Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,

Jamie Renninger

Subject: NO REQUIRED COVID SHOTS FOR CHILDREN

External Email

Thank you for reading this email. I want to express my opposition to adding the Covid vaccine to the vaccine requirement list for school age children. Children have a statistical 0% chance of dying from Covid-19 and its variants. The Covid-19 vaccines have not undergone long term testing and we have zero long-term (3-5 year) data on how these treatments will affect our growing children. Please do not make this a school requirement until more data is collected over the next 5 years.

BOH,

The proposals are evil. You have no authority over peoples bodies by forcing them to do something you deem "best". God is the one who delegates authority and places LIMITS on that authority and you're outside those limits. We won't stand for mandatory shots or for your attempt to force people into your quarantine camps.

WASBOH,

Please take time to consider that children have a generally mild reaction to the Covid virus. In addition, the children have not shown high transmissibility to the public at large. Imposing a vaccination mandate at this time, with the data available, doesn't make sense for our children.

The board of health should encourage improving testing measures and accessibility for families to test at home when health and public safety is in question.

Members of the Washington State Board of Health,

I oppose the following proposed policies:

Allowing local health officers to use law enforcement (WAC 246-100—070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040. These specifics come from WA 246-100. Which includes

the Covid-19 injections as part of school immunization requirements using WAC 246-105.

I am concerned for these policies as they go against our God given rights and freedom.

Respectfully,

Mandy Meier

Sent from my iPhone

WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

Covid-19 was new and scary virus, but we've come a long way since it first appeared.

Immunocompromised and those individuals strongly concerned have the option to get a vaccine. Majority have mild infections. Passing laws at this point is government overreach at best, especially since vaccines DO NOT prevent transmission, or provide much protection for the new variant.

But what is happening, is that people feel threatened by the government. I already do, when I see these proposed policies. And when Government institutions will try to pass good policies in the future, if need arises, there will be pushback because you're setting a precedent of government overreach. PICK YOUR BATTLES. The current proposed measures are unnecessary and the current situation does not warrant such strict policies. It is a serious virus, but please remember the death rate is still less than 1 percent (even that is generous). Most people are either vaccinated or have natural immunity. You want to strip away freedoms of people for the sake of what? People want to be free, and safe. But how can we feel safe knowing we can be voluntarily detained because we didn't consent to a medical procedure related to a virus with such a high survival rate?

Concerning vaccine requirements of children: Requiring children to get a vaccine that has a higher risk of an adverse reaction than the threat of the initial infection is wrong. If you must do something, then please put it in the "recommended" vaccine list, BUT NOT REQUIRED.

COVID-19 is NOT an infection that can be eradicated with vaccines like POLIO or MEASLES, then why treat them the same? Put it in the category of the flu, which is closer to reality. I'm begging you, LEAVE THE CHILDREN ALONE! They are not a threat to our society. COVID is not a large threat to the well-being of children. If someone WANTS their child vaccinated, they know how to do it, and they will do it.

Thank you for your time,

Liliya Smal

P.S. I was going to provide articles to support my claims (although you have access to them), but I was afraid my e-mail will get flagged for containing links.

Subject: Opposition to mandated vaccination of school-aged children

External Email

Dear Washington State Board of Health member,

With respect, I am vehemently opposed to the proposed mandates for vaccination of school-aged children. "Following the science" has become a mantra, but it is important to actually see the science, the data and the statistics, which all show that children and young people in general have a statistically zero chance of dying from Covid-19. Yes, a handful across the world have died with Covid-19, but this simply does not equate to a threat that deserves this type of response.

There must not be a "one-size-fits-all" remedy in health care. People are different, and their bodies react in different ways. It is unconscionable to force this experimental MRNA

gene therapy, that has not been fully tested, on anyone ... as a condition for attending school, or participating in other activities in our free American society.

Please may I refer you to the VAERS (vaccine adverse effect reporting system) data at openvaers.com

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fopenvaers.com%2F&data=04%7C>
here

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fopenvaers.com%2Fcomponent%2Fthe-openvaers-red-box-report%3Fuserid%3D22313-

aN5egbywnQdeWB%26tmpl%3Draw%26utm_source%3Dnewsletter_42%26utm_medium%3Demail%26utm_campaign%3Dopenvaers-red-box-

report&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C1efd99aabf0b4a88f11508d9d6d05360%7C11d

- the latest report shows over a million adverse reactions to the vaccines, and counting.

This number is generally considered (by the CDC) as an under-reported statistic. It

shows that over 21,000 deaths have occurred within 2 to 3 days after receiving a "vaccine", and well over 100,000 hospitalizations!

Please, respectfully, I implore you - vote NO on mandated vaccinations.

Thank you for your time and consideration,

James Gunn

Subject: Completely Opposed

External Email

I oppose the proposed WAC's 246-100-070 <<tel:246-100-070>> , WAC 246-100-045 <<tel:246-100-045>> , WAC 246-100-040 <<tel:246-100-040>> , WAC 246-100, WAC 246-105

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against covid-19 injections as part of the school immunization requirements using WAC 246-105.

I have 4 children in the public school system and will absolutely pull them out to homeschool if this goes through.

Thank you for your time,

Genevieve Robinson

would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org)
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&data=0>>
) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be

enough to stop consideration of making vaccines mandatory.

Leave our kids alone!

The proposed rule giving DOH powers to involuntarily quarantine or inject US citizens is in violation of federal law.

Under Title 21 CFR (Code of Federal Regulations) Section 50.23 & 50.24 It is illegal to exercise coercion when administering experimental medical treatments. Coercing any US citizen to receive medical treatment against their will constitutes an act of domestic terrorism, which is a felony. Any attempted enforcement of such an unlawful rule would expose anyone enforcing it to charges of domestic terrorism. Since the proposed rule will be UNLAWFUL by definition and will also violate WA State Constitution, Article 1 Section 7 - right to privacy - there is only one option. Abolish consideration of such a rule or face

criminal charges (Domestic Terrorism and/or Conspiracy to commit Domestic Terrorism).

I am a very concerned citizen writing you to urge you to refuse to push through the new proposed policies that include mandatory covid vaccinations, and that also permit health officers to use law enforcement power in forcing isolation, quarantine, and detainment of individuals and families. This is completely unconscionable, and Washington citizens have had enough. Not only do children have a 99.995% covid survival rate, but these vaccines are STILL in the early stages of development and testing, and any long-term side effects are still completely unknown. Weighing this risk MUST be one each individual freely does for themselves, and is not forced into, particularly for parents deciding what is best for their own child. Each person has the right to choose - and refuse - medical treatment, counseling, and testing without being forcibly detained for their choices. These policies not only vastly overstep the constitutional bounds of 'health care', but also seriously infringe on personal and parental rights.

We the people INSIST you vote to STOP these unconstitutional policies from moving forward, at once.

Sincerely,

Heidi Forslund

Vaccine Mandate/Quarantine Facility Opposition Letter

To The Washington State Board of Health,

This letter is to inform you that I strongly oppose the proposed vaccine mandate and quarantine facility propositions for Pierce County. I would like to express my extreme opposition to implementation of the UNLAWFUL COVID 19 vaccine requirement for schools in Washington State and the quarantine facility in this or any area.

1. There is absolutely NO COVID vaccine available in the United States has received FDA approval. ALL available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. This fear monger approach by the State of Washington and the Federal Government to force American citizens to inject an experimental drug AGAINST THE LAW and is the subject of numerous lawsuits! A Federal Judge recently rejected Pfizer's claim that the two products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable'

• Children's Health Defense (childrenshealthdefense.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>

) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Targeting our children is simply another tactic to accomplish the goal of 100% of vaccination. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID! I challenge the Washington State Board of Health to show medical records for even one child who has died of COVID without co-morbidities.

3. NO ONE knows the long term risks of these vaccines. One of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM. The studies Pfizer conducted were woefully underpowered. This is an analysis of the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors. (americasfrontlinedoctors.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>

) It concludes the risks DO NOT outweigh the benefits, therefore more research MUST be done before being administered to children or anyone else!

Forced vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity.

Our hospitals have more vaccinated COVID positive patients than unvaccinated, THE VACCINES ARE NOT WORKING!

Furthermore, real science is showing an abundance of evidence proving that this virus and all its variance are completely treatable with proven positive results when early treatment with the correct protocols are implemented. There is absolutely no reason to INVOLUNTARY FORCE persons or groups of people/families into isolation in quarantine facilities, which will inevitably further exacerbate the problem and death tolls. This is and extreme and blatant abuse of civil liberties and will not succeed!

We stand firmly against ANY AND ALL of these proposed WAC: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105,

If the Washington State Board of Health rules in favor of these mandates you can be absolutely certain to face legal action immediately, as this is constitutional, against the law and will be stopped!

Thank you for your careful consideration of this matter,

Kama Bigbee, PhD.

Educational Consultant

Sincerely,

Holly Stockman

The best thing you can do at maximum is possible require weekly testing. Even that is excessive with unfair fraudulent contracting practices. Keep in mind that the testing has high false positive rate.

In summation, I recommend that you rule against any forced quarantine or vaccination. That is not America.

Thank you,

LMcMahon

Ms. Herendeen,

Please consider the federal law (and hear the people, the citizens of this nation) as you consider the rule that gives DOH power to involuntarily quarantine or inject citizens of the US, children on up. This rule is in direct violation of federal law under Title 21 CFR (Code of Federal Regulations), Section 50.23 & 50.24. It is illegal to coerce someone into compliance when giving an experimental medical treatment. It is a felony to do so, actually- UNLAWFUL- and constitutes an act of domestic terrorism (which, if passed, would legally make you a domestic terrorists).

That unlawful-by-definition rule will also violate the WA State Constitution, Article 1 Section 7, which speaks to the right to privacy.

This leaves only one option for your decision on this rule, and that is for you to reject it and to abolish all and any consideration of such a rule, or face criminal charges of Domestic Terrorism and/or Conspiracy to Commit Domestic Terrorism.

Thank you,

Kristen Cormick

Subject: No mandate for covid vaccine in children

External Email

DO NOT enact a covid vaccine mandate for children of any age. If you do you will be responsible for the deaths and injury of hundreds to thousands of children. Don't be fooled by the federal government's propaganda. If you do your research, you'll understand that the covid vaccines are responsible for tens of thousands of deaths worldwide and over 1 million adverse effects. They are causing more harm than good. The vaccines have been proven to be ineffective. There are more people getting covid who have been "fully" vaccinated than those who are unvaccinated. There is no point other than for financial reasons for greedy pharmaceutical companies and state and local government agencies clambering for federal funds to get vaccinated.

Keep the government at all levels out of the family decision making process and out of the doctor patient relationship. Family decisions and medical decisions are personal and private.

What you should be spending your time on is enabling early treatment solutions that are widely available to all Washingtonians. The biggest crime of this century is that the government at all levels and medical administrations at all levels have failed to recognize that Covid can be treated early with existing medications that are already widely available.

DO NOT MANDATE VACCINES FOR CHILDREN OF ANY AGE.

Lindsay,

I am extremely opposed to our WA state making Covid vaccination mandatory for child care and school admission. As a parent who researches all vaccines, even before Covid, I have always taken more than an interest in what is going into my child.

The vaccine is simply too new and experimental for me to feel comfortable putting it into my three healthy children. As parents our responsibility to our children is to make the best possible health decisions for them. I believe that a year old "emergency use" vaccine, that doesn't have 99-100% effectiveness, where we also do not yet understand the future health ramifications, is not the best for my children.

If vaccines are made mandatory in WA state, a state I have always loved and lived in, there is no doubt we will either homeschool our children, or move to a state that does not require such action.

Thank you for your time.

I am sending this email to urge you, as a member of the WA state Board of Health, to please vote AGAINST applying current infectious disease WAC codes to include Covid-19 for all WA state residents!

This is an outrageous abuse of power and every person in WA state and across the nation should strongly object to this invasion of our privacy and our liberties as freedom loving Americans!

To allow local health officers to use the law (WAC 246-109-070) to enforce these "Emergency Orders" (WAC 246-100-045 & WAC 246-100-040) is...to say the least...tyrannical! And of course it goes with saying that this is illegal and goes against the NUREMBURG CODE Article 6, Section 28!

No policy should disrespect the rights of all to make their own health care decisions. Public health is important, but NOT at the expense of losing our GOD given freedoms. Please vote NO to these "Emergency Orders"!!!!

Thank you!

Judy Senkler

Sent from my iPhone Sent from my iPhone

PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Very Sincerely,

Stephanie Newcomb

To whom it may concern:

I want to publicly say that I 100% support everyone's individual decision on this. I DON'T support the government mandating a vaccine that is still under EUA. Some in my house are vaccinated and some aren't because in our home we support personal decisions when it comes to our own bodies.

Thank you,

Suzanne M Leon

Hello,

I am VERY STRONGLY OPPOSED to making the COVID-19 vaccine a required immunization for kids to attend school or daycare. I am very much opposed to it being required for anybody at all. It is still a very new "vaccine" and hasn't had time to be fully tested to see what any long-term effects it might have. Also it can affect different people differently and not always for good. Plus, unlike the older vaccines, the Covid one doesn't actually keep people from getting Covid or spreading it to others. Please, please do not allow this to become a requirement! I know for me, and many others I know, if it does become required we will be pulling our kids out of school altogether, rather than go against what we believe is best for our kids and inject them with the Covid vaccine.

Most sincerely,
Israel Dehnert

Hello,

It has come to my attention that WA Board of Health will be discussing COVID-19 shot mandates for schools and recommendations for forcible quarantine and/or detention of those that disagree with policies. As a parent and a citizen of the State of WA, I request that you abandon the plan of forming a technical advisory group to explore COVID-19 mandates and adopt a new rule of requiring products to have completed Phase 3 clinical trials before they can be added to the list of school requirements.

One definition of insanity is to repeat the same action over and over again and expect different results. For almost 2 years we have attempted to follow the health

recommendations of washing, masking, distancing, testing, isolating and vaccinating. By now, it is quite apparent that the virus has mutated; as a result, SARS CoV2 has become more virulent (which is the nature of all viruses) but LESS FATAL. Real immunity is achieved with exposure and recovery as is evidenced by the fact that those infected with SARS in 2002/3 cannot become infected with SARS CoV2 today! In contrast, COVID-19 has managed to find a way to escape the vaccine per the evidence by the incredibly high numbers of vaccinated and even boosted individuals getting sick and testing positive. Surely this fact has not escaped your knowledge!

I also hope that you, being members of the WA State Health Board, are well aware of what the #1 cause of death was (aside from abortions which came in at an astonishing 43 million, globally) in 2021. Last year, the disease that killed 8.2 million people globally was cancer. Cancer killed more people last year than COVID-19 has since the beginning of the pandemic. Death is tragic, yes, but I will not stand by as mandates and overreaches of personal medical freedoms are occurring, of which should only be between doctors and their patients should be handled; politicians and elected officials like yourselves have not earned nor have any say in the privacy of what medical choices my family or any Washingtonian family makes. Can you imagine what the United States could do if local officials like yourself across the nation put this much effort into cancer research and treatment as they did in pushing for COVID-19 vaccine creation? We'd probably find a cure within the next year.

I do not doubt that you all desire to improve the health of Washingtonians. However, I do not trust that you have carefully investigated and logically determined adequate and measurable health remedies for which you are able to provide evidence. Before doubling down on measures that seem to HARM more than they HELP the overall health of citizens, please determine and make public the evidence to justify any policies. Giving "powers of police officers, sheriffs, constables, and all other officers" is an overreach of what the State Health Departments' responsibilities, an overreach of the people's freedoms, as well an effort to over-centralize general powers within the state, which is against what our Constitution stands for throughout the land.

Regarding mandating shots, know that the clinical trials will not be completed until 2023. Know that WA State has a legal definition of a "vaccine" that the COVID-19 shots do not fulfill as they were never part of a living microorganism nor do they prevent transmission or infection of disease. "Vaccine" means a preparation of killed or attenuated living microorganisms, or fraction thereof, that upon administration stimulates immunity that protects against disease and is approved by the federal food and drug administration as safe and effective <https://app.leg.wa.gov/RCW/default.aspx?cite=70.290.010>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx?cite=70.290.010>

Finally, do no harm! You cannot possibly know or care more about the health of children than do the parents of Washington children!

Now I ask, how necessary or even safe is it to give a vaccine to a person who already has immunity to the pathogen? Most children by now have been exposed to the virus and have developed immunity without difficulty since it has now been almost 2 YEARS. Why

consider a mandate for those not at high risk for adverse outcome should they become infected but who carry unknown risks of adverse reaction with getting the shot?

I look forward to hearing these concerns addressed and evidence for any and all recommendations to be presented when I tune into your meeting on January 12.

Thank you,

Hailey Eames

(spreads easier) but less deadly. Real immunity is achieved with exposure and recovery as is evidenced by the fact that those infected with SARS in 2002/3 cannot become infected with SARS CoV2 today! In contrast, Covid19 has managed to find a way to escape the vaccine as is evidenced by the incredibly high numbers of vaccinated and even boosted individuals getting sick and testing positive. Surely this fact has not escaped your knowledge!

As Health Board members, you are obligated to provide us with facts that support any and all recommendations or requirements.

- 1) What is the current rate of mortality for COVID19 infection and stratified according to age groups?
- 2) Point to ANY measures that have reduced the numbers of fatalities (cases are not fatalities).
- 3) What is the rate of all COVID 19 caused mortality in WA in 2020 and 2021?.....did the measures imposed reduce the number of deaths from prior year?
- 4) Provide me evidence of asymptomatic spread of SARS CoV2.
- 5) Provide me safety studies for masking children and randomized clinical trials for masks preventing spread of lab-confirmed upper respiratory viruses (not modeling of masks on mannequins).
- 6) Make public the accuracy of testing - what is the rate of false positives and false negatives of tests and were results determined by manufacturers of the tests or unbiased 3rd party investigators?
- 7) Provide evidence that the vaccines prevent infection and transmission and that they improve the health of individuals who receive them compared to those who do not.
- 8) Explain why there is so much focus on eliminating this 1 virus when human immune systems have successfully protected our growing population since the beginning of time?

I believe that as members of the WA State Health Board you truly desire to improve the health of Washingtonians. However, I do not trust that you have carefully investigated and logically determined adequate and measurable health remedies for which you are able to provide evidence. Before doubling down on measures that will HARM more than they HELP the overall health of citizens, please determine and make public the evidence to justify any policies.

Regarding mandating shots, know that the clinical trials will not be completed until 2023. Know that WA State has a legal definition of a vaccine that the C19 shots do not fulfill as they were never part of a living microorganism nor do they prevent transmission or infection of disease.

Dear Health Officials,

We absolutely do NOT believe that the Covid 19 vaccine should be required for children to gain entry to child care or school! PLEASE vote 'NO' on the states effort to mandate the vaccine for children! It is currently only an EUO {Emergency Use Only}, and quite clearly not efficient or effective for stopping Covid; the possible dangerous side effects resulting in permanent disability & even death, {Listen to the people who have experienced deep loss after loved ones have taken the vaccine in good faith!!}, create the need for people to make their own medical decisions in regards to any medicine put into their bodies & the bodies of the children they are charged to protect! We urge you to make the moral & humane decision with the power that has been entrusted to you. Thank you!!

Most sincerely,
Amie & Dave Beisel

Vote NO on this policy. VOLUNTARY is not VOLUNTARY if this is implemented. ONLY if Illegally entered the country and are not US citizens.

PROPOSED POLICIES:

- Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

Sincerely,
Marilyn Bennett

with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Fwd: January 12 Meeting- Current infectious disease WAC codes to include Covid-19 for all WA State residents.

Send an email to these people by tomorrow!! This is the one I sent. They are trying to use the WAC's to set up camps in WA to force people into and to require the vaccine for ALL WA schools.

Subject: January 12 Meeting- Current infectious disease WAC codes to include Covid-19 for all WA State residents.

Hello,

I'm concerned about the WAC's being reviewed to possibly be revised and add to them. You don't have the right to decide if a child gets vaccinated or to decide if you can use law-enforcement to detain me and or my family if you choose to do so. The following proposed policies/WAC's are unconstitutional! .

PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC

This blatant abuse of power needs to stop. I am NOT in support and oppose these possible changes. Please don't do this.

Thank you,

Dear Board Member,

With headlines like this today, I do not think there is enough information for the board to be making a mandate for shots for covid! SAY NO TO ANY MANDATES. INFORMED CONSENT is required for medical decisions by the individuals and parents of minor children.

Judge Gives FDA Just Over 8 Months to Produce Pfizer's Safety Data

The decision rejects the FDA's request to release the data over what would be 75 years.
Sincerely,
Marilyn Bennett

To whom it may concern:

I am writing you to urge you to stand up against the push for vaccine mandates (for children and adults) and to stand for medical freedom of choice. There are not enough long term studies regarding the use of the Covid-19 vaccine and the option of natural immunity needs to be a part of this conversation, if we are truly wanting to follow the science.

Even the CDC and Dr. Anthony Fauci have admitted that the vaccine itself does not stop transmission or infection. This is the logical disconnect between facts and political agenda.

Sadly, with the push for this and the proposed policies to allow health officers to use law enforcement to order persons involuntarily to isolation facilities or coerced medical intervention, Washington board of health is playing with medical tyranny. Not only is all of this discussion in direct violation of the Washington State Constitution and the US Constitution, the proposed policies are in direct violation of the Nuremberg code article 6 section 3 that states: No government can mandate or force medical treatment without individual consent.

Please stand for medical freedom of choice for the citizens of Washington.

I urge you to reject the imposition of a Covid vaccine requirement for children in Washington State. Children have a nearly 100% recovery rate from Covid 19, they have not been shown to be spreaders of the virus, and should never be required to receive an experimental EUA drug to cause severe side effects and death.

Thank you for your time,
Mary Harris

External Email

Dear Board Member,

I am sure you have had a lot of comments going both ways on view and opinions of what is best for the situation at hand. Never in the history has a vaccine been pushed like this and for what reason to curb the fear of others? We CAN NOT allow this emotion to cloud what is right to each of us and our choice to what we put in our bodies. We have been given that right to have the option to choose what is best for our own bodies and for what is best for our children. The depression, the drugs, the bullying in our children's schools are way more critical to address than a coerced vaccine that is not wanted. We have already survived and while many have not, they had underlining conditions. A healthy person does not need to take medicines and as already proven there is no way to isolate sickness that will obviously remain present. I choose to trust in natural immunity which is still a real proven science and allow each parent to choose what route works best for them.

I AM OPPOSED TO FORCED VACCINES

I Pray to the Lord daily for His Protection, guidance, Love and Justice in this situation.

I thank you for taking the time to read this letter.

Covid vaccines should absolutely NOT be mandatory, especially for kids to attend in-person school. As a parent of children who will be affected by this requirement and as a teacher who is around kids on a daily basis, science does not support this and it is a personal choice.

I myself decided to get the "vaccine" so my symptoms might be lessened if I contract Covid, but only after it was not emergency approved. Kids are not affected the same way as adults (especially with underlying conditions) are. Vaccinated people are getting Covid- not just in breakthrough cases anymore. Mandating the Covid vaccine does not follow the science anymore.

This is a personal family choice that should not be mandated. It will also affect our schools as parents pull kids out of school and are forced- yes- forced- to have their children go remote or home schooled. Non-vaccinated people, especially kids, should not be viewed as second class citizens. This will deny the rights of so many Americans and is absolutely disgusting that it is even being considered.

This is an embarrassment to Washington state.

) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors

(americasfrontlinedoctors.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>
)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Jacqueline Delgado

Subject: Opposition to Implementation of a Covid 19 Vaccine Requirement for Schools

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be

enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. We are opposed to the proposed WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105 and or any changes made to these regarding anything to do with COVID vaccines, COVID mandates or the giving of health officers the authority to use law enforcement.

We are completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or

vaccination.

We are completely against covid-19 injections as part of the school immunization requirements using WAC 246-105.

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

Children have little risk from Covid-19,
but they do have considerable risk from the unapproved Covid vaccines.

In America,
health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention.
This is not about our health; it
is an
unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Neuremberg Code is codified into US law _ Title 45 Part 46 plus Title 21 part 312 & 314.

IT IS LAW and the government is bound by it.

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,

Best Always,

Paige

Dear Washington State Board of Health members,

I understand you are considering some very drastic measures in regards to the Covid pandemic.

I am appalled to think that US citizens would be considered criminals and incarcerated for making medical decisions. What ever happened to "my body, my choice".

In addition, Covid appears to be like the flu at this point, still of concern but totally manageable.

Please do not make decisions that will cause untold hardship on individual and families.

This is still America.

Respectfully,
MarKay Neumann
Anacortes

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

I support the petition for rulemaking (item 11 on the Jan 12 agenda). I support establishing a new rule that prohibits adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

I am strongly opposed to your considering using WAC codes to include COVID-19 for Washington state residents!!

From my research COVID-19 is a manageable disease IF early treatment is administered. I have also observed that those who've received the COVID vaccine (and Boosters) are NOT immune from contracting COVID (or its various mutations) nor are they unable to transmit it to others.

I am also strongly opposed to your requiring school children to receive the COVID vaccine as a requirement for school attendance. As I'm sure you are aware, young children are not at high risk of contracting COVID but the vaccine itself is wrought with considerable long-term health risks for them.

I am appalled that you are considering having Health Officers quarantine individuals or families in a prison-like facility. This is America and NOT NAZI Germany!!! You do NOT have the right to force vaccines on those who do not wish to receive them!! Need I remind you of the Neuremburg Code? In accordance with our state's Constitution and our nation's Constitution we have the right to bodily autonomy when it comes to "experimental drugs"!!

As a government entity you are required to protect the rights of the citizens of this state not infringe upon them!!

I OBJECT to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents and requirement of Covid vaccinations in schools.

ALL other vaccine and medications are trialed for 5-10 years under strict rules. And even then, data is skewed and behind closed door deals are made between the FDA and drug companies. The Covid vaccine was trialed for only MONTHS!!! Not even one year. What are the side effects going to be in 5 years? 10 years? Even the inventor of the mRNA, Dr. Robert Malone DOES NOT RECOMMEND children getting it. You cannot require this vaccine with so much unknown for an ever changing virus that DOES NOT KILL 99.998% of children!!! What are the long term side effects and overall efficacy of this covid vaccine? Are you going to require boosters every 6 months? You miss a booster and get kicked out of school? Unreal expectations. Period. The vaccine does not stop transmission.

Please stop this proposal immediately.

Sincerely,

Michelle Olson

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for WA State residents. I know MANY people who have Omicron right now who are fully vaccinated. Some of those who are vaccinated have been the sickest in their family. Many people are also having adverse affects to the vaccines and we don't read anything about it in the local paper and we know of they are being caused by the vaccine. No one should be forced to inject something into their body that could be lethal. Hitler got away with it and because the people allowed it. Please STOP and think about this and protect our freedoms. We are yet to see the results of these vaccines and you don't want to be responsible for deaths and serious illnesses because you forced people to do something to their bodies against their will. Why would you want to require children to get this vaccine when they have such little risk from Covid-19 and we don't know what the risks will end up being from vaccinating them?

I support establishing a new rule that prohibits adding any Emergency use Authorized product or any licensed product that lacks completed phase 3 trial studies to the school required list.

As someone who is vaccinated please tell me this is not true:

Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

Throwing families in camps is ridiculous now that new research papers continue to emerge and prove this false. This appears on the surface as an opportunity for someone to overreach their powers against citizens going forward. Using a crisis to obtain more power just as American history proves. I am sure having the medical authority to put people in camps will not sit well when you look much further back in history as well and I bet someone will make a reference to it.

The second piece that was sent to me was this:

Include the Covid-19 injections as part of school immunization requirements using WAC 246-105

This appears to go against all data as well. Young children under 18 appear to be the least affected based on the new research of hospitalization risk. We know the vaccines do not stop the spread because the vaccinated are getting it and spreading it. I am vaccinated and still had to go to emergency twice where they have done nothing for me. We should be focusing on treatment which seems to be what nobody wants to discuss. I am against the above proposed agendas.

Thank you,
John-Ryan Jones

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

Washington State Board of Health:

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. The Washington State Board of Health's focus should be to provide preventive, out-patient clinics and administer available medicines and treatments that have been successful when treating Covid, as it is being in other states. The present information available from the CDC and state health departments is confusing, and It seems being fully vaccinated will require regular booster shots, forever!

Also, including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In the United States, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention.

This would definitely be unconstitutional.

Signed,

Janet E. Backe

Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

To All concerned with freedom liberty and the constitution.

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early, by using remedies that are safe, effective and inexpensive. Moreover, it is survivable by more than 90% of the population. These Covid mRNA gene-altering vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots indefinitely!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. The current BioNTech by Pfizer is NOT the item that was granted an approval. Comirnaty was approved, but it is NOT being used now and wont be until 2023.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason. Using threats, intimidation and bullying to FORCE someone to "voluntarily" receive a drug or procedure is unconstitutional and violated the Civil Rights acts of 1964 and Title VII. Any state governor cannot supersede the US Constitution and make up overreaching rules that have no scientific or ethical basis. The governor is acting on ill-advised influences that are unfair, unscientific, and illegal. No one can mandate a drug while during an Emergency Use Authorization when last ditch emergency drugs are being pushed. Any EUA drug MUST be voluntarily accept or refused by free-will and that only after full information of side effects and dangers as outlined in the FDA slide page 16 from Oct 22, 2020.

I am a Registered Nurse and I take care of Covid patients. I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. Including Covid vaccines as a requirement for attending public school is putting our children at risk and making parents chose between having their child in school or forcing them to get the vaccine. Children have little risk from Covid-19, and there are no long term studies on the Covid vaccines. THE RIGHT THING TO DO IS TO LET THE PARENTS MAKE THE DECISION!!

Please do the right thing and let me make the best choice for my children.

Sincerely,

Jennifer Keesler RN

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents:

This disease is manageable if treatment is started early. Moreover, it is survivable by the vast majority of people. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. This disease has become endemic. It is never going away. It's time we learned to live with it. We can't keep everybody living in fear and government tyranny forever. At some point we got to grow up and accept some things can hurt us or even end our lives and sometimes there's nothing we can do to stop that.

Including Covid vaccines as a requirement for attending public school is completely unnecessary:

Children have very little risk from Covid-19 and there has not been nearly enough testing on these vaccines to show they are safe for kids. They are under emergency use authorization and thus should only be used on people with high risk factors for Covid-19. The government does not have the right to force children to take experimental drugs. This is a violation of informed consent. Nobody knows what the side effects really are which is why the vaccines haven't been fully approved. If you know that and give your consent that's one thing. If you are forced or coerced into giving your consent that is unacceptable.

Those who would trade freedom for security deserves neither and will lose both.

Signed,

Thank you,

Mark Smithlin

To: Washington State Board of Health

I object to the plan to apply current infectious disease WAC Codes to include COVID-19 for Washington residents. This virus is manageable if treated early, especially the new Omicron variant. Moreover, overall, it is survivable by more than 98% of the population. The currently available vaccines have a little effect on the Omicron variant, and, in fact, most of those diagnosed with this variant have had at least two shots, many with the boosters. A requirement for booster shots, that we would have to have every six months, only enriches the pharmaceutical companies. This is completely ridiculous for a virus that is, as viruses do, continuously reducing in virulence. The current variant, once people have natural immunity, has been shown to protect humans from other variants much more effectively.

Including COVID-19 vaccines as a requirement for attending public school is completely unnecessary. Children have very little risk from COVID-19, in any of its variants, and many more long-term problems with the vaccines.

In America, health officers do not have the right to forcibly quarantine a person or family for refusing a COVID-19 vaccination or any other type of medical treatment, especially given the survival rate of this virus and constantly increasing number of effective and available therapeutics. We did not incorporate such measures with Ebola (50% survival rate), or other far more dangerous viruses/diseases in recent history, which makes considering such now completely unreasonable.

This is not about our health; it is an unconstitutional, criminal intent attempt by the government to control the population. Japanese internment camps or Jewish ghettos in 1930's-40's Germany come to mind. Those proposing such a plan will be remembered as trying to turn our republic into an authoritarian regime. This is not the will of the people, and they should have full information and decision making power, instead of such things being discussed at a hushed up meeting.

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for WA State residents. I know MANY people who have Omicron right now who are fully vaccinated. Some of those who are vaccinated have been the sickest in their family. Many people are also having adverse affects to the vaccines and we don't read anything about it in the local paper and we know of they are being caused by the vaccine. No one should be forced to inject something into their body that could be lethal. Hitler got away with it and because the people allowed it. Please STOP and think about this and protect our freedoms. We are yet to see the results of these vaccines and you don't want to be responsible for deaths and serious illnesses because you forced people to do something to their bodies against their will. Why would you want to require children to get this vaccine when they have such little risk from Covid-19 and we don't know what the risks will end up being from vaccinating them?

I support establishing a new rule that prohibits adding any Emergency use Authorized product or any licensed product that lacks completed phase 3 trial studies to the school required list.

To: Washington State Board of Health

I object to the plan to apply current infectious disease WAC Codes to include COVID-19 for Washington residents. This virus is manageable if treated early, especially the new Omicron variant. Moreover, overall, it is survivable by more than 98% of the population. The currently available vaccines have a little effect on the Omicron variant, and, in fact, most of those diagnosed with this variant have had at least two shots, many with the boosters. A requirement for booster shots, that we would have to have every six months, only enriches the pharmaceutical companies. This is completely ridiculous for a virus that is, as viruses do, continuously reducing in virulence. The current variant, once people have natural immunity, has been shown to protect humans from other variants much more effectively.

Including COVID-19 vaccines as a requirement for attending public school is completely unnecessary. Children have very little risk from COVID-19, in any of its variants, and many more long-term problems with the vaccines.

In America, health officers do not have the right to forcibly quarantine a person or family for refusing a COVID-19 vaccination or any other type of medical treatment, especially given the survival rate of this virus and constantly increasing number of effective and available therapeutics. We did not incorporate such measures with Ebola (50% survival rate), or other far more dangerous viruses/diseases in recent history, which makes considering such now completely unreasonable.

This is not about our health; it is an unconstitutional, criminal intent attempt by

the government to control the population. Japanese internment camps or Jewish ghettos in 1930's-40's Germany come to mind. Those proposing such a plan will be remembered as trying to turn our republic into an authoritarian regime. This is not the will of the people, and they should have full information and decision making power, instead of such things being discussed at a hushed up meeting.

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

+++++++ Children have little risk from Covid-19,
but they do have considerable risk from the unapproved Covid vaccines.
++++++

In America,
health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention.
+++++++ This is not about +our +health;+ +it
+++++++is +an
unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,

Hope you have a wonderful day!

Jody

I object to the plan to apply current WACs covering infectious disease to include Covid-19. The United States mortality rate is 1.4% (<https://coronavirus.jhu.edu/data/mortality> <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcoronavirus.jhu.edu%2Fdata%2F>) with a very skewed distribution toward the elderly. The average age of Covid-19 death exceeds 82 years old, while the average mortality age in the United States is 78.8. Furthermore, this disease has shown to be manageable if treated early.

The vaccines are showing to be ineffective, especially in the newer variants, such as Omicron. Both the vaccinated and unvaccinated are coming down with the disease and both can transmit the disease equally. There are many unknowns yet with the safety of the vaccines. We do know the VAERS data shows there has been more death and injury due to these vaccines than all other vaccines combined over a thirty-year period. We have no idea what the long-term effects might be with these vaccines. Given the relatively low mortality rate and the known and yet unknown vaccine risks, the risk of mandating vaccination is just too high. I object to any vaccine operating under an Emergency Use Authorization or has not successfully completed Phase 3 trial studies to be required or mandated in the State of Washington.

Sincerely,

Ken Allen

I object vehemently to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 98 percent of the population.

Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Recent studies in Germany discovered that fully vaccinated were more than 400% more likely to catch Omicron, as were the unvaccinated. This means the vaccinated would be the most logical to place into camps, though I would object to this as well.

Since fully vaccinated will require regular booster shots, forever! Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the still experimental Covid vaccines. In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

The action could also lead to great levels of civil disobedience the possibility of which should not be taken lightly.

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. There are a number of alternative treatments that have demonstrated a definitive reduction of the severity of the outcome. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Medical experience would predict that being fully vaccinated will likely require regular booster shots.

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

The currently available Covid virus vaccines, which have only been granted "temporary" authorization, are still in Phase 3 vaccine trials. The long term effects and safety of the treatment are unknown. Present policies seem to be directed at using the entire human population as trial subjects.

Long standing medical ethics outlined by international civil and medical agreements, codes, and covenants have established the requirement for informed consent by any person before receiving treatment or participating in an experiment.

In America, health officers do not have the right to quarantine a person or family in an internment-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. This is bordering on crimes against humanity which is what the Nuremburg Trials were all about.

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. The disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are opposing this plan should be charged with treason.

Signed,

Natalya Vorobets

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, and some have received booster shots. There is also no guarantee that continued full vaccination status will not require ongoing and regular booster shots.

Furthermore this is an alarming law that brings to mind the concentration camps utilized by Nazi Germany to separate those thought of as inferior. It is appalling that the state of Washington would even think to arrest, detain, and separate people under the guise of public health while also taking away personal and parental choice. NO on health official use of WAC 246-100-070 for detainment, unlawful testing, and vaccination for Coronavirus SARS-CoV-2 (Covid-19.)

Signed,

Berta K Wenning

Washington State Board of Health;

PROPOSED POLICIES: Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040).

If you pass this bill you will be in violation of the Nuremberg code and you can be indicted and arrested for your participation. Common Law Juries are being formed around the state, which have the power to do that. A law of this nature violates the Constitution and several health laws, including the Patient Bill of Rights and HIPPA laws. The Supreme Court already ruled that NO emergency can eliminate any rights guaranteed by the Constitution. If you proceed to pass this bill after being warned, you will be considered to be intentionally committing treason. If you are unfamiliar with Common Law Juries and their power, you better look it up. This is a consequence, not an empty threat.

See the laws that David Martin shares in his quick video below. They are the US Federal Statutes that incorporate Nuremberg. David has done all the work and shared it on his website. See link:

https://www.instagram.com/p/CYVSfl2KkSF/?fbclid=IwAR1Ivec598G-DDf93zt2kyHcglJXj2aj8zR314TaGev6uEinsK76M_XV8OM.

I would also like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the

range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

Force vaccinating healthy children for a disease that doesn't affect them is inhumane.

People are dying from the covid vaccines. The risk of the vaccine is 1,000 time higher than simply getting covid. Do the right thing and do not require these vaccinations for school age children.

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable with a %99.75 survival rate. Even more manageable and survivalable with proper treatment and good health habits (working out, taking care of yourself, eating healthy, proper vitamins). Put this money and budget into improving communities health habits and making vitamins, clean healthy food more available.

Thank you

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

Subject: Vaccine for Children

External Email

Hello All,

I have heard that the Washington State Board of Health is making a recommendation for a vaccination requirement for children

Many doctors have agreed that Covid is not a threat to children.

It is unnecessary to require a vaccination for children. There have been studies of side effects that are causing more problems than the actual issue with Covid.

It is not necessary to take a chance and give a trial vaccine to small children when the children are again not susceptible to problems with actual Covid.

Also many doctors have agreed that masks are not providing any benefit.

There have been many studies that there are more psychological negative impacts by wearing a mask for children at school. Children need to see the faces of the teachers and other children to communicate effectively and naturally. Children are becoming unable to socialize appropriately when they are masked. Also children move the mask around and are actually getting more dirt and germs next to their faces than if they were non masked. Children would have to have 10+ masks a day to actually be effective. They would have to change them every time they would touch their face if you really wanted this to work. Also a regular cloth mask is not going to work.

A simple procedure of having children wash their hands often throughout the day will help more than having the vaccine and masks. It is also important that if children are sick they need to stay home. The government should put more money towards the help of parents

and child care of sick parents.

Let's get the children back into the classroom, no masks, no vaccines and let the children learn in a normal healthy environment.

Let's do what is best for the children.

Please step away from any politics and stick with what we know from trusted doctors. And when I say trust the doctors I mean the ones that don't have a political agenda.

Thank you!

Regards,

Elke Pitman

I urge you to reject the imposition of a Covid vaccine requirement for children in Washington State. Children have a nearly 100% recovery rate from Covid 19, they have not been shown to be spreaders of the virus, and should never be required to receive an experimental EUA drug to cause severe side effects and death.

Thank you for your time,
Mary Harris

You cannot compare this vaccine to those that prevent the measles, mumps, varicella, or pertussis. Those are vaccines that PREVENT disease.

The Covid Vaccination has been proven to NOT PREVENT sickness... not only can you still get Covid with this vaccine, you can SPREAD it... so requiring students to be vaccinated for Covid is ridiculous. You aren't stopping or slowing anything this way.

LET PARENTS CHOOSE WHAT IS BEST FOR THEIR CHILDREN, not schools.

Hello Melanie,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Rubin, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Subject: Stop this blatant usurpation of our freedom and basic rights!

External Email

Stop this blatant usurpation of our freedom and basic rights! My family and I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105 as I understand they are forcing people to comply with medical testing, treatment, vaccinations, examination against their free will and free choice. Furthermore, I understand they are giving such tyrannical powers as forcing people into quarantine facilities. This sounds a lot like the National Socialists in Hitler's Germany. #040 alone gives the local health officer authorization to detain Washingtonians in a quarantine facility and force whatever "treatment" they feel is in the state's best interest. This is about whether our state will respect any rights they don't believe is convenient for them. This is a ploy to subject us to slavery. Please browse #040 yourself if you think I am exaggerating! No disease is as dangerous as losing human dignity and subjecting ourselves to an elitist "health officer" or anyone's subjective control. Stop this blatant usurpation of our freedom and basic rights!

Thank you!

Jay MacPherson

Subject: Fwd: Vaccination for children

External Email

☐ To whom it may concern,
I would like to express my opinion about mandating vaccination for children to attend school.

Based on the information that is available for children, especially young males age 12 to 18, the side effects of the vaccine for COVID-19 do not, in my opinion, outweigh the benefits of the vaccine.

It would not be in the best interest of the children to make this vaccine mandatory at this time.

There is new medication on the market to treat COVID 19 (molnupiravir and paxlovid) that significantly reducing symptoms, hospitalizations and death when given within 3 days of symptom onset. These drugs are available at no cost to our students and families, paid for by our government.

Proposing mandatory student vaccination for COVID at this point would be the same as proposing influenza vaccines. As similar treatments are available for flu.

Thank you for taking into account my opposition to COVID-19 vaccination being mandatory for students.

Subject: vaccine

External Email

Hello,

Our kids will be pulled out of public school if the covid vaccine becomes a requirement or they are discriminated against for not having it.

1- The risk of severe illness or death to children is still very low, considerably lower than influenza. There is a higher risk of adverse reactions to the vaccine. It is not our children's responsibility to protect the vulnerable at their own risk. Any vulnerable teachers and staff are welcome to vaccinate themselves to mitigate their own risk.

2- Vaccinated are still becoming infected and are spreading it the same as unvaccinated, posing the same risk to the vulnerable. Again, the vulnerable all have access to the vaccine to mitigate their own risk as they see fit.

3- While adverse reactions to the vaccine may be fairly low in the short term, they do happen. there are literally zero long-term studies in humans to know if there will be any impacts to health down the road. History is full of products once deemed to be safe by the FDA that are now banned. Let's see how this looks in 5 to ten years.

4- I would also like to add that as long as "any cloth or paper" mask is deemed sufficient, I will consider the source of the requirement to be of questionable intent. ALL ACTUAL SCIENCE has consistently shown an actual surgical mask to have marginal effectiveness against a virus, with a K95 or N95 to be the only mask to make much difference. The flimsy cloth or paper that the majority of children are wearing is less than effective. I would like the data on how many staff and children are out of WA schools with other viral/respiratory illnesses/asthma compared to the 2018/2019 school year. Our circle of children have been continually struggling with this since the beginning of school. Please

see The University of Michigan website for info on their influenza outbreak that was severe enough that the CDC was called in. This university requires masks AND vaccines (and lets not forget that influenza particles are significantly larger than Covid particles). These are college students, capable of better mask hygiene than the younger children.

This is absolutely ridiculous and should NOT be a requirement for children to go to school.

This will and already has become way too political and the children will suffer the consequences of a stunted education while their parents continue to fight for their rights.

All kids living in the United States have the right to a free public education. And the Constitution requires that all kids be given equal educational opportunity no matter what their race, ethnic background, religion, or sex, or whether they are rich or poor, citizen or non-citizen.

The vaccine does not stop the spread of Covid and I urge you to really consider if the schools is the main source of the problem... it's not.

Hello,

I am VERY STRONGLY OPPOSED to making the COVID-19 vaccine a required immunization for kids to attend school or daycare. I am very much opposed to it being required for anybody at all. It is still a very new "vaccine" and hasn't had time to be fully tested to see what any long-term effects it might have. Also it can affect different people differently and not always for good. Plus, unlike the older vaccines, the Covid one doesn't actually keep people from getting Covid or spreading it to others. Please, please do not allow this to become a requirement! I know for me, and many others I know, if it does become required we will be pulling our kids out of school altogether, rather than go against what we believe is best for our kids and inject them with the Covid vaccine.

Most sincerely,
Israel Dehnert

To Whom it May Concern,

I am asking you to please consider voting no on the mandate that will mean children can not enter schools or child care facilities if they're not vaccinated. I am a fully vaccinated mother of two who does believe the vaccine is good, but I also believe in freedom of choice and medical decisions. When you take that away, you take away the very thing that makes us human. Please let each family decide for themselves on this issue. Thank you for your time.

Regards,

Subject: Urgent

Hello,

I am a mother of two children and I am legally within my God given rights to oppose the recommendation to require school age children to be vaccinated to attend school and I'm about to share with you why...

This is not right under any circumstances and to try and tamper with a child's rights under our Constitution to have access to education is absurd, wrong, and act of violating their rights.

The so called "vaccine" aka (experimental drug) has not been out long enough to prove enough of any good or effective results and injecting of a foreign object into children is not right and a violation to their rights and our rights as the parents regarding the well being of their health rights, not made by man, but by God when he created us. We have freedom of religion, freedom of speech and freedom to choose what goes into our bodies.

When the Polio vaccine was first thought of in the 1940's, funded by the March of Dimes Foundation, there seemed to be a good outcome of the vaccines that were created by Dr. Jonas Salk. It took them over a year, up to 10+ years to work out the ups and downs in the science before using it in people as a vaccine. The "Covid-19 shot" has only been out for a year and not been through it's own ups and downs to be pushed so hard to be injected into innocent children.

Dr. Salk used a chemical that was injected into people to try to kill the 125 strains of Polio. Yeah there was some hype about how good it was working but, in 1954 there were 200 cases of people becoming infected by a bad batch of the vaccines. I'm not surprised because, vaccines don't prevent contraction of disease or viruses, they minimize the possibility of bad symptoms once one has already contracted it, and it ultimately is based on each person's body, immune system and overall well being.

My overall point in saying all this, is that the "shot" that they are considering to be a vaccine and wanting so badly to be injected into children, is still under emergency use by the FDA and is not showing any proof of any good outcome for children, as it has not been studied long enough and has not been out long enough for it to be considered trustworthy. I don't trust their so called "statistics", and my children are not a statistic study, they are human beings and have the right to be educated, and have freedom. The freedom that we have today, that is being tampered and stomped on, was bought and paid for by the lives and blood shed of many who gave their lives for it; much like the same way Jesus Christ paid for our sins and died for us to have freedom from the bondage and slavery to sin.

This whole pandemic and the pushing and shoving of control, and all that is becoming of it, is a form of segregation and in some ways, like the Holocaust, but in a different way involving vaccine status, herd immunity/herd mentality and so on. It's sick and our future generations don't deserve this kind of crap. Our kids deserve better and when the United States of America separated from King George, we became free from control, and all the tyranny and oppression that he caused. There is too much happening that mimics what he was doing and what our soldiers fought to free us from. ☐☐☐ Please consider and try to understand what I am saying. This isn't personal towards any one person, this is a nationwide issue and our kids don't need to be subjected or be involved the political garbage that's happening around them. That's why they have parents to guide and protect them. If you have kids, I hope this reaches your heart in a good way.

Thank you and God Bless America,

Jennifer Childs

Subject: URGENT

External Email

Hello Christy,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Rubin, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Subject: Upcoming Vote regarding mandates for vaccine

External Email

To All Washington State Officials who represent me,

I am writing you as a concerned citizen of Washington state. I understand you have a major decision coming before you to consider vaccine mandates for children as well as adults. I urge you to take into your thought process more than the current accepted binary conversation that the vaccine is the one and only way to proceed in health for our communities and states.

In years past, we as parents, families and supported by the medical community considered natural immunity strong and robust. We currently have doctors who are successfully helping to keep sick patients out of the hospital, and they need more physicians to help them. There is more to this story on a successful way through this, and your decision is an important part of it.

There are not enough long-term studies regarding the use of the Covid-19 vaccine and the option of natural immunity needs to be a part of this conversation if we are truly wanting to follow the science. The fact that the drug manufacturers have requested to wait to release their data for 75 years creates confusion and concerns on why they are not acting with transparency. Recently the CDC director and Dr. Anthony Fauci have admitted that the vaccine itself does not stop transmission or infection. This is the logical disconnect between facts and political agenda.

In addition, there are thousands of deaths and adverse reactions reported, though not published through mainstream media. I will provide you links to some of these sources if you want.

You will be looked on in history for the vote you are about to make. How will you choose to stand for the liberty and freedom our country is rooted in? Can you imagine what

caused our state and government to place Germans and Japanese citizens in camps during the 2nd World War? It may have seemed like the best option at the time, however, it is viewed correctly today as a human rights abuse. It was a decision made out of fear. I urge you to make a decision based on courage, transparency, medical facts, which come from all places, including those that are being silenced in the main media. Please do not allow fear to be part of your decision. Fear of what others think or say, fear of job loss, lack of promotion, fear of possible personal cost if you stand against the swell of the current tyrannical narrative. You have so many people cheering you on to stand for human rights including medical freedom of choice.

Sadly, the push for the mandate of vaccines and the proposed policies which could follow will place health officers in the possibility of managing a police state. We are not in an emergency situation that would justify the use of law enforcement to order persons involuntarily to isolation facilities or coerced medical intervention. If this continues Washington board of health is considering medical tyranny. Not only is all of this discussion in direct violation of the Washington State Constitution and the US Constitution, but the proposed policies are also in direct violation of the Nuremberg code article 6 section 3 that states: No government can mandate or force medical treatment without individual consent.

Please stand for medical freedom of choice for the citizens of Washington.

External Email

Dear Health Board,

Thank you for accepting open comments. Please consider that COVID19 is a zoonotic virus that will continue to run through all animals & people alike. There will not be an end. Thankfully the virus will degrade as it has with Omicron which is not deadly to the majority.

It's is unconstitutional to use a health concern to quarantine or force vaccinate anyone. This is not a third world country where the various agencies can do whatever they want to the populous.

The best thing you can do at maximum is possible require weekly testing. Even that is excessive with unfair fraudulent contracting practices. Keep in mind that the testing has high false positive rate.

In summation, I recommend that you rule against any forced quarantine or vaccination. That is not America.

Thank you,

LMcMahon

I oppose the proposed WAC's 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against covid-19 injections as part of the school immunization requirements using WAC 246-105.

I urge you to reject the imposition of a Covid vaccine requirement for children in Washington State. Children have a nearly 100% recovery rate from Covid 19, they have not been shown to be spreaders of the virus, and should never be required to receive an experimental EUA drug to cause severe side effects and death.

Thank you for your time,
Mary Harris

Subject: Support of Informed Choice Washington, agenda item #11

External Email

I am in favor and support of the Informed Choice Washington's petition for rulemaking ITEM #11, asking for a new rule to PROHIBIT the Washington State Board of Health from requiring students to receive/endure/or be vaccinated with any Emergency Use Authorized products, or licensed products that lack COMPLETED PHASE 3 CLINICAL TRIAL STUDIES.

I OPPOSE the Washington State Board of Health's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school.

As has been seen by the Washington State Universities who mandated COVID-19 shots for all staff and students - IT DOES NOT STOP COVID-19! The Washington State Universities are mostly all presently not in class but are remote due to the rise in confirmed COVID-19 cases in Vaccinated students and staff.

The FDA admits that the safety of this vaccine is unknown. How can the Washington State Board of Health know differently? Who will be responsible for the unknown side effects of this trial vaccine? Let the parents and guardians of all children decide what is best for their children.

Marcia Estell

To whom it may concern:

I just wanted to share some thoughts with you about this vaccination. I hope you will listen to the voices of the people. Mandating something that has no history is absolutely frightful. There has not been enough time to see how this will affect our society down the road.

We also know that children are not affected to the degree that adults are by Covid so why would we experiment on them?

The documentation does show, however, that both the vaccinated and unvaccinated are both spreading Covid. So, why are we and our children being pushed to get vaccinated? It seems to me the vaccination isn't the cure. Help me out here.

Respectfully,

Kim

Hello,

I am writing this email in hopes that I can reach the correct people who are making decisions out side of their rights. I DO NOT believe that it is ok for you to decide what I put into my child's body!!!

That is not your decision to make and parents should not have to decide between putting an experimental vaccine into their child or to send them to public school. To say we cannot send our children to school without the vaccine....the school by the way that MY TAXES pay for is illegal and horrible.

Our children are not guinea pigs to be tested on. If I cannot send my child to school then there should be a law put into place so I can get out of paying the taxes on something I am not utilizing.

Please do not take a parents right to decided what is best for their child unless you are willing to come into our home and pay the consequences for what may happen to them. Kids need to be in school but they should not be forced to get an experimental vaccine!!!!

Thank you for listening and I hope you guys make the right choice. Washington state used to be the best place to live and now I am afraid many will be forced to leave because lawmakers think they have the right to make choices for us in what is supposed to be a FREE land!

Sincerely,
A concerned tax payer that pays your paycheck!

Subject: Strong disagreement with the proposal to make COVID-19 vaccines mandatory for school age children

External Email

Hello, dear representative!

I would like to express my strong disagreement with the proposal to make COVID-19 vaccines mandatory for school and childcare admission in our county, as well as state.

As a parent and a member of the community, I implore you to please stop pushing to require Covid-19 vaccinations for ANY child in child care or school. Each point contains a link to the relative research.

1. All COVID-19 vaccines currently administered in the USA are still under emergency approval

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.hopkinsmedicine.org%2Fhealth-and-diseases%2Fcoronavirus%2Ffull-fda-approval-of-a-covid-19-vaccine-what-you-should-know&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C49c330881abf4277afb408d9d1ff6ad5%7C11d0e217...>>
. Meaning, FDA still has not enough scientific safety data collected to grant a full approval.

2. Children and young people have a mostly mild or asymptomatic

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.eurosurveillance.org%2Fcontent/7917/ES.2021.26.14.2001248%23abstract_content&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C49c330881abf4277afb408d9d1ff6ad5%7C11d0e217...>
presentation when infected with SARS-CoV-2. They are at near-zero
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cebmn.net%2Fglobal-covid-19-case-fatality-rates%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C49c330881abf4277afb408d9d1ff6ad5%7C11d0e217...>>
risk of death from COVID-19.

3. There is an unusually high

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.openvaers.com%2Fdata&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C49c330881abf4277afb408d9d1ff6ad5%7C11d0e217...>>
rate of reported adverse events and deaths following the COVID-19 vaccines compared to other vaccines. Some adverse events
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fcoronavirus%2Fncov%2Fvaccines%2Fsafety%2Fadverse-events.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C49c330881abf4277afb408d9d1ff6ad5%7C11d0e217...>>
are more common in the young
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fvaccines%2Fclinical-considerations%2Fmyocarditis.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C49c330881abf4277afb408d9d1ff6ad5%7C11d0e217...>>

, especially myocarditis

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.sciencemag.org%2Fnews%2F2021-04-08%2Fscience.2021.437.1000%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C49c330881abf4277afb408d9d1ff6ad5%7C11d0e217264&isredir=1>>
reports-link-between-rare-cases-heart-inflammation-and-covid-19-
vaccination&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C49c330881abf4277afb408d9d1ff6ad5%7C11d0e217264&isredir=1
. Where potential harm exists from an innovation and little is known about it, the precautionary principle dictates to first do no harm. Better safe than sorry.

4. Medium and long-term safety data

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.aier.org%2Farticle%2Fwhy-are-we-vaccinating-children-against-covid-19%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C49c330881abf4277afb408d9d1ff6ad5%7C11d0e217264&isredir=1>>
are-we-vaccinating-children-against-covid-
19%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C49c330881abf4277afb408d9d1ff6ad5%7C11d0e217264&isredir=1
about the COVID-19 vaccines are still lacking. Children and young people have a remaining life expectancy of 55 to 80 years. Unknown harmful long-term effects are far more consequential for the young than for the elderly.

5. Vaccination policies rely on expected benefits clearly outweighing the risk of adverse events from the vaccination. The risk-benefit analysis

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.hartgroup.org%2Fwp-content%2Fuploads%2F2021%2F05%2FOpenLetterChildVaccination.pdf&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C49c330881abf4277afb408d9d1ff6ad5%7C11d0e217264&isredir=1>>
content%2Fuploads%2F2021%2F05%2FOpenLetterChildVaccination.pdf&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C49c330881abf4277afb408d9d1ff6ad5%7C11d0e217264&isredir=1
for the COVID-19 vaccines points to a high potential risk versus no benefit for children and young people.

6. Transmission

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Facademic.oup.com%2Fcid%2Farticle-abstract/doi/10.1093/cid/ciaa1000&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C49c330881abf4277afb408d9d1ff6ad5%7C11d0e217264&isredir=1>>
of SARS-CoV-2 from children to adults is minimal and adults
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fadc.bmj.com%2Fcontent%2Fearly/2021/04/08/adc.2021.01604&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C49c330881abf4277afb408d9d1ff6ad5%7C11d0e217264&isredir=1>>
2021-
321604&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C49c330881abf4277afb408d9d1ff6ad5%7C11d0e217264&isredir=1
in contact with children do not have higher COVID-19 mortality.

7. It is unethical

<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fportal.unesco.org%2Fen%2Fev.php%3FURL_ID%3D31058%26URL_DO%3DDO_TOPIC%26URL_SECTION%3D201.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C49c330881abf4277afb408d9d1ff6ad5%7C11d0e217264&isredir=1>

Attention public SERVANTS!

Vote NO on this proposed vaccine mandate for our school children. Data is showing people with the vaccine are catching the virus just as easily as those who have not been vaccinated. There is absolutely no justification for forced injections on free citizens. This outrageous government overreach needs to end NOW!! You are all in violation of the Nuremberg Code! Vote NO!!! Thousands of students will be removed from the public school system by their parents acrossed the state if this ridiculous use of force is installed. You should all be ashamed of yourselves! It's time to start listening to the people you work for, WE THE PEOPLE. You have forgotten your place, you are employees, not our dictators. End this outrageous overreach NOW and VOTE NO!!!

Board of health members.

It is gravely concerning that you are even CONSIDERING mandating a vaccine for children. How can you even consider SUCH A RIDICULOUS measure when there is not even AN APPROVED vax!!!!?? We will fight this bullshit tooth and nail - leave our kids alone and get the eff out of here with Dictator Inslee's ILLEGAL BULLSHIT MANDATE. One day you will look back and all be held liable / accountable for every death and injury if you approve this ridiculousness.

Even if that's your own guilt, the day will come.

Leave the kids alone. Un-mask them. Get them back in class. This is honestly the FASTEST way through this. Someone STEP UP and be a dayum leader !!!!! I know AT LEAST one of you has an ounce of common sense. Be the state everyone admires, not the one following.

Do you even realise EVERY STATE has the "new" strain?

Wa. St is number 9 NATIONALLY in regards to vaccination rates, and we have (had) the 8th HIGHEST INCREASE.... Tell me how that's "helping" WITHOUT talking about POTENTIAL.

WE ARE ALL GETTING COVID. You know the difference between the covid vax and mmr? EXACTLY. Please apply the same LOGIC - a REAL vaccine IS NOT REQUIRED as "THEY" desire. It lasts "forever".

Dear Caitlin,

Today I am writing to you to express my express my concerns on hearing that the Department of Health is considering mandating COVID Vaccines for children to attend school. I am completely AGAINST such a mandate.

The COVID Vaccines in the USA are NOT FDA approved and are being administer under and Emergency Use Authorization. According to the Nuremberg Code EUA products can not be mandated.

The risk of children dying from COVID are statistically at zero risk. The survival rate is from 99.997 – 99.998%. There can not be a benefit to mandating children to be vaccinated as there is no risk. No one knows what the long term risks of the vaccines are. We should not react out of fear.

Do not allow this mandate to move forward, Please.

To whomever it may concern,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis

of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>
)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you

I am 64 years old and have been born and raised in WA state. Never have I witnessed such an government take over.

Tiese mandates that are ruining lives and families need to stop. I have raised 4 children here and are now are raising their children. Which my hard working children, good citizens have lost their jobs over the mandates of being forced to get a vaccine that has not been studied with proper data to support, and is not been proven to stop viruses. No one knows the long term effects of this type of vaccine and now you want to force parents to take this into their little bodies! Shame on our leaders of this awful state. This is controlling our human rights of our and their bodies. And is certainly against our freedom of choice which our country is suppose to be based on.. FREEDOM, against the constitution of our once great country. I have been a nurse for 40 years and have left because of what I am seeing, my whole family has had Covid and are doing fine. We have natural immunity which our bodies give us. DO NOT MANDATE THIS FOY OUR CHILDREN.

SINCERELY

Jennifer McCann

Subject: Subject: Concern for Covid Vaccine to be added to required list for school enrollment.

External Email

> Dear Washington State Board of Health,

>

> I am writing with sincere concern regarding the direction of conversation around making the Covid vaccine a requirement for school enrollment. Understanding the severity and length of time that we have been dealing with this virus, I can understand that people want to do what is right to protect themselves and others. I too want to protect myself, my loved ones, and my community. That is why I take precautions wearing a mask, handwashing, limiting social interactions, etc. However, I cannot understand mandating that people who have a reasonable right to question the long term effects of the vaccine and make a personal choice to not vaccinate would be held to the fire to make a decision that we are not comfortable with or choose to pull our child out of the school system. I have been a public school teacher in Washington state for 20+ years and that would not be my desire. However, I absolutely oppose any Covid vaccine requirements for school age children. Mandating the vaccine for school enrollment is a gross over-reach at this time, while at first glance the vaccine may be presenting as safe, there has not been enough years to determine long term effects. People have a right to make an informed decision, many people have felt that the information we have so far is enough for them to take a vaccine. Others, like myself, wish to have a bigger picture, especially considering vaccinated individuals can still spread and catch this virus. Please afford people the right to make this delicate medical and personal family decision on their own and not be put to the fire to take the shot.

>

> Sincerely,

Lisa Ybarra

To the Washington State Board of Health members,

I'm a registered voter here in Washington and would like you to vote NO for the mandate of children to have to have the Covid vaccine to go to school. I believe that medical decisions and treatment should be between the person/family and their medical providers only.

Thank you for your time,

Elisha Lane

Please make the moral and right decision to allow parents to decide whether or not to provide their child with a COVID-19 vaccination.

Sincerely,

Aimee Bloom

Subject: Upcoming vote related to vaccine mandates

External Email

To All Washington State Officials who represent me,

I am writing you as a concerned citizen of Washington state. I understand you have a major decision coming before you to consider vaccine mandates for children as well as adults. I urge you to take into your thought process more than the current accepted binary conversation that the vaccine is the one and only way to proceed in health for our communities and states.

In years past, we as parents, families and supported by the medical community considered natural immunity strong and robust. We currently have doctors who are successfully helping to keep sick patients out of the hospital, and they need more physicians to help them. There is more to this story on a successful way through this, and your decision is an important part of it.

There are not enough long-term studies regarding the use of the Covid-19 vaccine and the option of natural immunity needs to be a part of this conversation if we are truly wanting to follow the science. The fact that the drug manufacturers have requested to wait to release their data for 75 years creates confusion and concerns on why they are not acting with transparency. Recently the CDC director and Dr. Anthony Fauci have admitted that the vaccine itself does not stop transmission or infection. This is the logical disconnect between facts and political agenda.

In addition, there are thousands of deaths and adverse reactions reported, though not published through mainstream media. I will provide you links to some of these sources if you want.

You will be looked on in history for the vote you are about to make. How will you choose to stand for the liberty and freedom our country is rooted in? Can you imagine what caused our state and government to place Germans and Japanese citizens in camps during the 2nd World War? It may have seemed like the best option at the time,

however, it is viewed correctly today as a human rights abuse. It was a decision made out of fear. I urge you to make a decision based on courage, transparency, medical facts, which come from all places, including those that are being silenced in the main media. Please do not allow fear to be part of your decision. Fear of what others think or say, fear of job loss, lack of promotion, fear of possible personal cost if you stand against the swell of the current tyrannical narrative. You have so many people cheering you on to stand for human rights including medical freedom of choice.

Sadly, the push for the mandate of vaccines and the proposed policies which could follow will place health officers in the possibility of managing a police state. We are not in an emergency situation that would justify the use of law enforcement to order persons involuntarily to isolation facilities or coerced medical intervention. If this continues Washington board of health is considering medical tyranny. Not only is all of this discussion in direct violation of the Washington State Constitution and the US Constitution, but the proposed policies are also in direct violation of the Nuremberg code article 6 section 3 that states: No government can mandate or force medical treatment without individual consent.

Please stand for medical freedom of choice for the citizens of Washington.

Hello,

I am VERY STRONGLY OPPOSED to making the COVID-19 vaccine a required immunization for kids to attend school or daycare. I am very much opposed to it being required for anybody at all. It is still a very new "vaccine" and hasn't had time to be fully tested to see what any long-term effects it might have. Also it can affect different people differently and not always for good. Plus, unlike the older vaccines, the Covid one doesn't actually keep people from getting Covid or spreading it to others. Please, please do not allow this to become a requirement! I know for me, and many others I know, if it does become required we will be pulling our kids out of school altogether, rather than go against what we believe is best for our kids and inject them with the Covid vaccine.

Most sincerely,

Israel Dehnert

Hello Caitlin,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Rubin, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Subject: Stop this blatant usurpation of our freedom and basic rights!

External Email

I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105 as I understand they are forcing people to comply with medical testing, treatment, vaccinations, examination against their free will and free choice. This blatant usurpation of our freedom and basic rights needs to STOP NOW! Furthermore, I understand they are giving such tyrannical powers as forcing people into quarantine facilities. This sounds a lot like the National Socialists in Hitler's Germany. #040 alone gives the local health officer authorization to detain Washingtonians in a quarantine facility and force whatever "treatment" they feel is in the state's best interest. This is about whether our state will respect any rights they don't believe are convenient for them. This is a ploy to subject us to slavery. Please browse #040 yourself if you think I am exaggerating! No disease is as dangerous as losing human dignity and subjecting ourselves to an elitist "health officer" or anyone's subjective control. Stop this blatant usurpation of our freedom and basic rights!

Sincerely,

~ Kari Udlock

Subject: Student "vaccine" mandate

External Email

Greetings to Whom it May Concern,

My name is Lydia Ross. I am a parent of a 4th grader in Spokane county. For my child's safety I'd rather not give anymore information than this. I'm writing in regards to this proposal of a COVID-19 "vaccine" mandate for our younger children 5-11. First I'd like to say this isn't a vaccine. Vaccines protect us from things like chicken pox, small pox etc. These "vaccines" you speak of are simply an immunization. They DO NOT stop anyone from contracting Covid-19 they help protect us against it, like the flu shot. So I will be referring to this mandate as an immunization shot from this point forward. I am strongly AGAINST this mandate. To force our young children to take an immunization that we have no idea how it's going to affect them in the long term, is by no means ok with me. The science is just not there, when it comes to our young people. Some would argue other wise, but there are no long term studies to prove me wrong. As a parent if you force this immunization onto my child I will be forced to pull them out. The flu shot is not mandatory so neither should this covid shot. I am lacking trust in our school system already. What this state is teaching our kids isn't what I would expect for elementary students. I haven't seen anything grade appropriate for my 4th grader other than math. So this will be my final straw in any sort of faith in the system. I want to trust our public schools I really do. I want to see them get back to basics with learning. I'm getting off point so let me vier back. I want to see this county or state REJECT this mandate on our children. Let the parents decide what is best for our children you don't get to decide that. For the record I am for vaccines. I am not one of these anti vaccine people out there. Not all of us think this immunization is the right choice for our kids. I do not want to be put into a corner with my back against a wall with the choice of getting an immunization shot or pull my kid from school. Don't do this to parents we have been through enough with virtual learning, struggles with mental health, etc. I won't get into our personal struggles. Moving on. My child is terrified of this shot not because of a needle, but because they're not sure if it's safe for them and I'm not sure either. Thank you for reading this I appreciate your time and having a voice in this debate. I hope you do the right thing and reject this extreme assault on our kids.

Lydia Ross Mother to a 4th grader.

Subject: Upcoming Proposed Policies

External Email

Hello,

I am a Washington State resident and have become aware of the proposed policies to be presented on January 12th.

I am writing to register my emphatic opposition to mandating Covid-19 vaccines for school attendance.

I am also writing to register my opposition and absolute outrage at the prospect of the involuntary detention and isolation in quarantine facilities of those who refuse to comply with requests for medical examination, testing, treatment, counseling, and vaccination. The right to refuse these things is protected by both our state and federal constitutions, and their violation brings to mind (and I do not draw this comparison lightly) the horrors of Nazi Germany.

I urge you to utterly reject these policies and stand as an inhibitor of the evil that would come of them.

Respectfully,

Maggie MacInnis

Subject: Upcoming Vote regarding mandates for vaccine

External Email

To All Washington State Officials who represent me,

I am writing you as a concerned citizen of Washington state. I understand you have a major decision coming before you to consider vaccine mandates for children as well as adults. I urge you to take into your thought process more than the current accepted binary conversation that the vaccine is the one and only way to proceed in health for our communities and states.

In years past, we as parents, families and supported by the medical community considered natural immunity strong and robust. We currently have doctors who are successfully helping to keep sick patients out of the hospital, and they need more physicians to help them. There is more to this story on a successful way through this, and your decision is an important part of it.

There are not enough long-term studies regarding the use of the Covid-19 vaccine and the option of natural immunity needs to be a part of this conversation if we are truly wanting to follow the science. The fact that the drug manufacturers have requested to wait to release their data for 75 years creates confusion and concerns on why they are not acting with transparency. Recently the CDC director and Dr. Anthony Fauci have admitted that the vaccine itself does not stop transmission or infection. This is the logical disconnect between facts and political agenda.

In addition, there are thousands of deaths and adverse reactions reported, though not published through mainstream media. I will provide you links to some of these sources if you want.

You will be looked on in history for the vote you are about to make. How will you choose to stand for the liberty and freedom our country is rooted in? Can you imagine what

To whom it may concern,

Regarding WAC 246-105

I want to remind you that children are at an extremely low risk for Covid. The vaccines are still ONLY EUA! There are no long-term studies to document ANY history of safety. Studies do now document that the vaccinated and unvaccinated can both transmit Covid, therefore the vaccine apparently DOES NOT stop the spread of the virus. In which case this would make no common sense to impose.

Regarding WAC 246-100

This is insane and stripping families of our rights. You have no authority to force any of this on us! If this happens my family will leave Washington state along with many others.

Please listen to the community!

Best Regards,
Lindsay Ghaderi

I urge you to reject the imposition of a Covid vaccine requirement for children in Washington State. Children have a nearly 100% recovery rate from Covid 19, they have not been shown to be spreaders of the virus, and should never be required to receive an experimental EUA drug to cause severe side effects and death.

Thank you for your time,
Mary Harris

Subject: Stop with all the mandates!!!!

External Email

To whom it my concern

It is no one's right to take away others humans rights
(I do not believe that another person has the right to choose for anyone other than themselves and their children.)

I do not want these mandates and will seek legal representation against any and all parties that take my constitutional right to choose away. The organizations that have given ultimatums to us saying I can no longer work unless vaxed...

The Health Insurance companies that say if you have complications from taking the experimental vax ...you will not be covered on your policy!

Because you willingly too the vax knowing it was experimental...

The same for life insurance....if you pass away from complications of the vax your family will NOT get your life insurance benefits... you may not care about others and there families but I bet you care about yours!

Bidens mandates have been shelved by the 5th circuit Court as unlawful and unconstitutional.

The people of Washington State are fed up with all the Operation COVID-19

All the people who are trying to control others need to wake up, you may be ok with what is happening right now but, one day it will be your turn to be controlled by people that have no business all up in your life and your life choices. You are forgetting they don't care about you either.

STOP THE MANDATES NOW!!!

J.R

I know several important conversations will be happening soon. I would like to weigh in on the matter and explain why.

I strongly object to the proposed policies:

WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

Covid-19 was new and scary virus, but we've come a long way since it first appeared.

Immunocompromised and those individuals strongly concerned have the option to get a vaccine. Majority have mild infections. Passing laws at this point is government overreach at best, especially since vaccines DO NOT prevent transmission, or provide much protection for the new variant.

But what is happening, is that people feel threatened by the government. I already do, when I see these proposed policies. And when Government institutions will try to pass good policies in the future, if need arises, there will be pushback because you're setting a precedent of government overreach. PICK YOUR BATTLES. The current proposed measures are unnecessary and the current situation does not warrant such strict policies. It is a serious virus, but please remember the death rate is still less than 1 percent (even that is generous). Most people are either vaccinated or have natural immunity. You want to strip away freedoms of people for the sake of what? People want to be free, and safe. But how can we feel safe knowing we can be voluntarily detained because we didn't

consent to a medical procedure related to a virus with such a high survival rate?

Concerning vaccine requirements of children: Requiring children to get a vaccine that has a higher risk of an adverse reaction than the threat of the initial infection is wrong. If you must do something, then please put it in the "recommended" vaccine list, BUT NOT REQUIRED.

COVID-19 is NOT an infection that can be eradicated with vaccines like POLIO or MEASLES, then why treat them the same? Put it in the category of the flu, which is closer to reality. I'm begging you, LEAVE THE CHILDREN ALONE! They are not a threat to our society. COVID is not a large threat to the well-being of children. If someone WANTS their child vaccinated, they know how to do it, and they will do it.

Thank you for your time,

Liliya Smal

P.S. I was going to provide articles to support my claims (although you have access to them), but I was afraid my e-mail will get flagged for containing links.

Subject: STOP this power grab and civil rights violation

External Email

Dear Wa. State board member,

You must pause and reflect on what is happening! I emphatically oppose any and ALL mandatory vaccines and the proposed policy of allowing local health officers to use law enforcement (WAC 246-100-070) to enforce an emergency order to involuntary detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). I implore you to not allow this!

What madness is happening here....this is Nazi Germany all over again in our great United States! The government can not trample our human rights. This is NOT about public health, but rather power and control and it MUST STOP!!

Please hear my strong objection to applying current infectious disease WAC codes to include C-19 for all WA State residents and NO mandatory jabs for children of any age, or including C-19 into the existing WAC Codes for involuntary detaining.

Respectfully,
Maureen Dunaway

I absolutely do NOT believe that the Covid 19 vaccine should be required for children to gain entry to child care or school! PLEASE vote 'NO' on the states effort to mandate the vaccine for children. It is currently only an EUO {Emergency Use Only}, and quite clearly not efficient or effective for stopping Covid; the possible dangerous side effects resulting in permanent disability & even death, {Listen to the people who have experienced deep loss after loved ones have taken the vaccine in good faith!!}, create the need for people to make their own medical decisions in regards to any medicine put into their bodies & the bodies of the children they are charged to protect! Thank you for your time!

To whom it may concern,

Regarding WAC 246-105

I want to remind you that children are at an extremely low risk for Covid. The vaccines are still ONLY EUA! There are no long-term studies to document ANY history of safety. Studies do now document that the vaccinated and unvaccinated can both transmit Covid, therefore the vaccine apparently DOES NOT stop the spread of the virus. In which case this would make no common sense to impose.

Regarding WAC 246-100

This is insane and stripping families of our rights. You have no authority to force any of this on us! If this happens my family will leave Washington state along with many others.

Please listen to the community!

Best Regards,

Lindsay Ghaderi

Dear Washington State Board of Health,

Do not try to force the experimental jabs on our children. #WeThePeople demand that you do not try to force covid vaccines on our children.

I've forwarded an email & link from Dr Mercola & Children's Health Defense. There are many independent experts, scientists & doctors that provide science, facts & proof why it's wrong to give healthy children the covid vaccines. You need to follow the real science, facts & proof. Children under 18 have a 99.99%+ of recovering & not having any serious issues from covid. The covid vaccines are killing & injuring many hundreds of thousands of people. I request that you review & consider information from Robert Malone & many other experts in covid vaccines, science & many health issues.

You, many government bureaucrats, the medical community & many others will be held accountable for your decisions, how & why you made them.

Parents will protect our children & pull them out of public schools.

You will be held accountable for crimes against humanity & the Nuremberg codes.

Sincerely,

Jim Spies

One of the many millions of #WeThePeople that will hold you accountable for your incompetence & decisions.

To whom it may affect:

I am writing to let you know that I am 100% against the proposed COVID policies. The proposed policies are an absolute government overreach.

There is not enough data to support this. The Trusted News Initiative has censored and pushed one narrative to the people.

I stand against these proposed WAC's : WAC 246-100-070, WAC 246- 100-045, WAC 246-100-040.

They violate my constitutional rights and my personal beliefs as an American citizen.

If these pass, I and MANY others will leave the state and relocate to a state which protect and honor our rights and freedoms.

Vaccinated people are still contracting and spreading COVID, and are filling up the hospitals at the same rate or even more than unvaccinated. Also many vaccinated are in fact dying of covid after getting three shots. This is an atrocity and the supporting data is easily viewable by the general public.

We ask you to really consider your actions. We the people have the power. Government works for the people. Thank you.

I can't not believe what our state has come to. This is ridiculous that you all are trying to force our children to get an experimental shot just to go to school. Public school is not a privilege, it is a right! Not everyone had the luxury of home school. Which living costs as high as they are, in most cases both parents need to work just to be able to provide a roof over their heads. We need our child to be in school learning. Last years education scores after being at home learning should prove that kids do not learn as well at home!

Hello,

I am a Washington State resident and have become aware of the proposed policies to be presented on January 12th.

I am writing to register my emphatic opposition to mandating Covid-19 vaccines for school attendance.

I am also writing to register my opposition and absolute outrage at the prospect of the involuntary detention and isolation in quarantine facilities of those who refuse to comply with requests for medical examination, testing, treatment, counseling, and vaccination. The right to refuse these things is protected by both our state and federal constitutions, and their violation brings to mind (and I do not draw this comparison lightly) the horrors of Nazi Germany.

I urge you to utterly reject these policies and stand as an inhibitor of the evil that would come of them.

Respectfully,

Maggie MacInnis

Subject: Vaccine for Children

External Email

I have heard that the Washington State Board of Health is making a recommendation for a vaccination requirement for children

Many doctors have agreed that Covid is not a threat to children.

It is unnecessary to require a vaccination for children. There have been studies of side effects that are causing more problems than the actual issue with Covid.

It is not necessary to take a chance and give a trial vaccine two small children when the children are again not susceptible to problems with actual Covid.

Also many doctors have agreed that masks are not providing any benefit.

There have been many studies that there are more psychological negative impacts by wearing a mask for children at school. Children need to see the faces of the teachers and other children to communicate effectively and naturally. Children are becoming unable to socialize appropriately when they are masked. Also children move the mouse around and

are actually getting more dirt and germs next to their faces than if they were on mast. Children would have to have 10+ masks a day to actually be effective. They would have to change them every time they would touch their face if you really wanted this to work. Also a regular cloth mask is not going to work.

A simple procedure of having children wash their hands often throughout the day will help more than having the vaccine and masks. It is also important that if children are sick they need to stay home. The government should put more money towards the help of parents

and child care of sick parents.

Let's get the children back into the classroom, no masks no vaccines and let the children learn in a normal healthy environment.

Let's do what is best for the children.

Please step away from any politics and stick with what we know from trusted doctors. And when I say trust the doctors I mean the ones that don't have a political agenda.

Sincerely,

Lori Pitman

Subject: I oppose Vaccine Mandates

External Email

This is in response to today's discussion and vote. The vaccine benefit risk ratio to

children is one that there is more cause for harm to kids from the experimental shot with myocarditis and more than the risk of any COVID injury or hospitalization.

Also the WAC that would allow law enforcement to enforce the shot and the COVID camps is facia to an extreme.

Subject: STOP Vaccine Mandates for Washington School Children!

External Email

Dear Kelie,

Today I am writing to you to express my express my concerns on hearing that the Department of Health is considering mandating COVID Vaccines for children to attend school. I am completely AGAINST such a mandate.

The COVID Vaccines in the USA are NOT FDA approved and are being administer under and Emergency Use Authorization. According to the Nuremberg Code EUA products can not be mandated.

The risk of children dying from COVID are statistically at zero risk. The survival rate is from 99.997 – 99.998%. There can not be a benefit to mandating children to be vaccinated as there is no risk. No one knows what the long term risks of the vaccines are. We should not react out of fear.

Do not allow this mandate to move forward, Please.

Mr. James Deady

Enumclaw, WA

Subject: Stop this blatant usurpation of our freedom and basic rights!

Stop this blatant usurpation of our freedom and basic rights! My family and I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105 as I understand they are forcing people to comply with medical testing, treatment, vaccinations, examination against their free will and free choice. Furthermore, I understand they are giving such tyrannical powers as forcing people into quarantine facilities. This sounds a lot like the National Socialists in Hitler's

Germany. #040 alone gives the local health officer authorization to detain Washingtonians in a quarantine facility and force whatever "treatment" they feel is in the state's best interest. This is about whether our state will respect any rights they don't believe is convenient for them. This is a ploy to subject us to slavery. Please browse #040 yourself if you think I am exaggerating! No disease is as dangerous as losing human dignity and subjecting ourselves to an elitist "health officer" or anyone's subjective control. Stop this blatant usurpation of our freedom and basic rights!

Thank you!

Jay MacPherson

To the Washington State Board of Health members,

I'm a registered voter here in Washington and would like you to vote NO for the mandate of children to have to have the Covid vaccine to go to school. I believe that medical decisions and treatment should be between the person/family and their medical providers only.

Thank you for your time,

Elisha Lane

☐ From: Mary Small

Subject: Covid Vaccine

☐ I am greatly disappointed that you are even considering this item - the Covid vaccine is not the same as the required vaccines for school. I am retired from 27 years in public health, immunizations, emergency preparedness and planning.

You all have forgotten how viruses work, as well as giving new and still experimental vaccines more credit than they deserve. You have ignored natural immunity, and do not use our common benefit risk analysis to exclude children from vaccines. They have more risk from the Covid vaccines than the virus.

I have never seen this much manipulation from the political health side of life. Falsifying numbers for hospitalizations of children and increasing the death rate in kids from this disease, before being forced to walk it back. Stop buying into the hype of these vaccines saving everyone. The elderly yes not anyone else unless they are already high risk.

People are better off getting and recovering from this virus unless they are over 65-75 years of age or high risk. STOP political health and please go back to Standard Public Health practices and policies...

For kids Covid is easier than the flu!

kids don't need this...

This vaccine has issues-take away the liability protection for the manufacturers and you'll get the real picture. No required Covid vaccines for kids, this is not a solution to this communicable disease problem.

Subject: Upcoming vote related to vaccine mandates

External Email

To All Washington State Officials who represent me,

I am writing you as a concerned citizen of Washington state. I understand you have a major decision coming before you to consider vaccine mandates for children as well as adults. I urge you to take into your thought process more than the current accepted binary conversation that the vaccine is the one and only way to proceed in health for our communities and states.

In years past, we as parents, families and supported by the medical community considered natural immunity strong and robust. We currently have doctors who are successfully helping to keep sick patients out of the hospital, and they need more physicians to help them. There is more to this story on a successful way through this, and your decision is an important part of it.

There are not enough long-term studies regarding the use of the Covid-19 vaccine and the option of natural immunity needs to be a part of this conversation if we are truly wanting to follow the science. The fact that the drug manufacturers have requested to wait to release their data for 75 years creates confusion and concerns on why they are not acting with transparency. Recently the CDC director and Dr. Anthony Fauci have admitted that the vaccine itself does not stop transmission or infection. This is the logical disconnect between facts and political agenda.

In addition, there are thousands of deaths and adverse reactions reported, though not published through mainstream media. I will provide you links to some of these sources if you want.

You will be looked on in history for the vote you are about to make. How will you choose to stand for the liberty and freedom our country is rooted in? Can you imagine what caused our state and government to place Germans and Japanese citizens in camps during the 2nd World War? It may have seemed like the best option at the time,

however, it is viewed correctly today as a human rights abuse. It was a decision made out of fear. I urge you to make a decision based on courage, transparency, medical facts, which come from all places, including those that are being silenced in the main media. Please do not allow fear to be part of your decision. Fear of what others think or say, fear of job loss, lack of promotion, fear of possible personal cost if you stand against the swell of the current tyrannical narrative. You have so many people cheering you on to stand for human rights including medical freedom of choice.

Sadly, the push for the mandate of vaccines and the proposed policies which could follow will place health officers in the possibility of managing a police state. We are not in an emergency situation that would justify the use of law enforcement to order persons involuntarily to isolation facilities or coerced medical intervention. If this continues Washington board of health is considering medical tyranny. Not only is all of this discussion in direct violation of the Washington State Constitution and the US Constitution, but the proposed policies are also in direct violation of the Nuremberg code article 6 section 3 that states: No government can mandate or force medical treatment without individual consent.

Please stand for medical freedom of choice for the citizens of Washington.

Lynn Fox

I oppose the proposed WAC's 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against covid-19 injections as part of the school immunization requirements using WAC 246-105.

To whom it may concern,

I am writing to express my outrage against the proposed Washington state administrative codes. What is being proposed is immoral, tyrannical and anti-American. It is an over read and abuse of power by those who are public servants. It is not the role of the government to coerce its constituents into a medical procedure against their will. I've been reading about the constitution to our 2 year old (great book for kids by DK) and this goes against everything taught in the book. Your use of power to control us is wrong!

I stand against these proposed WAC's:

WAC 246-100-070
WAC 246-100-045
WAC 246-100-040
WAC 246-100
WAC 246-105

Sincerely,
Nicole Richardson

Hello,

I am a lifelong resident of Washington state. I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>>

)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you,

Lynette McLaughlin

External Email

Hello,

Our kids will be pulled out of public school if the covid vaccine becomes a requirement or they are discriminated against for not having it.

1- The risk of severe illness or death to children is still very low, considerably lower than influenza. There is a higher risk of adverse reactions to the vaccine. It is not our children's responsibility to protect the vulnerable at their own risk. Any vulnerable teachers and staff are welcome to vaccinate themselves to mitigate their own risk.

2- Vaccinated are still becoming infected and are spreading it the same as unvaccinated, posing the same risk to the vulnerable. Again, the vulnerable all have access to the vaccine to mitigate their own risk as they see fit.

3- While adverse reactions to the vaccine may be fairly low in the short term, they do happen. there are literally zero long-term studies in humans to know if there will be any impacts to health down the road. History is full of products once deemed to be safe by the FDA that are now banned. Let's see how this looks in 5 to ten years.

4- I would also like to add that as long as "any cloth or paper" mask is deemed sufficient, I will consider the source of the requirement to be of questionable intent. ALL ACTUAL SCIENCE has consistently shown an actual surgical mask to have marginal effectiveness against a virus, with a K95 or N95 to be the only mask to make much difference. The flimsy cloth or paper that the majority of children are wearing is less than effective. I would like the data on how many staff and children are out of WA schools with other viral/respiratory illnesses/asthma compared to the 2018/2019 school year. Our circle of children have been continually struggling with this since the beginning of school. Please

see The University of Michigan website for info on their influenza outbreak that was severe enough that the CDC was called in. This university requires masks AND vaccines (and lets not forget that influenza particles are significantly larger than Covid particles). These are college students, capable of better mask hygiene than the younger children.

Subject: Vaccine Mandate

External Email

Dear Christy,

My name is Stacey Simon, I'm writing to you about the possibility of mandating the Covid-19 vaccine in our schools.

I want to advocate for my children and for the children of Washington State. This isn't about anti-vax, but for everyone's right to choose what goes into their bodies.

This vaccine is still new, and there aren't any long term studies on its effects. It should be left up to the parents and their physician whether or not to get the vaccine, not the government. No one should be forced to take anything in order to attend school, hold a job, or continue to be a member in society. Studies have shown that our kids are not at risk for serious illness, and to date, Covid-19 still has over a 99% survival rate.

Clearly the vaccine isn't working to keep this virus at bay, and those that are vaccinated are still getting sick and spreading the virus. So why at this point would mandating this for our students be necessary or make any logical sense?

I can appreciate the fact that the world's attention is currently hyper-focused on Covid 19. Health and Public Safety organizations feel the need to show some sort of response, warranted or not. Please keep in mind the flawed logic of the vaccines and our children's well-being and health when making these policy decisions.

Thank you,

Please stop trying to force unnecessary vaccines on our children. These vaccines don't even work!

Why are we putting so much pressure on getting these vaccines when the survival rate of this cold is over 99% in children.

The vaccine makers won't even publish the data used for these vaccines for another 50 to 75 years! Why are we putting our trust in these companies who make money off our sickness??!!

This is disgusting and wrong!

I strongly oppose Washington State Board of Health making a decision to recommend the vaccine requirement for school aged children on January 12.

Please stop this madness!

Hello Caitlin,

I am a lifelong resident of Washington state.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>
)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you,

Lynette McLaughlin

Subject: Stop Vaccine for children mandate

External Email

Dear WSBOH,
Please, do not mandate a requirement for children to be vaccinated. The vaccine should not be a stipulation for attending school or daycare.
We know that children are at low risk to Covid 19 and its variants. We also know that their developing immune systems are sensitive. Especially when the vaccine is an "emergency use authorization status."
These concerns are legitimate. When there are two or more possibilities regarding our children, the parents have that right to decide.
There are many professional persons with advisement. Stop trying to mandate decisions that are the right of the parents.
Respectfully,
Mark W Humes

Vaccine Mandate Opposition Letter

To The Washington State Board of Health,

This letter is to inform you that I strongly oppose the proposed vaccine mandate in Pierce County. I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. There is absolutely NO COVID vaccine available in the United States has received FDA approval. ALL available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. This fear monger approach by the State of Washington and the Federal Government to force American citizens to inject an experimental drug AGAINST THE LAW and is the subject of numerous lawsuits! A Federal Judge recently rejected Pfizer's claim that the two products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable'

• Children's Health Defense (childrenshealthdefense.org
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>
>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Targeting our children is simply another tactic to accomplish the goal of 100% of vaccination. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID! I challenge the Washington State Board of Health to show medical records for even one child who has died of COVID

without co-morbidities.

3. NO ONE knows the long term risks of these vaccines. One of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM. The studies Pfizer conducted were woefully underpowered. This is an analysis of the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors. (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>) It concludes the risks DO NOT outweigh the benefits, therefore more research MUST be done before being administered to children or anyone else!

Forced vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity.

Our hospitals have more vaccinated COVID positive patients than unvaccinated, THE VACCINES ARE NOT WORKING!

If the Washington State Board of Health rules in favor of this mandate you can be absolutely certain to face legal action immediately, as this is constitutional, against the law and will be stopped!

Thank you for your careful consideration of this matter,

Anne Asher

Subject: Upcoming vote related to vaccine mandates

External Email

To All Washington State Officials who represent me,

I am writing you as a concerned citizen of Washington state. I understand you have a major decision coming before you to consider vaccine mandates for children as well as adults. I urge you to take into your thought process more than the current accepted binary conversation that the vaccine is the one and only way to proceed in health for our communities and states.

In years past, we as parents, families and supported by the medical community considered natural immunity strong and robust. We currently have doctors who are successfully helping to keep sick patients out of the hospital, and they need more physicians to help them. There is more to this story on a successful way through this, and your decision is an important part of it.

There are not enough long-term studies regarding the use of the Covid-19 vaccine and the option of natural immunity needs to be a part of this conversation if we are truly wanting to follow the science. The fact that the drug manufacturers have requested to wait to release their data for 75 years creates confusion and concerns on why they are not acting with transparency. Recently the CDC director and Dr. Anthony Fauci have admitted that the vaccine itself does not stop transmission or infection. This is the logical disconnect between facts and political agenda.

In addition, there are thousands of deaths and adverse reactions reported, though not published through mainstream media. I will provide you links to some of these sources if you want.

You will be looked on in history for the vote you are about to make. How will you choose to stand for the liberty and freedom our country is rooted in? Can you imagine what caused our state and government to place Germans and Japanese citizens in camps during the 2nd World War? It may have seemed like the best option at the time,

however, it is viewed correctly today as a human rights abuse. It was a decision made out of fear. I urge you to make a decision based on courage, transparency, medical facts, which come from all places, including those that are being silenced in the main media. Please do not allow fear to be part of your decision. Fear of what others think or say, fear of job loss, lack of promotion, fear of possible personal cost if you stand against the swell of the current tyrannical narrative. You have so many people cheering you on to stand for human rights including medical freedom of choice.

Sadly, the push for the mandate of vaccines and the proposed policies which could follow will place health officers in the possibility of managing a police state. We are not in an emergency situation that would justify the use of law enforcement to order persons involuntarily to isolation facilities or coerced medical intervention. If this continues Washington board of health is considering medical tyranny. Not only is all of this discussion in direct violation of the Washington State Constitution and the US Constitution, but the proposed policies are also in direct violation of the Nuremberg code article 6 section 3 that states: No government can mandate or force medical treatment without individual consent.

Please stand for medical freedom of choice for the citizens of Washington.

Dear Christy,

Today I am writing to you to express my concerns on hearing that the Department of Health is considering mandating COVID Vaccines for children to attend school. I am completely AGAINST such a mandate.

The COVID Vaccines in the USA are NOT FDA approved and are being administer under and Emergency Use Authorization. According to the Nuremberg Code EUA products can not be mandated.

The risk of children dying from COVID are statistically at zero risk. The survival rate is from 99.997 – 99.998%. There can not be a benefit to mandating children to be vaccinated as there is no risk. No one knows what the long term risks of the vaccines are. We should not react out of fear.

Do not allow this mandate to move forward, Please.

Sincerely

Mr. James Deady

I absolutely do NOT believe that the Covid 19 vaccine should be required for children to gain entry to child care or school! PLEASE vote 'NO' on the states effort to mandate the vaccine for children. It is currently only an EUO {Emergency Use Only}, and quite clearly not efficient or effective for stopping Covid; the possible dangerous side effects resulting in permanent disability & even death, {Listen to the people who have experienced deep loss after loved ones have taken the vaccine in good faith!!}, create the need for people to make their own medical decisions in regards to any medicine put into their bodies & the bodies of the children they are charged to protect! Thank you for your time!

Hello,

I am a mother of two children and I am legally within my God given rights to oppose the recommendation to require school age children to be vaccinated to attend school and I'm about to share with you why...

This is not right under any circumstances and to try and tamper with a childs rights under our Constitution to have access to education is absurd, wrong, and act of violating their rights.

The so called "vaccine" aka (experimental drug) has not been out long enough to prove enough of any good or effective results and injecting of a foreign object into children is not right and a violation to their rights and our rights as the parents regarding the well being of their health rights, not made by man, but by God when he created us. We have freedom of religion, freedom of speech and freedom to choose what goes into our bodies.

When the Polio vaccine was first thought of in the 1940's, funded by the March of Dimes Foundation, there seemed to be a good outcome of the vaccines that

were created by Dr. Jonas Salk. It took them over a year, up to 10+ years to work out the ups and downs in the science before using it in people as a vaccine. The "Covid-19 shot" has only been out for a year and not been through it's own ups and downs to be pushed so hard to be injected into innocent children.

Dr. Salk used a chemical that was injected into people to try to kill the 125 strains of Polio. Yeah there was some hype about how good it was working but, in 1954 there were 200 cases of people becoming infected by a bad batch of the vaccines. I'm not surprised because, vaccines don't prevent contraction of disease or viruses, they minimize the possibility of bad symptoms once one has already contracted it, and it ultimately is based on each person's body, immune system and overall well being.

My overall point in saying all this, is that the "shot" that they are considering to be a vaccine and wanting so badly to be injected into children, is still under emergency use by the FDA and is not showing any proof of any good outcome for children, as it has not been studied long enough and has not been out long enough for it to be considered trustworthy. I don't trust their so called "statistics", and my children are not a statistic study, they are human beings and have the right to be educated, and have freedom. The freedom that we have today, that is being tampered and stomped on, was bought and paid for by the lives and blood shed of many who gave their lives for it; much like the same way Jesus Christ paid for our sins and died for us to have freedom from the bondage and slavery to sin.

This whole pandemic and the pushing and shoving of control, and all that is becoming of it, is a form of segregation and in some ways, like the Holocaust, but in a different way involving vaccine status, herd immunity/herd mentality and so on. It's sick and our future generations don't deserve this kind of crap. Our kids deserve better and when the United States of America separated from King George, we became free from control, and all the tyranny and oppression that he caused. There is too much happening that mimics what he was doing and what our soldiers fought to free us from. ☐☐☐ Please consider and try to understand what I am saying. This isn't personal towards any one person, this is a nationwide issue and our kids don't need to be subjected or be involved the political garbage that's happening around them. That's why they have parents to guide and protect them. If you have kids, I hope this reaches your heart in a good way.

Thank you and God Bless America,

Jennifer Childs

Dear Health Board,

Thank you for accepting open comments. Please consider that COVID19 is a zoonotic virus that will continue to run through all animals & people alike. There will not be an end. Thankfully the virus will degrade as it has with Omicron which is not deadly to the majority.

It's is unconstitutional to use a health concern to quarantine or force vaccinate anyone. This is not a third world country where the various agencies can do whatever they want to the populous.

The best thing you can do at maximum is possible require weekly testing. Even that is excessive with unfair fraudulent contracting practices. Keep in mind that the testing has high false positive rate.

In summation, I recommend that you rule against any forced quarantine or vaccination. That is not America.

Thank you,

LMcMahon

Subject: Commit to no COVID vaccine mandates on children

External Email

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

I am completely against all proposed covid policies that are overreaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105. All of this is unconstitutional and I would like to remind everyone that we fought wars against the things Germany did to their citizens. If we could stop repeating history and learn from it instead that would be great.

Respectful,
A Washington state citizen

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>>)

)

A Covid-19 vaccine mandate clearly does not pass the 9 criteria required when Reviewing Antigens for Potential Inclusion in WAC 246-105-030. My lack of support for a mandate stems from the following criteria not being met under sections II and III on the list of criteria:

II. Disease Burden Criteria

5. The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population.

- The vaccine has been directly available to every vulnerable sub-set of the population for some time.

6. Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting or activity being given the highest priority.

- It is widely proven that vaccinated individuals can and do continue to transmit the virus. We know this because this was the science used to justify mask mandates. Masks are mandated in schools already, regardless of vaccination status, to prevent the vaccinated from transmitting the virus.

III. Implementation of the Criteria

7. The vaccine containing this antigen is acceptable to the medical community and the public.

While the vaccine may be acceptable to the medical community (although we will note that even within the medical community, the vaccine adoption rate was not acceptable enough to preclude a forced mandate), we cannot gloss over the fact that public acceptance does not even represent a strong majority.

- Under 51% of Spokane County residents are vaccinated. (srdc.org
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C>
)

- Less than 40% of kids 12-17 are vaccinated. (srdc.org
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C>
)

- Only 36% of the entire black community in Spokane County is vaccinated, and it is reasonable to assume this number is far lower among ages 12-17. A vaccine mandate in

schools would disproportionately affect students of color in our community. (srdc.org
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C>
)

8. The administrative burdens of delivery and tracking of vaccine containing this antigen are reasonable.

- Our administrators and nurses have already given feedback that a vaccine mandate would create an unreasonable and insurmountable administrative burden involving tracking.

9. The burden of compliance for the vaccine containing this antigen is reasonable for the parent/caregiver.

- As stated in the above vaccination statistics, parents are choosing not to vaccinate their children. Forcing them to do so (as with other segments of our society who were coerced under the threat of losing their jobs and livelihoods) does not fall within a reasonable burden of compliance. It does not seem logical to vaccinate a group (ages 0-19) with such a low, even insignificant, rate of hospitalization or death, while claiming that will protect a more vulnerable group (ages 50-90) with a dramatically higher rate of vaccination (between 62%-82% based on age). Thusly, our state would propose forcing vaccination on those who do not need it, to protect those who already have it and/or could easily get it.

The vaccine is widely available to any age group now. Vaccination rates reflect individual health choices that must be protected. We have to acknowledge that individuals can make their own health decisions for themselves and their families. There simply is not a case to be made for forcing someone to get vaccinated to protect someone else who can easily get vaccinated themselves.

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

To whom is in charge,

I understand the public involvement in helping prevent spread of diseases, flus, colds, etc. I get it. I really do. However involuntary actions on the public is not the way. This is a general consensus from the public in multiple applications here in the US. An example, you shouldn't be walking up to a random person who "looks" illegal and asking for their green card without actual evidence to suspect them.

I am completely against any of the covid policies that involve involuntary action or constriction on public freedoms. I am against WACs: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

Please reconsider. If you want public infringement on our rights to decide what to do in our own life, then let it be the public's decision and put it to a fair vote. Let school districts make their own choice. Or leave it up to local policy so there's a sense of choice and freedom to live where it aligns with our views as many do. I love Washington and have grown up here, but I do not agree with the over-reaching policies of certain upon the rest of the state. Other cities that do not live the same way as Metro cities. Please be respectful of your residents diversity with how they live their life.

Thank you for your time,

Jasmine Kling

Please oppose or put a halt to this requirement for students that attend public schools. This is such a new vaccine that have limited time on their safety data that we have no clue what the long terms affects are and should not be using our children as an experiment. The science has been constantly changing and I'm not comfortable as well as other parents to putting this into our children. We should have a choice with what happens to our children and it is not up to the government to decide what we or our children do with our bodies. Why is " my body my choice" only allowed in certain situations but not what happens with ourselves or our children. Please take a look at a parents perspective on this. This is so important that we halt this and take time to think clearly on something that could later on be harmful to our children no matter what the government is pushing on us. We've already been doing what we were told we needed to do to stay safe and that's as force our children to mask 8+ hours a day. Now what? Do the masks not work because covid is still around and even though 78% of Washington is

fully vaxxed covid is still here and affects vaccinated. This will never end vaccination or no vaccination. Please give us a choice.

I am completely AGAINST any of the proposed Covid Policies that are over reaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-45, WAC 246-100-040, WAC 246-100, WAC 246-105.

We the people will NOT allow our medical freedom to be stripped away from us.

I am asking you to carefully consider the repercussions. Getting a vaccine should be a choice between the citizens and our healthcare providers not the county or the state to be involved in. The state of Washington and Pierce County are trying to make medical decisions for us. What's next are you going to not let us have the choice to get an abortion if I decide that's what best for us?

You guys are over stepping and violating our constitutional rights. Many people have already moved out of the state due to your requirements these proposed changes will only make more people flee Washington.

Our state has one of the highest vaccination rates nation wide, some of the strictest protocols and rules for masks and vaccinations and yet we still have one of the highest rates of Covid so what makes you believe implementing more policies will help? Why not follow suit of other states who are letting people live their lives and have lower Covid rates.

WE WILL NOT GIVE UP WE WILL NOT STAND QUIET WHILE YOU TRY TO STRIP US OF OUR MEDICAL FREEDOM!

You are violating our constitutional rights

Sincerely concerned Washington state citizen,

Kirsten

Subject: COVID 19 Vaccination Requirement for School in Washington State

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>>

)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you for your attention on this important matter.

To whom it may concern:

I am writing you to urge you to stand up against the push for vaccine mandates (for children and adults) and to stand for medical freedom of choice. There are not enough long term studies regarding the use of the Covid-19 vaccine and the option of natural immunity needs to be a part of this conversation, if we are truly wanting to follow the science.

Even the CDC and Dr. Anthony Fauci have admitted that the vaccine itself does not stop transmission or infection. This is the logical disconnect between facts and political agenda.

Sadly, with the push for this and the proposed policies to allow health officers to use law enforcement to order persons involuntarily to isolation facilities or coerced medical intervention, Washington board of health is playing with medical tyranny. Not only is all of this discussion in direct violation of the Washington State Constitution and the US Constitution, the proposed policies are in direct violation of the Nuremberg code article 6 section 3 that states: No government can mandate or force medical treatment without individual consent.

Please stand for medical freedom of choice for the citizens of Washington.

Subject: COVID 19 Mandate

I strongly believe the decision to mandate this vaccine, especially while approved for emergency purposes for this age group, will hurt all of our schools. I believe strongly in medical freedom as well as the right to a robust public education earned thru our tax dollars. Regardless of if someone or I am pro or anti covid vaccine our schools stand to lose an even larger number of students if this is pushed thru. As of last reported WA schools overall enrollment is down 55k since the beginning of the pandemic and estimated to grow larger not smaller per reports. OSPI has asked for more funding to bridge this gap that has been filled with Covid dollars, which will not last. Each student is estimated to equal 18k in yearly funding. So my question is simple how many more families will pull their children out in search of homeschool, charter or private options and what will be left for the children left in our public system regardless of vaccination status. Even if only a few more % leave there will be districts that will be left behind.
#stopthemandate

I have personally pulled my two children out of public school both last year and this current year. This decision will be the tipping point to going back next year or continuing with homeschool. I have also began exploring charter and private options. I am not alone I have over a dozen friends in our state that have removed their children as well. Including mine we now have over 8 new homeschool friends, and 8 friends in private or charter options. Recently I have had 5 others reach out to me to ask about homeschool to gear up in case of a mandate. I'm just one Mom who knows 16+ students that have left.

I am currently leaving my children unvaccinated for the reasons of one, they have had covid and recovered fine and two because of the growing risk of Myocarditis. This is a vaccine that has proven to not stop the spread of this disease. Vaccinated people can still both get covid and spread covid. So in relation to a group that has less than a 1% chance of severe illness and even less of death the decision should be left to the parents. I would never tell anyone what to do with their children nor should anyone tell me what to do with mine.

Thank you for you time,

Alisha Ridgely

Hello,

I am here to let you know that I am opposed to the proposed Covid Policies. I see them as a violation to my rights as a citizen of the United States and as a form of religious oppression. I stand against these policies: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

With over a 95% survivability rate, Covid does not pose as great a threat as these policies assume, especially to children in schools. Personal health should remain personal. We do not need government interference and mandates for these. That being said, vaccines should be available to those who would like to take them voluntarily. But, they should not be required to allow a person to live their normal day to day life. These policies seem to be leaning more towards a power grab, than the interest of the public. Once again, I oppose these proposed policies.

Sincerely,
Ivan

Hello,

I am writing to express my sincere concerns about mandatory Covid-19 vaccines for school entry and childcare in WA. I have 2 young children, ages 6 and 4 who are currently all up to date on their vaccination schedules. My husband and I have spent hours discussing and evaluating potential risks and benefits of vaccinating our children against Covid-19 and have come to the conclusion that there are simply too many known and unknown risks to submitting our children to these experimental vaccines. It is well known that the risk of severe illness and death to children from Covid-19 is extremely low. What is more concerning to us as parents are the potential long term risks associated with a new vaccine technology. Given these facts, we believe it is in the best interest of our children's health to not vaccinate them against Covid-19.

May I also point out that the current Covid-19 vaccines available in the United States remain under emergency use authorization. These vaccines also do not stop transmission, only lessening the severity of symptoms. Mandating Covid-19 vaccines for our children, the majority of who have very mild or even asymptomatic cases, is simply unnecessary and will not "stop the spread" or protect others. If anything, it may convince parents to allow their vaccinated children to go to school while ill in a false assumption that they can't get covid, increasing the spread. Putting our most innocent at risk of suffering unknown long term side effects from a rushed vaccine for a disease that does not cause them harm is simply not rational.

I implore you to allow parents to make their own decisions for their children's health.

Thank you,

Jamie Temple

To whom it may concern,

Following my email about vaccine requirements for our children I ran across some more information that has me literally terrified. If it's true that someone is proposing to allow local health officers to use law enforcement to involuntarily detain people for refusing to comply with medical examination, testing, treatment, counseling, and vaccination... I would like to take the time to VEHEMENTLY disagree with this and the lack of public information regarding it. I'm disgusted that someone is working so hard to keep it quiet and I'm disgusted that it's even being proposed in the first place. This completely violates our human rights and there will be riots in the streets if this is implemented. Those of us that have chosen not to get the vaccine have GOOD reasons for not getting it. And considering all vaccine exemptions are being turned away and fired even if their bodies can't handle vaccines... This is one step ENTIRELY too far. It is our human rights to choose what we do with our health and bodies. Forcing people to do something against the beliefs and their health is flat out wrong. And the fact that it's being proposed to bring in "involuntary quarantine facilities" honestly sounds like a step away from "concentration camps". And if you attended history class we all know how that turned out for Germany...

Thank you again for your consideration and I will see you all in an hour,

Lila Bliss

To whom it may concern,

I believe that a vaccine requirement for school aged children is against our American and parental rights. Being forced to inject something into our children when we don't know the long term effects on even adults would be putting our children in potential danger. This vaccine hasn't been studied long enough for many adults to feel comfortable getting it so forcing us to give it to our children is just flat out wrong. If this vaccine requirement passes I wouldn't be surprised if you lose a ton of students. Which would also mean losing a ton of funding if I'm not mistaken and a lot of schools are understaffed already. This decision could be detrimental to the districts and our children. I'm asking, begging actually, for this not to be passed. We shouldn't have to decide between sending our children to school or exposing them to something with unknown long term effects. Not every one can homeschool and those that can't find other solutions will be forced to do something they don't agree with. Look at the recent issues with firing people due to not getting the vaccine. Struggling to find bus drivers, road workers, government departments are understaffed. Even the teachers. The same will happen here if it's forced on our children and they're the ones that will suffer the most.

Thank you for your consideration,

Lila Bliss

Hello,

You are in an incredibly difficult position where, no matter what decisions you make, there will always be someone upset with you. I hope that you can make the best decisions you can with the information available to you.

As a parent, I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools and childcare in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Famericasfrontlinedoctors.org%2F2021%2F10-red-flags-in-the-fdas-risk-benefit-analysis-of-pfizers-eua-application-to-inject-american-children-5-to-11-with-its-mrna-product-commentary%2F&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C98489bf7b20740d990b108d9d204d>

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

)

A Covid-19 vaccine mandate clearly does not pass the 9 criteria required when Reviewing Antigens for Potential Inclusion in WAC 246-105-030. My lack of support for a mandate stems from the following criteria not being met under sections II and III on the list of criteria:

II. Disease Burden Criteria

5. The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population.

- The vaccine has been directly available to every vulnerable sub-set of the population for some time.

6. Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting or activity being given the highest priority.

- It is widely proven that vaccinated individuals can and do continue to transmit the virus. We know this because this was the science used to justify mask mandates. Masks are mandated in schools already, regardless of vaccination status, to prevent the vaccinated from transmitting the virus.

III. Implementation of the Criteria

7. The vaccine containing this antigen is acceptable to the medical community and the public.

While the vaccine may be acceptable to the medical community (although we will note that even within the medical community, the vaccine adoption rate was not acceptable enough to preclude a forced mandate), we cannot gloss over the fact that public acceptance does not even represent a strong majority.

- Under 51% of Spokane County residents are vaccinated. (srdc.org
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C>
)

- Less than 40% of kids 12-17 are vaccinated. (srdc.org
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C>
)

- Only 36% of the entire black community in Spokane County is vaccinated, and it is reasonable to assume this number is far lower among ages 12-17. A vaccine mandate in

schools would disproportionately affect students of color in our community. (srdc.org
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C>
)

8. The administrative burdens of delivery and tracking of vaccine containing this antigen are reasonable.

- Our administrators and nurses have already given feedback that a vaccine mandate would create an unreasonable and insurmountable administrative burden involving tracking.

9. The burden of compliance for the vaccine containing this antigen is reasonable for the parent/caregiver.

- As stated in the above vaccination statistics, parents are choosing not to vaccinate their children. Forcing them to do so (as with other segments of our society who were coerced under the threat of losing their jobs and livelihoods) does not fall within a reasonable burden of compliance. It does not seem logical to vaccinate a group (ages 0-19) with such a low, even insignificant, rate of hospitalization or death, while claiming that will protect a more vulnerable group (ages 50-90) with a dramatically higher rate of vaccination (between 62%-82% based on age). Thusly, our state would propose forcing vaccination on those who do not need it, to protect those who already have it and/or could easily get it.

The vaccine is widely available to any age group now. Vaccination rates reflect individual health choices that must be protected. We have to acknowledge that individuals can make their own health decisions for themselves and their families. There simply is not a case to be made for forcing someone to get vaccinated to protect someone else who can easily get vaccinated themselves.

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

I am completely AGAINST any of the proposed Covid Policies that are over reaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-45, WAC 246-100-040, WAC 246-100, WAC 246-105.

We the people will NOT allow our medical freedom to be stripped away from us.

If children are required to get the covid vaccine for school you will be pushing so many parents to home school or move states. Parents are already scared sending their kids to school with all of the school shootings so this will just be one more reason for them to decide to home school.

The covid-19 vaccination should not be forced upon anyone especially our children.

I am asking you to carefully consider the repercussions. Getting a vaccine should be a choice between the citizens and our healthcare providers not the county or the state to be involved in. The state of Washington and Pierce County are trying to make medical decisions for us. What's next are you going to not let us have the choice to get an abortion if I decide that's what best for us?

You guys are over stepping and violating our constitutional rights. Many people have already moved out of the state due to your requirements these proposed changes will only make more people flee Washington.

Our state has one of the highest vaccination rates nation wide, some of the strictest protocols and rules for masks and vaccinations and yet we still have one of the highest rates of Covid so what makes you believe implementing more policies will help? Why not follow suit of other states who are letting people live their lives and have lower Covid rates.

WE WILL NOT GIVE UP WE WILL NOT STAND QUIET WHILE YOU TRY TO STRIP US OF OUR MEDICAL FREEDOM!

You are violating our constitutional rights

Sincerely concerned Washington state citizen,

Kirsten

To whom it may concern:

I am a fully vaccinated individual. I am also completely against any of the proposed COVID policies, which are over-reaching and immoral at best. Sending people to detainment centers for choosing not to vaccinate is just plain wrong - especially considering that the vaccines in question do not prevent transmission of the virus and those of us who are vaccinated still get sick. It also does not take into account those who are unable to get vaccinated due to legitimate medical or religious reasons.

I humbly ask that you consider what these proposed covid policies would really accomplish.

Stand against these proposed WACs:
WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, and WAC 246-105

Thank you

Please oppose or put a halt to this requirement for students that attend public schools. This is such a new vaccine that have limited time on their safety data that we have no clue what the long terms affects are and should not be using our children as an experiment. The science has been constantly changing and I'm not comfortable as well as other parents to putting this into our children. We should have a choice with what happens to our children and it is not up to the government to decide what we or our children do with our bodies. Why is " my body my choice" only allowed in certain situations but not what happens with ourselves or our children. Please take a look at a parents perspective on this. This is so important that we halt this and take time to think clearly on something that could later on be harmful to our children no matter what the government is pushing on us. We've already been doing what we were told we needed to do to stay safe and that's as force our children to mask 8+ hours a day. Now what? Do the masks not work because covid is still around and even though 78% of Washington is fully vaxxed covid is still here and affects vaccinated. This will never end vaccination or no vaccination. Please give us a choice.

<michelle.davis@sboh.wa.gov <mailto:michelle.davis@sboh.wa.gov> >

I am a WA state and Nationally Board Certified Teacher and have been teaching for 16 years. I love our schools and I love our kids! More dear to heart than my career in education, I'm a mom of two teenage children who are healthy and happy! I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State. It's a horrible idea for many reasons, such as:

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than

2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

To whom it may concern:

I am writing you to urge you to stand up against the push for vaccine mandates (for children and adults) and to stand for medical freedom of choice. There are not enough long term studies regarding the use of the Covid-19 vaccine and the option of natural immunity needs to be a part of this conversation, if we are truly wanting to follow the science.

Even the CDC and Dr. Anthony Fauci have admitted that the vaccine itself does not stop transmission or infection. This is the logical disconnect between facts and political agenda.

Sadly, with the push for this and the proposed policies to allow health officers to use law enforcement to order persons involuntarily to isolation facilities or coerced medical intervention, Washington board of health is playing with medical tyranny. Not only is all of this discussion in direct violation of the Washington State Constitution and the US Constitution, the proposed policies are in direct violation of the Nuremberg code article 6 section 3 that states: No government can mandate or force medical treatment without individual consent.

Please stand for medical freedom of choice for the citizens of Washington.

I am writing today to voice my concern over new proposed covid policies. I am completely against any of the proposed Covid Policies that are over reaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

And in regards to the last one, WAC 246-105, that should not even be proposed this early I to the vaccine development. The vaccines are STILL experimental and should NOT be forced on anyone but especially kids. We don't have a full understanding of the side effects and children have a 99% chance to recover from covid. It should be up to the parents if they want to use this experimental vaccine on their child/children.

If this becomes mandatory we will be pulling our child from public schools. And I know several others who will do the same.

Thank you,

Maren

Hello!

I am completely against any of the proposed Covid policies that are over reaching and immoral.

We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246 246-100, WAC 246-105.

This doesn't feel like the America that our fallen had fought and died for. My brother didn't die at age 20 years old, to watch us hand over our freedoms that you're trying to take away. We have a right to medical freedom.

Go look at the damage this experiment is doing. It's not a vaccine, there's no attenuated virus. People are dying after these jabs. But the news isn't reporting it. You need to actually go look for yourselves. I see posts of people losing loved ones that are jabbed, daily.

Doctors are speaking out against this! Even the Doctor who worked with the Moderna jab. How can you not be cautious here?

Don't you dare push this on our children. Nor their families.

Regards,

Jessica

We the people will NOT allow our medical freedom to be stripped away from us.

I am asking you to carefully consider the repercussions. Getting a vaccine should be a choice between the citizens and our healthcare providers not the county or the state to be involved in. The state of Washington and Pierce County are trying to make medical decisions for us. What's next are you going to not let us have the choice to get an abortion if I decide that's what best for us?

You guys are over stepping and violating our constitutional rights. Many people have already moved out of the state due to your requirements these proposed changes will only make more people flee Washington.

Our state has one of the highest vaccination rates nation wide, some of the strictest protocols and rules for masks and vaccinations and yet we still have one of the highest rates of Covid so what makes you believe implementing more policies will help? Why not follow suit of other states who are letting people live their lives and have lower Covid rates.

WE WILL NOT GIVE UP WE WILL NOT STAND QUIET WHILE YOU TRY TO STRIP US OF OUR MEDICAL FREEDOM!

You are violating our constitutional rights

Sincerely concerned Washington state citizen,

Kirsten

Fwd: January 12 Meeting- Current infectious disease WAC codes to include Covid-19 for all WA State residents.

Send an email to these people by tomorrow!! This is the one I sent. They are trying to use the WAC's to set up camps in WA to force people into and to require the vaccine for ALL WA schools.

Subject: January 12 Meeting- Current infectious disease WAC codes to include Covid-19 for all WA State residents.

Hello,

I'm concerned about the WAC's being reviewed to possibly be revised and add to them. You don't have the right to decide if a child gets vaccinated or to decide if you can use law-enforcement to detain me and or my family if you choose to do so. The following proposed policies/WAC's are unconstitutional! .

PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC

This blatant abuse of power needs to stop. I am NOT in support and oppose these possible changes. Please don't do this.

Thank you,

To whom it may concern,

As a parent in WA state, I am adamantly opposed to a covid vaccine requirement for school aged kids and daycares. This vaccine has not had any long term (or relatively short term) safety studies done and is only approved for emergency use. The SCIENCE shows that though this virus is becoming more transmissible it is also becoming LESS severe symptom wise (especially in children). No parent wants their child to get sick, not even with the common cold (which is where covid is heading in mutation). However the reality is that if they don't catch it at school they will catch it at the grocery store, the library, from mom or dad who got it from work etc. DESPITE vaccination status!

It is absolute discrimination to refuse children access to public school because their parents don't feel comfortable giving them an experimental vaccine (and it's only considered a 'vaccine' because the definition of a vaccine has recently been amended).

The government has over-reached, this is a parenting issue, not a government issue.

Thank you for your time.

Hello,

I am writing to express my sincere concerns about mandatory Covid-19 vaccines for school entry and childcare in WA. I have 2 young children, ages 6 and 4 who are currently all up to date on their vaccination schedules. My husband and I have spent hours discussing and evaluating potential risks and benefits of vaccinating our children against Covid-19 and have come to the conclusion that there are simply too many known and unknown risks to submitting our children to these experimental vaccines. It is well known that the risk of severe illness and death to children from Covid-19 is extremely low. What is more concerning to us as parents are the potential long term risks associated with a new vaccine technology. Given these facts, we believe it is in the best interest of our children's health to not vaccinate them against Covid-19.

May I also point out that the current Covid-19 vaccines available in the United States remain under emergency use authorization. These vaccines also do not stop transmission, only lessening the severity of symptoms. Mandating Covid-19 vaccines for our children, the majority of who have very mild or even asymptomatic cases, is simply unnecessary and will not "stop the spread" or protect others. If anything, it may convince parents to allow their vaccinated children to go to school while ill in a false assumption that they can't get covid, increasing the spread. Putting our most innocent at risk of suffering unknown long term side effects from a rushed vaccine for a disease that does not cause them harm is simply not rational.

I implore you to allow parents to make their own decisions for their children's health.

Thank you,

Jamie Temple

The DOH needs to understand that us parents will be pulling the majority of our children out of school if this is mandated for them. The schools will lose major funding. Look at how California's is going right now? They're already backtracking. Just give it up. We the people will destroy this narrative. Mandating a covid vax is completely uncalled for and unnecessary. Natural immunity is what we need to be reaching for. So many of us have it. Look at Florida and how well they are doing. Politicians are talking so many horrible things about them, and then go vacation there happily without any restrictions or masks. WHY??? Because this is wrong, and you all know it. Masks are restricting my child's breathing. Are you willing to be liable for any damages to my child's health from having to wear these awful masks or if, God forbid, she was to get an 'EMERGENCY AUTHORIZED AND NOT FDA AUTHORIZED' covid vaccine? Let me answer that for you, no, you won't be. We all know it. What you're doing is WRONG. My friend has brain damage because of the Pfizer vaccine and guess what she got stuck with? Over \$10k worth of bills (after insurance) and that's just to get a diagnosis. Guess who won't be helping pay for any of that. You guessed right, NOBODY. This is on her now and it's morally wrong. Everything about this is WRONG. STOP TRYING TO PUSH THIS ON PEOPLE. We will not go quietly. We will be heard.

Your voting resident,

Holli-anne Lorenz

If the virus has never been properly isolated, it doesn't exist. Then the test is a fraud, the vaxx is a fraud.

It's my body, my choice ~ and children should not be vaccinated against their will.
Do not go against science, logic and common sense, we expect sound judgment. There is zero scientific evidence that justifies vaccines or quarantines.

Do not commit a crime against the citizens of Washington state. We don't need forced vaccination or quarantine.

Informed Consent is required by law.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.99%

Vaccines are far away from the point of diminishing return, it's substantially more harmful to vaccinate. It is blatantly criminal to even consider forced vaccinations.

Informed Consent is required by law.

No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM

The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product –

Subject: I OPPOSE VAX MANDATE - Pierce County

External Email

Good Evening -

I OPPOSE the vaccine mandate for school children ages 5-18. If a mandate is imposed I will be pulling my 3 elementary aged children from the public school setting and initiating a homeschool curriculum immediately.

I would like to share some brief facts with you surrounding Covid-19.

* It should be noted that children have a nearly 100% survival rate from Covid-19.

* Dr. Eric Rubin, physician at Boston's Brigham and Women's Hospital, Adjunct Professor of Immunology and Infectious Diseases at Harvard University, Editor-in-Chief of the New England Journal of Medicine:

* On October 26, 2021, as a voting member of the FDA advisory panel on the Pfizer vaccine for kids ages 5-11, Dr. Eric Rubin stated, "It's really going to be a question of what the prevailing conditions are but we're never going to learn about how safe this vaccine is unless we start giving it. That's just the way it goes. That's how we found out about rare complications of other vaccines like the rotavirus vaccine."

* Harvey A Risch, MD, PHD, Professor of Epidemiology at Yale School of Public Health:

* Dr. Risch stated during an interview that he would homeschool his children if public schools mandated the vaccine. Additionally, he would only recommend the vaccine to children if they have some kind of chronic illness.

* Per CDC statistics, during the 12-month period October 2, 2020 through October 3, 2021, there were 66 COVID-19 associated deaths in children 5-11, making COVID the eighth leading cause of death for this age group, behind accidents (969 deaths); malignant neoplasms (525); Congenital malformations, deformations and chromosomal abnormalities (274); assault/homicide (207); heart disease (115); chronic lower respiratory diseases (107); influenza and pneumonia (84); intentional self-harm/suicide

(also 66 deaths).

* Children are almost seven times more likely to die in a car accident than from COVID-19. They are almost eight times more likely to drown.

* Per John Hopkins University, a typical vaccine development timeline is 5-10 years versus the accelerated Covid-19 track of 1-2 years.

Again, if this vaccine is mandated we will be forced to pull our children from our school district. Homeschooling is less than ideal given that two of our children have IEP's. However, we believe the unknown long-term risks of the vaccination far outweigh any damage I may do to their education. Our children are role models to their peers and their absence would be a loss to their district.

Thank you -

Nichole Hurley

☐ I oppose WAC 246-100 rule making that would expand authority to involuntary quarantine individuals.

I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

Children are extremely low risk for Covid.

The vaccines are still only EUA.

There are no long term studies to document any history of safety.

Studies do now document that vaccinated and unvaccinated can both transmit Covid therefore the Vaccine does NOT stop the spread of the covid disease!

Dear Heath Leaders,

Thank you for your role in leading our state and making the tough decisions. I am writing to ask you to please remember who you work for, the people of WA. As one of those people I am asking you to remember there are two different sides to all this COVID craziness. While I respect your personal opinion and desire to have everyone vaccinated you need to respect ours. We live in the land of the free. We get to make our own choices. My choice to not vaccinate doesn't hurt anyone. The vaccinated get vaccinated to protect themselves and therefore they don't need to worry unless the vaccine doesn't work. Even if the vaccine doesn't work, it is not an illness that should be feared like our leaders are stressing. The data speaks for itself. You of all people should understand this.

Therefore, please remember this week as you discuss our states future and health, there are medical opinions for both sides and just because one doesn't see your way doesn't give you the right to try and control the other side. I am just asking for respect for those who oppose. Think about how you would feel if the tables were turned. Would you want your opinion heard and respected or for those who oppose to use their power and authority to take your freedom and liberties? Yes, it's a rhetorical question, so please do what is right and just for the people of WA and remember our constitutional rights.

On another note, please review the world's history on forcing people to do something. No where has it ever worked. It only causes more strife, fear, and violence. Please just stick to sharing facts, educating people and preserving our freedom to hear that information and make our own decisions for our families. I want to live in a state that can work as a unit, not divided and living in fear like we are. We can work together and will one day again. You can help be the change we need to see in our state and for our nation. So please, I request again for you to think and reflect on your choices as health leaders because they do have a serious impact on all of us.

Thank you for your consideration to these pressing matters.

Lindsay Lofstrom

To Whom It May Concern,

I OPPOSE Agenda Item #8, the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. You oppose COVID-19 shot mandates, period!

I SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Please don't approve this- our children are not test subjects, there isn't enough data, or long term effects.

Sincerely

Lisa Kramlich

Subject: I Oppose the Formation of a Tech Advisory Group to view COVID-19 shot mandates

External Email

Good afternoon,

I wanted to provide input on the agenda for the Jan 12 meeting. I may not be able to attend via Zoom.

I oppose the TAG for COVID 19 shots as possible mandates for school. These products, while in widespread use, have generated a very large amount of adverse reports and reactions in VAERS. Mandating these shots depends on an unproven optimism that things will be fine for the many children who already have underlying health issues, ASD, or other chronic conditions. My own children are in this situation. Those children have NOT been proven to be more in danger from COVID, but often are seriously adversely affected by vaccinate that provoke the immune system in a way that goes around the normal functions of the immune system.

A mandate for an emergency use vaccine is dangerous and should be avoided. Especially in light of how fast COVID is changing and the waning efficacy of the current vaccines.

I do support the new Petition for Rulemaking that would prohibit making any emergency use authorized product or a licensed product that lacks Phase 3 trial studies from being a on "school required" list.

Sincerely,

Janis Lemert

I oppose WAC 246-100 rule making that would expand authority to involuntary quarantine individuals.
I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.
Children are extremely low risk for Covid.
The vaccines are still only EUA.
There are no long term studies to document any history of safety.
Studies do now document that vaccinated and unvaccinated can both transmit Covid therefore the Vaccine does NOT stop the spread of the covid disease!

Subject: I Oppose mandating covid injections in schools

External Email

I am a Washington state resident.

I oppose any formation of a task group designed to explore mandating covid injections in our schools.

The emergency use authorization for these injections has expired by every logical and scientific standard.

I support the informed choice Washington petition for rule making which is on the agenda for January 12th.

No EUA product may be mandated according to federal law title 21, section 360bbb-3 of the FD&C act. Mandating these injections is illegal and immoral and any step in that direction is wrong.

Washington State is in grave trouble on so many levels and the department of health should be focusing on the very real health dilemmas facing our children.

Respectfully,

Laura Neuman

To All it May Concern:

I am completely against any of the proposed Covid Policies that are over reaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

I am all for the safety and health of our community and children. However, there is not enough long term data on how this vaccine is impacting our long term health therefore I fully believe that the medical decision to vaccinate children should be up to the parents and the parents of those children alone based on assessment of risk. NO ONE ELSE. To take away medical freedom and choice is immoral. This is unacceptable and will not stop the spread of COVID-19. Please focus on the the higher issues at stake, which is the mental health issues that this is causing children and the rise in mental issues and suicide rates because the impact that COVID-19 has had.

Thank you for your time and I truly hope this reaches you and strikes a compassion cord from one parent to another.

Highly concerned parent of two young children (the future of our society),

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee famously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Subject: Re: Health Board Meeting

External Email

Members of the Health Board,

I would like to express my EXTREME OPPOSITION to two different things that I understand you are considering in regard to COVID 19.

First is the possible use of the courts, ex parte, and law enforcement to involuntarily confine/quarantine a person or group of people. This would rob us of due process for a disease that, though not trivial, has a mortality rate no higher than the seasonal flu. In addition, there is every indication, both in the data from South Africa and that which is emerging in the United States, that the Omicron variant of the virus, though more contagious than any of the others, is relatively mild and more like the common cold.

Second, the implementation of a COVID 19 vaccine requirement for schools in Washington State. There is no COVID vaccine available in the United States that has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (A Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense - childrenshealthdefense.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>
> Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

In addition to these two things, I would like to say that the logic for not mandating the COVID 19 vaccine for children also applies to adults, whether it is in regard to employment or for any other reason.

The simple fact is that no one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. Here is an analysis of 10 Red Flags associated with Pfizer's studies:

Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>
)

Please carefully consider any actions that you might take in light of the freedoms that have been guarded and fought for by many Americans for over 200 years. My husband was a veteran and this is especially dear to me. I am not a lawyer, but it seems to me that implementation of heavy handed measures to deal with COVID 19 is unwarranted and unconstitutional. I expect that doing so will precipitate legal challenges, just like it has at the Federal level.

Respectfully,
Nancy Ann Lowe

Please do not vote to mandate the Covid 19 vaccine for kids. This should be a decision made by caregivers freely and not under pressure. The long term data is not fully established yet and we don't know what this will do to each individual child. We all need to stop making kids shoulder the burden of protecting adults who have tools to protect themselves. This Covid pandemic is tragic but we must draw the line somewhere.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of

the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Hello,

My name is Jozeff Davie and i am a 34 year old male who has not been vaccinated but i believe it is my Human right to decide what i do with or put into my body.

Our government is forcing people out of work, school and basically making the unvaccinated feel like outcast that aren't allowed or wanted in the community. Now we are being told that we may also be getting detained/isolated if we don't comply with Washington states mandatory vaccine law. This is not a government for the people any more, Washington states leaders have turned against the very people they are supposed to be serving and have become dictator's that are violating our American rights.

I DO NOT SUPPORT ANY LAW THAT WILL DETAIN HUMANS FOR NON COMPLIANCE OR FORCE ANY HUMAN TO INJECT THEMSELVES WITH ANYTHING THEY DO NOT WANT IN THEIR BODY.

We are humans with rights NOT owned cattle.

Lets go brandon.

Thank you,

Subject: I am Completey Against Proposed Policies WAC codes - Overreach & Immoral

External Email

Hello,

I would like to voice my concern with the Proposed Policies and WAC codes. Telling an individual or family that they are required to take a vaccine that is not FDA approved and has not been out on the market for longer than 13 months is against the Constitution and our rights as Free Americans. Our ancestors fought for our rights to give us the freedom to make choices for ourselves. If our Washington State health Department and Governor push to vaccinate and take away individual freedoms that is putting you into the NAZI Germany and Hitler era. Governments shall not overreach and cause immoral policies against an individual person's freedoms. And to require children to be vaccinated with a vaccine that is not FDA approved and been through a full multi level trial just as every other medicine and vaccine has had to go through is immoral, illegal, and overreach. Putting a medicine in our bodies that we don't know enough about and that we have personally witnessed other friends and family members have severe reactions to as well as die within 2 days of having these vaccines is again against our personal liberties afforded us under both the State and US Constitution. Please vote against all WAC codes that require COVID vaccines for anyone.

I would love to talk with someone more about my reasons why I am against this if you want to hear more information.

I stand against these Proposed WAC's:

WAC 246-100-070
WAC 246-100-045
WAC 246-100-040
WAC 246-100
WAC 246-105

Subject: I am AGAINST Vaccine requirement for school aged children

External Email

To whom it may concern,

I am not an anti-vax parent, my children are vaccinated. On the contrary, in no way do I support the requirement for my young, developing children to be required to be vaccinated with an experimental drug that the drug company cannot be held responsible for if said drug hurts them in any way. I'm not willing to risk giving my healthy children a drug we've had very little time to understand the long term effects this could have on them, or to risk any of the complications we already know can happen from this vaccine. Please, please, do not make the vaccine a requirement to attend public school. My 1st grader would be devastated if I had to remove her from school to homeschool her, if a requirement to vaccinate school aged children was out into order. Covid has been so hard already. I have a 4yr old who doesn't get nearly get the socialization he deserves & a 7yr old who didn't get to finish pre-school & only was able to join in on Kindergarten the last semester when in-person started back up earlier last year. This would just be one more disappointment. Again, please do not require our children to be submitted to an experimental drug. Let them continue with the little bit of normal they get going to school without risking any of the complications of an experimental vaccine.

Please.

Subject: Health focus

External Email

Hello Washington Board of Health,

You have been placed in your position to look at the overall health of our State and your decisions can positively impact or negatively impact our Whole State.

Where is your focus all depends on the input you have received and the voices that have caught your attention either during this time or some powerful campaign to convenience you. Throughout History it is interesting when legitimate arguments have been disregarded because of a heavy distraction by other input.

Your approach to make decisions is based on your ability to either promote or see hope and encourage the individual & public or the contrary to be led by fear and foster destruction upon the individual & public.

Throughout history when the focus has been on fear many decisions have been made that adversely affect the whole population for sometimes many generations.

I can't help but look at our current situation with covid-19 and wonder why our focus is so often on FEAR and not on the Percentage of the population who has recovered from even contracting this virus. The 98+ percentage recovery rate (by official numbers of data I even question) puts us in a very capable approach adequately addressing this virus and not living in Fear that has been so promoted.

The measures that have often been implemented have not been inclusive and disregard the adverse damage for all and especially children and the population as a whole is having to deal with a greater health crisis from suicide, mental health, constant fear of people and even isolation and in human love for one another and the attack upon our society as a whole.

Please do not allow dark measures to be implemented which destroy life as a whole in our state and realize we each will answer for the positions and choices we make as we have been placed on this earth.

Thank you for your time

Jeff Irish

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,

Melissa Mills

Subject: Fwd: I am Completey Against Proposed Policies WAC codes - Overreach & Immoral

External Email

Hello,

I would like to voice my concern with the Proposed Policies and WAC codes. Telling an individual or family that they are required to take a vaccine that is not FDA approved and has not been out on the market for longer than 13 months is against the Constitution and our rights as Free Americans. Our ancestors fought for our rights to give us the freedom to make choices for ourselves. If our Washington State health Department and Governor push to vaccinate and take away individual freedoms that is putting you into the NAZI Germany and Hitler era. Governments shall not overreach and cause immoral policies against an individual person's freedoms. And to require children to be vaccinated with a vaccine that is not FDA approved and been through a full multi level trial just as every other medicine and vaccine has had to go through is immoral, illegal, and overreach. Putting a medicine in our bodies that we don't know enough about and that we have personally witnessed other friends and family members have severe reactions to as well as die within 2 days of having these vaccines is again against our personal liberties afforded us under both the State and US Constitution. Please vote against all WAC codes that require COVID vaccines for anyone.

I would love to talk with someone more about my reasons why I am against this if you want to hear more information.

I stand against these Proposed WAC's:

WAC 246-100-070

WAC 246-100-045

WAC 246-100-040

WAC 246-100

WAC 246-105

My comments regarding the Health Departments meeting for January 12, 2022. I, and my family, comprised of 2 adult children and their spouses, are adamantly opposed to the health departments proposed overreach of authority regarding covid. It is unconstitutional to mandate forced quarantine, counseling, medical treatments or vaccinations. You are unelected and not law makers and we will not comply. We will however join the thousands of people in litigation against those who attempt to force these unlawful acts upon citizens.

I want to express how extremely opposed I am to the following proposed laws..

PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

This is most definitely overreach of power by the government and takes away a human right to choose what's best for their body and their children. I'm not against vaccines but I am for the right to choose!
Please vote NO on these!

Thank you

Inna Nikolaychuk

Subject: I Don't Want My Kids Taking The Covid Vaccine

External Email

All 3 of my children came down with Covid recently and they have recovered in the span of a few days.

Why? Because we provided supplements, vitamins, and minerals to help their body's natural immune response effectively fight off the disease.

The survival rate of this virus for kids is equal to that of a cold or a flu and flu shots have never been mandated before, nor should they.

People should be in charge of their own health decisions and the government should not have the power to mandate what I or my kids should put into our bodies, especially given the alarming rise in myocarditis among children who have taken this vaccine.

Parents should be allowed the God-given right to decide what is best for their children's health and that means the right to refuse or accept the vaccine without governmental intervention or mandates.

Our family will highly consider moving out of Washington State if these vaccine mandates are passed.

Washington state board of health,

So you want to weaponize The Washington state board of health, medical officials, and the local police against citizens that are exercising their constitutional rights to make their own medical decisions? I can't believe you're even considering these draconian and unconstitutional policies.

It appears that you were born in the wrong era, you should've been born in Nazi Germany and part of the third Reich with your proposed tyrannical policies. This is a page right out of the Nazi playbook of show me your papers, you will get a force vaccination against your will or you will be arrested and taken to a concentration camp.

Do you really think Americans are OK with this? I can answer that, we are absolutely opposed to these unethical, unlawful, unconstitutional, and ill moral Policies. The Nuremberg trials and code After World War II spells it out very clearly. The Washington state board of health needs to read and honor the US Constitution, the Washington state constitution, and the bill of rights. Individual citizens have the right to choose what goes in their body and what does not.

I want to join the countless other parents who object to a vaccine mandate for our kids. There are many reasons why these vaccines should be a family decision rather than a mandated requirement. I'll briefly list a few of these reasons:

- 1 The vaccines are not without severe risk. Those risks have to be weighed against the potential benefits. For kids, the data clearly says the virus risks are low for kids and they appear to be getting even lower with new viral strains.
- 2 Many kids already have natural immunity which is proving to be incredibly resilient. Adding vaccines on top of that is both unnecessary and comes with risks.
- 3 Many families have suffered from vaccine-induced illnesses including, but not limited to anaphylaxis, vaccine-induced thrombotic thrombocytopenia, myopericarditis, and Guillain-Barré syndrome. Forcing families to vaccinate their kids after seeing those symptoms is a perverse form of torture in violation of the Nuremberg Code.
- 4 Our public schools are not popular right now and private school enrollment has dramatically increased. Vaccine mandates will only further force families into alternative options like homeschooling.
- 5 The current vaccines don't solve the transmission problem as we've seen with fully vaccinated environments like cruise ships.
- 6 We don't have long-term studies of these therapies.
- 7 Data suggests transmission in schools is very low.
- 8 The decision to vaccinate should be between a family and their doctor, not a one-size-fits-all state requirement.
- 9 Milder, but contagious strains like omicron will increase natural immunity which continues to be the most resilient defense.
- 10 Infertility is a possible side effect

Thank you

I am joining the number of other parents objecting a vaccine mandate for our kids in schools.

There is an incredibly high risk of a multitude of vaccine caused injuries among children due to the new roll out of the Covid Vaccine for kids.

1. There is not safety data that has been released. Which means this is not an informed choice.
2. Kids have not posed a threat this entire pandemic.
3. The vaccine is proven that it does not prevent transmission.
4. Many kids have experienced regular pediatrics vaccine injury and deserve a choice especially after seeing it is REAL that kids get injured by even regular vaccines. It's emotionally traumatizing and forcing that risk on a parent isn't fair.
5. If there's a risk there is a choice.
6. There is data showing it does cause heart issues in kids.
7. The creator of the MRNA vaccine said so himself that kids have a high injury risk including a wide array of injuries.
8. This is not a one size fits all when all kids have different DNA and this will effect each child differently.
9. No one knows the health or issues these poor children will face 10 years down the road if they are forced to get this vaccine.
10. It is no one else's responsibility to make medical decisions for a family other than the PARENTS!
11. Private school rates have sky rocketed.
12. This is corrupting the public school system.
13. Parents are home schooling at a high rate we've never seen before.
14. People have religious beliefs that need to be respected.
15. It's NO ONE else's choice but the PARENTS!!!!

To: Whom this should be directed to before 12:00 pm on Friday, January 7, 2022,

I want to join the countless others (including about 14,000 medical Doctors in the US) who object to the vaccine mandate for our children and grandchildren.

The vaccines are not without severe risk, and can possibly cause infertility issues.

There are no long term studies of the vaccine therapy.

Many people who have received the vaccine are also getting Covid, in addition to many other health issues. The vaccine is not proving effective to stopping the spread, as we have seen.

By forcing our public schools to mandate the vaccine, many families will be forced into private schools, and homeschooling, which will dramatically decrease public school enrollment.

This should be a private decision for each family and their doctor, and not have the Washington state government take control of people's private lives, and force them to vaccinate anyone.

I hope that you people will listen to many credited doctors, who can provide you with much needed information, and that you will not automatically assume that you have all the answers.

Respectfully,

A citizen of the land of the free and brave, and hopefully it will continue to be,

Julie Gray

Hello,

I want to join the countless other parents who object to a vaccine mandate for our kids. There are many reasons why these vaccines should be a family decision rather than a mandated requirement. I'll briefly list a few of these reasons:

1 The vaccines are not without severe risk. Those risks have to be weighed against the potential benefits. For kids, the data clearly says the virus risks are low for kids and they appear to be getting even lower with new viral strains.

2 Many kids already have natural immunity which is proving to be incredibly resilient. Adding vaccines on top of that is both unnecessary and comes with risks.

3 Many families have suffered from vaccine-induced illnesses including, but not limited to anaphylaxis, vaccine-induced thrombotic thrombocytopenia, myopericarditis, and Guillain-Barré syndrome. Forcing families to vaccinate their kids after seeing those symptoms is a perverse form of torture in violation of the Nuremberg Code.

4 Our public schools are not popular right now and private school enrollment has dramatically increased. Vaccine mandates will only further force families into alternative options like homeschooling.

5 The current vaccines don't solve the transmission problem as we've seen with fully vaccinated environments like cruise ships.

6 We don't have long-term studies of these therapies.

7 Data suggests transmission in schools is very low.

8 The decision to vaccinate should be between a family and their doctor, not a one-size-fits-all state requirement.

9 Milder, but contagious strains like omicron will increase natural immunity which continues to be the most resilient defense.

Thank you
Hannah Mitchell

To whom it may concern:

I want to join the countless other parents who object to a vaccine mandate for our kids. There are many reasons why these vaccines should be a family decision rather than a mandated requirement. I'll briefly list a few of these reasons:

1. The vaccines are not without severe risk. Those risks have to be weighed against the potential benefits. For kids, the data clearly says the virus risks are low for kids and they appear to be getting even lower with new viral strains.
2. Many kids including mine already have natural immunity which is proving to be incredibly resilient. Adding vaccines on top of that is unnecessary and comes with additional risks.
3. Many families have suffered from vaccine-induced illnesses including, but not limited to anaphylaxis, vaccine-induced thrombotic thrombocytopenia, myopericarditis, and Guillain-Barré syndrome. Forcing families to vaccinate their kids after seeing those symptoms is a perverse form of torture in violation of the Nuremberg Code.
4. Our WA schools are not popular right now for many reasons. Vaccine mandates will only further force families into alternative options like homeschooling or moving out of state.
5. The current vaccines don't solve the transmission problem as we've seen with fully vaccinated environments like cruise ships. If the vaccinated can still catch and spread COVID, mandates are useless and unnecessary.
6. We don't have long-term studies of these therapies which are still under Emergency Use Authorization.
7. Data suggests transmission in schools is very low.
8. The decision to vaccinate should be between a family and their doctor. No medicinal decisions are one-size-fits-all.
9. Milder, but contagious strains like omicron will increase natural immunity which continues to be the most resilient defense.

The burden of proof is on your shoulders to:

1. Prove that the efficacy of the current vaccinations will be sustained over a course of time therefore preventing multiple injections without proper scientific study of how multiple injections, or boosters, will effect a child.
2. Prove that vaccine immunity is better than natural immunity.
3. Prove that vaccine immunity is sustainable and that a vaccinated child cannot infect another person or spread the disease.
4. Prove that those with natural immunity continue to spread the disease which they have natural antibodies to fight.
5. Prove that the vaccines are the only effective option for preventing the spread of COVID- in order to do this you must address the other preventable measures and prove their inefficiency.
6. If mandate is passed, you must provide a legal outcome for those who are forced to give this to their child and that child incurs an adverse reaction causing them injury or death. If it's forced upon us, with knowable risk, the responsibility must fall on the shoulders of the entity that forced the vaccination.

This is an unlawful mandate. It is unprecedented. The goal for the initial mandates was to protect the most vulnerable- the sick and elderly. This has nothing to do with the sick and elderly, particularly with the Omicron strain of the virus. This has everything to do with power and money. Leave our kids alone!

To whom it may concern,

I am sending this email to join the countless other parents and grandparents who object to a vaccine mandate for our kids. There are several reasons why these vaccines should be a family decision rather than a mandated requirement. I'll briefly list a few of these reasons

1 The vaccines are not without severe risk. Those risks have to be weighed against the potential benefits. For kids, the data clearly says the virus risks are low for kids and they appear to be getting even lower with new viral strains.

2 Many kids already have natural immunity which is proving to be incredibly resilient. Adding vaccines on top of that is both unnecessary and comes with risks

3 Many families have suffered from vaccine-induced illnesses including, but not limited to anaphylaxis, vaccine-induced thrombotic thrombocytopenia, myopericarditis, and Guillain-Barré syndrome. Forcing families to vaccinate their kids after seeing those symptoms is a perverse form of torture in violation of the Nuremberg Code.

4 Our public schools are not popular right now and private school enrollment has dramatically increased. Vaccine mandates will only further force families into alternative options like homeschooling.

5 The current vaccines don't solve the transmission problem as we've seen with fully vaccinated environments like cruise ships

6 We don't have long-term studies of these therapies.

7 Data suggests transmission in schools is very low

8 The decision to vaccinate should be between a family and their doctor, not a one-size-fits-all state requirement

9 Milder, but contagious strains like omicron will increase natural immunity which continues to be the most resilient defense

10 Infertility is a possible side effect

11 No allowance for natural immunity which is the best option as they have mild symptoms

Thank you,
Kimberly boubel

Subject: Communicating With Board Members - No Covid Vaccine Mandate for School

External Email

I am writing to you as a mother of two children in Ridgefield, WA. I believe that parents and guardians should be allowed to make decisions on the Covid vaccine based on their family beliefs, medical history and prior Covid illness/exposure. The State of WA should not be requiring the Covid vaccine for school access. It is not equitable or a standard that should be required since there are no long-term studies on the vaccine's effect on children. There are serious side effects involving teenage boys with heart inflammation that I would like more information on before making a choice on the vaccine.

I believe that the WA DOH should treat the Covid vaccine as the flu shot. It could be highly encouraged for families to get but not a mandate.

Please allow parents and guardians to make medical choices for their children and not be forced in order to gain access to taxpayer funded education.

Thank you in advance for reading my email.

Sincerely,

Kelly Graeme

To whom it may concern,

My name is Josh Biddlecomb and I live in Benton county Washington. What you are trying to impose with this vaccine mandate in the schools and impose law enforcement to round up the unvaccinated in quarantine camps is absolutely despicable, evil and unconstitutional. I 100% oppose what you are trying to do here!! Just know, that there are more of us than you realize. We are the majority! The people of Washington will not stand for this kind of draconian rule and communist agenda infiltrating our state! Please consider the repercussions this will cause across the state if you impose such evil restrictions and mandates.

Thank you,

With regards to mandating covid vaccines for our children I say absolutely not. Kids are the lowest at risk if any risk at all with regards to covid. The vaccine is not FDA approved, it is only approved as an emergency. You will not use our kids as experiments for your vaccine.

Again, I say NO to mandating your covid vaccine for our kids, or anybody for that matter.

Subject: Proposed policies regarding Covid-19

External Email

To Whom it May Concern,

I am writing this to urge you to not adopt new policies regarding Covid-19, vaccines, etc. The proposed policies are outrageous and violate a person's right to choose for themselves what is best for their own body. Forcing people and families to isolate at facilities is what happened in concentration camps during WW2. Implementing these policies will not serve the public in a positive way. All you're going to do is cause harm, anger people, and force people to either leave the state or take children out of public schools. California implemented similar mandatory vaccine mandates for children to go to school and over 30,000 children were pulled from public school. They have since reversed their decision because of this. If you institute these policies and force children to be vaccinated you're going to have a huge fight on your hands that you were not expecting. Do not take people's right to choose away.

Sincerely,
A vaccinated person who supports medical freedom

It is not right to force a vaccine on anyone let alone a child to attend school! The kids are barley even impacted by the virus so why force this?! This is absolutely insane to force this brand new vaccine on a child. It's WRONG.

Too much is unknown about the Covid vaccine. To force people to a vaccine is against basic human rights. Until then you can guarantee them they will not be harmed physically short or long term...you are gambling with the life's of the people. Giving the government authority to restrict our freedoms even before knowing they are infectious is wrong.

I am completely against any of the proposed Covid Policies that are overreaching and immoral.

I stand against these proposed WAC's:
WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

It's a slippery slope heading down and you need to use the rights that our forefathers fought for so long ago. It's called freedom and it's starting to look like things are trying to work against that.

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets vaccine, one group gets placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccine adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Finally, as this is an experimental drug that you will be forcing on our children, I will close with the 10 points to the Nuremberg code. I strongly urge you to read over these as YOU will be the ones held responsible for these crimes if you push these mandates through.

The ten points of the code were given in the section of the judges' verdict entitled "Permissible Medical Experiments":[6]

1. The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the experimental subject there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be

conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person which may possibly come from his participation in the experiment. The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs, or engages in the experiment. It is a personal duty and responsibility which may not be delegated to another with impunity.[13]

2. The experiment should be such as to yield fruitful results for the good of society, unprocurable by other methods or means of study, and not random and unnecessary in nature.

3. The experiment should be so designed and based on the results of animal experimentation and a knowledge of the natural history of the disease or other problem under study that the anticipated results will justify the performance of the experiment.

4. The experiment should be so conducted as to avoid all unnecessary physical and mental suffering and injury.

5. No experiment should be conducted where there is an a priori reason to believe that death or disabling injury will occur; except, perhaps, in those experiments where the experimental physicians also serve as subjects.

6. The degree of risk to be taken should never exceed that determined by the humanitarian importance of the problem to be solved by the experiment.

7. Proper preparations should be made and adequate facilities provided to protect the experimental subject against even remote possibilities of injury, disability, or death.

8. The experiment should be conducted only by scientifically qualified persons. The highest degree of skill and care should be required through all stages of the experiment of those who conduct or engage in the experiment.

9. During the course of the experiment the human subject should be at liberty to bring the experiment to an end if he has reached the physical or mental state where continuation of the experiment seems to him to be impossible.

10. During the course of the experiment the scientist in charge must be prepared to terminate the experiment at any stage, if he has probable cause to believe, in the exercise of the good faith, superior skill and careful judgment required of him that a continuation of the experiment is likely to result in injury, disability, or death to the experimental subject.

My great grandparents never expected they might end their lives in Nazi Germany's concentration camps, but they did because decent, moral citizens did not speak out.

I am speaking out today to state unequivocally this entire scheme of yours regarding camps for the unvaccinated is unacceptable.

The use of law enforcement to detain citizens who refuse to be injected with experimental, unsafe toxins is outrageous and illegal.

The covid experimental vaccines should NOT be added to the school immunization schedule. In fact, the school immunization schedule should be immediately ended as the truth about the damages from them is also being exposed. Vaccines have done harm to most people, even if they have not figured it out yet. I know this from personal experience as well as extensive research. I have probably read more

actual medical studies in the past five years than any of you.

As a taxpayer in Washington for over sixty years I object to funding this immoral and illegal plan. I also object to the monies that will need to be paid in reparations, as happened after the Japanese internment's.

The children of this state desperately need psychiatric remediation from this stressful situation. Statistics show alarming suicide rates, drug overdoses (most from illegal fentanyl WA State has failed miserably to stop), and anxiety.

Our tax dollars should go directly to the treatment of the children (NOT to corrupt institutions to "study the approach " as is currently the case).

These types of illegal mandates you are attempting are currently being challenged and overturned in our judicial system. The truth is being exposed. Please stop wasting our financial resources on brutal, ineffective, illegal ideas like this and do what you were set up to do: actually improve health for the citizens of this state.

Regards,

Karen Cook

Subject: Proposed legislation

External Email

January 7, 2022

To Washington State Department of Health and anyone else concerned:

I am writing in Regards to Proposed Legislation WAC 246-100-070, WAC 246-100-045, 246-100-040, WAC 246-100 and WAC 246-105.

As a long-time resident of Washington State and a mother, I DO NOT agree with these propositions. I do not consent to our government dictating personal medical choices and locking up citizens. This is unconstitutional overreach. Our forefathers would never have tolerated this type of legislation! America was founded on the premise of personal freedom. As Benjamin Franklin wisely coined, "Those who would give up essential Liberty, to purchase a little temporary Safety, deserve neither Liberty nor Safety." This is America, land of the free and home of the brave! We do not consent to this intrusion into our private lives. What about those with medical conditions? Are they now to be locked up in a quarantine facility because they would die from an experimental medical procedure? What has happened to our country that this is even considered?

I believe these proposed laws are unconstitutional and violate the 4th amendment:

Amendment IV

The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no warrants shall issue, but upon probable cause, supported by oath or affirmation, and particularly describing

the place to be searched, and the persons or things to be seized.

Remember that whatever you do DOES NOT SUPERSEDE the United States Code. You can and will be held accountable by We the People!

Title 18 of the United States Code, Sections 241 and 242 criminalize conspiracy against rights and the deprivation of rights under color of law. In other words, they make it a criminal offense for public officials to go beyond the limits of their authority to strip away the public's rights. The law applies to police, judges, elected officials, and yes, public health officials as well as health care providers at public facilities.

Please also leave our children alone! Whether a parent chooses to vaccinate their children is a personal choice. All should be free to decide either TO get it or NOT to get it. I am OPPOSED to making COVID-19 vaccination mandatory for schools or childcare in our State. There are studies that show both vaccinated and unvaccinated can and do get and transmit COVID. And there are studies showing harm and death from the vaccine, as well as no long term safety studies so far. Children are also EXTREMELY low risk for dying from COVID. This should be a personal choice up to each family and parent. The vaccines have been proven to cause death. No one should be forced or coerced to take something that might kill them!

Please do not pass these laws and bring disgrace upon our nation, a world leader for its founding principles of freedom. Let us remember that "all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness." And when we read the Declaration of Independence further, we see that when our government attempts to make laws that are destructive to personal freedoms such as bodily integrity and informed consent, then "it is right of the people to abolish it, and to institute new Government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their Safety and Happiness." Please remember our history and do not pass these horrendous laws in Washington State!

Thank you for your consideration of my request.

Sincerely,

Kathryn Holm

Kennewick, WA

"When in the Course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume among the powers of the earth, the separate and equal station to which the Laws of Nature and of Nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness.--That to secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed, -- That whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or to abolish it, and to institute new Government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their Safety and Happiness. Prudence, indeed, will dictate that Governments long established should not be changed for light and transient causes; and accordingly all experience hath shewn, that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing invariably the same Object evinces a design to reduce them under absolute Despotism, it is their right, it is their duty, to throw off such Government, and to provide new Guards for their future security.--Such has been the patient sufferance of these Colonies; and such is now the necessity which constrains them to alter their former Systems of Government." Subject: Proposed Quarantine, Inoculation Policies (WAC246-100)

External Email

Dear Washington State Board of Health,

This is voice opposition to the following proposed policies:

- to allow local health officers to use law enforcement (WAC246-100-070) to force an emergency order to involuntarily detail a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examinations, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

First, U.S. VAERS adverse event numbers reveal that the average number of reports of such events following vaccination for the past 10 year has been about 39,000 each year, with an average of 155 deaths. That covers all available vaccines combined. In contrast, the COVID shots all by themselves now have been the source of 983,756 adverse events as of December 17, 2021, with 20,622 deaths. Even with these numbers, there is an enormous underreporting factor as many doctors and nurses do not know about the system, and the reporting process itself is tedious. Who has the time?

Second, children are at risk for possibly lifelong health consequences from the shot. Heart inflammation or Myocarditis is one of the most common problems among boys and young men, particularly fit young men. Dr. John Campbell of the U.K. recently interviewed a young man from Boise, Idaho who is a mountain bike champion and who has been incapacitated by the shot who talked about what he has been through physically and medically.

Dr. Mercola says that those younger in years are more at risk than those who are older. Furthermore, the more doses received, the greater the risk so that after the second dose, boys have a six times greater risk of myocarditis.

In Britain, the data shows that deaths among teenagers have gone up greatly since that age group became eligible and began receiving the COVID shots. From the week ending June 26 to the week ending September 18, 2020, 148 deaths were reported among 15- to 19-year-olds. A year later during the same period in 2021, 217 deaths occurred in that age group. This represents a 47 percent increase.

Beyond these reasons, there is no reason to quarantine people in this way unless we want to look like Germany in years gone by. My ex-husband's father was an interpreter at Nuremberg. These actions violate "informed consent" rules. This is still an experimental injection. Comirnaty is not yet available in the U.S. Further, has its producer submitted disclosure of its proprietary ingredients as required yet?

Please stop these policies before they start!

Best regards,

Lynn Lambert

To the Washington State Board of Health,

I'm a parent of two elementary school children and I'm respectfully asking that the covid vaccine not be a requirement for children to attend school.

Children are at an extremely low risk for covid-19. The vaccine is under emergency use authorization with no long term studies.

Mandating this vaccine is an act of discrimination and a violation of medical freedom. I have taught my daughters that their body is their choice. Children are the most vulnerable members of our society. We have an obligation to protect them which includes their right to medical freedom. As such, I personally know three people who are injured from the vaccine.

If there is any risk then it should always be a choice!

Thank you!

To whom it may concern, WA State Board of Health,

I am writing to express my opinion as a Doctor, with over 40 years experience and training, that the COVID vaccines should not be mandatory for children. There is absolutely no science or documentation to support that it would benefit children and in fact there is a lot of information that is cause for concern for a child to be vaccinated for COVID, with the current vaccine choices that we have. It is my opinion that we should be focusing our efforts on prevention and early treatment of these viruses. Treatments that are available OTC and can make a significant difference in the length and severity of illness. Vitamin C, Zinc, Vitamin D, Selenium, and Quercetin have all been shown to be effective and the Dept. of Health should be communicating that to the people of this state.

Thank you,

Dr Jim Telloian

We stand against these proposed WAC's:
WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

PROPOSED POLICIES:

- Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from (WAC in 246-100).
- Including the Covid-19 injections as part of school immunization requirements using (WAC 246-105).

WSBOH,

It is a parents decision whether my child needs a covid vaccine. The fact you are discussing making it mandatory for our children to have a covid vaccine is very disappointing. If you do make the covid vaccine mandatory, my spouse and I will be pulling our children from public schools. I ask you reconsider making covid vaccine mandatory.

Thanks,
Aaron Zehnder

Dear Washington State Department of Health staff,

Please do not require school children and preschoolers to be inoculated with a Covid "vaccine" in order to attend school in our state!

Why the Pfizer vaccine for Covid 19 Does More Harm Than Good

Source: www.CanadianCovidCareAlliance.org
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.canadiancovidcarealliance.org>>

The Pfizer trial only used:

- 1) Unexposed & inoculated, and
- 2) Unexposed & not inoculated.

They should have also included:

- 1) Exposed & inoculated, and
- 2) Exposed and not inoculated (aka natural immunity from having had Covid).

The fact that they avoided the latter 2 shows that they thought their Pfizer vax wouldn't perform well in those categories. A study should show how those exposed and not inoculated fare vs. inoculated & exposed. It didn't.

The clinical endpoints of the trial should have been: Do people who take the Pfizer vax have less illness and death? (It wasn't) Choosing the proper endpoint is well-known, as a result of testing of cancer drugs. In cancer drug testing, they had to switch to all-point mortality, and Pfizer should have done so.

They could easily have included biomarkers, but they didn't. We need to know how people exposed, but not inoculated compare with the exposed and inoculated. This is natural immunity, and we need to know how those with natural immunity fared.

They should have tested for: de-dimer levels (micro-clotting) before and after.

Other biomarkers Pfizer should have and easily could have tested for: inflammation, barrier permeability, hypoxia, cardiac damage, predisposition to Alzheimer's, predisposition to autoimmune disease.

They should have had biomarkers for thrombotic disease. This is a condition which

would take time to surface, but could have been measured before & after in biomarkers. Many doctors are reporting thrombotic conditions in vaccinated patients.

Vaccine passports: The Pfizer vaccine was not tested for spread reduction: No evidence at all that they reduce transmission and disease, and that was never one of the endpoints of the study. All they measured for was, "Do people who take the vaccine test positive for Covid-19 less often?" and the study was designed so that they would get few "no" answers, and they then proceeded to a vax rollout.

Testing failures: Subjective testing: The study did not test all patients for Covid-19! Instead, they only tested for the Covid-19 symptom, and then left it up to the discretion of their investigators to decide what that was. So that means that asymptomatic infection would be missed entirely. And it introduced a high level of subjectivity to the trial, because an investigator could actually decide whether to test or not to test. This lack of systematic testing actually makes the results of the trial unreliable. All participants should have been tested.

There is considerable missing data in the study. The endpoint is all Covid cases: 8 inoculated vs 162 placebo. But it's such a small # of participants to begin with. But there are 80 lost follow-up subjects in the inoculated group! They don't know whether they got sick or not, or even died. They don't know. That's 10x more than the # of Covid cases they had in the inoculated group. So if a significant proportion of those 80 had been positive, it would have dramatically changed the results. Also, all the suspected but unconfirmed cases: 1594 in the inoculated group, 1816 in the placebo. This means they were symptomatic, but the investigator never followed up with a Covid test! These are huge numbers compared to the confirmed cases! The fact that the suspected cases which weren't tested were significantly larger than the endgame results means that this data is unreliable. The study should not have been accepted.

What about the placebo group? There were also many unconfirmed cases. If all these cases, inoculated and placebo, were positive, the relative risk reduction would then only be 19%. That's not a high enough percentage to gain approval.

Adolescents: The inoculation is really all risk and no benefit.

Teens are statistically at 0% risk of death from Covid-19. But the vaccine does pose risk of serious events. But the study was not designed to find serious adverse events. A serious event that occurred at a rate of 1/800 might not even show up in a sample of 1,005 people.

In the tests, there was a serious event in at least one subject who was inoculated. A 12-year-old girl. She experienced multiple serious effects, including lost feeling from the waist down, lost bowel and bladder control, menstrual cycle issues, seizures, verbal and motor tics, dizziness, fainting, headaches, brain fog, erratic blood pressure, and more. And the last 10 months, she is wheel chair bound and fed by a feeding tube. Pfizer labelled her case "functional abdominal pain."

5-11 year olds: The inoculation is an unacceptable risk to this group. Pfizer, using predictive modelling, acknowledges that their inoculations WILL cause myocarditis, but optimistically claims there will be zero deaths from myocarditis in any of their modelled scenarios. It's speculative. Still, there's no justification for giving children myocarditis. But the government has actually normalized myocarditis in kids, publishing Sick Kids brochures of how to deal with myocarditis in kids. But how to deal with it is to not cause myocarditis in kids! It's very serious. It causes permanent damage. Severe myocarditis weakens your heart so that the rest of your body doesn't get enough blood. Blood clots can form in your heart, leading to a stroke or heart attack. And the mortality rate is up to 20% at 6.5 years. The risk of 4 in 20 children who contract myocarditis dying within 6.5 years is unequivocally an unacceptable risk for children. But the FDA maintains that it is

an acceptable risk for children. They have actually abandoned the “do no harm” principle.

Dr Eric Rubin of the New England Journal of Medicine (NEJM) has said that the way to find if they do harm is by doing a roll-out on the population. He voted to roll out inoculations for ages 5-11, and suggested that a population level roll out as an appropriate way to test for adverse events. Of note, the NEJM is also the publisher of the Pfizer reports.

Governments are proclaiming the inoculations to be safe, yet the data is not there to back that up. Pfizer admits that their long term immune response, efficacy & safety data is limited and that their studies weren’t powered to find “rare” side effect, as only about 1500 kids were in the testing group which received the inoculation. The law of informed consent says that parents should be told about these risks, but it’s not happening.

On Nov 2, the British Medical Journal released an article about their investigation into Ventavia, one of the research companies Pfizer hired to conduct the trials. A whistleblower who was a Regional Director reported to the FDA that Ventavia: falsified data, unblinded participants, did not follow up and test participants who reported symptoms, and mislabeled some specimens. Several other employees backed up the Whistleblower’s account. But Pfizer never disclosed the problems in its EUA application, and in fact, Pfizer has now hired the same researcher, Ventavia, to run more Covid-19 clinical trials.

So it’s not surprising that we are seeing the issues we are in the 6-month report.

Manipulation of Data Cohorts: Pfizer took the results from their adult trial, which started July 27, 2020, and then added in the results from the 12-15 year olds’ trial, despite the fact that the adolescent trial started four months later. Since it’s well known that the efficacy wanes over time, this gives a false boost to the efficacy numbers. The efficacy of the two groups should have been reported separately, not presented as one combined result.

Pfizer trials did not prove safety. They proved harm. The endpoints of the trial should have been illness and death, not a positive or negative Covid-19 test. But their test actually showed harm. They used younger, healthier groups than the vaccine would eventually be rolled out to. Here are some results of Pfizer’s own randomized control trial: Related adverse event, +300% over placebo group; severe adverse event, +75% over placebo group; any serious adverse event, +10% over placebo group. Deaths in the vaccinated group: 20; placebo group, 14.

How is this harm playing out in the real world? Governments are assuring us that they are monitoring safety and will let the public know if there are problems. But once the vaccine was rolled out at the population level, the surveillance method for reporting is called “passive.” It’s difficult and time-consuming for overworked doctors and health workers to file the harm reports, and then it goes thru several levels of bureaucratic approval before the case is accepted as a vaccine-related injury.

“Active” surveillance was used for trial participants. They were given a phone app with choices of adverse events they experienced. 78% reported adverse reports, and 5% were serious. There was also journal entry options for the participants, and 30% reported adverse events thru that, and 2% were serious. But when the reporting method was switched to passive for the general population rollout the reporting fell way down.

But some news is getting out: For example, the risk of myocarditis is becoming known. And it’s occurring in younger, healthy population where there was previously a very low rate of myocarditis.

On Nov. 17, the FDA released the first batch of data to satisfy a Freedom of Information request. This is data used by the FDA to approve Pfizer's covid-19 vaccine. One report in which Pfizer tracked adverse events in the first 2.5 months after the EUA, reported 1,200 deaths and over 25,000 nervous system adverse events. Under "Safety Concerns" Pfizer listed Anaphylaxis and Vaccine-Associated Enhanced Disease. This document should be incriminating for any agency who saw it and called the vaccine "safe."

Pfizer's criminal past includes lying about a heart valve which fractured and killed hundreds; conducting clinical trials on African children without their parents' consent, after which some of the children died; bribing doctors; suppressing research; manipulating studies; withholding information that its products caused cancer; fraudulent marketing, and many more. They've literally paid billions in fines and settlements for their actions. So they are not a highly ethical corporation.

The CDC has redefined "vaccine" to suit political & pharmaceutical interests. The new definition of vaccine by the CDC is "A preparation that is used to stimulate the body's immune response against diseases." The new definition does not indicate there is any actual benefit derived from a vaccine.

Subject: Proposed Policies - Jan 12th Agenda

External Email

Members of the Board of Health,

I am expressing grave concern, along with countless others across the state, regarding the proposed use of force to quarantine individuals and groups due to Covid 19. This is absolutely insane! Especially given the dominance of Omicron, it's mild symptoms and lack of hospitalizations and deaths attributed to it. I must insist that each and every one of you reject this proposal as well as the one to require Covid 19 immunization in schools. While other developed countries around the world are questioning the vaccines cost/benefit in youth it's immoral and irresponsible for us to make this a requirement to access resources already funded by our own money.

Do not adopt these proposals. Thank you.

Thank you for your public service. I know everyone is figuring this emergency situation out as it develops.

I wanted to comment that requiring mandatory vaccinations for children has a few possible consequences. I urge you to consider what would happen if it is found that in 5-20 years, longitudinal studies on this new technology vaccine show some possible negative health effect like an increase in cardiac events or a rare cancer. This would be legally damning and financially severe, not to mention morally upsetting.

By not making vaccines mandatory, we give parents and guardians back legal responsibility to make healthcare decisions. This protects the schools and state from the consequences of a vaccine with no long term effects yet known. Probably most families will opt to vaccinate their children. And, even if some do not, the likelihood of severity of illness to children is statistically incredibly low. Maybe omicron is the best variant to get for long term safety anyway? It's possible getting the mild variant would even offer better immunity as an adult. People who lived through the Spanish flu had exposures to it that later protected them as adults from SARS. We don't know enough about the long term trajectory of immunity to covid yet bc we don't have the longitudinal studies. Be prudent. Requiring a vaccine for children is not nothing. Older Americans can protect themselves with boosters and social distance too. Our children should not be guinea pigs when we have no long term studies, and requiring a vaccine makes the requiring party responsible. That's a huge responsibility with long term financial and moral implications.

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets vaccine, one group gets placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccine adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA

technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Finally, as this is an experimental drug that you will be forcing on our children, I will close with the 10 points to the Nuremberg code. I strongly urge you to read over these as YOU will be the ones held responsible for these crimes if you push these mandates through.

The ten points of the code were given in the section of the judges' verdict entitled "Permissible Medical Experiments":[6]

1. The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the experimental subject there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person which may possibly come from his participation in the experiment. The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs, or engages in the experiment. It is a personal duty and responsibility which may not be delegated to another with impunity.[13]

2. The experiment should be such as to yield fruitful results for the good of society, unprocurable by other methods or means of study, and not random and unnecessary in nature.

3. The experiment should be so designed and based on the results of animal experimentation and a knowledge of the natural history of the disease or other problem under study that the anticipated results will justify the performance of the experiment.

4. The experiment should be so conducted as to avoid all unnecessary physical and mental suffering and injury.

5. No experiment should be conducted where there is an a priori reason to believe that death or disabling injury will occur; except, perhaps, in those experiments where the experimental physicians also serve as subjects.

6. The degree of risk to be taken should never exceed that determined by the humanitarian importance of the problem to be solved by the experiment.

7. Proper preparations should be made and adequate facilities provided to protect the experimental subject against even remote possibilities of injury, disability, or death.

8. The experiment should be conducted only by scientifically qualified persons. The highest degree of skill and care should be required through all stages of the experiment of those who conduct or engage in the experiment.

9. During the course of the experiment the human subject should be at liberty to bring the experiment to an end if he has reached the physical or mental state where continuation of the experiment seems to him to be impossible.

10. During the course of the experiment the scientist in charge must be prepared to terminate the experiment at any stage, if he has probable cause to believe, in the exercise of the good faith, superior skill and careful judgment required of him that a continuation of the experiment is likely to result in injury, disability, or death to the experimental subject.

The covid vaccine should NOT be required for school age children. Children are still at low risk of getting covid and the vaccine is still only EMERGENCY USE AUTHORIZED. While I understand that this virus needs to be taken seriously, using our children as guinea pigs for this vaccine is ridiculous!!

I do not believe that a vaccine mandate for Covid 19 should be made for students in the state of Washington. The vaccine studies and data collection was rushed and we still do not know if there will be any long term effects. The law states that every child will receive a free and appropriate education-FAPE By demanding a vaccine that does not prevent the disease and never will, is unconstitutional. When schools were challenged about the rights of students to attend school with HIV, it found they had the right to go whether the disease was active or not. The teacher and classmates were not even allowed to know the infected student was in their class and took the chance every day of it spreading. The COVID 19 virus is also present every day, but children do not get as sick from it .002% have had death in the whole country. Our school system does not need to be the police, it needs to educate the students and today we are doing a poor job. We need to quit following the WEA demands and follow the real science.

Subject: Proposed policies Jan 12th

External Email

Dear esteemed WA state Board of Health members,

As a concerned mother, grandmother and citizen of WA my entire life, I am deeply concerned with where these mandates are taking us. I request that you vote no to all the proposed policies on January 12th. It is already a violation of our rights to coerce the public to take an under tested vaccine by making it mandatory in order to work or to go to restaurants and other entertainment venues. (Now New York is simply requiring that everyone of their citizens get this vaccine. Are we next?) This is just wrong. There are far too many concerns surrounding this immunization to make it mandatory for anyone, let alone children who, by and large, don't even get sick with covid - nor do they, by and large, spread it.

I have never been anti Vax. All my children and I have been vaxxed all through school. These Vaccines made sense. I actually have a sister who was born deaf due to rubella measles during the 60's. So I understand how vaccines work and their value.

But covid is different. There's been something wrong from the git go with how these immunizations got pushed through. And my research tells me that I'm right. The bottom line is parents should have the right to choose whether or not their kids get vaxxed. It should not be a requirement to take a vaccine that has not been properly tested in order to attend school. I've watched the videos of young athletes dropping dead during soccer, football and basketball games from Myocarditis and pericarditis after having the covid immunization. Do you want that on your conscience? Please don't let them turn our kids into test Guinea pigs!

Additionally, please vote no to forcing medical care, detaining, or forcing this vaccine onto anyone. This kind of violation of human rights is unthinkable for our country. Do not be part to this totalitarianism! We have grown into being a country that prides ourselves on our constitutional rights, valuing freedom, free speech and correcting our past wrongs. Quarantining people and coercing them to take this poorly tested vaccine is a slippery slope to totalitarianism! Furthermore, because we have been a leader of human rights and democracy, people all over the world are watching us because they know if we fall in this way, there is no longer a standard and they will have no hope. Many citizens of other countries are being detained without substantial reason, it seems to be a power grab. Do you really want that here?

Please vote no to these oppressions and uphold our individual liberties.

Sincerely,
Mary Smith

Hello,

I would like to comment on the upcoming discussion on Covid vaccine mandates for school children. With how little research there has been done of the long term affects of this vaccine, it is not right for parents to feel forced to inject their child with something that they don't fully trust. I understand that many are happy to get the vaccine for their child. That is their choice and it should remain a choice. Parents know their children best. They know how their bodies react to inflammatory vaccines and if a parent is hesitant to give it to their child then it is for good reason. Another factor is that children are way less likely to have serious complications from Covid. So why require a vaccine for them if the chance of them being seriously sick is so low? There seems to be more risk with the vaccine side affects than with the actual virus.

Let parents decide. That is what it comes down to it. This should not even be a discussion. With such a low mortality rate (across the board, not only for children) a mandated vaccine is not the right move. Do not take medical freedoms away.

Thank you,
Lacey

Absolutely not!

I totally disagree with this possible law change.

We, as USA citizens do not need the government making health choices, especially those that have underlined conditions that government has no business knowing about.

Halt this action now!

Kindly,

Lora Upton

To Whom it may concern,

I am vehemently opposed to your proposal to add the experimental COVID 19 vaccines to the State required vaccines list for school children and daycare children. These vaccines are dangerous and this would be a vast overreach for the State to undertake. You have already caused a mass exodus from the public schools. I plead with you to not approve this proposal. I and many other parents in Washington State will remove our children from public schools if this mandate is passed!

My comment regarding -
The Washington State Board of Health (WSBOH) will have it's January meeting on Wednesday, January 12th. On the agenda: Immunization Criteria for Child Care and School Entry.

I do not want covid vaccines requirement for school children. It is still EUA only - and is inappropriate for it to be mandated for that legal reason.

My grandchildren have had the disease as well as all those in my household. I find the research and statements of eminent physicians and researchers to be wise in waiting for accurate studies to be done before masses of children are vaccinated for a disease that they recover from quickly.

Thank you for your consideration

To whom it may concern,

Today I was informed by a fellow mother and friend that the Washington State Board of Health was meeting to discuss policies dealing with the current covid situation. These policies seem to basically amount to the government forcing people to give up their right to bodily autonomy.

Therefore, I have to express my deep concerns for the agenda and state that I DO NOT agree with the proposed policies. They infringe on the rights of a person and the rights of a parent to make the best decisions for THEIR children. Again, I'd like to state I am in full disagreement with the proposed policies. I can not support the agenda regarding COVID vaccinations requirements in school when there is no long term study on the effects of the vaccine especially on young children.

I feel the way I do for many reasons but the strongest reason, as a person and as a mother, is that the numbers and the studies do not support the decision of these policies. I implore you to think about what these policies would really look like if passed because, I for one, do not see a bright future for the state of Washington if the board of health passes this agenda during the meeting.

Respectfully,

K. Harmon

No person should ever be coerced to engage in an unwanted medical procedure. And while it is bad enough the government violated this basic liberty right by mandating the Covid-19 vaccine, they have also been negligent with providing honest and accurate data.

That form of governance is destructive to liberty and antithetical to the openness required in a democratic society. Therefore, I stand completely against any of the proposed Covid Policies that are over reaching and immoral. Standing against the following proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

To Whom it may concern,

In my opinion it is completely inappropriate to ask parents to have their children vaccinated with a vaccine that is under EUA. It has already been determined that the vaccine does not stop the spread of Covid. It is confirmed that those who are double vaccinated and boosted are getting and spreading the virus. It has also been determined that children fare well if infected. This idea that force vaccinating children will help this pandemic in any way is preposterous. Proper studies have not been conducted and the vaccine that is being given is not the vaccine that was studied in trials.

Thank You,
Concerned parent

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets vaccine, one group gets placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccine adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA

technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Finally, as this is an experimental drug that you will be forcing on our children, I will close with the 10 points to the Nuremberg code. I strongly urge you to read over these as YOU will be the ones held responsible for these crimes if you push these mandates through.

The ten points of the code were given in the section of the judges' verdict entitled "Permissible Medical Experiments":[6]

1. The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the experimental subject there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person which may possibly come from his participation in the experiment. The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs, or engages in the experiment. It is a personal duty and responsibility which may not be delegated to another with impunity.[13]

2. The experiment should be such as to yield fruitful results for the good of society, unprocurable by other methods or means of study, and not random and unnecessary in nature.

3. The experiment should be so designed and based on the results of animal experimentation and a knowledge of the natural history of the disease or other problem under study that the anticipated results will justify the performance of the experiment.

4. The experiment should be so conducted as to avoid all unnecessary physical and mental suffering and injury.

5. No experiment should be conducted where there is an a priori reason to believe that death or disabling injury will occur; except, perhaps, in those experiments where the experimental physicians also serve as subjects.

6. The degree of risk to be taken should never exceed that determined by the humanitarian importance of the problem to be solved by the experiment.

7. Proper preparations should be made and adequate facilities provided to protect the experimental subject against even remote possibilities of injury, disability, or death.

8. The experiment should be conducted only by scientifically qualified persons. The highest degree of skill and care should be required through all stages of the experiment of those who conduct or engage in the experiment.

9. During the course of the experiment the human subject should be at liberty to bring the experiment to an end if he has reached the physical or mental state where continuation of the experiment seems to him to be impossible.

10. During the course of the experiment the scientist in charge must be prepared to terminate the experiment at any stage, if he has probable cause to believe, in the exercise of the good faith, superior skill and careful judgment required of him that a continuation of the experiment is likely to result in injury, disability, or death to the experimental subject.

Vaccine mandates are ridiculous, if this happens I will pull all my children out of Washington state schools! The risk of COVID being spread through children is so low. The flu shot isn't mandated for school, so the COVID shot shouldn't be either! My whole family has had covid, and quite frankly I've had worse colds. I can't stress this enough- I will pull all of my children out of Washington state schools if this vaccine mandate happens! No kids in school = no funding!

This comment is in regards to the Immunization Criteria for Child Care and School Entry to be address on Jan 12th, 2022.

As elementary school teachers, and more importantly as parents to two young children, the idea of giving up our parental rights and rights as a citizen of this country to send our children to public school because they haven't been vaccinated with an experimental vaccine that we adults are not comfortable with receiving, is absurd. We have a God-given right to use common sense and make health decisions for our own family without risk of loosing the opportunity to send our children to child care or school. Let parents make decisions for their own children without risk of forsaking the right to free education. The risk of contracting Covid-19 DOES NOT out weigh the risk of loosing our freedoms and liberties.

Please vote NO on these proposed policies:

Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

IF passed they are a violation of medical privacy and freedom.

Thank you,
Karen Meyer

I realize there are many different opinions on this subject. It's hard to know which ones to believe. I've heard many from both sides. Our children should not be used as lab rats, as to date we do not know the long term effect of the vaccine for covid.

Most children who become infected with the COVID-19 virus have only a mild illness.

There are emerging reports of myocarditis and pericarditis. Myocarditis and pericarditis have recently been recognized as very rare adverse events following vaccination with the COVID-19 vaccines developed by Pfizer-BioNTech and Moderna.

A signal of these events following mRNA-based vaccination was first identified in Israel in May 2021, where 148 cases of myocarditis were reported within 30 days of immunization, usually following a second dose.

This prompted the Israeli Ministry of Health to issue an investigation into any possible link between these cases of myocarditis and vaccination.

The results pointed to a possible link between the second vaccine dose and the onset of myocarditis among young men aged 16 to 30, with a stronger link identified among those aged 16 to 19.

Following the initial signal in Israel, further cases of myocarditis and pericarditis following mRNA-based vaccination were reported in numerous other countries.

The product information for both the Pfizer-BioNTech and Moderna vaccines was then updated to include myocarditis and pericarditis as an adverse event of unknown frequency in the UK, Europe, and the US.

the CDC's, U.K.'s, and WHO's earlier guidance was much more consistent with the best medical research on masks' effectiveness in preventing the spread of viruses. That research suggests that Americans' many months of mask-wearing has likely provided little to no health benefit and might even have been counterproductive in preventing the spread of the novel coronavirus.

The CDC asserts this even though its own statistics show that Covid-19 is not much of a threat to schoolchildren. Its numbers show that more people under the age of 18 died of influenza during the 2018–19 flu season

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fflu%2Fabout%2F2019.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C2d5b9109870149345fce08d9d0b3e555%7C11>>—a season of “moderate severity” that lasted eight months—than have died of Covid-19
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fncchs%2Fnvss%2F2019>> across more than 18 months. What's more, the CDC says
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fncchs%2Fnvss%2F2019>>

that out of every 1,738 Covid-19-related deaths in the U.S. in 2020 and 2021, just one has involved someone under 18 years of age; and out of every 150 deaths of someone under 18 years of age, just one has been Covid-related. schoolchildren, learn in part from communication conveyed through facial expressions,

: A study from the Francis Crick Institute in London found that Pfizer's COVID-19 vaccine destroys a type of white blood cell called the T cell and weakens the immune system.

There are numerous countries banning certain vaccine and several who ban it from children and teenagers.

According to my dr. it is the vaccinated that lead to the other variants, just like when you take too many antibiotics, the virus mutates and makes other forms. Which we are now seeing.

I know this is a hard decision to make. I hope you wait until more studies are done. Most vaccines take many years of study before being approved.

Our freedoms are being taken away from us. No law has ever required us to take other vaccine. Thank you

Dear WSBOH,

This email is in regards to the current policies being discussed tomorrow (1/7). I am so disappointed to see proposed policies:

WAC 246-100-070
WAC 246-100-045
WAC 246-100-040

You are ruining our state and our lifestyle by proposing people should lose medical freedom. I believe we should have the right to choose whether the Covid vaccine is appropriate for our bodies or not. The choice is important, and what has been enforced on us thus far, has obviously done nothing for anyone's health. The vaccine has proven its ineffectiveness by now, so forcing this would be the absolute wrong decision and removal of the freedom we have a right to.

Thank you,

Hillary Belton

To who it may concern,

I respectfully request that you do not vote to mandate COVID vaccinations for all school-age children in the state of Washington. The vaccine is still experimental and children without pre-existing conditions are still at very low risk from COVID. In forcing vaccinations on our children, you are taking away our parental right to make health decisions without forcing our children to lose their right to an education in the state of Washington. Homeschooling is not a feasible alternative for most families, so you are likely asking families to choose between their right to a public education for their children or no education at all. As a mother who has been cautious about vaccinations since my oldest child was over-vaccinated 10 years ago I ask you to remember that the flu vaccination is not a mandated vaccine in this state and since the COVID vaccination is also for a virus I ask that you consider the parallels.

Thank you for taking the time to read my comments.

Hello,

I do not support mandates for children to have the COVID-19 vaccine for school entry. This is a vaccine that does not decrease the risk of Covid, does not decrease the risk of transmitting Covid and there are numerous studies demonstrating it does not have a large beneficial effect on child. The absolute risk benefit for COVID-19 vaccines is less than 1% (if you look at relative risk which is not beneficial you will find a greater percentage but that statistic is extremely misleading). There's no need to be mandating these vaccines on kids, it needs to be a parent choice. Furthermore, these vaccines are NOT FDA approved. They have an EUA granted by the FDA. That makes it unethical to require an experimental vaccine without the consent of the individual or their parents/guardians. There are no long-term safety studies on these vaccines for children and Pfizer admits that there needs to be more long-term studies regarding the risk of myocarditis and children. Again, these COVID-19 vaccines for children need to be a parental choice and they certainly should never be mandated while it is an experimental drug without FULL FDA approval. Anybody considering making this experimental vaccine mandated to receive an education should really look up the Nuremberg code. It will save the state from a lot of litigation in the future.

Best,

Jessica Kirchner

Absolutely do not agree with any vaccine mandate. Public schools are paid for by taxes. Parents should be able to choose if they want their children vaccinated or not. They are the ones funding these schools. The state is not in charge of our children. If a woman is able to say my body my choice to abort a child, then a woman should be able to choose and decide medical choices for their children.

The vaccine does NOT stop the spread of covid. This is absolute common sense at this point. If I choose to "risk" my own health or my children by not getting this then I should be able too.

After all, people are allowed to risk their health by smoking cancerous cigarettes, eating unhealthy fast food, cancer causing shampoos, sugary drinks causing obesity. All of these and more are much more dangerous than catching covid. This is absolutely ridiculous and not supported by the majority of parents in this state.

Please vote NO on these proposed
policies:

Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

IF passed they are a violation of medical privacy and freedom.

Thank you,

Karen Meyer

I am completely against ANY of the proposed policies that are clearly government overreach and UNconstitutional. Freedom matters and we have the constitution on our side. We will come for every single one of your seats as you continue to move towards tyranny of the people. It wont stand. WAC 246-100-070, WAC246-100-045, WAC 246-100-040, WAC 246-100 and WAC 246-105 must be dropped and NO longer considered. Stand for freedom not fear. Do better.

Most concerned citizen,
Jessica Okon

I urge you to not force covid vaccines on children in Washington State.

There hasn't been enough research as to how this mRNA technology impacts the future for reproduction and other long term impact.

Children are not as susceptible nor do they have the severity of symptoms from Covid-19.

Let's use discernment and take the future work force of Washington and the world into consideration and not add anymore crippling health wise or devastation to what we are still trying to figure out.

The first tenant in health care is do no harm.

Can the BOH attest on their life that mandating vaccines is doing no harm?

Who is going to hold account for all the children that were otherwise healthy that afterward had been impacted in anyway negatively?

Thank you kindly for considering all options and all people in this 'free country'.

Mindy

Hello. My children go to Northwest Christian School in Puyallup, WA. I am very uncomfortable with this potential mandate of requiring school aged children to get one of the Covid-19 vaccinations to go to school. Requiring a vaccine that doesn't stop an individual from getting this virus seems like it should be upon the individual's decision. If someone wants to protect themselves then that should be their choice. It won't stop or decrease the spread of Covid-19 so it shouldn't have an effect in whether it would benefit the school itself, or the classes/students.

Thank you for the opportunity to let me give my input.

PROPOSED POLICIES: Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040).

If you pass this bill you will be in violation of the Nuremberg code and you can be indicted and arrested for your participation. Common Law Juries are being formed around the state, which have the power to do that. A law of this nature violates the Constitution and several health laws, including the Patient Bill of Rights and HIPPA laws. The Supreme Court already ruled that NO emergency can eliminate any rights guaranteed by the Constitution. If you proceed to pass this bill after being warned, you will be considered to be intentionally committing treason. If you are unfamiliar with Common Law Juries and their power, you better look it up. This is a consequence, not an empty threat.

See the laws that David Martin shares in his quick video below. They are the US Federal Statutes that incorporate Nuremberg. David has done all the work and shared it on his website. See link:

https://www.instagram.com/p/CYVSfl2KkSF/?fbclid=IwAR1Ivec598G-DDf93zt2kyHcglJXj2aj8zR314TaGev6uEinsK76M_XV8OM.

I would also like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be

no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you,

Lynnette

Subject: Proposed law enforcement, quarantine facility

External Email

Dear State Board of Health

I am writing to you about the proposed ruling on the use of quarantine facility and use of force to place people there. This is a definite defilement of our civil rights as an American Citizen. This is comparable to the Japanese Camps in the states during the World War or the German Concentration Camps. Because these individuals were thought to be a hazard to society or of inferior quality by a few ruling government individuals they had there life upended or killed. Is this really were the state of Washington is going? A totalitarian governor and governing boards will not make this a better state. Yes Covid is real and people have died, but hundreds also die from the flu on an annual basis. People are dying from suicide due to the isolation, alcohol consumption is up, people are dying from multiple events. Every day at the hospital they call Codes, stroke, heart attack, rapid response in an alarming number from non Covid patients. The insurance industry just released data that non- Covid life insurance claims are up 40% in this last quarter. Maybe we should be looking at a broader picture of why people are suddenly dying at a young ages from clots, cancer and the increase in auto immune disorders. Further isolation camps as seen in Australia are not the answer.

Thank you Mary Nelson

I have two children who WILL NOT be enrolled in Washington schools or any other state if this vaccine is mandated. It is a disgusting over reach that has no regard to the longevity of my childrens health. You are flying scared flopping about making decisions based out of fear and misinformation. You have NO long term evidence of the avalanche this could cause to our childrens bodies. Bodies that would be on your hands, forcing parents that may have no other choice but to send their kids to school so they can work and put over priced food on the table. we as parents and free Americans will NOT comply with this INSANITY. It is INSANITY! The cause of Washingtons crumble is staring you in the face, these children are our future and this mandate is a failure.

I strongly oppose these proposed policies up for current discussion.

As an American Citizen we have the right to choose if we vaccinate and have the right to choose if our children vaccinate. I work around people daily that are fully vaccinated and those that are not. There is no discrimination with Covid on whether a person is vaccinated or not. As many of my friends that are vaccinated have contracted Covid as those that are not.

If Covid was as serious as people say it is, why is there the fear that those unvaccinated are hurting the vaccinated. If I choose to not vaccinate and Covid takes my life then that is my choice. Allow Covid to weed out those "that in your eye" do not comply with what you feel should happen. You are safe....correct? These proposed policies are not for the health and welfare of the people. They are nothing more than control. As a proud American Citizen I ask that you oppose these proposed policies.

STRONGLY OPPOSE!

Proposed Policies

WAC 246-100-070

WAC 246-100-045

WAC 246-100-040

Allowing local health officers to use law enforcement force for an emergency order to involuntarily detain a person or a group of persons (families) to be isolated in a quarantine facility following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination. These specifics come from WAC-246-100.

Subject: Proposed policy for Jan 12

External Email

I am writing you today to share my utter shock at this proposal. Not only do you want to put Covid 19 vaccines into the line up for children, who are at almost no risk from Covid but are at risk of myocarditis from the shot, but you want to allow health officers to detain people for refusing medical examination, testing, treatment, counseling, and vaccination? Not only is this appalling but it is illegal and needs to stop.

Many of us have already recovered from Covid and have natural immunity which is being completely ignored. In addition, Covid is not fatal for 97% of the population and even less so if you are healthy and have no co-morbidities.

Add to that the over 21000 deaths reported to VAERS and the 40% increase in unexplained deaths since these vaccines rolled out, and it is abhorrent that you would try to force them on people. In addition, a new study just came out showing that the vaccines have little effect against Omicron and a negative effect after three months. It is also clear that those vaccinated can still get and spread covid. I personally know of five fully vaccinated people who just got Covid in December. As these "vaccines" are not stopping the spread of the disease and are showing little efficacy for those who take them, it is ridiculous that you would require them and force people to take them. This needs to stop.

Here's the study I referenced in case you missed it.

I am submitting comment for the upcoming January 12 meeting discussing mandated covid-19 shots for children to be able to attend school or daycare.

I am horrified at the idea of mandating these shots. Children are at extremely low risk from this illness. And these shots are still only emergency use authorized! It should be up to parents to decide if they would like their children to take what is still essentially an experimental drug.

These should NOT be mandated!

Kristine Grigas

Subject: Proposed WAC

External Email

Dear Washington State Board of Health and to whom it may concern,

I am writing to you regarding my concern for the upcoming proposed policies that are intended to update our current policies that are written as law.

1. WAC 246-100-070: To allow local health officers to use law enforcement.
2. WAC: 246-100-045 : To force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility.
3. WAC: 246-100-040: Following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination.
4. WAC: 246-105: Include the Covid-19 injections as part of school immunization requirements.

These additions would be a tyrannical over reach of jurisdiction. Our government is supposed to make our lives better, not take away our freedoms that have been earned through so much sacrifice. Their role is to provide national defence, secure our borders, make sure we have life, liberty and justice. Our constitutional rights are trying to be stripped away and as an American I am standing up to say NO MORE alongside thousands of other Americans! We have the right to make our own decisions regarding our bodies.

There is no freedom in the statement "voluntarily comply". Also, refusing to "voluntarily comply" is bullying the American people to take actions against their own will. It is a forceful statement and is threatening. We Are The People. I am standing up for what is good, true, and for our basic human rights.

The Covid-19 injection is NOT a vaccine. It is an experimental biological factor that has been a complete and utter failure. Healthy people are having adverse reactions and health complications, even death after receiving the shot. Those with the injection are contracting AND spreading Covid-19. It is an experiment that has failed. The risk of children dying from the virus is so minute that the risk of adverse reactions from the shot dramatically outweigh the potential danger. Only time will tell how severe the health complications will be from the Covid-19 injection. Forcing Washington State residents to be vaccinated would be unconstitutional and therefore cannot become law.

I believe in the good of people and I believe that good always wins. Please don't prolong this chaos any longer. We have had this vaccine out for a little over a year and nothing is changing. Things are becoming worse. Please don't be a part of the evil doers. Stand up and fight for what is right. I hope this will reach into your human heart and I pray that you will support and do what is constitutionally, ethically and morally right.

Sincerely,

Lisa Wyant

I do NOT want Covid vaccine be mandated for children to attend school in Washington state. These vaccines are not long term effect tested for children. Children are not at risk of dying from Covid. The vaccine has more detrimental effect on kids then Covid. My children have had Covid and it was only a 3-4 day mild cold for them.

If this becomes a requirement I will be pulling my children out of school in Washington state. We need to have the right to choose our medical options. I am not an anti vaccine person. My husband and I both are vaccinated. It is just too untested to submit my children to.

Thank you,

Michelle Naef ☐☐

Please do not require children to be vaccinated for Covid. I have 4 children ages 13, 15, 17 and 19. All of them had Covid in August. They are all fine. Vaccines are created to help mimic natural antibodies. Why do children need a vaccine to do what nature has already done for them. This choice should be left to the parents. I'm a certified WA state public teacher and this is an over reach on parental rights and bodily autonomy. These mandates must not continue. We are a free people and the constitution is the supreme law of the land which declares our personal rights.

Hello,

This comment is in regards to COVID vaccine being mandated as a requirement to attend public school. While I agree Covid is a serious disease and has had a huge impact on our community, I feel that much more research must happen before we are in a place to make the vaccine mandatory. I have two children ages 4 and 7. Thank you for hearing my input.

PROPOSED POLICIES: ☐☐☐☐

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

I do not agree with this policy and the reason for that is that it goes against our sovereignty .and free will choice of what we put in our body. To use law enforcement against humanity goes against the use of our public officers who are sworn in to protect people from crime not to corral people because they choose to decide what goes in their bodies and not be forced by an outside force. This is the land of the FREE not Nazi Germany. I also do not agree with this in our school system. I would just pull my child out of the school system for I am their voice as they are too young to make a choice for themselves. I do not consent to your proposed Policy.

As a parent, I demand that you HALT Immunization Criteria for the Children of Washington State!

We the constituents and community members of this great State of Washington, DEMAND the Washington State Board of Health (WSBOH) REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

Lastly, but most importantly, WE the PARENTS are in charge of our children! No one else!

Sincerely,
A Mama Bear!

Hello Lindsay,

I am writing as a concerned parent of two boys in the Bellevue School District. Before you vote on whether or not to make this vaccine a requirement for school, I am asking you to listen to this 1- hour compilation of critical questions brought up by the FDA Advisory Board when deciding to approve Pfizer's COVID vaccine for 5-11 year old's. In case you are unable to listen, I have provided key points from the meeting below. Please note myself and thousands of other parents will be unenrolling our children if this is required to attend school. Before you vote - please make sure you are informed on the benefits and risks to our children.

Key Points from the FDA Advisory Board Meeting - Oct 26th:

***Link to 1-hour highlights video here.

Advisors do not recommend healthy children get this vaccine

Advisors do not recommend this vaccine be required to attend school

Doctors do not expect the vaccine to prevent infection

They have no data or expectations it will prevent transmission

Based on current data and modeling, the risks of the vaccine to children outweigh the benefits

Children's vaccine is based on the alpha variant and has little to no protection against Delta or Omnicron

Children's vaccine includes Tris (hydroxymethyl)aminomethane), a stabilizing agent, however the vaccines given during the clinical trials did not include this new ingredient so no one knows the potential risks to our children.

Advisors very concerned about increase in myocarditis and pericarditis especially in young boys

Approval was given based on the vaccine being available to immune compromised children only.

Thank you for your time,

Kathy Wall

I want to express how extremely opposed I am to the following proposed laws..

PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

This is most definitely overreach of power by the government and takes away a human right to choose what's best for their body and their children. I'm not against vaccines but I am for the right to choose!
Please vote NO on these!

Thank you

Lindsay Herendeen:

I am sending this message to voice my concern about the mandates for the vaccinations that you will be discussing on Monday in your meeting. I and many others are against making it mandatory to have these shots to protect the public for several reasons.

1.

While it appears that the shots lower the severity of the attack by the virus, they are

ineffective at stopping the spread.

2. There are adverse results to receiving the shots of which only the immediate affects have had time to manifest themselves.
3. The trial periods were way too short due to the EUA and longer-term consequences have not had time to occur.
4. The hysteria and fear that has been prompted through various sources has created a major division and distrust of government and media and even some in the medical profession.
5. The survival rate for humans is such that 95+ percent of those who acquire the virus will be able to defeat it with or without the shot.
6. Early treatments that are available can reduce the danger of the virus. Unfortunately, these treatments are being suppressed by government and media in favor of pushing citizens to Perceive that the shots which can have short term serious consequences like heart attacks, myopericarditis, shingles, bells palsy and other permanent disabilities and in to many cases death. We do not know of the long term dangers as the normal trial period will not be reached for several more years.

Finally, "This shot is the FIRST TIME EVER that the use of mRNA gene transfer technology has been used against an infectious virus. This is the FIRST EVER vaccine to make no provable claims about reduction of infection, transmissibility or death. This is the FIRST EVER coronavirus vaccine ever tested on humans (and previous coronavirus vaccines all failed due to antibody-dependent enhancement, a condition in which the antibodies actually facilitate infection rather than defend against it). The first ever use of genetically modified polynucleotides in the general population."

I have personally had a close friend and another acquaintance die within weeks of receiving the second shot and one young woman who I have known since she was born who had the shot when pregnant and had a miscarriage. This is important to me and I believe that many others have had similar experiences.

I hope you will consider these thoughts and do your own research about this and in the mean time please do not agree to any mandates regarding this "Vaccine "PERIOD. And certainly not for school aged children who have no choice and little ability to understand the dfierance between this shot and other vaccines that they have received.

Thank you for your time and consideration.

Sincerely,

Jean R. Doty

Registered voter in Stanwood, WA.

Letter From A Concerned Person to WA BOH

On the 29th day of December 2021, a notification by way of the email was received that the Washington Board of Health Technical Advisory Group (BOH) is exploring adding COVID-19 vaccination to school admission requirements.

CLARIFICATION OF THE ISSUES

Any physical and/or tangible evidence that a medical pandemic as legally and medically defined has occurred anywhere around the world over the past two years (December 2019 to December 2021).

To allow the students of State of Washington to make an educated decision on this matter, it is hereby requested that the Washington Board of Health Technical Advisory

Group (BOH) provide copies of any and all official and supporting documents in the BOH possession of:

1. Any physical and/or tangible evidence of medical isolation of the purported COVID-19 virus pursuant to the CDC and/or W.H.O. vaccine isolation protocols.
2. Any physical and/or tangible evidence that a "Medical Emergency" exists by statutory definition in the state of Washington.
3. Any physical and/or tangible evidence that any COVID-19 vaccine prevents infection by the COVID-19 virus and that any COVID-19 vaccine prevents the COVID-19 virus from spreading.

Please provide the exact legal and lawfully promulgated OFFICIAL procedure enacted by the legislature within the limits set by the Washington State Constitution and Washington State Law (enacting clause, statutes, session laws, legislative certification and Common Law Rules) that authorizes the BOH to administer medical advice and treatment and/or have any say on a student's medical health care choices.

This correspondence is seeking "validation" that is competent evidence and strict proof that the Washington Board of Health Technical Advisory Group (BOH) has a legal liability and lawful authority in relation to any "medical drug use injections" and/or medical health care choices and are truly acting within the scope of their fiduciary relationship to the students of Washington State concerning this matter.

Sincerely,

Tina McCorkle - Pastor and Grandparent

To Whom It May Concern,

I OPPOSE Agenda Item #8, the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. You oppose COVID-19 shot mandates, period!

I SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Leave OUR children alone! No one decides what goes into our children's bodies but us Parents! PERIOD! END OF STORY!

Sincerely,
Terra Kiens

Subject: AGAINST mandated covid shots for school kids

External Email

Dear Lindsay,

I'm writing to express my extreme concern, and opposition, over the proposal to inject our school age children with the experimental covid shots, as a requirement for school admission. This is a decision that should be left to the parents. We know that the risk to children birth to 17 years is so small as to be inconsequential. The shots are harming people's immune systems. To invade children's developing immune system and inability to protect themselves create a vulnerability that opens them up to unfathomable damage. Since April 2021, increased cases of myocarditis and pericarditis have been reported in the United States after the covid shots, particularly in adolescents and young adults. WHY are we putting our kids' hearts at risk?

Health officials are telling parents that children should be vaccinated for the sake of herd immunity. What is largely ignored are the studies that show children are not driving the pandemic and, in fact, are less likely to transmit the virus than adults. We also see

clearly that "vaccination" status has nothing to do with stopping transmission of the virus. Covid outbreaks on "100% vaccinated" cruise ships are a stark example. Bottom line – children are not the risk factors for covid. Leave them alone! It's WAY too early to know potential long-term side effects. They do not need to be forced guinea pigs for these shots. If the parents want that for their kids – that should be THEIR decision. Let parents decide either for - or against – the shots. NOT the government! Please – do NOT make these covid shots required. It's simply not necessary.

Sincerely,

Vicki Gillette

I am adamantly against forced vaccines and forced quarantine for any person in the state of Washington!!!

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following reasons:

- * Follow the science, children's risk is so low that the risk of adverse effects from the shot is higher than a child's adverse effects from covid.

- * Mandates are not laws and every parent has the right to make medical decisions for their children.

- * These shots are for emergency use. They do NOT have medical trials that are proven over a period of time.

* Covid is spread by vaccinated and unvaccinated.

There are no valid grounds for mass shots for children!!!

Sincerely,

Kristine Farley

over. I'm by far the eldest at work but have been keeping my immune system strong. One of the "fully vaccinated" adults already had Covid last year but went for testing recently when she came down with sniffles and a mild sore throat. She received a positive Covid test result!

This situation (I'm excluded although not sick, while others who are also "exposed" can become infected and spread germs) can repeat itself endlessly, since adults and students can receive a positive Covid test result ad infinitum.

I have almost a 99% probability of surviving Covid, as do others. It has become like a flu or a cold: anyone can get it, and almost everyone will survive if they have a strong immune system.

If the board mandates that all residents receive mRNA "vaccines" or be "involuntarily detained for isolation," it must allow for exemptions, and it must allow time for people to flee the state. Many will move rather than comply.

Discriminating against people based on whether they've received a Covid mRNA "vaccine" is to be "vaxist," like being bigoted, sexist, racist, anti-Catholic, or anti-Semitic. Some people insist that the "unvaxxed" are subhuman and must be denied basic human rights. We've been down this road before. Don't make Washington continue to be a laughingstock.

Ann Makar, Vancouver

This, (and many more reasons) and firstly, the fact that you are not our children's parents, and secondly, children are not at high risk for Covid, makes this whole decision mute.

We encourage you to stand for freedom and support the parents in making the best informed decision for their children.

Let Freedom Ring,

E. Meyers

P.s.

Well-Structured German Study Shows No Deaths among Healthy German Kids Ages 5 to 11

Here is what we find for healthy kids with Covid-19:

- For healthy kids, the risk of going to the hospital is 51 per 100,000
- For healthy kids, the risk of going to the ICU is 8 per 100,000
- For healthy kids, the risk of death is 3 per 1,000,000
- There were no deaths reported in healthy kids older than 5
- Kids 5 to 11 have a lower risk than kids <5 and adolescents 12 to 17
- Kids 5 to 11 have a risk of going to the ICU of 2 in 100,000; 0 died
- Among kids who died of COVID19, 38% were already on palliative/ hospice care

The Germany study shows that risks to healthy kids are very low.

So why the school closures, mask mandates, and vaccinations for children who are not at risk□

To whom it may concern,

As a parent in WA state, I am adamantly opposed to a covid vaccine requirement for school aged kids and daycares. This vaccine has not had any long term (or relatively short term) safety studies done and is only approved for emergency use. The SCIENCE shows that though this virus is becoming more transmissible it is also becoming LESS severe symptom wise (especially in children). No parent wants their child to get sick, not even with the common cold (which is where covid is heading in mutation). However the reality is that if they don't catch it at school they will catch it at the grocery store, the library, from mom or dad who got it from work etc. DESPITE vaccination status!

It is absolute discrimination to refuse children access to public school because their parents don't feel comfortable giving them an experimental vaccine (and it's only considered a 'vaccine' because the definition of a vaccine has recently been amended).

The government has over-reached, this is a parenting issue, not a government issue.

Thank you for your time.

Good morning,

I am emailing to let you know that I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- Children are at extremely low risk for Covid
- The vaccines are still only EUA (emergency use authorized)
- There are no long-term studies to document any history of safety
- Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- The vaccine apparently does not stop the spread of the disease

To pass this mandate considering the above reasons is criminal and those kids that die or have major health complications due to the vaccine will be on you. To subject our kids to potential long term health issues for something that is not a major risk to them is beyond wrong. There is plenty of data and statistics proving that kids do not need to be vaccinated. You need to stand up and do what is right. Our kids need to be protected from this vaccine until further studies and longterm history can prove it is safe.

Please do your part in taking a stand against the mandate for our children.

Thank you,

Robynn Langley

think it is absolutely necessary for myself or my child. The children are not at risk of death or serious illness from this virus. The deaths in this 2 years of Covid is under 1,000 according to the CDC. Why are we doing this!?? It's not worth the risk to our children. I ask you to please not back parents into a corner. We love our children and deserve to have choices and the ability to advocate for them since they are unable to do so for

them selves.

Thank you for your time.

available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only “approved” COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This “smoke and mirrors” approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer’s claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are ‘Interchangeable’ • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there’s no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, “We are never going to learn about how safe this vaccine is until we start giving it” Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer’s studies: Ten red flags in the FDA’s risk-benefit analysis of Pfizer’s EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>)

Force vaccinating healthy children for a disease that doesn’t affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thanks,
John

Subject: Comments regarding Covid-19 Vaccination Requirements for School Children

External Email

Good Morning,

I am not "anti-Vax", both my wife and I have been fully vaccinated however I do not support a mandate for all school age kids to be required to be vaccinated for a number of reasons.

1. Covid Vaccination, especially given the vaccines are still under EUA, should be a decision between patient and doctor and not a requirement of the schools. I understand that other vaccines are required, however they are all FDA approved while Covid vaccines are not approved by FDA.
2. Covid in children is generally mild and therefore the risk of Covid related infection does not necessitate requiring children to be vaccinated and exposing them to the risks of the vaccine. My kids have all had Covid and all of them responded well and thankfully had a very minor case.

3. At minimum natural immunity should be allowed as an alternative to vaccination when considering vaccination status and Covid risk in children. That's only common sense. There are a huge number of studies that demonstrate natural immunity is better than the vaccine especially against Delta and Omicron. Here's one out of Israel that demonstrates natural immunity is vastly superior to vaccination

(<https://www.medrxiv.org/content/10.1101/2021.08.24.21262415v1>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F10.1101%2F2021.08.24.21262415v1>

)
4. There are risks of cardiac adverse events in kids post vaccination which are well known and documented

(<https://www.medrxiv.org/content/10.1101/2021.08.30.21262866v1>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F10.1101%2F2021.08.30.21262866v1>

) which are pretty scary.
5. This same study indicates kids are 4-6 times more likely to develop myocarditis than end up in the hospital for any reason associated with Covid. Think about that for a second - 4-6x risk of a terrible heart disease versus being admitted to the hospital due to covid.

The bottom line is that requiring vaccination is trying to solve a problem that barely exists and exposes children to potential health challenges as a result of the vaccine. Parents and doctors should be allowed to make risk reward decisions for their children and schools are not a significant at risk environment for Covid 19 related illness.

Ben Sharpe

Mercer Island, WA

With great power comes great responsibility; Which is why it is crucial the members of the board make the right decision for the people and our children.

I understand that everyone has a different set of morals and values that guide how we each make our own decisions. Which is why it's important for you to really dive deep and ask yourself who you really are and determine if you are proud of who you are and what you as an individual are support and represent.

No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are

'Interchangeable' Children's Health Defense (childrenshealthdefense.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>

) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>

).

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Hailey Unland

therefore,

6. The vaccine apparently does not stop the spread of the disease

Wanted to express my disgust with even the THOUGHT of this proposition. These vaccines were meant to be VOLUNTARY from the start. Now, not only have they been FORCED on the majority of adults, you are trying to FORCE them on CHILDREN!!! The risks of this vaccine to children FAR outweigh the severity of the virus. They are no more at risk with this virus than the common flu. This is NOT smallpox, measles, polio, etc., that had a much higher risk of harm.

You might also want to think about how much money your schools are going to lose, because I GUARANTEE there will be a mass exodus from the public school system if this is implemented!

Thank you for your time,

Subject: Against Covid-19 vaccinate mandate for children to attend school

External Email

Hello,

I am currently an educator and parent of two students who attend public school. I have been a resident in Lynden, WA for over 13 years. I am strongly against mandating the Covid-19 vaccination for students to attend school. There are many reasons why. Here are just a few;

1. The vaccine has not proven to stop individuals from getting Covid-19
2. Covid-19's death rate (especially in children) is .01 percent (October 2021)
3. The vaccine has not been tested long enough, so we do not know the long-term negative side effects
4. Many of the negative side effects from the Covid-19 vaccination are worse than getting Covid-19 itself
5. There is no consideration to those that have had Covid-19 and have natural

immunities

I am not an anti-vaccination person and believe in vaccinations. However, this is a horrible over reach of power. Long-term health is not being considered, if this mandate is pushed through. Individuals need to be able to make the best decisions for themselves and under aged children. Every situation is different. There is also no thought or consideration given to natural immunities.

Thank you for your time,

Jacqueline Vanderpol (a concerned parent and educator)

Thank you,

Elizabeth Etter

I am a very concerned citizen writing you to urge you to refuse to push through the new proposed policies that include mandatory covid vaccinations, and that also permit health officers to use law enforcement power in forcing isolation, quarantine, and detainment of individuals and families. This is completely unconscionable, and Washington citizens have had enough. Not only do children have a 99.995% covid survival rate, but these vaccines are STILL in the early stages of development and testing, and any long-term side effects are still completely unknown. Weighing this risk MUST be one each individual freely does for themselves, and is not forced into, particularly for parents deciding what is best for their own child. Each person has the right to choose - and refuse - medical treatment, counseling, and testing without being forcibly detained for their choices. These policies not only vastly overstep the constitutional bounds of 'health care', but also seriously infringe on personal and parental rights.

We the people INSIST you vote to STOP these unconstitutional policies from moving forward, at once.

Sincerely,

Heidi Forslund

Subject: NO mandate for Children regarding Covid 19 vaccines

External Email

Dear people,
I'll keep this brief.

Do NOT Vote for any mandate for school aged children to receive the Covid injection(s).
We do not have anywhere near the data to show it is safe or necessary for children.

Rule #1 First, do no harm.

Sincerely,

Maureen Bernardy
36628 25th Ct S
Federal Way WA 98003

Please stand behind and protect parents rights to choose what is best for their children.
Please respect freedom of choice. Please respect bodily autonomy and informed consent
by saying NO to mandating the Covid vaccine for our children.

Thank you for your time,

Nicole K

Eastsound, Wa.

I want to express how extremely opposed I am to the following proposed laws..

PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

This is most definitely overreach of power by the government and takes away a human right to choose what's best for their body and their children. I'm not against vaccines but I am for the right to choose!
Please vote NO on these!

Thank you

Inna Nikolaychuk

Hello!

I am completely against any of
the proposed Covid Policies that
are overreaching and immoral
I stand against these WAC's:
WAC 246-100-070, WAC
246-100-045, WAC 246-100-040,
WAC 246-100, WAC 246-105. Sent from my iPhone

hospitalizations for the young are with Covid-19 and not for Covid-19, we can know that they are not in mortal danger from Covid-19. Neither is there a great risk of the young spreading Covid-19 to staff and teachers. The young have a greater risk of Covid-19 vaccine adverse reactions than of a serious Covid-19 illness. We must protect our young before we consider self-protection.

Sincerely,

Tresa Baker

To whom it may concern:

I am writing you to urge you to stand up against the push for vaccine mandates (for children and adults) and to stand for medical freedom of choice. There are not enough long term studies regarding the use of the Covid-19 vaccine and the option of natural immunity needs to be a part of this conversation, if we are truly wanting to follow the science.

Even the CDC and Dr. Anthony Fauci have admitted that the vaccine itself does not stop transmission or infection. This is the logical disconnect between facts and political agenda.

Sadly, with the push for this and the proposed policies to allow health officers to use law enforcement to order persons involuntarily to isolation facilities or coerced medical intervention, Washington board of health is playing with medical tyranny. Not only is all of this discussion in direct violation of the Washington State Constitution and the US Constitution, the proposed policies are in direct violation of the Nuremberg code article 6 section 3 that states: No government can mandate or force medical treatment without individual consent.

Please stand for medical freedom of choice for the citizens of Washington.

Dear Lindsey,

I am a Washington state citizen and a parent. I STRONGLY OPPOSE the use of police officers and health officials for taking persons to detainment facilities who do not comply with quarantine, face masks, testing, and vaccination. WE ARE UNITED STATES CITIZENS WITH A CONSTITUTION. WE HAVE INDIVIDUAL RIGHTS AND LIBERTIES. WE DO NOT LIVE IN WORLD WAR II, NAZI GERMANY. NO COVID QUARANTINE CAMPS!!! I strongly oppose adding covid to list of diseases. Please show studies where covid has been isolated.

I STRONGLY OPPOSE required covid vaccination for children and adolescents. Recent information coming out shows that these covid vaccines, are not vaccines, they are gene modification therapies. These gene modification therapies are not safe. See VAERS report: VAERS through 12/24,21: 1,000,227 adverse events reported. 21,002 deaths, 110,609 hospitalizations, 109,245 urgent care, 156,456 doctor office visits, 8,673

anaphylaxis, 12,532 Bell's palsy, 22,117 3,435 miscarriages, 10,640 heart attacks, 22,117 myocarditis/pericarditis, 35,650 permanently disabled, 5,011 Thrombocytopenia/low Platelet, 23,892 life threatening, 36,492 severe allergic reaction, and 11,462 shingles. <https://openvaers.com/covid-data>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fopenvaers.com%2F%2Fcovid-data&data=04%7C01%7CW5BOH%40SBOH.WA.GOV%7Ce6a04345683d4d65df7d08d9d6e8bdbc%7C11d0>

. There has not been full disclosure as to what are in these injections. The vaccine box insert is blank. The current offered covid gene modification injections are under EUA, thus they are not FDA approved.. only Cominarty is FDA approved and it is currently not being offered. Children and adolescents are at much higher risk of vaccine damage than covid.

I strongly oppose proposed WACS:

WAC 246-100-070

WAC 246-100-045

WAC 246-100-040

WAC 246-100

WAC 246-105

These proposals are violations of Nuremberg Code: "The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision."

- Katrina Mason

enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Lindsay,

I oppose this proposition. I am not opposed to the choice or availability of vaccinations, in fact I have received many vaccinations. But I am whole heartily against the covid-19 injections and the fear and bullying tactics being employed to coerce the public, "joints for jabs", free bus rides for a month, cups of coffee, and now this idea to forcibly detain those who do not wish to receive the covid-19 vaccination in a concentration camp, excuse me, in a "quarantine facility". This disease is real but it is also overwhelmingly mild and does not result in hospitalization for the vast majority of those who contract it. Those with risk factors including advanced age, immune deficiency, obesity, respiratory, and heart conditions should certainly make informed choices for themselves as should the rest of the public. This is a matter of bodily autonomy this is not a matter for bureaucracy and the WA State Board of Health. It is and should remain out of the scope of practice for this board to apply current infectious disease WAC codes to include Covid-19 for all WA State residents. Recommendations are one thing forced intervention is

I am very strongly opposed to these proposed policies being discussed.

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Very Sincerely,
Stephanie Newcomb

To whom it may concern,

I OPPOSE Agenda Item #8, the Board's formation of a Technical Advisory Group (TAG) to review information about Covid-19 shots for consideration of mandating the shots for school. I OPPOSE Covid-19 shot mandates, PERIOD. The science does NOT support the notion that unvaccinated individuals spread the virus any more than vaccinated individuals. Children are statistically at ZERO risk of dying from Covid (their survival rate is in the range of 99.997 - 99.998%); where there is no risk, there can be no benefit. Furthermore, there are numerous studies now that support adverse affects of the vaccine on our children. Even the FDA has doubts about the safety of a vaccine for an individual under the age of 16. (www.fda.gov/media/151710/download...the
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.fda.gov%2Fmedia%2F151710>>
required studies on children will not even be completed until May 31, 2027!!!!!! And that is only one of the required pediatric assessments!) There has been enough time now to

find out the truth about what is going on with Covid, and there is no excuse for draconian measures to be inflicted on our children just to be able to attend school.

I SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EAU) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list. As noted in the FDA link above, the required pediatric studies required are not yet completed. STOP USING OUR CHILDREN AS TEST SUBJECTS!!!

Sincerely,

Marie Sketchley

Hello,

My name is Hannah Kilcup. I am a teacher and a single mother of 3 children. I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty

Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>
) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. Dear Lindsay,

Please note that I, Rachelle Boone a resident of Washington state am sending my disapproval for any Covid vaccine mandates for anyone and most especially anyone under the age of 18 per the reasons that follow:

Children are at extremely low risk for covid.

The vaccines are still only EUA.

There are no long-term studies to document any history of safety with the vaccines.

Studies do now document that the vaccinated and unvaccinated can both transmit Covid therefore the vaccine isn't proving effective in stopping the spread of covid.

Thank you for hearing the voice of the residents of Washington State.

Sincerely,

Rachelle Boone

Subject: AGAINST FASCIST POLICIES WAC 246-100 AND WAC 246-105
Importance: High

External Email

Hello,

I am writing this email to demand the fascist policies WAC 246-105 and WAC 246-100 to be ceased from existence.

Whoever decided to create them, as well as to propose them to the public is cruel and evil in their nature just like the policies themselves.

History shows that whenever government officers were allowed to affect people's lives in such a manner these policies allow them, there were millions of people who were denied their basic human rights of choice and freedom. Because of the same in their nature policies, 6 million Jews were brutally killed, and millions more of different were traumatized and suffering. And if we are to give these policies even a chance for existence, we will be repeating the same mistake here in the United States, the country of the free.

We CANNOT and SHOULD NOT allow policies like that to exist. It is against human rights, rights given to us by God himself, the rights protected by the constitution. The constitution is designed to limit the government because absolute power corrupts absolutely, and our leaders are already corrupted. However, these proposed policies override the constitution and provide health officers absolute power, which makes these policies UNCONSTITUTIONAL.

It is clear that the pandemic, mainly created as a political tool to place power in the hand of just a few cruel people, has nothing to do with the proposed policies that cease human freedom. We all saw that somehow states like Florida, where people continued their normal lives, and somehow had even fewer cases of COVID compared to the Marxist states like California. It is not a question of protecting people's health because it is to be taken care of by each person individually by each individual, not by the government. That is, I am raising my voice AGAINST these UNCONSTITUTIONAL, UNHUMAN, IMMORAL, EVIL IN THEIR NATURE policies. I am raising my voice as my God-given constitutional right for the sake of the future of this generation, the generation of my future children and their children, and for the sake of this country.

I expect to hear a personal reply to this email, as it is my right and your obligation to read it thoroughly to take action upon the people you represent and whose constitutional rights you are to protect.

Best Regards,

Aleksandra Ankuda

Dear Lindsay,

I strongly disagree with any vaccine mandate and or allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100□□□□□□

DO NOT Include the Covid-19 injections as part of school immunization requirements ! ! !

Thank you,
Mark Anthony
Spokane WA

Sars-Cov-2 has never been isolated - no proof exists, 25 countries, 139 institutions+
<https://www.fluoridefreepeel.ca/fois-reveal-that-health-science-institutions-around-the-world-have-no-record-of-sars-cov-2-isolation-purification/>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fluoridefreepeel.ca%2Ffois-reveal-that-health-science-institutions-around-the-world-have-no-record-of-sars-cov-2-isolation-purification%2F&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Ca721d866e2904878d09408d9d6e82b>

If the virus has never been properly isolated, it doesn't exist. Then the test is a fraud, the vaxx is a fraud.

It's my body, my choice ~ and children should not be vaccinated against their will.
Do not go against science, logic and common sense, we expect sound judgment. There is zero scientific evidence that justifies vaccines or quarantines.

Do not commit a crime against the citizens of Washington state. We don't need forced vaccination or quarantine.

Informed Consent is required by law.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.99%

Vaccines are far away from the point of diminishing return, it's substantially more harmful to vaccinate. It is blatantly criminal to even consider forced vaccinations.

Informed Consent is required by law.

No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity.

Do not require these vaccinations for school age children.

Russell Green

My oldest daughter during COVID learned she had CF - we have now all been tested. The vaccination has caused damage to two of my adult granddaughters currently.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Subject: Concerned Parent

External Email

Dear member of the Washington State Board of Health,

I am writing to you as a concerned parent regarding the upcoming decision as to whether the Covid vaccine should be required for school age children for the 2022-2023 school year. My husband and I have 3 children ages 12, 9 and 7 years, one boy and 2 girls. We have a close family member, who is fully vaccinated, that had vaccine related myocarditis a few months back and has still not fully recovered. Sadly, there are 22,117 cases of confirmed myocarditis/pericarditis in the US CDC VAERS system, as of December 24th, 2021.¹ With high rates of myocarditis being reported as an adverse side effect from the vaccine in boys ages 12-17, that is a serious concern of ours for our son. He is an active football player, and we are concerned about the long-term effects of myocarditis, especially since it has not been extensively researched in kids.

I believe consideration should be given for families who have had positive Covid cases, have fully recovered and now have antibodies. There seems to be a blatant disregard in our community, and Washington state as a whole, for anyone who has fully recovered from the virus and can prove they have antibodies. Someone I know personally had to jump through major hoops to be able to attend an event in Seattle. They were told they needed to present a negative covid test taken within 72 hours of the event OR an antibody test. This individual got the antibodies test done before the event and then double-checked with the organization a day before to ensure they would still accept the antibody test. They said they would not accept it and a negative covid test was required to attend. There are currently 140 studies available on the robust, durable protection of natural immunity from around the world by hundreds of scientists, researchers and doctors.² Why is this not a part of the conversation in our country and state??

Studies have shown that Covid affects children far less than it affects adults and over 16,000 physicians and medical scientists around the world are declaring that healthy children should NOT be vaccinated against Covid.³ To require mass vaccination of school age children with a vaccine this is STILL under Emergency Use Authorization is wrong. We as parents still do not have clear lists of potential side effects and complications of the vaccine and we should have the right and freedom to weigh the pros and cons for our individual children based on their health history.

Our country was built on freedom and choice. Our state government and Board of Health are taking those freedoms away from parents by implementing mandates regarding the virus. Even at a national level the vaccine mandates have stopped. Why is our state continuing to push these mandates?? It is unnecessary. Let parents make decisions for our children, which we have been doing all their lives. Please take a step back and look at the potential long-term ramifications of mandating this vaccine for kids. It has not been well tested and there have been over 169,934 cases of adverse reactions to the vaccine in our country, as of December 24th.¹ After the vaccine has gone through the proper testing and we truly know how it affects children, then let's have the conversation about requiring it for school-aged children.

Thank you,

Rachel Groves

Resident of Olympia

To whom it may concern:

I am strongly opposed to the Covid vaccine drugs being mandated for school attendees. Vaccination is not a decision for politicians, but should be decided by the individual or their parents. Should there be long-term side effects, from these vaccine drugs, or from the virus itself, it falls on the parents to carry the burden of those health issues. The government can educate parents about this decision, but should not make the decision for them, nor coerce them into choosing against what they feel is best for their children.

Please do not mandate these drugs.

Sincerely,

Mary Brooks

(Citizen of WA state and parent of 6 grown children and 5 grandchildren)

Washington State Board member:

Please do not vote to enforce Covid vaccines for children at school. Children have a strong immune system and very high success rate. This goes against our constitution and parents desires for their children. For those that want it for their kids it's an option now. This should Never be forced on anyone. You will see people pulling their kids out of school so fast if this passes.

Also please vote no for allowing local health officers to use law enforcement to force an emergency order to involuntarily a person or group of people to be isolated in quarantine facility if refuse vaccine, or testing, treatment etc. we are human beings with free will. We live in a free country. We should not be forced to put anything in our bodies.

This needs to move to endemic status as this isn't going away. Vaccines aren't stopping this as people can still get Covid if vaccinated. Many from who I have seen are having a worse Covid experience after vaccination then the unvaccinated. Vaccines are not the answer. We need to learn to live with this. Our economy is affected enough, our mental health is affected enough, and our livelihood and health. Please vote no.
Michelle

It was brought to my attention that you will be voting on covid vaccinations for school age children on January 12. I urge you to vote NO!

I am strongly opposed to this vaccine and I will not be vaccinating my children with this experimental untested Covid vaccine that is not even reliable. I am more worried about the vaccine side effects than I am of the low risk complications of the virus. We have had the virus and we have natural immunity.

This is the parents decision, not the governments. No more controlling our families.

Public schools are already experiencing a huge drop in enrollment because of parents pulling their children out. If you force this vaccine even more of us will be forced to homeschool our children. We will not let you make our children's health choices for us.

Vote no!

Thank you,
Melissa Perez

available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only “approved” COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This “smoke and mirrors” approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer’s claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are ‘Interchangeable’ • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there’s no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, “We are never going to learn about how safe this vaccine is until we start giving it” Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer’s studies: Ten red flags in the FDA’s risk-benefit analysis of Pfizer’s EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>)

Force vaccinating healthy children for a disease that doesn’t affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

becoming more transmissible it is also becoming LESS severe symptom wise (especially in children).

No parent wants their child to get sick, not even with the common cold (which is where covid is heading in mutation). However the reality is that if they don't catch it at school they will catch it at the grocery store, the library, from mom or dad who got it from work etc. DESPITE vaccination status!

It is absolute discrimination to refuse children access to public school because their parents don't feel comfortable giving them an experimental vaccine (and it's only considered a 'vaccine' because the definition of a vaccine has recently been amended).

Again, I am speaking as one of "We the People" I am adamantly opposed to a covid vaccine requirement for any and all children!

Thank you for your time.

Anna Andrews

Hello,

My name is Katie Walsh and I am a first grade teacher at Coulee City Elementary and a mother of 2 current elementary students and one future student. I strongly support medical autonomy and choice when it comes to people's right to choose what is best for their bodies and their children's bodies. I urge you to allow individual freedoms in this area and discourage the recommendation for COVID-19 vaccinations of children to attend school or any person for that matter to live a life of their choosing. I believe it is complete discrimination to segregate students based on their medical status. I also believe that science has now shown that vaccinated individuals can indeed contact and spread this virus and that the affects of the virus on children are minimal and do not warrant the risks of the vaccine. All of my children and I have had the virus and our natural antibodies are alive and strong to offer us and others protection.

Education has come a long way in offering a free, appropriate, public, education for students across the nation. Unfortunately, with policy around COVID-19, I have seen that fall by the wayside and this potential mandate will force families to choose between what they feel like is in their child's best interest physically versus what they know is in their child's best interests emotionally, socially, and academically. This is not a free, appropriate, public education for ALL. Families and teachers that have options WILL withdraw their students from public institutions and WILL resign over this issue.

Enrollment is already on the decrease and continues to decrease due to, what in my opinion is, poor policy around managing COVID-19. The state is already going to have to pick up a big tab due to this. I can foresee public education in WA state turning into what it is in some developing countries with the "haves" opting for private or home-school and the "have-nots" being left in the public system due to no other option. Quality Educators will leave and public schools will become institutional islands that are poorly staffed and underfunded. WE CAN DO BETTER FOR OUR STUDENTS AND FAMILIES. You are in a position of influence and I ask that you use your influence to protect the whole child and family autonomy when it comes to making decisions of well-being for their child. Protect diverse, quality, flourishing public education and protect the right to a free, appropriate, public education.

Thank you,

Katie Walsh

I am against the laws: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, 246-105 WAC, 246-100 WAC.

You do not have the right to pass these laws, this is a complete violation of the United States Constitution. This is a crime against the law and you will be held accountable before the people of the United States and God.

There are forces higher than yours, This is God, and He will strictly ask you, so take some time before adopting anti-human laws against your people.

-

Best regards,
Evgenii Mishkin

Furthermore, the vaccines clearly aren't working to prevent disease and the idea that one's infection is less severe is dubious at best- afterall, how can one know how severe it would have been had they been unvaccinated? And that, especially when so many unvaccinated have such non-severe infections.

Please do not take away parental freedom for healthcare decisions for children. This should be a personal decision for each parent. And children are at very low risk of developing severe Covid.

The vaccine does not stop the spread of this disease as studies show both the vaccinated and unvaccinated are spreading it.

Finally, I find it shocking, unscientific and discriminatory that provision for those who have natural immunity never seems to be considered. If any new rules are made, PLEASE address natural immunity.

Sincerely,

Rebecca L Hageman. RN

Dear Washington State Board of Health Member,

I am writing as a concerned citizen and a parent of school-age children to ask you to consider soberly and conscientiously the known facts about Covid-19 vaccination for young people and say NO to Covid vaccine mandates for kids in Washington State.

Consider the following well- established realities (some sources included below):

1. Children are at the lowest risk of severe outcomes from Covid-19 of any age group,

with risk factors a thousandfold lower than those in the oldest age groups. Nearly every child with a severe or fatal outcome from Covid has had correspondingly severe preexisting health issues. Parents of these children are likely to keep them at home for the duration of the pandemic, vaccine mandates or not.

2. Covid-19 vaccines DO NOT stop the spread of Covid-19. Breakthrough cases are exceedingly common and increasingly so as the omicron variant expands through our country. Vaccine mandates will NOT effectively stop in-school spread; thus, they serve no public health purpose. At this point, vaccines seem at best to decrease the risk of a severe case of Covid-19; but children are the group in LEAST need of this decrease (see above), and even if they were to benefit from them, weighing and choosing such benefit against the risks should be entirely between the child, the parents, and the physician. It is emphatically not the government's appropriate role to intervene in a person's private medical decisions, especially when those decisions do not have an appreciable impact on public health.

3. Children, particularly young and teenage boys, are the age group MOST at risk of severe injury from Covid-19 vaccines, including myocarditis and pericarditis. If you mandate vaccines for school-age children in Washington State, children will be severely injured who did not need to be. Children will die who should not have died. For no appreciable impact on public health.

Just given these facts, Covid-19 mandates for school-age children would be a travesty and an abdication of your responsibility as public health authorities, as well as an affront to the Hippocratic Oath that underlies the practice of medicine. However, I also invite you to consider the following:

4) Washington State children have undergone an extreme and prolonged disruption of their education over the last two years. As a parent and a friend of many parents, I have a front-row seat to witness the increases in depression, despair, hopelessness, and educational damage that has been inflicted upon them. Requiring vaccination for school attendance WILL result in more disruption, especially for the lowest-income families in our state, who tend both to be the most vaccine-hesitant and to have the fewest resources to educate their children outside of the school system.

In addition, you would have a mass exodus of students from the school systems into private schools, or, if that's not possible, effective homeschooling. Parents outside of Seattle and Olympia are NOT comfortable with injecting their children with a still-experimental medication, without any long-term safety information, for a disease that poses an overall low risk to them. That is why vaccine uptake among the youngest age groups has fallen so far short of expectations. If you think the school system is hurting now, imagine when all those parents have pulled their children out.

Covid-19 vaccine mandates for school-age children violate all available scientific evidence and common sense, overstep the bounds of appropriate government intervention, and would result in incredible harm done to families and schools. I urge you not to consider

such a step and, if you have considered it, to reconsider.

Thank you,

Megan Minnick

Please, do not consider requiring vaccines for school age children. Like all other decisions regarding their children parents should have the final say about what's best. It should be up to parents to choose.

As an educator, ministry leader and parent I whole heartedly disagree with enforcing mandates on citizens. I also believe that the masks and face covering requirements are doing more harm than good to school aged children and students and should be lifted immediately!

In service to my community,

Mrs. Laurice Warthan

To whom it may concern:

I am a mother of 5 and the wife of a firefighter. I teach for a home education program and I have battled autoimmune illness for most of my life, very severely in the last 7 years. All of these experiences give me significant interest in the agenda for the January 12, 2022 meeting.

I am in opposition to the following:

1) Any involuntary isolation/quarantine of people as described in parts of WAC 246.100;

There is NO evidence that those with natural immunity to Covid-19 or those who are unvaccinated are of greater threat to their communities. In fact, both those who are vaccinated and those who are unvaccinated can still transmit the virus, as evidenced in the very high number of vaccinated firefighters who are currently sick with Covid. Any type of mandatory quarantine would not only be unnecessary and illogical, but an egregious affront to citizens' civil liberties.

2) Any mandate on COVID vaccines for children as a requirement to attend K-12 public schools.

There are currently NO vaccines available for use in the United States that are not still under emergency use authorization. Covid-19 poses less than 1% risk of mortality to children and there are no long-term studies done on risks due to the vaccine. Please do not jeopardize our children's health and futures.

Sincerely,
Cutzi Jobes

Regarding the covid vaccination for Washington state, it should not be forced on children or adults. It should be a choice not a mandate.

Sincerely

Julie Riveira, WA

I do not believe in mandating vaccines on anyone...especially
on children.

Please, please NO NOT MANDATE vaccines.

Sent from my iPad

I want to express my voice and concern over these proposals. To be honest, I am shocked that I even have to address these things in America, the land of the free.

I am 100% opposed to any forced Covid 19 mRNA shots on our children! This is absolute madness to even consider given that kids are at very little risk of harm from Covid and now that we have Omicron, which is proven to be mild, it shows that the pandemic is coming to an end. This is a virus that will always be around we simply need to learn to live with it. This is still an experimental shot and we have no way of knowing the long term effects on our kids. I am not willing for my kids to be an experiment and there is simply no need for this to happen. Dr. Fauci himself, stated that kids were at little risk from dying of Covid and that the hospitalizations were being overcounted because they are including kids in the hospital WITH Covid rather than BECAUSE of Covid, this is a HUGE difference and confirms there is no need to mandate this for kids.

I am also appalled at the thought that quarantine facilities would be even be considered, is this Nazi Germany?! It is complete insanity and there is absolutely no scientific basis for you to approve this. We live in America, the land of the free I am sure you are aware of all of the evidence against but for some reason are choosing to ignore it. Why? I ask? Why? This is madness and it needs to stop now.

I was recently in a free state with no mask mandate or vaccine requirements to move freely around the city. It made me that much more aware of the tyranny we are living under here in WA. I love where I live and will fight to keep it free. Please don't make me leave the state because of irrational forced mandate.s

The proposals being considered are tyrannical, evil and a complete overreach of power. There is NOTHING anyone can say or do to make me give my children this experimental vaccine that is causing so much harm especially to kids. Each parent has the right to choose what they want for their kids and for themselves.

I, and many others will hold you responsible for any irreversible damage from unnecessary experimental mRNA treatment so please vote accordingly. Are you prepared to be responsible for the harm that will inevitably come if you move forward with these proposals?

May God be with you as you make this crucial vote.

Thank you,

Nora Berry

Washington State Board member:

Please do not vote to enforce Covid vaccines for children at school. Children have a strong immune system and very high success rate. This goes against our constitution and parents desires for their children. For those that want it for their kids it's an option now. This should Never be forced on anyone. You will see people pulling their kids out of school so fast if this passes.

Also please vote no for allowing local health officers to use law enforcement to force an emergency order to involuntarily a person or group of people to be isolated in quarantine facility if refuse vaccine, or testing, treatment etc. we are human beings with free will. We live in a free country. We should not be forced to put anything in our bodies.

This needs to move to endemic status as this isn't going away. Vaccines aren't stopping this as people can still get Covid if vaccinated. Many from who I have seen are having a worse Covid experience after vaccination then the unvaccinated. Vaccines are not the answer. We need to learn to live with this. Our economy is affected enough, our mental health is affected enough, and our livelihood and health. Please vote no.
Michelle

enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you for your attention on this important matter.

Joe Toche

Seattle, WA

Please see the following study titled

“Why are we vaccinating children against Covid-19?”

<https://www.sciencedirect.com/science/article/pii/S221475002100161X>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.sciencedirect.com%2Fscience>

You are responsible to know the data if you are making recommendations that guide policy.

Children remain the lowest risk group regarding Covid, but have carried the greatest burden from the overreaching, long overdue and ineffective attempts to “protect” them. They were needlessly kept out of school for more than a year and their education and mental health suffered. This is crucial developmental time they won’t get back. They continue to be required to wear masks in school which is an undue burden given the lack of evidence to support this requirement. We are one of few states still imposing such needless measures, Washington needs to figure it out, and stop doing it at the expense of children and the those you are supposed to serve and protect.

Concerned parent and WA citizen

would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

I know someone personally who has had the injections and now has to see a doctor every 4-5 weeks to see if there is any progress to reverse the adverse reaction due to the Covid-19 shot.

I have a child in preschool. It is my responsibility as the parent to choose what is best for my child. If an adult can have adverse reaction to this injection why on earth would we want to give this to a child?!

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&data=04%7C01%7C6A8B2352-4040-4039-B068-545456565656%2F&isRedirection=true>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. I am a WA state and Nationally Board Certified Teacher and have been teaching for 16 years. I love our schools and I love our kids! More dear to heart than my career in

education, I'm a mom of two teenage children who are healthy and happy! I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State. It's a horrible idea for many reasons, such as:

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. I am strongly opposed to adding covid vaccine for children to the WAC-246-105-030

Covid vaccines remain under emergency use authorization and the rules that apply to that status Children under 18 yr have extremely low clinical risk from covid infection Children have a much higher risk of adverse event to the vaccine- including life long health issues Research supporting child vaccinations safety is flawed by the methods used to collect it Covid vaccines do NOT prevent getting it or transmitting it

DO NOT subject our children's health to a failed vaccine and the future unknown risks it may cause

Subject: Please Vote NO on MANDATORY VACCINES FOR ANYONE, LEAST OF ALL CHILDREN!

Please do not require vaccination of children for admission to school and day care! Please do not take authority away from parents, especially since this vaccine is still only approved as Emergency Use and no one really knows the long term side effects. All one need do is look at the government's own website (VAERS) for vaccine related adverse effects to know that these vaccines are not without risks. Thousands have been injured and many have died, having taken the shot under duress.

This latest variant is proving to be mild in its symptoms and the "vaccine" is not proving to be effective or efficient in eradicating Covid so why should anyone take the risk of injecting themselves or least of all their children with an unproven solution.

Please listen to Dr. Robert Malone who is one of the founding scientists for the mRNA "vaccine!"

JRE #1757 - Dr. Robert Malone, MD (rumble.com)

Hello,

Our kids will be pulled out of public school if the covid vaccine becomes a requirement or they are discriminated against for not having it.

1- The risk of severe illness or death to children is still very low, considerably lower than influenza. There is a higher risk of adverse reactions to the vaccine. It is not our children's responsibility to protect the vulnerable at their own risk. Any vulnerable teachers and staff are welcome to vaccinate themselves to mitigate their own risk.

2- Vaccinated are still becoming infected and are spreading it the same as unvaccinated, posing the same risk to the vulnerable. Again, the vulnerable all have access to the vaccine to mitigate their own risk as they see fit.

3- While adverse reactions to the vaccine may be fairly low in the short term, they do happen. there are literally zero long-term studies in humans to know if there will be any impacts to health down the road. History is full of products once deemed to be safe by the FDA that are now banned. Let's see how this looks in 5 to ten years.

4- I would also like to add that as long as "any cloth or paper" mask is deemed sufficient, I will consider the source of the requirement to be of questionable intent. ALL ACTUAL SCIENCE has consistently shown an actual surgical mask to have marginal effectiveness against a virus, with a K95 or N95 to be the only mask to make much difference. The flimsy cloth or paper that the majority of children are wearing is less than effective. I would like the data on how many staff and children are out of WA schools with other viral/respiratory illnesses/asthma compared to the 2018/2019 school year. Our circle of children have been continually struggling with this since the beginning of school. Please see The University of Michigan website for info on their influenza outbreak that was severe enough that the CDC was called in. This university requires masks AND vaccines (and lets not forget that influenza particles are significantly larger than Covid particles). These are college students, capable of better mask hygiene than the younger children.

becoming more "virulent" (spreads easier) but less deadly. Real immunity is achieved with exposure and recovery as is evidenced by fact that those infected with SARS in 2002/3 cannot become infected with SARS CoV2 today! In contrast, Covid19 has managed to find a way to escape the vaccine as is evidenced by the incredibly high numbers of vaccinated and even boosted individuals getting sick and testing positive. Surely this fact has not escaped your knowledge!

As Health Board members, you are obligated to provide us with facts that support any and all recommendations or requirements.

1) what is the current rate of mortality for COVID19 infection and stratified according to age groups?

2) point to ANY measures that have reduced the numbers of fatalities (cases are not fatalities).

3) what is rate of all cause mortality in WA in 2020 and 2021?.....did the measures imposed reduce the number of deaths from prior year?

4) provide evidence of asymptomatic spread of SARS CoV2.

5) provide safety studies for masking children and randomized clinical trials for masks preventing spread of lab-confirmed upper respiratory viruses (not modeling of masks on mannequins).

6) make public the accuracy of testing - what is the rate of false positives and false negatives of tests and were results determined by manufacturers of the tests or unbiased 3rd party investigators?

7) provide evidence that the vaccines prevent infection and transmission and that they improve health of individuals who receive them compared to those who do not.

8) explain why so much focus on eliminating this 1 virus when human immune systems have successfully protected our growing population since the beginning of time? Are you aware that some viruses are beneficial for humans and can protect against various forms of cancers and heart issues? Did you know that your human virome contains over 380 TRILLION viruses?

I do not doubt that as members of WA State Health Board that you truly desire to improve the health of Washingtonians. However, I do not trust that you have carefully investigated and logically determined adequate and measurable health remedies for which you are able to provide evidence. Before doubling down on measures that seem to HARM more than they HELP the overall health of citizens, please determine and make public the evidence to justify any policies.

Regarding mandating shots, know that the clinical trials will not be completed until 2023. Know that WA State has a legal definition of a vaccine that the C19 shots do not fulfill as they were never part of a living microorganism nor do they prevent transmission or infection of disease.

"Vaccine" means a preparation of killed or attenuated living microorganisms, or fraction thereof, that upon administration stimulates immunity that protects against disease and

is approved by the federal food and drug administration as safe and effective

<https://app.leg.wa.gov/RCW/default.aspx?cite=70.290.010>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx?cite=70.290.010>>

Finally, do no harm! You cannot possibly know or care more about the health of children than do the parents of Washington children! My college son's roommate suffered myocarditis shortly after his Pfizer booster and is now unable to resume an active lifestyle for the next 6 months and possibly longer! Heart muscle doesn't regenerate and unnecessary injury to a healthy 19 yo is a travesty he will suffer with for the rest of his life. How many others are now injured? What is the real rate of adverse effects following these EUA products and how can you determine if the safety studies have yet to be completed and there is no transparency of adverse event reporting?

Furthermore, how necessary or even safe is it to give a vaccine to a person who already has immunity to the pathogen? Most children by now have been exposed to the virus and have developed immunity without difficulty. Why consider a mandate for those not at high risk for adverse outcome should they become infected but who carry unknown risks of adverse reaction with getting the shot?

I look forward to hearing these concerns addressed and evidence for any and all recommendations to be presented when I tune into your meeting on January 12. <x-apple-data-detectors://2>

Thank you,
Therese Hendrix

*I am able to provide evidence of any claims made in this letter, just let me know what you need substantiated.

Sent from my iPhone

vaccinations requirements in school when there is no long term study on the effects of the vaccine especially on young children.

I feel the way I do for many reasons but the strongest reason, as a person and as a mother, is that the numbers and the studies do not support the decision of these policies. I implore you to think about what these policies would really look like if passed because, I for one, do not see a bright future for the state of Washington if the board of health passes this agenda during the meeting.

Respectfully,

K. Harmon

Hello,

I am a Washington State resident and have become aware of the proposed policies to be presented on January 12th.

I am writing to register my emphatic opposition to mandating Covid-19 vaccines for school attendance.

I am also writing to register my opposition and absolute outrage at the prospect of the involuntary detention and isolation in quarantine facilities of those who refuse to comply

with requests for medical examination, testing, treatment, counseling, and vaccination. The right to refuse these things is protected by both our state and federal constitutions, and their violation brings to mind (and I do not draw this comparison lightly) the horrors of Nazi Germany.

I urge you to utterly reject these policies and stand as an inhibitor of the evil that would come of them.

Respectfully,

Maggie MacInnis

This is horrible and against our constitutional rights.

I oppose the proposed WAC's 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against covid-19 injections as part of the school immunization requirements using WAC 246-105.

Thank you,
MeLainee

Code Sec.360bbb-3(e)(1)(A)(ii)(III) reads "of the option to accept or refuse administration of the product, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks".

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccines adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Consider additionally, the greater alienation of a growing population of Washington homeschoolers this decision could bring. Our children need a government and health officials they can trust to put their best interest first. How will families who choose to homeschool because of this proposed COVID vaccine mandate be supported in their freedom to opt-out of public school? So far I have personally only encountered red tape and a general lack of concern for the education of any child whose parent un-enrolls them from the public school system.

It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time.

Lena Guisewite

Olympia, WA

available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long-term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it." Since we do not know the long-term effects of the vaccines, it is irresponsible to inject so many growing and developing children with them.

Force vaccinating healthy children for a disease that is not dangerous to them to make adults feel safe is a new low for humanity. As a newlywed who is planning on having children soon, I am horrified by how Washington state is putting children at risk and wondering if it is safer to raise children elsewhere.

Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Robyn Antoine

Hello Lindsay,

I am a lifelong resident of Washington state.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are

interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you,

Lynette McLaughlin

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets vaccine, one group gets placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the

drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccine adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Finally, as this is an experimental drug that you will be forcing on our children, I will close with the 10 points to the Nuremberg code. I strongly urge you to read over these as YOU will be the ones held responsible for these crimes if you push these mandates through.

The ten points of the code were given in the section of the judges' verdict entitled "Permissible Medical Experiments":[6]

1. The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the experimental subject there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person which may possibly come from his participation in the experiment. The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs, or engages in the experiment. It is a personal duty and responsibility which may not be delegated to another with impunity.[13]

2. The experiment should be such as to yield fruitful results for the good of society, unprocurable by other methods or means of study, and not random and unnecessary in nature.

3. The experiment should be so designed and based on the results of animal experimentation and a knowledge of the natural history of the disease or other problem

under study that the anticipated results will justify the performance of the experiment.

4. The experiment should be so conducted as to avoid all unnecessary physical and mental suffering and injury.
5. No experiment should be conducted where there is an a priori reason to believe that death or disabling injury will occur; except, perhaps, in those experiments where the experimental physicians also serve as subjects.
6. The degree of risk to be taken should never exceed that determined by the humanitarian importance of the problem to be solved by the experiment.
7. Proper preparations should be made and adequate facilities provided to protect the experimental subject against even remote possibilities of injury, disability, or death.
8. The experiment should be conducted only by scientifically qualified persons. The highest degree of skill and care should be required through all stages of the experiment of those who conduct or engage in the experiment.
9. During the course of the experiment the human subject should be at liberty to bring the experiment to an end if he has reached the physical or mental state where continuation of the experiment seems to him to be impossible.
10. During the course of the experiment the scientist in charge must be prepared to terminate the experiment at any stage, if he has probable cause to believe, in the exercise of the good faith, superior skill and careful judgment required of him that a continuation of the experiment is likely to result in injury, disability, or death to the experimental subject.

Regards,

Nicole Goode

External Email

Dear Board Member,

I ask the Board to exclude the COVID-19 from the list and NOT implement a Covid-19 Vaccination Mandate for Childcare and School admission. My logical reasons are as follows:

1. The statements from the CDC, WHO, and WH about vaccine impact on transmission and infection "neither prevent the disease nor stop transmission." The above mentioned organizations, as well as, the Biden Administration have clearly stated this. It is obvious to me that these "vaccines" fall under the classification of medical procedures or treatments, not to traditional vaccines.

2. There is no FDA approved covid vaccine available in the USA that prevents

transmission of the disease. I believe, you would be violating existing International Law with this mandate.

3. According to CDC & WHO data, there could be unknown risk to children. Their data shows clearly that across all variants, CHILDREN ARE AT THE LOWEST RISK for infection, transmission and severity.

4. These mandates have and will impact student enrollment and funding for schools. Anti-public school advocates have clearly achieved advances during the pandemic by disenrolling children from schools, which are government controlled. Check with districts and you will find, there is a multitude of parents who are vocally and actively opposed to school and childcare mandates. You will see an excess of one-fourth enrollment in local districts. This will have a significant negative impact on school funding when schools already claim their resources are stretched past the breaking point.

5. Many parents in Washington State hold strong family values and believe parents should control what is to be done, or not done, to their children; not the local State or national government.

I respectfully ask you to consider my logical points based on data and strong family values.

Kathy Varela

Dear

Today I am writing to you to express my express my concerns on hearing that the Department of Health is considering mandating COVID Vaccines for children to attend school. I am completely AGAINST such a mandate.

The COVID Vaccines in the USA are NOT FDA approved and are being administer under and Emergency Use Authorization. According to the Nuremberg Code EUA products can not be mandated.

The risk of children dying from COVID are statistically at zero risk. The survival rate is from 99.997 – 99.998%. There can not be a benefit to mandating children to be vaccinated as there is no risk. No one knows what the long term risks of the vaccines are. We should not react out of fear.

Do not allow this mandate to move forward, Please.

I am writing in regard to an item on the agenda for your upcoming meeting on January 12, 2022. I OPPOSE adding COVID-19 to the current infectious disease WACs, and I OPPOSE adding COVID-19 to school immunization requirements.

According to the CDC's own numbers, COVID-19 has a 99.74% survival rate

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nbc26.com%2Fnews%2Fcoronavirus%2Festimates-covid-19-fatality-rate-including-asymptomatic-cases&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cbf9d277de33d4cc059e608d9d6eed436%7C11d>

. What warrant is there for requiring children and potentially adults take a risk on a product that has no long-term safety data available, is still in experimental trials for two more years, and doesn't stop infection or transmission

To Whom it May Concern,

I OPPOSE Agenda Item #8, the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose COVID-19 shot mandates, period!

I SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Sincerely,
Heather D

To whom it may concern, you unelected bureaucrats,

I am a FREE citizen and lifelong resident of Washington. I reside in Spokane County. I am one of your bosses. I am not your servant, peasant, subject, peon, or inferior.

I have a multitude of questions, serious, important questions, and a lot to say about the way people employed by the government of Washington have begun to believe they are the rulers of the citizens of Washington, have come to the completely mistaken and wicked belief that they are entitled to make private, medical decisions for the citizens of Washington and the children, and that they have the right to coerce, compel, and force the FREE citizens of Washington to do anything, especially anything that violates a free human being's bodily autonomy.

I OPPOSE WAC 246-105 (You may NOT allow Covid-19 injections to be added to school immunization requirements.)

I OPPOSE WAC 246-100 (You may NOT allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040).).

I do not agree that these WACs should be modified, changed, or altered in any way to add any language referring to COVID-19 or coronavirus or any of the variants.

I DEMAND that you tread lightly and remember that We The People are free, sovereign human beings with the right to speak and move freely, amongst other things. You have no right to violate our rights, freedoms, or bodily autonomy. Anything you do while being paid by the taxpayers of Washington must be with the full awareness of our rights and zero treading upon them.

My first question, a 2 parter, which you MUST address: When did you become the rulers/bosses/parents/supervisors/kings/queens/lords/stewards of the citizens of Washington? And when did WE the People abdicate our rights and freedoms to you?

If your answer is anything but "NEVER" and "NEVER" then you should resign in shame immediately. How dare you believe, even for 1 second, that YOU have any right whatsoever to dictate anything to the free citizens who have chosen to live in Washington? WE are YOUR bosses. WE pay your salaries. You are supposed to work for us. We are not peasants, subjects, peons, slaves, indentured servants, children, minions, inferiors, etc. We have the right to make our own decisions. You have ZERO right to impose your wicked ideas on us, to force, coerce, threaten, chide, compel, or anything. If you cannot remember these things then resign right now. You have no business being in "public service" if you cannot remember YOU SERVE THE PUBLIC. As the publicly funded website for the Board of Health says, "the State Board of Health has served the people of Washington for 132 years." SERVED THE PEOPLE. It does NOT say "ruled the people." Further, it says you "promote policies that protect and improve the public's health." Promote does not equal "coerce" or "force" or "rule." Maybe you should refresh your memories and remember your places (that would be beneath the people who are your bosses, by the way).

We elect representatives to a legislature where they discuss, write, take opinions on, debate, and vote on laws. We did not elect career bureaucrats to create rules, regulations, or demands on the people. If you have not been elected to a legislature then stop thinking you have any right to force your notions upon us. No rules/regulations without representation. If you are in the legislature, then it's time to remember YOU WORK FOR US. You have no business creating and passing laws that violate our freedoms and rights. If you cannot remember this, then resign in disgrace. I do not care if the legislature "grants you powers." They only serve with the consent of the governed and we do not consent to be experimented on, to be ruled by unelected (or elected) power-hungry fascists or give up our rights, freedoms, and bodily autonomy. WE DO NO CONSENT.

WE ARE IN CHARGE, not you. You have ZERO right to violate my bodily autonomy, make

medical decisions for me, force me to inject ANYTHING in my body, deny me entrance to publicly funded spaces, force me to wear fabric on my face, coerce me to inject anything into my body, coerce me to wear fabric on my face, etc. etc. etc. As a free human being, I get to decide what I inject into my body, what I wear, and where I go. My tax dollars pay for publicly funded spaces and if you want to deny me entrance to anything my money pays for then I want all of my money back and I will no longer pay taxes. Such things are literally discrimination, segregation, and immoral. I will not share my private medical choices with event staff, clerks, government officials, or to enter establishments, public or private. My private medical records are MY BUSINESS ALONE. If you think forcing people to share their medical records with others is acceptable, then you better be ready to put your own medical records out in public view immediately so we can all have a look and make decisions on what you are allowed to do, what you must inject, the behavior you are no longer allowed to engage in, etc. Further, if you want to coerce us into sharing this medical decision, then it's only fair that everyone's every medical decision be public record. Promiscuous? Then we want to see if you have STDs before you can be in public. A drinker or smoker? We get to dictate what you get to do in life. A drug user? We get to make decisions for you, too, and share everything publicly. Or maybe you should back this runaway train up and remember you serve free citizens who have the right to private medical records.

Second Question: When did the free citizens of Washington give their children to you to raise? Why do YOU think you have the right to dictate other people's children's medical decisions? Children belong to God and with their parents. They do not belong to the governor, the attorney general, legislators, school principals, babysitters, cousins, neighbors, store clerks, or you, unelected, arrogant, power-hungry bureaucrats. You have NO RIGHT to decide what is injected into other people's children. Parents have the responsibility to make decisions for their children.

COVID-19 is really not much of a threat to MOST people and it's even less of a threat to children. According to the CDC's best estimate of the infection fatality rate for individuals ages 0-19 is 0.00002, meaning 99.998% of children survive it. Why on earth do they need to be injected with things which have no long-term studies or trials? These shots have barely been around for a year and you cannot possibly argue that a year or 2 suffice as "long-term." It is horrifying that you are even considering making experimental shots mandatory for anyone, let alone children. Other immunizations (which actually IMMUNIZE, unlike the COVID "vaccines") were tested for a long time before they were used and were available for a long time before anyone considered making them mandatory. As COVID primarily impacts the elderly and the ill, it is unconscionable to demand children be forced to get injected with these experiments. Please refer to this article and many others like it for more information, as apparently you are completely ignorant of reality: <https://www.tabletmag.com/sections/news/articles/covid-vaccine-mandates-kids-legal>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.tabletmag.com%2Fsections%2Fnews%2Farticles%2Fcovid-vaccine-mandates-kids-legal&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cf6e030d2e0664064b6b608d9d6ebf644%7C11d0>

Currently, as I am sure you must know, there is no COVID-19 "vaccine" available in the United States outside of ones approved only under the Emergency Use Authorization, which is only possible if there are no therapeutics available to treat something. As we all know, there are therapeutics available to help fight COVID-19. I believe you cannot mandate these shots as long as they are under the EUA. And, as you know, "Comirnaty" is not available in the United States so you cannot mandate children be forced to get the EUA injections. Or anyone else, for that matter.

To quote the article above at length:

"In 2004, under Section 564 of the Food, Drug and Cosmetic Act, 21 U.S.C. § 360bbb-3, Congress permitted the FDA to grant EUAs so that any American in a personal emergency can choose whether or not to explore potentially lifesaving treatments that have not gone through the full testing regime. In other words, the legal basis for EUAs is a matter of the individual right to access experimental treatments, not of government right to compel such treatments. EUA products, by definition, have not yet been proven safe and effective according to FDA standards.

Indeed, Congress has recognized that Americans should not be forced to take medical products that have not been deemed safe and effective by the federal agency charged with the power to decide. The same federal statute that authorizes EUA products also requires, among other things, that potential recipients of such medications be informed "of the option to accept or refuse administration of the product, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks." According to a plain reading, individuals have a statutory right to "refuse administration" of a vaccine approved only for emergency use. The language leaves no doubt that Congress intended for any decision to take such products to be made free of coercion, pressure, or duress. A city or school system that withholds children's access to education, extracurricular, and recreational activities—all crucial to their cognitive and emotional development—violates both the letter and the spirit of the statute."

I read this and think you should read it, too (or read it AGAIN): 'As the Technical Advisory Group stated during their meeting on December 29th, in order to amend Chapter 246-105 WAC "the vaccine (Covid vaccine) containing this antigen must PREVENT disease(s) that have significant morbidity and/or mortality". CLEARLY, these COVID "vaccines" DO NOT PREVENT TRANSMISSION. We were told repeatedly, by the CDC, Biden, and the rest of the snake oil salesmen, that these "vaccines" would 100% prevent you from getting or transmitting COVID-19. That was obviously a bunch of lies. Numbers show that highly "vaccinated" places are seeing massive surges of "cases." Masks also do not stop transmission (DUH) either and we do not consent to be muzzled. The only point of mandating these shots which do not prevent transmission is to control free human beings and force them to do as you "command." NOPE. We do not consent.

There are no Washington laws which give you the authority to mandate citizens must take an medication or have any medical intervention. Such a thing is so far out of your purview that you should never show your face again in public if you think you have even a tiny, infinitesimal "right" to do so. Requiring these untested "vaccines" for children is outside any law as well. Such decisions belong solely to parents/guardians and children. As the article says, "The Ninth and 14th Amendments to the United States Constitution protect the right of individuals—both children and adults—to bodily integrity and to decline unnecessary medical treatment."

Further, Natural Immunity is an important, long-studied scientific fact which those in the "health" field, in their haste to seize control and impose their own wills upon free citizens, have decided to pretend doesn't exist. Do you force those who have had chicken pox or measles, etc., to get the actual vaccines for these diseases? Do you force them to get "booster" shots? No, you do not, as such things would destroy the natural immunity which does a better job than anything created in labs. Since the COVID "vaccines" do not immunize anyone, you have no reason to coerce, compel, force, or mandate anyone into getting these shots. You have no moral, ethical, scientific, or legal standing to do so. If you think you have such rights, then please be aware that others can use the same arguments to dictate their beliefs in the future. Most Christians do not believe in sex before marriage and a case could certainly be made that engaging in such promiscuous behavior has consequences that hurt society at large, which would mean the government should be able to force interventions on those who think they have the right to decide

who they sleep with. Etc. If you want to open that door, we're happy to make sure everyone in this Godless state is living pure, holy lives.

As we do not know the bodily consequences these "vaccines" might have long-term, it is unconscionable that you would even consider mandating them for children (or anyone). We cannot have any idea how their developing bodies might be hurt by these experimental shots. Are you prepared to be sued, as a "board" and as individuals by parents whose children are damaged by something you ordered before long-term studies can possibly exist? You will be morally, ethically, and, hopefully, criminally/monetarily/civilly held liable for any consequences if you mandate these for children. If you have half a brain amongst you, then you will step back, remember your place, and wait a decade or more to see how things go. Parents/guardians have the sole rights to make this decision for children. NOT YOU.

Under Jay Inslee's hateful guidance, government workers have arrogantly decided they have the right to dictate to the free citizens of this state, to discriminate, segregate, violate bodily autonomy, and threaten, coerce, force. We live in the United States of America and as Americans, we are FREE. We have the sole right to decide what medical "treatments" are injected into our bodies. We have the right to move freely, at will, to speak freely, to assemble, and to get rid of all governments which violate our rights. You are employed by the citizens of Washington. You better remember your place. You may provide suggestions and we are free to ignore them. There is not one medical treatment or medicine which every single person needs. Not one. We do not force healthy people to have chemotherapy or take heart medication (malpractice, anyone???). We do not put casts on unbroken legs. Why on earth would you think everyone should get these experimental shots? You have no idea what consequences many people will face due to your immoral, unethical coercion. You may recommend people get these experimental shots. You may NOT demand, force, coerce, pressure, threaten, or mandate them. In the last two years, you have created a hateful, divisive, cruel society where you segregate people based on their personal medical choices. You tell them they are less than, vectors for disease, and evil, when they are not. You lock them out of society and foment hatred against them. Is it any wonder that there have been so many more opioid overdoses and deaths, more domestic violence, more suicides, more hopelessness? YOU have contributed to these deaths and despair. YOU. And yet you cruelly continue to divide and subjugate us. If you care about the health and well-being of all Washington citizens (what a laugh!), then you should be concerned with all of those people. Vastly higher numbers of people have been affected by those things than by COVID-19 but you have ignored them at our peril. You have failed to encourage therapeutics, exercise, and healthy eating to prevent COVID and other things. You have locked people inside, kept them away from co-workers and loved ones (gathering strengthens immune systems, obviously, so it's interesting to consider whether you purposefully crafted policies which forced people to weaken their immune systems), and tried to keep them frightened.

Government is instituted by the people, for the people, to make life better for the people, not to rule the people. Free people cannot be compelled by any government or business or person to violate their bodily autonomy. Do you know what we call it when a person uses force or coercion to violate another's bodily autonomy? RAPE. We call it rape and it is immoral and evil. You have no right to violate our bodily autonomy or our children's bodily autonomy. We do not consent to any violation of our bodily autonomy. We do not consent to being locked out of society. We do not consent to be ruled by bureaucrats.

If you are a doctor, you have presumably taken an oath to "do no harm." Yet, in the last two years, you have crafted policies which have done immeasurable harm. You have kept people frightened, alone, and you should be held accountable for these things. Time to remember your oaths and step back from committing evil against the free citizens of Washington. You continue to abuse power loaned to you by the legislature, which only has power because it is loaned by the people. We do not consent to be abused, manipulated, frightened, coerced, forced, threatened, segregated, discriminated against,

or locked out.

Perhaps you should spend some time learning more history so you can see how those who violated bodily autonomy and freedom are remembered. Many were put on trial and faced severe consequences for their evil actions. You have the choice to violate freedoms or to step back and recognize you have no such powers on this earth. For example, you should read the Nuremberg Code and why it was instituted in the first place. Never in history have the good guys been the ones coercing, forcing, threatening people with injections. So perhaps you might recognize which side you are currently on here. (Not the good guys, obviously.)

Nuremberg Code:

1. The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the experimental subject there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person which may possibly come from his participation in the experiment.

"The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs, or engages in the experiment. It is a personal duty and responsibility which may not be delegated to another with impunity." (This means each of you individually is responsible for ascertaining the consent of the people, as in each person you think should be forced to have these experimental shots, and if you force/coerce/threaten, then you are individually responsible for the consequences. You cannot say it was a group decision or you just went along with others. You are complicit and morally, ethically responsible.)

<http://www.cirp.org/library/ethics/nuremberg/>

Our family is strongly opposed to mandating vaccines for children. There is not enough information about long term effects. We cannot put our children at risk with what is still an experimental vaccine. There is not enough information on adolescent boys and resulting cardiomyopathy.

Sincerely, Tom and Marva McDevitt

Sincerely,

Charyl Baziak

available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only “approved” COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This “smoke and mirrors” approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer’s claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are ‘Interchangeable’ • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there’s no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, “We are never going to learn about how safe this vaccine is until we start giving it” Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer’s studies: Ten red flags in the FDA’s risk-benefit analysis of Pfizer’s EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>)

Force vaccinating healthy children for a disease that doesn’t affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thanks,
John

enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Best Regards! Carolynn

Hello board members and anyone else it may concern,

As parents in Washington state, we say please do not mandate a vaccine to go to school!

Children are at extremely low risk for Covid.

The vaccines are still only EUA.

There are no long term studies to document any history of safety.

Studies DO now document that vaccinated and unvaccinated can both transmit Covid.

The vaccine apparently does NOT stop the spread of Covid.

The risk of injury from the vaccine is not worth it when it doesn't even stop the spread to begin with.

A mandate doesn't make any sense!

Thank you,
Katie and Josh McGuire

Sent from my iPhone

an Emergency Use Authorization. The only “approved” COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This “smoke and mirrors” approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer’s claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are ‘Interchangeable’ • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. To Whom It May Concern,

I OPPOSE Agenda Item #8, the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose COVID-19 shot mandates, period!

I SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Sincerely,

Angela Winston

Please excuse any typos, this was sent from my phone

To whom it may concern, you unelected bureaucrats,

I am a FREE citizen and lifelong resident of Washington. I reside in Spokane County. I am one of your bosses. I am not your servant, peasant, subject, peon, or inferior.

I have a multitude of questions, serious, important questions, and a lot to say about the way people employed by the government of Washington have begun to believe they are the rulers of the citizens of Washington, have come to the completely mistaken and wicked belief that they are entitled to make private, medical decisions for the citizens of Washington and the children, and that they have the right to coerce, compel, and force the FREE citizens of Washington to do anything, especially anything that violates a free human being's bodily autonomy.

I OPPOSE WAC 246-105 (You may NOT allow Covid-19 injections to be added to school immunization requirements.)

I OPPOSE WAC 246-100 (You may NOT allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040).).

I do not agree that these WACs should be modified, changed, or altered in any way to add any language referring to COVID-19 or coronavirus or any of the variants.

I DEMAND that you tread lightly and remember that We The People are free, sovereign human beings with the right to speak and move freely, amongst other things. You have no right to violate our rights, freedoms, or bodily autonomy. Anything you do while being paid by the taxpayers of Washington must be with the full awareness of our rights and zero treading upon them.

My first question, a 2 parter, which you MUST address: When did you become the rulers/bosses/parents/supervisors/kings/queens/lords/stewards of the citizens of Washington? And when did WE the People abdicate our rights and freedoms to you?

If your answer is anything but "NEVER" and "NEVER" then you should resign in shame immediately. How dare you believe, even for 1 second, that YOU have any right whatsoever to dictate anything to the free citizens who have chosen to live in Washington? WE are YOUR bosses. WE pay your salaries. You are supposed to work for us. We are not peasants, subjects, peons, slaves, indentured servants, children, minions, inferiors, etc. We have the right to make our own decisions. You have ZERO right to impose your wicked ideas on us, to force, coerce, threaten, chide, compel, or anything. If you cannot remember these things then resign right now. You have no business being in "public service" if you cannot remember YOU SERVE THE PUBLIC. As the publicly funded website for the Board of Health says, "the State Board of Health has served the people of Washington for 132 years." SERVED THE PEOPLE. It does NOT say "ruled the people." Further, it says you "promote policies that protect and improve the public's health." Promote does not equal "coerce" or "force" or "rule." Maybe you should refresh your memories and remember your places (that would be beneath the people who are your bosses, by the way).

We elect representatives to a legislature where they discuss, write, take opinions on, debate, and vote on laws. We did not elect career bureaucrats to create rules, regulations, or demands on the people. If you have not been elected to a legislature then stop thinking you have any right to force your notions upon us. No rules/regulations without representation. If you are in the legislature, then it's time to remember YOU WORK FOR US. You have no business creating and passing laws that violate our freedoms and rights. If you cannot remember this, then resign in disgrace. I do not care if the legislature "grants you powers." They only serve with the consent of the governed and we do not consent to be experimented on, to be ruled by unelected (or elected) power-hungry fascists or give up our rights, freedoms, and bodily autonomy. WE DO NO CONSENT.

WE ARE IN CHARGE, not you. You have ZERO right to violate my bodily autonomy, make

medical decisions for me, force me to inject ANYTHING in my body, deny me entrance to publicly funded spaces, force me to wear fabric on my face, coerce me to inject anything into my body, coerce me to wear fabric on my face, etc. etc. etc. As a free human being, I get to decide what I inject into my body, what I wear, and where I go. My tax dollars pay for publicly funded spaces and if you want to deny me entrance to anything my money pays for then I want all of my money back and I will no longer pay taxes. Such things are literally discrimination, segregation, and immoral. I will not share my private medical choices with event staff, clerks, government officials, or to enter establishments, public or private. My private medical records are MY BUSINESS ALONE. If you think forcing people to share their medical records with others is acceptable, then you better be ready to put your own medical records out in public view immediately so we can all have a look and make decisions on what you are allowed to do, what you must inject, the behavior you are no longer allowed to engage in, etc. Further, if you want to coerce us into sharing this medical decision, then it's only fair that everyone's every medical decision be public record. Promiscuous? Then we want to see if you have STDs before you can be in public. A drinker or smoker? We get to dictate what you get to do in life. A drug user? We get to make decisions for you, too, and share everything publicly. Or maybe you should back this runaway train up and remember you serve free citizens who have the right to private medical records.

Second Question: When did the free citizens of Washington give their children to you to raise? Why do YOU think you have the right to dictate other people's children's medical decisions? Children belong to God and with their parents. They do not belong to the governor, the attorney general, legislators, school principals, babysitters, cousins, neighbors, store clerks, or you, unelected, arrogant, power-hungry bureaucrats. You have NO RIGHT to decide what is injected into other people's children. Parents have the responsibility to make decisions for their children.

COVID-19 is really not much of a threat to MOST people and it's even less of a threat to children. According to the CDC's best estimate of the infection fatality rate for individuals ages 0-19 is 0.00002, meaning 99.998% of children survive it. Why on earth do they need to be injected with things which have no long-term studies or trials? These shots have barely been around for a year and you cannot possibly argue that a year or 2 suffice as "long-term." It is horrifying that you are even considering making experimental shots mandatory for anyone, let alone children. Other immunizations (which actually IMMUNIZE, unlike the COVID "vaccines") were tested for a long time before they were used and were available for a long time before anyone considered making them mandatory. As COVID primarily impacts the elderly and the ill, it is unconscionable to demand children be forced to get injected with these experiments. Please refer to this article and many others like it for more information, as apparently you are completely ignorant of reality: <https://www.tabletmag.com/sections/news/articles/covid-vaccine-mandates-kids-legal>

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.tabletmag.com%2Fsections%2Fvaccine-mandates-kids-legal&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Ce2d3e1bc19b44d4eba2a08d9d6ebef7f%7C11d0e

Currently, as I am sure you must know, there is no COVID-19 "vaccine" available in the United States outside of ones approved only under the Emergency Use Authorization, which is only possible if there are no therapeutics available to treat something. As we all know, there are therapeutics available to help fight COVID-19. I believe you cannot mandate these shots as long as they are under the EUA. And, as you know, "Comirnaty" is not available in the United States so you cannot mandate children be forced to get the EUA injections. Or anyone else, for that matter.

To quote the article above at length:

"In 2004, under Section 564 of the Food, Drug and Cosmetic Act, 21 U.S.C. § 360bbb-3, Congress permitted the FDA to grant EUAs so that any American in a personal emergency can choose whether or not to explore potentially lifesaving treatments that have not gone through the full testing regime. In other words, the legal basis for EUAs is a matter of the individual right to access experimental treatments, not of government right to compel such treatments. EUA products, by definition, have not yet been proven safe and effective according to FDA standards.

Indeed, Congress has recognized that Americans should not be forced to take medical products that have not been deemed safe and effective by the federal agency charged with the power to decide. The same federal statute that authorizes EUA products also requires, among other things, that potential recipients of such medications be informed "of the option to accept or refuse administration of the product, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks." According to a plain reading, individuals have a statutory right to "refuse administration" of a vaccine approved only for emergency use. The language leaves no doubt that Congress intended for any decision to take such products to be made free of coercion, pressure, or duress. A city or school system that withholds children's access to education, extracurricular, and recreational activities—all crucial to their cognitive and emotional development—violates both the letter and the spirit of the statute."

I read this and think you should read it, too (or read it AGAIN): 'As the Technical Advisory Group stated during their meeting on December 29th, in order to amend Chapter 246-105 WAC "the vaccine (Covid vaccine) containing this antigen must PREVENT disease(s) that have significant morbidity and/or mortality". CLEARLY, these COVID "vaccines" DO NOT PREVENT TRANSMISSION. We were told repeatedly, by the CDC, Biden, and the rest of the snake oil salesmen, that these "vaccines" would 100% prevent you from getting or transmitting COVID-19. That was obviously a bunch of lies. Numbers show that highly "vaccinated" places are seeing massive surges of "cases." Masks also do not stop transmission (DUH) either and we do not consent to be muzzled. The only point of mandating these shots which do not prevent transmission is to control free human beings and force them to do as you "command." NOPE. We do not consent.

There are no Washington laws which give you the authority to mandate citizens must take an medication or have any medical intervention. Such a thing is so far out of your purview that you should never show your face again in public if you think you have even a tiny, infinitesimal "right" to do so. Requiring these untested "vaccines" for children is outside any law as well. Such decisions belong solely to parents/guardians and children. As the article says, "The Ninth and 14th Amendments to the United States Constitution protect the right of individuals—both children and adults—to bodily integrity and to decline unnecessary medical treatment."

Further, Natural Immunity is an important, long-studied scientific fact which those in the "health" field, in their haste to seize control and impose their own wills upon free citizens, have decided to pretend doesn't exist. Do you force those who have had chicken pox or measles, etc., to get the actual vaccines for these diseases? Do you force them to get "booster" shots? No, you do not, as such things would destroy the natural immunity which does a better job than anything created in labs. Since the COVID "vaccines" do not immunize anyone, you have no reason to coerce, compel, force, or mandate anyone into getting these shots. You have no moral, ethical, scientific, or legal standing to do so. If you think you have such rights, then please be aware that others can use the same arguments to dictate their beliefs in the future. Most Christians do not believe in sex before marriage and a case could certainly be made that engaging in such promiscuous behavior has consequences that hurt society at large, which would mean the government should be able to force interventions on those who think they have the right to decide

who they sleep with. Etc. If you want to open that door, we're happy to make sure everyone in this Godless state is living pure, holy lives.

As we do not know the bodily consequences these "vaccines" might have long-term, it is unconscionable that you would even consider mandating them for children (or anyone). We cannot have any idea how their developing bodies might be hurt by these experimental shots. Are you prepared to be sued, as a "board" and as individuals by parents whose children are damaged by something you ordered before long-term studies can possibly exist? You will be morally, ethically, and, hopefully, criminally/monetarily/civilly held liable for any consequences if you mandate these for children. If you have half a brain amongst you, then you will step back, remember your place, and wait a decade or more to see how things go. Parents/guardians have the sole rights to make this decision for children. NOT YOU.

Under Jay Inslee's hateful guidance, government workers have arrogantly decided they have the right to dictate to the free citizens of this state, to discriminate, segregate, violate bodily autonomy, and threaten, coerce, force. We live in the United States of America and as Americans, we are FREE. We have the sole right to decide what medical "treatments" are injected into our bodies. We have the right to move freely, at will, to speak freely, to assemble, and to get rid of all governments which violate our rights. You are employed by the citizens of Washington. You better remember your place. You may provide suggestions and we are free to ignore them. There is not one medical treatment or medicine which every single person needs. Not one. We do not force healthy people to have chemotherapy or take heart medication (malpractice, anyone???). We do not put casts on unbroken legs. Why on earth would you think everyone should get these experimental shots? You have no idea what consequences many people will face due to your immoral, unethical coercion. You may recommend people get these experimental shots. You may NOT demand, force, coerce, pressure, threaten, or mandate them. In the last two years, you have created a hateful, divisive, cruel society where you segregate people based on their personal medical choices. You tell them they are less than, vectors for disease, and evil, when they are not. You lock them out of society and foment hatred against them. Is it any wonder that there have been so many more opioid overdoses and deaths, more domestic violence, more suicides, more hopelessness? YOU have contributed to these deaths and despair. YOU. And yet you cruelly continue to divide and subjugate us. If you care about the health and well-being of all Washington citizens (what a laugh!), then you should be concerned with all of those people. Vastly higher numbers of people have been affected by those things than by COVID-19 but you have ignored them at our peril. You have failed to encourage therapeutics, exercise, and healthy eating to prevent COVID and other things. You have locked people inside, kept them away from co-workers and loved ones (gathering strengthens immune systems, obviously, so it's interesting to consider whether you purposefully crafted policies which forced people to weaken their immune systems), and tried to keep them frightened.

Government is instituted by the people, for the people, to make life better for the people, not to rule the people. Free people cannot be compelled by any government or business or person to violate their bodily autonomy. Do you know what we call it when a person uses force or coercion to violate another's bodily autonomy? RAPE. We call it rape and it is immoral and evil. You have no right to violate our bodily autonomy or our children's bodily autonomy. We do not consent to any violation of our bodily autonomy. We do not consent to being locked out of society. We do not consent to be ruled by bureaucrats.

If you are a doctor, you have presumably taken an oath to "do no harm." Yet, in the last two years, you have crafted policies which have done immeasurable harm. You have kept people frightened, alone, and you should be held accountable for these things. Time to remember your oaths and step back from committing evil against the free citizens of Washington. You continue to abuse power loaned to you by the legislature, which only has power because it is loaned by the people. We do not consent to be abused, manipulated, frightened, coerced, forced, threatened, segregated, discriminated against,

or locked out.

Perhaps you should spend some time learning more history so you can see how those who violated bodily autonomy and freedom are remembered. Many were put on trial and faced severe consequences for their evil actions. You have the choice to violate freedoms or to step back and recognize you have no such powers on this earth. For example, you should read the Nuremberg Code and why it was instituted in the first place. Never in history have the good guys been the ones coercing, forcing, threatening people with injections. So perhaps you might recognize which side you are currently on here. (Not the good guys, obviously.)

Nuremberg Code:

1. The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the experimental subject there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person which may possibly come from his participation in the experiment.

"The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs, or engages in the experiment. It is a personal duty and responsibility which may not be delegated to another with impunity." (This means each of you individually is responsible for ascertaining the consent of the people, as in each person you think should be forced to have these experimental shots, and if you force/coerce/threaten, then you are individually responsible for the consequences. You cannot say it was a group decision or you just went along with others. You are complicit and morally, ethically responsible.)

Dear Board Member,

I am AGAINST mandating the shot for children to attend school.

Children are at extremely low risk for Covid. The shots are still only EUA (emergency use authorization). The FDA approved drug is not being made or available in the US. This is an experimental drug and is covered by the Nuremberg Code.

Children are our most vulnerable and valuable asset. They should not be required to take an EXPERIMENTAL drug in order to attend school. The risk of lifetime damage from the drug during their formative years exceeds the risk of death from covid.

1. More children die of the flu than covid.
2. More children die in car accidents than from covid.
3. According to the CDC/VEARS reports, More children have died from the shot than from covid.

There are no long term studies to see the effects of this therapeutic on children. There have been cases of myocarditis (a life shortening disease) that especially show up in children who participate in sports.

We need to protect them from possible life long damage.

AND the Shot/Therapeutic is NOT working for Omicron. It was made for Alpha.

The Health Department should NOT MANDATE a product with this FAILURE rate. The original claims for this product were WRONG. How many more problems may be on the horizon from this experimental drug??? What if myocarditis rates increase in children with time? What if neurological problems in children increase with time? How many other issues? Possibly fertility issues in both males and females?

Who will assume the liability for this mandated experiment for the damages to the children??? Are you were willing to pay for damages caused by a shot that doesn't work maybe even half of the time against a virus that kills less children than the flu or car accidents?

VOTE NO on the mandate to ensure the health and safety of our children.

Sincerely,

Marilyn Bennett

I urge you to reject the imposition of a Covid vaccine requirement for children in Washington State. Children have a nearly 100% recovery rate from Covid 19, they have not been shown to be spreaders of the virus, and should never be required to receive an experimental EUA drug to cause severe side effects and death.

Thank you for your time,
Mary Harris

) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

Dear Lindsay,

It has been brought to my attention that this board seeks to find a way to force children in Washington State to receive the experimental, emergency-use authorized mRNA vaccine in order to attend public school.

I am a paraeducator for the Lake Washington District. I have a degree in Nutrition and Food Science. I have 5 children. If this plan is implemented, I will quit my position and take my children from this district and return to home education, like so many other good, caring parents are doing now.

I'm sad to think that you aren't aware of the outcry in this state toward the governor's tyranny and his plans to bring force to bear along with quarantine camps.... This does not benefit America or honor our constitution, and I'm ashamed at the very suggestion of such segregation and discrimination.

Realize the fight is bigger than you know. You are joining the governor in destroying our economy, our well-being, and our way of life. Please reconsider your trajectory.

Sincerely,

Noelle Simms

To Whom It May Concern;

As a mother, entrepreneur, and taxpaying citizen of the State of Washington, I am both disgusted and appalled that the upcoming discussion to remove a medical freedom of choice is even being considered. It seems the dominant party of the State would support the freedom of a woman's choice to abort (MURDER) an unborn fetus with no freedom inside the womb of it's own. So I'll keep my words brief... if it is required for children to get vaccinated for the COVID-19 virus, I WILL remove my children from public school, and homeschool my children. I refuse to inject my children with a poison, developed in haste to a virus no more deadly than the seasonal flu, and treatable with natural remedies. I have faith that I am making the most informed decision for my children and my family.

Sincerely,

Concerned Voting and Taxpaying Citizen

To whom it may concern,

I am writing to oppose the proposed covid-19 policies that are currently being considered on Jan 12th. These include:

WAC 246-100-070
WAC 246-100-045
WAC 246-100-040

Although I understand the rational behind these proposed policies, I do not think they will have the intended effect. These policies will put undo pressure on our already overwhelmed police force. These health policies and mandates should not be considered law unless the people that they effect have had a chance to review them. The language of these policies leaves a lot to interpretation and opportunity for misuse and overreach.

These policies will also discourage people from seeking testing for infectious disease and may actually exasperate the problem. Would you willingly be tested for a illness if you thought it was possible that you would be involuntarily detained?

The current mandates and policies have not stopped the spread of Covid even though the majority of people have willingly followed them. Doubling down on these policies will not improve our current situation.

Thank you in advance for your time and consideration.

Kady Bowman

enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>
)

A Covid-19 vaccine mandate clearly does not pass the 9 criteria required when Reviewing Antigens for Potential Inclusion in WAC 246-105-030. My lack of support for a mandate stems from the following criteria not being met under sections II and III on the list of criteria:

II. Disease Burden Criteria

5. The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population.

- The vaccine has been directly available to every vulnerable sub-set of the population for some time.

6. Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting or activity being given the highest priority.

- It is widely proven that vaccinated individuals can and do continue to transmit the virus. We know this because this was the science used to justify mask mandates. Masks are mandated in schools already, regardless of vaccination status, to prevent the vaccinated from transmitting the virus.

III. Implementation of the Criteria

7. The vaccine containing this antigen is acceptable to the medical community and the public.

While the vaccine may be acceptable to the medical community (although we will note that even within the medical community, the vaccine adoption rate was not acceptable enough to preclude a forced mandate), we cannot gloss over the fact that public acceptance does not even represent a strong majority.

- Under 51% of Spokane County residents are vaccinated. (srdc.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C>>)
- Less than 40% of kids 12-17 are vaccinated. (srdc.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C>>)
- Only 36% of the entire black community in Spokane County is vaccinated, and it is reasonable to assume this number is far lower among ages 12-17. A vaccine mandate in schools would disproportionately affect students of color in our community. (srdc.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C>>)

8. The administrative burdens of delivery and tracking of vaccine containing this antigen are reasonable.

- Our administrators and nurses have already given feedback that a vaccine mandate would create an unreasonable and insurmountable administrative burden involving tracking.

9. The burden of compliance for the vaccine containing this antigen is reasonable for the parent/caregiver.

- As stated in the above vaccination statistics, parents are choosing not to vaccinate their children. Forcing them to do so (as with other segments of our society who were coerced under the threat of losing their jobs and livelihoods) does not fall within a reasonable burden of compliance. It does not seem logical to vaccinate a group (ages 0-19) with such a low, even insignificant, rate of hospitalization or death, while claiming that will protect a more vulnerable group (ages 50-90) with a dramatically higher rate of vaccination (between 62%-82% based on age). Thusly, our state would propose forcing vaccination on those who do not need it, to protect those who already have it and/or could easily get it.

The vaccine is widely available to any age group now. Vaccination rates reflect individual health choices that must be protected. We have to acknowledge that individuals can

make their own health decisions for themselves and their families. There simply is not a case to be made for forcing someone to get vaccinated to protect someone else who can easily get vaccinated themselves.

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

This is an email to strongly encourage you to vote NO on any mandate for children regarding the covid vaccine. It has not been studied enough for children and children do not need this so-called vaccine to protect them. They have done quite well if they have tested positive.

Also, I would strongly encourage a NO vote for any mandate that would quarantine against someone's will! That is blatantly against our civil rights and our constitution! It will only encourage violence and increase the distrust in the government of this state. The recovery rate for someone who has contracted covid-19 or one of its variants is almost 100%! There is no reason to be so heavy-handed against the people of this state.

Thank you,

Kim Spain

Debbie Baril

The loss of bodily autonomy is a very serious thing and to this point has been relegated to communist, socialist and Marxist regimes, not free republics.

I strongly urge you to consider what the enforcement of these WAC codes would mean for our free society. Because Covid-19 is a treatable and low risk illness for most individuals - especially children, these actions would be absolutely unnecessary and contrary to our state and federal constitutions, resulting in the loss of freedom for millions of individuals.

I would also ask you to consider the severity of breaking the Nuremberg Code. Because the Covid-19 injection is still an experimental drug, it falls under its jurisdiction. All human medical experimentation is to be conducted with voluntary informed consent. Those involved in forcing a person against his or her will to participate in medical experimentation are subject to the penalties of crimes against humanity. Please recognize that those seeking to enact these proposed WAC codes are culpable.

Respectfully submitted,

Debbie MacInnis

I am strongly urging you to vote NO for vaccine mandates for our children and schools. Please resist the public hysteria and Big Pharma lobbying machines, look at the science and data for kids, and ask yourself why would we force such a thing on our precious children? FACT - zero kids 5-11 in the Pfizer clinical trial, either vaccinated or in the control group, had severe Covid symptoms. Zero. FACT - per the CDC data, less than 1/10th of 1 percent (<0.10%) of people hospitalized with (not because of) COVID were kids 0-17, and even fewer died. FACT - vaccinated people can spread the disease - look at what's happening now. FACT - we don't know the long-term side effects of this vaccine; it's just too early. FACT - the drug companies cannot be sued for any deaths or adverse reactions to their products; ask yourself why? Given all of this, how could you even consider mandating a vaccine on our children? Let the parents and their doctors decide!!!!

Also, consider also that the least vaccinated portion of our population are minorities.

What message will this send if you vote yes?

DO NOT enact a covid vaccine mandate for children of any age. If you do you will be responsible for the deaths and injury of hundreds to thousands of children. Don't be fooled by the federal government's propaganda. If you do your research, you'll understand that the covid vaccines are responsible for tens of thousands of deaths worldwide and over 1 million adverse effects. They are causing more harm than good. The vaccines have been proven to be ineffective. There are more people getting covid who have been "fully" vaccinated than those who are unvaccinated. There is no point other than for financial reasons for greedy pharmaceutical companies and state and local government agencies clambering for federal funds to get vaccinated.

Keep the government at all levels out of the family decision making process and out of the doctor patient relationship. Family decisions and medical decisions are personal and private.

What you should be spending your time on is enabling early treatment solutions that are widely available to all Washingtonians. The biggest crime of this century is that the government at all levels and medical administrations at all levels have failed to recognize that Covid can be treated early with existing medications that are already widely available.

DO NOT MANDATE VACCINES FOR CHILDREN OF ANY AGE.

I am sending this email to urge you, as a member of the WA state Board of Health, to please vote AGAINST applying current infectious disease WAC codes to include Covid-19 for all WA state residents!

This is an outrageous abuse of power and every person in WA state and across the nation should strongly object to this invasion of our privacy and our liberties as freedom loving Americans!

To allow local health officers to use the law (WAC 246-109-070) to enforce these "Emergency Orders" (WAC 246-100-045 & WAC 246-100-040) is...to say the least...tyrannical! And of course it goes with saying that this is illegal and goes against the NUREMBURG CODE Article 6, Section 28!

No policy should disrespect the rights of all to make their own health care decisions. Public health is important, but NOT at the expense of losing our GOD given freedoms. Please vote NO to these "Emergency Orders"!!!!

Thank you!

1) I did not bother to sign up for oral public comment -- I have been too often silenced, just as most of

those attempting to make those demeaning one-minute public comments were by your suspiciously defective sound system -- one that did not allow at least 3/4 of those signed up for the hour to be heard, either by

those of us listening online, or at all, with their sound being cut off. From my own personal experience,

most of those who seemed to have left the meeting before speaking were actually there, but were being blocked from speaking, just as has so often happened to me -- both online and in person.

All of the above could be easily avoided, if the mad mandates of medical law martinet members of what is now being exposed as a "COVID cult" would allow normal in-person meetings. It is becoming increasingly obvious that such virtual meetings are not to maintain the safety of the we the people, but corporate government control over us as their supposed subservient subjects.

2) Please note that there is indeed reason for the public to be suspicious, inciting some misinformation; please find some of the evidence in the following articles, even those from the corporate mainstream media supposedly fact-checking them -- especially that of job notices, unless they are faked -- of Washington State hiring for COVID Strike Force members.

3) Thank you all for seeming to do the best you could to be civil under trying circumstances, and for BOH members voting in a fair and equitable manner in the best interests of the public -- no matter what their previous intentions may have been.

FACT FOCUS: Washington State isn't changing quarantine rules

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.theolympian.com%2Fnews%2F9190601002%2F&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C18667859de8041c6eebc0>

FACT FOCUS: Washington state isn't changing quarantine rules

A Washington State Board of Health meeting on Wednesday became the topic of a nationwide misinformation campaign...

1. There is absolutely NO COVID vaccine available in the United States has received FDA approval. ALL available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. This fear monger approach by the State of Washington and the Federal Government to force American citizens to inject an experimental drug AGAINST THE LAW and is the subject of numerous lawsuits! A Federal Judge recently rejected Pfizer's claim that the two products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable'

• Children's Health Defense (childrenshealthdefense.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>

) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Targeting our children is simply another tactic to accomplish the goal of 100% of vaccination. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID! I challenge the Washington State Board of Health to show medical records for even one child who has died of COVID without co-morbidities.

3. NO ONE knows the long term risks of these vaccines. One of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM. The studies Pfizer conducted were woefully underpowered. This is an analysis of the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors. (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>) It concludes the risks DO NOT outweigh the benefits, therefore more research MUST be done before being administered to children or anyone else!

Forced vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity.

Our hospitals have more vaccinated COVID positive patients than unvaccinated, THE VACCINES ARE NOT WORKING!

If the Washington State Board of Health rules in favor of this mandate you can be absolutely certain to face legal action immediately, as this is constitutional, against the law and will be stopped!

Thank you for your careful consideration of this matter,

Kama Bigbee, PhD.

Subject: Mandatory Vaccination Objection

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org)
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>

) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

We want to voice our concern and opposition to the proposals WAC-246-100-070 and WAC-246-105. We oppose using police force be used to isolate in a quarantine facility any families or group of person because they do not want to be medically examined, treated, tested or vaccinated. That sounds eerily like Nazi Germany treatment of the Jews and I am sure that we do not want to go down that road.

We ask that you listen to the people at your meeting on January 12th and oppose these two measures.

To Whom It May Concern,

I adamantly oppose WAC 246-100 rule making that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

These are unconstitutional measures and are reminiscent of actions that individuals were tried for during the Nuremberg Trials. Please, I encourage you to be courageous and stand by our Constitution.

Please note that WE ARE OPPOSED TO THESE!!

Thank you, Jeff and Emily Woods

Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

To whom it may concern,

I am a member of the Bothell COMMUNITY. I am voicing my opinion here of complete opposition to any force by police to isolate families or individuals. To force children to have a covid shot before school admittance.

This is not only grossly illegal and against many different human rights and our God given choice. But it is absolutely deplorable, disturbing and will absolutely affect our homes.

I am as a local saying NO to all proposed WAC codes. This is my official email in response to the following meeting with public notations ending by 12 today.

Thanks,
Kayleigh Kilmer

My name is Selah. My family and I are very opposed to your proposed detainment facilities. This is evil and supporting the Devils agenda. To whomever gets the lovely job of reading these emails, first I pray for you now. I pray God would use you specifically to voice truth in the midst of lies. I pray for eyes to be opened of the grave evil that is taking place here in WA state. If you don't, people will be leaving in droves. Not only that, but WA will get even darker. The spiritual heaviness of Portland will consume WA state and God's spirit will not bless anything the state officials touch. This is a fearful time for many, but I pray for you, that God would move in your life to use you to move mountains. I pray for fearlessness in you. I pray your heart would turn to the Lord if not already and God would use YOU to stop this.

Subject: Opposition to proposed action on agenda items 9 and 11 for meeting on 1/12/2022

External Email

Good evening,

I am writing to request that you take NO ACTION on agenda items 9 and 11 for the Washington State Board of Health Meeting that is scheduled for 12 January 2022.

Detaining and forcing medical test and treatment is unconstitutional and unnecessary in the United States, especially for a flu/cold like that has a 99.8% survival rate. The consideration of activating WAC 246-100 is draconian and tyrannical. It places Washington state residents in danger of physical, psychological and spiritual harm, and is a gross violation of our constitutional rights.

Additionally, putting an experimental vaccine (ie the COVID19 vaccine) on the schedule as a requirement for childcare and school attendance is overreach. ALL of the COVID19 vaccines in the United States are experimental. Note the following from the CDC's website 'At present, Pfizer does not plan to produce any product (COMIRNATY) with these new NDCs and labels over the next few months while EUA authorized product is still available and being made available for U.S. distribution. As such, the CDC, AMA, and drug compendia may not publish these new codes until Pfizer has determined when the product will be produced with the BLA labels.'

(<https://www.cdc.gov/vaccines/programs/iis/covid-19-related-codes.html>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fvaccines%2Fpro>
19-related-
codes.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C3fdf74ca26214089964408d9d190e84d%7C11

Per Doe et. Al vs Austin, US Federal District Judge Allan Winsor rejected a claim by the U.S. Department of Defense (DOD) that the Pfizer-BioNTech COVID-19 vaccine being administered under Emergency Use Authorization is interchangeable with Pfizer's Comirnaty vaccine.

Voluntary consent of the human is absolutely essential for any medical treatment. This means that the person involved should have the legal capacity to give consent; should be so situated as to be able to exercise free power of choice without the intervention of any element of force, fraud, deceit, duress, overreaching or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. The WAC 246-100 codes introduce an element of force, fraud, deceit, duress, overreach, constraint and coercion.

The decisions you make in the next few days will be your legacy. Are you willing to be responsible for a new era of medical apartheid? Are you willing to be the cause of segregation and discrimination and possibly violence in our community? Are you willing

to answer for your choices to the public?

Please do NOT take action on agenda items 9 and 11. You alone are responsible for your decision. Consider the implications before you jump to irrational action.

Respectfully,
Lara Steinhebel

I am writing to voice my strong opposition for requiring the COVID Vax for children as a requirement for school (or any other place for entry). Children are not at an extreme risk and it should be up to parents if they want to inject their child with an experimental vaccine. This should not be something anyone in government mandates!

I also am opposed to WAC 246-100-040, Procedures for isolation or quarantine. It should be up to the individual to self-quarantine if they are sick. This should in no way be forced upon people.

It's time to let our citizens start making choices for their own health and own family. The government has done what it can to mitigate the spread of this virus, the power now needs to go back to the individual to manage their own health. If you all want something

positive to do to help us get healthy, why not actually create and promote a health campaign? Challenge citizens to get more exercise, eat healthier and take their vitamins. If everyone did this, our bodies would be healthier and less susceptible to sickness. Thank you!

Subject: OPPOSING Vaccine Requirement for School Aged Children

External Email

All:

My name is Lindsay Burmeister, I am an HR Manager in Local Government, a wife and a mother of three school aged children. I am writing in opposition to the vaccine requirement for school aged children.

On March 18, 2021, I received my first and only dose of the Moderna Vaccine. Exactly 7 days later, the injection site began twitching uncontrollably and I experienced numbness and paresthesia down my left arm. The paresthesia spread to my bi-lateral extremities and I was admitted to the hospital in early April. At the hospital, an MRI was performed which depicted inflammation in my brain and spine.

I had no pre-existing conditions prior to getting the vaccine- I had never had COVID, and I was an otherwise healthy and active person. This vaccine has changed my life. It is now a struggle to simply get out of bed, get dressed, brush my teeth and take my medication. My life used to revolve around my kids- now, it's my kids who are taking care of me.

These vaccines have failed any reasonable risk/ benefit calculus in connection with children. The decision to administer these vaccines to children has been rushed, based on incomplete data from vaccine trials, insufficient to predict rates of severe and long lasting reactions. I strongly oppose the vaccine requirement for school age children, as it has not been decisively demonstrated that the benefits outweigh the risks for young people.

My medical records are available on request. Please reach out to me if you have any further questions.

Thank you,
Lindsay Burmeister

Subject: Opposition to Mandated Covid-19 vaccination for Children

External Email

To whom it may concern,

I am writing to expressly convey my firm opposition to ANY mandated Covid-19 vaccination, ESPECIALLY for children. This would be not only a gross abuse of government authority, but also a reckless measure that will injure and potentially kill those affected. At this advanced stage of statewide/nationwide vaccination, it has become evident that previous information about the vaccine's ability to safeguard against the spread of Covid-19 effectively is in fact false. It has also become clear that children are statistically far less likely to contract an emergent case of Covid-19; that is to say that Covid-19 is far less of a threat to the average healthy child that is not considered immunocompromised or has a condition that could be classified as a comorbidity. Vaccination to Covid-19 is a decision that should only be made by the individual after careful consideration. As a medical intervention, the Covid-19 vaccines are increasingly proving themselves to not be without their own inherent risks. Many frightening cases of post vaccination injury and/or death of previously healthy children have arisen since the availability of the vaccine to younger individuals. In light of the extensive controversy surrounding this issue as well as contradictory data, I would consider any mandate of this treatment on children to be unacceptably reckless. Should this mandate of Covid-19 vaccination be implemented on children, It will be my immediate action to remove my children from the government school system, and vigorously support the responding legal opposition to this inexcusable encroachment on the civil liberties of the citizens of the State of Washington.

Thank you for your careful consideration.

Subject: Opposition proposed policies other than HB1680

External Email

What is being proposed and already forced is as you know, unconstitutional, immoral, unethical, barbaric, power grabbing, irresponsible, and greedy as I'm sure the schools will get money for forcing poison into kids and already are making them sick slowly with suffocation of masks (YOUR decisions are doing this- bit can also save kids and families) which are scientifically unhealthy to wear and do no good only harm physically, psychologically, emotionally as certain teachers punish perfectly healthy kids that they are supposed to teach educate and protect because they exercise a sane, mindful healthy dare I say normal approach to live life and breathe oxygen at appropriate levels. According to OSHA a mask is a confined space, not meant to be inhabited. Period. You need permits to enter confined spaces and constant monitoring of gases flammability etc. Gases such a CO2- what we exhale and O2 oxygen which we breathe. Oxygen levels below 19.5% are O2 deficient as is the area under a mask. Add stuffy nose and some anxiety, how does one breathe and function? Not well, not at their best. Increased fatigue, headaches, etc. Surely as parents and grandparents you want better fate and care and protection of your kids your and their rights and freedoms. Govt has overreached. They are out to take everyone down. All of you, your families, friends, people and anything you like enjoy or care about. Freedom gone. That is the issue. You all have not only a choice but an obligation in your capacities as professionals and sons, daughters, parents, grandparents to protect the future and stop what's happening now.

Have you seen Australia? Take a look. They want to remove all freedom all over the world. You mean nothing to the govt and you owe them nothing. The kids the parents yourselves. You have a duty to do what's right, not pressured, persuaded or threatened, or paid off. I implore you to do the right thing.

The only thing for tyranny to win is for good men/women to do nothing...or compitculate/sell out. Don't continue to sell out one more moment. Literally the now immediate and near future and distant future of kids rests on your decisions. Do you love your paycheck or a sum of money from feds to sell these innocent kids down the river? I'm sure you teach them.to.do.whats right, even if it's unpopular. I'm pleading that you live by example and do the same.

This, whole thing, all.of it matters. More than anything has in your life til now. Will you protect these kids, give them a fighting chance and our city and push back for our nation or will you continue to cave? God knows and sees all, even if we don't. There's none to fear but Him.

We as Americans, people need to unite against tyranny. Proposed policies to kidnap kids, families, innocent people bc they choose to not put Cancer causing and other poison in their bodies? Because they support freedom and real science that shows and proves masks and the EXPERIMENTAL jabs are harmful. More harmful. Detrimental than good? That they cause cancer [infertility miscarriages stillbirths (96%)] myocarditis- IN KIDS, Multiple sclerosis, paralysis, POTS, immnosupression through various diseases known like hiv/aids (yes in and from.jabs) and unknown. And on and on and on. THIS is what you want to FORCE into kids? Your families? Its murder plain and simple. It's genocide of all.peoples who are not elitists. They think we are all ants, not even people.

Go to America's frontline Doctors online and Dr Ryan Cole in Idaho and 15,000+ Drs who

are starting to speak up and stand up for truths. Review the studies from Drs all over the world who have been fired, gag ordered, silenced threatened killed for speaking truth about dangers of this experimental experiment. Educate yourselves, make informed decisions. If you fail to do this, how hypocritical are you?

Thank you for your time. Do the right thing. The kids need you to, your families need you to, our city, state and nation needs you too.

Subject: Opposition to mandated vaccination of school-aged children

External Email

Dear Washington State Board of Health member,

With respect, I am vehemently opposed to the proposed mandates for vaccination of school-aged children. "Following the science" has become a mantra, but it is important to actually see the science, the data and the statistics, which all show that children and young people in general have a statistically zero chance of dying from Covid-19. Yes, a handful across the world have died with Covid-19, but this simply does not equate to a threat that deserves this type of response.

There must not be a "one-size-fits-all" remedy in health care. People are different, and their bodies react in different ways. It is unconscionable to force this experimental mRNA gene therapy, that has not been fully tested, on anyone ... as a condition for attending school, or participating in other activities in our free American society.

Please may I refer you to the VAERS (vaccine adverse effect reporting system) data at
openvaers.com
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fopenvaers.com%2F&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C9a798faa77c6475cb02908d9d452ae4f%7C11d>
here
<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fopenvaers.com%2Fcomponent%2Fthe-openvaers-red-box-report%3Fuserid%3D22313-aN5egbywnQdeWB%26tmpl%3Draw%26utm_source%3Dnewsletter_42%26utm_medium%3Demail%26ut
openvaers-red-box-
report&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C9a798faa77c6475cb02908d9d452ae4f%7C11d
- the latest report shows over a million adverse reactions to the vaccines, and counting.
This number is generally considered (by the CDC) as an under-reported statistic. It
shows that over 21,000 deaths have occurred within 2 to 3 days after receiving a
"vaccine", and well over 100,000 hospitalizations!

Please, respectfully, I implore you - vote NO on mandated vaccinations.

Thank you for your time and consideration,

James Gunn

This email will certify that I am OPPOSED to the Board's formation of a TAG to review information about COVID 19 shots for consideration of MANDATING the shots for our children in schools throughout Washington state. I am completely against this mandate.

Secondly, I am in support of Informed Choice WA's petition for rulemaking – This is item #11 on the agenda for the Jan 12 meeting. It was filed by Xavier Figueroa, PhD, on behalf of Informed Choice WA, and asks the Board to establish a new rule that PROHIBITS them from adding any Emergency Use Authorized product, or any licensed product that lacks COMPLETED Phase 3 trial studies, to the school required list.

Subject: Opposition Statement - WA Citizen/Parent

External Email

Hello,

I am a parent of students in the Kittitas County region. I am in full opposition to the formation of the TAG group as well as having the COVID shots being added into the required immunizations schedule.

I am not opposed to vaccinations that have proven to prevent the occurrence or contraction of diseases. My children have been (to date before Covid shots) current with the vaccines that have been on the schedule. Our family has had a history of reactions to flu vaccines and we do not participate in those inoculations. IF the shots for covid are added to what is available to families, it certainly should remain a personal decision based on family history as to them being taken. There has been no negative impact within the school or community for our family by not taking the flu shot, as it is confidential - as ALL medical decisions should be.

If the TAG board is formed, please be sure there are plenty of individuals from across the state as well as with differing opinions so that the whole of the state is represented as it should be to ensure all voices are heard in this matter.

Please use due diligence when taking any kind of action that can cause a huge negative impact on our kids and their future. BEcause this will most certainly impact it.

External Email

☐ I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. Children are at extremely low risk of dying from covid but the risks of the vaccine are unknown.
2. There are NO long term studies to prove these vaccines are safe. That is a reckless risk to our youth. It is up to the pharmaceutical companies to prove safety not up to the public to prove harm..
3. The vaccines are still emergency use authorized only
4. There are now studies to demonstrate that both vaccinated and unvaccinated can spread covid, therefore vaccination does not stop the spread.
5. These vaccines do not guarantee the prevention of infection (as demonstrated by the current rise in cases) and medical choices must remain with the individual not the government
6. Our public health is failing our youth by censoring science and trying to take away personal medical choice

We love Washington and don't want to have to move our family from this beautiful state. Consider the low risk in children and how the virus has changed into a very weak state.

Thank you,
Jerilyn Young

Dear Washington State Board of health,

As a mother of four, ages 9, 7, 3, and 6 months, I am completely against requiring a Covid-19 vaccine for school attendance. It should be each families choice to make. If someone feels better and safer being vaccinated and/or vaccinating their children they have the right to make that choice. But forcing people out of jobs, and forcing children out of schools, and forcing people from recreational activities due to not wanting to make a medical decision is just wrong. We all have the right to sovereignty; one of the great principles our country was founded on. CV19 has gone through my house more than once, and the second time only one of us got sick with symptoms so mild I was shocked when the test came back positive. We've already built up a natural immunity, and I don't think forcing the vaccine on everyone is the way. It should remain a case by case scenario where each family makes the decision that they feel most confident in. Please don't force this on everyone.

Thank you for your time,

Kira Hesseltine

Subject: Opposition to Implementation of a COVID 19 Vaccine Requirement for Schools in Washington State

External Email

To all parties emailed,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State for the following reasons.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Subject: Opposed to mandatory Covid vaccines for children

External Email

I am extremely opposed to our WA state making Covid vaccination mandatory for child care and school admission. As a parent who researches all vaccines, even before Covid, I have always taken more than an interest in what is going into my child.

The vaccine is simply too new and experimental for me to feel comfortable putting it into my three healthy children. As parents our responsibility to our children is to make the best possible health decisions for them. I believe that a year old "emergency use" vaccine, that doesn't have 99-100% effectiveness, where we also do not yet understand the future health ramifications, is not the best for my children.

If vaccines are made mandatory in WA state, a state I have always loved and lived in, there is no doubt we will either homeschool our children, or move to a state that does not require such action.

Thank you for your time.

Subject: OPPOSED and FIRMLY AGAINST MANDATORY COVID-19 VACCINE IN SCHOOLS

External Email

to the Department of Health and ANYONE else making decisions regarding children's health and safety in the state of Washington:

I am a lifelong resident of Washington state, born and raised and am now raising my two children in my beautiful state. I am writing to you in regards to the agenda topic in which the DOH and other members will discuss whether the covid-19 vaccine should be mandatory for school children.

WITHOUT A DOUBT, IT SHOULD NOT BE MANDATORY. As a citizen, resident, tax payer and MOTHER of this state, I demand that the DOH NOT make this covid vaccine mandatory for schools. I will remove my children from the school system if this happens. I also know many members in my community that will do the same. We will take our kids out. We don't want to give any more funding to an institution that does not put the health and safety of children in school first and foremost. My decision and reason for opposing this VERY UNNECESSARY rule are as follows:

1. Covid-19 vaccines REMAIN under Emergency Authorized Use and therefore are NOT fully approved. Administering a vaccine that is not authorized for a virus that has over a 99% survival rate in children is UNNECESSARY and MORALLY WRONG. There is ZERO evidence to show that the EUA vaccine is necessary for children and adolescents. BOTH of my children have been in school, daycare, etc during the ENTIRE pandemic and we have followed the necessary steps. During this time, my children have not experienced severe illness nor have they spread illness and I firmly believe that there is NO scientific evidence that warrants a NEED to require this EUA vaccine mandatory in school.

2. Children under the age of 18 have a 99.995% survival rate from covid-19 infection. According to the CDC and WHO, they have a higher risk of death from the flu. Why are we requiring a vaccine that has almost 100% survival rate in children and lower than the flu?

Let's review the data from the CDC: In the 2017/2018 flu season (Nov-March), 643 children (under 18) died <https://www.cdc.gov/flu/about/burden/2017-2018.htm>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fflu%2Fabout%2F2018.htm&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cb331b100602f4c1e2e2e08d9d23f736e%7C11d>>. In the 2018/2019 flu season, 477 children died

<https://www.cdc.gov/flu/about/burden/2018-2019.html>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fflu%2Fabout%2F2019.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cb331b100602f4c1e2e2e08d9d23f736e%7C11c>>. In the 2019/2020 flu season, 434 children died

<https://www.cdc.gov/flu/about/burden/2019-2020.html>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fflu%2Fabout%2F2020.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cb331b100602f4c1e2e2e08d9d23f736e%7C11c>>. Comparatively, out of over 3.6 million cases of COVID-19 in children in the US, 423

have reportedly died of it as of 8/11/21 <https://data.cdc.gov/.../Provisional-COVID-19-Death.../nr4s-juj3>

COVID-19-Deaths-Focus-on-Ages-0-18-Yea%2Fnr4s-

juj3&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cb331b100602f4c1e2e2e08d9d23f736e%7C11d0e217
. That is less child deaths from C-19 than from each of the last three flu seasons. The links above showing 423 reported deaths in children from C-19 is over a period of 20 months (since January 2020), not over a 4-month winter flu season. This means the risk of death for children from C-19 per season is even lower than the flu, perhaps half as low. And the CDC's C-19 death count at the link above includes 18 year-olds, whereas the CDC's seasonal flu death count does not. It's ages 0-17. It's important to keep in mind that children who die from the flu or COVID-19 often have serious pre-existing conditions. Children with co-morbidities have nearly double the risk of severe COVID-19 than healthy children. And children with underlying conditions including obesity were found to have nearly triple the risk of COVID-19-associated death.

Children have proven to have strong innate immunity. They are safe, resilient and not at risk of death. They are critical to establishing long term sustainable and most effective her immunity.

3. Adverse reactions from the vaccine in young children. The FDA and VAERS system have reported a significant number of reactions in children, including death from the vaccine. Over 80%+ of children who have received the vaccine have had an adverse reaction. Additionally, the mortality rate of vaccine deaths has sky rocketed since introducing the covid-19 vaccine. The CDC claims that less than 1% of children have an adverse reaction, which is false and significantly contradicts data from VAERS. If you make the decision to make this a mandatory vaccine, you are directly contributing to thousands of children getting very ill and DYING from this vaccine. That will be your fault and only yours.

Make the right decision for OUR children and their health and safety and DO NOT MAKE THIS VACCINE MANDATORY.

Thank you, Kristina Mashek

Subject: Oppose Vaccine Requirement for Students

External Email

To whom it may concern:

I am opposed to the vaccine requirement for students. The definition of fully vaccinated or "up-to-date" is not well understood. I am not comfortable with an ever moving target. This is even more concerning when it is for a vaccine that lacks long term data. Short term data has shown that those who are vaccinated are still able to transmit the virus and get the virus. There is not a cookie cutter approach to respiratory viruses and parents should be able to best determine their child's risk factors. Relying on innate immunity and/or immunity from prior infection is also something that parents should be able to consider when choosing what is best for their child or children.

Most sincerely,
Michelle Zabell

What is being proposed and already forced is as you know, unconstitutional, immoral, unethical, barbaric, power grabbing, irresponsible, and greedy as I'm sure the schools will get money for forcing poison into kids and already are making them sick slowly with suffocation of masks (YOUR decisions are doing this- bit can also save kids and families) which are scientifically unhealthy to wear and do no good only harm physically, psychologically, emotionally as certain teachers punish perfectly healthy kids that they are supposed to teach educate and protect because they exercise a sane, mindful healthy dare I say normal approach to live life and breathe oxygen at appropriate levels. According to OSHA a mask is a confined space, not meant to be inhabited. Period. You need permits to enter confined spaces and constant monitoring of gases flammability etc. Gases such a CO2- what we exhale and O2 oxygen which we breathe. Oxygen levels below 19.5% are O2 deficient as is the area under a mask. Add stuffy nose and some anxiety, how does one breathe and function? Not well, not at their best. Increased fatigue, headaches, etc. Surely as parents and grandparents you want better fate and care and protection of your kids your and their rights and freedoms. Govt has overreached. They are out to take everyone down. All of you, your families, friends, people and anything you like enjoy or care about. Freedom gone. That is the issue. You all have not only a choice but an obligation in your capacities as professionals and sons, daughters, parents, grandparents to protect the future and stop what's happening now.

Have you seen Australia? Take a look. They want to remove all freedom all over the world. You mean nothing to the govt and you owe them nothing. The kids the parents yourselves. You have a duty to do what's right, not pressured, persuaded or threatened, or paid off. I implore you to do the right thing.

The only thing for tyranny to win is for good men/women to do nothing...or compitculate/sell out. Don't continue to sell out one more moment. Literally the now immediate and near future and distant future of kids rests on your decisions. Do you love your paycheck or a sum of money from feds to sell these innocent kids down the river? I'm sure you teach them.to.do.whats right, even if it's unpopular. I'm pleading that you live by example and do the same.

This, whole thing, all.of it matters. More than anything has in your life til now. Will you protect these kids, give them a fighting chance and our city and push back for our nation or will you continue to cave? God knows and sees all, even if we don't. There's none to fear but Him.

We as Americans, people need to unite against tyranny. Proposed policies to kidnap kids, families, innocent people bc they choose to not put Cancer causing and other poison in their bodies? Because they support freedom and real science that shows and proves masks and the EXPERIMENTAL jabs are harmful. More harmful. Detrimental than good? That they cause cancer [infertility miscarriages stillbirths (96%)] myocarditis- IN KIDS, Multiple sclerosis, paralysis, POTS, immnosupression through various diseases known like hiv/aids (yes in and from.jabs) and unknown. And on and on and on. THIS is what you want to FORCE into kids? Your families? Its murder plain and simple. It's genocide of all.peoples who are not elitists. They think we are all ants, not even people.

Go to America's frontline Doctors online and Dr Ryan Cole in Idaho and 15,000+ Drs who are starting to speak up and stand up for truths. Review the studies from Drs all over the world who have been fired, gag ordered, silenced threatened killed for speaking truth about dangers of this experimental experiment. Educate yourselves, make informed decisions. If you fail to do this, how hypocritical are you?

Thank you for your time. Do the right thing. The kids need you to, your families need you to, our city, state and nation needs you too.

External Email

Christy,

I am extremely opposed to our WA state making Covid vaccination mandatory for child care and school admission. As a parent who researches all vaccines, even before Covid, I have always taken more than an interest in what is going into my child.

The vaccine is simply too new and experimental for me to feel comfortable putting it into my three healthy children. As parents our responsibility to our children is to make the best possible health decisions for them. I believe that a year old "emergency use" vaccine, that doesn't have 99-100% effectiveness, where we also do not yet understand the future health ramifications, is not the best for my children.

If vaccines are made mandatory in WA state, a state I have always loved and lived in, there is no doubt we will either homeschool our children, or move to a state that does not require such action.

Thank you for your time.

Jessica Cooke

Subject: OPPOSITION of Proposed Covid-19 WAC

External Email

Dear Board of Health Members,

I've recently become aware of the Washington Administrative Code (WAC) proposals regarding Covid-19 requirements for school age children. I am in complete OPPOSITION to this proposal, and disappointed in our state leadership for allowing this infringement of our rights to even be considered. I am frankly disgusted at the lack of regard to our children health and safety, as this is not about protecting children, all science points to the opposite. Science proves that Covid-19 is as much a threat to our children as the common cold, and yet you've allowed fear and mob mentality to dictate your legislation. The possible side effects of this vaccine, which science shows to be ineffective at eradicating Covid-19 and has not received adequate long-term testing, outweigh the risks of the disease, but you are seeking to overturn the rightful responsibility and judgment of parents. Dr. Robert Malone has issued health warnings regarding this vaccine and this CANNOT be taken lightly. This is NOT a childhood disease, and does not compare to the other diseases that we've largely eliminated through vaccines. While I am thankful for access to a vaccine, I fully support the CHOICE to vaccinate against Covid-19 or not. As we have equal access to a vaccine, allow each individual to assess their own assumed risks and make the necessary decisions for their own family. Eliminating choice is a totalitarian practice and should not and CANNOT be tolerated.

The WAC proposals regarding quarantine and forced exams, testing, treatment and vaccines are unnecessary and over-reaching. The death rate for Washington state has been steadily declining for the past four months. While the cases have increased, the number of asymptomatic and low sickness vs. extreme cases have not been provided. The only data is deaths and cases, and based on these numbers, while many people have contracted the illness, not many are dying; certainly not in numbers that require you to force people to be quarantined, examined, tested, treated or vaccinated. I am OPPOSED to any forced actions and extremely disappointed that it is being discussed.

If this were truly about science and protecting children, people for the matter, all doctors and scientist would have their voices heard. Instead we are censoring and eliminating opposing research and arguments. I am appalled by the way Washington state is handling this situation and all in favor should be ashamed and concerned about the harm they are inflicting on children. Vaccination is the choice of the parents and parents alone. The School boards and government officials are overstepping and I refuse to sit quietly. This is MY child, not yours.

This is not a threat to children, nor to most healthy individuals. Educate yourselves, do research this proposal is a direct attack on human rights.

I appreciate your consideration,

Irish Lurvey

Subject: Opposition to Implementation of a Covid 19 Vaccine Requirement for Schools

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you,

Jessica Storton

Subject: Opposed to the Covid 19 Vaccine Mandate for School Aged Children

External Email

Washington State Board of Health,

I am writing to the Washington State Board of Health regarding the Covid19 Vaccine for k-12 grade students. I will address my concerns over a possible mandatory vaccine requirement as well as current covid protocol and mask mandates.

I am a stay at home mom with two young children aged 4 and 2. My husband owns his own electrical contracting company. The mandates that have been forced upon employers and employees for many in the state have not affected us, yet. Hearing the possibility of a covid vaccine mandate for school aged children that is under emergency authorization at this time is irresponsible and a huge overreach of power. In the event that it gets FDA approved, I have a hard time making my healthy child take a vaccine that has only been tested on children her age for less than one year. Both my children are up to date on their current vaccines. I am not opposed to vaccines, quite the opposite in fact. I strongly support vaccines that have been not only tested, but proven to stop infection and transmission for decades. I'm very fortunate that these exist in fact. However, the covid vaccine is not one of them. The fact that there are not long term studies done on the effects of the vaccine, gives me pause. This is not comparable to the Polio or measles vaccine, for example. This is putting many parents and guardians in a tough spot for the upcoming school year. Public school is a government program afforded to all children... so long as you comply with exactly what we say.

As we are all well aware and have been since the beginning of the pandemic in 2020, covid is not affecting school children. Oddly enough, most only get a runny nose if they have any symptoms at all. So the idea of making a vaccine mandatory for every student doesn't make sense. Is it to protect the teachers?? Well, the teachers can choose to be vaccinated, oh wait, it wasn't a choice for them either, they either got the vaccine or lost their job. So we know that teachers and staff are vaccinated, so "protecting" them shouldn't be an excuse. If the vaccine worked as it should, then by simply having the vaccine, or two or three... probably four boosters by the time next school year starts, they should be protected. If other parents want to do what they think is necessary and vaccinate their children, that should be their choice as well. They can vaccinate their children if they choose. If the vaccine doesn't stop infection or spread, then why does my child need one? The flu for decades has been proven to be deadly and detrimental to children of all ages. Why not require the flu vaccine every year for public schools? Is it because they don't prevent or stop transmission? Something both the flu shot and the covid vaccine have in common.

The possibility of making the covid 19 vaccine mandatory puts many families in an uncomfortable position. My husband and I are lucky enough to be able to search for out of state options, I know not all families are able to do so. We are actively looking into other states where these mandates do not exist. Which makes me extremely angry to feel like I have to leave a state where I grew up, attended university, and started a family just so I can have the CHOICE to do what is right for my children at this time. Trying to prevent the spread of a disease that has proven to infect even the boosted is taking a toll on all those involved in the educational setting. My daughter, who is learning the sounds of letters and how to read, has had to learn through a masked teacher for almost two years now. She isn't able to read facial expressions or take social cues from

teachers and peers in her class. On the flip side, we know the impacts of distance learning is not effective, and in most cases detrimental to the mental, and sometimes physical health of some students. Drug abuse, depression, prescription antidepressants and teen suicide have been on the rise since 2020. Why are these overlooked? The board of health should keep this in mind as well as it too is affecting the health of many Washingtonians.

We are reminded DAILY of the struggles and the fact that we are still in a pandemic with the masks that we are forced to wear. I'm curious, have we successfully stopped transmission with masks? The clear answer is no. With masks or without as you can see from states who haven't been masked all along, there are trends with covid, it surges and evens out, surges and evens out. We knew this surge was going to occur, just as we can probably predict the next surge as well. So what is the purpose of masks? My preschooler wears hers and it's wet when she comes home from her 2.5 hour school day. It's licked, dropped on the playground and put back on her face. How is this helpful? There are still breakouts in classrooms and schools where very strict protocols are enforced. How can that be if masks worked? Again, if a parent or child feels so inclined, let them choose to wear a k-95 mask. But it should be just that, a choice. My daughter doesn't get a snack at school, pre-covid they got a snack, all in the sake of transmission. Children in our district have to eat on the floor in a line for lunch. This is unacceptable. What are we doing??

To say I have been disappointed in how covid has been handled is an understatement. I'm so fortunate that my daughter was able to attend private preschool when k-12 was closed for in person learning. She will be in kindergarten next year and she will not be getting the vaccine if it is required for school. Which is unfortunate that I will have to choose to homeschool, or move out of state for my voice to be heard and for my rights as a parent to be upheld. Choose wisely as to what is actually important for the safety of the child, and not the uproar from the mob if you decide to let parents have a choice. That's all myself and many like me are asking for, a choice in our health and the health of OUR children.

Thank you,

Kari Roddan

Subject: Opposition to Implementation of a Covid 19 Vaccine Requirement for Schools

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>))

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you,
Jessica Storton

Subject: Oppose Vaccines for Children

External Email

Dear members of the Washington State Board of Health,

I and many people of Washington state oppose all COVID-19 vaccine mandates and particularly a mandate for school children.

First, for most people, the disease caused by the SARS-CC2 has a 99% survival rate. For children, it is nearly 100% survival rate. The only children who died from COVID already were sick with other diseases such as cancer. Unfortunately, many people have been listed as COVID death because they died with the virus in their system, but that wasn't the cause of their death. Thus, children do not need the vaccine.

Second, coronaviruses, which include cold viruses, are well-known to mutate to weaker forms. Yes, Omnicron may be more contagious, but the South African doctors say it is more like a cold, not a life-threatening illness except for those with compromised immune systems. Most children do not fall in that category. As they say, there is no cure for the common cold. Moreover, taking the current vaccine is like taking last year's flu shot. It is out of date.

Third, the vaccine is an experimental drug. It is against the Nuremberg Code to force someone to participate in a medical experiment without consent. Most people who consent to the injection are not given full information about the drug. (Pfizer wants to postpone publishing its ingredient list for 55 years. How does one have informed consent without the ingredients list?). Thus, there is no true consent.

Fourth, no one knows the long-term effects of this drug on children after only a few months of testing. Children's bodies are different than adults' because they are still developing. How will this drug affect their growth, their brains, their fertility?

Fifth, even if the injection was authorized by the FDA, parents have the right to medical, religious, or philosophical exemptions. Currently, only a few medical exemptions have been allowed. People must have autonomy over their bodies. This is part of having the "right to life" guaranteed in our Constitution.

Six and MOST IMPORTANT, the reports for the Vaccine Adverse Event Reporting System (VAERS) for COVID vaccine injury and death are off the charts. Young men and boys have a high risk of heart damage from this drug. One child who participated in the vaccine trial as a 12-year-old is permanently disabled from the injection. See her story here <https://www.foxnews.com/media/ohio-woman-daughter-covid-vaccine-reaction-wheelchair>. There are many others like her. As of this writing, Open VEARS has recorded over 1.8 million cases, including 21,000 deaths.

If you mandate this experimental medical treatment for all school children, you will be responsible for the harm that happens to any of them from this experimental medical procedure. The myocarditis risk seems to be inversely proportional to the age of the recipient. Young male athletes all over the world, particularly soccer players, have collapsed or dropped dead on the playing field from heartattacks caused by the injection. Teen boys have had their life expectancy shorted from this shot. Who knows what it will

do to the little boys?

Do not make this injection mandatory for school children.

Subject: OPPOSED TO VAX MANDATES

External Email

WA State Board of Health,

I am adamantly opposed to making the Covid shot mandatory for school children. We have no idea the long term effects of this shot. Already there are disturbing reports of disabilities and even death associated with these shots. Efficacy is very questionable. Why else the necessary boosters and the fact that many vaccinated still get the virus? The shot is more dangerous than the virus to children. Hence, the safety is also questionable. Damage to a child would be for their lifetime. Concerning teachers fears, it has been repeatedly shown that for healthy people recovery from the virus is most likely.

To recap the efficacy of the shots are highly suspect, safety in the short and long term is unknown and the virus is highly survivable. Intelligent use of proven and safe therapeutics to combat the secondary infections makes the survivability likely. This shot is new technology and any adverse reactions of children will last their entire lives...for some it will dramatically shorten their lives

The decision belongs to the child's legal guardian. The government should only give recommendations. Furthermore, these shots are still under Emergency Use Authorization and can not be legally required without informed consent. Therefore, the state would be legally liable for adverse reactions.

These last two years have been unprecedented in the erosion of our individual rights and freedoms. I understand the pressure you are under and ask that you not subject children and their families to the struggles this will certainly create. I pray for your courage, wisdom and discerning heart.

Best Regards,

Washington State Board of Health,

We are opposed to all your proposed policies regarding Covid-19.

- How can anyone make a decision that "One size fits all" for SARS-COV-2? We are all unique and some have medical conditions that getting the vaccine could worsen. Also the simplicity of its not anyone else choice to choose what I put into my body. How about we focus on good health, hygiene, help for those with diabetes type 2, obesity. Things that will drastically improve someone's outcome if they were to come down with Covid. They would be better equipped to handle it if their health was in order, which is also not a one size fits all. Just as in the injection is not for all.

- Isolating anyone involuntarily for quarantining for such a high survival rate is unthinkable. This is America, not Australia. This is also not Ebola, now that is a terribly tragic disease that would require full safety measures. This is not that. It exists and we should be cautious but isolating, mandatory vaccinations is not the answer.

- Our Government should not take place of parents making choices for their children, or for themselves either. This is crossing so many lines and I'm tired of the lines continuing to be moved until personal freedom and responsibility seems to have become extinct.

Hello,

This email is to express my very strong opposition to any expansion of WAC Chapter 246-100 or inclusion of COVID-19 under these rules.

To continue to centralize power in the hands of our Health Officer in Kitsap County would have disastrous effects. One individual cannot possibly be all-knowing and decisions are best made in a decentralized fashion as has been demonstrated in WA well before our state constitution was formed.

This has been especially true in our county as our Health Officer, Dr. Morrow has made false statements and grievous omissions recently that members are working hard to correct so folks in our county are better informed. What we have encountered recently show very good examples of why continuing to centralize authority in one fallible individual would not, in the end, promote health in Kitsap.

Subject: Opposed to V requirements

External Email

Dear Washington State Board of health,

As a mother of four, ages 9, 7, 3, and 6 months, I am completely against requiring a Covid-19 vaccine for school attendance. It should be each families choice to make. If someone feels better and safer being vaccinated and/or vaccinating their children they have the right to make that choice. But forcing people out of jobs, and forcing children out of schools, and forcing people from recreational activities due to not wanting to make a medical decision is just wrong. We all have the right to sovereignty; one of the great principles our country was founded on. CV19 has gone through my house more than once, and the second time only one of us got sick with symptoms so mild I was shocked when the test came back positive. We've already built up a natural immunity, and I don't think forcing the vaccine on everyone is the way. It should remain a case by case scenario where each family makes the decision that they feel most confident in. Please don't force this on everyone.

Thank you for your time,

Subject: Opposition of vaccine requirement for children

External Email

Dear Health Board of Washington,

I am a mother of 7 children, 4 who are now adults, with children of their own, and 3 under 18. I am deeply concerned with the trend of our government slowly removing our rights as parents to govern our own families. The flip flop of guidelines, the lack of information on those who've gained immunity from this virus naturally, and the lack of overwhelming outbreaks in schools and states across this nation are some of the reasons I oppose this requirement. Where are the studies from those such schools and states that have no mandates for vaccines or masks? Please reconsider what this kind of requirement will have on our already stressed, hurting communities. There are so many other places your efforts could be placed, that would bless people more than harm them. Resources like our police department that are already stressed, could be handling more impactful situations, rather than round up people who choose not to partake in this vaccine. In my own family, my grandson just had a seizure brought on by a brain injury when he was just a baby. Our oldest son adopted 2 of the 5 siblings that were taken away from a neglectful situation. His daughter witnessed her brother endure a Grand Mal seizure. What they found in the CT scan was a portion of his brain was dead from that trauma. His biological mother has had more children and has been in and out of jail. Where is the logic in this? Every child is a blessing and we need to protect them. They are not experiments. Although, as my Father in Law, found out, our government doesn't always have our best interests at heart. He died as a result of agent orange, with brain tumors and lung cancer, though he never smoked in his life. His life was cut short, by a government that knew better.

Thank you for your consideration,

Subject: Opposition to mandated vaccination of school-aged children

External Email

Dear Washington State Board of Health member,

With respect, I am vehemently opposed to the proposed mandates for vaccination of school-aged children. "Following the science" has become a mantra, but it is important to actually see the science, the data and the statistics, which all show that children and young people in general have a statistically zero chance of dying from Covid-19. Yes, a handful across the world have died with Covid-19, but this simply does not equate to a threat that deserves this type of response.

There must not be a "one-size-fits-all" remedy in health care. People are different, and their bodies react in different ways. It is unconscionable to force this experimental mRNA gene therapy, that has not been fully tested, on anyone ... as a condition for attending school, or participating in other activities in our free American society.

Please may I refer you to the VAERS (vaccine adverse effect reporting system) data at openvaers.com

- the latest report shows over a million adverse reactions to the vaccines, and counting.

This number is generally considered (by the CDC) as an under-reported statistic. It shows that over 21,000 deaths have occurred within 2 to 3 days after receiving a "vaccine", and well over 100,000 hospitalizations!

Please, respectfully, I implore you - vote NO on mandated vaccinations.

To Whom It May Concern:

If you value the public's opinion like your webpage states, then you need to know that I am completely against any of the proposed Covid Policies that are extremely over reaching and immoral. Even if you don't have a flooded inbox, you need to be 100% aware that there is at least 50% of Washington residents who stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105. If these WAC's were implemented, the WABOH will have taken a major step backwards in public trust. The citizens of this state who work hard, pay taxes and look out for one another DO NOT NEED the WABOH to implement such WAC's. We can take care of ourselves!! Law enforcement is already overburdened. I personally know many LEO's who will not enforce or comply. Why would the DOH put even more stain on our law enforcement, that makes absolutely no sense and no matter what you do to try and PR this, it will never make sense. It's irrational. In terms of individuals, schools, businesses, and the public in general, you need to allow us to live our lives as we see fit. Life MUST go on and by now, we all know the risks and safety precautions needed to take care of our own.

Respectfully,
Kim Greger

Subject: OPPOSITION of Proposed Covid-19 WAC

External Email

Dear Board of Health Members,

I've recently become aware of the Washington Administrative Code (WAC) proposals regarding Covid-19 requirements for school age children. I am in complete OPPOSITION to this proposal, and disappointed in our state leadership for allowing this infringement of our rights to even be considered. Science proves that Covid-19 is as much a threat to our children as the common cold, and yet you've allowed fear and mob mentality to dictate your legislation. The possible side effects of this vaccine, which science shows to be ineffective at eradicating Covid-19 and has not received adequate long-term testing, outweigh the risks of the disease, but you are seeking to overturn the rightful responsibility and judgment of parents. This is NOT a childhood disease, and does not compare to the other diseases that we've largely eliminated through vaccines. While I am thankful for access to a vaccine, I fully support the CHOICE to vaccinate against Covid-19 or not. As we have equal access to a vaccine, allow each individual to assess their own assumed risks and make the necessary decisions for their own family.

I appreciate your consideration.

Jess O'Neill

Subject: Opposition to covid 19 vax

External Email

To whom it may concern on the
Washington State Board of Health,

I would like to voice my extreme opposition to ALL Covid 19 vaxx requirements, including the implementation of a requirement for school children. Force or coercion has NO PLACE IN A FREE SOCIETY. Furthermore, not a single covid vaccine available to the US has received FDA approval and are still being used under Emergency Use Authorization. These drugs are experimental at best. Emergency Use Authorization products cannot be legally mandated!

The survival rate for covid is over 99% for most age groups. Never in the history of mankind have we been afraid of coronaviruses (colds) and there has never been a vaccine for the common cold. Dying WITH covid is not dying FROM covid. I, and many like me, are not blindly believing these skewed statistics and blatant lies from our government.

No one knows the long term effects of these vaccines. Short term effects already have claimed the health and lives of previously healthy adults. The Australian government is already offering compensation for those who are now suffering from side effects of the vaccine - including death.

https://www.servicesaustralia.gov.au/deceased-covid-19-vaccine-recipient-payments-and-funeral-costs-you-can-claim-through-covid-19?context=55953&fbclid=IwAR1gGNXoX_URamp4S52CiCC29JOxGQMLnnA8ZaJl4A9Bvls3xplqynmPtbc

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.servicesaustralia.gov.au%2Fdeceased-covid-19-vaccine-recipient-payments-and-funeral-costs-you-can-claim-through-covid-19%3Fcontext%3D55953%26fbclid%3DIwAR1gGNXoX_URamp4S52CiCC29JOxGQMLnnA8ZaJl4A9Bvls3xplqynmPtbc>

Please do not implement forced vaccination. Countries around the globe are seeing mass protests, food shortages, labor shortages, and this seriously threatens our way of life here in America. I appreciate you taking the time to read this email and feel free to respond! Thank you for your public service, I trust you will do the right thing.

Subject: FW: Opposition to Implementation of a Covid 19 Vaccine Requirement for Schools

From: Jessica Mccoy <jstorton533@gmail.com>
Sent: Friday, January 7, 2022 11:42 AM
Subject: Opposition to Implementation of a Covid 19 Vaccine Requirement for Schools

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you,

Jessica Storton

To Whom It May Concern,

I OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. You oppose COVID-19 shot mandates, period.

I SUPPORT Informed Choice Washington's Petition for Rulemaking. The petition is item 11 on the January 12th agenda. It was filed by Xavier Figueroa, PhD, on behalf of ICWA, and asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Medical choices need to be limited to the parent for our children. The school system's top priority is to provide an education, not determine the medical requirements of students to receive said education, especially when the data on the efficacy of the Covid vaccine is limited in its duration and concerning in its safety.

Hello,

I am completely opposed to the changes being put forward regarding the WAC laws. These changes are against my rights as an American citizen. The nuremberg laws after World War II was put into place to protect citizens from their governments tyrannical actions.

My body and what goes into it is my choice, and only my choice. The HIPPA laws are in place to protect a citizen and their medical Information. I Do Not Feel it is any of your business or the business of a staffer to see or act upon my medical records. You are not my medical doctor.

Once we as a Society start to deem people a health risk, unfit and any other things that are going to come down the pipeline, you yourselves will not be protected from this. Today, I am at risk, but tomorrow it will be you. Have you ever read the poem, And Then They Came For Me? You should reread it, or read it.

Would you be willing to hand over your child or grandchild to a stranger to lock them up away from their family? These vaccines have horrific side effects on adults and children. As a parent, do you think that some official would know what is right for the child? Seriously, each and everyone of you have no idea what is best for someone else's child. You don't even know what is best for an adult. Looking at cases through a political view, is not what is best for anyone.

The pharmaceutical companies, only want to give this to the children so they can not be sued.

Research the company's and the clauses that protect them.

Would each of you be willing to be removed from your home, family, or work to be forced into an undisclosed location, for up to 364 days I bet not. This committee is not above or better then I am. The power this committee is seeking is unprecedented and unconstitutional. It is down right wrong.

Thank you

Subject: OPPOSED to State Board of Health Proposals

□

□

What the WA State Board of Health is considering is way out of your purview! I am completely opposed to using WA State law to impose on citizens this way. What happened to life in a free country??

"Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100. Include the Covid-19 injections as part of school immunization requirements using WAC 246-105".

I am opposed to all of the above!

You do NOT have the right to do this.

Very Sincerely

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- Children are at extremely low risk for Covid
- The vaccines are still only EUA (emergency use authorized)
- There are no long-term studies to document any history of safety
- Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- The vaccine apparently does not stop the spread of the disease

Subject: Opposing tech advisory group for mandatory vaccines for children, opposing additional communicable diseases for agenda item 9. Supporting agenda item 11

External Email

Dear Washington State Board of Health,

I'm writing to oppose the TAG that WAC 246-100 be expanded to include COVID-19 vaccination as a requirement for school attendance, opposing item 9, and support item 11.

The Covid-19 vaccinations, while in widespread use, have generated a very large amount of adverse reports and reactions in VAERS. Mandating these shots relies on an unproven optimism that things will be fine for the many children who already have underlying health issues, ASD, or other chronic conditions. Those children have NOT been proven to be more in danger from COVID, but often are seriously adversely affected by vaccines that provoke the immune system in a way that goes around the normal functions of the immune system. Furthermore, regarding adding the emergency approved Covid vaccine to the childhood schedule, the science has shown that children are the least at risk and should not be forced to take an experimental product with unknown long-term effects. A mandate for an emergency use vaccine is dangerous and should be avoided, especially in light of how fast COVID is changing and the waning efficacy of the current vaccines.

As we are seeing, the vaccines and boosters are not protecting the vaccinated and are resulting in underreported yet still staggering vaccine injuries and deaths. A large percentage of the population already has natural immunity, yet the pro-vaccine community has been completely ignoring this despite numerous studies showing the superiority of natural immunity.

I would like to Oppose Agenda Item 9 that looks at expanding the authority of the health board that is already in extreme overreach for additional communicable diseases. Forcing vaccination, counseling, or detention, at the sole discretion of anyone person with little to no regard for the medical, religious, or personal freedoms granted by our constitution is abhorrent to the reasons we fought so hard to separate ourselves from England. It's essentially force medical and prevention without representation.

I DO Support the new Petition for Rulemaking, Agenda Item 11, that would prohibit making any emergency use authorized product or a licensed product that lacks Phase 3 trial studies from being a on "school required" list.

Thank you for your time and consideration,

External Email

I strongly oppose policies that would expand any authority to quarantine individuals/families into a quarantine facility involuntarily. I am appalled that an individual's bodily autonomy in regard to informed consent to any medical examination, testing, treatment, counseling or vaccination would not be recognized. These are all medical choices an individual/family should be able to make for themselves. I am also opposed to adding a Covid-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend school.

There are viable treatments for SARS Cov2. Because there were viable treatments, legally the experimental vaccines (mRNA gene therapies) should not have been allowed to be rolled out. With regard to children, they are not significantly negatively affected by the virus. It is unconscionable that the Vaccine Adverse Event Reporting System (VAERS) number of deaths has now exceeded 20,000 and the number for adverse events reported has exceeded 1M. In the 1970s a vaccine program was stopped when the death count reached 25 - we need to return to common sense thinking once again and stop this vaccine program now, let alone attempt to infringe on individual rights further.

Subject: Opposition to COVID Shot Mandates for School Children

External Email

To whom it may concern:

I do not support Covid 19 mandates, nor do I support the Covid 19 shot being added to the list of required school vaccinations for children. My rationale follows:

1. I OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose all COVID-19 shot mandates.
2. I SUPPORT Informed Choice Washington's Petition for Rulemaking, item 11 on the January 12th agenda. It was filed by Xavier Figueroa, PhD, on behalf of ICWA, and asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Thank you for your attention to this critically important matter.

Sincerely,

Laurie Serhan

Subject: Opposed COVID-19 Shots Mandatory

External Email

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- * Children are at extremely low risk for Covid
- * There are no long-term studies to document any history of safety
- * Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore, the vaccine apparently does not stop the spread of the disease.

If this passes, I will be homeschooling my kids!

Dear Washington State Board of Health,

I'm writing to oppose the TAG that WAC 246-100 be expanded to include COVID-19 vaccination as a requirement for school attendance, opposing item 9, and support item 11.

The Covid-19 vaccinations, while in widespread use, have generated a very large amount of adverse reports and reactions in VAERS. Mandating these shots relies on an unproven optimism that things will be fine for the many children who already have underlying health issues, ASD, or other chronic conditions. Those children have NOT been proven to be more in danger from COVID, but often are seriously adversely affected by vaccines that provoke the immune system in a way that goes around the normal functions of the immune system. Furthermore, regarding adding the emergency approved Covid vaccine to the childhood schedule, the science has shown that children are the least at risk and should not be forced to take an experimental product with unknown long-term effects. A mandate for an emergency use vaccine is dangerous and should be avoided, especially in light of how fast COVID is changing and the waning efficacy of the current vaccines.

As we are seeing, the vaccines and boosters are not protecting the vaccinated and are resulting in underreported yet still staggering vaccine injuries and deaths. A large

percentage of the population already has natural immunity, yet the pro-vaccine community has been is completely ignoring this despite numerous studies showing the superiority of natural immunity.

I would like to Oppose Agenda Item 9 that looks at expanding the authority of the health board that is already in extreme overreach for additional communicable diseases. Forcing vaccination, counseling, or detention, at the sole discretion of anyone person with little to no regard for the medical, religious, or personal freedoms granted by our constitution is abhorrent to the reasons we fought so hard to separate ourselves from England. It's essentially force medical and prevention without representation.

I DO Support the new Petition for Rulemaking, Agenda Item 11, that would prohibit making any emergency use authorized product or a licensed product that lacks Phase 3 trial studies from being a on "school required" list.

Thank you for your time and consideration,

Lisa Howe

to the Department of Health and ANYONE else making decisions regarding children's health and safety in the state of Washington:

I am a lifelong resident of Washington state, born and raised and am now raising my two children in my beautiful state. I am writing to you in regards to the agenda topic in which the DOH and other members will discuss whether the covid-19 vaccine should be mandatory for school children.

WITHOUT A DOUBT, IT SHOULD NOT BE MANDATORY. As a citizen, resident, tax payer and MOTHER of this state, I demand that the DOH NOT make this covid vaccine mandatory for schools. I will remove my children from the school system if this happens. I also know many members in my community that will do the same. We will take our kids out. We don't want to give any more funding to an institution that does not put the health and safety of children in school first and foremost. My decision and reason for opposing this VERY UNNECESSARY rule are as follows:

1. Covid-19 vaccines REMAIN under Emergency Authorized Use and therefore are NOT fully approved. Administering a vaccine that is not authorized for a virus that has over a 99% survival rate in children is UNNECESSARY and MORALLY WRONG. There is ZERO evidence to show that the EUA vaccine is necessary for children and adolescents. BOTH of my children have been in school, daycare, etc during the ENTIRE pandemic and we have followed the necessary steps. During this time, my children have not experienced severe illness nor have they spread illness and I firmly believe that there is NO scientific evidence that warrants a NEED to require this EUA vaccine mandatory in school.

2.Children under the age of 18 have a 99.995% survival rate from covid-19 infection. According to the CDC and WHO, they have a higher risk of death from the flu. Why are we requiring a vaccine that has almost 100% survival rate in children and lower than the flu?

Let's review the data from the CDC: In the 2017/2018 flu season (Nov-March), 643

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fflu%2Fabout%2F2018.htm&data=04%7C01%7CWSTBOH%40SBOH.WA.GOV%7Ca6a7570d02094db033a708d9d4131719%7>

. In the 2018/2019 flu season, 477 children died

<https://www.cdc.gov/flu/about/burden/2018-2019.html>

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fflu%2Fabout%2F2019.html&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Ca6a7570d02094db033a708d9d4131719%](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fflu%2Fabout%2F2019.html&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Ca6a7570d02094db033a708d9d4131719%7)

. In the 2019/2020 flu season, 434 children died

<https://www.cdc.gov/flu/about/burden/2019-2020.html>

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fflu%2Fabout%2F2020.html&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Ca6a7570d02094db033a708d9d4131719%](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fflu%2Fabout%2F2020.html&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Ca6a7570d02094db033a708d9d4131719%7)

. Comparatively, out of over 3.6 million cases of COVID-19 in children in the US, 423

have reportedly died of it as of 8/11/21<https://data.cdc.gov/.../Provisional-COVID-19-Death.../nr4s-juj3>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdata.cdc.gov%2FNCHS%2FProvisi>
COVID-19-Deaths-Focus-on-Ages-0-18-Yea%2Fnr4s-

juj3&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Ca6a7570d02094db033a708d9d4131719%7C11d0

. That is less child deaths from C-19 than from each of the last three flu seasons. The links above showing 423 reported deaths in children from C-19 is over a period of 20 months (since January 2020), not over a 4-month winter flu season. This means the risk of death for children from C-19 per season is even lower than the flu, perhaps half as low. And the CDC's C-19 death count at the link above includes 18 year-olds, whereas the CDC's seasonal flu death count does not. It's ages 0-17. It's important to keep in mind that children who die from the flu or COVID-19 often have serious pre-existing conditions. Children with co-morbidities have nearly double the risk of severe COVID-19 than healthy children. And children with underlying conditions including obesity were found to have nearly triple the risk of COVID-19-associated death.

Children have proven to have strong innate immunity. They are safe, resilient and not at risk of death. They are critical to establishing long term sustainable and most effective herd immunity.

3. Adverse reactions from the vaccine in young children. The FDA and VAERS system have reported a significant number of reactions in children, including death from the vaccine. Over 80%+ of children who have received the vaccine have had an adverse reaction. Additionally, the mortality rate of vaccine deaths has sky rocketed since introducing the covid-19 vaccine. The CDC claims that less than 1% of children have an adverse reaction, which is false and significantly contradicts data from VAERS. If you make the decision to make this a mandatory vaccine, you are directly contributing to thousands of children getting very ill and DYING from this vaccine. That will be your fault and only yours.

Make the right decision for OUR children and their health and safety and DO NOT MAKE THIS VACCINE MANDATORY.

Thank you, Kristina Mashek

Subject: Opposed to COVID vaccine mandates

External Email

Washington State Board of Health,

I am writing today because I understand that you will soon be making a decision on whether to add the Covid-19 shot to the school age vaccination schedule in order to attend K-12 school.

I oppose mandating the Covid-19 shot in all forms including for employment, accessing services, travel, restaurants, entertainment, sports, and in order to attend K-12 school. This shot is NOT necessary and is causing more damage than it is causing good. Children are the least affected by the Covid virus and very susceptible to this experimental injection. Forty two other states are successfully operating their schools without mandating masks or the Covid-19 shot. It is ridiculous and morally reprehensible to force anyone to take this shot. Our children have been hurt enough in the past 2 years with lockdowns, virtual learning, masks, etc. Please stop these knee jerk reactions by making things even worse by mandating the Covid-19 shot in order to attend school. Please also note that the Los Angeles Unified School District tried to mandate the Covid-19 shot and failed miserably.

In addition, I oppose the mandatory masking of students (and staff) as well. Masking is not healthy for our children and their ability to learn is affected. For example, when children are learning to read, they need to hear the sound and see the way the sound is made. When a teacher is wearing a mask the student hears a muffled "th" sounds for example. When a teacher is wearing a mask the student cannot see the lip/mouth formation of the sound. In addition, the teacher cannot see the way the child is making the sound when the child is wearing a mask.

Medical decisions (including masking and vaccines) are personal decisions for parents to make and between parents and their child's pediatrician. The Board of Health should respect these personal choices and put an end to mandatory masking and mandatory Covid-19 shots.

Again, to be clear :

1. I OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose COVID-19 shot mandates!
2. I do SUPPORT Informed Choice Washington's Petition for Rulemaking. It was filed by Xavier Figueroa, PhD, on behalf of ICWA.
- 3.

Please do not impose a new rule for any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Respectfully, Jenny Arkills,CMA AAMA

Subject: OPPOSED TO COVID RESTRICTIONS

External Email

To whom it may concern,

I am OPPOSED to any further restrictions, rules, or regulations surrounding COVID-19. My reasons are many. This is not by any means an exhaustive list.

The virus:

1. As time goes on, the virus may be more transmissible but has become far less deadly
2. The survival rate (as I know you already know), is over 99% - your responses to this have been out of proportion to the threat

"Vaccines/Natural Immunity":

1.

A large percentage of people have already had the illness and have durable, robust, and long term immunity across variants. I have a good basis for saying this and will provide you with studies, journal articles, and professionals in the field of immunology who support this claim.

2.

The "vaccines" are not what the word implies. They do not prevent getting or transmitting the disease. In fact, the mechanism by which the COVID shot works is to make one's own body become a production factory of the toxic spike protein within itself (which makes the "vaccinated" super-spreaders). It should then be called a gene-based therapeutic by which we hoped it would lessen severity of disease - which has also rapidly been shown to also not be the case.

3. By your own logic then, if a large proportion of people have had the shot and/or have had the actual illness and recovered, then it stands to reason that any further restrictions would be ridiculous and not based on any science or evidence whatsoever. Either they are protected the way that you are asking them to be, or they have natural immunity which is even better than what you are asking. It would literally be tyranny for tyranny's sake - and that is obviously unacceptable.

Looking at other places that have had success:

1. Let us take a look at what has worked and what has not worked.
2. Japan: no mandates, no quarantine camps. Lots of freedom and almost no cases. Very well under control

3. Uttar Pradesh in India: used early treatment and No vaccination or quarantine camps. Almost no cases and society is running as usual.
4. Southern Africa: The only places having trouble are the ones who are pushing the COVID shots. Any other areas not looking to have any heavy handed policies are thriving with little to no policies. Plus these areas routinely use anti-parasitics.
5. Colorado & Florida: I am now just working off of recent memory, but these two places are examples of allowing people to make a choice, and not having everything fall apart. The more authoritarian any place gets, the worse the outcomes. Both of them are managing their COVID cases fine by not managing it essentially. Let people decide what is best for them and the rest takes care of itself.
6. Why on Earth would you double down on policies that have only exacerbated our current situation. It is literally the definition of insanity to keep doing the same thing (or more of it) and expecting a different or, in this case, better result. What you have been doing with masking, quarantines, shots, and no early treatment is a failure.

How the country and the world will view you as humans and as a board:

This should make you sit up and take notice. If you go down the path of authoritarian dictators - our country, the world, and history will not be kind to you; and rightfully so. This is the kind of stuff that happens in China and North Korea. Heavy handed, top-down rule making with no guiding morality, consensus among the governed, or even any evidence whatsoever that what you are doing is meant to serve us (as "public servants"). You do not have our consent. You do not have sufficient evidence. There is no coherent guiding morality. You will be viewed as ego-tripping tyrants on a power binge. I would think very carefully about this, because you are making history, and it can be for the better or for the worse. Make the right choice, which is the one that lets individuals decide what is best for them and their families. If you make the choice to allow families to decide, you will be seen by the state, country and the world as reasonable, thoughtful and righteous. You can literally be the heroes here that save us from tyranny and oppression. You will be lauded. I am praying that you take my words to heart.

Sincerely,

Marie Tansy

Hannah,

I am extremely opposed to our WA state making Covid vaccination mandatory for child care and school admission. As a parent who researches all vaccines, even before Covid, I have always taken more than an interest in what is going into my child.

The vaccine is simply too new and experimental for me to feel comfortable putting it into my three healthy children. As parents our responsibility to our children is to make the best possible health decisions for them. I believe that a year old "emergency use" vaccine, that doesn't have 99-100% effectiveness, where we also do not yet understand the future health ramifications, is not the best for my children.

If vaccines are made mandatory in WA state, a state I have always loved and lived in, there is no doubt we will either homeschool our children, or move to a state that does not require such action.

Thank you for your time.

To whom this may concern,

I'm absolutely against the vaccinations for children. Trying to pass a bill hush hush is Absurd. You all have the audacity to tell the parents that your even considering a force of vaccinations for our children to attend school, or any other activities. Non of you have the right to step in and say what we will and can't do for our children's future/safety. All the vaccines side effects are off the charts for adults. The truth is out, stop forcing this poison in our children. It's not even fda approved. What about the lorn term effects? Adult "vaccinations" are still in Experimental stages. No long term studies have been done since this is brand new. I will not allow you to threaten the quality of life and future of my children by forcing the vaccinations in my children that are not life threatening. Please look down deep into your hearts and allow the parents to choose what we do for our kids. You we're not there when OUR children were born, first steps, first word, and etc. You may have children of your own. You must understand the frustration and angry we are all going through. I love my kids more then anything in this world. I will fight to protect the Innocence of this world, which is our kids. Please deny this and throw it out.

Thank you for your time

Subject: OPPOSITION TO MANDATORY COVID VACCINES AND RULE CHANGES

External Email

I am writing to you today to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State, and also extreme opposition to a rule change to include Covid under the Communicable and Certain Other Diseases category.

No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization -- yes still. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cd544b7d49b904731ca2d08d9d21402e4>>
) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID, as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show proof of medical records for even one child who has died OF COVID. The data we've been following for nearly two years proves undeniably that children are not at any high risk of death from this virus, nor are they "super spreaders", nor are they spreading anything asymptotically. (There are so many sites to share with data, science, doctors, proof that I will assume you've been keeping up to date on your own.)

No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered and grossly manipulated.

Just yesterday, former White House advisors conferred that this virus will be part of a normal routine of similar viruses. This Covid virus, just like RSV, was in fact man-made and released (whether it was intentional or not has yet to be proven.)

"The 'new normal' requires recognizing that SARS-CoV-2 is but one of several circulating respiratory viruses that include influenza, respiratory syncytial virus (RSV), and more," the authors write. "COVID-19 must now be considered among the risks posed by all respiratory viral illnesses combined."

The virus is waning itself out, as viruses do, and the newest strain of Omicron is proving just that. We need to collectively band together as Americans, to do what is very best for all people, and stop living in such extreme fear as being mandated by our main stream media. Several mandates are literally killing people at extremely high rates: Search Results from the VAERS Database (medalarts.org)

I am completely against any of the proposed Covid Policies that are over reaching and immoral, and stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105. Forcing anything on free Americans protected by the Constitution is asking for strife and dissension. We will hold

the line against tyrannical mandates and proposed policies that violate our civil liberties and fundamental rights as human beings. And I stand with the Word of God:

"Praise the name of God forever and ever, for he has all wisdom and power. He controls the course of world events; he removes kings and sets up other kings. He gives wisdom to the wise and knowledge to the scholars. He reveals deep and mysterious things and knows what lies hidden in darkness, though he is surrounded by light." Daniel 2:20-23

"Speak up for those who cannot speak for themselves; ensure justice for those being crushed." Proverbs 31:8

Please do the right thing and reject any requirement of these vaccinations for school age children and reject the change of rule to include Covid as a Communicable Disease. I call on you to represent the population of those whom you swore to be a voice for to reject all such aforementioned policies. I stand with the Constitution - will you? I am praying over you as are countless others as you make the right decision.

Thank you,

BOARD OF COMMISSIONERS
FRANKLIN COUNTY
WASHINGTON

January 7, 2022

Washington State Board of Health,

As a Commissioner of Franklin County, I am completely against any of the proposed Covid Policies presented in the following WAC's, 246-100-070, 246-100-045, 246-100-040, 246-100 and 246-105, as I feel they are overreaching and immoral. There are many questions pertaining to these WAC's, which I would like addressed in this letter that remain unknown.

- What law enforcement agency is the legislature planning to work with to enforce the vax mandates?
- What will be done to citizens who refuse medical care or vaccination?
- Will children's and their parent's doctors be included in the decisions regarding medical exams, evaluating their health conditions, and making the decision to vaccinate--or will the State Government now take on this massive responsibility minus personal physicians?
- Will State Officials have full access to all citizens' health records?
- In one section of the discussions we are researching, "diseases" to become the responsibility of state governing officials to evaluate, is not defined. Do you have a definition of what health conditions The State will now evaluate and require forced treatment for?
- To go along with vax and medical care mandates; will the State of Washington be exempt from any legal liability on their part, for damages done to children or adults due to forced medical care?
- What happened to my body, my choice? Especially pertaining to a virus that has a less than 1% mortality rate.

Once again, I am opposed to these WAC's and the destruction they are doing to our community.

Sincerely,

A handwritten signature in blue ink, appearing to read "Clint Didier".

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

This has gone too far. This is unacceptable.

State Brd of Health:

I want to register my strong dissent against any regulation that would forcibly inoculate citizens against COVID-19 and its mutations. When the state does these kinds of things, it abdicates its moral stance and its ability to govern a free citizenry.

I understand you are taking comments and voting on a series of policies on January 13 which concern themselves with forcible actions and even retention of citizens regarding the vaccine. Are you crazy? Is this the Soviet Union? Is this China, where they drag people around physically to force them to be inoculated? I'm a vaccinated and boosted person but I cannot support such bizarre regulations.

On a practical level, do you actually propose that local governments will be able to corral and herd whole families into some kind of government facility? Our jails are overflowing already with lawbreakers and now you propose to make lawbreakers out of freedom loving citizens. You do not deserve the responsibility you have If you enact such regulations.

Subject: Proposed Covid Policies and January 12 Meeting

External Email

As a vaccinated Washington state resident who believes in justice, I am writing to protest the new Covid policy being considered by Washington's Board of Health at the upcoming meeting on January 12. The proposed policy for the inclusion of Covid 19 into existing WAC codes is extremely unjust for many state residents. It is divisive and an unfair--a surprisingly extremist direction to turn for determining Covid policies.

Have you thought through the implications of what is being proposed? Do we, as a state, want holding facilities again, reminiscent of the shameful internment camps of the past? Are you wanting to impose totalitarianism on the people of this state? Do you as board members want to be known for treating residents as animals with no rights and no opinions or convictions of their own? These are questions that you, the board, should be asking and then answering unanimously with a resounding, "No."

Is the board thinking seriously about what's at stake? Would the good people on this current Board of Health really want the legacy of having been responsible for turning our state into a police state, and, thereby--due to getting the police involved as a show of force--disrupt the peace, scar lives, traumatize and harass children and families, potentially cause civil unrest, dehumanize society and bring lasting shame upon themselves, as board members?

I am asking, do our good BOH members not realize that they are making people lose faith in them by their willingness to consider such an unjust course of action? Do they not realize that they will incite widespread anger by residents who feel hurt and betrayed by the board? Aren't they aware they will do a lot of harm, when, surely, their intentions are to do a lot of good?

I urge you, the board, to think more seriously about the course of action you are considering, and all of its ramifications. These ideas for Covid policies on the agenda for next week's meeting are bad ideas. They are harmful. You are above this and do not need to soil your good names this way. Instead choose fairness, justice and compassion.

Demonstrate you are open-minded by acknowledging valid concerns of those with other viewpoints, such as personal convictions and scientific arguments against getting vaccinated. Leave a legacy that all people can applaud. Bring us through this Covid crisis compassionately and peacefully without resorting to force and without getting the police involved. Afterall, we all have to answer to God for how we treat other people. Let us show mercy.

I oppose the inclusion of Covid 19 into existing WACs, including, but not limited to: WAC 246-105, WAC 246-100, WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100-070, and so on.

Sincerely,

Subject: Proposed COVID Policies

External Email

Good Morning,
I am completely against the proposed COVID policies. They are over reaching and immoral!
On top of that, there isn't enough research, study and knowledge to back up these actions!
I, along with many other Washington residents, stand against these proposed WAC's :
WAC 246-100-070, WAC 246-100-045, WAC 246-100-040.
Not only are these an infringement against our constitutional rights, but also our moral & personal rights!
If these pass, I along with MANY other WA residents will leave the state and relocate to states which protect and honor our rights and freedoms.
Natural Immunity must be considered in the fight to end the pandemic.
Everyday we are seeing natural immunity being considered, questioned and in some cases allowed. Since when did a man-made vaccine overrule our bodies and our immune systems.
Look at the data and see the writing on the walls. Vaccinated people are still contracting and spreading COVID, they are filling up the hospitals and ICU and early children have a 99% chance of survival.
This is America and we have the right to decide what goes in our bodies.
If this passes I will take all of my children out of public school, and so will many other parents.
Actions have consequences and WA residents will not stand for this kind of unconstitutional power grab.

Thank you for your time and consideration!

Subject: Proposed change to WA state health law

External Email

To whom it may concern,
I would like to share my thoughts on the proposed change to WA state health law.
This whole idea of proposed change is concerning to me. There has been enough time and data available now to show that vaccinated people are catching and spreading Covid. So the idea that vaccinating everyone will change the spread is just not scientifically correct and has no data to back that idea.
This is not a one all fix. Many people have compromised immunity auto immunes and data shows with this vaccine it can cause more complications and even death. Being forced seems to totally go against the Hippocratic oath.
Covid has already hurt people enough they don't need to be hurting people even more. Many people have had Covid already and science shows that those people have just as much if not more immunity to Covid as vaccinated. So then forcing this vaccine is only putting them in harms way.
Thank you for the time to hear the people.

Do not make this proposed change.

Thank you,
Jackie DeVries

To whom it may concern:

As a parent of a 16 year old young man,
I am completely against any of the proposed Covid policies that are overreaching and immoral.

I am strongly against: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

If these are implemented, I will not hesitate to withdrawal our son from the the school system, and find some other means of education.

I am not an "anti-vaxxer", just a concerned parent with common sense. We, as a family, and contributing members of society (and registered voters and taxpayers), are completely aware of the risks that are involved in daily life, and take the necessary precautions to navigate through ALL the risks that life has. Any mandates or policies that threaten some sort of "discipline" or "removal" of rights, are not moral or in anyway shape or form, the way that Democracy is supposed to work.

Regards,

Neil Sine

To Washington Board of Health,

I am a 65 year old woman who has spent my life eating healthy, exercising & respecting the body God gave to me.

I am completely against any of the Covid policies that are being proposed. I feel they will rob me of my right to care for my health in the manner for which my body was created. I feel these policies are over reaching and feel like I will soon live under a Nazi State of control if they become law.

I stand against these proposed WAC's: WAC 246-100-070; WAC 246-100-045; WAC 246-100-040; WAC 246-100; WAC 246-105.

I would suggest you discuss whether your law will really protect people from a virus that has a brain to fight any vaccine that might be created. Also investigate the science that proves stress can negate the benefits of a vaccine.

The best way to fight this pandemic is to help people understand taking care of their health is the best way to build their immune system. Stop stressing the public with your fear & perhaps those who do choose to be vaccinated will find the science can work and won't require boosters upon boosters.

Trusting you will make the right choices for all and not just the paranoid.

Sincerely,
Janise Disbrow

To all of whom it may concern,

I am absolutely against any of the proposed covid policies that are overreaching and against my religious freedoms and autonomous rights.
I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

It is absurd to think anyone should be forced to receive a vaccine that does NOT prevent contracting the virus nor spreading the virus. It is absurd to mandate a vaccine when Covid-19 has a low fatality rate. It is absurd to mandate a vaccine when most age groups, specifically children, do not have a high risk of serious illness due to Covid-19.

It is up to the PARENTS whether or not an emergency vaccine should enter any minor. There are zero long term studies of the side affects (due to the vaccine being new) of this vaccine which should worry any health department. All long term expectations of the vaccine are speculative and therefore should not be regulated for anyone.
No child should be subjected to an experiment. Especially a mandated experiment.

To whom it may concern,

I am a WA resident. Along with many others, I am completely against policies WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

Medical freedom is a part of our God given "unalienable rights" as the constitution puts it. Law enforcement doesn't not have the right to over step those rights, and neither does the health department. It's an unalienable right for a reason.

Vaccines are effective scientifically. Mandating and enforcing them? That's effectively communism. If your goal is to make everyone have the same status medically as "vaccinated," then take a look at the Soviet Union, Nazi Germany, or even the holocaust. All were an effort to make everyone "equal and the same," except what it did was throw peoples right away to be different and have personal beliefs.

Best,
JS

Subject: Proposal to add Covid inoculation requirement for public school attendance

External Email

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets vaccine, one group gets placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccine adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time.

communicabledisease@sboh.wa.gov <mailto:communicabledisease@sboh.wa.gov>
<communicabledisease@sboh.wa.gov <mailto:communicabledisease@sboh.wa.gov> >

I oppose the Communicable and Certain Other Diseases Rule.

I am completely against any of the proposed Covid Policies that are over reaching and immoral. I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

Additional comments:

(20) "Medical treatment" or "treatment" means the treatment for curable diseases and treatment that causes a person to be unable to transmit a disease to others, based on generally accepted standards of medical and public health science.

With regard to COVID, the vaccines are failing to cause a person to be unable to transmit a disease to others. And "generally accepted standards of medical and public health science" are controversial at best, and at worst are determined by large pharmaceutical companies controlling funding for research and spending more money lobbying than on research. They have no liability for so-called vaccines, they provide misleading poorly designed short-term unblinded research, they have had to pay large settlements for committing fraud, and they are focused on profits at the cost of human lives. Is experimental vaccination that carries risk of death and permanent harm the "treatment" you are proposing?

Isolation" means the separation((, for the period of communicability or contamination,)) of infected or contaminated persons or animals from others ((in such places and under such conditions as)) to prevent or limit the ((direct or indirect)) transmission of the infectious agent or contaminant from those infected or contaminated to those who are susceptible to disease or who may spread the agent or contaminant to others.

Now why would you propose removing the provision that specifies the period of isolation?

(13) "Health order" or "order" means a written directive issued by the state or local health officer that requires the recipient to take specific action to remove, reduce, control, or prevent a risk to public health.

Considering that health orders could include specific action (presumably including vaccination), and that so-called COVID vaccinations are currently available under emergency use authorization (and not approved) and are being administered without informed consent, you should be on notice that this revision puts your "health officers" in the position of further subjecting people to medical experiments. Is that what you're desiring to achieve? Involuntary participation in human medical experimentation? Is the resistance to your attempt at one-size-fits-all mandated vaccination so great that you must resort to these measures?

WAC 246-100-045 specifies "competent medical care" and there is already a great shortage of that. How would you propose ensuring competent medical care?

I don't have time to continue picking this thing apart, but it appears to be an attempt at inappropriate and inadvisable overreach. How would you propose implementing these WAC provisions? The potential for human rights violations, civil rights violations, discrimination, government overreach, and similar harms far outweigh any of your fabricated benefits in this poorly handled COVID crisis that has already been made exponentially worse by the way it has been mismanaged by public health authorities.

Under these provisions, it appears it would be easier to detain someone for having symptoms of the common cold than it would be for a victim of domestic violence to get a restraining order. Even mentally ill persons at risk of causing harm to themselves and others must be allowed a medical exam and have a court order for involuntary medical treatment. Quit trying to impose your ineffective and dangerous pharmaceutical products on adults and children who do not want them and who recognize that there are safe and effective alternatives.

If you're going to mandate anything, you should mandate that your public health officers and authorities read "The Real Anthony Fauci: Bill Gates, Big Pharma, and the Global War on Democracy and Public Health". The author welcomes debate and any sincere scientific challenges or updates to the thoroughly researched content.

I imagine some of you believe you are acting in someone's best interest, but you are merely doing the bidding of Big Pharma while failing to represent the people and protect our democracy.

A Very Concerned Washingtonian.

Subject: Proposed Covid vaccine mandate

External Email

Dear WA DOH board member:

Thank you for your contribution and effort during this strained time in our community and world.

As a concerned parent of two boys ages 5 & 9, and pediatric RN, BSN with 20 yrs experience, 17 of those at Seattle Children's Hospital, I humbly ask you to allow parents to continue to decide what is ultimately best for the health, education and future of their children.

We have been severely challenged these last almost two years, as I'm sure you have also, in making decisions for our families that will allow our conscious to rest and be able to sleep at night. Medical choice is integral to parenting and our wonderful nation's liberties. None can argue after the experiment of this last year and a half that our kids need in-person school, now more than ever. Parents want teachers to remain healthy and be able to support students, however mandating an as-of-yet experimental drug that doesn't protect them from contracting or transmitting the virus does not make sense nor solve the problem. This virus has consistently not been deadly to most healthy children with a 99.98% survival rate, and we do not know it's effects on their bodies 5, 10, or 25yrs from now. Not only that, but most of us find injecting them every 3-5 months to maintain any benefit medically irresponsible and morally reprehensible. If there is one thing I've learned in 20yrs of practicing nursing/medicine, it's that children's bodies are not little adults. Giving them a smaller dose of the adult dose does not mean it will do the same thing or have the same side effects as it may on a teen/adult. Also, I firmly believe the body is well-designed to contract and mitigate disease by creating acquired immunity/antibodies that last longer and work better than it appears the current vaccine can do. I am not an anti-vax parent, but I do have an issue with a vaccine that doesn't do what it should and we have no long-term research on.

Furthermore, after being so let down by schools due to teacher union chaos, I fear many parents will simply choose to no longer send their kids to school if this mandate goes through, either choosing homeschool or leaving the state. My husband and I will be moving our family to another state if this mandate is approved.

Thank you for your time and effort in reading this. Please do the right thing for the good of our state's children and their futures by recommending NO Covid vaccine mandate to be able to attend school.

Janine Johnson
RN, BSN

Dear Washington State Board of Health -

I am completely against any of the proposed Covid Policies that are over reaching and immoral, and stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105. These policies are draconian, unneeded, and an absolute violation of our God given rights.

For your consideration:

- What test will be used to determine SARS-COV-2 infection?
- CDC withdrew the request to the U.S. Food and Drug Administration (FDA) for Emergency Use Authorization of the current test being used.
- Does the testing isolate only for the SARS-CoV-2?
- Where is the data that isolates a live sample of the SARS-CoV-2 for these tests?
- A testing device would need to be proven reliable against a reliable isolated live sample with verified repeated data and studies
- Where is the data that shows the science for the accuracy for these tests? There are so many False Positives and False Negatives.
- How can anyone make a decision that "One size fits all" for SARS-COV-2?
- With a population that is supposedly 80-90% vaccinated how can we still be having such outbreaks? After the Omicron wave passes, most all the population will have natural immunity to COVID. These policies are not only horrible, they couldn't be considered at a worse time, as we begin to see an end to this pandemic.
- With each new variant, the symptoms lessen, as with Omicron; a very mild variant, for most, it's no worse than a bad cold.
- Why is Natural Immunity from a SARS-COV-2 infection not noted or taken into consideration?
- Isolating anyone involuntarily for quarantining for such a high survival rate is unthinkable. This is America, not Australia.
- Our Government should not take place of parents making choices for their children, or for themselves either.
- People are waking up and understanding that the science with no published studies for SARS-CoV-2 is more about Control versus Health.

Thank you for your time.

Subject: Proposed Covid Policies Concerns

External Email

Two Whom it May Concern

As a resident of Washington State since 1985 I am concerned and completely against the proposed Covid Policies being considered by the WA State Board of Health.

Please consider these policies with wisdom and thoughtfulness for what implementation of these policies will truly mean. These policies are an over reach by government/public servants and an abuse of power and will discriminate in harmful ways.

Please do not allow our government to coerce its citizens to accept medical procedures against their will or discriminate and shame them if they cannot comply. This is not how our country was meant to run and I am concerned for the future if this is allowed to continue.

I stand AGAINST these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC-100-040, WAC 246-100 and WAC-246-105

Thank you for your consideration and review.
Sincerely.

Subject: Proposed Covid -19 WAC changes

External Email

Senator Lovick,

I am writing to you today in regards to the proposed WAC changes involving Covid-19, specifically WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, and WAC 246-105.

I am an RN of 44 years working in ER and ICU. I am outraged that our state has been reduced to this kind of tyranny.

I am 100% against these proposed policies. They are completely immoral, illegal, and unconstitutional. Detaining citizens against their will without due process is illegal. The government has zero right to have any say in a personal, medical decision.

Regardless of where you stand with the Covid-19 vaccine, mandating experimental treatment without informed consent is wrong. Forcing this experimental vaccine on our children is wrong.

There is no benefit in forcing a vaccine that does not prevent the transmission of the virus.

The logic is just not there.

Please consider my comments when making your decision. I have lived in Washington my entire life and, with the direction this state is heading, I don't recognize it anymore. If these proposed changes go into effect, I will move to another state. Please be on the right side of history. These proposed WAC changes will turn this state into a modern-day Nazi Germany.

I appreciate your time,
Michelle Dupar, RN ,BSN, CCRN

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 99 percent of the population. Covid vaccines have little effect on Covid, and in fact, most people who get this Covid and spread it have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. They also do NOT have the right to force vaccines on citizens who do not choose them.

This is not about our health. This is about control and it is NOT in the purview of the Washington State Department of Health or ANY elected official or unelected state employee. These decisions are the right of every citizen and NO law, mandate, code or policy can override those rights. We are NOT granted rights from the State. The State is REQUIRED to protect our rights and not infringe on them.

Thank you for your consideration,
Marion Friedrich

Hello,

We are against any of the proposed Covid policies that are over reaching and immoral!

We stand against these WAC's:

WAC 246-100-0070

WAC 246-100-045

WAC 246-100-040

WAC 246-105

HALT Immunizations for Children of Washington State!

Action: We the constituents and community members of the State of Washington, DEMAND the Washington State Board of Health REFUSE to make Covid vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

Thank You!

Vernon & JoAnn Dykstra

To whom it may concern,

I am absolutely against any of the proposed covid policies that are overreaching and against my religious freedoms and autonomous rights.

I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

It is absurd to think anyone should be forced to receive a vaccine that does NOT prevent contracting the virus nor spreading the virus. It is absurd to mandate a vaccine when Covid-19 has a low fatality rate. It is absurd to mandate a vaccine when most age groups, specifically children, do not have a high risk of serious illness due to Covid-19.

It is up to the PARENTS whether or not an emergency vaccine should enter any minor. There are zero long term studies of the side affects (due to the vaccine being new) of this vaccine which should worry any health department. All long term expectations of the vaccine are speculative and therefore should not be regulated for anyone. No child should be subjected to an experiment. Especially and mandated experiment.

Thank you for your time,

Kendra DeVries

To the Members of the WA State Board of Health:

There is no reason to apply current WAC code to include Covid 19. There is no reason to use law enforcement to enforce an emergency order to involuntarily detain anyone to be isolated at a quarantine facility. Potentially forcible vaccinating those who have chosen to forgo vaccination is wrong, and also unnecessary.

The current Covid 19 vaccinations:
Do not prevent transmission
Do not prevent infection

The current Omicron variant is mild - and while cases are increasing - deaths are dramatically decreasing. Omicron is actually helping with immunity. Every single recovered case of Covid brings with it natural immunity. There are over 100 studies now showing that natural immunity is far superior to anything from a vaccination - and does not require constant booster shots.

We were told, in error, that the vaccines were 95% effective. We have seen their effectiveness wane in just about 6 months time, to around 25%, depending on which shot we are looking at.

Overall, these policies are over reaching and immoral.

Vaccination of children against Covid 19 to attend school is also wrong, and should not be implemented. The science shows that children do not spread Covid, and that the survivability rate is in essence 100% for those who do contract it. (99.997%)

I offer below for your own consideration, more reasons to not implement these policies:

1. The mandates are incoherent. Either the "vaccines" protect, or they do not protect, those who have received them. If they do protect, there is nothing to fear but fear itself, which the government has a duty to resist rather than promote. If they don't protect, they ought not to be forced on others. We have seen that they do not protect.

2. Such mandates are contrary to science, as to sound reasoning. It has become evident recently that the vaccinated, too, are prone not only to contract Covid, but to spread it. There is increasing evidence, as predicted by eminent scientists, that mass vaccination of people who do not need protection is driving variant production and dangerous antibody dependent enhancement (ADE). Moreover, many have already been exposed to SARS-CoV-2 and have robust natural immunity. It is particularly dangerous for them, as for the young, to take these injections.

3. Coercive mandates represent a violation of individual autonomy. Vaccination decisions, as some courts have recently reaffirmed, are personal medical decisions that cannot appropriately be determined by anyone other than a patient and his or her own

doctor; nor can information about those decisions, except in extreme cases, be demanded by third parties.

4. These mandates serve to reinforce the vaccine passport system or to achieve its goals by other means. But vaccine passports violate the principles of liberty, equality, and fraternity. They severely erode natural and constitutional rights while accomplishing nothing that protects the citizenry, for people without passports are often immune and people with passports are often not immune. This suggests to any thinking person that such instruments are political not medical in nature; in short, that they are instruments of power, not of faithful service to the public.

5. It is deeply unethical to ask people—especially young people who, absent serious co-morbidities, are not at risk from the virus, but are at risk from experimental measures—to submit to those measures because older people, in a position of power over them, are fearful. Inasmuch as this fear is stoked by those plainly in a conflict-of-interest position, who stand to gain financially and politically from the imposition of vaccines or vaccine passports, it is doubly unethical.

6. People who are pressured or coerced into vaccination and who suffer vaccine injury—deaths and serious injuries are being reported in significant numbers in many jurisdictions—will be in a position to take legal action against those who did the coercing, or who suppressed knowledge of these injuries. Others who are disadvantaged by non-compliance may also be in a position to take legal action. (I encourage you to read the Statement of Non-Compliance

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fzeroanthropology.net%2F2021%2Fof-non-compliance-with-mandatory-vaccination-in-canadian-universities%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1fd7ca93ba3e4cf5d5a308d9d17aa766%7C11d0e217262&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1fd7ca93ba3e4cf5d5a308d9d17aa766%7C11d0e217262> produced by Professor Forte, with which I concur.) Likewise those for whom nothing has been done to provide the option of a vaccine that is ethically produced and genuinely safe.

7. Coercive mandates, in the case of experimental treatments, violate the Nuremberg Code, which ought to be held sacrosanct among both the vaccinated and the unvaccinated. They do so by abandoning the principle of informed consent with which it begins. Indeed, it can be argued cogently (though I cannot conduct that argument here) that each of the code's ten points has been violated, or on the present trajectory will be violated. Their short-term performance is disconcerting

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fthe-pipeline.org%2Fhow-effective-are-the-vaccines%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1fd7ca93ba3e4cf5d5a308d9d17aa766%7C11d0e217262&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1fd7ca93ba3e4cf5d5a308d9d17aa766%7C11d0e217262> and their long-term effects are unknown.

8. What is already clear enough is that, unlike traditional vaccines, they produce dangerous, even fatal, clotting effects; require frequent boosters; disrupt the natural immune system; and, through global rather than targeted use, contribute to the emergence of breakthrough variants. The public has not been properly informed of these features. Rather, it has been encouraged, quite irrationally, to scapegoat the unvaccinated. Even such consent as it has afforded, then, does not meet Nuremberg standards. Moreover, the consent of one adult does not suffice in lieu of another's; nor, in such circumstances, can the consent of many override the dissent of one.

Emerging evidence about the behavior of the virus and of the vaccines, and about the behavior of those suppressing safer and more viable treatments for their own gain, makes the position of officials who enforce mandates and passports extremely tenuous. I fear history will judge harshly all who undertake to act contrary to reason and in violation of basic moral principles.

I observe that able clinicians working

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.amjmed.com%2Faction%2F9343%252820%252930673-2&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1fd7ca93ba3e4cf5d5a308d9d17aa766%7C11d0e217262&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1fd7ca93ba3e4cf5d5a308d9d17aa766%7C11d0e217262> on COVID-related public health problems have supplied good medical reasons (here are ten

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.kathydopp.info%2FCOVIDinfo>
) why we ought to steer clear of coercive mandates and instead re-examine the peculiar
premises on which recent public policy has been based. Sadly, such voices are being
censored, but many other capable doctors and scientists are of the same mind. As the
Harvard epidemiologist Martin Kulldorff remarked in a recent interview
<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.theepochtimes.com%2Fharvard-epidemiologist-martin-kulldorff-on-vaccine-passports-the-delta-variant-and-the-covid-public-health-fiasco_3942556.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1fd7ca93ba3e4cf5d5a308d9d17aa7
: "To me, as a public health scientist, it is stunning that we suddenly threw out [the
sound] principles we have used for decades to deal with public health issues."

To sound principles we must return immediately. Can I count on you to help set things
right? Refusing to endorse coercive mandates and abandoning vaccine passports would
be a good start. In the other direction lies a scary precipice, both for the people and for
those who govern them. What might be mandated or forced next?

Thank you for your attention to this very important situation. I appreciate your service to
our state.

Sincerely,

Matt Bovenkamp

Hello,

I am completely against any of the proposed Covid policies that are over-reaching and immoral. I stand against these WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, and WAC 246-105.

I am also against mandated Covid shots for kids as criteria for child care and school entry. Children are extremely low-risk for Covid and vaccines are still only EUA (emergency use authorization).

To whom it may concern,

As a resident of Washington state, currently living in Pierce County, I strongly oppose the following proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, and WAC 246-105. Not only are these proposed mandates a violation of our constitutional rights and medical freedoms, but they are mandates that should not be enforced by the state government. These mandates should be discussed among local governments and school boards. I will not continue to stand for the constant overreach of the WA state government.

*

communicabledisease@sboh.wa.gov <mailto:communicabledisease@sboh.wa.gov>
<communicabledisease@sboh.wa.gov <mailto:communicabledisease@sboh.wa.gov> >

I oppose the Communicable and Certain Other Diseases Rule.

I am completely against any of the proposed Covid Policies that are over reaching and immoral. I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

Additional comments:

(20) "Medical treatment" or "treatment" means the treatment for curable diseases and treatment that causes a person to be unable to transmit a disease to others, based on generally accepted standards of medical and public health science.

With regard to COVID, the vaccines are failing to cause a person to be unable to transmit a disease to others. And "generally accepted standards of medical and public health science" are controversial at best, and at worst are determined by large pharmaceutical companies controlling funding for research and spending more money lobbying than on research. They have no liability for so-called vaccines, they provide misleading poorly designed short-term unblinded research, they have had to pay large settlements for committing fraud, and they are focused on profits at the cost of human lives. Is experimental vaccination that carries risk of death and permanent harm the "treatment" you are proposing?

Isolation" means the separation((, for the period of communicability or contamination,)) of infected or contaminated persons or animals from others ((in such places and under such conditions as)) to prevent or limit the ((direct or indirect)) transmission of the infectious agent or contaminant from those infected or contaminated to those who are susceptible to disease or who may spread the agent or contaminant to others.

Now why would you propose removing the provision that specifies the period of isolation?

(13) "Health order" or "order" means a written directive issued by the state or local health officer that requires the recipient to take specific action to remove, reduce, control, or prevent a risk to public health.

Considering that health orders could include specific action (presumably including vaccination), and that so-called COVID vaccinations are currently available under emergency use authorization (and not approved) and are being administered without informed consent, you should be on notice that this revision puts your "health officers" in the position of further subjecting people to medical experiments. Is that what you're desiring to achieve? Involuntary participation in human medical experimentation? Is the resistance to your attempt at one-size-fits-all mandated vaccination so great that you must resort to these measures?

WAC 246-100-045 specifies "competent medical care" and there is already a great shortage of that. How would you propose ensuring competent medical care?

I don't have time to continue picking this thing apart, but it appears to be an attempt at inappropriate and inadvisable overreach. How would you propose implementing these WAC provisions? The potential for human rights violations, civil rights violations, discrimination, government overreach, and similar harms far outweigh any of your fabricated benefits in this poorly handled COVID crisis that has already been made exponentially worse by the way it has been mismanaged by public health authorities.

Under these provisions, it appears it would be easier to detain someone for having symptoms of the common cold than it would be for a victim of domestic violence to get a restraining order. Even mentally ill persons at risk of causing harm to themselves and others must be allowed a medical exam and have a court order for involuntary medical treatment. Quit trying to impose your ineffective and dangerous pharmaceutical products on adults and children who do not want them and who recognize that there are safe and effective alternatives.

If you're going to mandate anything, you should mandate that your public health officers and authorities read "The Real Anthony Fauci: Bill Gates, Big Pharma, and the Global War on Democracy and Public Health". The author welcomes debate and any sincere scientific challenges or updates to the thoroughly researched content.

I imagine some of you believe you are acting in someone's best interest, but you are merely doing the bidding of Big Pharma while failing to represent the people and protect our democracy.

A Very Concerned Washingtonian.

Hello,

To whom it may concern, my name is Kirstyn Taylor and I am a resident of Washington State. As a resident, it is my, and every other residents responsibility and right to have a say in how our state is run. The government is supposed to protect, respect the constitutional rights, and serve the needs and wants of the states people, not vise versa.

I am completely against any of the proposed Covid Policies that are over reaching, unconstitutional, and immoral. Myself, and many others stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

This is not Australia. We did not ask for this, nor does it benefit our humanity in any way.

This country is the Land of the Free, and it can not slip into the hands (and laws) of power hungry and sinful government officials. These laws are not a joke, and the communistic characteristics of said laws are absolutely horrific. The people of Washington state can only hope and pray that these laws are rejected. Otherwise the government and State officials will loose the trust and respect from the states residents.

Respectfully,
Kirstyn Taylor

Dear Sir or Madam,

I am completely against any of the proposed Covid Policies that are over reaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105. "

It is our God given right to choose for ourselves. No government in the United States of America has the right nor should be allowed to force individuals, families, or collective body to be vaccinated, especially an experimental vaccination.

No governmental body should have the right to force individuals, families, or collective bodies into "quarantining." Nor should they be allowed to use force to do so.

An experimental vaccine should not be required to attend school especially for a virus that has little effect on the youth.

These bills are not for the betterment of the citizen but a huge power grab and cultural change. These bills are meant to strip us of our liberties and give them to the corrupt and power hungry.

Sincerely,
Jenifer Robison.

To Whom it May Concern,

In reviewing your meeting agenda for January 12, 2022, I wanted to take a moment and send my opinion as concerned citizen, local taxpayer, and mother of 3.

I strongly oppose the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school.

I do not believe children should be mandated to be given an experimental vaccine with no long term data. This virus has never been a significant threat to children. The vaccine has not shown to be completely effective in preventing the illness and there is a chance of a reaction to the vaccine itself.

The bill is including COVID 19 into the list of infectious diseases requiring mandatory reporting. Right now it's being reported under the Emergency Orders mandates, but this bill will require it to be reported permanently. I oppose any legislation requiring the reporting of non-sexually transmitted diseases to the government.

I also believe natural immunity needs to be taken into consideration. Other countries, such as Germany, recognize that natural immunity is effective.

The bill is defining "exposure" as having any "contact" with an infected person (instead of the less than 6ft for more than 15 min and the person had symptoms definition). I oppose this loose definition because it is vague and overboard.

The bill is defining "associated death" as anyone who died from EVEN an INDIRECT result of COVID 19. I oppose this because it perpetuates incorrect information (i.e. the number of COVID deaths), spreads false fear, and allows the government to continue its mandates due to "COVID deaths".

I oppose that the bill will also require public schools to teach children about ALL sexually transmitted diseases (it used to just require the teaching of HIV), starting WHENEVER the school board decides and in WHATEVER manner the school board decides. I oppose this because the parents are best equipped to discern how and when to inform their children about such things, not the school. I particularly oppose this because the bill specifically says that the public schools have the "unique" position of being able to educate kids about such important matters.

I support Agenda Item #11, the Informed Choice Washington's Petition for Rulemaking.

Thank you for your time.

Sincerely,

Juddy Phillips

To whom it may concern,

I am writing to voice my concern for the new proposed covid policies WAC 246-100-045, WAC 246-100-940, WAC 246-100, WAC 246-105. I believe these proposed policies a vast over reach, violate our rights as American citizens and go against medical freedom.

There are proven models of success in how to handle Covid-19 in other states and other countries with lower covid deaths.

Also, the vaccine has not been approved by the FDA yet. Which is essential to any decision making. Also, why would a policy be considered that violates our rights and medical freedom as American citizens?

This state needs to recognize natural immunity and medical freedom.

Thank you for your time.

I want to start off that I am a health care worker full time as well as a full time mother of 3. Two kiddos in elementary school which these policies could affect.

First off I'll state that it's against our religion for this dang Covid vaccine that you are trying to enforce and bully people into getting. This vaccine isn't FDA approved, and as much as you want to say it is, we all know it's not even available here in the US! Everything in these vaccines have been proven to be detrimental to a persons health. These things have side effects such as seizures, epilepsy, blood clots, neurological disorders, and many other which have been reported.

Also, let's touch on how it's our parental rights under the constitution to be able to decide what's best for our children. All you guys are there for are you do what's right BY TRUE FACTS! You are going to see so many people pull out their children out of schools. Your taking rights away from the parents and it's not just Covid, I could start talking about race theory, etc.

I don't agree with sitting here and playing hitler in 2022 by forcing anyone, AT ALL to do as you say or else you will be put in quarantine homes, which we all know y'all are trying to push, and already have this agenda started behind the scenes.

You will lose all funds, due to parents pulling kiddos out of school and moving. Please take into consideration that this goes against all constitutional rights and tons of peoples religious beliefs!

Please make WA state a place where people want to come together && grow without rights being taken away!

Subject: Proposed Covid Policies

External Email

Good morning,
I am completely against any of the proposed Covid Policies that are overreaching and immoral. We the People of Washington State, stand against the following proposed WAC's:

WAC 246-100-070
WAC 246-100-045
WAC 246-100-040
WAC 246-100
WAC 246-100-105

Thank you

Subject: Proposed Covid WACs

External Email

I am completely against the proposed covid policies. They are overreaching and immoral.

On top of that, there isn't enough research, study or knowledge to back up these actions!

I, along with many other Washington residents stand against theses proposed WACs:
WAC 246-100-070, WAC 246-100-045, WAC 246-100-040.

Not only are these an infringement against our Constitutional rights, but our moral and personal rights. These rights are inalienable!

From: Lena Ehler
Sent: 1/6/2022 11:57:12 PM

Subject: Proposed covid policies

External Email

I am completely against any and all of the proposed Covid Policies, which are over-reaching and immoral. We stand against the following proposed WAC's:

WAC 246-100-070

WAC 246-100-040

WAC 246-100-045

WAC 246-100

WAC 246-105

These proposed WAC's strip all medical freedom from individuals and families who do not comply with involuntary and /or forced medical procedures, testing, treatment, counseling, or vaccinations; engage law enforcement to detain said individuals/families to be isolated in quarantine facilities following said refusal; and, force covid-19 injections on children as part of school immunizations.

Parents have always been given the option to opt their children out of "required" school vaccinations for diseases (not just a virus) which were and still are much more critical than the covid 19 virus. If this requirement is forced, many more parents will pull their children from the public school system.

Again, we reject the above mentioned proposed WAC's, standing against them as over reaching our constitutional rights and immoral standards.

Thank you for hearing the voice of the people and representing us in your decision.

--

Lena

Subject: RE: Proposed Covid Quarantine and Vaccination Policies

External Email

It has been brought to my attention that the following policies have been proposed, and will be voted on next week.

PROPOSED POLICIES:

- Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from (WAC 246-100).
- Including the Covid-19 injections as part of school immunization requirements using (WAC 246-105.)

The simple fact these policies have even been proposed is absolutely deplorable. This State has crossed one line after another, and this is yet another. There is no logical argument to justify involuntary detainment over this virus. There is no logical argument as to why this 'vaccine' should be required for children.

You all need to do some serious soul-searching, and think long and hard about this.

I will not stand by on the sideline if the State attempts to enforce any of these nonsense policies. You need to vote this down.

Subject: Commit to no COVID vaccine mandates on children

External Email

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

Subject: Commit to no COVID vaccine mandates on children

External Email

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

Subject: No! to mandatory Covid vaccination for school aged children

External Email

Dear members of WA State Board of Health,

As citizen of this country, as a resident of the Washington state and as a member of the community I would like to voice my concern and disagreement with proposed rule of making Covid vaccine mandatory for school aged children.

Even per CDC statistics children's mortality rate is minimal ☐ states reporting, 0.00%-0.02% of all child COVID-19 cases resulted in death. As well as hospitalizations rate for children: 0.1%-1.6% of all their child COVID-19 cases resulted in hospitalization are insignificant. They rarely contract Covid or have prolonged side effect.

For the BEST INTEREST of OUR CHILDREN the risks of requiring mandatory vaccination against Covid are much higher in a long term than the risk of contracting it or passing it to others. I strongly believe that there has not been enough studies and research done, because there has not been enough time to weigh, on the vaccines that are currently used. It is my firm belief that ONLY the parents and guardians should decide whether their child should be vaccinated, based on their health, moral and religious beliefs, deciding otherwise is overreach of power, discrimination of our choice and deprivation of our autonomy.

Respectfully,

Maryan Rzhiskiy

From: Kim Seher

Subject: Oppose vaccination requirement -they are our children !!!

External Email

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

There is a not enough sound data on the vaccines however we do know scientifically that Covid dow not impact children the way it does adults. Children are not at risk so therefore there is no reason to vaccinate them.

As parents we hope you sincerely hear our voices! If the state does pass this I know masses of people that will leave the state. Very important to consider the science in your decision .

Sincerely ,
Kim Seher

To whom it may concern,

I'd like to exercise my responsibilities as a citizen of King County, Washington State by informing you of my strong concern for and objection to several Washington Administrative Code (WAC) related to COVID-19 currently being considered by the WSBOH.

To be clear and specific, I am completely against the proposed COVID policies (WAC 246-100-070, 045, and 040).

As a veteran of the United States Armed Forces, WA state resident for over 15 years, and a long-standing person of faith I see these proposals as an unnecessary overreach bordering on immoral actions by any government agency.

I am therefor completely against these proposals and formally AND respectfully request the Board reject them.

Thank you,

Respectfully,

Jeff McFetridge

Why the Pfizer vaccine for Covid 19 Does More Harm Than Good

Source: www.CanadianCovidCareAlliance.org
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.canadiancovidcarealliance.org>>

The Pfizer trial only used:

- 1) Unexposed & inoculated, and
- 2) Unexposed & not inoculated.

They should have also included:

- 1) Exposed & inoculated, and
- 2) Exposed and not inoculated (aka natural immunity from having had Covid).

The fact that they avoided the latter 2 shows that they thought their Pfizer vax wouldn't perform well in those categories. A study should show how those exposed and not inoculated fare vs. inoculated & exposed. It didn't.

The clinical endpoints of the trial should have been: Do people who take the Pfizer vax have less illness and death? (It wasn't) Choosing the proper endpoint is well-known, as a result of testing of cancer drugs. In cancer drug testing, they had to switch to all-point mortality, and Pfizer should have done so.

They could easily have included biomarkers, but they didn't. We need to know how people exposed, but not inoculated compare with the exposed and inoculated. This is natural immunity, and we need to know how those with natural immunity fared.

They should have tested for: de-dimer levels (micro-clotting) before and after.

Other biomarkers Pfizer should have and easily could have tested for: inflammation, barrier permeability, hypoxia, cardiac damage, predisposition to Alzheimer's, predisposition to autoimmune disease.

They should have had biomarkers for thrombotic disease. This is a condition which would take time to surface, but could have been measured before & after in biomarkers. Many doctors are reporting thrombotic conditions in vaccinated patients.

Vaccine passports: The Pfizer vaccine was not tested for spread reduction: No evidence at all that they reduce transmission and disease, and that was never one of the endpoints of the study. All they measured for was, "Do people who take the vaccine test positive for Covid-19 less often?" and the study was designed so that they would get few "no" answers, and they then proceeded to a vax rollout.

Testing failures: Subjective testing: The study did not test all patients for Covid-19! Instead, they only tested for the Covid-19 symptom, and then left it up to the discretion of their investigators to decide what that was. So that means that asymptomatic infection would be missed entirely. And it introduced a high level of subjectivity to the trial, because an investigator could actually decide whether to test or not to test. This lack of systematic testing actually makes the results of the trial unreliable. All participants should have been tested.

There is considerable missing data in the study. The endpoint is all Covid cases: 8 inoculated vs 162 placebo. But it's such a small # of participants to begin with. But there are 80 lost follow-up subjects in the inoculated group! They don't know whether they got sick or not, or even died. They don't know. That's 10x more than the # of Covid cases they had in the inoculated group. So if a significant proportion of those 80 had been positive, it would have dramatically changed the results. Also, all the suspected but unconfirmed cases: 1594 in the inoculated group, 1816 in the placebo. This means they were symptomatic, but the investigator never followed up with a Covid test! These are huge numbers compared to the confirmed cases! The fact that the suspected cases which weren't tested were significantly larger than the endgame results means that this data is unreliable. The study should not have been accepted.

What about the placebo group? There were also many unconfirmed cases. If all these cases, inoculated and placebo, were positive, the relative risk reduction would then only be 19%. That's not a high enough percentage to gain approval.

Adolescents: The inoculation is really all risk and no benefit.

Teens are statistically at 0% risk of death from Covid-19. But the vaccine does pose risk of serious events. But the study was not designed to find serious adverse events. A serious event that occurred at a rate of 1/800 might not even show up in a sample of 1,005 people.

In the tests, there was a serious event in at least one subject who was inoculated. A 12-year-old girl. She experienced multiple serious effects, including lost feeling from the waist down, lost bowel and bladder control, menstrual cycle issues, seizures, verbal and motor tics, dizziness, fainting, headaches, brain fog, erratic blood pressure, and more. And the last 10 months, she is wheel chair bound and fed by a feeding tube. Pfizer labelled her case "functional abdominal pain."

5-11 year olds: The inoculation is an unacceptable risk to this group. Pfizer, using predictive modelling, acknowledges that their inoculations WILL cause myocarditis, but optimistically claims there will be zero deaths from myocarditis in any of their modelled scenarios. It's speculative. Still, there's no justification for giving children myocarditis. But the government has actually normalized myocarditis in kids, publishing Sick Kids brochures of how to deal with myocarditis in kids. But how to deal with it is to not cause myocarditis in kids! It's very serious. It causes permanent damage. Severe myocarditis weakens your heart so that the rest of your body doesn't get enough blood. Blood clots can form in your heart, leading to a stroke or heart attack. And the mortality rate is up to 20% at 6.5 years. The risk of 4 in 20 children who contract myocarditis dying within 6.5 years is unequivocally an unacceptable risk for children. But the FDA maintains that it is an acceptable risk for children. They have actually abandoned the "do no harm" principle.

Dr Eric Rubin of the New England Journal of Medicine (NEJM) has said that the way to find if they do harm is by doing a roll-out on the population. He voted to roll out inoculations for ages 5-11, and suggested that a population level roll out as an appropriate way to test for adverse events. Of note, the NEJM is also the publisher of the Pfizer reports.

Governments are proclaiming the inoculations to be safe, yet the data is not there to back that up. Pfizer admits that their long term immune response, efficacy & safety data is limited and that their studies weren't powered to find "rare" side effect, as only about 1500 kids were in the testing group which received the inoculation. The law of informed consent says that parents should be told about these risks, but it's not happening.

On Nov 2, the British Medical Journal released an article about their investigation into Ventavia, one of the research companies Pfizer hired to conduct the trials. A whistleblower who was a Regional Director reported to the FDA that Ventavia: falsified data, unblinded participants, did not follow up and test participants who reported symptoms, and mislabeled some specimens. Several other employees backed up the Whistleblower's account. But Pfizer never disclosed the problems in its EUA application, and in fact, Pfizer has now hired the same researcher, Ventavia, to run more Covid-19 clinical trials.

So it's not surprising that we are seeing the issues we are in the 6-month report.

Manipulation of Data Cohorts: Pfizer took the results from their adult trial, which started July 27, 2020, and then added in the results from the 12-15 year olds' trial, despite the fact that the adolescent trial started four months later. Since it's well known that the efficacy wanes over time, this gives a false boost to the efficacy numbers. The efficacy of the two groups should have been reported separately, not presented as one combined result.

Pfizer trials did not prove safety. They proved harm. The endpoints of the trial should have been illness and death, not a positive or negative Covid-19 test. But their test actually showed harm. They used younger, healthier groups than the vaccine would eventually be rolled out to. Here are some results of Pfizer's own randomized control trial: Related adverse event, +300% over placebo group; severe adverse event, +75% over placebo group; any serious adverse event, +10% over placebo group. Deaths in the vaccinated group: 20; placebo group, 14.

How is this harm playing out in the real world? Governments are assuring us that they are monitoring safety and will let the public know if there are problems. But once the vaccine was rolled out at the population level, the surveillance method for reporting is called "passive." It's difficult and time-consuming for overworked doctors and health workers to file the harm reports, and then it goes thru several levels of bureaucratic approval before the case is accepted as a vaccine-related injury.

"Active" surveillance was used for trial participants. They were given a phone app with choices of adverse events they experienced. 78% reported adverse reports, and 5% were serious. There was also journal entry options for the participants, and 30% reported adverse events thru that, and 2% were serious. But when the reporting method was switched to passive for the general population rollout the reporting fell way down.

But some news is getting out: For example, the risk of myocarditis is becoming known. And it's occurring in younger, healthy population where there was previously a very low rate of myocarditis.

On Nov. 17, the FDA released the first batch of data to satisfy a Freedom of Information request. This is data used by the FDA to approve Pfizer's covid-19 vaccine. One report in which Pfizer tracked adverse events in the first 2.5 months after the EUA, reported 1,200

deaths and over 25,000 nervous system adverse events. Under "Safety Concerns" Pfizer listed Anaphylaxis and Vaccine-Associated Enhanced Disease. This document should be incriminating for any agency who saw it and called the vaccine "safe."

Pfizer's criminal past includes lying about a heart valve which fractured and killed hundreds; conducting clinical trials on African children without their parents' consent, after which some of the children died; bribing doctors; suppressing research; manipulating studies; withholding information that its products caused cancer; fraudulent marketing, and many more. They've literally paid billions in fines and settlements for their actions. So they are not a highly ethical corporation.

The CDC has redefined "vaccine" to suit political & pharmaceutical interests. The new definition of vaccine by the CDC is "A preparation that is used to stimulate the body's immune response against diseases." The new definition does not indicate there is any actual benefit derived from a vaccine.

I am writing to oppose the notion of mandating the Covid vaccine as one of the school entry requirements in the state of Washington.

Data has shown the impact of covid hospital and death toll on children under 16 years is close to 0%, Furthermore, we don't know the long term side effects can inflict by covid vaccine while the short term effects have crippled many including myocarditis among youth Many studies indicated Covid vaccine is not safe to inoculate children at a massive scale, it is still an experimental remedy that is only needed by a very few with compromised immune systems or existing medical conditions.

It is not sensible nor ethical to even consider making the Covid vaccine a requirement to enter school.

Sincerely,

Jay Zhang

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Washington state board of health,

I object to the plan to put unconstitutional WAC codes in place such as WAC 246-100-070 <tel:246-100-070> , WAC 246-100-045 <tel:246-100-045> and WAC 246-100-040 <tel:246-100-040> .

There is no reason to do so when over 99% of people who contract covid also recover. These codes go completely against citizens body autonomy and I will not stand for it.

Sincerely,
Jennifer Montez

I am adamantly against forced vaccines and forced quarantine for any person in the state of Washington!!!

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following reasons:

- * Follow the science, children's risk is so low that the risk of adverse effects from the shot is higher than a child's adverse effects from covid.
- * Mandates are not laws and every parent has the right to make medical decisions for their children.
- * These shots are for emergency use. They do NOT have medical trials that are proven over a period of time.
- * Covid is spread by vaccinated and unvaccinated.

There are no valid grounds for mass shots for children!!!

Sincerely,

Kristine Farley

Subject: Oppose covid vaccine requirement

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>>)

)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Subject: Oppose TAG and actions to mandate vaccines for children

External Email

As a mother of four school-age children, I oppose mandating the COVID-19 vaccine for children. Each parent has the right to make health decisions for their own children and mandating a vaccine whose outcomes are still being tested is to politicize our children's health.

Neither should families or individuals be forcibly taken to a quarantine facility for exercising their personal health decisions. This is in reference to Item 9 on the agenda for the 1/12 meeting.

Please govern on the side of choice and personal freedom.

Respectfully-

--

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. Also oppose adding a C-19 vaccine to the WAC246-105 schedule of required vaccines for children to attend schools.

Thank you
Melanie

Subject: OPPOSE changes to Health Policy

External Email

State Board of Health,

As a parent and citizen of this state, I oppose any of these drastic and unconstitutional changes to the health policy.

We should be able to make our own healthcare choices and decisions without having the heavy hand of the state dictate what we do to take care of ourselves, and our children.

I oppose these changes. I ask that you VOTE NO.

Sincerely,
Karen Larsen

Subject: Objection to proposed COVID19 policies

External Email

I am opposed to any of the proposed policies related to detaining individuals in quarantine facilities, involuntary medical exams, testing, or treatments. I am also opposed to including COVID-19 injections as part of school immunization requirements using WAC 246-105.

I stand against the following proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

- * I believe in informed consent for medical decisions.
- * I support medical freedom and bodily autonomy.
- * I believe in personal freedoms supported by The Constitution of the United States.

- * Children are at an extremely low risk of mortality as a result of COVID infection.
- * The vaccines are still only EUA status.
- * There are no long term studies to document any history of safety.
- * Studies now show that both vaccinated and unvaccinated individuals can transmit COVID. Therefore, the vaccine does not prevent spread of infection or disease.

Subject: Opinion on covid 19 vaccination for children

External Email

As a mother of 2 children that attend 2 different schools in Washington state I would like to voice my opinion on the matter of mandating children to be vaccinated in order to attend public school. I do not feel that it is fair to force anyone to chose between and education and a vaccine that is still in its early using for their child. There are no long term studies on what this vaccine may do to our childrens growing bodies. Children fair very well with the actual covid 19 virus. If this becomes a mandate I will unenroll my children from the sequim school district and enroll them in a private school that is not associated with the school district. Thank you very much for taking the time to hear my voice.

Sincerely, Nicole Goettling (Sequim Wa)

Subject: Oppose vaccine mandate agenda

attachments\EB4E2EED4B3F4D82_image0.jpeg

External Email

Dear Dept. of Health,

Comments for the Jan 12th meeting.

Please oppose using law enforcement to detain people in quarantine facilities. We are free people. This would be a gross overreach of power.

Our medical decisions are private.

No school child should be forced to get a Covid vaccine. Please rethink this.

Those who have the vaccine shots & boosters are still getting COVID. The vaccines are not protecting citizens from getting sick.

Please abandon this tyrannical agenda.

Sincerely,
Nancy Hansen

Subject: Now Available: January 12 Proposed Final Agenda for State Board of Health Public Meeting

The proposed final agenda

<<https://sboh.wa.gov/Portals/7/Doc/Meetings/2022/Jan%2012/WSBOH-Agenda-2022-01-12-Final.pdf?ver=2022-01-05-175008-690>> is now available for the State Board of Health's public meeting on Wednesday, January 12. We will meet from 9:00 a.m. – 3:30 p.m. Meeting materials will be available on our website on Friday, January 7 by 5:00 p.m.

Please read the draft agenda for more information about the meeting, including how to give public comments on the Communicable and Other Certain Diseases rules hearing.

You may access the meeting in the following ways:

1. Online and register: https://us02web.zoom.us/webinar/register/WN_DjusY10WTj-EyQyDTdyxsw
2. Call-in and participate using your phone:
 0. Webinar Call in: 253-215-8782
 1. Webinar ID: 894 7406 4216
 2. Webinar Passcode: 957396

A Special Note about Public Comment:

* We encourage you to submit written public comments to the Board in advance of the meeting. To help ensure Board members have an opportunity to read and consider your comments before the meeting, please email us your comments <<mailto:wsboh@sboh.wa.gov?subject=My%20Public%20Comments>> by Friday, January 7 by 12:00 Noon. Written comments received after 12:00 Noon on Friday will be shared with Board members; however, Board members may not have the capacity to read or consider your comments over the weekend before the meeting or during the meeting. You may give verbal comments at the meeting during the public comment or rules hearing segments.

Other Meeting Information:

- * This meeting will be held online through the Zoom Webinar application
- * Board members, presenters, and staff will participate remotely.

Phone: (360) 236-4110

Mailing Address: P.O. Box 47990, Olympia, WA 98504-7990

Subject: Oppose Forced School Vaccinations

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Karen Kane

I am adamantly against forced vaccines and forced quarantine for any person in the state of Washington!!!

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following reasons:

- * Follow the science, children's risk is so low that the risk of adverse effects from the shot is higher than a child's adverse effects from covid.
- * Mandates are not laws and every parent has the right to make medical decisions for their children.
- * These shots are for emergency use. They do NOT have medical trials that are proven over a period of time.
- * Covid is spread by vaccinated and unvaccinated.

There are no valid grounds for mass shots for children!!!

Sincerely,

Kristine Farley

Subject: Object to the plan to apply current infectious disease WAC code to include Covid-19

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 99 percent of the population. Covid vaccines have little effect on Covid, and in fact, most people who get this Covid and spread it have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. They also do NOT have the right to force vaccines on citizens who do not choose them.

This is not about our health. This is about control and it is NOT in the purview of the Washington State Department of Health or ANY elected official or unelected state employee. These decisions are the right of every citizen and NO law, mandate, code or policy can override those rights. We are NOT granted rights from the State. The State is REQUIRED to protect our rights and not infringe on them.

Sincerely,
Meg Wang

Board Members,

Thank you for serving in our beautiful state of Washington. I am a father of 3 children, who lives in Vancouver WA along with many other families. We the people here, who elected you to represent us and our families do not support WAC 246-100-070 and 246-100-045. This is unconstitutional. You stand with woman to protect their bodies when they want to abort the baby, but now you force people who want to protect their body from vaccine. This is hypocrisy. Do not take away the freedom that our fathers fought for, the freedom given by God. Stop telling us how to live our lives. We elected you to represent us, please do so. We are wholeheartedly oppose WAC 246-100-070 and 246-100-045, please vote against it.

Respectfully yours,

Families of Vancouver, WA.

I am very opposed to mandating the experimental gene therapy shot on our children!!! It has not been properly tested for adverse events and has shown numerous prospective adverse effects on those who have taken it. I know more people who have died and had serious negative consequences from it than for the condition it is supposed to offer protection for.

I am horrified that this is even under consideration and will advise others to not support officials who back this overreach into a personal health decision.

Sincerely

What in the world kind of communistic shenanigans are you trying to create? This is objectionable on so many levels! I and my family and friends vaxEd and I vaxEd absolutely disagree with this proposal! It is unbelievable this has gotten this far! If you detain people and families how long is the incarceration! What about vaxEd people who are also getting covid with the shot and boosters. What in the world is the purpose? Seriously.

Objection to state mandated covid experimental gene therapy

To Whom It May Concern,

Please do not make the covid "vaccine" (a misnomer, as it is really gene therapy) mandatory for school age children. To remind you -- children have been at extremely low risk for covid-19 and the vaccination is still only emergency-use authorized. Human studies have not been given the time needed to prove their safety. Please please PLEASE do not go through with this proposal. BTW - Is the WSBOH prepared to proclaim their safety and efficacy for all children -- for all people, for that matter? Federal health officials have stated . . . CDC Director Walensky: "What the vaccines can't do anymore is prevent transmission."

* Dr. Anthony Fauci: "We now know, as a fact, that [vaccinated people with Covid-19] are capable of transmitting the infection to someone else."

* Moderna's Chief Medical Officer Dr. Tal Zaks: "There's no hard evidence that it stops [the Covid-19 vaccinated] from...potentially infecting others who haven't been vaccinated."

It sounds to me, as testified by our own government officials and big-pharma that Covid-19 "vaccines" are mere treatments and therefore have no legal grounds for forced use.

Please, do not consider requiring vaccines for school age children. Like all other decisions regarding their children parents should have the final say about what's best. It should be up to parents to choose.

As an educator, ministry leader and parent I whole heartedly disagree with enforcing mandates on citizens. I also believe that the masks and face covering requirements are doing more harm than good to school aged children and students and should be lifted immediately!

In service to my community,

Mrs. Laurice Warthan

Subject: Oppose Vaccine Mandates For Students

External Email

Please oppose Covid vaccine mandates for students. Since the risk to students from Covid are extremely small, there is no justification for a mandate.

- * Studies show very little difference in the infection rate for vaccinated and unvaccinated.
- * Studies show very little difference in the spread to family members for infected people who are vaccinated or unvaccinated.
- * The primary advantage of the Covid vaccine is that it appears to attenuate the effect of the virus to some degree, similar to people infected previously that have antibodies. The vaccine doesn't protect public health, but it may help protect personal health.
- * There are known and unknown risks of serious adverse effects on people's health from the vaccine.

Since it's not a public health risk, but a personal health risk, the pros & cons of whether children receive the vaccine should be a decision made by the parents, not by a government mandate.

+
Members of the WA State Board of Health,

During your January 12, 2022 meeting I urge you to oppose Agenda Item #8 which would allow for the formation of a Technical Advisory Group; a group which would then make decisions regarding vaccination enforcement for children, mandatory quarantines, etc. Please inform yourselves as to the nature of the corona virus, the impact of the mass vaccination policies, as well as the effect of the virus on the very young and the impact of another required vaccination on our children.

I ask you to support Agenda Item #11 which wisely prohibits additional use of EUA products until Phase III trial studies have been completed.

The State of WA has not the right nor the duty to impose upon its citizens mandatory medical procedures. It is particularly abhorrent that WA State is considering mandating children receive experimental injections, and for a virus whose impact on children is minimal.

Sincerely,

Laurel L Berger, BSN, RN

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>
)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Scott Farley

Subject: Objection to proposed

External Email

As a Washington state resident and taxpayer, I am strongly against any of the proposed covid policies.

The policies are over reaching and immoral, especially on injections that do not have long term data.

The underreported data on VAERS for the COVID vaccines has 691,884 adverse events

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind>
, including 9,295 deaths

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind>
and 59,767 serious injuries

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind>
, reported in the U.S. between Dec. 14, 2020, and Dec. 10, 2021.

The vaccine makers are not liable for injury or death due to their product. How can they be ethically or morally be forced upon your constituents?

None of the covid vaccines stop transmission or provide immunity.

Why not support healthy lifestyles such as nutrition and exercise? The state could spend money supporting WA state agriculture go to organic farming. Support recreation centers. I have not seen a real community recreation center in western Washington. Colorado has great recreation centers in Montrose County and eastern Colorado. Parks were closed in 2020 and had limited reopening in 2021. How is that promoting exercise and health?

NO ON WAC 246-100-070, WAC 246-100-045, WAC 246-100-040 and WAC 246-105.
~Michele

Subject: No vax mandates

External Email

I am writing to say that I do NOT support vaccination mandates for our children.

1. Children are at a low risk of infection for Covid-19.
2. Both vaccinated and unvaccinated people get Covid AND can spread Covid, so this vaccination will not stop the spread of the virus.
3. There are too many side effects from the vaccine and I do NOT want this to be a requirement.

Please leave our kids alone. NO MANDATES. This is unethical.

External Email

I am emailing you today to let you know of my concern for two items on the January 12th meeting agenda

Item #8 Immunization Technical Advisory Group

Undoubtedly this TAG will be reviewing information about COVID-19 vaccines for consideration of mandating the vaccines for school. Such a mandate will certainly, and I mean certainly, create a division and social gap in our state that is unworthy of being called "United" in these United States. There are bigger issues to take into consideration than a health care preference or even public health itself.

Item #11 Rulemaking Petition

I fully support this petition for rulemaking. Please take this overwhelmingly supported petition seriously.

A fellow Washington Citizen

WSBOH,

I strongly OPPOSE the board's formation of the Technical Advisory Group to review info about COVID-19 shots for consideration of mandating them for school-aged children. I fully oppose the shot mandates, period!

They are nothing more than a treatment that can help the immunocompromised, and we should not be even entertaining a shot mandate for children when they have a much stronger immune system that can fight off this virus even better than the flue & common cold.

Especially when the reports now of omicron being weaker as compared to the previous variants of this virus. The BOH and medical community as a whole have been trying to play catch up now for over 2 years.

OPPOSE, OPPOSE, OPPOSE.

I am adamantly against forced vaccines and forced quarantine for any person in the state of Washington!!!

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following reasons:

- * Follow the science, children's risk is so low that the risk of adverse effects from the shot is higher than a child's adverse effects from covid.
 - * Mandates are not laws and every parent has the right to make medical decisions for their children.
 - * These shots are for emergency use. They do NOT have medical trials that are proven over a period of time.
 - * Covid is spread by vaccinated and unvaccinated.
- There are no valid grounds for mass shots for children!!!

Sincerely,
Kristine Farley

06JAN2022

Dear Washington State Board of Health,

It has just come to my attention the WSBOH will consider making Covid-19 trial drug shots mandatory for school admission and childcare in our State and response is required in less than 24 hours.

As this is not enough time for me to adequately update statistics I prepared and sent to the legislature a few months ago I am forwarding the same informative request to you in an attached document.

Please bear in mind some statistics are not current for 07JAN2022 but are as stated, from 4 months prior in OCT2021 and did not specifically address pediatric or school issues which require a completely different level of risk complexity and much longer term observational studies.

Covid-19 trial drugs designed for pediatric populations must first be accorded time to execute properly run scientific trials to their full conclusion to ensure children maintain future health into adulthood without longterm toxic consequences. Corona virus in children has known recovery rates over 99.% while conversely, observed serious adverse effects to current Covid-19 trial drug shots offered have occurred with children globally. Mandating any type vaccination, for viruses with such high levels of excellent recovery, has not happened historically because naturally acquired immunity is optimal, stops

infection transmission and fortifies the human immune system in case of further infection exposures. Traditionally, vaccines do not accomplish these immune standards but when safely produced and optimal- help deter severity or stop the viral illness. The current trial drug candidates' manufacturers stated their trial drug shots will not prevent infection, nor prevent transmission and in actuality have not.

Administering vaccinations first requires critical evaluation, fully informing prior to consents and careful risk calculations since every vaccination contains components considered a risk every time for every person exposed. Proposing ongoing administration of current Covid-19 Trial Drugs to pediatric populations is placing our children at unprecedented, unnecessary risk that is unethical. Please keep in mind that NO prior trial drugs with these unprecedentedly high level of adverse coagulopathy issues have been permitted to continue but have been halted for review or withdrawn.

If parents choose to volunteer their children for any drug trials at any time that is a parental issue.

Our state's DOH must advocate for the overall longterm health of its children examining all available data--and be prepared to defer decisions till the longterm trials are properly completely without political, pharma, or time-constraint pressure. This state's DOH must choose to protect all our children from future irreversible and/or epigenetic health risks. The state must protect every single child from exposure to drugs prematurely marketed and ensure properly executed studies have made it to their full completion after preliminary animal studies, followed by longterm, tracked populations. Above all this state's DOH must not mandate forced pediatric exposures to these trial drugs- especially at this premature point based on grossly incomplete studies with known violations of scientific trial protocols.

I encourage anyone concerned with the question of children and Covid-19 trials to please read the 14Sept2021 article in Toxicology Reports which carefully examines issues related to COVID-19 inoculations for children. If you find you are familiar with all the research presented - consider scrolling straight to: 4. Discussion: Two issues arise from these results.

Hello,

My name is Hannah Kilcup. I am a teacher and a single mother of 3 children. I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Rubin, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit

analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>

Cc:
Subject: Object

External Email

I write to express my strong objection to the proposed COVID policies that are unconstitutional, immoral, draconian. I stand strongly against the following proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC-246-100, WAC 246-105.

No science supports doing this as the vaccines (therapeutic at best) do not prevent the vaccinated from getting COVID and even spreading it. Further, VARES reports that since records began being collected in 1990 to now, 67% of the deaths reported have happened after the introduction of the COVID vaccines, approximately over the past 1-2 years. That means that the vaccines have proven to not safe for any age group.

The denial of the rights of citizens in these blatant over reaching WAC's will have consequences to those pass them into law. Legal measures will be brought against the state for its attempt to steal, kill and destroy the lives of so many citizens.

I will be watching how you vote.

Michael Scaroni

Omicron death rate is much lower - Omicron Variant Info

by Dr. Patten — Read time: 3 minutes

<https://www.omicronvariant.com/omicron-death-rate-is-much-lower/>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.omicronvariant.com%2Fomicron-death-rate-is-much-lower%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C95418d0c3a294018e95c08d9d216b5a9%7C11>>

Could the Omicron variant actually end up saving lives? The omicron variant death rate is a lot lower than others, including Delta. If Delta is completely pushed out by Omicron then yes, lives would end up being saved (or at least, not so many people will end up dying).

There is a new study that has come out of South Africa. The study says the people hospitalized during the Omicron wave had fewer severe COVID-19 symptoms and were not as likely to die.

When conducting the study, researchers compared the summer wave in 2020, the winter wave in the same year, and the spring wave in 2021. They studied these waves in order to assess how the omicron variant stacked up against them.

The study can be found on the JAMA Network
<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fjamanetwork.com%2Fjournals%2Fjama%2Ffulltext%2F202105cca4541a59%26utm_source%3Dsilverchair%26utm_medium%3Demail%26utm_campaign%3Darticle_jama%26utm_content%3Dolff%26utm_term%3D123021&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C95418d0c3a294018e95c08d9d216b5a9%7C11>
.

The percentages concerning the Omicron death rate

During the COVID-19 delta variant wave, 74% of hospitalized patients required oxygen therapy. In comparison, just 17.6% of hospitalized patients needed it during the omicron wave.

Hospital length of stays lowered too. The average time that an infected patient stayed in the hospital for was 8 days pre-omicron. By comparison, the average is now 3 days now that the omicron variant is dominant.

The omicron death rate has plummeted. Pre-omicron the death rate was 29.1%, this has dropped to 2.7% with the omicron variant.

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.reuters.com%2Fworld%2Fafghanistan%2Fcurfew-it-says-covid-19-fourth-wave-peaks-2021-12->

Despite the lifting of the curfew, researchers have not been relying on omicron variant data from South Africa. This is because the population of South Africa had a high level of COVID-19 virus immunity thanks to the previous surges.

The WHO's incident manager for COVID-19, Dr. Abdi Mahamud, said it is still too early to interpret all of the data coming from South Africa. This is especially true when it comes to assessing just how the omicron variant will affect different populations.

The omicron death rate numbers look very promising. We should hold off on the celebrations though, at least for the moment. In the meantime, the fact that hospital stays are shortening is going to be good news for hospitals across the world.

We should remember too that there will probably be other variants before the pandemic is over, but it does look as though things are slowing down even as omicron is speeding up.

"Omicron is spreading at a rate we have not seen with any previous variant. I need to be very clear: vaccines alone will not get any country out of this crisis. It's not vaccines instead of masks, distancing, ventilation, or hand hygiene. Do it all. Do it consistently. Do it well."

Hello,

I am a concerned parent who believes whole heartedly that a covid vaccine mandate for children in school is absolutely unnecessary. The rate of how covid affects children is so minute and the percentage of survival for children with covid is very high that this mandate is not for their benefit.

I oppose a covid vaccine mandate for children.

Thank you!

I am writing because I am very concerned about what I am reading regarding WAC 246-100-045, WAC 246-100-070, and WAC 246-100-040.

To take authority away from law enforcement and needing to submit to a health authority seems pretty scary.

This feels a little too much like Nazi activity. Who gets to decide the threat these people cause? Who decides if everyone is fully vaccinated and boosted?

This is infuriating that this is even on the table. Why don't you focus on how to care for people who are sick? How to keep people from dying? Why are people being denied treatment? How come so many have died? I've heard many people say they aren't interested in going to the doctor and definitely not going to the hospital. The trust has been broken. People are afraid of the medical community. I believe this is for several reasons. Who do we trust? So many "facts" and opinions that don't make sense. People getting denied treatment that their family requests for them. People being given treatment that the family has asked not to dispense. People being alone and not having an advocate in the hospital. I could go on and on about how all this has been handled.

This isn't even covering the insanity of the mandates and how it is effecting so many in our state. From schools to law enforcement to hospitals to WDOT to all others who are requiring it. Do you not know how many people who have been injured or killed because of the vaccine? Why in the world is this happening? There is an agenda of some sort. I am asking you to please stand against this tyranny.

Sincerely,
Kristi Oliver

WA state board of health I oppose the covid vaccine for school kids~

1. OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose COVID-19 shot mandates, period!
2. SUPPORT Informed Choice Washington's Petition for Rulemaking (see below) — our petition is item 11 on the January 12th agenda. It was filed by Xavier Figueroa, PhD, on behalf of ICWA, and asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Sincerely,

Kristin Nelson

Washington State Board of Health,

I am writing as a concerned parent of two school aged boys. I'd like to specifically address the below.

Agenda Item #8:

I oppose the addition of Covid vaccines to the child/school entry list of products.

Agenda Item #11:

I support this Petition to change 246-105 WAC that would prohibit the Board of Health from adding any product to a mandated list unless its successfully completed Phase III trials for proper licensure.

Signed,
Kaylea Custer

Dear Board of Health,
I have a fantastic article worth the read is included via the link below. Our children should not be masked. Masking does not stop a tiny virus. Kids constantly fiddle with the mask and my child had a chronic cough from masking at school all day. Our kids do not need an experimental vaccine for COVID either. I know too many men and a woman who have died of sudden cardiac arrest or are now for the past 7 months are completely disabled unable to even stand on their own as a result of this so called vaccine. Please oppose mandatory vaccines for children and adults even.

Subject: Objection to state mandated Covid-19 shots for children

External Email

To the WA State Board of Health,
I am writing to communicate my strong objection to mandating Covid-19 vaccines for children in the state of WA. I am not against vaccines. My 4 kids have been protected against diseases with vaccines that have a long track record of efficacy and safety. The Covid-19 vaccine DOES NOT have a long track record of efficacy and safety. Furthermore, statistics clearly show that children are at extremely low risk for Covid-19 and even if they do get it the symptoms are generally very mild. Although I feel I am low risk as well at age 44, I did get the vaccine. Let me make this clear: I am not anti-vaccine. What I am strongly against is the state of WA mandating that all children receive a vaccine that is only "emergency use authorized" and is still experimental. If children were at a high risk for Covid infection and health risk then the conversation might be different. The facts are, children are extremely low risk and no parent should ever be forced to put a vaccine into their children, especially one that is only EUA.

Thank you,
Jon Biggerstaff

Subject: Oppose COVID vaccine mandate

External Email

To Whom It May Concern:

I am writing as a concerned citizen and loyal taxpayer. I strongly oppose Agenda Item #8. I do not believe children should be mandated to be given an experimental vaccine with no long term data. This virus has never been a significant threat to children. I am 43 years old and have contracted COVID, along with my husband and children. My husband, who is fully vaccinated, was effected equally to my symptoms and all of us healed after 2 weeks. It did not cause long term effects in any of us. Those who are at high risk should consider vaccination, but those who are young and healthy should NOT be mandated to vax up.

I support Agenda Item #11 prohibiting Emergency Use Authorized products or licensed products TV at have not completed phase 3 trial studies.

Thank you for your time and I look forward to seeing these items voted on in my favor.

Sincerely,
Nicole Rapp

Subject: Oppose Vaccine Mandates

External Email

Dear Boardmember,

I am contacting you to express my concerns regarding the addition of the Covid-19 vaccine to the WAC-246-105 that aims to remove a parent's right to informed consent. I believe that the choice of if, when and how a child is to be vaccinated needs to remain between a family and their doctor. Where there is a risk of injury or death, no matter how small the perceived risk may be, there must be a choice. To mandate a medical procedure with known risks is medically unethical. I implore you to oppose or dismiss this mandate.

If we are not free to make informed, voluntary decisions about which pharmaceutical products we are willing to take, then we are not free in any sense of the word. If this proposal passes it will set a very dangerous precedent and there will be no limit on which individual freedoms the State can remove in the name of the greater good.

For these reasons and many more, I urge you to view this action as inhumane and medically unethical.

Sincerely,
Elizabeth Embick

Subject: Opinion against COVID-19 vaccine mandates for children

External Email

Dear sir or ma'am,

I am the parent of a private school student in Bellevue. I absolutely disagree with the COVID-19 vaccine entering the mandatory vaccine, even though I support the existing school mandatory vaccine.

First, the COVID-19 vaccine does not meet the purpose and role of mandatory school vaccination at all.

In CDC, the definition of a vaccine has been changed to a protective meaning from immune formation. According to global statistics so far, the COVID-19 vaccine has not been seen at all to prevent transmission by forming mass immunity and has been used to comfort individuals by not exacerbating their symptoms.

School-mandated vaccinations are intended to form mass immunity and prevent transmission, but currently, COVID-19 vaccines do not meet these two important aspects at all. Therefore, it is natural that the vaccination of the COVID-19 vaccine should be left to the individual's choice.

Second, the COVID-19 vaccine is only an emergency approved vaccine that is not sufficiently clinical and has many side effects. There has been no study at all on what side effects will occur a year or 10 years after children are hit. For this reason, many experts and doctors in the United States are currently opposed to vaccinations for children and adolescents.

Therefore, I think it is irresponsible to force children and adolescents to match dangerous vaccines that have not been proven safe for more than 10 years.

Thank you for listening to my thoughts. I sincerely ask you to consider this for the health and future of our children.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Please don't do this to the children.

Thank you for reading this.

I am here to voice my concerns taking place in this State in regard to COVID 19 shots.

I feel that every parent chooses what they feel is right for their children and themselves. Whether that means choosing to get a shot or not, just like choosing to breast feed or use formula. Both are a right answer in what they choose for their family and that because it's a CHOICE. It should always be a choice to get a shot or not, just like the flu shot (Norway already views COVID as the flu so we really need to get on their level).

Thousands of fellow parents will pull their kids out of school if this is required. I love my children too much to force junk in their body that has yet to even be proven affective from getting it spreading with the shot- so what the point of even getting it? Due to the thousands of parents pulling their children will only add to the falling economy... as teachers, bus drivers, cooks, etc. will no longer be needed since their will hardly be any children in school.

Face it, COVID will not go away- people need to move on and live their life and realize it's not serious. People die from smoking... yet that's still ok....how many alcohol related deaths have there been? Millions... but yet let's still sell it and every venue, restaurant, and store. That makes sense.

There isn't a Covid pandemic. There is a people with power pulling pandemic. Horrible people that do not respect the constitution.

As you can see I am completely against forcing people and children from a shot that they feel is not good for them. And punishing those families who chose not to get it. This is un-American and I hope you are ashamed of yourselves.

We strongly OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school.

We OPPOSE ANY FORCED QUARANTINE AT A GOVERNMENT FACILITY. We OPPOSE ALL QUARANTINES AT ANY FACILITY. We OPPOSE ALL "HEALTH" OFFICIALS HAVING ANY CONTROL/FORCED ISOLATION.

Stop Inslee, all government officials and all of the government overreach. The Governments JOB is to protect our freedom. This is not about health if it were fast food, alcohol, junk food, soda, and all processed food would be out of business. Exercise, fresh air and healthy foods would be the focus on healthy living to boost immune systems. The vaccine risks would be talked about and those injured would not be silenced. Scientists, Doctors, Nurses are being silenced when speaking the truth of what is happening with the covid plan.

Subject: Oppose Agenda item #8. Support Agenda Item #11

External Email

I strongly oppose Covid-19 shot mandates! Oppose Agenda item #8. Medical care is between the physician and the patient- NOT the government. The government should NEVER, never, never be involved in personal medical decisions, including injections (i.e. vaccinations, etc). Mandates are coercive and forceful- they are violent.

Support Agenda item #11. Emergency Use Authorized products and licensed products that lack completed phase 3 trial studies should never be added to the school required list.

It is extremely concerning that the Government has forgotten its role of servant and has assumed the role of master.

No more threats toward "We the People" veiled by the cries of "safety" it is time for Government to resume it's rightful role as civil servant PROTECTING the people's medical freedom, instead of threatening people and destroying freedom in the name of "safety"

I fear that those that have been placed in government roles are no longer serving the people, but are serving another agenda that is not in the interest of "We The People".

I urge you to vote No on item #8 and Yes on item #11.

Thank you for your attention and time,
Lindsay

Hello,

I am writing to let you know the following:

1. I OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. Children do NOT need covid-19 shots. It does more harm than good and is supported by science on that. They do not transmit the disease nor do they get sick from C-19. NO MORE MANDATORY SHOTS!!! I oppose COVID-19 shot mandates, PERIOD!!!!!! It is a violation of our freedom of medical choice.
2. I SUPPORT informed Choice Washington's Petition for Rulemaking-the petition is item 11 on the January 12th agenda. It was filed by Xavier Figueroa, PHD on behalf of ICWA and asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product or any licensed product that lacks completed Phase 3 trial studies, to the school required list. Federal Emergency Use Authorization Statutes prohibit school mandates of EUA products. Phase 3 clinical trials are not completed yet. The FDA admits safety is unknown in children! Children should be excluded from mandates!
3. I do not support any rule that tries to involuntarily quarantine any person because of COVID-19 illness. That is a violation of our human rights and against freedom! It is time for the state of Washington to step back and let all Washingtonians live without draconian measures. No more new rules!!!!!! Enough is Enough!!!!

Thank you,

Leo Blakley, Concerned Washington Citizen

Dear Board of Health:

Isn't too bad that big tech is censoring any open information or debate about the safety of these so called "safe vaccines"? In fact, these are not only not safe, nor are they vaccines. All you have to do is go over to another platform like Rumble or Bitchute where you can find fanciful debate on what we are injecting into people's bodies.

These vaccines last about 120 days max. They are truly therapeutics. Secondly, no ingredient list has ever been provided. But scientist are finding strange things in the serums. They are also seeing evidence of blood cells that do not look normal and autopsies that are not normal. Of course, all this information is being suppressed.

Thirdly, they are seeing a large spike in the VAERS system of not only over 1,000,000 adverse reactions, but a death count over 20,000. As you know VAERS is underreported. You have scientists all over the world speaking out on this.

Injecting an unknown serum into our children is not only wrong, but it is criminal especially when they have a recovery rate of 99.999% for COVID, especially given the fact that the virus is going away now, mild in most people even many elderly. It is also wrong to use your children as a shield for a threat you "perceive." In fact, I would say injecting an unknown serum into children is criminal. Let's see the long term studies including safety for the unborn? Oh ya, there are none.

Just my 2 cents.

RE: Please oppose COVID 19 vaccine requirement for schools in Washington State

I am attaching a report done on the Pfizer safety data. It is produced by the Canadian Covid Care Alliance, a group of medical professionals. It shows with genuine scientific rigor that the Covid-19 inoculations are not safe. Before making any decision please look at this. The presentation is less than 40 minutes long. I have also attached the pdf of the presentation that includes links to sources.

Thank you.

Tom Larsen

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable'. Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long or even medium term risks of these vaccines.

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you,

Tom Larsen

Board Members,

Thank you for serving in our beautiful state of Washington. I am a father of 3 children, who lives in Vancouver WA along with many other families. We the people here, who elected you to represent us and our families do not support WAC 246-100-070 and 246-100-045. This is unconstitutional. You stand with woman to protect their bodies when they want to abort the baby, but now you force people who want to protect their body from vaccine. This is hypocrisy. Do not take away the freedom that our fathers fought for, the freedom given by God. Stop telling us how to live our lives. We elected you to represent us, please do so. We are wholeheartedly oppose WAC 246-100-070 and 246-100-045, please vote against it.

Respectfully yours,

Families of Vancouver, WA.

Subject: Oppose Mandating Covid Vaccines on Children

External Email

1. I OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. There will be a mass exit for our schools. LA County had to walk back there mandate on school aged children because so many kids where pulled out of school. It makes absolutely no sense being the danger of contracting covid bears virtually no health risk to young people. However all covid-19 vaccines have been widely known to cause heart problems, and blood clotting (the list goes on) in completely healthy people with know prior issues before being vaccinated with Covid-19 shots. With that said, is the board willing to except responsibility of playing Russian Roulette with our children, we still don't know the long term effects of these vaccines. Being the governments of the world rushed in to enforce these vaccines was very very foolish. Decisions were made out fear and or financial gain. I oppose COVID-19 shot mandates, period!
2. I SUPPORT Informed Choice Washington's Petition for Rulemaking . The petition is item 11 on the January 12th agenda. It was filed by Xavier Figueroa, PhD, on behalf of ICWA, and asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Thank for paying attention to "We The People"

External Email

☐ To whomever is considering requiring COVID-19 vaccines for children in WA state to receive schooling or childcare:

Please protect children's civil rights in WA state, I implore you to say NO to mandating COVID-19 vaccines for children in order to receive schooling and childcare. I am a WA resident, citizen, parent, social worker and adult that has chosen to get a COVID vaccine for myself... I think it is worth mentioning, I am not against vaccines, I am against your proposed discrimination against children in the worst form- stopping a child's education and ability to advance in society simply based on their vaccine status.

What WA State Board of Health is proposing, is outright discrimination against children to receive education and childcare services in WA state based on their parent's informed and rightful healthcare decision. I am against discrimination of ALL kinds- including discrimination of COVID-19 vaccine status. Denying a child an education based on any kind of status is unethical treatment of people and I stand against it. Forcing children to have a vaccine to be educated would be a systemic discrimination bully tactic, to squeeze parents to make a decision on a vaccine that still has potential unknown risks and does not prevent the transmission of COVID-19.

We are the moms, we gave birth to these children that happen to reside in WA state, we are the ones that love and care for them- it is not the place of the state to force any healthcare decision upon parents for their children.

1. Policies and decisions can have unintended consequences. Furthermore, what will be next? Shall a child be prevented from participating in any part of society unless they have this particular vaccine? Let's face it, WA state has a bigger problem that needs immediate attention, WA state is failing in many areas of public education in basic areas of math, science, language arts - students are graduating without basic grade level understanding of basic subjects (<https://washingtonstatereportcard.ospi.k12.wa.us/> <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwashingtonstatereportcard.ospi.k12.wa.us/>>). WA state was failing children in their education before the pandemic, I cannot imagine how over a year of children on a computer has improved these numbers and now pushing this decision. There are teacher and substitute shortages- I am actually certified to work in the schools and if you mandate this, I would not consider ever working in a WA school if you forced this mandate. Have you thought of the implications of this decision on hiring staff for schools in the future? The staffing pipeline you will not have as a result? Parents are educators and school staff, they didn't sign up for what you are proposing. Perhaps you may want to consider the teachers and staff that will leave WA schools because of this policy, and those potential staff that will never consider teaching in your schools because of your policies.

2. Consider basic civil in America: Check out HHS.gov- from their website as of January 6, 2022:

"What are civil rights?

Civil rights are personal rights guaranteed and protected by the U.S. Constitution and federal laws enacted by Congress, such as the Civil Rights Act of 1964 and the Americans with Disabilities Act of 1990. Civil rights include protection from unlawful discrimination.

The HHS Office for Civil Rights (OCR) enforces civil rights laws that prohibit discrimination on the basis of race, color, national origin, disability, age, religion, and sex (including pregnancy, sexual orientation, and gender identity) by certain health care and human services entities:

- * state and local social and health services agencies,
- * hospitals,
- * clinics,
- * nursing homes,
- * insurers who are participating in the Marketplaces and receiving premium tax credits, and
- * other entities receiving federal financial assistance from HHS.

Under these laws, all persons in the United States have a right to receive health care and human services in a nondiscriminatory manner. For example, you cannot be denied services or benefits simply because of your race, color, national origin, or disability. For more information about these laws and our authority under them, see our Civil Rights home page

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.hhs.gov%2Fnode%2F2391&>
."

Also, "The Civil Rights Act of 1964 is the nation's benchmark civil rights legislation, and it continues to resonate in America. Passage of the Act ended the application of "Jim Crow" laws, which had been upheld by the Supreme Court in the 1896 case Plessy v. Ferguson, in which the Court held that racial segregation purported to be "separate but equal" was constitutional. The Civil Rights Act was eventually expanded by Congress to strengthen enforcement of these fundamental civil rights."

(<https://www.dol.gov/agencies/oasam/civil-rights-center/statutes/civil-rights-act-of-1964>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.dol.gov%2Fagencies%2Foasam%2Fcivil-rights-center%2Fstatutes%2Fcivil-rights-act-of-1964&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C8a7c9d5f6e7f41ac416008d9d203a800%7C11d0e21>

Not only will you be segregating children due to their COVID-19 vaccine status, you will be excluding them from an education altogether. This will be a shameful stain on WA state's history should you enact this.

3.

Please refer to WAC 246-105-030

4. Despite getting the COVID-19 vaccine, the disease will still be transmissible, it is

not preventable: "Vaccine-preventable diseases children must be protected against for full immunization. In accordance with the conditions of this chapter, a child is required to be vaccinated against, or show proof of acquired immunity for, the following vaccine-preventable diseases before attending school or a child care center)."

4. What happened to informed consent? Parents can make informed decisions for their children and if you disagree with it, that is okay, this is a free state in a free country, we are free people to decide what we want for ourselves and our children. We are the healthcare decision makers for our children. Parents have valid concerns to choose against the COVID-19 vaccine for their child and it is their family business what they decide. There is still little research on the long term effects that could occur in children, this is a valid concern for parents and they should be allowed to give pause to this decision. When I talked to a local pediatrician it is clear not much is known about the vaccine and children who have already had COVID-19. This, along with a host of other factors influence decision-making and these factors must remain private and respected. Parents do not need to give a reason why or "exemption status", it is a personal decision.

We are still learning about adverse effects in adults, some parents are not willing to risk vaccine injury or adverse effects for their children- and this should be okay like any other healthcare decision a parent makes with informed consent.

I implore you to stop the overreach into people's lives and allow parents to make informed healthcare decisions freely for their children. Please respond and let me know you received this communication and that you will consider it when you make your decision.

Sincerely,
Melissa Campana

Subject: No to vaccine mandates

External Email

Dear SBOH,

Please do not force people who would be more harmed than helped to get vaccinations that do not even affect their age group. Having children get immunized for a disease that has virtually 0% death rate for but the vaccination has an increased chance of causing myocarditis and other terrible side effects (www.CanadianCovidCareAlliance.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.canadiancovidcarealliance.org>>) is irresponsible at best, and criminal at worst on your part if you pass this as a mandate.

This applies to all people who are immune to covid from having contracted the disease and are now immune to it. The risks of the vaccine far outweigh any public good that the vaccine has shown to do. Please do not add covid to the list of communicable diseases that warrant such extreme measures.

Please stand behind and protect parents rights to choose what is best for their children. Please respect freedom of choice. Please respect bodily autonomy and informed consent by saying NO to mandating the Covid vaccine for our children.

Thank you for your time,

Nicole K

Subject: NO Vaccine Requirement for Children!

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

No one knows the long-term risks of these vaccines. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

☐ Dear Board member,

☐

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit

analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>
)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

To whom it may concern:

I am writing to voice my opinion about having Washington State Board of Health (WSBOH) REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for school admission. Due to the following reasons:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to the COVID vaccines than actual COVID-19

Subject: No Vaccine Mandates for Children

External Email

To Whom it May Concern:

I am a lawyer and journalist with an undergraduate degree in environmental science and political science from Columbia University. I also am a published author of children's biology reference books. I am writing to urge you to NOT mandate vaccines for children for school entry. Children are at practically no risk for hospitalizations or deaths from Covid. Almost all the children who have experienced hospitalization and/or death from Covid are those children with severe co-morbidities. Amongst those co-morbidities, include a majority of children with obesity.

The WSBOH would better serve the health and safety of the children and workers in our schools, by implementing stricter standards for preventing and addressing obesity in children through better diet and more opportunities for mandatory exercise. Such an approach would get to the root of the Covid problem in schools much more efficiently than forcing the majority of the students who are in good health, and have good immunity, to undergo a VERY RISKY MEDICAL PROCEDURE for which the long term effects have yet to be ascertained.

Furthermore, it is possible that the WSBOH is not aware of the possible risks from this vaccine because the pharmaceutical companies sponsor all the mainstream news outlet and as a result, the WSBOH is may be heavily relying on paid advertisements in order to get their information on the necessity or efficacy of the Covid vaccine. These same entities that are sponsoring the dissemination of information are actively suppressing opportunities to hear about negative reactions from the vaccines in order to secure their financial interests.

The decision on whether to vaccinate a child should be left up to each parent and their chosen doctors. Parents should not be forced to choose between their child's education and a vaccine that may negatively and permanently impact their child's health.

Thank you for your consideration of my deep concerns on this matter.

Sincerely,

Judith Yablonski

I am here to voice my concerns taking place in this State in regard to COVID 19 shots.

I feel that every parent chooses what they feel is right for their children and themselves. Whether that means choosing to get a shot or not, just like choosing to breast feed or use formula. Both are a right answer in what they choose for their family and that because it's a CHOICE. It should always be a choice to get a shot or not, just like the flu shot (Norway already views COVID as the flu so we really need to get on their level).

Thousands of fellow parents will pull their kids out of school if this is required. I love my children too much to force junk in their body that has yet to even be proven affective from getting it spreading with the shot- so what the point of even getting it? Due to the thousands of parents pulling their children will only add to the falling economy... as teachers, bus drivers, cooks, etc. will no longer be needed since their will hardly be any children in school.

Face it, COVID will not go away- people need to move on and live their life and realize it's not serious. People die from smoking... yet that's still ok....how many alcohol related deaths have there been? Millions... but yet let's still sell it and every venue, restaurant, and store. That makes sense.

There isn't a Covid pandemic. There is a people with power pulling pandemic. Horrible people that do not respect the constitution.

As you can see I am completely against forcing people and children from a shot that they feel is not good for them. And punishing those families who chose not to get it. This is un-American and I hope you are ashamed of yourselves.

Children are at extremely low risk for Covid 19.

The vaccines are only Emergency Use Authorized. There are no long-term studies to document any history of safety. Studies do now document that vaccinated and unvaccinated can both transmit Covid. Therefore the vaccine apparently does not stop the spread of the disease.

Mandatory Covid 19 Vaccines will segregate many children from an equal education. This mandate does not support equity diversity and inclusion.

Dear Washington State Board of Health members,

We are living through controversial times right now, where some people are in fear of losing their personal liberties and the freedom to choose what is best for them and their families.

Some people think that mandating a mRNA shot in order for kids to attend school is the route we should take. This technology, and the speed in which the shot was created by different companies simultaneously, is mind blowing. Science truly is a wonder. However, the science is very one sided right now, and anyone with a sideways view of a Covid 19 shot is canceled, their voice left unheard. Where is the dialogue that belongs to science? Where is the push back to make sure we are right?

There is no data about the long term effects of the Covid shots on kids. People are expected to sign their rights away without knowing their risks? Not a good deal in my opinion.

If families want the Covid 19 shot, then they should get it. If families choose to wait until further research is conducted on the risks involved, then that should be their freedom to choose.

Thanks for your time,

Megan Schorr

To whom it may concern:

I am a parent, grandparent and member of the community. I implore you to please stop the push to require Covid 19 vaccinations for ANY child in child care or school. Covid vaccines should NOT be a requirement for our children! Children are at an extremely low risk for Covid 19. The Covid vaccines have no long-term testing on adults and they have even less testing on children. Covid 19 vaccines are not stopping the virus as many with the vaccine are contracting and spreading Covid 19. The vaccine has not been tested enough to ensure its efficacy and safety in children. Requiring this vaccine does not protect our children!

The disease burden in this case does not meet your criteria. There is NOT a significant morbidity and/or mortality in at least some sub-set of the population. The survival rate is well over 90% and even the long term effects of Covid 19 do not represent a significant amount. Additionally, this vaccine is not meeting your criteria because it is not reducing the risk of person-to-person transmission.

As for the criteria of implementation, the vaccine is NOT acceptable to the medical community and the public. There is an extremely large amount of both the medical and the general public who do not accept this vaccine as safe.

Please protect our children by NOT requiring Covid 19 vaccinations to attend child care or school.

Thank you,

Kim Bentz

Hello,

I am writing to strongly demand that WA State NOT impose mandatory covid-19 vaccinations for school aged children. I'm actually baffled that I even have to write you this email, and that this topic is even on the agenda for your next meeting. The ignorance of such a proposal is actually jarring.

- 1) A mandate is not the law. To force people to comply with a mandate is criminal.
- 2) The vaccines are STILL (all of them) experimental drugs under emergency order. You cannot mandate this for schools or detain persons or families involuntarily who do not wish to comply. This is illegal and unethical.
- 3) Mass-vaccinating children for covid-19 is not a clinical necessity, as the real science has clearly shown! More injuries and adverse reactions (even just the small percentage of reported ones in the VAERS system) come from the vaccine than covid itself. The miniscule number of reported children who struggled with covid had other comorbidities that affected their outcome.
- 4) There is currently a 99.9% survival rate of covid-19 infections in the United States and the survival rate is even higher for school-aged children, who RARELY have problems, or even symptoms, of this infection. To mandate vaccinations on a populace with a greater than 99.9% survival rate shows a complete lack of common sense and critical thinking prowess.
- 5) If the goal of mass-vaccination of children is to reduce transmission to others, I strongly urge this "Board of Health" to look at the data and observe how an alarming

amount of current covid infections are in fully vaccinated individuals, who, believing they were protected, got infected and have been spreading it to others. This Board should be focused on THAT alarming trend, not on mass-vaccination of children who don't need it.

I look forward to the January 12th meeting!

Warmly,

JDW

☐ Dear Board member,
☐

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Kim Pham

I am completely against any of the proposed Covid policies that are overreaching and immoral.

We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.
