1b338d9%7C11d0e2>>

Boys more at risk from Pfizer jab side-effect than Covid, suggests study

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.theguardian.com%2Fworld%2Fnews%2Fhealth%2Fboys-more-at-risk-from-pfizer-jab-side-effect-than-covid-suggests-study&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C503e4a3d10e44ede3a3308d9d1b338d9%7C11d0e2>>

Høeg Study on Myocarditis

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F10.1101%2F2021.12.15.21261111v1>>

Criteria #5: The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population.

As per the CDC, it is estimated that approximately 26million children between 0-17 years have gotten covid and approximately 645 died with covid. CDC Estimated COVID incidence by Age

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fcoronavirus%2Fncov%2Fcases->

updates%2Fburden.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C503e4a3d10e44ede3a3308d9d1

That is 1 in 40,300 +/- which is certainly not significant. In fact more children die annually from flu and pneumonia, heart disease and drowning. It is estimated that about 70% of the deaths are amongst those with serious underlying health conditions such as asthma, obesity, cancer, neurologic/developmental conditions, and cardiac conditions.

<https://www.medpagetoday.com/infectiousdisease/covid19/88630>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medpagetoday.com%2Finfer>

Criteria #6: Vaccinating against this disease reduces the risk of person-to person transmission, with transmission in a school or child care setting or activity being given the highest priority.

The science does not support the notion that this vaccine prevents the spread of the virus. On August 8, 2021, the CDC notified the public that the COVID-19 vaccine does not prevent you from spreading COVID.

CDC Director: Vaccines No Longer Prevent You From Spreading COVID

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.realclearpolitics.com%2Fvide>

The information surrounding the COVID-19 vaccines is ever evolving. We originally thought 2 shots would be sufficient and just today, the Moderna CEO announced 4 shots will be necessary. They said if you got the shot, you wouldn't get covid. Then we learned, breakthrough cases happen but they were thought to be rare. And now, it's clear that breakthrough cases are not rare. We are constantly finding out new information and the last thing we should be doing is mandating a vaccine for children who are the least vulnerable to the virus.

If all board members haven't already, they should listen to the entire 7hr + meeting from FDA advisory committee on 10/26/2021. Link to Committee hearing

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.youtube.com%2Fwatch%3F>

During the hearing FDA board members specifically voiced concerns about an emergency use authorization being exploited by states to mandate the vaccine for school attendance. The FDA board did not agree with that and I do NOT believe this vaccine mandate is necessary for children.

Thank you for your time.

Dear State of Washington Board of Health Members;
I learned today that you are considering a requirement of all students to show evidence of a Covid-19 Vaccine similar to the list of other vaccine requirements.

If the Covid-19 vaccine was a fully vetted tool with proven efficiency that would be one thing, however many of my colleagues who have received the vaccine have still contracted Covid 19. The vaccine does not stop the spread of the virus. I wish it worked, but it doesn't. This has been stated by our own CDC officials.

There are also various studies that show the vaccine is harmful. Several Doctors have testified that young children should not be required to take the vaccine.

I have great concerns about anyone being mandated to take this experimental vaccine and ask that you do not move forward with any requirement. Lives are at stake and it would be a great burden for you to bear if children were harmed.

Thank you for your consideration of this matter.

Sincerely,
Laura Hoggatt

Subject: COVID-19 Vaccine Mandate Proposal for Schools

External Email

To the Washington State Board of Health

My name is Hugh Pierce, and I am a 7-year resident of Anacortes, Washington. I have 2 children currently in the Anacortes School District. I am writing you to express my concerns regarding the potential of a vaccine mandate for children to attend school in-person. I urge you to not let this vaccine mandate become a reality.

This mandate would be unconstitutional, both state and federal, by infringing on our rights to privacy and our rights to make our own decisions for our children's health.

This mandate is not aligned with the actual risk that COVID-19 poses to children ages 0-19. Also, this mandate is not aligned with the risk that an un-vaccinated child poses to anyone else who is vaccinated. Please consider the following documented facts:

- * The COVID-19 vaccine does not prevent a person from getting COVID-19
- * A vaccinated person can still contract and spread the virus
- * Natural immunity from previous COVID-19 infection is better than the vaccine
- * The vaccine only minimizes the COVID-19 symptoms, does not eliminate them
- * There have been ZERO COVID-19 deaths in Skagit County for children ages 0-19.

The risk of mandating this vaccine completely out-weighs the benefits. An un-vaccinated child poses no increased risk to anyone who is vaccinated.

I urge you to consider the concerns I have mentioned above, and to do more research on this before implementing such an unconstitutional mandate. Do not implement a COVID vaccine mandate for my child to attend school.

Thank you for your time and consideration regarding this extremely important matter.

Sincerely,

Hugh Pierce

Parent, Anacortes School District

Subject: Re: Decision about Recommending Covid-19 Vaccine for School Children

External Email

Each member of the Washington State Board of the Health has a grave responsibility to set practices and make policies that affect individual citizens and families of the State of Washington. Parents have the right and responsibility to make decisions for their children. A vaccine of any kind is putting a substance into a body that has either wanted efficacy against disease or unwanted short-term or long-term damage. I ask the board to rule against any recommendation of the Covid-19, Novel Coronavirus Vaccine for children in Washington State schools or anyone else.

As Americans we have sovereign jurisdiction over our bodies. Parents know their children best and should make ultimate medical decisions for their children. They can consult their doctors or faith leaders. Parents want to make informed choices about what goes into their children's bodies. Children are not at great risk of Covid-19 or of spreading it. I urge the Board to vote No or Against the Covid-19 vaccination recommendation for Washington's school children.

Sincerely,

Janet M. Young

Subject: Covid vaccine requirement for public schools

External Email

I am writing as a resident of Washington state to let you know my feelings on this unconstitutional and tyrannical overreach of power you think you have. Gov Inslee has obviously led you to believe you're more powerful than you actually are.

You have no right deciding what is best for our children. You are not the parent, grand parent or guardian. You are a public servant, hired and paid for by the people. and guess what, you're doing a very poor job and really pissing the people of Washington off.

Children have a 99.9% chance of surviving covid. They do NOT need an experimental drug injected into their innocent bodies due to your crazy beliefs that you are protecting them. AGAIN, not your job! Covid is being spread by both the vaxxed and unvaxxed, so what's the point? You're falling into the tyrannical beliefs of our government, leading you to false thinking that you're doing the best for everyone, when time and time again, it's proven to be not the case.

Over the years, many experimental drugs have been pulled off the market due to lack of study, illness or even death. But we don't like to talk about that because it might upset someone and cause them to think on their own. Nope, definitely don't want the people to do that!

Give this shot 10-20 years of long term effect studies and bring this idea back to the table. Our children are not guinea pigs and I refuse to allow you to act as if they are.

To date, 55000 children have been pulled out of public schools here. If this ridiculous idea is pushed through, I believe you will see a mass exodus from public schools and Washington state. At \$17000.00 dollars per enrolled child, do you really want to push it and see how many more will leave the public system? My 3 children will soon be adding to the number of unenrolled students if the outcome of this meeting is to try and force me to do something that I don't think is right for my family. I will never stop fighting for what I believe is right for them, just as I have raised them.

We the people have the power to bankrupt your school system and I'm really not sure you want to see how far we will go to protect our children.

Please reconsider and drop this ridiculous notion of protecting our children. You're doing just the opposite.

Sincerely,
A concerned parent and tax payer.

Subject: COVID-19 Vaccination Requirements

External Email

Do not mandate Covid vaccines for children in this State. There is no FDA approved COVID-19 vaccine available in the United States today. And there are no plans to make one available any time soon.

On August 23, 2021 the FDA granted full approval for a COVID-19 vaccine to Pfizer-BioNtech for a specific product sold under the brand name Comirnaty. The fully-approved version of Comirnaty is nowhere to be found in the United States.

A separate product, which remains under emergency use authorization (EUA), is the only "Pfizer shot" available in the United States.

If the Washington Health Dept. coerces, intimidates, or compels anyone to receive any experimental gene therapy injection (aka COVID-19 vaccine) may be liable for civil damages.

Subject: Covid-19 and WACs

External Email

Dear Caitlin Lang,

Please do not create a police state with requirements or even allowances for law-enforced quarantining, isolation, medical exams, treatments, or vaccinations in regard to Covid-19.

There are still no long term studies to show Covid vaccines are safe. Let people decide whether to vaccinate for themselves.

Furthermore, the vaccines clearly aren't working to prevent disease and the idea that one's infection is less severe is dubious at best- afterall, how can one know how severe it would have been had they been unvaccinated? And that, especially when so many unvaccinated have such non-severe infections.

Please do not take away parental freedom for healthcare decisions for children. This should be a personal decision for each parent. And children are at very low risk of developing severe Covid.

The vaccine does not stop the spread of this disease as studies show both the vaccinated and unvaccinated are spreading it.

Finally, I find it shocking, unscientific and discriminatory that provision for those who have natural immunity never seems to be considered. If any new rules are made, PLEASE address natural immunity.

Sincerely,

Rebecca L Hageman. RN

Subject: Detaining & forcing medical testing and/or treatment is unconstitutional & unnecessary in America. No FORCED COVID shots of children!!

External Email

Forcing medical care, isolation, or treatment is totally unnecessary as COVID is getting less & less dangerous. As it mutates it is becoming more contagious but is causing less severe illness.

Because the majority of the population is vaccinated, along with natural immunity of those who have had the illness, herd immunity is happening now which will keep the illness under control.

The action of mandating a vaccine to the least impacted age group is unconscionable! There are side effects from these shots, making them much more dangerous than if the child were to contract the virus. There are also many unknown long-term effects, including possible sterilization.

This action would cripple the already failing public schools. So many parents are already about to Home School their kids and this will force this action upon them.

You cannot say you want to do this to protect the children when you speak of mandating the vaccine for a virus that is becoming more like the flu every day and impacts kids 0-19 years old the least. Follow the data!!!

Both of these proposed mandates are terrible and unnecessary and would take away more of American's constitutional rights and God-given freedoms!!

Subject: Covid Vaccination requirement

External Email

At this time there is, in my view, a complete lack of evidence of the necessity of inclusion of a COVID vaccination requirement in WAC 246-105. Quoting from 246-105-010: "The purpose of this rule is to protect children and the public against certain vaccine-preventable diseases. Under the authority of the board of health, this rule describes the immunization requirements of children attending schools and child care centers." The facts are the current COVID vaccines do not prevent catching the disease, and therefore are ineligible for inclusion in the list of "vaccine-preventable" diseases. The current COVID "vaccines", as is demonstrated by the vast number of "breakthrough" cases, are not able to prevent COVID to a comparable level as actually effective vaccines for the section 030 listed diseases, but merely to be a pre-treatment for the disease that generally reduces the severity. Compare and contrast the number of COVID breakthrough cases (and rates) to breakthroughs for those vaccinated against the diseases listed in 246-105-030. Who has heard of breakthrough cases of chickenpox? Diphtheria? Rubella? Measles? Mumps? Pertussis? And the rest of the list, for that matter. The simple fact is, the number of "breakthrough" cases of the -030 currently listed diseases is so small as to be negligible - it would be major local news of an outbreak of Measles or Mumps in our local schools, yet these are all but unheard of. Yet the number of COVID cases that breakthrough the current vaccines are significant. Therefore, as a matter of definition, COVID is not a vaccine preventable disease. Compare and contrast COVID to one of the listed diseases with an actually effective vaccine - Mumps. According to the CDC, there were only 139 cases in 2021. Considering that the best available evidence as of this writing indicates that on average children suffer no worse from COVID than the normal seasonal flu, and considering the unknown potential long term side effects of the current COVID vaccines, the risk-reward profile indicates negligible benefit to the children of Washington, while imposing unquantified potential risk upon them. Compare to the current policy for seasonal flu: Flu is an equal, if not a greater risk to children (and never mind the ability of children to spread seasonal flu to adults) AND the seasonal flu vaccine risk profile is well known and low, yet there is no mandate to vaccinate children for the seasonal flu. Yet, this Board is considering mandating a vaccine for a disease, COVID, that is equal or lower risk to children AND has a vaccine with an unknown long term risk profile? That would be illogical and would indicate other non-fact based motivations for such a mandate. I respectfully urge the board to not add COVID to the list of diseases in WAC 24-105-030."

Thank you for your time.

Please keep covid19 vaccine out of wac codes and requirements. I believe in bodily autonomy and our own ability to review research, weigh our personal risks vs benefits, and make informed decisions for ourselves. This is what I teach in my own clinical practice and household.

COVID19 vaccinations are not without side effects and at times can have severe adverse effects, even death. COVID19 vaccinations have limited ability to prevent covid19 infection, which diminishes with each new variant. It's main use is more therapeutic in reducing the severity of symptoms, and therefore is more of a preventative treatment modality than a vaccine. Because of it's limited ability in actually preventing infection (like a vaccine), "vaccinated" and "unvaccinated" are both able to become infected and spread covid19, whether asymptomatic or symptomatic.

Many businesses and governments have misunderstood the effectiveness of the vaccine in preventing infection, and a vaccinated person's ability to be infected and infectious, and have made vaccinated people to believe they are falsely safe from infection and spreading the virus. Requirements that require vaccination or a negative covid19 test put people in a more dangerous position for super spreader events by allowing all of these people to be congregated in mass numbers and close proximity to each other, but likely a significant proportion of the vaccinated (that were not tested) are infected with covid19 and infecting those nearby at said event.

In conclusion, there is a lot of mixed evidence that has been misinterpreted and/or left out of mainstream influence. The issue of covid19 vaccination has been politicized and divisive among our citizens. It has caused a lot of stress and anxiety for families concerned of the potential side effects, but are pressured to vaccinate to keep their job or attend normal life events. It has silenced our voices and left certain groups open to discrimination.

Please keep the covid19 "vaccine" out of our WAC codes and state requirements. Our children don't need to suffer as their parents have on account of required covid19 vaccination. Allow them and us bodily autonomy. Teach them the importance of shared decision-making in health care and care of their own bodies. Public health measures should be limited to non-invasive modalities, or in serious cases, give the option for effective vaccines that actually prevent infection and therefore transmission.

Thank you for listening and I hope my voice is heard and considered.

I am completely against any over-reach of health officials, government, especially when done by corrupt, inept people who pretend to have our best interest in mind. People in office hold positions to work for the people, not to control the people. These proposed covid policies are immoral and against our constitution. America is a free country and we have the right to free choice of what we want done with our health. This goes for WAC 246-100-070, 246-100-045, 246-100-040, 246-100, 246-105. Washington residents and Americans will stand up for what is right. That is the freedom to choose. I will not live in fear of covid. If the Washington health officials are so concerned for Washington, open your eyes to the numbers killed by drug abuse. Open your eyes to the depression and drug and suicides you are creating because of these fear mongering and control tactics. Yes, people die with covid but many more survive it. You and laws like you propose are the direct cause of many other deaths due to depression, loss of jobs with mandates, abuse in homes because of lockdowns/depression, people turning to drug abuse, health issues triggered by the stress/fear mongering and suicides that never would have happened if it was not for the stress created by lockdowns/mandates. How you live with yourself knowing you cause that is beyond my comprehension. Stop meddling in other lives and let the people be free to do as they feel is best for themselves. Realize covid is no worse than so many other things we face on a daily basis in our country or life in general. Stop trying to cause fear and control us. It will be your families and loved ones' freedoms lost as well.

Subject: COVID vaccine requirment

External Email

Dear WA Board of Health,

Please vote "NO" on requiring COVID vaccines in school. Research shows the vaccine doesn't stop individuals from catching or spreading the virus. While there is still evidence of reducing the risk of severe disease, this age demographic is already at very low risk of severe disease, and the teachers and staff have already been required to be vaccinated, so the children don't pose any greater risk to them. Given these circumstances, I feel it is unethical to require children to be put at risk of vaccine reaction when there is little to no benefit for this age group.

Furthermore, schools have already lost many students and staff over current vaccine and mask requirements. I feel extending the vaccine requirement to children will only further negatively impact school enrollment and staffing.

Thank you,

Laura Robeck

Subject: COVID-19 vaccine requirement for school aged children

External Email

Good morning,

I am writing this email to express my disagreement with implementation COVID vaccine as a requirement for school aged children. According to statistics and the information provided by CDC, children belong to the age group that is least affected by COVID-19. Their mortality rate from COVID is almost nonexistent and long term effects are extremely low. Up to this date majority of the children have already been infected with COVID and developed natural immunity.

In addition, requiring COVID-19 vaccine as a condition to attend public school will force majority of the parents to pull their children from public schools and move them to private schools, which, as a result, will lead to public schools losing a lot in funding and will damage already fragile school system in Washington state.

Please, consider people's will and opinion when you will be making a decision on this matter on January 12.

Thank you.

Respectfully,

Irina Radchanka

would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

I know someone personally who has had the injections and now has to see a doctor every 4-5 weeks to see if there is any progress to reverse the adverse reaction due to the Covid-19 shot.

I have a child in preschool. It is my responsibility as the parent to choose what is best for my child. If an adult can have adverse reaction to this injection why on earth would we want to give this to a child?!

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>
)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Subject: Decision whether to recommend or require COVID vaccine for school age children

I personally have had the COVID vaccination, I am in my my mid 60's and decided I would. However, I totally oppose a mandatory COVID vaccination for school age children. I don't think there has been sufficient time to discover any long-term side effects. Children's bodies are still growing this is not worth the risk. Much more research needs to be done. I oppose requiring this and hope you will take my views into consideration. Thank you, Judy Haight

Dear WA Board of Health,

I'm opposed to the implementation of a covid-19 vaccine requirement for schools and any other circumstances. I'm also opposed to forced incarceration and/or separation of families of WA residents due to any communicable diseases, including covid-19 and any variants. As a concerned WA state citizen, it is of utmost importance that you uphold parental freedom in regards to children's health. The greatest advocate for a child is their parental guardian.

Thank you for your consideration,

Katie

Good afternoon members of the Washington State Board of Health. I am writing today to ask you to please not require a covid vaccination in order for children to attend school.

As a mother of a 5 and 7 year old, I am against this because of what the data has shown, that kids have nearly a 0% chance of dying from covid. The vaccine cannot do much better than that. I am not anti-vaccine, my kids are completely up to date on all vaccines, including their flu shots. That is because of what the data of those other vaccines can combat, versus the covid vaccine.

I fully support people choosing what to do for their own children, as well as adults to make the decision on what to do with their own health. With most teachers choosing to be vaccinated, and many children's parents that will choose this for their children, it should not be forced upon us as a requirement.

If this goes through as a requirement, I will be forced to pull my children from public school, and I know many others that will do the same. Please, do not choose this over a virus that only 20 children with no previous comorbidities have died from in the entire US in going on 3 years.

Thank you for your time,
Kellyn Penoncello

would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

I know someone personally who has had the injections and now has to see a doctor every 4-5 weeks to see if there is any progress to reverse the adverse reaction due to the Covid-19 shot.

I have a child in preschool. It is my responsibility as the parent to choose what is best for my child. If an adult can have adverse reaction to this injection why on earth would we want to give this to a child?!

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>
)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

To whom it may concern:

I am writing you to urge you to stand up against the push for vaccine mandates (for children and adults) and to stand for medical freedom of choice. There are not enough long term studies regarding the use of the Covid-19 vaccine and the option of natural immunity needs to be a part of this conversation, if we are truly wanting to follow the science.

Even the CDC and Dr. Anthony Fauci have admitted that the vaccine itself does not stop transmission or infection. This is the logical disconnect between facts and political agenda.

Sadly, with the push for this and the proposed policies to allow health officers to use law enforcement to order persons involuntarily to isolation facilities or coerced medical intervention, Washington board of health is playing with medical tyranny. Not only is all of this discussion in direct violation of the Washington State Constitution and the US Constitution, the proposed policies are in direct violation of the Nuremberg code article 6 section 3 that states: No government can mandate or force medical treatment without individual consent.

Please stand for medical freedom of choice for the citizens of Washington.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- * Children are at extremely low health risk for Covid
- * The vaccines are still only EUA (emergency use authorized)
- * There are no long-term safety studies
- * Several studies show kids have greater risk with the Covid inoculation than they do benefit
- * Studies document vaccinated and unvaccinated can both transmit Covid
- * The vaccine does not stop the spread of the disease
- * Informed Consent is the law and the safety data is not adequate or even publicly available in full
- * Myocarditis is a greater risk to adolescents than Covid health risk

You are responsible to know the data if you are making recommendations that guide policy.

Children remain the lowest risk group regarding Covid, but have carried the greatest burden from the overreaching, long overdue and ineffective attempts to "protect" them. They were needlessly kept out of school for more than a year and their education and mental health suffered. This is crucial developmental time they won't get back. They continue to be required to wear masks in school which is an undue burden given the lack

of evidence to support this requirement. We are one of few states still imposing such needless measures, Washington needs to figure it out, and stop doing it at the expense of children and the those you are supposed to serve and protect.

Good morning. I am writing you to express my disagreement with with mandating vaccinations for children who attend public school. I do not believe enough study has been done by the FDA to deem these vaccines safe for children. Sometimes we just don't know how safe a medication is for many years. Take a look at Chantix, as an example. This drug was on the market for a decade as a safe medication for smoking cessation, only to be discovered later that it causes cancer anyway. We should not be holding education hostage if a parent refuses to vaccinate their children against CV-19 at this time—and this is coming from someone who IS vaccinated, by the way. I even received an email from the district last year that stated kids can't even attend remote school if not up-to-date on all required vaccines! This is just becoming a lesson in insanity. Please don't do this. Parents WILL pull their children from school and you'll be left with an entire generation of uneducated people to run the country in 30 years.

Thank you for your consideration.

No to all of this!!

On Jan. 12th at 9:30 AM – 3:30 PM, the WA State Board of Health will discuss applying current infectious disease WAC codes to include Covid-19 for all WA State residents.

- To voice your concerns, register for the live webinar here:
https://us02web.zoom.us/webinar/register/WN_DjusY10WTj-EyQyDTdyxsw
- You can also dial-in using your phone for listen-only mode: Call in: +1 (253) 215-8782 (not toll-free) Webinar ID: 894 7406 4216 Passcode: 957396
- Location: 101 Israel Rd. SE, Tumwater, WA 98501
- Comments must be in by this Friday, Jan. 7th at noon. Don't wait!

PROPOSED POLICIES:

- Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

To Whom It May Concern,

I am writing about your upcoming meeting regarding the COVID vaccine in children. I am very strongly opposed to this being added to the current list of required vaccines for children. COVID is very different in children than adults. And so new that I can't understand even considering a mandate for a vaccine for something that didn't exist even two years ago. In the same way that I had chicken pox as a child my children have already had COVID and their bodies are creating antibodies to protect them. Thus making the vaccine unnecessary for them. Having spoken with many other parents about the vaccine for children I hate to think about what will happen in our schools if this is mandated. The amount of children being pulled to homeschool. When I know every dollar counts in public education. My children thrive in their schools and we were overjoyed for them to not be remote this year. If this goes through and the COVID vaccine is added to the list of required vaccines our family will no longer belong to a public school as much as that breaks our hearts. If you look at the numbers of vaccinated children in Washington state I think it will show that a fair amount of parents are uninterested and even against this vaccine for their children and mandating it won't change that. It will just create more mess for families and children and school as a result of COVID.

Thank you for your time. I hope you'll consider NOT adding the COVID vaccine to the list of requirements for children to attend school.

Subject: Covid vaccine for children

External Email

The government has no right to mandate that children must have the covid "vaccine."
We the people (parents) are the only ones who may choose what is right for our children.
You have no right or claim on our children. You work for us and do not dictate to us. This
"vaccine" has been the cause of deaths and many vaccine injuries, so conveniently not
reported on the mainstream media. In addition, children are the least at risk. So back
off, because as Americans we will not give up our freedom. Your tyranny will not be
tolerated.

Subject: COVID vaccine requirements for school children

External Email

Dear members of the Washington State Board of Health,

I and many people of Washington state oppose all COVID-19 vaccine mandates and particularly a mandate for school children.

First, for most people, the disease caused by the SARS-CC2 has a 99% survival rate. For children, it is nearly 100% survival rate. The only children who died from COVID already were sick with other diseases such as cancer. Unfortunately, many people have been listed as COVID death because they died with the virus in their system, but that wasn't the cause of their death. Thus, children do not need the vaccine.

Second, coronaviruses, which include cold viruses, are well-known to mutate to weaker forms. Yes, Omnicron may be more contagious, but the South African doctors say it is more like a cold, not a life-threatening illness except for those with compromised immune systems. Most children do not fall in that category. As they say, there is no cure for the common cold. Moreover, taking the current vaccine is like taking last year's flu shot. It is out of date.

Third, the vaccine is an experimental drug. It is against the Nuremberg Code to force someone to participate in a medical experiment without consent. Most people who consent to the injection are not given full information about the drug. (Pfizer wants to postpone publishing its ingredient list for 55 years. How does one have informed consent without the ingredients list?). Thus, there is no true consent.

Fourth, no one knows the long-term effects of this drug on children after only a few months of testing. Children's bodies are different than adults' because they are still developing. How will this drug affect their growth, their brains, their fertility?

Fifth, even if the injection was authorized by the FDA, parents have the right to medical, religious, or philosophical exemptions. Currently, only a few medical exemptions have been allowed. People must have autonomy over their bodies. This is part of having the "right to life" guaranteed in our Constitution.

Six and MOST IMPORTANT, the reports for the Vaccine Adverse Event Reporting System (VAERS) for COVID vaccine injury and death are off the charts. Young men and boys have a high risk of heart damage from this drug. One child who participated in the vaccine trial as a 12-year-old is permanently disabled from the injection. See her story here <https://www.foxnews.com/media/ohio-woman-daughter-covid-vaccine-reaction-wheelchair>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.foxnews.com%2Fmedia%2Fwoman-daughter-covid-vaccine-reaction-wheelchair&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C73fd5436dd6946e16c3e08d9d216db8b%7C11>. There are many others like her. As of this writing, Open VEARS has recorded over 1.8 million cases, including 21,000 deaths.

If you mandate this experimental medical treatment for all school children, you will be responsible for the harm that happens to any of them from this experimental medical procedure. The myocarditis risk seems to be inversely proportional to the age of the recipient. Young male athletes all over the world, particularly soccer players, have collapsed or dropped dead on the playing field from heartattacks caused by the injection. Teen boys have had their life expectancy shorted from this shot. Who knows what it will do to the little boys?

Do not make this injection mandatory for school children.

Good Morning,
I am 100% against the proposed COVID policies. They purposed policies are a government over reach.
There is not enough data to support this. The Trusted News Initiative has censored and pushed one narrative to the people.
I stand against these proposed WAC's : WAC 246-100-070, WAC 246- 100-045, WAC 246-100-040.
This goes against my constitutional rights. My personal beliefs as an American citizen. If these pass, I will leave the state and relocate to a state which protect and honor our rights and freedoms.

Vaccinated people are still contracting and spreading COVID, they are filling up the hospitals. Also in fact dying of this virus after three shots.
This is America stand up and act like it!
Consider you're actions. We the people have the power. Government works for the people.

Thank you,

Jeff Rhone

Subject: COVID Vaccine

External Email

I am writing you all today to state my concerns about mandating kids 5 and up being required to get the COVID vaccine. Our kids are still so young and have their whole lives in front of them. We have no clue how this vaccine could affect our children long term. We have seen through the last 2 years that yes kids have contracted COVID, but it does not severely hurt them. I feel that taking the time we would normally take to test a vaccine is something we owe it to our kids.

Over the last few months in King county, we have restricted NON vaccinated people from enter Nonessential business, yet over the last month COVID has been on the rise, and our hospitals are filling up. SO, I ask is the vaccine doing what it is supposed to be doing. Are we willing to take a chance on our kids and their futures? How does this benefit them or you?

I understand that we already have vaccines in place that the kids should have to enter school, but these vaccines have been around for years. And with the proper form parents can opt out of those vaccines for their children. We also know how and what these vaccines will do to/for our children.

I plea with you to really look at the big picture of what is going on and if this vaccine should be mandated. Is this vaccine real slowing the spread of COVID? Maybe the SARS-CoV-2 strain, but it doesn't seem to slow down the spread of all the variants. It's one thing to ask adults to get the vaccine, but it is another to mandate our children to get it when we have no data to show the positives or negatives of the vaccine.

Please don't do this. Let's take all the politics out of this and look at what is really going on FOR OUR CHILDREN.

Thank you
Marci Rauscher

please be advised that I strongly recommend rejecting any requirement for children to have the Covid vaccine in order to attend school.

1. Covid has always been a virus affecting older adults with co-morbidities NOT children. Children are at very low risk!
2. The current vaccine is still emergency use authorized.
3. There are potential side effect warnings for children. See cdc web site.

Health and medical treatment are a parents sole right. Mandating experimental treatments falls outside your authorization and should be rejected!

Dear Christy Hoff,

Please do not create a police state with requirements or even allowances for law-enforced quarantining, isolation, medical exams, treatments, or vaccinations in regard to Covid-19.

There are still no long term studies to show Covid vaccines are safe. Let people decide whether to vaccinate for themselves.

Furthermore, the vaccines clearly aren't working to prevent disease and the idea that one's infection is less severe is dubious at best- afterall, how can one know how severe it would have been had they been unvaccinated? And that, especially when so many unvaccinated have such non-severe infections.

Please do not take away parental freedom for healthcare decisions for children. This should be a personal decision for each parent. And children are at very low risk of developing severe Covid.

The vaccine does not stop the spread of this disease as studies show both the vaccinated and unvaccinated are spreading it.

Finally, I find it shocking, unscientific and discriminatory that provision for those who have natural immunity never seems to be considered. If any new rules are made, PLEASE address natural immunity.

Sincerely,

Rebecca L Hageman. RN

It is my firm belief that a school district has no right to mandate my child to put something in their body. That is the responsibility of the parents. Especially with the short term data on the side effects of this vaccine since there is no long term data. My children will not be apart of this human experiment. With that being said. If you make my child take this vaccine and it kills them, who will be responsible for my child's death?

Respectfully,

Nicholas Garrigues

would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

I know someone personally who has had the injections and now has to see a doctor every 4-5 weeks to see if there is any progress to reverse the adverse reaction due to the Covid-19 shot.

I have a child in preschool. It is my responsibility as the parent to choose what is best for my child. If an adult can have adverse reaction to this injection why on earth would we want to give this to a child?!

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>

)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Melissa Garrity

Hello --

I am vehemently opposed to a covid vaccination mandate for Washinton State school-age children. That is a gross abuse of power. The decision to vaccinate or not for covid should only be made by parents and their children's doctors. Government has no place in that decision for this particular virus.

These should NOT be mandatory for children or anyone. There is zero long term evidence that these are safe or effective. These shots are causing more harm than good. Children do not need to have more injections of harmful substance in their bodies. Think about this logically.

I would like to point out a few facts;
Children are at extremely low risk for Covid
The vaccines are still only EUA (emergency use authorized)
There are no long-term studies to document any history of safety
Studies do now document that vaccinated and unvaccinated can both transmit Covid,
therefore,
The vaccine apparently does not stop the spread of the disease

I will not Compy!!!

Subject: Deny Vaccine Mandate- Protect kids

External Email

To whom this may concern,

I would like to express my deepest concern regarding requiring kids to get a vaccine that has not been approved fully by the FDA. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability.

The vaccine has proven to be unsuccessful in "stopping" the covid-19 virus. The virus will always be here. Like hundreds and thousands of years us humans have relied on our tried and true immune system to learn to fight these viruses and sicknesses off. Mandating a vaccine for healthy children as well as sick children poses a huge risk for the future generations. Our bodies are made to fight off viruses, and viruses are made to change and strain to make them weaker. We are only making them stronger by not letting people's bodies fight for natural immunities.

Parenting choices should be left to the parents not the government. Right now from birth there are vaccinated and unvaccinated individuals who walk our streets every day and it was their parents' jobs to make the best decision they could on behalf of their child. Requiring a vaccination to go to a Washington state school goes against the freedom that the United States was founded upon. It takes away the freedoms for parents to make the best decisions for their children that they see fit not the government.

Children are statistically at zero risk of dying from COVID. Adult and children's survival rate is in the range of 99.97-99.98%. The human race needs viruses to continue living. Especially children, they depend on immune system strengthening in their early years and masks aside not giving them an opportunity to be able to develop an immune system will deem detrimental to our society.

I really encourage you to take a look at the facts, not given to you by the media or the CDC or the FDA. But look at the facts of your life and what made you who you are today. How were you raised as a child, were you placing a bubble given every vaccine possible, forced to be isolated away from society? Or were you playing in the dirt, going to the grocery store, playing at the playground, were you at daycare? Please consider how dangerous this will be for the children, the future generation that we are raising today.

Thank you very much for your time and I really hope you will make the best decision for our future, and deny vaccine mandates.

Subject: Covid Vaccines for Children

External Email

Dear Board of Health Members:

I oppose mandating the experimental gene therapy treatment AKA Covid vaccine for any and all children, school-age or not, as well as all adults and babies.

It is a well-known fact that the impact of the Covid 19 virus on children is no worse than the flu or a cold.

I personally know people who have been injured and several who have died from the vaccine. I have listened to the stories of those who have been irreparably harmed by it. This vaccine has been devastating to individuals, families, communities, the medical profession, law enforcement, highway department, the military, the economy, and more.

I also oppose all masking. I have grandchildren in first grade with learning and other disabilities. Do you know how hard it is for children in their formative years to differentiate sounds when the teacher is wearing a mask, let alone without a mask on? The children need to see the teacher's mouth and the teacher needs to see the children's mouths. I myself can barely understand when someone is speaking through a mask. All the sounds are muffled. I needed and was provided speech therapy when young and would never have overcome the difficulty if masking had been required.

Did you know that Pfizer has made \$30 billion on Covid and Moderna \$20 billion? Even members of Congress are heavily invested in pharmaceuticals. Why does Pfizer refuse to disclose the mystery ingredients in both the EUA and Comirnaty vaccines? (Yes, there is a difference) Why are people questioning this particular vaccine when they have accepted all other vaccines? Why is natural immunity now being attacked when it was common knowledge for decades that it is better than any vaccine? Why did all the animals die during the mRNA study about six years ago? Why is only one view on Covid allowed? Why the censorship? Doesn't this all seem odd? Asking questions is the scientific method.

I am also opposed to all the Covid policies under consideration by the Board of Health to be included in the WACs. This is government overreach.

The children are our future. Will it take the death or injury of one of your own children or grandchildren to see that mandating this vaccine will only cause suffering and loss?

To whom it may concern,

I am asking that a mandate for the covid vaccine not be enforced for our children to go to school. Parents should never have to balance the choice of their child's health care, with their right to receive an education. Regardless of a possible exemption, this puts more pressure and stress onto entire family units, which we know are suffering from the trauma of the past two years to start with. Please allow those who want the vaccine to get it, and let our child (with almost 100% survival rate) continue to go to school without any farther obstacles.

Thank you,

Kara Hanwright

I am a Washington state resident and parent to a school age child.
I oppose any formation of a task group designed to explore mandating covid injections in our schools.

The emergency use authorization for these injections has expired by every logical and scientific standard.

I support the informed choice Washington petition for rule making which is on the agenda for January 12th. <x-apple-data-detectors://5>

No EUA product may be mandated according to federal law title 21, section 360bbb-3 of the FD&C act. Mandating these injections is illegal and immoral and any step in that direction is wrong.

Washington State is in grave trouble on so many levels and the department of health should be focusing on the very real health dilemmas facing our children.

Respectfully,
Hannah Kogan

Subject: Covid vaccine Requirement

External Email

To Whom it may concern,

I wanted to voice my concern with Washington state requiring our children to be vaccinated for COVID-19. While my older have been vaccinated I am not ready or trusting enough to vaccinate my youngest at this point in time until I see more results and data behind the potential affect of the vaccine on younger children. I am strongly opposed to requiring Covid 19 vaccine especially for school aged children.

Please vote no on this and any requirements of being quarantined in quarantine centers for people unwilling to be vaccinated should the State go that route.

Thank you for your consideration and hearing the voice of the people in the community.

Sincerely,

Kristine Rafn

Hello.

I wanted to say I strongly disagree with the totalitarian measures WA is trying to implement. They are a major violation of human rights and are not ok. Please note no to them all esp the involuntary quarantines. Totally insane to implement.

Best

Julie Fig

I urge the committee to decline the requirement of all Covid vaccines for children to attend public schools.

- The science does not support the notion that unvaccinated individuals spread the virus any more than vaccinated individuals, nor do our laws permit us to segregate and discriminate against people for refusing medical intervention.
- Parents are already dealing with mental health declines in children, including my own 7 year old son. The movement to pull kids from public schools in lieu of homeschooling is growing, impacting the funding of public schools.
- Masks, in the words of an FDA physician, are little more than "facial decorations" and have no impact on the spread; yet they are mandated for children.
- Did you know that in the WA state flu season of 2017-18 the death rate was 11%, while the Covid death rate in the state of WA thus far is 1.1% according to government sources?

- Today the headline read that the Pfizer jab for children is still being assessed as to how many boosters needed, efficacy, and potential side effects. Is making our children "guinea pigs" risking possible negative results something you are willing to live with on your conscience?

In addition, the enforcement of quarantined individuals at "camps" should not be allowed. This has been done before with much regret. It's discriminatory, segregational, and inhumane to force people away from family and their life, especially since we've been living in an adjusted normal for two years, almost three years. Now is not the time to start such a radical enforcement.

It is simply too soon to require something of this magnitude with no allowed exceptions, unconfirmed efficacy and unknown side effects. Please delay the approval of the Covid vaccine.

Sincerely,

I am opposed to Covid 19 being mandated for children for the following reasons:

- * Children are at extremely low risk for Covid
- * The vaccines are still only EUA (emergency use authorized)
- * There are no long-term studies to document any history of safety
- * Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- * The vaccine apparently does not stop the spread of the disease

Subject: Covid Vaccine

External Email

□

I am a parent of a student who attends the Lynden Public School District. I wanted to express my concern when it comes to the possibility of mandating the Covid vaccine for students to attend school. I strongly oppose this idea. Let me tell you why:

- * Vaccinated individuals are still getting and spreading Covid.
- * There are no long term studies on how this will effect those who are receiving it. Based on the short term effects and the deaths due to the vaccine, as a parent I choose to pass and see what studies are done in the next few years to determine whether the vaccine is a good fit for my child.
- * Thus far many of the negative effects of the vaccine have been worse than the virus itself, most certainly in children.
- * The natural immune system has not been given any credit nor has any consideration or thought been given to those who already have natural immunities to Covid.
- * The death rate of Covid is .01 percent per the information released in October of 2021.

My child is fully immunized so this is not coming from an "anti vaxer", this is coming from a concerned parent who loves her child more than anyone else possibly could. I weigh, on a daily basis, the pros and cons of something before I decide what is best for my child, her health and her future. Every individual has unique circumstances, we should be respectful of those circumstances and allow people the choice to do what is best for themselves and their families.

Thank you for taking the time to consider my concerns. I hope you will do what you know to be right, good and honest.

To our local government officials,

It has come to my attention that we have a very important upcoming vote regarding schools and our children. I am astounded that this vaccine with no history of side effects would be on the table for a vote to mandate it for CHILDREN! If this trend continues I will be joining the thousands of other parents that have chosen to seek education outside of the local school district. I urge you to consider the consequences of mandating an experimental shot for children when there is no data to tell us long-term effects. PLEASE VOTE NO!

Thank you,
Kelsie Hubbard

Dear Members of The Washington State Board of Health,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

I am praying for all of you to be filled with wisdom, truth, and courage and to make the right decision.

God bless and be with you,

Wendy Nuxoll

Subject: COVID Vaccination Requirement

External Email

Hello,

I would like to voice my opinion on the proposal to make the Covid vaccine mandatory for Washington State schools. I for one am extremely opposed and honestly appalled by this proposal. Here is why -

1. The vaccine does not stop transmission. Our state is already one of the states with the highest vaccine rate in the country and it still spreading easily.
2. We don't know all of the long term side effects of the vaccine.
3. We do know that there are side effects in some children, especially boys. One such side effect is vaccine induced myocarditis. There are more boys that end up hospitalized with myocarditis than with Covid. There is no way that I will take that risk for my son.
4. Most children don't have serious side effects from Covid.
5. There are studies that do show that both vaccinated and unvaccinated individuals can transmit Covid.

In the end, all this will do is push more students into homeschool.

Thank you for your time,

Konni Miller

To whom it may concern;

I am not in favor of Mandating any vaccine, especially Covid vaccine for anyone, including our children. Our children are not at risk for getting an experimental shot that does not prevent covid. Parents have the right to choose for their children, not the government. You are overreaching and people will not comply with your mandates. This is insane. It's time to stop the mandates and realize that the vaccine is not going to stop covid, and it is just making the politicians rich. The covid vaccine should NOT be a requirement for our children, as well as adults. People need to take a stand against this tyranny. We all will be help accountable in the end, which side will you be on?

To whom it may concern,

Please do not mandate the covid vaccine for school attendance. The inventor of the vaccine has even come out warning parents about the risks of the technology in the vaccine and that we should not be inoculating our children with it. There are more studies than you care to read that show they kids are not at risk for serious injury or death with this virus. The actual data supports that. The vaccine will cause more harm than covid. My children got covid and literally had symptoms last for 5 hours. My daughter slept it off and my son had a sour stomach and headache for a few days. When my husband and I got it, we lost our smell and had mild symptoms for about a day and then we were fine. H1N1 was way worse for my husband and honestly, the common flu and other respiratory viruses are worse than covid has been for most adults, let alone children. This vaccine is not approved in the United States and you know that. All of this is still under EUA. The emergency is over and the data as proven that. Don't give in to the bureaucrats who want to keep the power and open your eyes to the truth. Please do not mandate this vaccine for our children.

Thank you

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- * Children are at extremely low health risk for Covid
- * The vaccines are still only EUA (emergency use authorized)
- * There are no long-term safety studies
- * Several studies show kids have greater risk with the Covid inoculation than they do benefit
- * Studies document vaccinated and unvaccinated can both transmit Covid
- * The vaccine does not stop the spread of the disease
- * Informed Consent is the law and the safety data is not adequate or even publicly available in full
- * Myocarditis is a greater risk to adolescents than Covid health risk

You are responsible to know the data if you are making recommendations that guide policy.

Children remain the lowest risk group regarding Covid, but have carried the greatest burden from the overreaching, long overdue and ineffective attempts to "protect" them. They were needlessly kept out of school for more than a year and their education and mental health suffered. This is crucial developmental time they won't get back. They continue to be required to wear masks in school which is an undue burden given the lack

of evidence to support this requirement. We are one of few states still imposing such needless measures, Washington needs to figure it out, and stop doing it at the expense of children and the those you are supposed to serve and protect.

Dear Board Members,

I am writing today to urge you NOT to include a Covid-19 vaccine requirement into the immunization schedule required for child care & school entry.

Before I go further, I think it is important to provide some background information on why I am urging you to adopt this position, as I believe context is key to any discussion.

I am a 4th generation West Seattleite who was born, raised, and educated in the State of Washington. I hold degrees in both Business and Political Science from the University of Washington. I'm also the 4th generation of my family to own and operate a small business (a company I founded while in college at the UW) in Seattle and was recognized as Washington State's Mr. Future Business Leader by FBLA-PBL in 1998 and as a 40 under 40 honoree by the Puget Sound Business Journal in 2018.

In August of 2020, my family fled our home of 12 years in Seattle, leaving on only 4 days' notice. The reason we fled was due to Governor Inslee's proclamation that it was "unsafe for any child to attend school in the state of Washington", and the subsequent closure of in-person instruction by the private school our oldest son was enrolled at (along with nearly every other school in the Seattle area).

There are many conditions in this world that pose a far greater risk to children and their families than Covid-19. For example, my two children have very unique educational needs – our oldest (age 7 ½) is gifted and has a specific learning disability – mixed dyslexia. Our youngest (age 4 ½) is highly gifted, yet is in the 2nd percentile for articulation (he has a major speech impediment), and has been attending speech therapy since age 3. My wife has a mental health condition which would put her health and quite possibly her life at risk had we stayed in Seattle through the lockdowns of last winter. None of these conditions are compatible with remote school or mandatory masking of children.

When weighing the consequences of staying in Seattle and dealing with the long-term

repercussions of the lockdown on their health and learning vs. leaving for a location with a more balanced view, the choice was clear: It was far safer for our family to risk contracting Covid-19 than to stay in our family's home of 4+ generations. We were fortunate enough to own a vacation rental property in Arizona, and therefore were afforded the opportunity to move there for a period of time to escape our state and local government restrictions.

Despite our comparative privilege, like most families, the vast majority of our income comes from my work. As such, for the last 18 months, I've been commuting from Phoenix to Seattle bi-weekly to continue to run my essential business, which provides IT management and support to other (primarily) essential businesses such as medical practices, crisis clinics and biotech firms (among others). Our employees continued to work in-person (in a hybrid model), and my in-person presence was required to provide continuity for our employees, clients, and operations. I spent much of last winter on nearly-empty airplanes wearing N95 or KN95 masks for hours at a time commuting between the cities in which I worked and lived.

As you might expect, I pursued vaccination against Covid-19 as quickly as I was allowed. While I had accepted that there was risk of infection prior to being vaccinated, my primary concern was the health and well-being of my family. Since I was residing part-time in Arizona, I became eligible as an essential worker in March of 2021 and received my first dose of the Pfizer vaccine on March 25.

Because I have a history of severe allergic reactions, I was advised by my Allergist/Immunologist to bring my epi-pens with me to the vaccination site. After receiving my shot, I began to go into anaphylaxis and was monitored by emergency personnel on-site for 90 minutes. Thankfully it did not progress to the point of my airways closing significantly and I did not end up needing to be hospitalized. Needless to say, my reaction made getting the second shot in the series an unknown risk. I delayed my second dose for an extra week, and scheduled my shot for a time when I had a friend who was a physician staying with us in case any adverse reactions occurred. Thankfully, none did, and I became fully vaccinated on April 21, 2021. My wife also completed her vaccine series with the Pfizer vaccine a few weeks later.

Our vaccinations did not protect us from transmission for very long, unfortunately.

During a business trip to Boston and Seattle in August, I was exposed to SARS-CoV2 and became symptomatic upon returning to Phoenix. On August 29, 2021, I tested positive and began my isolation period. Within the next few days, my wife and both of my children also tested positive for the virus. We followed all CDC guidelines and isolated at home for nearly 3 weeks total (as each positive result came a few days after the prior one).

My symptoms were thankfully mild, my wife's were moderate but resolved quickly thanks to early treatment and easy access to monoclonal antibodies, and my kids were essentially asymptomatic. One had a temperature of 99 degrees for less than a full day,

and the other had a slight cough which didn't even require the use of over-the-counter cough syrup.

As a result of our breakthrough infections, my wife and I have "hybrid immunity" and our kids have "natural immunity". Almost no data are available on the safety of further use of vaccines on those who had breakthrough infections, and the data are sparse to non-existent regarding efficacy of the vaccine on young children with prior natural immunity.

Here are a few facts about the Pfizer vaccine trial on 5-11 year olds that are particularly relevant – these are all taken from the New England Journal of Medicine article on the Pfizer study available at this link

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nejm.org%2Fdoi%2Ffull%2F10.1056/NEJMoa2111356&hpid=hp-top-story-table-main%3Anew%2F&hpt=hp-top-story-table-main>
. I have highlighted and/or noted the relevant portions and attached a PDF copy for your reference:

- * The Pfizer vaccine was administered to a very small number of children
 - * Only 1518 children total during the Phase 2/3 trial
 - * In the phase 1 trial, children with a previous Covid-19 diagnosis were completely EXCLUDED
 - * In the phase 2/3 trial, only 135 children had evidence of prior Covid-19 – less than 9% of the total test group
- * Side effect data for those with prior infection is extremely limited
 - * A very small number of children who were previously infected were studied
 - * The study has a total of one sentence and ZERO data on the side effects for those with prior infection
 - * Data on non-severe adverse events was only collected for one month after the second dose was administered – meaning we have no long-term safety data
- * Efficacy of the vaccine is LOWER than natural immunity during the study period
 - * Efficacy against transmission was 90.7% in the vaccine group against transmission (of older variants) - 95% CI 67.7 to 98.3
 - * Not a single child who had evidence of prior Covid-19 infection was reinfected during the Pfizer trial – meaning prior natural immunity was 100% effective during the trial

It's also important to note that the CDC estimated that 42% of children have had prior Covid-19 infections. So while the amount of data we have from the study is very limited, a very high percentage of children in America have already contracted Covid-19, and many more will due to the Omicron winter wave that we are currently experiencing.

The Pfizer trial article states:

"Direct benefits of preventing SARS-CoV-2 infection in children include protection against severe disease, hospitalizations, and severe or long-term complications, such as MIS-C. Indirect benefits include the likelihood of reduced transmission in the home and in school settings, including transmission affecting vulnerable persons, and safer in-person learning. Without effective Covid-19 vaccines for this age group, children could potentially become ongoing reservoirs of infection and sources of newly emerging variants Covid-19-associated school closures and quarantines also have social and economic costs for families and caregivers. Widespread vaccination across age groups is therefore essential in ongoing efforts to curtail the pandemic."

However, most of these points are now moot due to the new Omicron variant. Data has shown that it produces less severe disease, reduced rates of hospitalization, less severe complications (MIS-C wasn't even evident during the Delta wave that the Pfizer trial was based on, much less the milder Omicron variant). As a society, we've mostly now agreed that in-person school is essential and vaccines offer a very limited benefit against transmission. Children generally don't get severe cases of Covid-19 (zero were hospitalized during the trial), and those with prior natural immunity did not get reinfected AT ALL.

At the end of the day, this decision should be a risk-reward calculation. There is now very little reward to requiring vaccination of children against Covid-19 – it is unlikely to reduce transmission significantly (due to Omicron) and very few cases are severe. Those parents who wish to vaccinate their children are free to do so.

However, the risks to mandating vaccination are significant. Many parents will pull their children out of schools if vaccination is mandated (this was noted by Governor Inslee during his press conference earlier this week). Very little data exists on the safety and efficacy of the vaccine on those children who have prior natural immunity. And many, many children will have natural immunity as a result of this Omicron wave we are currently experiencing.

As an entrepreneur and businessman, I am trained to make risk-reward calculations all day, every day. To me (and many others), a low-benefit with unknown risk scenario is not one that I am interested in pursuing. I hope the Board of Health reads and carefully considers these facts when making a determination about whether to require Covid-19 vaccination for children in Washington State.

Thank you for your time and consideration.

I think there is a need to allow time, additional research and historical data to present itself before we mandate an injection for students. At least for now, the role of a parent to manage their child's medical affairs should remain the family's sole discretion.

Thank you for OPPOSING the addition of this vaccine to the requirements for school attendance at this time.

Thank you.

To whom it may concern,

I would like my express my opposition and concern to this potential requirement.

I am not the typical "anti-vaccine" person. I do believe in the effectiveness of the current required vaccines. My 2nd grade daughter is current on all required vaccinations.

I am however firmly against any brand of COVID vaccination for her age group. I believe this vaccine is too new for our young children. I am not comfortable with the data provided for the long term effects for a young child.

I believe the threat to a child's health from the virus is far less than the long term effects from the vaccine.

My wife is fully vaccinated and I support her decision in getting it as she is in the healthcare industry.

We both have made an educated decision to not vaccinate our daughter and I will not be getting it either.

If this becomes a requirement I am prepared to pull my daughter from the public school system and do whatever is necessary to protect her from this mandate.

Please take my concern into consideration.

Thank you for taking the time to read this.

Regards,
Nathan.

To whom it may concern,
Please vote no on this proposal of vaccinating our children with the untested and unapproved COVID vaccine. Children are at low risk for this virus and the vaccine is still only EUA. Requiring the vaccine for attendance of our school age children and childcare is potentially harmful with unknown risks in developing bodies for unknown period of their lives.
Thank you for your time in reading and considering what families of the citizens of this state have to say on this matter.

Subject: COVID vaccine requirement for school aged children

External Email

Good morning,

I am writing this email to express my disagreement with implementation COVID vaccine as a requirement for school aged children. According to statistics and the information provided by CDC, children belong to the age group that is least affected by COVID-19. Their mortality rate from COVID is almost nonexistent and long term effects are extremely low. Up to this date majority of the children have already been infected with COVID and developed natural immunity.

In addition, requiring COVID-19 vaccine as a condition to attend public school will force majority of the parents to pull their children from public schools and move them to private schools, which, as a result, will lead to public schools losing a lot in funding and will damage already fragile school system in Washington state.

Please, consider people's will and opinion when you will be making a decision on this matter on January 12.

Thank you.

Respectfully,
Irina Radchanka

Subject: Covid-19 Proposed Policies

External Email

I would like to speak out AGAINST the propositions being discussed today at noon.

It is NOT acceptable to apply the current infectious disease WAC's to include Covid-19
It is NOT acceptable to make the covid-19 vaccination mandatory for all school age students

It is NOT acceptable to give the local health officers the use of law enforcement with regards to any aspect of Covid-19

Because this topic is just now being discovered by the general population I was not able to read deeply into all that will be discussed or take time off work to join in discussion. I am sure there are many other topics that are not acceptable that will be discussed today. This move is 100% unacceptable. Do not take away our freedoms and rights for your perceived risks.

My daughter will be homeschooled if this is put in place. More funding will be lost for our schools as so many families will follow suit. There is a deep seated issue here, and this type of policy and move is why our children go out of state for higher education.

I have watched massive amounts of Washington residents move out of our state over the last two years due to policies and choices being made in Olympia and forced on the residents without our consent. It saddens me to watch lifelong residents give up on our wonderful state and move.

External Email

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets vaccine, one group gets placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccine adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time.

To whom it may concern,

I have been informed that the Board of Health is meeting to decide if the COVID shots should be added to the child vaccination schedule. This is scary, maddening and absolutely ridiculous! I oppose the formation of the TAG to review the info about consideration of the COVID shots for school.... I oppose the mandates PERIOD! There should be no EUA for our children, of anyone for that matter! I have already pulled my children out of public school because of the mask mandates, because of the social aspect, I would like them to attend again at some point once the mask is an option or gone for good. If you mandate a vaccine for the COVID bs, they will never attend a "government" school again. I know that many other parents are ready to pull their kids out of the system as well if this goes through! Do what's best for our kids and let the parents decide if their kids need an experimental vaccine! Huge thank you to Reps Klippert, Chase, McCaslin and Graham for introducing Bill 1680! Immunity is our best "shot"!! May God guide you in these decisions....He will be your judgement!

Hi,

My name is Nicole Denny and I have 2 students who attend the public school system in Washington State. I myself work in the public school as does my husband. We oppose adding the COVID-19 vaccines to the WAC 246-105 as a required vaccine.

We are NOT anti-vaxxers!!!! Our 4 kids have received every vaccine recommended at their well-child visits. This is different however!!!

1. It is under Emergency use Authorization by the FDA, the manufacturers have complete immunity if these cause any long term side effects or disabilities in our children we have NO recourse to hold the manufacturers accountable.
2. There are absolutely NO LONG TERM STUDIES showing the long term effects on the health of children after receiving these vaccines. How can there be? These vaccines are not that old!
3. Children are not severely impacted when infected with COVID!!!! They are not at risk of dying from this virus and research is now showing they do not spread it to others.
4. Our children have NATURAL IMMUNITY To COVID as they have already had the virus. I know the government does not recognize NATURAL/ACQUIRED IMMUNITY to this virus, but how can you recognize that giving someone a vaccine (which is injecting them with a form of the virus) creates immunity, but actually having the real virus in their bodies and fighting it off and surviving does not create immunity!!!!????? If you deny immunity from natural infection (acquired immunity) then you must also deny that vaccines can create immunity!!!!!!!
5. Every single one of these shots has either aborted fetal cells in the ingredients or cells were used during the creation or testing of these vaccines. Our religious beliefs do not allow us to use these substances because of the use of aborted fetal cells!

WE WILL WITHDRAW OUR CHILDREN FROM THE PUBLIC SCHOOL SYSTEM IF THESE ARE ADDED TO THEIR REQUIRED VACCINES TO ATTEND SCHOOL!!!!!! WE WILL HOMESCHOOL OR ONLINE SCHOOL THEM!!!! THEY WILL NOT RECEIVE THESE VACCINES IN ORDER TO ATTEND PUBLIC SCHOOL!!!!!! I know many, many parents who feel the same way. It will be interesting to see what happens to funding for schools, jobs for teachers (my job as well as my husband's), etc. when the enrollment drops significantly because you want to force parents to vaccinate their children with an experimental substance for a virus that they have less of a risk of dying from than they do of having side effects from the experimental stuff you want us to force into their bodies!!!! LEAVE MY MEDICAL DECISIONS TO ME AS A PARENT! MY CHILDREN HAVE NATURAL/AQUIRED IMMUNITY AND DO NOT NEED THE VACCINE BECAUSE THEIR IMMUNITY IS BETTER THAN THE VACCINE IMMUNITY!

Thank you for your time!
Nicole Denny

Subject: Covid-19 vaccination requirements in school

External Email

To the Washington State Board of Health,

In regards to the desire to implement the requirement in public schools for the vaccination for Covid-19, this is a mistake that should not happen. There are several reasons that I object to this:

First, the FDA has not yet given approval for this to go in effect, but is requiring additional studies for children. If you have the background requirements of education necessary to make this decision, you know that children are going through major development and may have adverse responses to the vaccines that adults do not experience. Additional study is the best decision for the sake of our children.

Second, the vaccination currently is not showing effectiveness to prevent Covid-19 and it should be considered that potential adverse effects can be more harmful for the population of children than the mild experiences from Covid-19.

Third, my grandson at 18 years old received his second shot for the vaccination and had serious problems with pericarditis and ended up in ER several times. He had already had Covid-19 in the past as many unvaccinated people are and probably had immunities, but got vaccinated because he thought it was the right thing to do. People that have adverse reaction should not be required any booster shots which undoubtedly this board will try to require.

Please, at least delay this requirement until the additional studies that FDA asked for be completed in October.

Hi,

I am a mother of three. My husband recently received the Pfizer Covid vaccine. Since then, he has been experiencing heart issues (which is apparently common with this vaccine). I advised him against it but he knew his employer was going to be requiring it. I have a 13-year-old daughter who was born with a congenital heart condition. These vaccines could be deadly for my daughter and my other two children. These vaccines have not been studied long enough to see what the long-term effects are. This is no different than a flu shot. I am seeing more and more vaccinated people contracting Covid than non-vaccinated people. That just seems very odd to me. I believe that everybody should have their own choice in what they put into their body. Serious side effects and death occur from these vaccines. That is a risk I am not willing to take with my children. I will not be vaccinating my children should it become mandatory. A medical decision like this should be made between a patient and their doctor, nobody else. I will not bury my child who already has a compromised heart because the government thinks she needs a shot. My kids have been in public school for 13+ years and they've never had the flu or Covid. My kids have healthy immune systems and we trust our immune systems. Let's trust our bodies to do what they do, and stop giving the government and the pharmaceutical companies so much control of this "experimental vaccine" in which they are exempt from harm.

Thank you,
Kim Lienhard

Dear Washington State Board of Health,

I strongly oppose requiring students to be vaccinated for COVID-19. The vaccines are only authorized for emergency use for children and haven't been tested for long-term safety. Since young people are not at serious risk from COVID-19, forcing them to be vaccinated is an unnecessary risk.

Thank you for your consideration.

Sincerely,

Subject: COVID Vaccine Mandate

External Email

To whom it may concern:

I am writing to ask that the state board of health REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. Vaccines DO NOT prevent, nor stop the spread of COVID-19
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19
4. The COVID-19 vaccine is new. Many parents do not feel comfortable giving this to children without years of testing, studies and long term effects being known.

I personally will remove ALL my children from Washington state public schools before I will comply to a COVID-19 vaccine mandate for my children.

Thank you for your time,
Leanne Uttech

Dear sirs and ms,

We are very opposed to covid vaccinations for children because they generally have very strong immune systems and getting covid is a very light case of having flu or cold symptoms.

It has been verified that young males have a high risk of serious heart problems following this shot.

Families should be free to choose for themselves whether or not to get vaccinated.

Anyone dictating a requirement like this to them is violating their Constitutional rights.

Sincerely,

Richard and Jeanette Hammer

To Whom It May Concern:

1). I very strongly oppose the Board's consideration of mandating the EUA Covid-19 vaccine for school.

This vaccine has not been FDA approved and children rarely have complications with COVID-19 per the CDC's data. Out of the 800,000 plus deaths last year, only slightly over 200 were children. Not to mention the new variants are less deadly for all populations.

2). I do however support the petition that prohibits any EUA product from being added to the school required list. Any product that has not completed Phase 3 clinical trials should never be considered to be required for children!

Our children need to be protected from a drug that isn't officially approved for use. This virus is quickly becoming more contagious but much weaker, which is the normal cycle for a virus!

As a parent there is no way that I would inject my child with a vaccine that hasn't been out on the market for very long. We don't know what the long term affects are from the vaccine. I will not allow for my children to be a guinea pig to make someone feel safer. The vaccine really doesn't make that much of a difference. I believe that our own natural God given ammuny is way better then a man made vaccine. I don't feel the need to put poison in my children when children are not coming down with very serious symptoms. To me this is no different then the flu vaccine. You can still catch covid and spread it being fully vaccinated. The covid vaccine should be optional. I will pull my children out of the public school system before I put the covid vaccine into their bodies.
Thank you for your time Jamie Davis

Each member of the Washington State Board of the Health has a grave responsibility to set practices and make policies that affect individual citizens and families of the State of Washington. Parents have the right and responsibility to make decisions for their children. A vaccine of any kind is putting a substance into a body that has either wanted efficacy against disease or unwanted short-term or long-term damage. I ask the board to rule against any recommendation of the Covid-19, Novel Coronavirus Vaccine for children in Washington State schools or anyone else.

As Americans we have sovereign jurisdiction over our bodies. Parents know their children best and should make ultimate medical decisions for their children. They can consult their doctors or faith leaders. Parents want to make informed choices about what goes into their children's bodies. Children are not at great risk of Covid-19 or of spreading it. I urge the Board to vote No or Against the Covid-19 vaccination recommendation for Washington's school children.

Sincerely,

Janet M. Young

Subject: RE: COVID-19 Vaccine Requirement for School Children

External Email

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets vaccine, one group gets placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccines adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time and I urge you to re-consider this measure as children's lives are at risk.

As a parent, that is deeply troubling.

Subject: Covid-19 Vax

External Email

I am absolutely opposed to mandating the Covid-19 vax upon school age children. They are at a very low risk to begin with, and the vax has caused many side effects. This is something that parents need to have the decision on and NOT the schools or the government.

So, I am urging not to approve any type of mandated covid-19 vaccine upon any school age children.

Thank you,
Jim Mahoney

Dear friend,

I am writing to oppose WAC proposals that authorize the Dept of Health to involuntarily detain unvaccinated persons.

These proposals are tyrannical and stand in opposition to 1) the US Constitutional guarantees of freedom of speech and freedom to choose one's own medical care and 2) The Nuerenberg Code that prohibits involuntary participation in medical procedures.

I request that these WAC suggestions be refused immediately.

Thank you,
Loree Petree

Subject: Detaining & forcing medical testing and/or treatment is unconstitutional & unnecessary in America. No FORCED COVID shots of children

External Email

Forcing medical care, isolation, or treatment is totally unnecessary as COVID is getting less & less dangerous. As it mutates it is becoming more contagious but is causing less severe illness.

Because the majority of the population is vaccinated, along with natural immunity of those who have had the illness, herd immunity is happening now which will keep the illness under control.

The action of mandating a vaccine to the least impacted age group is unconscionable! There are side effects from these shots, making them much more dangerous than if the child were to contract the virus. There are also many unknown long-term effects, including possible sterilization.

This action would cripple the already failing public schools. So many parents are already about to Home School their kids and this will force this action upon them.

You cannot say you want to do this to protect the children when you speak of mandating the vaccine for a virus that is becoming more like the flu every day and impacts kids 0-19 years old the least. Follow the data!!!

Both of these proposed mandates are terrible and unnecessary and would take away more of American's constitutional rights and God-given freedoms!!

Subject: COVID-19 Vaccine Requirement

External Email

Hello,

You are in an incredibly difficult position where, no matter what decisions you make, there will always be someone upset with you. I hope that you can make the best decisions you can with the information available to you.

As a parent, I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools and childcare in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Famericasfrontlinedoctors.org%2F2021%2F10-red-flags-in-the-fdas-risk-benefit-analysis-of-pfizers-eua-application-to-inject-american-children-5-to-11-with-its-mrna-product-commentary%2F&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C92fc25879cdf42a4a64808d9d466ee>

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

To Whom It May Concern,

I am writing about your upcoming meeting regarding the COVID vaccine in children. I am very strongly opposed to this being added to the current list of required vaccines for children. COVID is very different in children than adults. And so new that I can't understand even considering a mandate for a vaccine for something that didn't exist even two years ago. In the same way that I had chicken pox as a child my children have already had COVID and their bodies are creating antibodies to protect them. Thus making the vaccine unnecessary for them. Having spoken with many other parents about the vaccine for children I hate to think about what will happen in our schools if this is mandated. The amount of children being pulled to homeschool. When I know every dollar counts in public education. My children thrive in their schools and we were overjoyed for them to not be remote this year. If this goes through and the COVID vaccine is added to the list of required vaccines our family will no longer belong to a public school as much as that breaks our hearts. If you look at the numbers of vaccinated children in Washington state I think it will show that a fair amount of parents are uninterested and even against this vaccine for their children and mandating it won't change that. It will just create more mess for families and children and school as a result of COVID.

Thank you for your time. I hope you'll consider NOT adding the COVID vaccine to the list of requirements for children to attend school.

Hello,

I am a mother of 3 kids here in Spokane, WA, one of which will hopefully be entering the school system next year.

I can speak for all the people in my family, social group and church that a forced vaccination of this kind, placed upon innocent children whose risk of illness is so low it can hardly be measured goes against our medical freedoms. It should remain within the parents' discretion which vaccines their children receive always, especially when there are people receiving the vaccine experiencing ongoing adverse effects of this vaccine. Parents should have the right to weigh the risk vs. benefits of giving their kids a vaccine.

Parents who willingly get the shots for their kids should be respected. So, too, those who choose not to get an experimental shot for their children should be respected.

Please govern accordingly,

Katie Repsold

Subject: Covid Vaccines for Children

External Email

Dear Board of Health Members:

I oppose mandating the experimental gene therapy treatment AKA Covid vaccine for any and all children, school-age or not, as well as all adults and babies.

It is a well-known fact that the impact of the Covid 19 virus on children is no worse than the flu or a cold.

I personally know people who have been injured and several who have died from the vaccine. I have listened to the stories of those who have been irreparably harmed by it. This vaccine has been devastating to individuals, families, communities, the medical profession, law enforcement, highway department, the military, the economy, and more.

I also oppose all masking. I have grandchildren in first grade with learning and other disabilities. Do you know how hard it is for children in their formative years to differentiate sounds when the teacher is wearing a mask, let alone without a mask on? The children need to see the teacher's mouth and the teacher needs to see the children's mouths. I myself can barely understand when someone is speaking through a mask. All the sounds are muffled. I needed and was provided speech therapy when young and would never have overcome the difficulty if masking had been required.

Did you know that Pfizer has made \$30 billion on Covid and Moderna \$20 billion? Even members of Congress are heavily invested in pharmaceuticals. Why does Pfizer refuse to disclose the mystery ingredients in both the EUA and Comirnaty vaccines? (Yes, there is a difference) Why are people questioning this particular vaccine when they have accepted all other vaccines? Why is natural immunity now being attacked when it was common knowledge for decades that it is better than any vaccine? Why did all the animals die during the mRNA study about six years ago? Why is only one view on Covid allowed? Why the censorship? Doesn't this all seem odd? Asking questions is the scientific method.

I am also opposed to all the Covid policies under consideration by the Board of Health to be included in the WACs. This is government overreach.

The children are our future. Will it take the death or injury of one of your own children or grandchildren to see that mandating this vaccine will only cause suffering and loss?

To whom it may concern:

I am writing to ask that the state board of health REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. Vaccines DO NOT prevent, nor stop the spread of COVID-19. I can currently attest to this as a vaccinated adult and testing positive for COVID-19.
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19
4. The COVID-19 vaccine is new. Many parents do not feel comfortable giving this to children without years of testing, studies and long term effects being known.

I personally will remove ALL my children from Washington state public schools before I will comply to a COVID-19 vaccine mandate for my children!! PLEASE do not further ruin public schools for children in this state.

Thank you for your time,
Kristen Benson

To the Washington State board of Health,

I am writing to be a voice against requiring the Covid-19 vaccine for school and preschool-age children. This requirement would only give cause for more families to leave our school systems as many are not yet convinced of the soundness of the vaccine. Children are not in danger (for the most part) from covid and the vaccine is not fully effective, and only for a limited amount of time. In time, the situation will be best served in the same manner as the flu vaccine: recommended, optional, up to families to decide.

Thank you-

External Email

Dear school board, I am writing on behalf of my family and my son who is not yet two years old. Adding the Covid vaccine to the long list of vaccinations that are already required to participate in public school is inappropriate and unwanted.

I have seen and heard from parents how the Covid pandemic has affected their children for the last two years. I have heard how schools close and open periodically allowing their students zero consistency which school age children crave. I have personally not heard of any cases of children contracting the Covid-19 which leads me away from supporting a new vaccine requirement. Non-support also comes from the lack of evidence that this vaccine is safe and effective and will not cause more asymptomatic children into the school room.

As parents we are ingrained to protect our children from what they cannot protect themselves from. I am hoping you do not require the Covid vaccine in school aged children.

Thank you for your time,
Jennifer Elder

Subject: Covid vaccines as part of School Immunizations

External Email

I would like to express my extreme opposition to the implementation of a COVID 19 vaccine requirement for schools in Washington State.

I do NOT want vaccines for my children. In fact, we have visited the children's medical clinician who even has recommended the children DO NOT get the vaccine and who also suggested that getting the vaccine is more dangerous than getting Covid.

** We follow our clinician's advice on all vaccines. By requiring Covid vaccines for school immunization, you will be FORCING us to choose between following medical advice OR receiving public education for our children. ** (It's worth mentioning the liability to which you expose yourself in doing so).

The following statements are being declared by many and are statements I fully support.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. Subject: COVID Vaccine Mandate for Schools

External Email

Good Afternoon,

I wanted to reach out and express my complete opposition to mandating COVID vaccines for children to attend school. Contrary to the media and Washington Dept of Health's assertions, these vaccines have NOT been properly tested and have not even existed long enough to determine if they are safe and/or if there are any long-term negative side affects. There are however, many negative side affects already present from receiving the vaccine, mostly experienced by the younger population. I DO NOT support forcing vaccines on children, or any one else for that matter. I will not have my child receive the COVID Vaccine and will remove her from school if it becomes required.

Thank You,

Malissa Moore

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

Subject: Mandatory covid 'vaccines' for children

External Email

Please register my opposition to this idea. There are a number of reasons. First, we've heard from the beginning that children are virtually immune to covid. Those vaccinated still spread covid. The safety of these experimental gene altering substances has not been proven and as children are highly resistant to covid anyway, there is no justification to risk their health with a substance that does not meet the RCW definition of a vaccine. Lastly, the state has no justification to mandate any medical procedure on anyone, especially for a pandemic that no longer is one. Thank you.

Subject: Mandatory Vax and Forced Quarantine - WA State

External Email

It is beyond terrifying to think our government believes they should have the right to involuntarily detain a person or their family to an isolated facility under any conditions. It is also UNACCEPTABLE that this would give SOMEONE the power to make this decision at their discretion based on a person lawfully choosing NOT to comply with medical examination, testing, treatment, counseling and vaccination. This tactic could ultimately be a threat to force people into making a decision they WOULD not choose unless being threatened with a consequence. Thus, there is no law protecting the person on when and how they can leave these quarantine "facilities" on their own accord and putting their daily lives and responsibilities in jeopardy.

I would also like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State. Below is supporting information that has been helped to be drafted by others that share the same views on me. THIS IS WRONG. Taking away a parents right or forcing them to make a decision that could detrimentally impact their child is unacceptable.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in

Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>
)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Hello,

As a mother of two children (9 and 11), I am very concerned about a possible vaccine mandate for our children. There is simply no long term research on this vaccine and it's been given emergency use only, meaning that it essentially places our children's health at the mercy of a grand experiment. Our children are at a greater risk of having a vaccine injury than they are being hospitalized from Covid and the vaccines have not even proven to be effective at preventing infection or transmission, especially with the new omicron variant. As a mother, it should be my right to chose which vaccines are best for my children. Vaccines are not a one size fits all matter and a mandate would be a serious infringement on bodily autonomy and our rights as parents to choose what is best for our kids.

Sincerely,
Lani Hertzog

To Whom it May Concern:

I am writing these comments in regards to the proposed action of adding the COVID-19 vaccine to the required list of immunizations for children to attend school. I am vaccinated myself and encourage everyone to make their own informed decision on whether to take the vaccine. However, it would be ridiculous to assume that the situation with this vaccine is similar to others that are currently required. Notably:

1. This vaccine was authorized for emergency use. It has not undergone the normal clinical trials that would typically be required for approval.
2. This vaccine is the first of its kind to use mRNA technology instead of live virus (like other established vaccines currently mandated). There may be unknown long-term effects that we are not aware of yet for the COVID vaccine.
3. Young people have incredibly low chances of death, or even requiring hospitalization, as a result from COVID infection.
4. IF the vaccine were shown to prevent transmission, then one could make a case that it is a benefit to vaccinate children. This is NOT the case with newer variants so it is unwarranted.
5. Even less may be known about long-term impacts in children than adults. I believe the risks are low, however they are NOT zero.
6. I am aware of people whose doctors have advised them NOT to get the vaccine based upon their personal health issues.

I chose to get vaccinated, as well as my 3 children. All three of my children still became COVID positive. Thankfully, none of them experienced significant symptoms. I only say this to convey that I am not "anti-vaccine" by any means. Anyone proposing to consider the COVID vaccine similar to other traditional vaccines is negligently disregarding the reality of the pandemic and the reasonable concerns many WA citizens have. I do not support the state adding the COVID vaccine to the list of required vaccines for school attendance.

Regards,

Jeff Petermann

We are (opposed completely) and everybody that we have talked to from various political stripes and positions are opposed to this.

What is crucial for you to understand and we know that you do is that the suppression of information has not worked, and many people who do not take the position that is the official position from some government agencies who are equally as educated and credentialed has been disseminated- from virologists, doctors, PhD's, analysts, creators of the technology that we are using to give these shots to those who want them.

The various public agencies...W.H.O, the FDA, Governors, Mayors, Health Departments, government organizations, Fauci.. give varying and (wildly different information, frequently contradicting what they've said a few days or weeks prior.)

How can you trust this series of inconsistent declarations, statements, and dictates?

The American people have the information that they need from both sides, they know how to make decisions but coercion, assaults on liberty, and the citizens of America who are supposed to (trust) these very inconsistent statements and dictates from agencies that seem to be bouncing back and forth with very little science backing what they are saying.

The proposed changes are what we see and how things work in China, Cuba, North Korea and totalitarian countries.

Passing these dangerous W.A.C's that can and will be abused meaning abuse of citizens is unnecessary, is it immoral, is wrong and will elicit a response from people who are not subjects and who are not subjected to be told exactly what they must do from agencies that are extraordinarily inconsistent and frequently do not have the science to backup what they are saying.

Have these in front of you and do the right thing, set them aside and throw them in the garbage.

I simply cannot fathom a justification for a mandated experimental "vaccine" on our children for a virus that is non life-threatening to them. The only reason I can think of is politics, money, and corruption.

This "vaccine" has proven to be ineffective at preventing or stopping the spread of Covid-19, so why on earth would we inject our children with this when we have no idea of the long-term side-effects or negative implications?

My children have all of their regularly stipulated vaccines, and I assure you, I am not an "anti-vaxxer". I am a logical and concerned parent who will NOT allow the state of Washington to use my children as their lab rats.

If this is imposed, I will seek an exemption. If that is not granted, I will remove my children from the public school they attend.

If the government of Washington state thinks I will cave to their tyrannical mandates, they have no idea of a mother's conviction to protect her children at all costs.

Unintended Consequences of mRNA Shots

Analysis by [Dr. Joseph Mercola](#)

✓ Fact Checked

STORY AT-A-GLANCE

- › “Worse Than the Disease: Reviewing Some Possible Unintended Consequences of mRNA Vaccines Against COVID-19,” by Stephanie Seneff, Ph.D., and Dr. Greg Nigh, is one of the most comprehensive descriptions of the many possible unintended consequences of the mRNA gene transfer technologies incorrectly referred to as “COVID vaccines”
- › As of December 3, 2021, the U.S. Vaccine Adverse Event Reporting System (VAERS) has logged 19,886 COVID jab related deaths. Pfizer — the only company that the U.S. Food and Drug Administration has granted full licensing for an as-yet unavailable COVID shot — accounts for 13,268 of them
- › Calculations suggest VAERS COVID-related reports are underreported by a factor of 41. That means that in the U.S. alone, the actual death toll may be closer to 374,576. Including international deaths reported to VAERS would put the death toll at 815,326
- › Key side effects that are now being reported in massive numbers include miscarriages, heart attacks, myopericarditis, thrombocytopenia (low platelet count), shingles, Bell’s palsy and a variety of permanent disabilities, many of which involve neurological dysfunction
- › The side effects we now see being reported were entirely predictable based on the known science detailed in Seneff’s and Nigh’s paper

MIT scientist Stephanie Seneff’s paper,¹ [“Worse Than the Disease: Reviewing Some Possible Unintended Consequences of mRNA Vaccines Against COVID-19,”](#) published in the International Journal of Vaccine Theory, Practice and Research in collaboration with

Dr. Greg Nigh, is still one of the best, most comprehensive descriptions of the many possible unintended consequences of the mRNA gene transfer technologies incorrectly referred to as “COVID vaccines.”

December 9, 2021, their paper was reprinted in the Townsend Letter, the Examiner of Alternative Medicine.² Seneff, Ph.D., a senior research scientist at MIT who has been conducting research at MIT for over five decades, has spent a large portion of her career investigating the hazards and mechanisms of action of glyphosate.

Her attention was diverted to the science of mRNA gene transfer technologies in early 2020, when Operation Warp Speed was announced. As noted in her paper, many factors that lacked precedent, yet were being implemented at breakneck speed, included:

1. The first-ever use of PEG in an injection
2. The first-ever use of mRNA gene transfer technology against an infectious agent
3. The first-ever “vaccine” to make no clear claims about reducing infection, transmissibility or death
4. The first-ever coronavirus vaccine ever tested on humans (and previous coronavirus vaccines all failed due to antibody-dependent enhancement, a condition in which the antibodies actually facilitate infection rather than defend against it)
5. The first-ever use of genetically modified polynucleotides in the general population

An Insanely Reckless Process

In a May 2021 interview with me, Seneff said:

“To have developed this incredibly new technology so quickly, and to skip so many steps in the process of evaluating [its safety], it's an insanely reckless thing that they've done. My instinct was that this is bad, and I needed to know [the truth].

So, I really dug into the research literature by the people who've developed these vaccines, and then more extensive research literature around those topics. And I don't see how these vaccines can possibly be doing anything good ..."

At the time, just five months into the mass inoculation campaign, Seneff suspected the COVID shots would end up killing far more people than the infection itself. Today, a full year into it, the statistics are grim beyond belief, proving her educated prediction to have been an astute one.

mRNA Jabs Are Shockingly Hazardous

As of December 3, 2021, the U.S. Vaccine Adverse Event Reporting System (VAERS) has logged an astounding 927,738 COVID jab related adverse events, including 19,886 deaths.³ VAERS can receive reports from vaccine manufacturers and other international sources, and if we exclude those, the death toll reported in U.S. territories exclusively stands at 9,136.⁴

Of the total death reports, Pfizer — the only company that the U.S. Food and Drug Administration has granted full licensing for an as-yet unavailable COVID shot — accounts for the vast majority: 13,268, compared to 4,894 for Moderna, 1,651 for Janssen and 73 for an undisclosed brand.

Pfizer also accounts for the vast majority of hospitalizations post-injection, and while those over the age of 66 make up the bulk of deaths, the 25-to-50 age group accounts for most of the hospitalizations. Key side effects that are now being reported in massive numbers include:⁵

Miscarriages	Heart problems such as heart attacks and myopericarditis
Thrombocytopenia (low platelet count)	Shingles
Bell's palsy	A variety of permanent disabilities, many

of which involve neurological
dysfunction

All of these consequences were predicted by Seneff and Nigh in their paper, which makes the events all the more tragic. Importantly, VAERS is notoriously underreported, so the real-world impact of these shots is far greater than what those data suggest.

The Cure Is Indeed Worse Than the Disease

Calculations⁶ performed by Steve Kirsch, executive director of the COVID-19 Early Treatment Fund, and his team of statisticians suggest VAERS COVID-related reports are underreported by a factor of 41. This is a conservative estimate, supported by calculations using a variety of sources besides VAERS itself.

That means that in the U.S. alone (using the data for U.S. territories only), the actual death toll may be closer to 374,576 (including international deaths reported to VAERS would put the death toll at 815,326), and those are deaths that occurred within days or weeks post-injection.

As Seneff and Nigh explain in their paper, there's overwhelming reason to suspect that these gene transfer injections will have devastating impacts in the long term, resulting in excess deaths over the next decade.

What's more, it's clear that the death toll from the COVID-19 infection itself in the U.S. has been vastly exaggerated, as it's based on positive PCR tests and even mere suspicion of COVID in the absence of testing. Many died from other causes and just happened to have a positive COVID test at the time of death.

Kirsch estimates the real death tally from COVID-19 to be about 50% of the reported number (which is likely conservative). This means about 380,000 Americans died from COVID-19 (rather than with COVID), whereas the COVID shots may have killed more than 374,570 in the first 11 months alone.

“ Seneff suspects that in the next 10 to 15 years, we’ll see a dramatic spike in prion diseases, autoimmune diseases, neurodegenerative diseases at younger ages, and blood disorders such as blood clots, hemorrhaging, stroke and heart failure.”

As predicted in the title of Seneff’s paper, it seems the cure may indeed end up being worse than the disease. This is particularly true for children and young adults, who have either died or been permanently disabled by the shots by the thousands, while having an extraordinarily low risk of dying from or being seriously harmed by the infection itself.

Seneff suspects that in the next 10 to 15 years, we’ll see a dramatic spike in prion diseases, autoimmune diseases, neurodegenerative diseases at younger ages, and blood disorders such as blood clots, hemorrhaging, stroke and heart failure.

The Spike Protein Is the Most Dangerous Part of SARS-CoV-2

The reason we’re seeing all these problems from the COVID shots is because they program your cells to continuously produce SARS-CoV-2 spike protein, which we now know is the most dangerous part of the virus. Many experts noted this from the start, wondering what the vaccine developers could possibly be thinking, selecting this as the antigen for their shots.

While the mRNA injections can cause harm in many different ways, one basic problem is that they can overstimulate your immune system to the point of failure. In summary, as your cells start producing the viral spike proteins, your immune cells rally to mop up the proteins and dump them into your lymphatic system. (This is why many report swollen lymph nodes under the arms.)

The antibody response is part of your humoral immunity. You also have cellular immunity, which is part of your innate immune system. Your innate immune system is very powerful. If you're healthy, it can clear viruses without ever producing a single

antibody. Antibodies are actually a second-tier effect when your innate immune system fails.

The problem is that your innate immune system will not be activated and likely will fail to protect you if you get a COVID-19 shot, because it's bypassing all of the areas where your innate immune system would be brought to bear.

Normally you breathe the virus in and stimulate the production secretory IgA antibodies that protect your respiratory system. When you bypass that route of exposure with a jab in the arm, no secretory IgA antibodies are produced, leaving you susceptible to the infection.

As explained by Ronald Kostoff in an excellent December 8, 2021, Trial Site News article, "COVID-19 'Vaccines': The Wrong Bomb Over the Wrong Target at the Wrong Time":⁷

"An effective vaccine would focus on cellular immunity in the respiratory and intestinal tract, in which secretory IgA is produced by your lymphocytes that are located directly underneath the mucous membranes that line the respiratory and intestinal tract.

The antibodies produced by these lymphocytes are ejected through and to the surface of the linings. These antibodies are thus on site to meet air-borne viruses and they may be able to prevent viral binding and infection of the cells.

Unfortunately, the main inoculants used presently for COVID-19 focus on antibodies (IgG and circulating IgA) that occur in the bloodstream. These antibodies protect the internal organs of the body from infectious agents that try to spread via the bloodstream."

When you are injected with the COVID jab, your body will only induce IgG and circulating IgA — not secretory IgA, and these types of antibodies do not effectively protect your mucous membranes from SARS-CoV-2 infection. So, as noted by Kostoff, the

breakthrough infections we're now seeing "confirm the fundamental design flaws" of this gene transfer technology.

"A natural infection with SARS-CoV-2 (coronavirus) will in most individuals remain localized to the respiratory tract," Kostoff writes.⁸ "The vaccines used presently cause cells deep inside our body to express the viral spike protein, which they were never meant to do by nature.

Any cell which expresses this foreign antigen on its surface will come under attack by the immune system, which will involve both IgG antibodies and cytotoxic T-lymphocytes. This may occur in any organ, but the damage will be most severe in vital organs.

We are seeing now that the heart is affected in many young people, leading to myocarditis or even sudden cardiac arrest and death. In other words, we are dropping the wrong bomb on the wrong target at the wrong time!"

In the end, your body will essentially believe that your innate immune system has failed, which means it must bring in the backup cavalry. In essence, your body is now overreacting to something that isn't true. You're not actually infected with a virus and your innate immune system has not failed, but your body is forced to respond as if both are true.

Effects Likely to Persist Long Term

What's more, the synthetic RNA in the mRNA vaccines contains a nucleotide called methyl-pseudouridine, which your body cannot break down, and the RNA is programmed to trigger maximum protein production. So, we're looking at completely untested manipulation of RNA.

It is very important to recognize that this is a genetically engineered mRNA for the spike protein. It is not identical to the spike protein mRNA that SARS-Cov-2 produces. It's been significantly altered to avoid being metabolized by your body.

The spike protein your body produces in response to the COVID-19 vaccine mRNA locks into your ACE2 receptor. This is because the genetically engineered new spike protein has additional prolines inserted that prevent the receptors from properly closing, which then cause you to downregulate ACE2. That's partially how you end up with problems such as pulmonary hypertension, ventricular heart failure and stroke.^{9,10}

As noted in a 2020 paper,¹¹ there's a "pivotal link" between ACE2 deficiency and SARS-CoV-2 infection. People with ACE2 deficiency tend to be more prone to severe COVID-19. The spike protein suppresses ACE2,¹² making the deficiency even worse. According to Seneff, the gene transfer injections essentially do the same thing, and we still don't know how long the effects last.

Manufacturers initially guessed the synthetic RNA might survive in the human body for about six months. A more recent investigation found the spike protein persisted in recovered COVID patients for 15 months.¹³

This raises the suspicion that the synthetic and more persistent mRNA in the COVID shots may trigger spike protein production for at least as long, and probably longer.¹⁴ What's more, the number of spike proteins produced by the shots is far greater than what you experience in natural infection.

As explained by Dr. Peter McCullough,¹⁵ this means that after your first shot, your body will produce spike protein for at least 15 months. But, when you get shot No. 2 a few weeks later, that shot will cause spike protein production to go on for 15 months or longer. With shot No. 3 six months after that, you produce spike protein for yet another 15 months.

With regular boosters, you may never rid your body of the spike protein. All the while, it's wreaking havoc with your biology. McCullough likens it to "a permanent install of an inflammatory protein in the human body," and inflammation is at the heart of most if not all chronic diseases. There's simply no possible way for these gene transfer shots to improve public health. They're going to decimate it.

Long-Term Neurological Damage Is To Be Expected

In her paper,¹⁶ Seneff describes several key characteristics of the SARS-CoV-2 spike protein that suggests it acts as a prion. This could help explain why we're seeing so many neurological side effects from the shots. According to Seneff, the spike protein produced by the COVID shot, due to the modifications made, may actually make it more of a prion than the spike protein in the actual virus, and a more effective one.

For a detailed technical description of this you can read through Seneff's paper, but the take-home message is that COVID-19 shots are instruction sets for your body to make a toxic protein that will eventually wind up concentrated in your spleen, from where prion-like protein instructions will be sent out, radically increasing your risk of developing neurodegenerative diseases.

Lung, Heart and Brain Diseases Are Predictable Consequences

Seneff also goes into great detail describing how the spike protein acts as a metabolic poison. While I recommend reading [Seneff's paper](#) in its entirety, I've extracted some key sections below, starting with how the spike protein can trigger pathological damage leading to lung damage and heart and brain diseases:¹⁷

"The picture is now emerging that SARS-CoV-2 has serious effects on the vasculature in multiple organs, including the brain vasculature ... In a series of papers, Yuichiro Suzuki in collaboration with other authors presented a strong argument that the spike protein by itself can cause a signaling response in the vasculature with potentially widespread consequences.

These authors observed that, in severe cases of COVID-19, SARS-CoV-2 causes significant morphological changes to the pulmonary vasculature ... Furthermore, they showed that exposure of cultured human pulmonary artery smooth muscle cells to the SARS-CoV-2 spike protein S1 subunit was sufficient to promote cell signaling without the rest of the virus components.

Follow-on papers showed that the spike protein S1 subunit suppresses ACE2, causing a condition resembling pulmonary arterial hypertension (PAH), a severe lung disease with very high mortality ... The 'in vivo studies' they referred to ... had shown that SARS coronavirus-induced lung injury was primarily due to inhibition of ACE2 by the SARS-CoV spike protein, causing a large increase in angiotensin-II.

Suzuki et al. (2021) went on to demonstrate experimentally that the S1 component of the SARS-CoV-2 virus, at a low concentration ... activated the MEK/ERK/MAPK signaling pathway to promote cell growth. They speculated that these effects would not be restricted to the lung vasculature.

The signaling cascade triggered in the heart vasculature would cause coronary artery disease, and activation in the brain could lead to stroke. Systemic hypertension would also be predicted. They hypothesized that this ability of the spike protein to promote pulmonary arterial hypertension could predispose patients who recover from SARS-CoV-2 to later develop right ventricular heart failure.

Furthermore, they suggested that a similar effect could happen in response to the mRNA vaccines, and they warned of potential long-term consequences to both children and adults who received COVID-19 vaccines based on the spike protein.

An interesting study by Lei et. al. (2021) found that pseudovirus – spheres decorated with the SARS-CoV-2 S1 protein but lacking any viral DNA in their core – caused inflammation and damage in both the arteries and lungs of mice exposed intratracheally.

They then exposed healthy human endothelial cells to the same pseudovirus particles. Binding of these particles to endothelial ACE2 receptors led to mitochondrial damage and fragmentation in those endothelial cells, leading to the characteristic pathological changes in the associated tissue.

This study makes it clear that spike protein alone, unassociated with the rest of the viral genome, is sufficient to cause the endothelial damage associated with COVID-19. The implications for vaccines intended to cause cells to manufacture the spike protein are clear and are an obvious cause for concern."

The COVID Shots Activate Latent Viruses

As mentioned earlier, shingles infection is turning out to be a rather common side effect of the COVID shot, and like the neurological, vascular and cardiac damage we're seeing, activation of latent viral infections was also predicted.

One reason why latent viral infections are cropping up in response to the shots is because the shots disable your type I interferon pathway. A second reason is because your immune system is overburdened trying to deal with the inflammatory spike proteins flowing through your body. Something's got to give, so latent viruses are allowed to break through.

That's not the end of your potential troubles, however, as these coinfections may worsen or accelerate other conditions, such as Bell's Palsy, myalgic encephalomyelitis and chronic fatigue syndrome.

Herpes viruses, for example, have been implicated as a trigger of both AIDS¹⁸ and chronic fatigue syndrome.¹⁹ Some research suggests these diseases don't appear until viruses from different families partner up and the type 1 interferon pathway is disabled.

With all of that in mind, it seems inevitable that, long term, the COVID mass injection campaign will result in an avalanche of a wide range of debilitating chronic illnesses.

CDC Hits New Lows With Two Manipulated Studies

Analysis by [Dr. Joseph Mercola](#)

✓ Fact Checked

STORY AT-A-GLANCE

- › Recent data from the U.K. Office of National Statistics reveals people who have been double jabbed against COVID-19 are dying from all causes at a rate six times higher than the unvaccinated
- › In the U.S., meanwhile, the Centers for Disease Control and Prevention is propping up the official narrative with two manipulated studies — one suggesting the jab reduces all-cause mortality, and another claiming the shot is five times more protective than natural immunity
- › Both studies are of questionable quality and have several problems, including selection of time and date ranges that allow them to pretend that the COVID shots are safer and more effective than they really are
- › According to all-cause mortality statistics, the number of Americans who died between January 2021 and August 2021 is 16% higher than 2018 (the pre-COVID year with the highest all-cause mortality) and 18% higher than the average death rate between 2015 and 2019. Did COVID-19 raise the death toll despite mass vaccination, or are people dying at increased rates because of the COVID jabs?
- › CDC data reveal that while the number of hospitalized patients with natural immunity fell sharply over the summer, when the delta variant took over, the number of vaccinated people being hospitalized soared, from three per month on average during the spring to more than 100 a month in late summer. Since these vaccinated patients were less than six months from their second dose, they should have been at or near maximum immunity

While recent data from the U.K. Office of National Statistics (ONS) reveal people who have been double jabbed against COVID-19 are dying from all causes at a rate six times higher than the unvaccinated,¹ the U.S. Centers for Disease Control and Prevention is propping up the official narrative with a "study"² that came to the remarkable conclusion that the COVID shot unbelievably reduces your risk of dying from all causes, which includes accidents (but excluding COVID-19-related deaths). As reported by CNN Health, October 22, 2021:³

"The research team was trying to demonstrate that the three authorized Covid-19 vaccines are safe and they say their findings clearly demonstrate that. 'Recipients of the Pfizer-BioNTech, Moderna, or Janssen vaccines had lower non-COVID-19 mortality risk than did the unvaccinated comparison groups,' the researchers wrote in the weekly report⁴ of the U.S. Centers for Disease Control and Prevention.

The team studied 6.4 million people who had been vaccinated against Covid-19 and compared them to 4.6 million people who had received flu shots in recent years but who had not been vaccinated against coronavirus.

They filtered out anyone who had died from Covid-19 or after a recent positive coronavirus test ... People who got two doses of Pfizer vaccines were 34% as likely to die of non-coronavirus causes in the following months as unvaccinated people, the study found.

People who got two doses of Moderna vaccine were 31% as likely to die as unvaccinated people, and those who got Johnson & Johnson's Janssen vaccine were 54% as likely to die ..."

Two key takeaways from those paragraphs are 1) the researchers admit they intended to demonstrate that the shots are safe and effective, and stats can be manipulated to find what you want to find, and 2) people who got the Janssen shot did in fact have a higher death rate than the unvaccinated (54% likelihood, compared to the unvaxxed).

Are the Shots Reducing All-Cause Mortality?

The researchers hypothesize that people who get the COVID jab may be healthier overall than those who abstain, and have healthier lifestyles. In my view, this is classic Orwellian doublespeak, as most of the brainwashed don't understand the fundamentals of healthy behavior.

I suspect their new propaganda has more to do with the fact that they only looked at data through May 31, 2021. By mid-April, an estimated 31% of American adults had received one or more shots.⁵ As of June 15, 48.7% were fully "vaccinated."⁶ So, we can assume that by the end of May, somewhere in the neighborhood of 45% of eligible Americans were double jabbed, give or take a couple of percentage points.

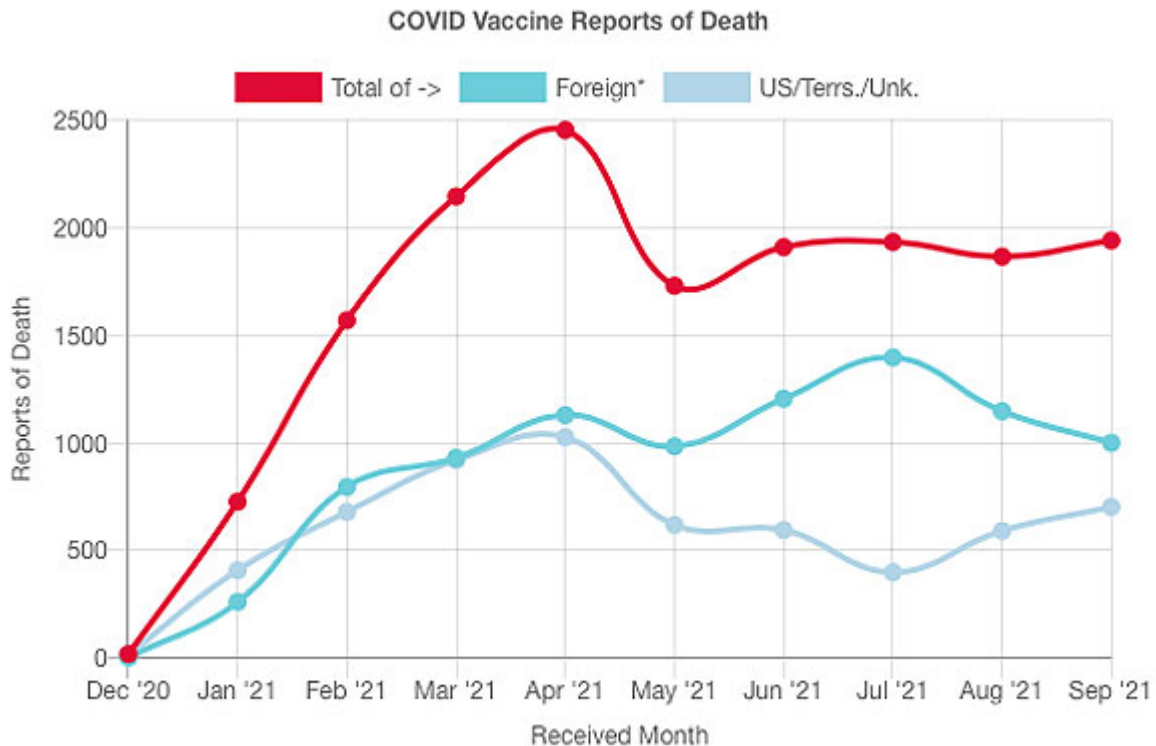

The reason I suspect statistical tomfoolery is because this is precisely how the CDC invented the "pandemic of the unvaccinated" myth, where they claimed 99% of COVID-19 deaths and 95% of COVID-related hospitalizations were occurring among the unvaccinated.⁷

To achieve those statistics, the CDC included hospitalization and mortality data from January through June 2021, a timeframe during which the vaccinated were still in a minority.

Here, we again see them use a seven-month span of time when vaccination rates were low. More importantly, however, is that the chosen cutoff date also obscures a rapid rise in vaccine-related deaths reported to the U.S. Vaccine Adverse Events Reporting System (VAERS).

Look at the graph below, obtained from OpenVAERS mortality reports page.⁸ As you can see, reports of deaths following the COVID jab peaked right at the beginning of April 2021, then dropped down again during the month of April. Interestingly enough, the study notes that the daily vaccination rate has declined by 78% since April 13, 2021.

However, while the daily vaccination rate has plummeted since April, reported deaths have remained high and relatively steady. Could this be a hint that people are dying from shots they received earlier in the year?

As of January 1, 2021, only 0.5% of the U.S. population had received a COVID shot, so comparing death rates of the vaxxed and unvaxxed in December 2020 and January 2021 may not be all that fruitful. Why not include July, August and September in the analysis instead?

As you can see, reported deaths were significantly elevated during these months, compared to December and January. And, while not shown in that graph, between September 3, 2021, and October 22, 2021, the total cumulative reported death toll shot up from 7,662^{9,10} to 17,619.¹¹ In other words, it more than doubled in about seven weeks – a timeframe that was not included in the CDC's analysis.

What's more, while the study was large and sociodemographically diverse, the authors admit that "the findings might not be applicable to the general population."

Also, recall they changed the definition of "vaccinated" to include someone who is two weeks past their second dose (for two dose regimens). This would obfuscate the truth as there were tens of millions that received one jab or more but were not considered "vaccinated."

Why Is All-Cause Mortality Higher in 2021?

According to all-cause mortality statistics,¹² the number of Americans who died between January 2021 and August 2021 is 16% higher than 2018, the pre-COVID year with the highest all-cause mortality, and 18% higher than the average death rate between 2015 and 2019. Adjusted for population growth of about 0.6% annually, the mortality rate in 2021 is 16% above the average and 14% above the 2018 rate.

The obvious question is, why did more people die in 2021 (January through August) despite the rollout of COVID shots in December 2020? Did COVID-19 raise the death toll despite mass vaccination, or are people dying at increased rates because of the COVID jabs?

In a two-part series,¹³ Matthew Crawford of the Rounding the Earth Newsletter examined mortality statistics before and after the rollout of the COVID shots. In Part 1,¹⁴ he revealed the shots killed an estimated 1,018 people per million doses administered (note, this is doses, not the number of individuals vaccinated) during the first 30 days of the European vaccination campaign.

“ Between 800,000 and 2 million so-called 'COVID-19 deaths' may in fact be COVID vaccine-induced deaths.”

After adjusting for deaths categorized as COVID-19 deaths, he came up with an estimate of 200 to 500 deaths per million doses administered. With 4 billion doses having been administered around the world, that means 800,000 to 2 million so-called "COVID-19 deaths" may in fact be vaccine-induced deaths. As explained by Crawford:¹⁵

"This does not even include vaccine-induced deaths that have not been recorded as COVID cases, though I suspect that latter number is smaller since the only good way to hide the vaccine mortality signal is to smuggle deaths through the already-established COVID death toll."

Corroborating Crawford's calculations are data from Norway, where 23 deaths were reported following the COVID jab at a time when only 40,000 Norwegians had received the shot. That gives us a mortality rate of 575 deaths per million doses administered. What's more, after conducting autopsies on 13 of those deaths, all 13 were determined to be linked to the COVID jab.¹⁶

Is the COVID Jab Responsible for Excess Deaths?

Crawford goes on to look at data from countries that have substantial vaccine uptake while simultaneously having very low rates of COVID-19. This way, you can get a better idea as to whether the COVID jabs might be responsible for the excess deaths, as opposed to the infection itself.

He identified 23 countries that fit these criteria, accounting for 1.88 billion individuals, roughly one-quarter of the global population. Before the COVID jabs rolled out, these nations reported a total of 103.2 COVID-related deaths per million residents. Five nations had more than 200 COVID deaths per million while seven had fewer than 10 deaths per million.

As of August 1, 2021, 25.35% of inhabitants in these 23 nations had received a COVID jab and 10.36% were considered fully vaccinated. In all, 673 million doses had been administered. Based on these data, Crawford estimates the excess death rate per million vaccine doses is 411, well within the window of the 200 to 500 range he calculated in Part 1.

Another interesting data dive was performed by Steve Kirsch, executive director of the COVID-19 Early Treatment Fund. In the video "Vaccine Secrets: COVID Crisis,"¹⁷ he argues that VAERS can be used to determine causality, and shows how the VAERS data indicate more than 300,000 Americans have likely been killed by the COVID shots.¹⁸ Anywhere from 2 million to 5 million have also been injured by them in some way.

What Do the VAERS Data Tell Us?

In a September 18, 2021, interview with The Covexit podcast, Jessica Rose, Ph.D., who holds degrees in applied mathematics, immunology, computational biology, molecular biology and biochemistry, also discussed what the VAERS data tell us about the safety of the COVID shots.

Rose covers issues such as the magnitude of the side effects compared to other vaccination programs, the problem of under-reporting, and how causality can be assessed using the Bradford Hill Criteria. You can find a PDF of the [slide show that Rose presents here](#).¹⁹ Here's a summary of some of the key points made in this interview:

- Between 2011 and 2020, the number of VAERS reports ranged between 25,408 and 49,412 for all vaccines. In 2021, with the rollout of the COVID shots, the number of VAERS reports shot up to 521,667, as of September 3, 2021, for the COVID shots alone. (Fast-forward to October 22, 2021, and the report tally for COVID-related adverse events has ballooned to 837,593.²⁰)
- Between 2011 and 2020, the total number of deaths reported to VAERS ranged between 120 and 183. In 2021, as of September 3, the reported death toll had shot up to 7,662. As of October 22, 2021, the death toll was 17,619.²¹
- Cardiovascular, neurological and immunological adverse events are all being reported at rates never even remotely seen before.
- The estimated under-reporting factor (URF) is 31. Using this URF, the death toll from COVID shots is calculated to be 205,809 as of August 27, 2021; Bell's palsy 81,747; herpes zoster infection 149,017; paresthesia 305,660; breakthrough COVID 365,955; myalgia 528,457; life threatening events 230,113; permanent disabilities 212,691; birth defects 7,998.
- The Bradford Hill Criteria for causation are all satisfied. This includes but is not limited to strength of effect size, reproducibility, specificity, temporality, dose-response relationship, plausibility, coherence and reversibility.

CDC Claims COVID Jab Beats Natural Immunity

If you think the CDC's claim that the COVID jab lowers all-cause mortality is a low point in its irrational vaccine push, prepare to let your expectations sink even lower, with even more egregious Orwellian doublespeak implementation. October 29, 2021, the CDC released yet another study, this one claiming the COVID jab actually offers five times better protection against COVID-19 than natural immunity. As reported by Alex Berenson in an October 30, 2021, Substack article:²²

"Yesterday the Centers for Disease Control, America's not-at-all-politicized public health agency, released a new study purporting to show that vaccination protects against COVID infection better than natural immunity. Of course, a wave of stories about the benefits of mRNA vaccination followed.

To do this, the CDC used some magic statistical analysis to turn inside raw data that actually showed almost four times as many fully vaccinated people being hospitalized with Covid as those with natural immunity – and FIFTEEN TIMES as many over the summer. I kid you not.

Further, the study runs contrary to a much larger paper from Israeli researchers in August. As my 2-year-old likes to say, How dey do dat? Well, the Israeli study drew on a meaningful dataset in a meaningful way to reach meaningful conclusions.

It counted infections (and hospitalizations) in a large group of previously infected people against an equally large and balanced group of vaccinated people, then made moderate adjustments for clearly defined risk factors.

It found that vaccinated people were 13 times as likely to be infected – and 7 times as likely to be hospitalized – as unvaccinated people with natural immunity. In contrast – how do I put this politely? – the CDC study is meaningless gibberish that would never have been published if the agency did not face huge political pressure to get people vaccinated."

Data Manipulation Is Apparently a CDC Specialty

Berenson goes on to dissect the study in question, starting with its design, which he calls "bizarre." The CDC analysts looked at data from 200,000 Americans hospitalized with "COVID-like" illness between January and August 2021 in nine states. Two groups were then compared:

1. Those who had confirmed COVID at least 90 days before and received another COVID test at the time of their hospitalization
2. Those who had been fully vaccinated for at least 90 days, but not more than 180 days, before their admittance and received another COVID test at the time of their hospitalization

Berenson points out what I stressed earlier, which is that choosing certain time or date ranges will allow you to make the shots appear a whole lot better than they actually are. Here, by choosing a 90- to 180-day inclusion range, they're looking at a best-case scenario, as we now know the shots quit working after a handful of months. So, they're only looking at that short window during which the COVID shots are at maximum effectiveness.

The 90-day criterion also ends up excluding the vast majority of patients hospitalized with COVID-like illness, both vaccinated and unvaccinated. While Berenson doesn't address the vaccinated, few if any could have been fully vaccinated for at least 90 days prior to March, so why include January and February? Just about everyone was by definition unvaccinated at that time.

As for those with natural immunity, only 1,020 of the 200,000 patients hospitalized between January and August had a previously documented COVID infection. As noted by Berenson:²³

"Given the fact that at least 20% of Americans, and probably more like 40%, had had COVID by the spring of 2021, this is a strikingly small percentage – and certainly doesn't suggest long COVID is much of a threat."

Of the 1,020 with natural immunity, only 89 tested positive for COVID, while 324 of the 6,328 vaccinated patients who met the study criteria tested positive. Of note here is two

things:

- 1) There were more vaccinated patients hospitalized for COVID-like illness than those with natural immunity; this despite including months when vaccination rates were in the fractional and single digits, and
- 2) A greater number of vaccinated patients tested positive for breakthrough infection than patients with natural immunity

Hospitalization Rate Among Vaccinated Is Soaring

Berenson continues:²⁴

"And the CDC didn't have, or didn't publish, figures on how many people were actually in the two groups ... Instead it compared the PERCENTAGE OF POSITIVE TESTS in the two groups. But why would the percentage of positive tests matter, when we don't know how many people were actually at risk? ...

[A]mazingly, the statistical manipulation then got even worse. The natural immunity group had an 8.7% positive test rate. The fully vaccinated group had a 5.1% positive test rate. So the natural immunity group was about 1.7 times as likely to test positive. ($1.7 \times 5.1 = \text{about } 8.7$.)

With such a small number of people in the natural immunity group, that raw 'rate ratio' may well have failed to reach statistical significance. (We don't know, because the CDC didn't provide an unadjusted odds ratio with 95% boundaries – something I have never seen before in any paper.)

Instead, the CDC provided only a risk ratio that it had adjusted with a variety of factors, including 'facility characteristics [and] sociodemographic characteristics.'

And finally, the CDC's researchers got a number that they could publish – hospitalized people who had previously been infected were five times as likely to have a positive COVID test as people who were fully vaccinated. Never mind

that there were actually four times as many people in the second group. Science!

By the way, buried at the bottom of report is some actual data. And it's bad. The CDC divided the hospitalizations into pre- and post-Delta – January through June and June through August.

Interestingly, the number of hospitalized people with natural immunity actually fell sharply over the summer, as Delta took off. About 14 people per month were hospitalized in the winter and spring, compared to six per month from June through August. (Remember, this is a large sample, with hospitals in nine states.)

But the number of VACCINATED people being hospitalized soared – from about three a month during the spring to more than 100 a month during the Delta period. These vaccinated people still were less than 180 days from their second dose, so they should have been at or near maximum immunity – suggesting that Delta, and not the time effect, played an important role in the loss of protection the vaccine offered."

Perhaps Rep. Thomas Massie said it best when he tweeted:²⁵

"What do 'road kill' and a CDC sponsored COVID paper have in common? By the third day, they're so picked apart they're unrecognizable. This CDC Director is shameless for fabricating junk science with findings that stand in stark contrast to every credible academic study."

Massie goes on to point out some obvious flaws and questions raised by the study, including the following:

- The authors failed to verify recovery among those with previous infection, so any number of these "reinfections" may actually have been long-COVID.
- The fact that more than 6,000 hospitalized for COVID symptoms were vaccinated, compared to just 1,000 with previous infection, counters the claim that 99% of COVID hospitalizations are unvaccinated.

- The number of vaccinated people hospitalized for COVID symptoms correlate negatively with the time since vaccination; 3,625 were hospitalized within 90 to 119 days of vaccination, 2,101 within 120 to 149 days, and 902 within 150 to 179 days of vaccination. "Could initial hospitalizations be due to vaccine adverse effects or due to a temporarily weakened immune system from the vaccine?" Massey asks.²⁶
- The study only considered those with natural immunity who ended up in the hospital, and not the ones who didn't get sick. "Natural immunity helps prevent hospitalization!" Massey says.²⁷

Massie also notes that this paper, which is only six pages long, has an astounding 50 authors, and at least half a dozen of them disclose Big Pharma conflicts of interest. What's more, seeing how Congress gave the CDC a cool \$1 billion to promote the COVID jab, isn't working for the CDC a conflict of interest as well?

Martin Kulldorff, Ph.D., professor of medicine at Harvard Medical School and a biostatistician and epidemiologist in the Division of Pharmacoepidemiology and Pharmacoeconomics at Brigham and Women's Hospital, also critiqued the study in a tweet, saying:²⁸

"This CDC study has a major statistical flaw, and the 5x conclusion is wrong, it implicitly assumes that hospitalized respiratory patients are representative of the population, which they are not. Trying to connect with authors."

Natural Immunity Is the Best Answer

Try as the CDC might to twist the data, there's really no question that natural immunity is superior and longer lasting than vaccine-induced immunity. This is also a long-held medical fact that has been tossed aside as too inconvenient to matter in COVID-19.

For some undisclosed reason, the government wants everyone to get the COVID injection, whether medically warranted or not. The sheer lunacy of that is cause enough to be leery and hold off on getting the risky jab. I can tell you one thing, this policy has

nothing to do with safeguarding public health, because it's driving public health in the wrong direction.

It's quite clear that the way out of this pandemic is through natural herd immunity, and at this point, we know there's no reason to fear COVID-19. Overall, its lethality is on par with the common flu.^{29,30,31,32,33} Provided you're not in a nursing home or have multiple comorbidities, your chances of surviving a bout of COVID-19 is 99.74%, on average.³⁴

Additionally, we also know there are several early treatment protocols that are very effective, such as the Frontline COVID-19 Critical Care Alliance I-MASK+³⁵ protocol, the Zelenko protocol,³⁶ and nebulized peroxide, detailed in Dr. David Brownstein's case paper³⁷ and Dr. Thomas Levy's free e-book, "[Rapid Virus Recovery](#)." Whichever treatment protocol you use, make sure you begin treatment as soon as possible, ideally at first onset of symptoms.

The reported rate of death from COVID-19 shots in VAERS, on the other hand, exceeds the reported death rate of more than 70 vaccines combined over the past 30 years, and if you are injured by a COVID shot and live in the U.S., your only recourse is to apply for compensation from the Countermeasures Injury Compensation Act (CICP).³⁸

Compensation from CICP is very limited and hard to get. You only qualify if your injury requires hospitalization and results in significant disability and/or death, and even if you meet the eligibility criteria, it requires you to use up your private health insurance before it kicks in to pay the difference.

There's no reimbursement for pain and suffering, only lost wages and unpaid medical bills. Salary compensation is of limited duration, and capped at \$50,000 a year, and the CICP's decision cannot be appealed.

For a taste of what life is like for those injured by these shots, review some of the cases reported to [nomoresilence.world](#). You can also learn more about the potential mechanisms of harm in Stephanie Seneff's paper,³⁹ "[Worse Than The Disease: Reviewing Some Possible Unintended Consequences of mRNA Vaccines Against COVID-19](#)," published in the International Journal of Vaccine Theory, Practice and Research in collaboration with Dr. Greg Nigh.

The COVID Shots Are Killing People

Analysis by [Dr. Joseph Mercola](#)

✓ Fact Checked

STORY AT-A-GLANCE

- › Those at highest risk of dying from COVID-19 are also at highest risk of dying from the COVID shot. The shots are also causing severe heart damage in younger people whose risk of dying from COVID is inconsequential
- › While you only get at most six months' worth of protection from the COVID shot, each injection will cause damage for 15 months as your body continuously produces toxic spike protein
- › The spike protein is responsible for COVID-19-related heart and vascular problems, and it has the same effect when produced by your own cells. It causes blood clots, myocarditis and pericarditis, strokes, heart attacks and neurological damage, just to name a few
- › The safety signal is very clear, with 19,249 deaths having been reported to the U.S. Vaccine Adverse Events Reporting System as of November 19, 2021. Historically, drugs and vaccines are pulled off the market after about 50 suspected deaths
- › Children aged 12 to 17 are five times more likely to be hospitalized with COVID jab-induced myocarditis than they are to be hospitalized for COVID-19 infection

The video above features Dr. Peter McCullough, a cardiologist, internist and epidemiologist, and editor of two peer-review journals, who has been on the media and medical frontlines fighting for early COVID treatment. McCullough has also been outspoken about the potential dangers of the COVID shots, and the lack of necessity for

them. Curiously, agencies that are currently calling the shots do not have the authority to dictate how medicine is practiced.

The U.S. Food and Drug Administration, for example, has no power to tell doctors what to do or how to treat patients. The National Institutes of Health are a government research organization and cannot tell doctors how to treat patients.

Ditto for the U.S. Centers for Disease Control and Prevention, which is an epidemiologic analysis organization. It is the job of practicing doctors to identify appropriate and effective treatment protocols, which is precisely what McCullough has been doing since the start of this pandemic.

In August 2020, McCullough's landmark paper "Pathophysiological Basis and Rationale for Early Outpatient Treatment of SARS-CoV-2 Infection" was published online in the American Journal of Medicine.¹

A follow-up paper, "Multifaceted Highly Targeted Sequential Multidrug Treatment of Early Ambulatory High-Risk SARS-CoV-2 Infection (COVID-19)" was published in Reviews in Cardiovascular Medicine in December 2020.² It became the basis for a home treatment guide.

COVID Shots Are Dangerous and Ineffective

When it comes to the COVID injections, McCullough cites research showing those at highest risk of dying from COVID-19 are also at highest risk of dying from the COVID shot. Additionally, the shots are causing severe heart damage in younger people whose risk of dying from COVID is inconsequential.

He points out the safety signal is very clear, with 19,249 deaths having been reported to the U.S. Vaccine Adverse Events Reporting System as of November 19, 2021.³

The signal is also consistent both internally and externally. A number of side effects are reported in high numbers, and very close to the time of injection, that validate the

suspicion that the shots are at fault. The U.S. data are also consistent with data from other countries, such as the Yellow Card system in the U.K.

Despite that, not a single safety review has been conducted to weed out risk factors and the like. “We’re almost a year into the program and there’s been no attempt at risk mitigation,” McCullough says. At the same time, there have been gross attempts to coerce Americans into taking the shots — everything from free beer or a free lap dance, to million-dollar lotteries and paid scholarships to state universities.

Such enticements are an undeniable violation of research ethics that strictly forbid any and all kinds of coercion of human subjects. As suspected and predicted, no sooner had bribery stopped working than government officials started talking about vaccine mandates.

President Biden infamously stated that his patience with “vaccine hesitancy” was “wearing thin.” The insinuation was that if people didn’t get the shot, they’d face serious repercussions, and we’re now seeing those repercussions play out day by day, as people are being fired and kicked out of school for refusing the jab.

Meanwhile, they haven’t even determined which vaccine is the most effective, which is remarkable. If government really wanted to end the pandemic with a vaccine, wouldn’t they determine which shot works the best and promote the use of that? But no, they tell us any shot will do.

“The fact that there’s no safety report, they’re not telling you if you’re taking the best vaccine, the fact that it’s kind of in a distorted way linked to your ability to work and go to school, that we’re violating the Nuremberg Code, violating the declaration of Helsinki — it’s just not adding up. It’s not looking good for those who are promoting the vaccine,” McCullough says.

Add to all that the now-clear finding that the shots offer only limited protection for a very short time — six months at best. According to McCullough, there are more than 20 studies showing efficacy drops to nothing at the six-month mark. They’ve also had very limited effectiveness against the Delta variant, which has been the predominant strain for several months.

Why Booster Treadmill Is Such a Health Hazard

I've often stated that, in all likelihood, your risk of side effects will rise with each additional shot. McCullough cites research showing your body will produce the toxic SARS-CoV-2 spike protein for 15 months.

If your body is still producing the spike protein — which is what's causing the blood clots and cardiovascular damage — and you take an additional shot every six months, there will come a time when your body simply cannot withstand the damage being caused by all the spike protein being produced.

Also consider this: While you only get at most six months' worth of protection from any given shot, each injection will cause damage for 15 months. If we continue with boosters, eventually, it's going to be impossible to ever clear out the spike protein.

While the spike protein is the part of the virus chosen as the antigen, the part that triggers an immune response, it's also the part of the virus that causes the worst disease. The spike protein is responsible for COVID-19-related heart and vascular problems, and it has the same effect when produced by your own cells.

It causes blood clots, myocarditis and pericarditis, strokes, heart attacks and neurological damage, just to name a few. As noted by McCullough, the spike protein of this virus was genetically engineered to be more dangerous to humans than any previous coronavirus, and that is what the COVID shots are programming your cells to produce. "They're just grossly unsafe for human use," McCullough says.

Myocarditis Will Likely Be Widespread

He goes on to discuss research from 2017,⁴ which showed myocarditis in children and youth occurs at a rate of four cases per million per year. Assuming there are 60 million American children, the background rate for myocarditis would be 240 cases a year. How many cases of myocarditis have been reported to VAERS following COVID injection so far? 14,428 as of November 19, 2021.⁵

“Doctors have never seen so many cases of myocarditis,” McCullough says, citing research showing that among children between the ages of 12 and 17, 87% are hospitalized after receiving the shot. “That’s how dangerous it is,” he says. “It is frequent, and it is severe.”

Yet the FDA claims myocarditis after the COVID shot is “rare and mild.” We’re now also getting reports of fatal cases of myocarditis in adults in their 30s and 40s. “Myocarditis right now looks like an unqualified disaster,” McCullough says, both for younger people and adults.

“Children aged 12 to 17 are five times more likely to be hospitalized with COVID jab-induced myocarditis than they are to be hospitalized for COVID infection.”

Sadly, children also reap no benefit from the shots, so it’s all risk and no benefit for them. McCullough points out there has been no recorded school outbreaks and no child-to-teacher transmission. He estimates 80% of school aged children are already immune, which would explain this.

Meanwhile, research cited in the interview found that children aged 12 to 17 are five times more likely to be hospitalized with COVID jab-induced myocarditis than they are to be hospitalized for COVID infection. These data counter the claim that COVID-induced heart problems are a far greater problem than “vaccine”-induced heart damage.

And let’s not forget, if you take a COVID shot, you have a 100% chance of being exposed to whatever risk is associated with that shot. On the other hand, if you decline the injection, it’s not 100% chance you’ll get COVID-19, let alone die from it. You have a less than 1% chance of being exposed to SARS-CoV-2 and getting sick.

So, it’s 100% deterministic that taking the shot exposes you to the risks of the shot, and less than 1% deterministic that you’ll get COVID if you don’t take the shot.

COVID-19 Unrelated to Vaccination Rates

As noted by McCullough, rates of COVID are higher now in the highest vaccinated areas than they were before the vaccine rollout. That too tells us they aren't working and not worth the risk.

He cites research⁶ published September 30, 2021, in the European Journal of Epidemiology, which found no relationship between COVID-19 cases and levels of vaccination in 68 countries worldwide and 2,947 counties in the U.S. If anything, areas with high vaccination rates had slightly higher incidences of COVID-19. According to the authors:⁷

"[T]he trend line suggests a marginally positive association such that countries with higher percentage of population fully vaccinated have higher COVID-19 cases per 1 million people."

Iceland and Portugal, for example, where more than 75% of their populations are fully vaccinated, had more COVID-19 cases per 1 million people than Vietnam and South Africa, where only about 10% of the populations are fully vaccinated.⁸ Data from U.S. counties showed the same thing. New COVID-19 cases per 100,000 people were "largely similar," regardless of the percentage of a state's population that was fully vaccinated.

"There ... appears to be no significant signaling of COVID-19 cases decreasing with higher percentages of population fully vaccinated," the authors wrote.⁹ Notably, out of the five U.S. counties with the highest vaccination rates — ranging from 84.3% to 99.9% fully vaccinated — four of them were on the U.S. Centers for Disease Control and Prevention's "high transmission" list. Meanwhile, 26.3% of the 57 counties with "low transmission" have vaccination rates below 20%.

The study even accounted for a one-month lag time that could occur among the fully vaccinated, since it's said that it takes two weeks after the final dose for "full immunity" to occur. Still, "no discernable association between COVID-19 cases and levels of fully vaccinated" was observed.¹⁰

Hospitalization rates for severe COVID infection have also risen, from 0.01% in January 2021 to 9% in May 2021, and the COVID death rate rose from zero percent to 15.1% in

that same timeframe.¹¹ In short, everything is getting worse, not better, the more people get these shots.

Allowing natural immunity to build is really the only rational way forward. But then again, the COVID jabs aren't about protecting public health. They're about ushering in a socio-economic control system via vaccine passports, which is something McCullough doesn't discuss in this interview. Nothing makes sense if you look at it from a medical standpoint. It only makes sense if you see it for what it is, which is a control system.

Natural Immunity Is 'Infinitely Better' Than Vaccine Immunity

According to McCullough, "natural immunity is infinitely better than vaccine immunity," and studies have borne that out time and again. The reason natural immunity is superior to vaccine-induced immunity is because viruses contain five different proteins.

The COVID shot induces antibodies against just one of those proteins, the spike protein, and no T cell immunity. When you're infected with the whole virus, you develop antibodies against all parts of the virus, plus memory T cells.

This also means natural immunity offers better protection against variants, as it recognizes several parts of the virus. If there are significant alternations to the spike protein, as with the Delta variant, vaccine-induced immunity can be evaded. Not so with natural immunity, as the other proteins are still recognized and attacked.

Here's a sampling of scholarly publications that have investigated natural immunity as it pertains to SARS-CoV-2 infection. There are several more in addition to these:¹²

Science Immunology October 2020¹³ found that "RBD-targeted antibodies are excellent markers of previous and recent infection, that differential isotype measurements can help distinguish between recent and older infections, and that IgG responses persist over the first few months after infection and are highly correlated with neutralizing antibodies."

The BMJ January 2021¹⁴ concluded that "Of 11, 000 health care workers who had

proved evidence of infection during the first wave of the pandemic in the U.K. between March and April 2020, none had symptomatic reinfection in the second wave of the virus between October and November 2020.”

Science February 2021¹⁵ reported that “Substantial immune memory is generated after COVID-19, involving all four major types of immune memory [antibodies, memory B cells, memory CD8+ T cells, and memory CD4+ T cells].

About 95% of subjects retained immune memory at ~6 months after infection. Circulating antibody titers were not predictive of T cell memory. Thus, simple serological tests for SARS-CoV-2 antibodies do not reflect the richness and durability of immune memory to SARS-CoV-2.”

A 2,800-person study found no symptomatic reinfections over a ~118-day window, and a 1,246-person study observed no symptomatic reinfections over 6 months.

A February 2021 study posted on the prepublication server medRxiv¹⁶ concluded that “Natural infection appears to elicit strong protection against reinfection with an efficacy ~95% for at least seven months.”

An April 2021 study posted on medRxiv¹⁷ reported “the overall estimated level of protection from prior SARS-CoV-2 infection for documented infection is 94.8%; hospitalization 94.1%; and severe illness 96.4%. Our results question the need to vaccinate previously-infected individuals.”

Another April 2021 study posted on the preprint server BioRxiv¹⁸ concluded that “following a typical case of mild COVID-19, SARS-CoV-2-specific CD8+ T cells not only persist but continuously differentiate in a coordinated fashion well into convalescence, into a state characteristic of long-lived, self-renewing memory.”

A May 2020 report in the journal Immunity¹⁹ confirmed that SARS-CoV-2-specific neutralizing antibodies are detected in COVID-19 convalescent subjects, as well as cellular immune responses. Here, they found that neutralizing antibody titers do correlate with the number of virus-specific T cells.

A May 2021 Nature article²⁰ found SARS-CoV-2 infection induces long-lived bone marrow plasma cells, which are a crucial source of protective antibodies. Even after mild infection, anti-SARS-CoV-2 spike protein antibodies were detectable beyond 11 months' post-infection.

A May 2021 study in E Clinical Medicine²¹ found “antibody detection is possible for almost a year post-natural infection of COVID-19.” According to the authors, “Based on current evidence, we hypothesize that antibodies to both S and N-proteins after natural infection may persist for longer than previously thought, thereby providing evidence of sustainability that may influence post-pandemic planning.”

Cure-Hub data²² confirm that while COVID shots can generate higher antibody levels than natural infection, this does not mean vaccine-induced immunity is more protective. Importantly, natural immunity confers much wider protection as your body recognizes all five proteins of the virus and not just one. With the COVID shot, your body only recognizes one of these proteins, the spike protein.

A June 2021 Nature article²³ points out that “Wang et al. show that, between six and 12 months after infection, the concentration of neutralizing antibodies remains unchanged. That the acute immune reaction extends even beyond six months is suggested by the authors' analysis of SARS-CoV-2-specific memory B cells in the blood of the convalescent individuals over the course of the year.

These memory B cells continuously enhance the reactivity of their SARS-CoV-2-specific antibodies through a process known as somatic hypermutation. The good news is that the evidence thus far predicts that infection with SARS-CoV-2 induces long-term immunity in most individuals.”

Reinfection Is Very Rare

McCullough stresses there is also no need to worry about reinfection if you've already had COVID once. The fact is, while breakthrough cases continue among those who have

gotten one or more COVID-19 injections, it's extremely rare to get COVID-19 after you've recovered from the infection.

How rare? Researchers from Ireland conducted a systematic review including 615,777 people who had recovered from COVID-19, with a maximum duration of follow-up of more than 10 months.²⁴

"Reinfection was an uncommon event," they noted, "with no study reporting an increase in the risk of reinfection over time." The absolute reinfection rate ranged from 0% to 1.1%, while the median reinfection rate was just 0.27%.^{25,26,27}

Another study revealed similarly reassuring results. It followed 43,044 SARS-CoV-2 antibody-positive people for up to 35 weeks, and only 0.7% were reinfected. When genome sequencing was applied to estimate population-level risk of reinfection, the risk was estimated at 0.1%.²⁸

There was no indication of waning immunity over seven months of follow-up, unlike with the COVID-19 injection, which led the researchers to conclude that "Reinfection is rare. Natural infection appears to elicit strong protection against reinfection with an efficacy >90% for at least seven months."²⁹

"It's a one-and-done," McCullough says. If you've had it once, you won't get it again. He also advises against using PCR testing after you've had confirmed COVID-19 once, as any subsequent positive tests are just going to be false positives.

Early Treatment Options

In closing, should you get COVID-19, know there are several very effective early treatment options, and early treatment is key, both for preventing severe infection and preventing "long-haul COVID." Here are a few suggestions:

- **Oral-nasal decontamination** — The virus, especially the Delta variant, replicates rapidly in the nasal cavity and mouth for three to five days before spreading to the

rest of the body, so you want to strike where it's most likely to be found right from the start.

Research³⁰ has demonstrated that irrigating your nasal passages with 2.5 milliliters of 10% povidone-iodine (an antimicrobial) and standard saline, twice a day, is an effective remedy.

Another option that was slightly less effective was using a mixture of saline with half a teaspoon of sodium bicarbonate (an alkalizer). You can also gargle with these to kill viruses in your mouth and throat. When done routinely, it can be a very effective preventive strategy. You can find printable [treatment guides on TruthForHealth.org](#).

- **Nebulized peroxide** — A similar strategy is to use nebulized hydrogen peroxide, diluted with saline to a 0.1% solution. Both hydrogen peroxide and saline^{31,32} have antiviral effects.

In a May 10, 2021, Orthomolecular Medicine press release,³³ Dr. Thomas E. Levy — board-certified in internal medicine and cardiology — discussed the use of this treatment for COVID-19 specifically. Levy has in fact written an entire book on peroxide nebulization called “[Rapid Virus Recovery](#),” which you can download for free from MedFox Publishing.

- **Vitamin D optimization** — Research has shown having a vitamin D level above 50 ng/mL brings the risk of COVID mortality down to near-zero.³⁴
- **Other key nutraceuticals** — Vitamin C, zinc, quercetin and NAC all have scientific backing.
- **Key drugs** — For acute infection, ivermectin, hydroxychloroquine or monoclonal antibodies can be used. While monoclonal antibodies and hydroxychloroquine must be used early on in the disease process, ivermectin has been shown to be effective in all stages of the infection.

Doxycycline or azithromycin are typically added as well, to address any secondary bacterial infection, as well as inhaled budesonide (a steroid). Oral steroids are used on and after the fifth day for pulmonary weakness and aspirin or NAC can be added to reduce the risk of clotting. In the interview, McCullough discusses the use of each of these, and other, drugs.

One drug I disagree with is full-strength aspirin. I believe a potentially better, at least safer, alternative would be to use the enzymes lumbrokinase and serrapeptase, as they help break down and prevent blood clots naturally.

Omicron Variant and Vaccine Resistance

Analysis by [Dr. Joseph Mercola](#)

✓ Fact Checked

STORY AT-A-GLANCE

- › Another SARS-CoV-2 variant dubbed Omicron has reportedly arisen in fully “vaccinated” patients in Botswana. Handfuls of cases have also emerged in other areas of the world
- › In response, Japan, Israel and Morocco have closed their borders to all foreign travelers. The U.S., the U.K., Canada and the European Union have banned travelers from southern Africa specifically. Australia has delayed its reopening plans and China has announced a “zero-tolerance approach” to the new variant
- › Fear over Omicron is likely unjustified, as it appears far milder than previous strains. Primary symptoms of infection include extreme fatigue for a couple of days, headache, body aches, scratchy throat and intermittent dry cough. No severe cases have been identified
- › While the mass vaccination campaign appears to be driving the rapid mutation of the virus, governments around the world continue to double down on this failed strategy
- › According to National Institutes of Allergy and Infectious Diseases director Dr. Anthony Fauci, Omicron might evade both monoclonal antibodies and COVID shot-induced antibodies, but he insists getting the COVID shot (if unvaccinated) or a booster if “fully vaccinated” is your best bet

The inevitable is now here. Another SARS-CoV-2 variant dubbed Omicron has reportedly arisen in fully “vaccinated” patients in Botswana.¹ Handfuls of cases have also emerged in other areas of the world. Judging by the doomsday headlines² and government

imposed lockdowns and border closings, the technocratic elite would really like everyone to panic about this one.

In response, Japan, Israel and Morocco immediately closed their borders to all foreign travelers. The U.S., the U.K., Canada and the European Union banned travelers from southern Africa specifically. Australia delayed its reopening plans and China announced a “zero-tolerance approach” to the new variant.³ But is the fear justified? Probably not.

While the Omicron variant appears to spread more rapidly than previous mutations, and affects people younger than 40 to a greater degree than before, there’s no evidence that it has a higher lethality. On the contrary, it may actually be milder.

That seems to be the opinion of Dr. Angelique Coetzee, chair of the South African Medical Association, who discovered the Omicron variant, who in a recent interview (see video above) said:⁴

“Looking at the mildness of the symptoms that we are seeing — apparently, there’s no reason for panicking as we don’t see severely ill patients... The most predominant complaint is severe fatigue for one or two days, with headache, body aches and pain.

Some will have a scratchy throat and some will have a dry cough [that] comes and goes. Those are more or less the big symptoms we have seen.”

Viruses Typically Mutate Into Less Dangerous Variants

This all makes sense, based on what we already know about viruses. As reported by Paul Elias Alexander, Ph.D., with the Brownstone Institute:⁵

“The WHO has said the Omicron variant can spread more quickly than other variants. Likely true. The virus is behaving just like how viruses behave.

They are mutable and mutate, and via the Muller’s ratchet theory, we expect these to be milder and milder mutations, not more lethal ones given the pathogen seeks to infect the host and not arrive at an evolutionary dead end.

The virus will mutate downward so that it can use the host (us) to propagate itself via our cellular metabolic machinery. The Delta variant has shown us this: It is very infectious and mostly non-lethal – specially for children and healthy people ...

[T]here is no reporting of increased virulence/lethality of this new Omicron variant, and this will remain the case based on what we've seen from Delta and prior variants. There are no guarantees, but we operate based on risk and all things point to the same for this new variant.

Just because there might be a wave in South Africa does not mean there will be waves in the U.S. or Israel or other places with greater natural immunity. This was the prize of letting people enjoy day-to-day living.

The nations that have ended lockdowns are likely to move past this new variant scare, and be fine. This is more of an overreaction by the WHO and governments and much ado about nothing."

Is a New Round of COVID Shots the Answer?

While the mass vaccination campaign appears to be driving the rapid mutation of the virus, governments around the world continue to double down on this failed strategy. More shots are the answer, they say.

National Institutes of Allergy and Infectious Diseases (NIAID) director Dr. Anthony Fauci has stated Omicron might evade both monoclonal antibodies and COVID shot-induced antibodies.⁶ Sticking to the same script, National Institutes of Health director Dr. Francis Collins recently told Fox News viewers:⁷

"Please, Americans, if you're one of those folks who's sort of waiting to see, this would be a great time to sign up, get your booster. Or if you haven't been vaccinated already, get started."

It's baffling, considering the shots don't protect against infection or spread, and the fact that Omicron apparently emerged in fully "vaccinated" patients.⁸ What's more, if the Omicron variant actually evades COVID shot-induced antibodies, what's the point of getting it?

A vaccine-evading variant is clear evidence that mass vaccination is fueling more problematic mutations, so the recommendations simply don't jibe with the available data.

COVID Shots Are a Failure

In his article, Alexander highlights a long list of studies showing the COVID shots have suboptimal efficacy, including the following:⁹

The Lancet Infectious Diseases October 2021¹⁰ — Fully "vaccinated" individuals who develop breakthrough infections have a peak viral load similar to that of unvaccinated people, and efficiently transmit the infection to unvaccinated and "vaccinated" alike in household settings.

The Lancet Preprint¹¹ — Fully "vaccinated" Vietnamese health care workers who contracted breakthrough SARS-CoV-2 Delta infections had viral loads that were 251 times higher than those found in cases infected with earlier strains. So, the shots do not appear to protect against infection with the Delta strain.

A July 31, 2021, medRxiv preprint by Riemersma et. al.¹² found no difference in viral loads between unvaccinated people and those "fully vaccinated" who developed breakthrough infections. They also found the Delta variant was capable of "partial escape from polyclonal and monoclonal antibodies."

Eurosurveillance rapid communication, July 2021¹³ — An outbreak of the Delta variant in a hospital in Finland suggested the shots did little to prevent the spread of infection, even among the "vaccinated," and despite routine use of face masks and other protective equipment.

Eurosurveillance rapid communication, September 2021¹⁴ — An upsurge of Delta variant infections in Israel, at a time when more than 55% of the population were “fully vaccinated,” also showed the COVID shots were ineffective against this variant. The infection spread even to those who were fully jabbed AND wore surgical masks.

The Lancet Preprint, October 2021¹⁵ — This Swedish study found the Pfizer injection’s effectiveness progressively waned from 89% on Days 15 to 30, post-injection, to 42% from Day 181 onward. As of day 211, no protection against infection was discernible. Moderna’s shot fared slightly better, waning to 59% as of Day 181. The AstraZeneca injection offered lower protection than Pfizer and Moderna from the start, and waned faster, reaching zero by day 121.

BioRxiv September 2021¹⁶ — Six months after the second Pfizer shot, antibody responses and T cell immunity against the original virus and known variants was found to have substantially waned, in many cases reaching undetectable levels.

Journal of Infection August 2021¹⁷ — When the Delta variant was the cause of the infection, neutralizing antibodies had decreased affinity for the spike protein, while antibodies that worsen infection had increased affinity.

The Lancet Infectious Diseases November 2021¹⁸ — 26% of patients admitted to hospital with confirmed severe or critical COVID-19 were “fully vaccinated;” 46% had a positive COVID test but were asymptomatic, 7% had mild infection and 20% had moderate illness. So, among those who developed symptoms of infection, the majority ended up with severe or critical illness.

medRxiv August 2021¹⁹ — People with no previous SARS-CoV-2 infection who got the Pfizer shot had a 5.96-fold increased risk for breakthrough infection and a 7.13-fold increased risk for symptomatic disease, compared to people who had natural immunity.

Can COVID-19 Injections Promote ADE?

Over the course of 2020, many published studies highlighted the risk of antibody-dependent enhancement (ADE) following the COVID shots. For example, one October 28, 2020, paper stressed that:²⁰

“... vaccines designed empirically using the traditional approach (consisting of the unmodified or minimally modified coronavirus viral spike to elicit neutralizing antibodies), be they composed of protein, viral vector, DNA or RNA and irrespective of delivery method, may worsen COVID-19 disease via antibody-dependent enhancement (ADE).”

While we’ve not seen conclusive evidence of ADE yet, there are signs that point in that direction. Twenty years of research have demonstrated that making a vaccine against coronaviruses is fraught with risk.²¹ In fact, most previous coronavirus vaccine efforts — for severe acute respiratory syndrome coronavirus (SARS-CoV), Middle East respiratory syndrome coronavirus (MERS-CoV), respiratory syncytial virus (RSV) and similar viruses — have ended up triggering ADE.^{22,23,24,25,26,27}

What that means is that, rather than enhance your immunity against the infection, the vaccine actually enhances the virus’ ability to enter and infect your cells, resulting in more severe disease than had you not been vaccinated.²⁸ The 2003 review paper “Antibody-Dependent Enhancement of Virus Infection and Disease” explains it this way:²⁹

“In general, virus-specific antibodies are considered antiviral and play an important role in the control of virus infections in a number of ways. However, in some instances, the presence of specific antibodies can be beneficial to the virus. This activity is known as antibody-dependent enhancement (ADE) of virus infection.

The ADE of virus infection is a phenomenon in which virus-specific antibodies enhance the entry of virus, and in some cases the replication of virus, into monocytes/macrophages and granulocytic cells through interaction with Fc and/or complement receptors.

This phenomenon has been reported in vitro and in vivo for viruses representing numerous families and genera of public health and veterinary importance.

These viruses share some common features such as preferential replication in macrophages, ability to establish persistence, and antigenic diversity. For some viruses, ADE of infection has become a great concern to disease control by vaccination."

The 2014 paper,³⁰ "Antibody-Dependent SARS Coronavirus Infection Is Mediated by Antibodies Against Spike Proteins," concluded that monoclonal antibodies generated against SARS-CoV spike proteins actually promoted infection, and that overall, "antibodies against SARS-CoV spike proteins may trigger ADE effects," thereby raising "questions regarding a potential SARS-CoV vaccine."

So far, all Omicron cases have been relatively mild, but should it turn out that fully "vaccinated" people are developing severe disease while the unvaccinated don't, then that would be an indication that ADE is at play.

SARS Vaccine Shown to Cause ADE

An interesting 2012 paper³¹ with the telling title, "Immunization with SARS Coronavirus Vaccines Leads to Pulmonary Immunopathology on Challenge with the SARS Virus," demonstrates what many researchers now fear, namely that COVID-19 vaccines may end up making people more prone to severe SARS-CoV-2 infection.

The paper reviews experiments showing immunization with a variety of SARS vaccines resulted in pulmonary immunopathology once challenged with the SARS virus. As noted by the authors:³²

"Inactivated whole virus vaccines whether inactivated with formalin or beta propiolactone and whether given with or without alum adjuvant exhibited a Th2-type immunopathologic in lungs after challenge.

As indicated, two reports attributed the immunopathology to presence of the N protein in the vaccine; however, we found the same immunopathologic reaction in animals given S protein vaccine only, although it appeared to be of lesser intensity.

Thus, a Th2-type immunopathologic reaction on challenge of vaccinated animals has occurred in three of four animal models (not in hamsters) including two different inbred mouse strains with four different types of SARS-CoV vaccines with and without alum adjuvant. An inactivated vaccine preparation that does not induce this result in mice, ferrets and nonhuman primates has not been reported.

This combined experience provides concern for trials with SARS-CoV vaccines in humans. Clinical trials with SARS coronavirus vaccines have been conducted and reported to induce antibody responses and to be “safe.” However, the evidence for safety is for a short period of observation.

The concern arising from the present report is for an immunopathologic reaction occurring among vaccinated individuals on exposure to infectious SARS-CoV, the basis for developing a vaccine for SARS.

Additional safety concerns relate to effectiveness and safety against antigenic variants of SARS-CoV and for safety of vaccinated persons exposed to other coronaviruses, particularly those of the type 2 group.”

Higher Vaccination Rates, Higher Infection Rates

One trend that could be indicative of ADE is the fact that areas with higher vaccination rates have higher infection rates. If the shots prevented infection, it would be the opposite. The Waterford district in Ireland, for example, has a 99.7% vaccination rate, the highest in the country, but also has the highest daily COVID case load.³³

“ [G]overnments asked us for two weeks to flatten the curve to help prepare hospitals so that they can tend to surges and other non-COVID illnesses. We as societies gave our governments two weeks, not 21 months. ~ Paul Elias Alexander, Ph.D.”

And, for some reason, the U.S. COVID mortality rate is higher in 2021 than it was in 2020,³⁴ before the rollout of the shots, so clearly, they're not helping matters. As noted by Alexander in his Brownstone article:³⁵

“[G]overnments asked us for two weeks to flatten the curve to help prepare hospitals so that they can tend to surges and other non-COVID illnesses. We as societies gave our governments two weeks, not 21 months.

They failed to tend to the non-COVID illnesses, and we locked down the healthy and well (children and young and middle aged healthy persons) while failing to properly protect the vulnerable and high-risk persons such as the elderly ... This failure rests on public health messaging and government.

Additionally, what did our governments in the U.S., Canada, UK, Australia etc. do with the tax money for the hospitals and personal protective equipment (PPE), etc.? Hospitals must be prepared by now. Governments have failed! Not the people. The task forces have failed, not the people.”

Masks don't work. Lockdowns don't work. Shutting down small businesses and schools don't work. The COVID shots don't work. Yet with the emergence of Omicron, governments are reimplementing all of the same countermeasures that haven't worked for the past two years.

Insanity is doing the same thing over and over again, expecting different results. Yet that's what's passing for “science” these days. The answer to this madness is mass-noncompliance. We must peacefully reject these wholly unscientific and harmful “remedies.”

Subject: My input as a licensed mental health counselor

External Email

I stand opposed to mandatory vaccination of the COVID 19 vaccine. I am a licensed mental health counselor in Spokane County and many people are in distress over this vaccine. For many people it goes against their conscience and they do not trust this new vaccine. I believe it will be harmful to many people to have more mandates. I see that mandates related to covid and the vaccine are creating a mental health crisis with a sharp increase in anxiety and depression.

I believe passing something that requires people to inject a substance they do not want in their body is wrong, unethical and harmful to people. For people's mental health they need to have the right to make medical decisions for themselves.

I oppose and ask that you do not vote to pass vaccination requirements for covid 19.

Sincerely,
Lynnette Palmer

Dear Washington State Board of Health,

Our state government should NOT enforce emergency orders to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, or vaccination.

This detaining and possibly forcing medical treatment is an over reach by our local government. Medical decisions should be made between a person and their local medical provider.

Sincerely,
A WA State Citizen

tested?

5) Children are at very low risk of severe Covid symptoms and least affected by this virus. Some are asymptomatic and most have mild illness akin to a cold. Around 40% of the children who have died in the pandemic died WITH Covid and not FROM Covid. As of 1/6/22, according to CDC, there have been 823 deaths relating to Covid in the 0-18yo age group. There are approximately 73 million children in the US, so that would be a death rate of .001%. Does this percentage of risk outweigh the unintended consequences of vaccine injury and the unknown long-term effects that these vaccines can have on millions of children?

6) Natural immunity must be considered. In reading code WA 246-105-030 for other required immunizations "proof of acquired immunity" is acceptable in lieu of the child having the immunization, the way I read it. I implore you to acknowledge and accept natural immunity as valid protection for the child. It is irresponsible and nonsensical to disregard natural immunity.

7) Are you considering the side effects such as tachycardia, myocarditis, blood clots, etc. in children that are reported in VAERS? If not, why? Don't these cases deserve to be completely investigated before mandating any product be injected into ALL Washington children?

8) What are you doing to promote a healthy lifestyle for Washington residents? Why is there no mention of the importance of adequate vitamin D levels? This preprint states that we can, theoretically, get to zero deaths if the individual has a Vitamin D level of 50ng/ml or higher:

<https://www.medrxiv.org/content/10.1101/2021.09.22.21263977v1.full?fbclid=IwAR22o3DoenTSQT3C9DU>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F>

I implore each of you to both think critically and act ethically here. Parents are watching and we will stand up for what we think is fair and just when it comes to our children's health. Our children have suffered greatly these past two years due to policies that were not backed by science. We have had enough. Having these vaccines available to children is one thing; mandating these vaccines is another and makes no sense.

I'd be happy to talk more in depth about any of the above should you be interested. If there is anything I stated that is inaccurate, I welcome you to correct me with backup data. My phone number is listed below.

Thank you for your time and your attention.

Sincerely,
Jennifer

Official Representative that was voted IN to Product and Defend the Liberties of Our State,

I oppose the Communicable and Certain Other Diseases Rule.

I am completely against any of the proposed Covid Policies that are over reaching and immoral. I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

Additional comments:

(20) "Medical treatment" or "treatment" means the treatment for curable diseases and treatment that causes a person to be unable to transmit a disease to others, based on generally accepted standards of medical and public health science.

With regard to COVID, the vaccines are failing to cause a person to be unable to transmit a disease to others. And "generally accepted standards of medical and public health science" are controversial at best, and at worst are determined by large pharmaceutical companies controlling funding for research and spending more money lobbying than on research. They have no liability for so-called vaccines, they provide misleading poorly designed short-term unblinded research, they have had to pay large settlements for committing fraud, and they are focused on profits at the cost of human lives. Is experimental vaccination that carries risk of death and permanent harm the "treatment" you are proposing?

Isolation" means the separation((, for the period of communicability or contamination,)) of infected or contaminated persons or animals from others ((in such places and under such conditions as)) to prevent or limit the ((direct or indirect)) transmission of the infectious agent or contaminant from those infected or contaminated to those who are susceptible to disease or who may spread the agent or contaminant to others.

Now why would you propose removing the provision that specifies the period of isolation?

(13) "Health order" or "order" means a written directive issued by the state or local health officer that requires the recipient to take specific action to remove, reduce, control, or prevent a risk to public health.

Considering that health orders could include specific action (presumably including vaccination), and that so-called COVID vaccinations are currently available under emergency use authorization (and not approved) and are being administered without informed consent, you should be on notice that this revision puts your "health officers" in the position of further subjecting people to medical experiments. Is that what you're desiring to achieve? Involuntary participation in human medical experimentation? Is the resistance to your attempt at one-size-fits-all mandated vaccination so great that you must resort to these measures?

WAC 246-100-045 specifies "competent medical care" and there is already a great shortage of that. How would you propose ensuring competent medical care?

I don't have time to continue picking this thing apart, but it appears to be an attempt at inappropriate and inadvisable overreach. How would you propose implementing these WAC provisions? The potential for human rights violations, civil rights violations, discrimination, government overreach, and similar harms far outweigh any of your fabricated benefits in this poorly handled COVID crisis that has already been made exponentially worse by the way it has been mismanaged by public health authorities.

Under these provisions, it appears it would be easier to detain someone for having symptoms of the common cold than it would be for a victim of domestic violence to get a restraining order. Even mentally ill persons at risk of causing harm to themselves and others must be allowed a medical exam and have a court order for involuntary medical treatment. Quit trying to impose your ineffective and dangerous pharmaceutical products on adults and children who do not want them and who recognize that there are safe and effective alternatives.

If you're going to mandate anything, you should mandate that your public health officers and authorities read "The Real Anthony Fauci: Bill Gates, Big Pharma, and the Global War on Democracy and Public Health". The author welcomes debate and any sincere scientific challenges or updates to the thoroughly researched content.

I imagine some of you believe you are acting in someone's best interest, but you are merely doing the bidding of Big Pharma while failing to represent the people and protect

our democracy.

A Very Concerned Washingtonian Constituent !!

Thank You and Blessings, Michael Johnson

I absolutely oppose making the covid vaccination mandatory.

I suggest you review what the CDC has recently stated: that the vaccinated are able to transmit covid, as well as still contract covid. Healthy unvaccinated people, despite the media hype, are not the enemy. Vaccinated people are still getting ill, and are still requiring more and more and more boosters because of the lack of efficacy of these experimental vaccines over the long term.

There are inalienable rights, still fortunately, in our republic. I have the right to protect my body from experimental vaccines, one of whose creators has been allowed to seal its vaccine records for 75 years and whose patient insert on contraindications, etc. was left blank in clear violation of the law. Shouldn't every health department in the United States be challenging this? Have you personally asked yourselves this question? If not, why not?

I assume you have delved deeply into the VAERS site and noted the tens of thousands of adverse events. I have, and I reserve the absolute right to refuse to take an experimental vaccine shown to have adverse events far in excess of what normally would be permitted for a new drug.

Finally, passing this mandate will make me, an utterly law-abiding citizen for all of my life, into a criminal. How many citizens of this state do you want to make into a criminal?

How brutally are you willing to punish me because I have reserved the right to control my own body? Will you fine me more and more? Will you haul me off to a camp because how else can you control me? Will you send swat teams to forcibly inject me in my home? Will you refuse me health care because I'm not vaccinated? Will you stop me from going into a food store? How far are you willing to let your brutality go?

All tyrants have said the same thing, "We know better than you do about your own self, so you have to do what we say. WE control your body, not you."

How much of a tyrant will you find yourself becoming, subtly, step by step, always talking yourself into the myth that you know best for all others and it's okay to harshly punish people because it is for our own good?

I will be watching your upcoming discussion next Wednesday and noting what each of you is saying to yourself and to each other.

As a Mother in WA state, with two young children, I do not feel vaccine mandation is the correct path to take.

I worry for my children's safety, for their health, for their overall well being and forcing my child to place an unneeded substance into their body, against their will, is COMPLETELY UNNECESSARY AND WRONG.

WHERE IS THEIR FREEDOM IN THE SAY?

Their little bodies need to develop and grow and learn on their own, naturally.

Sickness happens- regardless if you're vaccinated or not, you will still get sick.

Let people decide how they care for THEIR OWN BODIES by themselves.

Thanks for taking the time to read my comment.
Don't have a good day, Have a great day!

Subject: Re: Mandatory Vax and Forced Quarantine - WA State

External Email

My wife and I would like to display our dismay.

First off. Shame on you.

You will not be remembered as the saviors who helped contain COVID. NOBODY WILL. What you will be known for is putting the first law abiding innocent Washingtonians into a government funded and operated building against their will since the WWII Japanese internment camps. This will not stop COVID. Nothing will. We as Americans will get through this without you. We will protect our friends and family and hold them close. You will stop trying to protect us and let us protect each other. You (the government) will not stop COVID. History tells me that and you (the government) is going down a very wrong and familiar path that history has played out a thousand times over. Spoiler alert, it doesn't end well for the government and especially doesn't end well for the governed. After this forum, go home and hug your family and know that there are good people (like yourself) that will be taken away from their families if you pass this.

My wife wrote this part and you should it read it twice.

It is beyond terrifying to think our government believes they should have the right to involuntarily detain a person or their family to an isolated facility under any conditions. It is also UNACCEPTABLE that this would give SOMEONE the power to make this decision at their discretion based on a person lawfully choosing NOT to comply with medical examination, testing, treatment, counseling and vaccination. This tactic could ultimately be a threat to force people into making a decision they WOULD not choose unless being threatened with a consequence. Thus, there is no law protecting the person on when and how they can leave these quarantine "facilities" on their own accord and putting their daily lives and responsibilities in jeopardy.

I would also like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State. Below is supporting information that has been helped to be drafted by others that share the same views on me. THIS IS WRONG. Taking away a parents right or forcing them to make a decision that could detrimentally impact their child is unacceptable.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org)

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>
>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>
>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

To whom it may concern,

I am absolutely against any of the proposed covid policies that are overreaching and against my religious freedoms and autonomous rights.

I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

It is absurd to think anyone should be forced to receive a vaccine that does NOT prevent contracting the virus nor spreading the virus. It is absurd to mandate a vaccine when Covid-19 has a low fatality rate. It is absurd to mandate a vaccine when most age groups, specifically children, do not have a high risk of serious illness due to Covid-19.

It is up to the PARENTS whether or not an emergency vaccine should enter any minor. There are zero long term studies of the side affects (due to the vaccine being new) of this vaccine which should worry any health department. All long term expectations of the vaccine are speculative and therefore should not be regulated for anyone. No child should be subjected to an experiment. Especially a mandated experiment.

To whom this may concern : if it is true that I am hearing that you guys are considering taking people into custody and putting them in places to isolate them when they refuse to vaccinate or do as you're telling them, this will bring mass rioting and chaos amongst the population like you've never seen before. People will defend themselves with weapons and you will be 100% liable for those actions.

This has gotten completely out of control! The vaccinated people are still getting sick and still spreading the freaking virus. It is absolutely comical and asinine at this point. There is nothing wrong with medical choice! The mere fact that the government has taken it away from people, is the reason people are fighting back. You are trying to make a communist country and control the mass population. It won't work!

And as far as vaccinating my children in public schools I will not, repeat this, I WILL NOT COMPLY to this madness!!!

If anything, we need to fear the vaccinated ! They are the ones that are getting sick and spreading it right now. Even the vaccinated ,who have now become sick with Covid, are seeing that it is not working and they are taking back all of the words they ever used against the unvaccinated because now they are nothing different than the unvaccinated. Stop trying to control this country! Give the freaking people their jobs back, leave our freaking kids alone, and get the hell on with business in this country so our economy can go back to normal. You are not God and nobody will never come near me or my children , or I will defend myself! I fear for those who would be given those jobs to take people in and force isolation... good luck!

Stop threatening and bullying this country! We're sick of it!

I would like to express my extreme opposition to the implementation of a COVID 19 vaccine requirement for schools in Washington State. These policies are overreaching and immoral. I stand against these proposed WAC's.

246-100-070

246-100-045

246-100-040

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fprotect-us.mimecast.com%2Fs%2FcHiLC5yWqqtZo0JYpfyn0pC%3Fdomain%3Dchildrenshealthdefense.org&data=0>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long-term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fprotect-us.mimecast.com%2Fs%2FJM-2C680rrTrEoNI0T5oTUF%3Fdomain%3Damericasfrontlinedoctors.org&data=04%7C01%7CNathaniel.Thai%](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fprotect-us.mimecast.com%2Fs%2FJM-2C680rrTrEoNI0T5oTUF%3Fdomain%3Damericasfrontlinedoctors.org&data=04%7C01%7CNathaniel.Thai%20)>)

Dear Committee:

Your decision regarding vaccine requirements for children should be based on facts and clinical studies without bias. Studies show that teens and children statistically have 0% risk of death from Covid. On the other hand, studies prove that these vaccines do pose serious and unacceptable risk from inflammation of the heart muscle, hypoxia, predisposition to auto-immune diseases, etc.

I am sure you know the above and have been inundated with much information. PLEASE do not mandate vaccines for young people. Those decisions should be left to parents after they have been thoroughly informed of risks. Let parents parent! Do NOT overstep your role.

Thank you,

I believe that as a U S citizen I have the right to choose what is best for my body. It is unfathomable that Washington State is considering threatening the basic rights of it's citizens with forced COVID vaccinations and quarantine camp suggestions. There are religious and medical reasons why the vaccine does not work for everyone and it destroys the principles of medical privacy and informed consent to force mandates of this vaccine because it is explicitly illegal and explicitly inconsistent with the Nuremberg Code.

I am completely against any of the proposed Covid Policies that are over reaching and immoral. I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

I believe in freedom of health choices!

Sincerely,
Marsha Rusca

To those that will listen: what happened to my body my choice, or parents' making choices for their children because they're not old enough to be informed and think like an adult? There has been so much damage done to the trust of public office and those in it. This kind of law will just pour fuel on the fire. I know that's this is supposed to be for the common good but if you remove choice or freedom in the matter you better be ready for the consequences!

By enacting this law the state board of health is ignoring the serious side effects of the vaccine. This is apauling! I expect more from our officials.

☐ Goodafternoon,

I am writing this because I am completely against any mandate for this experimental vaccine. It should not be mandated to keep your job, go to school, or live your life. In America we should have medical choice and freedom. Washington state is taking that away from its citizens. I personally will never put my kids into public school due to ridiculous mandates on the school system. My family and I will be leaving Washington state if these wacs go into affect. I was fired from the state patrol due to the ridiculous mandates Governor Inslee put on the executive employees. This is unconstitutional! Washington state is going to continue moving down hill unless people make changes! I do not agree with any of these wacs! You will have a very difficult time having law enforcement enforce these mandates! Citizens of Washington are tired of the over step when the vaccine is not working to prevent the spread of Covid!

Children cannot benefit from COVID-19 injections, seeing how they only have a 0.005% risk of death in the first place. Healthy children have died shortly after the jabs and dozens of cases of heart inflammation have been reported. By requiring vaccines for children, they would be taking all the risk and receive no benefit. Since when, in the history of public health, have children been sacrificed to protect the sick and elderly? Public health authorities have completely reversed the conventional risk/reward analysis.

Omicron is the new majority variant and its mutation evades the COVID-19 vaccine making the vaccine redundant. Why expose children to possible side effects that could be physically debilitating and again, receive no benefit? There are no long-term safety studies regarding these vaccines, they do not stop transmission of the disease or prevent the disease. Why are we considering putting our children at such risk when they receive no benefit? This is truly unethical.

I am writing to inform the Board of Health that I oppose any expansion of WAC 246-100, I oppose adding COVID-19 to the WAC 246-105-030 list of vaccinations required for children, and I oppose the proposed modification to Local Boards of Health, as proposed in WAC 246-90.

Specifically on the Opposition to Expansion or Enforcement of WAC 246-100; I oppose any Board's strengthening or expansion of WAC 246-100, specifically WAC 246-100-040, Procedures for Isolation or Quarantine as such restraints violate the US and State of Washington Constitutions and violate personal liberties. The fact that you are even contemplating changes that are not constitutional in our state, in our country, is incomprehensible; that should be obvious, right?

Even more strongly I oppose adding COVID-19 to WAC 246-105. Vaccinating against an endemic flu-like virus is an individual and parental decision - it is a personal liberty to say 'yes' or 'no'. Especially given that the current EUA'ed vaccines' effectiveness remains questionable, at best, with clear evidence of risk with vaccinating children. For instance, VAERS data indicates nearly 28,000 adverse events for children aged 0-17, (<https://medalerts.org/vaersdb/findfield.php?TABLE=ON...>), including 55 deaths in that age group (<https://medalerts.org/vaersdb/findfield.php?TABLE=ON...>).

In context the United States has experienced 823 deaths within the 0-18 year old category in US since the onset of the pandemic (<https://data.cdc.gov/.../Provisional-COVID-19.../nr4s-juj3>).

There is no clear indication that the EUA'ed COVID-19 vaccines will do more good than harm for the children of Washington. Further, this proposed Rule raises the question that if minors are harmed from the COVID-19 vaccine, who will take responsibility? Are you willing to be personally liable for any injured minors? Are you willing to bet the hard-earned money of the constituents of Washington to fund liability/compensation funds? I oppose adding COVID-19 to WAC 246-105-030 (or any other section of WAC 296-105) or requiring COVID-19 vaccine for children.

Sincerely,
Janelle DeYoung

To all listening, thank you. This is surely a trying time in your position. I am not one to write in and voice my opinion. I do not have an activist soul, and I strive for neutrality and open mindedness. Different perspectives is part of what makes the world beautiful. I am not anti-vaccine. I believe each individual is built off their own past experiences and current life circumstances. Honoring that is to give an informed choice. I will only comment to the fact that all information out has opposing information. We have a strange collision of insecure and over confident citizens and it's exhausting to even choose your choice. I haven't lived in fear since the beginning - a choice I often make in all areas of my life. Today I fear. I fear for a great divide. When you make erratic moves it cause a ripple effect of other erratic moves. Proposing the use of force on one's health and body is erratic. These codes will not change heads into getting the vaccine if they have not. It will push them further away. Children who aren't old enough to develop strong opinions on adult subjects are taking on the characteristics of the radical reactions from their parents. They are bringing it to playgrounds and causing a great divide there. How can be able to choose a legal do not resuscitate order for our health care but are facing a state that can use force to give you a vaccine? I fail to see an end. Will we be forced to get each continuing booster indefinitely? Families will be ripped apart just because we weren't all born with the same comfort level and biology. Friendships strained. Peace will be forgotten. Mental health has been given it's long overdue spotlight over the recent years and I believe it's time to make it an important factor. Children need innocent environments. They need stable, love thy neighbor kind of leaders teaching them and caring for them. The proposed actions that belong to these new policies encroaches past physical health and I don't believe it is worth it when you consider all of the factors, and ask what the true success rate of this would be. The COVID vaccine is more likened to a flu vaccine. Reoccurring, evolving, and has never been required to get an education. This isn't asking parents to make a choice for a one/two time dose like the actual required vaccines. The mama bears of the world become more paralyzed in decisions than ever with information/misinformation floating around. Deciding for them will not result in a happier safer community but quite the opposite. Choose an vaccine education plan first. Choose peace whenever possible. We have unfortunately established distrust in today's society already. Keep the campaigns, get creative about the cause believed to be best, there are other ways. No one has ever found peace and felt safety by force. I'm asking you to think deeper. Keep the kids in school. Let them be able to focus on education instead of vaccine status. Let parents be the parents because with all due respect, NO ONE loves a child more than their parents, and we are all genuinely doing what we feel is best. In short, I am begging you, for the sake of seeing us as whole humans and not bodies. - For the sake of Washington learning to love and trust again. - For the sake of our next generation, and for the sanctity of Freedom, do not put these proposed policies into place. Appreciating your time, attention, and hopefully your heart.

With all I have,

Concerned Washington Citizen

External Email

To the Washington State Board of Health with Respect;

I am writing this to you as a concerned citizen and parent of 3 school age children, 13 and 5 year old boys and a 10 year old girl. I am writing to oppose any and all mandates for children AND adults that will require COVID-19 vaccination to be a part of regular society. The position that is being taken by the government is so far out of its jurisdiction it is blatantly violating rights of the American People.

As a parent, and learned citizen of this country, I have the ability and medical freedom to judge the risks associated with the COVID-19 vaccine. My many months of research has concluded that it is far more harmful to the health and safety of my family to receive the COVID-19 vaccine, than to risk infection for a second or third time. As such, I will not tolerate, be forced or coerced into jeopardizing the health or safety of our family to a vaccine whose long term side effects are unknown and whose short term (reported and CDC listed) side effects can have adverse reactions such as myocarditis, pericarditis, and lesser known, but scientifically proven reactions such as blood clotting, heart attack, loss of sensation or overstimulation sensation to body, severe to acute respiratory problems – and the list could go on to even include death.

My goal, which should be the same as the law makers, policy makers and elected officials/representatives is to protect my family from harm. Mandatory, forced or coerced vaccinations are in direct opposition to that goal. While vaccinations themselves are not a new requirement, I would like to point out that existing required vaccines have had extensive time and resources for development and proper trials and testing. They were not subject to hiding of the side effects of many who received the vaccine and/or squashing other viable treatment options, simply because they do not go along with the narrative of the Big Pharma companies and agenda of the CDC. As a parent I see the rushed production of the vaccine, propaganda, silencing and shaming of people of differing points of view, as misguided attempts to do "something" rather than risk being prudent and accused of doing "nothing".

My answer to forced mandatory vaccination for COVID-19 is NO, it will continue to be no until safety, efficacy equal to that of natural immunity is prove. Please do the right thing on behalf of the citizens of this great state, furthermore this great Nation and DO NOT mandate a COVID-19 vaccination.

Respectfully,

Kaycie Nelson

Greetings,

I am writing to express my deep concern and opposition to the requirement of covid vaccinations for school children/students to attend public school. All research to date points to low risk amongst children with regards to infection, transmission, AND recovery, and this "vaccine" is only approved for emergency use authorization.

As a parent, it's vital that our government remembers and honors their position in office and our position in the home when it comes to making the best possible decisions for our families.

Thank you.

Subject: Mandatory Vax and Forced Quarantine - WA State

External Email

My childhood mentor just died in reaction to the vaccine.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school

Subject: Mandatory Vaccine mandate for Children of Washington State childcare and school admission

External Email

Attention Washington State Board of Health Members,

I respectfully submit this letter to you as a concerned parent regarding the vaccine mandate for school age kids.

Covid shots should absolutely NOT be required for our children! Children are at extremely low risk for Covid and the vaccines are still only emergency use authorization. I demand the Washington State Board of Health refuse to make Covid vaccination shots mandatory for children of Washington State childcare and school admission for the following reasons:

1. Covid vaccines remain under emergency use authorization.
2. Children under the age of 18 have a 99.995% survival rate from covid infection.
3. Children have a higher chance of death or adverse reactions to covid vaccines than Covid 19.

Sincerely,
Julie Robertson
Tumwater

I strongly oppose #9, and #11 of the proposed policies for forced vaccinations for children's without consent of the parents.

Detaining kids? Splitting up families?

The FDA said that natural ammunition is 13 times more effective than the vaccine.

I am saddened that the state is not using the data on the FDA site to guide public health policy.

The state can make a law, fine, and we will see you in court.

It's these kind of illegal, ignorant, silly, anti-science proposals that make our state the laughing stock of the US. Concentration camps! Are you kidding me. What a laughable joke. Forcing experimental vaccines on kids that have a 100% recovery rate. It's so absolutely uneducated, that it's utterly laughable.

To Whom It May Concern,

As a citizen of Washington State and a parent. I ask that you oppose any revision to WAC 246-100 and WAC 246-105 as it relates to COVID-19 virus.

1. The vaccine is currently under emergency use authorization. Such vaccines should not be a requirement.
2. With the current omicron variant we see that the vaccine is not effective. It is unclear on the vaccine effectiveness moving forward because this virus is changing so quickly with new variants
3. Kids are low risk when it comes to COVID-19. From my own experience I have had COVID with symptoms and my three children that live in the same home were asymptomatic or did not get it at all.

Thank you for your consideration.

As you consider school vaccination mandates at your meeting on the 12th it is my hope that our constitution and our private rights will not be overrun in the process.

Although I myself am fully vaccinated and encourage others to do the same the possibility that this could be mandated, especially to our children, in order for them to attend public school is unacceptable.

Is it fair to assume that "my body, my choice" applies to vaccinations or is that logic saved for aborting babies?

I have confidence in individuals to make good choices for their health and truly believe that if this issue had not been brought forth with such a heavy handed approach that science and logic would have led to better acceptance of the vaccine.

Thank you for considering these thoughts as you meet next Wednesday.

External Email

Good Afternoon Mrs. Hoff,

As a parent I have gathered and watched for information regarding the Covid vaccination and results on children and I implore you to STRONGLY OPPOSE any recommendation to require Covid vaccination for school aged children. Are you not aware that now there are now 16,000 physicians and medical scientist around the world who have signed a declaration publicly declaring that healthy children should NOT be vaccinated for COVID-19? Please read this declaration:

WE, THE PHYSICIANS OF THE WORLD, united and loyal to the Hippocratic Oath, recognizing the imminent threat to humanity brought forth by current Covid-19 policies, are compelled to declare the following:

WHEREAS, after 20 months of research, millions of patients treated, hundreds of clinical trials performed and scientific data shared, we have demonstrated and documented our success and understanding in combating COVID-19; WHEREAS, in considering the risks vs. benefits of major policy decisions, thousands of physicians and medical scientists worldwide have reached consensus on three foundational principles; NOW THEREFORE, IT IS:

RESOLVED, THAT HEALTHY CHILDREN SHALL NOT BE SUBJECT TO FORCED VACCINATION (view supporting evidence

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdoctorsandscientistsdeclaration.org/evidence%2F%23children&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C131dda31b2a64312b8>
>)

* Negligible clinical risks from SARS-CoV-2 infection exist for healthy children under eighteen.

* Long term safety of the current COVID vaccines in children cannot be determined prior to instituting such policies. Without high-powered, reproducible, long term safety data, risks to the long-term health status of children remain too high to support use in healthy children.

* Children risk severe, adverse events from receiving the vaccine. Permanent physical damage to the brain, heart, immune and reproductive system associated with SARS-CoV-2 spike protein-based genetic vaccines has been demonstrated in children.

* Healthy, unvaccinated children are critical to achieving herd immunity. Natural

immunity is proven to tolerate infection, benefiting community protection while there is insufficient data to assess whether Covid vaccines assist herd immunity.

RESOLVED, THAT NATURALLY IMMUNE PERSONS RECOVERED FROM SARS-CoV-2 SHALL NOT BE SUBJECT TO ANY RESTRICTIONS OR VACCINE MANDATES (view supporting evidence

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdoctorsandscientistsdeclaration.org/evidence%2F%23recovered&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C131dda31b2a64312b8e308d9d470>
)

- * Natural immunity is the most protective, and longest-lasting solution against the development of COVID-19 disease and its more serious outcomes.

- * Naturally immune persons are at the lowest risk of transmission, thus should not be subject to travel, professional, medical or social restrictions.

- * Natural immunity provides the best source of herd immunity, a condition necessary for eradicating the Covid virus.

RESOLVED, THAT ALL HEALTH AGENCIES AND INSTITUTIONS SHALL CEASE INTERFERING WITH PHYSICIANS TREATING INDIVIDUAL PATIENTS (view supporting evidence

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdoctorsandscientistsdeclaration.org/evidence%2F&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C131dda31b2a64312b8e308d9d470>
)

- * Early intervention with numerous, available agents has proven to be safe and effective, and has saved hundreds of thousands of lives.

- * No medicine already given regulatory approval shall be restricted from “off-label” use, particularly during this global humanitarian crisis caused by a rapidly mutating virus, which requires quick to adopt treatment strategies.

- * Health agencies shall be prohibited from interfering with physicians prescribing evidence-based treatments they deem necessary, and insurance companies must cease blocking payments for life-saving medicine prescribed by doctors.

RECOMMENDED LEGISLATIVE OR EXECUTIVE ACTION:

We believe that violating any of these three principles unnecessarily and directly risks death to our citizens. We hereby recommend the leaders of states, provinces and nations legislate or take executive action to prohibit the three practices described above.

And if that weren't compelling enough to STRONGLY OPPOSE Covid vaccination for children, please read this statement by Dr. Robert Malone who himself is even vaccinated for Covid and generally pro-vaccination! Dr. Malone is an internationally recognized scientist/physician and the original inventor of mRNA vaccination as a technology. I would believe that his statement should be a powerful insight and trusted source of information. Please read his very own statement below:

My name is Robert Malone, and I am speaking to you as a parent, grandparent, physician and scientist. I don't usually read from a prepared speech, but this is so important that I wanted to make sure that I get every single word and scientific fact correct.

I stand by this statement with a career dedicated to vaccine research and development. I'm vaccinated for COVID and I'm generally pro-vaccination. I have devoted my entire career to developing safe and effective ways to prevent and treat infectious diseases. After this, I will be posting the text of this statement so you can share it with your friends and family.

Before you inject your child - a decision that is irreversible - I wanted to let you know the scientific facts about this genetic vaccine, which is based on the mRNA vaccine

technology I created:

There are three issues parents need to understand:

The first is that a viral gene will be injected into your children's cells. This gene forces your child's body to make toxic spike proteins. These proteins often cause permanent damage in children's critical organs, including

- * Their brain and nervous system
- * Their heart and blood vessels, including blood clots
- * Their reproductive system, and
- * This vaccine can trigger fundamental changes to their immune system

The most alarming point about this is that once these damages have occurred, they are irreparable

- * You can't fix the lesions within their brain
- * You can't repair heart tissue scarring
- * You can't repair a genetically reset immune system, and
- * This vaccine can cause reproductive damage that could affect future generations of your family

The second thing you need to know about is the fact that this novel technology has not been adequately tested.

- * We need at least 5 years of testing/research before we can really understand the risks
- * Harms and risks from new medicines often become revealed many years later

Ask yourself if you want your own child to be part of the most radical medical experiment in human history One final point: the reason they're giving you to vaccinate your child is a lie.

- * Your children represent no danger to their parents or grandparents
- * It's actually the opposite. Their immunity, after getting COVID, is critical to save your family if not the world from this disease

In summary: there is no benefit for your children or your family to be vaccinating your children against the small risks of the virus, given the known health risks of the vaccine that as a parent, you and your children may have to live with for the rest of their lives. The risk/benefit analysis isn't even close.

Subject: Mandatory Gene Therapy Shot

External Email

Board Members,

I plead with you to vote no on the subject of mandating vaccines in schools, specifically the Covid 19 EAU gene therapy program. Children are the least population to be at risk. I believe, after seeing the effects it is having on children to date, that this gene therapy is much riskier than covid for any child. Please read all of the emails you are receiving and hear from the people of Washington State. Please vote no, for the health of our children.

External Email

To the Washington State Board of Health:

Good morning,

Being a current active practicing Veterinarian in this state that also worked in the WSU and USDA virology and entomology laboratories, the concept of" vaccinating" children with vaccines that are still not FDA approved is a very serious thing. (Yes, I have studied this subject.)

As you know, this making unapproved/experimental vaccinations is in direct violation of Nuremberg Codes – see code 6 section 3 as one example.

Please deeply study the current CDC VAERS information – this is deeply concerning. In the animal health world, these vaccines would have been removed from the market long ago.

Thank you for reading,

Mardell E Ryan, DVM

I have huge concerns with both items 9 and 11. Not only are they draconian, they're illegal and divisive. DOH has no business enforcing a health procedure on people that don't want it. I will yank my kids out of public education and move out of this state if either of these measures is enacted. You will see a mass exodus out of this state, which will derail its economy.

Subject: Mandatory vaccines for kids

External Email

I am writing to ask you to please not make COVID vaccines a requirement for school and daycare admission. If you look at the data, children are not at risk for serious COVID illness and there's no reason for there to even be an EUA vaccine for kids available. This vaccine has not gone through proper testing which is why it's still only authorized under emergency use. There are no available approved vaccines for the same reason. Since the vaccine was made available to kids there have been many "mysterious" child heart attacks, heart conditions and deaths. There are serious risks that come with this experimental vaccine.

Please, please don't hurt the children. Look at this with an open mind. Even if you believe in the vaccine, think about what they are doing. They are banning medicine and treatments that work to treat COVID and they push this vaccine like crazy. They even bribe, coerce, and force it upon people. None of this makes sense.

I am emailing you about trying to Mandate the shot.
These are in emergency use authorization still.
They are NOT Safe. They have been proven to NOT be safe though.

There is no long term effects on these.
Not a single person can tell you what is to come of these. Not to mention that Bill Gates and Fauci are being Sued by numerous companies and people for "Crimes Against Humanity"

We are free beings and have the right to choose what we do with our bodies! Some people have health conditions and don't want foreign substances put into their systems. Some people have Religious beliefs also that they don't want the shot because of what it does to your DNA.

Some people have done extensive research and listened to many doctors, scientists, parents, nurses and everyday people speaking up about the harms of these shots.

These children also should not be forced into getting this shot.

This is ILLEGAL to force people into getting these. This is Medical Rape.

And we have the Freedom to choose what we do with our own bodies.

We have Rights.

Period!

Thank you.

Seems to me if we are following science at me if we require other vaccinations to be required for public schools then this should be no different.

We are dealing with an ever changing virus that is highly transmissible and depending on your vaccination status can kill you or leave you with life long impacts.

Why would we not require the vaccinations for our children to be in the classroom? Isn't this what parents wanted...kids in the classroom? Then there should be a choice to make. Vaccinate or not. If you did not have your child fully vaccinated then they would not be allowed in class. The Covid vaccine should be required for all kids in the public schools.

Thank you
Jennifer Foronda

Subject: Meeting notes January 12

External Email

I am writing to contribute comments to the January 12 Board of Health meeting, which includes the proposal to include Covid 19 injections as part of school immunization requirements. I oppose this proposal for the following reasons:

1. Lack of vaccine efficacy.
2. There are no long term studies on side effects.
3. Risk of myocarditis. Which continues being trivialized as a side effect. However, it too has never been seen in children, therefore we do not know its long term side effects either. Myocarditis causes scar tissue that can lead to heart failure years later.
4. Coercion and censorship shouldn't be the necessary tools to get people vaccinated. The proof should be in the data.

5. VAERS deaths and adverse reactions are the highest they have ever been, a clear indicator there are inherent risks of taking the vaccine. When looking at a child's risk from covid vs the vaccine, there is not a clear reward profile.

6. The risk of thrombocytopenia. As detailed by this mother in Seattle, who was forced to take the vaccine in order to participate in her children's school, and tragically passed away. [https://obits.oregonlive.com/us/obituaries/oregon/name/jessica-wilson-
obituary?id=24814165](https://obits.oregonlive.com/us/obituaries/oregon/name/jessica-wilson-obituary?id=24814165)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fobits.oregonlive.com%2Fus%2Fobituaries%3Fid%3D24814165&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C8aa31289fe8a43c2401308c>>

7. Overall mistrust in how this pandemic has been handled and why there is such a myopic push for vaccines by governmental bodies. The same people who told everyone you wouldn't get covid if you were vaccinated, that it was stopping transmission. The narrative has continued to evolve with no established science base. There has been no emphasis on treatment, monoclonal antibodies weren't encouraged during the wave of Delta, when they were shown effective. There has been a constant complaint of overwhelming the medical staff, yet anyone who chose not be vaccinated was fired, further depleting the workforce. There has also been no expansion of our medical facilities or covid units after two years. At this point it is clear there needs to be a transition from attempting prevention to treatment.

Covid is not a one size fits all approach. There is a clear patient profile that is severely impacted by this disease. The decision for a child looks much different then that of an 80 year old with diabetes for example. I am so passionate and steadfast in my opposition to mandating the vaccine for children to attend school, that I am prepared to move out of Washington state if this is enacted.

Hi,

I am voicing my concern in regards to possible covid vaccine mandate for our children. I am a mother of 3 children under 11 years and it should be my right to choose which vaccines are best for my them. Mandating Covid vaccines equate them with standard childhood shots against polio, chickenpox, TDaP, and MMR. But those decades-old vaccines have gone through the full FDA testing regime. The Covid vaccine has received only emergency-use authorization for this age group, meaning its safety and efficacy have not yet been established to the FDA's satisfaction. The Covid-19 vaccines are too new to have been studied for long-term effects. Young children face very low risk from Covid-19 and children pose no threat to anyone if they have natural immunity. I believe we should have the freedom to choose what's best for our children, not the government. Thank you!

Sincerely,
Lilian Ng

i feel strongly that it is unnecessary to make COVID-19 vaccination mandatory for school admission and childcare. Children are at a very low risk for COVIC. The vaccines are still only EUA and there are no long term studies to document any history of safety. Studies now document that the vaccinated and unvaccinated can both transmit Covid, therefore the vaccine does not stop the spread of the disease.

Thank you for your time,
Laurie

From: Janet Scully <jscully712@gmail.com>
Date: January 7, 2022
Subject: Mandatory Covid Vaccines

Ladies and Gentlemen,

I am writing to let you know that I am absolutely against any involuntary detention and/or quarantine! This is enough! COVID is a flu or a cold that is highly contagious, I get that, but the death rate and the rate at which people are hospitalized does not constitute this type of overreach by you and/or anyone else. The Constitution gives you no authority to issue mandates.

We, as citizens, are perfectly capable of making our own decisions about our healthcare. Especially when the vaccination doesn't even prevent you from contracting the virus to begin with. This isn't even rational thinking to consider this type of response. Not to mention that the vaccination is not even FDA approved. The one that is FDA approved isn't available anywhere and all those that are being offered are still under an Emergency Use Authorization.

I am also expressly opposed to the mandatory vaccination of children. There are a number of overwhelming reasons NOT to vaccinate children, but three that come directly to mind are:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

I will definitely be joining the Zoom call next week, but wanted to get my opposition in on record before the meeting.

Thank you for your time and consideration.

Janet Scully

Good afternoon, i was writing to express my disdain for your upcoming agenda to do with involuntary quarantine as an agenda item although i see it's been pulled down now, i can only assume to limit interest in participating in the zoom meeting. Just know that i find it foul and disgusting. Especially when i see other states and countries flourishing through this pandemic and staying open yet Washington state is fighting New York and California to be literally the most communistic right under our nose. Point in fact Nancy Pelosi wanting to move to Florida after retiring from Congress or congresswoman Ocasio Cortez maskless, hugging fans in Florida. Clearly your move in trying to lock Washington down harder and employing internment camps as a way to curb covid is nothing more than a power grab for politics and not actually about public health! How about addressing children eating outside in 38 degree weather as being child abuse!! Thanks for your time, I'm sure this email gets deleted but I've said my piece although i could go on!!! I'm not a conspiracy theorist but if a level headed person like me is mad, i can imagine what all these right wing conspiracy buffoons are thinking.

Thanks for your consideration

Sincerely
Justin Green

The vaccine should absolutely NOT be mandated to our children. We should have the right to accept the risks with COVID-19 AND NOT be subject to a emergency vaccine that is not FDA approved nor provides adequate protection against the spread or contraction of Sars-2. Let the parents choose what is best for our children!

I am appalled that you are actually considering requiring experimental vaccines for children in Washington state. Have you not been following the adverse reactions to the Covid vaccines for children. I am a registered nurse and have been following the VAERS. The true numbers are showing 1 out of 70 16-30 year olds in Israel which are 90% vaccinated are ending up with Myocarditis and pericarditis. Are you looking at risk versus benefit. Children have a 99.99% of recovery. I'd hate to think that you have been paid to push this agenda. In addition I understand you are also ruling on Nazi camps oh I mean involuntary quarantine camps like Australia has done. Sounds like the Japanese internment camps of the 1940s. I can't believe you would even discuss this. Are you not aware of what is going on in all major cities of the world. What strikes me as hypocritical is that you won't advertise/teach folks to take vitamins D and C, zinc, Quercetin, rest, melatonin, exercise, eat healthy, loose weight to help prevent illness by building up one's immune system. The only thing that is said is get a vaccine when so many other things should be done. And holding back therapeutics and not looking at what's working in other countries is criminal. Wake up , are you also the New World Order? Hope Murry RN

My childhood mentor just died in reaction to the vaccine.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to

learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

This is Mark Jones in Spokane Washington. It is my understanding the our state is trying to pass or include in a bill or policy or what ever they are using to detain and put those who don't comply to vaccinations or test for covid or have covid, them and family members in custody and put into covid centers or Quarantine centers.

I strongly appose any violation of our rights!! This is an experimental shot under some corrupt emergency order. Intelligence people by now know WE HAVE BEEN LIED TO! The same people who have push, promoted and financed covid are the ones profiting from this experimental shot. Covid is a bio weapon and has never been isolated and in 7 world courts they have not been able to produce proof of a covid virus.

It is crimes against humanity what state government leaders are trying to do to the people of those states. CDC, the WHO have changed their positions several times. Vaccine companies have changed terms to get approval from corrupt FDA and NIH. What in the world is going on!

No one has any right to force me into any medical treatment against my will, No One!

This is illegal and against our constitutional rights and God give rights.

This action Must be denied, removed and those pushing it need to be charged with crimes against humanity!

Government has any business in my medical decisions! Government has no right to infringe on our rights and our wishes when it comes to medical treatment.

All mandates, forced Vaccine compliance, or testing with out informed consent should ever be passed or put into effect by any government agencies or corporations.

Mark Jones

I am strongly opposed to a mandatory covid vaccine for school aged children.

Children are at extremely low risk of Covid. When they do contract it, their symptoms are minimal. The vaccine is still EUA and has no long term safety data as well as many documented instances of adverse reactions. Numerous studies have proven that the vaccinated are transmitting the disease and becoming infected themselves. Studies in teens have also shown that the risk of being hospitalized due to an adverse vaccine event is higher than the risk of being hospitalized from covid.

There is no logical reason to require an injection for a disease that does not prevent the transmission or infection of said disease.

I hope that each of you abandon political biases and consider the actual data in this matter before MANDATING something that could affect the health and wellness of others. The decision to take this vaccine should be just that -- A CHOICE. It should be a decision made by families and their physicians based on the knowledge of each individual child.

Sincerely
Mandy Huetten

To whom it may concern,

It is not the health department or government's right to tell parents what to or to not do with their children. Covid 19 is not as serious for most kids and even the man who created the mrna vaccine has said it isn't safe for children. It is our job as parents to decide what we feel is safe.

I am entering the attachment to this e-mail into public comment for the WA State Board of Health meeting scheduled on Wednesday, January 12th, 2022 at 9:30am in regards to the proposed policies:

- Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040).

These specifics come from WAC 246-100.

- Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

The law is clear. If you attempt to enact these policies into law I will take legal action as disclosed in the attached document.

Sincerely,

Lucine Drake

To whom it may concern,

My name is Herminia Torres I live in Chelan County, Washington. I have one child in elementary school and nephews and nieces in public school here as well. I'm going to get straight to the point. This "vaccine" is genocide. Micheal Yeadon, Pfizer's ex Chief scientist said no one should ever take this MRNA vaccine and if you did you take the Pfizer vaccine you have about three years left. The first dose reduces your life span by 15% and the second dose by 35%. It is equivalent to being injected with HIV. Scientists have discovered that the vaccine spike proteins damage DNA cells and once they do, the cell which once could repair itself cannot anymore. People are getting sick and dying and I more than anyone can tell you this because I'm seeing it wipe out my family! My brother in law is currently missing after losing his mind due to inflammation in his brain from too many spike proteins damaging his brain cells resulting in covid psychosis. He lost his mind and went into the woods at Mission ridge three months after getting the vaccine. We have not found him. Mr. Yeadon said that the ones who get it in their brain are the unlucky ones. It just killed my Aunt. She should not have passed away! This is from the vaccine. My two aunt's have passed my oldest brother died. Took my only Uncle. You must listen to me! My son said almost all the kids in his class got the vaccine and they don't feel good! Listen, these kids will die. They are going to get polio like symptoms and the government will say we have a polio crisis but it is from the vaccine. You must stop this and use your power to stand up. You must not listen to what they say this "vaccine" is. This vaccine is made from aborted fetal kidney cells and you are injecting it into your body. It goes against GOD and all things pure. You have altered your Genome and weakened your immune system. It's why you have gotten covid even after getting the vaccine. Don't do this to anyone else. Save our community. We all need each other now more than ever. They want us to be at war against each other. You don't feel good after getting the vaccine do you? It's evil poison. You must see people are sick. They are lying to us all. They are creating vaccine lettuce. MRNA lettuce so folks can eat it! All the animals died in the MRNA vaccine studies. They all either got cancer or died. My aunt just dropped dead. So did my friends grandmother after she got the vaccine. You cannot allow this or we will come to stand up. This will create a war. You're going to get karma very much if you even think this is a wise choice for humanity. May your heart be light and love and you do the right thing by allowing people to make a choice. Let me tell you what, there is such a thing as immunity. I, my partner and my child have never gotten sick once! Not once! You need to start every meal with onions, garlic and ginger. If you are sick you need burdock root, sea moss gel, and Manuka honey. Remain well and please do not choose to believe in this agenda anymore. They want people dead and that's exactly what is happening. With all due respect, please please please do not destroy Washington and our smart kids. We are a clean, smart state with intelligent human beings residing here. Keep Washington free. You took the vaccine because you thought it would help. You are in a trial. The trial doesn't end until 2023. Have you seen what is is doing and has done? You cannot deny this because you feel different inside. You still have to suffocate and wear a mask even though you took the vaccine. You still have to get tested. Enough is enough. We are counting on you to stand up. Please!!! Please I'm begging you. It's wiping out the Mexicans, natives and blacks. They want an

all white race. I'm begging with all my soul you say no. This is a war.

Sincerely, Herminia

I am 100% opposed to unelected officials implementing of a COVID 19 vaccine requirement for schools in Washington State based upon the lack of solid persuasive information. The CDC and NIH have been wrong at nearly every recommendation and they will be held accountable as will you if you usurp parental family decisions. There is not enough justification for you to usurp parents for mandatory gene therapy!

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. Requiring a vaccine that's proven not to work with a record amount of side effects and no liability towards its financial incentive holders all for a disease no more deadly than a cold is nothing but runaway degenerative authoritarianism.

Furthermore, granting law enforcement the ability to detain individuals or families up to the point of incarcerating them in concentration camps for "health" is the play-by-play reenactment of Nazi Germany's rise to power when they declared the Jews carried typhus and must be quarantined for public health.

Should your democrat-led and corporate-funded fascist policy be implemented, hell the likes of which you have never seen will break out Nation-wide. If you think the American people are going to tolerate concentration camps you've got another thing coming. It will be the last nail in the coffin for the state economy and it's people.

Sincerely,
A guy who's read a history book.

Dear Washington State Board of Health:

It is with grave concern I write to you regarding your desire to put the unvaccinated into quarantine camps (WAC 246-100-070). What people inject into their bodies should be their own choice, not forced upon by law. Does "My body, my choice" not apply to this circumstance? And no one can even guarantee that there will not be a risk of illness, injury or death from these experimental vaccines. You and I both know that the only FDA approved Pfizer vaccine is the Comirnaty and it is not even available here in America. My own brother has Guillain Barre disease after receiving the J & J vaccine. This has to stop immediately. To vaccinate or not should only be a personal decision. Being forced makes it even more suspect.

This law also goes completely against the Nuremberg Code. Specifically Rule Number 1:

The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to exercise free power of choice without the intervention of any element of force, fraud, deceit, duress, overreaching or other ulterior form of constraint or coercion.

As a proud citizen of Washington state for over 50 years, the mere idea of this disgusts me. Let try for once even giving 5 minutes of attention and or air time to the natural treatments and immune buidling supplements, foods, exercise and other lifestyle habits that can increase your overall health. In my opinion, what you are proposing is dirty and evil. Do not go through with this law.

Sincerely,
Laurie Angiuli

To Whom It May Concern,

As a citizen of Washington State and a parent. I ask that you oppose any revision to WAC 246-100 and WAC 246-105 as it relates to COVID-19 virus.

1. The vaccine is currently under emergency use authorization. Such vaccines should not be a requirement.
2. With the current omicron variant we see that the vaccine is not effective. It is unclear on the vaccine effectiveness moving forward because this virus is changing so quickly with new variants
3. Kids are low risk when it comes to COVID-19. From my own experience I have had COVID with symptoms and my three children that live in the same home were asymptomatic or did not get it at all.

Thank you for your consideration.

All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to

learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org

External Email

Hello,

My child's medical information is protected by HIPAA. We should never have to disclose his information. A person should always be able to choose to participate or provide an exemption after medical council. If someone participates or not it is not for the government to decide it is for a trained and educated medical professional to provide counsel on an individual basis. A mandate will not change whether or not a child's health situation allows them to get the vaccination or not. There are many people who want the vaccination and should be able to get it readily and free of charge. There are also situations where a child should not get a vaccination dependent upon genetic disposition or current medical status. I implore you to follow the regulations and rules of our constitution that allow for the freedom of medical choice based on personal and individual health with medical council.

Sincerely,
Marisa Wilson

As a citizen of the USA and resident of WA state, I OPPOSE vaccine and mask mandates of students. I taught for 40years and know much about children's emotional wellness- masks don't help that at all. Natural immunity in children and the science documented pre covid about masks, scientifically prove neither should be forced by the government but should remain parental decisions. Also, I am in favor of HB 1680 on natural immunity, as well as agree that no products lacking phase 3 trial studies should ever be included in the emergency use authorized list. Quarantine camps in Washington state???? I don't live in Australia or Germany pre WWII! I don't want to move to another state, but I want to live in a state abiding with the USA constitutional guaranteed freedoms.

I am strongly opposed to adding the Covid vaccines for children to ho to school. When will you realize this is no longer a pandemic of the unvaccinated but just as much a pandemic of the vaccinated passing around the virus. Here are other reasons.

- 1 COVID vaccines remain under the Emergency Use Authorization and the rules that apply to this status
- 2 Children under the age of 18 have a 99.995% survival rate from COVID infection.
- 3 Children. Have a higher chance of death or adverse event to COVID vaccines than COVID-19 infection.
- 4 The research to support this were methodological flawed regarding safety data.
- 5 The COVID vaccines does not prevent getting COVID 19 infection and does not prevent the transmission of this infection.

Mike Falk

External Email

To Whom It May Concern,

As a citizen of Washington State and a parent. I ask that you oppose any revision to WAC 246-100 and WAC 246-105 as it relates to COVID-19 virus.

1. The vaccine is currently under emergency use authorization. Such vaccines should not be a requirement.
2. With the current omicron variant we see that the vaccine is not effective. It is unclear on the vaccine effectiveness moving forward because this virus is changing so quickly with new variants
3. Kids are low risk when it comes to COVID-19. From my own experience I have had COVID with symptoms and my three children that live in the same home were asymptomatic or did not get it at all.

Thank you for your consideration.

Mariya.

Good morning,

Please consider the health and safety of our children who deserve to wait for more research; let alone mandates to inject this newly made so called vaccine.

One child hurt in a trial will be enough for me to say no! Especially when we know that this virus does not affect children.

Doctors on record saying Covid-19 affects the spike protein from the virus adheres to the Ace 2 receptor. Children have zero risk with Covid because they have very few Ace2 receptors making them not as susceptible to the virus.

The first Covid-19 trial for children 12-17 using the Pfizer vaccine and conducted at, Cincinnati General Hospital.

Nothing was made public from the trial regarding this mothers' daughter adverse events. In the video Mother was sitting next to her daughter in a wheelchair explaining what happened after her second injection.

Over 35 adverse advents decreased vision, muscle weakness, menstruation irregularities, blood in her urine, loss of feeling and tremors. As well as going to the emergency room 9 times, hospitalized 3 times for a total of 46 days in fact she was in the hospital when the vaccine was approved.

She went on to say that she knows that none of this or the other children in the trial process having adverse reactions were made public other than abdominal pain.

A study of the 350 children in one US hospital with cause of death as covid-19. Records found not one child was healthy, sick only with Covid and all of children were already very ill with other co-morbidities.

Parents and children should have access to all information related to the research to make an informed consent. If mandated we would be constrained, coerced, forced by an overreaching Washington State board of health.

Please vaccinations should be voluntary with informed consent being essential.

Thank you,

Ida Hightower

It has been proven time and time again....PROVEN that the covid vaccine does not prevent transmission or infection

How could you possibly justify a mandate to experiment on our children?

The severe cases have all had other risk factors which contribute to the more severe outcomes.

This is a choice for each family not a decision to be made by others

Thank you
Concerned parent of 3

It is unconstitutional to make COVID "vaccines" part of school immunization requirements using WAC 246-105 as all COVID shots with the exception of Comirnaty are under emergency use authorization and are to be taken with full informed consent and without coercion or mandate. We the people are directing you, our elected officials, to NOT allow COVID "vaccines to become part of school immunization requirements. The risk is not worth the benefit. Teenage boys have a higher chance of landing in the hospital due to a COVID "vaccine" reaction than due to complications from coming down with COVID itself.

In regards to quarantine, we the people, direct you, our elected officials, to NOT allow local health officers to use law enforcement to force an emergency order to involuntary detain a person or group of persons to be isolated in a quarantine facility. This is not an emergency and, therefore, should not be treated as such.

Thank you for your time and attention, Karen Jenkins

VOTE NO --to item 8 Technical Advisory Group

Covid shots should absolutely NOT be a requirement for our children to attend school or childcare.

Children are at extremely low risk for Covid and that the vaccines are still only EUA (emergency use authorized).

Approve and move forward item 11 Rulemaking Petition that prohibits the addition of any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

These PROPOSED POLICIES should be voted down and not done:

- Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

NO involuntarily detaining Americans.

To whom it may concern,

I absolutely oppose ANY forced, coerced, mandated, manipulated into doing anything to my personal body as well as my family.

NO ONE owns anyone! NO ONE has authority over anyone! Everyone has a God given right to choose what's best for themselves. The government or any state authority, official, law enforcement has NO right to enforce such inhumane acts against mankind. I rebuke every part of this evil!

I completely oppose against making it mandatory for children to get vaxed in order to attend school. EVERYONE got sick with colds or flu's before Covid. Everyone survived!! People would just stay home if they were sick, or stay home from school. We can all go back to that! That's how life has been for centuries for God sake!

THIS NEEDS TO STOP NOW!!

Hello,

As a mother of two, one who is medically complex, I am are very concerned about a vaccine mandate for my children. There is simply no long term research on this vaccine and it's been given emergency use only. My children are at a greater risk of having a vaccine reaction injury than they are being hospitalized from Covid. As the parent, it should be my right to chose which vaccines are best for my children. If a covid mandate for children passes I will move out of state. I will not let a mandate coerce us into making hurried and doubtful health decisions for my kids.

Also, the overreach of using law enforcement to segregate and place in what is ideologically an internment camp (which with great shame our state did our Japanese citizens during WW2) to those who have been near someone positive but do not want to take a vaccine is deplorable.

Sincerely,
Kayleigh Wright

Dear WSBOH,

Please do not move to make Covid 19 vaccines mandatory for all Children to attend school or daycare in Washington State. Children still have the lowest death rate for Covid-19 and these vaccines are still only approved under emergency authorization. This would be a mistake and potentially be more dangerous to children who have little risk of hospitalization and death from the Covid-19 virus.

Sincerely,
A Concerned Parent

Hello Washington State representatives,

As representatives of the people of Washington state, ALL PEOPLE of the state, it is your responsibility to listen to those who have beliefs on both sides of the divisive issues we all face and you deliberate on today. Please do not force one sides beliefs on the others under the veil of "public safety ". Consider each individuals right to choose what they believe is best for them and their children when it comes to health care decisions. As a law enforcement officer, I find myself questioning what some in this state feel is necessary steps when an individual human being chooses a path other than the "vaccination" route to combat the current pandemic. I think we can all agree there is "science" to be found to back up every possible angle there is with COVID these days. Who are any of us to tell another equal human being they must follow our path when it comes to personal health decisions or face losing their ability to provide for our children, loss of social freedoms, and potential loss of freedom by law enforcement detention. I can't believe we find ourselves discussing these things in 2022. More importantly, as a father of two young girls, I cannot fathom being told by an individual who has no possibility of caring for, loving, and wanting the absolute best for my daughters forcing me into a situation that I truly believe would be more costly to my children's health (physical, mental, and social). No one in this state, country, planet, or universe wants my kids to remain healthy more than I do and to force kids into this vaccine in order to attend PUBLIC school is just plain wrong and unethical. If this isn't a pathway to isolationism, bullying, segregation, and many other potential negative issues for our kids down the road then what is? This "vaccine" is not comparable to others mandatory vaccines so why are we trying to compare this one and those ones as if they are? At the very least we cannot pretend to understand long term effects due to the simple fact of the timeline. Children are not at serious risk for this disease, in fact much less so than the yearly flu and that vaccine has never been mandatory. Please be reasonable with this very important and critical decision you find yourselves considering.

Thanks,

Jakob Y

Greetings- I am sending this message to oppose any Covid 19 vaccine mandate on our school age children (as well on any US Citizen). The Covid 19 vaccine has not been proven to be safe or effective. Children are not dropping dead from this cold/flu. Covid 19 is 99% recoverable. No long term tests from this experimental vaccine have been done and therefore the harm it may impose on children is unknown. Eric J. Rubin, MD, PHD, the editor of the New England Journal of Medicine and a member of the External Advisory Committee to the FDA said as pertaining to using the Covid 19 vaccination on children, "We are never going to know how safe the vaccine is until we start giving it." ` What kind of science is that? Are you willing to even consider harming our children with that kind of reckless and reprehensible statement? There are hundreds of Doctors opposing the Covid 19 vaccine to children. I recommend a panel of medical experts be heard from both sides of this controversy. If you reviewed and listened to the medical opposition to the C-19 vaccine, you most certainly would be enlightened to any potential harmful effects it may have on children, making this consideration for a vaccine mandate revoked. As a Board making this very important decision, I would like to remind you that any harm that comes to children due to a choice that you make to mandate the C-19 vaccine on school children could result in medical damage and you become responsible for that medical damage. I would also like to remind you of the Nuremberg Code. If you are unfamiliar with it please look it up. Your decision to "Protect" the children against imposing a mandated "experimental" vaccine on school age children is absolutely and vitally crucial. Respectfully- Kim Porter

I do not agree with forcing vaccination, medical examination, testing, treatment, or counseling at any point and quarantine people/families who do not comply. This is unconstitutional and takes away our freedoms as American citizens. Using law enforcement to enforce governments plan for forced vaccination is wrong and pure violation of our rights!!

Furthermore, I do not agree with adding covid 19 vaccines to requirement for school entry at any level!

246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntary comply with requests for medical examination, testing, treatment, counseling, vaccination

COVID Jab

External Email

I am opposed to making COVID-19 injections mandatory for any school admission or childcare situation in Wa. State for the following Reasons:

The current shots do not work to stop the spread of covid or any of the variants.

The current shots are still in the Experimental Stage.

The CDC's VAERS (Vaccine Adverse Event Report System) has documentation that children have been permanently injured and died from the Covid shot. Statistics show more people have died from the Covid Shot than all other vaccines combined.

Anybody who takes the shots and is injured has no legal recourse to ask for financial compensation from the Manufacturers.

Children are at very low risk of catching covid.

11 Wa. State Children have died in nearly 2 years of Covid-19.

8 were in the 14-19 age bracket.

3 were in the 0-13 age bracket

Deaths were caused by underlying immune suppression - Cancer, Diabetes, other medical problems and for those 14-19 yrs, Obesity.

Covid is 99.995% survivable in those 0-24yrs old.

We do not fully know the long-term effects of the Covid shot.

Herd Immunity is imminent

The above Information is fact-based.

Thank you for voting against a mandatory Covid vaccination.

Hello,
I am strongly opposed to the COVID vaccine being required by schools for children. To do this completely ignores the facts that COVID has barely impacted children. The risk that these children have of negative effects of the actual virus is so minuscule, how could you possibly require this vaccine?! I am opposed!

Thanks
Jaclyn Moore

I do not believe that our children need to be getting this vaccine! The vaccine is not preventing anyone from getting Covid so why make it mandatory for our children to go to school. I have a feeling a lot of people will pull their children from public school of this goes through!

Please do not subject our kids to something that doesn't even prevent the virus!

Thank you

Hello,

As parents of 3 children, we are very concerned about a possible vaccine mandate for our children. There is simply no long term research on this vaccine and it's been given emergency use only. Our children are at a greater risk of having a vaccine reaction injury than they are being hospitalized from Covid. As the parent, it should be my right to chose which vaccines are best for my children. If a covid mandate for children passes we will look to move out of state. We will not let a mandate coerce doubtful health decisions for our kids.

Sincerely,
Melanie and Fabian Escalante

To whom it may concern,

Based on my understanding of Title VII of the Civil Rights Act, the First Amendment to the United States Constitution, and other federal and state laws, These three Covid-19 shots can not be mandatorily put upon any person of any age, particularly our children.

I believe receiving the Covid-19 vaccination is a personal and individual decision. The Bible states that the body is the Temple of the Holy Spirit. We are commanded to take good care of it, not to defile it, and certainly not introduce something into it that could potentially harm it (1 Corinthians 3:16-17, 1 Corinthians 6:19-20, 2 Corinthians 5:10, and 2 Corinthians 7:1). The Covid-19 vaccinations work as gene therapy. By manipulating genetic operations, the Covid-19 vaccination alters what God made (literally assuming the position of God), which I believe to be a sinful practice under these circumstances. These vaccines (by the very disclosure of the vaccine manufacturers) contain carcinogens, neurotoxins, animal viruses, animal blood, allergens, and heavy metals. Regardless of being FDA approved or not, there has not been adequate time of testing of the Covid-19 vaccines, nor has it been subject to long term research. At this time, I don't believe it would be right for any person to introduce these substances into there body because they have not sufficiently been proven to the world to be safe and effective at this point.

Thank you,

Concerned Washington State Voter

I strongly oppose a vaccine mandate for my school age children. In our case they reside with parents that are vaccinated, but our kids are not due to severe allergy sensitivities. Kids are at low risk for covid, and low risk for communicating covid. The vaccines are intended for emergency use only, and I absolutely refuse to allow my kids to be treated as experiments. You, as part of WA government have a duty to educate my kids, and you have FAILED to provide the quality of education they could have received had you and your counterparts had the guts or professionalism to hold in-classroom education in the 20 -21 term. If a vax mandate is handed down, you will still have the duty to educate my kids thru one means or another. The notion of imposing a mandate is one more paper cut in the relationship between families and educators and other arms of government. The fact I must write this memo royally pisses me off. I have been watching this agenda unfold across every front of WA government for the last 2 years and I am fed up. You should expect to be confronted by a massive negative response to your self-serving, liberal motives. Shut this discussion down by telling WA families a child vaccine mandate will never be imposed- ever.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to

learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Ref: Upcoming meeting on Jan 12, 2022

Words cannot express how angry and dissapointed it makes me to see the government attempting to take away our human rights as guaranteed by the United States Constitution!

To detain and "quarantine " American citizens because they refuse medical examination, testing, treatment and vaccination reminds me of what happened in Germany under Adolf Hitlers rule.

We as Americans have the right to choose what happens to our bodies.

Hello!

I'm writing to you because I was absolutely shocked to find out that we are entertaining the idea of mandating a Covid vaccine in kindergarten to 12th grade. The act of medical choice being ripped away by having a vaccine mandated by a government body takes away the very fiber of being in a free country.

It is fine to add the Covid vaccine into the schedule of vaccines for kids but at no point should something like this; in the infancy stage be mandated. Especially for our younger students. I hope that the logic is taken into consideration over the fear. With science highlighting that antibodies are not lifelong, nor are they year long. As well as our younger population is not as often the ones in the hospital. Those who are vulnerable, are tasked with The mitigation of viruses for themselves as they always have been. I'll plea that if this must go forth for Mandation that exemptions will not be taken away. Everything already is so scary, and any sense of normalcy for our young kids is already hanging in the balance, please don't make a mandation of a vaccine be the reason kids are homeschooled and lose more of the precious time and experience so important to growth.

Thank you for your time and consideration.

In light of the recent interview with Dr. Robert Malone, developer of the mRNA technology, where he resists the notion of vaccinating his own grandchildren with this yet to be thoroughly tested vaccine, I likewise resist the notion of vaccinating my grandchildren.

Children should not be experimented upon with a substance that is causing too many reactions and deaths even in adults.

No children have died of COVID in my county, Snohomish, so why the coercion?

Are you trying to decimate public schools? Requiring vaccination of the 5-11 year old will force another wave of families to pull their children from the system. I know my grandchildren will be pulled out of their public school. In the opinion of my son-in-law, who is African American, he does not trust the government jabs because too much experimentation has already been forced upon people of color.

My strong vote is NO! Over my dead body will you jab my grandchildren with thus untested technology.

Sincerely,
Marlee Huber.

Hello-

I do not agree with the planned law to legally enforce vaccinations on individuals or families. It is also barbaric to be detained in a quarantine facility.

Regardless of disease, virus or illness such overhaul of personal autonomy and our US freedoms is unlawful. Especially in the case of COVID-19... the death rate does not dictate such drastic measures. Perhaps these resources could be put to better use with providing more comprehensive early outpatient care. Thank you for your time, Krista

Im a father of a vaccine injured child do to washing vaccine mandates. I will have to live knowing that I let my child get vaccinated to attend school and now she will have a lifelong struggle with her injury. She has painful nerve inflammation up-and-down her right arm her neck and her side. When she has these outbreaks no medicine seems to even touch the pain she's in. Kids have very little risk of having a serious reaction to covid. Forcing them to get vaccinated Will only Put them at risk for vaccine injuries. I know vaccines are genuinely considered safe for most but sometimes vaccine reactions do happen and these reactions are devastating for the families and the children. Because this vaccine does not stop transmission or infection perfection it would be immoral for you to force the children of Washington State to take the covid vaccine. every covid Vaccine injury for children in the state will be blood on your hands if you pass mandatory vaccines for children.

Forced isolation and quarantine on free citizens It's just playing wrong. I know another agenda item was talking about Is force quarantining people who are deemed to be a threat to public health. Typhus outbreaks in Europe was the reason ghettos were built for Jews and the 1st camps they force the Jews into. We have to learn from history forced Quarantine people to prevent them from spreading illnesses Historically has goneIs really really bad. If people are put into forced quarantine sites for public safety the people who made this decision are no better than the nazis that put the Jews in the camps and Into ghettos to prevent them from spreading typhus.

We are AGAINST forced vaccinations for children.

- it would be a violation of the rights of parents to raise their children according to their own wisdom and values.
- it would be unthinkable to deny our children the education which we ourselves are paying for through our taxes.
- such an action would be an illegal and unconstitutional overreach of government into the private lives of citizens who pay your salary.

Thank you.

In regards to making it mandatory for kids to be vaccinated for Covid 19. This is a very slippery slope your taking and too many lives at risk not knowing the long term effect it has on any of us. Us as adults being able to take this risk is one thing but asking parents to make the decision for their kids when health care officials don't even know the outcome of this vaccine is ludicrous. I am 100% behind vaccines but we need time to make sure this is safe for children of all ages before making it mandatory!

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This is pure negligence to be even thinking about mandating children take the Covid shot or they cannot attend public schools!!

As you all are very well aware, the shot is not necessary as children are not at risk with over 99% survivability rate. The shot poses far more risk to children. And to say it is to protect their grandparents is nothing more than a scapegoat. When have we ever used our children as experiments? They are the generation we should be protecting!! And I say this as a grandmother.

Ask yourselves: If you were held responsible for the side effects of this shot to the children, would you be so willing to make them take it? The answer is a clear NO. No one would. This shot would be pulled so quickly because it is not safe! UK government just issued a study that the fully vaccinated are dying at a 286% higher rate!!!!

Just pause and think about the magnitude of what you are considering! This is clearly not necessary so why are you even considering such a thing??

You have clearly not educated yourselves if you move forward with this. I respectfully request you do further research on the shot and educate yourself about taking away a parents right to make medical decisions their own children. If you were truly educated, you would not even be considering this mandate.

I support the petition for rulemaking (item 11 on the Jan 12 agenda). I support establishing a new rule that prohibits adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

To whom it may concern,

I am against mandatory vaccination for any child. Parents are responsible for the care of their child and know the medical needs of their children.

Medicine is not a one size fits all, now, nor has it ever been.
Medical treatment should be at the discretion of the individual and what they deem valid for their own health and well-being. Each individual has a right to decide what goes into their body.

Regards,
Kristi Drew

Good evening,

It feels as if we have been under attack since the beginning of 2019 with the removal of the MMR personal/philosophical exemption. Our voices have been falling on deaf ears in Olympia and in each legislative district. I usually send emails with studies and reference points, but what I have found is that it doesn't make a difference. The board and legislators have a narrative they are going to follow regardless of what the people want. We need to stop, slow down and take a deep breath. We are safe and we are okay. No matter what is happening in the world, we are okay right now, in this moment.

Washington is a beautiful state with so much to offer, but many residents are fleeing the state to live and raise their families freely without all the covid restrictions. I have two young children and I am concerned about what they have experienced over the last two years and how it is impacting them. I am a teacher and I have had the hardest two years of my life. I'm on the verge of leaving the profession. Most of the other states in the country do not have strict covid-19 restrictions and mandates and they are fine.

Residents in other states (besides CA, NY and OR) live freely, while the screws keep getting tightened in Washington. We are at our breaking point and to this we say no more. Not my child. Not on my watch. I oppose the Board forming a technical advisory group to review information about covid-19 shots for consideration of mandating the shots for school. Not only do I oppose the formation of this group, I oppose ALL mandates. We need to move forward, in love and light, and be responsible for our own health. I encourage all of you to step foot in a school and experience the stress and devastation these restrictions are causing first hand. It is disturbing. These are our children. They are our future. They do not need experimental shots for a virus that does not impact them. No more. I stand with many other mothers out there who stand between their children and the board of health (big pharma). Not on our watch. Not our children.

I support Xavier Figueroa, PhD's petition asking the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Sincerely,

Jamie Keiter

According to the Nuremburg Code No one can be forced to participate in medical procedures without informed consent.

A BOH mandate would

Contradict the Nuremburg Code.

No mandates can be allowed. They are against the Nuremburg Code, are human rights abuses and are unconstitutional.

It does not matter the Legislature granted you rule making authority if the proposed rule violates these fundamentals.

Thank you,

Mark Williams

To Whom it may Concern

The Washington State Board of Health is seriously overreaching their authority with the WA Covid Detainment Emergency, to force Vaccinate anyone in the State of Washington. "We the people" have inalienable rights to life, liberty and the pursuit of happiness. We are sovereign and divine. Your oath of office does not allow you to impose any laws on us that we have not voted on. The suggestion to use emergency order to force vaccinate or detain anyone is illegal. Do not proceed with this emergency order. This is the United States of America founded on fundamental freedoms that must be observed.

With great concern and sincerity

Mary Helm – Peirce County WA

First. Forcing everyone to get the vaccine is a violation of the First amendment that America was established on. The First Amendment protects us against government limits on our freedom of expression. Choosing what goes in our bodies is part of our individual expression. We live in America where it is the land of the free, where immigrants came to ESCAPE their controlled society. Having that reputation is now being compromised with these policies.

All vaccines and medicine we have took thorough research and countless tests before they were released to the public. The COVID-19 vaccine and boosters have not been through such research. There was not enough time and it was rushed. We have no idea the consequence of that, present, especially down the road. A year from now? 5 years? People could be dropping dead, one by one. There are SO many unknowns that people are ok with blindly putting into their bodies because of fear, regardless of the consequences. Leadership should be a calming voice against the rising fear and worry instead of causing it; Increasing it. My concern is that forcing people to get the vaccine will result in the people fighting back when they decide enough is enough.. It makes me concerned for the people getting injected who have allergic reactions to ingredients in the vaccine. We don't know if there are unseen side effects that could show up! Especially children getting it so young. Growing with that in your system? Who knows the effects. I'm concerned about the effect getting the vaccine will have on the immune system. Millions of people have taken the vaccine by now; who's to say they won't start having health issues related? Won't be able to conceive, will miscarry. Not to mention how this injection will affect unborn children, what birth defects it will cause. If you force people to get something, they won't want to do it. They will retaliate and then you have a rising rebellion. Riots. Danger to you and your families. Cause people get crazy. There are FAR more of 'the people' than government. Forcing something on us, threatening to put us in 'quarantine camps' is NOT the way to get what you want. It's repeating history and you saw how well that went for Hitler. America stands for FREEDOM. We have the right to choose what is right for ourselves. We are different than other countries because of the freedoms this country was founded on. You want people to do what what you want, to follow you, be worthy of being in a leadership role; you'll get far more results than scare or fear tactics. Please, be leaders the forefathers would be proud of.

Subject: masks

External Email

Hello,

I previously emailed you our intent to pull our children from school if the covid vaccine is required.

I would also like to add that as long as "any cloth or paper" mask is deemed sufficient, I will consider the source of the requirement to be of questionable intent. ALL ACTUAL SCIENCE has consistently shown an actual surgical mask to have marginal effectiveness against a virus, with a K95 or N95 to be the only mask to make much difference. The flimsy cloth or paper that the majority of children are wearing is less than effective. I would like the data on how many staff and children are out of WA schools with other viral/respiratory illnesses/asthma compared to the 2018/2019 school year. Our circle of children have been continually struggling with this since the beginning of school.

Please see The University of Michigan website for info on their influenza outbreak that was severe enough that the CDC was called in. This university requires masks AND vaccines (and lets not forget that influenza particles are significantly larger than Covid particles). These are college students, capable of better mask hygiene than the younger children.

While on their website, you can also find that this university did a study on masks against influenza several years earlier and determined masks did not provide a noticeable difference until HAND WASHING emphasis was added. In other words, the hand washing was what made the difference in college students. Also, please find their covid tracker. Extend it out to this time last year, pre-vaccine, and compare to this year WITH their vaccine requirement. The line is identical.

Why would this proposal even be considered in the United States of America? This is pure insanity! What we should be discussing is why government officials/representatives are not being tried for treason considering laws like this! This should have been thrown out as unconstitutional before any of you have wasted tax dollars on this. This is unacceptable! As for the COVID vax being added to school immunization records, absolutely not! The jab doesn't do anything but "reduce symptoms" hence the reason you need MULTIPLE BOOSTERS, this does not inoculate the person getting the jab and they can still contract and spread the disease. Do you hear how insane this sounds? None of this should be going on.

Dear members of the WA State Board of Health,

I am writing to request that you vote NO on the covid-19 vaccine mandate for K-12 students. Here are the reasons why:

The vast majority of children have mild or asymptomatic infection and do not need the vaccine to prevent hospitalization or death.

The vaccine does not prevent transmission and wanes in efficacy within a few months, requiring boosters.

This vaccine is still in the experimental phase. Pfizer stated in their pediatric study they will need at least five years to see long term effects and safety data. All other mandated K-12 vaccines have decades of safety data.

WA state has already lost a significant amount of K-12 students since the start of the pandemic and will lose many more if Covid-19 vaccines are mandated. Personally, I will pull my children from public education in protest of a vaccine mandate.

Thank you for reading my request to vote no on mandating the covid-19 vaccine.

Sincerely,
Holly Jorgensen

Hello WA State Department of Health,

I am a mother of two children and I wish to add my public comments as a long-time resident of Washington State. I was born and raised in this beautiful state and I care about the well-being and long-term health of people in WA State. That means both physical health as well as emotional health, spiritual health and psychological health.

In order to ensure that the people of WA can have the freedom of choice to be healthy people, both for themselves and their children, I urge you on behalf of our God-given rights upheld by the United States Constitution to NOT mandate COVID-19 vaccines for children to attend public school or any other venue. I myself am vaccinated with the Pfizer vaccine, but I do NOT think anyone should be mandated and forced to be vaccinated if they chose not to. It is a matter of medical and personal freedom to be able to chose what someone puts into their or their children's bodies. This is not a decision that should be forced upon people by the state or any governmental authority.

There are so many different ways to combat COVID-19 now! Which is a wonderful thing! There are vaccines for those who want them along with many other helpful and effective therapeutics to treat COVID-19. Furthermore, so many people have gotten COVID-19 and those people now have a strong natural immunity. There is no need to force children or people to take this vaccine.

I am praying for you and pray that you will all take the responsibility you have seriously to uphold public health in a way that does not take away people's personal liberties. If our personal liberties are lost then our health decline as individual's and as a state will also follow.

Thank you for taking the time to read my email.

Sincerely, Marisa Lee

Subject: Mandatory Vax and Forced Quarantine - WA State

External Email

It is beyond terrifying to think our government believes they should have the right to involuntarily detain a person or their family to an isolated facility under any conditions. It is also UNACCEPTABLE that this would give SOMEONE the power to make this decision at their discretion based on a person lawfully choosing NOT to comply with medical examination, testing, treatment, counseling and vaccination. This tactic could ultimately be a threat to force people into making a decision they WOULD not choose unless being threatened with a consequence. Thus, there is no law protecting the person on when and how they can leave these quarantine "facilities" on their own accord and putting their daily lives and responsibilities in jeopardy.

I would also like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State. Below is supporting information that has been helped to be drafted by others that share the same views on me. THIS IS WRONG. Taking away a parents right or forcing them to make a decision that could detrimentally impact their child is unacceptable.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in

Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children or require them for citizen at all.

Sincerely,

Morgan Timmerman

Dear Board members,

I wish to add my voice to those who are objecting to mandatory vaccinations for Covid (for children and otherwise). It is quite clear that the vaccinations that we have do not prevent the spread of the disease (the only plausible reason for requiring vaccination).

I also would like for all mask mandates to end. Our medical leaders at the highest levels have now admitted that the masks most of us are wearing do not prevent the spread of the disease and therefore it would be illogical to continue with these mandates.

Also, with the spread of Omicron, it is quite likely that the pandemic is coming to an end and that the virus is now becoming endemic. I urge you to keep that in mind and that any policies that are created would be in keeping with that and that you would make it a priority to encourage a return to normal life and the freedoms we are all used to enjoying.

I would very much like to see a return to the idea of protecting the most vulnerable in society and allowing others to go about their daily lives unhindered. This needs to be the foundation of any rules created now and in the future.

Most sincerely,
Jessica Burkett

Hello,

I am voicing my concern regarding your meeting in which you will be considering to put into law a forced vaccination of adults and children with an experimental drug which has proven to be ineffective and at the same time comes with dire side effects including death.

The fact that you are even considering making a law to force children to take such only goes to show your utter ignorance about the injection and also about studies from other countries including the report out of Canada ☐☐ regarding the Pfizer trials.

I would like to warn you, that adding this injection to a mandatory vaccine schedule for children or making it be a condition for work or participation in any social activity is entirely in American . It is a violation of the Nuremberg Code of Ethics, as well as a beach of Constitutional rights according to the Bill of Rights as stated in the United States Constitution.

I am advising that before you even convene - you should all educate yourself with the works of Dr Robert Malone and Dr Peter McCullem- who are some of the most qualified scientists in the fields of Virology and vaccinology in fact Dr Malone is the inventor of the mRNA technology and has crucial information regarding the injection of children with these COVID Jabs. He recently was interviewed by Joe Rogen to make your search easier . Also , should you seek him out you should use Duck Duck Go as your search engine , as the Google engine has become a censorship engine instead and you will not find the real Dr Robert Malone.

Know full well, that these injections cause harm, and are not safe for children nor for adults . According to the Canadian Health Care Alliance, Pfizer's trials are lying :

<https://uncoverdc.com/2021/12/16/new-evidence-pfizer-covid-jab-more-harm-than-good/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Funcoverdc.com%2F2021%2F12%2Fnew-evidence-pfizer-covid-jab-more-harm-than-good%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1f1fc6e362d54f925cf008d9d1646e96%7C11d0>>

Please take all that I have written to you to heart, and refrain from further mandating these injections.

Thank you for your time.

Subject: Mandatory vaccine public comment

External Email

I am writing as a parent of a public school student who is fully vaccinated with all of the FDA approved vaccines. I have always been pro-vaccine while recognizing that some kids can not safely get vaccinated. My nephew is vaccine injured and I've seen the damage that has been caused for him and his family. There are millions of kids like my nephew who can not tolerate vaccines. Ultimately it should be between the parent, and the medical professional as to whether or not kids are vaccinated and on what schedule. I delayed my daughter's vaccine schedule per her pediatrician's recommendation since she was born premature.

I am absolutely opposing a mandate that requires an EAU Covid vaccine for a virus that is low risk to children and teens. My daughter does not need this vaccine. My nephew would die from this vaccine. Our kids are done paying the price for adults to feel safe.

Furthermore, the vaccine does not prevent Covid or keep people from spreading Covid, as you know. Why mandate something so ineffective?

Public schools will lose so many students that the cost of enforcing this mandate will not be worth it. Trust me. I am aware of hundreds of thousands of parents who will immediately remove their children from public schools.

To whom it may concern,

I am completely against any of the proposed covid policies that are overreaching and against my religious freedoms and autonomous rights. I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

Parents must have the right to choose whether or not any vaccine enters into their minor. These vaccines are still an experiment and minors should not, under any circumstance, be subject to an experiment. This would be a different story if the vaccines actually helped. It seems that we are getting shots every few months because nothing is helping. I see no difference in the vaccinated and unvaccinated as it comes to illness and symptoms.

Children should not be in this experiment.

To Whom it May Concern,

The COVID vaccine should not be mandated for schools in Washington state for kids under the age of 18. Currently this vaccine is under Emergency authorization use for our kids. We should not mandate something that has not been fully vetted and approved by the CDC and FDA for this age group.

The study sample used to approve the EUA in children was relatively small..only approximately 2500 kids were included. It is too early to know what the side effects of this very new vaccine will be in children. Already we know there is an increased risk of myocarditis and other heart related issues in teens.

Children are getting mild illnesses from Covid and the death rate in the entire USA equates to 0.00%- 0.027% of the 7.5 million children who tested positive for COVID already in the US. The CDC reports that hospitalization is UNCOMMON in children.

Kids are not currently showing to be the population spreading COVID to others. We've seen that cases in children this fall are not a result of school transmission but rather community transmission.

Recent data has shown that vaccinated people can certainly transmit and be infected with COVID at alarming rates. This "vaccine" does not prevent COVID. Why not consider a stronger weekly testing requirement for students instead? Many parents are not yet comfortable with this very new vaccine. Only 18% of parents of students ages 5-11 in my county have fully vaccinated their kids even though doses are available.

Stop pushing mandates that aren't working to contain COVID anyway and give parents the right to make their own choices related to the risk and wellness of their own kids....similar to the influenza vaccine. Consider test to stay measures. They seem entirely more effective than the vaccination that doesn't appear to stop the spread of this virus. We already know it prevents poor outcomes in adults however the CDC has said poor outcomes are unlikely in kids. So why would we mandate it? Do the right thing.

Dear WA Department of Health Board,

It has come to the attention of parents in Washington state, like myself, that there is a proposal to mandate the COVID-19 vaccination, currently approved under emergency use authorization only for children, in order to attend school, or to add it to the required vaccinations to attend school. This is greatly concerning to myself, and thousands of parents in this state.

The COVID-19 vaccination has not been fully FDA approved for children, nor has it provided long-term immunity for any consumer of this treatment, requiring boosters frequently, for which there is little to no data on the compounding risks of vaccine boosters. It has also been made abundantly clear that adverse reactions (via VAERS or otherwise) are greatly under-reported. We also know that the risk of severe infection, hospitalization, or death due to COVID-19, especially for children, is minuscule. There is no logical reason, with variants becoming less and less severe, to make this treatment a requirement in order to attend schools.

We also need to consider the number of children and individuals who have also previously contracted COVID and have recovered fully, like myself and my children.

While I believe that COVID-19 vaccinations should be accessible to those who want or need them after consulting with their personal physicians, mandating them for children, including adding them as a school entry requirement, is unethical and unnecessary. Doing so will inevitably result in an exodus from public education much like what occurred in Los Angeles public schools. Even as a healthcare provider, I would quit my job to homeschool my children rather than subject my children to an unnecessary and unproven vaccine for them. I will consider this vaccine for them after full safety and efficacy data is available in approximately 5 years. I say this as a fully vaccinated adult who experienced adverse reactions following vaccination, and was dismissed when I tried to seek treatment.

I ask that you consider the absolute necessity of recommending COVID-19 vaccinations for children. There is sufficient evidence to indicate that not all children need this vaccine, children may experience severe adverse reactions from this vaccine - greater than what may be experienced by contracting COVID-19 itself in this age group, that the vaccine does not adequately reduce or stop transmission, and requiring a vaccine under emergency use authorization only is unethical. Doing so risks thousands, if not tens of thousands of families fleeing the public school system.

Thank you for your time and consideration.

Best,

K. Scott

I just want to say that every human on this earth has the right to make their own decisions. Forcing vaccines on people is a violation of human rights. Personally, I have chosen not to get the vaccine because almost every single medication I have been given has caused harm to me. I am always allergic to them. I almost died when I was given psalumedrol. Every person is capable enough to make decisions for themselves. You can not force humans to do things that they are not comfortable with! It is basic human rights!

Let's also stop and recognize that people are still getting sick of even if they have the vaccine, so why traumatize someone by violating them in such a manor. Vaccines have never completely wiped out a virus because viruses are a part of this Earth! The flu virus has been around for decades and the corona virus will be around for decades. Vaccine or not!

Let's focus on building our bodies up, instead of forcing a vaccine let's for education on food. We should be teaching people about the proper foods to eat to help their bodies fight viruses! Let's put more time and energy into getting people healthy and clean food and drinking water. The people that already have illnesses should get the vaccine, because their bodies are already fighting hard enough.

Do not take it to this level. Each and every person can make decisions for themselves.

Thank you for your time,
Madison Kautzman

I know that if you look on the VAERS website at the vaccine injuries reported the Covid Vaccine has more reports then everywhere vaccine combined since vaccines came out. As of December there has been almost 1 million reports of covid vaccine related injuries. Including 20,000 deaths. It is completely and totally unacceptable and unethical to require or force a shot on someone , especially a child that has death as a side effect. If they can not Gaurantee the safety of the person receiving the shot they should not be able to force anything. This is crazy and unethical.

I am writing to let you know I am against vaccine mandates for kids in public school. There is no approved vaccine, it's an EUA. The risk from the vaccine for kids far outweighs the risk of them getting covid. Death and adverse events from COVID vaccines are greater than all previous vaccines for all diseases.

It will be years and years before we fully know and understand the damage to health this is doing. The FDA wants to hide the data from us for 75 years, what are they hiding?

I hope you're mindful of the Nuremberg code while you're making this heavy decision. Do some research on VAERS data. How would you feel if your child or grandchild ended up a statistic in the VAERS data?

Please vote no.

External Email

To the WA Board of Health:

My name is Jane Sidlo and reside in Federal Way, WA

I want to address the alarming unconstitutional overreach of the following proposed WACs:

WACs: 246-100-070, 246-100-045, 246-100-040, 246-100, 246-105

What you are proposing here is a blatant disregard for our freedom under the constitution.

1. ☐ Do not add Covid-19 to the current infectious disease WAC codes, as this is not a disease that causes death as our government would like for us to believe, with a 98% + survival rate. There has been evidence reported by doctors that they were to falsify death certificates claiming covid when covid was a secondary cause. Suddenly every other ailment disappeared, and everything reported was COVID! Seriously! And you want us to entrust you to implement these WACs!?

2. The definition of pandemic has been changed from 'rapidly spreading infection that kills a lot of people' to 'rapidly spreading infection'. This makes it very convenient for governments to manipulate and control people by simply changing the definition of a word, using media reporting and spreading that fear incessantly is another tactic. We know from the beginning that covid was 98.+ % recoverable. In addition, politicians along with government agencies have dictated to what doctors can use to treat their patients. Proven treatments are not allowed!! Suddenly, they become the experts and then later we find out these treatments that were pushed are not effective. Such as the vaccine, Remdesivir; the WHO is now saying Remdesivir which was making a lot of money (3K for treatment) for big Pharma is not effective and advise not to use it. (Yes, Fauci praised it! And it has killed many including my friend!) We know the vaccine is not effective because many that have gotten it have gotten Covid and landed in the hospital. I know such people personally. Now they are advised to get the second vaccine and now the boosters and it's never going to end, this is clearly all about control and not concern for real public health. How are we the public to trust these government mandates and this control when we can see and hear with our very own eyesight and our very own hearing that a fraud is being perpetrated not only on this country, this State of Washington in particular, is radically overstepping the people's rights and desires for their own medical decisions. I personally have never gotten Covid, I have relied on my natural immunity and a healthy diet along with supplementation. I do not want to be injected with an experimental vaccine that has been known to kill and harm many people (CDC'S own VAERS DB!). Senator Ron Johnson held a hearing, allowing testimony of all of those that entered the trials of how they were injured and now it is covered up and they are abandoned. So, I say NO! stop this madness, stop this control. It's ironic that the government will allow for the killing of the unborn sighting, 'my body my choice'. But me as an individual that do not want to take a harmful experimental vaccine into my body cannot say, 'my body my choice!' Well, I do say my body my choice!

3. How is it the government, WA State, can ignore all the injuries reported due to the Covid vaccines?? Blood clots, Heart inflammation, Strokes, other sudden death and internal bleeding, uncontrollable body movements! And you sit there with your pens and ink and plan to force this atrocity on your WA Citizens! Some of us remember, we remember it was said in the beginning by the so-called health experts that they don't know the long-term effects! Well, we can see the short-term effects and the so-called cure is worse the illness!

4. I have had to write this letter on short notice, so I will quickly reference one of the WACs, it may be the one ending in 70 or 45, but at the sole discretion of 1 person, he can force a citizen into quarantine, this is frightful! Are we NAZI GERMANY NOW??? Sure sounds like this is the direction this current board and WA government is headed.

5. I appeal to your conscience WA Board of Health, how can you knowing all of this write these Proposed WACs? There is already enough blood on the hands of WA politicians and the media that is going to have to be answered for, DO NOT ADD TO IT!

6. One last point WA Board of Health! If you really cared about the health the of the people of Washington, why on earth would you hand out needles to addicts and promote their slow painful death rather than trying to treat them so they can get well? I can answer that for you, because none of this is about caring or health concerns, it's way bigger than that and you are going along with a very dark agenda.

7. One last comment, leave the children alone! They are not at risk for covid and never were! You are planning to destroy their health for life with this dangerous shot.

I could go on and on with much more information surrounding the lies and agendas behind covid and the shots but time of the essence here. I just hope to God those deceived by all this wake-up, (follow the money and power trips)

SUBJECT:

Detaining & forcing medical testing and/or treatment is unconstitutional & unnecessary in America. No FORCED COVID shots of children!!

BODY:

Forcing medical care, isolation, or treatment is totally unnecessary as COVID is getting less & less dangerous. As it mutates it is becoming more contagious but is causing less severe illness.

Because the majority of the population is vaccinated, along with natural immunity of those who have had the illness, herd immunity is happening now which will keep the illness under control.

The action of mandating a vaccine to the least impacted age group is unconscionable! There are side effects from these shots, making them much more dangerous than if the child were to contract the virus. There are also many unknown long-term effects, including possible sterilization.

This action would cripple the already failing public schools. So many parents are already about to Home School their kids and this will force this action upon them.

You cannot say you want to do this to protect the children when you speak of mandating the vaccine for a virus that is becoming more like the flu every day and impacts kids 0-19 years old the least. Follow the data!!!

Both of these proposed mandates are terrible and unnecessary and would take away more of American's constitutional rights and God-given freedoms!!

RE: ALLOWING LOCAL HEALTH OFFICERS TO USE ENFORCEMENT TO FORCE AN EMERGENCY ORDER TO INVOLUNTARILY DETAIN A PERSON, OR GROUP OF PERSONS, TO BE ISOLATED IN A QUARANTINE FACILITY FOLLOWING REFUSAL TO VOLUNTARILY COMPLY WITH REQUESTS FOR MEDICAL EXAMINATION, TESTING, TREATMENT, COUNSELING, VACCINATION.

and

INCLUDE THE COVID-19 INJECTIONS AS PART OF SCHOOL IMMUNIZATION REQUIREMENT!

Hello -

This is my public comment for the upcoming meeting on adding the Covid Vaccine to the line of up required vaccines for K-12 education.

According to the Board of Health's own criteria, a vaccine must be fully FDA approved in order to make it mandatory for school attendance. The current Pfizer vaccine in use for children in this country is still an Emergency Use Authorization only vaccine, so I do not see how this meets the Board of Health requirements. I recommend against mandating for school until the vaccine proves immunity to stop transmission like other common vaccines do, which was the requirement under consideration in the 1905 Jacobson vs. Massachusetts SCOTUS case in which it stated mandates could only be considered which "prevent the spread of contagious disease." So far, it is evident that this vaccine does not stop transmission and, therefore, should NOT be added to the list of vaccines needed.

More and more parents are pulling their children from public school due to the mandates and vaccine requirements. I know I'm just one person but what goes in my body and my children's body is my choice. Please consider our children and that they determine our future. Vaccine mandates will lead to unhealthy children and thus an unhealthy adult population.

Thank you for your time.

Hello,

Please do not require children to be vaccinated for Covid. I am a mother of a kindergartener and 7th grader. They both had covid and are healthy. Vaccines are created to help mimic natural antibodies. Why would I give my children a vaccine to do what nature has already done. I believe this choice belongs to the parent. This is an over reach on parental rights and bodily autonomy.

I am very much opposed to mandatory covid immunizations for children for any reason. Children are at risk for more problems from the vaccine than from getting covid. Let them get natural immunity as nature has done over the ages. Covid immunizations have not prevented covid infections in everyone.
Let's treat the symptoms with the other means we have found to be effective ie:
Vit D, antivirals, etc.

Washington State Board of Health:

I am very concerned about the policies that are going to be discussed at the meeting next Wednesday, in particular, the policy to involuntarily quarantine people who refuse test, examination, or vaccine for COVID-19. I believe that this removes the freedom and choice that the constitution affords us in this country. Everyone should have medical choice. COVID-19, in particular the omicron variant that is most widespread, has been proven to be mild and not cause many deaths, as well as fewer hospitalizations than Delta. To require a vaccine that doesn't prevent spread and to quarantine those who don't comply doesn't make sense when we look at the actual data. There are credible studies that show that vaccinated and unvaccinated people have the same viral load, therefore, they spread the disease the same. The only thing the vaccine does is reduce symptoms, and this only affects the person who received it, not anyone else. It should be everyone's personal choice to evaluate their personal risk and make a decision from there. If we continue to compromise the Constitution, we are going to threaten our democracy and the freedom we have in this great country. Please consider rejecting these new policies, as they don't make sense with the direction things are going, as well as the current science/data.

Thank you for reading!

I am writing to express my sincere desire and hope that mandatory Covid 19 vaccines NOT be required for schoolchildren in WA state. It is not a virus that is killing children and the known effects of this vaccine (and it's apparent many boosters) are not worth the risk! Our kids deserve an education and not scrutiny and division best case, and long term negative effects or death worst case. It has been well documented in medical studies that the risk of my teenage sons being hospitalized with myocarditis is higher than the risk of being hospitalized with Covid. We don't need WA state to tell us what to do with our own children! We care about our kids. We can take care of them. Pay attention. WA state parents do. And we don't like this unnecessary over reach.

Sincerely,
Kathleen Kittilstved

Dear board members,

I am deeply troubled by item number 9 on the upcoming agenda. Allowing the creation and enforcement of quarantine/isolation facilities would be in violation of many of our constitutionally protected freedoms, in particular, section 3 and 7. Furthermore, our constitution is very clear that all power is inherent in the people and government only derives its power from the consent of us, the governed. Please take careful regard to the sacred individual freedoms that are protected in our Washington State constitution and ensure that all decisions are in adherence to the law of the land.

Julie Banister

I appreciate this opportunity to write and let my voice be heard about something I hold very true and serious with my family. I have two kids in the Mead school district and a third that will hopefully be attending. My family has already had and overcome Covid 19 Virus. For my kids it was very very minor. All three had one afternoon where they didn't feel good and the next day they all were symptomless and feeling good. It was a little bit more work for us parents to fight it off but we came through and are doing good. No hospitals, no urgent care needed. Just prayer and vitamins. We as a family stand firm in our natural immune systems gifted by God and will continue to stay with God and vitamins. I cannot and will not take something for myself NOR give something to my kids that has not had years of clinical trials and testing to prove it is safe with no side effects. It is proven children have over a 99% survival rate. It makes no sense to give our children something man made that has side effects when our kids have such strong immune systems. My wife and I will not give our kids this "vaccine." We will file for religious exemption and even pull our kids out of public school if needed.

Thank you for taking your time to read our concerns. I would like to remind you God sees all and knows all. He will not let attacks on His children go without His judgment. May we all seek truth and discernment for the days ahead. I am praying for you all.

To whom it may concern,
The consideration of detaining individuals based on their covid status is outrageous. Covid is not a "disease", which by definition is incurable, but it is a virus infection that most people get like the common cold and recover from and then have immunity from. You can not stop a virus from spreading even with lockdowns and social distancing which has been proven by 2 yrs of of these protocols not working. To even consider breaking up families and punishing people for being sick or not complying is a violation of our constitutional freedoms in the highest level, and will have far more harm on individuals than it will ever help. Australia is evidence of the fact that this is harmful and has not stopped the spread. Employing law enforcement to carry out these involuntary isolations is a treasonous move by a corrupt government. Our personal health and that of our family is our individual responsibility and not that of any Government entity. This is a decision that is outside your legal purview. Stay in your lane.
A very concerned citizen,
Kimberly Skeith

I do not believe children should be required or mandated to receive this vaccination. It is an experiment they should not be subjected too. Our hind sight will be 20/20 years later. Right now forcing parents to do things to their kids that they don't believe is in their child's best interest is wrong. Period. Thank you for adding my comment to the ongoing discussion.

To whom it may concern,

I am a parent of two children currently in public school, and 1 who will be starting to attend this fall. I am concerned that there may be a vaccination requirement for COVID.

My children are, as of right now up to date on all required/recommended vaccinations. I feel comfortable with this because the current required vaccines to enter school have all been around for numerous years and have a track record of being safe for children. I do not feel the same about the COVID vaccination. It has not been around long enough for me to feel comfortable with my children taking it and I know more parents (vaccinated themselves) who feel the same as I do. If forced at this point to choose either to give my children this novice vaccine or pull them from public school, I will most definitely choose homeschool or another option.

Thank you for your time in reading my concerns.

Washington State lawmakers are meeting (via Zoom) to discuss adding COVID to its existing quarantine laws which would give a local health officer the ability to retain individuals or families they deem to be a threat.

Does this proposal allow health officials to use law enforcement to force an emergency order to involuntarily detain a person or group in a facility if the person/group refuses to comply with requests for medical treatment, testing, treatment, counseling or vaccination?

DEFINE A THREAT!

DEFINE RETAIN!

To the Board of Health and Whom it May Concern,

The new and experimental Covid vaccines should not be included in the school vaccination schedule, or any mandatory vaccination policy. There are multiple reasons for this:

1. Children are at very low risk from covid, especially now with the new, much less risky, variants.
2. These Covid vaccines have NO long term studies showing their safety or effectiveness.
3. Many young people who have chosen to voluntarily take the Covid vaccines have experienced very concerning side effects.
4. Covid vaccines do not prevent transmission or contracting Covid. At best they reduce symptoms, but most likely not even that.

Why would we force children, who do not get very sick from Covid, to take an experimental vaccine that has no long term safety studies, has proven to be dangerous specifically to young people, and does not prevent someone getting or transmitting Covid? Why would we mandate this for anyone? There is no reason to force this vaccine on anyone for any reason. It makes no logical sense. Which leaves us to wonder what our leaders get out of mandates like this? Is it kickbacks? Is it increased power? Because it certainly is not a reduction in Covid cases. It is not lawful to force this on anyone, but especially children.

Emergency powers are not supposed to be used to take away people's rights. The law says anyone who uses emergency powers to take away constitutional rights forfeits their office.

A very concerned,
Carrie Elmore

Dear WSBOH,

A move to make Covid 19 vaccines mandatory for all Children to attend school or daycare in Washington State is a very wrong move. Please, do not to make this terrible choice on our behalf.

Both the UK and South Africa have seen a surge in cases due to Omicron and then a steady decline in less than two months, and there is no reason to believe it will be different here.

Children still have the lowest death rate for Covid-19 and these vaccines are still only approved under emergency authorization. This would potentially be more dangerous to children who have little risk of hospitalization and death from the Covid-19 virus without having the results we want since it is obvious by now that fully vaccinated people still catch and transmit covid.

Why risk children's health for a much less dangerous and shorter lived version of this virus? Why cause a massive impact in underserved communities for something less dangerous than we have already faced before? Why create a two tier society now that most of the population is either vaccinated or has acquired immunity?

Your responsibility is too great and I hope you will be given the wisdom to make the right decision.

The bold decision this coming January 12th is to treat all citizens as intelligent individuals, capable of making informed decision for the well-being of of their children and community, instead of being forced or coerced.

Sincerely,
Joana Baumann

To whom it may concern,
I am commenting today on the proposed policies that you are discussing on January 12th. As I read down the list of proposals, I was appalled. It's hard to believe that you are a health board in the United States of America. The constitutional rights that you are violating in these policies is heinous. Mandating vaccines on anyone, let alone children, is unspeakable. You know as well as I do, that children are at very low risk for covid and most adults breeze through it as well. Yet, the adverse effects of NON FDA APPROVED vaccines are off the charts. You are proposing to force a vaccine on children and individuals without knowing their medical history or anything about their personal health.

I believe in the right to informed consent as an overarching ethical principle in the practice of medicine for which vaccination should be no exception. This is a responsible and ethically justifiable position to take in light of the fact that vaccination is a medical intervention performed on a healthy person that has the inherent ability to result in the injury or death of that healthy person.

Among the policies on this list, you are discussing putting people in quarantine by force if they don't comply with your mandates. This is called communism and we know how it ends. It ends in devastation on many levels. We live in one of the only truly free countries in the world and you have the obligation to uphold our constitutional rights and keep it free. You represent the people. Please do your job. Washington state has already lost too many people, because they've moved to free states. Stop the tyranny. Stop medical mandates.

Sincerely,
Marleen Payment

The initiative being discussed: "Immunization Criteria for Child Care and School Entry"

It is extremely important that we keep the next generation of American children safe and Covid vaccine is not the way to do it.

We do not know enough about the vaccine and its effectiveness to inject it into our children.

We know children are not at risk with this disease and it does not make any sense to vaccine against something that is not dangerous to children especially when we could be doing more harm than good.

Respectfully,
Karine Klempel

I am extremely concerned that the Covid 19 "vaccines" are even being considered as mandatory for child care and public school admission. Over my 34 year career as a public school teacher, I watched as my classrooms went from having children with virtually no chronic illnesses in the early 70s to having a good portion of my classroom dealing with some type of chronic condition by the time I retired in 2014. As I looked into vaccines in general and discovered that children now receive close to 70 vaccines from birth to age 18, I began to consider that they may be one of several contributing factors to the poor physical and mental health of many of our children. And now we are looking at Covid and the possibility of adding yet another "vaccine" mandate to the already enormous list of vaccines. I oppose making this "vaccine" a mandatory requirement for public school admission, child care or for any other reason, especially in children.

A recent Lancet study has shown that healthy children are almost at zero risk for Covid. But we have seen many cases of myocarditis and similar heart conditions in teens, particularly males, after receiving a Covid "vaccine". One recent study has suggested that myocarditis is associated with a 50% mortality within 5 years. Based on this, a teen has basically zero risk of dying from Covid and yet has a substantial risk of death from vaccination.

And then there's the case of Maddie de Garay, a teen who participated in the Pfizer trial, who suffered severe neurological injuries including seizures and permanent paralysis. Some 86% of children in Pfizer's clinical trial suffered an adverse reaction to the Pfizer Covid vaccine. Steve Kirsch has a model that estimates that 600 children have already died from Covid vaccines as of September 2021.

It concerns me especially that we have no idea as to any of the long term effects of these "vaccines". This is concerning in any age group, but especially in children who theoretically still have most of their life to live.

It also raises a red flag that the very companies who develop these Covid "vaccines" (and vaccines in general according to the 1986 vaccine Act) have absolutely no liability for any of the injuries or deaths that the vaccines cause, in this case leaving parents with a "damaged" child that they may have to care for for a lifetime and all the expenses that may accompany that.

Another factor is that these vaccines are under Emergency Use Authorization only. Even the Pfizer adult "vaccine" that was "approved" is one known as Comirnaty which is legally distinct from the actual Pfizer BioNTech and not yet available in the US. So the Pfizer vaccine most are receiving is still under EUA. Any vaccine that is under EUA should not be mandated or forced on an individual, child or adult.

Finally, we are now seeing the waning effect of all of the Covid vaccines and boosters. We no longer have a pandemic of the unvaccinated as it has allegedly been referred to, but rather a pandemic of the vaccinated, where, as Dr. Geert Vanden Bossche (a vaccine developer) tried to warn, that you never vaccinate during a pandemic. This causes the virus to mutate in an effort to evade the vaccine.

So why would we EVER want to vaccinate our children who are more at risk from the

effects of the vaccine than from dying of Covid?! And why would we want to deny them a public education, to which they have a right, by making their ability to get an education dependent on a vaccine mandate. In this "age of equity", none of this sounds equitable to me, but actually sound like discrimination. Do the right thing and do not mandate this "vaccine" for childcare or entry to public schools.

Subject: Proposition for COVID 19 vaccinations and WAC enforcement

External Email

Dear WA Department of Health Board,

It has come to the attention of parents in Washington state, like myself, that there is a proposal to mandate the COVID-19 vaccination, currently approved under emergency use authorization only for children, in order to attend school, or to add it to the required vaccinations to attend school. This is greatly concerning to myself, and thousands of parents in this state.

The COVID-19 vaccination has not been fully FDA approved for children, nor has it provided long-term immunity for any consumer of this treatment, requiring boosters frequently, for which there is little to no data on the compounding risks of vaccine boosters. It has also been made abundantly clear that adverse reactions (via VAERS or otherwise) are greatly under-reported. We also know that the risk of severe infection, hospitalization, or death due to COVID-19, especially for children, is minuscule. There is no logical reason, with variants becoming less and less severe, to make this treatment a requirement in order to attend schools.

We also need to consider the number of children and individuals who have also previously contracted COVID and have recovered fully, like myself and my children.

While I believe that COVID-19 vaccinations should be accessible to those who want or need them after consulting with their personal physicians, mandating them for children, including adding them as a school entry requirement, is unethical and unnecessary. Doing so will inevitably result in an exodus from public education much like what occurred in Los Angeles public schools. Even as a healthcare provider, I would quit my job to homeschool my children rather than subject my children to an unnecessary and unproven vaccine for them. I will consider this vaccine for them after full safety and efficacy data is available in approximately 5 years. I say this as a fully vaccinated adult who experienced adverse reactions following vaccination, and was dismissed when I tried to seek treatment.

I ask that you consider the absolute necessity of recommending COVID-19 vaccinations for children. There is sufficient evidence to indicate that not all children need this vaccine, children may experience severe adverse reactions from this vaccine - greater than what may be experienced by contracting COVID-19 itself in this age group, that the vaccine does not adequately reduce or stop transmission, and requiring a vaccine under emergency use authorization only is unethical. Doing so risks thousands, if not tens of thousands of families fleeing the public school system.

Thank you for your time and consideration.

Best,

K. Scott

Please do the right thing and save our babies. Mandating a Covid injection for children makes zero sense.

Our children have a higher chance of an adverse reaction from the shortly studied immunization than they do of having a serious reaction from naturally getting Covid. We must think with our brains and not follow the pocketbooks of government and big pharma. Where this is risk there must be a choice. That goes for everything. Blood will be on your hands.

Hello,

I would like to add my informed opinion to the decisions before your board. I am a primary care physician in Yakima Washington and have had extensive education regarding the current pandemic.

It is my understanding that one of the topics you're considering is the official mandate to require children to be vaccinated against Covid – 19. I encourage you to leave this up to parents. At least leave it up to local school boards.

Insisting on a vaccine that is under emergency use as brand new technology seems unwise. There are documented cases of myocarditis and other side effects that make it risky and therefore parents should be allowed to refuse. I am aware of a 13-year-old who died of myocarditis in Michigan. Even if these events are extraordinarily rare, the government should not require parents to take this risk.

I appreciate your service.

Concerned,
Joe Vickers, MD

Washington State Board of Health:

I am very concerned about the policies that are going to be discussed at the meeting next Wednesday, in particular, the policy to involuntarily quarantine people who refuse test, examination, or vaccine for COVID-19. I believe that this removes the freedom and choice that the constitution affords us in this country. Everyone should have medical choice. COVID-19, in particular the omicron variant that is most widespread, has been proven to be mild and not cause many deaths, as well as fewer hospitalizations than Delta. To require a vaccine that doesn't prevent spread and to quarantine those who don't comply doesn't make sense when we look at the actual data. There are credible studies that show that vaccinated and unvaccinated people have the same viral load, therefore, they spread the disease the same. The only thing the vaccine does is reduce symptoms, and this only affects the person who received it, not anyone else. It should be everyone's personal choice to evaluate their personal risk and make a decision from there. If we continue to compromise the Constitution, we are going to threaten our democracy and the freedom we have in this great country. Please consider rejecting these new policies, as they don't make sense with the direction things are going, as well as the current science/data.

Thank you for reading!

We feel strongly about not mandating vaccines for our children! We live in a free country and to subject children to mandates to receive shots/vaccines that are considered "experimental" is criminal and against our United States Constitution!!! The drug companies have made sure that they are protected from law suits for a very good reason.....BECAUSE THE VACCINES/Boosters are EXPERIMENTAL!!!! NO THANK YOU! We do not want our children used as your experimental subjects!! We Absolutely do not, will not, support mandates of these experimental drugs for our children!!!!

Subject: Proposed WAC's regarding Covid

External Email

Hello:

I've lived in Washington State since 2006 and love this state. My husband was born and raised in Washington State. We do not want to move, but if the route we are taking toward these WAC policies regarding Covid I had been informed about (listed below) are put in place many will reject or leave this beautiful state.

Many Washingtonians, especially myself and my husband and our family are completely against any of the proposed Covid policies that are overreaching and immoral. As a Latin woman, mom, wife, Washington Resident, and an American I believe these policies mentioned below are very wrong and against what our constitution represents.

We stand against proposed WACs:

WAC-246-100-070

WAC-246-100-045

WAC-246-100-040

WAC-246-100

WAC-246-105

If you have questions or comments please reach out.

Thank you for your time.

Your neighbors,

Maria and Cody Heiserman

Stop this blatant usurpation of our freedom and basic rights! My family and I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105 as I understand they are forcing people to comply with medical testing, treatment, vaccinations, examination against their free will and free choice. Furthermore, I understand they are giving such tyrannical powers as forcing people into quarantine facilities. This sounds a lot like the National Socialists in Hitler's Germany. #040 alone gives the local health officer authorization to detain Washingtonians in a quarantine facility and force whatever "treatment" they feel is in the state's best interest. This is a ploy to subject us to slavery. Please browse #040 yourself if you think I am exaggerating! No disease is as dangerous as losing human dignity and subjecting ourselves to an elitist "health officer" or anyone's subjective control. Stop this blatant usurpation of our freedom and basic rights! America has always been the Land of the Free, State government is supposed to protect the rights of the people in maintaining their Liberty, please DO that in this case.1

Thank you!

My wife and I absolutely oppose ANY mandatory or forced (experimental, gene therapy) 'vaccine' directive on any person especially on children.

Any effort to do so by any government agent or health board is a violation of personal freedoms ensured by Article one of the US Constitution and also a violation of Article one of the Nuremburg Codes.

The "experimental" vaccine is in violation of all 10 of the Nuremburg Codes

which carry the death penalty for those who seek to violate these International Laws.

The flawed tests and fraudulent death certificates, the "experimental" vaccine itself is in violation of Article 32 of the Geneva Convention.

Under Article 32 of the 1949 Geneva Convention IV, "mutilation and medical or scientific experiments not necessitated by the medical treatment of a protected person" are prohibited.

According to Article 147, conducting biological experiments on protected persons is a grave breach of the Convention.

The following violations of the Nuremburg Code are as follows:

Nuremburg Code #1: Voluntary Consent is Essential

No person should be forced to take a medical experiment without informed consent.

Many media, political and non-medical persons are telling people to take the shot.

They offer no information as to the adverse effects or dangers of this gene-therapy.

All you hear from them is – " safe and effective" and " benefits outweigh the risks."

Countries are using lockdowns, duress and threats to force people to take this vaccine or be prohibited to participate in free society under the mandate of a Vaccine Passport or Green Pass.

During the Nuremberg trials, even the media was prosecuted and members were put to death for lying to the public, along with many of the doctors and Nazis found guilty of Crimes Against Humanity.

To the Board of Health and Whom it May Concern,

The new and experimental Covid vaccines should not be included in the school vaccination schedule, or any mandatory vaccination policy. There are multiple reasons for this:

1. Children are at very low risk from covid, especially now with the new, much less risky, variants.
2. These Covid vaccines have NO long term studies showing their safety or effectiveness.
3. Many people who have chosen to voluntarily take the Covid vaccines have experienced very concerning side effects.
4. Covid vaccines do not prevent transmission or contracting Covid. At best they reduce symptoms.

Why would we force children, who do not get very sick from Covid, to take an experimental vaccine that has no long term safety studies, has proven to be dangerous specifically to young people, and does not prevent someone getting or transmitting Covid? Why would we mandate this for anyone? There is no reason to force this vaccine on anyone for any reason. It makes no logical sense. Which leaves us to wonder what our leaders get out of mandates like this? Because it certainly is not a reduction in Covid cases.

Sincerely
Jerry Elmore

Covid shots should absolutely NOT be a requirement for our children to attend school or childcare.

You comment doesn't need to be lengthy. We encourage you to remind the WSBOH that children are at extremely low risk for Covid and that the vaccines are still only EUA (emergency use authorized).

Subject: Proposition for COVID 19 vaccinations and WAC enforcement

External Email

Dear WA Department of Health Board,

It has come to the attention of parents in Washington state, like myself, that there is a proposal to mandate the COVID-19 vaccination, currently approved under emergency use authorization only for children, in order to attend school, or to add it to the required vaccinations to attend school. This is greatly concerning to myself, and thousands of parents in this state.

The COVID-19 vaccination has not been fully FDA approved for children, nor has it provided long-term immunity for any consumer of this treatment, requiring boosters frequently, for which there is little to no data on the compounding risks of vaccine boosters. It has also been made abundantly clear that adverse reactions (via VAERS or otherwise) are greatly under-reported. We also know that the risk of severe infection, hospitalization, or death due to COVID-19, especially for children, is minuscule. There is no logical reason, with variants becoming less and less severe, to make this treatment a requirement in order to attend schools.

We also need to consider the number of children and individuals who have also previously contracted COVID and have recovered fully, like myself and my children.

While I believe that COVID-19 vaccinations should be accessible to those who want or need them after consulting with their personal physicians, mandating them for children, including adding them as a school entry requirement, is unethical and unnecessary. Doing so will inevitably result in an exodus from public education much like what occurred in Los Angeles public schools. Even as a healthcare provider, I would quit my job to homeschool my children rather than subject my children to an unnecessary and unproven vaccine for them. I will consider this vaccine for them after full safety and efficacy data is available in approximately 5 years. I say this as a fully vaccinated adult who experienced adverse reactions following vaccination, and was dismissed when I tried to seek treatment.

I ask that you consider the absolute necessity of recommending COVID-19 vaccinations for children. There is sufficient evidence to indicate that not all children need this vaccine, children may experience severe adverse reactions from this vaccine - greater than what may be experienced by contracting COVID-19 itself in this age group, that the vaccine does not adequately reduce or stop transmission, and requiring a vaccine under emergency use authorization only is unethical. Doing so risks thousands, if not tens of thousands of families fleeing the public school system.

Thank you for your time and consideration.

Best,

K. Scott

Please stop the madness!

I say NO to mandatory vaccinations for children in Washington schools, as well as mask mandates. It's child abuse and not protecting anyone. The vaccine and masks are readily available and parents can make smart decision on their own without government intervention. The increased number of myocarditis and pericarditis cases after youth patients have received these vaccines should be enough of an indicator that we need to stomp on the brakes and reconsider the implications this may have on our children moving forward.

Let people live their lives and make smart decisions for their child's health and safety. The parents have full rights to their child's health and well being. No government entities should feel they wield the power over the taxpayers that fund them to push these types of mandates. The Washington government is now protecting the few, who have full accessibility to get the vaccine or to mask up, while enslaving the majority of Washingtonians with harsh mandates, when most could easily get over covid and receive great natural immunity. You'll never stop the virus until the mandates end.

Our children deserve to breathe and be free from experimental vaccines, which could cause more harm than good. Trust in natural immunity and free yourself from the coronaphobia.

I appreciate your consideration and reading my comments.

Thank you,

Nicholas Love

Hello my name is Kory and I served in the United States Army from 2010-2013. I signed away my life to fight for the American people's freedom. This is the same freedom all military personnel fought for and you guys are trying to take away. It is unconstitutional to take away our rights for this vaccination that isn't even proven to work. There is zero science on this vaccine about the long term effects and now you guys want to inject it into our children? I honestly thought this was a joke when I first read about it!! There is no way on God's green earth would I ever allow any person into my home to take any one of my kin to a facility to quarantine against our free will. I will not give up my rights over this. The same people that want this mandate passed are pro abortion... what happened to "my body, my choice"? Figure it out! Because if you pass this you will be shocked how it's actually going to turn out!

Hello, my name is Nelya Lutsyuk. I would like to leave a comment regarding the possibility of including Covid-19 injections as part of school immunization requirements. I am strongly against this. Covid vaccines have not proven to be effective in preventing the virus, nor do they stop the spread of Covid. The only thing we're told that makes getting the vaccine even slightly favorable is that symptoms are milder in people who contract the virus. This doesn't seem reason enough to require anyone, especially children, who have proven to fare exceptionally well, to get this vaccine! The WA State Board of Health should not be allowed to revoke the authority that rightfully belongs to parents in deciding what's best for their children. The same can be said about school districts nationwide. I hope you will consider these points, and may God give you wisdom in making this decision. Respectfully, Nelya Lutsyuk.

Hi,

My name is John Keen. I live in Eastern Washington and a father to two young boys. I'm writing to you in opposition to a potential policy you will be considering in your meeting next week. It is highly concerning that this policy would allow the use of law enforcement to involuntarily detain people that do not comply with COVID-19 and forcing them into quarantine. This is a gross misuse of force and should not be used against the American people.

Secondly, I'm also opposed to the potential policy that would add the COVID vaccine to the list of required vaccines for children to attend school. There is no long term data showing that this vaccine is safe for children or adults. To require this vaccine for children to obtain an education in this state is completely inappropriate.

Please say no to these policies!

Thank you for your time,
John Keen

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 99 percent of the population. Covid vaccines have little effect on Covid, and in fact, most people who get this Covid and spread it have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. They also do NOT have the right to force vaccines on citizens who do not choose them.

This is not about our health. This is about control and it is NOT in the purview of the Washington State Department of Health or ANY elected official or unelected state employee. These decisions are the right of every citizen and NO law, mandate, code or policy can override those rights. We are NOT granted rights from the State. The State is REQUIRED to protect our rights and not infringe on them.

Respectfully,
Michele Christensen

I am emailing the WSOBH member to express my deep concern for the changes to WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, and WAC 246-105 that includes Covid-19 vaccination for all Washington residents which includes our children.

This mRNA vaccine has not been FDA approved and still needs more test to be vetted and proven to be safe for the public. It does not have enough evidence to show that it's safe for our children and in actuality it show a great danger to our children. So to mandate this vaccine is not only unconstitutional but also morally wrong. All the science about Covid-19 does not support such an extreme response that strips our rights away. I strongly urge you to stop this extreme response to covid-19. Take a look at all the science and the constitution of the United States of American and the Nuremberg Code. Listen to the citizen of this great country and do the will of the people not the will of big Pharma and big Tech.

Don't let history repeat its self.

Sincerely
Krisanna Holmes

Board of Health,

I am writing in to comment on the discussion your having with regards to mandating kids covid vaccines for school attendance. Both my husband and I chose to vaccinate after seeing and evaluating the data on our risk. We are both fairly healthy and in our mid 40s so not in a higher risk category but still thought it was a fairly good risk benefit. My husband was fine but I had a couple more extreme adverse reactions although not life threatening, but I'm not comfortable boosting because of that. Our children are 8/9 and we have chosen not to vaccinate. They are both in good health and we have evaluated there risk and it is extremely low. We are not against vaccine, they have had all others but do not see the need to vaccinate with mrna vaccine which have not had the years of safety data that traditionally vaccines have. We may consider vaccinating them when a traditional vaccine is available like Novavax, but we will pull our kids out of school if it is mandated.

This email is regarding the upcoming The Washington State Board of Health meeting that will occur on Wednesday, January 12th. On agenda : Immunization Criteria for Child Care and School Entry.

Making Covid shots mandatory for child care and school admission when children are seldom to mildly effected by covid 19 is ridiculous. I will not allow my child's future to be compromised by injecting him with an STILL experimental injection that does not prevent transmission or infection. These experimental gene therapies can be more harmful to innocent children than helpful and it should be the decision of the household to make that call for their family and their child. Parents and guardians will not stand for this. You will find hundreds of kids being pulled out of the school system and we will find ways to educate our children with out fear or threat of coercion. It would be a mistake to mandate this. Make the right choice for our future generation, they deserve more from their leaders than a forced injection to make ignorant people feel safe.

Thank you,
Kelsey Downie

To whom this may concern,

I do not believe that children should be required to get the COVID-19 vaccine in order to attend school. Children are not at risk of dying from Covid-19 and the symptoms in kids are so minimal. This vaccine doesn't prevent kids from getting or passing COVID to others, so why should it be mandatory. This "vaccine" is not yet FDA approved, only EUA and it has not been properly tested. There will be so many people who take their children out of public school if this is a requirement which will lead to less students, less funding for public school, and more chaotic schools.

Please consider this as you make your decision on whether to require this of the poor innocent children who have already been used and abused throughout this pandemic. Let it be a parent's choice whether or not to vaccinate their child.

Thank you,
Melissa

Ladies and Gentlemen,

I am writing to let you know that I am absolutely against any involuntary detention and/or quarantine! This is enough! COVID is a flu or a cold that is highly contagious, I get that, but the death rate and the rate at which people are hospitalized does not constitute this type of overreach by you and/or anyone else.

We, as citizens, are perfectly capable of making our own decisions about our healthcare. Especially when the vaccination doesn't even prevent you from contracting the virus to begin with. This isn't even rational thinking to consider this type of response. Not to mention that the vaccination is not even FDA approved. The one that is FDA approved isn't available anywhere and all those that are being offered are still under an Emergency Use Authorization.

I am also expressly opposed to the mandatory vaccination of children. There are a number of overwhelming reasons NOT to vaccinate children, but three that come directly to mind are:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

I will definitely be joining the Zoom call next week, but wanted to get my opposition in on record before the meeting.

Thank you for your time and consideration.

Sincerely,

Kristine Valenciano

Hello,

My name is Jenna. I am a mother to a nine year old, a seven year old, and a fifteen month old. All three of my children attend public school, after school programs, and daycare.

I am concerned about the decision to add the SARS-CoV-2 vaccine to the list of mandated vaccines for school/daycare attendance for several reasons.

One: The KidCOVE study, which examines the effectiveness and safety of this vaccine, has measured outcomes that are not set to be revealed until an estimated date of June of 2023 (NIH, 2021).

Two: Studies that are being performed do not reveal the number of participants but rather, an estimation.

Three: These studies exclude 'unhealthy' children but do not define what constitutes 'unhealthy'

Four: Current mandatory vaccines have decades of completed research behind them - the SARS-CoV-2 does not.

If the SBOH mandates this vaccine, I will be ethically obligated to remove my children from public school and daycare.

As a healthcare worker, having taken a Hippocratic oath, I promised to do no harm; I promised that I would “not take or knowingly administer any harmful drug”. If I am uncertain of possible harm, due to the incompleteness of studies, then I am breaking that oath.

I can not, in good conscious, put something into my child's body when I am uncertain of the outcome.

Thank you for your time.

Jenna Lyman

Hello,

I just wanted to have my thoughts/comments heard. It is my choice whether or not to vaccinate my children. I should not be forced to do so to give my children the best education at no additional cost. I am a public school teacher. If vaccination is going to be mandatory, many students will be pulled from public school to either be home schooled, or placed in a private school. With both parents working now a days, most students learning at home are taught by a sibling, if distance learning is not offered in their school district. When student numbers are down, teachers get reduced -in-force. And if a private school is my only option, well I can't pay for that without my teaching job. I certainly wouldn't be able to pay for it making anything less. There are other ways to keep children healthy. The protocols the schools already have in place are enough. I have not had a student out with Covid yet!

Dear, WSBOH,

I definitely wanted to strongly voice my opinion on the following WAC's: I am against:

246-100-070
246-100-045
246-100-040

This is simply a play for more control and power over Washington State citizens. Have you considered what the mass exodus will be if these policies were enacted into law?
Result: Erosion of your tax base!

I am a native Washingtonian and will put my property up for sale to relocate out of state if this intrusion of personal privacy is enacted.

We do not need to waste law enforcement on citizens that are legally exercising their freedom of choice under the constitution of the United States

Please focus your attention on keeping Washingtonians healthy through education and healthy lifestyles as opposed to oppressive legislation without justification.

Sincerely,

Kevin Swanstrom

Hello,

My name is Jennifer Snook and I explore you to reject the ideas of requiring the COVID-19 vaccine for children participating in school or childcare in any situation. Absolutely none of the COVID-19 vaccines are FDA approved. Absolutely all are still under the emergency use authorization. Children are among the lowest at risk of covid and the least to transmit covid to others as well. The COVID-19 vaccine has 6x the amount of the spike protein as the actual virus and causes a significant amount of children (more specifically boys) to have adverse reactions like myocarditis (inflammation of the heart). The inflammation that the spike protein causes has strong adverse effects in brain tissue, reproductive organs, and more. These are serious, generally irreversible, and lifelong side effects and can/is causing death.

The vaccines have waning immunity and require boosters roughly every 6 mo to provide "protection". Many who are fully vaccinated and even bolstered are still getting covid, some are still hospitalized, and some even die. Why then are we mandating something so dangerous, non effective, and still unknown as to the long term effects of it?

Why isn't natural immunity being a major topic of discussion? It's been proven and there are peer reviewed studies showing that once you've had covid, it's one and done! You'll never have covid again. Even those who had the Alfa variant are immune to delta and omicron.

Natural immunity is for those of us who have had covid, now makes us safer than those who are vaccinated with something that isn't working.

Please say no to this dangerous requirement for our children.

I appreciate your time,

Jenni Snook

Good evening,

I am writing to ask that when you meet on January 12th to discuss making COVID vaccines a requirement for students K-12, that you would vote to not make it a requirement. Most parents like myself are against this. Vaccines are not stopping anyone from getting or spreading COVID. Please leave this as a choice, not mandatory.

Thank you,

I am opposed to forcing a mandate upon our children to be vaccinated for COVID-19 to attend school or daycare. Our children are not statistically at high risk for severe implications or death from the COVID-19 virus, with over a 99% survival rate. The risk of exposing our children to a vaccine that has no long term evidence or case studies to support they will not contract an auto-immune disease, heart disease to include pericarditis, cancer or even worse, death, is not worth it from a parents perspective. This is not a traditional vaccine that eradicates the spread of COVID virus, but rather works like a flu shot that may or may not lessen or decrease the severity of the symptoms. As a parent, I'm not willing to risk my child's long term health by exposing him to a new scientific intervention that hasn't been given the proper length of time that other vaccines have traditionally received for testing (5-10 years). This mandate is very aggressive and unethical to those parents who are not comfortable with the science thus far. This should be a choice at the parental level, it should not be a decision imposed upon parents using short-term evidence that is still evolving everyday. Traditional vaccines, that are currently mandatory for school or daycares, have undergone long term, controlled, case studies and therefore can be termed "safe" using real data. There have been millions of Americans who have received this vaccine and no one is following or tracking the long term side effects. We are hearing about them, but they are being dismissed because they are not apart of a controlled study. This is concerning, because that it was science is all about. It starts with a theory and then is followed by long term, extensive studies in a controlled environment. This is not a controlled environment & the controlled studies that have been conducted are very short term. It's more of a let's hope this works and doesn't effect our children later on.

I appreciate your attention to this matter and sincerely hope and pray that our voices are heard loud & clear. Please do not force something upon me or my child that I am more afraid of than the actual virus itself. My family has survived Covid twice; I'm afraid for our long term health if we get this vaccine. No one can guarantee that there are no long term side effects, because it takes time to determine this. My child has attended a private school, and for the last two years, it has been a safe environment. No children have been hospitalized from this virus. This vaccine should not interfere with our children's education.

Thank you & god bless!

Firstly, before anything should be implemented in as a required vaccine to OUR children's (not YOUR) vaccine schedule, there should be thorough consideration of the VAERS reporting (which is only 1% of those that report or experience adverse reactions). Secondly there is NO approved COVID vaccine that is being distributed in the United States. Furthermore a COVID vaccine is not even FDA approved for ages 5-11 (it's under EAU). There needs to be a printed list of ALL vaccine ingredients with risks and benefits for every Covid vaccine that is offered. This is a direct violation of informed consent and a COMPLETE disregard for natural immunity and asymptomatic cases in children!! This virus had a 99% recovery rate BEFORE any vaccines! There is NO logical science to back up requiring the COVID vaccine for children to attend school. Protect our freedom to choose, protect bodily autonomy, and protect our children!

SAY NO TO COVID VACCINE FOR CHILDREN TO ATTEND SCHOOL!

I am a grandmother and retired teacher, who is opposed to mandating vaccines for students. The extremely small risk of a child being hospitalized with Covid does not justify the risk of heart disease, a neurological disability or possible death from the vaccine. I know of a healthy young man who died within 24 hours after getting a shot. There are no studies on potentially harmful long-term side effects that might be experienced years after getting the vaccine. It's morally reprehensible to mandate a shot that has already been shown to cause an increase in health/heart problems in school-aged children.

Thank you for considering these concerns.

Board of Health,

I am email about the Washington State Board of Health meeting on January 12th, 2022. I am a concerned Washington citizen and mother of two and horrified that there is a consideration to add the COVID-19 shots to the required list of immunizations for kids to attend school. This is completely unacceptable and downright problematic for many reasons. Healthy children are not at risk and therefore should not be required to receive an injection that has yet to have any long-term safety studies done on it as well as the importance of informed consent that parents need to have before making a medical decision for their children, the the risk-benefit for each child is going to be different and that needs to be a part of the policy decisions.

Also, I wanted to let the board know that I am in favor of the petition filed by Informed Choice Washington that prohibits the State Board of Health from adding any Emergency Use Authorization product or any licensed product that lacks completed Phase 3 trail studies to the school required list. There should be no school immunizations that are required that have not gone through rigorous testing and the proper safety trails, our children are not to be a part of the experiment!

Thank you for your time.

To the Washington State Board of Health

I am writing as a concerned parent and long standing resident of Washington State. I would like to express my opposition to requiring a Covid 19 vaccine requirement for schools in Washington state. I am not against vaccines but in my opinion this is not a true vaccine.

- * Children are at an extremely low risk for dying from Covid.
- * Even the vaccinated are getting it and spreading it
- * The state does not mandate flu shots
- * The Covid variant is constantly changing so this vaccine is not a fix
- * More long term studies need to be done
- * Myocarditis is not a minor side effect.
- * Children are not Guinea pigs

Forcing a healthy child to take a vaccine that may have a negative long lasting side effect in order for adults to feel safe is unacceptable. It is creating fear when there is no reason to fear but to be cautious. Please consider having the vaccine as a recommendation instead of a requirement for school age children.

Respectfully yours,

Karla Byrum

Re the following discussion January 12, 2022 re
PROPOSED POLICIES:

- Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Our comments:

None of your "Proposed Policies" acknowledge the experimental status of Covid-19 injections nor do they take into consideration the FACT that children are far more at risk to adverse complications from experimental Covid-19 injections than they are to contracting the actual disease.

None of your "Proposed Policies" acknowledge the existence of successful early treatment options that have been aiding and curing the infected who now retain naturally acquired immunity, nor do these "Proposed Policies" recognize the FACT that 99.9% of the population survives and thrives post infection. None of your "Proposed Policies" take into account the FACT that this pandemic has now become ENDEMIC. This also means every single policy you have required in the State of Washington to date has failed to control viral spread.

Locking people up in so-called quarantine/internment camps and *forcing people to receive experimental drug therapies clearly violates the Nuremberg Code and *you people* will eventually be held responsible for such tyrannical actions.

Not only will such "Proposed Policies" create further chaos they are completely incapable of stopping the spread of an airborne endemic virus.

Please, do open your eyes and stop pretending that you can control viral spread through internment camps, forced experimental injections, or other forms of coercion. The so-called Covid-19 injections have OBVIOUSLY FAILED to control viral spread particularly among those who have chosen to be double and triple-injected.

If you engage in said coercive behavior: you will eventually be held personally responsible for your actions in support of coercing any single person in the State of Washington into receiving experimental drug therapies.

Sincerely,

Hilary and Bob Hammett

To the Washington State Board of Health Representatives:

I am deeply concerned about the direction our state is heading as far as vaccination protocol for students. If the Covid vaccine is added to the mandatory vaccine schedule for public schools, I will be withdrawing my seventeen year old son from the school system and he will not be able to graduate with his class, which is his wish and right. To add the Covid shot to the vaccine schedule is absolutely unjustified. This vaccine is still experiment, there is no liability for the multi billion dollar companies that produce it, and there are significant known harms and deaths (at least 20,000 worldwide) that are a result of these vaccine. Please look for yourself at the VAERS website. I also recommend exploring these sources which show that the FDA approved vaccine causes more harm than good:

<https://www.canadiancovidcarealliance.org/wp-content/uploads/2021/12/The-COVID-19-Inoculations-More-Harm-Than-Good-REV-Dec-16-2021.pdf>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.canadiancovidcarealliance.org/wp-content/uploads/2021/12/The-COVID-19-Inoculations-More-Harm-Than-Good-REV-Dec-16-2021.pdf&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C0d6e300a7951488c2fec08d9d1605f4f%7C11d0>

<https://www.scivisionpub.com/pdfs/us-covid19-vaccines-proven-to-cause-more-harm-than-good-based-on-pivotal-clinical-trial-data-analyzed-using-the-proper-scientific--1811.pdf>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.scivisionpub.com/pdfs/us-covid19-vaccines-proven-to-cause-more-harm-than-good-based-on-pivotal-clinical-trial-data-analyzed-using-the-proper-scientific--1811.pdf&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C0d6e300a7951488c2fec08d9d1605f4f%7C11d0>

Lastly I would like to say that it is absolutely abominable to me that your board is even considering passing WAC-246-100-040 "Procedures for Isolation or Quarantine ". This is in violation of the Nuremberg Code. To suggest that a law enforcement officer should be bound to enforcing such an unjust infringement on our civil liberties as protected by the Constitution of the United States of America is smearing our forefathers intentions to protect its citizens in the mud and likening our society to Nazi Germany and our police to the Gestapo. It adds insult to injury for our loyal Police Officers, who have been mandated this life threatening vaccine in order to keep their jobs of protecting the American People.

I ask you all to listen to your conscience on this matter and explore the information presented in the above links. The number of hospitalizations and deaths in school age children as a result of Covid 19 is minuscule. We do not know the long term effects of these vaccines and they have already proven to be unsafe as well as ineffective in preventing the spread of the virus.

Thank you for considering my sincere concerns. Please do your job and do not vote to approve these unconstitutional measures in Washington State.

WSBOH,
No immunization should be mandated by the state. It is a parental decision. And if your agenda item for 2:30 is in regards to the Covid vaccine, a child is 100 times more likely to die from the vaccine than from Covid, not to mention all the dangerous possible health problems it can cause. LAUSD tried, but failed, to enforce this EUA experimental vaccine on their students, so please don't try to push it on our children here in Washington.
Sincerely,
Joanne Carrieres

I am addressing all of you today to please say NO to the covid19 shot mandate for k-12 schools and childcare facilities. This is a massive infringement on parental rights. Washington state has a horrible track record of taking rights from parents, such as allowing abortion and gender transitioning at the age of 13 with out parent knowledge or consent. As a parent of 4 children that would be affected by a covid 19, k-12 mandate I am pleading with you to preserve parents rights to choose to vaccinate or not. There is no doubt if this mandate should be approved I will withdraw all of my children from public education. I will not allow my children to be a part of this experiment. The shots available in the USA are ONLY approved for emergency use authorization and have not been approved by the FDA. There are no long term studies to prove the shots will not harm our children. There is copious amounts of data and studies that point towards numerous adverse effects of taking the covid 19 shot. One such study suggest the spike protein is not anchoring at the injection site as planned and are floating freely through the body. These studies show that they typically end up anchoring very often to the bone marrow and ovaries. This suggests possible autoimmune disease and future infertility. As a mother whom spent over 5 years to get pregnant and over \$30,000 I would never do something to my 3 daughters that could potentially put them through the same mental and financial pain I suffered during infertility. I also do not want to subject my children to any other possible harmful diseases. To date 694 children ages 0-17 in the USA have died from covid 19 see this CDC link:

https://data.cdc.gov/widgets/9bhg-hcku?mobile_redirect=true

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdata.cdc.gov%2Fwidgets%2F9bhg-hcku%3Fmobile_redirect%3Dtrue&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C44c826f86ef844ca106d08d9d1b1574f%7C11d

While I am sadden by the loss of life of all of these children, I do believe for me this is not a big enough concern to gamble with the health of our children by mandating this covid shot.

In fact as of December 16th 2021 there have been a total of 6,483,703 cases of children ages 0-17 in the USA. <https://www.statista.com/statistics/1254271/us-total-number-of-covid-cases-by-age-group/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.statista.com%2Fstatistics%2F1254271%2Fus-total-number-of-covid-cases-by-age-group%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C44c826f86ef844ca106d08d9d1b1574f%7C11d>

by my calculations this concludes a .0107% chance of death in children. Now ask yourself does this extremely low death rate justify experimental shots being mandated to children of this age group?

Lastly, the covid 19 shot has not proven to stop the spread or the ability to get covid 19, it has only shown to reduce hospitalization and death of SOME of the variants. This further proves that vaccinating should be an individuals choice (and parental) because the decision to not vaccinate will not put others whom have chosen to vaccinate at any additional risk.

Please stand for parental rights and our God given rights and freedom to choose for ourselves by saying NO to the COVID 19 shot mandates.

Respectfully,

Katie Anderson

Hello,

My husband and I are appalled that Mead School District would even consider requiring children to receive a Covid vaccine.

Are you even aware that there is not one approved vaccine? Every single covid vaccine is still under an EUA only. The vaccine that many keep claiming is approved is known by the name of Comrinity, made by BioNTech which is now Pfizer-BioNTech. Comrinity is not only not approved, other than EUA, it also is not available in the USA.

I will repeat this: There is NO FDA approved covid vaccine available. None!

Prove me wrong by sending me proof of a covid vaccine that is 100% fully FDA approved and not only EUA. I will waiting for your email.

I want you all to understand that this school district is opening themselves up for major class action lawsuits by every parent that refuses to allow their children to be injected with these EUA vaccines. These "drugs" are not approved!

Not only are they not approved, but believe or not, you are not the parent of our children. You have no authority to attempt to coerce anyone into taking an experimental vaccine. You may think that you have that power, but you will find otherwise in time, if you should attempt for force this issue.

The schools job is to educate our children and not to force unapproved MRNA vaccines on anyone.

These so called vaccines, have become politicized, including by the educational system.

Shame on this school district for even considering an attempt to force a parent to allow a EAU injection that is loaded with MRNA to enter their children's bodies.

My husband and I love our children and we would never authorize them to be used as an experiment!

What do you all know about MRNA technology?

Have you ever listened to, Robert Malone, the single most qualified MRNA expert?

Perhaps you should.

Are you aware that he is 100% against the use of MRNA in any of the covid vaccines?

Finally, I would like to ask specifically what qualifies each of you to make any decision based upon a vaccine that is an EMERGENCY AUTHORIZATION USE ONLY vaccine?

You do understand that means that these vaccines are still experiments, right?

Let it be known that we are 100% against all covid vaccines. There is not enough information or studies available at this time Matter of fact Pfizer has been attempting to hide results from their vaccine trials. They have requested that the results from their vaccine trials not be seen by the public for 50+ years. That should tell you all something.

We are strongly against the effort of any forced covid vaccine!

Thank you

I have great concern about the upcoming proposed policies on your upcoming meeting on January 12.

Allowing local health officers to use law enforcement to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility is against our constitution. It is against everything we as Americans believe in and have fought for. It steps on the personal choices and freedoms of every citizen of this great country.

Another concern of mine is including the Covid-19 injections as part of school immunization requirements. Fluor pneumonia vaccine is part of that. Covid is no different. Parents still should ALWAYS have a choice in the medical care of their children. We are a country built on freedom, DO NOT take these freedoms away.

In order to have a fair discussion on this, members from East Washington should be included to weigh in on these decisions and the people of this region is being poorly represented.

Sincerely,
Marianne Bloxham

I strongly oppose requiring the current Covid vaccinations for children to attend a child care facility or school.

As studies have shown, most children that contract Covid recover quickly and completely.

All vaccinations should be at the discretion and choice of parents and NOT mandatory for school attendance.

Sincerely,
Kathy Koehler

Dear Board Members,

The poposed WAC 296-100 is a bad law. It deprives Washington State citizens of their US Constitutionally guaranteed civil liberties, is a dramatic overreach into the personal medical lives of citizens and nears the Australian approach to the unprecedented abuse of power in the western world. Moreover, this law is way out of touch with the current state of the so called pandemic. Covid has become a thing of the past and is weakening in society except among the "vaccinated"

Whom are filling hospitals with adverse reactions and covid due to the replication of the virus' in their bodies from "vaccine" that even Fauci admits doesn't protect people from infection.

It's time to leave this chapter behind us rather than double down on junk science.

Please pull this proposal from consideration and save the great State of Washington.

Respectfully,
Michael Vert

Decisions on whether to put relatively new vaccines into small children is not a decision to be made by any government entity. This decision should only be made by the child's parent. Many medications have been recalled due to unforeseen side effects and we will not know all the possible complications of Covid vaccines for years. Any bill that mandates this is absolute overreach and should never be CV inside red please protect our young.

Sincerely
Lois Silbernagel

I hereby submit this formal comment to state unequivocally that WA should under no circumstance attempt to enforce covid 19 treatment (in the form of what is currently called a vaccine) upon any child, adult or resident of WA state. Health dept or law enforcement have no place to demand vaccination, or penalize or force ably quarantine for a illness to which 92-98% survive.

Where there is risk in a treatment there must be a choice. We residents of WA are demanding guard rails in this matter. I oppose the Dept of Health infringing upon WA citizens in any way , adult or child, regardless of vaccination status.

This new experimental treatment absolutely should not be added to any list of required immunizations. It is too new with too many known adverse affects especially in younger populations.

Thankyou and please submit this comment to the record.

Sincerely,
Karen Gervais

Dear Washington State Board of Health,

I strongly oppose the mandating of these Covid shots for children and the forced medical compliance measures being proposed.

To say that we aren't responding to this virus correctly is an understatement. The collateral damage of lockdowns and mandates has proven to be much worse than the virus itself, with no proof of their desired effect. The bulk of the negative toll is being placed on our children with unprecedented psychological and emotional damage. Prophylaxis options, early treatment safe and effective drugs, and even proven effective antibody treatments have been suppressed by our government in exchange for the one-size-fits-all vaccine campaign. This has caused irreversible damage to our faith in public health. The answer isn't more control and forced compliance. We already don't trust you.

We know the time for these particular vaccines to pull us out from under the virus has come and gone because the virus the vaccines were created for no longer exists. These single spike Wuhan strand vaccines are now irrelevant. Simply put: the virus has moved on and it's time we do too. We're driving the multi-vaccinated to produce the same now-outdated immune response over and over instead of allowing the community to acquire multi-faceted broad immunity through natural infection of a mutating virus. Stop the blockading of information of prophylaxis regimens, make widely available safe and effective repurposed drugs for early treatment, and stop the limiting of effective monoclonal antibody treatment to those who are in the advanced stages of covid. Help your people!
It's time for our government to protect our right to life and liberty, not to suppress it all in the name of "public health".

Thank you for thoughtfully considering my comments.

From what I understand you guys are trying to allow law-enforcement WAC 246-100-070 officials to use law-enforcement to force an emergency order to involuntarily detain a person or group of persons to be isolated in a quarantine facility. Also WAC 246-100-045 following refusal to voluntarily comply with request for medical exemptions testing treatment counseling vaccines. WAC 246-100-040 the specifics come from WAC 246-100 including the COVID-19 injection as part of the school immunization requirement using WAC 246-105

You are allowing everyone to comment on this. I hope you do realize by trying to enforce anything on people is sick and disgusting not sure what world we're actually living in that mandate a vaccine that is not working, there is much evil going on in the world and governor Insley is part of that evilness I'm sure if you try to pass this any of you you will most likely start a war nobody in their right mind will be forced into a camp we are not living in Germany with Hitler this is America and it's unconstitutional. There are many people I know that have been vaccinated and many that have not been and all of them have still gotten Covid and it is not because of the unvaccinated. There's a bigger plan here and clearly Insley is behind it and maybe many of the people trying to pass this. We will all stand together to fight this my grandchildren and my children and nobody else will be forced to do anything. Washington state doesn't even have the biggest issues so what is behind all of this control fear political gain power money and so many other evil things. Many people see through this so please don't waste our time don't waste our money don't waste another minute trying to manipulate a mandate on people that have brains and can think for themselves. What happens when you cage (try to control) people they don't respond very well. I hate to tell you this but there is more of us out there than you realize that will not put up with your crap you're indecency your sickness your illness your mind games why do you think people aren't working right now good people that left their jobs because they won't buy into your BS. It's not because they're lazy it's because they're hard-working good decent people and you're trying to destroy our country you're definitely trying to destroy the state of Washington. So that's my statement enough is enough.

I am against requiring school age children to receive the Covid vaccine in order to attend school. I believe the vaccines are not fully safe and since they DO NOT prevent Covid, they are, in my opinion, useless. Even the CDC are uncertain of the long-term effects of the vaccine. Let the children attend school, regardless of their vaccine status. Their learning is much more important than lining the pockets of the drug makers.

To the Board of Health and Whom it May Concern,

The new and experimental Covid vaccines should not be included in the school vaccination schedule, or any mandatory vaccination policy. There are multiple reasons for this:

1. Children are at very low risk from covid, especially now with the new, much less risky, variants.
2. These Covid vaccines have NO long term studies showing their safety or effectiveness.
3. Many young people who have chosen to voluntarily take the Covid vaccines have experienced very concerning side effects.
4. Covid vaccines do not prevent transmission or contracting Covid. At best they reduce symptoms, but most likely not even that.

Why would we force children, who do not get very sick from Covid, to take an experimental vaccine that has no long term safety studies, has proven to be dangerous specifically to young people, and does not prevent someone getting or transmitting Covid? Why would we mandate this for anyone? There is no reason to force this vaccine on anyone for any reason. It makes no logical sense. Which leaves us to wonder what our leaders get out of mandates like this? Is it kickbacks? Is it increased power? Because it certainly is not a reduction in Covid cases. It is not lawful to force this on anyone, but especially children.

Emergency powers are not supposed to be used to take away people's rights. The law says anyone who uses emergency powers to take away constitutional rights forfeits their office.

A very concerned,
Carrie Elmore

While I see the big push for children to be vaccinated, the data does not support the need. For what purpose? To save children's lives? Data speaks that Covid isn't killing children, and is rarely hospitalizing them. Out of caution then? Caution for who?

Please let parents have a choice in decisions about their children. The more you draw a line in the sand, the more children you'll lose to public education, thus impacting the educational institution adversely. Consequences of negating parents choices. Sad.

WA State Board of Health,

I am in support of Dr. Xavier Figueroa's petition requesting that the WA State Board of Health adopt a new, permanent rule prohibiting the Board from adding to the daycare or school requirements any Emergency Use Authorized (EUA) product or any licensed product formulation which has not yet completed Phase 3 clinical trials.

To require the administration of a medical procedure under an EUA is illegal and immoral. That is especially the case of a child who can never provide informed consent by the very virtue of their age.

I am writing you all today to state my concerns about mandating kids 5 and up being required to get the COVID vaccine. Our kids are still so young and have their whole lives in front of them. We have no clue how this vaccine could affect our children long term. We have seen through the last 2 years that yes kids have contracted COVID, but it does not severely hurt them. I feel that taking the time we would normally take to test a vaccine is something we owe it to our kids.

Over the last few months in King county, we have restricted NON vaccinated people from enter Nonessential business, yet over the last month COVID has been on the rise, and our hospitals are filling up. SO, I ask is the vaccine doing what it is supposed to be doing. Are we willing to take a chance on our kids and their futures? How does this benefit them or you?

I understand that we already have vaccines in place that the kids should have to enter school, but these vaccines have been around for years. And with the proper form parents can opt out of those vaccines for their children. We also know how and what these vaccines will do to/for our children.

I plea with you to really look at the big picture of what is going on and if this vaccine should be mandated. Is this vaccine real slowing the spread of COVID? Maybe the SARS-CoV-2 strain, but it doesn't seem to slow down the spread of all the variants. It's one thing to ask adults to get the vaccine, but it is another to mandate our children to get it when we have no data to show the positives or negatives of the vaccine.

Please don't do this. Let's take all the politics out of this and look at what is really going on FOR OUR CHILDREN.

Thank you
Marci Rauscher

Subject: URGENT

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

I oppose the proposed WAC's 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against covid-19 injections as part of the school immunization requirements using WAC 246-105.

Subject: Vaccine

External Email

I am writing you all today to state my concerns about mandating kids 5 and up being required to get the COVID vaccine. Our kids are still so young and have their whole lives in front of them. We have no clue how this vaccine could affect our children long term. We have seen through the last 2 years that yes kids have contracted COVID, but it does not severely hurt them. I feel that taking the time we would normally take to test a vaccine is something we owe it to our kids.

Over the last few months in King county, we have restricted NON vaccinated people from enter Nonessential business, yet over the last month COVID has been on the rise, and our hospitals are filling up. SO, I ask is the vaccine doing what it is supposed to be doing. Are we willing to take a chance on our kids and their futures? How does this benefit them or you?

I understand that we already have vaccines in place that the kids should have to enter school, but these vaccines have been around for years. And with the proper form parents can opt out of those vaccines for their children. We also know how and what these vaccines will do to/for our children.

I plea with you to really look at the big picture of what is going on and if this vaccine should be mandated. Is this vaccine real slowing the spread of COVID? Maybe the SARS-CoV-2 strain, but it doesn't seem to slow down the spread of all the variants. It's one thing to ask adults to get the vaccine, but it is another to mandate our children to get it when we have no data to show the positives or negatives of the vaccine.

Please don't do this. Let's take all the politics out of this and look at what is really going on FOR OUR CHILDREN.

Thank you

To all members of the Washington state board of health:

I am writing to voice my concerns over the proposed policies WAC 246-100 and 105. I, and many other concerned citizens, are completely against such policies and strongly believe them to be an over reach on the part of our government. The long term effects will be detrimental to the families of our state. Please consider the voices of the people you work for and do not pass these policies, which infringe on our basic human rights. It will be a terrible mistake to impose these policies on the people.

Subject: TIME SENSITIVE Meeting tonight comment NO MANDATE for children

External Email

To the Wa Board of Health,

Do not attempt to take away the rights of parents to choose what is best for their children. This America, we have a constitution. Do not be swayed by propaganda that the vaccine is safe and effective for children. It is not. Pfizer is so clear about this they have asked a federal judge to give them 75 YEARS to disseminate all their data under the freedom of information act ! Everyone vaccinated will be dead in 75 years. There is NO proven data that children will not have reproductive issue and we already know, trial studies with children did not follow required protocol. Our male youth are having heart issues and death from related heart issues at alarming rates. Our young women are having spontaneous abortion in the early first trimester before they even know they are pregnant. The Omni variant has very mild symptoms and will create herd immunity in the youth who are quickly recovering.

Other highly populated countries have over come Covid with drastically lower death rates from using proactive readily available treatments and only vaccinating the vulnerable, infirmed, elderly or immune compromised. NOT CHILDREN.

The below sources are legitimate, documented and factual. Most have been removed from easily accessible searches on the internet and are more difficult to find now, so I am including links.

I challenge you to disemnante this to the full board. Become educated and not follow the lemmings before you make a drastic catastrophically damaging decision for our youth. PATIENCE and EDUCATION is WISDOM.

Subject: Vaccination Requirement Proposals for Schools

External Email

I understand the SBOH is considering vaccination requirements for schools K thru 12. I am 100% against the proposal of mandatory vaccination for school children. I am also absolutely against involuntary detaining any person or family due to the reasons listed in the proposed policy. Both vaccinated and unvaccinated people can spread Covid-19, so stop the discrimination and hatred of unvaccinated people who may have valid reasons to question the vaccine as this has divided our Country, While it appears to alleviate some of the symptoms you can still get Covid-19 even if vaccinated. It is shocking that you would even consider these policies.

Subject: Upcoming vote related to vaccine mandates

External Email

To All Washington State Officials who represent me,

I am writing you as a concerned citizen of Washington state. I understand you have a major decision coming before you to consider vaccine mandates for children as well as adults. I urge you to take into your thought process more than the current accepted binary conversation that the vaccine is the one and only way to proceed in health for our communities and states.

In years past, we as parents, families and supported by the medical community considered natural immunity strong and robust. We currently have doctors who are successfully helping to keep sick patients out of the hospital, and they need more physicians to help them. There is more to this story on a successful way through this, and your decision is an important part of it.

There are not enough long-term studies regarding the use of the Covid-19 vaccine and the option of natural immunity needs to be a part of this conversation if we are truly wanting to follow the science. The fact that the drug manufacturers have requested to wait to release their data for 75 years creates confusion and concerns on why they are not acting with transparency. Recently the CDC director and Dr. Anthony Fauci have admitted that the vaccine itself does not stop transmission or infection. This is the logical disconnect between facts and political agenda.

In addition, there are thousands of deaths and adverse reactions reported, though not published through mainstream media. I will provide you links to some of these sources if you want.

You will be looked on in history for the vote you are about to make. How will you choose to stand for the liberty and freedom our country is rooted in? Can you imagine what caused our state and government to place Germans and Japanese citizens in camps during the 2nd World War? It may have seemed like the best option at the time, however, it is viewed correctly today as a human rights abuse. It was a decision made out of fear. I urge you to make a decision based on courage, transparency, medical facts, which come from all places, including those that are being silenced in the main media. Please do not allow fear to be part of your decision. Fear of what others think or say, fear of job loss, lack of promotion, fear of possible personal cost if you stand against the swell

of the current tyrannical narrative. You have so many people cheering you on to stand for human rights including medical freedom of choice.

Sadly, the push for the mandate of vaccines and the proposed policies which could follow will place health officers in the possibility of managing a police state. We are not in an emergency situation that would justify the use of law enforcement to order persons involuntarily to isolation facilities or coerced medical intervention. If this continues Washington board of health is considering medical tyranny. Not only is all of this discussion in direct violation of the Washington State Constitution and the US Constitution, but the proposed policies are also in direct violation of the Nuremberg code article 6 section 3 that states: No government can mandate or force medical treatment without individual consent.

Please stand for medical freedom of choice for the citizens of Washington.

Subject: Urgent

External Email

I am sending this email to urge you, as a member of the WA state Board of Health, to please vote AGAINST applying current infectious disease WAC codes to include Covid-19 for all WA state residents!

This is an outrageous abuse of power and every person in WA state and across the nation should strongly object to this invasion of our privacy and our liberties as freedom loving Americans!

To allow local health officers to use the law (WAC 246-109-070) to enforce these "Emergency Orders" (WAC 246-100-045 & WAC 246-100-040) is...to say the least...tyrannical! And of course it goes with saying that this is illegal and goes against the NUREMBURG CODE Article 6, Section 28!

No policy should disrespect the rights of all to make their own health care decisions. Public health is important, but NOT at the expense of losing our GOD given freedoms. Please vote NO to these "Emergency Orders"!!!!

Thank you,
Jennifer Beatty

Subject: Vaccine Mandate Comment

External Email

To whom it may concern:

I am writing to ask you to vote against all vaccine mandates. Vaccine mandates violate fundamental human rights, notably the right to prior, free and informed consent for medical interventions. In a free society, everyone should have complete power and control over their own bodies. I urge you to do all in your power to ensure a return to the democratic principles upon which this country was founded. Especially, when the chances of survival from COVID is 98.23% for adults and even higher for children at 99.985%.

I realize your role is to maintain the legislation that "it is necessary to protect the health of the public and individuals by providing a means for the eventual achievement of full immunization of school-age children against certain vaccine-preventable diseases" (RCW 28A.210.060

<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx?_id=6879&_z=z
through 28A.210.170

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx>). Furthermore, your responsibility is to make decisions for public health for the "immediate preservation of the public peace, health, and safety, the support of the state government and its existing public institutions" ([1979 ex.s. c 118 § 13

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fleg.wa.gov%2FCodeReviser%2Fdof>
). Unfortunately, the current inoculations have not proven to protect the public from
transmission or infection of the Covid-19 virus . The inoculation concoctions still have an
EUA status and have not completed Phase III safety trials. EUA products are, by
definition, experimental and thus require the right to refuse. Under the Nuremberg Code,
the foundation of ethical medicine, no one may be coerced to participate in a medical
experiment. No healthy adult or child should be injured or die from a vaccine imposed
upon them by their government.

What we know now about COVID-19 and children:

* Almost 100% of kids don't suffer from severe COVID

> <https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fservices.aap.org%2Fen%2Fpages/novel-coronavirus-covid-19-infections%2Fchildren-and-covid-19-state-level-data-report%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ceb6e59c97c0949260e7e08d9d2109e74%7C11>. In fact, many have no symptoms at all. Thus, they may have already had COVID which is another excellent reason not to get the vaccine.

* The World Health Organization

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.precisionvaccinations.com%2Fsays-children-should-not-receive-covid-19-vaccines&data=04%7C01%7Cwsboh%40sbob.wa.gov%7CEb6e59c97c0949260e7e08d9d2109e74%7C11d>
(WHO) has announced that young people should not take the vaccine.

* A concerning number of young people

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdeconnectut-teens-hospitalized-heart-problems-covid-vaccines%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ceb6e59c97c0949260e7e08d9d2109e74%7C>, especially those under 30, are suffering from myocarditis (heart inflammation), blood

clots, low platelets and more following COVID-19 vaccination.

* The risks of COVID-19 vaccination adverse outcomes certainly outweigh the benefits to children and young adults who are considered low risk populations.

* Parental rights to make independent, informed decisions regarding their children's medical interventions, including vaccines, are being threatened.

* Some scientists have raised concerns that the safety risk of COVID-19 vaccinations have been underestimated. As of October 29th UPDATE, there have been 856,919 vaccine injuries including 18,078 deaths following COVID-19 vaccination.

* Clinical trials in children and young adults are ongoing and will not be completed for at least one year.

* Not a single published study has demonstrated that patients who have had a prior COVID-19 infection benefit from the vaccination. So why recommend all kids get the shot?

It's time to end the use of COVID-19 as a pretext for governmental coercion and mandates. The public is waking up to the cascading negative impacts upon society from elected officials wielding unprecedented power over the citizens of this country. As a resident of Washington state, and a concerned citizen, I urge you:

-- Do not support any legislation or directive coercing people or mandating medical interventions--including vaccines

-- Do not support any legislation or directive requiring people to wear masks

-- Do not support any legislation or directive that deprives people of the right to
congregate

-- Do not support any legislation or directive establishing lockdowns

- Do not support any legislation where employers can enact coercive tactics to overrule a person's rights to body autonomy

There is a reason many people in our current administration are demanding that you negate any and all personal morals, defy our constitution, harm others, create public fear, and avoid encouraging effective means of immunity. Money. It may not be the root of all evil, but it can certainly feed those roots. These companies, including our government agencies that are financially benefitting from these inoculation mandates, are making approximately \$1,000 per second from injecting people with questionable and life threatening substances. Many members of our community and state, who have been inoculated by the Covid "vaccine" are still becoming infected with the virus. This is not proven protection. This is experimental drug use. Is corrupt money and power, in the name of a science experiment, more important than the health and welfare of the people of our state? The very people you serve to protect? I also support the petition prohibiting the Washington State Board of Health from adding any EUA product to the required vaccination list. This has never been done and should never happen now or in the future.

May quality judgment and moral perspective be the lens through which you make your

decisions, and may fraudulent claims by those who have personal and financial agendas not obscure your ability to make determinations for the good people of our state.

Sincerely,

Kristyn Hardy

Subject: Upcoming Proposed Policies

External Email

Hello,

I am a Washington State resident and have become aware of the proposed policies to be presented on January 12th.

I am writing to register my emphatic opposition to mandating Covid-19 vaccines for school attendance.

I am also writing to register my opposition and absolute outrage at the prospect of the involuntary detention and isolation in quarantine facilities of those who refuse to comply with requests for medical examination, testing, treatment, counseling, and vaccination. The right to refuse these things is protected by both our state and federal constitutions, and their violation brings to mind (and I do not draw this comparison lightly) the horrors of Nazi Germany.

I urge you to utterly reject these policies and stand as an inhibitor of the evil that would come of them.

Respectfully,

Maggie MacInnis

I saw you were asking for input on having covid vaccinations as a school requirement. In the future the covid vaccine might be a good requirement. Right now no. We would like to see more research and follow up on vaccine reactions and long term side effects on children. Please get some time and research before we mandate it for our children.

In interstate of stopping the spread of Covid-19, is support including Covid-19 to the current WAC already in place IF a person(s) don't voluntarily self isolate or quarantine when they are carriers of the virus and aren't following safety measures to ensure they don't expose other individuals. Examples would include:

Children going to school unmasked and visibly displaying symptoms. In this instance, they should stay home. If they don't, I support the legal implications that the WAC provides and support a forced isolation.

I support the same for individuals continuing to work when sick with Covid-19. A forced isolation is supported.

If an individual does not self isolate under those types of conditions, they should be forced to. The lowest level of force should be used to gain compliance

WA State Board of Health,

I am in support of Dr. Xavier Figueroa's petition requesting that the WA State Board of Health adopt a new, permanent rule prohibiting the Board from adding to the daycare or school requirements any Emergency Use Authorized (EUA) product or any licensed product formulation which has not yet completed Phase 3 clinical trials.

To require the administration of a medical procedure under an EUA is illegal and immoral. That is especially the case of a child who can never provide informed consent by the very virtue of their age.

Subject: Vaccine mandate

External Email

The amount of myocarditis cases in children since the vaccine has been administered in ages 5-11 has sky rocketed. There is no denying that science. I do not support mandatory vaccines for children to attend school. I will forever advocate for my children and if this mandate affects their ability to receive public education I am fully prepared to homeschool.

NO VACCINE MANDATE!!

Hello,

I am completely against any of the proposed Covid policies that are over reaching and immoral. I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

Our children are in vulnerable developmental stages and any decision we make today directly impacts our youth. Suicide rates in children have increased since this "pandemic" began. They have suffered the loss of in person school, been secluded from friends and family, and have been forced to wear a mask. This vaccine mandate will cause a further divide among our children, leading to bullying, segregation, and mental illness.

Our children deserve better. WE can do better.

Thank you,
Kimberly Huff

Subject: Vaccine mandate concerns

External Email

As a parent of three children, I am generally pro vaccination and support nearly everything we can do to keep our kids safe and health.

However, in the case of the COVID vaccine, I am 100% opposed to any type of mandate for them.

Why?

Recent data shows that TWICE as many kids have died from the vaccine as have died from COVID.

And this is from a disease that we now know that kids are at negligible risk of hospitalization and death (kids 0-19 have a 99.9973% survival rate according to a Sept 2021 Stanford University study).

Injecting a viral gene into a child's body and forcing it to make spike proteins has caused and may continue to cause damage to a child's:

- Brain and nervous system
- Heart and blood vessels
- Their reproductive system
- and this vaccine can trigger fundamental changes to their immune system

Once these damages occur, they can't be undone.

How can you fix lesions within a child's brain?

How can you fix a child's heart tissue after it is scarred?

How can you fix reproductive damage that could affect future generations within your own family?

Do we adequately understand the risks when most pharmaceutical products need 5 or more years of testing and research to determine if they are safe? And we simply don't have that in this case.

Our children do not represent a risk to their parents and grandparents.

Please do not mandate vaccines for children.

Thank you for hearing my concerns.

Respectfully,

Nataliia Stankovich

I am writing to express my opposition to Agenda item 8#, regarding mandating COVID-19 vaccines for child care centers and schools. Children are very low risk of contracting COVID, and low risk for having severe illness. These vaccines do not prevent transmission. There is no reason to require them for schools, or anything else for that matter. I am highly appalled you are even forming a Technical Advisory Group to even reconsider such a thing! There is no long term data on these new vaccines. Reports of myocarditis are a grave concern. I am opposed to any mandate for COVID vaccines.

I am in strong support of Agenda Item 11#, asking the board to establish a new rule that would prohibit them from adding any EUA product to the vaccines that are required for school.

Thank you-

Heather O'Briant

Subject: Thoughts and Concerns regarding Covid-19 inclusion in WAC codes

External Email

Hello Washington State Board of Health,

It has been brought to my attention that the board will be having a meeting to discuss applying current infectious disease WAC codes to include Covid-19 for all Washington State residents on January 12th. As a lifelong citizen of this beautiful state, it is disappointing to see this measure being taken.

I know this virus has caused, for many, concern, heartbreak, and devastation. I also know that there have been previous situations that have caused similar thoughts and feelings. However, what we do know is that the odds of surviving this illness are very much in our favor (I believe it was around 99% being the survival rate), especially if you take proper health precautions to lead a healthy lifestyle. I know that we survived similar conditions in the past without having to take such extreme measures.

We have learned a lot about this virus (not everything, but a good amount), and with the current pattern that it is currently being displayed, we won't be able to "eradicate" or "completely defeat" this virus. As sad as it seems and as ambitious as the American spirit is to pull off such feats, there are many organizations and groups, including the Cato Institute, that are now saying that this virus is going in the direction of endemic. Early research on the Omicron variant seems to point in the direction of it being more spreadable, but not as heavy-hitting as the previous Delta variant. Though its ability to spread can be a cause for concern, if it is duller in the effects it can have on the human body, this might be a sign that it is indeed weakening.

It is interesting to me to see that there are countries around the world, including Norway and Singapore, that are making attempts to lift restrictions and "live with the virus". We have also seen that certain states within the U.S. have fared very equally if not better with limited restrictions than states that have imposed heavier mandates, especially during this winter. Though this may be a bit of a trial and error period, we also see some encouraging signs.

In this case, I am concerned that Covid-19 being included in the WAC codes can cause more harm than it is worth. Using law enforcement officers to track down and involuntarily detain U.S. citizens to be isolated in a quarantine facility is a bit of a government overreach and sounds like a bit of a reenactment of the internment camps during a dark period in this country for a virus that has a great recovery rate for human beings. It's also a bit of an encroachment on our God-given rights, liberties, and freedoms that we enjoy on this land. We should be looking toward giving the choice of vaccination and leaving it to the possible recipients without punishable offense either

way. It needs to be their personal responsibility to take care of themselves and we need to empower them to do so. We know that the FDA has approved an oral anti-drug and it seems other therapies, including natural immunity having been highlighted by several studies, have arisen that could prove to be great or better alternatives.

The point is that encroaching on freedoms and liberties does not create any trust in government agencies and instead, creates more tension with the people. The fatigue from constant goalpost moving, definition changing, and constant berating of citizens isn't doing you any favors and is just creating more enemies. Trying to take these medical decisions out of the hands of citizens is the exact reason my community (African Americans) has hesitancy in the first place (The Tuskegee experiment does not help the case of the general health community in terms of building trust either).

Much of the actions and rhetoric that is coming from government officials have done nothing more than destroy relationships and have caused people to question if life is worth it anymore. Though they may have lost hope, I believe God has a bigger plan for all of us. Even if you aren't a believer, sharing more negative rhetoric than positive does nothing more than cause more tension among the masses. We need to encourage individual choice, liberty, freedom, and autonomy without consequence. Many of these pillars make the country we are today and those pillars are those which granted you the position you are in today. To take that from someone else is selfish. It is easier to attract flies with honey rather than vinegar. Making threats will not help anyone in this case and the proposals you are making may not go the way you are expecting them to.

I hope you reconsider the items with which you are hoping to push forward with.

Sincerely,

Nick Jackson

Subject: Vaccination Requirements School Age Children

External Email

Dear Washington State Board of Health,

As a mother of two child, one of which currently attends public school, I would like to express my concern surrounding the consideration of requiring the Covid-19 vaccination for school aged children.

To start, I am very much for vaccinations. Both of my children are up to date on their recommended vaccinations for their age. However, those vaccinations have had years of scientific research conducted backing the claims that they prevent diseases. The Covid-19 vaccination is extremely new and has not had enough research compiled to know any long term effects on one's health and well being.

In addition, following the news, it appears that regardless of vaccination status, people of all ages are still contracting Covid-19 along with new variants. While this is a concerning virus that has left many without loved ones, myself being one of those people, at the same time, it should be left up to the individual/family to decide whether or not this vaccine is something he/she/they should seek.

As it seems that health officials are still working to find the correct dosage for adults (with now the third booster shot recommended and the foreseeable fourth being hinted at) yet wanting to enforce a vaccine still essentially in a preliminary trial on our children, without knowing the long term effects of how this new vaccine will affect our children, it is just as worrisome as parent to think what implications forcing this vaccine on our children could do to their health and well-being several years down the line.

Today I write to you to strongly urge you to reconsider enforcing this vaccine on school aged children in order to attend public school and to leave that decision up to the family sector. There have been far less Covid outbreaks than expected since children have returned to school this 2021-2022 school year, with school districts following the suggested mask mandate, hygiene, and social distance protocols. Enforcement of this vaccine, as data showing, is not necessary at this time.

Thank you for taking the time to review my strong suggestion on this matter.

Respectfully,

KJ Ertel
Concerned Citizen and Mother

Subject: Urgent

External Email

Hello,

I am a mother of two children and I am legally within my God given rights to oppose the recommendation to require school age children to be vaccinated to attend school and I'm about to share with you why...

This is not right under any circumstances and to try and tamper with a child's rights under our Constitution to have access to education is absurd, wrong, and an act of violating their rights.

The so called "vaccine" aka (experimental drug) has not been out long enough to prove enough of any good or effective results and injecting of a foreign object into children is not right and a violation to their rights and our rights as the parents regarding the well being of their health rights, not made by man, but by God when he created us. We have freedom of religion, freedom of speech and freedom to choose what goes into our bodies.

When the Polio vaccine was first thought of in the 1940's, funded by the March of Dimes Foundation, there seemed to be a good outcome of the vaccines that were created by Dr. Jonas Salk. It took them over a year, up to 10+ years to work out the ups and downs in the science before using it in people as a vaccine. The "Covid-19 shot" has only been out for a year and not been through it's own ups and downs to be pushed so hard to be injected into innocent children.

Dr. Salk used a chemical that was injected into people to try to kill the 125 strains of Polio. Yeah there was some hype about how good it was working but, in 1954 there were 200 cases of people becoming infected by a bad batch of the vaccines. I'm not surprised because, vaccines don't prevent contraction of disease or viruses, they minimize the possibility of bad symptoms once one has already contracted it, and it ultimately is based on each person's body, immune system and overall well being.

My overall point in saying all this, is that the "shot" that they are considering to be a vaccine and wanting so badly to be injected into children, is still under emergency use by the FDA and is not showing any proof of any good outcome for children, as it has not been studied long enough and has not been out long enough for it to be considered trustworthy. I don't trust their so called "statistics", and my children are not a statistic study, they are human beings and have the right to be educated, and have freedom. The freedom that we have today, that is being tampered and stomped on, was bought and paid for by the lives and blood shed of many who gave their lives for it; much like the same way Jesus Christ paid for our sins and died for us to have freedom from the bondage and slavery to sin.

This whole pandemic and the pushing and shoving of control, and all that is becoming of it, is a form of segregation and in some ways, like the Holocaust, but in a different way involving vaccine status, herd immunity/herd mentality and so on. It's sick and our future generations don't deserve this kind of crap. Our kids deserve better and when the United States of America separated from King George, we became free from control, and all the tyranny and oppression that he caused. There is too much happening that mimics what he was doing and what our soldiers fought to free us from. ☐ ☐ Please consider and try to understand what I am saying. This isn't personal towards any one person, this is a nationwide issue and our kids don't need to be subjected or be involved the political garbage that's happening around them. That's why they have parents to guide and

protect them. If you have kids, I hope this reaches your heart in a good way.

Thank you and God Bless America,
Jennifer Childs

Subject: Upcoming board of Health meeting agenda Notice

External Email

Washington State Board of Health

Concerning issues on the upcoming WA State Board of Health meeting agenda:

1. I ABSOLUTELY OPPOSE Agenda Item #8, the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose COVID-19 shot mandates, period!
2. I SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Coercion is illegal. Under 21 code of federal regulations section 50.23 and 24, it is illegal to make anyone participate in an experimental program using coercion.

Under 18 US code section 2331 and then subsection 802, inside the definition of domestic terrorism is anytime a US citizen or government in the US is forced to do something that it would not otherwise do, that is not only coercion, but domestic terrorism - a felony, with a 99 year prison term and up to a \$100,000,000. fine.

You are put on Notice.

Subject: Vac requirement for School Aged Children

External Email

I am writing in regards to the meeting about school aged children having to be vaccinated to attend school in Washington State.

I am against this decision and please take a moment to read why.

This is not a one size fits all situation. Not everyone is fit to get this vaccine nor should be told to. My daughter is the perfect example. We have struggled with anxiety, depression, seizures, anger issues, cognitive issues for years. I have spent over 16 years fighting for her and trying to find out what was wrong. Come to find out she has CIRS. CIRS is an autoimmune disease that does not allow her to flush toxins. The toxins we are talking about is mold. Mold from water damaged buildings has shut down her brain and now deals with sensory and cognitive issues. After years of finding the problems (schools being the main problem with mold, especially portables) and cleaning up her environment she is finally feeling so much better and is feeling happy and thriving. Not everyday is good we have our ups and downs. But good days outweigh the bad by far compared to vice versa years ago. I am bringing up her story because her doctor (who literally saved her life from suicide) highly recommends my daughter never going near that vaccine. He has some patients with a pinch of anxiety problems and ever since they got the vaccine their anxiety has been off the charts and they are struggling with this bad. So better for her to steer clear of this. So how many more kids deal with this? Anxiety in children is at an all time high. The last thing we need to do is inflame that in children even more. Not many people have the time or money that we luckily have to help our daughter. Most expense to help her was out of pocket because insurance does not pay for natural fixes. I think of all the families and kids that deal with depression and anxiety and think do any of them know about mold or their environment? It breaks my heart and would hate to see anyone struggle even more with this.

I beg you to please read the data, that no safety data actually exists for this age group. Please consider the myocarditis rates post-infection and the VAERS data for the category of kids is high. Please consider what would happen if you pass this resolution- the exodus from public education (and private for that matter) as well as from this state will continue.

Thank you for taking the time and really hope your decision is a no. I am one of thousands with a story like this. As a parent you know your child more than your own self at times, I know what is good for my child, NOT the government.

Subject: Vaccination requirement for school children

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States.
2. It is unconscionable to impose vaccination upon children to assuage adult fears. The death rate for children with COVID is less than 2 in 1,000,000. To impose a vaccine upon them is wrong and at a low for humanity when we don't know the long term effects.
3. To wield this untested "emergency" vaccine is like playing Russian roulette with a child's future.

I hope you reconsider the rights of our children and not impose this uncertainty upon them.

Regards,

Janelle Miller

I am concerned over these extreme measures, since there is still no evidence of any long term consequences of these vaccines. Children have low risk to Covid. These measures are only authorized for emergency by law.

And most especially the vaccine does not stop the spread of this disease since both vaccinated and unvaccinated are getting it and spreading it.

A concerned citizen.

I am completely against any of the proposed Covid Policies that are over reaching and immoral. I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

There is not sufficient research and evidence as to the vaccine safety for breastfeeding mothers and it would cause irreparable harm for me to be separated from my daughter at this time due to proposed quarantine regulations. We have both already had COVID, quarantining at home the entire time. We are in excellent health and it felt like a light cold. I trust my immune system, my healthy lifestyle and my precautions, but I do not believe that this vaccine is safe. More people have died from complications of this vaccine than have died from the Omicron variant.

Washington has already taken away my career (which was done 100% online from my home) because of the vaccine mandate. We will lose our home because of the vaccine mandate. My doctor is not allowed by her employer to write a medical exemption. Please do not rip apart our family as well. We are trying to leave the state as quickly as possible due to the mandates. Please give us a little time to flee from this place so that we can have the freedom to decide what is done to our own bodies.

To whom it may concern:

I am writing to ask that the state board of health REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. Vaccines DO NOT prevent, nor stop the spread of COVID-19
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19
4. The COVID-19 vaccine is new. Many parents do not feel comfortable giving this to children without years of testing, studies and long term effects being known.

I personally will remove ALL my children from Washington state public schools before I will comply to a COVID-19 vaccine mandate for my children.

Thank you for your time,
Nicole Nichols

Subject: Using Force to uphold COVID Mandates

External Email

To Whom It May Concern-

As a resident of Washington, I want to comment on the proposal to use force to uphold compliance with COVID Mandates.

* I have had Type I Diabetes (T1D) since 1985 and Juvenile Rheumatoid Arthritis (JRA) since 1992.

Both of my diseases are textbook, well-controlled. I live a healthy lifestyle that integrates fitness, diet, modern medicine, therapeutics, and social distancing.

* My older brother has T1D (Since 1978). He also has JRA, Crohn's Disease and Hashimoto's Disease.

He, too, manages his diseases to the best of his ability with impressive results, given his tenure with diseases!

* My middle sister suffers has no known auto-immune disorders.

As a six year old, my brother was vaccinated for MMR. Six months later, he was diagnosed with T1D.

As a six year old, my older sister was not vaccinated for MMR.

* Under the approval of my brother's endocrinologist, my mother opted to not vaccinate my sister for MMR.

* At the time (1980), there was theory the MMR vaccine may cause auto-immune disorders to present in children;

* By 1984, those theories had been "disproven" thru clinical studies of this topic: There was no clinical evidence that MMR was the root of auto-immune disorders presenting in juveniles.

* And so...

As a six year old, I was vaccinated for MMR. Six months later I was diagnosed with T1D.

As high-schoolers, we followed the same regime: My brother's JRA presented in High-school, as did mine, six-months after HS vaccinations. My sister lives free of known auto-immune disorders.

After high school, I realized my immune system reacted to vaccines in an atypical way; I have not been vaccinated for anything since I was 14 years old.

My brother has opted differently; NOTE: he has two more auto-immune disorders than I.

In NO WAY do I think Vaccines are universally unsafe.

I recognize they have saved millions of lives.

But they are not good for me.

I am not evangelical about my family's story.

I do not wish to sway people's decisions on their own healthcare.

But... facing the notion that I "MUST BE VACCINATED OR ELSE...", I am completely terrified.

I have evidence that if I am vaccinated, my immune system will react. It will not know how to stop attacking things it should not.

Do I get a vaccine knowing I may get MS? or Lupus? Or Guillain-Barre Syndrome?

Or will I now face criminal charges or incarceration if I opt to not ignite my wild immune system with a vaccine?

For the sake of those of us who have had adverse reactions to vaccines in the past, who manage our health diligently and conscientiously, please consider our dilemma.

Please do not authorize the use of force to uphold COVID mandates.

I beg you to allow the freedom to have the option that my mother took in 1980 by not vaccinating my sister.

Because she had the right to make that decision, my sister has been able to live a very different life than my brother and I. And I am forever grateful for that.

Thank you for your time and consideration.

Subject: Vaccine for Children

External Email

I have heard that the Washington State Board of Health is making a recommendation for a vaccination requirement for children

Many doctors have agreed that Covid is not a threat to children.

It is unnecessary to require a vaccination for children. There have been studies of side effects that are causing more problems than the actual issue with Covid.

It is not necessary to take a chance and give a trial vaccine two small children when the children are again not susceptible to problems with actual Covid.

Also many doctors have agreed that masks are not providing any benefit.

There have been many studies that there are more psychological negative impacts by wearing a mask for children at school. Children need to see the faces of the teachers and other children to communicate effectively and naturally. Children are becoming unable to socialize appropriately when they are masked. Also children move the mask around and are actually getting more dirt and germs next to their faces than if they were on mask. Children would have to have 10+ masks a day to actually be effective. They would have to change them every time they would touch their face if you really wanted this to work. Also a regular cloth mask is not going to work.

A simple procedure of having children wash their hands often throughout the day will help more than having the vaccine and masks. It is also important that if children are sick they need to stay home. The government should put more money towards the help of parents and child care of sick parents.

Let's get the children back into the classroom, no masks no vaccines and let the children learn in a normal healthy environment.

Let's do what is best for the children.

Please step away from any politics and stick with what we know from trusted doctors. And when I say trust the doctors I mean the ones that don't have a political agenda.

Sincerely,
Lori Pitman

Hello all!

First, I want to thank you for the job you all are doing. I know it's a thankless, but very important, job!

I love that we are finally getting some rules and clarification on quarantine and isolation.

Regarding this bill, the only apprehension I have is regarding vaccine mandates for children. I don't think it's an incorrect step at some point, but I think it's premature right now. We still have so many well respected epidemiologists saying conflicting things. Some believe we should vaccinate everyone immediately, and some say it's premature in children due to the numerous unknowns with the current omicron variant/future variants. Some are even saying we may need a new booster every year. There just seems to be too many unknowns right now to require it in our children and I would ask that we delay this portion of the bill for 6 to 12 months.

Thank you so much for your time -

To Whom It May Concern,

I'd like to express my opposition to the proposal to mandate the Covid-19 vaccine for children to attend public school. As the risk for children has been well documented to be extremely minimal and the vaccine being new without sufficient long term evidence, it is not appropriate at this time for the state to require this. There will absolutely be a drop in the amount of children attending public school in the state of Washington if this passes.

Sincerely,
Hope Goldman

Subject: URGENT - Public Comments for WSOH Members for COVID 19 Vaccine
Mandates in Schools

External Email

Attention All WSOH Members -

My name is Megann Moorman and I'm a mother of two small children of school age. I have been a resident of Washington my entire life and never desired more to leave this hell hole than I do now. I'm writing today to state my strong objection to having the Covid 19 vaccine being mandatory or required to attend school in Washington State.

All Covid 19 vaccines are still currently under an EUA which makes it ILLEGAL to do what you are attempting to do. We are watching. We see the corruption and lack of science or anything that makes any dang sense at this point.

Unvaccinated children and adults are crucial to achieving true, natural herd immunity. Listed below are true facts, statics and their sources to support why making this a requirement is unethical, illegal and completely unsafe.

See you on Zoom!

Megann Moorman
253-651-2065
megannmoorman@gmail.com <mailto:megannmoorman@gmail.com>

1. Federal Emergency Use Authorization statutes prohibit school mandates of EUA products

"The possible side effects of the vaccine are still being studied in clinical trials. . . Under the EUA, there is an option to accept or refuse receiving the vaccine." source: pp. 4-5
<https://www.fda.gov/media/153717/download>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F153717/download>>

The option to accept or refuse an EUA product is not conditioned upon written assertion of exemption. Medical, personal, or religious exemptions are not required in order to exercise the right to refuse. Under EUA law, a parent or guardian may simply decline a shot for their minor child, without providing explanation or paperwork. A state-level daycare or school requirement introduces the need for filing of exemptions, unlawfully exceeding the parameters set forth by Congress for EUA products.

"FDA believes that the terms and conditions of an EUA issued under section 564 preempt state or local law, both legislative requirements and common-law duties, that impose different or additional requirements on the medical product for which the EUA was issued in the context of the emergency declared under section 564." Source:

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Femergency-preparedness-and-response%2Fmcm-legal-regulatory-and-policy-framework%2Fvaccine-eua-questions-and-answers-stakeholders>>

stakeholders&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C92af5e24beb64f53dbd008d9d218223b%7C1

2. Phase 3 clinical trials of COVID-19 vaccines are not yet completed. C4591007—the main clinical trial in children and young adults with BNT162b2—has an estimated completion date of May 5, 2026. Source: <https://clinicaltrials.gov/ct2/show/NCT04816643>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fclinicaltrials.gov%2Fct2%2Fshow%2FNCT04816643>

3. The vaccine formulation now being given to U.S. children aged 5-11 is NOT the same formulation used in the clinical trials, and NOT the same formulation that has been administered to all other age groups under EUA. So even when current ongoing clinical trials are complete, the results cannot be assumed to be relevant to the safety or effectiveness of the new formulation.

"The vaccine that is authorized for use in children 5 through 11 years of age includes the same mRNA and lipids but different inactive ingredients compared to the vaccine that has been used under EUA in individuals 12 years of age and older and that has been studied in clinical trials." Source: p. 2 <https://www.fda.gov/media/153717/download>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F153717/download>

The participants in clinical trials involving children aged 5-11 received "two doses of 10 µg BNT162b2 or placebo (saline)", not the new formulation. Source: Pg. 17

<https://www.fda.gov/media/153447/download>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F153447/download>

Pfizer requested approval of the new formulation when they requested EUA for children 5-11. "Authorization is being requested for a modified formulation of the Pfizer-BioNTech COVID-19 Vaccine. Each dose of this formulation contains 10 µg of a nucleoside-modified messenger RNA (mRNA) encoding the viral spike (S) glycoprotein of SARS-CoV-2 that is formulated in lipid particles and supplied as a frozen suspension in multiple dose vials. . . . To provide a vaccine with an improved stability profile, the Pfizer-BioNTech COVID-19 Vaccine for use in children 5-11 years of age uses tromethamine (Tris) buffer instead of the phosphate-buffered saline (PBS) as used in the previous formulation and excludes sodium chloride and potassium chloride." Source: Pg. 14

<https://www.fda.gov/media/153447/download>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F153447/download>

4. FDA admits safety unknown. Children are being used as test subjects, with their parents acquiescing under fraudulent marketing pressure. Public Health messaging does not match the reality of the current knowledge base. At the October 26 VRBPAC meeting, FDA Advisor Dr. Eric Rubin admitted: ". . . but we're never going to learn about how safe this vaccine is unless we start giving it." Source: @6:52:33

https://youtu.be/laaL0_xKmmA

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fyoutu.be%2FlaaL0_xKmmA&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C92af5e24beb64f53dbd008d9d218223b%7C1

5. The International Alliance of Physicians and Medical Scientists has declared that children should be excluded from vaccine mandates:

"Consensus is clear among MDs and medical PhDs: following 20 months of exhaustive research, millions of patients treated, hundreds of clinical trials performed and scientific data shared worldwide, they conclude that healthy children and the COVID-recovered should be excluded from restrictions and vaccine mandates."

January 6, 2022

Dear Board of Health members,

It has come to my attention that in your upcoming board meeting there will be a discussion of involuntary isolation/quarantine of people as described in parts of WAC 246.100. This is quite alarming, to say the least, and I certainly OPPOSE this as it would definitely violate our constitutional rights!!

Another agenda item that I am completely OPPOSED to is mandating any Covid-19 vaccine for children in childcare and to attend K-12 public school. Covid-19 is not a threat to children, and furthermore it is not FDA approved as it is only approved for emergency use.

Sincerely,

Darcy Poland

Information on the long term effects of the current Covid vaccines is not sufficient to justify the eventual risks to children. The lasting physical effects of these vaccines may be worse than the short term effects of the new variants.

That is even more likely as the physical effects of future variants decrease and become less harmful.

The Washington State Board of Health should not make the Covid vaccines mandatory for children at this time.

That would be the correct decision until science knows more about the residual effects of these vaccines.

Thank you,
Leonard L. Grim

Hello WSBOH,

I am a concerned citizen. I am NOT for mandating the Covid vaccine for children. I personally got the vaccine back in April and plan to get the booster shot. My son caught covid in March 2020 and had mild cold symptoms that do not merit a vaccine. Vaccines have ALWAYS been a choice and Covid should be NO EXCEPTION. Citizens should be allowed to determine their own risks and benefits for personal healthcare options. This should be a choice NOT a mandate.

Concerned citizen,
Michele Hanusa

Vote against vaccine mandate for kids

Please look at science data

Kids are low risk at getting Covid and if so they recover quick.

The vaccine still in its emergency state which we have no knowledge in its side effects long term. Doctor who created the mRNA is speaking out about it and asking parents not to give it to kids. We need to listen to that and protect them from future harm.

Dont make decisions by fear but by actual data and let's stop this madness.

May God bless you all.

Just want to add myself to the list of people who strongly oppose adding the Covid vaccine for school requirements. You know it's wrong, everyone else has told you why. Stop trying to pull this tyrannical authoritative non-sense or you will see a mass exodus from public school attendees. You know the low numbers are already affecting many school districts. Kids are not dying of Covid and the vaccine doesn't work. Try spending more time investigating the long list of adverse side effects. You are literally putting our children's lives at risk if this becomes a requirement.

Subject: Upcoming Vote regarding mandates for vaccine

External Email

To All Washington State Officials who represent me,

I am writing you as a concerned citizen of Washington state. I understand you have a major decision coming before you to consider vaccine mandates for children as well as adults. I urge you to take into your thought process more than the current accepted binary conversation that the vaccine is the one and only way to proceed in health for our communities and states.

In years past, we as parents, families and supported by the medical community considered natural immunity strong and robust. We currently have doctors who are successfully helping to keep sick patients out of the hospital, and they need more physicians to help them. There is more to this story on a successful way through this, and your decision is an important part of it.

There are not enough long-term studies regarding the use of the Covid-19 vaccine and the option of natural immunity needs to be a part of this conversation if we are truly wanting to follow the science. The fact that the drug manufacturers have requested to wait to release their data for 75 years creates confusion and concerns on why they are not acting with transparency. Recently the CDC director and Dr. Anthony Fauci have admitted that the vaccine itself does not stop transmission or infection. This is the logical disconnect between facts and political agenda.

In addition, there are thousands of deaths and adverse reactions reported, though not published through mainstream media. I will provide you links to some of these sources if you want.

You will be looked on in history for the vote you are about to make. How will you choose to stand for the liberty and freedom our country is rooted in? Can you imagine what caused our state and government to place Germans and Japanese citizens in camps during the 2nd World War? It may have seemed like the best option at the time, however, it is viewed correctly today as a human rights abuse. It was a decision made out of fear. I urge you to make a decision based on courage, transparency, medical facts,

which come from all places, including those that are being silenced in the main media. Please do not allow fear to be part of your decision. Fear of what others think or say, fear of job loss, lack of promotion, fear of possible personal cost if you stand against the swell of the current tyrannical narrative. You have so many people cheering you on to stand for human rights including medical freedom of choice.

Sadly, the push for the mandate of vaccines and the proposed policies which could follow will place health officers in the possibility of managing a police state. We are not in an emergency situation that would justify the use of law enforcement to order persons involuntarily to isolation facilities or coerced medical intervention. If this continues Washington board of health is considering medical tyranny. Not only is all of this discussion in direct violation of the Washington State Constitution and the US Constitution, but the proposed policies are also in direct violation of the Nuremberg code article 6 section 3 that states: No government can mandate or force medical treatment without individual consent.

Please stand for medical freedom of choice for the citizens of Washington.

Subject: TAG Formation

External Email

Hello,

I am a parent and a Washington state resident. A forming of a task force to explore mandating COVID-19 injections in our school is horrifically immoral.

In a state that advocates for the freedom and well being of all people, this is going backwards.

According to the federal law title 21 of the FD&C Act: Section 360bbb-3 states "No EUA product may be mandated".

Please support our families in all the cities of Washington by spending the time and money in where there are actually needs - teacher salary, anti discrimination, inclusivity of the disabled, mental health support for teachers and students.

Thank you,
Candice Clem

clots, low platelets and more following COVID-19 vaccination.

* The risks of COVID-19 vaccination adverse outcomes certainly outweigh the benefits to children and young adults who are considered low risk populations.

* Parental rights to make independent, informed decisions regarding their children's medical interventions, including vaccines, are being threatened.

* Some scientists have raised concerns that the safety risk of COVID-19 vaccinations have been underestimated. As of October 29th UPDATE, there have been 856,919 vaccine injuries including 18,078 deaths following COVID-19 vaccination.

* Clinical trials in children and young adults are ongoing and will not be completed for at least one year.

* Not a single published study has demonstrated that patients who have had a prior COVID-19 infection benefit from the vaccination. So why recommend all kids get the shot?

It's time to end the use of COVID-19 as a pretext for governmental coercion and mandates. The public is waking up to the cascading negative impacts upon society from elected officials wielding unprecedented power over the citizens of this country. As a resident of Washington state, and a concerned citizen, I urge you:

-- Do not support any legislation or directive coercing people or mandating medical interventions--including vaccines

-- Do not support any legislation or directive requiring people to wear masks

-- Do not support any legislation or directive that deprives people of the right to
congregate

-- Do not support any legislation or directive establishing lockdowns

- Do not support any legislation where employers can enact coercive tactics to overrule a person's rights to body autonomy

There is a reason many people in our current administration are demanding that you negate any and all personal morals, defy our constitution, harm others, create public fear, and avoid encouraging effective means of immunity. Money. It may not be the root of all evil, but it can certainly feed those roots. These companies, including our government agencies that are financially benefitting from these inoculation mandates, are making approximately \$1,000 per second from injecting people with questionable and life threatening substances. Many members of our community and state, who have been inoculated by the Covid "vaccine" are still becoming infected with the virus. This is not proven protection. This is experimental drug use. Is corrupt money and power, in the name of a science experiment, more important than the health and welfare of the people of our state? The very people you serve to protect? I also support the petition prohibiting the Washington State Board of Health from adding any EUA product to the required vaccination list. This has never been done and should never happen now or in the future.

May quality judgment and moral perspective be the lens through which you make your

decisions, and may fraudulent claims by those who have personal and financial agendas not obscure your ability to make determinations for the good people of our state.

Sincerely,

Kristyn Hardy

To whom it may concern,

I urge you to stand up for bodily autonomy and personal choice by rejecting the weaponization of WAC 246-100-040 against covid.

Last year's winter wave peaked this week in 21. That means it is likely we are already or very nearly at the peak right now. However, there is no evidence that any mitigation measures have any effect whatsoever on an aerosolized airborne virus.

Omicron is a gift in disguise. Mild, infectious, conveying long-lasting, robust immunity to us all. Let's embrace common sense and get back to our lives PLEASE.

As a parent, teacher, and well-informed citizen, I am writing to express my concerns in regard to items on your meeting agenda.

Agenda Item #9 – Allowing local health departments to set up quarantine facilities and in some cases, detain people against their will. This is in direct conflict with our state constitution and is completely unnecessary in the current health situation. The vaccines have proven ineffective, as people still get Covid-19 after receiving them. Medically, it is proven that people develop natural immunity after having Covid-19. What justification would there be for quarantine facilities?

Agenda Item #11- Informed Choice Washington's Petition for Rulemaking (filed by Xavier Figueroa, Ph.D. on behalf of ICWA) requests a new rule that prohibits any EUA product, or any product that has not successfully complete Phase 3 trials to be added to mandatory school health requirements. I agree with this statement for the following reasons. #1. The current Covid -19 vaccines have not completed Phase 3 trials. #2. The current vaccines for Covid-19 are still in EUA. This means that they are supposed to only be applied in an emergency – not as a broad application to the entire public. #3. The EUA no longer should be applicable in this situation as current and further studies are finding many therapies for early treatment for Covid-19, which improves opportunities for natural immunities to develop. #4. The current vaccines are not preventing Covid-19. #5. According to the CDC's website VAERS, the current Covid-19 vaccines have a terrible record of adverse events and death. There is no data on safety over 3, 5, 10 years and beyond. It is not acceptable to vaccinate every child with a vaccine with this undeniably tragic safety level. The consequences could be devastating on our children!

I am opposed to changes to WAC 246-100-070, WAC 246-100-045, WAC 246-100-040 that would give increased power to local health officers regarding Covid 19 especially as it applies to vaccinations.

I also oppose including Covid 19 injections as part of school immunizations requirements using WAC 246-105.

Respectfully submitted,

Subject: Unconstitutional action being reviewed by Health Board

External Email

Dear Health Board,

Thank you for accepting open comments. Please consider that COVID19 is a zoonotic virus that will continue to run through all animals & people alike. There will not be an end. Thankfully the virus will degrade as it has with Omicron which is not deadly to the majority.

It's is unconstitutional to use a health concern to quarantine or force vaccinate anyone. This is not a third world country where the various agencies can do whatever they want to the populous.

The best thing you can do at maximum is possible require weekly testing. Even that is excessive with unfair fraudulent contracting practices. Keep in mind that the testing has high false positive rate.

In summation, I recommend that you rule against any forced quarantine or vaccination. That is not America.

Thank you,

LMcMahon

Subject: Vaccine Mandate

External Email

To Whom it may concern,

We are writing as concerned parents about the possibility of Covid vaccine mandates for school attendance. Data has consistently shown children to be at low risk for severe disease from Covid. Adults can choose to be vaccinated to protect themselves from severe disease. Current virus strains are showing to evade vaccines and given that there is no long term data on the efficacy or side effects of these vaccines in children, one has the right to weigh risk to benefits and decide what is right for their child's health. Using the comparison of the currently required vaccines it is not appropriate with this EUA vaccine to be mandated in similar fashion. Again, there is no long term data or listed potential side effects.

We would also like you to think about this; are you prepared to compensate parents of children who are vaccine injured should that prove to be the case? Also is the district able to handle budget cuts should there be a reduction in student enrollment after this mandate?

As Paramedics and parents we don't feel comfortable giving this vaccine to our young children. We are prepared to pull them from public school if this mandate is implemented.

Thank you for your consideration,

--

People over the age of 65 are the demographic for this virus as we have known this from the start of the pandemic. Teachers and school staff who want to protect themselves from not getting severe Covid should absolutely get the vaccines. The vaccines do not prevent people from catching nor spreading the virus as shown with Omicron spreading like wildfire among the vaccinated. I personally know nine triple vaccinated folks and four unvaxxed folks in our state that caught Omicron over the holidays. Duration of illness for both the vaxxed and unvaxxed for these Omicron folks were about the same (3-4 days). The unvaxxed had low grade fevers and body aches, slight coughs. The vaxxed had really bad sore throats and headaches, some had slight coughs. Both groups had runny noses/mucus/congestion and were tired. As we are entering the endemic stage of the virus we need to focus on severity and death -vs- cases. And children have a very very low incidence of severity from Covid. Therefore these vaccines should never be considered an emergency or a mandate for K-12 school children. Covid vaccines should be an emergency for hospitals, nursing homes, senior centers and for the older people that work there. Covid is not a childhood disease

Do not make this vaccine mandatory for everyone. One size does not fit all when it comes to this. The vaccinated can still get and give Covid, so it's not a vaccine by definition.

The survival rate is so high, if you people would stop making this political you would realize that do not make people get the vaccine!

Subject: Upcoming Meeting

External Email

My name is Julie Grose and my family and I have been in the WA State Schools for over 50+ years now. I have had 3 children graduate from the WA State public schools, and 1 still in middle school with 4 more years to go. I have never been more disappointed in the WA State School Board and the direction which you are all headed. This upcoming meeting is going to be very one sided most people believe. But what you don't probably see quite yet, is the amount of students you will lose immediately if you choose to require the Covid vaccine. I personally will pull my son out of our school district and turn to another teaching method. I will not tolerate being told what I must do medically for my family. I will sell my house and move out of this state I have always called home. You are ALL crossing a very thin line and risking losing so much more than you can see right now, which includes more young deaths. That blood will be on your hands, along with unlimited law suites against the WA State School Board & the children's individual school district.

These vaccines are not even FDA approved in the United States. These "so called" vaccines are only "approved" under the Emergency Use Authorization. Now they're saying you can mix these vaccines??? Come on wake up. Yet, you all feel like it would be beneficial to give healthy, young kids these shots not knowing the true side effects, and there are many - <https://vaers.hhs.gov/data.html>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fvaers.hhs.gov%2Fdata.html&data>

along with the long term effects, and death. We still don't have enough evidence to prove otherwise, yet you are making choices for families who are strongly against everything these drugs stand for. If this was a vaccine with years of reporting, which include side effects, long-term damage & death, do you still think people would take it? I doubt it very much, and the truth will come out, but it will be too late to save OUR kids.

I really hope you ALL look very deep in your souls and pray to GOD that you make the right choice. The guilt you will feel in a few years will overwhelm you, especially if it's the death of your own child. Leave this choice to the individual families, do what is right by God, but more so for your conscience. "THE TRUTH WILL SET YOU FREE"

Julie Grose

Subject: vaccine mandate

External Email

Dear WA State Health Officers:

Please do not be offended by my request. Concerning the meeting to decide on the vaccine requirement for school-aged children, I have a right to decide the health decisions our children make. Not you. Not anyone else. Please do the right thing.

Concerning the proposal to create an isolation facility for quarantine. Please see the Constitution. I have sworn to defend and protect the law. You should consider doing the same. Isolation facilities are wrong. You should know that. Ask Germany how it went for them. If you pass this legislation you are asking for severe repercussions for our society.

A little background about myself. I have a Masters Degree from Penn State and served 5 years in the US Navy. My wife is a registered nurse and we have 5 children. We have gone to extreme measures to make ourselves healthy and curb the spread of this virus. I know you don't believe in natural remedies because your positions are supported by the western medicine system and money, but we refrain from alcohol, illicit drugs, caffeine, sugar, and processed substances that take down our immune system. Two years ago we started a diet free from milk (only cultured dairy now), heavy carbs, and sugar. We use natural remedies to boost our immune system. We have been able to curb all sicknesses we have gotten, 100%. I have seen it for myself. Western medicine would be disappointed, but fortunately the evidence for me is strong enough that I say with full persuasion that I don't need a vaccine. My religion asks I seek for answers and direction from God. I feel persuaded by my God that this is correct and true. Maybe vaccines are right for some people. Maybe most western civilization doesn't feel the need to research and set forth immune-boosting choices. They would rather be vaccinated, take a pill, or ignore the advice to get healthy. But that is not me. I reserve the right to remain skeptical, seek my own remedies, and fight this illness as I see fit.

Please do not require my children to be vaccinated. They have already been turned down for sports, jobs, and other opportunities may soon close for them. It isn't right. They are 100% the healthiest kids in their schools. They are active, bright, social, smart. Our young daughter is 2 years old. She is the only child who has not been vaccinated with ANY vaccines. She also eats an EXTREMELY healthy diet. Consequently, she is the only child of ours who has not developed major sickness and illness as a child. To list what our other children have experienced as young children - Celiac Disease, Food Protein Induced Enterocolitis Syndrome, iron deficiency anemia, runny noses, sickness 2-3 times per year, hospitalizations for Celiac, major food allergies (wheat, milk), neurological problems. Fortunately, almost all of these symptoms have miraculously resolved for our other children. Please consider what I just said - ALL OF THEIR SYMPTOMS AND SICKNESSES HAVE RESOLVED. I understand this is a hard concept to hear. The change in diet has required extensive and expensive changes to our way of living - cooking all our meals from scratch, etc. But the science and conclusion are clear for me and my wife. It has worked. Our 2 year old is the healthiest child in her peer groups in our community, she walked early, started speaking early, and NEVER gets runny noses or sicknesses.

Western medicine may not be too interested though. And since you listen to western medicine, I understand you will have to inform yourselves from their studies and recommendations. This is unfortunate. But please understand not everyone thinks and lives that way. There are alternatives that work. Some don't. You have to be careful. For us, we are both careful and prayerful. We know 8 personal friends that have experienced myocarditis, nose bleeds, and other symptoms from the vaccine. You can't take that knowledge away from me. It is not misinformation because I talked to them. It happened right after the vaccine before my eyes. All of my siblings and siblings-in-law (20-30 people) have developed COVID-19 after getting vaccinated. ALL of them. We are the only family members who have not been vaccinated and we have not experienced any symptoms. NONE.

Again, it may be right for some. But not for all. Please do the right thing. Let people educate themselves. Do not pass silly and Nazi-like laws to mandate vaccines and put people in quarantine camps who do not get vaccinated. We reserve the right to remain skeptical, not get vaccinated, and stay out of concentration camps.

This is forwarded to Dan Newhouse, and other local leaders and advocates.

Thank you,
Nathan Clark

Subject: Vaccinating students

External Email

I strongly ask that the covid 19 vaccine not be mandatory for any students in Washington state, as parents do not have full informed consent at this stage of testing and use of any of the covid 19 vaccines.

Thank you for giving more time for trials and thus a better understanding of side effects before causing all students to take the covid 19 vaccine.

Subject: Vaccination feedback

External Email

I have the following concerns with vaccinations.

1. Making it a crime and creating quarantine facilities is very concerning and seems to be a threat to our liberty. I strongly oppose this.
2. I oppose adding the COVID vaccine to the mandatory school vaccination. I am very concerned that most parents in our area will get the waiver from their doctor. This would mean that we would have to exclude those students from school when the "COVID Season" hit (much like the flu season). I also am concerned that up to this point all vaccinations stop the children from getting the disease. This seems to be the first vaccination to be required that will not stop COVID but only help to manage it. This is a large shift in our vaccination requirements for schools.

Jerry Pugh, Superintendent
Colfax School District

I would truly appreciate the opportunity to discuss this in more detail with you by phone on Zoom.

Thank you!

Subject: Urgent--comments for January 12 public meeting

External Email

Dear public health official:

This is regarding the proposal to add COVID-19 (infection by SARS-COV-2 virus) to the WACs, specifically WAC 246-100 (in any section) and also WAC 246-105. I apologize that I did not have time to gather multiple references and sources (I only learned about this proposal less than 24 hours ago); however, I feel it is your job to be aware of all the applicable data and scientific facts.

Please do NOT add COVID-19 to WAC 246-100 for the following reasons:

1. As we can observe from the past two years, the non-pharmaceutical interventions, even when applied harshly, have devastated countless individuals' lives, while doing very little to slow the spread of the disease. You can see this clearly in the public health data from most areas across the globe.

2. The illness has a survival rate of over 99%. Using data from www.worldometers.info <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.worldometers.info%2F&data=>, total COVID deaths being 5,492,931 and 2020 world population of 7,795,000,000 rounded up, computes to a death rate of 0.06953% or a survival rate of 99.93%. This means 7 deaths for every 10,000 people globally. Per the CDC website, the 2019 overall death rate for the USA was about 8.7 per 10,000. Please note, this was mostly pre-pandemic.

3. SARS-COV-2 being a respiratory virus is scientifically expected to mutate into a progressively less deadly form, and it may already be doing so with the Omicron variant. Possibly it is becoming just another common cold.

4. The virus has been politicized to an unbelievable extent. Is this defensible in any viewpoint?

Next, please do NOT add COVID-19 to WAC 246-105 for child immunizations.

1. This WAC is specific to "vaccine-preventable diseases". The COVID-19 vaccines are a documented failure at preventing the illness. Rather, the opposite seems to be occurring. The most highly-vaccinated regions are the ones enduring the greatest explosion of case numbers (for example: Israel <https://www.worldometers.info/coronavirus/country/israel/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.worldometers.info%2Fcoron>).

2. Children have a greater risk of harm from the vaccines, than from the virus. Of particular concern (so far as I have studied it) is myocarditis, as heart damage lasts for a lifetime, and also the strong possibility of reproductive harm in girls. –Has anyone studied this?

3. Please examine the VAERS reports on the dedicated system; other resources include
openvaers.com

.

When dealing with a situation this serious, we collectively need to consider ALL of the available data, which comprises a much greater picture than what is given in press conferences.

Thank you for your time and attention.

Best regards,

Jennifer Knowles

To whom it may concern—

I am a 25 year veteran pharmacist from Oregon and I serve many Washington residents as I live on the border, in Hood River. Today I am writing to request that you DO NOT mandate C-19 shots for children. In my experience, I have seen the risks to be astronomically worse than the benefits for these drugs. Our children should not be exposed to drugs that are still experimental and already known to be a cause of cardiac and neuropathic damage. I implore you to leave the kids alone!!!

Respectfully --

Kathleen Sanders, RPh

We will not stand for being forcefully detained and placed in quarantine camps!! We should not be forced to have this "vaccine". Our children should not be forced to have this "vaccine" in order to attend public school. We will not stand by and allow our rights to be stolen from us.

Children are at extremely low risk for Covid
The vaccines are still only EUA (emergency use authorized)
There are no long-term studies to document any history of safety
Studies do now document that vaccinated and unvaccinated can both transmit Covid,
therefore,
The vaccine apparently does not stop the spread of the disease

You pass this, you lose me and my wife tax money as we will be moving IMMEDIATELY
OUT OF STATE

To whom it may concern:

As a concerned citizen of Washington state, I am appealing to you to vote against the proposed Covid Policies as they are overreaching and immoral. I stand against these proposed WAC's:

WAC 246-100-045

WAC 246-100-070

WAC 246-100

WAC246-105

Hello -

I am writing to oppose making COVID shots mandatory for schools and daycare centers for a few very plain reasons.

1. Despite incorrect assertions, no FDA-approved vaccines are available. It is very I love to read the FDA notices and understand one key difference that Pfizer-BioNTech is legally distinct from the approved vaccine. Though the FDA said it was interchangeable and has the same safety and efficacy profiles, Pfizer-BioNTech is under Emergency Use Authorization only. While it is claimed that serious adverse events are rare no one claims that there are no serious adverse events. Impacted citizens will not have the recourse for restitution that they anticipated. Please focus on ensuring the public understands this prior to deciding (without coercion) if this medication is appropriate for them individually.

2. Reviewing the CDC and WHO websites reveals the goal of COVID-19 vaccines is to help the individual themselves lessen the risk of severe disease. The goal of reducing infection and spread is not supported by the medical and scientific literature as a benefit of the vaccines.

Sincerely,
Johnathon Huffman

Subject: Vaccine Mandate

External Email

As a citizen of WA state all my 44 years, and the great USA, I am completely against anybody forcing or blackmailing anyone else into injecting a mystery into our own bodies. NO ONE knows the long term damage, side effects, dangers of this vaccine, as only time can tell. You have zero authority to demand this, especially to these young children who are rarely getting covid, and not in danger of death over it. This is a free country, I stand by my Constitution which protects us from evil, and this id pure evil to mandate such a thing.

Krista Schelbrack

1. SUPPORT Informed Choice Washington's Petition for Rulemaking (see below) — our petition is item 11 on the January 12th agenda. It was filed by Xavier Figueroa, PhD, on behalf of ICWA, and asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Hello, two issues being address, use of law enforcement to force quarantine and mandatory immunizations for kids to go to school is a redline for me and my family. We will be moving out of state ASAP if these were to be passed and take effect. I know countless others who have expressed the same. DO NOT CONSIDER PASSING THESE MEASURES.

I appreciate the opportunity to comment on this. As grandparents of a student at ECS I find it hard to believe that it is even being discussed to force parents to do this to their children. If parents foolishly decide to do this to their kids, that is their choice. But to force them is wrong. I have a question for you all to consider, "What will be the next Mandate?" Please don't be naive and think that it won't happen and once you do it, now it won't matter what it is the next time as you have given up the freedom of choosing for yourself and family.

Subject: Subject: OPPOSITION of Proposed Covid-19 WAC

External Email

Dear Board of Health Members,

I've recently become aware of the Washington Administrative Code (WAC) proposals regarding Covid-19 requirements for school age children. I am in complete OPPOSITION to this proposal, and disappointed in our state leadership for allowing this infringement of our rights to even be considered. Science proves that Covid-19 is as much a threat to our children as the common cold, and yet you've allowed fear and mob mentality to dictate your legislation. The possible side effects of this vaccine, which science shows to be ineffective at eradicating Covid-19 and has not received adequate long-term testing, outweigh the risks of the disease, but you are seeking to overturn the rightful responsibility and judgment of parents. This is NOT a childhood disease, and does not compare to the other diseases that we've largely eliminated through vaccines. While I am thankful for access to a vaccine, I fully support the CHOICE to vaccinate against Covid-19 or not. As we have equal access to a vaccine, allow each individual to assess their own assumed risks and make the necessary decisions for their own family.

The WAC proposals regarding quarantine and forced exams, testing, treatment and vaccines are unnecessary and over-reaching. The death rate for Washington state has been steadily declining for the past four months. While the cases have increased, the number of asymptomatic and low sickness vs. extreme cases have not been provided. The only data is deaths and cases, and based on these numbers, while many people have contracted the illness, not many are dying; certainly not in numbers that require you to force people to be quarantined, examined, tested, treated or vaccinated. I am OPPOSED to any forced actions and extremely disappointed that it is being considered.

Washington state residents should be able to make the choice for themselves. We have all had or seen extreme illness in our lives, this is not being taken lightly. Trust your citizens to make the decision that is right for them and their family.

I appreciate your consideration.

Marlo Love

Hello,
I am VERY STRONGLY OPPOSED to making the COVID-19 vaccine a required immunization for kids to attend school or daycare. I am very much opposed to it being required for anybody at all. It is still a very new "vaccine" and hasn't had time to be fully tested to see what any long-term effects it might have. Also it can affect different people differently and not always for good. Plus, unlike the older vaccines, the Covid one doesn't actually keep people from getting Covid or spreading it to others. Please, please do not allow this to become a requirement! I know for me, and many others I know, if it does become required we will be pulling our kids out of school altogether, rather than go against what we believe is best for our kids and inject them with the Covid vaccine.
Most sincerely,
Israel Dehnert

Hello,

I am a Washington resident of 28 years and I am not comfortable with WACS 246-100-070, 246-100-045, 246-100-040 & 246-105.

To require children to get injected with this covid vaccine is not acceptable. It is unethical and morally wrong. To use law enforcement to detain and quarantine families is also wrong and against our constitutional rights. Enough of the unnecessary Is evasion of rights.

I am fully against these WACs and what they represent. When will this control end.

Signed,
A concerned citizen of WA born and raised.
Sincerly,
Nickee Gwinner

Subject: Time sensitive::: Mandatory Vax and Forced Quarantine - WA State

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

Covid-19 should be treated as the cold and flu are. It is here to stay and there has not been an effective vaccination made.

Please note:

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered.

This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors

(americasfrontlinedoctors.org)
