Good afternoon,

I am completely against any of the proposed covid policies currently being discussed. They are over reaching and go against my religious freedoms and autonomous rights. I stand against the following:

WAC 246-100-045

WAC 246-100-070

WAC 246-100-040

WAC 246-100

WAC 246-105

Regards,

Jared

External Email

☐
☐
☐

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

There are many devastating consequences with all of these vaccines. It is illegal, evil and unjust to harm our children in this way, to harm their life, to harm their long term health, to disable them if they were to survive the vaccines. By doing so as you are wanting plays directly into other organizations, evil, and elites agenda to wipe out generations. Cease and desist immediately and permanently. It would not be forgiven nor forgotten.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

I respectfully request that the Covid vaccine NOT be made mandatory for children to receive in order to go to school.

This continues to be an experimental vaccination that can and has caused injuries and death to children and adults alike. It is an experimental vaccine and the long term affects are completely unknown!

Children have nearly NO risk from Covid and at this point the risk of them spreading it is low. Forcing anyone, but especially our children to take this experimental vaccine is not only unconstitutional but unconscionable!

The vaccine also does not prevent getting the virus or spreading Covid and again kids have little to zero risk from Covid.

Why would we force an experimental vaccine that can and has caused REAL harm when the benefits for children are non existent?

Thank you for your consideration.

Sincerely,
Katie Owens

Good Morning,

I write to you today in total devastation. I'm awestruck that this has come this far. I'm the father of 2 boys, one of which is school aged. I've lived in Washington my whole life, I loved calling this place home for 36 years. I find it unbelievable that this is up for consideration. this isn't about science, children have always been the least susceptible to the virus. The Vaccine in many instances clearly doesn't work. it doesn't slow or stop the spread whatsoever. There are plenty of reports that these vaccines cause more harm than good in children, especially boys. Please find it within yourselves to do away with this nonsense.

On another note, WAC 246-100-070 is outrageously unconstitutional! you'd separate parents from kids or other family in the name of an unproven medication that is still ultimately being researched and is not even fully approved by the FDA. Again this isn't about Science to you, it's about a narrative. Nevermind the fact that this is in direct violation to the Nuremberg Code. I seriously hope you take this into consideration as you make your decision, as this could be in the history books one day.

sadly,
Nicolas Borden

WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, and WAC 246-105 are all blatantly against our United States constitution and are very immoral and overreaching by the government.

Our American freedom is on the line. Fight for this country, not against it. It has become incredibly obvious that these policies are no longer really about covid. They clearly are just about power and control.

To those who would be voting to recommend or voting to approve the following WAC's, you will never ever take away our freedom. It is given to us by God, not you. You work for us. We do not answer to you. Think twice before you take away our constitutional freedom. Think again after that. I will always stand against any policy that attempts to bypass our constitution.

Subject: Vaccine mandate

External Email

As a parent residing in WA state, I strongly & passionately oppose the states consideration of mandating covid-19 vaccines for children to attend school. I can assure you that many parents will pull their children from the public school system & many districts across the state will lose precious funding. We are not for the government telling us what we must do with our bodies and our children's bodies, in order to participate in society. We live in a free country & are entitled to body autonomy & freedom of choice. This consideration of a vaccine mandate for school is an extreme overreach by the state. Please do the right thing & do not approve this. Children are the least susceptible group in relation to the virus & show the mildest of symptoms or are asymptotic. Mandating a gene therapeutic drug for children is asinine & wrong on so many levels. I hope you all take a moment to consider morality & what is right & wrong. We do not know the side affects of these vaccines & we won't for many more years. I will not allow the government to overstep & overreach into my families lives. Enough is enough.

Respectfully,

Julie Curtis

External Email

I am writing to say that I , Like many others, am against requiring Covid vaccines for children 5-11 to attend school. It is absolutely unnecessary. My children have had it and I still will not vaccinate them .The government has no right to force this and from what I see on your website it does not even meet the "boards immunization criteria". The amount of people like myself that will absolutely NOT Vaccinate their children will withdraw their kids from school which will just destroy our education system. Their will be No laws passed by us taxpayers to keep funding these public schools. This is against our human rights and it is absolutely baffling to me that our government can just make these decisions. I run a small business and If this vaccination requirement goes into effect I will be forced to shut down my successful business of 6 years and relocate my family to another state. How dare the government uproot peoples lives like this as I know I am not the only one who is about to flee Washington. If you have any moral compass at all you know this is unacceptable. Please hear the people of your state and do not allow this tyranny to continue.

Sincerely,Maria Hibbard

Subject: Vaccine mandate

External Email

Hello board members and anyone else it may concern,

Please do not mandate a vaccine to go to school.
Children are at extremely low risk for Covid.
The vaccines are still only EUA.
There are no long term studies to document any history of safety.
Studies DO now document that vaccinated and unvaccinated can both transmit Covid.
The vaccine apparently does NOT stop the spread of Covid.
The risk of injury from the vaccine is not worth it.

A mandate doesn't make any sense!

Thank you,
Katie McGuire

Subject: Vaccination Feedback for School Age Children

External Email

To Whom It May Concern,

I am the mom of two healthy, young boys (ages 6 & 8). First let me say that I am not anti-vax. My boys have received every vaccine recommended by their doctors and schools up until this point. However, I will not approve of my children getting this new, still very experimental corona virus vaccination. Two years into the pandemic, we have a lot more data and the Science is clear....children are at little or no risk of serious complications from COVID 19. And, even if they are vaccinated, they can still spread the virus, so it doesn't even protect those around them if they are vaccinated. Children have a higher chance of getting severely ill or dying from the common flu than they do the Corona Virus. And yet, children are not mandated to get a yearly flu vaccine. Sure, they are recommended, but not mandated.

Up until this point the vaccinations required in schools have had long term studies demonstrating their safety for children and they have been used to combat what are known to be deadly and dangerous diseases to children specifically. However, there are no long term studies about the effects of the COVID-19 vaccinations, particularly with regards to children. Therefore, unless you are willing to financially bear the burden of any short or long-term negative side effects that can arise in children from taking the vaccine (like myocarditis, blood clots, etc), then you have no business telling parents they HAVE to get their kids vaccinated. If you do in fact make this mandatory, I guarantee you that thousands of parents will be removing their children from the WA schools to homeschool their children. That is how strongly the parents (most of whom are vaccinated themselves) all feel. The majority of parents agree that the risk outweighs the benefits for this particular vaccination.

Thank you for listening. I hope that you make the right decision for the children and families of Washington.

Hi there,

I am a mother of a 6 year old girl, and I am writing to you to discourage the required mandate for students having the Covid vaccine. I have done my part for this pandemic. I am vaccinated. My husband is as well. But requiring our children, who have been proven not to die or get very sick from Covid, is absurd. Let's give them a chance to fight this naturally, which has been proven to ward off future Covid BETTER than the vaccine. So if kids are not getting sick from Covid, and have a better shot of keeping future Covid away by getting it naturally, then there is no reason to require it.

Please allow my daughter, along with every other child, to fight this naturally and with their own choice.

Thank you,
Lauren Cox

To whom it may concern:

I just wanted to share some thoughts with you about this vaccination. I hope you will listen to the voices of the people. Mandating something that has no history is absolutely frightful. There has not been enough time to see how this will affect our society down the road.

We also know that children are not affected to the degree that adults are by Covid so why would we experiment on them?

The documentation does show, however, that both the vaccinated and unvaccinated are both spreading Covid. So, why are we and our children being pushed to get vaccinated? It seems to me the vaccination isn't the cure. Help me out here.

Respectfully,

Kim

The United States was founded on freedom. Freedom of religion, rights to bear arms, etc. The state of Washington and our Federal Government is slowly eroding our freedoms. This is wrong. The State of Washington is already in a mess. Seattle is falling apart after the city let the protestors take over the city and now no one wants to come there and visit. It's scary. You let homeless people take over parks, streets, neighborhoods and litter and defecate and do drugs. You pass laws that let people steal from stores with no repercussions. This is horrible. Now you are firing people who do not want to vaccinate. How is that going? Roads are not being taken care of in dangerous conditions and people are put in real danger. Police officers are quitting their jobs in large numbers and moving away. Airlines are understaffed for this reason also. Now you act like flu season is the end of the world. It's ridiculous. This is life. We have the flu. People get sick. Sadly, immune compromised citizens and the elderly pass away during these times. Every year! Now that COVID-19 has mutated into a more normal mild flu you are still freaking out. So let's impose a vaccine mandate and lose all these unvaccinated kids from our public school system and all the federal money that they bring. Hmmmm. Sounds really unintelligent to me. If you pass this mandate you are losing all my family and friends from the public school system. Stop the madness!!!

Subject: Vaccination Mandate for Children

External Email

Please do not abuse the power vested in the government to mandate child vaccination. I do not believe enough data has been collected to validate that children are safe from side affects. With over 90% of the at risk community vaccinated I don't believe that children are a reservoir that threatens the at risk community. If you are going to follow data you must also consider that a large percentage of children would likely choose not to be vaccinated once they are adults. You would therefore be violating the conscience of those soon to be adults.

As a mathematician for the last 30 years I have worked hard to pursue the application of science and the exploitation of data in the form of statistics to protect the public. In order to do that I have to study many aspects of all safety considerations. I do not believe the current administration or industry, Or industry has been accountable or effective at doing that. I believe if the policies have been followed today or applied to air travel only 60% of the people who got on a plane alive would get off a plane alive.

Thank you for your time and consideration.

To Whom It May Concern:

Please do not make the covid "vaccine" (a misnomer, as it is really gene therapy) mandatory for school age children. To remind you -- children have been at extremely low risk for covid-19 and they are still only emergency-use authorized.

Human studies have not been given the time needed to prove their safety. PLEASE do not go through with this proposal. BTW - Is the WSBOH prepared to proclaim their safety and efficacy for all children -- for all people, for that matter? Federal health officials have stated . . .

CDC Director Walensky: "What the vaccines can't do anymore is prevent transmission."

Dr. Anthony Fauci: "We now know, as a fact, that [vaccinated people with Covid-19] are capable of transmitting the infection to someone else."

Moderna's Chief Medical Officer Dr. Tal Zaks: "There's no hard evidence that it stops [the Covid-19 vaccinated] from...potentially infecting others who haven't been vaccinated."

It sounds to me, as testified by our own government officials and big-pharma that Covid-19 "vaccines" are mere treatments and therefore have no legal grounds for forced use. What a reckless abuse of power. STOP IT!!!

Isolation camps, forced vaccinations, removing the People rights. Have you read your constitution lately? I have you are in violation. You have yet to provide scientific proof this Cov 19 SARS Cov 2 virus has been isolated. Every FOIA request has come back with we can not provide you with proof of isolation. Etc etc.. this criminal activity has to stop. The made up elevated death reports exposed in declassified documents. The purposeful deaths of our elderly in the nursing homes. Let's not leave out the Nuremberg Code all found guilty of crimes against humanity will pay the ultimate price. I was just following orders does not release you from liability. EVERYONE ONE involved will pay for their crimes. The amount of corruption in this government runs deep but WE THE PEOPLE are stronger and there are many more of us. Anyone who thinks forced injections forced restraints on innocent people is acceptable do NOT belong in our government. We are all watching all of you and keeping track of who is making the right and the wrong decisions to protect their people. Show us PROOF of isolation show us PROOF of the death exaggerations. Watching VAERS and other resources is what many of us are doing. Finding records that have been removed fraudulently there is so much proof that many of us hold to expose the evil running rampant amongst us. I OBVIOUSLY OPPOSE this attempt to create HOLOCAUST 2.0 among the American People.

Disclaimer although it may read as there are threats in this message there are none. I'm merely stating my opinion and the level of my knowledge.

I am speaking up for those who are afraid and unaware.

I demand proof this virus exists from a human not from a lab and any and all variants.

I also demand scientific proof these injections are not doing harm and a complete list of their ingredients even the so called proprietary ones that could be causing harm.

Never should anything you want us to inject into our bodies be hidden.

These acts of deception are being brought to light.

I am adamantly opposed to making COVID-19 vaccines mandatory for school admission or childcare in Washington State. My reasons:

1.

Children are at very LOW risk of contracting COVID-19. Add that LOW risk to the HIGH survival rate. Mandated vaccines do not make sense, considering the possibility of a higher risk of harm from the vaccine.

2.

The vaccines do not stop the contraction of or the spreading of COVID-19. I have personally seen in the last few days, 3 friends, all double-vaxxed, who have tested positive for COVID-19. This shows that the COVID-19 vaccine really does not work, as you should know from publicly available information.

3. COVID-19 vaccines are still only Emergency Use Authorized. NO ONE should be required/mandated to receive an EUA vaccine or other EUA medication/preventative.

Read up! There is a plethora of publicly available information about all aspects of COVID-19 vaccines. There is NOTHING that I have read that would support mandatory COVID-19 vaccines for children, or for anyone for that matter.

Subject: Vaccination mandates in schools and Quarantine camps

External Email

Good morning,

I am writing as a very concerned citizen of WA state.

Requiring EUA COVID vaccines for children has no basis, grounded in good health for these children. With a disease that has a 99.995% recovery rate in children, there is absolutely no reason for a vaccination. Many children have very mild symptoms and without the fear of Covid would have been allowed in school any other time in history. We should not be making healthcare decisions based on fear. Does it not concern anyone on the board that the manufacturers have said it will take 75 years for them to release the ingredients of this experimental biologic? The FDA has come out saying the manufacturers need to release the information in 8 months. Wouldn't it be more prudent to at least wait to debate this issue until we know what is in it, before we subject our children to unknown health issues? Lets not forget that vaccinated people are spreading COVID also. If you are vaccinated aren't you protected from serious illness? So let those unvaccinated take their own risks based on their own research and assistance from their physicians. Our children, however, do not get a choice as to what is being put into them if the state moves forward with this. The government or the schools do NOT have a right to supercede their parental authority.

In regards to the quarantines, I'm just shocked that this is even an issue up for debate. Never in history have we quarantined healthy people. This makes no medical sense. Lepers were put into colonies way back when, NOT healthy people. To label COVID as an infectious disease to give more authority to a government who has repeatedly abused it's authority would be tragic. What is next? Will the flu be listed as an infectious disease? So everyone has to get a flu shot or be quarantined and subjected to "counseling" until the person comes to their senses and agrees with the government? This is called brainwashing/propaganda and when done in other countries, like China, considered human rights violations. Since when has differing opinions been a "threat" to society? It is what our country was founded on. Remember why our founding fathers left Great Britain and established our Constitution with rights? Allowing something this egregious makes us no better than Nazi Germany and what was done to the Jews. Didn't we learn from the Japanese internment camps? Involuntary detainment is a stain on our history. Does WA State want to be known for that kind of abuse to its citizens?

I respectfully ask you to reconsider both of these issues and say NO to both.
Thank you, Linda, concerned citizen

Subject: Vaccination Policies

External Email

I am completely against any of the proposed Covid Policies that are over reaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105. "

I will be taking my children out of public school if these policies pass.

The continued abuse of emergency power by Governor Inslee and his administration without listening to the will of the people or at least giving them a chance to show their views by allowing them to vote on important issues like these will not go unnoticed.

Thank you,

Max Hospenthal

I am against mandating children vaccinations and having quarantine camps. We are all adults and can govern ourselves. Please notify me of your decision on these two items. If passed I will be considering joining the others and moving out of Washington. This really is getting out of hand.

This is from Jessica Blattner's mother:

"At 14.5 my daughter received the Pfizer vaccine for Corona. It was important for us to give her the vaccine due to low lung capacity due to scoliosis (spinal curvature) that developed from a young age (because of an oncological disease from which she suffered up to two years old). Ten days before the vaccination she underwent surgery that was supposed to improve her leg rest and her posture. It is important to understand that immediately after the same surgery she went and everything was fine. A week after the vaccine she suddenly couldn't stand or walk and the doctors who tested her said it was a neurological phenomenon related to the vaccine and it would pass. And yet, she worked and restored great within two months. On October 12th she came back from school, I was shopping with her and she went to sleep. At 4am I walked into her room, she couldn't fall asleep so I covered her in a blanket and stayed with her until she fell asleep. At 8:30 am I walked into her room and she was no longer alive. Only then did I remember that a few days ago she complained about strong heartbeats and I thought she was probably stressed because of school. I didn't think for a moment that there was a problem with her heart. There never was. Doctors said she probably had a heart attack or something electrical in her heart. We didn't agree on the post-death opening. 14 and 9 months old was in her death. A beautiful and talented girl, she had a YouTube channel and Tik Tok and Instagram. 5 days before she died she recorded a video of her telling her "immune story". I'm sure this isn't a case and that's also why it's important for me to hear her story. I don't want it to be for nothing, I don't wish it to happen to other kids. This material should not be given to children in any way. This is simply a mistake. Please listen to me and my daughter's story. Please. "

This was Sarah Jessica Blattner talking about her Immune Story before she died:

I am opposed to the Board adding to the daycare or school requirements any Emergency Use Authorized (EUA) product or any licensed product formulation which has not yet completed Phase 3 clinical trials.

This opposition pertains to any and all avenues through which the Board has authority to add medical intervention requirements, including through regular or emergency rule-making.

The subject (or purpose) of this rule is: ICWA is requesting the WA State Board of Health adopt a new, permanent Rule prohibiting the Board from adding to the daycare or school requirements any Emergency Use Authorized (EUA) product or any licensed product formulation which has not yet completed Phase 3 clinical trials. This new rule request pertains to any and all avenues through which the Board has authority to add medical intervention requirements, including through regular or emergency rule-making.

I am requesting that the board adopt a new rule:

Despite the absence of an FDA licensed COVID-19 vaccine w/ completed Phase 3 trial studies in children, and despite CDC-acknowledged risks of myocarditis and blood clots, the BOH has gathered a Technical Advisory Group (TAG) to examine adding COVID-19 vaccines to daycare & school requirements. This new rule is needed immediately to ensure that federal EU regulations are upheld & to protect fully informed consent, which prohibits the use of coercion or undue influence, such as can be exerted by state requirements.

Subject: Vaccine for children concern

External Email

As a concerned parent during this pandemic, I realize that there is a need to discuss this issue. I am thankful for a chance to voice my opinion and concern.

I have a young boy in your school and I'm concerned about his health if he took the vaccine MORE than if he were to be infected by the virus. Myocarditis has been a bigger issue in young boys from getting the vaccine than it ever has before. This inflammation of the heart frightens me more than covid as it's deadly effects can become sudden and without warning. I don't want that for my family.

Please take into consideration the numbers of cases, illnesses, and deaths when it comes to the school children. The numbers don't show the same gravity that the numbers for adults do. Also, let's not forget that the vaccine DOESN'T stop the spread or lowers your chances of becoming infected. It is supposed to be a means for INDIVIDUAL protection for oneself and improves your chances of beating the virus if you become infected. This vaccine is new, and although FDA approved, still in its experimental stages and shouldn't be considered a staple vaccine yet. Please, DO NOT make the vaccine a requirement for our kids.

Thank you for your time,

Hamber Pablo

Hi,

Based upon our freedoms and constitution in this country and state, vaccines should be a choice that each person makes. Do not take our choice away. Freedom to choose what we put or don't put in our bodies. We should have the freedom to choose what medicine we do put or don't put into our bodies.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following reasons:

1. Children are at extremely low risk for Covid.
2. The vaccines are still only emergency use authorized.
3. There are no long-term studies to document any history of safety.
4. Studies do now document that vaccinated and unvaccinated can both transmit Covid; therefore,
5. The vaccine does not stop the spread of disease.

Please be logical and follow common sense about this issue. The risks of these injections far outweigh the benefits, and they are especially not necessary for children (under 18) as children (under 18) do not readily contract Covid, get sick from Covid, or spread Covid. There is a plethora of evidence available to support this. Please do not allow medical experimentation on our children.

To Whom it may concern,

I am a parent to three children in the Monroe School District.

I implore you to do whatever you can to reject the Covid vaccine compulsory for school attendance. One of my three children is severely vaccine injured and I will not be getting him or my others vaccinated against COVID. This is a virus that has little to no affect on children. In fact, my children have all had Covid and recovered without any ill affects.

Preventing children from attending school is discriminatory. Children whose families choose not to have this -still experimental- treatment have the right to an education.

We have the right to body autonomy and the right to choose our medical treatment. I encourage you to do all in your power to uphold our rights to our own medical choices for ourselves and our children.

Thank you for your consideration.

Dear WA Board of Health,

It has been brought to my attention that you are holding a meeting on 1/12/22 to discuss using law enforcement to forcibly detain those who refuse vaccines (WAC 246-100)... AND to force kids to get it to go to school.

This is incredibly wrong and disappointing to hear. I hope you will listen to the voices of the people of Washington and reconsider.

It should be up to parents if they want their children vaccinated. Washington has lost enough workers due to these ridiculous mandates! Enough. We won't stand quietly when it comes to our children. Pretty soon Washington will be vacant. You can't even get a Uhaul to get out because everyone is leaving in the masses. No way to undo the damage already done with all of the WSP and Wadot, drs, nurses etc who have already left, leaving us at a greater risk than any virus!

Subject: Support for Agenda Item 11 of January 12, 2022 Meeting

External Email

Members of the Washington State Board of Health,

I am writing to give my unequivocal support to Agenda Item 11, Informed Choice Washington's Petition for Rulemaking, which would "prohibit... the Board from adding to the daycare or school requirements any Emergency Use Authorized (EUA) product of any licensed product formulation which has not yet completed Phase 3 clinical trials."

As you are all no doubt aware, the United States VAERS system has been shown to be supremely under-reported, which amplifies the problems arising from the huge number of adverse events which have been reported. In undeniable disregard of federal law, many medical professionals do not report possible adverse events to the VAERS database, be it because they don't have the time (which is being exacerbated by mandates resulting in unvaccinated healthcare workers being fired), don't understand the system, don't believe (incorrectly) that all events must be reported whether or not a causal link is suspected, or any other reason.

The data also clearly indicate that children are among the least affected by COVID-19 (and much less acutely now with the circulation of the omicron variant, as opposed to the delta variant), but the most affected by negative adverse reactions from the vaccines (especially myocarditis). And, as time passes, it is very possible that more severe adverse events resulting from vaccination will become (more) apparent.

Furthermore, the data indicate that vaccine protection against omicron is much less robust than it was against delta, which makes the argument for mandating this technology—which is now considerably outdated and is likely to become even more so in the event of new mutations—less than well-considered.

COVID-19 does not pose a threat to the vast majority of children, and a risk-benefit analysis of these shots for children doesn't indicate that a mandate would be in any way beneficial for their health.

Please adopt this petition.

Sincerely,

Kincaid Gould

I am a parent of 2 children in Battleground School District. I am writing to express my concerns about the potential of making the covid 19 vaccine mandatory in schools. This vaccine is brand new and has not been studied long enough to know if there are long-term side effects. The virus is constantly changing therefore making the vaccine less effective. The virus isn't affecting children in the same way as adults. They are not getting very sick. My kids have had covid already. They do not need a vaccine. This vaccine should be a personal decision. I would pull my kids out of public school if this was mandated. I ask that you please do not make this a mandatory requirement.

Thank you,
Marin Krueger

Subject: Support for Covid vaccine mandate for school children

External Email

Hello all, I am a mom of 3 girls ages 17, 19, and 21. I live in a conservative area in northern WA. You'll likely be hearing from many of my conservative neighbors who are quite upset at the notion of mandating the Covid vaccines for school children. I, on the other hand, am FULLY onboard for requiring any of the Covid vaccines for eligible children. All of my girls are fully vaccinated, and I'm trying to get them their booster. I do not see any difference in requiring the Covid vaccine vs MMR or DTaP, etc. Please, please do consider mandating this like all of the other vaccines that protect our communities. This isn't just about the person receiving the vaccine, but the community at large. There are 4 people in my family who are seriously at risk of death by Covid, and while they are vaccinated in varying degrees, it has clearly been shown that Covid can still kill immune compromised individuals. It's even more important when it comes to protecting those who can't get the Covid vaccine.

The community needs protection in every possible area, and a Covid vaccine mandate for eligible school children would help protect the community at large in addition to the children themselves.

Thank you for your time,
Misty Manherz

Subject: Vaccine Mandate - School Age Kids

External Email

Good afternoon,

It is my understanding that the WA State Board of Health will be making a decision soon regarding the covid vaccine and our school age children.

I would like to say that I am 100% opposed to this requirement. I do not understand why you would want to impose this on our children when:

- * Children under the age of 18 have a 99.995% survival rate from covid infection - 99.995!!

- * The adverse effect of the shot for these children is child abuse. The kids will survive; let them get natural immunity.

- * The covid vaccine (not really a vaccine, just a shot that has terrible side effects) is still under emergency use authorization and has NOT BEEN VETTED for children. Even the members of the CDC have admitted to this.

It seems to me that it is you folks on the board who are afraid of something. Are YOU afraid of covid? Do YOU fall into the danger age? Do YOU have ailments already that would prevent you from surviving covid? Then by all means, please do get the shot and all of the many many many boosters to come. Wear a mask. Stay away from others. Protect yourself.

You have NO basis to impose this on our children. When will you start looking at the true facts and really do what's right? Or are you being paid off somehow?

You should be ashamed of yourselves for even considering such an atrocious act to our children. I do hope that you will all consider the consequences to the children themselves should you make this covid shot mandatory. Let the children grow up healthy and be responsible adults that can then make their own decisions. If not, their illness, unhealthy bodies, and deaths will be on your hands.

Sincerely,
Mrs. Engledow

Subject: The Vaccine

External Email

I STRONGLY oppose this bill.

I don't believe that it should be a requirement. I strongly believe that the parents should have the right to decide when and if it is right for their child.

I don't believe the government should have the right to tell parents what is best for their children as they don't even know them. This is a COMPLETE abuse of power and should not be allowed. Being forced to get a vaccine or forcing our children to get an education with it still being such a new vaccine. We don't know long term effects at all. I'm not willing to risk my child for the experiment. I REFUSE TO ALLOW THE GOVERNMENT TO MAKE MY CHILDREN LAB RATS FOR A VIRUS THAT HAS A 99.999% SURVIVAL RATE WAKE UP PEOPLE!!!

To the WA State Board of Health --

Whether you are aware or not, the vaccine you are pushing is a bioweapon designed to thin the herd with plausible deniability to shield the vaccine makers and their paid off minions. There were actually no excess deaths in 2020 but life insurance companies are reporting a huge, never-before seen 40% jump in all-cause deaths the last few months in working age individuals. Cardiac events, strokes, aggressive cancers, neurological and autoimmune issues (mRNA technology destroys innate human immune systems) and more, none connected to the 'vaccine' (which obvious isn't working as it should, at any rate).

Pathology results show 93% of people who died after being vaccinated were killed by the vaccine

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdoctors4covidethics.org%2Fwp-content%2Fuploads%2F2021%2F12%2Fend-covax.pdf&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C37466b6e998b43ce365d08d9d248e8dc%7C11d>>

Have you taken the time to look at the newly-released Pfizer documents?

Pfizer's own vaccine trial data conclusively shows an INCREASED risk of illness and death for the vaccinated group compared to the placebo group e.g. there were 20 total deaths in the vaccinated group versus 14 total deaths in the placebo group with nearly double the amount of cardiovascular deaths among the vaccinated. Furthermore, Pfizer unblinded the trial participants, tested the Covid-19 vaccine on healthy and young individuals rather than the sick and elderly and did not track any subclinical biomarkers

which would be valuable early warning signs of disease caused by the vaccines. Pfizer reported a 95% efficacy, which sounds like it protects you 95% of the time, but that 95% actually refers to the Relative Risk Reduction, while the Absolute Risk Reduction was only 0.84%. Pfizer reported one of their 12-year-old trial participants who has been paralyzed to a wheelchair and forced to eat from a feeding tube for the last 10-months as "functional abdominal pain". Another whistleblower who was a regional director of Pfizer's clinical trials also reported to the FDA that Pfizer had falsified data, unblinded participants, and not followed up on testing participants who reported symptoms, but neither the FDA nor Pfizer ever investigated the issue. Pfizer's report authors had conflicts of interest with 84% of them either employed by Pfizer, owning Pfizer stock, receiving grants from Pfizer, hired as consultants by Pfizer, or previously running clinical trials for Pfizer. For example, two of the Pfizer report authors actually made \$9B in stock market profit directly from the Pfizer vaccines because they also happened to be the co-founders of BioNTech.

Pfizer's data shows a significant increase in the risk of illness or adverse events for the vaccinated. You won't actually find it in the report itself. You have to dig into the supplementary appendix in order to find it. What else would you expect from the company that has paid the largest criminal fine in US history? Their whole business model is based on fraud. Why would you want to push this product on your fellow citizens? Is fear the driving force? Something else?

Washington state has been following lockstep with the globalist UN agenda (via WEF guidelines) written long before Covid-19 came on the scene and our governor is complicit. Yet with cases flourishing now, it is obvious that NONE of the mandates have had any effect on stopping the spread, and they never will. Perhaps you've been lied to with statistics but you have not seen any science at all proving our methods are correct. I know, I looked. Did you all mean to sign up for their depopulation push? Do you think you and your families can avoid it somehow? Hmm.

And now you are coming after our children?!

Washingtonians are trusting and gullible but they are beginning to wake up and speak out. Lawsuits have already been started around the world and eventually every one who pushed this death shot and overreaching mandates will be held accountable. It is murder for many. Covid is here to stay and we can live with it, with early treatment the key, NO quarantines, no forced testing, treatments, or injections required. This is a crime against humanity and you have been warned.

Subject: Vaccine mandate for childcare and schools

External Email

To Whom it May Concern,

It is with great urgency that I write this email. The DOH should not require vaccination in children as part of a requirement to attend school or childcare. In short- children should not have to receive an experimental vaccine in order to attend their free and public education. This vaccine DOES NOT prevent children from getting or spreading the virus. It has NO place as a requirement for entry to schools/childcare. It is also not the place of DOH to co-parent with every Washington family. Allow parents/guardians to make choices that best fit the health and safety of their families.

Make the safe choice for families and choose to continue to respect the freedoms of medical choice to Washington families.

-Kim Baumann

Dear Board of health members,

I am writing to express that Covid shots should absolutely NOT be a requirement for our children. I would like to remind the BOH that children are at extremely low risk for Covid and that the vaccines are still only EUA (emergency use authorization).

Please do not make this a requirement for our children to attend school and remove their rights to education and their right to have bodily autonomy.

I am writing to ask that the state board of health REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission due to the following reasons:

Vaccines DO NOT prevent, nor stop the spread of COVID-19.

Children under the age of 18 have a 99.995% survival rate from COVID infection.

Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19.

The COVID-19 vaccine is new. We and many parents do not feel comfortable giving this to children without years of testing, studies, and long term effects being known.

I have 4 grandchildren and they will be removed from Washington State schools before I will comply to a COVID-19 vaccine mandate for them.

Thank you for your time and attention to this serious matter and mandate,

To Whom it may concern,

I'm fully vaccinated and that was my choice. After seeing the ineffectiveness of the vaccine first hand, I question this push and what's behind it. The vaccine is NOT FDA approved because it hasn't gone through the rigorous testing necessary for approval. In addition, never in the history of vaccine approval has one been approved with less than a 50% effectiveness. In addition, mandating unapproved vaccines to children K-12, who have a 99.9995% survival rate without having had the vaccine, is unthinkable and negligent.

New information from VERS shows us that negative reactions to the vaccine are much higher than previously reported, especially in children and young adults, and most independent virologists believe those numbers are still underreported by as much as 80%. Dump this irresponsible idea and start working with scientific evidence instead of following political incentives. The unforeseen consequences of your actions to mandate will be on your heads and we will hold you responsible for the repercussions.

To Whom It May Concern~

This is my public comment for the upcoming meeting on adding the Covid Vaccine to the line of up required vaccines for K-12 education.

According to the Board of Health's own criteria, a vaccine must be fully FDA approved in order to make it mandatory for school attendance. The current Pfizer vaccine in use for children in this country is still an Emergency Use Authorization only vaccine, so I do not see how this meets the Board of Health requirements. I recommend against mandating for school until the vaccine proves immunity to stop transmission like other common vaccines do, which was the requirement under consideration in the 1905 Jacobson vs. Massachusetts SCOTUS case in which it stated mandates could only be considered which "prevent the spread of contagious disease." So far, it is evident that this vaccine does not stop transmission and, therefore, should NOT be added to the list of vaccines needed.

More and more parents are pulling their children from public school due to the mandates and vaccine requirements. I know I'm just one person but what goes in my body and my children's body is my choice. Please consider our children and that they determine our future. Vaccine mandates will lead to unhealthy children and thus an unhealthy adult population.

Thank you for your time.

To whom it may concern, my name is Nicole Brock & I have 3 kids in the Moses Lake school district. It was brought to my attention that a board is forming to implement the mandate of the Covid vaccine for kids in public WA schools. I'm absolutely against this & feel it's an over step of decision making. The flu shot was never mandated before. Also, research shows that kids can get over Covid much easier, just like a cold or the flu. If this gets passed I will be pulling my kids from the public school system & I know many others that will too. I hope you take parents rights into consideration when making your decisions.

Thank you for your time.

Best,
Nicole

Subject: Vaccination Feedback for School Age Children

External Email

Hello,

I am the grandmother and regular care giver of two elementary grade grandsons, and I do NOT wish that my grandsons be required to take any corona virus vaccinations. We all know the statistics; elementary age school children are at a very minimal to no risk for severe covid-related illnesses. To date, the vaccinations that are required in schools have had long term studies demonstrating their safety for children and they have been used to combat what are known to be deadly and dangerous diseases to children specifically - smallpox, as an example. Contrasted with this, there are no long term studies about the effects of the corona vaccinations particularly with regards to children; consequently, I don't believe that children should have to be required to get coronavirus vaccinations.

Thank you for considering my point of view,

Marianne Maiocco PhD

To the Washington State Board of Health,

I'm writing to implore you to NOT include the covid-19 shot on the list of required vaccinations for schools.

As the father of 2 school-age children in Whatcom County, I can say with certainty that a decision to mandate kids to have the covid vaccine will wreak havoc on many families and within our schools.

There are many reasons why (most) parents have chosen to wait on having their children receive the covid vaccine including, but not limited to:

* Covid vaccines are very new and most parents are not at all willing to risk their children's health before knowing much more about the long- and short-term side effects of this new vaccine. These feelings are completely justifiable as the science on these vaccines is still evolving and coming to light.

* In terms of how the vaccines will effect public health- that science is still evolving as well. Considering that both vaccinated and unvaccinated individuals can contract and pass along the virus, many parents and individuals remain skeptical that any perceived or real risk is actually worth any perceived benefit. It serves no one to preemptively force parents into a decision they aren't ready to make when there is still so much confusion circulating.

* Covid in otherwise healthy children is not a large risk- and the (extremely low) hospitalization rate of healthy children supports this. Therefore, the risk/reward of getting this shot does not balance when you consider the mild nature of the virus and the possible side effects of the vaccine. Parents should be given the freedom to choose their own level of risk for their family. There are already many adverse reactions occurring in children and young adults. Forcing this vaccine against an individual's or parent's will is reckless and wrong.

* There are MANY medical, religious, and other deeply personal reasons why parents are hesitant to give this shot to their children. Forcing parents to choose between their children's health or their schooling is not beneficial to anyone. Please DO NOT force parents to make this choice.

At this stage of the pandemic, we find ourselves at a pivotal moment when every protection we can possibly hope for from this virus is in place. We have the tools to protect ourselves and our families- and everyone should have the right to choose which protections are best for them. You, as the health board, are in a unique position to renew public trust in our state government by demonstrating trust in the people of Washington.

Please consider that no one cares more about a child's health than their parents. No one knows their medical history or the ins-and-outs of each individual child better than their parents. PLEASE allow parents- the ones who care the most- to make the determination for their own children. It is what is best for the health of every family, every school, and every community.

I appreciate your time and consideration.

Subject: Potential vaccine mandate

External Email

Dear Members,

I am writing as a parent of a school aged child that has been burdened by the consequences of the pandemic. I am deeply concerned about a potential mandate regarding the COVID-19 vaccine that may be required for school entry. I am requesting that you do NOT mandate these vaccines for children and here is why:

The statistics are clear! Children are not affected by the virus the same way immuno-compromised adults are. The effects of the virus on children are low enough that the risk of long term side effects from a COVID-19 vaccine FAR outweigh any benefit that vaccine could offer. My 16 year old son just recovered from Covid and it was exactly like having the flu. He's completely fine with zero complications. None of the rest of us were infected because we had Covid last year and have natural immunity. We MUST follow this science!

Decisions about medical choices, including vaccines, should be first faced with discernment - NOT mandated by a third-party. Based on the already low levels of enrollment in ALL school systems (both public and private), mandating the vaccine would further mark a mass exodus from these schools.

Again, follow the science and DO NOT mandate the vaccine for entry into school. The decision to do so would be extremely detrimental and profound on OUR children and our future.

Sincerely,
Kelly Mukomela

External Email

I want to speak out against requiring all students in Washington to be vaccinated against Covid. I am fully vaccinated, however I do not feel the vaccine has been studied long enough to ensure it is safe for children, especially if they need 3 or more shots in one year, and even then they may not prove effective. I do not think these vaccines can be compared to the vaccines that were developed, and tested for years. I do not believe the Washington board of Health has the authority to force these emergency vaccines on school children.

To the Washington State Board of Health,

We know that children in general are not severely affected by Covid. Please do not require them to be medical guinea pigs for a virus that isn't dangerous for them. We still don't know the long-term effects of the vaccines.

As the effects of Covid variants are naturally becoming less severe, please do not enact your unthinkable proposed policies for requiring law enforcement to involuntarily quarantine people or force treatment.

(Those related to allowing local health officers to use law enforcement (WAC 246-100-070 <tel:246-100-070>) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045 <tel:246-100-045>) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040 <tel:246-100-040>). These specifics come from WAC 246-100. Also, including the Covid-19 injections as part of school immunization requirements using WAC 246-105.).

This is not Nazi Germany. We are a country built on freedoms. Please protect the future of our country.

Thank you for your time. M. Hansen

Hello,

I am writing to let you know that I am completely against any of the overreaching COVID policies that are being proposed. They are unethical, immoral and anti science. It is a blatant over reach of power. I am against WAC 246-100-070, WAC 246-100-045, WAC 246-100-040.

Thank you.

Sincerely,

Michaela Eckert

Subject: Please say NO to vaccine mandates for school children

External Email

Dear Kellie:

Our children are our future. Please do NOT require Covid vaccines for children to attend school. They already have to have so many shots, and covid is not even a danger to nearly all children. Children are at extremely low risk for Covid. The risks definitely outweigh the benefits. Vaccines are STILL only EUA. We have absolutely NO long-term studies to demonstrate safety. Studies DO show that both vaccinated and unvaccinated can both transmit Covid. Therefore, the vaccine apparently does NOT stop the spread of the virus. Please, consider the preciousness of these children. They will be just fine... better than fine, actually, without the vaccine. Please vote NO! No Covid shots for children!!!

Thank you for listening.

Subject: Please With All Due Respect

External Email

Hello, I am a mother of an eleven year old son in Junior High and he is really flourishing with his education and self esteem. Throughout the closures due to COVID he has been severely depressed and missed out on many memories and experiences. We are going to counseling every three weeks and he is doing much better, but one thing I cannot control is when the government makes mandates and regulations that take from his life. There is no way under any circumstance I will allow my son to have the COVID vaccine. Why would I give him something I physically, mentally, emotionally and spiritually cannot put into my body. I know COVID is 100% a horrible reality and affects us all in many ways. Although this problem is not going to be stopped by mandating our future generations to require the vaccine. It will not reduce numbers and it will only continue to mutate into more variants of COVID and vaccinated people can still spread it to others. For instance, you can get COVID with or without the vaccine, you can die from COVID and die of side effects from the vaccine, you can spread COVID with or without being vaccinated, and you can have long term effects from both, so why would you want to get a vaccine on top of possibly getting COVID. I cannot control getting COVID, but I can control what I put into my body. We have NO IDEA the long term effects of this vaccination. Although, there are people dropping dead due to heart issues, blood clots and god only knows what else as some would think, but I believe there are people in higher power that do know. PLEASE do not take education, interactions, memories and childhood's away from our children. There are many families that will not be sending their children back to school due to this. Luckily my son has a good home that is safe, warm and he has plenty to eat. Please do not put our children at risk for all sorts of mental and emotional issues. I have had COVID and I do have long term lung problems I am encountering. I now use an inhaler here and there and I have not recovered from the coughing/flem build up and it has been 3 months. My whole household got COVID besides my son and he has been exposed multiple times now and still has remained healthy. Why would I give him a vaccine that could cause him heart issues for a fact because I know multiple families who have lost their children due to heart issues after receiving the vaccine. Also why would I give him something we have NO IDEA what it could do such as, possibly causing infertility or who knows what can occur. This is seriously the unknown. PLEASE I am begging you to please give this decision time and when I say time I mean there will be a point when the truth comes out about this vaccine and we shouldn't jump to conclusions and damage our children's health before we really know what could happen. Please do not take away their childhood or education.

Please from the bottom of your heart consider not requiring this until further truth and evidence comes out.

Sincerely,

Karli Sansom

Subject: Please say NO to C-19 Vax for Our Kids!

External Email

Dear members of the WA State Board of Health,
I implore you to TRULY consider our children's actual health outcomes and do NOT recommend the experimental Covid-19 vaccines as mandatory for school children! There are NO long-term studies and no vaccine created in this way and this quickly has ever been used. Don't force our kids to be an experiment!

Our children are not at high risk for Covid-19 - not getting it, not transmitting it, and no child has had detrimental outcomes from Covid that didn't already have serious health issues. Don't make so many children suffer as experimental guinea pigs for so little in return.

The Covid vaccines DO NOT stop the transmission of Covid! They are not effective and they are not safe. There are many extremely troubling reports of myocarditis and other serious heart conditions (including death!) from young, healthy individuals whose only common factor is the Covid vaccines.

Please due your true due diligence and look at the real facts, not just the ones provided by those benefitting from the vaccines financially. The vaccine industry is dependent on our being and staying sick. They have no motive to actually improve our health.

Actual natural immunity from Covid-19 will protect our children much better and much longer and without the toxic, life-altering, and unknown side effects of the vaccines. It would be better for our kids to have Covid when they are young and can handle it best -- just like Chicken Pox. Then they will likely have life-long immunity... Rather than life-long side effects from the vaccines.

And these vaccine injuries are REAL. Take a look at the Vaccine Adverse Event Reporting System (VAERS), please visit - <https://openvaers.com/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fopenvaers.com%2F&data=04%7C>>. These numbers are very likely only a tip of the iceberg, as vaccine injury is extremely underreported. Those injuries are very real and devastating to the individuals they effect. There are over 1.8 million adverse vaccine events reported. It is not rare... And those numbers are not just statistics - they are real, human lives that are forever changed for the worse ... or taken away altogether. Where there is RISK there must be CHOICE!

If parents want to vaccinate their children against Covid, that should be their choice. And they can! But it is wrong - morally, ethically, and medically to force this untested and experimental vaccine upon the children of Washington by threatening them with the loss of their education!

I urge you, please, do the right thing and keep this decision in the hands of the parents!
Where will it all end if you don't? How many dozens of boosters will be needed after that?
With each shot there is more compounded risk. Please, keep your hands and your
conscience clean and DO NOT recommend the Covid-19 vaccines be required for our
students!

Respectfully,
Melanie Robbins

Even having the conversation of whether we will rip people from thier homes is egregious. Covid was ENGINEERED to be a flu virus, that is why they used the Sars Virus and the vehicle. This thing will be around indefinitely and we will always find it should we look for it. I am absolutely opposed to these procedures that infringe on my rights to make my own medical decisions. Not only that, most of the people in Washington State not comply.

To Washington state big:

I am completely against this proposed covid policy that is a complete overreach of power. People are entitled to their own healthcare choices. There shouldn't be any threat of law enforcement being able to detain you due to a personal health choice.

Also, not having all the information about or from the studies of the vaccinations for Covid 19, there should be no mandatory implementation of vaccine requirements of children for public school attendance.

Sincerely,

Janine Van Liew

We want to voice our concern and opposition to the proposals WAC-246-100-070 and WAC-246-105. We oppose using police force be used to isolate in a quarantine facility any families or group of person because they do not want to be medically examined, treated, tested or vaccinated. That sounds eerily like Nazi Germany treatment of the Jews and I am sure that we do not want to go down that road.

As well we oppose Covid-19 injections being made part of the school immunizations requirements. Children are at low risk for Covid-19 and these injections have only EUA and are at best experimental.

We ask that you listen to the people at your meeting on January 12th and oppose these two measures.

I am a U.S. citizen and a tax-paying resident of Washington State. I understand that there will be a public hearing on Wednesday, January 12th, 2022 of the board of health of Washington State.

I would like my opinion to be considered as the board of health of Washington State contemplates taking possible action* on a Rulemaking Petition - Chapter 246-105 WAC, Immunization Criteria, Child Care and School Entry which I believe is in regard to Covid-19 vaccines which are under experimental authorization at this time by the Federal Government under the Food and Drug Administration. I would vociferously point out that these vaccines are experimental and should not be mandated as part of the national immunization guidelines designated in WAC 246-105-040 specifically and as part of Chapter 246-105-WAC Immunization of Child Care and School Children against certain vaccine-preventable diseases last update: 10/22/19.

My opinion on this topic comes from the extensive research I have done on the vaccines themselves as well as my knowledge of the U.S. Constitution. These vaccines have been linked to numerous side effects** including myocarditis, menses changes in menstruating young women, heart attacks, Guillain Barre syndrome, and death to over 21,002 individuals including some young persons. It is not right to mandate an experimental vaccine on the youngest in our population for something that is still in the experimental stage and does not outright prevent Covid-19 in vaccinated individuals as we have discovered over the past four months. It is time for the board of health of Washington State to step back from these draconian measures of mandating the Covid-19 vaccines, especially for our young citizens, in order to attend school. It is enough.

I am asking you to not include Covid-19 vaccines in the immunization program for our youth in order to attend school. This is consciously wrong and oversteps the boundaries of your authority to say nothing of the crimes against humanity such legislation via mandate will set for this state.

Additionally, I am also concerned about agenda item 6. Looking for Public Comment on 246-100 WAC Communicable and Other Certain Diseases. This item seems to address everything from detainment, containment, and quarantine. Please tell me that you are not looking to implement these kinds of dystopian procedures for those who have chosen not to get the experimental vaccines. Again, I must emphasize, that now is the time to do the right thing and listen to the public outcry such as mine about this whole pandemic and these experimental vaccines and the draconian measures. Enough.

I have lived here for over two decades and the destruction that has been done to this state in the name of public health but under the guise of fascist politics may never recover. Please acknowledge what I am saying and do the right thing and do not proceed to implement these draconian policies against the youth in our society and the unvaccinated. Enough!

Dear Board of Health Members,

Thank you for your service to the citizens of Washington State. The last two years has been very stressful for all and cannot begin to image what you as the board all have had to endure.

That being said, PLEASE do not implement ANY policies that utilize tyrannical actions (involuntary quarantines, testing, treatment, counseling, and vaccinations) in what will be a failed attempt to "contain" Covid19. This virus will never be contained, it is a part of our ecosystem now. The only real defenses against it are REDUCING CO-MORBIDITIES and allowing ROBUST THERAPEUTIC TREATMENT DEVELOPMENT. Have you as a board, recommended spending any public service resources on telling people to live a healthy lifestyle as the best defense??? If people are healthy, IT IS CLEAR THEY ARE AT A MASSIVELY REDUCED RISK OF LONG TERM EFFECTS FROM THIS DISEASE.

My wife and our entire family are vaccine and boosted. We do understand the legitimacy of vaccines and have no problem with them. We also

know that the vaccines are ONLY GOOD FOR SHORT TERM PERSONAL PROTECTION from significant symptoms, but do not stop transmission or infection. Our taking a vaccine DOES NOT save anybody else from Covid19, so forcing vaccines on people becomes nothing more than a form of medical authoritarianism, not health care. If WA's health care systems are stressed due to COVID patients, it is ONLY because hundreds of qualified health care professionals were unnecessarily terminated from their jobs (many with natural immunity), adding to that the confusing information from the CDC on quarantining and mildly sick people all rushing our hospitals. It ALL has effected the ability to properly staff enough people to provide care.

I implore you before you go down that long road of imprisoning the good citizens, (because that is what it will look like). Please educate the citizens of Washington state truthfully how they can mitigate this disease. I believe if people understood the truth of how the vaccines were created (mRNA), and the understanding of how in it newness of this disease and it morphs so quickly. While health care pivots to combat it with every changing and increasing knowledge of how this strain of covid acts, and why we need to alter the course of treatments. Most citizens do not comprehend this.

Please DO NOT implement any actions that will only hurt/divide/anger your fellow citizens and DO NOTHING to reduce the spread of this disease. HAVE COURAGE AND PLEASE TAKE A STAND AGAINST TYRANNY.

Jack Berry

Dear Washington State Board of Health,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit

analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>
)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you for reading.

Subject: Possible mandate for children

attachments\C9426DA50F4A4E20_Vaccine mandate for children.pdf

External Email

Attached please find a letter opposing the possible mandate for children and the Covid 19 vaccine. Thank you for your time!

Kara Evanger

To Whom It May Concern:

This letter is in regards to the possible mandate for children to be vaccinated for Covid 19. In all ways this should be considered child abuse. Although children are definitely known to contract Covid 19, it is extremely rare for this illness to be anything other than a common flu. Children are resilient and recover very quickly. The possible side effects of the vaccine are far too risky for us to administer this to any child, much less require it for school attendance.

In the past month, 3 children have died from the vaccine, not just in the world, not just in the state of Washington, but in one local fire district on the east side of Seattle. These numbers make the possibility of this mandate extremely scary and absolutely horrific for the lives of our children. The children whose lives were unnecessarily taken way too young were 12, 13, and 14 years old. Are you willing to risk the life of your child? Are you willing to risk the life of your niece or nephew, granddaughter or grandson? Are you willing to carry the weight of these deaths on your shoulders should you vote to mandate this vaccine for our children to attend school?

Children are not at risk with Covid, any more than they are at risk with the common flu. Although this letter focuses on the possibility of death, there are very common side effects that are also affecting the children in our community. At one point in the past few months, a friend of mine who is a nurse at a local children's hospital said that they were treating 17 minors with myocarditis. 16 of those being treated were male. This side effect will impact the health of these children for the rest of their lives. Is your son worth that risk? Are you willing to shoulder the damaged health of a multitude of children in our community?

Please consider very carefully the miniscule risk of children contracting Covid vs the unethical risk of mandating a vaccine that has not been proven to be effective. Please allow parents to decide for themselves if the risk is greater for their own children and if they are willing to risk the lives of those that they love.

Sincerely,

Kara L Evanger

Subject: Please do your duty

External Email

To the WA State Board of Health Advisory Committee:

My name is Kayleen, and I am writing to you as a fellow citizen, pleading along with thousands of fellow Washingtonians that you please do your duty:

1. Hear the people's voices and our cry for freedom.
2. Consider the evidence from all around us, world wide, that supports the Covid-19 injection should not be made mandatory for children to attend school in WA state.
3. Uphold our nation's and state's Constitution, as well as the Nuremberg Code, that protect our freedom from this medical tyranny that forces parents to get the injection for their children.

Out of all the evidence that supports that this requirement would be unlawful, tyrannical, government overreach, it is the fact that children have a more than 99.995 recovery rate from this virus. Please let us, the people, know why, therefore, children are being subjected to this experiment that is not approved for mandatory use in anyone by the FDA. The Covid injection is only authorized for Emergency Use. How are these facts making a difference in the way you vote for this requirement?

This evidence of why the Covid injection should not be made mandatory for children to attend school leads to the question of transparency in how does the BOH Advisory Committee have the authority to make this a requirement for children to receive a public education? The fact that this requirement is on the table brings into question the agenda and qualifications of the BOH Advisory Committee. Have you considered natural immunity? Have you considered what leading scientists like Dr. Malone has been warning about? Did you know he is the inventor of the mRNA vaccine? Even if that can be argued, can you ignore what dangers Dr. Malone warns about in these injections?

Lastly, I wanted to ask, why are these pharmaceutical companies immune to liability? Are you to be liable for the injuries that occur because of these injections? WHY ARE PEOPLE'S INJURIES TO THE INJECTIONS BEING IGNORED BY OUR GOVERNMENT? From even one child's death or adverse effects from the injection, why are you voting on making it mandatory to go to school? Have you considered the harm already done to people, including children, from these Covid-19 injections? The evidence of the harm, in addition to its ineffectiveness makes the passing of a mandatory Covid-19 injection an absolute crime to humanity.

Have you seen the cry of the people, worldwide, in response to this medical tyranny? Why then and for the above reasoning, would you mandate it? As God as our witness, please do your duty.

In the name of freedom,
Kayleen Westford

Please do not require vaccination of children for admission to school and day care! Please do not take authority away from parents, especially since this vaccine is still only approved as Emergency Use and no one really knows the long term side effects. All one need do is look at the government's own website (VAERS) for vaccine related adverse effects to know that these vaccines are not without risks. Thousands have been injured and many have died, having taken the shot under duress.

This latest variant is proving to be mild in its symptoms and the "vaccine" is not proving to be effective or efficient in eradicating Covid so why should anyone take the risk of injecting themselves or least of all their children with an unproven solution.

Please listen to Dr. Robert Malone who is one of the founding scientists for the mRNA "vaccine!"

JRE #1757 - Dr. Robert Malone, MD (rumble.com)

We are writing to you ashamedly that the state we live in is really considering imposing such policies regarding COVID-19 vaccination, using law enforcement to enforcing this on every Washington state citizen and also wanting to force our children on this untested vaccine.

I am adamantly against every one of these polices that are on the docket for discussion. It is against our liberties and our beautiful foundation of freedoms that our veterans and ancestors have fought for.

I ask that you reconsider all of this. It is against the very nature of the fabric of our nation. To even consider making this mandatory for children and not knowing long term affects and knowing the short term affects (myocarditis being just one of many) is astonishingly foolish.

But then to take it a step further, and want to discuss mandating this for every citizen of Washington state...you WILL loose tax payer money as millions will exit.

Again, we are adamantly against anything that would propose a mandated/required jab for citizens and/or for our children. Period.

This should all be off the table and not even a thought for existence...

Washington State Board of Health Members,

I, Kristine L Harris, residing in the city of Wenatchee, Chelan County WA, wish to STRONGLY OPPOSE allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100 and including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

The government has no right to force anyone to take anything into their bodies they do not choose to take. This idea is equal to the taking of God-given freedoms in Nazi Germany. It also is criminal to punish or detain anyone for their choice of medical freedom. Reference the NUREMBERG Code! A Quarantine facility where people are forced to stay is absolutely wrong, especially in the face of the Covid disease and it's variants which only have a tiny fraction of risk of death to the average person. Even those with comorbidities have a very high chance of surviving this virus. Allowing people's natural immunities to fight this virus is the ONLY way to reduce its strength. The mRNA vaccines are EXPERIMENTAL and should not be forced on anyone, period! These vaccines have been proven to carry more of a health risk than getting Covid! Look at the VAERS reports!

Also, we have the same opinion about not mandating children to be vaccinated against Covid. Almost ALL children survive the virus as easily as the common cold or flu virus. Again, these vaccines are EXPERIMENTAL and have not yet proven to be safe! Heart, nervous system, and other systems in the bodies of young people receiving these vaccines are being affected in atrocious ways! The risk FAR OUTWEIGHS any benefit! It is truly WRONG to mandate these vaccines when natural immunity is very effective against this virus!

Please accept my sincere concerns and recommend AGAINST these proposals being presented.

Respectfully,

Kristine L Harris

Subject: POTENTIAL VACCINE MANDATE FOR CHILDREN

External Email

To whom it may concern,

We are writing as concerned parents about the possibility of COVID-19 vaccine mandates for school attendance.

Data has consistently shown children to be at low risk for severe disease from COVID-19 and the extent of the risk from the vaccine is yet to be understood. With the lack of long-term data regarding side effects or efficacy of the currently available vaccines, most specifically in children, parents have the right to weigh the risks and benefits and decide what is right for their own children. This is not "just another vaccine". Using the comparison of currently required vaccines is not appropriate with this EUA vaccine. Again, there is no long term data or listed potential side effects and risks.

We do not feel at all comfortable giving this vaccine to our children and will pull them from public school if this mandate is implemented.

Thank you,

James and Lisa Zimmerman

To whom it may concern,

It came to my attention that the WA State Board of Health will discuss applying current infectious disease WAC codes to include Covid-19 for all WA State residents.

Specifically Codes:

WAC 246-100-070

WAC 246-100-045

WAC 246-100-040

WAC 246-100.

Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

I am adamantly opposed to any further draconian covid rulings - masks, vaccines, quarantine - that they are unlawful, unconstitutional, and against the Nuremberg Code.

I lost a son to suicide as he was deeply concerned about these matters and our basic human rights being taken away.

Please reconsider implementing these codes into policy.

Thank you,
Kathy

Subject: Fwd: Please do NOT require COVID vaccination for school children

External Email

To the Washington State Board of Health,

I'm writing to implore you to NOT include the covid-19 shot on the list of required vaccinations for schools.

As the mother of 2 school-age children in Bellingham, I can say with certainty that a decision to mandate kids to have this shot would wreak havoc on many families and within our schools.

I'm sure we can all agree that vaccines are an important and effective tool for preventing many diseases- and I have always been perfectly willing to utilize them to protect my own children, and our community. However, there are many reasons why (most) parents have chosen to wait on having their children receive these particular shots including, but not limited to:

- * In the scheme of things, the covid vaccines are still quite new and most parents, (while willing to receive the jabs themselves) are not at all willing to risk their children's health before knowing much more about the long- and short-term side effects of this new vaccine. These feelings are completely justifiable as the science on these vaccines is still evolving and coming to light.

- * In terms of how the vaccines will effect public health- that science is still evolving as well. Considering that both vaccinated and unvaccinated individuals can contract and pass along the virus, many parents remain skeptical that any perceived or real risk is actually worth any perceived benefit. It serves no one to preemptively force parents into a decision they aren't ready to make when there is still so much confusion circulating.

- * Covid in otherwise healthy children is not a large risk- and the (extremely low) hospitalization rate of healthy children supports this. Therefore, the risk/reward of getting this shot does not balance when you consider the mild nature of the virus and the possible side effects of the vaccine. Parents should be given the freedom to choose their own level of risk for their family.

- * There are MANY medical, religious, and other deeply personal reasons why

parents are hesitant to give this shot to their children. Sadly, most of these reasons will not be covered by "exemptions"- forcing parents to choose between their children's health or their schooling. Please DO NOT force parents to make this choice.

For whatever reason, the covid vaccines- effective or not- have been profoundly politicized (on both sides), with most parents falling on one side or the other. Because of this, it is reasonable to assume that a decision to require this particular vaccine at this time would directly cause a mass exodus from our schools, shattering our communities and negatively impacting public health across the state.

At this stage of the pandemic, we find ourselves at a pivotal moment when every protection we can possibly hope for from this virus is in place. We have the tools to protect ourselves and our families- and everyone should have the right to choose which protections are best for them. You, as the health board, are in a unique position to renew public trust in our state government by demonstrating trust in the people of Washington.

Please consider that no one cares more about a child's health than their parents. No one knows their medical history or the ins-and-outs of each individual child better than their parents. PLEASE allow parents- the ones who care the most- to make the determination for their own children. It is what is best for the health of every family, every school, and every community.

I sincerely appreciate your time and consideration.

Dear WSBOH,

Please do not move to make Covid 19 vaccines mandatory for all Children to attend school or daycare in Washington State. Children still have the lowest death rate for Covid-19 and these vaccines are still only approved under emergency authorization. This would be a mistake and potentially be more dangerous to children who have little risk of hospitalization and death from the Covid-19 virus.

Dear Health Officials,

We absolutely do NOT believe that the Covid 19 vaccine should be required for children to gain entry to child care or school! PLEASE vote 'NO' on the states effort to mandate the vaccine for children! It is currently only an EUO {Emergency Use Only}, and quite clearly not efficient or effective for stopping Covid; the possible dangerous side effects resulting in permanent disability & even death, {Listen to the people who have experienced deep loss after loved ones have taken the vaccine in good faith!!}, create the need for people to make their own medical decisions in regards to any medicine put into their bodies & the bodies of the children they are charged to protect! We urge you to make the moral & humane decision with the power that has been entrusted to you.
Thank you!!

Most sincerely.

Good day,

As a mother who experienced the Delta variant of Covid-19 first hand in September 2021, as did my 12 year old daughter, the experience reinforced our belief that vaccines are unnecessary to mandate for everyone. While vaccines may have a place for those with comorbidities, immunocompromised, and by choice, there is no need to mandate vaccines for anyone, especially children.

An effective and science-driven list of 8 reasons why children should not be mandated to receive the vaccine is here

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Femail.chriskresser.com%2F8-reasons-vaccine-mandates-for-5-to-11-year-olds-are-unscientific-and-immoral%3Futm_campaign%3DChris%2520Kresser%2520General%2520News%26utm_medium%3Demail%26utm_source%3Dhs_email&data=04%7C01%7Cwsboh%40sboh%2Egov](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Femail.chriskresser.com%2F8-reasons-vaccine-mandates-for-5-to-11-year-olds-are-unscientific-and-immoral%3Futm_campaign%3DChris%2520Kresser%2520General%2520News%26utm_medium%3Demail%26utm_source%3Dhs_email&data=04%7C01%7Cwsboh%40sboh%2Egov%26utm_content%3D199913009%26utm_source%3Dhs_email&data=04%7C01%7Cwsboh%40sboh%2Egov)>
8OgwFVisAlb_L6PLIfJzffYz2AnFARa_KdhwSFjMmKpQ9A_REPn0kpobe2HB8We0c5by3v79tzIpXz4PK0unhy-t6Osw%26utm_content%3D199913009%26utm_source%3Dhs_email&data=04%7C01%7Cwsboh%40sboh%2Egov
. Some of the more provoking thoughts are detailed below.

Protection against extreme events

It has been proven now that vaccines offer varying amounts of protection against extreme disease and death. However, children and healthy adults are not at risk of developing extreme cases nor dying of Covid-19.

Per the CDC's own data

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fcoronavirus%2F2019-ncov%2Fcases-updates%2Fcases-in-us.html%26utm_campaign%3DChris%2520Kresser%2520General%2520News%26utm_source%3Dhs_email&data=04%7C01%7Cwsboh%40sboh%2Egov>
99clReCI22V-DOo8xZLsJglfbQseWZgyn4C9BZh-bNX-P6VvhrWnp8rr771yVMvBWfXQuuWANcm9zJHnV2NCdbD4k1w%23demographics&data=04%7C01%7Cwsboh%40sboh%2Egov
, people up through the age of 17 have almost no risk of death:

Unnecessary chemicals, especially after infection

Low estimates for infection rates among children was ~50% as of November 2021. A study from Yale and the Cleveland Clinic show that vaccinating after infection confers no additional protection

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F99clReCI22V-DOo8xZLsJglfbQseWZgyn4C9BZh-bNX-P6VvhrtWnp8rr771yVMvBWfXQuuWANcm9zJHnV2NCdbD4k1w&data=04%7C01%7Cwsboh%40sboh.wa.gov>, so why inject unnecessary chemicals into our children?

Antiquated vaccines

Especially since the existing vaccines were designed to address the initial spike protein of the Alpha variant, which is no longer the primary variant, why even consider those vaccines? Similar to the flu vaccine, which will never catch up to mutations and other variants, there can never be full protection against this virus to balance out the known and UNKNOWN risks that vaccines bring, such as myocarditis. Just check the VAERS database of over 1M reported vaccine injuries, and those are just the reported ones.

Myocarditis and unknown health risks

And yet the risk of myocarditis and other vaccine injuries has a higher chance of occurring than the child being adversely affected by a Covid-19 infection.

Informed consent around safety & efficacy non-existent

Have you reviewed the vaccine producers safety and efficacy reports from their clinical trials? Neither has anyone else. Go into your local pharmacy and ask to see the documentation included with the vaccine doses supplied to them. All the pages with the heading "Safety and Efficacy" say "Intentionally Left Blank". I am not comfortable putting something in my or my childrens' bodies if I can't be provided safety AND efficacy information. Nor do I feel you have the right to mandate that of me or my family.

Children are not spreaders

As early as July of 2020, researchers knew that children do not spread
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.sciencedaily.com%2Frelease%2F99clReCI22V-DOo8xZLsJglfbQseWZgyn4C9BZh-bNX-P6VvhrtWnp8rr771yVMvBWfXQuuWANcm9zJHnV2NCdbD4k1w&data=04%7C01%7Cwsboh%40sboh.wa.gov> infection as well as adults.

Summary (text below from the "8 reasons" article I reference above):

Please do the right thing and do your own independent research. Do not use Google as a search engine. Instead use DuckDuckGo, where information is not censored and you can find the studies and research from around the world. Other countries like Israel, Denmark, Sweden, Japan and even Germany are proving vaccine efficacy is going negative in many places and all cause mortality for 2021 rose at alarming rates, with the rollout of the vaccines as the main differentiator from previous years. We have no idea what the long term repercussions of vaccines will be, so why even consider mandating it for the least risky demographic?

Please do the right thing and keep schools open, without vaccine mandates. Allow all individuals the freedom of choice where they know they have to bear the consequences, whatever they may be.

Thank you for your consideration.

--

Make it a fabulous day,

External Email

Hello Caitlin,

I am writing as a concerned parent of two boys in the Bellevue School District. Before you vote on whether or not to make this vaccine a requirement for school, I am asking you to listen to this 1- hour compilation of critical questions brought up by the FDA Advisory Board when deciding to approve Pfizer's COVID vaccine for 5-11 year old's. In case you are unable to listen, I have provided key points from the meeting below. Please note myself and thousands of other parents will be unenrolling our children if this is required to attend school. Before you vote - please make sure you are informed on the benefits and risks to our children.

Key Points from the FDA Advisory Board Meeting - Oct 26th:

***Link to 1-hour highlights video here.

Advisors do not recommend healthy children get this vaccine

Advisors do not recommend this vaccine be required to attend school

Doctors do not expect the vaccine to prevent infection

They have no data or expectations it will prevent transmission

Based on current data and modeling, the risks of the vaccine to children outweigh the benefits

Children's vaccine is based on the alpha variant and has little to no protection against

Delta or Omnicron

Children's vaccine includes Tris (hydroxymethyl)aminomethane), a stabilizing agent, however the vaccines given during the clinical trials did not include this new ingredient so no one knows the potential risks to our children.

Advisors very concerned about increase in myocarditis and pericarditis especially in young boys

Approval was given based on the vaccine being available to immune compromised children only.

Thank you for your time,

Kathy Wall

Dear Board Members-

I am writing to ask you to vote no concerning these proposed WAC's : WAC 246-100-070, WAC 246- 100-045, WAC 246-100-040.

The proposed isolation of non-complying individuals and families into State Facilities who refuse to comply with requests for medical examination, testing, treatment, counseling, vaccination, including the Covid-19 injections as part of school immunization requirements, is reprehensible and unconscionable.

It is very evident after a year of Covid-19 vaccinations, that they are having the opposite effect. There are 24 Covid patients at Central Washington Hospital in Wenatchee, WA on January 6th, 2022, (<https://www.confluencehealth.org/patient-information/covid-19-what-you-need-to-know/with> <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.confluencehealth.org%2Fpatient-information%2Fwhat-you-need-to-know%2Fwith&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ce8cd1297ce7d44a793b708d9d2144070%7>) eleven of them are partially vaccinated and 13 fully vaccinated. If the vaccines are more effective than natural immunity then why are the hospitals full of people who've taken the experimental gene therapy? It is clear that God-given natural immunity is superior to the Covid 19 vaccine.

There simply is not enough long term testing to back up the claims that it saves lives. There have been many reports of adverse reactions and sudden death per the VAERS website.

We have been free to make decisions concerning our body and health since the inception of America. Why begin to take away our rights now especially without having proof of long term efficacy for the Covid 19 Vaccine? Where will such an act lead us in 1 -20 years from now? What other rights can easily be taken away from you, me, our children and fellow citizens?

Please vote NO on anything that takes away the liberty our founding fathers fought and died for in the founding of this great country!

Sincerely,

Misty DeFina

Subject: Opposition to WAC proposed changes to WAC 46-100-045/040/070

External Email

I am adamantly opposed to the proposed changes in WAC 246-100-070, WAC 246-100-045, WAC 246-100-040. Washington State is continuing the intrusive government overreach. This MUST stop and turn back to the fact that you are working for the people and are to represent the people. Let the citizens' voices be heard and call a vote on such intrusion to our human rights. Please listen!

We the people are not to be ruled by the government. The government is ruled by the people. None of these proposed items are acceptable to us American citizens. In fact, this furthers the negativity and lack of trust in our government today. There are a multitude of issues that the people would like you to focus on.

Is it true that we have isolation and quarantine "strike teams" and facilities being built in the state of Washington? Are the changes in these laws, so that citizens can involuntarily be detained by these "strike teams" and inside these facilities? What EXACTLY is the purpose if true and how exactly has this been funded? Was it approved by the people? I would sincerely like an answer to these questions.

I never in my lifetime thought I would see the government overreach being accomplished and attempted today.

None of the mandates have worked over these past two years as proven by current case levels of Covid-19 and all the new variants. Some of us have been vaccinated and have continued to be infected more than once. Nothing has stopped the spread. This is a virus, it changes over time, just as the flu. It has to run its course. There are unfortunate deaths and impacts from the flu each year. The flu is a different strain each year. We shouldn't and haven't mandated that all get the flu vaccine. The government should provide options for the vulnerable to be protected and cared for, but only as they choose. This overreach has destroyed people's businesses and way of life and attempted to divide the people. There is no solid science behind this nonsense. All Americans should have the freedom of choice. We are good people who care about our families, communities and neighbors. We have done everything asked and Washington state continues to bear down on us as if we are the children of the state and we are not competent to make our individual informed decisions.

Who is Washington State to set an emergency mandate for such a thing and then get to determine if someone's medical or religious exemption is legitimate? Employers are being required to be the gestapo and dive into employee's personal rights of religion and medical conditions. Employers already have full-time responsibilities and this is a heavy time and money burden in addition. Doctors are being investigated for goodness sake. There is absolutely NO VALUE in this for the good of the people. Our body, our choice!

The State must stand down and end these ineffective emergency mandates and proposed changes to our laws. We are the parents of our children and not the government. We do our research to decide what is in our children's best interest by weighing the pros and cons of such things as vaccines. We love them! It is unfathomable and completely un-

American that law enforcement would be called upon to involuntarily detain citizens that do not voluntarily comply. The United States of America is NOT a communist country nor should we continue leaning that way.

I would appreciate a personalized (not a canned) response to the questions noted above regarding isolation and quarantine "strike teams" and facilities being built in the state of Washington.

Please stop this insanity!

Sincerely,
Lana Redman

Subject: Please oppose vaccine mandate for kids

External Email

Dear Board of Health,

Please oppose the vaccine mandate for kids.

Many children have already had Covid.
I have four children ages 13, 15, 17 & 19.
They all had Covid in August and do not need a vaccine. They have natural antibodies from recovering from the virus.

The vaccines are not preventing people from getting the virus. They do seem to help the elderly have less severe side effects.

There are risks for children who get the vaccine, however slight, and where there is risk there should be a choice.

We are a free people. We should not be coerced or forced to do something to our body that we feel has potential danger.

Please remember your oath to do no harm.

Please uphold personal freedom, bodily autonomy & parental rights.

Please oppose a mandate for children to get the vaccine.

Sincerely,
Nancy Hansen

Subject: Please do NOT require COVID vax for kids!

External Email

Hello,

I am writing to share my opinion that COVID vaccines should NOT be required for kids to be in school. There are no long term studies available to make an informed decision. I am vaccinated myself and not anti-vax but kids are so young. Their bodies are different and they have a lot of life ahead of them. I was willing to take a chance on myself to help the greater community but I am not willing to take a chance on my kids at this time. I'm glad that it is available for those that want it. My godson has some health conditions that make the thought of covid very scary and I'm thankful that it is available for him. I have another friend with a medically fragile daughter and her older siblings are vaccinated to help protect her. Again, I'm glad that is an option for their family because the benefits outweigh the risks. But my kids are not high risk for covid complications. Therefore I am not going to take on a risk on their behalf that could affect the rest of their lives.

Thank you,
Michelle Zuspan

Families are all talking and are all completely against any of the proposed Covid policies that are overreaching and immoral. We stand against these proposed WAC's:

WAC 246-100-070

WAC 246-100-045

WAC 246-100-040

WAC 246-100

WAC 246-105

Why are we forcing something that under the age of 18 isn't a threat. From social media and my social circle more people that get this vac, get cv-19 and or other side affects. The risk don't out weigh the benefits esp in youth! Families are pro informed consent. No one wants to lose their freedom to choose. Everyone I know that is vac is not for this!!!! For up to two months of protection before requiring a booster..People know their immune systems and their kids. No one should be forced! We live in America and this is not American. I could go on, people won't comply if this passes. Law enforcement does not want this burden either. There will always be a virus. We can't create a vac for every virus. Ex the flu shot has proven that.

☐

Hello,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in

Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Lindsey Booren

Hello,

As a parent of three young children, 1 school aged, I am strongly opposed to adding the COVID-19 vaccine to the list of vaccines required for children to join a public school.

Data shows that the vaccine does not prevent transmissible infection at an efficacy adequate to justify a mandate.

Children are at incredibly low risk of serious illness without having received the vaccine, and getting the vaccine does not prevent community transmission of the virus. There is little to be gained from adding this vaccine to the required list other than false peace of mind, which comes at the expense of:

1. Stripping families of their right to choose what is best for their individual health circumstances, and
2. Introduced potential for unintended side effects on young, developing bodies. There is no real long term data on the effects of this vaccine. While the likelihood may be low, the risk exists and should not be weighted any less than the risks should children remain unvaccinated against COVID-19, considering the incredibly low risk of severe illness in children (not saving child's life) and vaccination not preventing transmissible infection (not saving lives in the community).

Respectfully,
Josiah Sebens

I am writing to express my extreme dissatisfaction in the required and mandated vaccinations that you are imposing on not only our children, but on the people in Washington State. Vaccinations should be tested and proved as safe; these are not. The long-term results and implications are still yet inconclusive. There is no documentation that having a covid vaccination prevents you from getting covid - in fact it is the opposite. Many, many, MANY people who are vaccinated continue to get covid, so clearly the vaccination is not doing it's job. A vaccination is supposed to PREVENT you from contracting a disease - this covid vaccination does not do that! This vaccination is weakening peoples' immune system and should not be required at a government level. This is a personal choice issue and governmental agencies have NO BUSINESS being involved with the (our, as parents) decision. Childrens' immune systems are strong. Their rate of infection with Covid is low and their hospitalization is lower. As this vaccination is still in its trial stages, please do not inject, or force our children to be injected, with an unknown long-term substance that we do not know, nor will we know the effects of the vaccination, for years to come. Stay out of our homes and the governing our children. It

is our jobs to monitor our children, what they inject or ingest into their systems, and their beliefs. Please, do your jobs and not ours.

To Board of Health Forum:

Thank you for having this forum. I am writing in support of Petition #11 which requests that BOH establish a new rule that prohibits requiring anyone to take a EUA product or licensed product that has not yet completed Phase 3 clinical trials. I oppose BOH formation of a Technical Advisory Group to review information about Covid-19 shots for consideration of mandating the shots for schools. I oppose any Covid-19 shot mandates because each person needs to weigh their medical condition with their medical provider and make an informed, personal decision. This is especially true since the infection fatality rate for Covid-19 is low. For ages 0-17 it is at 0.00002 which is statistically a zero percent death rate. Beyond that, when you consider that most hospitalizations for the young are with Covid-19 and not for Covid 19. They are not in mortal danger from Covid-19 nor is there a great risk of it spreading Covid-19 to staff and teachers. The young have a greater risk of Covid-19 vaccine adverse reactions. We must protect our young before we consider self-protection.

Sincerely,

Margi Brown

Subject: Opposition to Vaccine Requirements for Students

External Email

January 7th, 2022

Dear WA BOH Members,

I would like to express my opposition to any requirements for COVID vaccines for students under age 18. I am a mother of a second grade student who has natural immunity to COVID 19 already. My son had very mild symptoms and historically 99% of those under 18 have recovered from COVID 19 without complications. Additionally, natural immunity is considered to be stronger than vaccine immunity.

Please do NOT require that a new vaccine where long-term effects are not known be given to our children. The risks do not weigh the potential benefits. Healthy kids should not be given emergency use vaccines and subsequent boosters.

Also if there is any consideration from this board about compulsory quarantines for any reason, please consider the negative reaction of the public and the rashness of such a measure. I have lived in WA all my life and worry that taking away personal freedoms of WA state residents will have a long term detrimental effect on the state and its citizens.

Thank you for your consideration.

Sincerely,
A concerned mom and WA state citizen,
Julie Newfield

Dear Caitlin,

Our children are our future. Please do NOT require Covid vaccines for children to attend school. They already have to have so many shots, and covid is not even a danger to nearly all children. Children are at extremely low risk for Covid. The risks definitely outweigh the benefits. Vaccines are STILL only EUA. We have absolutely NO long-term studies to demonstrate safety. Studies DO show that both vaccinated and unvaccinated can both transmit Covid. Therefore, the vaccine apparently does NOT stop the spread of the virus. Please, consider the preciousness of these children. They will be just fine... better than fine, actually, without the vaccine. Please vote NO! No Covid shots for children!!!

Thank you for listening.

To whom it may concern,
This has to stop. No mandates for vaccination with a vaccine that has a constantly weaning effectiveness, does not prevent transmission, and comes with many risks of effects. My father suffered a severe stroke after his vaccination. Many others in my circle have had life threatening adverse reactions to their vaccine. These are not rare occurrences, they are just dismissed. This has to stop.
My children will not be in any form of public school until these ineffective mandates are stopped.
Please look to other countries and states and see that this is the definition of insanity. We should be allowed to determine our risk/reward when it comes to our own health. I have also personally known many people to die from current hospital protocol in our state. Life saving early treatment has been denied and voices have been silenced. This is criminal.
I'm severely disappointed in our state and the way this entire pandemic has been handled. It is now time to turn this around.

Sincerely,
Micaela Batterberry

I, Jennifer Aisenberg Plute, oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaxx to the WAC 246-105 schedule of required vaccines for children to attend schools.

I may agree in five years when there are some longer study times of the effects of the shot on people, but at this time, we know very little about the shot. No other vaccine that has eliminated disease requires boosters six months after receiving the complete regiment of shots. Malaria is the only preventative medication that requires follow up two months after the first dosage.

Please, think about what this Nation is and has represented and continue to allow freedom of choice regarding this.

Respectfully submitted,

Jennifer Aisenberg Plute

Hello,

I am a Pierce county resident writing to voice my opposition to upcoming policies regarding using WAC codes for Covid-19. I don't believe it's in the best interest of the people of Washington To pursue these policies. I think it will do more harm than good. The lies this "pandemic" is based on will only be compounded with further policy. I also don't believe this is about health. There are many more things that could be done regarding bff health. It is also a horrible idea to require children to take an experimental injection when they are not affected by the sickness. Please do not enact these dangerous policies.

Dear WSBOH,

Please do not move to make Covid 19 vaccines mandatory for all Children to attend school or daycare in Washington State. Children still have the lowest death rate for Covid-19 and these vaccines are still only approved under emergency authorization. This would be a mistake and potentially be more dangerous to children who have little risk of hospitalization and death from the Covid-19 virus.

Best Wishes,
Lory Capusan

Dear Washington State Board of Health,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee famously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you for reading.

Subject: Opposed to the Covid 19 Vaccine Mandate for School Aged Children

External Email

Washington State Board of Health,

I am writing to the Washington State Board of Health regarding the Covid19 Vaccine for k-12 grade students. I will address my concerns over a possible mandatory vaccine requirement as well as current covid protocol and mask mandates.

I am a stay at home mom with two young children aged 4 and 2. My husband owns his own electrical contracting company. The mandates that have been forced upon employers and employees for many in the state have not affected us, yet. Hearing the possibility of a covid vaccine mandate for school aged children that is under emergency authorization at this time is irresponsible and a huge overreach of power. In the event that it gets FDA approved, I have a hard time making my healthy child take a vaccine that has only been tested on children her age for less than one year. Both my children are up to date on their current vaccines. I am not opposed to vaccines, quite the opposite in fact. I strongly support vaccines that have been not only tested, but proven to stop infection and transmission for decades. I'm very fortunate that these exist in fact. However, the covid vaccine is not one of them. The fact that there are not long term studies done on the effects of the vaccine, gives me pause. This is not comparable to the Polio or measles vaccine, for example. This is putting many parents and guardians in a tough spot for the upcoming school year. Public school is a government program afforded to all children... so long as you comply with exactly what we say.

As we are all well aware and have been since the beginning of the pandemic in 2020, covid is not affecting school children. Oddly enough, most only get a runny nose if they have any symptoms at all. So the idea of making a vaccine mandatory for every student doesn't make sense. Is it to protect the teachers?? Well, the teachers can choose to be vaccinated, oh wait, it wasn't a choice for them either, they either got the vaccine or lost their job. So we know that teachers and staff are vaccinated, so "protecting" them shouldn't be an excuse. If the vaccine worked as it should, then by simply having the vaccine, or two or three... probably four boosters by the time next school year starts, they should be protected. If other parents want to do what they think is necessary and vaccinate their children, that should be their choice as well. They can vaccinate their children if they choose. If the vaccine doesn't stop infection or spread, then why does my child need one? The flu for decades has been proven to be deadly and detrimental to children of all ages. Why not require the flu vaccine every year for public schools? Is it because they don't prevent or stop transmission? Something both the flu shot and the covid vaccine have in common.

The possibility of making the covid 19 vaccine mandatory puts many families in an uncomfortable position. My husband and I are lucky enough to be able to search for out of state options, I know not all families are able to do so. We are actively looking into other states where these mandates do not exist. Which makes me extremely angry to feel like I have to leave a state where I grew up, attended university, and started a family just so I can have the CHOICE to do what is right for my children at this time. Trying to prevent the spread of a disease that has proven to infect even the boosted is taking a toll on all those involved in the educational setting. My daughter, who is learning the sounds of letters and how to read, has had to learn through a masked teacher for almost two years now. She isn't able to read facial expressions or take social cues from

teachers and peers in her class. On the flip side, we know the impacts of distance learning is not effective, and in most cases detrimental to the mental, and sometimes physical health of some students. Drug abuse, depression, prescription antidepressants and teen suicide have been on the rise since 2020. Why are these overlooked? The board of health should keep this in mind as well as it too is affecting the health of many Washingtonians.

We are reminded DAILY of the struggles and the fact that we are still in a pandemic with the masks that we are forced to wear. I'm curious, have we successfully stopped transmission with masks? The clear answer is no. With masks or without as you can see from states who haven't been masked all along, there are trends with covid, it surges and evens out, surges and evens out. We knew this surge was going to occur, just as we can probably predict the next surge as well. So what is the purpose of masks? My preschooler wears hers and it's wet when she comes home from her 2.5 hour school day. It's licked, dropped on the playground and put back on her face. How is this helpful? There are still breakouts in classrooms and schools where very strict protocols are enforced. How can that be if masks worked? Again, if a parent or child feels so inclined, let them choose to wear a k-95 mask. But it should be just that, a choice. My daughter doesn't get a snack at school, pre-covid they got a snack, all in the sake of transmission. Children in our district have to eat on the floor in a line for lunch. This is unacceptable. What are we doing??

To say I have been disappointed in how covid has been handled is an understatement. I'm so fortunate that my daughter was able to attend private preschool when k-12 was closed for in person learning. She will be in kindergarten next year and she will not be getting the vaccine if it is required for school. Which is unfortunate that I will have to choose to homeschool, or move out of state for my voice to be heard and for my rights as a parent to be upheld. Choose wisely as to what is actually important for the safety of the child, and not the uproar from the mob if you decide to let parents have a choice. That's all myself and many like me are asking for, a choice in our health and the health of OUR children.

Thank you,

Kari Roddan

Subject: Please DO NOT mandate vaccines for our kids

attachments\B5628E0B9153461A_SmartSelect_20220107-123743_Message+.jpg

External Email

Dear WA State Board of Health member,

I appreciate your time in reading this note. I am writing you regarding the decision you are considering to mandate our children to receive COVID injections as a requirement for school entrance.

I am a registered nurse with expertise in nutrition, natural health, and healing autoimmunity. I am also a concerned parent of five children, four of whom attend public school and one who will in a few years.

For many years I believed fully in the vaccine model and was reared in the western medicine framework that we should never question vaccine safety or efficacy. That all changed when I nearly lost my daughter to vaccine injury as a toddler. She developed a severe petechial rash all over her body, which means she was hemorrhaging all over. I knew exactly what it was and we rushed her to the ER. Her platelets were so low that she was borderline brain hemorrhage and we nearly lost her. Her life was miraculously spared but she went on to experience a vast spectrum of symptoms in every body system and developed autoimmune celiac and other allergies that have absolutely changed the course of our entire lives.

I have spent the past 12 years studying vaccines and learning how to heal from vaccine injury. I have researched in depth their safety profiles and the truth about vaccines is that they are unavoidably unsafe. Vaccines are full of harmful adjuvants that expose our children to the most dangerous, carcinogenic, toxic substances known to man such as mercury, aluminum, polysorbate 80, and many other poisons, leading to toxic heavy metal buildup in our children's brains and other organs that FAR exceeds any safety threshold. Vaccines are known to open the gut barrier and brain barrier causing immune system reactions and alterations leading to asthma, allergies, autoimmune diseases of all kinds, cancers, and neurological disorders of all kinds such as ADHD, epilepsy, anxiety, autism, developmental delay and many others. We currently have the worst health report card for our pediatric population that has ever been known and it only gets worse as the vaccination schedule continues to ramp up. It is absolutely absurd that we now have 72 + vaccines currently on schedule.

Vaccines are unavoidably unsafe for every child. This is especially true for the current COVID mRNA and viral vector "vaccines." These are not traditional vaccines. These new therapies are being rushed to market. No vaccine was EVER brought to market this quickly. These vaccines are still experimental and CANNOT, therefore, be mandated to children. You cannot approve and continue to tote the line that something is "safe and effective" when it is experimental. By mandating this therapy for children, you will be imposing the greatest human experiment the world has ever seen, and you will have on your hands the blood of the innocent, as deaths and injuries soar, and as you cannot assure ANYONE that things won't go wrong.

U.S. VAERS data from Dec. 14, 2020, to Dec. 31, 2021, for 5- to 11-year-olds show:

of blood clotting disorders, with all cases attributed to Pfizer.

It is unlawful for you to mandate or force anyone to get a vaccine, especially a child. Children have next to zero risk from Covid. Who are we trying to protect by vaccinating them? It's certainly not them. Why is there only one solution for this pandemic? What about the amazing success of early treatment? What about natural immunity? Why are we not educating people about how to strengthen their immune systems instead? I have not seen your board say anything regarding boosting natural immunity with Vit D, Vit C, or scientifically proven herbs or natural remedies. Why??

PLEASE educate yourself regarding these vaccines. If you are not informed on VAERS you owe it to every citizen in this state to get informed. These "vaccines" have been by far more injurious than ALL OTHER vaccines COMBINED. VAERS data released Friday by the Centers for Disease Control and Prevention included a total of 1,017,001 reports of adverse events from all age groups following COVID vaccines, including 21,382 deaths and 166,606 serious injuries between Dec. 14, 2020, and Dec. 31, 2021.

This is absolutely absurd that we are still recommending these vaccines. Any other pharmaceutical, at just a handful of reported deaths, would be blacklisted and pulled from market immediately. Mandating these vaccines for children is dangerous, irresponsible, and wrong.

As a parent of a vaccine injured child, I know firsthand the devastation and unnecessary heartache an injury can bring. My child can NEVER get this vaccine, as it would likely take her life. If you mandate it, she, and countless others like her, would be prevented from going to school and that is completely outrageous and unlawful.

Please do the right thing and do not impose vaccine mandates on our school children.

Thank you,
Lindsay Clark, RN

Dear Washington State Board of Health,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit

analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>
)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you for reading.

Subject: Please do not pursue new proposed Covid policies, including state-mandated Covid shots for school and daycare children!

External Email

Hello Washington State Board of Health,

As a Washington State resident and mother, I plead with you to please follow the true science that shows us that children are at a very low risk for severe illness from Covid and that taking the vaccine causes greater and yet fully unknown risks to children, as even an FDA panel member conceded. Dr. Eric Rubin stated in October 2021, "We're never going to learn how safe the vaccine is until we start giving it." In addition, the FDA admitted that they don't know the longterm risks of the Covid vaccines to children, nor adults.

Please also do not enact your proposed policies for requiring law enforcement to involuntarily quarantine people or charge them with a misdemeanor. This is America, not Australia AND these rules are for a weakening Covid virus, not the Black Plague.

If you pass any of these proposed policies (summarized here below) you are trampling on Washingtonian Americans' freedoms to a level never reached before.

(Those related to allowing local health officers to use law enforcement (WAC 246-100-070 <tel:246-100-070>) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045 <tel:246-100-045>) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040 <tel:246-100-040>). These specifics come from WAC 246-100. Also, including the Covid-19 injections as part of school immunization requirements using WAC 246-105.).

These policies do not benefit public health, but rather do terrible damage to our American way of life.

These policies are tyrannical. It is shameful that these rules have even been proposed by Americans!

Subject: Please say NO to vaccines for school children

External Email

Dear Christy:

Our children are our future. Please do NOT require Covid vaccines for children to attend school. They already have to have so many shots, and covid is not even a danger to nearly all children. Children are at extremely low risk for Covid. The risks definitely outweigh the benefits. Vaccines are STILL only EUA. We have absolutely NO long-term studies to demonstrate safety. Studies DO show that both vaccinated and unvaccinated can both transmit Covid. Therefore, the vaccine apparently does NOT stop the spread of the virus. Please, consider the preciousness of these children. They will be just fine... better than fine, actually, without the vaccine. Please vote NO! No Covid shots for children!!!

Thank you for listening.

Subject: Opposition to WAC 246-100-070

External Email

Washington State Board of Health,

I, Jacqueline Corulli a Washington? King County resident STRONGLY OPPOSE allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100 and including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

>>

>> The government has no right to force anyone to take anything into their bodies they do not choose to take. It also is criminal to punish or detain anyone for their choice of medical freedom. A Quarantine facility where people are forced to stay is absolutely wrong, especially in the face of the Covid disease and it's variants which only have a tiny fraction of risk of death to the average person. Even those with comorbidities have a very high chance of surviving this virus. Allowing people's natural immunities to fight this virus is one way to reduce its strength and should be a individuals choice. The mRNA vaccines are experimental and should not be forced on anyone.

>> As far as mandating children to be vaccinated against Covid. Most healthy children, at least a very high percent, survive the virus as easily as the common cold or flu virus. Along with that, there are some very serious possible side affects. Heart, nervous system, and other systems in the bodies of young people receiving these vaccines are definitely being reported. These risk need to be reported and consider so that people can make an informed decision on this vaccine if THEY decide to take the vaccine. It is morally and ethically wrong to mandate these vaccines on any individual.

>>

>> Please accept my sincere concerns and recommend AGAINST these proposals being presented.

>>

>> Respectfully,

>>

Please do not require vaccination of children for admission to school and day care! Please do not take authority away from parents, especially since this vaccine is still only approved as Emergency Use and no one really knows the long term side effects. All one need do is look at the government's own website (VAERS) for vaccine related adverse effects to know that these vaccines are not without risks. Thousands have been injured and many have died, having taken the shot under duress.

This latest variant is proving to be mild in its symptoms and the "vaccine" is not proving to be effective or efficient in eradicating Covid so why should anyone take the risk of injecting themselves or least of all their children with an unproven solution.

Please listen to Dr. Robert Malone who is one of the founding scientists for the mRNA "vaccine!"

JRE #1757 - Dr. Robert Malone, MD (rumble.com)

Subject: Policies

External Email

Dear Board of Health Members,

Thank you for your service to the citizens of WA.

I am writing to ask you to NOT implement ANY policies that utilize tyrannical actions (involuntary quarantines, testing, treatment, counseling, and vaccinations) in what will be a failed attempt to "contain" Covid19. This virus will never be contained, it is a part of our ecosystem now. The only real defenses against it are REDUCING CO-MORBIDITIES and allowing ROBUST THERAPEUTIC TREATMENT DEVELOPMENT. Have you as a board, recommended spending any public service resources on telling people to live a healthy lifestyle as the best defense??? If people are healthy, IT IS CLEAR THEY ARE AT A MASSIVELY REDUCED RISK OF LONG TERM EFFECTS FROM THIS DISEASE.

We also know that the vaccines are ONLY GOOD FOR SHORT TERM PERSONAL PROTECTION from significant symptoms, but do not stop transmission or infection. My taking a vaccine DOES NOT save anybody else from Covid19, so forcing vaccines on people becomes nothing more than a form of medical authoritarianism, not health care. If WA's health care systems are stressed due to COVID patients, it is ONLY because hundreds of qualified health care professionals were unnecessarily terminated from their jobs (many with natural immunity), and due to that there are not enough people to provide care.

Please DO NOT implement any actions that will only hurt/divide/anger your fellow citizens and DO NOTHING to reduce the spread of this disease. HAVE COURAGE AND PLEASE TAKE A STAND AGAINST TYRANNY.

Subject: Please do not enact law based on health

External Email

Hello,

I am writing to ask you to allow the citizens of Washington to be responsible for their own health. It is not the government's job to keep people healthy. That is the individual's right and responsibility. Taking control over what people do with their body is beyond the scope of a free society.

In addition, the current vaccine for Covid is still under Emergency Use Authorization. There is no testing that has confirmed that this vaccine is safe and quite contrary. The VAERs report shows thousands of deaths in connection with the vaccine. Please do not mandate this for children in school or enact any law stating that individuals must take this. It is the individual's right to make that decision for themselves. I personally know at least 5 people who have died of massive strokes and/or heart attacks within 3 days of taking the vaccine. Please allow people to make the decision themselves about whether they are willing to take that risk.

Thank you much!!

Subject: PLEASE NO Covid 19 Vaccination Mandates for WA Public Schools

External Email

I, Lb Rust am compelled to support the following:

THAT CHILDREN SHALL NOT BE SUBJECT TO FORCED VACCINATION

Negligible clinical risks from SARS-CoV-2 infection exist for healthy children under eighteen.

Long term safety of the current COVID vaccines in children cannot be determined prior to instituting such policies. Without high-powered, reproducible, long term safety data, risks to the long-term health status of children remain too high to support use in healthy children.

Children risk severe, adverse events from receiving the vaccine. Permanent physical damage to the brain, heart, immune and reproductive system associated with SARS-CoV-2 spike protein-based genetic vaccines has been demonstrated in children.

Healthy, unvaccinated children are critical to achieving herd immunity. Natural immunity is proven to tolerate infection, benefiting community protection while there is insufficient data to assess whether Covid vaccines assist herd immunity.

NATURALLY IMMUNE PERSONS RECOVERED FROM SARS-CoV-2 SHALL NOT BE SUBJECT TO ANY RESTRICTIONS OR VACCINE MANDATES

Natural immunity is the most protective, and longest-lasting solution against the development of COVID-19 disease and its more serious outcomes.

Naturally immune persons are at the lowest risk of transmission, thus should not be subject to travel, professional, medical or social restrictions.

Natural immunity provides the best source of herd immunity, a condition necessary for eradicating the Covid virus.

HEALTH AGENCIES AND INSTITUTIONS SHALL CEASE INTERFERING WITH PHYSICIANS
TREATING INDIVIDUAL PATIENTS

Violating any of these three principles unnecessarily and directly risks death to our citizens. I hereby recommend the leaders of states, provinces and nations legislate or take executive action to prohibit the three practices described above.

The future of Liberty and the Free World now depends in large part on you!

Sincerely, Lb Rust

From: Lisa Twining
Sent: 1/6/2022 8:56:37 PM

Subject: Please Listen - Do NOT require COVID vaccine for school children

External Email

To the Washington State Board of Health,

My name is Lisa Twining and I am a mother of 3 wonderful school aged girls. I am writing to you today asking you to NOT include the COVID - 19 shot in the list of requirements for schools.

I am not an anti-vaccine person. We can agree that vaccines are important and effective in preventing many diseases and my children have been vaccinated. I truly hope this vaccine does what it is intended to do, but I am not willing to sign my children up to be test subjects.

As you know, the COVID vaccine is new and is amazing science, but many of us are not willing to risk jabbing our children and creating long term health risks in their future. I feel there is enough evidence showing that this vaccine is evolving and more information is coming out about the effects both positive and negative. At this time, there is not enough consistent information and time that makes a rational decision for my young children.

As you know the vaccinated and unvaccinated adults and children can contract and pass COVID. I understand the vaccine can give you the tools to help fight the virus, but as we are seeing children's immune systems are strong and have not been as compromised as our elderly. Covid for healthy children is not a large risk and with low hospitalization rate (children checked in for COVID only) of healthy children supports this. Therefore, the risk/reward of getting this shot does not balance when you consider the mild nature of the virus and the possible side effects of the vaccine. Parents should be given the freedom to choose their own level of risk for their family.

As we have seen, COVID and the vaccine has been politicized and we are seeing a great divide. I am fearful if you follow through with this requirement we will see a mass exit from schools and shattering many communities' families and loss of trust in our public health.

Please take the time to consider both views. At this time we have the RIGHT to choose to receive the vaccine and many have done so. Please allow parents to observe and see the data that comes from science

Please know that parents care about their children and the children within their school, county, state and nation. Please allow us to determine when and if our child should receive this vaccine.

Please do not include this in the list of requirements yet.

Lisa Twining

Mother of 3

We are writing to you in response to the fact that the state we live in and call home is astonishingly discussing requiring mandatory COVID Vaccines for residents, children included. This is a policy that shouldn't even be up for discussion, yet here it is. It is against liberty and our freedom that has been fought for by veterans and those who came before us. What is currently on the docket regarding mandatory medical procedure, and using law enforcement to impose these "rules" include nothing but tyrannical policies that will bring destruction to this beautiful state.

We ask that you reconsider, as it against everything America truly stands for. We are a nation of FREEDOM, and this state should be upholding that.

Thank you

Subject: Please do not force the vaccinations as a mandate

External Email

Dear SBOH,

Please do not force people who would be more harmed than helped to get vaccinations that do not even affect their age group. Having children get immunized for a disease that has virtually 0% death rate for but the vaccination has an increased chance of causing myocarditis and other terrible side effects (www.CanadianCovidCareAlliance.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.canadiancovidcarealliance.org>>) is irresponsible at best, and criminal at worst on your part if you pass this as a mandate.

This applies to all people who are immune to covid from having contracted the disease and are now immune to it. The risks of the vaccine far outweigh any public good that the vaccine has shown to do. Please do not add covid to the list of communicable diseases that warrant such extreme measures.

Thank you for your time,

--

God bless!

-Lisa

Dear Washington State Board of Health,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit

analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>
)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you for reading.

JooAe Choi

To whom it may concern,

I am writing you to voice my opposition to any sort of mandated vaccines for school children. I have 3 children who will be attending school in WA in the next few years.

It is discriminatory for ethnic and religious groups, goes against science because clinical trials have not been completed or successful in showing the efficacy and safety of Covid 19 vaccines, and goes against freedom of choice. The shots are dangerous for many individuals as you can readily see in the VAERS reporting. Even if it only harms ONE person, where there is risk of harm, there must be choice. I have multiple family members and friends who have suffered effects ranging from heart races to severe life long tremors that there is no remedy as a direct result of the Covid 19 vaccine. It is outrageous that mandating vaccines for ANYONE but especially children is an option. One size does not fit all. This is not science. This is tyranny. Please fight for our children. Do what is right, not what you feel pressured to do.

All it takes for evil for triumph is for the good men to do nothing. Please be a good person. Do something. Fight for our freedom even if you personally support Covid 19 vaccines.

Please please take heed!

Subject: Please do not mandate vaccination of our children!!!

External Email

I am opposed to making COVID-19 mRNA vaccine shots mandatory for school admission or childcare in our State for the following REASONS:

- Vaccines do not prevent transmission.

Facts that the vaccines DO NOT stop the transmission of Covid come from our own key federal government officials including Anthony Fauci who says that Covid transmission from vaccinated individuals is now a fact and the CDC Dir. Walensky has stated "What the vaccines do not do anymore is prevent transmission."

- Vaccines are no longer effective.

95% of Covid cases are now from Omicron strain. Currently US & worldwide data documents vaccine boosters are failing against the Omicron strain of Covid. Additionally, it is documented that the most common Covid strain "Omicron" is non-life threatening and similar to a common cold.

- No Long Term Safety Data in Children

- Critically important is that there are NO long term safety studies for the mRNA Covid vaccines in children.

- Litigation

- In consideration of the facts above the Washington State Board of Health (WSBOH) should avoid unnecessary and harmful actions against children which will guarantee costly litigation against the WSBOH and it's members if they pursue vaccine mandates for children admission in school and childcare.
- Today the 6th Circuit Court of Appeals refused a request to stay an order blocking the governments Federal Contractor Vax Mandate. Additionally a significant number of lawsuits are working there way to US Supreme Court in regards to the legality of state or federal vaccine mandates.

Respectfully Signed,
Lindsey Jensen

Dear Lindsay,

Our children are our future. Please do NOT require Covid vaccines for children to attend school. They already have to have so many shots, and covid is not even a danger to nearly all children. Children are at extremely low risk for Covid. The risks definitely outweigh the benefits. Vaccines are STILL only EUA. We have absolutely NO long-term studies to demonstrate safety. Studies DO show that both vaccinated and unvaccinated can both transmit Covid. Therefore, the vaccine apparently does NOT stop the spread of the virus. Please, consider the preciousness of these children. They will be just fine... better than fine, actually, without the vaccine. Please vote NO! No Covid shots for children!!!

Thank you for listening.

Subject: Fwd: Please do NOT require COVID vaccination for school children

External Email

To the Washington State Board of Health,

I'm writing to implore you to NOT include the covid-19 shot on the list of required vaccinations for schools.

As the mother of 2 school-age children in Bellingham, I can say with certainty that a decision to mandate kids to have this shot would wreak havoc on many families and within our schools.

I'm sure we can all agree that vaccines are an important and effective tool for preventing many diseases- and I have always been perfectly willing to utilize them to protect my own children, and our community. However, there are many reasons why (most) parents have chosen to wait on having their children receive these particular shots including, but not limited to:

* In the scheme of things, the covid vaccines are still quite new and most parents, (while willing to receive the jabs themselves) are not at all willing to risk their children's health before knowing much more about the long- and short-term side effects of this new vaccine. These feelings are completely justifiable as the science on these vaccines is still evolving and coming to light.

* In terms of how the vaccines will effect public health- that science is still evolving as well. Considering that both vaccinated and unvaccinated individuals can contract and pass along the virus, many parents remain skeptical that any perceived or real risk is actually worth any perceived benefit. It serves no one to preemptively force parents into a decision they aren't ready to make when there is still so much confusion circulating.

* Covid in otherwise healthy children is not a large risk- and the (extremely low) hospitalization rate of healthy children supports this. Therefore, the risk/reward of getting this shot does not balance when you consider the mild nature of the virus and the possible side effects of the vaccine. Parents should be given the freedom to choose their

own level of risk for their family.

* There are MANY medical, religious, and other deeply personal reasons why parents are hesitant to give this shot to their children. Sadly, most of these reasons will not be covered by "exemptions"- forcing parents to choose between their children's health or their schooling. Please DO NOT force parents to make this choice.

For whatever reason, the covid vaccines- effective or not- have been profoundly politicized (on both sides), with most parents falling on one side or the other. Because of this, it is reasonable to assume that a decision to require this particular vaccine at this time would directly cause a mass exodus from our schools, shattering our communities and negatively impacting public health across the state.

At this stage of the pandemic, we find ourselves at a pivotal moment when every protection we can possibly hope for from this virus is in place. We have the tools to protect ourselves and our families- and everyone should have the right to choose which protections are best for them. You, as the health board, are in a unique position to renew public trust in our state government by demonstrating trust in the people of Washington.

Please consider that no one cares more about a child's health than their parents. No one knows their medical history or the ins-and-outs of each individual child better than their parents. PLEASE allow parents- the ones who care the most- to make the determination for their own children. It is what is best for the health of every family, every school, and every community.

I sincerely appreciate your time and consideration.

Dear Representatives,

Please enter this email into your decisions today at Noon!

We oppose the proposed WAC's 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

We are completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

We are completely against covid-19 injections as part of the school immunization requirements using WAC 246-105.

Please fight to maintain our Constitutional rights to choose the most fundamental human choices. No one should be forced against their will to inject or ingest anything that has not gone through a time tested clinical trial and proven. Each persons situation is unique and a one person fits all shot, is not the safest for everyone. Do not repeat history by putting human beings in camps. Remember the golden rule? Do unto others as you'd have them do unto you? Preserve the rights of the people of the United States of America with your God given wisdom, truth and justice to do the right thing.

Respectfully,

Mark and Cynthia Cronkhite

I am writing as a resident of Washington state to let you know my feelings on this unconstitutional and tyrannical overreach of power you think you have. Gov Inslee has obviously led you to believe you're more powerful than you actually are.

You have no right deciding what is best for our children. You are not the parent, grand parent or guardian. You are a public servant, hired and paid for by the people. and guess what, you're doing a very poor job and really pissing the people of Washington off.

Children have a 99.9% chance of surviving covid. They do NOT need an experimental drug injected into their innocent bodies due to your crazy beliefs that you are protecting them. AGAIN, not your job! Covid is being spread by both the vaxxed and unvaxxed, so what's the point? You're falling into the tyrannical beliefs of our government, leading you to false thinking that you're doing the best for everyone, when time and time again, it's proven to be not the case.

Over the years, many experimental drugs have been pulled off the market due to lack of study, illness or even death. But we don't like to talk about that because it might upset someone and cause them to think on their own. Nope, definitely don't want the people to do that!

Give this shot 10-20 years of long term effect studies and bring this idea back to the table. Our children are not guinea pigs and I refuse to allow you to act as if they are.

To date, 55000 children have been pulled out of public schools here. If this ridiculous idea is pushed through, I believe you will see a mass exodus from public schools and Washington state. At \$17000.00 dollars per enrolled child, do you really want to push it and see how many more will leave the public system? I know for a fact mine would be pulled immediately. What sort of impact do you think this will have on households who depend on that time their children are gone to make a little income?

We the people have the power to bankrupt your school system and I'm really not sure you want to see how far we will go to protect our children.

Please reconsider and drop this ridiculous notion of protecting our children. You're doing just the opposite.

Sincerely,

A concerned parent and tax payer.

Washington State Board of Health Members,
I, Victoria A. Fleishman, residing in Ferndale WA, Whatcom county, am stating that I STRONGLY OPPOSE allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100 and including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

The government has no right to force anyone to take anything into their bodies they do not choose to take. This idea is equal to the taking of God-given freedoms in Nazi Germany. It also is criminal to punish or detain anyone for their choice of medical freedom. Reference the NUREMBERG Code! A Quarantine facility where people are forced to stay is absolutely wrong, especially in the face of the Covid disease and it's variants which only have a tiny fraction of risk of death to the average person. Even those with comorbidities have a very high chance of surviving this virus. Allowing people's natural immunities to fight this virus is the ONLY way to reduce its strength. The mRNA vaccines are EXPERIMENTAL and should not be forced on anyone, period! These vaccines have been proven to carry more of a health risk than getting Covid! Look at the VAERS reports!

Also, I have the same opinion regarding the mandating of children to be vaccinated against Covid. Almost ALL children survive the virus as easily as the common cold or flu virus. Again, these vaccines are EXPERIMENTAL and have not yet proven to be safe! Heart, nervous system, and other systems in the bodies of young people receiving these vaccines are being affected in atrocious ways! The risk FAR OUTWEIGHS any benefit! It is truly WRONG to mandate these vaccines when natural immunity is very effective against this virus!

Please accept my sincere concerns and recommend AGAINST these proposals being presented.

Respectfully,

Victoria Fleishman

Subject: Re: Please Listen - Do NOT require COVID vaccine for school children

External Email

I would also like to encourage you NOT to allow local health officers to use law enforcement to detain a person (medically/unvaccinated/treatment) and put them in an isolated facility. How can you not see that this extreme force will only cause more violence and anger in our state. I can't not believe, in America, the country of free choice and speech, our medical freedoms are being taken away. We all have a right to our medical freedom. It is also a waste of time for our law enforcement. Law Enforcement should be focusing on violence in the streets, looting, drug trafficking, and sex trafficking within our state.

I can't believe this is even being discussed! I am disappointed in our state's leadership.

Please listen to the WHOLE STATE not just King County or Western Washington! Please do not force people to do something that is not proven to work and could cause long term health issues. This should be our choice!

Lisa Twining
Washington Resident

On Thu, Jan 6, 2022 at 8:55 PM Lisa Twining <vonskirch@gmail.com>
<mailto:vonskirch@gmail.com> > wrote:

To the Washington State Board of Health,

My name is Lisa Twining and I am a mother of 3 wonderful school aged girls. I am writing to you today asking you to NOT include the COVID - 19 shot in the list of requirements for schools.

I am not an anti-vaccine person. We can agree that vaccines are important and effective in preventing many diseases and my children have been vaccinated. I truly hope this vaccine does what it is intended to do, but I am not willing to sign my children up to be test subjects.

As you know, the COVID vaccine is new and is amazing science, but many of us are not willing to risk jabbing our children and creating long term health risks in their future. I feel there is enough evidence showing that this vaccine is evolving and more

information is coming out about the effects both positive and negative. At this time, there is not enough consistent information and time that makes a rational decision for my young children.

As you know the vaccinated and unvaccinated adults and children can contract and pass COVID. I understand the vaccine can give you the tools to help fight the virus, but as we are seeing children's immune systems are strong and have not been as compromised as our elderly. Covid for healthy children is not a large risk and with low hospitalization rate (children checked in for COVID only) of healthy children supports this. Therefore, the risk/reward of getting this shot does not balance when you consider the mild nature of the virus and the possible side effects of the vaccine. Parents should be given the freedom to choose their own level of risk for their family.

As we have seen, COVID and the vaccine has been politicized and we are seeing a great divide. I am fearful if you follow through with this requirement we will see a mass exit from schools and shattering many communities' families and loss of trust in our public health.

Please take the time to consider both views. At this time we have the RIGHT to choose to receive the vaccine and many have done so. Please allow parents to observe and see the data that comes from science

Please know that parents care about their children and the children within their school, county, state and nation. Please allow us to determine when and if our child should receive this vaccine.

Please do not include this in the list of requirements yet.

Hello Kelie,

I am writing as a concerned parent of two boys in the Bellevue School District. Before you vote on whether or not to make this vaccine a requirement for school, I am asking you to listen to this 1- hour compilation of critical questions brought up by the FDA Advisory Board when deciding to approve Pfizer's COVID vaccine for 5-11 year old's. In case you are unable to listen, I have provided key points from the meeting below. Please note myself and thousands of other parents will be unenrolling our children if this is required to attend school. Before you vote - please make sure you are informed on the benefits and risks to our children.

Key Points from the FDA Advisory Board Meeting - Oct 26th:

***Link to 1-hour highlights video here.

Advisors do not recommend healthy children get this vaccine

Advisors do not recommend this vaccine be required to attend school

Doctors do not expect the vaccine to prevent infection

They have no data or expectations it will prevent transmission

Based on current data and modeling, the risks of the vaccine to children outweigh the benefits

Children's vaccine is based on the alpha variant and has little to no protection against Delta or Omicron

Children's vaccine includes Tris (hydroxymethyl)aminomethane), a stabilizing agent, however the vaccines given during the clinical trials did not include this new ingredient so no one knows the potential risks to our children.

Advisors very concerned about increase in myocarditis and pericarditis especially in young boys

Approval was given based on the vaccine being available to immune compromised children only.

Thank you for your time,

Kathy Wall

Subject: Pediatric Vaccine Opposition

External Email

I am a parent! I am the sole decision maker for my children! I refuse to let them get this "vaccine!" It's an experimental drug, NOT a vaccine! This "coronavirus" is a COMMON COLD! It's not affecting children at all. Injecting this poison and POPULATION CONTROL into young, healthy children is the most disgusting thing I have ever heard of!

Below are some more reasons!

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Hello WA State Health Board Members,

We are writing this email to plead and ask for the Covid Vaccine to not be mandated in public or private schools. We strongly urge for this not to be passed. There will be many teachers and staff and students leaving the public school systems and private as well due to this terrible possible mandate.

Thank you,
Kelly & Jeff Segel

To whom it may concern:

Our children are our future. Please do NOT require Covid vaccines for children to attend school. They already have to have so many shots, and covid is not even a danger to nearly all children. Children are at extremely low risk for Covid. The risks definitely outweigh the benefits. Vaccines are STILL only EUA. We have absolutely NO long-term studies to demonstrate safety. Studies DO show that both vaccinated and unvaccinated can both transmit Covid. Therefore, the vaccine apparently does NOT stop the spread of the virus. Please, consider the preciousness of these children. They will be just fine... better than fine, actually, without the vaccine. Please vote NO! No Covid shots for children!!!

Thank you for listening.

Subject: Please say no to a Covid 19 vaccine mandate

External Email

Dear Washington State Board of Health Members,

I am writing to you on behalf of the many public school children in Washington State. Research clearly shows that the risk factors for a child to become seriously ill from sars covid 19 are very small compared to the potential to life long negative impacts from the vaccinations that are still only available via Emergency Use. I would challenge each of you to go to the Pfizer website and do your own research- Comirnaty is "approved", but is NOT available and is not being injected in recipients - only the original Pfizer. The two are not the same.

Are you willing to take the blame? Support families when their child(ren) have adverse responses to the vaccination? The pharmaceutical companies are not standing behind their product, but are rather "hiding" behind emergency use. The injected sign all of their rights away. These vaccinations have NOT been tested long enough - what will they do to the cardiovascular system, pulmonary system, reproductive system. When I was young, Thalidomide was given to pregnant woman as "safe" to reduce nausea- so many have no forearms and hands- it hadn't been thoroughly tested. Where is the rush? Test thoroughly then, trust the outcome based on true scientific research.

For all of the people double vaccinated and boosted spreading and catching the virus currently - the vaccines clearly didn't do what they were to do as initially stated: to end the pandemic. Sars covid 19 is carried by people and animals, it will NEVER be eradicated and we are foolish to believe it is so.

America is a land of choice, that has been protected since 1776, but is quickly vanishing. There will be a mass exodus from the public school system, are you prepared for that?

Please allow parents to make the BEST decisions for their child(ren) and do not force something that is an experiment and our children are literally the lab rats to be part of Washington State's history.

Sincerely,

Lisa Anderson

Dear Health Officials,

We absolutely do NOT believe that the Covid 19 vaccine should be required for children to gain entry to child care or school! PLEASE vote 'NO' on the states effort to mandate the vaccine for children! It is currently only an EUO {Emergency Use Only}, and quite clearly not efficient or effective for stopping Covid; the possible dangerous side effects resulting in permanent disability & even death, {Listen to the people who have experienced deep loss after loved ones have taken the vaccine in good faith!!}, create the need for people to make their own medical decisions in regards to any medicine put into their bodies & the bodies of the children they are charged to protect! We urge you to make the moral & humane decision with the power that has been entrusted to you.
Thank you!!

Most sincerely.

Subject: Please regain our trust before moving on these disturbing policies.

External Email

Dear Wa State Board of Health,

As an American, wife, mother, and grandmother I am deeply disturbed by to proposed policies. I understand the policies to be discussed are allowing local health officers to use law enforcement to force and emergency order to involuntarily detain a person or group of persons to be isolated in a quarantine facility following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination and include the Covid-19 injections as part of school immunization requirements.

Here are some concerns I have Covid mRNA shots are still experimental and have no completed their trial periods. These are experimental, mRNA gene therapies that have never been used before and we do not know what the long-term effects could possibly be. It is completely unethical to coerce or mandate someone to take this shot or be forced to be tested. The PCR tests are not reliable for determining illness and the whole pandemic has been determined from these unreliable tests. The Comirnaty shot is not available and is not interchangeable with the others. Too add an unavailable FDA approved shot , that has yet to be properly safety tested for children and has not gone through the complete safety trials for children to attend school, is unethical. Coercion of the children and the parents to be forced into partaking in the experimental mRNA gene therapy goes against the Nuremburg code, from the Nuremburg trials, spurred on by the atrocities of what happened to the Jewish people in Nazi Germany - the conversation of not being allowed to attend schools and also being forced to be subjected to medical testing and experimental shot or be arrested and detained for an indefinite amount of time in an encampment, sounds a lot like what happened to the Jews in Nazi Germany, as well as the precursor details leading up to. Being that the risks by far do outweigh the benefits for children, it is questionable why this is being done and this time, it appears it is being done right now to give the companies who created these shots complete immunity from being sued by those injured by the shot-- is that why the "FDA Approved Comirnaty" is not available, per the CDC? Because they wouldn't have and immunity from liability? We know that once the shot is added to the childhood schedule it will have complete immunity from liability to the companies. The federal courts also recently ruled in the 35 Navy seals vs Joee Biden, , that the Covid virus does not null our 1st Amendment rights. Therefore, forcing someone who does not want the shot abased upon their beliefs is unconstitutional. VEARS has recorded more than 21,00 deaths and more that 1,000,000 adverse reactions to the Covid shots. Studies are demonstrating that risks of the shots are 4 and 5-fold above the benefits. Issues of Myocarditis id beyond alarming. The push back through the Freedom of information Action filings recently and the unavailability of the safety studies from the FDA demonstrates that we are not being provided the opportunity for informed consent and the facts are not being provided. Conversations of arresting and detaining for indefinite amount of time, those who do not wish to be tested nor want the shot for themselves or their children is draconian, and tyrannical and goes against are constitutional right to legal due process.

There is so much more to say but I encourage the Health Board to look at the actual science and not just the narrative of the same pharmaceutical companies that are

refusing to be transparent with their safety studies.

Thanks for your time,

Heather

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

We want to voice our concern and opposition to the proposals WAC-246-100-070 and WAC-246-105. We oppose using police force be used to isolate in a quarantine facility any families or group of person because they do not want to be medically examined, treated, tested or vaccinated. That sounds eerily like Nazi Germany treatment of the Jews and I am sure that we do not want to go down that road.

We ask that you listen to the people at your meeting on January 12th and oppose these two measures.

To State Board of Health,

As a parent, teacher, and well-informed citizen, I am writing to express my concerns in regard to items on your meeting agenda.

Agenda Item #9 – Allowing local health departments to set up quarantine facilities and in some cases, detain people against their will. This is in direct conflict with our state constitution and is completely unnecessary in the current health situation. The vaccines have proven ineffective, as people still get Covid-19 after receiving them. Medically, it is proven that people develop natural immunity after having Covid-19. What justification would there be for quarantine facilities?

Agenda Item #11- Informed Choice Washington's Petition for Rulemaking (filed by Xavier Figueroa, Ph.D. on behalf of ICWA) requests a new rule that prohibits any EUA product, or any product that has not successfully complete Phase 3 trials to be added to mandatory school health requirements. I agree with this statement for the following reasons. #1. The current Covid -19 vaccines have not completed Phase 3 trials. #2. The current vaccines for Covid-19 are still in EUA. This means that they are supposed to only be applied in an emergency – not as a broad application to the entire public. #3. The EUA no longer should be applicable in this situation as current and further studies are finding many therapies for early treatment for Covid-19, which improves opportunities for natural immunities to develop. #4. The current vaccines are not preventing Covid-19. #5. According to the CDC's website VAERS, the current Covid-19 vaccines have a terrible record of adverse events and death. There is no data on safety over 3, 5, 10 years and beyond. It is not acceptable to vaccinate every child with a vaccine with this undeniably tragic safety level. The consequences could be devastating on our children!

Respectfully,
Nicole Brockett

Subject: Proposal

External Email

I am writing this is in direct opposition to the WA state DOH proposal to modify WAC to use Law Enforcement to involuntarily detain individuals and families into quarantine for failure to comply with requests for medical exemption, testing, treatment, counseling, and/or vaccination and also I am staunchly opposed to the DOH proposal to require COVID vaccines as part of school immunization requirements.

This is an unscrupulous action by the DOH and I expect more from public officials.

As a concerned citizen, I AM NOT IN SUPPORT OF THE DOH ACTION TO MODIFY WASHINGTON LEGISLATION TO INCLUDE COVID-19 FOR ILLEGAL DETENTION AND MANDATORY VACCINATIONS. Not only is this immoral, it is a complete abuse of law enforcement action and outside the reach of the DOH.

Subject: Opposition to Vaccine Requirement

External Email

To all members of the Washington State Board of Health:

I would like to express my extreme opposition to the implementation of a COVID 19 vaccine requirement for schools in Washington State.

The reasoning used to support this position:

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long-term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

The health of a child is, first and foremost, the responsibility of the parent. If you proceed with this requirement, the outcome will likely be that many parents will withdraw their children from state schools. This will be to avoid risking the health of their children on a vaccine that has short-term efficacy and is statistically unnecessary for children.

I caution you that if you take this step, you will be responsible for the continued rise in homeschooling (which is already happening) and the unnecessary vaccination of healthy children - a state that cannot be guaranteed AFTER the vaccine is injected. Please reach out to those doctors and scientists who are speaking out against vaccines for children. Put them on the spot to provide you with data and scientific studies that support their concerns. Factor in all the compelling evidence before determining a path forward. The children and parents in this state are depending on you to make a choice that promotes health, yet does not sacrifice commonsense.

Again, I would like to state my strong opposition to requiring Covid 19 vaccines for children in the WA state school system. I will follow your discussion and decision very closely.

Sincerely,

Julie James

Hello Christy,

I am writing as a concerned parent of two boys in the Bellevue School District. Before you vote on whether or not to make this vaccine a requirement for school, I am asking you to listen to this 1- hour compilation of critical questions brought up by the FDA Advisory Board when deciding to approve Pfizer's COVID vaccine for 5-11 year old's. In case you are unable to listen, I have provided key points from the meeting below. Please note myself and thousands of other parents will be unenrolling our children if this is required to attend school. Before you vote - please make sure you are informed on the benefits and risks to our children.

Key Points from the FDA Advisory Board Meeting - Oct 26th:

***Link to 1-hour highlights video here.

Advisors do not recommend healthy children get this vaccine

Advisors do not recommend this vaccine be required to attend school

Doctors do not expect the vaccine to prevent infection

They have no data or expectations it will prevent transmission

Based on current data and modeling, the risks of the vaccine to children outweigh the benefits

Children's vaccine is based on the alpha variant and has little to no protection against

Delta or Omnicron

Children's vaccine includes Tris (hydroxymethyl)aminomethane), a stabilizing agent, however the vaccines given during the clinical trials did not include this new ingredient so no one knows the potential risks to our children.

Advisors very concerned about increase in myocarditis and pericarditis especially in young boys

Approval was given based on the vaccine being available to immune compromised children only.

Thank you for your time,

Kathy Wall

Subject: Please Vote NO on MANDATORY VACCINES FOR ANYONE, LEAST OF ALL CHILDREN!

Please do not require vaccination of children for admission to school and day care! Please do not take authority away from parents, especially since this vaccine is still only approved as Emergency Use and no one really knows the long term side effects. All one need do is look at the government's own website (VAERS) for vaccine related adverse effects to know that these vaccines are not without risks. Thousands have been injured and many have died, having taken the shot under duress.

This latest variant is proving to be mild in its symptoms and the "vaccine" is not proving to be effective or efficient in eradicating Covid so why should anyone take the risk of injecting themselves or least of all their children with an unproven solution.

Please listen to Dr. Robert Malone who is one of the founding scientists for the mRNA "vaccine!"

JRE #1757 - Dr. Robert Malone, MD (rumble.com)

We would like to express our extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis

of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>
>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

We want to voice our concern and opposition to the proposals WAC-246-100-070 and WAC-246-105. We oppose using police force be used to isolate in a quarantine facility any families or group of person because they do not want to be medically examined, treated, tested or vaccinated. That sounds eerily like Nazi Germany treatment of the Jews and I am sure that we do not want to go down that road.

We ask that you listen to the people at your meeting on January 12th and oppose these two measures.

Hello,

Please know that my kids do not need the Covid vaccine! There is no science backing this up. Let us have the choice to do it or not to do it. Never in the history of this county has such a thing happened and I suggest it would not only be wrong, unconstitutional, and sinful to do so, but absolutely devastating to my kids. You know what it can do the reproductive organs in girls. Do not mess with my girl, Hailey's body! They won't even tell us what is in the EUA vaccine.

Thanks,
Josh Dyck

Dear Health Officials,

We absolutely do NOT believe that the Covid 19 vaccine should be required for children to gain entry to child care or school! PLEASE vote 'NO' on the states effort to mandate the vaccine for children! It is currently only an EUO {Emergency Use Only}, and quite clearly not efficient or effective for stopping Covid; the possible dangerous side effects resulting in permanent disability & even death, {Listen to the people who have experienced deep loss after loved ones have taken the vaccine in good faith!!}, create the need for people to make their own medical decisions in regards to any medicine put into their bodies & the bodies of the children they are charged to protect! We urge you to make the moral & humane decision with the power that has been entrusted to you. Thank you!!

Most sincerely.

Hi,
Thanks for taking my statement on this matter.
I'm a retired firefighter/paramedic. My wife is still an active firefighter, as is our youngest son. Our eldest (that sounds too old for 28) is a Med-Tech in the local emergency room.
It is a privilege to help and

serve the people of our town, county and state.

We stay up on medical issues to weigh the risks on the vaccines and interventions. We have all been vaccinated.
That said, I don't think the current vaccines are a good bet for everyone. And every person should be allowed to make their own decision on healthcare.

I am against mandating any medical treatment for any person against their will. Especially young children. Parents have the job of caring for kids in the best way possible.

Any bureaucracy that attempts to override the parents' will is exceeding their authority. Most people realize that children are very resilient to common pathogens, including covid. So they shouldn't be forced to risk receiving vaccines with a history of side effects, to little benefit.

The newest variant seems to be pretty mild, which is great news. I think we're turning a corner with covid and heading into less scary times. Let's calmly consider what is necessary right now, and what might be harmful.

Please do not mandate childhood vaccines.

Thanks again for considering my views.

External Email

Ladies and Gentlemen,

I am writing to let you know that I emphatically oppose the WAC 246-100-070 Ruling which would allow law enforcement to involuntarily detain and/or quarantine individuals and families! It is reminiscent of World War II detention of people groups based on ethnicity. COVID is contagious. So is the flu. However, please recall that there is a greater than 95% survival rate for COVID-19 patients. The fact that this is even being considered is quite unbelievable and illogical. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule, which would require children to be vaccinated to attend school for the following reasons, among others:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

Thank you for your time and consideration.

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

Subject: FW: Forced Vaccination & Quarantine in WA?? PLEASE Do No Harm!

From: John Eames <eamesconsulting2015@gmail.com>
Sent: Friday, January 7, 2022 11:42 AM
To: Kahler, Kelie (SBOH) <Kelie.Kahler@sboh.wa.gov>
Subject: Forced Vaccination & Quarantine in WA?? PLEASE Do No Harm!

External Email

Dear Kelie:

I understand that WA Board of Health will be discussing Covid-19 shot mandates for schools and recommendations for forcible quarantine and/or detention of those that disagree with policies. As a parent who has raised and nurtured my children in this State, I request that you abandon the plan of forming a technical advisory group to explore COVID19 mandates and adopt a new rule of requiring products to have completed Phase 3 clinical trials before they can be added to a list of school requirements.

For almost 2 years we have attempted to follow the health recommendations of washing, masking, distancing, testing, isolating and vaccinating. By now it is apparent that the virus is going to continue regardless of measures attempted. Thankfully, SARS CoV2 is acting in similar manner as all other viral pandemics and becoming more "virulent" (spreads easier) but less deadly. Real immunity is achieved with exposure and recovery as is evidenced by the fact that those infected with SARS in 2002/3 cannot become infected with SARS CoV2 today! In contrast, Covid19 has managed to find a way to escape the vaccine as is evidenced by the incredibly high numbers of vaccinated and even boosted individuals getting sick and testing positive. Surely this fact has not escaped your knowledge!

As Health Board members, you are obligated to provide us with facts that support any and all recommendations or requirements.

- 1) What is the current rate of mortality for COVID19 infection and stratified according to age groups?
- 2) Point to ANY measures that have reduced the numbers of fatalities (cases are not fatalities).
- 3) What is the rate of all COVID 19 caused mortality in WA in 2020 and 2021?.....did the measures imposed reduce the number of deaths from prior year?
- 4) Provide me evidence of asymptomatic spread of SARS CoV2.

5) Provide me safety studies for masking children and randomized clinical trials for masks preventing spread of lab-confirmed upper respiratory viruses (not modeling of masks on mannequins).

6) Make public the accuracy of testing - what is the rate of false positives and false negatives of tests and were results determined by manufacturers of the tests or unbiased 3rd party investigators?

7) Provide evidence that the vaccines prevent infection and transmission and that they improve the health of individuals who receive them compared to those who do not.

8) Explain why there is so much focus on eliminating this 1 virus when human immune systems have successfully protected our growing population since the beginning of time?

I believe that as members of the WA State Health Board you truly desire to improve the health of Washingtonians. However, I do not trust that you have carefully investigated and logically determined adequate and measurable health remedies for which you are able to provide evidence. Before doubling down on measures that will HARM more than they HELP the overall health of citizens, please determine and make public the evidence to justify any policies.

Regarding mandating shots, know that the clinical trials will not be completed until 2023. Know that WA State has a legal definition of a vaccine that the C19 shots do not fulfill as they were never part of a living microorganism nor do they prevent transmission or infection of disease.

"Vaccine" means a preparation of killed or attenuated living microorganisms, or fraction thereof, that upon administration stimulates immunity that protects against disease and is approved by the federal food and drug administration as safe and effective

<https://app.leg.wa.gov/RCW/default.aspx?cite=70.290.010>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx?cite=70.290.010>

Furthermore, how necessary or even safe is it to give a vaccine to a person who already has immunity to the pathogen? Most children by now have been exposed to the virus and have developed immunity without difficulty. Why consider a mandate for those not at high risk for adverse outcome should they become infected but who carry unknown risks of adverse reaction with getting the shot?

I look forward to hearing these concerns addressed and evidence for any and all recommendations to be presented when I tune into your meeting on January 12.

Thank you.

Subject: don't make covid vaccine mandatory for children!

External Email

Dear Sir/Madame,

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State .

As a parent, and a member of the community, I implore you to please stop the push to require Covid 19 vaccinations for ANY child in child care or school. Covid vaccines should absolutely NOT be a requirement for our children! Children are at an extremely low risk for Covid 19. The Covid 19 vaccines have no long-term testing on adults and they have even less testing on children. Covid 19 vaccines are not stopping the virus as many with the vaccine are contracting and spreading C19. The vaccine has not been tested enough to ensure its efficacy and safety in children. Requiring this vaccine does not protect our children!

The disease burden in this case does not meet your criteria. There is NOT a significant morbidity and/or mortality in at least some sub-set of the population. The survival rate is well over 90% and even the long term effects of C19 do not represent a significant amount. Additionally, this vaccine is not meeting your criteria because it is not reducing the risk of person-to-person transmission.

As for the criteria of Implementation, the vaccine is NOT acceptable to the medical community and the public. There is an extremely large amount of both the medical and the general public who do NOT accept this vaccine as safe.

And finally in regard to vaccine effectiveness, this vaccine does not work. It is not on the Recommended Childhood & Adolescent Immunization Schedule. It is not preventing C19 nor is it preventing the spread of C19. The vaccine is not cost effective for our nation.

Perhaps it is cost effective or free or maybe even puts some money into the local schools, but as a nation, it is destroying our financial position at an alarming rate.

"Experience to date with the vaccine containing this antigen demonstrates that it is safe and has an acceptable level of side effects." Yeah. Not even close. Tell that to the parents of the kids who are having heart attacks. Tell that to my friends who have had massive autoimmune flare ups and other medical issues arise immediately after their second dose. This is not a safe vaccine for all people. Even the FDA board that was approving those vaccines to young kids did it with the impression that this will be absolutely voluntary and will never be mandated which CDC guaranteed. Will you take upon yourself the responsibility for the health and wellbeing of innocent children who you will be subjecting to unknown risks in order to receive education which is an ingrained right of every child? Will you create segregation and discrimination based on the medical choices made?

Please PROTECT our children by NOT requiring a C19 vaccination to attend child care or school.

Thank you,

Larysa Plostak

External Email

I am sending this email to urge you, as a member of the WA state Board of Health, to please vote AGAINST applying current infectious disease WAC codes to include Covid-19 for all WA state residents!

This is an outrageous abuse of power and every person in WA state and across the nation should strongly object to this invasion of our privacy and our liberties as freedom loving Americans!

To allow local health officers to use the law (WAC 246-109-070) to enforce these "Emergency Orders" (WAC 246-100-045 & WAC 246-100-040) is...to say the least...tyrannical! And of course it goes with saying that this is illegal and goes against the NUREMBURG CODE Article 6, Section 28!

No policy should disrespect the rights of all to make their own health care decisions
Public health is important, but NOT at the expense of losing our GOD given freedoms.
Please vote NO to these "Emergency Orders"!!!!

Thank you!

Subject: Forced quarantine for the "un-vaccinated" and forced vaccinations especially for children is inhumane.

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State, and forced quarantine for the "un-vaccinated" or anyone with "signs or symptoms" of "COVID-19".

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>>)

4. The proposed rule giving DOH powers to involuntarily quarantine or inject US citizens is in violation of federal law. Under Title 21 CFR (Code of Federal Regulations) Section 50.23 & 50.24 It is illegal to exercise coercion when administering experimental medical treatments. Coercing any US citizen to receive medical treatment against their will constitutes an act of domestic terrorism, which is a felony. Any attempted enforcement of such an unlawful rule would expose anyone enforcing it to charges of domestic terrorism. Since the proposed rule will be UNLAWFUL by definition and will also violate WA State Constitution, Article 1 Section 7 - right to privacy - there is only one option. Abolish consideration of such a rule or face criminal charges (Domestic Terrorism and/or Conspiracy to commit Domestic Terrorism).

5. The virus is not possible to detect. "Deeply hidden in an official document on covid-19, the CDC ruefully admitted as early as summer 2020 that it does not have a measurable virus: 'As no quantified (= measured) isolated virus objects of 2019-nCoV are available at this time...' (page 39 of the 'CDC 2019-Novel Coronavirus (2019- nCoV) Real-Time RT-PCR Diagnostic Panel' (July 13). In other words, the CDC, as one of THE leading medical authorities in the world, could not, and still cannot, demonstrate a virus.

Writing about the scientifically totally debunked for this purpose, but still shamelessly abused PCR test, the CDC stated under the heading 'limitations': "The detection of viral RNA cannot demonstrate the presence of an infectious virus, or that 2019-nCoV is the causative agent of clinical symptoms." And in addition: "This test cannot exclude other diseases caused by other bacterial or viral pathogens."

In other words, we cannot prove that the people who get sick and are hospitalized, and very occasionally die, were sickened by a new coronavirus called SARS-CoV-2, nor can we prove that it caused them to develop a new disease called 'covid-19.' It could just as easily be a different virus and a different disease. (And since all the symptoms, including severe pneumonia, correspond seamlessly to what flu can cause historically in vulnerable people...'if it looks like a duck and walks like a duck, it is a duck'.

Earlier this year, Samuel Eckert's German Team and the Isolate Truth Fund pledged a reward of at least \$265,000 for any scientist who can provide incontrovertible proof that the SARS-CoV-2 virus has been isolated and therefore exists. They too pointed out that not one lab in the world has yet been able to isolate this coronavirus. That sum has now been increased to 1 MILLION EUROS."

(https://thetruthiswhere.wordpress.com/2021/06/26/cdc-sued-for-fraud-by-7-universities/?fbclid=IwAR3vqssglXDxPq9vt8bKgZCYC0QdEBbRf_u6jdcDqislx9dOxNqhkdzyrfs

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fthetruthiswhere.wordpress.com%2F%2F%3Ffbclid%3DIwAR3vqssglXDxPq9vt8bKgZCYC0QdEBbRf_u6jdcDqislx9dOxNqhkdzyrfs&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C0793b2050c6946d2b>

In closing, force-vaccinating healthy children, or anyone for that matter, for a disease that doesn't affect them to make some adults feel safer is a new low for humanity. Forced quarantine of the "un-vaccinated" population or those showing "signs or symptoms" of "COVID-19" is an abuse of power. Please do the right thing and do not move forward with this mandatory vaccination, particularly for school aged children, or forced quarantine of anyone.

Medical freedom is meant for us all,

Lorrie Fox

Subject: DO NOT MANDATE VACCINE SHOTS FOR CHILDREN

External Email

- * Children are at risk for potentially lifelong health problems from the jab. Myocarditis (heart inflammation) has emerged as one of the most common problems, especially among boys and young men
- * Myocarditis is inversely correlated to age, so the risk gets higher the younger you are. The risk is also dose-dependent, with boys having a six fold greater risk of myocarditis following the second dose
- * British data show deaths among teenagers have spiked since that age group became eligible for the COVID shots. Between the week ending June 26 and the week ending September 18, 2020, 148 deaths were reported among 15- to 19-year-olds. During those same weeks in 2021, 217 deaths occurred in that age group — an increase of 47%

How's that liability issue going to work for all those who vote in favor of this nonsense?

Think about the consequences before you vote to mandate shots for children, they will be significant...

You do not have the science on your side regarding this.

There is too much information available at this moment in time, to where you should have known better.

Please do the right thing and vote no.

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

Dont poke the mama bears. If you do, you will lose.

Regarding "11. Rulemaking Petition – Chapter 246-105 WAC, Immunization Criteria, Child Care and School Entry –Possible Action":

I do not support forcing children to get the COVID-19 vaccination to attend school. There are several reasons.

1. The COVID-19 vaccines are available to families that choose to vaccinate their children.
2. The COVID-19 vaccines are under Emergency Use Authorization.
3. The long-term effects of COVID-19 vaccinations are not studied and thus unknown.
4. The COVID-19 vaccines do not prevent vaccinated individuals from acquiring COVID-19 or stop the transmission of COVID-19 to others.
5. The latest COVID-19 variants, e.g., omicron, are showing fewer hospitalizations and deaths overall.
6. All COVID-19 variants have shown a low risk to children.

Forcing the COVID-19 vaccine upon those that do not want it undermines the liberty afforded to all individuals under the Washington State Constitution. It also does not make the school environment any safer because it does not stop COVID-19 from being acquired or transmitted.

Sincerely,

Kyle Hutchison

Christy,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

I'd strongly urge the members of the board in control of such an important decision to form their consensus based of the facts, logic and reasoning while using honesty, fairness from an unbiased perspective to guide those decisions.

With great power comes great responsibility; Which is why it is crucial the members of the board make the right decision for the people and our children.

I understand that everyone has a different set of morals and values that guide how we each make our own decisions. Which is why it's important for you to really dive deep and ask yourself who you really are and determine if you are proud of who you are and what you as an individual are support and represent.

No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' Children's Health Defense (childrenshealthdefense.org)

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>
) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>
>).

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Hailey Unland

To Whom it May Concern,

Our family is completely against any of the COVID policies that are overreaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

There should absolutely be no right for law enforcement to detain people for vaccination purposes. The vaccination for COVID is unproven as a legitimate vaccination. People are receiving the vaccination still getting COVID, being hospitalized for COVID and dying from COVID. There is no evidence that it lowers symptoms of COVID in the majority of people. There are significant side effects and risks of receiving the vaccination. This should not be a required vaccination at this time as it is NOT a vaccination.

Please, please, consider the effects of these WACs and the unnecessary overreach they would cause. Please oppose these WAC's.

Please do not make any decisions that would require forcing people to do anything with their bodies and go by the principle, "my body, my choice." This is very dangerous when you start mandating, forcing, punishing people for doing what they know is right for their body. Do you believe in forced abortion because some people believe it is for the greatest good with population control. How is what you are considering different?

Subject: Evidence Supports Opposing All Mandates / Public Input for next State Health Board Meeting

External Email

Dear Official Office Holder,
Please consider that all of the most vaccinated cities, states and countries have the most injury and death.

All that is needed is promotion of normal health measures and for early treatment protocols to be put in place.

Hire back naturally immune medical staff to care for all the vaccine injured and backlog of people who need medical care.

Put the health of people above fear and/or profits.

Please OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school.

You oppose COVID-19 shot mandates, period!

Please SUPPORT Informed Choice Washington's Petition for Rulemaking (see below) — our petition is item 11 on the January 12th agenda. It was filed by Xavier Figueroa, PhD, on behalf of ICWA, and asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Thank you for your time and consideration,

P. Tronson Kitsap County resident

I am sick of writing these emails so here is my copy of local correspondence.

Note the jab injured and deaths from it have only increased since I compiled this info in the last month or two:

This is entirely an important letter, but please, at least, scroll to italics and then bolded sentence.

First, breaking news from <https://gab.com/TheSharpEdge1/posts/107491674098714863>
:

TheSharpEdge @TheSharpEdge1 12.22.2021

Columbia University Study Finds VAERS Deaths from Covid Jab Undercounted BY A FACTOR OF 20.

If the current deaths reported to VAERS = 20,244

**Then the true number of deaths is more like = 404,880

TO PUT IT INTO PERSPECTIVE, THAT'S ROUGHLY THE SAME NUMBER OF PEOPLE WHO'VE DIED SUPPOSEDLY "FROM COVID" IN 2021 IN THE US, ACCORDING TO CDC AS OF DEC 10TH (405,769)

<https://www.christianitydaily.com/articles/14298/20211216/columbia-university-study-finds-vaers-deaths-undercounted-by-factor-of-20.htm>

=====

Most people are more likely to die from the clot shots than any sickness (no matter what variant is passing through)--partly due to a form of vaccine caused AIDS.

Now known as VAIDS.

Quote from a close friend who works at an assisted living facility in Pierce County:

We lost 20 elderly residents where I work, and one co-worker.

This all happened AFTER they were all "vaccinated", which was only nine months ago.

We usually only lose two to three residents an entire year

due to natural causes or diseases elderly people are susceptible to contract.

Senior NIH doctor, Matthew Memoli, told Fauci in a July 30 email that he believes "the way we are using the vaccines is wrong," adding that mandated vaccines are

"extraordinarily problematic," according to the WSJ. He runs a clinical studies unit within the National Institutes of Health's National Institute of Allergy and Infectious Diseases—headed by Dr. Anthony Fauci—and is scheduled to argue against COVID-19 vaccine mandates during a Dec. 1 seminar hosted by the agency, according to David Wendler, a senior NIH bioethicist who is planning the seminar.

Many immunologists have warned, even prior to this crisis, about trying to jab your way out

of a pandemic; specifically due to antibody dependent enhancement and creating variants.

Globally, there is a 52.3% increase in #COVID19 deaths per day associated with the start of a #COVIDvaccination program as of October 20, 2021 using the OWID dataset. Small correction made for implied deaths from ongoing cases.

Fewer than 6% of people in Africa are vaccinated.

For months, the WHO has described Africa as

"one of the least affected regions in the world" in its weekly pandemic reports.

In addition, some researchers say their tendency to spend time outdoors might be helping!

It is more than clear, just in our own country, that the VAERS numbers are off the rails--with Harvard saying only one to ten percent are typically recorded.

COVID jab deaths versus all other vaccine deaths by year since 1990 according to the CDC's VAERS database:

Inline image

Please consider for the sake of humanity, not to push forward with any mandates for something with an over 99% survival rate for the unjabbed.

Double plus jabbing only makes it progressively worse.

This is proven by world wide stats (see some, at the end, after my sign off) of more sickness and death in the highest jabbed locations.

Deaths are rising due to these faulty jabs and poor medical treatment plans at hospitals--

starting with remdesivir and ending with intubation (

<https://www.thegatewaypundit.com/2021/11/exclusive-nurse-blows-whistle-heinous-medical-malpractice-covid-patients-killed-remdevir-immediate-intubation/>).

If you get sick for any reason, please look into avoiding the above mentioned protocols and no boosters.

CDC admits that it has no record of an unvaccinated person spreading COVID after recovering from COVID.Inline image

Masks and lockdowns only hurt and do not help.

If you want to help, please share education on how to boost immunity with proven daily lifestyle actions--including natural and/or inexpensive supplement immune boosters;

like the Florida Surgeon General promoting nutraceuticals for COVID

Thank you for your time and consideration,

P. Tronson, Kitsap County resident P.S. I could send so much more,

but below is some of the information I've seen since my last letter--that I have safely clicked on:

You're 5x more likely to die from these jabs than from sickness without them:

https://media.gab.com/system/media_attachments/files/089/171/795/original/c4642cf70d321331.mp4

Here is the link to the study that was being discussed in the video:

<https://www.sciencedirect.com/science/article/pii/S221475>

The U.S. Occupational Safety and Health Administration (OSHA) has amended its injury recording rule in a way that will hide the true extent of the damage that the COVID jab mandate will have on the American workforce. According to OSHA rules, employers must record and report work-related illnesses, injuries and fatalities. This recording requirement initially also applied to adverse reactions suffered by employees who had to get the COVID shot as a requirement for employment. This rule was changed in late May 2021. OSHA will not enforce the recording requirement if the injury or fatality involves the COVID jab, even if required for employment. The nonenforcement will remain through May 2022. With this change, OSHA is covering up vaccine injuries, and hindering workers from seeking workers' compensation.

America's Frontline Doctors

WOW: Lancet study proves the shot does not prevent transmission.

"fully vaccinated individuals with breakthrough infections have peak viral load similar to unvaccinated cases and can efficiently transmit infection in household settings, including to fully vaccinated"

Why is this SO important?

The 1905 SCOTUS case Jacobson v Massachusetts held that mandates can only be considered to "prevent the spread of contagious disease."

As all studies show the shots don't stop transmission, Covid mandates are obviously illegal.

<https://www.qwant.com/?q=Lancet+study+proves+the+shot+does+not+prevent+transmission.+%E2%80%9Efully+vaccinated+individuals+with+breakthrough+infections+have+peak+viral+load+similar+to+unvaccinated+cases+and+can+efficiently+transmit+infection+in+household+settings,+including+to+fully+vaccinated%E2%80%9E>

=====

Dr. Christina Parks

New evidence is showing that the mRNA vaccines may reprogram the immune system in ways that are permissive for cancer growth. Even more worrying, this new modeling study shows that the spike protein has a high affinity for the anti-cancer proteins, p53 and BRCA 1/2. These data show that it is likely that the spike protein (produced by the vaccines) may be binding to and inactivating these tumor-suppressor genes in the body. p53 is perhaps the gene whose activity is the most important in the body for preventing cancer. Its role is to make sure that all damage to DNA has been properly repaired prior to cell division. If damage is too extensive to be repaired, it signals the cell to commit suicide. BRCA 1/2 play a similar role in breast tissue. Clearly, the inactivation of these genes will lead to cells with DNA mutations continuing to divide and prosper, one of the most important steps in the development of cancer. More research to determine if these interactions are actually taking place in the cells of people with Covid or who have been vaccinated is urgently needed. <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7324311/>

Related note from, me (the one writing this email): My dear friend, whose husband is a nurse got the jab early on, and even though the jab literature, scant as it was at the time, warned against having unprotected sex for 6 months after the jab--they did and now at 53 she has aggressive stage 4 colon cancer!

=====

WHAT DOES THIS TELL YOU?
HOW IS THIS NOT GENOCIDE?

<https://alexberenson.substack.com/p/vaccinated-english-adults-under-60>

According to weekly mortality data from the British Government-

The brown line represents weekly deaths from all causes of vaccinated people aged 10-59, per 100,000 people.

The blue line represents weekly deaths from all causes of unvaccinated people per 100,000 in the same age range.

Dear Christy,

To Whom It May Concern:

As you prepare to sit down with members of the Washington Board of Health members on January 12th, please consider the many words you have received from other concerned citizens of Washington State as well as my words. Please do not force people to be detained or forced into quarantine facilities if they choose, for their own health and safety, to not be vaccinated against COVID-19. What happened to the people having the freedom to make their own choices for their own bodies? By forcing something like this, you would be taking away the basic freedoms that our country is founded on and throw them down the drain. By doing this, you would force people like my parents who are in their upper 70's, who have already had COVID and fully recovered and now have antibodies and natural immunity, to forcibly be detained because they choose not to be vaccinated. THEY DON'T NEED TO BE VACCINATED. And neither does anyone who already has natural immunity. SO DON'T FORCE THEM. OR ANYONE.

And in the case of requiring kids to be vaccinated in order to go to school, well that's just utter and complete nonsense. Kids aren't dying right and left from COVID. Omicron is a cold. Kids get colds ALL THE TIME. With no studies in place AT ALL to show that vaccinating children is even helpful, why would you force parents to vaccinate their kids in order to go to school? It doesn't make any sense whatsoever. Let the kids be kids and not alter their DNA when there is ABSOLUTELY NOTHING to show that it will do them any good.

Again, I ask you as an American and a native Washingtonian, please do not force the people of Washington State to go against their given freedoms but allow them to make the best decisions that they can make for themselves and their families.

Thank you.

Sincerely,

Jacinta Rupprecht

Subject: DO NOT SUPPORT MANDATORY COVID-19 VACCINATIONS

External Email

Hello,

My name is Katie Walsh and I am a first grade teacher at Coulee City Elementary and a mother of 2 current elementary students and one future student. I strongly support medical autonomy and choice when it comes to people's right to choose what is best for their bodies and their children's bodies. I urge you to allow individual freedoms in this area and discourage the recommendation for COVID-19 vaccinations of children to attend school or any person for that matter to live a life of their choosing. I believe it is complete discrimination to segregate students based on their medical status. I also believe that science has now shown that vaccinated individuals can indeed contact and spread this virus and that the affects of the virus on children are minimal and do not warrant the risks of the vaccine. All of my children and I have had the virus and our natural antibodies are alive and strong to offer us and others protection.

Education has come a long way in offering a free, appropriate, public, education for students across the nation. Unfortunately, with policy around COVID-19, I have seen that fall by the wayside and this potential mandate will force families to choose between what they feel like is in their child's best interest physically versus what they know is in their child's best interests emotionally, socially, and academically. This is not a free, appropriate, public education for ALL. Families and teachers that have options WILL withdraw their students from public institutions and WILL resign over this issue.

Enrollment is already on the decrease and continues to decrease due to, what in my opinion is, poor policy around managing COVID-19. The state is already going to have to pick up a big tab due to this. I can foresee public education in WA state turning into what it is in some developing countries with the "haves" opting for private or home-school and the "have-nots" being left in the public system due to no other option. Quality Educators will leave and public schools will become institutional islands that are poorly staffed and underfunded. WE CAN DO BETTER FOR OUR STUDENTS AND FAMILIES. You are in a position of influence and I ask that you use your influence to protect the whole child and family autonomy when it comes to making decisions of well-being for their child. Protect diverse, quality, flourishing public education and protect the right to a free, appropriate, public education.

Thank you,
Katie Walsh

Please vote no on any vaccine mandate of Covid 19. We do not know the long term effects of this vaccine. We also know that children are not at risk if they catch Covid 19. We know that the vaccine does not stop the spread of the virus (PER CDC AND FAUCI) and I may suggest that if a vaccinated person with light symptoms may not realize they have Covid and may be out in society spreading it. PLEASE DO NOT ALLOW ANY MANDATE.

Subject: For Board Consideration Regarding Mandatory Injections for Children

External Email

Board Members,

I highly encourage you to consider your position very carefully with regard to requiring school aged children to obtain a COVID shot.

In order to assist you, I recommend you look at your vote from the position of whether it is legal within our system of government or an overstep of authority; whether it's appropriate to demand parents subject their children to an event that has no recourse or liability if proven inappropriate; and from a moral standpoint of whether it's appropriate to demand (without proper consideration) that a person be subjected to an injection they cannot legally argue against; and from another legal standpoint regarding whether a person can be made to give up the fundamental rights to life, liberty, and the pursuit of happiness as guaranteed in our nation's founding documents to all Americans- not just consenting adults.

My children, as minors, cannot fight a legal battle as to the treatment of their bodies. As a parent, I am charged with their well-being and for the provision of care as determined by my morals, values, and judgement. I can be held accountable for my failure.

Although you cannot be held financially liable for your vote, you do stand a distinct possibility of losing items significantly more valuable than your portfolio and wealth. You run the risk of losing your morality, your reputation, and your legacy. For many politicians, maintaining reputation and legacy are paramount.

If the morality of the situation doesn't persuade you to vote against any mandates with regard to "vaccines", let me add a little more meat to the stew that's boiling.

I will not subject my children to the injection. I will fight it. I will fight you and every position you take.

Furthermore, I have the ability to take my family to another state. If I move, you lose my economic impact on the system....and let me assure you that I have a positive impact on the revenue received in this state. I have the ability to take my military pension as well as my two six-figure income producing companies to another state. With that move, I will also take the money I spend on goods and services out of this state and someone else will reap the positive impact of my family's residency.

I will not buy Washington; I will not support Washington.

A line has been drawn.

I am not the only one who feels this way.

You can add to the exodus of this state or you can start righting the ship to get it back on a proper course.

The vote is yours.....select wisely.

Sincerely,

Kyle G. Rash

Subject: Do NOT implement COVID-19 vaccine mandates for school children!!!

External Email

To all Washington State Board of Health members -

I would like to express my EXTREME!!! opposition to you plan to implement a COVID 19 vaccine requirement for schools in Washington State. I don't care how you hide behind Gov. Inslee's mandates, or the typical, "we're just following CDC guidelines" mantra. During the past nearly two years, you have all been presented with plenty of evidence, studies, and professional testimony debunking the so-called 'science' the CDC and Dr. Fauci continually spew out. If you vote to implement your plan to force all students to be vaxed under threat of siccing law enforcement on the families of those who refuse, you will have chosen to ignore irrefutable evidence, you will become morally bankrupt and you will never be forgiven for your purposeful potential harming of children.

The following three points are AMPLE reasons to never mandate Covid-19 experimental vaccines to children:

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.
2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.
3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully under powered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

Respectfully, only if you withdraw your plans to mandate Covid-19 vaccines for school children -

To whom it may concern.

This is very concerning to me! Forcing medical care, isolation, or treatment is totally unnecessary as COVID is getting less & less dangerous. As it mutates it is becoming more contagious but is causing less severe illness.

Because the majority of the population is vaccinated, along with natural immunity of those who have had the illness, herd immunity is happening now which will keep the illness under control.

The action of mandating a vaccine to the least impacted age group is unconscionable! There are side effects from these shots, making them much more dangerous than if the child were to contract the virus. There are also many unknown long-term effects, including possible sterilization.

This action would cripple the already failing public schools. So many parents are already about to Home School their kids and this will force this action upon them.

You cannot say you want to do this to protect the children when you speak of mandating the vaccine for a virus that is becoming more like the flu every day and impacts kids 0-19 years old the least. Follow the data!!!

Both of these proposed mandates are terrible and unnecessary and would take away more of American's constitutional rights and God-given freedoms!!

Pure and simple -- it is UNCONSTITUTIONAL and will not hold up in court.

My question is why? It does not look good for you because it looks to me like you want more control. Enough is enough. Quit playing "politics" and get back to real work.

To Washington State Board of Health Members,
Regarding the Rules Hearing on January 12, 2022 on Communicable and Other Certain Diseases, I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals.

Regarding the Rulemaking Petition on January 12, 2022 for Chapter 246-105 WAC, Immunization Criteria, Child Care and School Entry, I support the initiative to prohibit (for school attendance) any Emergency Use Authorized products, or licensed products that lack completed Phase 3 trial studies.
Thank you for your time.

Thank you for your time.

Dear WSBOH,

Hello, I do not approve of the mandatory Covid Vaccinations for childcare and school admission.

Hoping you will refuse this type of action for the following reasons:

Covid vaccination is still under emergency use authorization, children under the age of 18 have a 99.995% of survival rate, and they have a higher chance of death or adverse reaction to covid vaccine than covid-19 itself.

Thank you for your time and consideration, it's VERY appreciated! We CAN make the right decisions☐

Subject: Endorsement of COVID Vaccine Mandate for Children Attending Public School

External Email

Hello - I live in Clark County, WA, and my 15-year-old and 9 year old are currently attending a public elementary and high school. My kids are fully vaccinated.

I wholeheartedly endorse a COVID vaccine mandate for all eligible children attending public schools. Vaccines have been scientifically proven effective in stopping the spread of COVID, as well as reducing the severity of the illness.

Moreover, CHILDREN ARE ALREADY REQUIRED TO PROVIDE EVIDENCE OF MULTIPLE VACCINATIONS BEFORE THEY ARE PERMITTED TO ATTEND PUBLIC SCHOOLS. I do not understand why this potential vaccine mandate would be viewed any differently than existing vaccine mandates.

Please do not kowtow to a vocal minority speaking out against such a mandate. Do the right thing for our children based on scientific evidence and medical precedents.

Thank you,

Karen Clark

My son goes to school in Seattle and I live in Colorado. I 100% do not agree with a vaccine mandate for k-12. I also have a ex wife that has and will break court orders and follow this. That is a decision that will be stripped away from me and my ability to make more life long decisions for my son. My sons Healthcare, school, religion, health etc are already in the courts to help this defenseless child and this would out weigh everyone of those decisions. Again I am 100% against this mandate and letting you know these decisions reach further and carry greater depth and weight than any of us can comprehend. It's bad enough when a parent Is parental alienating a child to the point of major health conditions and behavior issues that the other parent has to live in poverty to fight to help his son. Now the government is trying to do even worse to the child that can not be undone.

Such laws go against personal freedoms granted by the United States Constitution. All mandates passed thus far the state of Washington have been proven ineffective. We are told to mask up and we'll prevent spread then report numbers that oppose what you claim. The exact same thing has occurred with the vaccines. The vaccinated can spread Covid-19 (all variances!), the CDC has provided evidence proving this claim. If the vaccine does NOT stop the spread and does NOT prevent becoming infected then why are you trying to vaccinate our children with a drug that lacks a longitudinal study. You do NOT know the long term side effects that will appear years from now. I do not support the WAC or what it stands for. I am ashamed of Washington officials that are trying to pass this.

Sincerely,
Melissa Fleck

To whom it may concern,

As a mother of two children under seven years old, I am very concerned about a possible vaccine mandate for our children. There is simply no long term research on this vaccine and it's been given emergency use only. Our children are at a greater risk of having a vaccine injury than they are being hospitalized from Covid. As a mother, it should be my right to chose which vaccines are best for my children. If a covid mandate for children passes we will make the choice to move out of state. We will not allow our tax dollars to support such a ludicrous mandate.

This is not about health when both vaccinated and unvaccinated can transmit the virus and still enforcing everyone to take this vaccine. We have seen nations with high vaccination rate still have high number of covid cases. What does that explains? There is no scientific reason for this mandate at all.

Sincerely,
Lois Lau

To the board of health and its members,

I write to you today as a health care professional with more than 30 years experience. I have been a certified immunizer in the state of Washington for more than 20 years and have administered thousands of vaccines in my career. I am certainly not an "antivaxer". I am however very concerned with the direction that the state has leaned to with COVID-19 vaccines.

It has now been two years since the COVID-19 pandemic began and we have learned so much about its affect on children. The CDC states "most children with COVID-19 have mild symptoms or they may have no symptoms at all ("asymptomatic"). Fewer children have been sick with COVID-19 compared to adults." This statement does not begin to adequately distinguish the difference between childhood infection with SARS-COV-2 and older generations sickened by COVID-19. The population of Americans age 0 to 17 stands at approximately 73 million. Using updated CDC statistics for January 6th 2021 adolescents, including 18 year olds, have now seen a total of 823 COVID-19 deaths. This means that the approximate 25% of Americans in the age group 0-18 have accounted for a staggeringly low 0.1% of all COVID-19 deaths. Of these unfortunate fatalities a great number occurred secondarily to very serious preexisting conditions such as cancer, severe asthma, morbid obesity, and developmental disorders.

It is very reasonable to believe that vaccines may have a positive effect on those children who are at most risk for the negative affects of COVID-19 disease. This should not be automatically applied to others within that cohort who do not face the same risk as those already severely ill. It seems much more sensible to this professional to be teaching parents and children how important proper diet, exercise, and an overall healthy lifestyle can be to one if they do indeed come into contact with SARS-COV-2.

There is much we can learn about fighting the disease by understanding some of the things that the vaccine cannot provide.

The vaccine can not prevent obesity or inform Washingtonians of the importance of dietary inclusion of fruits and vegetables; eat a good diet! The vaccine can not provide the needed vitamin D that only 30 minutes of sun exposure a day can give to individuals; go outside! The vaccine can not exhort the benefit of daily exercise in increasing lung capacity and reducing inflammation, something particularly important in people with asthma; be active! These points are particularly lost to those most socially disadvantaged among us, buried under all the conversation given over to vaccinations.

We have learned much about the potential for harm that can come from the COVID-19 vaccines. It is incredibly difficult for me to understand how we as a society have disallowed the free flow of information regarding potentially dangerous effects of these vaccines. This is telling! When I was an intern pharmacist at the University of

Washington, a prestigious research university, my preceptor was an investigational drug service director at a major northwest hospital. We had long discussions regarding medications you yourselves may be familiar with; seldane, bextra, vioxx, rezulin etc. I still have a copy of the book "bitter pills" presented to me by this professor. As health care professionals we learn to be sceptical of terms like "new and improved" or "guaranteed to work" Shouldn't we be allowed to be sceptical of these vaccinations who's catch phrases might as well be "never been tried" or "YOLO". We need to extend the freedom to scrutinize these vaccinations and preserve the lay publics right to discretion. We should not force the vaccine by coercion or threats of societal segregation onto those unwilling to voluntarily take the jab.

I mentioned that I have given thousands of immunizations in my career. My children have received all of there prescribed childhood shots. Those vaccines have been well studied for their safety and for the most part are "sterilizing" in nature. This meaning that the body's immune response prevents the disease from occurring and spreading. COVID-19 vaccines are what virologists term "leaky". That is, they act more as a therapeutic and do not stop the transmission of disease. Leaky vaccines are thought to promote viral variants through immune escape. This is one proposed reason for the development of the delta variant.

The administration of COVID-19 vaccines to younger persons also introduces the concept of antigenic sin. The body's immune system becomes less and less affective fighting against variants. The innate immune response is also negatively affected after receiving COVID-19 vaccines. It is still unclear as to the long term potential for antibody dependent enhancement (ADE) resulting from the use of coronavirus vaccines. It is certainly postulated that this is a potential cause for severe reactions to COVID-19 vaccines.

These vaccines are intended to provide the body with a means to recognize the spike protein of the virus by causing the body to self produce the spike. We now know that the spike is itself a toxic part of the virus. Free ranging spike proteins in the body are now considered very suspect in producing the vascular inflammatory responses affecting the heart and brain. Why would we give that to any child who is at very little risk of longstanding or fatal injury from contact with SARS-COV-2? It doesn't make sense!

A few prominent examples of vaccine side effects have filtered through the digital and mainstream media blockade on information. I am certain that most vaccine hesitant parents of young males understated that a real threat exists to the cardiac health of these children. Similar hesitancy arises among parents of young females in regards to affects on menstrual cycles and reproductive viability. I dont think the board can point to a single long term study that rules out potential effects that may disastrously harm our youngest generation.

Research shows that the disease has vectors other than humans. The CDC website states that SARS-CoV-2, "likely originated in bats". Mink, ferrets, cats, dogs, and primates have all been shown to carry SARS-COV-2. Studies of deer in Ohio last year showed that 36% tested were found to be positive for the Covid-19 coronavirus. It is now postulated that the current omicron variant originated from mice. The virus is everywhere! It is endemic and we must admit we will never vaccinate ourselves to the point of zero covid. We should certainly not be taking chances with our future generations on unproven vaccines. Mandates will not halt the transmission of the virus and will not provide a benefit that outweighs the risk to our youngest Citizens. If this board approves these mandates and enforcement provisions children will be harmed and families will suffer. This would be a misguided adventure you will forever have on your hands and in your head. Thanks.

Subject: Forced Quarantine of WA State Citizens.

External Email

WA State Board of Health Members

I am writing you because I am very concerned about the Jan 12th meeting to discuss imposing Vaccine Mandates and the use of law enforcement to force involuntary isolation of WA State Citizens in state quarantine facilities

Vaccine Mandates are unconstitutional, immoral and should never be imposed on a free people. The Vaccinated are just as likely to be infected with and transmit Covid as The Unvaccinated. The vaccine has not prevented the spread of Covid, which has a 99.9% survival rate. Additionally we know that the Omricon variant is much milder than either the original strain of Covid or the Delta variant, and as such, does not require draconian measures. These measures should never be imposed on our children as they are even less likely to die from Covid than adults.

Vaccine Mandates are not about health, they are about controlling the people.

We all shake our heads and say "Never Again" in reference to the Japanese Internment on Bainbridge Island during WW2. We wonder how such a horrible thing could have happened in our own community.

We declare "Never Again" in regards to the killing fields in Cambodia, the slaughter of innocents in Rwanda, and the concentration camps in the Holocaust.

Yet here we are.... It is happening again.... We are segregating people into groups, and dividing them for political reasons. This time we are using terms like Vaxed and Unvaxed. But make no mistake, the steps you are considering are similar to those that have been enacted before. Dehumanizing and segregating people is never acceptable. Forcing injections on an unwilling citizenry is a direct violation of the Nuremberg code.

Be the people that learn from history, not the people that repeat it!

This is your opportunity to prevent another injustice on the people of Washington State

Vote NO to forced involuntary detention and vaccine mandates.

Marcia Rubenstein
Silverdale, WA

Subject: Forced Vaccination & Quarantine in WA?? PLEASE Do No Harm!

External Email

Dear Caitlin:

I understand that WA Board of Health will be discussing Covid-19 shot mandates for schools and recommendations for forcible quarantine and/or detention of those that disagree with policies. As a parent who has raised and nurtured my children in this State, I request that you abandon the plan of forming a technical advisory group to explore COVID19 mandates and adopt a new rule of requiring products to have completed Phase 3 clinical trials before they can be added to a list of school requirements.

For almost 2 years we have attempted to follow the health recommendations of washing, masking, distancing, testing, isolating and vaccinating. By now it is apparent that the virus is going to continue regardless of measures attempted. Thankfully, SARS CoV2 is acting in similar manner as all other viral pandemics and becoming more "virulent" (spreads easier) but less deadly. Real immunity is achieved with exposure and recovery as is evidenced by the fact that those infected with SARS in 2002/3 cannot become infected with SARS CoV2 today! In contrast, Covid19 has managed to find a way to escape the vaccine as is evidenced by the incredibly high numbers of vaccinated and even boosted individuals getting sick and testing positive. Surely this fact has not escaped your knowledge!

As Health Board members, you are obligated to provide us with facts that support any and all recommendations or requirements.

- 1) What is the current rate of mortality for COVID19 infection and stratified according to age groups?
- 2) Point to ANY measures that have reduced the numbers of fatalities (cases are not fatalities).
- 3) What is the rate of all COVID 19 caused mortality in WA in 2020 and 2021?.....did the measures imposed reduce the number of deaths from prior year?

- 4) Provide me evidence of asymptomatic spread of SARS CoV2.
- 5) Provide me safety studies for masking children and randomized clinical trials for masks preventing spread of lab-confirmed upper respiratory viruses (not modeling of masks on mannequins).
- 6) Make public the accuracy of testing - what is the rate of false positives and false negatives of tests and were results determined by manufacturers of the tests or unbiased 3rd party investigators?
- 7) Provide evidence that the vaccines prevent infection and transmission and that they improve the health of individuals who receive them compared to those who do not.
- 8) Explain why there is so much focus on eliminating this 1 virus when human immune systems have successfully protected our growing population since the beginning of time?

I believe that as members of the WA State Health Board you truly desire to improve the health of Washingtonians. However, I do not trust that you have carefully investigated and logically determined adequate and measurable health remedies for which you are able to provide evidence. Before doubling down on measures that will HARM more than they HELP the overall health of citizens, please determine and make public the evidence to justify any policies.

Regarding mandating shots, know that the clinical trials will not be completed until 2023. Know that WA State has a legal definition of a vaccine that the C19 shots do not fulfill as they were never part of a living microorganism nor do they prevent transmission or infection of disease.

"Vaccine" means a preparation of killed or attenuated living microorganisms, or fraction thereof, that upon administration stimulates immunity that protects against disease and is approved by the federal food and drug administration as safe and effective

<https://app.leg.wa.gov/RCW/default.aspx?cite=70.290.010>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx?cite=70.290.010>

Furthermore, how necessary or even safe is it to give a vaccine to a person who already has immunity to the pathogen? Most children by now have been exposed to the virus and have developed immunity without difficulty. Why consider a mandate for those not at high risk for adverse outcome should they become infected but who carry unknown risks of adverse reaction with getting the shot?

I look forward to hearing these concerns addressed and evidence for any and all recommendations to be presented when I tune into your meeting on January 12.

Thank you.

Subject: Discussion concerning WAC 246-100

External Email

To Whom it may concern:

It is my understanding that you are considering using law enforcement to enforce government mandates for citizen behaviors concerning Covid-19.

The CDC itself has been wrong numerous times in its Covid-19 guidance. Here are aspects of its guidance that have changed and been widely viewed by experts as false:

CDC guidance for Covid-19 quarantine recommendations have changed (Now it's 5 days instead of 14 <https://www.wpr.org/new-cdc-quarantine-guidance-will-let-kids-staff-return-school-after-5-days-wisconsin-parents-say>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.wpr.org%2Fnew-cdc-quarantine-guidance-will-let-kids-staff-return-school-after-5-days-wisconsin-parents-say&data=04%7C01%7CWSboh%40sboh.wa.gov%7C2d7655464e214283769108d9d234264b%7C11d0e21> .)

How many shots and when a person should get them (What happened to 94.5% effectiveness against getting Covid-19? <https://time.com/5912491/moderna-covid-19-vaccine-effectiveness/>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ftime.com%2F5912491%2Fmoderna-covid-19-vaccine-effectiveness%2F&data=04%7C01%7CWSboh%40sboh.wa.gov%7C2d7655464e214283769108d9d234264>) Now we are told that we may need to get Covid booster shots every three months?

Which test is accurate? (Apparently not the PCR test which we were all told was the "gold standard" https://www.cdc.gov/csels/dls/locs/2021/07-21-2021-lab-alert-Changes_CDC_RT-PCR_SARS-CoV-2_Testing_1.html
<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fcsels%2Fdls%2F21-2021-lab-alert-Changes_CDC_RT-PCR_SARS-CoV-2_Testing_1.html&data=04%7C01%7CWSboh%40sboh.wa.gov%7C2d7655464e214283769108d9d234264 , and <https://tamhunt.medium.com/how-accurate-are-coronavirus-tests-data-quality-issues-and-the-coronavirus-pandemic-part-ii-ebc3c6544b04>
<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ftamhunt.medium.com%2Fhow-accurate-are-coronavirus-tests-data-quality-issues-and-the-coronavirus-pandemic-part-ii-ebc3c6544b04&data=04%7C01%7CWSboh%40sboh.wa.gov%7C2d7655464e214283769108d9d234264b%](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ftamhunt.medium.com%2Fhow-accurate-are-coronavirus-tests-data-quality-issues-and-the-coronavirus-pandemic-part-ii-ebc3c6544b04&data=04%7C01%7CWSboh%40sboh.wa.gov%7C2d7655464e214283769108d9d234264b%7C11d0e21))

Now many experts are saying the currently most common Covid-19 variant Omicron appears to present generally as little more than a typical cold.

Given all of the above, how can any government mandates on Covid-19 testing, vaccinations or quarantines be considered in any way responsible, especially considering how many lives and livelihoods these restrictions have destroyed?

Finally, we are sadly in a season of rising crime in our community. Police enforcement of the laws that govern civil society is a scarce commodity. Would you rather the police stop and detain the perpetrator of an armed robbery of a loved one's home, or force someone

who has decided, with the guidance of their trusted professional medical advisor, not to get the fourth or fifth booster shot?

I am strongly opposed to using our valuable police force to enforce any government mandates on testing, vaccinations, or quarantining for Covid-19.

Sincerely,
Jill D. Goodman
Tacoma WA

Subject: Do What is Right

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

I'd strongly urge the members of the board in control of such an important decision to form their consensus based of the facts, logic and reasoning while using honesty, fairness from an unbiased perspective to guide those decisions.

With great power comes great responsibility; Which is why it is crucial the members of the board make the right decision for the people and our children.

I understand that everyone has a different set of morals and values that guide how we each make our own decisions. Which is why it's important for you to really dive deep and ask yourself who you really are and determine if you are proud of who you are and what you as an individual are support and represent.

No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' Children's Health Defense (childrenshealthdefense.org)
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>>
) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical

records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Rubin, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>).

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Dear Board of Health Members,

Thank you for your service to the citizens of WA.

I am writing to ask you to NOT implement ANY policies that utilize tyrannical actions (involuntary quarantines, testing, treatment, counseling, and vaccinations) in what will be a failed attempt to "contain" Covid19. This virus will never be contained, it is a part of our ecosystem now. The only real defenses against it are REDUCING CO-MORBIDITIES and allowing ROBUST THERAPEUTIC TREATMENT DEVELOPMENT. Have you as a board, recommended spending any public service resources on telling people to live a healthy lifestyle as the best defense??? If people are healthy, IT IS CLEAR THEY ARE AT A MASSIVELY REDUCED RISK OF LONG TERM EFFECTS FROM THIS DISEASE.

We also know that the vaccines are ONLY GOOD FOR SHORT TERM PERSONAL PROTECTION from significant symptoms, but do not stop transmission or infection. My taking a vaccine DOES NOT save anybody else from Covid19, so forcing vaccines on people becomes nothing more than a form of medical authoritarianism, not health care. If WA's health care systems are stressed due to COVID patients, it is ONLY because hundreds of qualified health care professionals were unnecessarily terminated from their jobs (many with natural immunity), and due to that there are not enough people to provide care.

Please DO NOT implement any actions that will only hurt/divide/anger your fellow citizens and DO NOTHING to reduce the spread of this disease. HAVE COURAGE AND PLEASE TAKE A STAND AGAINST TYRANNY.

Name added here

"Dear Board Members,

Let me begin, by asking you to please have a moment of silence for my friend, Hospice Care worker Shannon Morgan, who was fully vaccinated, as per WA State mandates, who died, right after Christmas, of Guilliane Barr disease, a known, and documented complication of the Covid-19 Vaccine. The medical professionals suspected it was the vaccine that caused her death, and onset of Guilliane Barr, and blood clot in her heart. She was a ray of sunshine, and helped people until they took their last breath, but what her reward was, was an untimely, premature death.

We can prevent this from happening to other families.

Please suspend your intent for your rule making petition on WAC 245-100.

Your chapter 246 - 100 and rule making petition for 246 -105 tries to confuse, coerce, intimidate, threaten and harass citizens , and is ultimately an inappropriate use of your power.. The end game here is retaliation to those who don't comply, and it creates discrimination.

We have the right to determine what is the best for our families and what is done with our body, what is put into our bodies, and it doesn't matter whether the vaccine only has an "emergency authorization" or not.

The masks and the testing are also "emergency use authorization" but even if they weren't, we simply should not be forced by such laws.. Only a licensed medical doctor can suggest a medical treatment such as a mask, covid testing or a vaccine.

We have the constitutionally-protected and GUARANTEED right to life and the right to determine what it's done to our body. You forcing a needle into a person's body is NO different than an unwanted penis, being forced upon a person. It is unauthorized penetration. PLEASE for the love of life, do not do this to your citizens. It should remain a choice.

You are attempting to take the position of a medical professional.

Whereas:

1. The Nuremberg Code, codified into US Federal Law, prohibits forcing or coercing anyone, under any circumstances, to participate in a medical experiment; and the Code states "the voluntary consent of the human subject is absolutely essential."
2. Phase 3 clinical trials of COVID-19 vaccines are not yet completed. C4591007—the main clinical trial in children and young adults with BNT162b2—has an estimated completion date of May 5, 2026 and hence qualify as medical experiments. People taking these treatments are enrolled in clinical trials.
3. The vaccine formulation now being given to U.S. children aged 5-11 is NOT the same

formulation used in the clinical trials, and NOT the same formulation that has been administered to all other age groups under EUA. So even when current ongoing clinical trials are complete, the results cannot be assumed to be relevant to the safety or effectiveness of the new formulation.

"The vaccine that is authorized for use in children 5 through 11 years of age includes the same mRNA and lipids but different inactive ingredients compared to the vaccine that has been used under EUA in individuals 12 years of age and older and that has been studied in clinical trials." Source: <https://www.fda.gov/media/153717/download>

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ffacebook.com%2F.php%3Fu%3t6jJxTefJd4DAQ_BhqdyatdGbh-aw5IhOrfJCC3fk3CxfYrV4fMxiY%26__tn__%3D-UK-R%26c%5B0%5D%3DAT31BIT8sqKAoGp_dLcR-HHqMyxAWQM_jgBuPGhk3UWCWQ_naRIIAX-Ia2XpROslwj12h3Xm9q_wnu6v1993W2Te4HXgwR6KHFhHH2QQtd6pD8VCsipeoc8GqDRGrMQSJ61ybBuw2mz

4. Most vaccines are trialed for at least 5-10 years and COVID-19 vaccines have been in trials for less than one year.

5. No previously attempted coronavirus vaccines (ie. MERS, SARS-1) has been approved for market, due to antibody-dependent enhancement resulting in severe illness and deaths in animal models. The participants in clinical trials involving children aged 5-11 received "two doses of 10 µg BNT162b2 or placebo (saline)", not the new formulation.

Source: <https://www.fda.gov/media/153447/download>

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ffacebook.com%2F.php%3Fu%3m3F2ISjXTP_8R2bXYtThuMpPgg2bVOG5O-%26__tn__%3D-UK-R%26c%5B0%5D%3DAT31BIT8sqKAoGp_dLcR-HHqMyxAWQM_jgBuPGhk3UWCWQ_naRIIAX-Ia2XpROslwj12h3Xm9q_wnu6v1993W2Te4HXgwR6KHFhHH2QQtd6pD8VCsipeoc8GqDRGrMQSJ61ybBuw2mz

R%26c%5B0%5D%3DAT31BIT8sqKAoGp_dLcR-HHqMyxAWQM_jgBuPGhk3UWCWQ_naRIIAX-Ia2XpROslwj12h3Xm9q_wnu6v1993W2Te4HXgwR6KHFhHH2QQtd6pD8VCsipeoc8GqDRGrMQSJ61ybBuw2mz

6. Numerous doctors, scientists and medical experts are issuing dire warnings about the short and long-term effects of COVID-19 vaccines, including but not limited to death, infertility, miscarriages, Bell's palsy, blood clots, Gulliane Barr, clotting problems,

cancer, inflammatory conditions, autoimmune disease, early-onset dementia, convulsions, anaphylaxis, myocarditis, and antibody dependent enhancement leading to death.

7. Children and youth are at virtually no risk of dying from COVID-19 or transmitting it to others, but deaths and injuries to children and youth have already occurred in the COVID-19 injection clinical trials.

8. FDA admits long term safety is unknown. Children are being used as test subjects, with their parents acquiescing under fraudulent and media marketing pressure.

Public Health messaging does not match the reality of the current knowledge base.

At the October 26 VRBPAC meeting, FDA Advisor Dr. Eric Rubin admitted: ". . .but we're never going to learn about how safe this vaccine is unless we start giving it."

9. International Alliance of Physicians and Medical Scientists has declared that children should be excluded from vaccine mandates:

"Consensus is clear among MDs and medical PhDs: following 20 months of exhaustive research, millions of patients treated, hundreds of clinical trials performed and scientific

data shared worldwide, they conclude that healthy children and the COVID-recovered should be excluded from restrictions and vaccine mandates."

Source: <https://globalcovidsummit.org/.../thousands-of-physicians...>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fglobalcovidsummit.org%2Fnews%2Fof-physicians-and-scientists-reach-consensus-on-vaccinating-children-and-natural-immunity%3Ffbclid%3DIwAR1ENkG6HThkPtcftSkEQKIZDjotnBu-pPfcJO4hDFCEkWpcGigz7sQrgek&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C4f477f3116f04ac349df0>>

10. There have been more deaths from COVID-19 vaccines, as reported to the Vaccine Adverse Events Reporting

System (VAERS), than deaths in the last 10 years from all vaccines combined and only 1% -10% of vaccine injuries are reported to VAERS. The full extent of adverse events from the COVID

vaccines is unknown as there is a significant delay in uploading reports to the VAERS database.

The risk associated with COVID-19 vaccinations is extremely dangerous to the health and well-being of all children

and this form of treatment is unnecessary.

Any coercion or pressure tactics used for students to be vaccinated contravenes the Nuremberg Code, the Helsinki Declaration and Federal Law.

Any use of "implied consent" by any minor child under the age of 18 is defined in law as gross, contributory, and culpable criminal negligence.

Any party found to be involved in vaccination coercion when entrusted with the care of our children such as all school staff, school board members and executive, and any other adults who may have access to our children while under their care. This includes the assistance of outside school staff, contractors, public health nurses, or health officials could be prosecuted to full extent of law and you may be held personally and criminally liable for any injuries or deaths

that may occur.

We are forced to err on the side of spiritual caution and refuse to harm our temples in honor of Gods Holy Word.

The 1st Amendment of the constitution has protected these exact claims before the Supreme Court on many occasions. Even State governments have faced this glaring truth during the Covid crisis as

they attempted to pass mandates and laws that violated this basic principle only to have their wrong decisions righted before the Courts, with financial penalties.

We, as citizens, strive to be at peace with all men and to obey all laws and mandates from a legitimately elected government.

Please do not pass this rule making activity. Shannon having a choice, may have saved her life. Instead, mandates ensured her death.

Respectfully

--

To: Haag, Hannah R (SBOH) <Hannah.Haag@sboh.wa.gov>
Subject: Forced Vaccination & Quarantine in WA?? PLEASE Do No Harm!

External Email

Dear Hannah:

I understand that WA Board of Health will be discussing Covid-19 shot mandates for schools and recommendations for forcible quarantine and/or detention of those that disagree with policies. As a parent who has raised and nurtured my children in this State, I request that you abandon the plan of forming a technical advisory group to explore COVID19 mandates and adopt a new rule of requiring products to have completed Phase 3 clinical trials before they can be added to a list of school requirements.

For almost 2 years we have attempted to follow the health recommendations of washing, masking, distancing, testing, isolating and vaccinating. By now it is apparent that the virus is going to continue regardless of measures attempted. Thankfully, SARS CoV2 is acting in similar manner as all other viral pandemics and becoming more "virulent" (spreads easier) but less deadly. Real immunity is achieved with exposure and recovery as is evidenced by the fact that those infected with SARS in 2002/3 cannot become infected with SARS CoV2 today! In contrast, Covid19 has managed to find a way to escape the vaccine as is evidenced by the incredibly high numbers of vaccinated and even boosted individuals getting sick and testing positive. Surely this fact has not escaped your knowledge!

As Health Board members, you are obligated to provide us with facts that support any and all recommendations or requirements.

- 1) What is the current rate of mortality for COVID19 infection and stratified according to age groups?
- 2) Point to ANY measures that have reduced the numbers of fatalities (cases are not fatalities).
- 3) What is the rate of all COVID 19 caused mortality in WA in 2020 and 2021?.....did the measures imposed reduce the number of deaths from prior year?
- 4) Provide me evidence of asymptomatic spread of SARS CoV2.

5) Provide me safety studies for masking children and randomized clinical trials for masks preventing spread of lab-confirmed upper respiratory viruses (not modeling of masks on mannequins).

6) Make public the accuracy of testing - what is the rate of false positives and false negatives of tests and were results determined by manufacturers of the tests or unbiased 3rd party investigators?

7) Provide evidence that the vaccines prevent infection and transmission and that they improve the health of individuals who receive them compared to those who do not.

8) Explain why there is so much focus on eliminating this 1 virus when human immune systems have successfully protected our growing population since the beginning of time?

I believe that as members of the WA State Health Board you truly desire to improve the health of Washingtonians. However, I do not trust that you have carefully investigated and logically determined adequate and measurable health remedies for which you are able to provide evidence. Before doubling down on measures that will HARM more than they HELP the overall health of citizens, please determine and make public the evidence to justify any policies.

Regarding mandating shots, know that the clinical trials will not be completed until 2023. Know that WA State has a legal definition of a vaccine that the C19 shots do not fulfill as they were never part of a living microorganism nor do they prevent transmission or infection of disease.

"Vaccine" means a preparation of killed or attenuated living microorganisms, or fraction thereof, that upon administration stimulates immunity that protects against disease and is approved by the federal food and drug administration as safe and effective

<https://app.leg.wa.gov/RCW/default.aspx?cite=70.290.010>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx?cite=70.290.010>

Furthermore, how necessary or even safe is it to give a vaccine to a person who already has immunity to the pathogen? Most children by now have been exposed to the virus and have developed immunity without difficulty. Why consider a mandate for those not at high risk for adverse outcome should they become infected but who carry unknown risks of adverse reaction with getting the shot?

I look forward to hearing these concerns addressed and evidence for any and all recommendations to be presented when I tune into your meeting on January 12.

Thank you.

First, thank you for the work you do in the arena of public health.

I was informed this morning that these policies - WAC 246-100 would be discussed and voted on January 12th. I was hoping this is misinformation but I see it on your agenda.

The emergency in our country currently is government overreach. Ask people who have lost jobs and/or businesses what the problem has been the past 1 1/2 years.

Everyone can see that vaccinated people are still getting covid. So how does mandating vaccines and forcing quarantines help? The place I used to work, the Spokane Symphony mandated vaccines and people are still getting covid. So they are obviously not protected.

In a free country such as the USA there obviously must be a balance between laws & individual freedom or we will be no different than a communist nation where personal freedoms are sacrificed or a country in chaos where there is no order.

To choose to over mandate will be to invite lawsuits as constitutional guarantees of freedom are broken.

Please do not lead our state in a manner that is unconstitutional.

Respectfully,
Jeri Bentley

Dear sirs,

As a vaccinated citizen of Wa. St. I strongly oppose the WAC246-100 rule that will expand any authority to involuntarily quarantine our citizens because they choose for their own medical or religious reasons , not to receive a vaccine. This action by Wa. St. borders on FASCISM. This is criminal and our citizens and children deserve better, we have no idea what the long term effects of this experimental Covid vaccine will have on us. It's Our Body Our Choice! This Covid vaccine Should not be required for our small children to go to school.

External Email

Hello,

My name is Katie Walsh and I am a first grade teacher at Coulee City Elementary and a mother of 2 current elementary students and one future student. I strongly support medical autonomy and choice when it comes to people's right to choose what is best for their bodies and their children's bodies. I urge you to allow individual freedoms in this area and discourage the recommendation for COVID-19 vaccinations of children to attend school or any person for that matter to live a life of their choosing. I believe it is complete discrimination to segregate students based on their medical status. I also believe that science has now shown that vaccinated individuals can indeed contact and spread this virus and that the affects of the virus on children are minimal and do not warrant the risks of the vaccine. All of my children and I have had the virus and our natural antibodies are alive and strong to offer us and others protection.

Education has come a long way in offering a free, appropriate, public, education for students across the nation. Unfortunately, with policy around COVID-19, I have seen that fall by the wayside and this potential mandate will force families to choose between what they feel like is in their child's best interest physically versus what they know is in their child's best interests emotionally, socially, and academically. This is not a free, appropriate, public education for ALL. Families and teachers that have options WILL withdraw their students from public institutions and WILL resign over this issue. Enrollment is already on the decrease and continues to decrease due to, what in my opinion is, poor policy around managing COVID-19. The state is already going to have to pick up a big tab due to this. I can foresee public education in WA state turning into what it is in some developing countries with the "haves" opting for private or home-school and the "have-nots" being left in the public system due to no other option. Quality Educators will leave and public schools will become institutional islands that are poorly staffed and underfunded. WE CAN DO BETTER FOR OUR STUDENTS AND FAMILIES. You are in a position of influence and I ask that you use your influence to protect the whole child and family autonomy when it comes to making decisions of well-being for their child. Protect diverse, quality, flourishing public education and protect the right to a free, appropriate, public education.

Thank you,

Katie Walsh

Dear WSBOH,

Hello, I do not approve of the mandatory Covid Vaccinations for childcare and school admission.

Hoping you will refuse this type of action for the following reasons:

Covid vaccination is still under emergency use authorization, children under the age of 18 have a 99.995% of survival rate, and they have a higher chance of death or adverse reaction to covid vaccine than covid-19 itself.

Thank you for your time and consideration, it's VERY appreciated! We CAN make the right decisions☐

Subject: Forum re:vaccine mandates - say no to forced mandates

External Email

To all forum participants,

Please reconsider your efforts to force mandates on the citizens of WA state.

1) Regarding our children: Throughout history caring adults have consistently sacrificed their own safety to protect children - your desire to enforce the COVID shot on children is a complete contradiction to all known history. The protection of our children has always been paramount! Save the children ~ this forced mandate will result in some of our children having terrible health consequences from these inadequately tested drugs and/or parents removing their children from public schools.

2) Forced Mandating of every citizen of Washington state is in direct violation of the Nuremberg code:

"The voluntary consent of the human subject is absolutely essential.

This means that the person involved should have legal capacity to give consent; should be

so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, over-reaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved, as to enable him to make an understanding and enlightened decision. This latter element requires that, before the acceptance of an affirmative decision by the experimental subject, there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person, which may possibly come from his participation..."

Regards,
Karen Hawkins

Dear Christy,

It has been brought to my attention that this board seeks to find a way to force children in Washington State to receive the experimental, emergency-use authorized mRNA vaccine in order to attend public school.

I am a paraeducator for the Lake Washington District. I have a degree in Nutrition and Food Science. I have 5 children. If this plan is implemented, I will quit my position and take my children from this district and return to home education, like so many other good, caring parents are doing now.

I'm sad to think that you aren't aware of the outcry in this state toward the governor's tyranny and his plans to bring force to bear along with quarantine camps.... This does not benefit America or honor our constitution, and I'm ashamed at the very suggestion of such segregation and discrimination.

Realize the fight is bigger than you know. You are joining the governor in destroying our economy, our well-being, and our way of life. Please reconsider your trajectory.

Sincerely,

I understand you are considering using law enforcement to detain citizens who are not vaccinated.

This is wrong on so many levels.

1. Not constitutional
2. Flies in the face of logic and known science regarding viruses. People who have had the disease have natural immunity.
3. The death rate is about the same as the flu yet no one is forced to get the flu vaccine.
4. There are serious side effects and children should not be subjected to these terrible side affects.

You must be power mad.

Board,

I am appalled at what you are trying to do to our state by trying to enact a way to force people to vaccinate against their free will and use the law to do the dirty work.

This is against the Neuremberg Code, the Constitution of the United States, The constitution of the State of Washington and not to mention just the basic principles of freedom.

It would behouve you to read all of the above again from the beginning and ALL the way through to the end. Not to mention documentaries about Hitler, as you are using exactly the same tactics he did which led to the Neuremburg code and prosecuting the people involved for Crimes against humanity.

You might want to take a little time to watch HITLER: A Career - the comparisons to what happened then and what you are trying to do and what is happening now are undeniable.

Here are the links to the Neuremberg Code, U.S Constitution and WA State Constitution.

<https://constitutioncenter.org/media/files/constitution.pdf>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fconstitutioncenter.org%2Fmedia%2Fconstitutioncenter.org%2Fmedia/files/constitution.pdf>>

<https://leg.wa.gov/CodeReviser/Documents/WAConstitution.pdf>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fleg.wa.gov%2FCodeReviser%2FDocuments%2FWAConstitution.pdf>>

Take a good look at Article 1 -Section 1 and Section 2. You work for us and the ultimate law is the Constitution of the United States.

<https://www.ushmm.org/information/exhibitions/online-exhibitions/special-focus/doctors-trial/nuremberg-code>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ushmm.org%2Finformation%2Fexhibitions%2Fspecial-focus%2Fdoctors-trial%2Fnuremberg-code&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cddc9ca695da34cdc00b308d9d1a3ca0f%7C11d0e217>>

Take a good look at 1. It is very clear that what you are trying to do is against the Neuremberg code. You are committing crimes against humanity when you coerce people against their will. That's just 1. You are breaking many other laws in this document.

Lastly. There is a huge lawsuit that was just levied by the UK. Take a good look because the U.S and each state breaking these laws will be next.

Here is just one of many links to this suit for crimes against humanity. Maybe you'll be next.

Subject: DO NOT MANDATE Covid Vacc for Students!

External Email

Dear Wa State Board Of Health,

We are writing this email out of concern for the upcoming discussion this Wednesday, regarding mandating the covid vaccine as a required immunization for the public school system. Our family is in education in Kitsap County. Our own children attend the elementary school in where I teach. I have worked in the Bremerton School district for the last 16 years. My husband has his own business in the community. I ask that you all consider the risk/reward when making the decision to mandate vaccines to our children. What does a one size fits all approach accomplish?

I urge you all to consider these facts before you mandate the Covid vaccine for our children.

1. MRNA vaccines force our child's bodies to make toxic spike proteins and these proteins often cause permanent damage in critical children's organs.
2. We do not know the long term effects the vaccine will have on our children.
3. Healthy children are not at risk of hospitalization or death from Covid.

The vaccines are available and if a parent believes their child should get it then they can do so. Forcing a child to get a irreversible medical procedure without parental consent is wrong and an abuse of governmental power.

Thank you for your time,
Jennifer and Steven Youngker

Subject: Forced vaccines

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that

one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Rubin, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors

(americasfrontlinedoctors.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>
)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Dear Hannah,

As you prepare to sit down with members of the Washington Board of Health members on January 12th, please consider the many words you have received from other concerned citizens of Washington State as well as my words. Please do not force people to be detained or forced into quarantine facilities if they choose, for their own health and safety, to not be vaccinated against COVID-19. What happened to the people having the freedom to make their own choices for their own bodies? By forcing something like this, you would be taking away the basic freedoms that our country is founded on and throw them down the drain. By doing this, you would force people like my parents who are in their upper 70's, who have already had COVID and fully recovered and now have antibodies and natural immunity, to forcibly be detained because they choose not to be vaccinated. **THEY DON'T NEED TO BE VACCINATED.** And neither does anyone who already has natural immunity. **SO DON'T FORCE THEM. OR ANYONE.**

And in the case of requiring kids to be vaccinated in order to go to school, well that's just utter and complete nonsense. Kids aren't dying right and left from COVID. Omicron is a cold. Kids get colds ALL THE TIME. With no studies in place AT ALL to show that vaccinating children is even helpful, why would you force parents to vaccinate their kids in order to go to school? It doesn't make any sense whatsoever. Let the kids be kids and not alter their DNA when there is **ABSOLUTELY NOTHING** to show that it will do them any good.

Again, I ask you as an American and a native Washingtonian, please do not force the people of Washington State to go against their given freedoms but allow them to make the best decisions that they can make for themselves and their families.

Thank you.

Sincerely,

Jacinta Rupprecht

Hi,

Hi, I am both a high school teacher and minister of a small church and I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

I'm including these words below because I'm part of a group that discusses the current situation and we are likeminded on the issue of forced vaccinations- we simply believe that humans should be free to choose, so we do have members of the group who've chosen to get the vaccines. I'm okay with that choice, just as blanket mandates oppose fundamental human rights to say what I or my daughter can do with her own body.

I believe in education, not coercion. To me, coercion belittles the power of factual information and its credibility; as a teacher, I teach my students the power of research- science is meant to be a discussion not a fixed resolve. I appeal to you to not mandate vaccines for Washington's kids and reject any resolution that forces vaccination. Let freedom of choice be what defines us.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

To whom it may concern,

I am against any and all of the proposed Covid policies that are overreaching and immoral. We stand against these proposed WAC's: WAC-246-100-070, WAC-100-045, WAV 246-100-040, WAC 246-100, WAC 246-105

First and foremost, no federal, state, or local government may pass a law that goes against the Constitution. Article 6, Section 2 of the Constitution says,

"This Constitution, and the laws of the United States which shall be made in pursuance thereof; and all treaties made, or which shall be made, under the authority of the United States, shall be the supreme law of the land; and the judges in every state shall be bound thereby, anything in the Constitution or laws of any State to the contrary notwithstanding."

The Constitution is still the supreme law of the land even during emergencies. As the Supreme Court explained during the Great Depression,

"Emergency does not create power. Emergency does not increase granted power or remove or diminish the restrictions imposed upon power granted or reserved. The Constitution was adopted in a period of grave emergency. Its grants of power to the Federal Government and its limitations of the power of the States were determined in the light of emergency and they are not altered by emergency."

Furthermore, any law that gives health officials the right to use law enforcement to "falsely imprison" an individual is a violation of the 5th and 14th amendments. These amendments require that the government provide you with "due process of law" before the government may take away your life, liberty or property.

In *Mullane v. Central Hanover Bank and Trust*, the U.S. Supreme Court held that "due process" means that before the government deprives you of life, liberty, or property, the government must give you notice, and the opportunity to be heard, and to object to the deprivation.

In *Cruzan v. Director, Missouri Department of Health*, the Supreme Court held that persons had a constitutional right to refuse medical treatment. These forced measures, even in good conscience to prevent the spread of COVID, infringe on this right.

In conclusion, We The People will not stand for such unlawful measures to be set in place in our great state of Washington. We will not allow a government that imposes laws that take away our inalienable rights.

"Prudence, indeed, will dictate that Governments long established should not be changed for light and transient causes; and accordingly all experience hath shewn, that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing invariably the same Object evinces a design to reduce them under

absolute Despotism, it is their right, it is their duty, to throw off such Government, and to provide new Guards for their future security." -Declaration Of Independence

Signed,
Jacqueline Martin

Please do not mandate vaccines for children in school! This is unnecessary and we will pull our children out of public school. We love having our kids in public school and would hate to miss them having the public school experience, so please allow for medical freedom and a choice for families to decide if they want the vaccine or not.

Thank you,

Vote NO on the mandates below. I am appalled and frightened that you are even considering these actions.

RE: ALLOWING LOCAL HEALTH OFFICERS TO USE ENFORCEMENT TO FORCE AN EMERGENCY ORDER TO INVOLUNTARILY DETAIN A PERSON, OR GROUP OF PERSONS, TO BE ISOLATED IN A QUARANTINE FACILITY FOLLOWING REFUSAL TO VOLUNTARILY COMPLY WITH REQUESTS FOR MEDICAL EXAMINATION, TESTING, TREATMENT, COUNSELING, VACCINATION.

and

INCLUDE THE COVID-19 INJECTIONS AS PART OF SCHOOL IMMUNIZATION REQUIREMENTS

These kinds of actions are unacceptable, uncalled for and totally out of line. You have no right to do such things. We do not live in a Dictator/Totalitarian State. The Nuremburg Code forbids the forced immunization and involuntary detainment/confinement of people for refusing such things as the experimental Covid injection..

You are wildly & illegally overstepping your authority!!

I am sending this email to urge you, as a member of the WA state Board of Health, to please vote AGAINST applying current infectious disease WAC codes to include Covid-19 for all WA state residents!

This is an outrageous abuse of power and every person in WA state and across the nation should strongly object to this invasion of our privacy and our liberties as freedom loving Americans!

To allow local health officers to use the law (WAC 246-109-070) to enforce these "Emergency Orders" (WAC 246-100-045 & WAC 246-100-040) is...to say the least...tyrannical! And of course it goes with saying that this is illegal and goes against the NUREMBURG CODE Article 6, Section 28!

No policy should disrespect the rights of all to make their own health care decisions. Public health is important, but NOT at the expense of losing our GOD given freedoms. Please vote NO to these "Emergency Orders"!!!!

Thank you!

Subject: Fwd: Forced Vaccination of School Children

External Email

Dear Washington State Board of Health,

As a WA state resident and father of school children, I want to register my extreme opposition to any form of forced health intervention using law enforcement EVER.

I want to voice my extreme opposition to any consideration of using law enforcement to remove individuals into quarantine.

I want to voice my extreme opposition to any state health officer considering mandating the forced injection of ANY Washington state student for ANY vaccine including the current iterations of the COVID vaccine.

Please consider the basic facts, that are currently being argued about—so NOT settled.

This current crisis is arguably not very severe.

The CDC has admitted that only 5 to 6% of people are dying directly because of COVID, this amounts to 30 to 60 thousand total dead from COVID in the United States—a normal flu season runs comparable.

The hospitals have been monetarily incentivized to diagnose COVID.

There are readily available over the counter treatments for COVID.

People who actively treat COVID early have a great percentage of NOT being admitted to hospital. (As much as 85% in some studies)

Our school children ARE not in danger of COVID.

The current Vaccines DO HAVE potentially harmful side effects including death. CDC admits as many as 5,000 to 15,000 (this is disputed—numbers according to VAERS reporting) have died directly because of the Vaccine efforts.

Masks are NOT proven to prevent COVID, as the statement on the N95 box declares.

The current COVID vaccines do not prevent COVID nor Prevent the transmission of COVID

There is an excellent alternative protocol developed by Stanford and Harvard trained medical professionals that can be found at www.gbdeclaration.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.gbdeclaration.org%2F&data=>

.

Please do not continue COVID policy which more aligned with communist Chinese protocols.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only “approved” COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This “smoke and mirrors” approach by the FDA is the subject of numerous

lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. WA Board of Health is holding a meeting on 1/12/22 to discuss using law enforcement to forcibly detain those who refuse vaccines (WAC 246-100)... AND to force kids to get it to go to school.

This is evil and wrong.

What is the true risk of youth against this virus.

And then take that risk and assess it against the unknowns of a vaccine that has not been tested for the long term affects on children.

More people have died from heart disease, but we keep pushing junk food on the youth... not a proper diet and exercise.

Respectfully,

Matthew Hauser

I just learned about WAC246-100 and I cannot believe this is even happening! This administration is ruining the State that I have loved and lived in for over 60 years. This is complete insanity! The way this State is handling Covid-19 with all of these ridiculous mandates is going to force me out of WA. I keep holding out hoping that this nightmare will end and I will be able to remain here, but if these policies pass, I will take my entire family and move somewhere this tyranny is not taking place. The vaccine mandates DO NOT WORK!! Washington, with all of these mandates, is not doing any better at managing the virus than states that have not imposed any mandates such as Florida. All these mandates have done is ruined people's lives and businesses in Washington.

PLEASE STOP THIS CRAZY TRAIN & DO NOT PASS THESE POLICIES!!!

To: Hoff, Christy Curwick (SBOH) <Christy.Hoff@sboh.wa.gov>
Subject: Forced Vaccination & Quarantine in WA?? PLEASE Do No Harm!

External Email

Dear Christy:

I understand that WA Board of Health will be discussing Covid-19 shot mandates for schools and recommendations for forcible quarantine and/or detention of those that disagree with policies. As a parent who has raised and nurtured my children in this State, I request that you abandon the plan of forming a technical advisory group to explore COVID19 mandates and adopt a new rule of requiring products to have completed Phase 3 clinical trials before they can be added to a list of school requirements.

For almost 2 years we have attempted to follow the health recommendations of washing, masking, distancing, testing, isolating and vaccinating. By now it is apparent that the virus is going to continue regardless of measures attempted. Thankfully, SARS CoV2 is acting in similar manner as all other viral pandemics and becoming more "virulent" (spreads easier) but less deadly. Real immunity is achieved with exposure and recovery as is evidenced by the fact that those infected with SARS in 2002/3 cannot become infected with SARS CoV2 today! In contrast, Covid19 has managed to find a way to escape the vaccine as is evidenced by the incredibly high numbers of vaccinated and even boosted individuals getting sick and testing positive. Surely this fact has not escaped your knowledge!

As Health Board members, you are obligated to provide us with facts that support any and all recommendations or requirements.

- 1) What is the current rate of mortality for COVID19 infection and stratified according to age groups?
- 2) Point to ANY measures that have reduced the numbers of fatalities (cases are not fatalities).
- 3) What is the rate of all COVID 19 caused mortality in WA in 2020 and 2021?.....did the measures imposed reduce the number of deaths from prior year?
- 4) Provide me evidence of asymptomatic spread of SARS CoV2.

5) Provide me safety studies for masking children and randomized clinical trials for masks preventing spread of lab-confirmed upper respiratory viruses (not modeling of masks on mannequins).

6) Make public the accuracy of testing - what is the rate of false positives and false negatives of tests and were results determined by manufacturers of the tests or unbiased 3rd party investigators?

7) Provide evidence that the vaccines prevent infection and transmission and that they improve the health of individuals who receive them compared to those who do not.

8) Explain why there is so much focus on eliminating this 1 virus when human immune systems have successfully protected our growing population since the beginning of time?

I believe that as members of the WA State Health Board you truly desire to improve the health of Washingtonians. However, I do not trust that you have carefully investigated and logically determined adequate and measurable health remedies for which you are able to provide evidence. Before doubling down on measures that will HARM more than they HELP the overall health of citizens, please determine and make public the evidence to justify any policies.

Regarding mandating shots, know that the clinical trials will not be completed until 2023. Know that WA State has a legal definition of a vaccine that the C19 shots do not fulfill as they were never part of a living microorganism nor do they prevent transmission or infection of disease.

"Vaccine" means a preparation of killed or attenuated living microorganisms, or fraction thereof, that upon administration stimulates immunity that protects against disease and is approved by the federal food and drug administration as safe and effective

<https://app.leg.wa.gov/RCW/default.aspx?cite=70.290.010>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx?cite=70.290.010>

Furthermore, how necessary or even safe is it to give a vaccine to a person who already has immunity to the pathogen? Most children by now have been exposed to the virus and have developed immunity without difficulty. Why consider a mandate for those not at high risk for adverse outcome should they become infected but who carry unknown risks of adverse reaction with getting the shot?

I look forward to hearing these concerns addressed and evidence for any and all recommendations to be presented when I tune into your meeting on January 12.

Thank you.

Please vote no on any vaccine mandate of Covid 19. We do not know the long term effects of this vaccine. We also know that children are not at risk if they catch Covid 19. We know that the vaccine does not stop the spread of the virus (PER CDC AND FAUCI) and I may suggest that if a vaccinated person with light symptoms may not realize they have Covid and may be out in society spreading it. PLEASE DO NOT ALLOW ANY MANDATE.

External Email

I am sending this email to urge you, as a member of the WA state Board of Health, to please vote AGAINST applying current infectious disease WAC codes to include Covid-19 for all WA state residents!

This is an outrageous abuse of power and every person in WA state and across the nation should strongly object to this invasion of our privacy and our liberties as freedom loving Americans!

To allow local health officers to use the law (WAC 246-109-070) to enforce these "Emergency Orders" (WAC 246-100-045 & WAC 246-100-040) is...to say the least...tyrannical! And of course it goes with saying that this is illegal and goes against the NUREMBURG CODE Article 6, Section 28!

No policy should disrespect the rights of all to make their own health care decisions. Public health is important, but NOT at the expense of losing our GOD given freedoms. Please vote NO to these "Emergency Orders"!!!!

Thank you!

Subject: Discussion of COVID-19 WAC codes

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Dear Caitlin,

I strongly disagree with any vaccine mandate and or allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100□□□□□□

DO NOT Include the Covid-19 injections as part of school immunization requirements ! ! !

Thank you,
Mark Anthony

Subject: Discussion of Implementation of WAC 246-100 and WAC 246-105 codes

External Email

My family and I are completely against applying current infectious disease WAC codes (WAC 246-100) and school immunization codes (WAC 246-105) to include COVID 19. These codes are extremely over reaching, unjustified, and immoral, when considering their application towards COVID 19, a virus that is largely under control and the trend with the most recent variants being less harmless than the common cold. This is a disgrace and an abusive use of power that is utterly shameful.

We will not comply with these orders should they be enacted and will do whatever is within our legal power to fight this until common sense returns to those in power or they are removed from office and the implementation of such codes reversed.

The codes specifically in question for the January 12th meeting are the following:

WAC 246-100-070

WAC 246-100-045

WAC 246-100-040

WAC 246-100

WAC 246-105

Hello!

I am reaching out because I oppose WAC 246-100 rulemaking that would expand any authority to involuntarily quarantine individuals.

I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

Children's healthcare and medical decisions are for the child's parents to make, NO ONE else's.

What is right for one person may not be right for the next else especially when it's proven that this "vaccine" (when the definition of something has to be changed multiple times to fit an agenda you can guarantee that it's not what you're being told it is) isn't effective and the risks to children (and probably adults we just haven't seen the affects yet) outweigh the benefits.

This is unconstitutional and wrong.

Subject: discussion on mandatory Covid shots

External Email

To Whom it May Concern,

I am writing to say that I am against the mandatory Covid shots for school children as they are in the low risk category. Not only that, but to take away the rights of the American citizens to make these decisions themselves ought to be unthinkable. This goes for the proposed idea of forcing people to leave their homes, families, jobs, life as a whole and to be put in camps as if they are convicted criminals is unconstitutional. Have we learned nothing from the Nazis or the internment of the Japanese Americans during WWII? What about all the Black Lives Matter and Rainbow rhetoric talking about the rights of these people groups?

If we make these kind of unlawful decisions based on unfounded, biased "studies" and statistics, what's next? We better be careful of the rights we are considering taking away, lest it hits closer to home down the line.

Please vote "No" on issues forcing the vaccine, or putting people in internment camps because they don't comply. Let's keep our freedoms.

Thank you,

Kimberly

Subject: EMERGENCY ACTION! THIS CANNOT HAPPEN

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

You have no idea what we as American will do to keep our freedom!

Signed,

Jo Ann Urquhart

Subject: DO NOT SUPPORT MANDATORY COVID-19 VACCINATIONS

External Email

Hello,

My name is Katie Walsh and I am a first grade teacher at Coulee City Elementary and a mother of 2 current elementary students and one future student. I strongly support medical autonomy and choice when it comes to people's right to choose what is best for their bodies and their children's bodies. I urge you to allow individual freedoms in this area and discourage the recommendation for COVID-19 vaccinations of children to attend school or any person for that matter to live a life of their choosing. I believe it is complete discrimination to segregate students based on their medical status. I also believe that science has now shown that vaccinated individuals can indeed contact and spread this virus and that the affects of the virus on children are minimal and do not warrant the risks of the vaccine. All of my children and I have had the virus and our natural antibodies are alive and strong to offer us and others protection.

Education has come a long way in offering a free, appropriate, public, education for students across the nation. Unfortunately, with policy around COVID-19, I have seen that fall by the wayside and this potential mandate will force families to choose between what they feel like is in their child's best interest physically versus what they know is in their child's best interests emotionally, socially, and academically. This is not a free, appropriate, public education for ALL. Families and teachers that have options WILL withdraw their students from public institutions and WILL resign over this issue.

Enrollment is already on the decrease and continues to decrease due to, what in my opinion is, poor policy around managing COVID-19. The state is already going to have to pick up a big tab due to this. I can foresee public education in WA state turning into what it is in some developing countries with the "haves" opting for private or home-school and the "have-nots" being left in the public system due to no other option. Quality Educators will leave and public schools will become institutional islands that are poorly staffed and underfunded. WE CAN DO BETTER FOR OUR STUDENTS AND FAMILIES. You are in a

position of influence and I ask that you use your influence to protect the whole child and family autonomy when it comes to making decisions of well-being for their child. Protect diverse, quality, flourishing public education and protect the right to a free, appropriate, public education.

Thank you,

Katie Walsh

My name is Eleonora and I recently heard about the voting of these current policies and I would like to express my view as a WA resident. I do ask you to listen to my opinion as well and consider doing the right thing. We as humans have the right to decide what is best for us and our children.

I am completely against any of the proposed Covid policies that are overreaching and immoral. I stand against these WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-105. Please do not implement such policies.

Thank you

Dear WSBOH,

Hello, I do not approve of the mandatory Covid Vaccinations for childcare and school admission.

Hoping you will refuse this type of action for the following reasons:

Covid vaccination is still under emergency use authorization, children under the age of 18 have a 99.995% of survival rate, and they have a higher chance of death or adverse reaction to covid vaccine than covid-19 itself.

Thank you for your time and consideration, it's VERY appreciated! We CAN make the right decisions☐

Subject: Discussion of Vaccine Mandates on 1/12/22

External Email

I am admittedly opposed to forcing families to get the Covid vaccine for children, really for anyone.

The land of the free also includes the freedom to choose what medical treatments we want or don't want. There are no studies on the long term effects, or complications because this vaccine hasn't been around long enough to gather that data. Let the records reflect my statements.

I am completely against any of the proposed covid policies that are over reaching and immoral. I stand against these purposed WAC's :

WAC 246-100-070,

WAC 246-100-045,

WAC 246-100-040,

WAC 246-100,

WAC 246-105

Please consider the long term effects this could have on our children. Look at the data of how many kids survive, let alone don't even know they are sick. Please follow the actual science and data, not political lines.

--

Thank you,

Heidi Green

I am opposed to adding SARS COVID-19 to the list of identified pathogens under this heading.

I am vehemently opposed to adding vaccination against COVID-19 to the mandatory vaccinations for school-age children in Washington state. These are vaccines that are currently undergoing review and trials, their efficacy and durability of efficacy is questionable and the mortality rate in the target population of school-age children is too low to warrant the risk.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee famously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

To Whom It May Concern,

I OPPOSE Agenda Item #8, the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. You oppose COVID-19 shot mandates, period!

I SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

My whole family has already recovered from corona virus and have natural immunity, which according to every study ever done, shows longer immunity than the vaccine by at least 4 months. Everyone world wide is being infected and effected by Corona, no matter their vaccine status. These mandates are not based in any real science.

Sincerely,

Jacob Smay.

Subject: Forced Vaccines? NO!

External Email

Washington State Board of Health;

I strongly object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,

Jennifer Vanderbeken

Hello,

My name is Katie Walsh and I am a first grade teacher at Coulee City Elementary and a mother of 2 current elementary students and one future student. I strongly support medical autonomy and choice when it comes to people's right to choose what is best for their bodies and their children's bodies. I urge you to allow individual freedoms in this area and discourage the recommendation for COVID-19 vaccinations of children to attend school or any person for that matter to live a life of their choosing. I believe it is complete discrimination to segregate students based on their medical status. I also believe that science has now shown that vaccinated individuals can indeed contact and spread this virus and that the affects of the virus on children are minimal and do not warrant the risks of the vaccine. All of my children and I have had the virus and our natural antibodies are alive and strong to offer us and others protection.

Education has come a long way in offering a free, appropriate, public, education for students across the nation. Unfortunately, with policy around COVID-19, I have seen that fall by the wayside and this potential mandate will force families to choose between what they feel like is in their child's best interest physically versus what they know is in their child's best interests emotionally, socially, and academically. This is not a free, appropriate, public education for ALL. Families and teachers that have options WILL withdraw their students from public institutions and WILL resign over this issue.

Enrollment is already on the decrease and continues to decrease due to, what in my opinion is, poor policy around managing COVID-19. The state is already going to have to pick up a big tab due to this. I can foresee public education in WA state turning into what it is in some developing countries with the "haves" opting for private or home-school and the "have-nots" being left in the public system due to no other option. Quality Educators will leave and public schools will become institutional islands that are poorly staffed and underfunded. WE CAN DO BETTER FOR OUR STUDENTS AND FAMILIES. You are in a position of influence and I ask that you use your influence to protect the whole child and family autonomy when it comes to making decisions of well-being for their child. Protect

diverse, quality, flourishing public education and protect the right to a free, appropriate, public education.

Thank you,

Katie Walsh

Caitlin,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

I'd strongly urge the members of the board in control of such an important decision to form their consensus based on the facts, logic and reasoning while using honesty, and fairness from an unbiased perspective to guide those decisions.

With great power comes great responsibility; Which is why it is crucial the members of the board make the right decision for the people and our children.

I understand that everyone has a different set of morals and values that guide how we each make our own decisions. Which is why it's important for you to really dive deep and ask yourself who you really are and determine if you are proud of who you are and what you as an individual are support and represent.

No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' Children's Health Defense (childrenshealthdefense.org))

Dear board members,

Thank you for sacrificing your time and energy to make important and sometimes difficult decisions in the interest of public health in Washington state.

I am writing to urge you to refrain from requiring COVID-19 vaccination for students and to refrain from authorizing public health officers to order isolation and detainment of people who refuse to receive certain COVID-19 tests or treatment.

The vaccine requirement would do more harm than good, as would removing people from the safety of their home, where they can choose to self-isolate and retain access to important medical resources. Thank you for your consideration.

Dear Board of Health Members,

Thank you for your service to the citizens of WA.

I am writing to ask you to NOT implement ANY policies that utilize tyrannical actions (involuntary quarantines, testing, treatment, counseling, and vaccinations) in what will be a failed attempt to "contain" Covid19. This virus will never be contained, it is a part of our ecosystem now. The only real defenses against it are REDUCING CO-MORBIDITIES and allowing ROBUST THERAPEUTIC TREATMENT DEVELOPMENT. Have you as a board, recommended spending any public service resources on telling people to live a healthy lifestyle as the best defense??? If people are healthy, IT IS CLEAR THEY ARE AT A MASSIVELY REDUCED RISK OF LONG TERM EFFECTS FROM THIS DISEASE.

We also know that the vaccines are ONLY GOOD FOR SHORT TERM PERSONAL PROTECTION from significant symptoms, but do not stop transmission or infection. My taking a vaccine DOES NOT save anybody else from Covid19, so forcing vaccines on people becomes nothing more than a form of medical authoritarianism, not health care. If WA's health care systems are stressed due to COVID patients, it is ONLY because hundreds of qualified health care professionals were unnecessarily terminated from their jobs (many with natural immunity), and due to that there are not enough people to provide care.

Please DO NOT implement any actions that will only hurt/divide/anger your fellow citizens and DO NOTHING to reduce the spread of this disease. HAVE COURAGE AND PLEASE TAKE A STAND AGAINST TYRANNY.

I oppose WAC 246-100. Rule making like that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

Parent, business owner, and Washington State citizen,
Jessica Chavira

External Email

I am 100% against Covid 19 and it's variants from being added/included on the existing list of infectious diseases able to be enforced. When this is discussed by the Washington State Board of Health on January 12th, I am requesting that you refuse this protocol change as it is a violation of medical rights and is a form of religious discrimination as well as discrimination against those who medically are unable to receive these vaccines due to valid health concerns.

I am urging and begging you to stand up against this change. Please.

To Whom it May Concern,

I am completely against any of the proposed COVID Policies that are overreaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

These are our medical freedoms, and this is stripping us from our right to choose. Forcing a vaccine, let alone a vaccine that has not gone through proper testing is wrong and against the constitution. So much of what we love about this country is the freedom that we were given when this country was founded. Forcing a vaccine goes against so many of those freedoms and does not consider the damage that it could cause for people. There is no way for everyone to know everyone's situation, that is the beauty of choice. If the vaccine is right for you, you should have the right to make that choice, but if it is not right for me, I should have the right to make that choice.

I am an individual who was injured by a vaccine, this injury completely changed my life and how I live my life. This happened as a pre-teen and I am still dealing with side effects to this day, over 15 years later. Any mandate is concerning as a taxpayer, as a vaccine injured individual, as someone who wants to have kids someday. I cannot imagine raising a child in a world where they do not have the right to choose what is right for their own body and health.

Please reconsider these policies.

Sincerely,

Karina Scholl Zimmerman

To Whom it May Concern:

I am emailing to voice my complete and total disagreement with the proposed WACs pertaining to policies for medical examinations, testing, treatment, involuntary detainment, isolation or vaccination through the use of emergency authorization or any other formulated use of government overreach.

It is absolutely not the federal or state government's role to make decisions for a citizen's health. Federal and state government's only job is to ensure that our constitutional rights are protected. How we choose to live as free people is up to each individual...and certainly the forced injection of any material that carries zero liability for government or companies that produce or require an injection of anything.

This suggested line of policy is a gross and distorted use of government control. Stop it now.

I am writing to you today in regards to your upcoming meeting on January 12th. I am completely against these proposed WAC's: WAC 246 100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105. They are an absolute over reach, completely immoral and unconstitutional. How is forcing a person and their family to inject experimental drugs into their bodies that DON'T EVEN PROTECT you from getting the virus moral or constitutional? Or arresting them and putting them in camps for not doing so??? Are you Nazis??? We have freedom!! What happened to my body my choice?? You will be violating crimes against humanity! At this rate, your not any better than Hitler. This is wrong on so many levels. I have called Washington state home for my entire life, but feel I am being forced to leave, along with so many others. That seems to be your ultimate goal, since you continue to take away personal rights and freedoms. I urge you to vote against these and not allow this madness to continue! I am a kitsap resident and I have helped to build this amazing state for 16 years as a union Ironwork and if this continues I will be leaving Washington! and I know many others that feel this way!

Please do not require Covid vaccinations for our schoolchildren. The statistics have been consistent in showing that children under the age of 18 have a 99.9% survival rate. The media are fear mongering. Remember these vaccines have not had long term testing yet, and the VAERS reporting system for vaccine adverse affects shows an extremely high rate. Our children are being developmentally affected by the decisions being made by governing bodies. Please do not also subject them to the risks involved with administering truly unknown consequences into their growing bodies.

I am completely against any of the proposed COVID policies that are over reaching and immoral. This is an active experiment and there are no long term studies to prove that it is safe in the long run for our bodies. You can not tell someone or force someone to get a vaccine or any other medical treatment or procedure. These vaccines have caused many adverse reactions and deaths that continue to be ignored. This is completely inappropriate and crossing so many boundaries. The choice to use or accept ay form of intervention or physical or mental health issue remains my personal right, regardless the opinion of other people, including medical professionals or the government.

Thank you.

To whom it may concern,

I have been informed about covid policies that may come into place, regarding involuntary detain people for quarantining, and also requiring children to have the covid vaccine for school.

This is wrong and completely immoral, and I stand against these proposed covid policies to be discussed January 12th. Not only are they a violation to medical freedom, but also infringing on American's right and freedom we have as citizens of our country.

Policies I oppose are as following:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntary comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105

Please listen to the voice of the people and know this country, each state, is founded on the constitution allowing freedom to live.

Sincerely,

Keri Smart

Subject: Covid Policy Updates

External Email

The existing WAC's are overreaching and immoral. Updating the language to include Covid should concern every citizen. We are a free society, our constitution exists to prevent draconian measures which we are now seeing in Australia, Italy & France.

The science is evolving and we know that Covid has tipped to become endemic. The latest and future variants are showing to be indistinguishable from a bad cold.

Washington state is proud to be home to a progressive society, where we consider the wellbeing of all citizens. We need to look forward to the end of covid and back to normalcy. The proposed updates to WAC and vaccination requirements for children are NOT progressive. Please consider our voices, our choices.

I am completely against any of the proposed Covid policies that are overreaching and immoral. WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

Subject: Covid shots for kids

External Email

Dear Board members,
I hope that you will take into consideration the long lasting effects Covid shots will have on kids. This is a foreign substance that you want to introduce into a child's body. How many children have died from Covid? This is fear mongering. This is akin to child abuse. Please don't project your fears onto children just so you'll feel better. It should be a parent's choice, not a government agency. Don't do it!

Thank you, Joan Earl

Subject: Covid requirement for schools

External Email

The implementation of a COVID 19 vaccine requirement for schools in Washington State is absolutely insane.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA

product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>
)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Amyee McKnight

Subject: Covid Vaccination requirement

External Email

At this time there is, in my view, a complete lack of evidence of the necessity of inclusion of a COVID vaccination requirement in WAC 246-105. Quoting from 246-105-010: "The purpose of this rule is to protect children and the public against certain vaccine-preventable diseases. Under the authority of the board of health, this rule describes the immunization requirements of children attending schools and child care centers." The facts are the current COVID vaccines do not prevent catching the disease, and therefore are ineligible for inclusion in the list of "vaccine-preventable" diseases. The current COVID "vaccines", as is demonstrated by the vast number of "breakthrough" cases, are not able to prevent COVID to a comparable level as actually effective vaccines for the section 030 listed diseases, but merely to be a pre-treatment for the disease that generally reduces the severity. Compare and contrast the number of COVID breakthrough cases (and rates) to breakthroughs for those vaccinated against the diseases listed in 246-105-030. Who has heard of breakthrough cases of chickenpox? Diphtheria? Rubella? Measles? Mumps? Pertussis? And the rest of the list, for that matter. The simple fact is, the number of "breakthrough" cases of the -030 currently listed diseases is so small as to be negligible - it would be major local news of an outbreak of Measles or Mumps in our local schools, yet these are all but unheard of. Yet the number of COVID cases that breakthrough the current vaccines are significant. Therefore, as a matter of definition, COVID is not a vaccine preventable disease. Compare and contrast COVID to one of the listed diseases with an actually effective vaccine - Mumps. According to the CDC, there were only 139 cases in 2021. Considering that the best available evidence as of this writing indicates that on average children suffer no worse from COVID than the normal seasonal flu, and considering the unknown potential long term side effects of the current COVID vaccines, the risk-reward profile indicates negligible benefit to the children of Washington, while imposing unquantified potential risk upon them. Compare to the current policy for seasonal flu: Flu is an equal, if not a greater risk to children (and never mind the ability of children to spread seasonal flu to adults) AND the seasonal flu vaccine risk profile is well known and low, yet there is no mandate to vaccinate children for the seasonal flu. Yet, this Board is considering mandating a vaccine for a disease, COVID, that is equal or lower risk to children AND has a vaccine with an unknown long term risk profile? That would be illogical and would indicate other non-fact based motivations for such a mandate. I respectfully urge the board to not add COVID to the list of diseases in WAC 24-105-030."

Thank you for your time.

To whom it may concern,

I am a very concerned citizen of this state and have seen the radical policies you are considering adopting in this state concerning covid. Instead of listening to Inslee abs his cronies, please do the research yourself. There are more studies out there that show 1) kids are not at risk for this virus and Should no longer be forced into masking. The invented of this kind of vaccine has even said it will do irreversible damage to our kids if administered to them. Please stop the madness and these mandates in our school. The long term effects of the mandates will have a lot longer lasting negative impact on our kids than the virus ever could. 2) Allowing the state to use law enforcement to force compliance on their mandates up to taking families away or breaking families up to go to "quarantine facilities" is pure tyranny and is fully unconstitutional. Unless you want to be considered modern day nazis, as this is exactly what they did with the Jewish people, do not adopt this policy. It is not in the best interest of the state. Also, there is no longer an emergency. Look at the actual stats of hospitalizations and deaths and you will see that. Case numbers don't matter and even the federal government is finally admitting that. Please do the right thing, even if it's unpopular to your political allies, and allow the citizens of our state to live freely. We are not stupid and we do not need the government telling us how to live. We ar all very capable of making the right decisions for ourselves and our families, so I implore you to let us do that.

Thank you,
Lindsay

To whom this may concern,

Everyone is completely against these tyrannical measures. Think about what you are proposing, injections for kids wholly unaffected by Covid with gene therapy potentially life altering untested and studied injections. Doctors across the world are speaking out against such measures and I think it would be a great idea to listen to them. Especially the doctors who helped patent mRNA tech and explain that it isn't safe. These vaccines are EUA and have no long term studies. This is a illegal and a giant overreach. The fact that such discussions and policy are being discussed speak loudly of unelected bureaucracy and the motive they have. These policies are immoral and we do not support them.

The data reported by your own federal agencies doesn't even support such policy. Do we require flu shots? No, and these shouldn't be required either.

Good morning,

I am writing to let you know I am completely against the covid policies that are trying to be implemented. It is wrong, and a complete abuse of power. Good people, are actively leaving this state because there is no end to the overreach.

I am against WAC 246-100-070, WAC 246-100-045, WAC 246-100-040.

Respectfully,

Michele Young

Subject: Covid Quarantine camps

External Email

This email is in regard to the state considering instituting quarantine camps of any kind for Covid illness for vaxxed or unvaxxed citizens. This is an egregious assault to our constitutional rights and the American people will not stand for it. Clearly the vaccines are not working as hoped, and cannot be forced on anyone. Covid is an equal opportunity infector. As a US citizen we have rights to protect ourselves from an over reaching government. We will not stand for this kind of takeover. I urge you to reconsider pushing for this type of legislation and remember who you work for. We are a free America and this a going too far.

Thank you, Joan Hall

Subject: COVID RELATED RULES

External Email

I am writing to voice my opposition to the new rule that is being considered by the Washington Board of Health authorizing use of law enforcement to remove people from their homes and relocate them because of resistance to covid mandates, including vaccine mandates and masking mandates. These mandates are neither based on science nor are they in the best interests of the public. Natural immunity should also be considered to be equivalent if not superior to the existing experimental vaccines, which are DNA altering.

Sincerely,
Kathleen Austin

Subject: Covid protocols

External Email

I am writing to you concerning proposed items that you will be considering. First is a mandated Covid shot as a requirement for children. When Covid 19 first appeared, we had no idea what to expect. As we have seen, it targets certain groups, those who are elderly and have other comorbidity factors, obesity being a primary factor. Unlike influenza, children are far less likely to be severely affected by it. Requiring this shot, which does not have long term proven effectiveness or safety, is a poor, if not bad choice. I want to urge you to not require it. If parents choose to have their children receive it, that is fine but it should not be forced on anyone, young or old.

Another topic that I have heard is being considered, is requiring a contact tracing app on phones in the state of WA. I believe that is a complete invasion of privacy. It is something people can choose or not. It should not be required.

Lastly is the idea of a passport system being required to live in what has been a free society. We are citizens, not subjects. Some people have medical reasons for not getting these shots, and others have religious/ freedom of conscience reasons. Those need to be respected. Again, if someone chooses to get this, that is their choice but it should not be required.

Thank you for your time.

I am completely against these overreaching, completely immoral, policies that officials are trying to pass. This is completely unbelievable, it has been proven that COVID vaccinated people can still contract and spread COVID all the while hard working people who refuse to get this EAU only vaccines are being fired because they put the community at risk. This is simply not true and the data supports that. Natural immunity is something that needs to be addressed, personal choice is something that needs to be embraced. This is America, our ancestors and thousands of people enlisted in the armed forces today, fight for freedom and our constitution allows personal choice. Quite frankly, the state of our country is embarrassing.

I DO NOT support the following proposed policies or any other measure pertaining to restrictive measures that is buried in some policy somewhere:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Thank you for your time and I trust that given the Governors remarks yesterday and our Presidents recent remarks that you will do the right thing and strike these measures down. We are going to have to learn to deal with this, it's a virus and we are exposed to colds and viruses everyday. We should be promoting healthy eating and exercise for our communities.

Sincerely,

Jamie T

To whom this may concern:

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- Children are at extremely low risk for Covid
- The vaccines are still only EUA (emergency use authorized)
- There are no long-term studies to document any history of safety
- Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- The vaccine apparently does not stop the spread of the disease

It is a violation of our unalienable rights granted to us by our Constitution/Bill of Rights; furthermore it is a violation of the International Criminal Court Law, the Nuremberg Code, and the Geneva Convention.

Thank you,

Subject: Covid shots for our children

External Email

I am extremely opposed to requiring children who attend our public schools to get covid shots. Children are at extremely low risk for getting covid. Dr. Fauci recently stated that included in the count for children in hospitals are children that are being treated for something else (not covid), but tested positive while they were in there. The vaccines are still only emergency use authorized.

Please do not make covid shots a requirement for children to attend schools or childcare.

Sincerely,
Julie Bolt

Dear Sir or Madam,
No governmental authority should mandate that children receive the experimental mRNA injection out of fear of the virus that causes COVID-19. In the case of this virus there is an age below which the risk of death or serious injury is greater from the injection than from the virus. The age of school children and those in day care certainly falls in that category. Injecting children is not justified by science or reason. Secondly, for such a low-risk category parental rights should override the bureaucratic-imposed, one-size-fits-all protocol. Americans have the right to decide about our own risks and benefits, and for those for whom we are responsible.

Subject: Covid shots for KIDS under 18yrs old.

External Email

Kids under the age of 18 should not be required to be shot with chemicals that have such a high death and disfigurement total as the shot for Covid (and all variants past/present/future) without proper medical science showing the LONG TERM testing and results. If you people would actually listen to people you'd know and understand that most people aren't anti-vax we are anti-mandate. The government does not/cannot/should not control our health choices and decisions! When the Covid vaccine and boosters can be put into the same category as the other vaccines that kids are given for school (bumps/measles/pox etc) then there is grounds for discussion. LEAVE THE KIDS ALONE!!!! --

Subject: Covid vaccination mandate for our children

External Email

As a concerned citizen & taxpayer I would implore you not to impose a covid vaccination mandate on our school children. I could give many reasons but I've chosen 3.

1) In a very detailed study JAMA Pediatrics (which I am sure you know is a peer reviewed journal published by the American Medical Association) has done a study with data that does not support the hypothesis that children are at higher risk of carrying SARS-CoV-2 asymptotically more than adults. Also it is very rare for children to develop a difficult time with Covid.

<https://www.news-medical.net/news/20200914/Are-children-more-likely-to-be-SARS-CoV-2-asymptomatic-than-adults.aspx>

2) It is parents that should be responsible for the health decisions regarding their children

3) The impact of these vaccinations and the future effects are not known. Because of that more people will withdraw their children from public schools. Of course there are many families that do not have the capacity for that. Are they to be punished in the worst way for that inability - which is possibly risk to their children?

Thank you for considering this concern for our children.

Covid shots should absolutely NOT be a requirement for our children to attend school or childcare.

Children are at extremely low risk for Covid and the vaccines are still only EUA (emergency use authorized)!

This is sooo dangerous and absurd!!

I am writing to you today in regards to your upcoming meeting on January 12th. I am completely against these proposed WAC's: WAC 246 100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105. They are an absolute over reach, completely immoral and unconstitutional. How is forcing a person and their family to inject experimental drugs into their bodies that DONT EVEN PROTECT you from getting the virus moral or constitutional? Or arresting them and putting them in camps for not doing so??? Are you Nazis??? We have freedom!! What happened to my body my choice?? You will be violating crimes against humanity! At this rate, your not any better than Hitler. This is wrong on so many levels. I have called Washington state home for my entire life, but feel I am being forced to leave, along with so many others. That seems to be your ultimate goal, since you continue to take away personal rights and freedoms. I urge you to vote against these and not allow this madness to continue!

Subject: COVID Vaccination for School

External Email

To whom it may concern,

As a parent of three girls inside the Rosalia School District my husband and I are extremely opposed to mandatory vaccination for our children.

This is a violation of our parental rights in what we believe is considered harmful to their bodies. Our children have received their vaccinations to go to school, however this COVID Vaccination hasn't been around long enough or tested in our opinion to be given to our children.

There have been many cases abroad where their studies have shown that the chemicals inside this Vaccination are strong enough to clean brake fluid off your brakes if it is placed accidentally into your bloodstream. Who is to say that those receiving this vaccine won't have more health problems including seizures, blood clots, lung issues and cardiac issues as well.

If this is a decision made by our state for children to be vaccinated to go to school, I will not hesitate to pull my children out and homeschool them. We as parents do not want to homeschool our children because public schools offer so many great things that they don't necessarily receive at home. Such as social interaction and extracurricular activities. These would all be taken away from our children, because a higher power believes they know what is best for our children.

It is already awful enough that these kids are being forced to wear masks daily, which has been shown to carry more germs and viruses than the vaccine itself. By wearing a mask every day these children are exposing themselves to more lung issues and not allowing their bodies to develop immunities against infections. Natural germs.

Even though I am expressing my concerns and am totally against children being forced to receive the vaccination the higher powers that be will decide this for us, because what they believe is right for them is right for everyone. No it's not... What is good for one isn't good for everyone. This is taking away personal right of choice and forcing something into bodies, just like being raped. Having something done to you that you are not wanting done, or against your own free will.

Sincerely,

Lisa
A concerned parent

Subject: Covid Shot Requirement for Schools

External Email

To Whom it may concern,

Under no circumstances should the covid SHOT (not vaccine) be mandated for our children to attend schools. Number one it is not a vaccine. By definition a vaccine keeps you from getting the illness. Everybody is getting covid regardless of vaccination status. Before any vaccine has been mandated there has been years of research and proven data. We are nowhere near that with the Covid shot. The fact people are coming out and saying you have to keep getting boosters prove it is not working. You can not mandate our kids get a shot every 6 months for it to keep working. This is not ok. Public comment and opinion matters in these cases. We have to stand up for our children's rights. It is my job to protect and make decisions for my children, not yours!

Sincerely,
Jessica Miler

I am completely against any of the proposed Covid Policies that are over reaching, unethical, and completely immoral. This goes against medical freedom. You are trying to strip away our medical freedom over a vaccine that doesn't even prevent spread or contracting the virus. You can be fully vaccinated with all boosters and still catch covid along with spreading it to others. This is outrageous. IF THERE IS A RISK, THERE MUST BE A CHOICE! With any vaccine, there is a risk. Therefore, there must be a choice. I, along with many others, do not consent and do not agree with these proposed "laws"!!!

We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

From: Lesley Rutz
Sent: 1/6/2022 7:03:48 PM
To: DOH WSBOH
Subject: Covid shots for children

External Email

To the WA State Board of Health members,

Covid shots should absolutely NOT be required for children! Children are not at risk from the virus as proved by studies from many states and countries including Florida, Texas, South Dakota, Sweden, Africa and India. According to our CDC at Data.CDC.gov, 823 children ages 0-18 have died with/from Covid during the period of January 4, 2020 through January 6, 2022. And since even the CDC has stated that numbers were inflated using with, as opposed to from, and according to their records some of the children were suffering from leukemia or had recently undergone transplant surgery, we have no idea how many of those children actually died from the virus.

This shot is NOT a vaccine as vaccines prevent a person from getting and spreading a disease. Since those who have had 1, 2, 3 or 4 shots are still getting sick, the shot does not qualify as a vaccine. Also, Americans have always been allow to opt out of vaccination requirements for personally held beliefs; including religious beliefs.

Thank you for your time and attention.

Subject: Covid shots for Kids

External Email

WSBOH Personnel,
Please do not make it a requirement for children to get the Covid shot to attend school. So few children are deleteriously affected by this virus and NEED the benefit of building natural immunity. There are always going to be exceptions such as children who are immune compromised or have maladies that predispose them to a dangerous outcome if they contract Covid. Those parents should have the CHOICE of getting their child the shot or not, based on advice from a medical professional they trust. Please stop this overreach of the government.
Thank you, Harlene Elenbaas

I am completely against all of the covid policies that are overreaching and immoral. We the People stand against: WAC-246-100-070

WAC-246-100- 045

WAC-246-100-040

WAC-246-100

WAC-246-105

The government has no right to impose these unconstitutional policies.

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

I am totally against the actions that the Board of health is considering. This continues to destroy our country, our families, our economy. People should choose for themselves, not the government. Omicron has been defined as a cold. Let's get back to reality!
We are each responsible for our own health! Get government out of this!
Completely disgusted by the actions of our government! We, the people, protest!!

Subject: Consideration of adding Covid-19 Experimental Use Authorization shots to WAC 246-105

To the State Board of Health,
I am writing to strongly OPPOSE adding ANY and ALL covid 19 mRNA treatments to the WAC 246-105 list of required vaccines for children to attend school. All vaccines come with some risk to children and society, be they small or great, and no vaccine should be added to this list lightly. But, these new treatments called 'vaccines' for SARS COV2 should never be considered for the reasons listed below.
1. All covid-19 'vaccines' being used are still listed under EXPERIMENTAL USE AUTHORIZATION, and therefore, by law, use MUST be voluntary. No person can legally be required to take them. And no parent can legally be required to authorize them for their children.

2. This SARS COV2 virus has been statistically proven to be benign in children. Children have less chance of serious illness or death from Covid-19 than the average cold. Statistically 0%. We have never required a vaccine for a benign illness in children with a statistical death rate of zero.

3. Children have been proven to not be carriers of this disease and therefore do not asymptotically spread it to adults.

4. The many SARS COV2 'vaccines' now in use under EUA have been proven to be dangerous and deadly by the CDC's own VAERS system, and also by many, many peer reviewed papers based on the CDC's own statistical collection data.

5. MRNA technology is new and has not been proven safe or effective, in any age group, in long term studies.

6. The cost to society from medical treatment for vaccine injury in all age groups is already mounting. It cannot be cost effective to require this treatment in healthy children who are not at risk of serious illness or death.

7. Washington State citizens have overwhelmingly demonstrated that SARS COV2 mRNA technology treatments are not wanted or acceptable, especially in children. Less than half the population of our state is considered 'fully vaccinated' despite them being widely pushed and available. The public does not want these 'treatments' nor do we want them for our children.

8. The above points make it completely clear that these treatments do not meet the 9 criteria required when Reviewing Antigens for Potential Inclusion in WAC 246-105-030 <tel:246-105-030>

<https://sboh.wa.gov/Portals/7/Doc/Publications/ImmunizationCriteria-Update2017-Final.pdf>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsboh.wa.gov%2FPortals%2F7%2F%2FImmunizationCriteria-Update2017-Final.pdf&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C94a91554d4284af08e6c08d9d20c14c6%7C11d0>

>

Be it known, that if, after review of the information above and peer reviewed studies and data collection of the vaccine injured, these treatments are approved by this board to be added to the list of required vaccines under WAC 246-105, the members of this board will be held responsible under Nuremberg codes for all maimed and injured children as a result of these EUA 'vaccines' forced without consent. The citizens of this state know and understand the freedoms and responsibilities we are afforded in our state and national Constitutions. And we stand on them.

In closing, I strongly request that no SARS COV2 EXPERIMENTAL USE AUTHORIZATION drugs be approved for inclusion in WAC 246-105.

Thank you,
Julie Michener

Subject: COVID 19 Vaccines

External Email

I want to thank you for all your efforts to keep everyone safe in our community. I know this pandemic has been hard on everyone. I am writing as a parent to plead with you not to mandate any Covid 19 vaccines for K-12 schools. Covid 19 vaccines are not a one size fits all. My son who is 15 had Covid 2x and had no symptoms either time. He has a blood clotting gene that causes blood clots. For him to take the Covid 19 vaccination its more of a risk to take the vaccine than not. It has already been proven that the survival rate for kids who get Covid are over 99% . They are the lowest at risk. their are so many side effects associated with this vaccination such as myocarditis in teenage boys. As a parent with his medical issues I know what's best for him. He is best off not taking the vaccine. I say this with no disrespect but the school board, the superintendent, the governor, and the Health department do not know what's best for my child with his medical issues. So once again this vaccine is not a one size fits all. Each parent should decide what's best for their child.

If this vaccine does get mandated for school aged kids are you willing to take the responsibility if the side effects reported to VAERS happen to our children? Are you willing to take the responsibility if any child dies as a result of this vaccine? I guarantee you that if anything happens to our children parents will tie you up in the court systems for life and make sure justice is served for their child if any thing happens as a result from the vaccine.

So in conclusion as a parent with my sons medical condition a vaccine would do more harm to him. I am begging you to please let vaccines be up to the parents .

Thank you Margo

The government has now taken this experiment too far. We must protect our children from the tyranny that is taking place. The vaccines are not safe which has been proven by many virologists and scientists who have all been silenced with efforts to silence them.

The science says that children have virtually less than a .003% chance of long term affects from covid with literally no deaths from children without comorbidities. There is no one that can tell us long term affects of vaccines because there has not been enough time. Dr's who claim it is safe should lose their licenses. They can't even tell us what's in the vaccine. We have seen vaccine injuries with young adults. The sneaky way our government has tried to get this passed over the Christmas holiday when citizens were busy with family gatherings is underhanded and unacceptable. We will protect the children at all cost. That may mean we take the steps to impeach and make public all the parties involved. We may need to seek private education and instead of defunding the police we defund public education. We can take it out of the tax base, give it to the people and give the power back to the parents

I oppose all medical applications mandated by political reasoning. Currently only the tremendous increase in drug overdose deaths and death by suicide, from depression, are true facts. Do not further create a police state with unfounded, fear mongering, political activism. Mike Hanson 509-671-4760 Pend Oreille Co. resident

Subject: Concerning WA State Board of Health proposal for Covid-19

External Email

I am vehemently opposed to the WA State Board of Health proposing an involuntary, detainment in a quarantine facility or mandatory vaccines.

This type of proposal is dictatorial and unwarranted in a free society. This proposal could cause great harm to the citizens of Washington state by separating families, causing great mental injury to children and impacting how a person works and supports themselves.

Please oppose such measures. It is immoral to even think the state government could try and control its citizens in such fashion.

Dear WA state representatives & government leaders,

I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

I am completely against any of the proposed policies that discuss detaining people or groups of people involuntarily.

I believe in the four main principles of ethics that include autonomy, beneficence, nonmaleficence, and justice. I am an advocate for informed consent and against any kind of coerced or forced medical treatments that are involuntary, especially if there are any risks of injury to the individual involved.

May you highly consider these principles & ethical values as you make important decisions for the state of Washington.

Thank you,
Jennifer Hagstrom

Subject: COVID mandates for children

External Email

Hello,

I am strongly opposed to mandating the COVID injections on our children. Yet, that is exactly what they are proposing next week. Children are at extremely low risk for COVID and these medical decisions should be left in the hands of parents. Verifiable data shows that more children have been injured and have died from the injections than from the COVID virus itself.

I am a physician of 21 years in healthcare. I am extremely concerned with the idea of mandating injections for children. The reactions and injuries we are seeing, as well as several of my nursing colleagues are terrifying.

The data is overwhelming but yet being censored and hidden as to the damage and danger of the COVID injections. We are seeing heart problems, neurological problems, changes in ovarian activity/dysmenorrhea, and so much more. Our overall death rate has gone from 10% to 40% and according to epidemiologists, it does NOT coincide with COVID deaths but with the timing that the injections were rolled out much later in 2021.

My doctor and nursing colleagues have asked their chief managers about reporting these adverse events to VAERS and they HADN'T EVEN HEARD OF IT. Only 1-10% of the injection injuries/deaths are being reported. Even those numbers being reported are astoundingly higher since the COVID vaccine started being injected.

In addition, it is well-documented that there are FULLY FDA licensed and CDC approved forms of early COVID treatment that have saved thousands. Those treatments are not being used and healthcare providers are getting fired for using those protocols. THE PROTOCOLS BEING USED NOW IN OUR HOSPITALS ARE KILLING PEOPLE, when we know better.

There have been no long term studies on adults and NONE on children due to the EUA. And in fact, if it were recognized in our healthcare system that other approved, successful medications were effective, the EUA would have to be removed, rendering the EUA inapplicable. We know that the survival rate for our young children from COVID is 99.9973%

History is in the making right now with a devastating effect on our innocent children of our future and unknowing, fearful, brainwashed adults. I am writing this letter to know that I did everything I could to stop the insanity. I hope to be on the side of history that DID THE RIGHT thing based on verifiable, expertly researched undeniable data and evidence.

Thank you in Health,
Dr. K. Thomas

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. I am currently taking classes to become a teacher and planning to teach in Washington, if these requirements are passed I will not be returning and teaching in Washington because these requirements are unlawful and ridiculous.

2. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

3. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

4. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Rubin, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity! Please do the right thing and do not require these vaccinations for school age children!

To whom it may concern,
I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children rarely get covid-19. If they do it is a mild case. Therefore, there is no need for them to get the shot.

The covid-19 shots have not gone through the rigorous studies that take 6 to 20 years to ensure the shots will not produce long-term diseases like cancer, diabetes, Etc. Since they are young and have their whole lives ahead of them they must not be given these experimental shots!

I opposed the mandating of these shots with the most extreme stance. And you must do the same. Do not cower to the pressure and do the right thing!

To whom it may concern ,

I am writing to express my concern for these upcoming bills and stand against proposed bills, WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100 and 246-105. Clinical trials for the Pfizer BioNtech for children 6 months of age and older will not be completed until 2026. Clinical trials for the vaccine currently being administered to our children that are under EUA are still recruiting and administering trial vaccinations until the completion of 2026. Clinical trial.gov identifier NCT04816643 states and is clear that these trials not only started on March 24th, 2021 but will not be completed until May 5th, 2026. There has clearly not been enough research to determine that this vaccine is safe and effective against covid-19. Please reconsider mandating these bills. Our lives and the lives of our children depend on it. Nothing should be mandated until these drugs are proven to be safe and effective for the extended amount of time needed to prove their effectiveness.

Thank you for your time...

Subject: concerns about content of Jan 12 discussion

External Email

Hello BOH members -

I have very serious concerns about the topics of upcoming discussion during the January 12th meeting regarding updating the WAC to include the Covid vaccinations.

Forcing all children and/or state residents to receive a vaccination - and particularly one that is still in experimental stage in the US - is doing a massive disservice to our greater good of public of health. I am seeing very large numbers of people now seriously questioning ALL vaccinations and there is an overall mistrust across all types of all healthcare - particularly among the organizations that have had the heaviest hand in letting staff go for not participating. To do this during the current variant surge that is not preventing vaccinated individuals from contracting the virus is especially damaging.

Thank you for your consideration in this matter,
Kathleen Pokorny

Subject: Concerns

External Email

To State Board of Health,

As a parent, teacher, and well-informed citizen, I am writing to express my concerns in regard to items on your meeting agenda.

Agenda Item #9 – Allowing local health departments to set up quarantine facilities and in some cases, detain people against their will. This is in direct conflict with our state constitution and is completely unnecessary in the current health situation. The vaccines have proven ineffective, as people still get Covid-19 after receiving them. Medically, it is proven that people develop natural immunity after having Covid-19. What justification would there be for quarantine facilities?

Agenda Item #11- Informed Choice Washington's Petition for Rulemaking (filed by Xavier Figueroa, Ph.D. on behalf of ICWA) requests a new rule that prohibits any EUA product, or any product that has not successfully complete Phase 3 trials to be added to mandatory school health requirements. I agree with this statement for the following reasons. #1. The current Covid -19 vaccines have not completed Phase 3 trials. #2. The current vaccines for Covid-19 are still in EUA. This means that they are supposed to only be applied in an emergency – not as a broad application to the entire public. #3. The EUA no longer should be applicable in this situation as current and further studies are finding many therapies for early treatment for Covid-19, which improves opportunities for natural immunities to develop. #4. The current vaccines are not preventing Covid-19. #5. According to the CDC's website VAERS, the current Covid-19 vaccines have a terrible record of adverse events and death. There is no data on safety over 3, 5, 10 years and beyond. It is not acceptable to vaccinate every child with a vaccine with this undeniably tragic safety level. The consequences could be devastating on our children!

Sincerely

Michelle Chace

External Email

I hope this email finds you and your family well.

A few days ago, during a WA State Board of Health meeting, the advisory group spoke of whether they should recommend adding Covid vaccination to the current WA vaccine schedule for school and daycare entry. Unfortunately public comments were not allowed. The advisory group would be making a recommendation for our children without hearing from the parents.

I oppose the Covid vaccine being added to the school and daycare schedule. Children have mild to no symptoms from the virus, and are thus the safest. Covid Vaccine inserts are none existent to the public, leaving us without a knowledgeable and informed choice. Pharmacists themselves do not have access to a vaccine insert. We are told to believe and take the plunge yet so many have had horrible and evenly deadly complications from these vaccines. Please urge the advisory group to be cautious and not make recommendations for the Covid vaccine to be added to the school and daycare schedule. Children are at extremely low risk for Covid and the vaccines are still only EUA.

Thank you for taking the time to read my opposition and concerns. I look forward to reading your reply.

Best regards,
Natalia

I understand the board is having a meeting on January 12th to decide whether Covid 19 vaccinations should be required for children attending school or childcare. Please do not require Covid 19 vaccinations for children. The virus has very little or no effects on children. The vaccine was only approved for emergency use. We have no idea what side effects the vaccine may have in many years to come. Why would you want to gamble on a child's future based on an experimental vaccine? This question to vaccinate a child or not should be left up to the parents.

Sincerely,

Nancy Leathers

Not only do I oppose this legislation I am absolutely shocked that the people we voted into office are even considering forcibly locking people up if they dont comply with their wishes.

This has absolutely gone far enough. It's disgusting

I am sincerely concerned for my children and grandchildren.
Especially those with anaphylaxis with vaccines;

1.

2.

The statements from the CDC, WHO, and WH about vaccine impact on transmission and infection "neither prevent the disease nor stop transmission." The above mentioned organizations, as well as, the Biden Administration have clearly stated this. It is obvious to me that these "vaccines" fall under the classification of medical procedures or treatments, not to traditional vaccines.

3. There is no FDA approved covid vaccine available in the USA that prevents transmission of the disease. I believe, you would be violating existing International Law with this mandate.

4. According to CDC & WHO data, there could be unknown risk to children. Their data shows clearly that across all variants, CHILDREN ARE AT THE LOWEST RISK for infection, transmission and severity.

5. These mandates have and will impact student enrollment and funding for schools. Anti-public school advocates have clearly achieved advances during the pandemic by dis-enrolling children from schools, which are government controlled. Check with districts and you will find, there is a multitude of parents who are vocally and actively opposed to school and childcare mandates. You will see an excess of one-fourth enrollment in local districts. This will have a significant negative impact on school funding when schools already claim their resources are stretched past the breaking point.

6. Many parents in Washington State hold strong family values and believe parents should control what is to be done, or not done, to their children; not the local State or national government.

Sincerely,
Karen Rothe

To Whom it May Concern:

I am writing in hopes that my opinion might be heard. I am completely against any of the proposed Covid Policies that are over reaching and immoral. Our founding Father's would be horrified if they knew what America has become today, especially after all they went through to make sure "America was Great" and protected. Why do we have a constitution if we do not use it? I completely understand that there is a virus out there and that people should use common sense as we should with any common cold, flu etc. However, we should NOT have our rights taken away because people fear the unknown. God has and always has had a "plan" for this world. After all He did say....If my people, which are called by my name, shall humble themselves, and pray, and seek my face, and turn from their wicked ways; then will I hear from heaven, and will forgive their sin, and will heal their land (2 Chronicles 7:14) I stand against the proposed WAC 246-100-070, WAC 246-100-045, WAC 246-100-40, WAC 246-100, WAC 246-105.
Thank you for allowing me to voice my opinion.

Because of Christ, I live:

Your gross overreach as a branch of government is out of hand. We are opposed to all proposed covid policies

Which are immoral and plain wrong.

We stand against these proposed WAC's; 246-100-070, 246-100-045, 246-100-040, 246-100, 246-105.

Rest assured you will lose MILLIONS in funding as my children will be pulled from school and i know thousands who will do the same. Bring back our constitution and what america was built on. Do the right thing, not the best thing to line your pockets.

The the wa state board of health:
To whom it may concern:

I would like to voice my concern and opposition to the upcoming proposals to be addressed at the 1/12/22 Public Meeting. Specifically, the proposal regarding using force to quarantine (WAC246-100-070) and adding the COVID vaccines to the list of required vaccines to attend public schools (WAC246-105).

I feel similarly towards both proposals in that they violate a person's right to exercise autonomy and completely disregards the conversation that happens between one and their medical doctor. These proposals take one's doctor and their medical advice completely out of the equation. This puts a person in unnecessary danger and puts the State in a position to be legally liable for damages in the event a person becomes sick or dies.

To unlawfully detain someone or use force for refusing to be vaccinated, quarantine, test, receive a medical exam or undergo treatment violates the Nuremberg code that makes ones consent absolutely essential. While the Nuremberg code pertains to medical doctors and experiments, it is still essential that one maintains their right to give consent.

To require children to receive a vaccine for a virus that does not affect them (or minimally) and that has irreversible damages, is criminal. The vaccine, once injected, causes the child's body to make toxic spike proteins. These proteins are what causes permanent damage to their brain (lesions), nervous system, heart (myocarditis and scarring), blood vessels (blood clots), reproductive systems and changes their immune system (genetical reset). This vaccine has not been adequately tested - it requires at least 5 years of testing/research to affirm that it does not cause further harm and risks. Our children represent zero danger to adults. If teachers and school staff are in fear of their health, they, as adults, have options to wear masks and receive a vaccine themselves. Why subject our children to irreparable danger when there are measures THEY can take to protect themselves? Our children's NATURAL immunity after getting COVID is critical to save future generations.

Thank you for your time.

Sincerely,
Kathryn Hansen

* I SUPPORT Informed Choice Washington's Petition for Rulemaking (see below) — our petition is item 11 on the January 12th agenda. It was filed by Xavier Figueroa, PhD, on behalf of ICWA, and asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Thank you for your consideration in this matter.

Kind regards,
Dr. Janelle Havelka DC

To All Board Members:

To put it simply, I am completely against all of the proposed covid policies as they are an absolute violation of our God given and human rights. These policies are overreaching and immoral. No one, or any government entity, has the right to make any policies that take away an individual's liberties and their pursuit for a happy life. We have been lied to for over the last 2 years about Covid and if you continue to implement these "rules" then you are complicit in perpetuating the lies. You must do the right thing and stand up for humanity by rejecting ALL of these proposed "rules".

Thank you. Please see the attached document.

Count 2: 18 USC § 2339– Conspiring to Commit Acts of Terrorism

Count 3. 15 U.S.C. §1-3 – conspiring to criminal commercial activity

Count 4. 18 USC § 175 – Funding and Creating a Biological Weapon

Count 5. 15 U.S.C. §8 – market manipulation and allocation

Count 6. 18 U.S.C. § 1001 – lying to Congress

Count 7. 15 U.S.C. § 19 – interlocking directorates

Count 8. 18 U.S. Code § 2384 - Seditious conspiracy

The Proposed Indictment

Throughout the decade of the 90s Pfizer sought to research, develop and patent a coronavirus (CoV) vaccine. Their first patent filing specifically recognizing the S-protein as the immunologic target for vaccines was filed on November 14, 1990 (U.S. Patent 6,372,224). With a focus on swine and canine gastroenteritis, these efforts showed little commercial promise and the patent was abandoned in April of 2000. During the same period, the National Institute for Allergy and Infectious Disease (NIAID) under the vaccine obsession of Dr. Anthony Fauci, funded Professor Ralph Baric at the University of North Carolina Chapel Hill. This program designed to commercially weaponize a naturally occurring toxin is the beginning of the criminal conspiracy and **violates 18 USC § 175, 15 USC § 1-3, and 15 USC § 8**) Dr. Baric's expertise was understanding how to modify components of the coronavirus associated with cardiomyopathy. NIAID Grants AI 23946 and GM63228 (leading to patent U.S. 7,279,327 "Methods for Producing Recombinant Coronavirus") was the NIH's first Gain-of-Function (GOF) project in which Dr. Baric created an "infectious, replication defective" clone of recombinant coronavirus. This work clearly defined a means of making a natural pathogen more harmful to humans by manipulating the Spike Protein and other receptor targets. A year after filing a patent on this GOF CoV, the world experienced the first outbreak of Severe Acute Respiratory Syndrome (SARS).

Under the guise of responding to a public health emergency, the United States Centers for Disease Control and Prevention (CDC) filed a patent application on the genome of SARS CoV on April 25, 2003. Accessing and manipulating the genomic data (which came from China making an “invention” claim by a U.S. entity illegal **violating 35 USC §101, 103**), Dr. Baric, Dr. Fauci, and the CDC **violated 18 USC § 175** (a felony). One year earlier, Dr. Baric and his team had already filed a patent which clearly the pathogen CDC claimed as novel in 2003. Three days after filing a patent on the genome, NIH-funded Sequoia Pharmaceuticals filed a patent for the vaccine on the virus invented a mere three days earlier. At the same time, in **violation of 15 USC § 19** Dr. Fauci was appointed to a board position with the Bill and Melinda Gates Foundation (a competitor in vaccine manufacturing) thereby beginning the interlocking directorate¹ anti-trust crime.

In 2005, the DARPA and MITRE hosted a conference in which the intentions of the U.S. Department of Defense was explicit. In a presentation focused on “Synthetic Coronaviruses Biohacking: Biological Warfare Enabling Technologies”, Dr. Baric presented the malleability of CoV as a biological warfare agent. **Violating 18 USC § 175** and inducing the non-competitive market allocation (**violating 15 USC § 8**) for years to follow, Dr. Baric and the U.S. Department of Defense spent over \$45 million in amplifying the toxicity of CoV and its chimeric derivatives.

From 2011 until the alleged COVID-19 pandemic, Dr. Fauci has routinely lamented about the inadequacy of public funding for his vaccine programs and the public’s general unwillingness to succumb to his insistence that everyone MUST be vaccinated against influenza. Despite repeated appropriations to advance vaccine dependency, his efforts have been largely unsuccessful. NIAID – under Dr. Fauci’s direct authorization – encouraged UNC Chapel Hill and Dr. Baric’s lab to ignore the GoF moratorium in a letter dated October 21, 2014. At that time, Drs. Fauci, Baric and EcoHealthAlliance’s Peter Daszak were in possession of an extremely dangerous Chinese pathogen identified a year earlier in Wuhan.²

While many illegal acts were committed by the conspirators leading up to 2015, the domestic terrorism program (**in violation of 18 USC § 2339**) was announced by NIAID-funded Daszak at the National Academy of Sciences. Here, he announced what was to become the domestic and global terrorism event branded COVID-19.

¹ We note that gain-of-function specialist, Dr. Ralph Baric, was both the recipient of millions of dollars of U.S. research grants from several federal agencies and sat on the World Health Organization’s International Committee on Taxonomy of Viruses (ICTV) and the *Coronaviridae* Study Group (CSG). In this capacity, he was both responsible for determining “novelty” of clades of virus species but directly benefitted from determining declarations of novelty in the form of new research funding authorizations and associated patenting and commercial collaboration. Together with CDC, NIAID, WHO, academic and commercial parties (including Johnson & Johnson; Sanofi and their several coronavirus patent-holding biotech companies; Moderna; Pfizer; Merck; BioNTech; AstraZeneca; Janssen; Ridgeback; Gilead (Dr. Baric’s alter ego); Sherlock Biosciences; and others), a powerful group of interests constituted what are “interlocking directorates” under U.S. anti-trust laws. Further, most of these entities, including the Federal Government ones **violated 35 USC § 200-206** by failing to disclose Federal Government interest in the remedies proposed.

These entities were affiliated with the WHO’s Global Preparedness Monitoring Board (GPMB) whose members were instrumental in the Open Philanthropy-funded global coronavirus pandemic “desk-top” exercise EVENT 201 in October 2019. This event, funded by the principal investor in Sherlock Biosciences (a beneficiary of the SARS CoV-2 EUA for CRISPR technology) and linking interlocking funding partner, the Bill and Melinda Gates Foundation into the GPMB mandated a respiratory disease global preparedness exercise to be completed by September 2020 and alerted us to anticipate an “epidemic” scenario. We expected to see such a scenario emerge from Wuhan or Guangdong China, northern Italy, Seattle, New York or a combination thereof, as Dr. Zhengli Shi and Dr. Baric’s work on zoonotic transmission of coronavirus identified overlapping mutations in coronavirus in bat populations located in these areas.

² By October 2013, the Wuhan Institute of Virology 1 coronavirus S1 spike protein was described in NIAID’s funded work in China. This work involved NIAID, USAID, and Peter Daszak, the head of EcoHealth Alliance. This work, funded under R01AI079231, was pivotal in isolating and manipulating viral fragments selected from sites across China which contained high risk for severe human response. (Ge, XY., Li, JL., Yang, XL. *et al.* Isolation and characterization of a bat SARS-like coronavirus that uses the ACE2 receptor. *Nature* **503**, 535–538 (2013).) The GoF work NIAID allowed to persist in the face of the moratorium was Dr. Baric’s work with this pathogen

*“...until an infectious disease crisis is very real, present, and at an emergency threshold, it is often largely ignored. **To sustain the funding base beyond the crisis, he said, we need to increase public understanding of the need for MCMs such as a pan-influenza or pan-coronavirus vaccine. A key driver is the media, and the economics follow the hype. We need to use that hype to our advantage to get to the real issues. Investors will respond if they see profit at the end of process,** Daszak stated.”³*

It is not surprising that one year later NIAID’s funding paid off with Dr. Baric’s lab announcing that the Wuhan-derived pathogen was “poised for human emergence”.⁴

Knowing that the U.S. Department of Health and Human Services (through CDC, NIH, NIAID, and their funded laboratories and commercial partners) had patents on each proposed element of medical counter measures and their funding, Dr. Fauci, Dr. Gao (China CDC), and Dr. Elias (Bill and Melinda Gates Foundation) conspired to commit acts of terror on the global population – including the citizens of the United States – when, in September 2019, they published the following mandate in **A World At Risk**:

“Countries, donors and multilateral institutions must be prepared for the worst. A rapidly spreading pandemic due to a lethal respiratory pathogen (whether naturally emergent or accidentally or deliberately released) poses additional preparedness requirements. Donors and multilateral institutions must ensure adequate investment in developing innovative vaccines and therapeutics, surge manufacturing capacity, broad-spectrum antivirals and appropriate non-pharmaceutical interventions. All countries must develop a system for immediately sharing genome sequences of any new pathogen for public health purposes along with the means to share limited medical countermeasures across countries.

Progress indicator(s) by September 2020

- *Donors and countries commit and identify timelines for: financing and development of a universal influenza vaccine, broad spectrum antivirals, and targeted therapeutics. WHO and its Member States develop options for standard procedures and timelines for sharing of sequence data, specimens, and medical countermeasures for pathogens other than influenza.*
- *Donors, countries and multilateral institutions develop a multi-year plan and approach for strengthening R&D research capacity, in advance of and during an epidemic.*
- *WHO, the United Nations Children’s Fund, the International Federation of Red Cross and Red Crescent Societies, academic and other partners identify strategies for increasing capacity and integration of social science approaches and researchers across the entire preparedness/response continuum.”⁵*

As if to confirm the utility of the September 2019 demand for “financing and development of” vaccine and the fortuitous SARS CoV-2 alleged outbreak in December of 2019, Dr. Fauci began gloating that his fortunes for

⁵ https://apps.who.int/gpmb/assets/annual_report/GPMB_annualreport_2019.pdf (page 8)

additional funding were likely changing for the better. In a February 2020 interview in **STAT**, he was quoted as follows:

“The emergence of the new virus is going to change that figure, likely considerably, Fauci said. “I don’t know how much it’s going to be. But I think it’s going to generate more sustained interest in coronaviruses because it’s very clear that coronaviruses can do really interesting things.”⁶

In November 2019 – one month before the alleged “outbreak” in Wuhan, Moderna entered into a material transfer agreement – brokered by the Vaccine Research Center at NIAID (at which UNC Chapel Hill alum Dr. Kizzy Corbett worked) – to access Dr. Baric’s Spike Protein data to commence vaccine development. In his own written statement obtained by the **Financial Times**, he refers to this agreement as being the foundation for the mRNA Moderna vaccine.⁷

To finalize the nature of the racketeering and anti-trust criminal conspiracy, when it came time to commercialize the NIH and DARPA owned spike protein and pass it off as a “vaccine” (in conflict with the standard for vaccines in statutory and scientific application), the Operation Warp Speed contract was awarded to DoD contraction ATI, a subsidiary of ANSER. In a graph reminiscent of the anti-trust hearings at the formation of the Clayton Act in the early 20th century, the identity of the interlocking conflicts of interests are presented in graphic relief. It is with no surprise that the result of this price-fixing conspiracy was the enrichment of the conspiring parties and the harm of consumers.

⁶ <https://www.statnews.com/2020/02/10/fluctuating-funding-and-flagging-interest-hurt-coronavirus-research/>

⁷ <https://pubmed.ncbi.nlm.nih.gov/32756549/>

Indeed, *the money followed the hype* and they *used the hype to get to the real issues*. *Investors follow where they see profit at the end of the process*.

And real Americans are dying each day because a criminal organization unleashed terror resulting in the deaths of Americans.

18 U.S.C. § 2331 §§ 802 – Acts of Domestic Terrorism resulting in death of American Citizens

Pub. L. No. 107-52 expanded the definition of terrorism to cover "domestic," as opposed to international, terrorism. A person engages in domestic terrorism if they do an act "dangerous to human life" that is a violation of the criminal laws of a state or the United States, if the act appears to be intended to: (i) intimidate or coerce a civilian population; (ii) influence the policy of a government by intimidation or coercion;

Every single Act, the declaration of the State of Emergency, the Emergency Use Authorization, the fraudulent face masks, the business closures, and the OSHA and CMS vaccine mandates are ALL admitted by the conspirators to be acts to coerce the population into taking a vaccine. Further, these acts disrupted the democracy of the United States of American and resulted in the violation of 18 USC § 2384. The conspirators announced it in 2015, then prepared the pathogen in 2016, and laid out the terror campaign in September 2019. And now they profit from the death of Americans.

Subject: Covid mandate proposal

External Email

I respectfully opposed the potential Covid vaccine mandate consideration for children 18 years in order to attend school in Wa. State. I don't oppose vaccines in general, rather the lack of effectiveness it has been on our population in general. Too many adults who have taken the vaccine have not been protected, which means more research needed to determine a safer vaccine. WAC 246-100 and 105 would not serve our community well. I can't imagine isolating those who choose not to be vaccinated.

Thank you,
Karl Zetterberg

Subject: Concern for Covid Vaccine to be added to required list for school enrollment.

External Email

Dear Washington State Board of Health,

I am writing with sincere concern regarding the direction of conversation around making the Covid vaccine a requirement for school enrollment. Understanding the severity and length of time that we have been dealing with this virus, I can understand that people want to do what is right to protect themselves and others. I too want to protect myself, my loved ones, and my community. That is why I take precautions wearing a mask, handwashing, limiting social interactions, etc. However, I cannot understand mandating that people who have a reasonable right to question the long term effects of the vaccine and make a personal choice to not vaccinate would be held to the fire to make a decision that we are not comfortable with or choose to pull I our child out of the school system. I have been a public school teacher in Washington state for 20+ years and that would not be my desire. However, I absolutely oppose any Covid vaccine requirements for school age children. Mandating the vaccine for school enrollment is a gross over-reach at this time, while at first glance the vaccine may be presenting as safe, there has not been enough years to determine long term effects. People have a right to make an informed decision, many people have felt that the information we have so far is enough for them to take a vaccine. Others, like myself, wish to have a bigger picture, especially considering vaccinated individuals can still spread and catch this virus. Please afford people the right to make this delicate medical and personal family decision on their own and not be put to the fire to take the shot.

Sincerely,

Jaime Beckland

Covid 19 vaccinations should absolutely not be mandatory, especially not be a requirement for school immunizations. Law Enforcement has no place in determining medical needs for my family or being involved in Covid 19 protocols, period. The fact that this is even on the table is horrifying. To unlawfully detain anyone in a quarantine facility is outrageous and appalling. As a parent, I make the medical decisions for myself and my child until she is old enough to do so for herself, NOT anyone else. Have you seen what's happened to children that have reacted to this vaccine? I have. Not something I'm willing to risk happening to my daughter. I have been told by someone that works in a hospital lab, as well as my midwife, that younger people have stronger immune systems so they tend to have more reactions (they are also pro vaccine). This makes NO sense to me. If their systems are stronger and react to this vaccine to the point of ending up in the ER because of this, WHY should this be required? This needs to be up to each family - not anyone else. I'm going to be expected to hold my child down while she screams, terrified, over a vaccine we don't want her to have - 2 different times?! No. Not acceptable.

Sincerely

Manny Ellsworth

Subject: COVID Detainment Emergency meeting - COMMENTS

External Email

To whom it may concern,

My name is Lauren Szczepanski, and I am a life long resident of WA state. My husband Marcin Szczepanski is a Lieutenant for the local Fire Department here in Gig Harbor, and we have two children ages 8 and 6. We have some huge concerns with the way COVID 19 has been handled by our state and need to voice our concerns before this meeting on Jan 12th.

I was recently made aware of this meeting happening and the topics that are being discussed regarding involuntary detainment and making injections a requirement for our children to attend school, and I am filled with rage that this state would even consider these two things as an option. The problem with our state and the one sided bias information they are sharing is making it nearly impossible to continue to live here. Vaccines are a choice, and should always be kept that way. Many families do not vaccinate their children from the start, and that is their choice. It may not be my choice, but that fact that we have that right is what this country is built off of.

Our entire family has experienced covid personally, and while it wasn't pleasant, it is not something we would ever consider injecting our children who it does not even affect, with a vaccine that does not work and comes with potentially seriously damaging side effects. The health and well being of our children is top priority for us, and without knowing the long term internal affects this vaccine has, especially on women's reproductive systems, we will not be complying with this states order to inject our children to attend school. This would be morally WRONG and pushing us closer to losing our rights as humans.

I personally received two doses of the Moderna earlier in 2021 and experienced horrible sickness and issues with my own reproductive system since. And I am a healthy 33 year old woman in great shape and not prior health issues. I will not be subjecting my daughter to possible long term issues and putting any potential roadblock in her way of having healthy children when she gets older. Also, my sister in law received the vaccine late in her pregnancy and ended up delivering two weeks early and the baby suffered severe seizures and stopped breathing for weeks after delivery. Doctors couldn't find a reason why, but after sharing her story we came to hear other similar stories happening to babies being born from women who received the vaccine while pregnant. But NO ONE is talking about the negative side of the vaccine, the harmful side. We are entitled to know all facts, and this country is hiding so much from us that we have to dig around and find it ourselves, and then be considered awful humans to don't care about others because we don't want to get vaccinated. It's wrong. Absolutely wrong.

I am begging this state to not enforce this injection rule for our children and our adults. We have to fight to keep our right as humans and citizens of this country. We cannot let fear and money from big Pharma dictate our decisions. It is not the health departments right to force this on residents of Washington. The health department should be properly communicating the pros and CONS of this vaccine and giving everyone their right to make their own decision.

Do not enforce this rule. Honest to God you will see teachers leave the state from every county, and parents take their children out of school to home school. The state will suffer when this happens.

Thank you.

-Lauren Szczepanski

Subject: Covid vaccine for school attendance

External Email

To whom it may concern.

I am a parent of two kids in the PSD school system .

It came to my attention that the board will be deciding whether to add Covid Vaccine as a requirement to be able to participate in school .

Let me be absolutely clear - keep this so called vaccine away from our kids . The side effects alone should give you pause. We are crippling our kids with myocarditis and other serious side effects for a virus that is a glorified cold?

The vax does not prevent getting the virus or transmitting it to others as do the childhood vaccinations currently in effect. So we inject our kids with something that does not protect them or others? Why? With a vaccine that had zero long term study?

I understand that some parents feel differently and it should be their choice whether to vax their kids with this joke of a vaccine. Just as it is MY choice whether I inoculate mine.

Some of the other things to consider are the mass exodus from the school system once this becomes a requirement as well as the lawsuits that will follow when, not if , kids will become injured from this "vaccine". And while the board might be protected from such a lawsuit, the individual members are not .

Thank you for you doing (I hope) the right thing , which is leaving this decision in the hands of parents .

To whom it may concern,

I have been a proud WA resident for well over 2 decades and never in my life did I think such a tyrannical and unconstitutional policy(s) would even be proposed in this beautiful state.

I am completely against any of the proposed Covid policies that are over reaching and immoral!

I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

Don't be in the wrong side of history.

FREE American,
Joshua Micu

Subject: COVID 19 vaccine requirement

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization.

The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense

(childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID.

Where there's no risk, there can be no benefit.

3. No one knows the long-term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Rubin, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you!

Subject: Covid mandates

External Email

To Whom It May Concern:

My first question is when did covid become a disease? To my knowledge it is a virus not a disease. Vaccinations are to prevent diseases. Second, the covid shots are not preventing people from getting the virus. In defending the shot I have heard it said that those that are "vaxed" experience milder symptoms. How do you know what the symptoms will be in each person? I had covid and the symptoms were very mild. I have not had the shot. Third, the focus in the media has been on reporting positive test, but the reality is that there have been very few deaths, especially in children, in recent months. The shot should be a choice not a mandate for everyone, especially children. There is almost no risk of death for children. The risk of side effects from the shot is greater than the risk of death from the virus. These mandates rob us of our freedom. To choose for ourselves and our children what is best for our bodies and our health is our right as American citizens. No one should have the right to choose for us.

Subject: Covid 19 injections, proposed actions

External Email

January 5, 2022

Dear WA State Board of Health, employees and associates and TAP:

We now know that the covid 19 injections not only do not prevent infection, transmission, hospitalization and death of covid 19, but they are also a considerable health risk. Why would anyone conceive of including such on a childhood (or any) vaccination schedule? Have you not done your due diligence in researching the data and facts around this hastily rolled out injection? To date, there is not even possibility of long term or phase 3 trials being completed. The risk of a child dying from covid 19, is less than .01 percent. This vaccine has already proven to be more dangerous to children than covid 19 itself.

It is your duty to search out these facts away from vested and conflicts of interests and learn for yourselves. Thousands of highly esteemed doctors and scientists are speaking out about what the data and science is showing and they are voicing their objections to, and abhorrence for, these forced injections. These doctors and scientists speaking facts and truth against a narrative are being censored from social and main stream media and academia. Why is that?

Are you aware of the VAERS? How many deaths from this forced injection are acceptable for you? I say not even 1 is acceptable, especially for a virus with a 99.9 + % recovery rate in children! Why won't Pfizer release all their data on these injections? Are you willing to take personal responsibility for the lives of children and adults you will maim and destroy by facilitating approval for this atrocity? Are you willing to break state and federal laws, US codes and constitutional protections to push this agenda? You will also be living in the state and country you chose to destroy personal protections from the real danger of an overreaching government in.

When presented with reality and all of the facts, the only conclusion one can reach for anyone supporting this agenda is:

1. They are either ignorant to facts, science and truth because of censorship and personally held distorted beliefs.
2. They are mentally ill, compromised or unstable.
3. They know what they are doing and are benefiting in some degenerative way from pushing this agenda.

In any case, those will not escape this horrific machine being fed and will not be immune to the consequences of their actions and madness.

We know the vaccine industry is pushing this injection for it's own reasons. We also know, based on wording in the current law, an approval on the childhood vaccine schedule would mean securing the vaccine industry additional liability protection.

To all of you in positions of importance regarding this matter: We are watching you, and many more of us are becoming aware by the hour. All of the money on Earth will never supersede truth, you cannot stop or silence it. You will either be held accountable for your actions or you will reap untold reward. Get on the right side of history and do the right thing.

Sincerely,

The majority

Regarding: Jan. 12 meeting on Covid policies

Ladies and Gentlemen of the Board:

I will keep this brief. Given what we now know about transmission, efficacy of injections, survivability, (especially for children) and therapeutic treatments; it seems ludicrous to me that you would consider emergency containment policies for and covid injections for children as immunization requirements as a rational response in your deliberations today. To me, these policies appear to be a disproportionate response and an affront to civil liberties.

I urge you to reject the adoption of these policies.

Thank you for considering my communication.

External Email

To all Washington State Board of Health members,

I, and my family, are completely against all additions of the COVID "vaccines" into any and all of the WAC codes of our state and the requirements for attending school in our state. The COVID "vaccines" are an experimental medical procedure and should NOT be mandated or forced on any individual. Neither should there be detention camps for those who choose not to have these experimental procedures as this would be medical tyranny and kidnapping. I remind you all of your obligation to adhere to the US Constitution, as it is the Supreme Law of the Land. Any and all laws created within individual states CANNOT violate any part of it and must comply with it, and the WA State Constitution, which at the beginning very clearly declares the US Constitution to be the Supreme Law of the Land. I demand you vote no on these matters, as the decisions about these things should be made based NOT on your personal opinions or the agendas of any special interest groups that may want to pay you off, but rather based on what the US Constitution does, or does not allow, and the actual scientific facts and data of an unbiased third party organization with no conflicts of interest regarding the outcomes. You simply CANNOT just "do what you're told" if it is in violation of the Supreme Law of our land.

Thank you.

To whom it may concern,

I am absolutely against any of the proposed covid policies that are overreaching and against my religious freedoms and autonomous rights.
I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

It is absurd to think anyone should be forced to receive a vaccine that does NOT prevent contracting the virus nor spreading the virus. It is absurd to mandate a vaccine when Covid-19 has a low fatality rate. It is absurd to mandate a vaccine when most age groups, specifically children, do not have a high risk of serious illness due to Covid-19.

It is up to the PARENTS whether or not an emergency vaccine should enter any minor. There are zero long term studies of the side affects (due to the vaccine being new) of this vaccine which should worry any health department. All long term expectations of the vaccine are speculative and therefore should not be regulated for anyone.
No child should be subjected to an experiment. Especially a mandated experiment.

Respectfully,

Jolie Winkler

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

-During the October 26th FDA advisory committee meeting, 16 of the 18 members were very clear that they did not believe "otherwise healthy" children do NOT need this injection. It was specifically stated in their closing comments that they were recommending approval so that "high risk children in conjunction with their parents and doctors" could have it available. They also noted that though some states may try to "mandate" it, they couldn't let that deter them from making it available to high risk kids that may need it.

-Federal Emergency Use Authorization statutes prohibit school mandates of EUA products. The only FDA approved version is not yet available in the United States. Phase 3 clinical trials of COVID-19 vaccines are not yet completed. C4591007—the main clinical trial in children and young adults with BNT162b2—has an estimated completion date of May 5, 2026.

Source:<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fclinicaltrials.gov%2Fct2%2F>

-The vaccine formulation now being given to U.S. children aged 5-11 is NOT the same formulation used in the clinical trials, and NOT the same formulation that has been administered to all other age groups under EUA. So even when current ongoing clinical trials are complete, the results cannot be assumed to be relevant to the safety or effectiveness of the new formulation.

-Not having language that recognizes and acknowledges innate immunity of the Covid 19 recovered is irresponsible medicine and employs a one size fits all medical approach that does not take into account the individual health needs of children.

-Children are the least affected by this virus regarding severity and most at risk of unknown long term effects.

Thank you for your time

Subject: Covid 19 School Requirement

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Dear WA state representatives & government leaders,

I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

I am completely against any of the proposed policies that discuss detaining people or groups of people involuntarily.

I believe in the four main principles of ethics that include autonomy, beneficence, nonmaleficence, and justice. I am an advocate for informed consent and against any kind of coerced or forced medical treatments that are involuntary, especially if there are any risks of injury to the individual involved.

May you highly consider these principles & ethical values as you make important decisions for the state of Washington.

Thank you,

Subject: COVID 19 January 12th Agenda

External Email

I am categorically against any of the proposed Covid-19 policies changes to WA state code. First, mandatory vaccination for school aged children. Children are not even threatened by death from Covid. They are 14 times more likely to die from automobile accidents or suicide than from this virus. They are more likely to suffer from adverse reactions and death resulting from the vaccine according to data. The argument that it will prevent transmission and catching the virus has been proven false. They can catch and transmit while being vaccinated. We are seeing this at a massive scale with Omicron. The vaccines are under emergency use authorization and have not been proven to be safe. There have been zero studies on the affects to fertility while the spike proteins are known to have negative effects on female egg production. Subjecting our children to a vaccine that is not proven safe and has known adverse reactions for a virus that does not threaten their lives is nothing more than child abuse. Secondly, involuntary quarantine is an attack on basic human rights. It is frightenly similar to Japanese interment camps in World War II and what happened to people of dissenting views in the USSR during Communist rule. Policies like this are threat to the core our freedoms and anyone in government positions who promote to subject people to this should be immediately relieved of their positions. You work for the people, and creating fear and isolating people for their views, rights, and personal choices is constitutionally and morally bankrupt. Thank you for your time.

Subject: Concerning proposed policies

External Email

Regarding the proposed policies for the upcoming meeting, I STRONGLY oppose them. To involuntarily detain people over something that has a 99% survival rate is unconstitutional and just not something that should even be considered, purr act of evil.... to mandate kids receive a vaccine that has high risks of myocarditis and teachers having to be taught signs of symptoms of cardiac arrest and yet actual Covid has less effects on them, is not right... it should be parent choice what happens to their children, they are the ones to birth them, raise them, feed them, etc.. they should be the ones to decide on vaccines...NOT THE GOVERNMENT!

NONE OF THIS IS OKAY. STOP THIS INSANITY NOW!

AGAINST THE PROPOSED POLICIES:

- Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Please don't allow this to happen. Covid is as common as the cold we know many people who are completely fine and had it. There are zillion diseases in the world and we can't go crazy over every single one. Health and body decisions are extremely intimate and private and making this law to be implemented for Covid is the beginning of an endless tyranny in this state. Not only privacy is concerning but how this virus is blown out of proportion to be used to control families not to mention the heartbreak of having someone make a medical decision for you. I am a voice for many families and believe me there are people who have no clue about what's happening if they knew they'll email you too. Have mercy already with this Covid control thing!

Subject: Covid 19 must not be included in WAC current infectious disease codes

External Email

It is a serious overreach by the state of Washington to include Covid 19 in the list of infectious diseases. The annual cold and flu season has never been treated with this level of fear mongering and they both spread quite easily and the flu has always resulted in deaths of the sick and elderly.

Two weeks to flatten the curve has become two years of tyranny by our governor. This never was an emergency situation.

The survival rate from Covid 19 is and has always been over 99%. The shots do not stop people from getting or spreading the virus, because it is a virus. Remember being told a virus always has to run its course? Changing the definition of words to support what is happening does not change reality.

The American people and Washingtonians are waking up to the lies, suppression of alternative information, including prophylactic measures, and misrepresentation of the truth.

We are responsible for our own bodies, not the government.

Do not move forward with this measure.

I just watched a video with Dr. Fauci talking about children with covid verses children being hospitalized because of covid. He explained a child could be hospitalized because of a broken leg but because everyone is tested for covid when entering hospitalization it is discovered he has asymptomatic covid. He said this leads to an overcount of covid related hospitalizations in children. Deaths because of covid are miniscule in children as well as hospitalizations because of covid therefore why would we risk adverse effects from a not fully tested vaccine on children when the disease poses so little risk to them. Also it has been shown that while the vaccine may mitigate the symptoms it does not prevent the catching or spreading of the disease and may even pose a false sense of security and encourage risky behavior. And why are you mandating a vaccine that does not address the current variants. It is reported that the vaccine and boosters do not address the virus mutations; it only addresses the spike protein of the original covid19 form of the virus.

Mandating anything is very risky. Think about it. What if someone decides that everyone must adopt a certain behavior but in your educated opinion you do not agree. But because they have decided to overreach their power, your freedom is taken away. The power is not always in the hands of those we agree with. Our American form of government has a system of checks and balances to guard against abuse of power. Preserve and enjoy that protection.

Subject: Concerns in regard to Jan 12 Meeting

External Email

Dear Board Members,

Please consider this email as a call to protect our Constitutional rights and to have choice in what we do with our bodies and how we tend to the care of our children.

The right to medical freedom and the freedom to choose what is best for our family is so important and if we lose this we will never get this back. We have seen time and time again if you allow a little over reach to occur then it wont stop.

Please do not disregard this voice because all of us Americans want our freedoms and we must consider the technologies they are about to engage in and many other things staring us in the face and what detrimental consequences these may have on "humanity" and decide if it's really worth this step you are about to take. Also, the emotional changes that will occur to our culture and how interactions will be among the people in the end. This could really turn out to be a very big battle that we may not be prepared to experience and by then it will be too late.

I beg you to please vote NO against this action and allow our freedoms to prevail .

Thank you,
SDL

Subject: COVID 19 vaccine

External Email

Dear WSBOH,

Please do not make Covid 19 vaccines mandatory for all children to attend school or daycare in Washington State. Children are not at any high risk in getting COVID and have the lowest death rate for it. These vaccines are only approved under emergency authorization and have not been proven to have many ill side effects. I believe it would be a mistake and potentially more dangerous to children who have such little risk even of being hospitalized from the Covid-19 virus to require them to receive the vaccine.

Thank you for considering,

Kellye Hall

.

To whom it may concern. If the Washington board of health objectives are to truly help keep Washington citizens safe, then passing these codes into law will not meet that objective. I fear that trying to detain citizens Because of the results of some test will result in more death and injuries then the virus will inflict. We have the right to make our own decisions. We have the right to keep our own council. What you are proposing to put into law was what the Germans did to the Jewish people (just using a different Avenue). Please do not impose your own will over the free will of the people.

Subject: COVID 19 vaccine requirement for schools in Washington State.

External Email

Washington State Board of Health,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>))

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children. Thank you for your consideration in this serious matter. Sincerely,

Jerry and Karen Snyder

Subject: Concern for Covid Vaccine to be added to required list for school enrollment.

External Email

Dear Washington State Board of Health,

I am writing with sincere concern regarding the direction of conversation around making the Covid vaccine a requirement for school enrollment. Understanding the severity and length of time that we have been dealing with this virus, I can understand that people want to do what is right to protect themselves and others. I too want to protect myself, my loved ones, and my community. That is why I take precautions wearing a mask, handwashing, limiting social interactions, etc. However, I cannot understand mandating that people who have a reasonable right to question the long term effects of the vaccine and make a personal choice to not vaccinate would be held to the fire to make a decision that we are not comfortable with or choose to pull our child out of the school system. I have been a public school teacher in Washington state for 20+ years and that would not be my desire. However, I absolutely oppose any Covid vaccine requirements for school age children. Mandating the vaccine for school enrollment is a gross over-reach at this time, while at first glance the vaccine may be presenting as safe, there has not been enough years to determine long term effects. People have a right to make an informed decision, many people have felt that the information we have so far is enough for them to take a vaccine. Others, like myself, wish to have a bigger picture, especially considering vaccinated individuals can still spread and catch this virus. Please afford people the right to make this delicate medical and personal family decision on their own and not be put to the fire to take the shot.

Sincerely,
Lola Ybarra

I write this in regards to the WAC 246-100 rule making that would expand authority to involuntary quarantine individuals. I strongly oppose this.

I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

Children are extremely low risk for Covid.

The vaccines are still only EUA and have not fully been approved for anyone.

There are no long term studies to document any history of safety.

Studies document that vaccinated and unvaccinated can both transmit Covid therefore the Vaccine does NOT stop the spread of the covid disease but only helps to prevent hospitalization and death of the individual.

I write this not only as a parent and citizen of Washington state but as a healthcare provider that has worked through the last two years with the general public. Stop. We in Washington are no better off in regards to covid than other states that have no or limited restrictions. Please stop with the power grabs and serve the people you are suppose to serve.

To whom this may concern,
I don't believe that the government should be forcing anyone to inject themselves with the Covid19 vaccine. I have received 2 vaccine shots and have had negative health reactions because of the vaccine or the components that were in the vaccine. I also have had Covid19 in October,2020 and recovered fully.

I do not agree that the government should also force our children to be vaccinated as well. When their success rate of recovery is so high.

Thank you for your time.

External Email

Good afternoon,

I write you to let you know I am completely against any of the overreaching covid-19 policies that are being proposed. Not only are they unethical, immoral, illegal and anti science, but is a blatant over reach of power.

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools. Due to many factors some including:

- Children are at extremely low risk for Covid
- The vaccines are still only EUA (emergency use authorized)
- There are no long-term studies to document any history of safety
- Studies do not document that vaccinated and unvaccinated can both transmit Covid, therefore,
- The vaccine does NOT stop the spread of the disease, even in the vaccinated.

If you agree to any of this malice...consider yourself with blood of innocent children on your hands.

I am against WAC 246-100-070, WAC 246-100-045, WAC 246-100-040.

Concerned patriot,
Molly Rohde

Please leave the decision to vaccinate children to the people who are responsible for them! Parents have the sole right to decide for their children what medical needs are best. No governing body or elected official has the right to demand medical needs for MY child. My husband and I will decide along with our trusted medical professional what is best for our child.

Schools have already proven they can handle the requirements to keep covid 19 from spreading through classrooms and it's working! Why would you require any further steps?

If you choose to move forward with a vaccine requirement for public schools I hope you understand the amount of funding ALL school districts will loose from the number of parents that WILL choose to remove their children from WA public schools. This is the last thing WA schools and children need right now. The loss in quality education will be unimaginable for the rest of these children's lives.

Please don't require unnecessary steps that could damage a family's well-being and any child's future.

To whom it may concern,

As a life-long Washington State Resident, I am deeply concerned that the Department of Health is considering these unreasonable measures. The use of law enforcement to coerce the citizens of this state to go against their conscience, follow unsupported/unbiased presuppositions, and submit to tyrannical authority is un-American. Our freedom is founded on the right of the individual to think, decide, and act according to conscience and personal will.

My request is that you reject these unreasonable proposals, and leave health decisions in the hands of the individual and not the government. This is a slippery slope, and once the government is given the right to make health decisions for its citizens, there will no longer be true safety for the citizens.

Dear Board of Health,
First let me say thank you for serving on this board. Second, I want to let you know that I oppose the Board's formation of a Technical Advisory Group to review information about Covid-19 shots for consideration of mandating shots for school. Covid-19 mandates should not exist at all.

What I do support is that you the Board of Health establish a new rule that prohibits you from adding any EUA (Emergency Use Authorized) product or any licensed product that lacks completed Phase 3 trials studies, to the school required list.

Vaccines of any kind should be left up to parents and guardians. Adults should also be able to make their own decisions about what vaccines they choose to take. Our bodies, our decisions. No one should be forced to take the Covid-19 vaccine.

Please take my comments seriously and don't just brush them aside for your proposed agenda. Every voice should be heard and regarded.

Thank You,
Juanita Butler

Fwd: January 12 Meeting- Current infectious disease WAC codes to include Covid-19 for all WA State residents.

Send an email to these people by tomorrow!! This is the one I sent. They are trying to use the WAC's to set up camps in WA to force people into and to require the vaccine for ALL WA schools.

Subject: January 12 Meeting- Current infectious disease WAC codes to include Covid-19 for all WA State residents.

Hello,

I'm concerned about the WAC's being reviewed to possibly be revised and add to them. You don't have the right to decide if a child gets vaccinated or to decide if you can use law-enforcement to detain me and or my family if you choose to do so. The following proposed policies/WAC's are unconstitutional! .

PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC

This blatant abuse of power needs to stop. I am NOT in support and oppose these possible changes. Please don't do this.

Thank you,

Good morning,

I am writing as a concerned Washingtonian in Regards to new statutes being looked at for vaccine requirements and forced protective measures.

I am completely against any of the proposed Covid policies that are overreaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

Do not pass new proposals regarding these items. Encourage everyone around you to not support these proposals and to speak up against them.

Thank you,

Kellie Robinson

The following post is circulating Facebook... please tell me that this is not true?
Is our state really following in Nazi Germany foot steps???
Are we really looking to strip people of their medical freedoms and lock them up in concentration camps?
Do we understand how ludicrous this is???

Please respond and let me know that this is a hoax please.

Sincerely
Jessica Hubbard

Here is the post:

Friends & Family,

RED ALERT!

On Jan. 12th starting at 9:30 AM – 3:30 PM, the WA State Board of Health will discuss applying current infectious disease WAC codes to include Covid-19 for all WA State residents. Zoom meeting details below. Please attend and show them you are listening.

THESE ARE THE PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

YOU MUST LET YOUR VOICE BE HEARD!

Click [HERE](#) to send an email to the WA State Board of Health.

It must be received by Noon, Friday, January 7. If this link works with your email server, it will populate an email for you, with the board of health email address, the subject line and body of the email. All you would have to do is sign your name at the bottom of the email and include your address or city.**

**If for any reason the link does not work on your computer or phone, try another device. The link is written in HTML code and may not work on all mail servers or devices. If you still can't get the link to work properly, you can copy and paste the email address, the subject and the message below into one of your personal emails.

In the To Field, copy and paste this address: wsboh@sboh.wa.gov
<<mailto:wsboh@sboh.wa.gov>>

In the Subject Field, copy and paste this: NO on Unconstitutional Vaccine Agenda

In the Body of the Email, copy and paste this message or write your own message:

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.
Signed,

YOUR NAME

Subject: Covid 19 Vaccine Mandates for children

External Email

Good morning,

I am writing to implore the Washington State Board of Health to NOT enact mandates, recommendations, or requirements for school aged children regarding the Covid 19 vaccine.

We do NOT want to be a pioneer in this uncharted territory. The consequences will be devastating, broad and long lasting. If you have not listened to any information set forth on this topic by vaccinologist and inventor of MRNA vaccines, Dr. Robert Malone, you should do so immediately.

I am a parent of a 14 year old. Healthy child. He is an athlete. He is already suffering psychological repercussions from the mask mandates, lock downs and social distancing imposed unnecessarily by the schools. He tells me school feels like prison.

Being forced to receive a non FDA approved injection for children to attend school, for novel Coronavirus Covid 19, which is not a threat to most children, is criminal and unconstitutional.

Parents deserve medical autonomy over their children and deserve the respect to make such potentially life altering decisions.

I fear if these vaccinations are compulsory, our schools will never recover. Every momma bear I know is willing to protect their children at all costs. The public school system will suffer, widening the already large gap in the socio economic divide. Most people I know are prepared for alternatives such as private school or other means of providing their child an education without putting their health at risk.

If these vaccinations are recommended, mandated, or required, the State of Washington is opening itself up to a long road of potential litigation down the road. Federal courts are beginning to rule against the mandates, and the State jurisdictions will not be far behind.

Please hear my voice. I am a mother, with the reasonable request that my child, and others in the State of Washington be allowed an education, without the looming threat of being subjected to forced medical experimentation, with no immediate recourse for the potential onslaught of damages.

Thank you for your time.
Please feel free to contact me with any questions.

Regards,

Michelle Alexander

Subject: COVID 19 vaccine requirement for schools in Washington State

External Email

To Whom This May Concern:

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>>)

4. As American Citizens we have Unalienable Rights which are written and guaranteed In The Constitution of the United States of America. Everyone has the right to personal choices and no one can be forced into an experimental vaccine. This goes against the Nuemburg Code.

5. It has been proven that Natural Immunity is stronger than any vaccine out there. All people should be allowed to prove whether or not they have had COVID already and natural immunity should be equal to being vaccinated.

Force vaccinating healthy children when there are other successful ways to deal with this COVID 19 VIRUS is not safe at all for short term or long term health. Children have been proven to have mild or no symptoms to the COVID 19 which mostly does not affect them with sickness. It is wrong to force vaccination on innocent children just make adults feel safe is very low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Brittany Cseh

External Email

Hello,

I live in North Bend, WA and my son attends a private Christian school.

Please do not add any covid vaccines to the already long list of child vaccines required to attend school. Covid-19 poses almost zero risk to children, and there is no liability should a child suffer a harmful reaction.

Our state is becoming more and more divided politically and socially. These vaccine mandates are yet another way that one set of people are being pushed out of mainstream society (and sometimes out of the state). Please let parents choose how to care for their children.

We the people will NOT allow our medical freedom to be stripped away from us.

I am asking you to carefully consider the repercussions. Getting a vaccine should be a choice between the citizens and our healthcare providers not the county or the state to be involved in. The state of Washington and Pierce County are trying to make medical decisions for us. What's next are you going to not let us have the choice to get an abortion if I decide that's what best for us?

You guys are over stepping and violating our constitutional rights. Many people have already moved out of the state due to your requirements these proposed changes will only make more people flee Washington.

Our state has one of the highest vaccination rates nation wide, some of the strictest protocols and rules for masks and vaccinations and yet we still have one of the highest rates of Covid so what makes you believe implementing more policies will help? Why not follow suit of other states who are letting people live their lives and have lower Covid rates.

WE WILL NOT GIVE UP WE WILL NOT STAND QUIET WHILE YOU TRY TO STRIP US OF OUR MEDICAL FREEDOM!

You are violating our constitutional rights

Sincerely concerned Washington state citizen,

Kirsten

How dare the State think they know better than my doctor that I should be vaccinated!!!
This action is no better

than in Australia!!! And the fact that you make no allowances for those of us who have
already had COVID speaks of the State's ignorance.

This vaccine is not a vaccine as it does not prevent us from getting the virus as our
government/state first told us.

Where is the herd immunity that the President assured us would happen?

I am a free American, not a slave and I GET TO DECIDE whether I want the vaccine. This
is still in the experimental stage and I have no desire to be the federal/state's guinea pig!
There is not enough information for me to decide on whether I want this vaccine.

In my opinion this is a political power grab and that the federal government is in cahoots
with the BIG PHARMA.

You promised that the vaccine would stop the virus; now we are required to have booster
shots. We have never had so many doctors contest this virus. It doesn't stop the virus,
only makes it less likely we would be hospitalized.

When you figure out the percentage of people infected versus those who die, is not
enough to insist that we get vaccinated.

I am willing to wear a mask, I do. I social distance, I use hand sanitizer regularly, I avoid
gatherings. BUT I REFUSE TO TAKE THIS CONTROVERSIAL VACCINE AND I WILL SUE
ANYONE WHO THINKS THAT THEY CAN FORCE ME TO DO SO OR TO QUARANTINE IN
ANY PLACE BUT MY HOME AND I DECIDE WHETHER I NEED TO QUARANTINE.

THIS MANDATE AGAINST OUR CITIZENS IS WRONG AND WE SHOULD BE ABLE TO VOTE
ON THIS!!!

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable and it is survivable by more than 99 percent of the population. Our family of six all contract Covid last summer and recovered easily. For all of us, it was like having a bad flu.

It is now showing in the data, that vaccines have little effect on the Covid virus. Even people fully vaccinated are now getting sick and spreading it.

Including Covid vaccines as a requirement for attending public school is totally unnecessary. Children have little risk from Covid-19, but they do have a greater risk from the Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. They also do NOT have the right to force vaccines on citizens who do not choose them.

This does not seem to be about health, but control. It is NOT in the purview of the Washington State Department of Health or ANY elected official or unelected state employee. These decisions are the right of every citizen and NO law, mandate, code or policy can override those rights. We are NOT granted rights from the State. The State is REQUIRED to protect our rights and not infringe on them.

Sincerely,
Jennifer Holmes

To whom it may concern:

I am writing you to urge you to stand up against the push for vaccine mandates (for children and adults) and to stand for medical freedom of choice. There are not enough long term studies regarding the use of the Covid-19 vaccine and the option of natural immunity needs to be a part of this conversation, if we are truly wanting to follow the science.

Even the CDC and Dr. Anthony Fauci have admitted that the vaccine itself does not stop transmission or infection. This is the logical disconnect between facts and political agenda.

Sadly, with the push for this and the proposed policies to allow health officers to use law enforcement to order persons involuntarily to isolation facilities or coerced medical intervention, Washington board of health is playing with medical tyranny. Not only is all of this discussion in direct violation of the Washington State Constitution and the US Constitution, the proposed policies are in direct violation of the Nuremberg code article 6 section 3 that states: No government can mandate or force medical treatment without individual consent.

Please stand for medical freedom of choice for the citizens of Washington.

Thank you for your concern and care for citizens of Washington,
Margo Dahl-

I am completely against any of the proposed Covid Policies that are over reaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

FURTHER, it is a known fact that the reason they want children to take this shot, is to remove liability from the pharmaceutical companies.

Subject: School Vaccine Requirement

External Email

Here is some wording you can copy and paste and then include your own personal story or voice.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age.

To Whom It May Concern,

I OPPOSE Agenda Item #8, the Board's formation of a Technical Advisory Group to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose COVID-19 shot mandates, period!

I SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Sincerely,

Kim Davey

To the Washington State Board of Health:

I've lived in WA state my entire life. I love this state. I want to continue to raise my family here., I understand there are proposals to add COVID vaccines as a requirement for children to attend school. As a parent (of six children), I strongly urge you to reconsider making this a requirement. Statistically, children are at little risk of suffering from major complications from COVID. I will not be getting my children vaccinated unnecessarily, just to attend school. They have all already had COVID, my husband and myself are already vaccinated (and have had COVID), and I will not take the risk of my children experiencing negative side effects from the vaccine itself, when they don't need it. I will unenroll my children from public school, as will MANY people in my community. Please don't do it.

Thank you,
Kimberly Hall

External Email

I, Kati Spencer, a registered Voter and resident of Spokane WA wholeheartedly oppose any and all CoVID vaccine requirements for any minor child in WA state. I oppose any medical treatment, medical examination or counseling (WAC 246-100) without parental consent. I will not allow local health officials to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC-246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040) This includes the requirement of the covid-19 injection as a part of school immunization requirements using WAC 246-105.

It is an infringement on our rights as citizens and our ability to do what is best for our children and ourselves. The government doesn't have the right to tell us as parents or US citizens what we can and cannot do with our own bodies. We have the right to medical autonomy and it needs to stay that way. The government needs to get out of our medical decisions.

This is an atrocious abuse of power and we will not stand for it.

Hello,

In so far as you touch upon the upcoming state health decisions, I am emailing to urge you to resist policies that restrict the rights of un-inoculated people or anyone due to COVID. I refer specifically to the board's scheduled discussion on the 12th, proposing to allow involuntary detention of people who refuse to get the shot (WAC 246-100) and proposing to require the shot for kids going to school. Let me refer you to our state constitution, Article I, Section I, which says that "all political power is inherent in the people, and governments derive their just powers from the consent of the governed, and

are established to protect and maintain individual rights." Consequently, an unelected board trying to dismantle the rights of people who do not consent to the shot is in violation of our Constitution, Article I, Section I. Additionally, you would be in violation of other sections, for example 2, 3, 4, 7, 10, and 11. These are in accordance with natural law and morality. The sooner all this overreach from state leaders ends, the better. The power is with the people, and we see what you are doing.

Best,

Tova Forman

Subject: Schools in the State of Washington

External Email

Hello, Ms. Lang,

I have a child in a middle school in Washington. I would like it to be made known that I am greatly concerned about the possibility of mandating that school-aged children be required to receive a COVID-19 shot in order to attend school.

First, as has been made abundantly clear, these COVID-19 shots have been completely ineffective in preventing the spread of the corona virus.

Second, the only available shots in the U.S. are those under experimental use authorization by the FDA. This means that there are no fully vetted vaccines for the COVID-19 virus available.

Third, there is evidence that these shots have created adverse reactions in many younger people who have received the inoculations. These adverse reactions, like myocarditis, cause irreparable damage to the heart of children which have these consequences.

Please do not approve any action which would mandate that school-aged children would be required to receive these COVID-19 shots. Doing so would, in my opinion, place the Washington State Board of Health in a place of enmity with myself and other citizens of the State of Washington.

Thank you for your time in reading this message.

Sincerely,

Neil Berry

I object to allowing such a young vaccination to be required for young children to attend school. There are too many risks involved when we don't know how they will be affected long term. This should be a voluntary vaccine for those who are high risk or have high risk in their household. If this was required I would choose to homeschool my children and I know many others who would do the same. Which is unfair to the district as well as our young people.

To whom it may concern:

I am writing to ask you to vote against all vaccine mandates. Vaccine mandates violate fundamental human rights, notably the right to prior, free and informed consent for medical interventions. In a free society, everyone should have complete power and control over their own bodies. I urge you to do all in your power to ensure a return to the democratic principles upon which this country was founded. Especially, when the chances of survival from COVID is 98.23% for adults and even higher for children at 99.985%.

I realize your role is to maintain the legislation that "it is necessary to protect the health of the public and individuals by providing a means for the eventual achievement of full immunization of school-age children against certain vaccine-preventable diseases" (RCW 28A.210.060

<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx?_id=6879&context=1
through 28A.210.170

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx>). Furthermore, your responsibility is to make decisions for public health for the "immediate preservation of the public peace, health, and safety, the support of the state government and its existing public institutions" (1979 ex.s. c 118 § 13).

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fleg.wa.gov%2FCodeReviser%2Fdco>
). Unfortunately, the current inoculations have not proven to protect the public from

transmission or infection of the Covid-19 virus . The inoculation concoctions still have an EUA status and have not completed Phase III safety trials. EUA products are, by definition, experimental and thus require the right to refuse. Under the Nuremberg Code, the foundation of ethical medicine, no one may be coerced to participate in a medical experiment. No healthy adult or child should be injured or die from a vaccine imposed upon them by their government.

What we know now about COVID-19 and children:

* Almost 100% of kids don't suffer from severe COVID

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fservices.aap.org%2Fen%2Fpages/novel-coronavirus-covid-19-infections%2Fchildren-and-covid-19-state-level-data-report%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C170856db19f74d67f81e08d9d20fdc92%7C11c>. In fact, many have no symptoms at all. Thus, they may have already had COVID which is another excellent reason not to get the vaccine.

* The World Health Organization

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.precisionvaccinations.com%2Fsays-children-should-not-receive-covid-19-vaccines&data=04%7C01%7Cwsboh%40sbob.wa.gov%7C170856db19f74d67f81e08d9d20fdc92%7C11d0e>

(WHO) has announced that young people should not take the vaccine.

* A concerning number of young people

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdeconnecticut-teens-hospitalized-heart-problems-covid-vaccines%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C170856db19f74d67f81e08d9d20fdc92%7C1>, especially those under 30, are suffering from myocarditis (heart inflammation), blood clots, low platelets and more following COVID-19 vaccination.

* The risks of COVID-19 vaccination adverse outcomes certainly outweigh the benefits to children and young adults who are considered low risk populations.

* Parental rights to make independent, informed decisions regarding their children's medical interventions, including vaccines, are being threatened.

* Some scientists have raised concerns that the safety risk of COVID-19 vaccinations have been underestimated. As of October 29th UPDATE, there have been 856,919
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffinal19&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C170856db19f74d67f81e08d9d20fdc92%7C11d0e2172> vaccine injuries including 18,078 deaths
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffinal19%26DIED%3DYes&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C170856db19f74d67f81e08d9d20fdc9> following COVID-19 vaccination.

* Clinical trials in children and young adults are ongoing and will not be completed for at least one year.

* Not a single published study has demonstrated that patients who have had a prior COVID-19 infection benefit from the vaccination. So why recommend all kids get the shot?

It's time to end the use of COVID-19 as a pretext for governmental coercion and mandates. The public is waking up to the cascading negative impacts upon society from elected officials wielding unprecedented power over the citizens of this country. As a resident of Washington state, and a concerned citizen, I urge you:

-- Do not support any legislation or directive coercing people or mandating medical interventions--including vaccines

-- Do not support any legislation or directive requiring people to wear masks

-- Do not support any legislation or directive that deprives people of the right to congregate

-- Do not support any legislation or directive establishing lockdowns

-- Do not support any legislation where employers can enact coercive tactics to overrule a person's rights to body autonomy

There is a reason many people in our current administration are demanding that you negate any and all personal morals, defy our constitution, harm others, create public fear, and avoid encouraging effective means of immunity. Money. It may not be the root of all evil, but it can certainly feed those roots. These companies, including our government agencies that are financially benefitting from these inoculation mandates, are making approximately \$1,000 per second from injecting people with questionable and life threatening substances. Many members of our community and state, who have been inoculated by the Covid "vaccine" are still becoming infected with the virus. This is not proven protection. This is experimental drug use. Is corrupt money and power, in the name of a science experiment, more important than the health and welfare of the people of our state? The very people you serve to protect?

May quality judgment and moral perspective be the lens through which you make your decisions, and may fraudulent claims by those who have personal and financial agendas not obscure your ability to make determinations for the good people of our state.

Sincerely,

Ian Newman

External Email

I'd like to comment for the upcoming meeting concerning requiring k-12 students to receive covid vaccinations. I'm absolutely opposed to the requirement, and if implemented will be pulling my children from public school.

I know that many supporters of the idea will cite other vaccination requirements for school children, but at no point in the last two years have we seen covid be a significant threat to children. Things like measles and polio had much worse risks for children but covid with few exceptions remains incredibly low risk for children so please do not require them to receive this vaccination.

Best Regards,

Michael West

To Whom It May Concern,

Please do not force people who would be more harmed than helped to get vaccinations that do not even affect their age group. Having children get immunized for a disease that has virtually 0% death rate with a vaccine that has an increased chance of causing myocarditis and other terrible side effects (www.CanadianCovidCareAlliance.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.canadiancovidcarealliance.org>>) is irresponsible at best, and criminal at worst on your part if you pass this as a mandate.

This applies to all people who are immune to covid from having contracted the disease and are now immune to it. The risks of the vaccine far outweigh any public good that the vaccine has been shown to do.

Please do not add covid to the list of communicable diseases that warrant such extreme measures. That a disease is contagious, and potentially dangerous to the sick or very old, is not sufficient alone to warrant extreme efforts by the State to impose questionable treatments on perfectly healthy and in many cases already immunized citizens.

Thank you for your time and service to Washington State

Sincerely,

Nathan Carter

Subject: State Mandated Covid Shots for Children

External Email

Hello,

Covid shots should absolutely NOT be a requirement for our children. Children are at extremely low risk for Covid. The Covid shots are still only EUA (emergency use authorization). There are no long term studies to document ANY history of safety.

Studies do now document that vaccinated and unvaccinated people can both transmit Covid. Therefore, the vaccine does not stop the spread of Covid.

If Covid shots are a requirement for children to attend public schools, I will remove my 3 children from the public school system for their long-term health and safety.

Thank you for keeping the best interests and rights of parents and families in mind when making your decision.

Subject: Stop mandate/ Covid WAC codes

External Email

America was founded on "we the people", to serve and protect the people!!! Please remember that when you are making decisions. You are where you are due to elections and support of the common people to trust in your judgement to protect us from tyranny. America is not a socialist country and we are quickly moving that way with every mandate being forced upon us and our rights being taken under a "emergency use authorization". Last I checked an emergency doesn't last multiple years, this is about control.

Do not add Covid-19 to the current infectious disease WAC codes, as this is not a disease that causes death as our Government Regime would like for us to believe, with a 96% + survival rate, "False Information" & "NO complete TRANSPARENCY", being an "EXPERIMENTAL Vaccines" all of which comes from our Government, should not ever be taken to the lengths that it has.

This is my understanding to the pandemic; I would like you to consider this information and again DO NOT ADD Covid-19 to WA WAC Codes.

Federal government wants to run roughshod over state powers, contrary to what the Founding Fathers intended in the Ninth and 10th Amendments to the Bill of Rights, which reserved powers to the states.

Dr. Francis Boyle is an international law expert. He's also an expert on 'genetic bioweapons.' And he was a gentleman who framed the 'anti-terrorism act.' It's called the "Bioweapons Anti-Terrorism Act" or B.W.A.T.A. It was framed in 1989, signed into law in 1990 by President George W. Bush, with unanimous approval from the U.S. Senate and the U.S. Congress. And so, if there is a Genetic Bioweapons Anti-terrorism Act, it means obviously there must be a genetic bioweapons industry. And I want you to know, that on this earth: 22 nations on planet earth have what we call BSL4 Labs, BSL4 Labs means Bio Safety Level 4. Bio Safety Level 4 is the highest level of Bio Safety.

New Zealand has locked its entire citizenry down for one, yes one new case of COVID. This simply boggles the mind. A look across the United States shows a similar trend in

states led by democrat leaders. The separation of powers, or the powers granted to the states under the constitution is the only thing stopping America from looking like the examples listed above. Leaders in the red states are essentially holding the line against national oppression in America, but they cannot do this alone.

I can predict with relative certainty that new variants or strains are about to emerge.

New bloated case counts, not deaths of course, will pepper the headlines of news organizations, hysteria will once again rule the news cycles. Continued public crises are going to manifest and perpetuate fear throughout our communities. My hope is that you are done being scared; and anger and outrage finally sets in. Remember, you are exceptional. I can also say with absolute certainty that they will come for you one day, not matter who you are if you don't stand up now, vaccinated or not. Tyranny has no boundaries; and there are bigger plans for you, your children and your wealth. Globalism has found its way into American culture; and it is poisoning from within. Digital passports, digital currencies, elimination of privacy and private property ownership; and massive taxation are happening as we speak; and are modern day tools of enslavement. The time has come to resist lockdown measures (peacefully of course) and say no to tyranny. Collectively we are stronger than the world's largest armies. We will not give up any of our civil liberties granted to us under our Constitution. We will not comply with vaccine passports. We will not allow segregation and discrimination to take new root in America. There is already so much that divides the American people, we don't need any other reasons. We will not enforce any mask mandates, especially of our children. We will not frequent businesses that promote targeted oppression of our neighbors. We will not be bullied by state agencies or elected abusers.

Natural Immunity has never been approved or meds that has proven to work. The vaccine has been available to all who wish to take it. Making something a blanket mandatory is wrong. It is not right for everyone and their have been many complications reported. Health care has never been a one size fit all and this should not be treated any different.

I believe our state will suffer if any more mandates or codes are enforced at this time and more than likely the citizens will boycott businesses that enact segregated practices on our fellow citizens. We will have a zero tolerance for civil liberty abuses on our citizenry. We will utilize the American court system of justice; and non-violent civil disobedience to combat despotism and tyranny, as Dr Martin Luther King Jr has taught us. Above all else, we will remain free people.

Thank you, for your time and concern and please remember to open your heart, soul and mind to all the issues that I have tried to convey.

Respectfully,

concerned citizen

Subject: Required immunization schedule

External Email

Good evening,

I object to the proposal of requiring a Covid injection for school attendance.

None of the Covid injections are a vaccine as they do not prevent illness. I am not sure how they can be added to a "Vaccine Schedule" when they are a gene therapy as opposed to the immunizations that are currently on the schedule.

We have no long term data for the proposed injections. The data is not there, period. Our children are our future not our science experiment. Will you remove the injection from the schedule if long term negative effects are discovered? What is your threshold for harm?

The science tells us that children have a very low risk of severe Covid infection. The data shows us that schools are not viral breeding grounds. Apparently schools are safe places since they are open and functioning at full capacity.

The science shows the injections can cause serious lifelong, permanent heart damage in children. All the available injections are EUA and thus there is no liability for the manufacturers. Will the state DOH assume liability for damages and medical bills for damaged children?

Will you as individual board members take responsibility for short and long term effects of this novel medical procedure that you propose to force upon families without consent?

Sincerely,
Irene Mazur

We are opposed to the proposed WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105 and or any changes made to these regarding anything to do with COVID vaccines, COVID mandates or the giving of health officers the authority to use law enforcement.

We are completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

We are completely against covid-19 injections as part of the school immunization requirements using WAC 246-105.

Dear WSBOH'S,

Please stop this craziness to mandate Immunization for Child Care and School Entry.
It should NOT be required for young children as all the evidence has proven that children are at extremely low risk for Covid.

Thank you so much for taking consideration of the people in your decision.

It's been a couple months since I sent my previous email and even with the spread of Omicron, my stance has not changed. My children and I have all had Omicron now and it had little affect on our lives. Less so than a normal cold. To reiterate one of my points below, the flu shot is not required. When I wrote that and added the statistics, it was for Delta, but with Omicron causing less serious illness, I feel like this point is even more pertinent.

Please do not take this choice away from parents. Allow them to decide what is best for their children.

Michael Kostis
9222 8th Ave NW
Seattle, WA 98117

Nov 5, 2021, 12:32 PM by michael@kostis.co:

I would ask the Washington State Board of Health not to add the covid-19 vaccine to the list of required immunizations that students are required to get to attend school.

Would the vaccine prevent kids from getting covid? No.

Would it prevent them from spreading covid? No.

Would the school district allow them to take off their masks after vaccination? No.

Would the schools have to spend less time cleaning, filtering the air, etc? No.

Is a yearly flu shot required, even though the risk of serious illness in children from covid is comparable to the flu?

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.npr.org%2F2021%2F05%2Fkids-the-risk-of-covid-19-and-the-flu-are-similar-but-the-risk-perception-isn&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1c202e65163247af97e608d9d1fc00d3%7C11d0e2172>>
* No.

So, why should we require this vaccine?

I ask that the Board of Health considers these questions and the rights of parents before making their decision.

Thank you,

Michael Kostis

Subject: Re-January 12 meeting

External Email

To whom it may concern,

I am a Pierce County resident writing regarding the January 12th meeting of the WA State Board of Health.

Please DO NOT add Covid-19 to the current infectious disease list applicable to WAC 246-100-045, WAC 246-100-940, WAC 246-100, WAC 246-105. I believe these proposed policies a vast over reach, violate our rights as American citizens and go against medical freedom.

I especially oppose adding the Covid-19 gene therapy (referred to as "vaccine") to the lists of requirements for children to enter public school, based on the following reasons:

1. The long term safety is unknown.
2. What IS known is that the spike protein migrates to various places in the body, causing a variety of conditions, as seen in the increase in myocarditis & nervous system issues.
3. Children are not at high risk of dying from the disease.

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.sciencedirect.com%2Fscience>

4. Immunity from these shots is waning, but immunity from natural infection is not.

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F1>

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Facademic.oup.com%2Fcid%2Fadvances%2Fdoi%2F10.1093%2Fcid%2Fciab884%2F6381561&data=04%7C01%7Cwsboh%40sboh.wa.g>

5. "Vaccinated" children can still spread the disease to others.

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F1>

6. Pre-pubescent medications often have unexpected impacts on various body systems, and so need to be well studied prior to approval. This has had no long-term safety studies.

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.sciencedirect.com%2Fscience>

7. The effect on reproduction is unknown. What IS known is that these shots often affect women's menstruation, and menstruation affects fertility.

8. There is another way. There are many other treatment options available.

The negative impact that this would have VASTLY outweighs the possible benefits. Please do what is right for the future of America. DO NOT add Covid-19 to this infectious disease list.

Subject: SAY NO TO COVID 19 Vaccine Mandate for Schools

External Email

Washington State Board of Health:

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit. Have any of you looked at the VAERS data from the CDC? Over 1 million adverse events reported from the COVID vaccines, with 21K reported deaths.... Over 100K hospitalizations. In 30 years of VAERS data there have been less than 1,000 reported deaths from all other vaccines. Yet in less than 1 year, we have 21k reported deaths from COVID vaccines....

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

In addition there are children, like my own, that have already contracted COVID-19 and have natural immunity. This natural immunity, based on nearly 150 studies, proves to be

equal if not better, than the protections provided by any of the vaccines. Any mandate to vaccinate school age kids is not "following the science" but rather bucking the science. The current Omicron variant is affecting vaccinated individuals more than it is unvaccinated. 96% of Omicron cases in Germany are among the vaccinated. I'm sure that is not isolated to Germany. As a matter of fact, our son has several vaccinated friends that have all now been infected with COVID (presumably Omicron).

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thanks,

Jeff

Subject: Statement Against Proposed Policies

External Email

To Whom it May Concern:

I am completely against any of the proposed COVID policies that are over-reaching and immoral. I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

First, the rights of parents/children to make their own health decisions should not be infringed upon. What happened to freedom? The United States of America was founded in the name of freedom. Thousands of immigrants come to our country per year so they can be free to live, work, and govern their family and health as they please. They come for a better life. It breaks my heart that so many people who have given up everything they had in their home countries- to gain this freedom in the US -are now losing it again. They're losing that freedom because of us who are recreating the environments of socialism, control and fear that they once fled. Please listen to those who have experienced a society like this before and would never want to live in it again. Regarding the vaccine requirement- I stand for medical freedom. People should always be able to make personal health decisions, all the way to asking not to be resuscitated if they should lose their pulse. A government has no place to be the healthcare proxy for all of us. We should instead be empowered by our right to make our own health decisions. Some may argue that requiring the COVID vaccine is no different than requiring others. We must consider that these circumstances (requiring vaccines that are not fully FDA approved) have exposed already existing problems with our systems (requiring other vaccines too). Vaccines should be encouraged to protect health, but not required. To require them and exclude those who don't "comply" is discrimination.

Regarding detainment- what benefit can that be to our state? How can a person be ok with the idea of being taken from their home because they're seen as threat- not because of anything they've done but because they're a human being, with a body that gets sick. That's inevitable, regardless of how "careful" a person is with hygiene. We're so focused on taking sick people out as a threat to society- what about the real threats? How about destroying sex trafficking, porn sites, drug trafficking- all the things that silently creep into our homes and infect completely innocent people, destroying their lives not for 10-14 days but in many cases forever. These new policies are making people anxious and fearful, isolated and depressed -and for comfort they will turn to the things above. Those things will hurt them and our state worse than COVID ever will.

Thank you for reading, and hearing my convictions.

Subject: Say no to involuntary quarantine and mandated vaccines for school

External Email

Dear Members of the Washington State Board of Health,

As a long time resident of Washington State, I urge you to stop this madness. I oppose WAC 246-100 rulemaking that would expand any authority to involuntarily quarantine individuals.

I also oppose adding a Covid-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

As a board of health, I encourage you to look at the science behind this ever evolving virus. Over time it has become more contagious and less deadly. With each new variant, it looks more and more like the common cold. With its current state, there is no need for involuntary quarantine or for school mandated Covid-19 vaccination.

Sincerely,
Kari Price

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- Children are at extremely low risk for Covid
- The vaccines are still only EUA (emergency use authorized)
- There are no long-term studies to document any history of safety
- Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- The vaccine apparently does not stop the spread of the disease

Kim Paxton

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdeconnecticut-teens-hospitalized-heart-problems-covid->

, especially those under 30, are suffering from myocarditis (heart inflammation), blood clots, low platelets and more following COVID-19 vaccination.

* The risks of COVID-19 vaccination adverse outcomes certainly outweigh the benefits to children and young adults who are considered low risk populations.

* Parental rights to make independent, informed decisions regarding their children's medical interventions, including vaccines, are being threatened.

* Some scientists have raised concerns that the safety risk of COVID-19 vaccinations have been underestimated. As of October 29th UPDATE, there have been 856.919

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind%2Fvaccineinjuries](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind%2Fvaccineinjuries&data=04%7C01%7Cwsboh%40soh.wa.gov%7C16c10c1b685b45c1723a08d9d20f7946%7C11d0e2172)
19&data=04%7C01%7Cwsboh%40soh.wa.gov%7C16c10c1b685b45c1723a08d9d20f7946%7C11d0e2172
vaccine injuries including 18,078 deaths

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffinal%26DIED%3DYes&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C16c10c1b685b45c1723a08d9d20f79>
following COVID-19 vaccination.

* Clinical trials in children and young adults are ongoing and will not be completed for at least one year.

* Not a single published study has demonstrated that patients who have had a prior COVID-19 infection benefit from the vaccination. So why recommend all kids get the shot?

It's time to end the use of COVID-19 as a pretext for governmental coercion and mandates. The public is waking up to the cascading negative impacts upon society from elected officials wielding unprecedented power over the citizens of this country. As a resident of Washington state, and a concerned citizen, I urge you:

-- Do not support any legislation or directive coercing people or mandating medical interventions--including vaccines

-- Do not support any legislation or directive requiring people to wear masks

-- Do not support any legislation or directive that deprives people of the right to
congregate

- Do not support any legislation or directive establishing lockdowns

- Do not support any legislation where employers can enact coercive tactics to overrule a person's rights to body autonomy

There is a reason many people in our current administration are demanding that you negate any and all personal morals, defy our constitution, harm others, create public fear, and avoid encouraging effective means of immunity. Money. It may not be the root of all evil, but it can certainly feed those roots. These companies, including our government agencies that are financially benefiting from these inoculation mandates, are making approximately \$1,000 per second from injecting people with questionable and life threatening substances. Many members of our community and state, who have been inoculated by the Covid "vaccine" are still becoming infected with the virus. This is not proven protection. This is experimental drug use. Is corrupt money and power, in the name of a science experiment, more important than the health and welfare of the people

of our state? The very people you serve to protect?

May quality judgment and moral perspective be the lens through which you make your decisions, and may fraudulent claims by those who have personal and financial agendas not obscure your ability to make determinations for the good people of our state.

Sincerely,

Julie Stilson

Hello,

I am a concerned mother and citizen of Washington State. I am reaching out in regards to the upcoming meeting to discuss the potential for the covid vaccine to become a required vaccine to be able to attend school.

I think to include this vaccine without further research and data gathering is hasty. The vaccine was just recently approved for children and I feel that more data on the side effects and health concern to children should be monitored further before this becomes required.

As this vaccine is still only for emergency use and still in the experimental phase, it should not be required. Where there is concern and risk, there should be a choice, especially in an age group that shows resilience when faced with covid.

Sadly, I am preparing to pull my 4 children out of school if this does become a requirement.

I am simply asking for patience instead of haste in making this decision. More data needs to be gathered on the continued efficacy of the vaccine and how children respond to the vaccine whether positively or negatively before it becomes required.

Thank you for your time and considerations.

Sincerely,
Melanie Hall

As someone who owns multiple properties across Washington state, I can guarantee you that passing these codes into law will make me sell off and leave, as it will for thousands of others and prevent the rest of the country from ever considering moving to Washington state.

Are you wanting to be Nazis? That's what these codes sound like. Maybe review history a little before you vote. This is eerily similar to how the holocaust started.

Subject: Stop the force of vaccines!!!!

External Email

Please quit removing our freedoms or you will force many people to live off grid/ homeschool children. Without the people to control, the government will fall. So stop rocking the boat!!

You can't mess with people's beliefs or you will get major pushback and retaliation.

You can't force someone to believe in a germ mask or vaccines. Many people are seeing the truth, and the truth always wins.

Back off now, because the people will never sacrifice faith/ religion and beliefs for the greed and sin which is apparent in the government being paid off by Big Pharma.

Freedom to choose what goes in our bodies!! Freedom to handle sicknesses by our own choices and medical preferences! It's laughable that the vaccine is being made out to be our only hope to be saved. What a mockery to the higher power which keeps us alive each day. Vaccines do not save us. They never have. It's been a lie from day one. The truth is out. Our immune systems, made by the Creator, saves us time after time. Vaccines are an illusion and actually very destructive to the body. My children have had horrible vaccine reactions and been deathly sick after vaccines. Myself, along with thousands of other parents can never be brainwashed to believe a vaccine is healthy after witnessing it with our own eyes. So you better quit trying. You can't change our minds.

I am writing to inform the Board of Health that I oppose any expansion of WAC 246-100, I oppose adding COVID-19 to the WAC 246-105-030 list of vaccinations required for children, and I oppose the proposed modification to Local Boards of Health, as proposed in WAC 246-90.

Specifically on the Opposition to Expansion or Enforcement of WAC 246-100; I oppose any Board's strengthening or expansion of WAC 246-100, specifically WAC 246-100-040, Procedures for Isolation or Quarantine as such restraints violate the US and State of Washington Constitutions and violate personal liberties. The fact that you are even contemplating changes that are not constitutional in our state, in our country, is incomprehensible; that should be obvious, right?

Even more strongly I oppose adding COVID-19 to WAC 246-105. Vaccinating against an endemic flu-like virus is an individual and parental decision - it is a personal liberty to say 'yes' or 'no'. Especially given that the current EUA'ed vaccines' effectiveness remains questionable, at best, with clear evidence of risk with vaccinating children. For instance, VAERS data indicates nearly 28,000 adverse events for children aged 0-17, (<https://medalerts.org/vaersdb/findfield.php?TABLE=ON...>), including 55 deaths in that age group

(<https://medalerts.org/vaersdb/findfield.php?TABLE=ON...>).

In context the United States has experienced 823 deaths within the 0-18 year old category in US since the onset of the pandemic (<https://data.cdc.gov/.../Provisional-COVID-19.../nr4s-juj3>).

There is no clear indication that the EUA'ed COVID-19 vaccines will do more good than harm for the children of Washington. Further, this proposed Rule raises the question that if minors are harmed from the COVID-19 vaccine, who will take responsibility? Are you willing to be personally liable for any injured minors? Are you willing to bet the hard-earned money of the constituents of Washington to fund liability/compensation funds? I oppose adding COVID-19 to WAC 246-105-030 (or any other section of WAC 296-105) or requiring COVID-19 vaccine for children.

Thanks,

Joanie

From: May Lindsay <maester@aol.com>
Sent: Friday, January 7, 2022 11:06 AM
To: Kahler, Kelie (SBOH) <Kelie.Kahler@sboh.wa.gov>
Subject: Regarding Washington State Board of Health Meeting for January 12, 2022

External Email

Dear Kelie Kahler,

As a parent and a member of the community, I implore you to please stop the push to require Covid-19 vaccinations for ANY child in child care or school. Covid vaccines should absolutely NOT be a requirement for our children! Please also reference Seattle Childrens Article

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.seattlechildrens.org%2Fresearch%2Fbioethics%2Fresearch%2Fkids-required-covid-19-vaccine-ethics-perspective%2F%3Ffbclid%3DIwAR0R_d3b4QB75FgFmEhilIzrKMUTn9GJBqiTO352mhaExKzZeCkabObK5g>
where its stated that it is too soon to be requiring vaccinations for our children. Children are at an extremely low risk for Covid-19. The Covid-19 vaccines have no long-term testing on adults and they have even less testing on children. Covid-19 vaccines are not stopping the virus as many with the vaccine are contracting and spreading Covid-19 . The vaccine has not been tested enough to ensure its efficacy and safety in children. Requiring this vaccine does not protect our children!

The disease burden in this case does not meet your criteria. There is NOT a significant morbidity and/or mortality in at least some sub-set of the population. The survival rate is well over 97% and even the long term effects of Covid-19 do not represent a significant amount. Additionally, this vaccine is not meeting your criteria because it is not reducing the risk of person-to-person transmission.

As for the criteria of Implementation, the vaccine is NOT acceptable to the medical community and the public. There is an extremely large amount of both the medical and the general public who do NOT accept this vaccine as safe.

And finally in regard to vaccines effectiveness, this vaccine does not work. It is not on the Recommended Childhood & Adolescent Immunization Schedule. It is not preventing Covid-19 nor is it preventing the spread of Covid-19. The vaccine is not cost effective for our nation. Perhaps it is cost effective or free or maybe even puts some money into the local schools, but as a nation, it is destroying our financial position at an alarming rate. "Experience to date with the vaccine containing this antigen demonstrates that it is safe and has an acceptable level of side effects." Yeah. Not even close. Tell that to the parents of the kids who are having heart attacks. Tell that to my friends who have had massive auto immune flare ups and other medical issues arise immediately after their second

dose. This is not a safe vaccine for all people.

In addition, i want to point back to The Nuremberg Code, codified into US Federal Law which prohibits forcing or coercing anyone, under any circumstances, to participate in a medical experiment; and the Code states "the voluntary consent of the human subject is absolutely essential." Your chapter 246 - 100 and rule making petition for 246 -105 try to confuse, coerce, intimidate, threaten and harass us. This is called retaliation and discrimination, and that is against the law.

We have the right to determine what is the best for our families. Please PROTECT our children by NOT requiring a Covid-19 vaccination to attend child care or school.

Thank you,

May Lindsay

Subject: SEVERE CONCERNS ABOUT PROPOSED COVID MEASURES

External Email

To whom it may concern at the Washington State Board of Health,

We wanted to submit our opinions and concerns regarding the upcoming proposal/vote to implement even more restrictive and unbelievably draconian measures on the constituents of Washington State. Also, we want to make known our absolute disgust, for even the suggestion, that would allow the abuse of individual law enforcement officers and absolute misuse of the abilities and resources of the LEO's of this state- in such a way as to make them enforce a heartless totalitarian type power over the people and said people's rights.

We obviously cannot speak for all LE individuals but having an LEO in our family, we can speak for him and many that we know, and their hearts are to serve and protect- to honor the oath they took to defend the rights of the people they serve- NOT to wrongly enforce unlawful and abhorrently unconstitutional, measures to satisfy the fear or power grabs of some people in charge.

If such proposed COVID measures are enacted in an attempt to "control" COVID, they will only serve as a horrific display of an overreach of power on the part of the Washington State Board of Health as well as Governor Inslee.

Not once have I ever heard or seen any type of information/education from this state's Board of Health, local schools, Governor, or other leaders, that encouraged people to support their immune system, get healthy and strong, lose weight, eat real food, get sunshine, etc... all the things that science has proven time and time again to be beneficial to not only avoid getting sick often, but to help a person recover quicker if they do happen to become ill. Getting ill, while not fun, and yes, can have unfortunate outcomes for those who are already ill with other comorbidities (another reason to encourage natural, healthy living), is a fact of life as a human being. Our bodies often times become stronger after the fact and more robust and resilient. These proposed COVID measures offer nothing in the way of properly acknowledging the importance of taking good care of one's own body and mind, how to prevent a severe illness, or how to keep one's immune system in good working condition- they only will serve to keep people dependent on a pill or shot or by forcing others to be detained away from them, to keep from getting sick and will warp minds into a constant state of fear and anxiety- especially the minds of our precious children. These measures are absolutely fear based and offer up no real solutions and support for true, good health to the people of this state and are an attack on our upcoming generations which we find heartbreaking to say the least. Are you taking note of the rise in suicide amongst our youth or the rise in crippling anxiety or fear to be around other people? Is this board really concerned about our whole health, or just about control?

Furthermore, FORCING OR COERCING people to accept "health care" in the form of a "vaccination", that has not yet proven to be anything more than a therapeutic (at best) is the sort of thing horror movies are made of. NO ONE, NO MATTER THEIR AGE, RACE, BACKGROUND, OR RELIGIOUS BELIEFS, SHOULD EVER BE FORCED TO ACCEPT AN EXPERIMENTAL, UNPROVEN, MEDICAL INTERVENTION THAT THEY DO NOT WANT OR HAVE DISCUSSED WITH THEIR DOCTOR, COULD BE MORE HARMFUL TO THEM IF THEY PARTAKE IN SUCH AN INTERVENTION (as is the case with multiple people in our family)!

I'm sure you all are familiar with the Nuremburg code...

The fact that our leaders, who are charged with protecting the people of this good state, would even consider that sort of abuse is more concerning to myself and my family than any virus and has us seriously contemplating whether this state is the best place to continue to live, despite being born and raised here.

We ask that the members of the Washington State Board of Health do not participate in the mass hysteria and fear based thinking surrounding this virus, by enforcing these demeaning and ineffective measures AND we ask that you work to remove current mask mandates and social distancing requirements, especially for our children in schools. These measures have done nothing but encourage fear and anxiety and caused other health issues. We ask instead that you return to the basics of good health and healthy living that has seen us through many other outbreaks of years past and begin to confidently encourage and educate the people you serve, on proper ways to care for their bodies naturally so as to help minimize effects should they become ill.

We also ask that you remember that the rights of every individual that lives on this earth, is given their rights from GOD, not from government officials. It is not the place of the government to take the right to live freely away (which includes allowing people the ability to choose the best way to address their health needs or concerns on their own terms, with consideration of their own religious beliefs, and with their own personal doctors- not by the misuse of law enforcement or by forcing medical interventions as was done in Nazi Germany).

Please choose to perform at a higher level of service, and honor the GOD given rights of the people you live amongst and do not approve these proposed COVID measures.

Best,

The Crumley family, Puyallup WA

All,

I'll keep this brief, as I am sure you have been inundated with more comments than you can count.

How many more people have to die? What will it take to finally convince you that the true pandemic is the poison found within the CV19 "vaccine"? Are you so arrogant, so proud, so hard-hearted and willfully ignorant of the facts that you would seriously consider mandating this untested, unproven substance in order to educate children?

If so, I can only assume that you are on the take - that you have sold your soul to the devil himself. No rational, thinking, humane individual would think that this "vaccine" is a safe and ethical choice for the state of Washington going forward. I know it, and I know that you know it. How many more people have to die at the hands of this "vaccine" for you to swallow your pride and admit that?

I strongly oppose the application of WAC 246-100-040 and/or any other WAC or mandate to those not vaccinated for Covid 19.

If one follows ALL the science, rather than just that with which one agrees, it is clear there are reasons to be and not to be vaccinated. Both vaccinated and unvaccinated people are getting Covid, spreading Covid and dying of Covid.

Any such enforcement of law or government mandate is unconstitutional and a serious infringement on our rights as free citizens.

Subject: Requirement for Covid vaccine for children

External Email

To Committee:

Your decision regarding vaccine requirements for children should be based on facts and clinical studies without bias. Studies show that teens and children statistically have 0% risk of death from Covid but does pose serious and unacceptable risk from inflammation of the heart muscle, hypoxia, predisposition to auto-immune diseases, etc.

I am sure you know the above and have been inundated with much information. PLEASE do not mandate vaccines for young people. Those decisions should be left to parents after they have been thoroughly informed of risks.

Thank you,

Subject: School vaccines

External Email

To whom it may concern:

I am writing to ask that the state board of health REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. Vaccines DO NOT prevent, nor stop the spread of COVID-19
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19
4. The COVID-19 vaccine is new. Many parents do not feel comfortable giving this to children without years of testing, studies and long term effects being known.

I personally will remove ALL my children from Washington state public schools before I will comply to a COVID-19 vaccine mandate for my children.

Thank you for your time,

Heidi and Brad Summers

Subject: Response to Covid-19 vaccine mandate for school age children

External Email

Good Morning-

I want to send my thoughts on the Covid-19 vaccine mandate being considered for school age kids.

This mandate is not backed by science. In light of the omicron variant, this is not necessarily protecting our kids. I'm a fully vaccinated adult. I currently have COVID-19. My kids are not vaccinated and did not contract it in close contact with me for several days and several others that contracted the virus.

Covid and the vaccine are going to a direction of being endemic like the flu. The vaccines are not as effective at prevention similar to the flu shot. They are not like MMR, Polio or Chicken Pox vaccines. Without more data on this vaccine over time or proof of protecting spread of disease, it's requirement in schools has no place. We are also vaccinating against something that is not circulating. 35% protection is not protection.

Sincerely,

Kim Brooks

Parent in the Northshore School District

much more harmful than covid itself to boys. At minimum, the UK found that boys are 6 times more likely to suffer myocarditis from the vaccine than covid itself. Since the vax has been approved for kids 5 to 11, 1 in 100 has a documented adverse reaction in VAERS. These numbers have never been seen and the drug still allowed to be used.

Please do not mandate the covid vaccine for all children. Children are at greater risk of harm from vax side effects than covid itself.

Thank you for your time and consideration,

Patty Johanson

Subject: Registered Nurse and doctoral NP student public comment for 1/12/2022 BOH Meeting Agenda

External Email

Dear TAG team members and voting Board of Health members,

I am writing to you as an obstetric-neonatal-pediatric nurse and board-certified lactation consultant with seventeen years of nursing experience in hospitals, clinics, public health, and home care. I am currently in a nurse practitioner doctoral program at PLU, and I have applied all of my graduate-level coursework to understanding this issue. The State Board of Health (SBOH) is considering the covid19 vaccine for inclusion in chapter 246-105 WAC. (**This means the Covid vaccine will be required for school children).

As a concerned nurse, mother, and Washington state citizen, I OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about covid19 injections for consideration of mandating the injections for school. I am opposed to mandating these injections for school attendance and I am opposed to any policies that support the mass administration of m-rna covid19 injections for all healthy children. I support individual parent choice in this decision, in consultation with their health care provider. As a nurse, I cannot, in good conscience, promote the m-rna covid19 injections for healthy children or teens due to serious concerns about safety, necessity and efficacy including the lack of reproducible long term safety data. My concerns are summarized at this link, with citations, for your review.

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwmalonemd.substack.com%2Fp919-genetic-vaccine-safety-in%3Futm_campaign%3Dpost%26utm_medium%3Dweb%26utm_source%3Ddirect%26fbclid%3DIwAR1U

As a registered nurse, I wholeheartedly SUPPORT Informed Choice Washington's Petition for Rulemaking. This petition is item 11 on the January 12th agenda. It was filed by Xavier Figueroa, PhD, on behalf of ICWA, and asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

You have all the weight of public opinion supporting you and your vote of opposition on including the covid19 vaccine in inclusion of the school immunization schedule and your vote supporting item 11 on your agenda to prohibit any EUA product on the school required list.

A Covid-19 vaccine mandate clearly does not pass the 9 criteria required when Reviewing Antigens for Potential Inclusion in WAC 246-105-030. I am not taking issue with the vaccine itself, and in fact continue to support vaccination as an individual choice for unique individual circumstances. My lack of support for a mandate stems from the following criteria NOT being met under sections II and III on the list of criteria:

5. The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population.

6. Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting or activity being given the highest priority.

- ### III. Implementation of the Criteria

While the vaccine may be acceptable to the medical community (although we will note that even within the medical community, the vaccine adoption rate was not acceptable enough to preclude a forced mandate), we cannot gloss over the fact that public acceptance does not even represent a strong majority.

- < Less than 40% of kids 12-17 are vaccinated.** ([srdc.org](#))
<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fl.facebook.com%2Fl.php%3Fu%3DvUkP2nOCminU%26h%3DAT2zRwWj_WQADK6heZ68L24g8uC2fdp93hdRVJYz5botS4sfolkHtIPH2VmHGVRV3V2PTY867_QmF-Ju0xuxFt2f4iN0gtBVKQ%26__tn__%3D-Uk-y-R%26c%5B0%5D%3DAT2nz3q5ovNbncnjLDycnXnNxas37xsQUaMXu2BwxrZIkvI-HrSe7GXDsjwqOjnIDlbiNihxaDbadWtFWZ_0whd-IgyH3X7NemLkAHy_AwwF9f8Ir1txlosrvGFInRRVWAU3S8yUdIdSCx5W1U54PetWg7oQ8jjBTINF2ybhj0tcpeITFXU&data=04%7C01%7CWSSBOH%40sboh.wa.gov%7C636d3a5a53164127776008d9d217e783%7C11d0e2>

- Only 36% of the entire black community in Spokane County is vaccinated, and it is reasonable to assume this number is far lower among ages 12-17. A vaccine mandate in schools would disproportionately affect students of color in our community. (srcd.org <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2F1.facebook.com%2F1.php%3Fu%3>

)

8. The administrative burdens of delivery and tracking of vaccine containing this antigen are reasonable.

- Our administrators and nurses have already given feedback that a vaccine mandate would create an unreasonable and insurmountable administrative burden involving tracking.

9. The burden of compliance for the vaccine containing this antigen is reasonable for the parent/caregiver.

- Forcing parents to inject their children with this disease-modifying medical therapy termed covid19 vaccination forces and coerces parents (as with other segments of our society who were coerced under the threat of losing their jobs and livelihoods). It does not fall within a reasonable burden of compliance. It does not seem logical to vaccinate a group (ages 0-19) with such a low, even insignificant, rate of hospitalization or death, while claiming that will protect a more vulnerable group (ages 50-90) with a dramatically higher rate of vaccination (between 62%-82% based on age). Thus, our state would propose forcing vaccination on those who do not need it, to protect those who already have it and/or could easily get vaccinated by individual choice.

The vaccine is widely available to any age group now. Vaccination rates reflect individual health choices that must be protected. We have to acknowledge that individuals can make their own health decisions for themselves and their families. There simply is not a case to be made for forcing someone to get vaccinated to protect someone else who can easily get vaccinated themselves.

Thank you for your public service.

Kind regards,

Lara Gabriel, RN, BSN, IBCLC

WSBOH Members,

We strongly oppose WAC 246-100 rule making that would expand the code to give authority to involuntarily quarantine people for any reason.

Further, we strongly oppose the addition of the Covid 19 vaccine to WAC 246-105 of required vaccines for children to attend schools.

I absolutely oppose mandating school children vaccinations for these reasons:

- 1.) Need: Our children do not NEED this vaccine as they are in the lowest risk of death category with a 99.9% survival rate.
- 2.) Risk: The vaccinations are still under emergency use protocols, and have not been properly studied for long term effects. Data is showing our children are more likely to have an adverse reaction to the vaccine than be harmed from Covid.
- 2.) Efficaci: The data shows the vaccine does not prevent people or kids from getting Omicron, and Omicron is actually a better protector from the Delta variant than the vaccine.

Subject: Requiring COVID vaccine for K-12 school

External Email

Dear Washington State Board of Health,

I have taught for over 17 years and I have two children in high school. I am a high school teacher in Spokane.

I am writing to convey my overwhelming support of requiring the COVID vaccine in schools.

This situation is like none any of us has ever seen before. Vaccines are proven to protect the general public's health and there is a strong precedence of requiring vaccines for school attendance.

Students are not complying with wearing masks. Sadly, some staff members also don't grasp the importance of wearing masks properly.

I can only speak from my experience. I actually enforce masking in my classroom and it is a constant battle. I have lost track of how many times I have to stop class and ask students to raise their masks. Some don't. They stare at me and refuse to raise their mask to protect others in the room. There is no consequence for students who exhibit this behavior. This results in students getting infected and/or being quarantined. I teach in a zip code where only 54.3%

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsrhd.org%2Fmedia%2Fdocuments>>
of people have received one dose of the vaccine.

As a teacher I find this frustrating; as a parent, I am terrified. My children's safety depends on whether or not a particular teacher is feeling up to battling over masks that day, whether or not the students near my children are compliant, and whether or not someone else accepts the benefits of vaccines and has been vaccinated. I am fully vaccinated, have received a booster, never stopped wearing a mask in public and teach with my classroom window at least cracked open - even in the most frigid temperatures. Yet, my health and safety is endangered daily because I am surrounded by people who choose not to get vaccinated, not to mask, not to follow the steps that protect other people.

An additional issue, particularly in light of the Omicron's transmissibility, is the exposure staff and students have when contact tracing is not possible. Passing time between classes results in the entire student body being in the halls at once, very close to each other. Many students take this as an opportunity to remove their masks completely, even though they aren't supposed to, and there is a lot of talking, laughing, and yelling. Teachers are forced to stand in the halls and supervise while unmasked students pass inches from staff members. Contact tracing is not possible in this situation. Students either ignore us, or tell us to "fuck off" when we ask them to raise their masks. My school

allows unmasked student athletes to run laps for conditioning in the school's halls before school starts. The air is full of exhalation before the school day even begins.

Currently, we have multiple students and staff members either infected or quarantined. Our contact tracers are overwhelmed and behind the curve, allowing infection to spread.

I firmly believe students learn best when attending school in person. The lack of mask compliance is not only disrupting classes in real time, it is leading to hundreds of students missing class, or not having their regular teachers present.

Vaccines absolutely need to be required to lower the spread of infection in schools and consequently the greater community. My students work as courtesy clerks in grocery stores, in fast food places, servers in nursing homes, etc. Furthermore, they are getting sick at school and taking the virus home to family members who then go to their jobs and about their business in the community.

Quite frankly, I don't understand how this is up for debate or why public comment is being sought. The science clearly proves the vaccines are safe and lower the risk of serious consequences. It is the lack of vaccination that is allowing variants to develop and the pandemic to continue.

Please require COVID vaccinations in K-12 schools. This vaccination is the way students and staff will actually be able to safely attend school.

Thank you for your time,
Melissa Schreiber

Subject: Stop Children Vaccine Mandates

External Email

□ Dear Washington State Board of Health,

I am writing to you as a concerned citizen to please stop the madness! I am totally against covid vaccinations in children to attend schools! I am also against the plans on making a law for health officials to be able to detain any citizen if they don't abide by your health orders (getting vaccinated for covid).

May I remind you that covid vaccines are still under EAU authorization and no one is getting informed consent (please open up an insert of any of these covid vaccines...you will see a blank page). Not only are these vaccines not approved, they do not work to stop anyone from getting or spreading covid. If that is the case, how can this even be on the table. It is a huge overreach! Lastly children under the age of 18 have 99.995% survival rate for covid infection! Why would anyone with basically zero risk take any type of medication, especially when there have been so many adverse reactions! In this instance, the risks of taking this vaccine outweigh the benefits! Please do the right thing and strike down these proposals! Protect our children's and our rights and freedoms to bodily autonomy! I never in a million years thought I would ever have to write such an email and defend my position on this...where is the common sense!

I am asking you, the Board of Washington State Health, to refuse to make these covid vaccinations mandatory for our children!!

Sincerely,
Julie Mock
206-850-1737

Sent from my iPad

Second, the only available shots in the U.S. are those under experimental use authorization by the FDA. This means that there are no fully vetted vaccines for the COVID-19 virus available.

Third, there is evidence that these shots have created adverse reactions in many younger people who have received the inoculations. These adverse reactions, like myocarditis, cause irreparable damage to the heart of children which have these consequences.

Please do not approve any action which would mandate that school-aged children would be required to receive these COVID-19 shots. Doing so would, in my opinion, place the Washington State Board of Health in a place of enmity with myself and other citizens of the State of Washington.

Thank you for your time in reading this message.

Sincerely,

Neil Berry

Hello,

It has come to my attention that WA Board of Health will be discussing COVID-19 shot mandates for schools and recommendations for forcible quarantine and/or detention of those that disagree with policies. As a parent and a citizen of the State of WA, I request that you abandon the plan of forming a technical advisory group to explore COVID-19 mandates and adopt a new rule of requiring products to have completed Phase 3 clinical trials before they can be added to the list of school requirements.

One definition of insanity is to repeat the same action over and over again and expect different results. For almost 2 years we have attempted to follow the health recommendations of washing, masking, distancing, testing, isolating and vaccinating. By now, it is quite apparent that the virus has mutated; as a result, SARS CoV2 has become more virulent (which is the nature of all viruses) but LESS FATAL. Real immunity is achieved with exposure and recovery as is evidenced by the fact that those infected with SARS in 2002/3 cannot become infected with SARS CoV2 today! In contrast, COVID-19 has managed to find a way to escape the vaccine per the evidence by the incredibly high numbers of vaccinated and even boosted individuals getting sick and testing positive. Surely this fact has not escaped your knowledge!

I also hope that you, being members of the WA State Health Board, are well aware of what the #1 cause of death was (aside from abortions which came in at an astonishing 43 million, globally) in 2021. Last year, the disease that killed 8.2 million people globally was cancer. Cancer killed more people last year than COVID-19 has since the beginning of the pandemic. Death is tragic, yes, but I will not stand by as mandates and overreaches of personal medical freedoms are occurring, of which should only be between doctors and their patients should be handled; politicians and elected officials like yourselves have not earned nor have any say in the privacy of what medical choices my family or any Washingtonian family makes. Can you imagine what the United States could do if local officials like yourself across the nation put this much effort into cancer research and treatment as they did in pushing for COVID-19 vaccine creation? We'd

probably find a cure within the next year.

I do not doubt that you all desire to improve the health of Washingtonians. However, I do not trust that you have carefully investigated and logically determined adequate and measurable health remedies for which you are able to provide evidence. Before doubling down on measures that seem to HARM more than they HELP the overall health of citizens, please determine and make public the evidence to justify any policies. Giving "powers of police officers, sheriffs, constables, and all other officers" is an overreach of what the State Health Departments' responsibilities, an overreach of the people's freedoms, as well an effort to over-centralize general powers within the state, which is against what our Constitution stands for throughout the land.

Regarding mandating shots, know that the clinical trials will not be completed until 2023. Know that WA State has a legal definition of a "vaccine" that the COVID-19 shots do not fulfill as they were never part of a living microorganism nor do they prevent transmission or infection of disease. "Vaccine" means a preparation of killed or attenuated living microorganisms, or fraction thereof, that upon administration stimulates immunity that protects against disease and is approved by the federal food and drug administration as safe and effective <https://app.leg.wa.gov/RCW/default.aspx?cite=70.290.010>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx?cite=70.290.010>

Finally, do no harm! You cannot possibly know or care more about the health of children than do the parents of Washington children!

Now I ask, how necessary or even safe is it to give a vaccine to a person who already has immunity to the pathogen? Most children by now have been exposed to the virus and have developed immunity without difficulty since it has now been almost 2 YEARS. Why consider a mandate for those not at high risk for adverse outcome should they become infected but who carry unknown risks of adverse reaction with getting the shot?

I look forward to hearing these concerns addressed and evidence for any and all recommendations to be presented when I tune into your meeting on January 12.

Thank you,

Hailey Eames

I have 2 kids that go to school and if you guys require the covid vaccine as part of immunization requirements then we are homeschooling until we leave this state. Please don't make it a requirement. This is a decision parents should make not the school or the government and the flu vaccine has never been required so why should this?

Dear Board of Health Members,

Thank you for your service to the citizens of WA.

I am writing to ask you to NOT implement ANY policies that utilize tyrannical actions (involuntary quarantines, testing, treatment, counseling, and vaccinations) in what will be a failed attempt to "contain" Covid19. This virus will never be contained, it is a part of our ecosystem now. The only real defenses against it are REDUCING CO-MORBIDITIES and allowing ROBUST THERAPEUTIC TREATMENT DEVELOPMENT. Have you as a board, recommended spending any public service resources on telling people to live a healthy lifestyle as the best defense??? If people are healthy, IT IS CLEAR THEY ARE AT A MASSIVELY REDUCED RISK OF LONG TERM EFFECTS FROM THIS DISEASE.

We also know that the vaccines are ONLY GOOD FOR SHORT TERM PERSONAL PROTECTION from significant symptoms, but do not stop transmission or infection. My taking a vaccine DOES NOT save anybody else from Covid19, so forcing vaccines on people becomes nothing more than a form of medical authoritarianism, not health care. If WA's health care systems are stressed due to COVID patients, it is ONLY because hundreds of qualified health care professionals were unnecessarily terminated from their jobs (many with natural immunity), and due to that there are not enough people to provide care.

Please DO NOT implement any actions that will only hurt/divide/anger your fellow citizens and DO NOTHING to reduce the spread of this disease. HAVE COURAGE AND PLEASE TAKE A STAND AGAINST TYRANNY.

Subject: Regarding Washington State Board of Health Meeting for January 12, 2022

External Email

Dear Board Members,

As a parent and a member of the community, I implore you to please stop the push to require Covid-19 vaccinations for ANY child in child care or school. Covid vaccines should absolutely NOT be a requirement for our children! Please also reference Seattle Childrens Article

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.seattlechildrens.org%2Fresearch%2Fbioethics%2Fresearch%2Fkids-required-covid-19-vaccine-ethics-perspective%2F%3Ffbclid%3DIwAR0R_d3b4QB75FgFmEhilIzrKMuUTn9GJBqiTO352mhaExKzZeCkabObK5g>
where its stated that it is too soon to be requiring vaccinations for our children.

Children are at an extremely low risk for Covid-19. The Covid-19 vaccines have no long-term testing on adults and they have even less testing on children. Covid-19 vaccines are not stopping the virus as many with the vaccine are contracting and spreading Covid-19 . The vaccine has not been tested enough to ensure its efficacy and safety in children. Requiring this vaccine does not protect our children!

The disease burden in this case does not meet your criteria. There is NOT a significant morbidity and/or mortality in at least some sub-set of the population. The survival rate is well over 97% and even the long term effects of Covid-19 do not represent a significant amount. Additionally, this vaccine is not meeting your criteria because it is not reducing the risk of person-to-person transmission.

As for the criteria of Implementation, the vaccine is NOT acceptable to the medical community and the public. There is an extremely large amount of both the medical and the general public who do NOT accept this vaccine as safe.

And finally in regard to vaccines effectiveness, this vaccine does not work. It is not on the Recommended Childhood & Adolescent Immunization Schedule. It is not preventing Covid-19 nor is it preventing the spread of Covid-19. The vaccine is not cost effective for our nation. Perhaps it is cost effective or free or maybe even puts some money into the local schools, but as a nation, it is destroying our financial position at an alarming rate. "Experience to date with the vaccine containing this antigen demonstrates that it is safe and has an acceptable level of side effects." Yeah. Not even close. Tell that to the parents of the kids who are having heart attacks. Tell that to my friends who have had massive auto immune flare ups and other medical issues arise immediately after their second dose. This is not a safe vaccine for all people.

In addition, i want to point back to The Nuremberg Code, codified into US Federal Law which prohibits forcing or coercing anyone, under any circumstances, to participate in a medical experiment; and the Code states "the voluntary consent of the human subject is absolutely essential." Your chapter 246 - 100 and rule making petition for 246 -105 try to confuse, coerce, intimidate, threaten and harass us. This is called retaliation and discrimination, and that is against the law.

We have the right to determine what is the best for our families. Please PROTECT our children by NOT requiring a Covid-19 vaccination to attend child care or school.

Thank you,
May Lindsay

To whom it may concern:

I am writing to ask you to vote against all vaccine mandates. Vaccine mandates violate fundamental human rights, notably the right to prior, free and informed consent for medical interventions. In a free society, everyone should have complete power and control over their own bodies. I urge you to do all in your power to ensure a return to the democratic principles upon which this country was founded. Especially, when the chances of survival from COVID is 98.23% for adults and even higher for children at 99.985%.

I realize your role is to maintain the legislation that "it is necessary to protect the health of the public and individuals by providing a means for the eventual achievement of full immunization of school-age children against certain vaccine-preventable diseases" (RCW 28A.210.060

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx&data=04%7C01%7Cwsboh%40soh.wa.gov%7Ce9754101261b467716f708d9d20e9648%7C11d0c0a1-404d-42b1-9000-000000000000> through 28A.210.170

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx&data=04%7C01%7Cwsboh%40soh.wa.gov%7Ce9754101261b467716f708d9d20e9648%7C11d0c0a1-404d-42b1-9000-000000000000>). Furthermore, your responsibility is to make decisions for public health for the "immediate preservation of the public peace, health, and safety, the support of the state government and its existing public institutions" ([1979 ex.s. c 118 § 13

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fleg.wa.gov%2FCodeReviser%2Fdocs%2FRCW%2F28A%2F28A.210.060.htm&data=04%7C01%7Cwsboh%40soh.wa.gov%7Ce9754101261b467716f708d9d20e9648%7C11d0c0a1-404d-42b1-9000-000000000000>). Unfortunately, the current inoculations have not proven to protect the public from transmission or infection of the Covid-19 virus . The inoculation concoctions still have an EUA status and have not completed Phase III safety trials. EUA products are, by definition, experimental and thus require the right to refuse. Under the Nuremberg Code, the foundation of ethical medicine, no one may be coerced to participate in a medical experiment. No healthy adult or child should be injured or die from a vaccine imposed upon them by their government.

What we know now about COVID-19 and children:

* Almost 100% of kids don't suffer from severe COVID

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fservices.aap.org%2Fen%2Fpages%2Fnovel-coronavirus-covid-19-infections%2Fchildren-and-covid-19-state-level-data-report%2F&data=04%7C01%7Cwsboh%40soh.wa.gov%7Ce9754101261b467716f708d9d20e9648%7C11d0c0a1-404d-42b1-9000-000000000000> . In fact, many have no symptoms at all. Thus, they may have already had COVID which is another excellent reason not to get the vaccine.

* The World Health Organization

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.precisionvaccinations.com%2Fblog%2Fsays-children-should-not-receive-covid-19-vaccines&data=04%7C01%7Cwsboh%40soh.wa.gov%7Ce9754101261b467716f708d9d20e9648%7C11d0c0a1-404d-42b1-9000-000000000000> (WHO) has announced that young people should not take the vaccine.

* A concerning number of young people

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdeconnecticut-teens-hospitalized-heart-problems-covid-vaccines%2F&data=04%7C01%7Cwsboh%40sbh.wa.gov%7Ce9754101261b467716f708d9d20e9648%7C>, especially those under 30, are suffering from myocarditis (heart inflammation), blood clots, low platelets and more following COVID-19 vaccination.

* The risks of COVID-19 vaccination adverse outcomes certainly outweigh the benefits to children and young adults who are considered low risk populations.

* Parental rights to make independent, informed decisions regarding their children's medical interventions, including vaccines, are being threatened.

* Some scientists have raised concerns that the safety risk of COVID-19 vaccinations have been underestimated. As of October 29th UPDATE, there have been 856,919 vaccine injuries including 18,078 deaths following COVID-19 vaccination.

* Clinical trials in children and young adults are ongoing and will not be completed for at least one year.

* Not a single published study has demonstrated that patients who have had a prior COVID-19 infection benefit from the vaccination. So why recommend all kids get the shot?

It's time to end the use of COVID-19 as a pretext for governmental coercion and mandates. The public is waking up to the cascading negative impacts upon society from elected officials wielding unprecedented power over the citizens of this country. As a resident of Washington state, and a concerned citizen, I urge you:

-- Do not support any legislation or directive coercing people or mandating medical interventions--including vaccines

- Do not support any legislation or directive requiring people to wear masks

-- Do not support any legislation or directive that deprives people of the right to
congregate

-- Do not support any legislation or directive establishing lockdowns

-- Do not support any legislation where employers can enact coercive tactics to overrule a person's rights to body autonomy

There is a reason many people in our current administration are demanding that you negate any and all personal morals, defy our constitution, harm others, create public fear, and avoid encouraging effective means of immunity. Money. It may not be the root of all evil, but it can certainly feed those roots. These companies, including our government agencies that are financially benefitting from these inoculation mandates, are making approximately \$1,000 per second from injecting people with questionable and life threatening substances. Many members of our community and state, who have been inoculated by the Covid "vaccine" are still becoming infected with the virus. This is not proven protection. This is experimental drug use. Is corrupt money and power, in the

name of a science experiment, more important than the health and welfare of the people of our state? The very people you serve to protect?

May quality judgment and moral perspective be the lens through which you make your decisions, and may fraudulent claims by those who have personal and financial agendas not obscure your ability to make determinations for the good people of our state.

Sincerely,

Ian Newman

Subject: School immunization requirements vote

External Email

This email is regarding the upcoming vote for student required immunizations for school. As a concerned parent I wanted to share my thoughts. I do not believe any child should be forced into any vaccination. There should be an opt out. Parents should be in charge of their children's healthcare and decisions. There are many reasons why I feel this vaccination should not be a required one for school. 1st of all it has not been around long enough to know the long term effects. Secondly the vaccination has not put a stop to the spread of the virus or getting it.. Next we don't know how each child would be affected by this vaccine so it should be up to the child parent and doctor. Our whole family recently had the virus thankfully we got through it fine. The kids had it minimal symptoms to no symptoms. Even our high needs special needs daughter got through it well. Even vaccinated adults and children can get the virus as well as spread it. If this vaccine was one that put a stop to the spread and stop to getting the virus that might be another thing but it doesn't. This vaccine they are saying you need boosters for often and it sounding more and more like a flu shot. Which is optional. This should not be forced. Every child deserves the same rights to education at school in person as well as the ability to play sports with their peers. Not having this vaccination should not be something that puts a hinder in that for these children. Also there are many studies where teens and children are having long term side effects from the vaccination including heart issues. Please consider keeping this an optional vaccine.. If people are comfortable with getting it and they want to and they feel it protects themselves that should absolutely be there choice but it should not be forced on any child or adult. Every child should have the same rights to the same education no matter their covid vaccines status.

Thank you for your time,
A concerned parent

I have heard that you all are trying to quietly pass a recommendation that school aged children be mandated to get the vaccine.

I'm here to tell you as a parent and educator in Washington that you are overstepping more boundaries than ever before. This is NOT about safety, but about power and everyone in this corrupt stage is abusing it.

Keep your government mandates and "recommendations" and give people freedom of choice. Enough is enough.

Hello,

It has come to my attention that WA Board of Health will be discussing COVID-19 shot mandates for schools and recommendations for forcible quarantine and/or detention of those that disagree with policies. As a parent and a citizen of the State of WA, I request that you abandon the plan of forming a technical advisory group to explore COVID-19 mandates and adopt a new rule of requiring products to have completed Phase 3 clinical trials before they can be added to the list of school requirements.

One definition of insanity is to repeat the same action over and over again and expect different results. For almost 2 years we have attempted to follow the health recommendations of washing, masking, distancing, testing, isolating and vaccinating. By now, it is quite apparent that the virus has mutated; as a result, SARS CoV2 has become more virulent (which is the nature of all viruses) but LESS FATAL. Real immunity is achieved with exposure and recovery as is evidenced by the fact that those infected with SARS in 2002/3 cannot become infected with SARS CoV2 today! In contrast, COVID-19 has managed to find a way to escape the vaccine per the evidence by the incredibly high numbers of vaccinated and even boosted individuals getting sick and testing positive. Surely this fact has not escaped your knowledge!

I also hope that you, being members of the WA State Health Board, are well aware of what the #1 cause of death was (aside from abortions which came in at an astonishing 43 million, globally) in 2021. Last year, the disease that killed 8.2 million people globally was cancer. Cancer killed more people last year than COVID-19 has since the beginning of the pandemic. Death is tragic, yes, but I will not stand by as mandates and overreaches of personal medical freedoms are occurring, of which should only be between doctors and their patients should be handled; politicians and elected officials like yourselves have not earned nor have any say in the privacy of what medical choices my family or any Washingtonian family makes. Can you imagine what the United States could do if local officials like yourself across the nation put this much effort into cancer research and treatment as they did in pushing for COVID-19 vaccine creation? We'd

probably find a cure within the next year.

I do not doubt that you all desire to improve the health of Washingtonians. However, I do not trust that you have carefully investigated and logically determined adequate and measurable health remedies for which you are able to provide evidence. Before doubling down on measures that seem to HARM more than they HELP the overall health of citizens, please determine and make public the evidence to justify any policies. Giving "powers of police officers, sheriffs, constables, and all other officers" is an overreach of what the State Health Departments' responsibilities, an overreach of the people's freedoms, as well an effort to over-centralize general powers within the state, which is against what our Constitution stands for throughout the land.

Regarding mandating shots, know that the clinical trials will not be completed until 2023. Know that WA State has a legal definition of a "vaccine" that the COVID-19 shots do not fulfill as they were never part of a living microorganism nor do they prevent transmission or infection of disease. "Vaccine" means a preparation of killed or attenuated living microorganisms, or fraction thereof, that upon administration stimulates immunity that protects against disease and is approved by the federal food and drug administration as safe and effective <https://app.leg.wa.gov/RCW/default.aspx?cite=70.290.010>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx?cite=70.290.010>

Finally, do no harm! You cannot possibly know or care more about the health of children than do the parents of Washington children!

Now I ask, how necessary or even safe is it to give a vaccine to a person who already has immunity to the pathogen? Most children by now have been exposed to the virus and have developed immunity without difficulty since it has now been almost 2 YEARS. Why consider a mandate for those not at high risk for adverse outcome should they become infected but who carry unknown risks of adverse reaction with getting the shot?

I look forward to hearing these concerns addressed and evidence for any and all recommendations to be presented when I tune into your meeting on January 12.

Thank you,

Hailey Eames

I am a Washington state resident and parent to a school age child.
I oppose any formation of a task group designed to explore mandating covid injections in our schools.

The emergency use authorization for these injections has expired by every logical and scientific standard.

I support the informed choice Washington petition for rule making which is on the agenda for January 12th.

No EUA product may be mandated according to federal law title 21, section 360bbb-3 of the FD&C act. Mandating these injections is illegal and immoral and any step in that direction is wrong.

Washington State is in grave trouble on so many levels and the department of health should be focusing on the very real health dilemmas facing our children.

Respectfully,
Kerri Johnson

I oppose the Communicable and Certain Other Diseases Rule.

I am completely against any of the proposed Covid Policies that are over reaching and immoral. I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

Additional comments:

(20) "Medical treatment" or "treatment" means the treatment for curable diseases and treatment that causes a person to be unable to transmit a disease to others, based on generally accepted standards of medical and public health science.

With regard to COVID, the vaccines are failing to cause a person to be unable to transmit a disease to others. And "generally accepted standards of medical and public health science" are controversial at best, and at worst are determined by large pharmaceutical companies controlling funding for research and spending more money lobbying than on research. They have no liability for so-called vaccines, they provide misleading poorly designed short-term unblinded research, they have had to pay large settlements for committing fraud, and they are focused on profits at the cost of human lives. Is experimental vaccination that carries risk of death and permanent harm the "treatment" you are proposing?

Isolation" means the separation((, for the period of communicability or contamination,)) of infected or contaminated persons or animals from others ((in such places and under such conditions as)) to prevent or limit the ((direct or indirect)) transmission of the infectious agent or contaminant from those infected or contaminated to those who are susceptible to disease or who may spread the agent or contaminant to others.

Now why would you propose removing the provision that specifies the period of isolation?

(13) "Health order" or "order" means a written directive issued by the state or local health officer that requires the recipient to take specific action to remove, reduce, control, or prevent a risk to public health.

Considering that health orders could include specific action (presumably including vaccination), and that so-called COVID vaccinations are currently available under emergency use authorization (and not approved) and are being administered without informed consent, you should be on notice that this revision puts your "health officers" in the position of further subjecting people to medical experiments. Is that what you're desiring to achieve? Involuntary participation in human medical experimentation? Is the resistance to your attempt at one-size-fits-all mandated vaccination so great that you must resort to these measures?

WAC 246-100-045 specifies "competent medical care" and there is already a great shortage of that. How would you propose ensuring competent medical care?

I don't have time to continue picking this thing apart, but it appears to be an attempt at inappropriate and inadvisable overreach. How would you propose implementing these WAC provisions? The potential for human rights violations, civil rights violations, discrimination, government overreach, and similar harms far outweigh any of your fabricated benefits in this poorly handled COVID crisis that has already been made exponentially worse by the way it has been mismanaged by public health authorities.

Under these provisions, it appears it would be easier to detain someone for having symptoms of the common cold than it would be for a victim of domestic violence to get a restraining order. Even mentally ill persons at risk of causing harm to themselves and others must be allowed a medical exam and have a court order for involuntary medical treatment. Quit trying to impose your ineffective and dangerous pharmaceutical products on adults and children who do not want them and who recognize that there are safe and effective alternatives.

If you're going to mandate anything, you should mandate that your public health officers and authorities read "The Real Anthony Fauci: Bill Gates, Big Pharma, and the Global War on Democracy and Public Health". The author welcomes debate and any sincere scientific challenges or updates to the thoroughly researched content.

I imagine some of you believe you are acting in someone's best interest, but you are merely doing the bidding of Big Pharma while failing to represent the people and protect our democracy.

A Very Concerned Washingtonian.

Subject: Reject WAC Code Proposals January 12

External Email

Dear Representatives,

We've entrusted you to help protect, lead and build a great life for Washingtonians. Surely your common sense can see how the WAC codes that are being proposed in the January 12 meeting are in direct alignment with how Nazi Germany and the Holocaust all BEGAN. The same mistakes are being repeated! You would be an active contributor in taking away liberty and freedom; the very thing that we have prided ourselves on as a nation and our veterans have sacrificed to uphold. When you look at photos or see videos of the Nazis, do you think to yourself, "That's what I want to be like"? Because that is exactly what you'd be like if you allow these codes to become legalized in Washington state.

Everyone is getting COVID-19; just like everyone gets colds or flus periodically. Sometimes they are intense, sometimes they are mild. But we have seen that COVID-19 is not killing off the mass population like it was originally made to look. Children are hardly affected, the "vaccines" don't stop people from getting it, and the "vaccines" and rules surrounding COVID-19 are changing so frequently that it is obvious that we still don't know enough about the "vaccines" to where it should be mandated to inject into our bodies, let alone our children's delicately developing bodies. And what about religious beliefs that do not align with the "vaccines"?

Do you want to be that person who allowed children to be taken away from their parents because for whatever reason, they chose not to "vaccinate"? Do you really want to be that person who is known for initiating the sending of families to camps for following their freedom of choice or religious or medical beliefs? Stop treating the unvaccinated like Jews!

Do not approve these WAC codes. Do not require "vaccination" for children to attend school. Do not create modern day Nazis by granting authority for families to be sent to camps or punished in any way for how they choose to protect themselves against COVID-19. Stand up for our freedom! Be a hero for Washingtonians and reject these proposals! I know you can see what some of our government leaders are attempting to do and it is terrifying! Not to mention, you will see this state being vacated in great numbers over the next couple of years as a result. Truly consider the vast impact this would have on the demographics and the economy in Washington state.

We trust you to do the right thing. PLEASE, reject these WAC proposals.

Respectfully,

Kristi Balant

Subject: Stop Mandates for COVID-19 Shots for Children

External Email

To Whom It May Concern ~

I'm writing today to oppose the Board of Health's formation of a Technical Advisory Group (TAG) to review information for the consideration of mandating shots for school and I oppose the Board of Health taking any steps to mandate vaccines for children. I oppose COVID-19 shot mandates for everyone. I believe that they are unconstitutional. I believe if you go down this road and there are deaths in people, and especially our children, that you should and will be held accountable for all of them. The studies have already shown that children have a very low rate of getting COVID and spreading it to others.

The vaccines for children are still in EUA and even if the FDA approves them, you are talking about the largest human experiment in the history of our country. Allow people to make their own medical decisions for both themselves and their children. A better use of your time would be to investigate and visit with ALL doctors about the vaccine. Dr. Robert Malone, the inventor of mRNA has even said that these shots should not be used on children. When the president of the United States says that there are therapeutics available for an illness (COVID) and he has access to all the medicines all over the world and he's shunned by the media, the WHO, NIH and big pharma, you know that the United States is heading in a bad direction. Do not be a part of going against the medical Hippocratic Oath or the Nuremberg code.

We will all be watching you. Tell the truth and protect our children. Thank you for your time.

Sincerely,

Lisa Johnson

Subject: School aged vaccine mandate

External Email

Why would experimental vaccines be mandated for children when they have a 99.997% chance of recovery from Covid and its variants?

The use of common sense, critical thinking, uncensored scientific analysis and debate have become irrelevant to government employees who have assigned themselves the role of mandating healthcare decisions for others. If each person involved in the implementation of mandates were to be held personally accountable for any injury incurred, would common sense, critical thinking, uncensored scientific analysis and debate be allowed as part of the decision-making process?

Get your children vaccinated if you want but keep your mandates off of ours!

Subject: Statement January 12, 2022 meeting

External Email

Please reconsider any attempt to enhance Covid related language within Washington state codes and/or to militarize our agencies against the citizens of the state.

Consider Instead the ideas that promote stronger medical rights for our citizens, removing no-fault liability clauses for vaccine manufacturers and distributors of all vaccines, advertisers and physicians. Especially with regard to inoculations that have bypassed established protocol and ethical standard review, including those only approved based on a EUA status.

Consider raising requirements of drug manufacturers and researchers. Add higher expectations of absolute transparency,
Reduce the time allowable for resolution of data gaps. Eliminate any approval of any pharmaceutical that takes over 10 years to show its claim of safety.

Consider that informed consent does not include, and is not constituted by, propagandized coercion, job loss or sanctions of any citizen of any age.

Consider as well, the protection of children. The children, even in trials of medication, cannot make medical decisions of their own volition, they depend on their parents to protect them from all harm, even that which is baselessly, unscientifically, imposed by governments. The children should not be forced into medical studies and especially not one that involves an inoculation of questionable efficacy.

Consider that you are being asked by your superiors, not by the citizens, to enter into a tyrannical action against, even your, better judgment. I do not believe that any of you will be capable of living with yourselves if you are willing to commit human lives to an almost certain death or unjustified confinement.

Consider that citizens count on being innocent before being considered guilty. To detain a citizen without cause or due process is and should remain a crime. You should not be in the business of creating false cause to validate removal of inherent rights. These proposals amount to fraud and force. That is something that you, as a citizen as well, should not ever welcome as a code, law or a practice.

Consider that no matter which way you steer your input or decision, there will inevitably be a day of reconciliation at the end of this saga. Vote as if your life, and your children's lives, depend upon your actions, because it will.

Subject: school children vax mandates

External Email

Dear Washington State Department of Health staff:

Please do not require school children and preschoolers to be inoculated with a Covid "vaccine" in order to attend school in our state!

Why the Pfizer vaccine for Covid 19 Does More Harm Than Good

Source: www.CanadianCovidCareAlliance.org
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.canadiancovidcarealliance.org>>

The Pfizer trial only used:

- 1) Unexposed & inoculated, and
- 2) Unexposed & not inoculated.

They should have also included:

- 1) Exposed & inoculated, and
- 2) Exposed and not inoculated (aka natural immunity from having had Covid).

The fact that they avoided the latter 2 shows that they thought their Pfizer vax wouldn't perform well in those categories. A study should show how those exposed and not inoculated fare vs. inoculated & exposed. It didn't.

The clinical endpoints of the trial should have been: Do people who take the Pfizer injection have less illness and death? (It wasn't). Choosing the proper endpoint is well-known, as a result of testing of cancer drugs. In cancer drug testing, they had to switch to all-point mortality, and Pfizer should have done so.

They could easily have included biomarkers, but they didn't. We need to know how people exposed, but not inoculated compare with the exposed and inoculated. This is natural immunity, and we need to know how those with natural immunity fared.

They should have tested for: de-dimer levels (micro-clotting) before and after.

Other biomarkers Pfizer should have and easily could have tested for: inflammation, barrier permeability, hypoxia, cardiac damage, predisposition to Alzheimer's, predisposition to autoimmune disease.

They should have had biomarkers for thrombotic disease. This is a condition which would take time to surface, but could have been measured before & after in biomarkers. Many doctors are reporting thrombotic conditions in vaccinated patients.

Vaccine passports: The Pfizer vaccine was not tested for spread reduction: No evidence at all that they reduce transmission and disease, and that was never one of the

endpoints of the study. All they measured for was, "Do people who take the vaccine test positive for Covid-19 less often?" and the study was designed so that they would get few "no" answers, and they then proceeded to a rollout.

Testing failures: Subjective testing: The study did not test all patients for Covid-19! Instead, they only tested for the Covid-19 symptom, and then left it up to the discretion of their investigators to decide what that was. So that means that asymptomatic infection would be missed entirely. And it highly level of subjectivity, because an investigator could actually decide whether to test or not to test. This lack of systematic testing actually makes the results of the trial unreliable. All participants should have been tested.

There is considerable missing data in the study. The endpoint is all Covid cases: 8 inoculated vs 162 placebo. But it's such a small # of participants to begin with. But there are 80 lost follow-up subjects in the inoculated group! They don't know whether they got sick or not, or even died. They don't know. That's 10x more than the # of Covid cases they had in the inoculated group. So if a significant proportion of those 80 had been positive, it would have dramatically changed the results. Also, all the suspected but unconfirmed cases: 1594 in the inoculated group, 1816 in the placebo. This means they were symptomatic, but the investigator never followed up with a Covid test! These are huge numbers compared to the confirmed cases! The fact that the suspected cases which weren't tested were significantly larger than the endgame results means that this data is unreliable. The study should not have been accepted.

What about the placebo group? There were also many unconfirmed cases. If all these cases, inoculated and placebo, were positive, the relative risk reduction would then only be 19%. That's not a high enough percentage to gain approval.

Adolescents: The inoculation is really all risk and no benefit.

Teens are statistically at 0% risk of death from Covid-19. But the vaccine does pose risk of serious events. But the study was not designed to find serious adverse events. A serious event that occurred at a rate of 1/800 might not even show up in a sample of 1,005 people.

In the tests, there was a serious event in at least one subject who was inoculated. A 12-year-old girl. She experienced multiple serious effects, including lost feeling from the waist down, lost bowel and bladder control, menstrual cycle issues, seizures, verbal and motor tics, dizziness, fainting, headaches, brain fog, erratic blood pressure, and more. And the last 10 months, she is wheel chair bound and fed by a feeding tube. Pfizer labelled her case "functional abdominal pain."

5-11 year olds: The inoculation is an unacceptable risk to this group. Pfizer, using predictive modelling, acknowledges that their inoculations WILL cause myocarditis, but optimistically claims there will be zero deaths from myocarditis in any of their modelled scenarios. It's speculative. There is no justification for giving children myocarditis. But the government has actually normalized myocarditis in kids, publishing Sick Kids brochures of how to deal with myocarditis in kids. But how to deal with it is to not cause myocarditis in kids! It's very serious. It causes permanent damage. Severe myocarditis weakens your heart so that the rest of your body doesn't get enough blood. Blood clots can form in your heart, leading to a stroke or heart attack. And the mortality rate is up to 20% at 6.5 years. The risk of 4 in 20 children who contract myocarditis dying within 6.5 years is unequivocally an unacceptable risk for children. But the FDA maintains that it is an acceptable risk for children. They have actually abandoned the "do no harm" principle.

Dr Eric Rubin of the New England Journal of Medicine (NEJM) has said that the way to find if they do harm is by doing a roll-out on the population. He voted to roll out

inoculations for ages 5-11, and suggested that a population level roll out as an appropriate way to test for adverse events. Of note, the NEJM is also the publisher of the Pfizer reports.

Governments are proclaiming the inoculations to be safe, yet the data is not there to back that up. Pfizer admits that their long term immune response, efficacy & safety data is limited and that their studies weren't powered to find "rare" side effect, as only about 1500 kids were in the testing group which received the inoculation. The law of informed consent says that parents should be told about these risks, but it's not happening.

On Nov 2, the British Medical Journal released an article about their investigation into Ventavia, one of the research companies Pfizer hired to conduct the trials. A whistleblower who was a Regional Director reported to the FDA that Ventavia: falsified data, unblinded participants, did not follow up and test participants who reported symptoms, and mislabeled some specimens. Several other employees backed up the Whistleblower's account. But Pfizer never disclosed the problems in its EUA application, and in fact, Pfizer has now hired the same researcher, Ventavia, to run more Covid-19 clinical trials.

So it's not surprising that we are seeing the issues we are in the 6-month report.

Manipulation of Data Cohorts: Pfizer took the results from their adult trial, which started July 27, 2020, and then added in the results from the 12-15 year olds' trial, despite the fact that the adolescent trial started four months later. Since it's well known that the efficacy wanes over time, this gives a false boost to the efficacy numbers. The efficacy of the two groups should have been reported separately, not presented as one combined result.

Pfizer trials did not prove safety. They proved harm. The endpoints of the trial should have been illness and death, not a positive or negative Covid-19 test. But their test actually showed harm. They used younger, healthier groups than the vaccine would eventually be rolled out to. Here are some results of Pfizer's own randomized control trial: Related adverse event, +300% over placebo group; severe adverse event, +75% over placebo group; any serious adverse event, +10% over placebo group. Deaths in the vaccinated group: 20; placebo group, 14.

How is this harm playing out in the real world? Governments are assuring us that they are monitoring safety and will let the public know if there are problems. But once the vaccine was rolled out at the population level, the surveillance method for reporting is called "passive." It's difficult and time-consuming for overworked doctors and health workers to file the harm reports, and then it goes thru several levels of bureaucratic approval before the case is accepted as a vaccine-related injury.

"Active" surveillance was used for trial participants. They were given a phone app with choices of adverse events they experienced. 78% reported adverse reports, and 5% were serious. There was also journal entry options for the participants, and 30% reported adverse events thru that, and 2% were serious. But when the reporting method was switched to passive for the general population rollout the reporting fell way down.

But some news is getting out: For example, the risk of myocarditis is becoming known. And it's occurring in younger, healthy population where there was previously a very low rate of myocarditis.

On Nov. 17, the FDA released the first batch of data to satisfy a Freedom of Information request. This is data used by the FDA to approve Pfizer's covid-19 vaccine. One report in which Pfizer tracked adverse events in the first 2.5 months after the EUA, reported 1,200 deaths and over 25,000 nervous system adverse events. Under "Safety Concerns" Pfizer listed Anaphylaxis and Vaccine-Associated Enhanced Disease. This document should be

incriminating for any agency who saw it and called the vaccine "safe."

Pfizer's criminal past includes lying about a heart valve which fractured and killed hundreds; conducting clinical trials on African children without their parents' consent, after which some of the children died; bribing doctors; suppressing research; manipulating studies; withholding information that its products caused cancer; fraudulent marketing, and many more. They've literally paid billions in fines and settlements for their actions. Therefore, they are not a highly ethical corporation.

The CDC has redefined "vaccine" to suit political & pharmaceutical interests. The new definition of vaccine by the CDC is "A preparation that is used to stimulate the body's immune response against diseases." The new definition does not indicate there is any actual benefit derived from a vaccine.

Because of these statistics and much more potential damage to our youth, I encourage to oppose requirements for school children and preschoolers to be inoculated with a Covid "vaccine" in order to attend school in Washington state!

Sincerely,

Michele Beckmann

We are against all of this. Do NOT allow this to happen in our state.

People and families have the rights to choose what is best for their families and needs. You work for US, not the other way around. You simply can't take away our freedoms like this.

We will resist all concentration camps and law enforcement will NOT enforce this. You will have a state in disarray for a virus that 99.9% of people survive and a virus that EVERYONE is getting jabbed or not.

PLEASE DO NOT SUPPORT THESE TYRANNICAL laws!

- Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Subject: State Board of Health/WAC codes

External Email

To State Board of Health,

As a parent, teacher, and well-informed citizen, I am writing to express my concerns in regard to items on your meeting agenda.

Agenda Item #9 – Allowing local health departments to set up quarantine facilities and in some cases, detain people against their will. This is in direct conflict with our state constitution and is completely unnecessary in the current health situation. The vaccines have proven ineffective, as people still get Covid-19 after receiving them. Medically, it is proven that people develop natural immunity after having Covid-19. What justification would there be for quarantine facilities?

Agenda Item #11- Informed Choice Washington's Petition for Rulemaking (filed by Xavier Figueroa, Ph.D. on behalf of ICWA) requests a new rule that prohibits any EUA product, or any product that has not successfully complete Phase 3 trials to be added to mandatory school health requirements. I agree with this statement for the following reasons. #1. The current Covid -19 vaccines have not completed Phase 3 trials. #2. The current vaccines for Covid-19 are still in EUA. This means that they are supposed to only be applied in an emergency – not as a broad application to the entire public. #3. The EUA no longer should be applicable in this situation as current and further studies are finding many therapies for early treatment for Covid-19, which improves opportunities for natural immunities to develop. #4. The current vaccines are not preventing Covid-19. #5. According to the CDC's website VAERS, the current Covid-19 vaccines have a terrible record of adverse events and death. There is no data on safety over 3, 5, 10 years and beyond. It is not acceptable to vaccinate every child with a vaccine with this undeniably tragic safety level. The consequences could be devastating on our children!

Respectfully,

Concerned parent,
Krissy Ryan

I absolutely oppose mandating school children vaccinations for these reasons:

- 1.) Need: Our children do not NEED this vaccine as they are in the lowest risk of death category with a 99.9% survival rate.
- 2.) Risk: The vaccinations are still under emergency use protocols, and have not been properly studied for long term effects. Data is showing our children are more likely to have an adverse reaction to the vaccine than be harmed from Covid.
- 2.) Efficaci: The data shows the vaccine does not prevent people or kids from getting Omicron, and Omicron is actually a better protector from the Delta variant than the vaccine.

To whom this may concern as a parent a grandparent and a school district employee I beg you do not make it a requirement for school-age children to be vaccinated to attend school. I fear that parents and other staff members will pull their children out of public school if this becomes a requirement. Just from what I know and what I have heard parents are not going to go along with this requirement. I fear if this becomes a requirement that parents and voters will not vote Yes on any future Levy or bond that has to do with the school districts. If my child was still in school I would pull her out of school quit my job and homeschool her. My grandchild is not old enough to be in school yet but that would also happen. I am deeply saddened by this whole requirement issue. So please please please do not make this a requirement.

Subject: State mandated COVID-19 shots for our children

External Email

I wanted to express my concern for a mandate to vaccinate children with COVID-19 vaccination. This mandate is completely unreasonable and follows an unwarranted approach to "keeping our children safe." The data has already proven that children are at extremely low risk of not only contracting or spreading the virus, but also very low risk of developing mild to severe symptoms. Why would we allow the state to MAKE our children take an experimental vaccine they don't need or to "protect" them from a virus that they are not likely to get? It's absolutely preposterous. In addition, data has also shown even if they do get the vaccine, it does very little to further protect them from contracting or spreading the virus. The data further concludes that with the side effects that have been traced back to the vaccine, it is literally poses more of a risk to develop adverse long and short-term reactions by taking the vaccine, than by not taking it at all. If vaccinating our children puts them at risk of having or developing negative side effects, the scale of these adverse reactions have the potential to be on a large scale and the blood of the children affected will be on the state and those proponents of this unwarranted mandate.

Jeff Kvinsland, resident in Pierce County, WA. and father of three.

Subject: Statement for WA State Board of Health will be meeting on January 12, 2022

External Email

The Public Health bureaucracy in Washington State has devolved into a sales force for pharmaceutical products. Government officials and local Public Health Officers have participated in the world-wide Covid psyop responsible for two years of unnecessary pain and suffering. They support a medical dictatorship which mandates experimental pharmaceutical injections as a condition of employment. These mandates violate the Nuremberg Codes and all existing laws involving informed consent. They failed to support early treatment protocols used around the world with generic drugs available over the counter in many places. They failed to stop the toxic drug Remdesivir plus ventilator treatments used to murder hospitalized patients who were REFUSED early treatment because it was forbidden by criminal public health officials. There will be a Nuremberg 2.0. Keep that in mind before you even attempt to force so-called vaccines on anyone or justify dragging people off to interment camps.

I OPPOSE Agenda Item #8, the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose all COVID-19 shot mandates.

I SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. No Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Subject: School-Age COVID-19 Vaccine Requirement Recommendation

External Email

Greetings -

I respectfully request a NO as a decision on requiring the COVID-19 vaccine for school age children. COVID-19 has become endemic, like the flu and colds. Immunizations are meant to be preventative. Per WAC 246-105-020 item 13 immunizing agents are for vaccine-preventable diseases. The COVID-19 vaccine is NOT preventative. It does not prevent the infection of or the spread of the COVID-19 virus. Much like the flu shot, the COVID-19 shot may, however, reduce the severity of the virus - which is a great option for those that feel they may have a greater risk. The hospitalization & death rate for children because of COVID-19 is so small, the CDC isn't even reporting the numbers.

While I am not making light of what can be a very serious virus, I urge you to reconsider your recommendation of a new requirement and keep the COVID-19 vaccine optional, like the flu shot. Children with underlying conditions or comorbidities should probably get it, or anyone that WANTS to get it should. But that is a choice that a parent should be able to make with the guidance of their child's health care provider.

Thank you for your time.

Best Regards,
Haley Kauzlarich

Hello, Ms. Kahler,

I have a child in a middle school in Washington. I would like it to be made known that I am greatly concerned about the possibility of mandating that school-aged children be required to receive a COVID-19 shot in order to attend school.

First, as has been made abundantly clear, these COVID-19 shots have been completely ineffective in preventing the spread of the corona virus.

Second, the only available shots in the U.S. are those under experimental use authorization by the FDA. This means that there are no fully vetted vaccines for the COVID-19 virus available.

Third, there is evidence that these shots have created adverse reactions in many younger people who have received the inoculations. These adverse reactions, like myocarditis, cause irreparable damage to the heart of children which have these consequences.

Please do not approve any action which would mandate that school-aged children would be required to receive these COVID-19 shots. Doing so would, in my opinion, place the Washington State Board of Health in a place of enmity with myself and other citizens of the State of Washington.

Thank you for your time in reading this message.

Sincerely,

Neil Berry

Vancouver, WA

Subject: Should cov-19 be added to WAC codes?

External Email

Do not add Covid-19 to the current infectious disease WAC codes. For a disease that is fatally affecting next to NO children, it is bizarre to think we should mandate an EXPERIMENTAL shot. If the state would like to have it available, that is okay, it is not okay to force it on children when we have no clue of the long term or short term effects. What short term effects we do know of are not looking good and the vast majority of children get the sickness and get over it quickly. What we can see by looking at adults is that the shot isn't protecting them anyways, so why would I risk it on my children? I would never allow my children to be part of a medical experiment unless the odds for their survival were drastically different. Let me repeat, drastically different. This is my line, this is the line that I've said the last 2 years that I will not allow the government to cross. Children will survive, don't force shots. Do not add Covid-19 to the current infectious disease WAC codes.

To whom it may concern,

I am extremely against mandating any of the proposed Covid Policies. These include WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

Not only is it against our Charter of Rights but it is also against the Numenberg code. As sent out today, what is in the vaccine will be released within 8 months, and so, if you force this upon ANYONE, you will be liable for any side effects that will ensue (any believe me, there will be millions of side effects).

Do the right thing and remove any talk of mandating these dangerous injections.

Signed a very concerned citizen,

Leanne Kudrna

External Email

I, Kati Spencer, a registered Voter and resident of Spokane WA wholeheartedly oppose any and all CoVID vaccine requirements for any minor child in WA state. I oppose any medical treatment, medical examination or counseling (WAC 246-100) without parental consent. I will not allow local health officials to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC-246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040) This includes the requirement of the covid-19 injection as a part of school immunization requirements using WAC 246-105.

It is an infringement on our rights as citizens and our ability to do what is best for our children and ourselves. The government doesn't have the right to tell us as parents or US citizens what we can and cannot do with our own bodies. We have the right to medical autonomy and it needs to stay that way. The government needs to get out of our medical decisions.

This is an atrocious abuse of power and we will not stand for it.

Hello,

I am writing to let you know the following:

1. I OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. Children do NOT need COVID-19 shots. I oppose COVID-19 shot mandates. It is a violation of our freedom to medical choice.
2. I SUPPORT informed Choice Washington's Petition for Rulemaking-the petition is item 11 on the January 12th agenda. It was filed by Xavier Figueroa, PHD on behalf of ICWA and asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product or any licensed product that lacks completed Phase 3 trial studies, to the school required list. Federal Emergency Use Authorization Statutes prohibit school mandates of EUA products. Phase 3 clinical trials are not completed yet. The FDA admits safety is unknown in children! Children should be excluded from mandates!
3. I do not support any rule that tries to involuntarily quarantine any person because of COVID-19 illness. That is a violation of our human rights and against freedom.

Thank you,

Leo Blakley, concerned citizen

To whom it may concern,

It has come to my attention that there are some law being considered that would take away our freedoms and rights as citizens. I understand that it is important to keep our communities safe. However, not at the expense of losing our freedoms.

I do not understand how we have gotten this far. When Covid firsts was a concern most of us were more than willing to do what was needed to keep everyone safe. However, it has gone on too long. I had an elderly parent living with me and could not even get her help with other medical concerns because of the lock down. I had to watch my mother be in pain and eventually have to suffer alone. To her that was worse than death. The reasoning has gotten out of control.

These mandated and rules have caused more emotional, physical and financial problems than it should have. Other states are getting through this without all the problems. There is a reason so many people are leaving this state. It is because they do not want to comply with all the rules here.

I have always loved living in the state of Washington, but feel like my options are too running out. I feel like those in power have gone too far.

So, I would ask that you reconsider the rules that are being considered. Taking away the freedoms of honest citizens is wrong. We will all do what is right if we are left to our own beliefs. It is wrong to force parents to have to make choices for their children that they do now believe in. It is wrong to be able to confine people against their will. It is a dangerous step that we are taking to take away the freedoms of the citizens of Washington state. More people will just leave this state if these rules are put into place. We are protected by privacy laws that should not be broken. It is not a good direction that we are going in. I am seeing so many leave because they just don't want to comply any more. I feel that I need to stand and try to make a difference, but I to will leave if that is what it comes to. We live in a country that is free and that freedom should be protected from even the politicians if they are taking away the freedoms that our founding fathers fought so hard to protect.

I believe that people do care about each other. I also feel like we have been lied to and giving false information to try and get us all to comply. Not sure why it is being pushed so hard. I stand against the rules that are being considered. STOP this madness now and stop the policies before it destroys this state that I have loved for so long.

With great concern:

Dear Board of Health Members,

Thank you for your service to the citizens of WA.

I am writing to ask you to NOT implement ANY policies that utilize tyrannical actions (involuntary quarantines, testing, treatment, counseling, and vaccinations) in what will be a failed attempt to "contain" Covid19. This virus will never be contained, it is a part of our ecosystem now. The only real defenses against it are REDUCING CO-MORBIDITIES and allowing ROBUST THERAPEUTIC TREATMENT DEVELOPMENT. Have you as a board, recommended spending any public service resources on telling people to live a healthy lifestyle as the best defense??? If people are healthy, IT IS CLEAR THEY ARE AT A MASSIVELY REDUCED RISK OF LONG TERM EFFECTS FROM THIS DISEASE.

We also know that the vaccines are ONLY GOOD FOR SHORT TERM PERSONAL PROTECTION from significant symptoms, but do not stop transmission or infection. My taking a vaccine DOES NOT save anybody else from Covid19, so forcing vaccines on people becomes nothing more than a form of medical authoritarianism, not health care. If WA's health care systems are stressed due to COVID patients, it is ONLY because hundreds of qualified health care professionals were unnecessarily terminated from their jobs (many with natural immunity), and due to that there are not enough people to provide care.

Please DO NOT implement any actions that will only hurt/divide/anger your fellow citizens and DO NOTHING to reduce the spread of this disease. HAVE COURAGE AND PLEASE TAKE A STAND AGAINST TYRANNY.

Subject: State Board of Health Public Meeting January 12, 2022

External Email

Dear Sirs and Mesdames,

I am writing to you to make known my concerns regarding the decisions to be made at the upcoming meeting on January 12, 2022.

WAC 246-100 Rulemaking would expand authority to involuntarily quarantine individuals. Absolutely NOT! I stand in strong opposition to such a ruling. Nowhere in the Constitution of the United States of America, nor in the Constitution of the State of Washington, does it grant elected/appointed officials such authority over the citizens. This "pandemic" is not as deadly as we have been lead to believe and does not warrant these powers. The Fourth Amendment of the US Constitution guarantees "the right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no Warrants shall issue, but upon probable cause, supported by Oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized." Involuntary quarantine is a direct violation of this right.

In addition, I strongly oppose adding a Covid-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools. It is my God-given, inalienable right to parent my child(ren) in the way that is in keeping with my beliefs, convictions, and informed research, as well as making the decisions that are in the best interests of them and their well-being. This decision, again, is in violation of the Fourth Amendment.

Your position is intended not as a way to control the citizens of our beautiful state but rather is meant to serve their interests and concerns. Our Constitution is intended to limit powers of the government thereby ensuring the blessings of our republic be preserved. I implore you to heed the voice and concern of the citizens of our state.

Respectfully,

Heather Hash

Subject: Regarding the January 12, 2022 board of health meeting

External Email

I am a very concerned citizen writing you to urge you to refuse to push through the new proposed policies that include mandatory covid vaccinations, and that also permit health officers to use law enforcement power in forcing isolation, quarantine, and detainment of individuals and families. This is completely unconscionable, and Washington citizens have had enough. Not only do children have a 99.995% covid survival rate, but these vaccines are STILL in the early stages of development and testing, and any long-term side effects are still completely unknown. Weighing this risk MUST be one each individual freely does for themselves, and is not forced into, particularly for parents deciding what is best for their own child. Each person has the right to choose - and refuse - medical treatment, counseling, and testing without being forcibly detained for their choices. These policies not only vastly overstep the constitutional bounds of 'health care', but also seriously infringe on personal and parental rights.

We the people INSIST you vote to STOP these unconstitutional policies from moving forward, at once.

Subject: Responding to WACs 246-100-070, 246-100-045 & 246-100-040

External Email

Hello,

It has come to my attention that WA Board of Health will be discussing COVID-19 shot mandates for schools and recommendations for forcible quarantine and/or detention of those that disagree with policies. As a parent and a citizen of the State of WA, I request that you abandon the plan of forming a technical advisory group to explore COVID-19 mandates and adopt a new rule of requiring products to have completed Phase 3 clinical trials before they can be added to the list of school requirements.

One definition of insanity is to repeat the same action over and over again and expect different results. For almost 2 years we have attempted to follow the health recommendations of washing, masking, distancing, testing, isolating and vaccinating. By now, it is quite apparent that the virus has mutated; as a result, SARS CoV2 has become more virulent (which is the nature of all viruses) but LESS FATAL. Real immunity is achieved with exposure and recovery as is evidenced by the fact that those infected with SARS in 2002/3 cannot become infected with SARS CoV2 today! In contrast, COVID-19 has managed to find a way to escape the vaccine per the evidence by the incredibly high numbers of vaccinated and even boosted individuals getting sick and testing positive. Surely this fact has not escaped your knowledge!

I also hope that you, being members of the WA State Health Board, are well aware of what the #1 cause of death was (aside from abortions which came in at an astonishing 43 million, globally) in 2021. Last year, the disease that killed 8.2 million people globally was cancer. Cancer killed more people last year than COVID-19 has since the beginning of the pandemic. Death is tragic, yes, but I will not stand by as mandates and overreaches of personal medical freedoms are occurring, of which should only be between doctors and their patients should be handled; politicians and elected officials like yourselves have not earned nor have any say in the privacy of what medical choices my family or any Washingtonian family makes. Can you imagine what the United States could do if local officials like yourself across the nation put this much effort into cancer research and treatment as they did in pushing for COVID-19 vaccine creation? We'd probably find a cure within the next year.

I do not doubt that you all desire to improve the health of Washingtonians. However, I do not trust that you have carefully investigated and logically determined adequate and measurable health remedies for which you are able to provide evidence. Before doubling down on measures that seem to HARM more than they HELP the overall health of citizens, please determine and make public the evidence to justify any policies. Giving "powers of police officers, sheriffs, constables, and all other officers" is an overreach of what the State Health Departments' responsibilities, an overreach of the people's freedoms, as well an effort to over-centralize general powers within the state, which is against what our Constitution stands for throughout the land.

Regarding mandating shots, know that the clinical trials will not be completed until 2023. Know that WA State has a legal definition of a "vaccine" that the COVID-19 shots do not fulfill as they were never part of a living microorganism nor do they prevent transmission or infection of disease. "Vaccine" means a preparation of killed or attenuated living microorganisms, or fraction thereof, that upon administration stimulates immunity that

protects against disease and is approved by the federal food and drug administration as safe and effective <https://app.leg.wa.gov/RCW/default.aspx?cite=70.290.010>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx?cite=70.290.010>

Finally, do no harm! You cannot possibly know or care more about the health of children than do the parents of Washington children!

Now I ask, how necessary or even safe is it to give a vaccine to a person who already has immunity to the pathogen? Most children by now have been exposed to the virus and have developed immunity without difficulty since it has now been almost 2 YEARS. Why consider a mandate for those not at high risk for adverse outcome should they become infected but who carry unknown risks of adverse reaction with getting the shot?

I look forward to hearing these concerns addressed and evidence for any and all recommendations to be presented when I tune into your meeting on January 12.

Thank you,
Hailey Eames

To whom it may concern,

I am writing you to voice my opposition to any sort of mandated vaccines for school children. I have 3 children who will be attending school in WA in the next few years.

It is discriminatory for ethnic and religious groups, goes against science because clinical trials have not been completed or successful in showing the efficacy and safety of Covid 19 vaccines, and goes against freedom of choice. The shots are dangerous for many individuals as you can readily see in the VAERS reporting. Even if it only harms ONE person, where there is risk of harm, there must be choice. I have multiple family members and friends who have suffered effects ranging from heart races to severe life long tremors that there is no remedy as a direct result of the Covid 19 vaccine. It is outrageous that mandating vaccines for ANYONE but especially children is an option. One size does not fit all. This is not science. This is tyranny. Please fight for our children. Do what is right, not what you feel pressured to do.

All it takes for evil for triumph is for the good men to do nothing. Please be a good person. Do something. Fight for our freedom even if you personally support Covid 19 vaccines.

Please please take heed!

Meghan Durazo

Subject: Requiring COVID-19 Vaccine for schools

External Email

Board,

I want to express that I would not like the COVID-19 Vaccine to be a required documentation for schools.

The implications of a vaccine are that it prevents something. There are far too many cases of the vaccinated catching COVID. Between Fauci and the CDC, they have expressed the vaccine doesn't prevent you from contracting or passing along COVID. There are also risks that come with taking a vaccine which is new. We don't know the long term effects and some of the short term effects are fairly severe, even if you don't buy into that the vaccine has caused deaths. I feel, that with a vaccine that has had such limited success in prevention and carries risk on its own, this should not be mandatory but elective. Allowing the parents to choose what they feel is the appropriate risk for their kids and respecting that decision.

Dear Board of Health Members,

Thank you for your service to the citizens of WA.

I am writing to ask you to NOT implement ANY policies that utilize tyrannical actions (involuntary quarantines, testing, treatment, counseling, and vaccinations) in what will be a failed attempt to "contain" Covid19. This virus will never be contained, it is a part of our ecosystem now. The only real defenses against it are REDUCING CO-MORBIDITIES and allowing ROBUST THERAPEUTIC TREATMENT DEVELOPMENT. Have you as a board, recommended spending any public service resources on telling people to live a healthy lifestyle as the best defense??? If people are healthy, IT IS CLEAR THEY ARE AT A MASSIVELY REDUCED RISK OF LONG TERM EFFECTS FROM THIS DISEASE.

We also know that the vaccines are ONLY GOOD FOR SHORT TERM PERSONAL PROTECTION from significant symptoms, but do not stop transmission or infection. My taking a vaccine DOES NOT save anybody else from Covid19, so forcing vaccines on people becomes nothing more than a form of medical authoritarianism, not health care. If WA's health care systems are stressed due to COVID patients, it is ONLY because hundreds of qualified health care professionals were unnecessarily terminated from their jobs (many with natural immunity), and due to that there are not enough people to provide care.

Please DO NOT implement any actions that will only hurt/divide/anger your fellow citizens and DO NOTHING to reduce the spread of this disease. HAVE COURAGE AND PLEASE TAKE A STAND AGAINST TYRANNY.

Subject: SBOH - Jan 7th - public comment re child/school vaccine mandate

External Email

Dear Members of WA State Board of Health,

Thank you for taking the time and consideration regarding the possible Covid-19 vaccine mandate for school age children, including daycare children.

I request that you leave the decision with the child and their parent along with their medical doctor on what is best for the child's medical health at this time.

I request you consider not mandating this vaccine as a condition of eligibility to attend child care and school.

While I do not have children in school, I see a real potential for parent's withdrawal of their child(ren) resulting from a mandate/requirement. I know plenty of folks who are vaccinated however they are in principal not pro vaccine mandate.

Also, the landscape is changing rapidly with medical recommendations, including from the CDC. We have managed this for some time now, and with continued focused protection for the medically vulnerable and elderly, coupled with partnering with doctors for specific health risks, we can best serve our children and schools at large.

Thank you again for seriously weighing the reality that children have an extremely low likelihood of infection and spread rate. Parents have already made choices regarding vaccinations as the increased vaccination rates demonstrate, and I trust they will make the best choice for their child going forward.

Sincerely,
Leslie Fernandes

Dear Lindsay,

Please do not mandate these experimental vaccines on our young healthy children.

It has been proven that children are not at risk of dying from covid or even catching it (let alone spreading it).

Vaccination is a personal choice that should be left to the parent/ guardian to decide for themselves. This is stated in the Nuremberg codes that were written to protect us from

these very circumstances.

There is not currently an emergency that gives our government the right to enforce these mandates.

Sincerely,

Sonja Hild

Subject: State Board of Health Public Meeting - January 12th

External Email

Dear Washington State Board of Health

I am against the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

Witnessing many friends and acquaintances of all ages who have had Covid-19, I have seen this disease is manageable if proper treatment is started early. In fact it is survivable by more than 98 percent of the population. The Covid vaccines have not been able to prevent transmission nor prevent someone from getting Covid.

Requiring ineffective Covid vaccines for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk when they are injected with a vaccine that has not undergone a minimum 5 or more years of study. The long term effects are unknown, but the VAERS government site has listed numerous adverse short term reactions to the vaccine.

It is against the Nuremburg Code* which formed the basis of the Code of Regulations Title 45 Part 46 in the US. It is discriminatory and unconstitutional for any official or health officer to be given the right to quarantine a person or family in a facility for refusing the Covid vaccination or any other medical intervention. They also do NOT have the right to force vaccines on citizens who do not choose them.

This is NOT in the purview of the Washington State Department of Health or ANY elected official or unelected state employee. These decisions are the right of every citizen and NO law, mandate, code or policy can override those rights. We are NOT granted rights from the State. The State is REQUIRED to protect our rights and not infringe on them.

Sincerely,
Linda Hee

6107 NE 4th PL

Renton, WA 98059

*Nuremburg Code of 1947 – 10 points

1. The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the experimental subject there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health

or person which may possibly come from his participation in the experiment. The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs, or engages in the experiment. It is a personal duty and responsibility which may not be delegated to another with impunity.[13]

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fen.wikipedia.org%2Fwiki%2FNure13&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ce0883b8983774f41dd4e08d9d217d754%7C11d0e217>

2. The experiment should be such as to yield fruitful results for the good of society, unprocurable by other methods or means of study, and not random and unnecessary in nature.

3. The experiment should be so designed and based on the results of animal experimentation and a knowledge of the natural history of the disease or other problem under study that the anticipated results will justify the performance of the experiment.

4. The experiment should be so conducted as to avoid all unnecessary physical and mental suffering and injury.

5. No experiment should be conducted where there is an a priori reason to believe that death or disabling injury will occur; except, perhaps, in those experiments where the experimental physicians also serve as subjects.

6. The degree of risk to be taken should never exceed that determined by the humanitarian importance of the problem to be solved by the experiment.

7. Proper preparations should be made and adequate facilities provided to protect the experimental subject against even remote possibilities of injury, disability, or death.

8. The experiment should be conducted only by scientifically qualified persons. The highest degree of skill and care should be required through all stages of the experiment of those who conduct or engage in the experiment.

9. During the course of the experiment the human subject should be at liberty to bring the experiment to an end if he has reached the physical or mental state where continuation of the experiment seems to him to be impossible.

10. During the course of the experiment the scientist in charge must be prepared to terminate the experiment at any stage, if he has probable cause to believe, in the exercise of the good faith, superior skill and careful judgment required of him that a continuation of the experiment is likely to result in injury, disability, or death to the experimental subject.

Subject: Regarding mandatory vaccine being added to the vaccination list for public schools.

External Email

I strongly disagree in vaccinating my kids. One of my kids already has reactions to all other required vaccines.

Most importantly, they have already have had covid. Survived through it, and now have developed anti bodies just like any other disease. We have a 99% survival rate. Just like any other threat or infection or disease we as people have over come and survived.

Educate, overcome and adapt. This is what I teach my children as I'm sure many other parents do the same. This vaccine has affected individuals young and old in many different ways, good and bad.

It also doesn't prevent you from catching COVID. This is a power trip thing your are taking into consideration. It's against my personal and constitutional right to make Such a absurd ridiculous choice that can harm my kids. You don't own my kids.

I refuse to support or participate in this khaos your causing. As you have seen many cops, nurses and large corporations refusing as they value to keep jobs and valuable workers, than be forced into a decision they have a strong desire to make on their own choice in the best interest of their health.

Not to mention causing emotional distress to the teachers and parents who decide to not get the vaccine. It should be an individual decision. Not a force against our will choice. Please understand what you are about to cause. I will remove my kids from school if this passes through.

You will regret this as well as your not thinking how much harm it will cause.

Our kids will lose a chance at education as well as great teachers. Caring teachers, and jobs will be dramatically affected. Stop this crazy possible mandate.

Thank you for hearing me out as a mom as a human and a U.S. citizen who knows and understands my rights.

Kaelinn Hart.

Subject: SBOH/DOH Community Feedback - Immunization Mandates for Children

External Email

Dear WA State Board of Health:

Thank you for working hard to help ensure that my child has the opportunity be in school and safe. I know that it has not been easy over the past several months. I appreciate the opportunity to voice my concern on the topic of immunization. I would also voice that I am very pro-vaccine (my family and children are fully vaccinated) and left-leaning politically.

As you probably know, multiple studies have shown that school is already safe for young people. This has been shown time and time again over the past several months, without mandating the Covid-19 vaccines. Luckily, studies and reports from other countries show that children do not seem to suffer from COVID, nor do they spread the disease to adults.

This is why schools in Europe and Asia are all open without consequence. However, we no longer need to look abroad for evidence of school safety. Schools across the country have been open for months, with millions of children SAFELY receiving an in-person education.

Regarding this vaccine in healthy kids, data/studies have yet to show a clear benefit that outweighs the risk of infection and, albeit rare, an adverse reaction to the vaccine itself. At this time, mandating this specific vaccine for children to be eligible to receive an education is misguided at best, and discriminatory at worse. The data simply does not support a mandate. Please see below with references.

First, we know that Covid 19, poses little risk to healthy children. Current data indicates that children are at far greater risk of critical illness from influenza than from COVID-19 (Source (JAMA Network)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fjamanetwork.com%2Fjournals%2Fjama%2Farticle%2F937577>

We have not mandated this influenza vaccine nor should we. Further, children and young people remain at low risk from COVID-19 mortality (Source (OSF PrePrint)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fosf.io%2Ffezdf%2F&data=04%70>

.

Second, children are not the main drivers of SARS-CoV-2 transmission Source (CMAJ Group

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cmaj.ca%2Fcontent%2F193%2F12%2F1234>

) and rarely transmit infection to others. Children more frequently have an asymptomatic or mild course compared to adults (Source (Journal of Medical Virology)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fonlinelibrary.wiley.com%2Fdoi%2F10.1111%2Fj.1365-3113.2020.08000.x>

.

Third, the adult population within the school has the opportunity to protect themselves, by getting vaccinated. Even with that, we know asymptomatic spread in long-exposure,

household settings (similar to the classroom) was less than 1% of transmission (Source (JAMANetwork)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fjamanetwork.com%2Fjournals%2Fjama%2Farticle%2F1317211>>
- meaning kids did not pass the virus to adults. Medical journals could not provide evidence for a relevant asymptomatic spread in childcare facilities in a low nor a high prevalence setting (Source (MedRxIV

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F10.1101%2F2020.04.14.20074441>>). Moreover, for adults living with children there is no evidence of an increased risk of severe COVID outcomes (Source (MedRxIV)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ft.co%2FNqnyL1JIXg%3Famp%3Fhl=us>>. All this to say that schools are already safe, healthy children have little to no risk when infected, and there is little evidence that they will transmit. THANK GOODNESS.

Besides the fact that this vaccine wanes and is non-sterile (it does not stop infection and transmission, but only reduces severe disease in a population that already has almost no risk), there is enough evidence to avoid the mandate. Encourage, recommend, discuss with the child's medical provider, absolutely. But to mandate is an overreach or strictly a political decision that is not driven by our children's best interest. If this becomes the decision, my family of 4 will move out of King Co and potentially Washington.

I understand that some teachers and parents feel scared. Putting aside the essential worker argument, it is important to view the facts dispassionately. Unless a teacher is older and has significant pre-existing conditions, that teacher is more likely to die while driving to school than to die from COVID.

<<https://rationalground.com/wp-content/uploads/2020/09/comparable-risk.jpg>>

That being said, if there are teachers that are vulnerable, every effort must be made to protect them by encouraging the vaccine or allowing them to work remotely. The burden should not be placed on our children, but the adults around them.

Pursuing a policy that knowingly harms children is against the mission of our school district, and I'm sure you also do not want to be responsible for denying children access to education, supervision, and nutrition.

I hope that you will be guided by facts and not emotions or politics when making decisions on how to proceed with schooling this upcoming year.

Thank you, again, for your time.

Subject: Reject Mandatory COVID Shots for School Admission

External Email

It has come to my attention that you will be discussing mandatory COVID shots for school admission at your January 12th board meeting. I would strongly urge you to reject mandatory COVID shots for the reasons below.

- * Children and young adults are at extremely low risk of hospitalization and death.
- * Data indicates that the COVID-19 shots do NOT prevent infection or spread of COVID. They are NOT a vaccine by the true definition. There are multiple studies on this and headlines everyday of people who are "fully vaccinated" becoming infected and transmitting COVID.
- * All current COVID-19 shots are under Emergency Use Authorization (EUA) this requires informed consent.

*

The exception is Comirnaty which is only fully FDA approved for ages 16 and older and has no current availability in the United States as of this writing.

- * This is a personal choice for parents to decide what works for their family history and should not be mandatory.

While there are many more reasons the ones I state above should be enough to dictate that mandatory COVID shots for school admission should be rejected as overreaching and immoral.

Respectfully,

~Jason Dinwiddie

Everyday 46 kids are diagnosed with cancer.
Everyday 7 children die from cancer
Pediatric Cancer kills more kids than Cystic Fibrosis, pediatric AIDS, & asthma COMBINED

1 in 330 children will develop cancer by age 20
Treatment side effects can last a lifetime for these kids

Fighting Childhood Cancer is not a choice, it's a necessity.

From: Mike Riches

Subject: State Board of Health Mtg. Jan. 12, 2022

External Email

To Whom this may Concern,

I am writing to you to make known my concerns regarding the decisions to be made at the upcoming State Board of Health meeting on January 12, 2022.

WAC 246-100 Rulemaking would expand authority to involuntarily quarantine individuals. Absolutely NOT! I strongly oppose such a ruling. Nowhere in the Constitution of the United States of America, nor in the Constitution of the State of Washington, does it grant elected/appointed officials such authority over the citizens. This "pandemic" is not as deadly as we have been lead to believe and does not warrant these powers. The Fourth Amendment of the US Constitution guarantees "the right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no Warrants shall issue, but upon probable cause, supported by Oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized." Involuntary quarantine is a direct violation of this right.

In addition, I strongly oppose adding a Covid-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools. It is the God-given, inalienable right of parents to parent their child(ren) in the way that is in keeping with their beliefs, convictions, and informed research, as well as making the decisions that are in the best interests of them and their well-being. This decision, again, is in violation of the Fourth Amendment.

Your position is intended not as a way to control the citizens of our beautiful state but rather is meant to serve their interests and concerns. Our Constitution is intended to limit powers of the government thereby ensuring the blessings of our republic be preserved. I implore you to do what is right by the citizens and the constitutions of our nation and state.

Respectfully,
Mike Riches

I am writing as a resident of Washington state to let you know my feelings on this unconstitutional and tyrannical overreach of power you think you have. Gov Inslee has obviously led you to believe you're more powerful than you actually are.

You have no right deciding what is best for our children. You are not the parent, grand parent or guardian. You are a public servant, hired and paid for by the people. and guess what, you're doing a very poor job and really pissing the people of Washington off.

Children have a 99.9% chance of surviving covid. They do NOT need an experimental drug injected into their innocent bodies due to your crazy beliefs that you are protecting them. AGAIN, not your job! Covid is being spread by both the vaxxed and unvaxxed, so what's the point? You're falling into the tyrannical beliefs of our government, leading you to false thinking that you're doing the best for everyone, when time and time again, it's proven to be not the case.

Over the years, many experimental drugs have been pulled off the market due to lack of study, illness or even death. But we don't like to talk about that because it might upset someone and cause them to think on their own. Nope, definitely don't want the people to do that!

Give this shot 10-20 years of long term effect studies and bring this idea back to the table. Our children are not guinea pigs and I refuse to allow you to act as if they are.

To date, 55000 children have been pulled out of public schools here. If this ridiculous idea is pushed through, I believe you will see a mass exodus from public schools and Washington state. At \$17000.00 dollars per enrolled child, do you really want to push it and see how many more will leave the public system?

We the people have the power to bankrupt your school system and I'm really not sure you want to see how far we will go to protect our children.

Please reconsider and drop this ridiculous notion of protecting our children. You're doing just the opposite.

Sincerely,

A concerned parent and tax payer.

Subject: Stop the mandates and government overreach!!

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Stop your overreach!!! Let the American people choose what they want to put into their and their families bodies!! My body my choice!!!!

Subject: Regarding WA COVID Detainment Emergency

External Email

To whom it may concern,

Regarding the proposed application of current infectious disease WAC codes to include Covid-19, please know that I am completely opposed to this policy change for several reasons.

1. The projected survival rate for Covid-19 infections is approximately 97 - 99% for the overall population. Dr. Anthony Fauci, director of the National Institute of Allergy and Infectious Diseases, testified to Congress in March that the mortality rate may be as low as 1% when accounting for people who are infected but don't develop symptoms severe enough to be tested. While this varies by age and co-morbidity status, it in general is highly survivable. The application of the current infectious disease WAC codes to this disease seems particularly extreme.
2. There is insufficient research regarding the safety of these vaccines for our children. The potential for long-term side effects from the vaccines make their requirement for school attendance unsupportable.
3. There are diseases that may require forced, involuntary quarantine and treatment, i.e. untreatable tuberculosis, however Covid is not that disease. It is too survivable for this level of enforcement.
4. This level of enforcement can cause the sick to hide instead of seeking treatment further increasing the likelihood of spreading it to others.
5. Given the grossly inadequate staffing level within the law enforcement departments, this is not realistic. They don't even have enough staff to respond in a timely manner to all but the most extreme life-threatening situations. How are the expected to spare staff for this.

Again, I completely opposed to this policy change. Let's save the big guns for more lethal diseases in the future.

Sincerely,

Lorraine Hume

Subject: Regarding WAC 246-105

External Email

To whom it may concern,

Regarding WAC 246-105

I want to remind you that children are at an extremely low risk for Covid. The vaccines are still ONLY EUA! There are no long-term studies to document ANY history of safety. Studies do now document that the vaccinated and unvaccinated can both transmit Covid, therefore the vaccine apparently DOES NOT stop the spread of the virus. In which case this would make no common sense to impose.

Regarding WAC 246-100

This is insane and stripping families of our rights. You have no authority to force any of this on us! If this happens my family will leave Washington state along with many others.

Please listen to the community!

Best Regards,

Mia Kimura

External Email

To Whom It May Concern;

On January 6, 2022 there was a landmark ruling that occurred in the UNITED STATES DISTRICT COURT FOR THE NORTHERN DISTRICT OF TEXAS FORT WORTH DIVISION where the FOOD AND DRUG ADMINISTRATION was ordered to produce Pfizer trial documents at a rate of 55,000 pages per month beginning no later than MARCH 1, 2022 after the FDA had attempted to block access to the documents for 75 years. Part of that court order to produce said documents states:

" there may not be a "more important issue at the Food and Drug Administration . . . than the pandemic, the Pfizer vaccine, getting every American vaccinated, [and] making sure that the American public is assured that this was not [] rush[ed] on behalf of the United States" and "Accordingly, the Court concludes that this FOIA request is of paramount public importance".

The most important takeaway here is that it is the FDA's duty to confirm the ongoing, promised safety of such an experimental product before recommending, marketing, and commanding its use on anyone, especially children- who are our future ancestors.

1) At what point did we pause to assess the ongoing safety or lack thereof for a medical product that enters the bloodstream, crosses the blood-brain barrier and cannot be removed from the body once injected? When did we pause to get caught up on the data to ensure it's ongoing safety before making it a requirement for any reason?

2) In particular, when did our (or any) state government intake an ongoing, unbiased assessment of excessive or untimely deaths of previously health-stable persons? What are the numbers of heart attacks and spontaneous heart disorders and anomalies, of strokes, blood clots and pulmonary embolisms since the rollout of the COVID-19 injectable product in Washington State?

3) Has the Washington State Department of Health been independently tracking and

documenting adverse event and/ or fatalities that occur after the statewide mandated administration of this experimental product? Where can that data be found for the informed public to view so as to make a health-informed decision without coercion?

4) Why is the state so eager to market and advance an irreversible medical product for use on children and adolescents, when the risk of COVID-19 for children is statistically miniscule as compared to suicide or drug overdose?

There is an alarming compounding of global data being brazenly ignored around harms being caused directly by and suspected to be a residual effect of the COVID-19 injectable product. The concerned public can see that our relevant and viable questions are being ignored and dismissed.

This is no longer a topic that can be passed over without being directly addressed-responding with data that is specific enough to show transparency and without conflict of interest. Now is a critical point for timely information for how to delay or prevent adverse health complications that may be caused by use of these products and for those who are interested to be able to receive treatment and care for harms already caused by it.

Finally, and most importantly, NO ONE has the authority over any INDIVIDUAL to determine what goes into OUR bodies or OUR CHILDREN'S without OUR permission, period.

ULTIMATELY, The COVID-19 product being mandated is an experimental substance and should be approached as such when propagandizing its safety and making it a requirement to participate in statewide public activities. By continuing to make the COVID-19 injection a requirement for Washingtonians, the WA DOH as an enforcer of such mandates along with the State of Washington is co-committing a systematic violation of human rights and participants of such acts will be subject to legal ramifications.

Please find attached a copy of the Court Order to the FDA.

Let's decide what is right.

Subject: Regarding Vaccine Mandate

External Email

To whom it may concern,
I DO NOT approve of a vaccine mandate for anyone. This is violating our constitutional rights as free citizens in a free country. How dare you propose a mandated vaccine for children with no long term studies available of the potential side effects when they have a next to zero risk of dying from COVID. There has never been a mandated vaccine for school age children, there have always been exception waivers so those will need to be a valid and accepted option for parents.

By creating quarantine camps you are asking for trouble. What part of that is acceptable in society? Forcing free people to accept your prejudices is a gross overstep of power. We need to end this madness now and live with this disease as it is instead of trying to fix everything with more control.

Please stop this

Subject: School Vaccine Requirement

External Email

Hello,

I am writing today to urge you to avoid vaccine requirements for students in school, both public and private.

Our schools have demonstrated the ability to safely educate our students in person, without drastic raises in Covid cases. Schools have the tools and protocols in place to effectively handle situations that arise, without disrupting the entire student population.

Making the Covid vaccine a requirement will require many families to choose between a quality education for their child, and maintaining their personal/religious/medical beliefs. I myself will have to make that decision for my kids.

I am a supporter of vaccines in general, and may find myself supporting the Covid vaccine at some point down the road. However, let us see more than one year's worth of data on the efficacy and safety of the vaccine before we mandate it for our youth.

I urge you to NOT require vaccines for Covid in our public and private schools.

Respectfully,

Maranda Davis

External Email

I, Kati Spencer, a registered Voter and resident of Spokane WA wholeheartedly oppose any and all CoVID vaccine requirements for any minor child in WA state. I oppose any medical treatment, medical examination or counseling (WAC 246-100) without parental consent. I will not allow local health officials to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC-246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040) This includes the requirement of the covid-19 injection as a part of school immunization requirements using WAC 246-105.

It is an infringement on our rights as citizens and our ability to do what is best for our children and ourselves. The government doesn't have the right to tell us as parents or US citizens what we can and cannot do with our own bodies. We have the right to medical

autonomy and it needs to stay that way. The government needs to get out of our medical decisions.

This is an atrocious abuse of power and we will not stand for it.

Hello,

I am writing to request that the Board of Health will decide to NOT recommend the Covid-19 vaccine be added to the current immunization requirements for school-aged children. As the parent of a teenaged boy, I have serious concerns about the short term, and long term, effects this injection can have on a growing child. I'm sure that you, like many others, have heard the stories of pre-teen and teenaged kids having terrible reactions to the injection including, but not limited to, fevers, respiratory issues, myocarditis, and even death. These are the effects that we know now, we do not yet know what long term effects the injection can have on our children. As of now, the Covid-19 vaccine has done very little to slow the spread or stop this virus. In fact, at this point, we (adults) have had to get multiple shots plus boosters, social distancing, wearing masks, and we're still contracting Covid-19. It is apparent the answer is not more shots, so why make our children get these shots to attend school...? Thank you for allowing me to voice my opinion and my concerns.

Subject: WA State Board of Health discussion of applying current infectious disease WAC codes with regards to Covid-19

External Email

Dear Honorable Board,

I stand against these proposed WAC's or the altering of existing ones: WAC 246-100-070 <tel:246-100-070> , WAC 246-100-045 <tel:246-100-045> , WAC 246-100-040 <tel:246-100-040> , WAC 246-100, WAC 246-105.

Please DO NOT mandate Covid vaccinations and involuntary detainment for children and citizens of any age in this USA.

Medical professionals in the field of vaccinations who do not have a financial stake in it are voicing medical concerns caused by the Covid-19 vaccine.

Here is a partial list of proven side effects known to date:

- 1 Reproductive problems
- 2 Alterations in menstruation
- 3 Birth defects and miscarriages
- 4 Premature menopause starting as early as 36 years old
- 5 Those who are post menopausal now starting to menstruate again
- 6 Lipid molecules thought to stay in the arm location are now known to be penetrating every cell in the body; bone marrow and ovaries to name two.

This one-sided push to mandate this vaccination is dangerous to the good people of our state-let alone the world. Every person must be able to make their own health decisions after weighing the risks and benefits of any medical intervention/procedure. There is no one-size-fits-all solution for any medical problem/disease. Also, it is destroying the professional field of medicine and science disciplines.

True science welcomes all findings, all studies and takes time to evaluate. This is not happening in regards to COVID-19.

NO VACCINATION MANDATES FOR CHILDREN OR CITIZENS OF ANY AGE.

Please! NO VACCINATION MANDATES FOR CHILDREN OR CITIZENS OF ANY AGE.

Thank you,

Laura Davidson

☐ WS State Board of Health,

I am writing to inform you that my wife and I are COMPLETELY against any of the proposed initiatives put forth to be considered as policy (WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105).

I fully understand that this is an incredibly controversial topic, however, this is a gross overreach and is immoral and most importantly an infringement on our rights as Washington and US citizens.

In addition to the above statement, WE KNOW that the VACCINATED and UNVACCINATED can contract and SPREAD Covid-19. It has been widely stated that the vaccinations and associated boosters do not prevent transmission of Covid-19, but ONLY mitigate symptoms.

I am extremely concerned that there is zero discussion around natural immunity or alternative treatments and am even more concerned that any attempt to do so has been silenced by the government, the media, and social media. This is incongruent to standard research or scientific processes - which allow and welcome rigorous scrutiny and peer review.

The fact that vaccinated people can spread Covid-19 just as easily as the vaccinated in addition to the lack of discussion around alternative treatments and natural immunity NEEDS to be discussed in depth before you can even consider these measures.

Signed,

Jordan Williams

Since you can still get and spread Covid there is no real reason for kids to be forced to vaccinate. Because even if vaccinated they will still get and spread Covid.

Let's stick to the constitution and respect persons individual body choices . And let's respect a parents choice to choose what is best for their child's health and well being.

Thank you, Jennifer Singley WA state resident and voter.

I am a K- 12 educator in WA State and have been instructing students for 40 years.

I'm writing to you about the agenda for the January 12, 2022 meeting.

I am in opposition to the following:

- 1) Any involuntary isolation/quarantine of people as described in parts of WAC 246.100;
- 2) Any mandate on COVID vaccines for children as a requirement to attend K-12 public schools.

Sincerely,

Leslie Drury

External Email

WA State Board of Health,

I am writing to inform you that my wife and I are COMPLETELY against any of the proposed initiatives put forth to be considered as policy (WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105).

I fully understand that this is an incredibly controversial topic, however, this is a gross overreach and is immoral and most importantly an infringement on our rights as Washington and US citizens.

In addition to the above statement, WE KNOW that the VACCINATED and UNVACCINATED can contract and SPREAD Covid-19. It has been widely stated that the vaccinations and associated boosters do not prevent transmission of Covid-19, but ONLY mitigate symptoms.

I am extremely concerned that there is zero discussion around natural immunity or alternative treatments and am even more concerned that any attempt to do so has been silenced by the government, the media, and social media. This is incongruent to standard research or scientific processes - which allow and welcome rigorous scrutiny and peer review.

The fact that vaccinated people can spread Covid-19 just as easily as the vaccinated in addition to the lack of discussion around alternative treatments and natural immunity NEEDS to be discussed in depth before you can even consider these measures.

Signed,

Nathan Williams

Members of the Washington State Board of Health,

I oppose the following proposed policies:

Allowing local health officers to use law enforcement (WAC 246-100—070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040. These specifics come from WA 246-100. Which includes the Covid-19 injections as part of school immunization requirements using WAC 246-105.

I am concerned for these policies as they go against our God given rights and freedom.

Respectfully,

Mandy Meier

Comments regarding proposals being considered at January 12th meeting

Regarding jabs:

1. The science shows that children are at extremely low risk of COVID. Furthermore, the so-called vaccine presents a high-risk of myocarditis in male children.
2. The laws makes clear that jabs, under emergency use authorization (EUA) cannot be mandated. There is no FDA approved jab available in the United States.
3. Jabs, under EUA, have not been tested for efficacy. This is like manufacturing an airplane in flight.
4. Studies now show that both jabbed and unjabbed can transmit COVID, the difference being that jabbed are more likely to spread COVID as they may not realize they are sick until they have spread the virus to others.

Regarding concentration camp facilities for "quarantine purposes".

There is nothing like following in the footsteps of Nazi Germany to remind people that absolute power corrupts absolutely. This is exactly what Hitler did to the Jews. The whole COVID "pandemic" was concocted by Dr Anthony Fauci, Bill Gates, Big Pharma and Big Tech. Their purposes have been two-fold: control and money, the more of each the better. When you try to censor information, on the premise that it's misinformation, people realize that those doing the censoring have ulterior motives. The government narrative has fallen apart.

1. COVID-19 is not nearly as deadly as the government has claimed. Yes, it is dangerous to the vulnerable: 1) the elderly; 2) those with comorbidities. It is not dangerous to those who are healthy. It is not dangerous to those under 20.
2. The jabs are more dangerous than having COVID and having natural immunity. The VAERS data, while grossly understated, shows the jabs can kill or significantly impair the health of anyone otherwise healthy.
3. The jabs do not stop or impair the spreading of COVID.
4. The majority of those, in the hospital, right now, with COVID, have received multiple jabs.
5. #4 makes it clear that the jabs are impairing the immune systems ability to function.

6. Evidence is also unequivocal that HCQ and IVM off-label use has been pulled by the Fauci/Gates cabal in the name of the much more expensive, ineffective "jabs" that are constituting a transfer of wealth, via the U.S. Government, from the middle-class to the wealthy. HCQ and IVM work, they are low-cost, they are early treatment that stops COVID. Every family should have an adequate supply as the needed prophylaxis.

Our governor is woefully negligent in his duty to the citizens of Washington State. His support of the Fauci/Gates money/control scheme is unconscionable and a dereliction of his duty as chief executive officer of this state. His push for concentration camps for those who dare oppose his draconian and unneeded mandates is no better than Hitler's targeting of the Jews. While Inslee calls the unvaccinated "terrorists", he is, in fact, the terrorist; the Hitler, mad for power and control. He is truly dangerous to the people of this state and should be removed immediately!

Sincerely,

Lynn M Finney

Subject: WA State Board of Health Voting to Add Covid 19 Vaccine requirement to schools.

External Email

Hello board members,

I am writing to you as I am a very concerned parent regarding the possibility of this Covid 19 vaccine becoming mandatory for my children to attend school. I live in Bellevue and have two children in the schools there. I know there is much controversy surrounding this topic, therefore, besides explaining my concern for my children's safety, there is the fact that myself as well as many, many other parents that would have to unenroll my children should be become a requirement.

I listen closely to the facts that are out there and respect and hold on to what was spoke on October 26th, 2021 at the FDA Advisory Board Meeting. It is my hope that you are familiar with the results of this board meeting as certainly it is not about making every child be vaccinated. They actually "do not" recommend this vaccine for healthy children, the approval for children was to make it available to those that have a compromised immune system and there is no proof that this vaccine will prevent transmission. If you have not seen this Board Meeting video, you should for sure watch it as thousands of parents have and are not comfortable having something put into their children's arm that has not been tested....and....the virus has mutated into mild cold like symptoms which only enrich our children's immune system making them stronger.

Please, please consider all the facts and what is best for our children. We all know that it is having them in school, learning, learning socialization and being kids.

I have always thought how great it would be if some of the zillion hours spent on TV on everything horrible about this virus would be spent on listing and talking about how we can help our immune become strong to be able to fight off any cold, flu etc...,zinc, Vitamin C etc. etc. etc. But nothing – to me that would be helping our children and the World.

Thank you for reading this.

I have my fingers crossed that you will make the right decision!

Thank you!

To: montychelliis@msn.com
Subject: You can not implement the vaccine mandate for Wa school kids.....

External Email

I vehemently oppose the implementation of a Covid 19 Vax requirement for schools in Washington State. For starter, based on reason #1 below and on so many other laws, this is flat out illegal. It would be harassment and coercion of the citizenry by those who are put in place by the citizens to protect the health of the citizens.

Secondly, it makes absolutely no sense and most people realize that, except the few that have been terrorized by the fear campaign and miss-information. It is clear now to everyone, and cited by the CDA, that the vaccinated are getting the virus, can spread it, and are getting sick from it (just as sick I might add), just like the unvaccinated. So the experimental shot makes zero sense to get, especially for children. Healthy children have literally no risk of getting hurt from this virus. On the other hand, there is a serious risk of injury or worse. The heart problems are real, the CDC has admitted that, VAERs injury and death are real and much underestimated, and people can clearly see all this is happening... and who knows what other injuries and long-lasting effects these kids will get with clotting, etc. One thing is sure however, there will be some injuries to these kids and likely some worse outcomes. You do not want to be responsible for that, and there will be damage to some of these kids if you force them to take this experimental gene therapy. And I will reiterate, there is zero risk to these kids if they don't get the shot

This is wrong to even seriously consider, discuss, and threaten citizens with in so many ways.... it is not moral, it is against humanity. And it is no way necessary with the virus being much less virulent now. The vast majority of the country is doing nothing like this. For God sakes, please do the right thing and protect your citizens health and their rights. It is your responsibility. We know there is big money to schools involved in this, but that is not a reason to do an awful thing like this. The truth will come out and you will want to be shown standing up for it. Please do the right thing. Thank you.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under

an Emergency Use Authorization. The only “approved” COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This “smoke and mirrors” approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer’s claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are ‘Interchangeable’ • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there’s no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, “We are never going to learn about how safe this vaccine is until we start giving it” Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer’s studies: Ten red flags in the FDA’s risk-benefit analysis of Pfizer’s EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>)

Force vaccinating healthy children for a disease that doesn’t affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Monty Chellis

It was brought to my attention that you will be voting on covid vaccinations for school age children on January 12. I urge you to vote NO!

I am strongly opposed to this vaccine and I will not be vaccinating my children with this experimental untested Covid vaccine that is not even reliable. I am more worried about the vaccine side effects than I am of the low risk complications of the virus. We have had the virus and we have natural immunity.

This is the parents decision, not the governments. No more controlling our families.

Public schools are already experiencing a huge drop in enrollment because of parents pulling their children out. If you force this vaccine even more of us will be forced to homeschool our children. We will not let you make our children's health choices for us.

Vote no!

Thank you,
Melissa Perez

External Email

Dear Ms. Hoff,

I am a fully vaccinated (COV-19) Seattle, Washington resident.

I'm AGAINST applying WAC-246-100-040, 045, 070 and WAC 246-105 to the management of COVID-19.

I am completely AGAINST giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family in a quarantine facility if they refuse requests of medical examination, testing, treatment, counseling, and vaccination.

I am completely AGAINST Covid-19 injections as part of the school immunization requirements using WAC 246-105.

As a state with tremendous resources in the tech and data space, I would LOVE to see these resources redirected to reporting accurate data on COVID cases (as well as vaccine adverse events) with comparisons between vaccinated and unvaccinated. Please include this data on our state dashboards. I know not everyone makes data-based decisions. But, the vast majority do! If clear and compelling data were presented and publicized, I believe NONE of the above would be necessary.

Thank you for your consideration and for working to keep our state safe and healthy.

With gratitude,

Kim Wilson

1104 S. 99th St.

Unit 25

Seattle, WA 98108

testing, treatment, counseling, vaccination (WAC 246-100-040).

I am writing to OPPOSE proposed polices:

that would include COVID-19 injections as part of school immunization requirements using WAC 246-105

I am writing to SUPPORT the request to adopt a new rule:

ICWA is requesting the WA State Board of Health adopt a new, permanent Rule prohibiting the Board from adding to the daycare or school requirements any Emergency Use Authorized

product or any licensed product formulation which has not yet completed Phase 3 clinical trials.

This new rule request pertains to any and all avenues through which the Board has authority to add

medical interventions requirements, including through regular or emergency rule-making.

The rule is needed because: Despite the absence of any FDA licensed COVID-19 vaccine w/ completed

Phase 3 trial studies in children, and despite CDC-acknowledged risks of myocarditis and blood clots, the BOH

has gathered a Technical Advisory Group to examine adding COVID-19 vaccines to daycare & school requirements.

This new rule is needed immediately to ensure that federal EUA regulations are upheld & to protect fully informed consent,

which prohibits the use of coercion or undue influence, such as can be exerted by state requirements.

The new rule would affect the following people or groups: All minor children, their parents and guardians in WA state.

Subject: WA State Resident on New Proposed Covid Policies

External Email

Dear WA State Board of Health, WA state officials, the governor, etc.

I am completely against any of the proposed Covid Policies that are over reaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

These are immoral and are not constitutional. We the people, and I know I am not alone, demand that these Covid policies are stopped and that previous passed policies are addressed and rejected. It is immoral and unethical to force a vaccination, or any medical treatment or decision, on any and all individuals. Do not pass these proposed policies.

Bill of Rights

Amendment 1: Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the government for a redress of grievances.

Amendment 10: The powers not delegated to the United States by the Constitution, nor prohibited by it to the states, are reserved to the states respectively, or to the people.

Amendment 14: All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the state wherein they reside. No state shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any state deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws.

These policies also violate the Nuremburg code, which states "The voluntary consent of the human subject is absolutely essential.

This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, over-reaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the

elements of the subject matter involved as to enable him to make an understanding and enlightened decision."

We the people are against these overruling, tyrannical, unnecessary policies!

Sincerely,

Kelly Smart

Subject: FW: We The People are your bosses

From: Jane P. <theladyjane@gmail.com>
Sent: Friday, January 7, 2022 2:31 AM
Subject: We The People are your bosses

External Email

To whom it may concern, you unelected bureaucrats,

I am a FREE citizen and lifelong resident of Washington. I reside in Spokane County. I am one of your bosses. I am not your servant, peasant, subject, peon, or inferior.

I have a multitude of questions, serious, important questions, and a lot to say about the way people employed by the government of Washington have begun to believe they are the rulers of the citizens of Washington, have come to the completely mistaken and wicked belief that they are entitled to make private, medical decisions for the citizens of Washington and the children, and that they have the right to coerce, compel, and force the FREE citizens of Washington to do anything, especially anything that violates a free human being's bodily autonomy.

I OPPOSE WAC 246-105 (You may NOT allow Covid-19 injections to be added to school immunization requirements.)

I OPPOSE WAC 246-100 (You may NOT allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040).).

I do not agree that these WACs should be modified, changed, or altered in any way to add any language referring to COVID-19 or coronavirus or any of the variants.

I DEMAND that you tread lightly and remember that We The People are free, sovereign human beings with the right to speak and move freely, amongst other things. You have no right to violate our rights, freedoms, or bodily autonomy. Anything you do while being paid by the taxpayers of Washington must be with the full awareness of our rights and zero treading upon them.

My first question, a 2 parter, which you MUST address: When did you become the rulers/bosses/parents/supervisors/kings/queens/lords/stewards of the citizens of Washington? And when did WE the People abdicate our rights and freedoms to you?

If your answer is anything but "NEVER" and "NEVER" then you should resign in shame immediately. How dare you believe, even for 1 second, that YOU have any right whatsoever to dictate anything to the free citizens who have chosen to live in Washington? WE are YOUR bosses. WE pay your salaries. You are supposed to work for us. We are not peasants, subjects, peons, slaves, indentured servants, children, minions, inferiors, etc. We have the right to make our own decisions. You have ZERO right to impose your wicked ideas on us, to force, coerce, threaten, chide, compel, or anything. If you cannot remember these things then resign right now. You have no business being in "public service" if you cannot remember YOU SERVE THE PUBLIC. As the publicly funded website for the Board of Health says, "the State Board of Health has served the people of Washington for 132 years." SERVED THE PEOPLE. It does NOT say "ruled the people." Further, it says you "promote policies that protect and improve the public's health." Promote does not equal "coerce" or "force" or "rule." Maybe you should refresh your memories and remember your places (that would be beneath the people who are your bosses, by the way).

We elect representatives to a legislature where they discuss, write, take opinions on, debate, and vote on laws. We did not elect career bureaucrats to create rules, regulations, or demands on the people. If you have not been elected to a legislature then stop thinking you have any right to force your notions upon us. No rules/regulations without representation. If you are in the legislature, then it's time to remember YOU WORK FOR US. You have no business creating and passing laws that violate our freedoms and rights. If you cannot remember this, then resign in disgrace. I do not care if the legislature "grants you powers." They only serve with the consent of the governed and we do not consent to be experimented on, to be ruled by unelected (or elected) power-hungry fascists or give up our rights, freedoms, and bodily autonomy. WE DO NO CONSENT.

WE ARE IN CHARGE, not you. You have ZERO right to violate my bodily autonomy, make medical decisions for me, force me to inject ANYTHING in my body, deny me entrance to publicly funded spaces, force me to wear fabric on my face, coerce me to inject anything into my body, coerce me to wear fabric on my face, etc. etc. etc. As a free human being, I get to decide what I inject into my body, what I wear, and where I go. My tax dollars pay for publicly funded spaces and if you want to deny me entrance to anything my money pays for then I want all of my money back and I will no longer pay taxes. Such things are literally discrimination, segregation, and immoral. I will not share my private medical choices with event staff, clerks, government officials, or to enter establishments, public or private. My private medical records are MY BUSINESS ALONE. If you think forcing people to share their medical records with others is acceptable, then you better be ready to put your own medical records out in public view immediately so we can all have a look and make decisions on what you are allowed to do, what you must inject, the behavior you are no longer allowed to engage in, etc. Further, if you want to coerce us into sharing this medical decision, then it's only fair that everyone's every medical decision be public record. Promiscuous? Then we want to see if you have STDs before you can be in public. A drinker or smoker? We get to dictate what you get to do in life. A drug user? We get to make decisions for you, too, and share everything publicly. Or maybe you should back this runaway train up and remember you serve free citizens who have the right to private medical records.

Second Question: When did the free citizens of Washington give their children to you to raise? Why do YOU think you have the right to dictate other people's children's medical decisions? Children belong to God and with their parents. They do not belong to the governor, the attorney general, legislators, school principals, babysitters, cousins, neighbors, store clerks, or you, unelected, arrogant, power-hungry bureaucrats. You have NO RIGHT to decide what is injected into other people's children. Parents have the responsibility to make decisions for their children.

COVID-19 is really not much of a threat to MOST people and it's even less of a threat to children. According to the CDC's best estimate of the infection fatality rate for individuals ages 0-19 is 0.00002, meaning 99.998% of children survive it. Why on earth do they need to be injected with things which have no long-term studies or trials? These shots have barely been around for a year and you cannot possibly argue that a year or 2 suffice as "long-term." It is horrifying that you are even considering making experimental shots mandatory for anyone, let alone children. Other immunizations (which actually IMMUNIZE, unlike the COVID "vaccines") were tested for a long time before they were used and were available for a long time before anyone considered making them mandatory. As COVID primarily impacts the elderly and the ill, it is unconscionable to demand children be forced to get injected with these experiments. Please refer to this article and many others like it for more information, as apparently you are completely ignorant of reality: <https://www.tabletmag.com/sections/news/articles/covid-vaccine-mandates-kids-legal>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.tabletmag.com%2Fsections%2Fnews%2Farticles%2Fcovid-vaccine-mandates-kids-legal&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C32e79629008d43300f3308d9d469ba10%7C11d>

Currently, as I am sure you must know, there is no COVID-19 "vaccine" available in the United States outside of ones approved only under the Emergency Use Authorization, which is only possible if there are no therapeutics available to treat something. As we all know, there are therapeutics available to help fight COVID-19. I believe you cannot mandate these shots as long as they are under the EUA. And, as you know, "Comirnaty" is not available in the United States so you cannot mandate children be forced to get the EUA injections. Or anyone else, for that matter.

To quote the article above at length:

"In 2004, under Section 564 of the Food, Drug and Cosmetic Act, 21 U.S.C. § 360bbb-3, Congress permitted the FDA to grant EUAs so that any American in a personal emergency can choose whether or not to explore potentially lifesaving treatments that have not gone through the full testing regime. In other words, the legal basis for EUAs is a matter of the individual right to access experimental treatments, not of government right to compel such treatments. EUA products, by definition, have not yet been proven safe and effective according to FDA standards.

Indeed, Congress has recognized that Americans should not be forced to take medical products that have not been deemed safe and effective by the federal agency charged with the power to to decide. The same federal statute that authorizes EUA products also requires, among other things, that potential recipients of such medications be informed "of the option to accept or refuse administration of the product, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks." According to a plain reading, individuals have a statutory right to "refuse administration" of a vaccine approved only for emergency use. The language leaves no doubt that Congress intended for any decision to take such products to be made free of coercion, pressure, or duress. A city or school system that withholds children's access to education, extracurricular, and recreational activities—all crucial to their cognitive and emotional development—violates both the letter and the spirit of the statute."

I read this and think you should read it, too (or read it AGAIN): 'As the Technical Advisory Group stated during their meeting on December 29th, in order to amend Chapter 246-105 WAC "the vaccine (Covid vaccine) containing this antigen must PREVENT disease(s) that have significant morbidity and/or mortality". CLEARLY, these COVID "vaccines" DO NOT PREVENT TRANSMISSION. We were told repeatedly, by the CDC, Biden, and the rest of the snake oil salesmen, that these "vaccines" would 100% prevent you from getting or transmitting COVID-19. That was obviously a bunch of lies. Numbers show that highly "vaccinated" places are seeing massive surges of "cases." Masks also do not stop transmission (DUH) either and we do not consent to be muzzled. The only point of mandating these shots which do not prevent transmission is to control free human beings and force them to do as you "command." NOPE. We do not consent.

There are no Washington laws which give you the authority to mandate citizens must take an medication or have any medical intervention. Such a thing is so far out of your purview that you should never show your face again in public if you think you have even a tiny, infinitesimal "right" to do so. Requiring these untested "vaccines" for children is outside any law as well. Such decisions belong solely to parents/guardians and children. As the article says, "The Ninth and 14th Amendments to the United States Constitution protect the right of individuals—both children and adults—to bodily integrity and to decline unnecessary medical treatment."

Further, Natural Immunity is an important, long-studied scientific fact which those in the "health" field, in their haste to seize control and impose their own wills upon free citizens, have decided to pretend doesn't exist. Do you force those who have had chicken pox or measles, etc., to get the actual vaccines for these diseases? Do you force them to get "booster" shots? No, you do not, as such things would destroy the natural immunity which does a better job than anything created in labs. Since the COVID "vaccines" do not immunize anyone, you have no reason to coerce, compel, force, or mandate anyone into getting these shots. You have no moral, ethical, scientific, or legal standing to do so. If you think you have such rights, then please be aware that others can use the same arguments to dictate their beliefs in the future. Most Christians do not believe in sex before marriage and a case could certainly be made that engaging in such promiscuous behavior has consequences that hurt society at large, which would mean the government should be able to force interventions on those who think they have the right to decide who they sleep with. Etc. If you want to open that door, we're happy to make sure everyone in this Godless state is living pure, holy lives.

As we do not know the bodily consequences these "vaccines" might have long-term, it is unconscionable that you would even consider mandating them for children (or anyone). We cannot have any idea how their developing bodies might be hurt by these experimental shots. Are you prepared to be sued, as a "board" and as individuals by parents whose children are damaged by something you ordered before long-term studies can possibly exist? You will be morally, ethically, and, hopefully, criminally/monetarily/civilly held liable for any consequences if you mandate these for children. If you have half a brain amongst you, then you will step back, remember your place, and wait a decade or more to see how things go. Parents/guardians have the sole rights to make this decision for children. NOT YOU.

Under Jay Inslee's hateful guidance, government workers have arrogantly decided they have the right to dictate to the free citizens of this state, to discriminate, segregate, violate bodily autonomy, and threaten, coerce, force. We live in the United States of America and as Americans, we are FREE. We have the sole right to decide what medical "treatments" are injected into our bodies. We have the right to move freely, at will, to speak freely, to assemble, and to get rid of all governments which violate our rights. You are employed by the citizens of Washington. You better remember your place. You may provide suggestions and we are free to ignore them. There is not one medical treatment

or medicine which every single person needs. Not one. We do not force healthy people to have chemotherapy or take heart medication (malpractice, anyone???). We do not put casts on unbroken legs. Why on earth would you think everyone should get these experimental shots? You have no idea what consequences many people will face due to your immoral, unethical coercion. You may recommend people get these experimental shots. You may NOT demand, force, coerce, pressure, threaten, or mandate them. In the last two years, you have created a hateful, divisive, cruel society where you segregate people based on their personal medical choices. You tell them they are less than, vectors for disease, and evil, when they are not. You lock them out of society and foment hatred against them. Is it any wonder that there have been so many more opioid overdoses and deaths, more domestic violence, more suicides, more hopelessness? YOU have contributed to these deaths and despair. YOU. And yet you cruelly continue to divide and subjugate us. If you care about the health and well-being of all Washington citizens (what a laugh!), then you should be concerned with all of those people. Vastly higher numbers of people have been affected by those things than by COVID-19 but you have ignored them at our peril. You have failed to encourage therapeutics, exercise, and healthy eating to prevent COVID and other things. You have locked people inside, kept them away from co-workers and loved ones (gathering strengthens immune systems, obviously, so it's interesting to consider whether you purposefully crafted policies which forced people to weaken their immune systems), and tried to keep them frightened.

Government is instituted by the people, for the people, to make life better for the people, not to rule the people. Free people cannot be compelled by any government or business or person to violate their bodily autonomy. Do you know what we call it when a person uses force or coercion to violate another's bodily autonomy? RAPE. We call it rape and it is immoral and evil. You have no right to violate our bodily autonomy or our children's bodily autonomy. We do not consent to any violation of our bodily autonomy. We do not consent to being locked out of society. We do not consent to be ruled by bureaucrats.

If you are a doctor, you have presumably taken an oath to "do no harm." Yet, in the last two years, you have crafted policies which have done immeasurable harm. You have kept people frightened, alone, and you should be held accountable for these things. Time to remember your oaths and step back from committing evil against the free citizens of Washington. You continue to abuse power loaned to you by the legislature, which only has power because it is loaned by the people. We do not consent to be abused, manipulated, frightened, coerced, forced, threatened, segregated, discriminated against, or locked out.

Perhaps you should spend some time learning more history so you can see how those who violated bodily autonomy and freedom are remembered. Many were put on trial and faced severe consequences for their evil actions. You have the choice to violate freedoms or to step back and recognize you have no such powers on this earth. For example, you should read the Nuremberg Code and why it was instituted in the first place. Never in history have the good guys been the ones coercing, forcing, threatening people with injections. So perhaps you might recognize which side you are currently on here. (Not the good guys, obviously.)

Nuremberg Code:

1. The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the experimental subject there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health

or person which may possibly come from his participation in the experiment.

"The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs, or engages in the experiment. It is a personal duty and responsibility which may not be delegated to another with impunity." (This means each of you individually is responsible for ascertaining the consent of the people, as in each person you think should be forced to have these experimental shots, and if you force/coerce/threaten, then you are individually responsible for the consequences. You cannot say it was a group decision or you just went along with others. You are complicit and morally, ethically responsible.)

As a life long resident of WA state, I am adamantly opposed to mandatory vaccination of the children of this state. I am a mother and grandmother and will make sure the children in my family will only be vaccinated by our own informed decision and not directed by the state. There is no data about the long term affects and we should not be willing to experiment with our kids for an illness that kids have shown not to be infected with.

Regarding the discussion of covid-19 vaccination requirements for children. The fact that you as individuals would even consider such a heinous, evil and morally bankrupt approach is beyond a lack of moral character, it borders on a level of evil that is unprecedented.

This goes beyond any political decision, it is a decision point for you all as individuals that will follow you for the rest of your lives.

Simply put (all of this data is well researched and available – and you all know this):

- * The data is empirically proven that these vaccines do NOT prevent anyone from getting or transmitting covid to others.
- * The data is empirically proven that these vaccines do NOT create ANY safety for anyone else, beyond the undetermined and temporary reduction of individual symptoms.
- * The data is empirically proven that children have an almost zero statistical risk of covid symptoms.
- * The data is empirically proven that children do not have high transmission rates to pass on covid to adults, in fact the transmission rates are far lower than the flu.
- * There is ZERO long term testing on the impacts of these vaccines on children. By definition, we have no longitudinal studies on side effects or long term health impacts.

In addition, what we see across the world, are that those places with lockdowns and vaccines mandates show no measurable difference in covid rates at all.

So, what we have are three factors:

1. The vaccines do not prevent transmission.
2. The vaccines have no long term testing for side effects and health impacts.
3. Children have almost no risk from covid in any rate.

So, to risk long term consequences for no appreciable benefit is beyond idiotic and misguided, it is evil. Our role as adults and parents is to protect our children, not use

them as political pawns in misguided and ill conceived political stances.

If you are to put these requirements in place then our response will be to immediately withdraw from the school system and move out of this State.

I hope you think long and hard about this, and do the right thing.

Michael

Hello,

I am very concerned about the proposed changes to our WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

Please oppose these proposed changes to the code, as they are an unethical overreach of the state into citizens' human rights.

The vaccines do not stop the spread of COVID-19. Children are not at a high risk of becoming terribly sick from COVID. The data shows a cost-benefit analysis of the COVID-19 vaccine does not support the necessity of COVID-19 vaccines for children. Teachers and other school officials may protect themselves. Please follow the science. These recommendations are unnecessary and will likely cause school districts to pressure parents into something they do not want for their child.

In addition, An INvoluntary quarantine facility is plainly on its face a violation of human rights. I have lived in Washington my entire life and I can't believe my home state is even considering it.

I am the mother of six children. I will be attending the Webinar on January 12th.

Thank you for your time,

Sara Cappello

Good Afternoon Representatives,

I am writing to OPPOSE proposed policies:

That allow local health officers to use law enforcement (WAc 246-100-070)
that are aimed to force an emergency order to involuntary detain a person
or group of persons (families) to be isolated in quarantine facility (WAC 246-100-045)
following refusal to voluntarily comply with requests for medical examination,
testing, treatment, counseling, vaccination (WAC 246-100-040).

I am writing to OPPOSE proposed policies:

that would include COVID-19 injections as part of school immunization
requirements using WAC 246-105

I am writing to SUPPORT the request to adopt a new rule:

ICWA is requesting the WA State Board of Health adopt a new, permanent Rule
prohibiting the Board from adding to the daycare or school requirements any Emergency

Use Authorized

product or any licensed product formulation which has not yet completed Phase 3 clinical trials.

This new rule request pertains to any and all avenues through which the Board has authority to add

medical interventions requirements, including through regular or emergency rule-making.

The rule is needed because: Despite the absence of any FDA licensed COVID-19 vaccine w/ completed

Phase 3 trial studies in children, and despite CDC-acknowledged risks of myocarditis and blood clots, the BOH

has gathered a Technical Advisory Group to examine adding COVID-19 vaccines to daycare & school requirements.

This new rule is needed immediately to ensure that federal EUA regulations are upheld & to protect fully informed consent,

which prohibits the use of coercion or undue influence, such as can be exerted by state requirements.

The new rule would affect the following people or groups: All minor children, their parents and guardians in WA state.

I vehemently oppose the implementation of a Covid 19 Vax requirement for schools in Washington State. For starter, based on reason #1 below and on so many other laws, this is flat out illegal. It would be harassment and coercion of the citizenry by those who are put in place by the citizens to protect the health of the citizens.

Secondly, it makes absolutely no sense and most people realize that, except the few that have been terrorized by the fear campaign and miss-information. It is clear now to everyone, and cited by the CDA, that the vaccinated are getting the virus, can spread it, and are getting sick from it (just as sick I might add), just like the unvaccinated. So the experimental shot makes zero sense to get, especially for children. Healthy children have literally no risk of getting hurt from this virus. On the other hand, there is a serious risk of injury or worse. The heart problems are real, the CDC has admitted that, VAERs injury and death are real and much underestimated, and people can clearly see all this is happening... and who knows what other injuries and long-lasting effects these kids will get with clotting, etc. One thing is sure however, there will be some injuries to these kids and likely some worse outcomes. You do not want to be responsible for that, and there will be damage to some of these kids if you force them to take this experimental gene therapy. And I will reiterate, there is zero risk to these kids if they don't get the shot

This is wrong to even seriously consider, discuss, and threaten citizens with in so many ways.... it is not moral, it is against humanity. And it is no way necessary with the virus being much less virulent now. The vast majority of the country is doing nothing like this. For God sakes, please do the right thing and protect your citizens health and their rights. It is your responsibility. We know there is big money to schools involved in this, but that is not a reason to do an awful thing like this. The truth will come out and you will want to be shown standing up for it. Please do the right thing. Thank you.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under

an Emergency Use Authorization. The only “approved” COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This “smoke and mirrors” approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer’s claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are ‘Interchangeable’ • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there’s no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, “We are never going to learn about how safe this vaccine is until we start giving it” Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer’s studies: Ten red flags in the FDA’s risk-benefit analysis of Pfizer’s EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>)

Force vaccinating healthy children for a disease that doesn’t affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Monty Chellis

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

Sincerely,

Julie Dow

To whom it may concern;

I oppose amending any of the WAC-246 codes to include involuntary confinement in a quarantine facility for anyone refusing medical examination testing, treatment, counseling, or vaccination. It is beyond unconstitutional to infringe upon our rights especially for a vaccine that is not effective in stopping the spread of covid. I have had loved ones pass away from said vaccine and I oppose mandating them!

Sincerely,

To whom it may concern;

I oppose any of the Washington State Board of Health members who recommend the requirement of vaccines for school aged children, especially the covid 19 vaccines or boosters. They are not preventing the virus and can have harmful side effects, as we've seen. Most importantly, it is clearly unconstitutional!

Sincerely,
Keli J. Brocha
Camano Island Washington

redress of grievances.

Amendment 10: The powers not delegated to the United States by the Constitution, nor prohibited by it to the states, are reserved to the states respectively, or to the people.

Amendment 14: All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the state wherein they reside. No state shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any state deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws.

These policies also violate the Nuremburg code, which states "The voluntary consent of the human subject is absolutely essential.

This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, over-reaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision."

We the people are against these overruling, tyrannical, unnecessary policies!

Sincerely,

Kelly Smart

Subject: VOTE AGAINST Vaccine Mandates for Students in Public Schools

External Email

I am firmly against the vaccine mandates for the students in the Washington State public schools. First, the risk to the students is small, and they recover quickly when or if exposed, as shown in our local public school. Second, these non-approved vaccines should be a choice, not a mandate against their will. Third, censored evidence from Israel and respectable doctors shows that these vaccines do more harm to students than good. Finally, the vaccine harm does not justify the means when a student has a 99% recovery rate from any COVID-19 virus.

Please vote against this mandate!

Regards,

Keith Pittman

Leave our kids alone!

The proposed rule giving DOH powers to involuntarily quarantine or inject US citizens is in violation of federal law.

Under Title 21 CFR (Code of Federal Regulations) Section 50.23 & 50.24 It is illegal to exercise coercion when administering experimental medical treatments. Coercing any US citizen to receive medical treatment against their will constitutes an act of domestic terrorism, which is a felony. Any attempted enforcement of such an unlawful rule would expose anyone enforcing it to charges of domestic terrorism. Since the proposed rule will be UNLAWFUL by definition and will also violate WA State Constitution, Article 1 Section 7 - right to privacy - there is only one option. Abolish consideration of such a rule or face criminal charges (Domestic Terrorism and/or Conspiracy to commit Domestic Terrorism).

Good Afternoon Representatives,

I am writing to OPPOSE proposed policies:

That allow local health officers to use law enforcement (WAc 246-100-070)
that are aimed to force an emergency order to involuntary detain a person
or group of persons (families) to be isolated in quarantine facility (WAC 246-100-045)
following refusal to voluntarily comply with requests for medical examination,
testing, treatment, counseling, vaccination (WAC 246-100-040).

I am writing to OPPOSE proposed policies:

that would include COVID-19 injections as part of school immunization
requirements using WAC 246-105

I am writing to SUPPORT the request to adopt a new rule:

ICWA is requesting the WA State Board of Health adopt a new, permanent Rule
prohibiting the Board from adding to the daycare or school requirements any Emergency

Use Authorized

product or any licensed product formulation which has not yet completed Phase 3 clinical trials.

This new rule request pertains to any and all avenues through which the Board has authority to add

medical interventions requirements, including through regular or emergency rule-making.

The rule is needed because: Despite the absence of any FDA licensed COVID-19 vaccine w/ completed

Phase 3 trial studies in children, and despite CDC-acknowledged risks of myocarditis and blood clots, the BOH

has gathered a Technical Advisory Group to examine adding COVID-19 vaccines to daycare & school requirements.

This new rule is needed immediately to ensure that federal EUA regulations are upheld & to protect fully informed consent,

which prohibits the use of coercion or undue influence, such as can be exerted by state requirements.

The new rule would affect the following people or groups: All minor children, their parents and guardians in WA state.

Subject: Vote NO. Why the Pfizer Inoculation Does More Harm than Good

External Email

Dear Washington State Department of Health staff,

Please do not require school children and preschoolers to be inoculated with a Covid "vaccine" in order to attend school in our state!

Why the Pfizer vaccine for Covid 19 Does More Harm Than Good

Source: www.CanadianCovidCareAlliance.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.canadiancovidcarealliance.org>

The Pfizer trial only used:

- 1) Unexposed & inoculated, and
- 2) Unexposed & not inoculated.

They should have also included:

- 1) Exposed & inoculated, and
- 2) Exposed and not inoculated (aka natural immunity from having had Covid).

The fact that they avoided the latter 2 shows that they thought their Pfizer vax wouldn't perform well in those categories. A study should show how those exposed and not inoculated fare vs. inoculated & exposed. It didn't.

The clinical endpoints of the trial should have been: Do people who take the Pfizer vax have less illness and death? (It wasn't) Choosing the proper endpoint is well-known, as a result of testing of cancer drugs. In cancer drug testing, they had to switch to all-point mortality, and Pfizer should have done so.

They could easily have included biomarkers, but they didn't. We need to know how people exposed, but not inoculated compare with the exposed and inoculated. This is natural immunity, and we need to know how those with natural immunity fared.

They should have tested for: de-dimer levels (micro-clotting) before and after.

Other biomarkers Pfizer should have and easily could have tested for: inflammation, barrier permeability, hypoxia, cardiac damage, predisposition to Alzheimer's, predisposition to autoimmune disease.

They should have had biomarkers for thrombotic disease. This is a condition which would take time to surface, but could have been measured before & after in biomarkers. Many doctors are reporting thrombotic conditions in vaccinated patients.

Vaccine passports: The Pfizer vaccine was not tested for spread reduction: No evidence at all that they reduce transmission and disease, and that was never one of the endpoints of the study. All they measured for was, "Do people who take the vaccine test positive for Covid-19 less often?" and the study was designed so that they would get few "no" answers, and they then proceeded to a vax rollout.

Testing failures: Subjective

The study did not test all patients for Covid-19! Instead, they only tested for the

Covid-19 symptom, and then left it up to the discretion of their investigators to decide what that was. So that means that asymptomatic infection would be missed entirely. And it introduced a high level of subjectivity to the trial, because an investigator could actually decide whether to test or not to test. This lack of systematic testing actually makes the results of the trial unreliable. All participants should have been tested.

There is considerable missing data in the study. The endpoint is all Covid cases: 8 inoculated vs 162 placebo. But it's such a small # of participants to begin with. But there are 80 lost follow-up subjects in the inoculated group! They don't know whether they got sick or not, or even died. They don't know. That's 10x more than the # of Covid cases they had in the inoculated group. So if a significant proportion of those 80 had been positive, it would have dramatically changed the results. Also, all the suspected but unconfirmed cases: 1594 in the inoculated group, 1816 in the placebo. This means they were symptomatic, but the investigator never followed up with a Covid test! These are huge numbers compared to the confirmed cases! The fact that the suspected cases which weren't tested were significantly larger than the endgame results means that this data is unreliable. The study should not have been accepted.

What about the placebo group? There were also many unconfirmed cases. If all these cases, inoculated and placebo, were positive, the relative risk reduction would then only be 19%. That's not a high enough percentage to gain approval.

Adolescents: The inoculation is really all risk and no benefit.

Teens are statistically at 0% risk of death from Covid-19. But the vaccine does pose risk of serious events. But the study was not designed to find serious adverse events. A serious event that occurred at a rate of 1/800 might not even show up in a sample of 1,005 people.

In the tests, there was a serious event in at least one subject who was inoculated. A 12-year-old girl. She experienced multiple serious effects, including lost feeling from the waist down, lost bowel and bladder control, menstrual cycle issues, seizures, verbal and motor tics, dizziness, fainting, headaches, brain fog, erratic blood pressure, and more. And the last 10 months, she is wheel chair bound and fed by a feeding tube. Pfizer labelled her case "functional abdominal pain."

5-11 year olds: The inoculation is an unacceptable risk to this group. Pfizer, using predictive modelling, acknowledges that their inoculations WILL cause myocarditis, but optimistically claims there will be zero deaths from myocarditis in any of their modelled scenarios. It's speculative. Still, there's no justification for giving children myocarditis. But the government has actually normalized myocarditis in kids, publishing Sick Kids brochures of how to deal with myocarditis in kids. But how to deal with it is to not cause myocarditis in kids! It's very serious. It causes permanent damage. Severe myocarditis weakens your heart so that the rest of your body doesn't get enough blood. Blood clots can form in your heart, leading to a stroke or heart attack. And the mortality rate is up to 20% at 6.5 years. The risk of 4 in 20 children who contract myocarditis dying within 6.5 years is unequivocally an unacceptable risk for children. But the FDA maintains that it is an acceptable risk for children. They have actually abandoned the "do no harm" principle.

Dr Eric Rubin of the New England Journal of Medicine (NEJM) has said that the way to find if they do harm is by doing a roll-out on the population. He voted to roll out inoculations for ages 5-11, and suggested that a population level roll out as an

appropriate way to test for adverse events. Of note, the NEJM is also the publisher of the Pfizer reports.

Governments are proclaiming the inoculations to be safe, yet the data is not there to back that up. Pfizer admits that their long term immune response, efficacy & safety data is limited and that their studies weren't powered to find "rare" side effect, as only about 1500 kids were in the testing group which received the inoculation. The law of informed consent says that parents should be told about these risks, but it's not happening.

On Nov 2, the British Medical Journal released an article about their investigation into Ventavia, one of the research companies Pfizer hired to conduct the trials. A whistleblower who was a Regional Director reported to the FDA that Ventavia: falsified data, unblinded participants, did not follow up and test participants who reported symptoms, and mislabeled some specimens. Several other employees backed up the Whistleblower's account. But Pfizer never disclosed the problems in its EUA application, and in fact, Pfizer has now hired the same researcher, Ventavia, to run more Covid-19 clinical trials.

So it's not surprising that we are seeing the issues we are in the 6-month report.

Manipulation of Data Cohorts: Pfizer took the results from their adult trial, which started July 27, 2020, and then added in the results from the 12-15 year olds' trial, despite the fact that the adolescent trial started four months later. Since it's well known that the efficacy wanes over time, this gives a false boost to the efficacy numbers. The efficacy of the two groups should have been reported separately, not presented as one combined result.

Pfizer trials did not prove safety. They proved harm. The endpoints of the trial should have been illness and death, not a positive or negative Covid-19 test. But their test actually showed harm. They used younger, healthier groups than the vaccine would eventually be rolled out to. Here are some results of Pfizer's own randomized control trial: Related adverse event, +300% over placebo group; severe adverse event, +75% over placebo group; any serious adverse event, +10% over placebo group. Deaths in the vaccinated group: 20; placebo group, 14.

How is this harm playing out in the real world? Governments are assuring us that they are monitoring safety and will let the public know if there are problems. But once the vaccine was rolled out at the population level, the surveillance method for reporting is called "passive." It's difficult and time-consuming for overworked doctors and health workers to file the harm reports, and then it goes thru several levels of bureaucratic approval before the case is accepted as a vaccine-related injury.

"Active" surveillance was used for trial participants. They were given a phone app with choices of adverse events they experienced. 78% reported adverse reports, and 5% were serious. There was also journal entry options for the participants, and 30% reported adverse events thru that, and 2% were serious. But when the reporting method was switched to passive for the general population rollout the reporting fell way down.

But some news is getting out: For example, the risk of myocarditis is becoming known. And it's occurring in younger, healthy population where there was previously a very low rate of myocarditis.

On Nov. 17, the FDA released the first batch of data to satisfy a Freedom of Information request. This is data used by the FDA to approve Pfizer's covid-19 vaccine. One report in which Pfizer tracked adverse events in the first 2.5 months after the EUA, reported 1,200 deaths and over 25,000 nervous system adverse events. Under "Safety Concerns" Pfizer listed Anaphylaxis and Vaccine-Associated Enhanced Disease. This

document should be incriminating for any agency who saw it and called the vaccine "safe."

Pfizer's criminal past includes lying about a heart valve which fractured and killed hundreds; conducting clinical trials on African children without their parents' consent, after which some of the children died; bribing doctors; suppressing research; manipulating studies; withholding information that its products caused cancer; fraudulent marketing, and many more. They've literally paid billions in fines and settlements for their actions. So they are not a highly ethical corporation.

The CDC has redefined "vaccine" to suit political & pharmaceutical interests. The new definition of vaccine by the CDC is "A preparation that is used to stimulate the body's immune response against diseases." The new definition does not indicate there is any actual benefit derived from a vaccine.

I am writing to you with extreme concern over the Washington State Board of Health meeting\

you are holding next week. I am already sickened by what you have done to our State, Counties

and Cities. The crime is out of control because of your policies. People have lost their jobs because of your vaccine mandates (and keeping everyone in masks to cover their destain). There are mountain passes that cannot reopen leading to supply chain issues because you decided it was a good idea to fire DOT workers. And health care workers are being fired.

The meeting with the Washington State Board of Health has nothing to do with keeping us safe but to give you the power to arrest people and put them into camps so you don't have to listen to them. We Washingtonians are sick of your measures taken from us the people for your own Power.

These Authoritarian Policies need to be stopped! We'd like for our kids and grandchildren to live in a free Country. Please say NO

Subject: VOTE NO FOR COVID VACCINE SCHOOL REQUIREMENT

External Email

To Whom It May Concern:

My name is Christina Hooge and I am the mother of 3 small children. As a parent, I am
abhorred by the ideas currently being proposed to legislation to FORCE "vaccination" on
my children.

Dr. Robert Malone who is the creator of the gene therapy - not vaccine - strongly advises
parents NOT to inject the covid "vaccine" into our children due to the dangerous toxic
spike proteins the injection causes, resulting in possible permanent damage to my child's
critical organs, such as the brain, nervous system, heart and blood vessels, reproductive
system and immune system.

The rate at which this "vaccine" has rolled out is alarmingly fast, and suggests cause for concern based on the lack of testing over time. As a person holding a Bachelors Degree in Science, the lack of testing, of knowing exactly what risks we are potentially ignoring is completely unacceptable to me as a parent. I should be able to look at research and decide for myself if the benefits outweigh the risks to an injection and, as it stands, this is a no brainer for me, as a parent. So far, it seems children have very mild systems due to COVID-19. I understand this is not always the case, but it does appear to be the majority, so my kids are at no increased risk to their lives or safety without this "vaccine."

It is not legislation's right to FORCE my child to receive an injection I do not feel is in his best interest; not only that, one in which could cause IRREVERSIBLE HARM to his body as he continues to grow.

If COVID-19 vaccination becomes a requirement (without allowing exemptions) for school enrollment, you can be sure my 3 children will be unenrolled instantly. We will homeschool or move out of state before I put my children's lives in jeopardy.

I hope you will truly consider my words as a concerned parent; America has always afforded us the right to CHOOSE for ourselves. It is my right as a parent to choose wisely for my children and not your right as a government official.

Thank you for supporting us parents when you vote NO for a covid vaccine requirement for school.

Sincerely,

Christina Hooge

Subject: VACCINES IN WA SCHOOLS

External Email

Good Evening ,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval.

All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization.

The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org)

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>>
) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>
)

Force vaccinating healthy children for a disease that doesn't affect them is plainly wrong . Once again I want to express my strong opposition to implementing this vaccine for our school kids in Washington state. Please do the right thing and do not require these vaccinations for school age children.

Thank you,

Moirra Petris

Comments regarding proposals being considered at January 12th meeting

Regarding jabs:

1. The science shows that children are at extremely low risk of COVID. Furthermore, the so-called vaccine presents a high-risk of myocarditis in male children.
2. The laws makes clear that jabs, under emergency use authorization (EUA) cannot be mandated. There is no FDA approved jab available in the United States.
3. Jabs, under EUA, have not been tested for efficacy. This is like manufacturing an airplane in flight.
4. Studies now show that both jabbed and unjabbed can transmit COVID, the difference being that jabbed are more likely to spread COVID as they may not realize they are sick until they have spread the virus to others.

Regarding concentration camp facilities for "quarantee purposes".

There is nothing like following in the footsteps of Nazi Germany to remind people that absolute power corrupts absolutely. This is exactly what Hitler did to the Jews. The whole COVID "pandemic" was concocted by Dr Anthony Fauci, Bill Gates, Big Pharma and Big Tech. Their purposes have been two-fold: control and money, the more of each the better. When you try to censor information, on the premise that it's misinformation, people realize that those doing the censoring have ulterior motives. The government narrative has fallen apart.

1. COVID-19 is not nearly as deadly as the government has claimed. Yes, it is dangerous to the vulnerable: 1) the elderly; 2) those with comorbidities. It is not dangerous to those who are healthy. It is not dangerous to those under 20.
2. The jabs are more dangerous than having COVID and having natural immunity. The VAERS data, while grossly understated, shows the jabs can kill or significantly impair the health of anyone otherwise healthy.
3. The jabs do not stop or impair the spreading of COVID.
4. The majority of those, in the hospital, right now, with COVID, have received multiple jabs.
5. #4 makes it clear that the jabs are impairing the immune systems ability to function.

6. Evidence is also unequivocal that HCQ and IVM off-label use has been pulled by the Fauci/Gates cabal in the name of the much more expensive, ineffective "jabs" that are constituting a transfer of wealth, via the U.S. Government, from the middle-class to the wealthy. HCQ and IVM work, they are low-cost, they are early treatment that stops COVID. Every family should have an adequate supply as the needed prophylaxis.

Our governor is wholly negligent in his duty to the citizens of Washington State. His support of the Fauci/Gates money/control scheme is unconscionable and a dereliction of his duty as chief executive officer of this state. His push for concentration camps for those who dare oppose his draconian and unneeded mandates is no better than Hitler's targeting of the Jews. While Inslee calls the unvaccinated "terrorists", he is, in fact, the terrorist; the Hitler, mad for power and control. He is truly dangerous to the people of this state and should be removed immediately!

Sincerely,

Lynn M Finney

I could not be more infuriated about this blatant attack on the rights of every Washingtonian.
I 100% oppose allowing the health official to use law enforcement to involuntarily detain anyone for Covid related reasons.
I 100% oppose adding Covid vaccination to the WA school immunization record.

In regards to:

WAC 246 100

WAC 246 100 040

WAC 246 100 045

WAC 246 100 070

As a tax paying American citizen, I STRONGLY DISAGREE AND VOTE AGAINST THE FOLLOWING LEGISLATIVE MOTIONS:

WAC 246 100

WAC 246 100 040

WAC 246 100 045

WAC 246 100 070

These motions are unconstitutional and threaten the medical privacy of the American people. The human body has natural biological defenses against disease and viruses, not to mention the extensive help from the development of modern medicine. Unfortunately, there comes a time when every individual's immune system is too old or too weak to continue the fight. This is inevitable for every being on the planet. To place further rules and regulations on people, reducing freedoms will only begin a civil war. It may seem fictitious to you, living in the wealthier class, but down here in the real civilian world, the people who have to work their lives away paying your salary, then get bombarded with treats of freedom reduction, WE ARE TALKING CIVIL WAR!! Heed my warning!!

RATHER instead of reducing freedoms and placing further rules and regulations, we can practice motions that ACTUALLY take steps towards a healthier society. Such as the reduction of chemicals in processed foods sold in stores, teaching our 12 year old children that instead of relying on a vaccine created in a lab, they can grow and eat vegetables that naturally build their immunities. Putting an end to deforestation to help slow down carbon emissions for cleaner air to breathe, instead of building developments to make people like you richer and richer but only further destroying our habitat. Rather than making us slap on a mask to prevent disease between each other, but at the same time give little concern to our environment, littering it with said masks. The environment that physically keeps each and every one of us, as well as all the animals of the world alive.

AGAIN, these motions are unconstitutional and will only further destroy our country and our planet. Eventually natural processes take over. Do not make a war out of this. If you're not going to teach and promote health for everyday practice and long term effects, do not concern yourselves with our health at all.

Sincerely, We The People.

I am a K- 12 educator in WA State and have been instructing students for 40 years.

I'm writing to you about the agenda for the January 12, 2022 meeting.

I am in opposition to the following:

- 1) Any involuntary isolation/quarantine of people as described in parts of WAC 246.100;
- 2) Any mandate on COVID vaccines for children as a requirement to attend K-12 public schools.

Sincerely,

Leslie Drury

Hello!

I am writing you to let you know that there is no need to set law enforcement on citizen of Washington State to force them into quarantine if they don't comply to the rules you are proposing. Covid-19 is doing what viruses do in that it is much less deadly than at first and now is more like a bad cold.

You want to be able to force people into a detention center like criminals and yet you let the criminals free. Covid-19 is not the danger it once was so why now the insane measures to stop Covid? It will always be with us, like the flu.

Please be reasonable and stop this emergency order from progressing into law.

Joan Stewart

Hello Washington State Board of Health member,

I support the petition submitted by Xavier Figueroa, Ph.D with Informed Choice WA (ICWA). See attached petition image.

I oppose the Covid vaccine being added to the school and daycare schedule. Children have mild to no symptoms from the virus, and are thus the safest. Covid Vaccine inserts are none existent to the public, leaving us without a knowledgeable and informed choice. Pharmacists themselves do not have access to a vaccine insert. We are told to believe and take the plunge yet so many have had horrible and evenly deadly complications from these vaccines. Please urge the advisory group to be cautious and not make recommendations for the Covid vaccine to be added to the school and daycare schedule.

I am completely against any of the proposed Covid Policies that are over reaching and immoral. We stand against these proposed WAC's: WAc 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

Thank you for taking the time to read my opposition and concerns. I look forward to reading your reply.

□Hello,
I am writing voice my concern. I am strongly against the follow proposed COVID policies WAC 246-100-070, WAC 246-100-045, and WAC 246-100-040, WAC 246-100, and WAC 246-105. These policies are an overreach or government and breach upon my religious freedoms.

As a mother, how do these proposals look at the individual needs of my children and their unique health needs? How will these policies protect the medically fragile population, mentally fragile children, the chronically ill? A blanket policy that promotes detainment and separating children from their parents is not in the best interest of the children and I DO NOT support these proposals. No one knows the physical, mental, and health needs of my children more than me and my doctors so I do not support the proposed policies.

With Thanks,
Heather Angelo

Kim Adair

On Fri, Jan 7, 2022 at 11:50 AM K. Adair <emailkimadair@gmail.com>
<<mailto:emailkimadair@gmail.com>> > wrote:

"Dear Board Members,

Let me begin, by asking you to please have a moment of silence for my friend, Hospice Care worker Shannon Morgan, who was fully vaccinated, as per WA State mandates, who died, right after Christmas, of Guilliane Barr disease, a known, and documented complication of the Covid-19 Vaccine. The medical professionals suspected it was the vaccine that caused her death, and onset of Guilliane Barr, and blood clot in her heart. She was a ray of sunshine, and helped people until they took their last breath, but what her reward was, was an untimely, premature death.

We can prevent this from happening to other families.

Please suspend your intent for your rule making petition on WAC 245-100.

Your chapter 246 - 100 and rule making petition for 246 -105 tries to confuse, coerce, intimidate, threaten and harass citizens , and is ultimately an inappropriate use of your power.. The end game here is retaliation to those who don't comply, and it creates discrimination.

The masks and the testing are also “emergency use authorization” but even if they weren’t, we simply should not be forced by such laws.. Only a licensed medical doctor can suggest a medical treatment such as a mask, covid testing or a vaccine.

You are attempting to take the position of a medical professional.

1. The Nuremberg Code, codified into US Federal Law, prohibits forcing or coercing anyone, under any circumstances, to participate in a medical experiment; and the Code states "the voluntary consent of the human subject is absolutely essential."

3. The vaccine formulation now being given to U.S. children aged 5-11 is NOT the same formulation used in the clinical trials, and NOT the same formulation that has been administered to all other age groups under EUA. So even when current ongoing clinical trials are complete, the results cannot be assumed to be relevant to the safety or effectiveness of the new formulation.

<https://www.fda.gov/media/153717/download>

4. Most vaccines are trialed for at least 5-10 years and COVID-19 vaccines have been in trials for less than one year.

Source: <https://www.fda.gov/media/153447/download>

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ffl.facebook.com%2F.php%3Fu%3m3F2ISjXTP_8R2bXYtThuMpPgg2bVOG5O-%26_tn_%3D-UK-

Ia2XpROslwlj2h3Xm9q wnu6vl993W2Te4HXgwR6KHFhHH2OQtd6pD8VCsipeoc8GqDRGrMQSJ61ybBuw2mz

6. Numerous doctors, scientists and medical experts are issuing dire warnings about the short and long-term effects of COVID-19 vaccines, including but not limited to death, infertility, miscarriages, Bell's palsy, blood clots, Guillane Barr, clotting problems,

cancer, inflammatory conditions, autoimmune disease, early-onset dementia, convulsions, anaphylaxis, myocarditis, and antibody dependent enhancement leading to death.

7. Children and youth are at virtually no risk of dying from COVID-19 or transmitting it to others, but deaths and injuries to children and youth have already occurred in the COVID-19 injection clinical trials.

8. FDA admits long term safety is unknown. Children are being used as test subjects, with their parents acquiescing under fraudulent and media marketing pressure. Public Health messaging does not match the reality of the current knowledge base.

At the October 26 VRBPAC meeting, FDA Advisor Dr. Eric Rubin admitted: ". . . but we're never going to learn about how safe this vaccine is unless we start giving it."

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ffacebook.com%2F.php%3Fu%3s5W6uDeBBRUUgf2DM%26h%3DAT0onbLNAhL8E8s989nXfH4xwSx9sJFuzfrst-S6-Z9EJ9xsTJiuXi0-tw-QgpgGd3Z5h6sW4GzCcXegd03aCHgNkHGx2xrQa_LalSShou9RayBTQrfPjKS86sHigLIG%26__tn__%3D-UK-R%26c%5B0%5D%3DAT31BIT8sqKAoGp_dLcR-HHqMyxAWQM_jgBuPGhk3UWCWQ_naRIIX-Ia2XpROslwj12h3Xm9q_wnu6v1993W2Te4HXgwr6KHFhHH2QQtd6pD8VCsipeoc8GqDRGrMQSJ61ybBuw2mz

9. International Alliance of Physicians and Medical Scientists has declared that children should be excluded from vaccine mandates:

"Consensus is clear among MDs and medical PhDs: following 20 months of exhaustive research, millions of patients treated, hundreds of clinical trials performed and scientific data shared worldwide, they conclude that healthy children and the COVID-recovered should be excluded from restrictions and vaccine mandates."

Source: <https://globalcovidsummit.org/.../thousands-of-physicians...>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fglobalcovidsummit.org%2Fnews%2Fof-physicians-and-scientists-reach-consensus-on-vaccinating-children-and-natural-immunity%3Ffbclid%3DIwAR1ENkG6HThkPctftSkEQKIZDjotnBu-pPfCJO4hDFCEkWpcGigz7sQrqek&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cd8e581acf8b846348247>

10. There have been more deaths from COVID-19 vaccines, as reported to the Vaccine Adverse Events Reporting

System (VAERS), than deaths in the last 10 years from all vaccines combined and only 1% -10% of vaccine injuries are reported to VAERS. The full extent of adverse events from the COVID

vaccines is unknown as there is a significant delay in uploading reports to the VAERS database.

The risk associated with COVID-19 vaccinations is extremely dangerous to the health and well-being of all children and this form of treatment is unnecessary.

Any coercion or pressure tactics used for students to be vaccinated contravenes the Nuremberg Code, the Helsinki Declaration and Federal Law.

Any use of "implied consent" by any minor child under the age of 18 is defined in law as gross, contributory, and culpable criminal negligence.

Any party found to be involved in vaccination coercion when entrusted with the care of our children such as all school staff, school board members and executive, and any other adults who may have access to our children while under their care. This includes the assistance of outside school staff, contractors, public health nurses, or health officials

could be prosecuted to full extent of law and you may be held personally and criminally liable for any injuries or deaths that may occur.

We are forced to err on the side of spiritual caution and refuse to harm our temples in honor of Gods Holy Word.

The 1st Amendment of the constitution has protected these exact claims before the Supreme Court on many occasions. Even State governments have faced this glaring truth during the Covid crisis as

they attempted to pass mandates and laws that violated this basic principle only to have their wrong decisions righted before the Courts, with financial penalties.

We, as citizens, strive to be at peace with all men and to obey all laws and mandates from a legitimately elected government.

Please do not pass this rule making activity. Shannon having a choice, may have saved her life. Instead, mandates ensured her death.

Respectfully

--

I am absolutely appalled that the Washington State Board of Health wants to use law enforcement to involuntarily detain a person or group of persons and isolate them in a quarantine facility for refusal to comply with requests for medical examination testing, treatment, counseling, vaccination. This is extreme overreach and appalling. We are not a police state. I am disgusted that this is even being considered. I am vaccinated, as is most of my family. But I respect the right of people to not be vaccinated. This is a frightening thought. That you would use law enforcement (who are already understaffed and overwhelmed) to enforce this absurd policy is unbelievable. I am so disgusted that this is even being considered.

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

Such laws go against personal freedoms granted by the United States Constitution. All mandates passed thus far by the state of Washington have been proven ineffective. We are told to mask up and we'll prevent spread then see reports that numbers oppose what you claim. The exact same thing has occurred with the vaccines. The vaccinated can spread Covid-19 (all variances!), the CDC has provided evidence proving this claim. If the vaccine does NOT stop the spread and does NOT prevent becoming infected then why are you trying to vaccinate our children with a drug that lacks a longitudinal study. You do NOT know the long term side effects that will appear years from now. The attempt to remove medical freedom and parental rights by demanding that parents vaccinate their school age children is an abuse of power. You do NOT have the right to put my children at risk. A risk without a guarantee that they will not get Covid or spread it to others. I do not support WAC 246-105, or what it stands for. I am ashamed of Washington State Health Department and Washington officials that are trying to pass this.

Sincerely,

Melissa Fleck

Mother and elementary teacher

To the members of the committee:

Please vote against the detainment center WA 246-100-070, WA 246-100-045 and forced vaccinations WA 246-100-040. VOTE NO on all accounts.

In addition vote against adding the Covid-19 vaccination to the list for children to attend school.

Our state government and health officials have already gone too far. Our children are being over tested, and learning in a less than healthy environment (fear leading the way in every area).

These proposals are a gross overreaching of authority.

Thank you,

Attention Nathaniel Thai,

As a member of the Washington Board of Health I'm sure you share my concern for the wellbeing of our populous. It is for this reason that I have taken the time to write to you. As a US citizen and resident of Washington State I want to express my strong objection to WAC 246-100. I understand that it will allow local health officers to use law enforcement (WAC 246-1—070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to comply with requests for medical examination, testing, treatment, counseling, vaccination (WA 246-100-140).

I believe this is an unnecessary overreach by this State. It seems like we are heading toward a pattern of control that resembles Communism. Please reject this legislation and protect our freedoms.

I vehemently oppose the implementation of a Covid 19 Vax requirement for schools in Washington State. For starter, based on reason #1 below and on so many other laws, this is flat out illegal. It would be harassment and coercion of the citizenry by those who are put in place by the citizens to protect the health of the citizens.

Secondly, it makes absolutely no sense and most people realize that, except the few that have been terrorized by the fear campaign and miss-information. It is clear now to everyone, and cited by the CDA, that the vaccinated are getting the virus, can spread it, and are getting sick from it (just as sick I might add), just like the unvaccinated. So the experimental shot makes zero sense to get, especially for children. Healthy children have literally no risk of getting hurt from this virus. On the other hand, there is a serious risk of injury or worse. The heart problems are real, the CDC has admitted that, VAERs injury and death are real and much underestimated, and people can clearly see all this is happening... and who knows what other injuries and long-lasting effects these kids will get with clotting, etc. One thing is sure however, there will be some injuries to these kids and likely some worse outcomes. You do not want to be responsible for that, and there will be damage to some of these kids if you force them to take this experimental gene therapy. And I will reiterate, there is zero risk to these kids if they don't get the shot

This is wrong to even seriously consider, discuss, and threaten citizens with in so many ways.... it is not moral, it is against humanity. And it is no way necessary with the virus being much less virulent now. The vast majority of the country is doing nothing like this. For God sakes, please do the right thing and protect your citizens health and their rights. It is your responsibility. We know there is big money to schools involved in this, but that is not a reason to do an awful thing like this. The truth will come out and you will want to be shown standing up for it. Please do the right thing. Thank you.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under

an Emergency Use Authorization. The only “approved” COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This “smoke and mirrors” approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer’s claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are ‘Interchangeable’ • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there’s no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, “We are never going to learn about how safe this vaccine is until we start giving it” Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer’s studies: Ten red flags in the FDA’s risk-benefit analysis of Pfizer’s EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>)

Force vaccinating healthy children for a disease that doesn’t affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Monty Chellis

Subject: WA SBOH- January 12th Meeting (comments)

External Email

Hi There,

I will be calling in to listen to the meeting on January 12th but have to be working and don't have the ability to participate in the public comment portion of the meeting.

I would instead like to make my comments via email before the 12:00pm deadline today, January 7th.

I am currently pregnant with my first child, a moment I have dreamed of. I am local to the Vancouver area and was raised here. I attended school Elementary through College right here in Vancouver.

As I think about the year ahead and growing my family here in WA state I have to start thinking about the future of my kids.

I would like to comment that I OPPOSE agenda item number eight. I oppose the Board's formation of a Technical Advisory Group to review information about Covid-19 shots for consideration of mandating shots for school. I oppose any mandates around Covid-19, period. This should be a personal choice between parent, child, and health provider without state interference.

I would like to comment that I SUPPORT agenda item number eleven. I support this Petition to change 246-105 WAC that would prohibit the Board of Health from adding any product to a mandated list unless its successfully complete Phase III trials for proper licensure. Again, this should be a personal choice between an individual family and their health care provide WITHOUT state government interference.

I will be in attendance of the meeting on January 12th alongside many other parents. I am opposed to the BOH taking any steps toward mandating the Covid vaccines for children's entry into school when phase 3 clinical trails of Covid-19 vaccines are not yet completed.

Thank you for your time.

To (All) Whom It May Concern:

I have been made aware of the above referenced proposed policies and I must express my concern about them--my grave concern—not just a pun. For about 30 years I have been aware of the legal immunity vaccines have when it comes to adverse effects or experiences they can cause. This did not seem to be an issue until covid arrived on the scene, and the experimental vaccine was touted as the only antidote to the virus. Early interventions were not mentioned by mainstream media, and in some places medications such as hydroxychloroquine, quercetin, and ivermectin (for humans) were pulled of the shelves of pharmacies.

The vaccines have not delivered as originally promised. They have not been 90% effective in preventing the virus from infecting a person, and one shot or two is no longer considered sufficient coverage. This is very, very different than requirements of traditional vaccines which allow one's body to build up antibodies or immunities to the pathogen in the near vicinity of the injection site and then be carried by the bloodstream to the rest of the body. The immunities developed after a true vaccination and possibly a booster are usually good for a person's whole life. Covid's definition of "fully vaccinated" has already changed twice in two years.

The goal of herd immunity due to this inoculation now seems to be unreachable. Outbreaks of Covid have occurred on cruise ships with 100% vaccinated clientele, and in Gibraltar, whose population is 100% fully vaccinated, still has Covid cases. Should Washington State expect anything different if her population is entirely vaccinated?

Medical doctors who have expressed concerns about the safety of this experimental vaccine based on the adverse reactions of their patients have been relieved of their jobs/licences. They cannot publish their findings on this topic. Over 200,000 Facebook users had their accounts cancelled after they told their stories about their vaccine adverse experiences. Why is this information being suppressed? Is it because "they" do not want the population to know that this "vaccine" contains formaldehyde, graphene oxide, and nanno particles that can wreak havoc in our bodies?

Governments have paid people to get vaccinated. A truck driver and a welder, both fathers, in our extended family have lost their jobs in Washington State rather than be inoculated. (Just how many people does a medium distance trucker interact with in a day's work? In this case, the same four people per day.) Front-line workers in hospital wards who kept themselves healthy without the jab were hailed as heroes during all of

2020. By the end of 2021, many of these excellent and experienced professionals had been forced to leave their jobs—and sometimes denied EI which they paid into for years—because they still chose to be unvaccinated. Mandating the jab will never guarantee 100% “compliance” and especially so in a nation that has valued and enjoyed freedom for centuries and written it into our Constitution.

Congress did not pass Biden’s shot mandate. This December 17-21, a poll was made by the Convention of States Action in partnership with The Trafalgar Group. This poll of over 1,000 eligible voters showed that 51.1% of those polled favor a bill in Congress to block Biden’s vax mandates. Biden’s plan is both unconstitutional and it exceeds the power of Occupational Safety and Health Administration. And if Congress did not pass Biden’s shot mandate, how is it that OSHA rules should try to usurp what Congress already denied? My observation is that the Occupational Safety and Health of many American workers has already been greatly endangered by the staff shortages caused where the vax mandate has been enforced and many trained workers have lost their jobs.

It appears to me that the purpose of forcing this experimental vaccine on people is simply not related to the jab’s effectiveness in improving the health and well-being of the American people. As stated above, the “vaccine” has not prevented the spread of the virus and therefore has not established herd immunity. Despite offering incentives for getting jabbed and heavy punishment for not getting jabbed, it has not been embraced by all the people. In fact, forcing the vaccine mandate has seriously damaged the economy and the quality of life for many, many American people. Pursuing it further will only cause more damage to the people and state you were elected to serve.

Your constituents have had ample opportunities to make their personal decisions about getting this shot; and they have already decided. Please respect their free wills! Remember, 51.1% of the Americans polled favored a bill to block Biden’s vax mandates.

Respectfully Yours,

Mary Balzer

It was brought to my attention that you will be voting on covid vaccinations for school age children on January 12. I urge you to vote NO!

I am strongly opposed to this vaccine and I will not be vaccinating my children with this experimental untested Covid vaccine that is not even reliable. I am more worried about the vaccine side effects than I am of the low risk complications of the virus. We have had the virus and we have natural immunity.

This is the parents decision, not the governments. No more controlling our families.

Public schools are already experiencing a huge drop in enrollment because of parents pulling their children out. If you force this vaccine even more of us will be forced to homeschool our children. We will not let you make our children's health choices for us.

Vote no!

Thank you,
Melissa Perez

Subject: WA state children & students concerns for Jan 12, 2022 meeting

External Email

Three Points I want to share with you regarding your meeting on January 12, 2022 discussing the fate of our children and residents of Washington state.

Point one -

Leave our children alone, DO NOT push through mandatory covid vaccines or boosters for school children immunization requirements or workers in our Washington state

- it is an experimental vaccine, and it is under emergency use authorization

- children recover from covid and are not at risk of fatalities from the illness

- the recovery rate is over 99% for children. Please don't risk the unknown long term side effects from forcing an experimental shot on them. Some kids that have got the shot have experienced heart issues, some strokes, or other adverse effects. This is not worth the risk.

- if you push this through many families will pull their kids from school and the schools will lose funding

- Natural immunity needs to be taken into consideration. It has always been the best defense for illnesses, this virus should be the same. It is against common sense to force someone a shot when they have already had the illness and have natural immunity.

If you push this through it is an abuse of your position. There are proven side effects and more health concerns by administering the non-FDA approved vaccine that is still under clinical trials for both children and adults. It should be up to parents to decide for their children, not the health department, schools; or employers for adults.

Please reference this article on the extremely low risks children have on society for covid:

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcovidmythbuster.substack.com%2Fsevere-covid-patient-can-produce&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cd23c87c9414b4bf4cf0f08d9d18dd8c3%7C1>

Point two -

Let Washingtonians be - DO NOT authorize local health officers to use law enforcement to force an emergency order to involuntarily detain (quarantine) a person or group of persons or for testing or vaccination. This is an overreach of Americans personal liberties. This is against the constitution.

Point three -

Stop the mandates - let Washington residents be free to choose. Last I checked, we live in America, our constitution is written to give us the right to choose and have freedom. The mandates are causing more harm in our community: financially, physically, and mentally. There would not be staffing shortages across all professions if the mandates were lifted. Children are experiencing stress and are becoming suicidal from all the restrictions. Stop the mandates.

Sincerely,
K.Barr

lauriely@protonmail.com <<mailto:lauriely@protonmail.com>>

To whom it may concern:

Thank you for having this forum. I am writing in support of Petition #11 which requests that BOH establish a new rule that prohibits requiring that anyone take an EUA product or licensed product that has not yet completed Phase 3 clinical trials. I oppose BOH formation of a Technical Advisory Group to review information about Covid-19 shots for consideration of mandating the shots for schools. I oppose any Covid-19 shot mandates because each person needs to weigh their medical condition with their medical provider and make an informed, personal decision. This is especially true since the infection fatality rate for Covid-19 is low. For ages 0-17 it is at 0.00002 (99.998% survival rate) which is statistically a zero percent death rate. Beyond that, when you consider that most hospitalizations for the young are with Covid-19 and not for Covid 19, we can know that they are not in mortal danger from Covid-19. Neither is there a great risk of the young spreading Covid-19 to staff and teachers. The young have a greater risk of Covid-19 vaccine adverse reactions than of a serious Covid-19 illness. We must protect our young before we consider self-protection.

Sincerely,

Laurie Buhler

To whom it may concern, you unelected bureaucrats,

I am a FREE citizen and lifelong resident of Washington. I reside in Spokane County. I am one of your bosses. I am not your servant, peasant, subject, peon, or inferior.

I have a multitude of questions, serious, important questions, and a lot to say about the way people employed by the government of Washington have begun to believe they are the rulers of the citizens of Washington, have come to the completely mistaken and wicked belief that they are entitled to make private, medical decisions for the citizens of Washington and the children, and that they have the right to coerce, compel, and force the FREE citizens of Washington to do anything, especially anything that violates a free human being's bodily autonomy.

I OPPOSE WAC 246-105 (You may NOT allow Covid-19 injections to be added to school immunization requirements.)

I OPPOSE WAC 246-100 (You may NOT allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040).).

I do not agree that these WACs should be modified, changed, or altered in any way to add any language referring to COVID-19 or coronavirus or any of the variants.

I DEMAND that you tread lightly and remember that We The People are free, sovereign human beings with the right to speak and move freely, amongst other things. You have no right to violate our rights, freedoms, or bodily autonomy. Anything you do while being paid by the taxpayers of Washington must be with the full awareness of our rights and zero treading upon them.

My first question, a 2 parter, which you MUST address: When did you become the rulers/bosses/parents/supervisors/kings/queens/lords/stewards of the citizens of Washington? And when did WE the People abdicate our rights and freedoms to you?

If your answer is anything but "NEVER" and "NEVER" then you should resign in shame immediately. How dare you believe, even for 1 second, that YOU have any right whatsoever to dictate anything to the free citizens who have chosen to live in Washington? WE are YOUR bosses. WE pay your salaries. You are supposed to work for us. We are not peasants, subjects, peons, slaves, indentured servants, children, minions, inferiors, etc. We have the right to make our own decisions. You have ZERO right to impose your wicked ideas on us, to force, coerce, threaten, chide, compel, or anything. If you cannot remember these things then resign right now. You have no business being in "public service" if you cannot remember YOU SERVE THE PUBLIC. As the publicly funded website for the Board of Health says, " the State Board of Health has served the people of Washington for 132 years." SERVED THE PEOPLE. It does NOT say "ruled the people." Further, it says you "promote policies that protect and improve the public's health." Promote does not equal "coerce" or "force" or "rule." Maybe you should refresh your memories and remember your places (that would be beneath the people who are your bosses, by the way).

We elect representatives to a legislature where they discuss, write, take opinions on, debate, and vote on laws. We did not elect career bureaucrats to create rules, regulations, or demands on the people. If you have not been elected to a legislature then stop thinking you have any right to force your notions upon us. No rules/regulations without representation. If you are in the legislature, then it's time to remember YOU WORK FOR US. You have no business creating and passing laws that violate our freedoms and rights. If you cannot remember this, then resign in disgrace. I do not care if the legislature "grants you powers." They only serve with the consent of the governed and we do not consent to be experimented on, to be ruled by unelected (or elected) power-hungry fascists or give up our rights, freedoms, and bodily autonomy. WE DO NO CONSENT.

WE ARE IN CHARGE, not you. You have ZERO right to violate my bodily autonomy, make medical decisions for me, force me to inject ANYTHING in my body, deny me entrance to publicly funded spaces, force me to wear fabric on my face, coerce me to inject anything into my body, coerce me to wear fabric on my face, etc. etc. etc. As a free human being, I get to decide what I inject into my body, what I wear, and where I go. My tax dollars pay for publicly funded spaces and if you want to deny me entrance to anything my money pays for then I want all of my money back and I will no longer pay taxes. Such things are literally discrimination, segregation, and immoral. I will not share my private medical choices with event staff, clerks, government officials, or to enter establishments, public or private. My private medical records are MY BUSINESS ALONE. If you think forcing people to share their medical records with others is acceptable, then you better be ready to put your own medical records out in public view immediately so we can all have a look and make decisions on what you are allowed to do, what you must inject, the behavior you are no longer allowed to engage in, etc. Further, if you want to coerce us into sharing this medical decision, then it's only fair that everyone's every medical decision be public record. Promiscuous? Then we want to see if you have STDs before you can be in public. A drinker or smoker? We get to dictate what you get to do in life. A drug user? We get to make decisions for you, too, and share everything publicly. Or maybe you should back this runaway train up and remember you serve free citizens who have the right to private medical records.

Second Question: When did the free citizens of Washington give their children to you to raise? Why do YOU think you have the right to dictate other people's children's medical decisions? Children belong to God and with their parents. They do not belong to the governor, the attorney general, legislators, school principals, babysitters, cousins, neighbors, store clerks, or you, unelected, arrogant, power-hungry bureaucrats. You have NO RIGHT to decide what is injected into other people's children. Parents have the responsibility to make decisions for their children.

COVID-19 is really not much of a threat to MOST people and it's even less of a threat to children. According to the CDC's best estimate of the infection fatality rate for individuals ages 0-19 is 0.00002, meaning 99.998% of children survive it. Why on earth do they need to be injected with things which have no long-term studies or trials? These shots have barely been around for a year and you cannot possibly argue that a year or 2 suffice as "long-term." It is horrifying that you are even considering making experimental shots mandatory for anyone, let alone children. Other immunizations (which actually IMMUNIZE, unlike the COVID "vaccines") were tested for a long time before they were used and were available for a long time before anyone considered making them mandatory. As COVID primarily impacts the elderly and the ill, it is unconscionable to demand children be forced to get injected with these experiments. Please refer to this article and many others like it for more information, as apparently you are completely ignorant of reality: <https://www.tabletmag.com/sections/news/articles/covid-vaccine-mandates-kids-legal>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.tabletmag.com%2Fsections%2Fnews%2Farticles%2Fcovid-vaccine-mandates-kids-legal&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C7e8a53f815444aab6f1808d9d1c943d4%7C11d0>

Currently, as I am sure you must know, there is no COVID-19 "vaccine" available in the United States outside of ones approved only under the Emergency Use Authorization, which is only possible if there are no therapeutics available to treat something. As we all know, there are therapeutics available to help fight COVID-19. I believe you cannot mandate these shots as long as they are under the EUA. And, as you know, "Comirnaty" is not available in the United States so you cannot mandate children be forced to get the EUA injections. Or anyone else, for that matter.

To quote the article above at length:

"In 2004, under Section 564 of the Food, Drug and Cosmetic Act, 21 U.S.C. § 360bbb-3, Congress permitted the FDA to grant EUAs so that any American in a personal emergency can choose whether or not to explore potentially lifesaving treatments that have not gone through the full testing regime. In other words, the legal basis for EUAs is a matter of the individual right to access experimental treatments, not of government right to compel such treatments. EUA products, by definition, have not yet been proven safe and effective according to FDA standards.

Indeed, Congress has recognized that Americans should not be forced to take medical products that have not been deemed safe and effective by the federal agency charged with the power to to decide. The same federal statute that authorizes EUA products also requires, among other things, that potential recipients of such medications be informed "of the option to accept or refuse administration of the product, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks." According to a plain reading, individuals have a statutory right to "refuse administration" of a vaccine approved only for emergency use. The language leaves no doubt that Congress intended for any decision to take such products to be made free of coercion, pressure, or duress. A city or school system that withholds children's access to education, extracurricular, and recreational activities—all crucial to their cognitive and emotional development—violates both the letter and the spirit of the statute."

I read this and think you should read it, too (or read it AGAIN): 'As the Technical Advisory Group stated during their meeting on December 29th, in order to amend Chapter 246-105 WAC "the vaccine (Covid vaccine) containing this antigen must PREVENT disease(s) that have significant morbidity and/or mortality". CLEARLY, these COVID "vaccines" DO NOT PREVENT TRANSMISSION. We were told repeatedly, by the CDC, Biden, and the rest of the snake oil salesmen, that these "vaccines" would 100% prevent you from getting or transmitting COVID-19. That was obviously a bunch of lies. Numbers show that highly "vaccinated" places are seeing massive surges of "cases." Masks also do not stop transmission (DUH) either and we do not consent to be muzzled. The only point of mandating these shots which do not prevent transmission is to control free human beings and force them to do as you "command." NOPE. We do not consent.

There are no Washington laws which give you the authority to mandate citizens must take an medication or have any medical intervention. Such a thing is so far out of your purview that you should never show your face again in public if you think you have even a tiny, infinitesimal "right" to do so. Requiring these untested "vaccines" for children is outside any law as well. Such decisions belong solely to parents/guardians and children. As the article says, "The Ninth and 14th Amendments to the United States Constitution protect the right of individuals—both children and adults—to bodily integrity and to decline unnecessary medical treatment."

Further, Natural Immunity is an important, long-studied scientific fact which those in the "health" field, in their haste to seize control and impose their own wills upon free citizens, have decided to pretend doesn't exist. Do you force those who have had chicken pox or measles, etc., to get the actual vaccines for these diseases? Do you force them to get "booster" shots? No, you do not, as such things would destroy the natural immunity which does a better job than anything created in labs. Since the COVID "vaccines" do not immunize anyone, you have no reason to coerce, compel, force, or mandate anyone into getting these shots. You have no moral, ethical, scientific, or legal standing to do so. If you think you have such rights, then please be aware that others can use the same arguments to dictate their beliefs in the future. Most Christians do not believe in sex before marriage and a case could certainly be made that engaging in such promiscuous behavior has consequences that hurt society at large, which would mean the government should be able to force interventions on those who think they have the right to decide who they sleep with. Etc. If you want to open that door, we're happy to make sure everyone in this Godless state is living pure, holy lives.

As we do not know the bodily consequences these "vaccines" might have long-term, it is unconscionable that you would even consider mandating them for children (or anyone). We cannot have any idea how their developing bodies might be hurt by these experimental shots. Are you prepared to be sued, as a "board" and as individuals by parents whose children are damaged by something you ordered before long-term studies can possibly exist? You will be morally, ethically, and, hopefully, criminally/monetarily/civilly held liable for any consequences if you mandate these for children. If you have half a brain amongst you, then you will step back, remember your place, and wait a decade or more to see how things go. Parents/guardians have the sole rights to make this decision for children. NOT YOU.

Under Jay Inslee's hateful guidance, government workers have arrogantly decided they have the right to dictate to the free citizens of this state, to discriminate, segregate, violate bodily autonomy, and threaten, coerce, force. We live in the United States of America and as Americans, we are FREE. We have the sole right to decide what medical "treatments" are injected into our bodies. We have the right to move freely, at will, to speak freely, to assemble, and to get rid of all governments which violate our rights. You are employed by the citizens of Washington. You better remember your place. You may provide suggestions and we are free to ignore them. There is not one medical treatment

or medicine which every single person needs. Not one. We do not force healthy people to have chemotherapy or take heart medication (malpractice, anyone???). We do not put casts on unbroken legs. Why on earth would you think everyone should get these experimental shots? You have no idea what consequences many people will face due to your immoral, unethical coercion. You may recommend people get these experimental shots. You may NOT demand, force, coerce, pressure, threaten, or mandate them. In the last two years, you have created a hateful, divisive, cruel society where you segregate people based on their personal medical choices. You tell them they are less than, vectors for disease, and evil, when they are not. You lock them out of society and foment hatred against them. Is it any wonder that there have been so many more opioid overdoses and deaths, more domestic violence, more suicides, more hopelessness? YOU have contributed to these deaths and despair. YOU. And yet you cruelly continue to divide and subjugate us. If you care about the health and well-being of all Washington citizens (what a laugh!), then you should be concerned with all of those people. Vastly higher numbers of people have been affected by those things than by COVID-19 but you have ignored them at our peril. You have failed to encourage therapeutics, exercise, and healthy eating to prevent COVID and other things. You have locked people inside, kept them away from co-workers and loved ones (gathering strengthens immune systems, obviously, so it's interesting to consider whether you purposefully crafted policies which forced people to weaken their immune systems), and tried to keep them frightened.

Government is instituted by the people, for the people, to make life better for the people, not to rule the people. Free people cannot be compelled by any government or business or person to violate their bodily autonomy. Do you know what we call it when a person uses force or coercion to violate another's bodily autonomy? RAPE. We call it rape and it is immoral and evil. You have no right to violate our bodily autonomy or our children's bodily autonomy. We do not consent to any violation of our bodily autonomy. We do not consent to being locked out of society. We do not consent to be ruled by bureaucrats.

If you are a doctor, you have presumably taken an oath to "do no harm." Yet, in the last two years, you have crafted policies which have done immeasurable harm. You have kept people frightened, alone, and you should be held accountable for these things. Time to remember your oaths and step back from committing evil against the free citizens of Washington. You continue to abuse power loaned to you by the legislature, which only has power because it is loaned by the people. We do not consent to be abused, manipulated, frightened, coerced, forced, threatened, segregated, discriminated against, or locked out.

Perhaps you should spend some time learning more history so you can see how those who violated bodily autonomy and freedom are remembered. Many were put on trial and faced severe consequences for their evil actions. You have the choice to violate freedoms or to step back and recognize you have no such powers on this earth. For example, you should read the Nuremberg Code and why it was instituted in the first place. Never in history have the good guys been the ones coercing, forcing, threatening people with injections. So perhaps you might recognize which side you are currently on here. (Not the good guys, obviously.)

Nuremberg Code:

1. The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the experimental subject there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health

or person which may possibly come from his participation in the experiment.

"The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs, or engages in the experiment. It is a personal duty and responsibility which may not be delegated to another with impunity." (This means each of you individually is responsible for ascertaining the consent of the people, as in each person you think should be forced to have these experimental shots, and if you force/coerce/threaten, then you are individually responsible for the consequences. You cannot say it was a group decision or you just went along with others. You are complicit and morally, ethically responsible.)

Hello,

I would like to express my viewpoints on the following topics below:

1. I OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose COVID-19 shot mandates, period.
2. I SUPPORT the Informed Choice Washington's Petition for Rulemaking. The item 11 petition on the January 11th agenda that was filed by Xavier Figueroa, PhD, on behalf of ICWA, and asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Thank you,

Amanda Davis

Dear Board of Health Members

I am writing to you to NOT Implement any policies that utilize tyrannical actions, involuntary quarantines, testing, treatment, counseling, and vaccinations. This will NOT Contain COVID-19. As you will know this virus will never be contained. The only defense against Covid it Or reducing Co-Morbidities and following therapeutic treatment development.

These vaccines are only good for short term and it is a proven factor they do not stop transmission of this disease or infection.

If our healthcare systems are stressed due to Covid patients, it is only because hundreds of qualified healthcare professionals were unnecessarily terminated from their jobs. Mini with natural immunity and due to that there are not enough people to provide care. Which I hold you responsible.

We are now seeing hospitals allowing healthcare workers to continue to work having Covid due to the decision made in terminating qualified health care workers. This has placed a tremendous hardship on our healthcare systems.

There is no regard for life.

I am asking please Do Not implement any actions that will only hurt, divide, anger your fellow citizens and it will do nothing to reduce the spread of this disease.

Good Afternoon Representatives,

I am writing to OPPOSE proposed policies:

That allow local health officers to use law enforcement (WAc 246-100-070)
that are aimed to force an emergency order to involuntary detain a person
or group of persons (families) to be isolated in quarantine facility (WAC 246-100-045)
following refusal to voluntarily comply with requests for medical examination,
testing, treatment, counseling, vaccination (WAC 246-100-040).

I am writing to OPPOSE proposed policies:

that would include COVID-19 injections as part of school immunization
requirements using WAC 246-105

I am writing to SUPPORT the request to adopt a new rule:

ICWA is requesting the WA State Board of Health adopt a new, permanent Rule
prohibiting the Board from adding to the daycare or school requirements any Emergency

Use Authorized

product or any licensed product formulation which has not yet completed Phase 3 clinical trials.

This new rule request pertains to any and all avenues through which the Board has authority to add

medical interventions requirements, including through regular or emergency rule-making.

The rule is needed because: Despite the absence of any FDA licensed COVID-19 vaccine w/ completed

Phase 3 trial studies in children, and despite CDC-acknowledged risks of myocarditis and blood clots, the BOH

has gathered a Technical Advisory Group to examine adding COVID-19 vaccines to daycare & school requirements.

This new rule is needed immediately to ensure that federal EUA regulations are upheld & to protect fully informed consent,

which prohibits the use of coercion or undue influence, such as can be exerted by state requirements.

The new rule would affect the following people or groups: All minor children, their parents and guardians in WA state.

To the Washington State Board of Health,

As a concerned Washington State citizen that votes and pays taxes please vote AGAINST the following proposed policies:

Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

There are a plethora of reasons that these decisions contradict reason and common sense. It is clear that our immune systems and the Covid 19 have unknown components that deserve individual choices. Medical decisions should be between an individual and their personal medical providers, not mostly unelected government officials making broad scoping policies for complicated issues. This includes a parent's right to make medical decisions for their children.

Statistics show that, though COVID 19 has been a virulent adversary, there is an extremely low risk of mortality, and this risk is even lower when it comes to our children. In addition, as all viruses mutate, they will become less severe.

There are not long term studies proving efficacy and/ or safety of these vaccines, and for many, the vaccine is not a best option, especially while the risks are so low, and there are other viable treatments and avenues to fight this diseases, including but not limited to supplementation, antiviral and anti-inflammatory medications proven to be safe, as well as letting our natural immune system do what it is designed to do.

I appreciate your consideration and a maximum effort to represent ALL Washington Citizens' best interests.

Please vote no for mandated Covid-19 vaccinations for children to attend schools!
Children continue to be low risk for Covid-19 infection and serious sickness. Also, Covid-19 vaccines are still approved for emergency use only. There is not enough known about the vaccine to make it mandated. And making it mandatory only further divides people on this issue.

Sincerely,
Kathy Townsend

I am NOT okay with the State of WA passing a law allowing law enforcement to detain you indefinitely in a "quarantine facility" for refusing their "medical treatment," I.E., covid shot. It's unconstitutional and against Nuremberg Code to force a medical experiment or detain citizens who refuse it. I am also against forcing the covid shot for school kids.

Leave our kids alone!

The proposed rule giving DOH powers to involuntarily quarantine or inject US citizens is in violation of federal law.

Under Title 21 CFR (Code of Federal Regulations) Section 50.23 & 50.24 It is illegal to exercise coercion when administering experimental medical treatments. Coercing any US citizen to receive medical treatment against their will constitutes an act of domestic terrorism, which is a felony. Any attempted enforcement of such an unlawful rule would expose anyone enforcing it to charges of domestic terrorism. Since the proposed rule will be UNLAWFUL by definition and will also violate WA State Constitution, Article 1 Section 7 - right to privacy - there is only one option. Abolish consideration of such a rule or face criminal charges (Domestic Terrorism and/or Conspiracy to commit Domestic Terrorism).

Good Afternoon Representatives,

I am writing to OPPOSE proposed policies:

That allow local health officers to use law enforcement (WAc 246-100-070) that are aimed to force an emergency order to involuntary detain a person or group of persons (families) to be isolated in quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040).

I am writing to OPPOSE proposed policies:

that would include COVID-19 injections as part of school immunization requirements using WAC 246-105

I am writing to SUPPORT the request to adopt a new rule:

ICWA is requesting the WA State Board of Health adopt a new, permanent Rule prohibiting the Board from adding to the daycare or school requirements any Emergency Use Authorized product or any licensed product formulation which has not yet completed Phase 3 clinical trials.

This new rule request pertains to any and all avenues through which the Board has authority to add medical interventions requirements, including through regular or emergency rule-making.

The rule is needed because: Despite the absence of any FDA licensed COVID-19 vaccine w/ completed

Phase 3 trial studies in children, and despite CDC-acknowledged risks of myocarditis and blood clots, the BOH

has gathered a Technical Advisory Group to examine adding COVID-19 vaccines to daycare & school requirements.

This new rule is needed immediately to ensure that federal EUA regulations are upheld & to protect fully informed consent, which prohibits the use of coercion or undue influence, such as can be exerted by state requirements.

The new rule would affect the following people or groups: All minor children, their parents and guardians in WA state.

Subject: WA BOH – January 12 2022 item - whether to include the new COVID Vaccines on the schedule of requirements for school

External Email

Dear Washington State Board of Health member,

If you mandate it, or recommend COVID19 vaccines be mandated for children, you should personally own a share of the liability for any child injured (you, not the taxpayers). If you are not willing to do this, then you should leave it in the hands of the parents.

I believe it is your agencies duty to provide as much information as possible about the COVID19 vaccinations. An informed agency, an informed Governor and an informed public is vital. The fact that this issue is even being considered by your agency, makes me wonder to what degree the concerns of various experts is even being looked at. And if it is, what degree of merit is it being granted? By refusing or neglecting to cover/address these concerns, one becomes a liability to the public. I'm hoping you choose another path, perhaps one of open debate. We need your agency working with us and for us. We need to work together for the sake of the future.

Sincerely,
Linda Wedin

I have included a couple of examples of things which concern me.

Example One:

Accurate estimates of COVID vaccine-induced severe adverse event and death rates are critical for risk-benefit ratio analyses of vaccination and boosters against SARS-CoV-2 coronavirus in different age groups. However, existing surveillance studies are not designed to reliably estimate life-threatening event or vaccine-induced fatality rates (VFR). Here, regional variation in vaccination rates was used to predict all-cause mortality and non-COVID deaths in subsequent time periods using two independent, publicly available datasets from the US and Europe (month-and week-level resolutions, respectively). Vaccination correlated negatively with mortality 6-20 weeks post-injection, while vaccination predicted all-cause mortality 0-5 weeks post-injection in almost all age groups and with an age-related temporal pattern consistent with the US vaccine rollout. Results from fitted regression slopes ($p < 0.05$ FDR corrected) suggest a US national average VFR of 0.04% and higher VFR with age (VFR=0.004% in ages 0-17 increasing to 0.06% in ages >75 years), and 146K to 187K vaccine-associated US deaths between February and August, 2021. Notably, adult vaccination increased ulterior mortality of unvaccinated young (<18, US; <15, Europe). Comparing our estimate with the CDC-reported VFR (0.002%) suggests VAERS deaths are underreported by a factor of 20, consistent with known VAERS under-ascertainment bias. Comparing our age-stratified VFRs with published age-stratified coronavirus infection fatality rates (IFR) suggests the risks of COVID vaccines and boosters outweigh the benefits in children, young adults and older adults with low occupational risk or previous coronavirus exposure. We discuss implications for public health policies related to boosters, school and workplace mandates, and the urgent need to identify, develop and disseminate diagnostics and

treatments for life-altering vaccine injuries.

RFK, Jr. Testifies Against COVID Vaccine Mandate for Kids in Battle for Health Freedom Down on the Bayou. Dr. Robert W. Malone, a developer of mRNA vaccine technology, recounts his experience earlier this week at the Louisiana statehouse where CHD team members, including Robert F. Kennedy, Jr., testified against adding Pfizer's COVID vaccine to the state's childhood vaccine schedule.

childrenshealthdefense.org

Example Three:

Vaccine Mandates: Unscientific, Divisive, and Enormously Costly

Excerpt: A key takeaway message is that absolutist, rigid COVID-19 vaccine mandates such as that put forth by OSHA are not based on the best possible science. Such population-wide mandates run counter to the universal medical dictum of risk stratification, whereby treatment is tailored to individuals based on individual risks and benefits to be accrued. They also violate the dominant philosophy of evidence-based medicine, which requires the use of the best possible study designs as evidence when making decisions about patient care.

Vaccine mandates, which are enormously costly and terribly divisive, are a cure worse than the disease, and without solid evidence, they are likely to increase vaccine hesitancy rather than vaccine confidence. Not just for the Covid vaccines, but also for existing lifesaving vaccines against for example measles and polio

<https://brownstone.org/articles/vaccine-mandates-unscientific-divisive-and-enormously-costly/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fbrownstone.org%2Farticles%2Fvaccine-mandates-unscientific-divisive-and-enormously-costly%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cd94856755446424e9e4408d9d214bd2f%7C11>

Vaccine Mandates: Unscientific, Divisive, and Enormously Costly □Brownstone Institute

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fbrownstone.org%2Farticles%2Fvaccine-mandates-unscientific-divisive-and-enormously-costly%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cd94856755446424e9e4408d9d214bd2f%7C11>

Simply put, the very best scientific study design currently available to mankind was not used to answer the most important outcomes, and the randomized trials do not support the widely held contention that COVID-19 vaccination using the Pfizer or Moderna brands lowers risk of death. This is unfortunately not the first time that FDA has approved a product based on a less important surrogate end ...
brownstone.org

Example Four:

A recent speech by Dr. Robert Malone

My name is Robert Malone, and I am speaking to you as a parent, grandparent, physician and scientist. I don't usually read from a prepared speech, but this is so important that I wanted to make sure that I get every single word and scientific fact correct.

I stand by this statement with a career dedicated to vaccine research and development. I'm vaccinated for COVID and I'm generally pro-vaccination. I have devoted my entire career to developing safe and effective ways to prevent and treat infectious diseases.

Before you inject your child - a decision that is irreversible - I wanted to let you know the scientific facts about this genetic vaccine, which is based on the mRNA vaccine technology I created:

There are three issues parents need to understand:

- The first is that a viral gene will be injected into your children's cells. This gene forces your child's body to make toxic spike proteins. These proteins often cause permanent damage in children's critical organs, including
 - ☐ Their brain and nervous system
 - ☐ Their heart and blood vessels, including blood clots
 - ☐ Their reproductive system
 - ☐ And this vaccine can trigger fundamental changes to their immune system
- The most alarming point about this is that once these damages have occurred, they are irreparable
 - ☐ You can't fix the lesions within their brain
 - ☐ You can't repair heart tissue scarring
 - ☐ You can't repair a genetically reset immune system, and
 - ☐ This vaccine can cause reproductive damage that could affect future generations of your family
- The second thing you need to know about is the fact that this novel technology has not been adequately tested.
 - ☐ We need at least 5 years of testing/research before we can really understand the risks
 - ☐ Harms and risks from new medicines often become revealed many years later
- Ask yourself if you want your own child to be part of the most radical medical experiment in human history
- One final point: the reason they're giving you to vaccinate your child is a lie.
 - ☐ Your children represent no danger to their parents or grandparents
 - ☐ It's actually the opposite. Their immunity, after getting COVID, is critical to save your family if not the world from this disease.

In summary: there is no benefit for your children or your family to be vaccinating your children against the small risks of the virus, given the known health risks of the vaccine that as a parent, you and your children may have to live with for the rest of their lives.

The risk/benefit analysis isn't even close.

As a parent and grandparent, my recommendation to you is to resist and fight to protect your children.

Dear WSBOH,

Please do not move to make Covid 19 vaccines mandatory for all Children to attend school or daycare in Washington State. Children still have the lowest death rate for Covid-19 and these vaccines are still only approved under emergency authorization. This would be a mistake and potentially be more dangerous to children who have little risk of hospitalization and death from the Covid-19 virus.

Subject: WA State Board of Health Vaccine Mandate Review

External Email

Dear Board of Health Members-

I am a mother of two high school boys and an active member in my public school and community in Seattle. I am writing to share my thoughts regarding a COVID vaccine mandate in Washington.

My kids have received every childhood vaccine on schedule. After some research I chose to give them the HPV vaccines as well. I'm leading with this because I would like to clarify that I am not anti-vaccine. The pejorative label 'anti-vaxxer' given to anyone not interested in the Covid-19 vaccines is misguided and inappropriate. I have not discouraged my family members or friends from getting the Covid-19 vaccine or subsequent boosters. I believe it is their choice and also there may be some benefit to people over age 70 and to my sister with severe asthma. I have no interest in campaigning against the vaccine but I stand strongly against a vaccine mandate.

It's very obvious that the vaccine will not prevent COVID infection or transmission, failing one of the qualification criteria for mandated vaccines set forth by the Board of Health. I listened to the Zoom meeting last week and that was point number one. The vaccine does not prevent disease so this should be a full stop. Even if you move beyond that to weigh the safety/side effects against risk of disease, the numbers don't add up for children or most people under age 70 with no co-morbidities.

The second point was disease burden criteria. There is no significant threat to children and the vaccine does not reduce risk of transmission. Again, this should be a full stop as it now fails points one and two.

Last month, several vaccinated students had Covid and infected most of the basketball team at our high school. My son was testing every few days so we knew he did not have Covid but the vaccinated players were not required to test. Eventually my son got Covid, as did our whole family over Christmas. We all had mild cold/flu symptoms for about 3 days and tested negative a week later. We know several people boosted and otherwise who are getting the new variant, which means a vaccine for an old variant from two years ago makes absolutely no sense to mandate – especially to an age group that has almost zero risk.

While the majority of vaccine recipients suffer no adverse effects, there have been reports of issues such as post-vaccine myocarditis that must weigh heavily on the decision to mandate this vaccine. Young males are at a higher risk for some reason and those who already contracted the virus have a 2-4 times higher risk of adverse events from the vaccine. My family cardiac history (including my own cardiac abnormality) puts my own sons at a higher risk for an adverse reaction as documented on the CDC's own website. (I'm happy to provide links to all of these studies but surely you are researching this yourselves.) More and more data indicate that the risk of myocarditis is far higher than we previously realized. Risks of myocarditis, pericarditis, and cardiac arrhythmias associated with COVID-19 vaccination or SARS-CoV-2 infection (Risks of myocarditis, pericarditis, and cardiac arrhythmias associated with COVID-19 vaccination or SARS-CoV-2 infection | Nature Medicine

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nature.com%2Farticles%2F5021-01630-0&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cd5d923443d15405356ae08d9d20e0b86%7C11d0e2172>).

The benefits of the vaccine must outweigh the risks and we don't have enough data to show benefits to healthy children. We also do not have long term safety data available for this vaccine. 28.1% of children between the ages of 5-11 in Washington have initiated vaccination. Only about 20.0% of children in this group are fully vaccinated as of today. 51.2% of children 12-15 are fully vaccinated and 59.2 of 16-17 year olds are fully vaccinated. I think this demonstrates that this vaccine is not accepted by the public, especially to parents of younger children.

Thank you for your time and I hope you take parents' comments about this topic very seriously. We all want the best for our children. Please do the right thing and do not mandate this vaccine.

Sincerely,

Heidi Taft

Subject: Vote Against Covid Policies

External Email

To my elected officials,

I am completely against any of the proposed Covid policies that are over reaching and immoral. I stand against WAC's: WAS 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

I am against a covid 19 vaccine requirement for schools. There is still too much to learn about the vaccines and the virus to force a vaccine upon the least vulnerable age range. There are too many unknown possible adverse effects to the bodies of our next generation.

There are many groups of children who's bodies can not take a vaccine. We advertise a country that is open to all which includes those with religious beliefs that don't tolerate a vaccine. We would be excluding more children than protecting.

The cost is so high in expense: time off work to get the multiple required shots, expense on medical facilities to administer it, time away from school to get multiple shots, time and money spent on administration costs just to keep up with the paperwork, so many possible side effects that will detract from school and work and on and on.

Please vote "no" on this law. Give it more time.

Take Care,
Julie Roulst

Subject: Vote AGAINST vaccines for school age children

External Email

Hi Christy Hoff,
My name is Carol Linden.
I'm asking you to vote AGAINST requiring vaccines for school age children!
I'm sure you are aware of the handling of the Covid-19 outbreak in Sweden in 2020.
The children went to school, wore NO mask, did not social distance from their friends and lived as normal as was possible and NO child died of Covid-19 between the ages of 0-15!
ZERO! NO CHILD DIED!!!
I'm emailing you because I represent thousands of people in Washington State who will not email you or write to you.
Our voice is not being heard.
I'm asking you to listen and vote NO to requiring vaccines for school age children in Washington State.
Thank you for your time.
Carol Linden

Subject: WA Immunization for K-12

External Email

Dear Washington State Board of Health,

Urging the committee to refrain from approving a COVID immunization requirement until more time has elapsed and long-term effects can be determined. Over the course of this pandemic it has been seen that Covid does not seriously affect most young people. Perhaps that risk is lower than the risk of the unknown long-term effects of the vaccine. Please give it more time.

Thank you.

Matthew Smith
Parent of an 8th grader and 12th grader in Washington State

Subject: WA State Board of Health January 12 meeting. A citizens concern

External Email

To whom it may concern,

I want to register my opposition to mandating any kind of medication for any of our children that is in emergency use. I also want to say that never in my 67 years of life did I have to make apologies for not giving my kids certain vaccinations.

It is unconscionable to even consider the COVID-19 shot mandate for children, ever!

I have done a lot of research, listen to many doctors, and I have good understanding that children should not be vaccinated with an emergency use shot that has not been tested as yet on children.

All of the indications I have seen through the CDC, through Fauci himself, and through the FDA, also indicate that children should never be mandated an emergency shot that has not been given full testing.

I oppose the formation of a technical advisory group. It's unnecessary.

I support choice. And I only support choice in the vaccines once there is full disclosure on side effects and the results of testing on children is completed.

I further request that the school board establish a rule that prohibits them from adding any emergency use authorization product, or any licensed product that lacks complete phase 3 trial studies.

Our children are not guinnie pigs.

Thank you for listening to my requests.

Sincerely,

KATHY

Executive Assistant

I can do all things through Christ who strengthens me. Philippians 4:13

External Email

To whom it may concern, you unelected bureaucrats,

I am a FREE citizen and lifelong resident of Washington. I reside in Spokane County. I am one of your bosses. I am not your servant, peasant, subject, peon, or inferior.

I have a multitude of questions, serious, important questions, and a lot to say about the way people employed by the government of Washington have begun to believe they are the rulers of the citizens of Washington, have come to the completely mistaken and wicked belief that they are entitled to make private, medical decisions for the citizens of Washington and the children, and that they have the right to coerce, compel, and force the FREE citizens of Washington to do anything, especially anything that violates a free human being's bodily autonomy.

I OPPOSE WAC 246-105 (You may NOT allow Covid-19 injections to be added to school immunization requirements.)

I OPPOSE WAC 246-100 (You may NOT allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040).).

I do not agree that these WACs should be modified, changed, or altered in any way to add any language referring to COVID-19 or coronavirus or any of the variants.

I DEMAND that you tread lightly and remember that We The People are free, sovereign human beings with the right to speak and move freely, amongst other things. You have no right to violate our rights, freedoms, or bodily autonomy. Anything you do while being paid by the taxpayers of Washington must be with the full awareness of our rights and zero treading upon them.

My first question, a 2 parter, which you MUST address: When did you become the rulers/bosses/parents/supervisors/kings/queens/lords/stewards of the citizens of Washington? And when did WE the People abdicate our rights and freedoms to you?

If your answer is anything but "NEVER" and "NEVER" then you should resign in shame immediately. How dare you believe, even for 1 second, that YOU have any right whatsoever to dictate anything to the free citizens who have chosen to live in Washington? WE are YOUR bosses. WE pay your salaries. You are supposed to work for us. We are not peasants, subjects, peons, slaves, indentured servants, children, minions, inferiors, etc. We have the right to make our own decisions. You have ZERO right to impose your wicked ideas on us, to force, coerce, threaten, chide, compel, or anything. If you cannot remember these things then resign right now. You have no business being in "public service" if you cannot remember YOU SERVE THE PUBLIC. As the publicly funded website for the Board of Health says, "the State Board of Health has served the people of Washington for 132 years." SERVED THE PEOPLE. It does NOT say "ruled the people." Further, it says you "promote policies that protect and improve the public's health." Promote does not equal "coerce" or "force" or "rule." Maybe you should refresh your memories and remember your places (that would be beneath the people who are your bosses, by the way).

We elect representatives to a legislature where they discuss, write, take opinions on, debate, and vote on laws. We did not elect career bureaucrats to create rules, regulations, or demands on the people. If you have not been elected to a legislature then stop thinking you have any right to force your notions upon us. No rules/regulations without representation. If you are in the legislature, then it's time to remember YOU WORK FOR US. You have no business creating and passing laws that violate our freedoms and rights. If you cannot remember this, then resign in disgrace. I do not care if the legislature "grants you powers." They only serve with the consent of the governed and we do not consent to be experimented on, to be ruled by unelected (or elected) power-hungry fascists or give up our rights, freedoms, and bodily autonomy. WE DO NO CONSENT.

WE ARE IN CHARGE, not you. You have ZERO right to violate my bodily autonomy, make medical decisions for me, force me to inject ANYTHING in my body, deny me entrance to publicly funded spaces, force me to wear fabric on my face, coerce me to inject anything into my body, coerce me to wear fabric on my face, etc. etc. etc. As a free human being, I get to decide what I inject into my body, what I wear, and where I go. My tax dollars pay for publicly funded spaces and if you want to deny me entrance to anything my money pays for then I want all of my money back and I will no longer pay taxes. Such things are literally discrimination, segregation, and immoral. I will not share my private medical choices with event staff, clerks, government officials, or to enter establishments, public or private. My private medical records are MY BUSINESS ALONE. If you think forcing people to share their medical records with others is acceptable, then you better be ready to put your own medical records out in public view immediately so we can all have a look and make decisions on what you are allowed to do, what you must inject, the behavior you are no longer allowed to engage in, etc. Further, if you want to coerce us into sharing this medical decision, then it's only fair that everyone's every medical decision be public record. Promiscuous? Then we want to see if you have STDs before you can be in public. A drinker or smoker? We get to dictate what you get to do in life. A drug user? We get to make decisions for you, too, and share everything publicly. Or maybe you should back this runaway train up and remember you serve free citizens who have the right to private medical records.

Second Question: When did the free citizens of Washington give their children to you to raise? Why do YOU think you have the right to dictate other people's children's medical decisions? Children belong to God and with their parents. They do not belong to the governor, the attorney general, legislators, school principals, babysitters, cousins, neighbors, store clerks, or you, unelected, arrogant, power-hungry bureaucrats. You have NO RIGHT to decide what is injected into other people's children. Parents have the responsibility to make decisions for their children.

COVID-19 is really not much of a threat to MOST people and it's even less of a threat to children. According to the CDC's best estimate of the infection fatality rate for individuals ages 0-19 is 0.00002, meaning 99.998% of children survive it. Why on earth do they need to be injected with things which have no long-term studies or trials? These shots have barely been around for a year and you cannot possibly argue that a year or 2 suffice as "long-term." It is horrifying that you are even considering making experimental shots mandatory for anyone, let alone children. Other immunizations (which actually IMMUNIZE, unlike the COVID "vaccines") were tested for a long time before they were used and were available for a long time before anyone considered making them mandatory. As COVID primarily impacts the elderly and the ill, it is unconscionable to demand children be forced to get injected with these experiments. Please refer to this article and many others like it for more information, as apparently you are completely ignorant of reality: <https://www.tabletmag.com/sections/news/articles/covid-vaccine-mandates-kids-legal>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.tabletmag.com%2Fsections%2Fnews%2Farticles%2Fcovid-vaccine-mandates-kids-legal&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C1a1d813a1fa742ccaafc08d9d205b303%7C11d0e>

Currently, as I am sure you must know, there is no COVID-19 "vaccine" available in the United States outside of ones approved only under the Emergency Use Authorization, which is only possible if there are no therapeutics available to treat something. As we all know, there are therapeutics available to help fight COVID-19. I believe you cannot mandate these shots as long as they are under the EUA. And, as you know, "Comirnaty" is not available in the United States so you cannot mandate children be forced to get the EUA injections. Or anyone else, for that matter.

To quote the article above at length:

"In 2004, under Section 564 of the Food, Drug and Cosmetic Act, 21 U.S.C. § 360bbb-3, Congress permitted the FDA to grant EUAs so that any American in a personal emergency can choose whether or not to explore potentially lifesaving treatments that have not gone through the full testing regime. In other words, the legal basis for EUAs is a matter of the individual right to access experimental treatments, not of government right to compel such treatments. EUA products, by definition, have not yet been proven safe and effective according to FDA standards.

Indeed, Congress has recognized that Americans should not be forced to take medical products that have not been deemed safe and effective by the federal agency charged with the power to to decide. The same federal statute that authorizes EUA products also requires, among other things, that potential recipients of such medications be informed "of the option to accept or refuse administration of the product, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks." According to a plain reading, individuals have a statutory right to "refuse administration" of a vaccine approved only for emergency use. The language leaves no doubt that Congress intended for any decision to take such products to be made free of coercion, pressure, or duress. A city or school system that withholds children's access to education, extracurricular, and recreational activities—all crucial to their cognitive and emotional development—violates both the letter and the spirit of the statute."

I read this and think you should read it, too (or read it AGAIN): 'As the Technical Advisory Group stated during their meeting on December 29th, in order to amend Chapter 246-105 WAC "the vaccine (Covid vaccine) containing this antigen must PREVENT disease(s) that have significant morbidity and/or mortality". CLEARLY, these COVID "vaccines" DO NOT PREVENT TRANSMISSION. We were told repeatedly, by the CDC, Biden, and the rest of the snake oil salesmen, that these "vaccines" would 100% prevent you from getting or transmitting COVID-19. That was obviously a bunch of lies. Numbers show that highly "vaccinated" places are seeing massive surges of "cases." Masks also do not stop transmission (DUH) either and we do not consent to be muzzled. The only point of mandating these shots which do not prevent transmission is to control free human beings and force them to do as you "command." NOPE. We do not consent.

There are no Washington laws which give you the authority to mandate citizens must take an medication or have any medical intervention. Such a thing is so far out of your purview that you should never show your face again in public if you think you have even a tiny, infinitesimal "right" to do so. Requiring these untested "vaccines" for children is outside any law as well. Such decisions belong solely to parents/guardians and children. As the article says, "The Ninth and 14th Amendments to the United States Constitution protect the right of individuals—both children and adults—to bodily integrity and to decline unnecessary medical treatment."

Further, Natural Immunity is an important, long-studied scientific fact which those in the "health" field, in their haste to seize control and impose their own wills upon free citizens, have decided to pretend doesn't exist. Do you force those who have had chicken pox or measles, etc., to get the actual vaccines for these diseases? Do you force them to get "booster" shots? No, you do not, as such things would destroy the natural immunity which does a better job than anything created in labs. Since the COVID "vaccines" do not immunize anyone, you have no reason to coerce, compel, force, or mandate anyone into getting these shots. You have no moral, ethical, scientific, or legal standing to do so. If you think you have such rights, then please be aware that others can use the same arguments to dictate their beliefs in the future. Most Christians do not believe in sex before marriage and a case could certainly be made that engaging in such promiscuous behavior has consequences that hurt society at large, which would mean the government should be able to force interventions on those who think they have the right to decide who they sleep with. Etc. If you want to open that door, we're happy to make sure everyone in this Godless state is living pure, holy lives.

As we do not know the bodily consequences these "vaccines" might have long-term, it is unconscionable that you would even consider mandating them for children (or anyone). We cannot have any idea how their developing bodies might be hurt by these experimental shots. Are you prepared to be sued, as a "board" and as individuals by parents whose children are damaged by something you ordered before long-term studies can possibly exist? You will be morally, ethically, and, hopefully, criminally/monetarily/civilly held liable for any consequences if you mandate these for children. If you have half a brain amongst you, then you will step back, remember your place, and wait a decade or more to see how things go. Parents/guardians have the sole rights to make this decision for children. NOT YOU.

Under Jay Inslee's hateful guidance, government workers have arrogantly decided they have the right to dictate to the free citizens of this state, to discriminate, segregate, violate bodily autonomy, and threaten, coerce, force. We live in the United States of America and as Americans, we are FREE. We have the sole right to decide what medical "treatments" are injected into our bodies. We have the right to move freely, at will, to speak freely, to assemble, and to get rid of all governments which violate our rights. You are employed by the citizens of Washington. You better remember your place. You may provide suggestions and we are free to ignore them. There is not one medical treatment

or medicine which every single person needs. Not one. We do not force healthy people to have chemotherapy or take heart medication (malpractice, anyone???). We do not put casts on unbroken legs. Why on earth would you think everyone should get these experimental shots? You have no idea what consequences many people will face due to your immoral, unethical coercion. You may recommend people get these experimental shots. You may NOT demand, force, coerce, pressure, threaten, or mandate them. In the last two years, you have created a hateful, divisive, cruel society where you segregate people based on their personal medical choices. You tell them they are less than, vectors for disease, and evil, when they are not. You lock them out of society and foment hatred against them. Is it any wonder that there have been so many more opioid overdoses and deaths, more domestic violence, more suicides, more hopelessness? YOU have contributed to these deaths and despair. YOU. And yet you cruelly continue to divide and subjugate us. If you care about the health and well-being of all Washington citizens (what a laugh!), then you should be concerned with all of those people. Vastly higher numbers of people have been affected by those things than by COVID-19 but you have ignored them at our peril. You have failed to encourage therapeutics, exercise, and healthy eating to prevent COVID and other things. You have locked people inside, kept them away from co-workers and loved ones (gathering strengthens immune systems, obviously, so it's interesting to consider whether you purposefully crafted policies which forced people to weaken their immune systems), and tried to keep them frightened.

Government is instituted by the people, for the people, to make life better for the people, not to rule the people. Free people cannot be compelled by any government or business or person to violate their bodily autonomy. Do you know what we call it when a person uses force or coercion to violate another's bodily autonomy? RAPE. We call it rape and it is immoral and evil. You have no right to violate our bodily autonomy or our children's bodily autonomy. We do not consent to any violation of our bodily autonomy. We do not consent to being locked out of society. We do not consent to be ruled by bureaucrats.

If you are a doctor, you have presumably taken an oath to "do no harm." Yet, in the last two years, you have crafted policies which have done immeasurable harm. You have kept people frightened, alone, and you should be held accountable for these things. Time to remember your oaths and step back from committing evil against the free citizens of Washington. You continue to abuse power loaned to you by the legislature, which only has power because it is loaned by the people. We do not consent to be abused, manipulated, frightened, coerced, forced, threatened, segregated, discriminated against, or locked out.

Perhaps you should spend some time learning more history so you can see how those who violated bodily autonomy and freedom are remembered. Many were put on trial and faced severe consequences for their evil actions. You have the choice to violate freedoms or to step back and recognize you have no such powers on this earth. For example, you should read the Nuremberg Code and why it was instituted in the first place. Never in history have the good guys been the ones coercing, forcing, threatening people with injections. So perhaps you might recognize which side you are currently on here. (Not the good guys, obviously.)

Nuremberg Code:

1. The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the experimental subject there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health

or person which may possibly come from his participation in the experiment.

"The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs, or engages in the experiment. It is a personal duty and responsibility which may not be delegated to another with impunity." (This means each of you individually is responsible for ascertaining the consent of the people, as in each person you think should be forced to have these experimental shots, and if you force/coerce/threaten, then you are individually responsible for the consequences. You cannot say it was a group decision or you just went along with others. You are complicit and morally, ethically responsible.)

Hello WSBOH,

Contrary to popular belief, many Americans are actually opposed to the vaccine mandate. Morally, the vaccine should be made available to those that want it, it should be an option and not a requirement. America is the most diverse country of different races, ethnicities, religions, etc. We have to respect other people's decisions but it should not a large impact that this vaccine mandate has on the whole country. Many of our ancestors and even ourselves come to America for what it's known for, freedom. America is the last of its kind and we Americans see it slowly fading away as we try to fight for it back.

We all have seen the consequences of the vaccine mandate. Many small businesses had to close while the big corporations were allowed to stay open. The WSF had plenty cancelled sailings along with crew shortages. Also, the recent snow storm left many stranded and in unsafe driving conditions. The list goes on and on; and it would really be ignorant to deny it. The Washington people openly see the lies and know that all these issues are due to the vaccine mandate.

With the vaccine, it does not lessen symptoms, it does not prevent or minimize chances of transmission, and it does not 100% protect you from it (virus). I personally contracted the virus from my father who is fully vaccinated, who also contracted it from his fully vaccinated coworker. I am happy to have natural immunity to the virus because it is the real and most accurate type of immunization.

It's been over two years with the virus, it was said to us that it would only take 15 days. The masks were supposed to go away once a vaccine was created. It's been two years, we Americans are becoming offended that we are thought to comply to their obnoxious mandates that has no sense in them at all.

Myself, along with many others are proud to be American. Freedom is America and America is Freedom. Vaccine mandates are neither.

Hoping for your kind consideration,

Michelle Gaudiel

I am a K- 12 educator in WA State and have been instructing students for 40 years.

I'm writing to you about the agenda for the January 12, 2022 meeting.

I am in opposition to the following:

- 1) Any involuntary isolation/quarantine of people as described in parts of WAC 246.100;
- 2) Any mandate on COVID vaccines for children as a requirement to attend K-12 public schools.

Sincerely,

Leslie Drury

To whom it may concern,

Myself and my family are completely against any of the proposed COVID policies that are completely overreaching, unethical, and are violation of Human Rights, the Constitution and anything the United States of America the home of the land and the free stand for.

We stand against these proposed policies:

WAC 1. Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from (WAC 246-100).

2. Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

I asked you to please deny and strike now and going forward these policies and those related to it.

I also ask that you consider reviewing the Nuremberg code.

Thank you for your time and consideration,

Jina

Subject: WA State DOH meeting on 1/12

External Email

To whom it may concern,

I am a Pierce County resident writing to you regarding the January 12th meeting of the WA State Board of Health.

I am asking that you DO NOT add Covid-19 to the current infectious disease list applicable to WAC 246-100-045, WAC 246-100-940, WAC 246-100, WAC 246-105. I believe these proposed policies to be a vast overreach; I believe that these policies violate our rights as American citizens, and that they come against medical freedom. We must continue to allow individuals to choose what is best for their individual bodies, as well as the bodies of their children.

I especially oppose adding the Covid-19 gene therapy (referred to as "vaccine") to the list of requirements for children to enter public school, based on the following reasons:

1. The long term safety is unknown.(!)

2. What IS known is that the spike protein migrates to various places in the body, causing a variety of conditions, as seen in the increase in myocarditis, pericarditis & nervous system issues.

3. Children are not at high risk of dying from the disease.

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.sciencedirect.com%2Fscience>

4. Immunity from these shots is waning, but immunity from natural infection is not. Evidenced by the need to give boosters in less than a year, while people are still contracting Covid.

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F1>

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Facademic.oup.com%2Fcid%2Fadvances%2Fdoi%2F10.1093%2Fcid%2Fciab884%2F6381561&data=04%7C01%7Cwsboh%40sboh.wa.g>

5. "Vaccinated" children can still spread the disease to others.

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F1>

6. Pre-pubescent medications often have unexpected impacts on various body systems, and so they need to be well studied prior to approval & administration to our youth population. This shot has had no long-term safety studies.

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.sciencedirect.com%2Fscience>

7. The effect on reproduction is unknown. What IS known is that these shots often affect women's menstruation, and menstruation affects fertility.

8. There is another way. There are many other treatment options available.

The negative impact that this would have on our children VASTLY outweighs the possible benefits. Where there is risk of injury, there must be personal choice.

Please do what is right for the future of Washington & more widely, America.

DO NOT add Covid-19 to this infectious disease list.

Thank you for your time,

Melody Robinson

Dear Board of Health Members,
I am writing to you to NOT implement any policies that utilize tyrannical actions, Involuntary quarantines, testing, treatment, counseling, and vaccinations And white will be a failed attempt to contain Covid-19. This virus will never be contained, it is a part of our world now. The only real defenses against it or reducing Co-Morbidities and allowing therapeutic treatment development. These vaccines are only good for short term and it is a proven factor they do not stop transmission or infection. If our healthcare systems are stress due to Covid patients, it is only because hundreds of qualified healthcare professionals were unnecessarily terminated from their jobs, mini with natural immunity and due to that there are not enough people to provide care. We are now seeing hospitals allowing healthcare workers to continue to work having covid due to the shortage of health care workers which you placed on our health care systems by terminating them. Please do not implement any actions that will only hurt, divide, anger your fellow citizens and it will do nothing to reduce the spread of this disease.

Subject: VOTE NO to Mandate

External Email

I wanted to send in my opposition to the proposed Covid policies that will be discussed on January 12th, 2022, in a meeting at the Washington State Board of Health.

The proposed isolation of non-complying individuals and families into State Facilities who refuse to comply with requests for medical examination, testing, treatment, counseling, vaccination, including the Covid-19 injections as part of school immunization requirements, is reprehensible and unconscionable.

It is very evident after a year of Covid-19 vaccinations, that they are having the opposite effect. There are 24 Covid patients at Central Washington Hospital in Wenatchee, WA on January 6th, 2022,

(<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.confluencehealth.org%2Fpatient-information%2Fwhat-you-need-to-know%2Fwith&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C140e720366a0480ee64908d9d1fdc1a>)

eleven of them are partially vaccinated and 13 fully vaccinated. If the vaccines are more effective than natural immunity then why are the hospitals full of people who've taken the experimental gene therapy? It is clear that God-given natural immunity is superior to man-made gene therapy, yet these rules being proposed would punish those who believe in natural immunity.

Please vote NO on anything that takes away the liberty our founding fathers fought and died for in the founding of this great country!

Sincerely,

Kelly Pearl

God Bless all those confluence workers who faithfully served BY YOUR SIDE during this pandemic that got tossed to the side with no mercy or understanding. Remember to never forsake mercy and kindness to people. That's what confluence health SHOULD STAND FOR.

Subject: Wa state covid mandates

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>))

A Covid-19 vaccine mandate clearly does not pass the 9 criteria required when Reviewing Antigens for Potential Inclusion in WAC 246-105-030. My lack of support for a mandate stems from the following criteria not being met under sections II and III on the list of criteria:

II. Disease Burden Criteria

5. The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population.

- The vaccine has been directly available to every vulnerable sub-set of the population for some time.

6. Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting or activity being given the highest priority.

- It is widely proven that vaccinated individuals can and do continue to transmit the virus. We know this because this was the science used to justify mask mandates. Masks are mandated in schools already, regardless of vaccination status, to prevent the vaccinated from transmitting the virus.

III. Implementation of the Criteria

7. The vaccine containing this antigen is acceptable to the medical community and the public.

While the vaccine may be acceptable to the medical community (although we will note that even within the medical community, the vaccine adoption rate was not acceptable enough to preclude a forced mandate), we cannot gloss over the fact that public acceptance does not even represent a strong majority.

- Under 51% of Spokane County residents are vaccinated. (srdc.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C>)
- Less than 40% of kids 12-17 are vaccinated. (srdc.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C>)
- Only 36% of the entire black community in Spokane County is vaccinated, and it is reasonable to assume this number is far lower among ages 12-17. A vaccine mandate in schools would disproportionately affect students of color in our community. (srdc.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C>)

8. The administrative burdens of delivery and tracking of vaccine containing this antigen are reasonable.

- Our administrators and nurses have already given feedback that a vaccine mandate would create an unreasonable and insurmountable administrative burden involving tracking.

9. The burden of compliance for the vaccine containing this antigen is reasonable for the parent/caregiver.

- As stated in the above vaccination statistics, parents are choosing not to vaccinate their children. Forcing them to do so (as with other segments of our society who were coerced under the threat of losing their jobs and livelihoods) does not fall within a reasonable burden of compliance. It does not seem logical to vaccinate a group (ages 0-19) with such a low, even insignificant, rate of hospitalization or death, while claiming that will protect a more vulnerable group (ages 50-90) with a dramatically higher rate of vaccination (between 62%-82% based on age). Thusly, our state would propose forcing vaccination on those who do not need it, to protect those who already have it and/or could easily get it.

The vaccine is widely available to any age group now. Vaccination rates reflect individual health choices that must be protected. We have to acknowledge that individuals can make their own health decisions for themselves and their families. There simply is not a case to be made for forcing someone to get vaccinated to protect someone else who can easily get vaccinated themselves.

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Hello Washington State Board,

My name is Kristine and I am emailing to voice my concerns with the upcoming meeting in WA Board Health Meeting.

Please do not enforce a vaccine, or any health mandate on the people. The vaccine does not prevent the spread of the COVID virus, and it should remain an individual choice to be vaccinated or unvaccinated.

Those who do want the vaccine, can easily get it, and spare themselves the greater risk from the virus. It should be a choice for those who do not wish to be vaccinated, to refrain from getting the vaccine, or any health care they wish to decline.

Do NOT impose a mandate for "conditions and principles when isolating or quarantining a person or group of persons in accordance with WAC 246-100-040

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FWAC%2Fdefault100-040&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cd9271edc2d2e4b71ad0208d9d1ffe1a9%7C11d0e217>100-040&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cd9271edc2d2e4b71ad0208d9d1ffe1a9%7C11d0e217

Protect our freedom of choice.

Washington State Board of Health Members,

I wish to STRONGLY OPPOSE allowing local health officers to use law enforcement (WAC 246-100-070 <tel:246-100-070>) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045 <tel:246-100-045>) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040 <tel:246-100-040>). These specifics come from WAC 246-100 and including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

The government has no right to force anyone to take anything into their bodies they do not choose to take. This idea is equal to the taking of God-given freedoms in Nazi Germany. It also is criminal to punish or detain anyone for their choice of medical freedom. Reference the NUREMBERG Code! A Quarantine facility where people are forced to stay is absolutely wrong, especially in the face of the Covid disease and its variants which only have a tiny fraction of risk of death to the average person. Even those with comorbidities have a very high chance of surviving this virus. Several of my friends ages 40 up to 75, (all unvaccinated), some with several comorbidities have had Covid (including Delta variant) have all survived. Our God-given natural immunity kicked in and we successfully navigated the disease and are now stronger for it. Allowing people's natural immunities to fight this virus is the ONLY way to reduce its strength. The mRNA vaccines are EXPERIMENTAL and should not be forced on anyone, period! These vaccines have been proven to carry more of a health risk than getting Covid! Look at the VAERS reports!

Also, I have the same opinion about not mandating children to be vaccinated against Covid. Almost ALL children survive the virus as easily as the common cold or flu virus. Again, these vaccines are EXPERIMENTAL and have not yet proven to be safe! Heart, nervous system, and other systems in the bodies of young people receiving these vaccines are being affected in atrocious ways! The risk FAR OUTWEIGHS any benefit! It is truly WRONG to mandate these vaccines when natural immunity is very effective against this virus!

Please accept my concerns and recommend AGAINST these proposals being presented.

Sincerely,
Pamela Coffell

Re: Jan. 12th WA State Board of Health Meeting

Agenda Item #8:

I VEHEMENTLY Oppose the addition of Covid vaccines to the child/school entry list of products. The DoH only began the evaluation process to evaluate the added shot on 29-Dec-2021. No vote will be taken at this meeting to add the shot, but comments on this topic are needed.

Agenda Item #11

I strongly Support this Petition to change 246-105 WAC that would prohibit the Board of Health from adding any product to a mandated list unless its successfully completed Phase III trials for proper licensure and approved by the legislature.

Linda Ryan

<mailto:claminator@gmail.com> > wrote:

THIS IS NOT OK. Talk about taking freedoms away and weaponizing the department of health and going full-on communist/nazi.,

What you are now proposing are deterrment camps JUST LIKE DURING WWII that the Nazi's AND OUR OWN GOVERNMENT DID. NEVER in the history of our great nation have the healthy people been detained because those who are ill are afraid. We still have God given rights over our own bodies. If you think this is okay then you need to fully come out of the closet as a full-on communist/nazi. But to treat the taxpayers of Washington state in this manner is a slap in the face. Government cannot control a virus that has been released on purpose. Government cannot regulate itself into health.

How about promoting healthy eating, exercise instead? Have any of you ever considered that as an option?

And giving kids the covid-19 so-called "vaccine" to children is proving more and more to be a detriment to their health including death.

I strongly urge to vote NO on weaponizing the department of health and law enforcement.

This was the email sent from another mom (Brenda Gingerich)

and it is exactly what I would have written. I have copied and pasted this letter to address my concern with this matter as well.

To whom it may concern:

I am writing to ask you to vote against all vaccine mandates. Vaccine mandates violate fundamental human rights, notably the right to prior, free and informed consent for medical interventions. In a free society, everyone should have complete power and control over their own bodies. I urge you to do all in your power to ensure a return to the democratic principles upon which this country was founded. Especially, when the chances of survival from COVID is 98.23% for adults and even higher for children at 99.985%.

I realize your role is to maintain the legislation that “it is necessary to protect the health of the public and individuals by providing a means for the eventual achievement of full immunization of school-age children against certain vaccine-preventable diseases” (RCW 28A.210.060

<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx?_id=6789&context=1
through 28A.210.170

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx>). Furthermore, your responsibility is to make decisions for public health for the

"immediate preservation of the public peace, health, and safety, the support of the state government and its existing public institutions" (1979 ex.s. c 118 § 13

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fleg.wa.gov%2FCodeReviser%2Fdof>
). Unfortunately, the current inoculations have not proven to protect the public from

transmission or infection of the Covid-19 virus . The inoculation concoctions still have an EUA status and have not completed Phase III safety trials. EUA products are, by definition, experimental and thus require the right to refuse. Under the Nuremberg Code, the foundation of ethical medicine, no one may be coerced to participate in a medical experiment. No healthy adult or child should be injured or die from a vaccine imposed upon them by their government.

What we know now about COVID-19 and children:

* Almost 100% of kids don't suffer from severe COVID

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fservices.aap.org%2Fen%2Fpages/novel-coronavirus-covid-19-infections%2Fchildren-and-covid-19-state-level-data-report%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C4a5ea3fb2e45484c61f408d9d2147730%7C11>. In fact, many have no symptoms at all. Thus, they may have already had COVID which

is another excellent reason not to get the vaccine.

* The World Health Organization

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.precisionvaccinations.com%2Fsays-children-should-not-receive-covid-19-vaccines&data=04%7C01%7Cwsboh%40sbh.wa.gov%7C4a5ea3fb2e45484c61f408d9d2147730%7C11d0>
(WHO) has announced that young people should not take the vaccine.

* A concerning number of young people

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdeconnecticut-teens-hospitalized-heart-problems-covid-vaccines%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C4a5ea3fb2e45484c61f408d9d2147730%7C1>, especially those under 30, are suffering from myocarditis (heart inflammation), blood clots, low platelets and more following COVID-19 vaccination.

* The risks of COVID-19 vaccination adverse outcomes certainly outweigh the benefits to children and young adults who are considered low risk populations.

* Parental rights to make independent, informed decisions regarding their children's medical interventions, including vaccines, are being threatened.

* Some scientists have raised concerns that the safety risk of COVID-19 vaccinations have been underestimated. As of October 29th UPDATE, there have been 856,919

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind%2Fvaccineinjuries&cid=7C11D0E21729B860&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C4a5ea3fb2e45484c61f408d9d2147730%7C11d0e21729b860>
vaccine injuries including 18,078 deaths

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffinal%26DIED%3DYes&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C4a5ea3fb2e45484c61f408d9d21477>
following COVID-19 vaccination.

* Clinical trials in children and young adults are ongoing and will not be completed for at least one year.

* Not a single published study has demonstrated that patients who have had a prior COVID-19 infection benefit from the vaccination. So why recommend all kids get the shot?

It's time to end the use of COVID-19 as a pretext for governmental coercion and mandates. The public is waking up to the cascading negative impacts upon society from elected officials wielding unprecedented power over the citizens of this country. As a resident of Washington state, and a concerned citizen, I urge you:

-- Do not support any legislation or directive coercing people or mandating medical interventions--including vaccines

- Do not support any legislation or directive requiring people to wear masks

-- Do not support any legislation or directive that deprives people of the right to
congregate

-- Do not support any legislation or directive establishing lockdowns

-- Do not support any legislation where employers can enact coercive tactics to overrule a person's rights to body autonomy

There is a reason many people in our current administration are demanding that you negate any and all personal morals, defy our constitution, harm others, create public fear, and avoid encouraging effective means of immunity. Money. It may not be the root

of all evil, but it can certainly feed those roots. These companies, including our government agencies that are financially benefitting from these inoculation mandates, are making approximately \$1,000 per second from injecting people with questionable and life threatening substances. Many members of our community and state, who have been inoculated by the Covid "vaccine" are still becoming infected with the virus. This is not proven protection. This is experimental drug use. Is corrupt money and power, in the name of a science experiment, more important than the health and welfare of the people of our state? The very people you serve to protect?

May quality judgment and moral perspective be the lens through which you make your decisions, and may fraudulent claims by those who have personal and financial agendas not obscure your ability to make determinations for the good people of our state.

Sincerely,

Brenda Gingerich

Sincerely,

Jessica Berg

I am completely against any of the proposed Covid policies that are over-reaching and immoral. I stand against these WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, and WAC 246-105.

I am against mandated Covid shots for kids as criteria for child care and school entry. Children are extremely low-risk for Covid and vaccines are still only EUA (emergency use authorization).

Subject: WA Board Health Meeting

External Email

Hello,

My name is Kristine and I am emailing to voice my concerns with the upcoming meeting in WA Board Health Meeting.

Please do not enforce a vaccine, or any health mandate on the people. The vaccine does not prevent the spread of the COVID virus, and it should remain an individual choice to be vaccinated or unvaccinated.

Those who do want the vaccine, can easily get it, and spare themselves the greater risk from the virus. It should be a choice for those who do not wish to be vaccinated, to refrain from getting the vaccine, or any health care they wish to decline.

Do NOT impose a mandate for "conditions and principles when isolating or quarantining a person or group of persons in accordance with WAC 246-100-040

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FWAC%2Fdefault%2F100-040&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C9deaf1f1feaf46f16bc808d9d212bd20%7C11d0e2172>%.
".

Protect our freedom of choice.

Subject: Vote NO. Why the Pfizer Inoculation Does More Harm than Good

External Email

Dear Washington State Department of Health staff,

Please do not require school children and preschoolers to be inoculated with a Covid "vaccine" in order to attend school in our state!

Why the Pfizer vaccine for Covid 19 Does More Harm Than Good

Source: www.CanadianCovidCareAlliance.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.canadiancovidcarealliance.org>>

The Pfizer trial only used:

- 1) Unexposed & inoculated, and
- 2) Unexposed & not inoculated.

They should have also included:

- 1) Exposed & inoculated, and
- 2) Exposed and not inoculated (aka natural immunity from having had Covid).

The fact that they avoided the latter 2 shows that they thought their Pfizer vax wouldn't perform well in those categories. A study should show how those exposed and not inoculated fare vs. inoculated & exposed. It didn't.

The clinical endpoints of the trial should have been: Do people who take the Pfizer vax have less illness and death? (It wasn't) Choosing the proper endpoint is well-known, as a result of testing of cancer drugs. In cancer drug testing, they had to switch to all-point mortality, and Pfizer should have done so.

They could easily have included biomarkers, but they didn't. We need to know how people exposed, but not inoculated compare with the exposed and inoculated. This is natural immunity, and we need to know how those with natural immunity fared.

They should have tested for: de-dimer levels (micro-clotting) before and after.

Other biomarkers Pfizer should have and easily could have tested for: inflammation, barrier permeability, hypoxia, cardiac damage, predisposition to Alzheimer's, predisposition to autoimmune disease.

They should have had biomarkers for thrombotic disease. This is a condition which would take time to surface, but could have been measured before & after in biomarkers. Many doctors are reporting thrombotic conditions in vaccinated patients.

Vaccine passports: The Pfizer vaccine was not tested for spread reduction: No evidence at all that they reduce transmission and disease, and that was never one of the endpoints of the study. All they measured for was, "Do people who take the vaccine test positive for Covid-19 less often?" and the study was designed so that they would get few "no" answers, and they then proceeded to a vax rollout.

Testing failures: Subjective

The study did not test all patients for Covid-19! Instead, they only tested for the Covid-19 symptom, and then left it up to the discretion of their investigators to decide what that was. So that means that asymptomatic infection would be missed entirely. And it introduced a high level of subjectivity to the trial, because an investigator could actually decide whether to test or not to test. This lack of systematic testing actually makes the results of the trial unreliable. All participants should have been tested.

There is considerable missing data in the study. The endpoint is all Covid cases: 8 inoculated vs 162 placebo. But it's such a small # of participants to begin with. But there are 80 lost follow-up subjects in the inoculated group! They don't know whether they got sick or not, or even died. They don't know. That's 10x more than the # of Covid cases

they had in the inoculated group. So if a significant proportion of those 80 had been positive, it would have dramatically changed the results. Also, all the suspected but unconfirmed cases: 1594 in the inoculated group, 1816 in the placebo. This means they were symptomatic, but the investigator never followed up with a Covid test! These are huge numbers compared to the confirmed cases! The fact that the suspected cases which weren't tested were significantly larger than the endgame results means that this data is unreliable. The study should not have been accepted.

What about the placebo group? There were also many unconfirmed cases. If all these cases, inoculated and placebo, were positive, the relative risk reduction would then only be 19%. That's not a high enough percentage to gain approval.

Adolescents: The inoculation is really all risk and no benefit.

Teens are statistically at 0% risk of death from Covid-19. But the vaccine does pose risk of serious events. But the study was not designed to find serious adverse events. A serious event that occurred at a rate of 1/800 might not even show up in a sample of 1,005 people.

In the tests, there was a serious event in at least one subject who was inoculated. A 12-year-old girl. She experienced multiple serious effects, including lost feeling from the waist down, lost bowel and bladder control, menstrual cycle issues, seizures, verbal and motor tics, dizziness, fainting, headaches, brain fog, erratic blood pressure, and more. And the last 10 months, she is wheel chair bound and fed by a feeding tube. Pfizer labelled her case "functional abdominal pain."

5-11 year olds: The inoculation is an unacceptable risk to this group. Pfizer, using predictive modelling, acknowledges that their inoculations WILL cause myocarditis, but optimistically claims there will be zero deaths from myocarditis in any of their modelled scenarios. It's speculative. Still, there's no justification for giving children myocarditis. But the government has actually normalized myocarditis in kids, publishing Sick Kids brochures of how to deal with myocarditis in kids. But how to deal with it is to not cause myocarditis in kids! It's very serious. It causes permanent damage. Severe myocarditis weakens your heart so that the rest of your body doesn't get enough blood. Blood clots can form in your heart, leading to a stroke or heart attack. And the mortality rate is up to 20% at 6.5 years. The risk of 4 in 20 children who contract myocarditis dying within 6.5 years is unequivocally an unacceptable risk for children. But the FDA maintains that it is an acceptable risk for children. They have actually abandoned the "do no harm" principle.

Dr Eric Rubin of the New England Journal of Medicine (NEJM) has said that the way to find if they do harm is by doing a roll-out on the population. He voted to roll out inoculations for ages 5-11, and suggested that a population level roll out as an appropriate way to test for adverse events. Of note, the NEJM is also the publisher of the Pfizer reports.

Governments are proclaiming the inoculations to be safe, yet the data is not there to back that up. Pfizer admits that their long term immune response, efficacy & safety data is limited and that their studies weren't powered to find "rare" side effect, as only about 1500 kids were in the testing group which received the inoculation. The law of informed consent says that parents should be told about these risks, but it's not happening.

On Nov 2, the British Medical Journal released an article about their investigation into Ventavia, one of the research companies Pfizer hired to conduct the trials. A whistleblower who was a Regional Director reported to the FDA that Ventavia: falsified data, unblinded participants, did not follow up and test participants who reported symptoms, and mislabeled some specimens. Several other employees backed up the Whistleblower's account. But Pfizer never disclosed the problems in its EUA application, and in fact, Pfizer has now hired the same researcher, Ventavia, to run more Covid-19 clinical trials.

So it's not surprising that we are seeing the issues we are in the 6-month report.

Manipulation of Data Cohorts: Pfizer took the results from their adult trial, which started July 27, 2020, and then added in the results from the 12-15 year olds' trial, despite the fact that the adolescent trial started four months later. Since it's well known that the

efficacy wanes over time, this gives a false boost to the efficacy numbers. The efficacy of the two groups should have been reported separately, not presented as one combined result.

Pfizer trials did not prove safety. They proved harm. The endpoints of the trial should have been illness and death, not a positive or negative Covid-19 test. But their test actually showed harm. They used younger, healthier groups than the vaccine would eventually be rolled out to. Here are some results of Pfizer's own randomized control trial: Related adverse event, +300% over placebo group; severe adverse event, +75% over placebo group; any serious adverse event, +10% over placebo group. Deaths in the vaccinated group: 20; placebo group, 14.

How is this harm playing out in the real world? Governments are assuring us that they are monitoring safety and will let the public know if there are problems. But once the vaccine was rolled out at the population level, the surveillance method for reporting is called "passive." It's difficult and time-consuming for overworked doctors and health workers to file the harm reports, and then it goes thru several levels of bureaucratic approval before the case is accepted as a vaccine-related injury.

"Active" surveillance was used for trial participants. They were given a phone app with choices of adverse events they experienced. 78% reported adverse reports, and 5% were serious. There was also journal entry options for the participants, and 30% reported adverse events thru that, and 2% were serious. But when the reporting method was switched to passive for the general population rollout the reporting fell way down. But some news is getting out: For example, the risk of myocarditis is becoming known. And it's occurring in younger, healthy population where there was previously a very low rate of myocarditis.

On Nov. 17, the FDA released the first batch of data to satisfy a Freedom of Information request. This is data used by the FDA to approve Pfizer's covid-19 vaccine. One report in which Pfizer tracked adverse events in the first 2.5 months after the EUA, reported 1,200 deaths and over 25,000 nervous system adverse events. Under "Safety Concerns" Pfizer listed Anaphylaxis and Vaccine-Associated Enhanced Disease. This document should be incriminating for any agency who saw it and called the vaccine "safe."

Pfizer's criminal past includes lying about a heart valve which fractured and killed hundreds; conducting clinical trials on African children without their parents' consent, after which some of the children died; bribing doctors; suppressing research; manipulating studies; withholding information that its products caused cancer; fraudulent marketing, and many more. They've literally paid billions in fines and settlements for their actions. So they are not a highly ethical corporation.

The CDC has redefined "vaccine" to suit political & pharmaceutical interests. The new definition of vaccine by the CDC is "A preparation that is used to stimulate the body's immune response against diseases." The new definition does not indicate there is any actual benefit derived from a vaccine.

Sincerely,
Kim Underwood

To State Board of Health,

As a parent, teacher, and well-informed citizen, I am writing to express my concerns in regard to items on your meeting agenda.

Agenda Item #9 – Allowing local health departments to set up quarantine facilities and in some cases, detain people against their will. This is in direct conflict with our state constitution and is completely unnecessary in the current health situation. The vaccines have proven ineffective, as people still get Covid-19 after receiving them. Medically, it is proven that people develop natural immunity after having Covid-19. What justification would there be for quarantine facilities?

Agenda Item #11- Informed Choice Washington's Petition for Rulemaking (filed by Xavier Figueroa, Ph.D. on behalf of ICWA) requests a new rule that prohibits any EUA product, or any product that has not successfully complete Phase 3 trials to be added to mandatory school health requirements. I agree with this statement for the following reasons. #1. The current Covid -19 vaccines have not completed Phase 3 trials. #2. The current vaccines for Covid-19 are still in EUA. This means that they are supposed to only be applied in an emergency – not as a broad application to the entire public. #3. The EUA no longer should be applicable in this situation as current and further studies are finding many therapies for early treatment for Covid-19, which improves opportunities for natural immunities to develop. #4. The current vaccines are not preventing Covid-19. #5. According to the CDC's website VAERS, the current Covid-19 vaccines have a terrible record of adverse events and death. There is no data on safety over 3, 5, 10 years and beyond. It is not acceptable to vaccinate every child with a vaccine with this undeniably tragic safety level. The consequences could be devastating on our children!

Respectfully,

Kent Bratt

External Email

Regarding your upcoming meeting on the 12th, we do not support enforcing WA code to give emergency law enforcement powers to forcefully place people into quarantine facilities nor do we support mandating vaccines for children who are at almost a 0% risk of dying from Covid. This is a severe overreach of power and the people of Washington won't stand for this. It is a direct threat to our freedoms and constitutional rights. We are on year three of this Covid charade, and clearly your approach is not working. The last thing we need is more mandates or more quarantines. This has already taken a detrimental toll on our economy and the mental health of adults and children. Absolutely no more.

It was brought to my attention that you will be voting on covid vaccinations for school age children on January 12. I urge you to vote NO!

I am strongly opposed to this vaccine and I will not be vaccinating my children with this experimental untested Covid vaccine that is not even reliable. I am more worried about the vaccine side effects than I am of the low risk complications of the virus. We have had the virus and we have natural immunity.

This is the parents decision, not the governments. No more controlling our families.

Public schools are already experiencing a huge drop in enrollment because of parents pulling their children out. If you force this vaccine even more of us will be forced to homeschool our children. We will not let you make our children's health choices for us.

Vote no!

Thank you,
Melissa Perez

Mandating this experimental "vaccine" (gene therapy) for school attendance is irresponsible. Children are rarely at risk from this virus and they are at a much higher risk of myocarditis (and much more) from this experimental "vaccine". Experiments should always be voluntary - Nuremburg Code.

There are numerous studies regarding efficacy and potential risks and the "benefit" (if any) simply does not outweigh the risk by any stretch of the imagination. Real world data only increasingly illustrates that these mandates, masking, vaccinating, social distancing etc aren't working. Cruise ships, the NFL, and places in the world with very high vaccination rates are still experiencing the virus.

A mandate for schools will only collapse the system further as parents will simply pull their children out of the education system or move to a more free state.

That this is even a consideration is atrocious.

I am highly against this bill school districts should not be deciding nor giving immunization shots or Covid shots to children without the parental consent there are long-term effects that nobody knows about they have been causing heart issues kids have been dying along with adults and having heart issues strokes etc. from these "safe" vaccines in addition I am highly opposed to detaining against peoples free will this is the United States of America people should not be placed forcibly in concentration camps for quarantine. I get something that has a 99.97% survival rate that again are individuals personal choices just like abortions do not support this bill. Kevin Milles Sequim Wa 3609122168

As a life long resident of WA state, I am adamantly opposed to mandatory vaccination of the children of this state. I am a mother and grandmother and will make sure the children in my family will only be vaccinated by our own informed decision and not directed by the state. There is no data about the long term affects and we should not be willing to experiment with our kids for an illness that kids have shown not to be infected with.

Subject: WA State Board of Health discussion of applying current infectious disease Codes to include Covid 19.

External Email

I stand against adding Covid -19 to WAC codes for all WA State residents allowing health officers to use law enforcement to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility, following refusal to voluntarily comply with requests for medical examination testing, treatment, counseling, vaccination. This is no different than the fear of a possible threat that brought the Japanese internment camps, stripping US citizens of their rights and freedoms.

I am also against including Covid-19 injections as part of school immunization requirements because: Covid vaccines remain under Emergency Use Authorization, children under the age of 18 have a 99% survival rate and children have a higher chance of adverse reaction and chance of death. Please wait for further

testing results.

Sincerely,
Janell Kelley

Subject: BOH Considerations

External Email

Dear Ms. Lang,

It has come to my attention that WA Board of Health will be discussing Covid-19 shot mandates for schools and recommendations for forcible quarantine and/or detention of those that disagree with policies. As a parent to 6 children in this State, I request that you abandon the plan of forming a technical advisory group to explore COVID19 mandates and adopt a new rule of requiring products to have completed Phase 3 clinical trials before they can be added to list of school requirements.

One definition of insanity is to repeat the same mistake over and over again and expect different results. For almost 2 years we have attempted to follow the health recommendations of washing, masking, distancing, testing, isolating and vaccinating. By now it is apparent that the virus is "gonna virus" regardless of measures attempted. Thankfully, SARS CoV2 is acting in similar manner as all other viral pandemics and becoming more "virulent" (spreads easier) but less deadly. Real immunity is achieved with exposure and recovery as is evidenced by fact that those infected with SARS in 2002/3 cannot become infected with SARS CoV2 today! In contrast, Covid19 has managed to find a way to escape the vaccine as is evidenced by the incredibly high numbers of vaccinated and even boosted individuals getting sick and testing positive. Surely this fact has not escaped your knowledge!

As Health Board members, you are obligated to provide us with facts that support any and all recommendations or requirements.

1) what is the current rate of mortality for COVID19 infection and stratified according to age groups?

2) point to ANY measures that have reduced the numbers of fatalities (cases are not fatalities).

3) what is rate of all cause mortality in WA in 2020 and 2021?.....did the measures imposed reduce the number of deaths from prior year?

4) provide evidence of asymptomatic spread of SARS CoV2.

5) provide safety studies for masking children and randomized clinical trials for masks preventing spread of lab-confirmed upper respiratory viruses (not modeling of masks on mannequins).

6) make public the accuracy of testing - what is the rate of false positives and false

negatives of tests and were results determined by manufacturers of the tests or unbiased 3rd party investigators?

7) provide evidence that the vaccines prevent infection and transmission and that they improve health of individuals who receive them compared to those who do not.

8) explain why so much focus on eliminating this 1 virus when human immune systems have successfully protected our growing population since the beginning of time? Are you aware that some viruses are beneficial for humans and can protect against various forms of cancers and heart issues? Did you know that your human virome contains over 380 TRILLION viruses?

I do not doubt that as members of WA State Health Board that you truly desire to improve the health of Washingtonians. However, I do not trust that you have carefully investigated and logically determined adequate and measurable health remedies for which you are able to provide evidence. Before doubling down on measures that seem to HARM more than they HELP the overall health of citizens, please determine and make public the evidence to justify any policies.

Regarding mandating shots, know that the clinical trials will not be completed until 2023. Know that WA State has a legal definition of a vaccine that the C19 shots do not fulfill as they were never part of a living microorganism nor do they prevent transmission or infection of disease.

"Vaccine" means a preparation of killed or attenuated living microorganisms, or fraction thereof, that upon administration stimulates immunity that protects against disease and is approved by the federal food and drug administration as safe and effective

<https://app.leg.wa.gov/RCW/default.aspx?cite=70.290.010>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx?cite=70.290.010>

Finally, do no harm! You cannot possibly know or care more about the health of children than do the parents of Washington children! My college son's roommate suffered myocarditis shortly after his Pfizer booster and is now unable to resume an active lifestyle for the next 6 months and possibly longer! Heart muscle doesn't regenerate and unnecessary injury to a healthy 19 yo is a travesty he will suffer with for the rest of his life. How many others are now injured? What is the real rate of adverse effects following these EUA products and how can you determine if the safety studies have yet to be completed and there is no transparency of adverse event reporting?

Furthermore, how necessary or even safe is it to give a vaccine to a person who already has immunity to the pathogen? Most children by now have been exposed to the virus and have developed immunity without difficulty. Why consider a mandate for those not at high risk for adverse outcome should they become infected but who carry unknown risks of adverse reaction with getting the shot?

I look forward to hearing these concerns addressed and evidence for any and all recommendations to be presented when I tune into your meeting on January 12.

Thank you,
Therese Hendrix

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets vaccine, one group gets placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccine adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time.
Michelle in Bellingham, WA

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee famously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-

benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors
(americasfrontlinedoctors.org

From: Jacqueline Vanderpol <jevanderpol@hotmail.com>
Sent: Friday, January 7, 2022 9:52 AM
Subject: Against Covid-19 vaccinate mandate for children to attend school

External Email

Hello,

I am currently an educator and parent of two students who attend public school. I have been a resident in Lynden, WA for over 13 years. I am strongly against mandating the Covid-19 vaccination for students to attend school. There are many reasons why. Here are just a few;

1. The vaccine has not proven to stop individuals from getting Covid-19
2. Covid-19's death rate (especially in children) is .01 percent (October 2021)
3. The vaccine has not been tested long enough, so we do not know the long-term negative side effects
4. Many of the negative side effects from the Covid-19 vaccination are worse than getting Covid-19 itself
5. There is no consideration to those that have had Covid-19 and have natural immunities

I am not an anti-vaccination person and believe in vaccinations. However, this is a horrible over reach of power. Long-term health is not being considered, if this mandate is pushed through. Individuals need to be able to make the best decisions for themselves and under aged children. Every situation is different. There is also no thought or consideration given to natural immunities.

Thank you for your time,

Jacqueline Vanderpol (a concerned parent and educator)

Subject: Comments regarding: Agenda for Jan 12 public meeting SBOH

□

Hello,

A few days ago, during a WA State Board of Health meeting, the advisory group spoke of whether they should recommend adding Covid vaccination to the current WA vaccine schedule for school and daycare entry. Unfortunately public comments were not allowed. The advisory group would be making a recommendation for our children without hearing from the parents.

I oppose the Covid vaccine being added to the school and daycare schedule. Children have mild to no symptoms from the virus, and are thus the safest. Covid Vaccine inserts are none existent to the public, leaving us without a knowledgeable and informed choice. Pharmacists themselves do not have access to a vaccine insert. We are told to believe and take the plunge yet so many have had horrible and evenly deadly complications from these vaccines. Please urge the advisory group to be cautious and not make recommendations for the Covid vaccine to be added to the school and daycare schedule.

Also, I oppose local health officers to use law enforcement (wac 246-100-070) to force an emergency order to involuntary detain a person or a group of persons to be isolated in quarantine facility (wac 246-100-045). This proposed rule (to wac 246-100 as outlined above) is unconstitutional and violates human rights and freedoms.

Thank you for taking the time to read my opposition and concerns. I look forward to reading your reply.

To whom it may concern,

I am writing to oppose the proposed covid-19 policies that are currently being considered on Jan 12th. These include:

WAC 246-100-070
WAC 246-100-045
WAC 246-100-040

Although I understand the rational behind these proposed policies, I do not think they will have the intended effect. These policies will put undo pressure on our already overwhelmed police force. These health policies and mandates should not be considered law unless the people that they effect have had a chance to review them. The language of these policies leaves a lot to interpretation and opportunity for misuse and overreach.

These policies will also discourage people from seeking testing for infectious disease and may actually exasperate the problem. Would you willingly be tested for a illness if you thought it was possible that you would be involuntarily detained?

The current mandates and policies have not stopped the spread of Covid even though the majority of people have willingly followed them. Doubling down on these policies will not improve our current situation.

Thank you in advance for your time and consideration.

January 6, 2022

Dear Board of Health members,

It has come to my attention that in your upcoming board meeting there will be a discussion of involuntary isolation/quarantine of people as described in parts of WAC 246.100. This is quite alarming, to say the least, and I certainly OPPOSE this as it would definitely violate our constitutional rights!!

Another agenda item that I am completely OPPOSED to is mandating any Covid-19 vaccine for children in childcare and to attend K-12 public school. Covid-19 is not a threat to children, and furthermore it is not FDA approved as it is only approved for emergency use.

Sincerely,

Darcy Poland

External Email

Hello,

I am currently an educator and parent of two students who attend public school. I have been a resident in Lynden, WA for over 13 years. I am strongly against mandating the Covid-19 vaccination for students to attend school. There are many reasons why. Here are just a few;

1. The vaccine has not proven to stop individuals from getting Covid-19
2. Covid-19's death rate (especially in children) is .01 percent (October 2021)
3. The vaccine has not been tested long enough, so we do not know the long-term negative side effects
4. Many of the negative side effects from the Covid-19 vaccination are worse than getting Covid-19 itself
5. There is no consideration to those that have had Covid-19 and have natural immunities

I am not an anti-vaccination person and believe in vaccinations. However, this is a horrible over reach of power. Long-term health is not being considered, if this mandate is pushed through. Individuals need to be able to make the best decisions for themselves and under aged children. Every situation is different. There is also no thought or consideration given to natural immunities.

Thank you for your time,
Jacqueline Vanderpol (a concerned parent and educator)

7 January, 2022

To all board members,

I am writing this email pleading you to reconsider some upcoming actions that are being explored by this group. I am a resident of Washington State, and I feel obligated to express my concerns about the upcoming DOH discussions regarding COVID-19 policy and proposed policy changes to WAC 246-100, specifically sections 070, 045 and 040 on January 12, 2022.

As research indicates, the virus continues to mutate and lessen in virulence, as viruses do. Therefore, I want to caution the members of the board and urge you NOT to make any "permanent" changes to the current infectious disease WAC codes. I also urge you to consider closely the amount of conflicting data on the effectiveness of the shots and adverse reactions that are being reported.

At this point in the pandemic, I believe it is time to look for ways to rebuild the confidence in the great people of Washington. Washingtonians have proven their commitment, steadfastness and willingness to be cautious and helpful over the past 2

years. It is extremely important, now than ever before, for the people of Washington State to begin their return to "normal". Continued mandates, threats of quarantine camps and forced vaccinations are NOT what Washingtonians want or need. It would be more effective to give priority to the study and the use of effective treatment methods available; and to look for ways to fund healthy living programs FOR our State by emphasizing exercise, healthy eating, appropriate vitamin D levels, better sleep and stress management.

I ask that you do NOT make policy changes to the WAC in regards/response to Covid and I do NOT support any efforts to make any changes. I DO believe that you will consider this request, keeping in mind the rights of citizens under the First Amendment to choose for themselves what they feel is best for themselves and their families.

Thank you for your time and consideration,

Loretta Rose

Hello,

I'd like to comment on the upcoming Board meeting scheduled for January 12th.

I OPPOSE Agenda Item #8, the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose COVID-19 shot mandates, period!

I SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Thank you,

Subject: Childhood Covid-19 Vaccine Mandates

External Email

Dear Washington State Board of Health Member,

I am writing as a concerned citizen and a parent of school-age children to ask you to consider soberly and conscientiously the known facts about Covid-19 vaccination for young people and say NO to Covid vaccine mandates for kids in Washington State.

Consider the following well- established realities (some sources included below):

1. Children are at the lowest risk of severe outcomes from Covid-19 of any age group, with risk factors a thousandfold lower than those in the oldest age groups. Nearly every child with a severe or fatal outcome from Covid has had correspondingly severe preexisting health issues. Parents of these children are likely to keep them at home for the duration of the pandemic, vaccine mandates or not.

2. Covid-19 vaccines DO NOT stop the spread of Covid-19. Breakthrough cases are exceedingly common and increasingly so as the omicron variant expands through our country. Vaccine mandates will NOT effectively stop in-school spread; thus, they serve no public health purpose. At this point, vaccines seem at best to decrease the risk of a severe case of Covid-19; but children are the group in LEAST need of this decrease (see above), and even if they were to benefit from them, weighing and choosing such benefit against the risks should be entirely between the child, the parents, and the physician. It is emphatically not the government's appropriate role to intervene in a person's private medical decisions, especially when those decisions do not have an appreciable impact on public health.

3. Children, particularly young and teenage boys, are the age group MOST at risk of severe injury from Covid-19 vaccines, including myocarditis and pericarditis. If you

mandate vaccines for school-age children in Washington State, children will be severely injured who did not need to be. Children will die who should not have died. For no appreciable impact on public health.

Just given these facts, Covid-19 mandates for school-age children would be a travesty and an abdication of your responsibility as public health authorities, as well as an affront to the Hippocratic Oath that underlies the practice of medicine. However, I also invite you to consider the following:

4) Washington State children have undergone an extreme and prolonged disruption of their education over the last two years. As a parent and a friend of many parents, I have a front-row seat to witness the increases in depression, despair, hopelessness, and educational damage that has been inflicted upon them. Requiring vaccination for school attendance WILL result in more disruption, especially for the lowest-income families in our state, who tend both to be the most vaccine-hesitant and to have the fewest resources to educate their children outside of the school system.

In addition, you would have a mass exodus of students from the school systems into private schools, or, if that's not possible, effective homeschooling. Parents outside of Seattle and Olympia are NOT comfortable with injecting their children with a still-experimental medication, without any long-term safety information, for a disease that poses an overall low risk to them. That is why vaccine uptake among the youngest age groups has fallen so far short of expectations. If you think the school system is hurting now, imagine when all those parents have pulled their children out.

Covid-19 vaccine mandates for school-age children violate all available scientific evidence and common sense, overstep the bounds of appropriate government intervention, and would result in incredible harm done to families and schools. I urge you not to consider such a step and, if you have considered it, to reconsider.

Thank you,

Megan Minnick

Arlington, WA

To: Kahler, Kelie (SBOH) <Kelie.Kahler@sboh.wa.gov>
Subject: "No!" To adding COVID-19 vaccine mandates to requirement list

External Email

Dear Board Member,

I ask the Board to exclude the COVID-19 from the list and NOT implement a Covid-19 Vaccination Mandate for Childcare and School admission. My logical reasons are as follows:

1.

The statements from the CDC, WHO, and WH about vaccine impact on transmission and infection "neither prevent the disease nor stop transmission." The above mentioned organizations, as well as, the Biden Administration have clearly stated this. It is obvious to me that these "vaccines" fall under the classification of medical procedures or treatments, not to traditional vaccines.

2. There is no FDA approved covid vaccine available in the USA that prevents transmission of the disease. I believe, you would be violating existing International Law with this mandate.

3. According to CDC & WHO data, there could be unknown risk to children. Their data shows clearly that across all variants, CHILDREN ARE AT THE LOWEST RISK for infection, transmission and severity.

4. These mandates have and will impact student enrollment and funding for schools. Anti-public school advocates have clearly achieved advances during the pandemic by disenrolling children from schools, which are government controlled. Check with districts and you will find, there is a multitude of parents who are vocally and actively opposed to school and childcare mandates. You will see an excess of one-fourth enrollment in local districts. This will have a significant negative impact on school funding when schools already claim their resources are stretched past the breaking point.

5. Many parents in Washington State hold strong family values and believe parents should control what is to be done, or not done, to their children; not the local State or national government.

I respectfully ask you to consider my logical points based on data and strong family values.

Christy,

STOP! just stop what you are doing to our children.

I will pull my children from public school the minute that this or any further vaccines without full phase 3 testing is required. Do not subject them to "Test to Stay" either. Testing to prove they are healthy will have lasting psychological impacts. These children are not guilty of being unhealthy until proven innocent by a test...they are already innocent.

You have absolutely no standing to make these current vaccines a requirement.

This would be crossing a line you could never come back from. All public trust in you as an entity would be lost forever.

Using children to "save elderly" is an absolute disgrace. Subjecting young bodies to yet unknown side effects is beyond reprehensible.

Trading parental choice for education is absolutely a nonstarter.

I hope you have common sense enough to see what a slippery slope you are standing

above with this decision.

Stand up for our parental choice to know what is best for our individual children and do not deprive our children of education for an untested vaccine with a small efficacy. Which side are you on? Pharma or children's education?

There are too many unanswered questions to trade my child's health for their education.

Sincerely,

Kbr Patrick

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets vaccine, one group gets placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccines adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time.
Michelle in Bellingham, WA

To whom it may concern,

I am writing to oppose the proposed covid-19 policies that are currently being considered on Jan 12th. These include:

WAC 246-100-070
WAC 246-100-045
WAC 246-100-040

Although I understand the rational behind these proposed policies, I do not think they will have the intended effect. These policies will put undo pressure on our already overwhelmed police force. These health policies and mandates should not be considered law unless the people that they effect have had a chance to review them. The language of these policies leaves a lot to interpretation and opportunity for misuse and overreach.

These policies will also discourage people from seeking testing for infectious disease and may actually exasperate the problem. Would you willingly be tested for a illness if you thought it was possible that you would be involuntarily detained?

The current mandates and policies have not stopped the spread of Covid even though the majority of people have willingly followed them. Doubling down on these policies will not improve our current situation.

Thank you in advance for your time and consideration.

Kady Bowman

Dear Kelie,

It has been brought to my attention that this board seeks to find a way to force children in Washington State to receive the experimental, emergency-use authorized mRNA vaccine in order to attend public school.

I am a paraeducator for the Lake Washington District. I have a degree in Nutrition and Food Science. I have 5 children. If this plan is implemented, I will quit my position and take my children from this district and return to home education, like so many other good, caring parents are doing now.

I'm sad to think that you aren't aware of the outcry in this state toward the governor's tyranny and his plans to bring force to bear along with quarantine camps.... This does not benefit America or honor our constitution, and I'm ashamed at the very suggestion of such segregation and discrimination.

Realize the fight is bigger than you know. You are joining the governor in destroying our economy, our well-being, and our way of life. Please reconsider your trajectory.

Sincerely,

Noelle Simms

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets vaccine, one group gets placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccine adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time.
Michelle in Bellingham, WA

Dear Board Member,

I ask the Board to exclude the COVID-19 from the list and NOT implement a Covid-19 Vaccination Mandate for Childcare and School admission. My logical reasons are as follows:

1. The statements from the CDC, WHO, and WH about vaccine impact on transmission and infection "neither prevent the disease nor stop transmission." The above mentioned organizations, as well as, the Biden Administration have clearly stated this. It is obvious to me that these "vaccines" fall under the classification of medical procedures or treatments, not to traditional vaccines.
2. There is no FDA approved covid vaccine available in the USA that prevents transmission of the disease. I believe, you would be violating existing International Law with this mandate.
3. According to CDC & WHO data, there could be unknown risk to children. Their data shows clearly that across all variants, CHILDREN ARE AT THE LOWEST RISK for infection, transmission and severity.
4. These mandates have and will impact student enrollment and funding for schools. Anti-public school advocates have clearly achieved advances during the pandemic by disenrolling children from schools, which are government controlled. Check with districts and you will find, there is a multitude of parents who are vocally and actively opposed to school and childcare mandates. You will see an excess of one-fourth enrollment in local districts. This will have a significant negative impact on school funding when schools already claim their resources are stretched past the breaking point.
5. Many parents in Washington State hold strong family values and believe parents should control what is to be done, or not done, to their children; not the local State or national government.

I respectfully ask you to consider my logical points based on data and strong family

values.

Subject: Childhood Covid-19 Vaccine Mandates

External Email

Dear Washington State Board of Health Member,

I am writing as a concerned citizen and a parent of school-age children to ask you to consider soberly and conscientiously the known facts about Covid-19 vaccination for young people and say NO to Covid vaccine mandates for kids in Washington State.

Consider the following well- established realities (some sources included below):

1. Children are at the lowest risk of severe outcomes from Covid-19 of any age group, with risk factors a thousandfold lower than those in the oldest age groups. Nearly every child with a severe or fatal outcome from Covid has had correspondingly severe preexisting health issues. Parents of these children are likely to keep them at home for the duration of the pandemic, vaccine mandates or not.
2. Covid-19 vaccines DO NOT stop the spread of Covid-19. Breakthrough cases are exceedingly common and increasingly so as the omicron variant expands through our country. Vaccine mandates will NOT effectively stop in-school spread; thus, they serve no public health purpose. At this point, vaccines seem at best to decrease the risk of a severe case of Covid-19; but children are the group in LEAST need of this decrease (see above), and even if they were to benefit from them, weighing and choosing such benefit against the risks should be entirely between the child, the parents, and the physician. It is emphatically not the government's appropriate role to intervene in a person's private medical decisions, especially when those decisions do not have an appreciable impact on public health.
3. Children, particularly young and teenage boys, are the age group MOST at risk of severe injury from Covid-19 vaccines, including myocarditis and pericarditis. If you mandate vaccines for school-age children in Washington State, children will be severely injured who did not need to be. Children will die who should not have died. For no appreciable impact on public health.

Just given these facts, Covid-19 mandates for school-age children would be a travesty and an abdication of your responsibility as public health authorities, as well as an affront to the Hippocratic Oath that underlies the practice of medicine. However, I also invite you to consider the following:

- 4) Washington State children have undergone an extreme and prolonged disruption of their education over the last two years. As a parent and a friend of many parents, I have a front-row seat to witness the increases in depression, despair, hopelessness, and educational damage that has been inflicted upon them. Requiring vaccination for school

attendance WILL result in more disruption, especially for the lowest-income families in our state, who tend both to be the most vaccine-hesitant and to have the fewest resources to educate their children outside of the school system.

In addition, you would have a mass exodus of students from the school systems into private schools, or, if that's not possible, effective homeschooling. Parents outside of Seattle and Olympia are NOT comfortable with injecting their children with a still-experimental medication, without any long-term safety information, for a disease that poses an overall low risk to them. That is why vaccine uptake among the youngest age groups has fallen so far short of expectations. If you think the school system is hurting now, imagine when all those parents have pulled their children out.

Covid-19 vaccine mandates for school-age children violate all available scientific evidence and common sense, overstep the bounds of appropriate government intervention, and would result in incredible harm done to families and schools. I urge you not to consider such a step and, if you have considered it, to reconsider.

Thank you,

Megan Minnick

External Email

Hello,

A few days ago, during a WA State Board of Health meeting, the advisory group spoke of whether they should recommend adding Covid vaccination to the current WA vaccine schedule for school and daycare entry. Unfortunately public comments were not allowed. The advisory group would be making a recommendation for our children without hearing from the parents.

I oppose the Covid vaccine being added to the school and daycare schedule. Children have mild to no symptoms from the virus, and are thus the safest. Covid Vaccine inserts are none existent to the public, leaving us without a knowledgeable and informed choice. Pharmacists themselves do not have access to a vaccine insert. We are told to believe and take the plunge yet so many have had horrible and evenly deadly complications from these vaccines. Please urge the advisory group to be cautious and not make recommendations for the Covid vaccine to be added to the school and daycare schedule. Also, I oppose local health officers to use law enforcement (wac 246-100-070) to force an emergency order to involuntary detain a person or a group of persons to be isolated in quarantine facility (wac 246-100-045). This proposed rule (to wac 246-100 as outlined above) is unconstitutional and violates human rights and freedoms.

Thank you for taking the time to read my opposition and concerns. I look forward to reading your reply.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>>)

)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Dear Ms. Hoff,

It has come to my attention that WA Board of Health will be discussing Covid-19 shot mandates for schools and recommendations for forcible quarantine and/or detention of those that disagree with policies. As a parent to 6 children in this State, I request that you abandon the plan of forming a technical advisory group to explore COVID19 mandates and adopt a new rule of requiring products to have completed Phase 3 clinical trials before they can be added to list of school requirements.

One definition of insanity is to repeat the same mistake over and over again and expect different results. For almost 2 years we have attempted to follow the health recommendations of washing, masking, distancing, testing, isolating and vaccinating. By now it is apparent that the virus is "gonna virus" regardless of measures attempted. Thankfully, SARS CoV2 is acting in similar manner as all other viral pandemics and becoming more "virulent" (spreads easier) but less deadly. Real immunity is achieved with exposure and recovery as is evidenced by fact that those infected with SARS in 2002/3 cannot become infected with SARS CoV2 today! In contrast, Covid19 has managed to find a way to escape the vaccine as is evidenced by the incredibly high numbers of vaccinated and even boosted individuals getting sick and testing positive. Surely this fact has not escaped your knowledge!

As Health Board members, you are obligated to provide us with facts that support any and all recommendations or requirements.

1) what is the current rate of mortality for COVID19 infection and stratified according to age groups?

2) point to ANY measures that have reduced the numbers of fatalities (cases are not fatalities).

3) what is rate of all cause mortality in WA in 2020 and 2021?.....did the measures imposed reduce the number of deaths from prior year?

4) provide evidence of asymptomatic spread of SARS CoV2.

- 5) provide safety studies for masking children and randomized clinical trials for masks preventing spread of lab-confirmed upper respiratory viruses (not modeling of masks on mannequins).
- 6) make public the accuracy of testing - what is the rate of false positives and false negatives of tests and were results determined by manufacturers of the tests or unbiased 3rd party investigators?
- 7) provide evidence that the vaccines prevent infection and transmission and that they improve health of individuals who receive them compared to those who do not.
- 8) explain why so much focus on eliminating this 1 virus when human immune systems have successfully protected our growing population since the beginning of time? Are you aware that some viruses are beneficial for humans and can protect against various forms of cancers and heart issues? Did you know that your human virome contains over 380 TRILLION viruses?

I do not doubt that as members of WA State Health Board that you truly desire to improve the health of Washingtonians. However, I do not trust that you have carefully investigated and logically determined adequate and measurable health remedies for which you are able to provide evidence. Before doubling down on measures that seem to HARM more than they HELP the overall health of citizens, please determine and make public the evidence to justify any policies.

Regarding mandating shots, know that the clinical trials will not be completed until 2023. Know that WA State has a legal definition of a vaccine that the C19 shots do not fulfill as they were never part of a living microorganism nor do they prevent transmission or infection of disease.

"Vaccine" means a preparation of killed or attenuated living microorganisms, or fraction thereof, that upon administration stimulates immunity that protects against disease and is approved by the federal food and drug administration as safe and effective

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx?cite=70.290.010>

Finally, do no harm! You cannot possibly know or care more about the health of children than do the parents of Washington children! My college son's roommate suffered myocarditis shortly after his Pfizer booster and is now unable to resume an active lifestyle for the next 6 months and possibly longer! Heart muscle doesn't regenerate and unnecessary injury to a healthy 19 yo is a travesty he will suffer with for the rest of his life. How many others are now injured? What is the real rate of adverse effects following these EUA products and how can you determine if the safety studies have yet to be completed and there is no transparency of adverse event reporting?

Furthermore, how necessary or even safe is it to give a vaccine to a person who already has immunity to the pathogen? Most children by now have been exposed to the virus and have developed immunity without difficulty. Why consider a mandate for those not at high risk for adverse outcome should they become infected but who carry unknown risks of adverse reaction with getting the shot?

I look forward to hearing these concerns addressed and evidence for any and all recommendations to be presented when I tune into your meeting on January 12. <x-apple-data-detectors://2>

Thank you,
Therese Hendrix

*I am able to provide evidence of any claims made in this letter, just let me know what you need substantiated.

External Email

Board Members,

First off, I'd like to start my email with your authority is not absolute and "We the People" do not consent to your heavy-handed approach to our health. We do not give you the authority to force any medical procedures on our children, our elderly, or on any human being that does not choose of their own free will your offerings of "public health" in a vaccine trial.

Our bodies are not owned by our government and on the contrary, our bodies according to the Bible are a temple of the Holy Spirit.

" Or do you not know that your body is the temple of the Holy Spirit who is in you, whom you have from God, and you are not your own? For you were bought at a price; therefore glorify God in your body and in your spirit, which are God's." - 1 Corinthians 6:19-20

We do not give you permission to operate in an authoritarian way nor do we approve of you attempting to use broad rule making powers to force the Covid-19 shots that are NOT currently FDA approved on anyone. Only "Comirnaty" is approved and yet it is not offered in the USA at this time. The current Pfizer-BioNTech Vaccine is the one given in the US, but it is still under "EUA", not "Authorized." (See leaflets given by pharmacists - attached to this email or this link)

Labeling of Pfizer Vaccines:

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Flabeling.pfizer.com%2FShowLabelin>

EUA approval letter from FDA also includes Authorization for Comirnaty:

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F151710>

>> Congress Using the wrong information:

They are making it sound like "Pfizer/ BioNTech" and "Comirnaty" are the same. They are legally not and should not be represented as such. Technically Pfizer and BioNTech are manufacturers, but they have one legal name for an FDA approved vaccine "Comirnaty" and one that is only under EUA. There is a misconception that this is about semantics, but it is not - legal names and legal approvals for drugs in the US are supposed to follow specific procedures, clinical trials, and they hold important legal obligations and regulations.

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcrsreports.congress.gov%2Fproduct>

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Flynnwoodtimes.com%2F2021%2F1-rejects-interchangeability-comirnaty%2F&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C9ca0f054b16c4f6667b808d9d1d4>

PREP Act

Based upon the projected numbers of Covid-19, "on January 21, 2020 the former Secretary, Alex M. Azar II, declared a public health emergency pursuant to section 319 of the PHS Act, 42 U.S.C. 247d, effective January 27, 2020, for the entire United States to aid in the response of the nation's health care community to the COVID-19 outbreak. Pursuant to section 319 of the PHS Act, the Secretary renewed that declaration effective on April 26, 2020, July 25, 2020, October 23, 2020, and January 21, 2021."

"On March 10, 2020, former Secretary Azar issued a Declaration under the PREP Act for medical countermeasures against COVID-19 (85 FR 15198, Mar. 17, 2020) (the Declaration). On April 10, the former Secretary amended the Declaration under the PREP Act to extend liability immunity to covered countermeasures authorized under the CARES Act (85 FR 21012, Apr. 15, 2020)."

This declaration is all based upon projections as the time and not actual deaths. The first case to enter the US was shared as January 23, 2020, and although by the date of the first declaration of "public health emergency" (January 31, 2020) there were less than 10 cases. (Please see the attached graphs of cases and deaths with the oldest at the bottom of the list) We are told to trust the "science" yet, declarations of emergency were declared with less than 10 cases in the US on a new virus and the first death didn't even happen until February 27, 2020. The mistrust the public is experiencing is due to the extreme measures that have been taken against the people and the very heavy handed measures that have not been supported by the actual data.

https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2F covid.cdc.gov%2F covid-data-tracker%2F%23trends_dailycases&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C9ca0f054b16c

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcrsreports.congress.gov%2Fproduct>

Please also review Pfizer's 6 month data. I've attached the document along with the link under "breaking news" called "More Harm Than Good." Although this is from Canada, we share lots of information, because we are all using the same vaccines.

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.canadiancovidcarealliance.org>

We have more strains, since the shots have been administered than we did prior to the shots being administered. The year of 2021 alone had "Mu", "Delta" and "Omicron" that were highly publicized and now "IHU" detected in France (January 2022.) Yet the first variant publicized was the "Gamma" in November 2021 in Brazil, but still not of concern until January 2021. The people of Washington have been more than compliant for the past 670+ days of our governor's emergency powers and yet the masks, shots, and lockdowns have not stopped the virus from spreading between vaccinated individuals,

causing death, or causing vaccine injuries amount those that chose to be apart of the vaccine trial.

Please review some of the stories of the vaccine injured as their lives matter as well.

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.covidvaccinevictims.com%2F8>

[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.habingfamily.com%2Fobituary-mike-granata&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C9ca0f054b16c4f6667b808d9d1d426fe%](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.habingfamily.com%2Fobituary-mike-granata&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C9ca0f054b16c4f6667b808d9d1d426fe%7C)

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.realnotrare.com%2Frealstories>

Understanding the VAERS reporting system:

[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fopenvaers.com%2F&data=04%](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fopenvaers.com%2F&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C9ca0f054b16c4f6667b808d9d1d426fe%7C)

You need to see what people think of the mandates by OSHA that President Biden issued.

With over 119,830 comments, people are very unhappy that medical procedures are being mandated and yet have not proven to stop the spread, stop transmission, nor stop hospitalization as was touted in the beginning of rolling out these vaccines.

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.regulations.gov%2Fdocument%2F2021-0007-0001&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C9ca0f054b16c4f6667b808d9d1d426fe%7C>

Also, another interesting point is that since Covid has entered the scene, the CDC shows that essentially the seasonal flu has mostly not impacted any children. That seems very untrustworthy and is causing many people to mistrust those in our public health.

[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fflu%2Fweekly&](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fflu%2Fweekly&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C9ca0f054b16c4f6667b808d9d1d426fe%7C)

Right now, you are facing a big decision to "force" medical procedures upon people that do not freely choose to participate in this trial. One day soon, you may be against something (politically, ethically, morally, or otherwise), and you may have already given up your freedoms to choose, because you didn't take this opportunity to speak up against "force" being perpetuated on those you serve.

We are asking you to consider the repercussions of force, mandates, and new laws that hurt the freedoms afforded us by our Creator; God or the ones supported by the US Constitution. Our children are our most treasured gem and it is our job given to us by God that we must protect them from any and all harm.

Please consider the points, data, and research I've shared when you consider a heavy-handed approach to mandates and forced medical procedures. In real life, not everyone can wear size 7 shoes, yet with all these mandates - we essentially are attempting to force everyone to have the same medical procedures when not everybody is the same.

Maria Thorpe

Concerned Mom, a parent of kids who have had Covid, and have seen them have summer cold worse than what they had. Please do not force this upon our children!

External Email

To Whom It May Concern,

I am writing this email to URGE you NOT to move forward with this ludicrous vaccine mandate for our children. These are MY children and it is MY decision what to put in their bodies to keep them healthy!! You are going to lose thousands more children, than the already 50,000 you have lost already, from the public school system! Me and numerous more parents will PULL OUR kids out school!!!

There are numerous statistics, research, and evidence that children are not a threat when it comes to COVID! They are not a threat to each other OR the adults they are around. They are not getting sick OR dying!! IN FACT its better for them to get it now and stop this virus from spreading to protect the adults in our community and gain immunity!! The risk of receiving the vaccine is so much higher than the benefit. Risks include myocarditis, harm to the brain, reproductive system and arteries! Most other states have not mandated vaccines for kids, kept schools open, and everyone is fine and living their life in freedom!!

I beg of you, DO NOT follow through with this vaccine mandate for our kids!!

Sincerely,

Megan Larsen

Kelie,

STOP! just stop what you are doing to our children.

I will pull my children from public school the minute that this or any further vaccines without full phase 3 testing is required. Do not subject them to "Test to Stay" either. Testing to prove they are healthy will have lasting psychological impacts. These children are not guilty of being unhealthy until proven innocent by a test...they are already innocent.

You have absolutely no standing to make these current vaccines a requirement.

This would be crossing a line you could never come back from. All public trust in you as an entity would be lost forever.

Using children to "save elderly" is an absolute disgrace. Subjecting young bodies to yet unknown side effects is beyond reprehensible.

Trading parental choice for education is absolutely a nonstarter.

I hope you have common sense enough to see what a slippery slope you are standing

above with this decision.

Stand up for our parental choice to know what is best for our individual children and do not deprive our children of education for an untested vaccine with a small efficacy. Which side are you on? Pharma or children's education?

There are too many unanswered questions to trade my child's health for their education.

Sincerely,

Kbr Patrick

TO WHOM IT CONCERNS:

Regarding the Rulemaking Petition on January 12, 2022 for Chapter 246-105 WAC, Immunization Criteria, Child Care and School Entry, I wholeheartedly support the initiative to prohibit (for school attendance) any Emergency Use Authorized products or licensed products that lack completed Phase 3 trial studies.

We MUST protect our children. There is substantial, peer-reviewed science proving that the risk of vaccine injury to children is far greater than their risk of a Covid fatality.

Follow the science please!

I am voicing my objection of adding COVID to WAC-100-040, WAC-100-045, WAC-100-070.

There is so much censored information, corrupted data, myriad opinions regarding this disease that actual scientific facts are unknown. Putting power to detain people in detention, isolation, or quarantine into the hands of an unelected official has the potential for great evil. Ignorance and fear should not be the basis if legislation. Medicine should not be determined by politics. With all the policy changes day to day wisdom demands waiting until all the facts are presented. No to adding COVID at this time.

Sincerely,
Marilyn Schlaudraff

This has gone on too long and too far. The masking is bad enough. There are more than 16,000 physicians that agree that our children should not be vaccinated. We are prepared to take our kids out of the state school system if you mandate this vaccine.

Subject: WACs Comment

External Email

To the Washington State Board of Health,

I am totally against the implementation or approval of any of these proposed WAC's:
WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

These WACs are completely immoral, unethical, and regressive and absolutely should not be allowed.

As a Washington State resident and voter, I implore the Washington State Board of Health to stand, as officials of integrity, against the tyrannical government overreach these WACs represent. Please help ensure Washington State has a bright future for both the residents of today and the next generation of Washingtonians and vote against these WACs.

- A concerned citizen and Washington resident

External Email

First, thank you for the work you do in the arena of public health.

I was informed this morning that these policies - WAC 246-100 would be discussed and voted on January 12th. I was hoping this is misinformation but I see it on your agenda.

The emergency in our country currently is government overreach. Ask people who have lost jobs and/or businesses what the problem has been the past 1 1/2 years.

Everyone can see that vaccinated people are still getting covid. So how does mandating vaccines and forcing quarantines help? The place I used to work, the Spokane Symphony mandated vaccines and people are still getting covid. So they are obviously not protected.

In a free country such as the USA there obviously must be a balance between laws & individual freedom or we will be no different than a communist nation where personal freedoms are sacrificed or a country in chaos where there is no order.

To choose to over mandate will be to invite lawsuits as constitutional guarantees of freedom are broken.

Please do not lead our state in a manner that is unconstitutional.

Respectfully,
Jeri Bentley
Spokane, 99205

Subject: Written Comment for WA State Board of Health Public Meeting Jan. 12, 2022

External Email

Dear Washington State Board of Health Members,

I was shocked to hear that the Board created a Technical Advisory Group (TAG) to review information regarding the experimental COVID vaccine in order to consider whether or not to add the experimental vaccine to the required school and daycare immunization schedule.

Why would you even consider adding an experimental COVID vaccine to the required immunization schedule? It makes no sense. And I believe that adding an experimental vaccine (with Emergency Use Authorization only) to the immunization schedule is illegal. What the Board is doing is even more perplexing considering that there has never been a COVID infection 'emergency' with the children in our state.

Why the rush? I live in Whatcom County and we haven't had one child or teenager die of COVID. We have more children and teens in Washington die of cancer, in car accidents, by suicide, and drowning than we do of COVID. So this is absurd and there is no scientific evidence backing up what you are doing, it's actually a waste of time and money. Adding the experimental COVID vaccine to the school and daycare immunization schedule will only serve to profit Big Pharma and all those connected to Big Pharma, it will NOT serve our children.

The experimental COVID vaccine for children ages 5-15 years old has Emergency Use Authorization only. The only FDA fully licensed and approved COVID vaccine is Pfizer's Comirnaty vaccine for those ages 16+ years old. However, Pfizer's Comirnaty vaccine is NOT yet available in the state of Washington or anywhere else in the United States. Pfizer's experimental BioNTech vaccine has been the only Pfizer COVID vaccine available for individuals 16+ years old.

If you really care about our children's health then you will take action to PROTECT them, not to hurt them. The Board can protect the health of children in Washington state by waiting until the experimental COVID vaccine for children gets FDA fully licensed and approved AND after all of the Phase 3 clinical trials have been completed, which is estimated to be sometime in 2026.

Thank you for taking the time to read this written comment.

Regards,
Natalie Y. Chavez

Subject: WAC Rule Regarding Quarantine

External Email

Your intention (or attempt) to dictate oppression of, incarceration of, persons and families by WAC that you deem by such rule to be in violation of the state's Emergency Powers Act is a violation of both the Washington State and US Constitutions.

Such violation gives individuals whose constitutional rights are so violated due recourse in the court of law; not only for exoneration but for due compensation. Be forewarned.

Subject: WAC code for covid-19

External Email

To whom it may concern. I am writing to let you know I do not believe you should change the WAC codes to include covid-19. Despite all efforts to shut this virus down, nothing has worked. Changing things to include a required "vaccination" for covid-19 is not going to help either. This is not a vaccine. It is closer to what a yearly flu shot might be, yet the flu shot is not mandatory to attend school or participate in normal life activities. Also, though it is touted as having received full FDA approval the ones available in this country have not received that. Comirnaty is the only one and it is not readily available, if at all, in the US. The side effects have not been fully learned and are not being honestly presented to those who choose or are forced to get this jab. Our kids are NOT at high risk of dying or having serious side effects from the disease, but they are from the shot. I urge you to not pass this!

Jodi Phelps,

Regarding these WAC's-

This is the most absurd, anti-science, anti-freedom, anti-common sense policies I've ever seen in my life. Can you honestly say you support these "public health" and "safety" measures? Do you think the population wants this? Do you think this would solve anything? Or make matters worse? Do you want your state to suffer the economic consequences as a result? The people do not want this, obviously. Even writing this email shows how far off this state is from reality. To question whether or not we should allow discrimination, segregation, and government overreach as a common practice is beyond absurdity. What a shameful state we're in. Anyone who supports these policies is living a life of denial, a life of lies, deceit and manipulation. The consequences of these irrational policies will be severe. This is not in the best interest of Washington State, not even close. And the people will not comply. If anything, there will be a mass exodus from this tyrannical state. This state will plummet and be a laughing stock of the country. I encourage you to be courageous and stand for the truth, stand for unity, stand for the freedoms and liberties that have been granted to us through years of turmoil so that we may live in peace. Preserve our freedoms, don't aid in giving them away. Let us not give away our freedom for the illusion of avoiding death.

Respectfully,
Jesse Mize

External Email

Dear Board of Health Members,

Thank you for your service to the citizens of WA.

I am writing to ask you to NOT implement ANY policies that utilize tyrannical actions (involuntary quarantines, testing, treatment, counseling, and vaccinations) in what will be a failed attempt to "contain" Covid19. This virus will never be contained, it is a part of our ecosystem now. The only real defenses against it are REDUCING CO-MORBIDITIES and allowing ROBUST THERAPEUTIC TREATMENT DEVELOPMENT. Have you as a board, recommended spending any public service resources on telling people to live a healthy lifestyle as the best defense??? If people are healthy, IT IS CLEAR THEY ARE AT A MASSIVELY REDUCED RISK OF LONG TERM EFFECTS FROM THIS DISEASE.

We also know that the vaccines are ONLY GOOD FOR SHORT TERM PERSONAL PROTECTION from significant symptoms, but do not stop transmission or infection. My taking a vaccine DOES NOT save anybody else from Covid19, so forcing vaccines on people becomes nothing more than a form of medical authoritarianism, not health care. If WA's health care systems are stressed due to COVID patients, it is ONLY because hundreds of qualified health care professionals were unnecessarily terminated from their jobs (many with natural immunity), and due to that there are not enough people to provide care.

Please DO NOT implement any actions that will only hurt/divide/anger your fellow citizens and DO NOTHING to reduce the spread of this disease. HAVE COURAGE AND PLEASE TAKE A STAND AGAINST TYRANNY.

Our family is completely against any of the COVID policies that are overreaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

There should absolutely be no right for law enforcement to detain people for vaccination purposes. The vaccination for COVID is unproven as a legitimate vaccination. People are receiving the vaccination still getting COVID, being hospitalized for COVID and dying from COVID. There is no evidence that it lowers symptoms of COVID in the majority of people. There are significant side effects and risks of receiving the vaccination. This should not be a required vaccination at this time as it is NOT a vaccination.

Please, please, consider the effects of these WACs and the unnecessary overreach they would cause. Please oppose these WAC's.

Sincerely,
James Erwin

To whom it may concern.

On Wednesday January 12th, there is a Board of Health meeting to discuss the vaccine requirements for school aged children and to form quarantine camps.

Any vaccine decision should be a parental choice. It is an abuse of power and government overreach for anyone elected to office by the people to decide what is best for our children.

Quarantine camps are an abuse of power. To segregate and hold someone in such a fashion based on personal choice is discrimination and against the federal law.

I am opposing ANY vaccine requirement for children.

I am apposing ANY creation of quarantine camps.

This is the time to stand up, advocate, and protect children and all residents of the state of Washington.

Thanks.

Senator Lovick,

I am writing you today regarding proposed changes to WAC's regarding covid-19.

I am completely against all of the proposed Covid policies. The proposed policies are immoral, authoritarian, and illegal. The potential to detain citizens without due process is illegal, unconstitutional and violates the core ideals of the Nuremberg code.

Mandating experimental medical treatment without consent is a crime against humanity.

Mandating experimental gene therapy drugs for children to "protect" them against a virus that poses little risk to them is beyond wrong!!!! SO WRONG!

I am opposed to the proposed WAC's:

WAC 246-100-070

WAC 246-100-245

WAC 246-100-040

WAC 246-100

WAC 246-105

Please consider these comments when making your decision. Should you vote to approve these WAC's you will find yourself firmly on the wrong side of history. These are immoral and just plain wrong. If you have any soul, you will think long and hard about what you're choosing and do what's right.

Washington State Board of Health

I am completely against the plan to apply infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early and most people survive it if given the proper treatment from the beginning. I have experienced this and I have witnessed this in the many people that I know who have gotten Covid and recovered just fine. The evidence just is not there to support such drastic measures. Also, I personally know a great deal of people who have had the shots and have still gotten Covid so they are having little effect. The efficacy wears off so quickly that you have to require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

I sincerely believe this is completely out of the scope of the Washington State Department of Health or ANY elected official or unelected state employee. These decisions are the right of every citizen and NO law, mandate, code or policy can override those rights. We are NOT granted rights from the State. The State is REQUIRED to protect our rights and not infringe on them. I therefore urge you not to proceed with this action.

Thank You,
Mary Jablonsky
Kent WA

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,

Leah Huff

'I absolutely do NOT believe that the Covid 19 vaccine should be required for children to gain entry to child care or school! PLEASE vote 'NO' on the states effort to mandate the vaccine for children. It is currently only an EUO {Emergency Use Only}, and quite clearly not efficient or effective for stopping Covid; the possible dangerous side effects resulting in permanent disability & even death, {Listen to the people who have experienced deep loss after loved ones have taken the vaccine in good faith!!}, create the need for people to make their own medical decisions in regards to any medicine put into their bodies & the bodies of the children they are charged to protect! Thank you for your time!

My father in law has still got side effects worsened after his second shot and was told to never get another one.

There are so many people out there speaking out about their own personal experiences and are being silenced.

The FOIA is due to start rolling out, and hopefully we will see the studies to make better choices and be fully informed. At the moment this has not happened.

Please pay attention, the research is being done in other countries and there are many links through the CDC, FDA, NIH and WHO, that send you to these trials, studies, and research documents.

The variants are already listed on their site and the WHO sends you to the GISAID.gov website and a few others to see the hundreds of variants they monitor from the SARS-CoV2 this only makes me think that they use them when they need to and pretend like they haven't been following and studying them all along.

Please read, please research and do not go by what the media is trying to push.

Make a informed decision, we all should be able to have that right here in America!

Thank you

Jessica Brooks

To whom it may concern,

It is reasonable and prudent to add covid vaccinations to our requirements for attending public school. It is NEITHER reasonable nor prudent to have police enforce this like jackbooted thugs detaining the Noncompliant. The answer is not more fascism. 1984 is not an instruction manual. What the hell is wrong with people? Back off from this hysterical authoritarianism!

The current mechanism of not allowing admittance to the public school if the student fails to vaccinate is reasonable. There is no reason for this insanity of 'detain and force'. What are you going to do if they refuse? Use tasers? Shoot them? 'Health internment camps'? FFS!

To Whom It May Concern,

I would like to express my concern about and object to the WAC codes applying to WA state residents. These laws infringe upon basic human rights. As is very evident by science, the vaccine has proven not to prevent people from contracting Covid or spreading it. In fact, more people are harmed by the vaccines than saved by them. These vaccines have proven to be a huge medical experiment in which irreversible damage is done, particularly to young people. Children especially should not take the Covid vaccine. As was stated at the beginning of this pandemic, children, in general, are not at risk for dying from Covid, nor are they great spreaders. For those people that are older, early treatment has proven to be effective in treating Covid. At the very least, regardless of opinions regarding the vaccine, every WA citizen should have the right to choose which medical avenue to pursue: to be vaccinated or not to be vaccinated. Somewhere along the line, we, as a state and country, have forgotten our individual freedom and right to choose. WAC 246-100-070 is to allow local health officers to use law enforcement to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counsel, vaccination (WAC 246-100-040). These suggestions are unconscionable! Can you not see that these codes absolutely infringe on basic human freedoms? Please reconsider passing any of these codes, particularly the ones requiring all children to be vaccinated with an experimental vaccine.

Thank you for your service.
Very Sincerely,
Kristen Klinger

Dear Washington State Board of Health, I am emailing to express my concern at the proposed discussion regarding recommending vaccination for school aged children, and also the possibility of applying current infectious disease codes to include Covid-19.

The CDC Director Walensky, herself stated "what the vaccines can't do is prevent transmission". Dr Anthony Fauci says "we know now as a fact that [vaccinated people with covid-19] are capable of transmitting the infection to someone else." With these testimonies and several others, it shows the Covid-19 vaccines do not prevent a person from contracting the disease, or from spreading it to others. The vaccines could be considered only as treatments therefore have no legal grounds for forced use.

The infection rate and survival rate in children has shown that this age group is not at risk of death or serious illness from Covid-19 therefore vaccination should not be forced upon this age group. Considering the widespread known adverse effects of the vaccine itself (I know of only two people who have died from Covid-19 - one aged 90 and the other in his 50's but a long term smoker, but know of several people who have died as a direct result of being injected with the Covid-19 experimental vaccine), people should be given the choice whether they would like to receive the vaccination or not. Also considering the complete lack of long term research on the vaccination in this age group. Making the wrong decision now could have serious effects on the future health of residents as they grow up to be the work force of WA state.

As to the use of law enforcement and possible detainment of those who refuse vaccination or testing, the above statements showing that the vaccinated are just as likely to spread the disease, reinforces that this decision would be extremely unfair discrimination based on a complete lie that the unvaccinated pose any sort of health risk different to what the vaccinated do to those around them.

Please continue to promote health among WA state residents that is non-discriminatory and non-threatening. Please decide NOT to insist on vaccination for school age children and please DO NOT allow amendments to the above listed WAC codes to include Covid-19.

Thank you for standing up for freedom of choice in the United States of America.

Yours, Lisa Sawyer.

Subject: Wed 1-12 Meeting

External Email

Dear Member Thai,

My name is Megan Mauch. I am a certified Speech Language Pathologist working in the public school system. I am an expert on child development and have worked both remotely and in person over the course of this pandemic. The impact lockdowns and mask mandates have had on kids' communication and social/emotional development is tragic. It has to stop.

I am writing to gain your attention to violations of moral and ethical treatment of children. Vaccines that are required for children should have completed Phase 3 trials and should be approved by the FDA. The fact that any individual would ever consider such a heinous, evil and morally bankrupt approach is beyond a lack of moral character, it borders on a level of evil that is unprecedented.

The data has empirically proven the following:

1. The vaccines do not prevent anyone from getting or transmitting COVID
2. Vaccines do not create any safety for anyone else, beyond the undetermined and temporary reduction of individual symptoms
3. Children have almost no statistical risk of covid symptoms
4. Children do not have a high transmission rate to pass on COVID to adults, it is known to be lower than the flu.
5. There is ZERO long term testing on the impacts of the vaccines on children.

In addition, we can see across the world that places with fewer lockdown measures and mandates are experiencing fewer problems with COVID.

Given this data, I implore you to make an ethical decision on several of the discussion items at Wednesday's meeting.

For Item #8: Please OPPOSE the plan to form a TAG to consider mandating shots for kids to attend school. OPPOSE COVID shot requirements.

For Item #9: OPPOSE the extension. There is no longer a need to extend emergency quarantine or forced isolation and no need for law enforcement to be used to do so.

For Item #11: SUPPORT the petition by Informed Choice of Washington to establish a rule that prohibits them from adding any EUA products to school required vaccine lists.

Thank you for standing up for what is BEST for children!

Thank You,

Megan Mauch, MS, CCC-SLP

Subject: WAC Code Laws

External Email

To Washington State Board of Health Members,

Mike and Sharon Fries strongly oppose these proposed policies:

WAC 246-100-070, We do not agree for the use of law enforcement to force or involuntarily detain anyone to a quarantine facility.

WAC 246-100-045, WAC 246-100-040, or WAC 246-105

We believe vaccinated or unvaccinated, we as citizens of the United States have the constitutional right to make the decision of what we inject into our, or our children's bodies. If we have the right to abort our children, we certainly have the right to refuse a mandated vaccine for school requirements. For a child the health effects are like a flu virus and natural immunities are built, like the chicken pox years ago. We believe the covid vaccine is a personal choice not the Government's choice, we believe in Medical freedom!

Thank you,

Michael and Sharon Fries

I would like to remind the Washington State Board of Health that:

- > Children are at extremely low risk for Covid.
- > The vaccines are still only EUA (emergency use authorized).
- > There are no long-term studies to document any history of safety.
- > Studies do not document that vaccinated and unvaccinated can both transmit Covid, therefore,
- > the vaccine apparently does not stop the spread of the disease.
- > If you intend to send unvaccinated people to concentration camps, you will have quite an uprising on your hands!

I encourage you to take these comments seriously.

Subject: weighing in on Today's proposed policies

External Email

Hello - I am a long term WA resident in Renton, WA.

I write to you as a WA citizen who was injured by the MMR booster and also someone who does WAC 173-303 compliance enforcement for a living. I want to quickly inform you of how I urge you to look at what is proposed. I am on break for work, so forgive my brevity.

****I urge you to NOT require Covid-19 injections as part of the requirement to attend public school. The risks presented by the scientists that advise the FDA do not outweigh the harm of catching Covid-19. Again, I'm coming to you as a vaccine injured citizen who was injured as a pre-teen. It took away my ability to enjoy my teenage years, my 20's and now my 30's. I'm unable to date, procreate or have children due to having to constantly take care of myself in order to remain a productive citizen and not mooch off the state. This causes not only a great sadness but resentment that people in your position had disregard for MY long term wellbeing and I fear for these children.**

****I urge you NOT to adopt the language in the draft you have with regards to using force to involuntary detail. I do regulatory compliance for a living and the wording is so broad it can be mis-applied for mass-harm. It rings of memories of Japanese internment. And 365 days is WAY too long. You will ruin lives and livelihoods. Property will end up being confiscated. This needs to go back to the drawing board and be refined to be much more specific and assure productive WA citizens are not going to ever be swept up into someone's madness, should it ever occur. We cannot rely on "intent". We must rely on the written word inside the WAC 173-303. I have seen our regulators try to skew the intent of the regulations decades after they have been written. We need the WAC to be very specific.**

Kind regards,
Michelle Frome
Renton, WA

PROPOSED POLICIES: • Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100. • Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Subject: Wed 1-12 meeting

External Email

Dear Members,

My name is Megan Mauch. I am a certified Speech Language Pathologist working in the public school system. I am an expert on child development and have worked both remotely and in person over the course of this pandemic. The impact lockdowns and mask mandates have had on kids' communication and social/emotional development is tragic. It has to stop.

I am writing to gain your attention to violations of moral and ethical treatment of children. Vaccines that are required for children should have completed Phase 3 trials and should be approved by the FDA. The fact that any individual would ever consider such a heinous, evil and morally bankrupt approach is beyond a lack of moral character, it borders on a level of evil that is unprecedented.

The data has empirically proven the following:

1. The vaccines do not prevent anyone from getting or transmitting COVID
2. Vaccines do not create any safety for anyone else, beyond the undetermined and temporary reduction of individual symptoms
3. Children have almost no statistical risk of covid symptoms
4. Children do not have a high transmission rate to pass on COVID to adults, it is known to be lower than the flu.
5. There is ZERO long term testing on the impacts of the vaccines on children.

In addition, we can see across the world that places with fewer lockdown measures and mandates are experiencing fewer problems with COVID.

Given this data, I implore you to make an ethical decision on several of the discussion items at Wednesday's meeting.

For Item #8: Please OPPOSE the plan to form a TAG to consider mandating shots for kids to attend school. OPPOSE COVID shot requirements.

For Item #9: OPPOSE the extension. There is no longer a need to extend emergency quarantine or forced isolation and no need for law enforcement to be used to do so.

For Item #11: SUPPORT the petition by Informed Choice of Washington to establish a rule that prohibits them from adding any EUA products to school required vaccine lists.

Thank you for standing up for what is BEST for children!

Thank You,
Megan Mauch, MS, CCC-SLP

Dear Board of Health,
My husband and I are hard working Washingtonians. He is a school teacher and, I am a pilot. We are alarmed at the overreach of our government regarding mandates. Haven't enough hard working citizens left our state to escape these mandates? We love Washington, but are considering the same direction. Our state is being stripped of its workforce. We oppose 246-100-070 -NO EMERGENCY ORDER. We oppose 246-100-045 - NO MANDATORY ISOLATION. We oppose 246-100-040 - NO FORCED VACCINATIONS OR TREATMENT OF ANY KIND AGAINST THE WILL OF OUR CITIZENS. This is the time to stand for your people, your State and your Country. Say NO to these mandates!!
Sincerely, Maria Plunket

These proposed Covid policies will not make as a "free country" anymore. You are forcing things that should not be forced. WE SHOULD HAVE A CHOICE. And you are taking away our rights. America's education system is already crap and kicking kids out of school because they didn't get a shot will make it even more worse and more stupid. Kids need to go to school without being forced to get a shot. This is ridiculous and getting out of hand. STOP IT!! There is not enough research done and you don't know the long side effects of the shot. You are killing us. Your other proposed WAC codes are dumb as well. Like what is wrong with you? You are not being logical at all. Sorry not sorry! I said what I said!

Subject: Washington covid detainment proposal

External Email

Hello,

I'm writing to you about the proposal to add covid detainment to the Washington code. I am completely against any of the proposed Covid Policies that are over reaching and immoral. I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

This is a violation of people's religious beliefs as well as privacy. For health and safety doesn't count because this is all about control and not giving individuals the chance to choose for themselves and their family what is best for them. I personally know so many who medically cannot get the vaccine as well as those who all of this goes against their religious beliefs- mine included. A shot isn't going to stop COVID. It may help some who are more susceptible to getting I'll, but forcing those to get it just to live in this state is beyond comprehension.

Please consider not putting these policies into place as they are an complete overreach of government and a breach of religious and personal freedom.

Thank you for reading,

Katelyn Alala

Hello,

A few days ago, during a WA State Board of Health meeting, the advisory group spoke of whether they should recommend adding Covid vaccination to the current WA vaccine schedule for school and daycare entry. Unfortunately public comments were not allowed. The advisory group would be making a recommendation for our children without hearing from the parents.

I oppose the Covid vaccine being added to the school and daycare schedule. Children have mild to no symptoms from the virus, and are thus the safest. Covid Vaccine inserts are none existent to the public, leaving us without a knowledgeable and informed choice. Pharmacists themselves do not have access to a vaccine insert. We are told to believe and take the plunge yet so many have had horrible and evenly deadly complications from these vaccines. Please urge the advisory group to be cautious and not make recommendations for the Covid vaccine to be added to the school and daycare schedule. Also, I oppose local health officers to use law enforcement (wac 246-100-070) to force an emergency order to involuntary detain a person or a group of persons to be isolated in quarantine facility (wac 246-100-045). This proposed rule (to wac 246-100 as outlined above) is unconstitutional and violates human rights and freedoms.

Thank you for taking the time to read my opposition and concerns. I look forward to reading your reply.

To whom it may concern,

I am a lifelong Washington resident, and I am appalled that the board of health is even considering a move to use law enforcement to forcibly make free citizens of the USA in Washington state to comply with highly controversial and politically charged health mandates!

One of the biggest issues with COVID-19 is the singular response to the virus outbreak. Why is the state looking to vaccines as the only solution, and not allowing other remedies that are proving to be effective around the world like ivermectin, hydroxychloroquine, etc. Also there is no consideration for natural immunity, which is proving to be the most effective. We have to stop these unconstitutional acts of politically charged health mandates.

My dad age 73, and my cousin age 49 died this last year as a result of getting the vaccine. I know many others family and friends who have permanent health issues and others who have died after receiving the vaccine. It is scary to me and very concerning to me that in light of this, the state is tightening its grip and forcing vaccines on all of its citizens and residents.

Please consider the constitutional rights and the freedoms of the citizens you serve in your positions of public office. We all are watching what is happening in Australia and other places where totalitarianism and government overreach is having an oppressive and destructive impact on its people.

Please restore our faith in you as policy makers to serve the people, and not oppress them. We need to start unifying our country and not further dividing it!

Thank you for doing what is right, and for your consideration.

Sincerely,

Kyle Gough

Covid does not need to be included in these definitions. Treatments are available and most people isolate at home. This is an unnecessary, unreasonable and unethical expansion of an already questionable WAC chapter.

This kind of overreach into people's private lives must be stopped. Requiring papers to move about, and now concentrating people into "Isolation camps" has no place in our free society. Someone needs to stand up against the tyranny that's been imposed on the citizens of state and country. Please realize the damage you are committing by perpetuating these ridiculous and overreaching mandates.

The currently required Vaccinations have had appropriate long term safety trials and results. These covid vaccines will not be through those trials for many more years. It is irresponsible for the Board of Health to require this new product be injected into ANYone, but especially small children. Children have been and could be harmed by this vaccine, either now or in their futures. We simply do not know at this point what the future effects will be. The effectiveness of these vaccines are proving to be much much less than we were initially told or expected. People who are vaccinated are still catching and spreading covid. How does having the vaccine make someone "safer" to be in public or school if they are still able to spread and catch covid? The answer is they are NOT any safer to be in a public space (restaurant, school or concert) than an unvaccinated individual. It is grossly negligent to even consider adding covid vaccination to the required school vaccines with this information.

I know my comments won't help, inslee has his mind set on total domination and dictatorship of our state. The camps have been created, the workers have been hired. It's just a desperate plea to anyone who will hear, that will look inside themselves and at facts and realize THIS. IS. WRONG. Please stand up for us. For our children's future. For life liberty and the pursuit of happiness.
We beg you.

My name is Enoch Mann and I am a resident in Whatcom County, I am absolutely appalled and disgusted at this egregious overreach of power trying to touch our children. This experimental gene therapy injection is anything but safe. There have already been over 20000 reported deaths and now coming up into the millions of adverse reactions. This has been proven to be only 1% of actual data that is being recorded. And to actually admit that is to admit a crime because pharmaceutical companies are required by law to make sure that those sites are run properly.

You Demoncrats have made it abundantly clear that you are power hungry and bloodthirsty and coming after our children. Some of the top doctors in the world including the inventor of the MRNA technology dr. Robert Malone has stated that the devastating effects of this experimental jab will last for Generations. We the people are diametrically opposed and severely hostile against this action that you are proposing to take. If you wish to force citizens against their will into camps then you will be met with extreme resistance. There is not a law enforcement officer that I know who will I choose to uphold this outrageous overreach and unconstitutional power grab.

It is a legal to mandate a vaccine under emergency authorized use and it is in direct violation of our rights including deprivation of rights under color of law under the Department of Justice code which punishment for breaking such law is either life imprisonment or death. Body autonomy and informed consent are a human right granted to us by our creator not by you. If you will attempt to try this extreme over reach of power that you think you have, we the people will make sure that you never ever serve in any kind of Health capacity or public service again. We we'll also make sure since you are held directly responsible for your crimes. We are men and women and we are not your personal property. We do not bow down to the corporation and we are not slaves but we are free and will remain that way and continue to defy every single attempt to take that away from us. We will pull our kids out of school so that it collapses. We the People Are Over your BS and we will find your personal addresses and we will visit your homes and we will make sure that until you stop this madness we will be there every day to make sure you know who we are.

I sincerely hope that you reconsider this , you are on the wrong side of History and it will not be kind to you when this is all over. Justice will be sought and every single one of you on the board of health and anyone who votes for this will be held personally responsible for every death and adverse reaction. The minute you started violating the Constitution you failed to be our government any longer and we the people withdraw our consent. We will not tolerate nor comply with any you pass

Subject: WAC codes including Covid

External Email

Hi,

I am writing to provide a comment for the Jan 12th meeting discussing applying current infectious disease WAC codes to include Covid for all WA state residents. I and my family stand fully against these proposals, which are over-reaching and deeply immoral. Individuals should have full medical autonomy and decision making responsibility for their medical examinations, testing, treatment, counseling, and vaccination. These are areas of responsibility that should never fall under the government's jurisdiction. It is grievous and wrong to consider including Covid-19 injections in school immunization requirements as science has shown Covid to not be a serious threat against children. Requiring such would be a violation of parental rights.

We stand against these proposed WAC's:

WAC 246-100

WAC 246-100-070

WAC 246-100-045

WAC 246-100-040

WAC 246-105

Thank you for your time concerning this matter,
Lacey Nelson
Pierce County Resident

Dear BOH,

This is America! Did you forget where you live? You're out of your mind if you think you can enforce nazi vaccination tactics on us and our children. Read that again.

You work for us and we're watching you. We will protect our rights, our medical freedom and our children from you woke freaks.

There will be no further medical tyranny in Washington state. Governor Inslee belongs in prison. As does anyone who thinks they can violate Washington state citizens and our children.

My body, my choice! Leave my family and our private medical needs alone at once! You are sick individuals if you think my right to private healthcare choices are up for grabs.

Stop this tyranny at once!

Lisa Pearson

Good morning,

I am reaching out because I oppose WAC 246-100 rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools. Children's healthcare and medical decisions are for the child's parents to make, NO ONE else's. What is right for one person may not be right for the next else especially when it's proven that this "vaccine" (when the definition of something has to be changed multiple times to fit an agenda you can guarantee that it's not what you're being told it is) isn't effective and the risks to children (and probably adults we just haven't seen the affects yet) outweigh the benefits. This is unconstitutional and wrong.

External Email

To State Board of Health,

As a parent, teacher, and well-informed citizen, I am writing to express my concerns in regard to items on your meeting agenda.

Agenda Item #9 – Allowing local health departments to set up quarantine facilities and in some cases, detain people against their will. This is in direct conflict with our state constitution and is completely unnecessary in the current health situation. The vaccines have proven ineffective, as people still get Covid-19 after receiving them. Medically, it is proven that people develop natural immunity after having Covid-19. What justification would there be for quarantine facilities?

Agenda Item #11- Informed Choice Washington's Petition for Rulemaking (filed by Xavier Figueroa, Ph.D. on behalf of ICWA) requests a new rule that prohibits any EUA product, or any product that has not successfully complete Phase 3 trials to be added to mandatory school health requirements. I agree with this statement for the following reasons. #1. The current Covid -19 vaccines have not completed Phase 3 trials. #2. The current vaccines for Covid-19 are still in EUA. This means that they are supposed to only be applied in an emergency – not as a broad application to the entire public. #3. The EUA no longer should be applicable in this situation as current and further studies are finding many therapies for early treatment for Covid-19, which improves opportunities for natural immunities to develop. #4. The current vaccines are not preventing Covid-19. #5. According to the CDC's website VAERS, the current Covid-19 vaccines have a terrible record of adverse events and death. There is no data on safety over 3, 5, 10 years and beyond. It is not acceptable to vaccinate every child with a vaccine with this undeniably tragic safety level. The consequences could be devastating on our children!

Subject: WAC 246-100 and 246-105

External Email

As a Washington resident, I am absolutely opposed to the proposed changes to WAC 246-100-040, 045, and -070 and WAC 246-105.

Allowing local health officers to involuntarily detain a person or group of people to isolated in a quarantine facility following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, or vaccination goes against everything our Constitution stands for. These types of laws are common in Communist countries, are Totalitarian in nature and have no place in the United States of America.

Why we don't need a vaccine mandate.....

- * The survival rate for all age groups infected with Covid remains at over 99%
- * The mortality rate for those infected with Covid ranges .0027 for ages 0-19 to .59% ages 60-69
- * The CDC states that .6% of severe adverse side effects from the Covid vaccines have resulted in death. This means you have a greater chance of dying from the vaccine than the virus if you're under 70.

Making a vaccine authorized under "emergency use" part of the required immunization for attendance to school is mandating all Washington students become guinea pigs. Only the parent of the child should be able to decide if they want their child to participate in such experiments, not the government! Given the survival rate for ages 0-19 is 99.9973% it is also completely unnecessary.

The emergency authority and orders the government are using need to stop immediately! By definition, an emergency is a serious, unexpected, often dangerous situation requiring immediate action. We are 2 years into this "emergency" and are over the hump. People are not dying or being hospitalized at the rates in 2020. We are getting sick and recovering. STOP THE MADNESS!

Sincerely,

Kathleen Moriarty

The laws that are being proposed in front of you today are absolutely insane and so far from our constitutional rights! This will bring a massive uprising in families coming together who will unenroll our children from the public school system altogether. You will be hurting many more families than it helps. Schools will lose massive federal funding. The lives that will be impacted and hurt by these laws is far more than the lives being impacted by Covid. There are many more families against these policies compared to the small number of people who are for them. I strongly urge all of you today to vote against all of these proposals today! Unless a Revolutionary war is what the end goal is here.

WAC 246-100

External Email

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

Sincerely,

Julie Dow

Washington State Board of Health
Technical Advisory Group (TAG)
ZOOM Webinar ID No. 894 7406 4216
Date & Time: Jan 12, 2022 09:00 AM Pacific Time (US and Canada)

Attention: WSBOH and TAG Members

Samantha Pskowski (SBOH)

Allegra Calder (BERK)

Hannah Febach (SBOH)

Tom Pendergrass (Retired Pediatrician)

Kate Cranfield (Public Health Nurse, Pierce County)

Lynnette Ondeck (School Nurse Administration, Anacortes)

Shauna Muendel (Health Care Authority with Background in Public Health)

Greg Lynch (School District Superintendent – Bremerton)

Annie Hetzel (Office of School Health)

Dimyana Abdelmalek (Thurston County Health)

Tom Locke (Representative for American Indian Health)

Adriana Liviare (Associate Program Director Public Health)

Jennifer Helseth (Specializing in children birth to 5 years of age)

Tao Sheng Kwan-Gett (Washington Department of Health)

Francis Bell (Pediatrician)

I am writing you all about a very grave matter. We have been informed regarding your most recent considerations for students regarding Vaccination and Testing. We as parents are aware that many of the Vaccination and Testing guidelines are in direct violation of congressional passed Acts, including GINA, ADA, and HIPAA.

You may not be aware of these violations, but we parents and students are aware of our rights. Student safety is paramount. We are bringing this information to you as you may be unaware of the worrying signs.

Upon review of the FDA's EUA and its approved labeling, a.k.a. "fact sheets," for each
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F14463>
COVID-19
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F14441>
vaccine
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F14630>
, it clearly states: "It is [the vaccine recipient's] choice to receive or not receive the
COVID-19 Vaccine." The reason each fact sheet includes this language is because the
same section
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.law.cornell.edu%2Fuscode%2F3&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C975f3e3e8ed64da9d52d08d9d1a54d0b%7C11d0e2172>
of the Federal Food, Drug, and Cosmetic Act that authorizes the FDA to grant an
Emergency Use Authorization (EUA) also requires the Secretary of Health and Human
Services to "ensure that individuals to whom the product is administered are informed ...
of the option to accept or refuse administration of the experimental product."

Please be advised that organizations are not shielded from liability with experimental agents. Also be advised that each individual member can be sued privately for breaking the law.

Under the 2005 PREP Act enacted by Congress (which can be viewed here
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.phe.gov%2FPreparedness%2F>
>), pharmaceutical companies that manufacture EUA vaccines are shielded from liability
related to injuries and damages caused by their experimental agents. However, any
employer, public school, or any other entity or person who mandates experimental
vaccines on any human being is not protected from liability for any resulting harm. While
vaccine manufacturers may be shielded from liability, your institution is not protected,
and neither are you.

You are required to inform students of their option to accept or refuse administration (by your policy) of a vaccine, test or face mask that is under Emergency Use Authorization.

The CDC reported the PCR diagnostic Panel will lose its EUA authorization as of December

31,2021.

"After December 31, 2021, CDC withdrew the request to the U.S. Food and Drug Administration (FDA) for Emergency Use Authorization (EUA) of the CDC 2019-Novel Coronavirus (2019-nCoV) Real-Time RT-PCR Diagnostic Panel, the assay first introduced in February 2020 for detection of SARS-CoV-2 only. CDC has provided this notice for clinical laboratories to have adequate time to select and implement one of the many FDA-authorized alternatives."

NOTE: In accordance with statutory legal requirements, I am requesting that you review the following questionnaire in connection with your proposed requirement that students receive a COVID-19 emergency use authorization (EUA) experimental investigational medical vaccine or to submit to testing.

1) The Food and Drug Administration (FDA) requires that EUA vaccine recipients be provided with certain vaccine-specific information to help them make an informed decision about vaccination. The EUA fact sheets that must be provided are specific to each authorized COVID-19 injection and are developed by the manufacturers of the injections (Pfizer/BioNTech, Moderna, Oxford/AstraZeneca, and the Johnson & Johnson subsidiary Janssen). The fact sheets must provide the most current and up-to-date information on the injections, and vaccine recipients must also receive information about adverse events. Have you read, understood, and will you provide parents and students with these fact sheets and with current information on adverse events so that we can make an educated decision?

2) Are you aware that the only FDA fully licensed and approved COVID-19 "vaccination" is Comirnaty? Pfizer/BioNTech hold the license to manufacture Comirnaty, however they have not currently begun to manufacture the fully licensed vaccine, and do not have a scheduled date to begin doing so. As such, there are no fully FDA approved COVID-19 vaccinations available in the United States. This has been upheld recently in a Florida Federal Court.

3) Please review the available databases of material adverse events (such as VAERS) reported to date for people who have received COVID-19 injections. Potential and reported adverse events include death, anaphylaxis, neurological disorders, autoimmune disorders, other long-term chronic diseases, cardiomyopathy, myocarditis, blindness and deafness, infertility, fetal damage, miscarriage, and stillbirth.

4) The FDA's guidance on emergency use authorization of medical products requires the FDA to "ensure that recipients are informed to the extent practicable given the applicable circumstances... [t]hat they have the option to accept or refuse the EUA product..." Are you aware of this statement? Do you intend to inform all parents and students that by law they have the option to refuse?

5) EUA products are unapproved, unlicensed, and experimental. Under the Nuremberg Code—the foundation of ethical medicine —no one may be coerced to participate in a medical experiment. The individual's consent is absolutely essential. No court has ever upheld a mandate for an EUA vaccine. In *Doe #1 v. Rumsfeld*, 297 F. Supp. 2d 119 (2003)¹⁵, a federal court held that the U.S. military could not mandate EUA vaccines for soldiers: "...[T]he United States cannot demand that members of the armed forces also serve as guinea pigs for experimental drugs" (*Id.* at 135). Are you aware of this?

6) The United States Code of Federal Regulations, The National Research Act of 1974 and the FDA require the informed consent of human subjects for medical research. The EUA COVID-19 injections are unapproved, unlicensed, investigational vaccines that are still in their experimental stage. It is unlawful to conduct medical research on a human being, even in the event of an emergency, unless steps are taken to secure the informed consent of all participants. Are you aware of this?

7) Since the Covid lockdowns began over one year ago, there have been over 178 reported breaches of unsecured protected health information (PHI), incidents investigated by the Office for Civil Rights (OCR). These breaches exposed millions of people's personal health information. Although many of these incidents were attributed to hacking, some of the breaches to PHI fell directly under the 1996 Health Insurance Portability and Accountability Act (HIPAA), such as sharing a patient's or person's information with an unauthorized individual or incorrectly handling PHI. How are you going to protect personal information with respect to your proposed requirement that students receive this injection?

8) Whereas pharmaceutical companies that manufacture EUA vaccines have been protected from liability related to injuries or deaths caused by experimental agents since the PREP Act was enacted in 2005, companies and all other institutions or individuals who mandate experimental vaccines on any human being are not protected from liability. Are you aware that you do not enjoy such liability protection?

9) Are you aware that students or their parents could file a civil suit against you, as individuals should they suffer an adverse event or death?

As legally authorized member of SBOH and/or TAG, please read and consider all of the above information and the included endnotes. Please note that you have been advised and as such, you individually will be held liable for any damage caused by requiring COVID-19 EUA vaccinations and testing.

Respectfully submitted,

Judith LJ Gunn

JAMA Internal Medicine January 15, 2021

Comparison of Saliva and Nasopharyngeal Swab Nucleic Acid Amplification Testing for Detection of SARS-CoV-2

Findings In this systematic review and latent class meta-analysis adjusting for the imperfect reference standard, saliva NAAT had a similar sensitivity and specificity to that of nasopharyngeal NAAT.

Meaning Given the ease of use and good diagnostic performances, these findings suggest that saliva NAAT represents an attractive alternative to nasopharyngeal swab NAAT and may significantly bolster massive testing efforts.

Subject: Washington State Board of Health Meeting January 12, 2021- Vaccines

External Email

To whom it may concern;

I oppose any of the Washington State Board of Health members who recommend the requirement of vaccines for school aged children, especially the covid 19 vaccines or boosters. They are not preventing the virus and can have harmful side effects, as we've seen. Most importantly, it is clearly unconstitutional!

Sincerely,

Keli J. Brocha

Subject: We the People DO NOT CONSENT!

External Email

"Dear Board of Members,

No CDC guidelines, OSHA regulations or health officer order can suspend our rights. "We the People" and do not consent. We do not give you the authority to force any medical procedures on our children, elderly, or on any human being that does not choose of their own free will your offerings of "public health" in a vaccine trial.

Your chapter 246 - 100 and rule making petition for 246 -105 try to confuse, coerce, intimidate, threaten and harass us. This is called retaliation and discrimination, and that is against the law.

We have the right to determine what is the best for our families and what is done with our body and it doesn't matter whether the vaccine only has an "emergency authorization" or not.

The masks and the testing are also "emergency use authorization" but even if they weren't, we cannot be forced into complying. Only a licensed medical doctor can suggest a medical treatment such as a mask, covid testing or a vaccine. You or school administrator has no authority to do so.

We have the constitutionally-protected and GUARANTEED right to life and the right to determine what it's done to our body.

We are covered under ADA laws and our needs would have to be accommodated by law.

You are not a medical professional and, therefore, you are unlawfully practicing medicine by prescribing, recommending, and using coercion to insist on this experimental medical treatment.

Whereas:

1. The Nuremberg Code, codified into US Federal Law, prohibits forcing or coercing anyone, under any circumstances, to participate in a medical experiment; and the Code states "the voluntary consent of the human subject is absolutely essential."

2. Phase 3 clinical trials of COVID-19 vaccines are not yet completed. C4591007—the main clinical trial in children and young adults with BNT162b2—has an estimated completion date of May 5, 2026 and hence qualify as medical experiments. People taking these treatments are enrolled in clinical trials.

3. The vaccine formulation now being given to U.S. children aged 5-11 is NOT the same formulation used in the clinical trials, and NOT the same formulation that has been administered to all other age groups under EUA. So even when current ongoing clinical trials are complete, the results cannot be assumed to be relevant to the safety or

effectiveness of the new formulation.

"The vaccine that is authorized for use in children 5 through 11 years of age includes the same mRNA and lipids but different inactive ingredients compared to the vaccine that has been used under EUA in individuals 12 years of age and older and that has been studied in clinical trials." Source: <https://www.fda.gov/media/153717/download>

4. Most vaccines are trialed for at least 5-10 years and COVID-19 vaccines have been in trials for less than one year.

5. No previously attempted coronavirus vaccines (ie. MERS, SARS-1) has been approved for market, due to antibody-dependent enhancement resulting in severe illness and deaths in animal models. The participants in clinical trials involving children aged 5-11 received "two doses of 10 µg BNT162b2 or placebo (saline)", not the new formulation. Source: <https://www.fda.gov/media/153447/download>

6. Numerous doctors, scientists and medical experts are issuing dire warnings about the short and long-term effects of COVID-19 vaccines, including but not limited to death, infertility, miscarriages, Bell's palsy, blood clots, cancer, inflammatory conditions, autoimmune disease, early-onset dementia, convulsions, anaphylaxis, myocarditis, and antibody dependent enhancement leading to death.

7. Children and youth are at virtually no risk of dying from COVID-19 or transmitting it to others, but deaths and injuries to children and youth have already occurred in the COVID-19 injection clinical trials.

8. FDA admits safety unknown. Children are being used as test subjects, with their parents acquiescing under fraudulent marketing pressure. Public Health messaging does not match the reality of the current knowledge base. At the October 26 VRBPAC meeting, FDA Advisor Dr. Eric Rubin admitted: ". . . but we're never going to learn about how safe this vaccine is unless we start giving it."

Source: @6:52:33

https://youtu.be/laaL0_xKmmA

9. International Alliance of Physicians and Medical Scientists has declared that children should be excluded from vaccine mandates:

"Consensus is clear among MDs and medical PhDs: following 20 months of exhaustive research, millions of patients treated, hundreds of clinical trials performed and scientific data shared worldwide, they conclude that healthy children and the COVID-recovered should be excluded from restrictions and vaccine mandates."

Source: <https://globalcovidsummit.org/news/thousands-of-physicians-and-scientists-reach-consensus-on-vaccinating-children-and-natural-immunity>

10. There have been more deaths from COVID-19 vaccines, as reported to the Vaccine Adverse Events Reporting System (VAERS), than death
www.fda.gov

fda.gov

Lisette

Lisette Caire

10. There have been more deaths from COVID-19 vaccines, as reported to the Vaccine Adverse Events Reporting

System (VAERS), than deaths in the last 10 years from all vaccines combined and only

1% -10% of vaccine injuries are reported to VAERS. The full extent of adverse events from the COVID

vaccines is unknown as there is a significant delay in uploading reports to the VAERS database.

The risk associated with COVID-19 vaccinations is extremely dangerous to the health and well-being of all children

and this form of treatment unnecessary.

Any coercion or pressure tactics used for students to be vaccinated contravenes the Nuremberg Code, the Helsinki Declaration and Federal Law.

Any use of "implied consent" by any minor child under the age of 18 is defined in law as gross, contributory, and culpable criminal negligence.

Any party found to be involved in vaccination coercion when entrusted with the care of our children such as all school staff, school board members and executive, and any other adults who may have access to our children while under their care. This includes the assistance of outside school staff, contractors, public health nurses, or health officials could be prosecuted to full extent of law and you may be held personally and criminally liable for any injuries or deaths that may occur.

We are forced to err on the side of spiritual caution and refuse to harm our temples in honor of Gods Holy Word.

The 1st Amendment of the constitution has protected these exact claims before the Supreme Court on many occasions. Even State governments have faced this glaring truth during the Covid crisis as

they attempted to pass mandates and laws that violated this basic principle only to have their wrong decisions righted before the Courts, with financial penalties.

While, as Christians, we strive to be at peace with all men and to obey all laws and mandates from a Legitimately elected government. We do not do so in violation of Gods Holy Laws, of which the

protection of my body is one of those spiritual laws that supersedes all manmade laws in my religious conscience."

Subject: WAC 246-100-070 - Involuntary Detention of Person(s) in Quarantine Facility

External Email

My husband and I are fully vaccinated, tax-paying retired long time residents of Washington State. I contracted co-vid in September of 2021. It is from that frame of reference that I am writing to express my STRONG concern and OPPOSITION to WAC 246-100-070! To empower/require our police force to forcibly remove a person and/or a family FROM THEIR HOMES to a "facility" is a violation of their rights!

People that have already chosen the hard path of potentially losing their jobs and facing other ramifications of a sincerely held conviction that they should not be vaccinated should NOT face internment! Are we back to the camps of World War 2 and the subsequent confiscation of property and assets? Are we among those that have learned NOTHING from history and are thus destined to repeat it?

This feels more like Hitler's Germany than the United States that I have loved and supported all my life. How on earth would it be enforced, a door-to-door survey by officials demanding to see proof of vaccination, then pulling children – or parents – or both from their homes?

ARE OUR LAWMAKERS LOSING THEIR COLLECTIVE MINDS AND REASON??? How deluded and isolated must anyone be to even consider this insanity? The unintended consequences and collateral damage caused by allowing co-vid to be added to this WAC are too numerous to even consider.

I vehemently oppose the application of WAC 246-100-070 to those not vaccinated against co-vid.

RE: Agenda Item #11 to be discussed at the upcoming WSBOH meeting on
January 12, 2022

Dear Members of the Board:

We urge you not to mandate child vaccinations for the Covid-19 virus and its variants.

It is a fact that the vaccines are still in the experimental stage and thus should not be mandated for children. We are very concerned that a mandate would be considered for children at all due to the extremely low rate at which they are contracting, transmitting, and/or dying of this disease.

Thank you for your consideration in these matters.

Yours truly,

Subject: Washington State Board of Health Proposals

External Email

Dear Washington State Board of Health Staff,

Concerning including Covid-19 injections as part of school immunization requirements WAC 246-105:

None of the vaccines for Covid have been approved by the FDA but are experimental and under emergency authorization. The outcomes are not known. VAERS data released by the Centers for Disease Control and Prevention included a total of 965,843 reports of adverse events from all age groups following COVID vaccines, including 20,244 deaths and 155,506 serious injuries between Dec. 14, 2020, and Dec. 10, 2021. Why would you risk putting young healthy lives in such danger, when children and youth have a minimal risk of getting Covid and mildly if they do. Please reconsider this regulation and influence your fellow board members to remove the requirement of Covid injection at once, as a requirement for school immunization. Would you be willing to accept such a liability considering the incalculable risks to young lives?

Concerning allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040).

How does an order issued by a health official have the authority of law? Under the U.S. Constitution, laws have authority by consent of the governed. This is by representative legislation. The residents and taxpayers of the state of Washington have not been given opportunity for input during the formation of such regulations to be mandated. I find it outrageous that involuntary detention could be enforced based on (-040 (4). (v) 'suspected' communicable disease or infectious agent if known, then having to petition the superior court for release! Each person has the right of conscience to voluntarily accept or refuse medical examination, testing, treatment, counseling, or vaccinations of any kind. This is U.S. and International law. As stated above, the Covid vaccination is not approved, except as an experimental vaccine. All regulations must allow for informed consent. The VAERS data released by the CDC reports thousands of adverse events from these vaccines. Therefore, please remove these regulations.

Respectfully, Kathryn Libke

Washington State Board,

I am very disgusted that these are the proposed orders that are being voted on or even discussed upon. These policies are completely over reaching and immoral. These policies are stripping away our American freedoms.

We have seen some of these policies implemented in Australia and Europe; we have seen that these policies are not effective. These policies resulted in complete chaos with riots, job walk outs, and rage. These policies are disgusting and should have never been proposed to begin with. We are seeing our governor Inslee with many lawsuits and other governors indicted because of the unlawful and over reaching policies they have either achieved or tried to achieve implementing.

We all know that this vaccine is not effective since it does not stop someone from contracting covid, it doesn't stop transmission, nor does it protect anyone. Not to mention many people have died and had severe side effects from this vaccine. Why we are still pushing it, is questionable. This vaccine has been studied by many doctors and spoken about negatively. MRNA inventor Dr.Robert Malone spoke about the vaccine and how it weakens the immune system and each booster only makes your immune system weaker. This vaccine has been falsely advertised to the entire world and this needs to stop. These viruses will keep mutating and many people will not have the immunity to survive.

These policies are over reaching and it is not acceptable. The state board of health has an obligation to keep WA and all our residence safe, healthy and informed. I urge everyone to educate themselves about this vaccine and what is in it and what risks it holds.

I am completely against any of the proposed covid policies that are over reaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

Psalms 118:6 "The lord is with me; I will not be afraid."
Don't be deceived. Make the right decision. God is coming soon, each decision that harms Gods people, their DNA, and their livelihood will be held accountable.

TO EVERYONE INVOLVED IN MAKING DECISIONS FOR WASHINGTON STATE:

First of all, no one should be forced coerced or BULLIED into getting medication, treatment, counseling, vaccinated, microchipped, or ANY other erroneous forms of government/or state, threats to citizens. we can talk about the migrants flooding the US without necessarily needing to show any sorts of proof of vaccine STATUS, but this email is to ask for your reconsideration on bogus mandated crap.

This is one of the greatest divides in history among the American people; those for or against mandatory vaccines. Interestingly enough, this should be a simple choice for persons to decide if they take this or that for whatever reasons they hold truthfully.

Please take into consideration that our President is a puppet, dems happily appease their own kind, vaxxed people still get covid. The great mystery is this- immunity, natural immunity at best, fights off covid. Not to mention, the suggested regimen from the Frontline docs.

It's a flu. Get it and move on. Take your ivermectin too! SHEESH

Thank you for looking at facts first before making US show you papers.

Hello,

I am a parent in the PSD 401 school district. I am writing to oppose adding a Covid 19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools. This vaccine and its effects have not been studied for long enough. It does not prevent the illness from being spread and it does not prevent children from getting the virus. I have received two Pfizer covid vaccines myself and ever since I have suffered from menstrual complications. The NIH has funded studies to investigate the link between the covid 19 vaccine and menstrual complications. Until those studies are complete, I am not comfortable accepting this shot on behalf of my young daughters. Covid is now an endemic illness much like the flu. Each year new vaccines will need to be created to help us prevent most of the variants. As such, just like the flu vaccine, it should not be required for students in Washington public schools.

Thank you for your time.

External Email

To the WA State Board of Health,

I understand that you are going to be discussing allowing health officers to involuntarily detain a person for failing to voluntarily comply with any number of things including testing, treatment and vaccination for covid 19.

I understand the disease is unpleasant (as I had it this summer) and I understand some people die (as they have from colds and flu's for centuries) and I understand the need to mitigate the spread of the disease but these codes are extremely alarming to me and the vast majority of people I know. As the health depts have failed to acknowledge natural immunity is as good or better than vaccine induced immunity - does that mean your health officer could detain me and force vaccinate me if I refuse to take the shot simply because I have been exposed? I read the codes and that is certainly how it reads to me.

I can assure you that pushing this on the population at this time will do nothing but further fracture our society!

I strongly suggest that you refrain from taking such tyrannical action. It will not be well received by the public!

Sincerely,
Laura Dentone

PS - Text I received regarding your proposed policies

WA State Board of Health will discuss applying current infectious disease WAC codes to include Covid-19 for all WA State residents.

PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Subject: WSBOH Public Meeting January 12, 2022

External Email

To the members and staff of the Washington Board of Health,

I am a resident of Washington state. I have been for almost all my life. I came from a country that has strong ideologies. Ideologies that the America of the past would have never allowed.

I am proud to say for most my life, Washington was a haven for my family and me. I have enjoyed the privilege of living in a place that allowed me to have the freedom to go about my day without worrying too much about the political climate or government policies that could negatively affect me.

That has changed. I have never been very involved in politics or policies. However, since the emergence of Covid-19, I saw how fear and power changed the way people think and act. I saw how people began to distrust one another and pass judgment on people they've never met, or took the time to know. I saw public officials blatantly abuse the power that was entrusted to them in order to serve themselves, not the people that put them in office.

I understand that in the role that you serve, it is your responsibility "to provide statewide leadership in developing and promoting policies that prevent disease, and improve and protect the public's health for all people in Washington". But as leaders, it is also your responsibility to survey all available resources to ensure the decisions you make are good and just for all people in Washington. As public officials, your job is to serve the people in this state. As a public employee, I understand that calling.

But as a resident in Washington, when I heard of the possible implementation of WAC 246-100 for Covid-19 by your board, I was enraged. There are many reasons why the implementation of this policy would be detrimental for the people of Washington. Not only would it be an impingement of every citizen's rights and privacy, but it would exacerbate the already growing concern for the public's mental health.

I will focus on this. Multiple studies, including ones from the CDC, have found that isolation and loneliness has been an increasing issue since the pandemic. I have read countless stories and news headlines about teens and young adults attempting to take their lives because of loneliness and depression. Emergency room visits for suicide attempts have significantly increased since the pandemic. Social isolation and unreasonable policies hindering students from engaging with their peers and even family members have created an entirely new pandemic.

On top of that, if this board determines that it is necessary for school children to be vaccinated with the Covid-19 injections in order to attend school (per WAC 246-105), then this board will be an accomplice to the above problem. With the unknown health risks associated with injecting children with the Covid-19 vaccine, it is reasonable for parents to decline. Forcing this vaccine in order for children to attend school would be the opposite of reason and an insult to parents who have the right to choose for their children. Studies have shown that children are highly resistant to Covid-19 with over a 99% survival rate.

One of the ways that the government and its agents are able to maintain the trust of its people, is by operating in a transparent and legitimate manner. When a health officer is given "sole discretion" on when to detain a person for what they deem to be a "public health risk", this poses an issue. How many people's rights and liberties will be stripped because an officer thinks a person displaying covid symptoms needs to be detained and isolated. Yet healthcare workers are allowed to come to work with mild covid symptoms.

I am imploring this board to honestly consider the effects of this decision and vote NO to the implementation of WAC 246-100 and WAC 246-105.

Respectfully submitted,

H. Ngo
Washington State Resident

Subject: Washington State Board of Health Meeting - WAC 246-100-045

External Email

Hello,

My name is Kristine and I am emailing to voice my concerns with the upcoming meeting in WA Board Health Meeting.

Please do not enforce a vaccine, or any health mandate on the people. The vaccine does not prevent the spread of the COVID virus, and it should remain an individual choice to be vaccinated or unvaccinated.

Those who do want the vaccine, can easily get it, and spare themselves the greater risk from the virus. It should be a choice for those who do not wish to be vaccinated, to refrain from getting the vaccine, or any health care they wish to decline.

Do NOT impose a mandate for "conditions and principles when isolating or quarantining a person or group of persons in accordance with WAC 246-100-040

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FWAC%2Fdefault%2F100-040&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C8d123a96af41415e6cc508d9d1fcb5d3%7C11d0e217>%.
".

Protect our freedom of choice.

Thank you,
Kristine Krueger

This household of three voters is highly opposed to the following WAC's:

246-100-070
246-100-045
246-100-040
246-100
246-105

It's a fact that children are at VERY low risk from contracting and dying from Covid-19.
No one knows the long term affects or safety of the vaccines and people who have gotten
them are still getting sick anyway!

Stop this overreach!

Subject: Washington State Mandate

External Email

Hello,

I wanted to reach out regarding the new proposed vaccine mandate. I believe the best thing about our country is our freedom, which includes freedom of choice. While I have nothing against those who choose to get the vaccine for themselves and their children, the choice shouldn't be taken away from everyone else. This will only result in more of a divide and more homeschooling, which will ultimately affect children's social skills, causing more mental health and suicide issues amongst them.

Additionally, it seems as if we're ignoring the facts of what is going on right now. Whether a person is vaccinated or not, they are still getting Covid. The vaccine is not helping, so what is forcing it going to do to stop the spread? Some people may answer it will "lessen the symptoms" however, I disagree. From experience, I know people who are vaccinated and recently got Covid way worse than those who are not.

I greatly disagree with this new proposal.

Freedom (noun): The power or right to act, speak, or think as one wants without hindrance or restraint.

Thank you,
Lauren

Subject: Why the Pfizer Inoculation Does More Harm than Good

External Email

Dear Washington State Department of Health staff,

Please do not require school children and preschoolers to be inoculated with a Covid "vaccine" in order to attend school in our state!

Why the Pfizer vaccine for Covid 19 Does More Harm Than Good

Source: www.CanadianCovidCareAlliance.org

The Pfizer trial only used:

- 1) Unexposed & inoculated, and
- 2) Unexposed & not inoculated.

They should have also included:

- 1) Exposed & inoculated, and
- 2) Exposed and not inoculated (aka natural immunity from having had Covid).

The fact that they avoided the latter 2 shows that they thought their Pfizer vax wouldn't perform well in those categories. A study should show how those exposed and not inoculated fare vs. inoculated & exposed. It didn't.

The clinical endpoints of the trial should have been: Do people who take the Pfizer vax have less illness and death? (It wasn't) Choosing the proper endpoint is well-known, as a result of testing of cancer drugs. In cancer drug testing, they had to switch to all-point mortality, and Pfizer should have done so.

They could easily have included biomarkers, but they didn't. We need to know how people exposed, but not inoculated compare with the exposed and inoculated. This is natural immunity, and we need to know how those with natural immunity fared.

They should have tested for: de-dimer levels (micro-clotting) before and after.

Other biomarkers Pfizer should have and easily could have tested for: inflammation, barrier permeability, hypoxia, cardiac damage, predisposition to Alzheimer's, predisposition to autoimmune disease.

They should have had biomarkers for thrombotic disease. This is a condition which would take time to surface, but could have been measured before & after in biomarkers. Many doctors are reporting thrombotic conditions in vaccinated patients.

Vaccine passports: The Pfizer vaccine was not tested for spread reduction: No evidence at all that they reduce transmission and disease, and that was never one of the endpoints of the study. All they measured for was, "Do people who take the vaccine test

positive for Covid-19 less often?" and the study was designed so that they would get few "no" answers, and they then proceeded to a vax rollout.

Testing failures: Subjective testing: The study did not test all patients for Covid-19! Instead, they only tested for the Covid-19 symptom, and then left it up to the discretion of their investigators to decide what that was. So that means that asymptomatic infection would be missed entirely. And it introduced a high level of subjectivity to the trial, because an investigator could actually decide whether to test or not to test. This lack of systematic testing actually makes the results of the trial unreliable. All participants should have been tested.

There is considerable missing data in the study. The endpoint is all Covid cases: 8 inoculated vs 162 placebo. But it's such a small # of participants to begin with. But there are 80 lost follow-up subjects in the inoculated group! They don't know whether they got sick or not, or even died. They don't know. That's 10x more than the # of Covid cases they had in the inoculated group. So if a significant proportion of those 80 had been positive, it would have dramatically changed the results. Also, all the suspected but unconfirmed cases: 1594 in the inoculated group, 1816 in the placebo. This means they were symptomatic, but the investigator never followed up with a Covid test! These are huge numbers compared to the confirmed cases! The fact that the suspected cases which weren't tested were significantly larger than the endgame results means that this data is unreliable. The study should not have been accepted.

What about the placebo group? There were also many unconfirmed cases. If all these cases, inoculated and placebo, were positive, the relative risk reduction would then only be 19%. That's not a high enough percentage to gain approval.

Adolescents: The inoculation is really all risk and no benefit.

Teens are statistically at 0% risk of death from Covid-19. But the vaccine does pose risk of serious events. But the study was not designed to find serious adverse events. A serious event that occurred at a rate of 1/800 might not even show up in a sample of 1,005 people.

In the tests, there was a serious event in at least one subject who was inoculated. A 12-year-old girl. She experienced multiple serious effects, including lost feeling from the waist down, lost bowel and bladder control, menstrual cycle issues, seizures, verbal and motor tics, dizziness, fainting, headaches, brain fog, erratic blood pressure, and more. And the last 10 months, she is wheel chair bound and fed by a feeding tube. Pfizer labelled her case "functional abdominal pain."

5-11 year olds: The inoculation is an unacceptable risk to this group. Pfizer, using predictive modelling, acknowledges that their inoculations WILL cause myocarditis, but optimistically claims there will be zero deaths from myocarditis in any of their modelled scenarios. It's speculative. Still, there's no justification for giving children myocarditis. But the government has actually normalized myocarditis in kids, publishing Sick Kids brochures of how to deal with myocarditis in kids. But how to deal with it is to not cause myocarditis in kids! It's very serious. It causes permanent damage. Severe myocarditis weakens your heart so that the rest of your body doesn't get enough blood. Blood clots can form in your heart, leading to a stroke or heart attack. And the mortality rate is up to 20% at 6.5 years. The risk of 4 in 20 children who contract myocarditis dying within 6.5 years is unequivocally an unacceptable risk for children. But the FDA maintains that it is an acceptable risk for children. They have actually abandoned the "do no harm" principle.

Dr Eric Rubin of the New England Journal of Medicine (NEJM) has said that the way to find if they do harm is by doing a roll-out on the population. He voted to roll out inoculations for ages 5-11, and suggested that a population level roll out as an

appropriate way to test for adverse events. Of note, the NEJM is also the publisher of the Pfizer reports.

Governments are proclaiming the inoculations to be safe, yet the data is not there to back that up. Pfizer admits that their long term immune response, efficacy & safety data is limited and that their studies weren't powered to find "rare" side effect, as only about 1500 kids were in the testing group which received the inoculation. The law of informed consent says that parents should be told about these risks, but it's not happening.

On Nov 2, the British Medical Journal released an article about their investigation into Ventavia, one of the research companies Pfizer hired to conduct the trials. A whistleblower who was a Regional Director reported to the FDA that Ventavia: falsified data, unblinded participants, did not follow up and test participants who reported symptoms, and mislabeled some specimens. Several other employees backed up the Whistleblower's account. But Pfizer never disclosed the problems in its EUA application, and in fact, Pfizer has now hired the same researcher, Ventavia, to run more Covid-19 clinical trials.

So it's not surprising that we are seeing the issues we are in the 6-month report.

Manipulation of Data Cohorts: Pfizer took the results from their adult trial, which started July 27, 2020, and then added in the results from the 12-15 year olds' trial, despite the fact that the adolescent trial started four months later. Since it's well known that the efficacy wanes over time, this gives a false boost to the efficacy numbers. The efficacy of the two groups should have been reported separately, not presented as one combined result.

Pfizer trials did not prove safety. They proved harm. The endpoints of the trial should have been illness and death, not a positive or negative Covid-19 test. But their test actually showed harm. They used younger, healthier groups than the vaccine would eventually be rolled out to. Here are some results of Pfizer's own randomized control trial: Related adverse event, +300% over placebo group; severe adverse event, +75% over placebo group; any serious adverse event, +10% over placebo group. Deaths in the vaccinated group: 20; placebo group, 14.

How is this harm playing out in the real world? Governments are assuring us that they are monitoring safety and will let the public know if there are problems. But once the vaccine was rolled out at the population level, the surveillance method for reporting is called "passive." It's difficult and time-consuming for overworked doctors and health workers to file the harm reports, and then it goes thru several levels of bureaucratic approval before the case is accepted as a vaccine-related injury.

"Active" surveillance was used for trial participants. They were given a phone app with choices of adverse events they experienced. 78% reported adverse reports, and 5% were serious. There was also journal entry options for the participants, and 30% reported adverse events thru that, and 2% were serious. But when the reporting method was switched to passive for the general population rollout the reporting fell way down.

But some news is getting out: For example, the risk of myocarditis is becoming known. And it's occurring in younger, healthy population where there was previously a very low rate of myocarditis.

On Nov. 17, the FDA released the first batch of data to satisfy a Freedom of Information request. This is data used by the FDA to approve Pfizer's covid-19 vaccine. One report in which Pfizer tracked adverse events in the first 2.5 months after the EUA, reported 1,200 deaths and over 25,000 nervous system adverse events. Under "Safety Concerns" Pfizer listed Anaphylaxis and Vaccine-Associated Enhanced Disease. This document should be incriminating for any agency who saw it and called the vaccine "safe."

Pfizer's criminal past includes lying about a heart valve which fractured and killed hundreds; conducting clinical trials on African children without their parents' consent, after which some of the children died; bribing doctors; suppressing research; manipulating studies; withholding information that its products caused cancer; fraudulent marketing, and many more. They've literally paid billions in fines and settlements for their actions. So they are not a highly ethical corporation.

The CDC has redefined "vaccine" to suit political & pharmaceutical interests. The new definition of vaccine by the CDC is "A preparation that is used to stimulate the body's immune response against diseases." The new definition does not indicate there is any actual benefit derived from a vaccine.

Subject: Washington Schools Vaccine Mandates for Children

External Email

Dear, WSBOH

Today I am writing to you to express my concerns on hearing that the Department of Health is considering mandating COVID Vaccines for children to attend school. I am completely AGAINST such a mandate.

The COVID Vaccines in the USA are NOT FDA approved and are being administer under and Emergency Use Authorization. According to the Nuremberg Code EUA products can not be mandated.

The risk of children dying from COVID are statistically at zero risk. The survival rate is from 99.997 – 99.998%. There can not be a benefit to mandating children to be vaccinated as there is no risk. No one knows what the long term risks of the vaccines are. We should not react out of fear.

Do not allow this mandate to move forward, Please.

Sincerely

Mr. James Deady

THIS IS NOT OK. Talk about taking freedoms away and weaponizing the department of health and going full-on communist/nazi.,

What you are now proposing are deterrment camps JUST LIKE DURING WWII that the Nazi's AND OUR OWN GOVERNMENT DID. NEVER in the history of our great nation have the healthy people been detained because those who are ill are afraid. We still have God given rights over our own bodies. If you think this is okay then you need to fully come out of the closet as a full-on communist/nazi. But to treat the taxpayers of Washington state in this manner is a slap in the face. Government cannot control a virus that has been released on purpose. Government cannot regulate itself into health.

How about promoting healthy eating, exercise instead? Have any of you ever considered that as an option?

And giving kids the covid-19 so-called "vaccine" to children is proving more and more to be a detriment to their health including death.

I strongly urge to vote NO on weaponizing the department of health and law enforcement.

Attention Member of the Washington Board of Health,

As a US citizen and resident of Washington State I want to express my strong objection to WAC 246-100. I understand that it will allow local health officers to use law enforcement (WAC 246-1—070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to comply with requests for medical examination, testing, treatment, counseling, vaccination (WA 246-100-140).

I believe this is unnecessary overreach by this State. It seems like we are heading toward a pattern of control that resembles Communism. Please reject this legislation and protect our freedoms.

According to this proposed rule change, the state of Washington intends to incarcerate such individual's as have decided: "my body my choice". Such detention/incarceration would be without criminal charge, a writ of "habeas corpus" before a judge, or a judicial hearing of any nature with legal counsel. Clearly, illegal and unconstitutional.

Welcome to Adolph Inslee's "Final Solution".

Subject: Washington State Board of Health hearing

External Email

Dear Washington State Board of Health:

I am very concerned about the proposed rule giving DOH powers to involuntarily quarantine or inject US citizens is in violation of federal law.

Under Title 21 CFR (Code of Federal Regulations) Section 50.23 & 50.24 It is illegal to exercise coercion when administering experimental medical treatments. Coercing any US citizen to receive medical treatment against their will constitutes an act of domestic terrorism, which is a felony. Any attempted enforcement of such an unlawful rule would expose anyone enforcing it to charges of domestic terrorism. Since the proposed rule will be UNLAWFUL by definition and will also violate WA State Constitution, Article 1 Section 7 - right to privacy - there is only one option. Abolish consideration of such a rule or face criminal charges (Domestic Terrorism and/or Conspiracy to commit Domestic Terrorism).

This virus has a very low mortality rate in children. Their recovery is 99.985%. My children have natural immunity as well as myself. There are more than 140 studies that demonstrate that natural immunity is equal or better than what is achieved by vaccines. The new variant strains are evading the vaccine and that immunity is waning. Thus,

Please do not put our children as well as other citizens in this situation.

Sincerely,

MaryJane Healey

Subject: WSBOH pediatrics Covid-19 vaccine requirement

External Email

Dear WA Board of Health,

I am opposed to requiring the Covid-19 vaccination for children to go to school because it is not FDA approved and there have been no long term studies showing that it is safe. This is asking parents to inject their child with something that could have life altering effects. Long term studies are necessary before making anything a requirement. In addition, the idea that WA state would consider forced quarantine or incarceration due to choosing not to take an injection of an unproven vaccine is abhorrant. This goes against both the constitution and basic human dignity. As a life long citizen of Washington State, I expect my elected officials to uphold my right to make informed consent health decisions for myself and my minor children without threat of forced quarantine or separation.

Thank you for considering my comments.

Sincerely
Kari Day

Subject: We The People are your bosses

External Email

To whom it may concern, you unelected bureaucrats,

I am a FREE citizen and lifelong resident of Washington. I reside in Spokane County. I am one of your bosses. I am not your servant, peasant, subject, peon, or inferior.

I have a multitude of questions, serious, important questions, and a lot to say about the way people employed by the government of Washington have begun to believe they are the rulers of the citizens of Washington, have come to the completely mistaken and wicked belief that they are entitled to make private, medical decisions for the citizens of Washington and the children, and that they have the right to coerce, compel, and force the FREE citizens of Washington to do anything, especially anything that violates a free human being's bodily autonomy.

I OPPOSE WAC 246-105 (You may NOT allow Covid-19 injections to be added to school immunization requirements.)

I OPPOSE WAC 246-100 (You may NOT allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040).).

I do not agree that these WACs should be modified, changed, or altered in any way to add any language referring to COVID-19 or coronavirus or any of the variants.

I DEMAND that you tread lightly and remember that We The People are free, sovereign human beings with the right to speak and move freely, amongst other things. You have no right to violate our rights, freedoms, or bodily autonomy. Anything you do while being paid by the taxpayers of Washington must be with the full awareness of our rights and zero treading upon them.

My first question, a 2 parter, which you MUST address: When did you become the rulers/bosses/parents/supervisors/kings/queens/lords/stewards of the citizens of Washington? And when did WE the People abdicate our rights and freedoms to you?

If your answer is anything but "NEVER" and "NEVER" then you should resign in shame immediately. How dare you believe, even for 1 second, that YOU have any right whatsoever to dictate anything to the free citizens who have chosen to live in

Washington? WE are YOUR bosses. WE pay your salaries. You are supposed to work for us. We are not peasants, subjects, peons, slaves, indentured servants, children, minions, inferiors, etc. We have the right to make our own decisions. You have ZERO right to impose your wicked ideas on us, to force, coerce, threaten, chide, compel, or anything. If you cannot remember these things then resign right now. You have no business being in "public service" if you cannot remember YOU SERVE THE PUBLIC. As the publicly funded website for the Board of Health says, "the State Board of Health has served the people of Washington for 132 years." SERVED THE PEOPLE. It does NOT say "ruled the people." Further, it says you "promote policies that protect and improve the public's health." Promote does not equal "coerce" or "force" or "rule." Maybe you should refresh your memories and remember your places (that would be beneath the people who are your bosses, by the way).

We elect representatives to a legislature where they discuss, write, take opinions on, debate, and vote on laws. We did not elect career bureaucrats to create rules, regulations, or demands on the people. If you have not been elected to a legislature then stop thinking you have any right to force your notions upon us. No rules/regulations without representation. If you are in the legislature, then it's time to remember YOU WORK FOR US. You have no business creating and passing laws that violate our freedoms and rights. If you cannot remember this, then resign in disgrace. I do not care if the legislature "grants you powers." They only serve with the consent of the governed and we do not consent to be experimented on, to be ruled by unelected (or elected) power-hungry fascists or give up our rights, freedoms, and bodily autonomy. WE DO NO CONSENT.

WE ARE IN CHARGE, not you. You have ZERO right to violate my bodily autonomy, make medical decisions for me, force me to inject ANYTHING in my body, deny me entrance to publicly funded spaces, force me to wear fabric on my face, coerce me to inject anything into my body, coerce me to wear fabric on my face, etc. etc. As a free human being, I get to decide what I inject into my body, what I wear, and where I go. My tax dollars pay for publicly funded spaces and if you want to deny me entrance to anything my money pays for then I want all of my money back and I will no longer pay taxes. Such things are literally discrimination, segregation, and immoral. I will not share my private medical choices with event staff, clerks, government officials, or to enter establishments, public or private. My private medical records are MY BUSINESS ALONE. If you think forcing people to share their medical records with others is acceptable, then you better be ready to put your own medical records out in public view immediately so we can all have a look and make decisions on what you are allowed to do, what you must inject, the behavior you are no longer allowed to engage in, etc. Further, if you want to coerce us into sharing this medical decision, then it's only fair that everyone's every medical decision be public record. Promiscuous? Then we want to see if you have STDs before you can be in public. A drinker or smoker? We get to dictate what you get to do in life. A drug user? We get to make decisions for you, too, and share everything publicly. Or maybe you should back this runaway train up and remember you serve free citizens who have the right to private medical records.

Second Question: When did the free citizens of Washington give their children to you to raise? Why do YOU think you have the right to dictate other people's children's medical decisions? Children belong to God and with their parents. They do not belong to the governor, the attorney general, legislators, school principals, babysitters, cousins, neighbors, store clerks, or you, unelected, arrogant, power-hungry bureaucrats. You have NO RIGHT to decide what is injected into other people's children. Parents have the responsibility to make decisions for their children.

COVID-19 is really not much of a threat to MOST people and it's even less of a threat to children. According to the CDC's best estimate of the infection fatality rate for individuals ages 0-19 is 0.00002, meaning 99.998% of children survive it. Why on earth do they need to be injected with things which have no long-term studies or trials? These shots have barely been around for a year and you cannot possibly argue that a year or 2 suffice as "long-term." It is horrifying that you are even considering making experimental shots mandatory for anyone, let alone children. Other immunizations (which actually IMMUNIZE, unlike the COVID "vaccines") were tested for a long time before they were used and were available for a long time before anyone considered making them mandatory. As COVID primarily impacts the elderly and the ill, it is unconscionable to demand children be forced to get injected with these experiments. Please refer to this article and many others like it for more information, as apparently you are completely ignorant of reality: <https://www.tabletmag.com/sections/news/articles/covid-vaccine-mandates-kids-legal>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.tabletmag.com%2Fsections%2Fnews%2Farticles%2Fcovid-vaccine-mandates-kids-legal&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C0cf58d53d9e849a2591508d9d1c8a1d8%7C11d0e21>

Currently, as I am sure you must know, there is no COVID-19 "vaccine" available in the United States outside of ones approved only under the Emergency Use Authorization, which is only possible if there are no therapeutics available to treat something. As we all know, there are therapeutics available to help fight COVID-19. I believe you cannot mandate these shots as long as they are under the EUA. And, as you know, "Comirnaty" is not available in the United States so you cannot mandate children be forced to get the EUA injections. Or anyone else, for that matter.

To quote the article above at length:

"In 2004, under Section 564 of the Food, Drug and Cosmetic Act, 21 U.S.C. § 360bbb-3, Congress permitted the FDA to grant EUAs so that any American in a personal emergency can choose whether or not to explore potentially lifesaving treatments that have not gone through the full testing regime. In other words, the legal basis for EUAs is a matter of the individual right to access experimental treatments, not of government right to compel such treatments. EUA products, by definition, have not yet been proven safe and effective according to FDA standards.

Indeed, Congress has recognized that Americans should not be forced to take medical products that have not been deemed safe and effective by the federal agency charged with the power to to decide. The same federal statute that authorizes EUA products also requires, among other things, that potential recipients of such medications be informed "of the option to accept or refuse administration of the product, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks." According to a plain reading, individuals have a statutory right to "refuse administration" of a vaccine approved only for emergency use. The language leaves no doubt that Congress intended for any decision to take such products to be made free of coercion, pressure, or duress. A city or school system that withholds children's access to education, extracurricular, and recreational activities—all crucial to their cognitive and emotional development—violates both the letter and the spirit of the statute."

I read this and think you should read it, too (or read it AGAIN): 'As the Technical Advisory Group stated during their meeting on December 29th, in order to amend Chapter 246-105 WAC "the vaccine (Covid vaccine) containing this antigen must PREVENT disease(s) that have significant morbidity and/or mortality". CLEARLY, these COVID "vaccines" DO NOT PREVENT TRANSMISSION. We were told repeatedly, by the

CDC, Biden, and the rest of the snake oil salesmen, that these "vaccines" would 100% prevent you from getting or transmitting COVID-19. That was obviously a bunch of lies. Numbers show that highly "vaccinated" places are seeing massive surges of "cases." Masks also do not stop transmission (DUH) either and we do not consent to be muzzled. The only point of mandating these shots which do not prevent transmission is to control free human beings and force them to do as you "command." NOPE. We do not consent.

There are no Washington laws which give you the authority to mandate citizens must take an medication or have any medical intervention. Such a thing is so far out of your purview that you should never show your face again in public if you think you have even a tiny, infinitesimal "right" to do so. Requiring these untested "vaccines" for children is outside any law as well. Such decisions belong solely to parents/guardians and children. As the article says, "The Ninth and 14th Amendments to the United States Constitution protect the right of individuals—both children and adults—to bodily integrity and to decline unnecessary medical treatment."

Further, Natural Immunity is an important, long-studied scientific fact which those in the "health" field, in their haste to seize control and impose their own wills upon free citizens, have decided to pretend doesn't exist. Do you force those who have had chicken pox or measles, etc., to get the actual vaccines for these diseases? Do you force them to get "booster" shots? No, you do not, as such things would destroy the natural immunity which does a better job than anything created in labs. Since the COVID "vaccines" do not immunize anyone, you have no reason to coerce, compel, force, or mandate anyone into getting these shots. You have no moral, ethical, scientific, or legal standing to do so. If you think you have such rights, then please be aware that others can use the same arguments to dictate their beliefs in the future. Most Christians do not believe in sex before marriage and a case could certainly be made that engaging in such promiscuous behavior has consequences that hurt society at large, which would mean the government should be able to force interventions on those who think they have the right to decide who they sleep with. Etc. If you want to open that door, we're happy to make sure everyone in this Godless state is living pure, holy lives.

As we do not know the bodily consequences these "vaccines" might have long-term, it is unconscionable that you would even consider mandating them for children (or anyone). We cannot have any idea how their developing bodies might be hurt by these experimental shots. Are you prepared to be sued, as a "board" and as individuals by parents whose children are damaged by something you ordered before long-term studies can possibly exist? You will be morally, ethically, and, hopefully, criminally/monetarily/civilly held liable for any consequences if you mandate these for children. If you have half a brain amongst you, then you will step back, remember your place, and wait a decade or more to see how things go. Parents/guardians have the sole rights to make this decision for children. NOT YOU.

Under Jay Inslee's hateful guidance, government workers have arrogantly decided they have the right to dictate to the free citizens of this state, to discriminate, segregate, violate bodily autonomy, and threaten, coerce, force. We live in the United States of America and as Americans, we are FREE. We have the sole right to decide what medical "treatments" are injected into our bodies. We have the right to move freely, at will, to speak freely, to assemble, and to get rid of all governments which violate our rights. You are employed by the citizens of Washington. You better remember your place. You may provide suggestions and we are free to ignore them. There is not one medical treatment or medicine which every single person needs. Not one. We do not force healthy people to have chemotherapy or take heart medication (malpractice, anyone???). We do not put casts on unbroken legs. Why on earth would you think everyone should get these

experimental shots? You have no idea what consequences many people will face due to your immoral, unethical coercion. You may recommend people get these experimental shots. You may NOT demand, force, coerce, pressure, threaten, or mandate them. In the last two years, you have created a hateful, divisive, cruel society where you segregate people based on their personal medical choices. You tell them they are less than, vectors for disease, and evil, when they are not. You lock them out of society and foment hatred against them. Is it any wonder that there have been so many more opioid overdoses and deaths, more domestic violence, more suicides, more hopelessness? YOU have contributed to these deaths and despair. YOU. And yet you cruelly continue to divide and subjugate us. If you care about the health and well-being of all Washington citizens (what a laugh!), then you should be concerned with all of those people. Vastly higher numbers of people have been affected by those things than by COVID-19 but you have ignored them at our peril. You have failed to encourage therapeutics, exercise, and healthy eating to prevent COVID and other things. You have locked people inside, kept them away from co-workers and loved ones (gathering strengthens immune systems, obviously, so it's interesting to consider whether you purposefully crafted policies which forced people to weaken their immune systems), and tried to keep them frightened.

Government is instituted by the people, for the people, to make life better for the people, not to rule the people. Free people cannot be compelled by any government or business or person to violate their bodily autonomy. Do you know what we call it when a person uses force or coercion to violate another's bodily autonomy? RAPE. We call it rape and it is immoral and evil. You have no right to violate our bodily autonomy or our children's bodily autonomy. We do not consent to any violation of our bodily autonomy. We do not consent to being locked out of society. We do not consent to be ruled by bureaucrats.

If you are a doctor, you have presumably taken an oath to "do no harm." Yet, in the last two years, you have crafted policies which have done immeasurable harm. You have kept people frightened, alone, and you should be held accountable for these things. Time to remember your oaths and step back from committing evil against the free citizens of Washington. You continue to abuse power loaned to you by the legislature, which only has power because it is loaned by the people. We do not consent to be abused, manipulated, frightened, coerced, forced, threatened, segregated, discriminated against, or locked out.

Perhaps you should spend some time learning more history so you can see how those who violated bodily autonomy and freedom are remembered. Many were put on trial and faced severe consequences for their evil actions. You have the choice to violate freedoms or to step back and recognize you have no such powers on this earth. For example, you should read the Nuremberg Code and why it was instituted in the first place. Never in history have the good guys been the ones coercing, forcing, threatening people with injections. So perhaps you might recognize which side you are currently on here. (Not the good guys, obviously.)

Nuremberg Code:

1. The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the experimental subject there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all

inconveniences and hazards reasonably to be expected; and the effects upon his health or person which may possibly come from his participation in the experiment.

"The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs, or engages in the experiment. It is a personal duty and responsibility which may not be delegated to another with impunity." (This means each of you individually is responsible for ascertaining the consent of the people, as in each person you think should be forced to have these experimental shots, and if you force/coerce/threaten, then you are individually responsible for the consequences. You cannot say it was a group decision or you just went along with others. You are complicit and morally, ethically responsible.)

I am a K- 12 educator in WA State and have been instructing students for 40 years.

I'm writing to you about the agenda for the January 12, 2022 meeting.

I am in opposition to the following:

1) Any involuntary isolation/quarantine of people as described in parts of WAC 246.100;

2) Any mandate on COVID vaccines for children as a requirement to attend K-12 public schools.

Sincerely,

Leslie Drury

Dear Sirs:

I am responding to the agenda items for your upcoming meeting today. I understand that public comments can be given this morning.

I am opposed to WAC 246-100 rulemaking that would expand any BOH authority to quarantine individuals or families involuntarily. I also oppose adding a Covid 19 vaccine requirement for children to attend schools.

Thank you for adding my public comment to your agenda.

Subject: WAC Codes & Covid 19

External Email

To whom it may concern,

I am writing to you all this morning to inform you that what you are considering is against not only the Washington State Constitution, but more importantly, the United States Constitution.

For you to even consider using Law Enforcement as a weapon against the citizens of Washington State, for practicing their Right to self govern is absurd at best. Governor Inslee & the D.O.H. have no authority to take such actions. One would think that someone would look at the U.S. Supreme Court's decision AGAINST the Biden administration in regard to his Covid 19 vaccination mandates & realize that the steps you all are considering have no legal leg to stand on.

It is my hope that you will reconsider these scare tactics, come to your senses & know that we have the right to self govern not only ourselves, but our children as well. These are our bodies & our choices.

Thank you for your time.

Subject: You can not implement the vaccine mandate for Wa school kids.....

External Email

I vehemently oppose the implementation of a Covid 19 Vax requirement for schools in Washington State. For starter, based on reason #1 below and on so many other laws, this is flat out illegal. It would be harassment and coercion of the citizenry by those who are put in place by the citizens to protect the health of the citizens.

Secondly, it makes absolutely no sense and most people realize that, except the few that have been terrorized by the fear campaign and miss-information. It is clear now to everyone, and cited by the CDA, that the vaccinated are getting the virus, can spread it, and are getting sick from it (just as sick I might add), just like the unvaccinated. So the experimental shot makes zero sense to get, especially for children. Healthy children have literally no risk of getting hurt from this virus. On the other hand, there is a serious risk of injury or worse. The heart problems are real, the CDC has admitted that, VAERs injury and death are real and much underestimated, and people can clearly see all this is happening... and who knows what other injuries and long-lasting effects these kids will get with clotting, etc. One thing is sure however, there will be some injuries to these kids and likely some worse outcomes. You do not want to be responsible for that, and there will be damage to some of these kids if you force them to take this experimental gene therapy. And I will reiterate, there is zero risk to these kids if they don't get the shot

This is wrong to even seriously consider, discuss, and threaten citizens with in so many ways.... it is not moral, it is against humanity. And it is no way necessary with the virus being much less virulent now. The vast majority of the country is doing nothing like this. For God sakes, please do the right thing and protect your citizens health and their rights. It is your responsibility. We know there is big money to schools involved in this, but that is not a reason to do an awful thing like this. The truth will come out and you will want to be shown standing up for it. Please do the right thing. Thank you.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital

nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Monty Chellis

lauriely@protonmail.com <mailto:lauriely@protonmail.com>

To whom it may concern:

Thank you for having this forum. I am writing in support of Petition #11 which requests that BOH establish a new rule that prohibits requiring that anyone take an EUA product or licensed product that has not yet completed Phase 3 clinical trials. I oppose BOH formation of a Technical Advisory Group to review information about Covid-19 shots for consideration of mandating the shots for schools. I oppose any Covid-19 shot mandates because each person needs to weigh their medical condition with their medical provider and make an informed, personal decision. This is especially true since the infection fatality rate for Covid-19 is low. For ages 0-17 it is at 0.00002 (99.998% survival rate) which is statistically a zero death rate. Beyond that, when you consider that most hospitalizations for the young are with Covid-19 and not for Covid 19, we can know that they are not in mortal danger from Covid-19. Neither is there a great risk of the young spreading Covid-19 to staff and teachers. The young have a greater risk of Covid-19 vaccine adverse reactions than of a serious Covid-19 illness. We must protect our young before we consider self-protection.

Sincerely,

Laurie Buhler

External Email

Please do NOT require our children to be vaccinated for Covid. There is current evidence that shows the vaccine has caused more deaths in children than actual Covid. Parents should remain the primary decision makers regarding their children's health as they are the primary caretakers. Our entire family of 6 had Covid back in 2020 and survived just fine as we took care of ourselves similar to any other time of flu infections.

We, as constituents and community members of Washington state, DEMAND the Washington State Board of Health (WSBOH) REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. COVID vaccines remain under Emergency Use Authorization and as such are experimental.
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

Subject: NO Detaining & forcing medical testing and/or treatment

External Email

Forcing medical care, isolation, or treatment is totally unnecessary as COVID is getting less & less dangerous. As it mutates it is becoming more contagious but is causing less severe illness.

Because the majority of the population is vaccinated, along with natural immunity of those who have had the illness, herd immunity is happening now which will keep the illness under control.

The action of mandating a vaccine to the least impacted age group is unconscionable! There are side effects from these shots, making them much more dangerous than if the child were to contract the virus. There are also many unknown long-term effects, including possible sterilization.

This action would cripple the already failing public schools. So many parents are already about to Home School their kids and this will force this action upon them.

You cannot say you want to do this to protect the children when you speak of mandating the vaccine for a virus that is becoming more like the flu every day and impacts kids 0-19 years old the least. Follow the data!!!

Both of these proposed mandates are terrible and unnecessary and would take away more of American's constitutional rights and God-given freedoms!!

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever! Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason. Signed,

Subject: No Covid Vaccine for School Kids

External Email

To Whom It May Concern:

My name is Nicholas Hooge and I am the father of 3 small children. As a parent, I am abhorred by the ideas currently being proposed to legislation to FORCE "vaccination" on my children.

Dr. Robert Malone who is the creator of the gene therapy - not vaccine - strongly advises parents NOT to inject the covid "vaccine" into our children due to the dangerous toxic spike proteins the injection causes, resulting in possible permanent damage to my child's critical organs, such as the brain, nervous system, heart and blood vessels, reproductive system and immune system.

The rate at which this "vaccine" has rolled out is alarmingly fast, and suggests cause for concern based on the lack of testing over time. As a person holding a Bachelors Degree in Science, the lack of testing, of knowing exactly what risks we are potentially ignoring is completely unacceptable to me as a parent. I should be able to look at research and decide for myself if the benefits outweigh the risks to an injection and, as it stands, this is a no brainer for me, as a parent. So far, it seems children have very mild systems due to COVID-19. I understand this is not always the case, but it does appear to be the majority, so my kids are at no increased risk to their lives or safety without this "vaccine."

It is not legislation's right to FORCE my child to receive an injection I do not feel is in his best interest; not only that, one in which could cause IRREVERSIBLE HARM to his body as he continues to grow.

If COVID-19 vaccination becomes a requirement (without allowing exemptions) for school enrollment, you can be sure my 3 children will be unenrolled instantly. My wife will homeschool or we will move out of state before I put my children's lives in jeopardy.

I hope you will truly consider my words as a concerned parent; America has always afforded us the right to CHOOSE for ourselves. It is my right as a parent to choose wisely for my children and not your right as a government official.

Thank you for supporting us parents when you vote NO for a covid vaccine requirement for school.

Sincerely,

Nicholas Hooge

Subject: No Mandate Covid vaccine for school

External Email

I am writing to oppose the notion of mandating the Covid vaccine as one of the school entry requirements in the state of Washington.

Data has shown the impact of covid hospital and death toll on children under 16 years is close to 0%, Furthermore, we don't know the long term side effects can inflict by covid vaccine while the short term effects have crippled many including myocarditis among youth Many studies indicated Covid vaccine is not safe to inoculate children at a massive scale, it is still an experimental remedy that is only needed by a very few with compromised immune systems or existing medical conditions.

It is not sensible nor ethical to even consider making the Covid vaccine a requirement to enter school.

Sincerely,

Lynn Trinh

Subject: NO on Covid vaccine mandate

External Email

To the Washington State Board of Health,

I'm writing to implore you to NOT include the covid-19 shot on the list of required vaccinations for schools.

I am the grandmother of 8 school-age children in Bellingham, I can say with certainty that a decision to mandate kids to have this shot would wreak havoc on many families (including mine) and within our schools.

I'm sure we can all agree that vaccines are an important and effective tool for preventing many diseases and I was perfectly willing to utilize them to protect my own children, when they were young, I was not and am still not an anti-vaccer. However, there are many reasons why (most) parents today have chosen to wait on having their children receive this particular shot including, but not limited to:

* In the scheme of things, the covid vaccines are still quite new and most parents, (while willing to receive the jabs themselves) are not at all willing to risk their children's health before knowing much more about the long- and short-term side effects of this new vaccine. These feelings are completely justifiable as the science on these vaccines is still evolving and coming to light.

* In terms of how the vaccines will affect public health- that science is still evolving as well. Considering that both vaccinated and unvaccinated individuals can contract and pass along the virus, many parents remain skeptical that any perceived or real risk is actually worth any perceived benefit. It serves no one to preemptively force parents into a decision they aren't ready to make when there is still so much confusion circulating.

* Covid in otherwise healthy children is not a large risk and the (extremely low) hospitalization rate of healthy children supports this. Therefore, the risk/reward of getting this shot does not balance when you consider the mild nature of the virus and the possible side effects of the vaccine. Parents should be given the freedom to choose their own level of risk for their family.

* There are MANY medical, religious, and other deeply personal reasons why parents are hesitant to give this shot to their children. Sadly, most of these reasons will not be covered by "exemptions"- forcing parents to choose between their children's health or their schooling. Please DO NOT force parents to make this choice.

For whatever reason, the covid vaccines- effective or not- have been profoundly politicized (on both sides), with most parents (and Grandparents) falling on one side or the other. Because of this, it is reasonable to assume that a decision to require this particular vaccine at this time would directly cause a mass exodus from our schools, shattering our communities and negatively impacting public health across the state.

At this stage of the pandemic, we find ourselves at a pivotal moment when every protection we can possibly hope for from this virus is in place. We have the tools to protect ourselves and our families and everyone should have the right to choose which protections are best for them. You, as the health board, are in a unique position to renew public trust in our state government by demonstrating trust in the people of Washington.

Please consider that no one cares more about a child's health than their parents. No one knows their medical history or the ins-and-outs of each individual child better than their parents. PLEASE allow parents- the ones who care the most- to make the determination for their own children. It is what is best for the health of every family, every school, and every community. This is still America where we do have the right to choose what we put in our bodies, I implore you to continue to respect that right and privilege.

Thank you for your time and thoughtful consideration on this matter.

Subject: NO MANDATORY COVID INJECTIONS FOR SCHOOL CHILDREN

External Email

I write to express my abhorrence for any consideration of coercion toward parents of school children by mandating Covid injections for school attendance.
Covid shots should ABSOLUTELY NOT be required for children to participate in any public school.

However, if these shots are mandated though they are only Emergency Use Authorized and children are at extremely low risk, and it results in many more parents exiting the public school system, this will be a positive outcome.

Subject: My Public Comments

External Email

In regards to the public meeting on January 12th, specifically, agenda item #11, in regards to requiring Covid -19 vaccination of children in order to be allowed access to public education, I would like state my extreme objection to this mandate. As a parent, I think this is a decision best left up to parents for a number of reasons. This is not a vaccine which has been tested as thoroughly as the other vaccines required for school attendance, such as measles, chicken pox and polio. There have never been any long term studies on this medication and I fear children will suffer greatly. We cannot possibly know the long term effects of this vaccine and the future health problems it may cause our children. Also, children are least likely to have problems with Covid-19 and I do not feel it is necessary after much research on the subject. Thank you for your consideration.

Sincerely,
Laura Amann

Subject: NO Mandatory covid 19 Vaccine for kids!

External Email

Please do not make this vaccine mandatory for kids! They are extremely low risk, and the virus' potency is fading. At risk populations can choose to vaccinate themselves. Kids should not be required to add yet another vaccine to their already extensive vaccine schedule when the C19 vaccine doesn't protect their own bodies from probable harm.

Thank you,

Subject: No MANDATED COVID VACCINE FOR CHILDREN!

External Email

Please say no to forced Covid vaccines for children. Children have virtually zero risk of severe Covid infection, yet are experiencing side effects at alarming rates. Normal, healthy children do not get blood clots and heart inflammation! These vaccines are still experimental and have not been fully approved for use. More long term studies need to be conducted before we force the least at risk population to undergo a potentially fatal medical procedure. This is just common sense. Do the right thing for these kids and say NO to mandated Covid vaccines!

External Email

Dear WSBOH,
I am emailing to express my concern as an educator and WA state resident. I do not think action should be taken to make Covid 19 vaccines mandatory for children to attend school or daycare in Washington State. Children still have the lowest death rate for Covid-19 therefore the vaccine should be optional for children. We do not have long term data on the effects of the vaccine in children or adults. Data shows increased heart issues in children who take the vaccine. This is very alarming. Please do not make the vaccine mandatory.

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

+++++++ Children have little risk from Covid-19,
but they do have considerable risk from the unapproved Covid vaccines.
++++++

In America,
health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention.
+++++++ This is not about +our +health;+ +it
+++++++is +an
unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Subject: Fwd: NO for mandatory Covid-19 vaccines for children

External Email

I am a parent with four children in our public school system. I am also a parent who has four children who have recently recovered from COVID-19. Three of my children had no symptoms. My youngest had a runny nose. Never in a million years would I have thought my children were ill, but they were tested because I was positive. Me, a fully vaccinated adult.

COVID-19 is not a severe threat to children. Doctors across the globe agree. Most children who get COVID-19 do not show symptoms at all. If they do, it is very mild. Vaccinated adults, teenagers, and children are getting Covid. Right now, there is absolutely no difference between vaccinated children and unvaccinated children in terms of catching and spreading the illness. They are all getting it. We all are.

Covid-19 is not a severe threat to children. What is, is the way their lives have been turned upside down. The way they've been put into "pods" at school, and cannot associate with friends outside their pod. The way they have to wave at old friends across a boundary, after 18 months of remote school. The way they have to eat lunch alone, with no peers allowed at their tables. What is a threat to children is learning to view everyone as dangerous and scary. Being told to never hug, to never high-five. To never, not once, see a teacher's or friend's full face, even outdoors. What is a threat to our children is the fact they no longer have regular physical exercise, because the gymnasium has been turned into more space for eating at lunch (so each child can sit alone), and the field becomes the only available place to have PE. But when it rains, the field becomes a bog, and PE is moved indoors into a classroom, where they play Uno, Connect 4, and watch YouTube videos from their desks as "physical education". It's astounding, that these decisions are made in the name of "health." These rules are not helping children. They are not keeping kids "healthy." They are not curbing the spread of omicron. They are destroying our child's well-being. They are crushing them.

Covid is not a severe threat to children. What is, is government overreach. And part of that government overreach, beyond what I listed above, is taking important medical decisions out of the hands of parents. My children had no symptoms when they "had Covid." None. Why should I be forced to vaccinate them? When I got vaccinated, and subsequently boosted, my menstrual cycle was severely impacted. I kept reading "oh, it's no big deal, it's part of the body's immune response." Because of the fact I've already birthed four children, I wasn't too worried about the fact I had two periods in a month. And then 3 weeks of bleeding after my booster. But I am supposed to give that same vaccine to my young girls, no questions asked? And not have a say in it?

These mandates are crushing our children. Their social and emotional well-being has been stomped on. Continuing to overreach—mandated vaccines THAT DON'T WORK included—will continue to destroy families and community systems.

Vaccinated kids are getting Covid. Unvaccinated kids are getting Covid. All are having mild disease, if any at all.

Please. Do not make the useless COVID 19 vaccines mandated for school entry. Our kids' lives are not to be politicized.

Remember. Vaccinated kids are getting and spreading Covid. Use common sense.

Please do not mandate schools to require CoVid 19 vaccine.

If you do you will see another mass exodus from the schools and the state- major loss of funds for your schools.

I have 6 Children.
All had CoVid.
All were fine.
They've had worse flu cases.

This shot isn't necessary to protect them. Their natural health does that on its own. Benefits don't out weigh risks and our children aren't responsible for protecting the adults. It should be the other way around.

The adults should be protecting the health and safety of their pupils.if the teachers are afraid - get a new job.

Blessings.

I am writing to you as a mother of two children in Ridgefield, WA. I believe that parents and guardians should be allowed to make decisions on the Covid vaccine based on their family beliefs, medical history and prior Covid illness/exposure. The State of WA should not be requiring the Covid vaccine for school access. It is not equitable or a standard that should be required since there are no long-term studies on the vaccine's effect on children. There are serious side effects involving teenage boys with heart inflammation that I would like more information on before making a choice on the vaccine.

I believe that the WA DOH should treat the Covid vaccine as the flu shot. It could be highly encouraged for families to get but not a mandate.

Please allow parents and guardians to make medical choices for their children and not be forced in order to gain access to taxpayer funded education.

Sincerely,

Kelly Graeme

I am strongly opposed to adding covid vaccine for children to the WAC-246-105-030

Covid vaccines remain under emergency use authorization and the rules that apply to that status Children under 18 yr have extremely low clinical risk from covid infection Children have a much higher risk of adverse event to the vaccine- including life long health issues Research supporting child vaccinations safety is flawed by the methods used to collect it Covid vaccines do NOT prevent getting it or transmitting it

DO NOT subject our children's health to a failed vaccine and the future unknown risks it may cause

I am strongly opposed to adding the Covid vaccines for children to the WAC-245-105.

1. COVID vaccines remain under the Emergency Use Authorization and the rules that apply to this status
2. Children under the age of 18 have a 99.995% survival rate from COVID infection.
3. Children. Have a higher chance of death or adverse event to COVID vaccines than COVID-19 infection.
4. The research to support this were methodological flawed regarding safety data.
5. The COVID vaccines does not prevent getting COVID 19 infection, not prevent the transmission of this infection.

Subject: No Covid Vaccine Mandate for Children!

External Email

I OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose COVID-19 shot mandates, period!

I SUPPORT Informed Choice Washington's Petition for Rulemaking. It was filed by Xavier Figueroa, PhD, on behalf of ICWA, and asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

As noted in the Petition Filing, we are requesting the WA State Board of Health adopt a new, permanent rule prohibiting the Board from adding to the daycare or school requirements any Emergency Use Authorized (EUA) product or any licensed product formulation which has not yet completed Phase 3 clinical trials. This new rule request pertains to any and all avenues through which the Board has authority to add medical intervention requirements, including through regular or emergency rule-making.

We are requesting this Rule because despite the absence of an FDA licensed COVID-19 vaccine formulation with completed Phase 3 trial studies in children, and despite CDC-acknowledged risks of myocarditis and blood clots and the data showing children are not at high risk of severe disease or death from COVID-19, the BOH has gathered a Technical Advisory Group (TAG) to examine adding COVID-19 vaccines to daycare & school requirements. This new rule is needed immediately to ensure that federal EUA regulations are upheld & to protect fully informed consent, which prohibits the use of coercion or undue influence, such as can be exerted by state requirements.

This new rule would impact and protect all minor children, and their parents and guardians, in WA State.

Here are the reasons I do not support covid vaccine mandates for school children:

1. Federal Emergency Use Authorization statutes prohibit school mandates of EUA products

"The possible side effects of the vaccine are still being studied in clinical trials. . . Under the EUA, there is an option to accept or refuse receiving the vaccine." source: pp. 4-5
<https://www.fda.gov/media/153717/download>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F153717/download>

The option to accept or refuse an EUA product is not conditioned upon written assertion of exemption. Medical, personal, or religious exemptions are not required in order to exercise the right to refuse. Under EUA law, a parent or guardian may simply decline a shot for their minor child, without providing explanation or paperwork. A state-level daycare or school requirement introduces the need for filing of exemptions, unlawfully exceeding the parameters set forth by Congress for EUA products.

"FDA believes that the terms and conditions of an EUA issued under section 564 preempt state or local law, both legislative requirements and common-law duties, that impose different or additional requirements on the medical product for which the EUA was issued in the context of the emergency declared under section 564." Source:

<https://www.fda.gov/emergency-preparedness-and-response/mcm-legal-regulatory-and-policy-framework/vaccine-eua-questions-and-answers-stakeholders>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Femergency-preparedness-and-response%2Fmcm-legal-regulatory-and-policy-framework%2Fvaccine-eua-questions-and-answers-stakeholders&data=04%7C01%7CWSBOH%40sboh.wa.gov%7C3e35bbe2beb54bf572eb08d9d16fdf4e%7C>

2. Phase 3 clinical trials of COVID-19 vaccines are not yet completed. C4591007—the main clinical trial in children and young adults with BNT162b2—has an estimated completion date of May 5, 2026. Source: <https://clinicaltrials.gov/ct2/show/NCT04816643>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fclinicaltrials.gov%2Fct2%2Fshow%2FNCT04816643>

3. The vaccine formulation now being given to U.S. children aged 5-11 is NOT the same formulation used in the clinical trials, and NOT the same formulation that has been administered to all other age groups under EUA. So even when current ongoing clinical trials are complete, the results cannot be assumed to be relevant to the safety or effectiveness of the new formulation.

"The vaccine that is authorized for use in children 5 through 11 years of age includes the same mRNA and lipids but different inactive ingredients compared to the vaccine that has been used under EUA in individuals 12 years of age and older and that has been studied in clinical trials." Source: p. 2 <https://www.fda.gov/media/153717/download>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F153717%2Fdownload>

The participants in clinical trials involving children aged 5-11 received "two doses of 10 µg BNT162b2 or placebo (saline)", not the new formulation. Source: Pg. 17

<https://www.fda.gov/media/153447/download>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F153447%2Fdownload>

Pfizer requested approval of the new formulation when they requested EUA for children 5-11. "Authorization is being requested for a modified formulation of the Pfizer-BioNTech COVID-19 Vaccine. Each dose of this formulation contains 10 µg of a nucleoside-modified messenger RNA (mRNA) encoding the viral spike (S) glycoprotein of SARS-CoV-2 that is formulated in lipid particles and supplied as a frozen suspension in multiple dose vials. . . . To provide a vaccine with an improved stability profile, the Pfizer-BioNTech COVID-19 Vaccine for use in children 5-11 years of age uses tromethamine (Tris) buffer instead of the phosphate-buffered saline (PBS) as used in the previous formulation and excludes sodium chloride and potassium chloride." Source: Pg. 14

<https://www.fda.gov/media/153447/download>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F153447%2Fdownload>

4. FDA admits safety unknown. Children are being used as test subjects, with their parents acquiescing under fraudulent marketing pressure. Public Health messaging does not match the reality of the current knowledge base. At the October 26 VRBPAC meeting, FDA Advisor Dr. Eric Rubin admitted: ". . . but we're never going to learn about how safe this vaccine is unless we start giving it." Source: @6:52:33

https://youtu.be/laaL0_xKmmA

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fyoutu.be%2FlaaL0_xKmmA&data=04%7C01%7CWSBOH%40sboh.wa.gov%7C3e35bbe2beb54bf572eb08d9d16fdf4e%7C

5. The International Alliance of Physicians and Medical Scientists has declared that children should be excluded from vaccine mandates:

"Consensus is clear among MDs and medical PhDs: following 20 months of exhaustive research, millions of patients treated, hundreds of clinical trials performed and scientific data shared worldwide, they conclude that healthy children and the COVID-recovered should be excluded from restrictions and vaccine mandates."

To the Washington State Board of Health,

"We strongly oppose WAC-100 rule making that would expand any authority to involuntary quarantine individuals.

We also oppose adding C-19 vaccines to the WAC 246-105 schedule of required vaccines for children to attend schools."

We...

1. OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. We oppose COVID-19 shot mandates, period!
2. SUPPORT Informed Choice Washington's Petition for Rulemaking (see attachment) — our petition is item 11 on the January 12th agenda. It was filed by Xavier Figueroa, PhD, on behalf of ICWA, and asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Sincerely,
Ned and Denise Pearson
Washington State Residents (for over 45 years)

External Email

DO NOT enact a covid vaccine mandate for children of any age. If you do you will be responsible for the deaths and injury of hundreds to thousands of children. Don't be fooled by the federal government's propaganda. If you do your research, you'll understand that the covid vaccines are responsible for tens of thousands of deaths worldwide and over 1 million adverse effects. They are causing more harm than good. The vaccines have been proven to be ineffective. There are more people getting covid who have been "fully" vaccinated than those who are unvaccinated. There is no point other than for financial reasons for greedy pharmaceutical companies and state and local government agencies clambering for federal funds to get vaccinated.

Keep the government at all levels out of the family decision making process and out of the doctor patient relationship. Family decisions and medical decisions are personal and private.

What you should be spending your time on is enabling early treatment solutions that are widely available to all Washingtonians. The biggest crime of this century is that the government at all levels and medical administrations at all levels have failed to recognize that Covid can be treated early with existing medications that are already widely available.

DO NOT MANDATE VACCINES FOR CHILDREN OF ANY AGE.

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

As a mother of two children who have been in in- person school for the last two years.

I strongly believe Covid shots should absolutely NOT be a requirement for our children to attend school or childcare.

Children are at extremely low risk for Covid and that the vaccines are still only EUA (emergency use authorized).

Our children got covid, and they bounced back in 3 days. It was amazing how fast they healed from their symptoms. I'm a living testimony along with thousands more who have had the same experiences with their children's healthy bodies recovering with very little issue.

I hope you think hard and consider this decision with the parent's testimonies in mind.

Sincerely,

Jessica Figueroa

To whom it may concern,
I am a mother of two children and a small business owner in Washington, I have followed every cdc recommendation and guideline. I fully followed every protocol and outline to stay healthy thru the pandemic. With that being said after almost a full year of little or no contact unless absolutely necessary we got Covid! To say the least and get to the point, I will be pulling my children from public schooling if the vaccination is required. We have taken so many risks nor knowing the long term consequences for the greater good , I draw the line at my children. Please consider how many Washington residents this will effect! I know we will be looking at moving out of this state if this mandatory vaccination is put in place.

Please consider the future of our children,

A mom who has had enough!

To you, who decides this vaccine mandate,

I am 100% against the proposed vaccine mandate for children.

I stand against these proposed WAC's : WAC 246-100-070, WAC 246- 100-045, WAC 246-100-040.

There is enough evidence to show children are not at risk and this is an over reach of government.

Thank you for your time,

Subject: No forced COVID isolation, treatment, testing/No forced COVID shots on children!!!!!!

External Email

Forcing medical care, isolation, or treatment is totally unnecessary as COVID is getting less & less dangerous. As it mutates it is becoming more contagious but is causing less severe illness.

Because the majority of the population is vaccinated, along with natural immunity of those who have had the illness, herd immunity is happening now which will keep the illness under control.

The action of mandating a vaccine to the least impacted age group is unconscionable! There are side effects from these shots, making them much more dangerous than if the child were to contract the virus. There are also many unknown long-term effects, including possible sterilization.

This action would cripple the already failing public schools. So many parents are already about to Home School their kids and this will force this action upon them.

You cannot say you want to do this to protect the children when you speak of mandating the vaccine for a virus that is becoming more like the flu every day and impacts kids 0-19 years old the least. Follow the data!!!

Both of these proposed mandates are terrible and unnecessary and would take away more of American's constitutional rights and God-given freedoms!!

Subject: No forced covid19 vaccines for children

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee famously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Kelli Langford Atkisson

mother, grandmother and Washington State resident for over 50 years.

Hello

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.thelancet.com%2Fjournals%2F00558-2%2Ffulltext%3Ffbclid%3DIwAR0O4_AzbWABcIx7EehXplcexeAShNUB7BN66zxV-5Ma9VH-7RO3hBHYT0A&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C7b60db9f0d694f7c470c08d9d2116c99%7C>

Our children and adults do not need any more required shots. Almost 40 different international studies are showing that the shots do not stop the spread of the covid virus...

Here is a recent study to comprehend:

[https://www.thelancet.com/.../PIIS1473-3099\(21.../fulltext](https://www.thelancet.com/.../PIIS1473-3099(21.../fulltext)
<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.thelancet.com%2Fjournals%2F00558-2%2Ffulltext%3Ffbclid%3DIwAR0O4_AzbWABcIx7EehXplcexeAShNUB7BN66zxV-5Ma9VH-7RO3hBHYT0A&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C7b60db9f0d694f7c470c08d9d2116c99%7C>
-sought to describe the impact of vaccination on admission to hospital in patients with confirmed SARS-CoV-2 infection using real-world data collected by the Yale New Haven Health System. "Patients were considered fully vaccinated if the final dose (either second dose of BNT162b2 or mRNA-1273, or first dose of Ad.26.COV2.S) was administered at least 14 days before symptom onset or a positive PCR test for SARS-CoV-2. In total, we identified 969 patients who were admitted to a Yale New Haven Health System hospital with a confirmed positive PCR test for SARS-CoV-2"...Researchers reported "a higher number of patients with severe or critical illness in those who received the BNT162b2 vaccine than in those who received mRNA-1273 or Ad.26.COV2.S..."

I am completely against any of the proposed Covid Policies that are over reaching and immoral. I stand opposed against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

So any actions by you or your board requiring covid shots for school age children or adults will be considered a criminal act and I will not rest until you, your spouse and family pay the full punishment for your crimes as decided in court.

Regards,
Jack Collins

Please do not make mandatory a "vaccine" for children, when the risk/benefit analysis doesn't even come close to showing a worthwhile risk for the patient.

This should not be mandatory for any young, healthy person, and especially not for children!!

The "vaccines" have not existed long enough for ANYONE to know what the long term effects could be on the children's health.

Subject: My Public Comments for 1/12/22 meeting regarding current WAC codes to include covid

External Email

Subject: My Public Comments for 1/12/22 meeting regarding current WAC codes to include covid

To whom it may concern,

I am strongly opposed to the proposed application of current infectious disease codes to include Covid-19 for all Washington residents.

First let me state that I believe covid is a real virus, and will make one very ill. I have had covid, and I understand that it is not fun, and, like other flu has the potential to be fatal in some cases. I have also had the Hong Kong Flu (1969) and I remember NO government involvement in either forcing me to be vaccinated, quarantined, or involuntarily detained in a quarantine facility.

Reasons:

The recovery rate from covid has been proven in various studies to be well over 90% without vaccination. Those are true numbers, not merely numbers that have been manipulated by the media or the medical community to validate their desire to vaccinate the entire population.

I am opposed to the removal of or ignoring of my rights as a US citizen given by the Constitution of the United States, the Bill of Rights, and other guarantees of freedom from Government intervention into my personal rights as to how I make my medical decisions.

According to the VAERS agency, death and serious injury caused by the vaccines is much higher than that caused by covid. This is widely known, though widely ignored by the media and government officials who are bent on pushing their agenda of control of the citizenry.

In light of the current rampant fears that have been ignited and fanned by the media, I do not trust local health officials, who are also driven by fear, to have the authority to put me and my family in a quarantine facility merely because the WAC codes 246-100-070, and 246-100-045 gives them that power. That kind of power in the hands of the wrong people is a carbon copy of what happened in NAZI Germany.

I could go on, and would be more than willing to present more reasons, but I know and respect the time constraints that the members of this committee are under.

In closing, I strongly request that the committee reject the application of current infectious disease codes to include covid 19 or other covid related virus infections for any or all Washington state residents.

Sincerely,

Mike Hughes

Subject: My Public Commentsi

External Email

I am writing to express our opposition to two agenda items being discussed at the January 12 meeting.

First, my husband and I are opposed to adding Covid-19 vaccines to the list of required vaccines for admission to K-12 public schools. This is not a proven vaccine and there are no long-term safety studies on the vaccine. Parents should have the right to make the best healthcare choices for their children and children should not be required to risk their health on a vaccine with no long-term safety records and from which a number of young people have suffered serious side effects.

We also oppose allowing local health officers to utilize law enforcement to involuntarily detain a person or group of persons to be isolated in a quarantine facility following refusal to voluntarily comply with requests for medical examination, treatment, testing, counseling and vaccination. This action would be an abuse of power by a local health officer and a violation of the constitutional rights of the citizens of WA state and the United States of America.

We respectfully request that these proposals not be recommended or enacted in Washington state.

Sincerely

David and Kay Chung
Federal Way, WA

Subject: My Public Comments for January 12, 2022 Agenda

External Email

To Whom it may concern,
I am writing in regards to the possible action of the COVID19 vaccine mandates for children's entry of school.

While I would like to believe that everyone is thinking of everyone with the best intentions for all when it comes navigating through this COVID pandemic it is not what I am seeing! While trying to have best intentions I see no one is listening to one another, let alone respecting one another's opinion, view, or thought! No one is allowing anyone to make a choice for themselves, setting only more and more restrictions and mandates. I see our world right now only hushing our children to make them think they have no choice or voice and that they do not matter.

I believe it should be up to parents and their children to navigate through what choices they should make as a whole - NO ONE ELSE!

I know many upon many people who are both vaccinated and not. I have seen both vaccinated and not contract and pass COVID. So please tell me how one option which is mandated is better? the vaccine DOES NOT stop COVID, it is an attempt to prevent the side effects of such to lessen the stress of our system. How is one who is vaccinated and has less symptoms but just as much potent better then someone with full symptoms and unvaccinated? I personally would rather someone have all the symptoms to know they are sick, then to have less symptoms and for them to think its just a head cold, or allergies, roaming freely thinking it is not a big deal mean while spreading things.

I have a child who will be a senior next year, 2022-2023 and she is mad! She is mad that she is being robbed daily of her high school experiences, that her voice is not being listened to, and that she is not being given choices to make for herself. She is frustrated with people not respecting one another, she is sad that the world is not kind and is not trying to be kind. She has chosen to not vaccinate, her reasoning is "we don't know long term effects" "I have had COVID, and trust my natural immunity" "This is not a risk I want to take or something I want to put into my body"
Why is my daughters voice not being listened to? Why are our children's voices and thoughts not being considered when making choices?

I also have a child who will be middle school next year and one who is to start kindergarten. We have decided as a family that if the mandates are pushed to require the vaccine for school, we will choose other schooling options that do not require or mandate against our freedom and rights of choice.

I would ask that ALL PERSONS seriously think of how this would benefit ALL, if you have honestly and purely listened to ALL who have spoken to you and what exactly are WE and a whole trying to accomplish long term.

Thank you for your time.

Thank you,
Jennifer Hubbard

Im writing because I'm absolutely against requiring covid vaccinations for children to participate in public school. The shots don't prevent transmission or infection and children don't have bad outcomes with infection. Myocarditis is KNOWN to be a common side effect and the risk is not worth it - I know you know this. The vaccines are still under clinical trials, still ongoing, and no long term effects are known. I will not subject my children to the array of unknown information available about the effects of getting the covid vaccines and boosters.

This is not an anti-vaxx issue, this is a human rights issue - we should not be forced to inject so many unknowns into ours or our children's bodies.

Please do not mandate the covid vaccines.

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

Children have little risk from Covid-19,
but they do have considerable risk from the unapproved Covid vaccines.

In America,
health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention.
This is not about our health; it
is an
unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,

Mr. & Mrs. Bob Peters

Dear Caitlin Lang-

I am emailing the Washington State Board of Health to reject and plead with you to not mandate the covid vaccine for school age children and teens.

I have 4 kids and I am not an anti vaccine parent. I acknowledge that covid19 is real and has been horrible for the elderly and those with pre existing conditions.

These vaccines are not safe for our kids and may cause irrevocable injury and damage. The viral gene injected into parent cells forces my child's body to make toxic spike proteins. These proteins often cause permanent damage in children's critical organs. These organs include the brain and nervous systems, heart and blood vessels(including blood clots), their reproductive system, and this vaccine can trigger fundamental changes to their immune system. Once these damages have occurred, they are irreparable and can not be reversed. You can not fix the lesions in their brain, you can't repair heart tissue scaring, you can't repair a genetically reset immune system, and this vaccine can cause reproductive damage that can affect future generations of our family.

Why would I want to risk all of the above for little or no benefit? Plus all of my kids and most of all their friends have had covid and they have a natural immunity.

The vaccines have not been properly tested. They are still experimental vaccines!

The harms and risks of new medicine are often revealed many years later.

I do not want my kids to be a part of this radical experiment.

There is no benefit to vaccinating my children against the small risk of the virus given the known health risks of the vaccine that we may have to live with for the rest of our lives.

We should be thinking about the well being of the kids and little ones who will soon grow up and need to run this country. It is not up to the government to make my kid get a experimental vaccine. We will not comply.

Thank you for your time

Ruthie Nicholson

Subject: No forced Covid Shots or isolation

External Email

Forcing medical care, isolation, or treatment is totally unnecessary as COVID is getting less & less dangerous. As it mutates it is becoming more contagious but is causing less severe illness.

Because the majority of the population is vaccinated, along with natural immunity of those who have had the illness, herd immunity is happening now which will keep the illness under control.

The action of mandating a vaccine to the least impacted age group is unconscionable! There are side effects from these shots, making them much more dangerous than if the child were to contract the virus. There are also many unknown long-term effects, including possible sterilization.

This action would cripple the already failing public schools. So many parents are already about to Home School their kids and this will force this action upon them.

You cannot say you want to do this to protect the children when you speak of mandating the vaccine for a virus that is becoming more like the flu every day and impacts kids 0-19 years old the least. Follow the data!!!

Both of these proposed mandates are terrible and unnecessary and would take away more of American's constitutional rights and God-given freedoms!!

Hello,

I'm completely against any proposed COVID policies that are over reaching and immoral.
I stand against these proposed WAC's.

WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100 and WAC 246-105

Thank you.

Subject: No COVID Vax for Our Kids

External Email

Hello,

My name is Hannah Kilcup. I am a teacher and a single mother of 3 children. I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.
