Board of Health -

I would like to register my support of Dr Berry & the mask mandate that she instituted here in Clallam County.

Dr Berry has done an outstanding job in a very difficult situation & I only wish that our citizens here would follow her advice & mandates. Our Covid #s would certainly be a lot more manageable if everyone was vaccinated & wore masks at appropriate times.

Sincerely,
Dorothy E Masters

Dr. Allison Berry is an outstanding public health official in Clallam County. As a former five-term Clallam County Commissioner, I had the opportunity to serve with several State, local and tribal public health officials over the years. We are fortunate to have her in our rural county. Please dismiss the complaint against Dr. Berry. Thank you. mike doherty

This message is to show support for the courageous steps Dr. Allison Berry has taken to protect the people of the North Olympic Peninsula. Our rural area saw COVID cases skyrocket late summer/early fall. She determined the best balance of curbing the COVID growth while protecting businesses and their employees.

Unfortunately, a vocal minority has been creating chaos, to the point of storming the County Courthouse, as well as trying to locate her at her home.

Please support Dr. Berry's efforts.

To the State Board of Health:

I'm a resident of Sequim, and I am writing in support of the efforts of Dr. Berry to stop the run-away covid-19 cases in Clallam County.

Irresponsible people are refusing to vaccinate, and Dr. Berry took strong measures to reduce disease transmission. Her courageous actions have resulted in hateful attacks on her and her family.

I want to assure you that most Clallam County residents support restrictions on the activities of people who refuse to get a vaccine.

"A community has the right to protect itself against an epidemic of disease which threatens the safety of its members," Justice John Marshall Harlan wrote in the 1905 case Jacobson v. Massachusetts.

Thank you,

Colleen Squier

I would like to voice my objection to the complaint regarding Dr. Berry in Clallam County. The complaint is political in nature and should be dismissed without further investigation. Dr. Berry is doing her job well and the critics, while very vocal, are also few. This looks like the product of a conservative "think tank" trying to further disrupt civilized life in this county.

In reference to #11 on your agenda item I would like to say that I fully support Dr. Allison Berry of Clallam County.

She has pulled us forward in an attempt to rid us of the impact of COVID on our small businesses, by using vaccine requirements to enter restaurants to dine inside. It has not impacted the ability of people to get food from an establishment, people who are unvaccinated can still pick food up for take out - or dine outside. It has allowed me to feel comfortable (as a vaccinated person) to finally dine inside a restaurant again.

I have been to a restaurant in Port Ludlow, and a winery in Woodinville in the past month that also had that requirement. It is forward thinking of Dr. Barry to implement it in Clallam County.

People make choices, and must live with them. If I want to go into a grocery store I must have on shoes and a shirt. If I want to fly in an airplane I must refrain from smoking during the flight - why ? for overall public health and safety. The vaccine is no different. The "choice" of a person to swing their fist ends at my nose.

"Choices" cannot and must not affect the health of the overall public, and when they do, it is up to our health leaders to implement common sense protocols that protect everyone from the selfish choices of a few. Dr. Berry has done that here in Clallam County and I applaud her.

Dr. Allison Berry, Public Health Officer for Clallam and Jefferson counties, has worked tirelessly to combat COVID-19 among the region's residents. She has ordered compliance with Gov. Jay Inslee's masking, social distancing, and mandatory vaccinations of public employees including health care workers and school employees. Thanks to her efforts, the region is now seeing a levelling off of those testing positive.

A complaint received by the State Board of Health charges that Dr. Berry failed to follow proper procedures in issuing a mandate on Sept. 2, 2021 that restaurant and bar patrons must show proof they are vaccinated against COVID-19. The summary of the case prepared by Mr. Grellner, makes it clear that Dr. Berry "acted within her authority" to "take certain actions to protect public health" to "control and prevent the spread of any contagious or infectious diseases that may occur within his or her jurisdiction."

Those words describe perfectly what Dr. Berry, with the approval of the County Board of Health, has done. It has won her the love and admiration of an overwhelming majority. Those filing this complaint are a tiny minority, making false claims that mandatory vaccinations are "unconstitutional."

Dr. Berry has stood up to intimidation and threats of bodily harm, with dignity and poise. We urge the State Board of Health to reject the complaint as lacking merit. We also urge the Board of Health to thank Dr. Berry for her courage and excellence as a Public Health Officer.

Respectfully,
John Shifley

1. Yes

Complaint against Dr. Berry for imposing proof of vaccinations to eat in restaurants and bars in Clallam County.

11. Are you Pro or Con on the proposal?

2. Con

I am writing in support of the courageous stand that Dr. Berry has taken in protecting our children and community against COVID. Those who refuse the vaccine are putting our children and elderly at risk. They should not have the right to expose others in public settings. If they choose to not be vaccinated, they should do the right thing and stay home. As Dr. Berry explained in her public comments, it is more important that children have the right to go to school than adults have the opportunity to go to a bar or restaurant. I understand it is difficult on restaurants to enforce this requirement given the belligerence of some unvaccinated, but I applaud their willingness to comply and make our community safer. The sooner people get vaccinated, the sooner our community can get back to normal. We were just in Spain where people have returned to eating out in droves. Everyone wears masks in public and 80% of the population is vaccinated. It's not a political wedge. It's just common sense.

To Whom it may concern,

We learned of this complaint through the "Next Door" community chat website. We will not be able to attend the meeting but would like to show our support for the community.

My husband and I are considered elderly (74 and 68 years old) although we usually enjoy relatively good health. We were both vaccinated against the corona virus in late January - early February following up 30 days later with the second dose and, therefore, feel much safer than we did the previous year. We wear masks whenever we are in public buildings required or not. We very much approve of the measures taken by Dr. Berry with regard to showing proof of vaccination when entering restaurants feeling strongly that this will save lives and keep the economy moving in the right direction.

In our opinion, Dr. Berry has provided a great service to the community.

Regards,
Gary & Kathy Lilley

Washington State Board of Health

Olympia, WA

October 8, 2021

To Michelle Davis, Chair Grellner, and State Board of Health members,

The Washington State Association of Local Public Health Officials (WSALPHO) appreciates the opportunity to provide public comment on the complaint issued against Dr. Allison Berry. This complaint alleges that Dr. Berry acted outside of her duty as health officer and outside of the local board of health's direction.

First and foremost, this is a local issue. Local Health Officers have broad scope and authority to make decisions for the public to protect them from disease and harm (RCW 70.05.070). Health officers are, in a sense, the doctor for a community. The decisions they make are to keep a whole community safe and protected from threats and hazards. A community-focused decision will have different impacts on the individuals within that community because of the different roles, status, positions, and levels of engagement they hold.

In practice, health officers work closely with their local boards of health and administrators in developing and implementing recommendations, orders, or directives. Health Officers issue these orders and directives for many public health problems, including isolation and quarantine, septic system maintenance, boil water notices, and community-wide directives. The authority to issue these directives lies with the health officer, not the local health board or the administrator. Orders and directives can happen as part of more significant response, such as a pandemic and in emergencies like foodborne outbreaks. We have seen this need to respond quickly as part of the pandemic's response through local masking mandates, school or classroom closures, recommendations to cancel large events, etc.

If the local board of health believes that Dr. Berry acted outside of their direction or disagreed with her directive, they should take administrative action as a personnel issue. This is the appropriate course of action. It would allow the local board of health to confirm how her action conflicted with their direction and provide an immediate opportunity to correct it. Complaints should always be directed at the supervisory body first when the complaint involves an employee (contracted or employed) before the state responds.

When Dr. Berry issued her order and mandate, the Clallam County Board of Health had the opportunity to provide public statements in opposition or disagreement with the local health official. They also have the responsibility and authority to immediately take disciplinary action if they had felt she had acted outside of the scope of health officer, a position that they appoint and oversee. The complaint's issue could have been raised and put on an upcoming local board of health meeting agenda. That meeting is another forum to publicly state the board's opposition to the decision and the process Dr. Berry followed. The local board of health members did none of these things in response to her directive.

Their initial silence should be taken to indicate that she had consulted them and had their support in her action. Nothing demonstrates that Dr. Berry acted outside of her authority or without the local board of health support. Further, at the September 28 local board of health meeting, the Clallam County Board of Health passed a resolution supporting Dr. Berry, her work, and the health department's work.

WSALPHO recommends and urges the State Board of Health to determine that this complaint has no validity in what it alleges and will not investigate further.

WSALPHO also is concerned that this complaint oversteps local government authority. This complaint encourages the state to dictate what local decisions and supervisory issues are acceptable, superseding our state's history of home rule, local laws, and authority. Further investigating this complaint sets an alarming precedent where any local decision can be challenged and overruled by the state without due process at the local level.

We thank the State Board of Health for looking critically at the points raised in this matter and look forward to a swift resolution.

In health,

Jaime Bodden, MPH, MSW
Managing Director
WSALPHO

Subject: Agenda item #11, Clallam County Public Health District Complaint
Date: Tuesday, October 12, 2021 12:58:56 AM

External Email

To Whom it May Concern:

This email is in regard to Agenda Item #11 in support of Dr. Allison Berry. I am a parent of a 10 yr old and a Clallam County community member living in the city of Sequim.

1. There is a concerted effort by a political group networking in Clallam County as "sovereign citizens" calling themselves "patriots" and consulting with "Constitutional Law Group" and escalating the uninformed to pressure our officials and particularly Dr. Allison Berry into quitting if officials do not meet their demands for "freedom."
2. The community is small and fully aware that Dr. Allison Berry is a relatively new mother, single, and leading our community safely through this pandemic.
3. Dr. Allison Berry fully informed us leading to the expected mandate that surprisingly left our bars and restaurants open while requiring vaccination cards. This information was distributed weekly through county health briefings that are meant as press releases which our county allows public view online. Our Health Officer has fully informed everyone in detail, speaks in laymen terms, teaches and is relatable rather than laying down the law without explanation.
4. She has shown devotion to the health of our community and prioritizing no harm to our children and their mental health. Her mandates have soothed fears of parents and children knowing everything possible is being done to protect those attending school.
5. She made it clear Delta variant cases surged that closing the schools last year and leaving the bars and restaurants open was an unhealthy choice for our children. So, closure of bars and restaurants was expected. She chose not to do that.
6. Theater is 1,000's of years old and essential to the social emotional health of society. Science, psychology, recently learned attributes of our craft are proven to treat trauma disorders. It inspires the change in every age in science. Our county theaters chose to also require vaccination cards and are not having outbreaks. In theater we depend on one another and must abide by the same rules regardless our politics, a requirement for collaboration. We did have difficulty getting everyone to comply due to misinformation. Fortunately, we have actual lawyers volunteering in our theaters that are able to explain the law around public health.

7. The upcoming season was announced and the Delta variant hit. That's when these "patriots" decided they were more important than others and chose not to protect the community in favor of what they call their personal "freedom."

8. Our unvaccinated children and our elderly immune compromised are excluded from the healthy experience of theater for their protection at this time as per our choice to protect the public. Our theaters are making decisions now ahead of the health department to reduce risk in hopes to prevent closure. We appreciate Dr. Allison Berry's actions and trust her judgement and impeccable integrity.

Thank you,
Rebecca Lynn Horst

To The Washington State Board of Health Members & Staff.

Re: Agenda Item #5, Public Comments.

I am sending this e-mail in support of Dr. Allison Berry. Dr. Berry has performed her duties professionally and with our public health at the forefront of her efforts.

Those efforts provide me with a degree of assurance that, along with my being vaccinated, others in my town and county are exhibiting common sense and concern for all others who are here. Even with what I consider the modest efforts initiated to address a public health emergency Clallam County still registers 1 in 17 of its citizens being infected. Not a very boastful statistic.

The various complaints voiced in the letters against Dr. Berry for me are from those who confuse Constitutional Freedom with social responsibility. There can be freedom without responsibility.

Dr. Allison Berry deserves support from every member of this community and the Washington State Board of Health.

With Kind Regards

DR. ALLISON BERRY, PUBLIC HEALTH OFFICER, NORTH OLYMPIC PENINSULA, HAS OUR FULL SUPPORT

To: Keith Grellner, Chair and all Washington State Board of Health Members

Dr. Allison Berry, Public Health Officer for Clallam and Jefferson counties, has worked tirelessly to combat COVID-19 among the region's residents. Nevertheless, the pandemic has spread and taken the lives of scores of women, children, and men on the Olympic Peninsula. She has ordered compliance with Gov. Jay Inslee's masking, social distancing, and mandatory vaccinations of public employees including health care workers and school employees. Thanks to her efforts, our region is now seeing a levelling off of those testing positive. Here, as in the rest of the nation, the majority of COVID-19 victims are unvaccinated. The best, perhaps only way, to end the COVID-19 pandemic is for everyone to be vaccinated except those with medical or religious exemptions.

The State Board of Health received a complaint charging that Dr. Berry failed to follow proper procedures in issuing a mandate on Sept. 2, 2021 that restaurant and bar patrons must show proof they are vaccinated against COVID-19. The summary of the case prepared by Mr. Grellner, makes it clear that Dr. Berry "acted within her authority" to "take certain actions to protect public health" to "control and prevent the spread of any contagious or infectious diseases that may occur within his or her jurisdiction."

Those words describe perfectly what Dr. Berry, with the approval of our County Board of Health, has done. It has won her the love and admiration of an overwhelming majority. Those filing this complaint are a tiny minority. They make false claims that mandatory vaccinations are "unconstitutional." In fact, the Supreme Court ruled in *Jacobson v. Massachusetts* in 1905 that mandatory vaccinations are constitutional, that vaccinations were urgently needed to stop the spread of smallpox. More than 600 court rulings since then have upheld health care mandates.

Attached to the complaint is a comment that Dr. Berry is guilty of "crimes against humanity" "treason," and compares her to "Nazis and Hitler." This is an absurd, vile slander. A boisterous crowd making similarly outrageous claims gathered to protest her mandate and then stormed the Clallam County Courthouse demanding that she present herself and that she be fired.

Dr. Berry has stood up to intimidation and threats of bodily harm, with dignity and poise. We urge the State Board of Health to reject the complaint as lacking merit. We also urge the Board of Health to join the undersigned groups in thanking Dr. Berry for her courage and excellence as a Public Health Officer.

As a member of PSARA, I am in full agreement with these comments. In addition, I feel it is important for the State Board of Health to read the ill-advised City Council resolution (see attached) that has increased the political division in the community of Sequim between those who see Dr. Berry's actions as a threat to their personal freedom and those who see the mandates she put in place as a necessity because the unvaccinated are shirking their personal responsibility to protect the health of the community by refusing to obey the mandates.

Statement of Puget Sound Advocates for Retirement Action (PSARA), including PSARA members in Clallam and Jefferson counties and Voices for Health & Healing (Clallam County).

Dear Keith Grellner, Chair, and members of the Washington State Board of Health,

Please accept this late submission, we only just heard about this scandalous complaint.

My Wife and I wholeheartedly support Dr. Berry!

She is doing a Herculean job controlling and reducing the raging COVID 19 pandemic that is ravaging Clallam county. As you are no doubt aware, a few weeks ago, the COVID infection rate here was a terrifying 1,200 cases per 100,000, and COVID deaths were becoming common, but the infection and death rate is now receding. Dr. Berry is simply doing her duty in applying the measures at her disposal required to contain the pandemic.

She is doing this with the full support of most of the community, but faces vicious and unwarranted opposition and intimidation (including threats to her person) from a minority of misinformed, ignorant but noisy individuals. These people are whining about infringements of their 'Constitutional Rights' to do whatever they like even if it causes harm to others, with no mention of responsibility to their neighbors and community. Of course they don't have such rights, the courts having upheld the legality of vaccination mandates for more than 100 years (Jacobson v. Massachusetts, 1905).

Please disregard this outrageous complaint with the indifference it deserves, and dismiss it.
Thank you for the work you do.

Sincerely,

Paul V. Hansen

To Whom It May Concern.

Dr. Berry acted within her authority in issuing a vaccine mandate covering bar and restaurant patrons, and I support her sensible public health measures. She has also courageously stood up to attempts to bully and defame her. She has withstood marching; even though, the antivaccine folks went to the wrong home.

She is a valued public servant, and I urge the State Board of Health to dismiss the complaints against her.

Thank you for time. Regards, Bill Kellogg in Sequim.

"I understand that Dr. Allison Berry, Public Health Officer for Clallam and Jefferson counties, has had a formal complaint lodged against her because of her work to combat COVID 19 in these two counties. The complaint is frivolous. She acted within her authority to issue vaccine mandates as needed with regard to covering bar and restaurant patrons. I support her taking sensible, proven public health measures.

Additionally, she is a dedicated public servant and should not have to stand up to the attempts to malign, bully and defame her.

I urge the State Board of Health to dismiss the complaints against her.

I am writing to express my whole-hearted support for Dr. Allison Berry, public health officer for Clallam and Jefferson counties. I am a resident of the Sequim area in Clallam County, and I appreciate that she has provided steady, evidence-based guidance during the past year and a half. It is alarming to see the attacks against her by misinformed, belligerent people.

Please dismiss the complaints against Dr. Berry and let her continue doing her outstanding work for our community. She deserves much better than she is getting.

Many thanks,

To: Keith Grellner, Chair and all Washington State Board of Health Members

Subject: Comments re your Oct 13 meeting, Item 11: Clallam County Public Health District Complaint.

Dr. Allison Berry, Public Health Officer for Clallam and Jefferson counties, has worked tirelessly to combat COVID-19 among the region's residents. Nevertheless, the pandemic has spread and taken the lives of scores of women, children, and men on the Olympic Peninsula. She has ordered compliance with Gov. Jay Inslee's masking, social distancing, and mandatory vaccinations of public employees including health care workers and school employees. Thanks to her efforts, our region is now seeing a levelling off of those testing positive. Here, as in the rest of the nation, the majority of COVID-19 victims are unvaccinated. The best, perhaps only way, to end the COVID-19 pandemic is for everyone to be vaccinated except those with medical or religious exemptions.

The State Board of Health received a complaint charging that Dr. Berry failed to follow proper procedures in issuing a mandate on Sept. 2, 2021 that restaurant and bar patrons must show proof they are vaccinated against COVID-19. The summary of the case prepared by Mr. Grellner, makes it clear that Dr. Berry "acted within her authority" to "take certain actions to protect public health" to "control and prevent the spread of any contagious or infectious diseases that may occur within his or her jurisdiction."

Those words describe perfectly what Dr. Berry, with the approval of our County Board of Health, has done. It has won her the love and admiration of an overwhelming majority. Those filing this complaint are a tiny minority. They make false claims that mandatory vaccinations are "unconstitutional." In fact, the Supreme Court ruled in *Jacobson v. Massachusetts* in 1905 that mandatory vaccinations are constitutional, that vaccinations were urgently needed to stop the spread of smallpox. More than 600 court rulings since then have upheld health care mandates.

Attached to the complaint is a comment that Dr. Berry is guilty of "crimes against humanity" "treason," and compares her to "Nazis and Hitler." This is an absurd, vile slander. A boisterous crowd making similarly outrageous claims gathered to protest her mandate and then stormed the Clallam County Courthouse demanding that she present herself and that she be fired.

Dr. Berry has stood up to intimidation and threats of bodily harm, with dignity and poise. We urge the State Board of Health to reject the complaint as lacking merit. We also urge the Board of Health to join the undersigned groups in thanking Dr. Berry for her courage and excellence as a Public Health Officer.

We are 100% in support of Dr. Berry.

The recent mandate to show proof of vaccination at a restaurant or bar is exactly what needs to happen. It puts our county in the forefront. My husband and I went out to eat in a restaurant last week, something we have rarely done since COVID. We felt so much safer knowing that everyone else in the restaurant was vaccinated. For once our personal freedom of being able to eat in a restaurant without fear had been considered.

Dr. Berry should be congratulated, not villified, for her desire to keep residents of Clallum County safer during these trying times.

I am a citizen of Clallam County, and I write to show my full support of Dr. Berry's rule to require proof of vaccination to dine indoors in Clallam and Jefferson Counties until the rate of cases returns to the 'moderate' level of 75 cases/100k for at least 2 weeks. Contrary to what my fellow citizens have claimed in their complaints about the order, this is NOT a 'vaccine mandate'. It is a requirement for those eligible for vaccinations to show proof of vaccination in order to dine indoors. Everyone is still fully within their rights to choose not to get a vaccine. If they make that choice, they still have the option to support their local restaurants by getting takeout or, when available, eating outdoors.

Contrary to what my fellow citizens claim in their e-mails and letters to you, there is no 'crime against humanity' - even if this vaccine were not authorized by the FDA, making it far from 'experimental', this rule is not mandating anyone to get the vaccine. Nor are anyone's Constitutional rights being violated. Eating indoors at a restaurant is not a guaranteed Constitutional right. In fact, many restaurants require customers to wear shirts and shoes to be served, even though there is no epidemic of foot and mouth disease, nor have I seen any reports of death from foot and mouth disease, let alone over 50 deaths in Clallam County and over 700k nationwide. Yet, I don't see any of my fellow citizens complaining about having to wear shoes or a shirt to dine indoors. Nor is this requirement a violation of the ADA - choosing to not get a vaccine is not a disability, and even if it was, the reasonable accommodations of getting takeout or dining outdoors are available. In a similar vein, HIPAA was put in place to keep others (mainly medical providers) from revealing information about your health, not to keep you from revealing your own health information - you and you alone can make that choice. And if you choose not to reveal such information, reasonable accommodations to indoor dining are available.

Please determine that this complaint does not merit a preliminary investigation due to lack of sufficient information indicating a possible violation of relevant public health law and notify the very vocal minority of my fellow citizens of that decision.

Sincerely,

Amy Greenlief

To:
Michelle Davis, Executive Director & Washington State Board of Health

This letter is to urge the Board to support Dr. Barry and all local health departments in issuing the appropriate orders to keep our citizens safe. There is a small, and very vocal contingent sending standard form letters, in opposition to safeguarding our communities. I am writing to ensure that the Board is aware that their public comments and vocal objection to vaccine mandates does not reflect the views of the local community as a whole.

The pandemic has been a difficult and challenging for all of us. The sooner we can get the spread under control so that our healthcare system can care for the ill, the sooner we can return to normal economic activity. Vaccine mandates are an American tradition to protect our communities and our country. We have had mandated vaccines for public school children since the 19th century.

I strongly urge the WA State Board of Health to support their mission to keep our citizens safe and support our local health officers as they do their jobs.

Thank you for the opportunity to comment,

To: Keith Grellner, Chair and all Washington State Board of Health Members
From: Robby Stern, Former Chair of the Healthy Washington Coalition
Subject: Comments re your Oct 13 meeting, Item 11: Clallam County Public Health District Complaint.

Unfortunately I will be unable to attend the Public Comment period of the Board meeting tomorrow. I wish to comment on what I view as a vicious attack on Dr. Allison Berry by misguided citizens. In my view, the complainants fail to understand and/or appreciate the critical role of public health and the officers mandated to insure the public health of Washington residents.

Dr. Allison Berry, Public Health Officer for Clallam and Jefferson counties is performing an admirable service for the residents of the North Olympic Peninsula. I have a number of friends who live in Clallam and Jefferson counties and without exception, they deeply appreciate the decisions made by Dr. Berry.

COVID 19 has had a devastating impact on our state, our country and our world. The development of a vaccine has created the possibility that we can actually overcome the terrible consequences of this deadly virus but only if the residents cooperate and follow basic public health protocols. There is a long history of vaccine mandates in our country including smallpox, polio, diphtheria, measles, and more. My wife was a pediatric nurse at Harborview for 20 years and then a school nurse for 5 years and vaccinations were mandatory standard public health practice with an exemption for people with genuine medical or religious reasons.

When Dr. Berry ordered that public accommodations, including restaurants and taverns open to the public, must verify vaccination status before allowing entry into their establishments she was exercising both her authority and good judgment to protect the public health and stop the spread of the COVID 19 virus. The complainants in this petition to the State Board of Health are, for whatever reason, demonstrating their lack of concern for the welfare of the broader community. Their complaint should be dismissed and Dr. Berry should be commended.

Thank you for this opportunity to provide a public comment,
Robby Stern, Former Chairperson of the Healthy Washington Coalition

I understand that anti-vaxxers and others indifferent to the dangers of Covid are now trying to politicize yet another aspect of our lives, this time the Clallam/Jefferson Counties health officer Dr. Alison Berry. Her performance in trying to educate and protect the citizens of these two adjacent counties about the dangers of Covid, and the benefit of vaccines and masks has been exemplary. The people initiating complaints against her are full of lies, irrationality and rage. I, among many other citizens here, am deeply grateful for her efforts, and we regret the ignorant vitriol that she has suffered now for months.

Dr Berry has followed carefully the data on Covid, and has kept us informed. She has stressed the importance of vaccines and of masks; recently, she has required proof of vaccination as a prerequisite for entering a bar or restaurant. In return for her concern and protection, the opposition has gone simply crazy. They are animated by destruction.

Please note the large number of supporters for the current public health measures in Clallam and Jefferson Counties, and please support Dr. Alison Berry.

WA State Board of Health Members,

As a taxpayer and resident of Clallam County this is a formal complaint of illegal actions taken by Dr. Allison Berry regarding a vaccine mandate affecting local dining establishments.

This complaint is filed pursuant to RCW 70.05.120 (1) which provides: Any local health officer or administrative officer appointed under RCW 70.05.040 who shall refuse or neglect to obey or enforce the provisions of chapters 70.05.70.24 and 70.46 RCW or the rules, regulations or orders of the state Board of Health or who shall refuse or neglect to make prompt and accurate reports to the State Board of Health, may be removed as a local health officer or administrative officer by the State Board of Health and shall not again be reappointed except with the consent of the state board of health. Any person may complain to the State Board of Health concerning the failure of the local health officer or administrative officer to carry out the laws of the rules and regulations concerning public health, and the State Board of Health shall, if a preliminary investigation so warrants, call a hearing to determine whether the local health officer or administrative officer is guilty of alleged acts. Such hearings shall be held pursuant to the provisions of chapter 34.05 RW, and the rules and regulations of the State Board of Health adopted thereunder.

We were NOT granted our procedural due process rights.

There was NO properly noticed public meeting by our Clallam County local Board of Health.

Our Clallam County local Board of Health did NOT direct Dr. Allison Berry to issue this type of mandate. She acted on her own.

There is NOT a public record of our local Board of Health's "findings and decisions" regarding the outcome of a public meeting that did not ever occur.

We need FAIRNESS and people on the State Board of Health to do the right thing to honor our rights as citizens of this state.

**Respectfully,
Denny Luce
Sequim, WA**

Hello, I am a member of the Sequim Good Governance League (SGGL) and Dr. Allison Berry is my Public Health Officer. After she issued a rule that restaurants and bars must check patrons vaccination cards there was pushback by a group of people who gathered at the County Courthouse to confront her. The Sheriff addressed the crowd and stated; "I basically said that the sheriff's office is not enforcing the health officer's mandate. And the reason we're not enforcing it is that I don't have the authority to enforce it. I did tell people that if they go into a business and refuse to wear a mask, we won't make them leave. The sheriff's office does not have the statutory authority to enforce health mandates." I discovered that RCW 43.20.050 provides guidance with regards to enforcement; RCW [43.20.050](#)

Powers and duties of state board of health—Rule making—Delegation of authority—Enforcement of rules. Section 5 specifically addresses enforcement of public health orders; (5) All local boards of health, health authorities and officials, officers of state institutions, police officers, sheriffs, constables, and all other officers and employees of the state, or any county, city, or township thereof, shall enforce all rules adopted by the state board of health. In the event of failure or refusal on the part of any member of such boards or any other official or person mentioned in this section to so act, he or she shall be subject to a fine of not less than fifty dollars, upon first conviction, and not less than one hundred dollars upon second conviction.

My question is in regards to Dr. Berry's authority. The RCW specifically calls out the state boh but how does the delegation of authority relate to her office? Although the board may not adopt her rule, is she under the aegis of the state's authority? In your view would the Sheriff and local Police be obliged to enforce the mandate. Without that specific connection I fail to see how the Sheriff will be convinced. I realize this will probably create more stress but we are experiencing some major pushback from opposition groups which probably include members of Ammon Bundy's People's Rights Movement and possibly the Oath Keepers, Three Percenters and Proud Boys. A group of people attempted to march on Dr. Berry's home and they continue to demand her resignation and even arrest. A meeting of the local health board was interrupted and a Sequim School Board meeting shut down because of anti-maskers. The Sequim City Council passed a Resolution challenging Dr. Berry's authority and refusing to support the rule. There is a planned rally on October 19th to support those employees who will be let go because they refuse to be vaccinated. Our dining and drinking establishments need to understand that law enforcement will support their decisions to follow the rule. Those businesses which refuse to comply need to be apprised both by the Clallam Board of Health and the Sheriff that they could lose their licenses. Can you help me connect the dots?

Sincerely, Brian Grad

Hello,

I know this email is past noon, but I'm hoping it will still make its way into the right hands in time.

I'm emailing in regards to the upcoming meeting on CMV, Cytomegalovirus. I had to advocate hard for both myself, and my baby to get testing and ultimately be diagnosed with CMV. I often think back and wonder how different our first year would have been if WA state had testing and education legislation in place. Not only are mothers left in the dark, but the medical community isn't properly prepared to advocate or support the families battling this. It is not uncommon. CMV is common, and if anything is taken away I want it to be that. By adding CMV to the newborn screening you will not only be helping babies get proper early intervention and testing, you will also be a light for all the mothers sitting in the dark unknowns of this virus. You will be making a bold statement to the medical community that it is time to understand CMV better, and acknowledge that it is common. That it needs attention and awareness drawn to it.

Thank you for your time,
Lisa A, CMV survivor and mother to a freaking miracle

Due to the limited long term effects knowledge, the observed adverse events and the discontinuation of the mRNA vaccines by Nordic, vaccine mandates should not be instituted. Not to mention the constitutionality of them and the cost to cover expected litigation.

October 12, 2021

Dear Department Rulemaking and Policy team,

We appreciate the opportunity to provide formal comments on the Department of Health's Group A Public Water Systems rule making and revision process. The City of Redmond is committed to providing safe drinking water to those who live, work, and play in Redmond. The City supports the characterization of PFAS occurrence in drinking water and scientific work to understand the public health impact of PFAS in drinking water. We offer the following comments to improve the clarity of the proposed rule, ensure consumer confidence in the SAL process, and use a science-based approach to rule development.

Concerns of Inconsistency between State and Federal Rules

- **Align SALs with MCLGs** - Due to anticipated standards at the federal level, via H.R. 2467 titled "PFAS Action Act of 2021" that requires the EPA to establish a national drinking water standard for PFOA and PFOS within two years, it is recommended that the state align actions around SAL with actions related to MCLGs. This would prevent undue burdens on purveyors due to changing standards for treatment and reporting and prevent confusion and mistrust from consumers due to changing messaging.
- **Significant Legislative Rule Analysis (page 13)**, states "*The SALs define a level in daily drinking water expected to be without appreciable health effects even in sensitive populations and life stages. They are comparable to a health advisory level or maximum contaminant level goal (MCLG) in the federal Safe Drinking Water Act.*" The rule as written requires utilities to take actions for repeated sampling, consumer notification, and 24-hour WDOH notification (246-290-480(2)) similar to that of an MCL at the federal level per 40.CFR.141.203. As stated within the Significant Legislative Rule Analysis, the SALs are comparable to MCLG. Therefore, requirements should be consistent with MCLGs instead of MCLs. Within 246-290-320 and 246-290-480, there are no follow up actions or reporting requirements for exceedances of MCLGs.
- **Significant Legislative Rule Analysis (page 16)**, states "*The proposed amendments to this section establish actions a Group A water system must take if there is an exceedance of a contaminant's SAL. These proposed amendments are like those for other federally regulated contaminants, including that the Group A water system must notify the department, notify Group A water system users, and owners and operators of any consecutive systems.*" The actions and notification being required for an SAL exceedance are in alignment with MCL exceedance for federal regulated contaminants, not MCLG exceedances. It is recommended that actions for an SAL exceedance aligns with MCLG exceedance at the federal level.

Concerns of Inconsistency between Department of Ecology and Department of Health

- **It is imperative that DOH coordinate with Ecology** regarding the development of the PFAS SALs and the use of reclaimed water over critical aquifer recharge areas (CARAs). The Reclaimed Water Use Law (RCW 90.46) identified acceptable uses of reclaimed water to include direct and indirect aquifer recharge. However, limited sampling of reclaimed water from LOTT and Brightwater facilities has shown PFOA detections that exceed the proposed SAL. With this proposed rulemaking going forward, this issue must be addressed in an update to WAC 173-219. At a minimum, if PFAS is found in reclaimed water at levels above a SAL it should be prohibited from land application use within CARAs and Wellhead Protection Areas.

Cost Burden

- **WAC 246-290-320(1)(d)(v)** – The follow-up action of *“Take action as directed by the department”* is vague. The rule needs to clarify the expectation of utilities for action that needs to be taken if one or more SAL is exceeded. What is the trigger to *“take actions as directed by the department”*? Recommend providing clear actions based on concentrations detected to allow purveyors to plan accordingly.
- **Significant Legislative Rule Analysis (page 27)**, quotes Ecology’s PFAS Chemical Action Plan to state that *“State agencies, the Washington State Legislature, and local water systems should work together to fund PFAS drinking water mitigation. These costs should be reimbursed by responsible parties under applicable laws.”* Redmond is concerned that cost burden will fall on utility ratepayers to fund capital and operational sampling and treatment that may stem from this rulemaking. Identification of the responsible party of PFAS contamination can be very costly and time consuming. Resources for PFAS source identification and mitigation must be identified to support the purveyors in identifying the responsible parties.

Consumer Confidence

- **WAC 246-290-71006 (page 83)**, states *“Group A water systems with an exceedance of any PFAS SAL must notify their customers so they can make more informed decisions about their health and the health of their families.”* Purveyors need guidance on how to inform consumers.
 - Clear, fact-based messaging must be created to address the array of potential sampling results (at SAL, above SAL and below MCL, etc.).

City Hall

15670 NE 85th Street

PO Box 97010

Redmond, WA

98073-9710

- Provide notice language based on the range and relative health risk of PFAS measured in the water source (i.e., is it safe for all people, a subset of the population, the most vulnerable population?).
- Prior to requiring notification to the public regarding PFAS in drinking water, provide relevant communication and messaging to healthcare providers to aid in their response to patient concerns.
- **Significant Legislative Rule Analysis (page 4)**, states *“In this rulemaking, the board and the department considered setting a state maximum contaminant level (MCL) for PFAS but ultimately the board directed the department to develop a “state advisory level”, which is undergoing a concurrent name change in this proposal to “state action level (SAL).”* If consumer notification is required for SAL exceedances, SAL development should include a cost-benefit analysis similar to requirements for MCL development. The SAL thresholds are more complex to explain to consumers since they are not aligned with MCLs.

Improve Clarity

- **WAC 246-290-130 (4)(h) (page 29)** contradicts 246-290-130 (4)(g)(i), which states raw water coliform source sample must be satisfactory. Recommend adding “unless approved disinfection treatment is provided”.
- **WAC 246-290-300 (10)(a), Table 3 (page 43-44)** – Recommend changing heading to “Monitoring for Contaminants with SALs”. Recommend only the specific contaminants with SALs should be listed in this column and revise column heading to read “Contaminant”.
- **WAC 246-290-300 (10)(b) (page 44)** does not mention the difference between the two available lab methods: EPA Method 533 (requires testing for 25 contaminants) and EPA Method 537.1 (requires testing for 18 contaminants). Recommend clarifying if it is the department’s intent that every system required to monitor for a SAL must have each sample analyzed using both EPA Method 533 and EPA Method 537.1 in order to test for all 29 analytes listed in Table 7 of WAC 246-290-075.
- **WAC 246-290-300 (10)(g) (page 45)** – For ease of understanding the acceptability of results from future UCMR5 testing, recommend including a matrix to show the acceptable limits and required actions in relation to each SAL.
- **WAC 246-290-310 (7)(b)(i) (page 49)** – The table containing organic chemical MCLs is missing a table number. Please add a table number for clarity and ease of reference.
- **WAC 246-290-455 (2) (page 60)**, states *“Purveyors using treatment or blending to remove or reduce a contaminant with SAL”* shall collect finished drinking water samples on a quarterly basis. Including blending in this section implies that a system that blends sources would have to

City Hall

Environmental Sustainability

monitor quarterly. Recommend removing the words "or blending" from this section or clarify that the quarterly monitoring requirement only applies when initial blended sample results are greater than a SAL.

If you would like to discuss any of these comments, please contact Amanda Balzer LG, Science and Data Analytics Supervisor at the City of Redmond abalzer@redmond.gov.

Thank you for taking Redmond's comments into consideration.

October 12, 2021

Dear Department Rulemaking and Policy team,

We appreciate the opportunity to provide formal comments on the Department of Health's Drinking Water laboratory certification and data reporting rule making and revision process. The City of Redmond is in support of high-quality lab data to protect the health of our residents and quality of our groundwater resource. We ask that you consider the following comments in the rulemaking and revision process on behalf of the City of Redmond.

- Draft rule changes to the reporting requirements in WAC 246-390-075 (17)(e)-(f) require Tentatively Identified Compounds (TIC) detected while analyzing a PFAS sample to be reported. These requirements may incur additional sampling costs associated with the interpretation and quantification of TICs. Is there a list of TICs to which the results would be compared? Is there a standard form for reporting TIC results?
- Draft State Action Level (SAL) monitoring requirements in WAC 246-290-300 classify per- and polyfluoroalkyl substances (PFAS) as organic chemicals. For ease of reference and consistency with SAL monitoring requirements, consider moving the PFAS section to be within or after the organic chemicals section. Or, add language to WAC 246-390-075 Reporting (13) that additional organic chemical State Detection Reporting Limits (SDRL) are listed separately in section (17) Table 7.
- To support communication of results, consider a requirement for the lab to send the purveyor copies of any notifications they send to the Department, such as adding 'Public Water System' on 4th column of Tables 1 and 2 (page 4), and sections 246-390-065 (2) (page 4) and 246-390-075 (17) (e) (page 14).
- Due to risk of cross contamination during sample collection, quality control field blanks collected at PFAS sample locations are important to understanding results. Will use of field blanks be part of the standard or up to each purveyor? USEPA 537.1 and 533 (drinking water analyses) contain specific QC requirements including a minimum of one field reagent blank for each set of samples per site and field duplicates (according to ITRC website).
- Consider adding a column to the Report of Analysis form to include the lab's Method Reporting Limit (MRL) for each contaminant, since it may be higher than the SDRLs.

app.leg.wa.gov/RCW/default.aspx?cite=238.01.400

(26) "Means" denotes an exhaustive definition.

(27) "Notice" has the meaning provided in RCW 238.01.410.

(28) "Person" means an individual, corporation, business trust, estate, trust, partnership, limited liability company, association, joint venture, government, governmental subdivision, agency, or instrumentality, or any other legal or commercial entity.

(29) "Principal office" means the office, in or out of this state, so designated in the annual report where the principal executive offices of a domestic or foreign corporation are located.

(30) "Proceeding" includes civil suit and criminal, administrative, and investigatory action.

(31) "Public company" means a corporation that has a class of shares registered with the federal securities and exchange commission pursuant to section 12 or 15 of the securities exchange act of 1934, or section 8 of the investment company act of 1940, or any successor statute.

(32) "Qualified director" means (a) with respect to a director's conflicting interest transaction as defined in RCW 238.08.700, any director who does not have either (i) a conflicting interest respecting the transaction, or (ii) a familial, financial, professional, or employment relationship with a second director who does have a conflicting interest respecting the transaction, which relationship would, in the circumstances, reasonably be expected to exert an influence on the first director's judgment when voting on the transaction; (b) with respect to RCW 238.08.735, a qualified director under (a) of this subsection if the business opportunity were a director's conflicting interest transaction; and (c) with respect to RCW 238.02.020(2)(d), a director who is not a director (i) to whom the limitation or elimination of the duty of an officer to offer potential business opportunities to the corporation would apply, or (ii) who has a familial, financial, professional, or employment relationship with another officer to whom the limitation or elimination would apply, which relationship would, in the circumstances, reasonably be expected to exert an influence on the director's judgment when voting on the limitation or elimination.

(33) "Record date" means the date established under chapter 238.07 RCW on which a corporation determines the identity of its shareholders and their shareholdings for purposes of this title. The determinations shall be made as of the close of business on the record date unless another time for doing so is specified when the record date is fixed.

(34) "Registered office" means the address of the corporation's registered agent.

(35) "Secretary" means the corporate officer to whom the board of directors has delegated responsibility under RCW 238.08.400(3) for custody of the minutes of the meetings of the board of directors and of the shareholders and for authenticating records of the corporation.

(36) "Shareholder" means the person in whose name shares are registered in the records of a corporation or the beneficial owner of shares to the extent of the rights granted by a nominee certificate on file with a corporation.

(37) "Shares" means the units into which the proprietary interests in a corporation are divided.

(38) "Social purpose" includes any general social purpose and any specific social purpose.

(39) "Social purpose corporation" means a corporation that has elected to be governed as a social purpose corporation under chapter 238.25 RCW.

(40) "Specific social purpose" means the specific social purpose or purposes for which a social purpose corporation is organized as set forth in the articles of incorporation of the corporation in accordance with RCW 238.25.040(2)(a).

(41) "State," when referring to a part of the United States, includes a state and commonwealth, and their agencies and governmental subdivisions, and a territory and insular possession, and their agencies and governmental subdivisions, of the United States.

(42) "Subscriber" means a person who subscribes for shares in a corporation, whether before or after incorporation.

(43) "Subsidiary" means an entity in which the corporation has, directly or indirectly, a controlling interest.

(44) "United States" includes a district, authority, bureau, commission, department, and any other agency of the United States.

(45) "Voting group" means all shares of one or more classes or series that under the articles of incorporation or this title are entitled to vote and be counted together collectively on a matter at a meeting of shareholders. All shares entitled by the articles of incorporation or this title to vote generally on the matter are for that purpose a single voting group.

(46) "Writing" or "written" means any information in the form of a document.

[2021 c 84 § 1; 2020 c 57 § 39; 2019 c 141 § 5; 2017 c 28 § 12. Prior: 2015 c 176 § 2148; 2015 c 20 § 1; 2012 c 215 § 17; 2009 c 189 § 1; prior: 2002 c 297 § 9; 2002 c 296 § 1; 2000 c 168 § 1; 1996 c 155 § 4; 1995 c 47 § 1; prior: 1991 c 269 § 35; 1991 c 72 § 28; 1989 c 165 § 14.]

5. I will not counsel or maintain any suit or proceeding which shall appear to me to be unjust, or any defense except as I believe to be honestly debatable under the law, unless it is in defense of a person charged with a public offense. I will employ, for the purpose of maintaining the causes confided to me, only those means consistent with truth and honor. I will never seek to mislead the judge or jury by any artifice or false statement.
6. I will maintain the confidence and preserve inviolate the secrets of my client and will accept no compensation in connection with the business of my client, unless this compensation is from or with the knowledge and approval of the client or with the approval of the court.
7. I will abstain from all offensive personalities and advance no fact prejudicial to the honor or reputation of a party or witness unless required by the justice of the cause with which I am charged.
8. I will never reject, from any consideration personal to myself, the cause of the defenseless or oppressed, or delay unjustly the cause of any person.

 Oaths.pdf

I WANT THOSE LIABLE FOR THE ENFORCEMENT OF THE STATE AND FEDERAL LAWS, TO ENFORCE THOSE LAWS AND REMOVE ALL OBSTRUCTIONS OF MARKET COMPETITION.

TODAY, I WANT MY SONS, I WANT SUED EVERY MANDATORY REPORTER, EVERY COP AND SHERIFF, EVERY FBI AGENT, EVERY INDIVIDUAL IN ANY FORM OF GOVERNMENT; THAT IS OBLIGATED TO ENFORCE THE RIGHTS OF AMERICANS, TO INNOVATE, DESIGN, MARKET AND SELL THEIR INTELLECTUAL PROPERTY.

Section 1 of the Sherman Act prohibits “[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States.” Ch. 647, 26 Stat. 209, as amended, 15 U. S. C. §1. While §1 could be interpreted to proscribe all contracts, see, e.g., *Board of Trade of Chicago v. United States*, 246 U. S. 231, 238 (1918), the Court has never “taken a literal approach to [its] language,” *Texaco Inc. v. Dagher*, 547 U. S. 1, 5 (2006). Rather, the Court has repeated time and again that §1 “outlaw[s] only unreasonable restraints.” *State Oil Co. v. Khan*, 522 U. S. 3, 10 (1997).

The rule of reason is the accepted standard for testing

<https://drive.google.com/drive/folders/14n5FiDaANCUnpuDclkuRjOf1S2i5rpgl?usp=sharing>

WOULD SOMEONE TELL THE COPS THAT YOU CANNOT REFUSE TO ENFORCE THE LAWS. YOU CANNOT REFUSE TO ALLOW AMERICANS TO EARN AN INCOME AND PAY TAXES.

I WAS NOT IN SEQUIM ON DECEMBER 31ST, I WAS NOT IN JEFFERSON COUNTY ON JUNE 16TH, AND I NEVER WAS EVER INVOLVED IN ANYTHING CRIMINAL.

WOULD SOMEONE TELL THE COPS, THAT YOU CANNOT REFUSE TO ENFORCE LAWS.

I AM BEING OBSTRUCTED FROM EARNING ANY INCOME, PAYING ANY TAXES, AND FROM REDUCING THE DEBT OF THE UNITED STATES. I HAVE OWNED BUSINESS AND I AM GOING TO PAY TAXES.

IT IS A CRIME TO REFUSE TO ENFORCE THE RIGHTS OF CITIZENS, TO REFUSE TO EXONERATE THE INNOCENT AND TO REFUSE TO OBLIGATE THE RIGHT TO EARNINGS AND TAXATION.

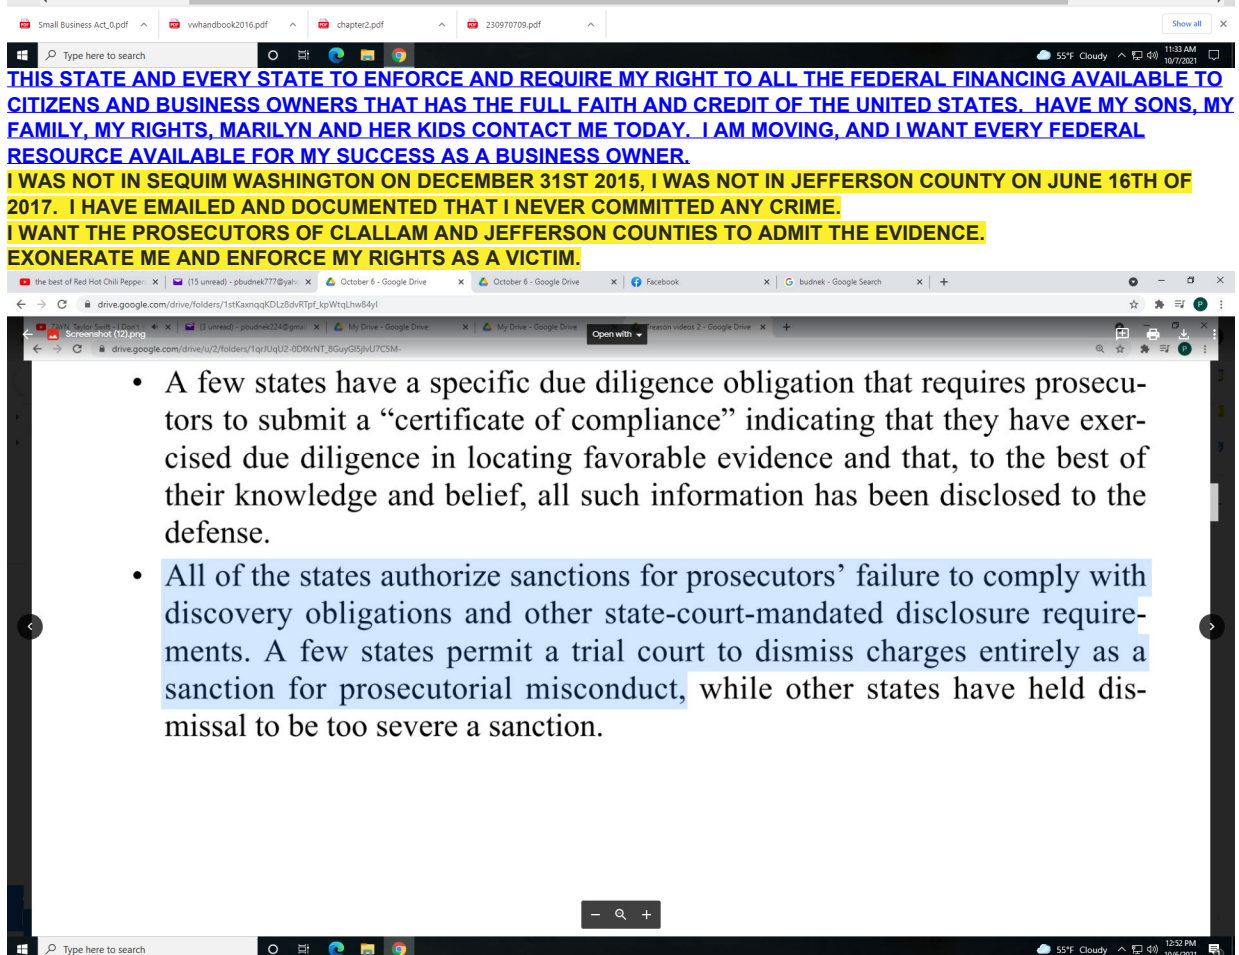

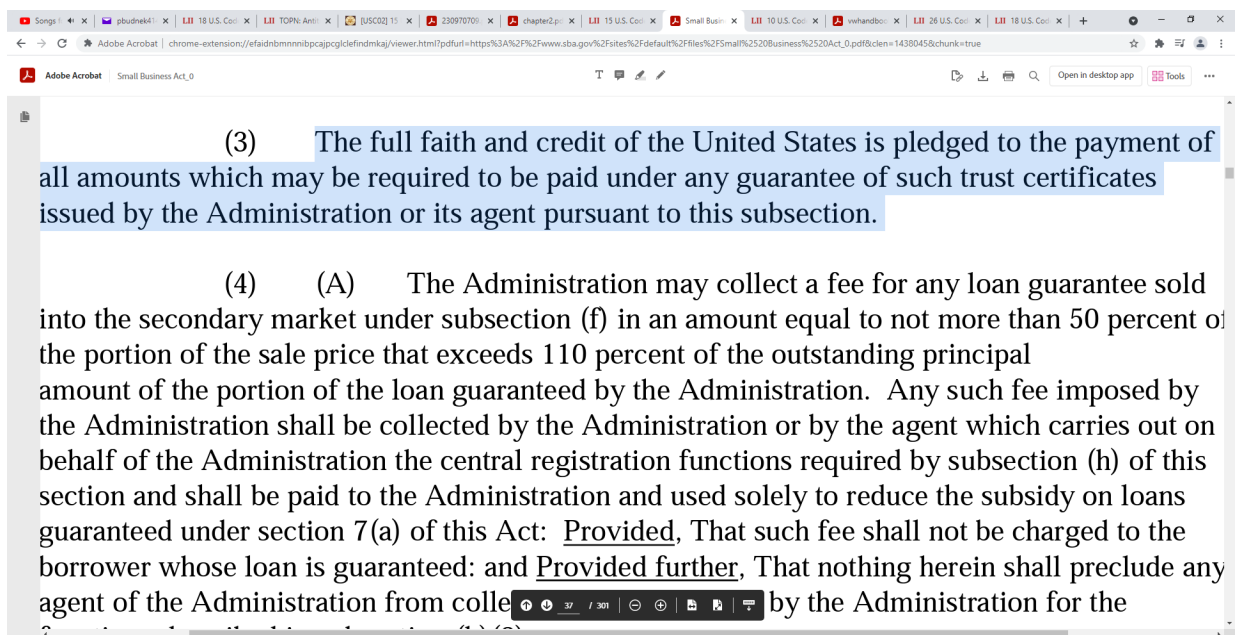

I WANT THE STATE OF WASHINGTON TO REMOVE ALL OBSTRUCTIONS OF BUSINESS, ALL OBSTRUCTIONS OF EMPLOYMENT, ALL OBSTRUCTIONS OF PAYING TAXATION.

IMADE SOME VIDEO_S AND I THOUGHT YOU MIGHT WANT TO WATCH THEM.PDF

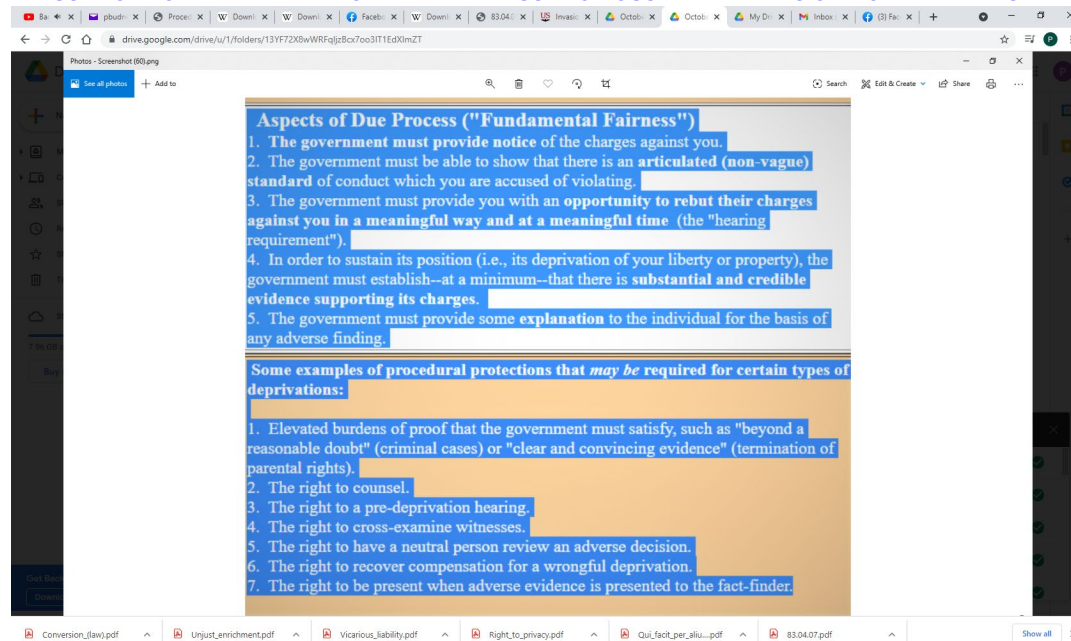

THE FALSE ACCUSATIONS OF CRIME, THE FRAUDULENT COURT ORDERS, AND THE OBSTRUCTIONS OF JUSTICE ARE GOING TO BE SUED AND PROSECUTED.

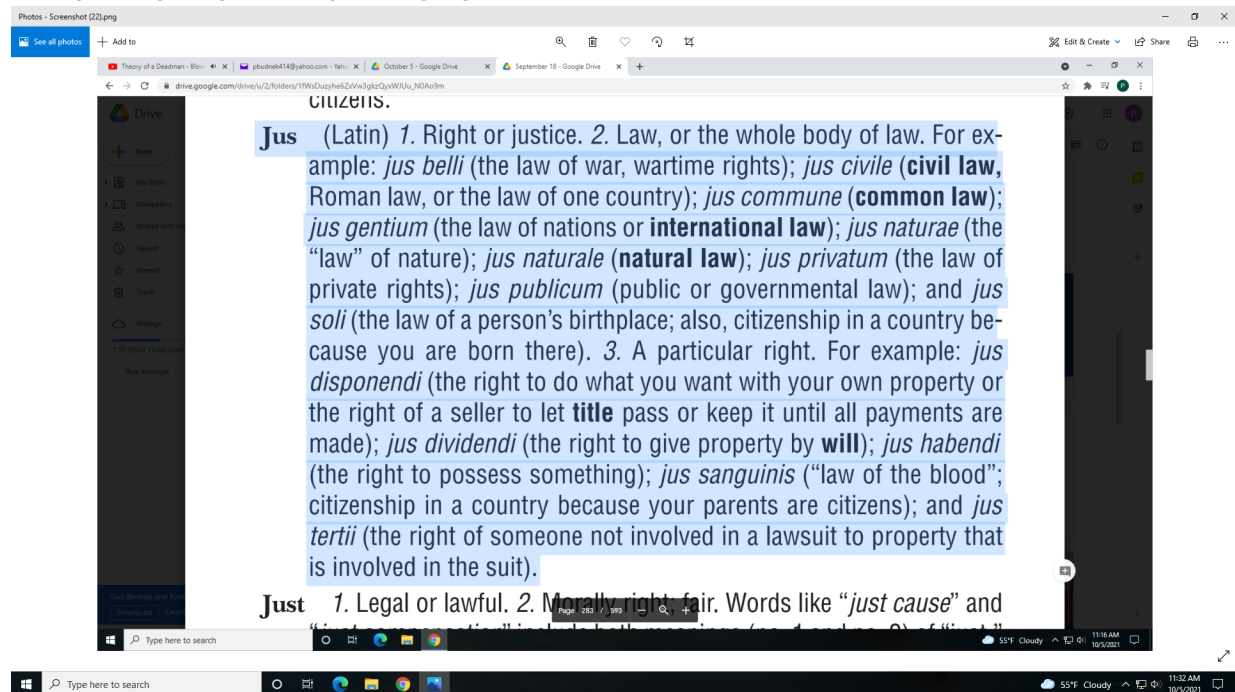

WOULD YOU INFORM EVERY INDIVIDUAL IN EACH OF THE 50 STATES THAT ARE ENLISTED IN THE STATE NATIONAL GUARDS; THAT THEY AND THEIR STATE NATIONAL GUARDS CAN BE SUED FOR NOT DEFENDING THE DUE PROCESS OF EACH STATES CONSTITUTION. I HAVE THE EVIDENCE THAT I NEVER COMMITTED ANY CRIME; AND I WANT TO SUE EVERY STATE NATIONAL GUARD FOR REFUSING TO OBLIGATE THE DEFENSE OF THE INDIVIDUAL STATE CONSTITUTIONS. I HAVE BEEN DENIED ALL EXONERATING EVIDENCE; THE CONCEALMENT OF PROSECUTORIAL MISCONDUCT, AND THE REFUSAL OF LAW ENFORCEMENT TO EXONERATE MYSELF. PLEASE, GET ME EVERY STATE NATIONAL GUARD EMPLOYEE FOR THE LAST 50 YEARS, AND ALL THE NAVY AND AIR FORCE RESERVISTS.

I AM GOING TO WANT THEM SUED AND IMPRISONED FOR THE REFUSAL TO OBLIGATE THE ENFORCEMENT OF STATE LAWS, FEDERAL LAWS AND CONSTITUTIONS.

IT VIOLATES THE PRIVACY OF MYSELF AND MY FAMILY FOR THE GOVERNMENT TO FUNDAMENTALLY REFUSE TO ENFORCE THE REQUIREMENTS OF DUE PROCESS. IT VIOLATES MY PRIVACY AND THE PRIVACY OF MY FAMILY TO REFUSE TO EXONERATE THE INNOCENT AND REFUSE TO HOUSE THE VICTIMS OF VIOLENT CRIMES.

HERE ARE SOME PICTURES, FOR POLICE AND SHERIFFS, THAT CANNOT READ, I AS A VICTIM OF VIOLENT CRIME; WANT THE POLICE TO ENFORCE ALL OF MY RIGHTS.

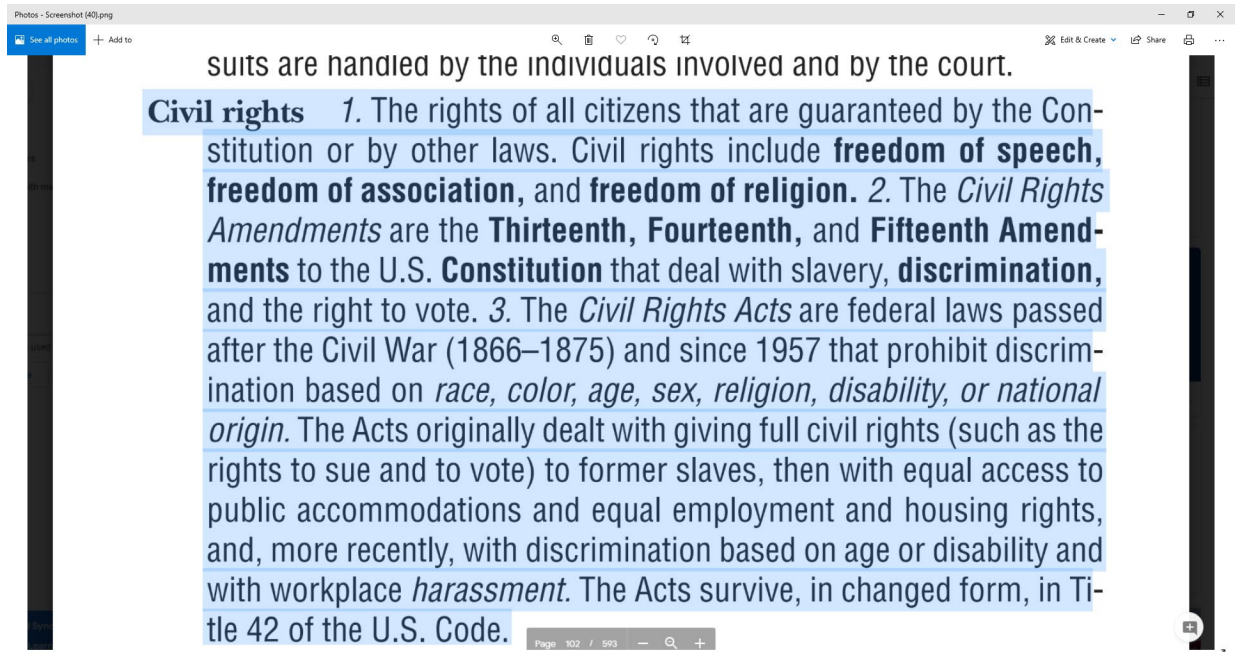

YOU CANNOT REFUSE TO EXONERATE THE INNOCENT, YOU HAVE TO ADMIT THE BRADY MATERIAL AND THE ALIBI EVIDENCE THAT I WAS NOT IN SEQUIM ON DECEMBER 31ST 2015 AND I WAS NOT IN JEFFERSON COUNTY ON JUNE 16TH OF 2017.

IT IS UNJUST TO REFUSE TO ENFORCE THE VICTIMS RIGHTS OF VIOLENT CRIME.

HERE IS A LINK TO ORAN'S LEGAL DICTIONARY, I WANT SUED THE CONCEALMENT OF ALL EVIDENCED CRIME.

https://drive.google.com/file/d/1R61_IIfVnnrOoMTmqag-p13PWaoRj0/view?usp=sharing

IT VIOLATES MY CIVIL RIGHTS TO NOT RECEIVE ANY DUE PROCESS FOR EVERY CIVIL SUBJECT MATTER COURT ORDER THAT HAS BEEN ISSUED IN CLALLAM COUNTY. IT VIOLATES MY CIVIL RIGHTS TO NOT EXONERATE AND NOT ENFORCE MY PARENTING RIGHTS.

IT IS A CRIMINAL USE OF RESTORATION LAWS TO REFUSE TO EXONERATE THE ACCUSED. I WAS NOT THERE, AND YOU CANNOT SAY ANY DEFENDANT HAS ANY MENTAL DISEASE OR DEFECT UNLESS YOU HAVE EVIDENCE AGAINST THEM. TODAY, I WANT REMOVED EVERY FRAUDULENT USE OF ALL MENTAL HEALTH EVALUATIONS, THE FRAUDULENT USE OF REFERRALS FOR CIVIL COMMITMENTS, AND THE FRAUDULENT USE OF RESTORATION LAWS.

Dr Berry acted within her authority in issuing a vaccine mandate covering bar and restaurant patrons, and I support her sensible public health measures. She has also courageously stood up to attempts to bully and defame her. Her life has been threatened by the ridiculous "disbelievers in science.'

She is a valued public servant, and I urge the State Board of Health to dismiss the complaints against her. You must not become part of the problem.

Washington State Board of Health

Re: Dismiss Complaint Against Dr. Allison Berry

The Washington State Board of Health has received a complaint lodged against Dr. Allison Berry that claims she exceeded her authority as the Public Health Officer for Clallam County by establishing a requirement that persons entering restaurants be required to show proof of vaccination against COVID-19. As a resident of Clallam County, I urge you to dismiss this complaint.

Dr. Berry has worked tirelessly to protect the people of the North Olympic Peninsula from the spread of COVID-19, with considerable success. Our county's rates have been lower than most of Washington State since the beginning of the pandemic. However, in August the situation changed rapidly with a dramatic spike in cases. A quick and effective response was absolutely necessary, and I greatly appreciate and support Dr. Berry's actions.

Please dismiss the complaint, and affirm the professional, competent, and responsive actions by Dr. Berry. Thank you.

As a Clallam County resident, I fully support the mandate here that restaurants and bars must see proof of vaccination for patrons wishing to dine indoors. Dr. Berry acted within her duties as a Public Health Officer to mitigate a dangerous surge here, in Covid infections.

I urge you to deny this politically motivated complaint as having no merit, and to publicly announce the Board's support of, and confidence in, Dr. Berry.

Thank you,
Lisa Dekker

Please dismiss this frivolous complaint against Allison Berry. She is a remarkable public health officer. I know. I used to work in public health before retiring in 2016.

Another reason why I think she is noteworthy is that back in January I was seeking vaccination. I couldn't make the website work for me so I called the Clallam County Health Department to seek help and to my astonishment Dr. Berry answered the phone. She was sweet, efficient, and on top of things. She helped me and I got vaccinated.

It would be a shame to lose such a treasure due to the asinine complaints of stupid people.

Dr. Berry has been, and is, a tireless advocate to protect the health all the residents of both Clallam and Jefferson Counties. The charges brought against her by a few loud and rude residents are both unfounded and obscene. Despite threats and continual harassment by a few, she has continued her tireless work to protect the many.

A large proportion of us are old, many in poor health, and appreciate her advocacy which we are unable to do.

Please consider these charges for what they are: brought by a few angry loud people who care nothing for the health of their fellow residents and who have no respect for public officials nor for the laws they have sworn to uphold.

Thank you for your attention,

Lilias Green,

Port Angeles, WA 98363

Washington State Board of Health
Dear Board Members:

I am writing regarding an item on your agenda for the Board meeting Wednesday October 13 : the complaint against our North Olympic Peninsula Public Health Officer Dr. Allison Berry.

Dr. Berry not only has my full support for all measures she has taken but she has my undying gratitude. For a fair measure of her support please consult the Peninsula Daily News Letters to the Editor since she instituted the mask mandate for local restaurants and bars. I am taking the liberty of appending some of these letters to my email. They are heartfelt and moving and represent the wishes and sentiments of the community.

Sincerely yours,
Paula Obrebski

Letters to Editor, Peninsula Daily News, concerning Dr. Allison Berry and mask mandates.

Virginia Hietpas, September 20:

"I would ask the crowd of anti-vax/anti-mask advocates who threatened Dr. Allison Berry because of mandates to protect our community from COVID-19 to go back and read the preamble to our Constitution.

"We the people" have a responsibility to "provide for the common defense" (against the virus) and "to promote the general welfare."

This is exactly what Dr. Berry is doing.

Our Constitution is a commitment to a safe, peaceful and healthy environment for all people.

The freedoms guaranteed in the Bill of Rights do not exempt an individual from responsibility to the greater good for all people in our communities.

It is a personal choice to refuse the vaccine or to wear a mask.

Simultaneously, it is a personal responsibility to respect the decisions made to protect all people during this public health crisis.

Virginia Hietpas

Sequim"

Dale Jarvis, September 19:

"The Sequim Good Governance League (SGGL) is very grateful that Dr. Allison Berry, Clallam and Jefferson County public health officer, is working on our behalf, and we have every confidence in her decisions.

Tired as we are of restrictions, we understand that the delta variant spreads much more easily than the alpha variant of last year. It only makes sense that people who go into public places to eat and drink unmasked should be vaccinated.

We are also grateful that Gov. Jay Inslee ordered that those who work in health care or with children must be vaccinated. Children are especially vulnerable to COVID, as many cannot be protected by the vaccination. People seeking help with health conditions are also especially vulnerable to the effects of COVID.

Until lately, the measures taken in Clallam and Jefferson counties, and public support of them, have protected us from the worst of the pandemic. Our soaring numbers and the strain on our health care system are evidence that we must do more.

Dr. Berry's decision is what good governance looks like: Qualified people doing their research, consulting with those affected, and making decisions that protect public health and safety. It has always been a legitimate purpose of government to protect public health and safety, even if it limits our activity.

This is our time to pull together to support decisions made by our public officials. Even though they may inconvenience us, they can slow or stop the community spread of COVID.

Dale Jarvis,

SGGL board member“

Gerald Carpenter, September 16:

“A mandate requiring vaccines and masks is long overdue.

Finally there is no reasonable excuse for spreading the virus, clogging the hospitals and helping the virus mutate.

When nine out of 10 people dying from the virus are unvaccinated, give up your tantrums based on rumors and fantasy, and help your neighbors who are doing their part.

If you won't do it for your neighbors, do it for the horses and cows who are suffering from a shortage of deworming medicine.

Gerald Carpenter,

Sequim”

Laurel Hargis, September 15:

“I want to inform the owners and staff of our local restaurants and bars that I and my husband are so happy to know that we can once again enjoy coming inside your establishments, thanks to the new requirement that indoor patrons be vaccinated against COVID-19.

You will have our business, and our thanks.

It was hard for us not to be able to enjoy going to our favorite restaurants or go out to enjoy a night of music and/or dancing or go watch the Seahawks with fellow fans.

I felt bad for the workers who had to risk exposure all this time and for the impact on business.

I am glad to know that your staff and our community will now have some added measure of safety thanks to this requirement, and since the majority of our citizens are vaccinated, I am certain that you will see an increase in business.

I urge everyone to support our local restaurants and bars.

If you are unvaccinated, please continue to patronize those places with outdoor seating while we still have beautiful weather or order takeout to enjoy at home or for a lovely picnic.

Laurel Hargis

Port Angeles”

Mark Fischer, MD, September 15:

“For any other disaster, I would like to think our community would work feverishly, arm in arm, for a successful outcome.

But apparently not this COVID-19 pandemic disaster.

Our community medical team will always take the high-road of compassion, science and blamelessness.

The only blame, really, belongs to the sources of incredible, lethal disinformation and vitriol.

It is 20 years since 9/11 and a unified country. Please, please bury the hatchet and once again let us rise up together, unite and help solve this current community disaster.

The longer the current acrimony continues, the longer people, families, schools and businesses will suffer.

We are all better than that.

Mark Fischer, MD

Port Angeles”

Connie Poulsen, September 14:

“What has this community come to?

This is the first letter I have ever written to a newspaper after many years of reading the daily news.

Sunday’s paper reported threats against Dr. Allison Berry, our public health officer.

This is a free country, and we as Americans are free to disagree with government rules and peacefully protest, but it crosses the line in a civilized society when a doctor who is trying desperately to save our lives comes under threats of personal harm.

I have lived in Clallam County for over 20 years, and I love this place and the sense of community it has always offered.

We as the citizens of Clallam County need to support our leaders who are making personal sacrifices to keep us all safe.

I respect Dr. Berry, whom I have never met, for her decisions.

I highly respect Sheriff Bill Benedict for his courage in facing a hostile crowd with calm words and good leadership.

We can fight this pandemic as a community, not let it tear us apart.

Bottom line, we all want the same thing; a safe and healthy place to live and raise our children.

Let’s do this together.

Connie Poulsen

Sequim“

Herb Hope, September 13:

“Kudos to Dr. Allison Berry for the fine work she has done under the terrifying burden of this virus.

We particularly admire her courage with the vaccination mandate, an action that is sorely needed.

Shame on the anti-vaxxers who are threatening her for that courage.

Extra shame on them for putting the lives of their neighbors at risk for their own anti-social beliefs.

Herb Hope

Sequim”

Russ Mellon, September 12:

“Those who have been protesting against wearing masks, vaccinations and the efforts by our public health officials to curb the increase in COVID-19 cases need to consider the hundreds of thousands of American lives that have been lost in all of the wars fought for our freedom.

Yes, you have the right of freedom of speech, but you can do it in a civil, non-belligerent and non-threatening way.

You can truly be a patriot and help win this war against COVID-19 that has claimed more than 650,000 American lives by using the most effective weapons we have, getting vaccinated and wearing masks.

Doing so shows you care about those around you, your community, front line health care workers, the economy and our nation.

Russ Mellon

Sequim”

Tony Hammond, September 12:

“Per the protests that occurred Sept. 3 and Sept. 7 at the Clallam County Courthouse, it would appear there are a number of people who have plenty of time on their hands.

Might I suggest they volunteer two hours per day at their local hospital or medical clinic?

Perhaps with a first-hand look at what our health care professionals are doing, as well as actually helping their communities, these people will get a better perspective on making a positive difference.

Bonus is they’ll have less time to be misinformed at the trough of propaganda at which they bow their heads.

I stand in full support of Dr. Allison Berry; keep up the good work.

Tom Hammond

Port Angeles”

Jerilyn Dille, September 10:

“Dr. Allison Berry made a fair decision in allowing bars and restaurants to serve only vaccinated people.

That leaves them open, versus being closed to everyone, and able to earn money.

Approximately 70 percent of people can go in.

The other 30 percent have their freedom to be unvaccinated and still get to eat, outside, or get take-out.

That should constitute a win-win for everyone.

Jerilyn Dille

Port Angeles”

Eugene F. Turner, September 9:

“I appreciated the PDN coverage of the protests surrounding Dr. Allison Berry’s recent mandate.

As a responsible proponent of health-related community issues for years, she has been a tireless worker in her field.

She deserves the Citizen of the Year award, not the complaints and harassment from a group of complainers ignoring the measures necessary for protection of our society.

As a pediatrician, I have been sickened by the appearance of children of all ages attending these protests, knowing that it will contribute to confusion in their social and school lives when presented with reliable information. What a travesty.

I would appreciate it if those who know of any person, such those pictured in the PDN, to please make an attempt to convince them that they are inviting more illness and death to a community already suffering from the COVID-19 disaster.

Eugene F. Turner

Port Angeles”

Tim Wheeler, September 12:

“I was the first speaker recognized by Clallam County Commission Chair, Mark Ozias, at the Sept. 7 commissioners’ meeting. I spoke on behalf of my organization, Voices for Health & Healing.

I thanked Dr. Allison Berry for her efforts to save lives menaced by COVID-19 and its deadly delta variant. I held up my vaccination card and thanked the Jamestown S’Klallam Tribe and health care workers for giving me both vaccinations at Carrie Blake Park.

I urged the unvaccinated to “get your shots.” They are free and 98 percent effective.

I added, “The life you save may be your own or someone you love.”

The crowd outside — I counted them — numbered 72, most of them not masked, presumably unvaccinated, a “super-spreader” event. They booed loudly as I spoke.

This anti-vaccination crowd is a small minority of our community. A majority of us is vaccinated, wear masks and practice social distancing. We support Dr. Berry’s measures to save lives and combat this lethal pandemic.

Thank you PDN for your front-page reporting of the catastrophic upsurge in the deadly COVID-19 delta variant here in Clallam County. The anti-vaxx mob’s threat of bodily harm to Dr. Berry is outrageous, modeled on the terrorist pro-Trump gang that stormed our nation’s Capitol building last Jan. 6 in an abortive coup d’etat. Law enforcement must protect all public officials doing their sworn duty.

We must not yield to anti-vaxxer intimidation.

Tim Wheeler

Sequim

Acting Chair of Voices for Health & Healing”

David Lasorse, September 8:

“What is happening to this county?

We have a record number of COVID-19 cases, we are seeing COVID-related deaths almost every day, and our hospitals are filled to capacity and overwhelmed.

Despite this, people are protesting the recent county health order to be vaccinated before entering a bar or restaurant.

Really?

You’re upset that you can’t have your drink indoors without being vaccinated?

Boohoo, life is so hard.

Show some responsibility.

You have every right to protest lawfully, but that does not give you the right to be taken seriously.

David Lasorsa

Port Angeles”

Hello,

I want to express my gratitude for Dr. Allison Berry's establishing vaccine mandates for restaurant and bar patrons in our counties. She used her expertise and experience to reach this decision, which is within her purview as Public Health Officer for both Clallam and Jefferson Counties. She has been targeted and defamed in the press for her sensible health promoting decisions during this pandemic. We need more public officials like her. The short sighted complaint against Dr. Berry should be dismissed. Please consider doing so.

Respectfully,

Polly Sarsfield, Sequim,

Please dismiss the complaint against Dr. Berry. The reality is, the complaining is coming from people whose undemocratic politics lead them to anti-science thought, based in made up beliefs. Dismiss these I'll thought complaints and protect rational, disciplined, peer-reviewed science and the policy makers who base decisions on the best knowledge of the day. Thank you.

Dr Berry is acting completely in her authority in issuing a vaccine mandate covering bar and restaurant patrons. She is shielding us with sensible public health measures to protect us from uncaring and reckless individuals.

She is a knowledgeable and caring public servant. The State Board of Health needs to dismiss the complaints against her and protect us from this unfounded attack on public health protections. That is her job and she is doing it well.

Thank you,
An appreciative citizen,
Robin Schrock, Sequim

My name is Peggy Goette. I am a resident of Clallam County. I am the co-owner of a tavern in Port Angeles. I am pro-mask, pro-vaccine, and I support the vaccine proof requirement. We are enforcing this requirement in our bar. Probably 90-95% of our patrons are cooperative and many have told us they are grateful to have a place to go where they feel safer.

I'm sure you have heard from people who have wrapped themselves in the flag and talked about violations of rights, how this is un-Constitutional, and that Covid-19 is not that bad. As members of the WA Board of Health I'm sure you know that the facts and science are not on their side.

The US Department of Health and Human Services declared a Public Health Emergency because of Covid-19 on January 31, 2020, the State of Washington followed on March 1, 2020. This allows government entities to take additional actions to combat this pandemic and protect human life. Now some people are saying that the government will take away our rights a bit at a time, that this is a slippery slope. Well, you know, sometimes, it's just flat land.

The US Supreme Court has upheld the authority of states to enforce compulsory vaccination laws, in the case of *Jackson v. Massachusetts*. It has upheld the authority of states to enact and enforce quarantine laws, in the case of *Compagnie Francaise de Navigation a Vapeur v Louisiana State Board of Health*. It has upheld the authority of states to impose isolation and quarantine laws, in the case of *Gibbons v Ogden* (American Bar Association).

Covid-19 is not the flu. In the 2019-2020 season there were 22,000 flu deaths, in the 2018-2019 season there were 34,000 flu deaths (Centers for Disease Control). There have been over 666,000 Covid-19 deaths in the US since January 2020 (CDC). Additionally, there are reports of long-term, perhaps permanent, damage from Covid-19 (CDC).

People say they don't trust the CDC or doctors because they are changing their earlier recommendations. They think they are being lied to. Science is fact based. Doctors and scientists make recommendations based on the information they have available. As more has been learned of this new disease their strategies changed. They didn't lie to us, they learned more.

I am sure that Dr. Berry has made this decision based on the best factual information she has available. She is trying to save lives, and I support her wholeheartedly. She should also have the full support of the Board of Health. Please do not be swayed by hate and fear-mongering.

Thank you.

I am asking the State Board of Health to dismiss the complaint against my Public Health Officer Dr. Allison Berry. She has from the beginning of the pandemic acted in the most professional and courteous manner one could hope to expect. She has explained her reasoning behind every action taken to help quell this insidious disease. Her only interest has been to promote public health measures based on the science, medical knowledge and guidance from the CDC. Her critics have politicized her behavior and used it as a weapon against her and the Clallam County Board of Health. It is unfortunate that so many people wholeheartedly embraced the conspiracy theories which have created a vicious and toxic atmosphere around efforts to apply public health measures known to be effective in controlling Covid-19. It is regrettable that many have turned away from the assistance and advice offered to them and instead continue to inveigh against the very people who want to help them and perhaps save their life.

Dear Board of Health Members

I have read the complaint against Dr. Berry, which contains a list of reasons that a health officer may be removed from that position, and a list of the issues the petitioner has with her actions, and it does not appear to me that those issues fall within her stated reasons a health officer can be removed.

If there is any question about her actions, I fully support her actions and her communications about those actions, and am very grateful as a Clallam County resident that she has been working to promote my safety and the safety of those I am in contact with. My wife and I have experienced loss and harm from this virus. We believe in the medically sensible approach that we see.

Thank You.

Please DISMISS this complaint against Dr. Berry, Health Officer for Clallam and Jefferson Counties. I have listened to the Clallam County coronavirus briefings and listened to Dr. Berry expertly explain what the data indicated, the situation locally and statewide, and what was needed to change the frightening spike in cases after breakouts coming from bars and restaurants, along with a couple of super-spreader weddings. Dr. Berry acted with conviction and complete authority, including with a measure of compassion, to bravely set vaccine mandates for bars and restaurants.

I think this complaint is misguided and doesn't take into account the benefits this action provided. It saddens me that it's born of a mean-spirited selfishness on the part of so many of my fellow residents on the peninsula.

Certainly the Board of Health cannot argue the need for vaccinations and the need to limit exposure through gatherings of unvaccinated, unmasked individuals indoors.

Respectfully,
Jane Manzer

To Whom It May Concern:

I just heard that a complaint was filed against our county health officer, Dr. Allison Berry. I want to let you know that Dr. Berry has done a very competent job in protecting us against Covid, even though she has a city council and many residents working against her. With our local level of vaccine opposition, she took the intelligent step of enacting a requirement for public venues (restaurants/bars) to require proof of vaccination. Many other communities have done the same. She should be applauded for her handling of this crisis.

Sincerely,

Kimberly Gonzales

Re: Statement of Support for Dr. Allison Berry, Clallam and Jefferson County
Public Health Officer

Please see attached letter from the League of Women Voters of Clallam County
Healthcare Committee.

Respectfully, Marcia Limoges, RN, BSN, OCN
995 Baker View Drive, Sequim, WA 98382
360-608-0946

For more than 100 years the League of Women Voters of the United States (LWVUS) has advocated for an informed electorate. Without accurate information, people cannot make informed choices about political candidates or public policy issues.

When the Fairness Doctrine of the U.S. Federal Communications Commission was in effect (1949-1987) national presidential debates broadcast on network television were moderated by representatives of the LWVUS. The doctrine required that broadcasters present candidates and controversial issues in a manner that was honest, equitable, and balanced. The national, state, and local LWV are still committed to this considered approach to controversy.

The League of Women Voters of Clallam County (LWVCLA) presents forums in which all candidates for public office are given equal time. It also has committees which study policy issues impacting our communities. The Healthcare Committee for the LWVCLA is committed to ensuring that all community members have access to healthcare and that public healthcare policy should be based on the best medical and social science available.

The LWVCLA Healthcare Committee strongly supports the guidelines of the Centers for Disease Control (CDC). The state and local mandates based on these guidelines requiring that healthcare workers, police, firefighters, EMTs, and teachers be vaccinated are to protect both our public employees and the vulnerable public which they serve from COVID-19 exposure and illness. Mandates to mask indoors and to provide proof of vaccination to eat indoors at restaurants or bars are also necessary to prevent exposure to and spread of the virus. Such practices allow these businesses to remain open and safe for both employees and patrons without limiting capacity.

The United States Supreme Court upheld the authority of states to enforce compulsory vaccination in the 1905 case of *Jacobsen V. Massachusetts*. In a 7-2 majority decision the court held that such laws do not violate the Fourteenth Amendment regarding discrimination. The court held that mandatory vaccinations are neither arbitrary or oppressive so long as they “do not go beyond what was reasonably required for the safety of the public”. The justices wrote that “in every well ordered society charged with the duty of conserving the safety of its members the rights of the individual in respect of his liberty may at times,

under the pressure of great dangers, be subjected to such restraint, to be enforced by reasonable regulations, as the safety of the general public may demand”.

Our hospitals are strained to capacity under the current surge of COVID-19 patients, the vast majority of whom are unvaccinated. The choice to reject rather than accept vaccination can lead to critical illness and death. It also results in delays of surgery and care for people with other conditions. When neighboring states must consider rationing health care to those most likely to survive, this surely represents a great danger. Vaccinations are the best way to save lives, stop the development of new variants, and halt the spread of COVID-19.

We commend Dr. Allison Berry, public health officer for Clallam and Jefferson Counties for her dedication and determination to follow the best medical science to keep our community as healthy as possible and our businesses operating safely.

Respectfully,

Marcia Limoges, RN, BSN, OCN, LWVCLA Healthcare Committee

Please register my total support for Dr. Allison Berry in her work to keep the residents of Clallam and Jefferson Counties safe. She is a valued public servant being targeted by folks who don't seem to have a concept of "for the common good." Her mandates were arrived at not lightly; she has acted courageously in the face of anti-science obstructionism.

Please dismiss the complaints against her. Dr. Berry is doing her job to stop the spread of COVID-19 on the Peninsula.

I am writing in support of Dr. Berry. Before becoming the county health officer, she was my personal physician at Jamestown Clinic in Sequim, WA. I found her to be an excellent doctor and she especially had a good bedside manner. As county health officer, she has done an excellent job in light of the COVID-19 pandemic. She took on this job before the pandemic hit and has managed an extremely hard job of responding to it. Her actions have kept the pandemic relatively under control in Clallam and Jefferson counties and if not for the persons who resist getting vaccinated, our outcomes would be a lot better. I am sincerely proud of her and how she has stood up to harsh criticism from certain segments of the population who think that her actions have been unfair.

Please do not take further action on the complaint waged by persons in our county who want to derail her proactive actions to control the pandemic. If not for her, we would be in far worse shape.

Sincerely,

Robert P Campbell

Dr. Barry has been a very positive force for good medical and public health practices. She has been targeted by a group of far-right trouble makers. They even marched on her former home in an effort to intimidate her. Each day during this terrible period of COVID, Dr. Barry has been featured in our local paper. She has kept all of us up to date on what is happening locally regarding the pandemic. Staying totally professional, she has consuled and helped us know how to live as safely as possible each day. Do not let the bullies sully her reputation. We need Dr. Barry. Please note that most members of this group also tried to intimidate and destroy the plans of the Jamestown SKlallam tribe to build a wrap-around clinic for people addicted to opioids. They were defeated but it wasted money and time.

We are fortunate to have a dedicated and competent health officer such as Dr. Berry. She has provided guidance and protected our county from the worst of COVID.

Recently, due to the number of unvaccinated people in our area she mandated vaccine cards to enter restaurants and bars. This has allowed these small establishments to stay open and our community to get back to some normalcy.

There is a fringe element in our county that has fought her leadership every step of the way, even our Mayor who is connected to Q-Annon. This is a small group of people that are disrupters and trouble makers. Please take this into consideration when you are viewing the complaint against her and vote to dismiss it.

Sincerely,
Jill Hay

I support the good work Dr. Berry has done during this very difficult time.

It is clear that there is a vocal anti-vaxer/anti-mask group of people here and nationally who refuse to look to science and think that wearing a mask is against their rights. This thinking is misdirected and has caused innocent people their lives.

My husband and I have done our best to wear masks in public and we certainly have had our vaccines. We feel it's an obligation to protect others as well as ourselves.

I substitute in the Sequim schools and don't feel safe returning to work until Covid is more under control so unvaccinated and unmasked people are making a dent in my income.

Please support Dr. Berry as she bravely follows the science and doesn't cave in to bullies.
Thank You

As a member of PSARA, I am in full agreement with the comments submitted to you by PSARA. In addition, I feel it is important for the State Board of Health to read the ill-advised City Council resolution (see attached) that has increased the political division in the community of Sequim between those who see Dr Berry's actions as a threat to their personal freedom and those who see the mandates she put in place as a necessity because the unvaccinated are shirking their personal responsibility to protect the health of the community by refusing to obey the mandates. Instead of a mask and proof of vaccination mandate, Dr. Berry could have closed down bars and restaurants. Instead she chose to preserve the ability of those businesses to provide their services to those who complied with her mandate, carry-out, or outdoor dining. She has my gratitude, and she deserves yours as well.

Respectfully,

Judith Beaver
Sequim, WA
(360) 683-7142

RESOLUTION NO. R2021-____

A RESOLUTION OF THE CITY OF SEQUIM CITY COUNCIL, EXPRESSING SUPPORT FOR OUR SMALL BUSINESSES AND ESSENTIAL WORKERS INDIVIDUAL RIGHTS.

WHEREAS Section 1 of the 14th Amendment of the United States Constitution states: “No state shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States: nor shall any state deprive any person of life, or property, without due process of law: nor deny to any person within it’s jurisdiction the equal protection of the laws”, and

WHEREAS Article 1 - Section 1 of the Washington State Constitution states: “All political power is inherent in the people and government derives it’s just power from the consent of the governed and is established to protect and maintain individual rights” and

WHEREAS Article 1, Section 2 of the Washington State Constitution states: “The Constitution of the United States is the supreme law of the land,” and

WHEREAS the Washington State Department of Health has stated that the COVID-19 vaccines do not prevent a person from being infected with COVID-19 nor do they prevent an infected vaccinated person from spreading the virus to another person, and

WHEREAS on August 18th, 2021, Governor Inslee mandated that all K-12 and higher education employees, as well as childcare providers, school staff, coaches, bus drivers, contractors, volunteers and others working in school facilities must be vaccinated or be prohibited from engaging in work, and

WHEREAS the Governor has mandated that all state workers, workers in state agencies, workers at educational settings and workers in healthcare settings be fully vaccinated by October 18, 2021, or be prohibited from engaging in work, and

WHEREAS on September 2nd, 2021, the Director of Clallam County Department of Health stated vaccinations are required to enter Peninsula restaurants/bars starting Saturday, September 4th which includes proof of vaccinations or what is commonly referred to as “vaccination passports”, and

WHEREAS the policing of vaccinated citizens has now been placed on restaurant/bar owners resulting in additional workload, fewer customers, and further strain on their ability to run a successful business.

WHEREAS the requirements being imposed on restaurant/bar owners is occurring when outdoor seating, available for customers, is less desirable due to seasonal change in weather conditions which will result in fewer customers, and

NOW THEREFORE BE IT, THE CITY COUNCIL OF THE CITY OF SEQUIM, WASHINGTON, DOES HEREBY RESOLVE TO: 1) uphold the Constitution of the United States and the Constitution of the State of Washington and to stand in strong support of the people in the City of Sequim and anyone else in the County, and the State that believe their constitutional rights are being violated, and 2) stand in strong support of all our state workers, educators and healthcare workers who are being forced to submit to vaccines with fear of losing their employment, and 3) stand in strong support with our restaurant/bar owners who will be financially impacted by the requirement to verify customers have been vaccinated prior to allowing them to dine inside, and 4) condemn any form of discrimination towards any person that does not possess or present proof of COVID-19 vaccine.

APPROVED BY THE CITY COUNCIL OF THE CITY OF SEQUIM, WASHINGTON, at a regular meeting thereof held the 13th day of September 2021.

To whom it may concern;

I am writing in support of the Clallam County Health Department head, Dr. Allison Berry. Dr. Berry, from the beginning of the Covid-19 health crisis has been a beacon of communication, knowledge and science-based advice for the county. We continue to look to her for guidance, and respect the difficult decisions (sometimes unpopular) she has made in order to protect us.

It has been brought to my attention that her critics (anti-vaccine, anti-mask protestors) have filed a complaint against her with the Washington State Board of Health. I feel that this is a frivolous filing, and in lieu of ALL that Dr. Berry continues to do to keep us safe in Clallam and Jefferson counties, I strongly oppose taking any measure against her other than bestowing lavish praise upon her for her diligence, care and continued close watch on new developments of this novel virus.

Fr: Elizabeth Baatz
RE: Insights on Clallam County & Alison Berry, M.D.
Dt: October 13, 2021

I'm writing you after researching the extraordinary situation Clallam County has been facing during the Delta surge of Covid. When you have some spare time, I hope you'll consider my email and footnotes with links. Let me know what you think and if I have been of any help to you.

As you know, the number of our Covid deaths at OMC is fifty-three now. No doubt that number would have climbed higher but for Dr. Barry. Meanwhile, our anti-vaxxers have been willful carriers of a fatal illness and I fear they were responsible for our hospital nearing collapse. #1 (Footnotes follow my salutation below.)

Comparing Clallam County to Jefferson County provides proof: By early September 2021, the percentage of the population vaccinated lingered at fifty-eight percent in Clallam County, but quickly shot up to seventy percent in Jefferson County. Then Clallam saw the number infected with Covid per one-hundred-thousand people towering at 1,009!! But in Jefferson it was only 247. #2

Dr. Berry did the absolute right thing to reduce the spread of Covid from the unvaccinated at bars and eateries. Meanwhile, anti-vaxxers threaten public officials, refuse to act responsibly for the common good and endanger their neighbors. #3

Where happened to create so many angry anti-vaxxer citizens? In 1954 Americans cared about the common good. Look back to history when parents embraced untested vaccines to eradicate polio. #4, #5 Did new

social media platforms allow people to form tribes spreading conspiracy theories and anti-science screeds that led to today's anti-vaccine craze? Sadly, I think that may be the case.

I cannot be angry at our anti-vaxxers because they fell into a rabbit hole on the internet. I am angry at Twitter, FaceBook and Google for creating algorithms to keep people on their platforms reading misleading and dangerous "news" simply so they can make more advertising money.

That said, I hope you will use your authoritative voices to proclaim your unwavering appreciation for and support of Dr. Berry today and every day.

Thank you for all YOU do for our community. And, thank you for taking time out of your busy days to read my email.

Best regards,
Lizzie Baatz

<https://data.news-leader.com/covid-19-vaccine-tracker/washington/53/>
Covid statistics in this letter are from the above three websites during the week after Labor Day weekend, excluding number of deaths updated on October 13, 2021.

#2 <https://www.peninsuladailynews.com/news/exhausted-health-care-workers-tell-of-virus-surge/>
“ ‘Nor is it a slow burn. It’s a wildfire,” Berry said, adding that, when the COVID numbers rise, as they are doing now, it’s impossible to trace all of the people exposed at a location. “We watched this happen in New York...We thought we’d missed it ... We just got hit by a tsunami in the fifth wave.’...‘We are seeing strain in Jefferson County. We’re seeing borderline collapse in Clallam”“ at Olympic Medical Center, Berry said.”

#3 <https://www.peninsuladailynews.com/news/hundreds-protest->

[vaccine-proof-order/](#)

“An estimated 200 to 300 anti-vaccine-mandate protesters rallied outside the Clallam County Courthouse on Friday morning before dozens entered the lobby, intent on confronting Dr. Allison Berry, the health officer for Clallam and Jefferson counties The meeting was cut short once the crowd was attempting to make their way down the hall to the meeting room,” Brian King, Clallam County chief criminal deputy, said later Friday. Once they entered, men, women and children crowded into the first-floor area, where they continued to rally, shouting chants against Berry and demanding she be fired.”

[#4 https://consumer.healthday.com/kids-health-information-23/kids-ailments-health-news-434/the-salk-polio-vaccine-greatest-public-health-experiment-in-history-691915.html](https://consumer.healthday.com/kids-health-information-23/kids-ailments-health-news-434/the-salk-polio-vaccine-greatest-public-health-experiment-in-history-691915.html)

“A nationwide trial of an experimental vaccine using school children as virtual guinea pigs would be unthinkable in the United States today. But that's exactly what happened in 1954 when frantic American parents -- looking for anything that could beat back the horror of polio -- offered up more than 1.8 million children to serve as test subjects. They included 600,000 kids who would be injected with either a new polio vaccine or a placebo.”

[#5 https://www.smithsonianmag.com/history/press-made-polio-vaccine-trials-public-spectacle-180977304/](https://www.smithsonianmag.com/history/press-made-polio-vaccine-trials-public-spectacle-180977304/)

“Even under the weight of all those unknowns, however, hundreds of thousands of children—and their parents—continued to participate in the vaccine testing Parents, who signed volunteer waivers for their children and helped organize trials and fund-raising campaigns, were cast in a more muted role in the press. But when featured, they were more articulate about the significance of the trials and often offered up quiet hope amid the doubt. ‘As parents we are grateful to hear that this vaccine is to be tested,’ one Utah PTA president summarized to reporters, ‘because, if successful, it might well mean that the day is nearing when our children really can be protected.’ ”

DR. ALLISON BERRY, PUBLIC HEALTH OFFICER, NORTH OLYMPIC PENINSULA,
HAS OUR FULL SUPPORT.

To: Keith Grellner, Chair and all Washington State Board of Health Members
Subject: Comments re your Oct 13 meeting, Item 11: Clallam County Public Health
District Complaint.

Dr. Allison Berry, Public Health Officer for Clallam and Jefferson counties, has worked tirelessly to combat COVID-19 among the region's residents. Nevertheless, the pandemic has spread and taken the lives of scores of women, children, and men on the Olympic Peninsula. She has ordered compliance with Gov. Jay Inslee's masking, social distancing, and mandatory vaccinations of public employees including health care workers and school employees. Thanks to her efforts, our region is now seeing a levelling off of those testing positive. Here, as in the rest of the nation, the majority of COVID-19 victims are unvaccinated. The best, perhaps only way, to end the COVID-19 pandemic is for everyone to be vaccinated except those with medical or religious exemptions.

The State Board of Health received a complaint charging that Dr. Berry failed to follow proper procedures in issuing a mandate on Sept. 2, 2021 that restaurant and bar patrons must show proof they are vaccinated against COVID-19. The summary of the case prepared by Mr. Grellner, makes it clear that Dr. Berry "acted within her authority" to "take certain actions to protect public health" to "control and prevent the spread of any contagious or infectious diseases that may occur within his or her jurisdiction." Those words describe perfectly what Dr. Berry, with the approval of our County Board of Health, has done. It has won her the love and admiration of an overwhelming majority. Those filing this complaint are a tiny minority. They make false claims that mandatory vaccinations are "unconstitutional." In fact, the Supreme Court ruled in *Jacobson v. Massachusetts* in 1905 that mandatory vaccinations are constitutional, that vaccinations were urgently needed to stop the spread of smallpox. More than 600 court rulings since then have upheld health care mandates.

Dr. Berry has stood up to intimidation and threats of bodily harm, with dignity and poise. We urge the State Board of Health to reject the complaint as lacking merit. We also urge the Board of Health to join the undersigned groups in thanking Dr. Berry for her courage and excellence as a Public Health Officer.

I, Linda Middleton want to add my name to support Dr. Berry's mandates and the work she is doing to keep all of us safe and to stop the pandemic.

A handwritten signature in cursive script that reads "Linda Middleton". The signature is written in dark ink and is positioned above the printed name and address.

Clallam County was in a terrible state with new Covid cases. We had reached the point where best estimates were 1 in 10 people had active infections.

Dr. Berry took appropriate action that was within her authority to issue a mandate requiring vaccination proof in order to eat or drink indoors at restaurants and bars in Clallam County. A minority of residents of Clallam County who were against vaccinations threatened her and now it looks like they have issued a complaint. Her actions have been effective in reducing the new cases - which are still high, but much reduced and making the majority of clallam county residents feel safe eating in restaurants and bars again. The Sequim City Council even had the audacity to pass a resolution encouraging restaurant owners to ignore the mandate. I tuned into their meeting and the vote was 4-3 with the 4 votes for the resolution being made by members who were not elected but were appointed - including a mayor who was also appointed and not elected and posts Qanon disinformation regularly.

Doctor Berry has courageously stood up to the bullying and tactics to defame her to do the right thing for the health of Clallam and Jefferson County. She is an asset to our county and I urge the State Board of Health to dismiss this complaint as the cowardly act it is by people who are not interested in the public health of our counties.

Note that this action did not prevent unvaccinated people from eating outdoors which most Sequim restaurants have worked at providing over the last year or wearing a mask to go in and order take out food.

Signed,
Elizabeth Bain

Dr. Allison Berry has led Clallam and Jefferson Counties through this pandemic in dedicated, conscionable, responsive, accessible, respectful and impeccably professional ways! Her leadership is without prejudice, backlash or frustration, despite the difficult hurdles certain groups have ruthlessly placed in her path at every turn. Her demeanor is unflappable in really tough times -- even as she has been ruthlessly attacked professionally.....and personally.

I am so grateful for her leadership, the science and medical best practices she has staunchly adhered to for our counties. Rather than sanction her, I hope you will honor her responsibility and hard work. Throw out this complaint, please. Gracious leadership is an art, and, in our communities, a courageous lifesaving act, indeed!

Sincerely & gratefully,

Mary Doherty Port Angeles, WA 610 952 6026

Hello WA State Board of Health:

I live in Clallam County and I am so so grateful for the amazing Public Health Officer that we have here.

Dr Berry acted within her authority in issuing a vaccine mandate covering bar and restaurant patrons, and I support her sensible public health measures. She has also courageously stood up to attempts to bully and defame her.

I have 5 and 3 year old who can not yet be vaccinated, so this time in our lives has been stressful. But I appreciate the leadership of Dr. Berry who has prioritized keeping our schools open and maintaining the availability of our hospital system with measures that aim to limit community spread of the Covid-19 virus.

She is a valued public servant, and I urge the State Board of Health to dismiss the complaints against her.

I also want to take this opportunity to express my gratitude for the community coalition that was formed in the spring of 2021 to implement an exemplary drive-thru and mass vaccination process in our community. Thank you to The S'Klallam Tribe, Jamestown Family Health, the Community Emergency Response Team (CERT), Local Law Enforcement, Health Care Staff, Community Volunteers, and everyone else who helped with the effort to distribute the Moderna Vaccine in our community so quickly and efficiently.

Thank you for your consideration.

Signed,

Harmony Rutter

DR. ALLISON BERRY, PUBLIC HEALTH OFFICER, NORTH OLYMPIC PENINSULA,
HAS OUR FULL SUPPORT

To: Keith Grellner, Chair and all Washington State Board of Health Members

Subject: Comments re your Oct 13 meeting, Item 11: Clallam County Public Health District Complaint.

Dr. Allison Berry, Public Health Officer for Clallam and Jefferson counties, has worked tirelessly to combat COVID-19 among the region's residents. Nevertheless, the pandemic has spread and taken the lives of scores of women, children, and men on the Olympic Peninsula. She has ordered compliance with Gov. Jay Inslee's masking, social distancing, and mandatory vaccinations of public employees including health care workers and school employees. Thanks to her efforts, our region is now seeing a levelling off of those testing positive. Here, as in the rest of the nation, the majority of COVID-19 victims are unvaccinated. The best, perhaps only way, to end the COVID-19 pandemic is for everyone to be vaccinated except those with medical or religious exemptions.

The State Board of Health received a complaint charging that Dr. Berry failed to follow proper procedures in issuing a mandate on Sept. 2, 2021 that restaurant and bar patrons must show proof they are vaccinated against COVID-19. The summary of the case prepared by Mr. Grellner, makes it clear that Dr. Berry "acted within her authority" to "take certain actions to protect public health" to "control and prevent the spread of any contagious or infectious diseases that may occur within his or her jurisdiction."

Those words describe perfectly what Dr. Berry, with the approval of our County Board of Health, has done. It has won her the love and admiration of an overwhelming majority. Those filing this complaint are a tiny minority. They make false claims that mandatory vaccinations are "unconstitutional." In fact, the Supreme Court ruled in *Jacobson v. Massachusetts* in 1905 that mandatory vaccinations are constitutional, that vaccinations were urgently needed to stop the spread of smallpox. More than 600 court rulings since then have upheld health care mandates.

Attached to the complaint are comments that Dr. Berry is guilty of "crimes against humanity" "treason," and compares her to "Nazis and Hitler." These are absurd, vile slanders. A boisterous crowd making similarly outrageous claims gathered to protest her mandate and then stormed the Clallam County Courthouse demanding that she present herself and that she be fired.

Dr. Berry has stood up to intimidation and threats of bodily harm, with dignity and poise. We urge the State Board of Health to reject the complaint as lacking merit. We also urge the Board

of Health to join the undersigned groups in thanking Dr. Berry for her courage and excellence as a Public Health Officer.

Dr. Berry is doing a fantastic job of protecting the health of Clallam residents. I totally support the actions she has taken in an attempt to stop the virus that has ravaged the country.

I am 77 with health risk so after almost two years of staying home, it is great to be able to eat out with friends again in safe environment.

Please dismiss the complaint against her.

Thank you

Barbara Allen, Sequim, WA.

To: Keith Grellner, Chair and all Washington State Board of Health Members
Subject: Comments re your Oct 13 meeting, Item 11: Clallam County Public Health District Complaint.

I believe I speak for the vast majority of Clallam County residents in expressing my complete support of County Health Officer Dr. Allison Berry, who has performed admirably and with courage and wisdom in the face of vicious, unfounded attacks. Last month, I watched an Clallam Board of Public Health meeting filled with conspiracy theories, illogical interpretations of the law, and vituperation, and all through it, Dr. Berry patiently provided answers to every question no matter how scurrilous. She has nothing on her mind but the protection of Clallam County's citizens, and this is patently obvious to anyone with ears to hear.

The SBOH has many important issues to deal with; this is not one of them. The complaint against her has no merit.

Indeed, the SBOH might consider following Dr. Berry's lead in protecting our citizens by mandating vaccinations for indoor restaurant patrons, an idea that caught the interest of Gov. Inslee during a recent visit to Clallam County.

We are lucky to have such a dedicated, conscientious, professional public health officer serving us under so much duress.

Sincerely, Ed Chadd
Port Angeles

To Whom it May Concern,

I am writing as a resident and small business person in Clallam County. As such, I have been subject to the restrictions imposed upon residents, and in particular restaurant and tavern owners, which have been put in place by Dr. Berry to combat the Covid 19 pandemic.

I want to go on record as stating unequivocally that I support her efforts to protect our community and the measures she has called for to do so. While it is plain that some of our clientele are now going elsewhere, we have gained other customers who are grateful to have a bar where they can see that everyone is checked for their vaccination status at the door and that the mask mandate is enforced. In short, they are grateful to have the peace of mind of knowing that they are in a safer environment. I know of several individuals who were resistant to getting vaccinated who have gotten vaccinated expressly so that they could continue to come to our bar, and I am sure that our place is not unique in that respect.

My business has not suffered due to these mandates, and additional staffing needs have been minimal. Any business owner saying otherwise is simply exaggerating and scapegoating Dr. Berry. More to the point, we believe that operating under these restrictions is better for the health of our community. We are happy to do so and very pleased that we have someone with the professionalism, ability and the courage of her convictions that Dr. Berry displays looking out for our staff, our patrons and our community.

Sincerely,

Rick Goette

Dear WA state Board of Health,

Let me preface my remarks by stating that I am a retired Professor of Epidemiology at the University of Washington, School of Public Health who now lives in Sequim.

Dr Berry acted within her authority in issuing a vaccine mandate covering bar and restaurant patrons, and I support her sensible public health measures. As an epidemiologist I know these decisions were in support of the health of the population of Clallam county. She has also courageously stood up to the shameful attempts to bully and defame her.

She is a terrific public servant, and I urge the State Board of Health to summarily dismiss the complaints against her.

Dear Washington State Board of Health,

As someone preparing to move to Washington, I am appalled and distressed by attacks on Dr. Allison Berry, Public Health Officer of Jefferson and Clallum Counties, and urge you to give her your full support as she continues to do her job.

A public health officer is a scientist and medical professional, charged with identifying and assessing threats to public health and implementing scientific, fact-based strategies to protect the public from disease and other threats to health and well-being. Until COVID-19 swept across our country, we heard very little of public health officers, whose written reports were accepted by county boards of supervisors without comment or discussion. Now, public health officers are front and center, leaders in the fight to overcome COVID-19. Thanks to the quick response of the public health officer where I live now, in Marin County, CA, we have had only 193 cumulative COVID-19 deaths, and 15,013 cumulative cases. 92.3% of the eligible population has received a complete vaccination series, and 80% of the entire population is fully vaccinated. When public health officers have the support of civic leaders and elected officials, they can do their jobs unfettered and their communities can win the fight against COVID-19.

Unfortunately, COVID-19 has become politicized, and people who long for a return to life before COVID-19 choose to believe masks aren't necessary, vaccines are more dangerous than the disease itself. These aren't bad people. Fear has made them willing to dismiss science and accept misinformation wholeheartedly. Although I sympathize with them, I know we cannot afford to allow their misguided notions to interfere with public health. Without aggressive action, COVID-19 will continue to decimate our communities, our country, and the world at large.

Dr. Berry has done nothing wrong; rather, she is "guilty" only of doing her job. Vaccine mandates have long been understood as a primary weapon in combating wide-spread disease. In 1905, the Supreme Court upheld vaccine mandates. When I was in 4th grade, our class lined up and was marched into the cafeteria, vaccinated, and returned to our classroom. No one objected. My class was the last to receive the smallpox vaccination, and, today, our country is smallpox free.

Some fifty years ago, when air travel was plagued by hijackings, the Supreme Court decided that the rights of the public to safety outweighed any one individual's Constitutional rights, and airport security measures were affirmed. This is another situation in which the need of the public to be safe must outweigh any individual's

objection.

As a pastor, I know what it is to walk with those who are near death, and to sit with a family who must make the difficult decision to withdraw withdraw a ventilator. In Deuteronomy, God says, "See, I have set before you today life and prosperity, death and adversity.... Choose life so that you and your descendants may live." (Dt. 30: 15, 19) Life and prosperity, death and adversity, are set before you today. You have the power to support and maintain public health, or to cause needless suffering and death. Please, choose life. Support Dr. Berry. Even one COVID-19 death that could have been prevented is one death too many.

Blessings,

Rev. Pamela Griffith Pond

We support the actions, communications, and decisions of our Public Health Officer, Dr. Berry. Do not allow any bullying from community members who think that individual rights should outweigh the health, and thereby the safety, of all of us. Let her do her job. We think she is taking appropriate actions and that covid vaccine passports should be more widely required and checked.

Please give the Doctor both IT and physical support and protection so that she may continue her work without feeling personally threatened.

To Whom It May Concern:

There has been a complaint filed against Dr. Allison Berry, Health Officer for Clallam County and Jefferson County.

I fully support her efforts to protect the citizens of Clallam County by issuing a mandate requiring people entering bars and restaurants to be vaccinated. At the time of her mandate, our county hospitals were close to exceeding capacity due to the high number of covid-19 patients.

Dr. Berry has worked tirelessly and courageously on behalf of our residents. She has been slandered, threatened, and harassed by many who opposed this mandate.

It is my hope that you determine that Dr. Berry did act within her capacity as our Public Health officer.

Sincerely,
Janet Popelka

Greetings WA Board of Health members:

I'm not much for form letters so I will get straight to the point in my own words and thoughts.

I wholly support Doctor Barry in her work guiding the health decisions for Clallam and Jefferson Counties through these trying times of the Covid-19 Pandemic. There is no easy path forward through all of this, but I feel the process should be guided by those who have studied and worked in this field, those who just might have a bit more specific knowledge of this matter than most of us. I feel her decisions are based on the best information she has available at the moment.

The situation we face has been, and remains, serious, and unfortunately also controversial. No one likes their freedoms curtailed, or inconveniences imposed upon them, unless there is good reason. It seems that at the moment there are over 700,000 good reasons, unless we are determined to add to that count. Let alone those who may suffer some long term side effects from the disease.

We have the tools: distancing, masks, vaccines. Do we have the will? Are we willing to make these small sacrifices for the health and welfare of our fellow citizens? Do we care?!

I for one care about others of this great nation of ours. Always have, always will. I feel the overburdened medical community also cares. They dedicate their lives to it.

I want to go on record to say I am vehemently opposed to this petulant reluctance to abide by some basic health precautions becoming cloaked in some form of super-patriotism. For me, being a patriot is serving your fellow countrymen. Don't try to camouflage your selfish and self-centered righteousness in the flag or the pledge.

This a well blessed country with a level of prosperity and freedoms that are but a dream in many parts of the world. We are very lucky to be here. I hope we can appreciate it and each other enough to do what is necessary to finally get through this long dark tunnel of the pandemic and on to better times.

9. Do you have any special expertise relevant to this topic?

1. Yes

I model epidemics.

10. Are you testifying on a specific proposal under consideration by the board?

1. Yes

A complaint against Clallam County Health Officer Berry, to find that she violated laws, and to remove her from her responsibilities.

11. Are you Pro or Con on the proposal?

2. Con

At the time of Dr Berry's directive, Clallam's new case rate was more than ten (10) times the threshold for the "High" risk threshold. It is still currently about seven times that threshold (data from Clallam County website). Where there is an epidemic, every day counts (doubling times are short), and our health department has supported Dr Berry and understands the importance of protecting our community. My words here also directly represent those of my wife, neighbors, and many colleagues. We support Dr Berry, her expertise and compassion. We recognize that public health in times of dangerous epidemics requires sometimes unpopular decisions, often complicated by those who do not understand and therefore act selfishly and endanger our community. If anything, we must err on the side of the health of our community--Mother Nature is unforgiving. Thank you!

It is with sadness that we find that Dr. Berry is under attack by anti-vaxxers.

Over the course of the COVID-19 epidemic we have been impressed by the patience, wisdom, and clear communication by Dr. Berry to our community.

I volunteered with enthusiasm to help as a member of CERT (Community Emergency Response Teams) to man our drive-thru vaccination clinics, which saw up to 1,000 Sequim area residents get their Covid vaccinations per day of the thrice-weekly events. The coordination and morale of the Clallam County Fire Department District 3, Sequim Police Department, Jamestown Family Health Clinic, and CERT volunteers exceeded anything I have ever seen as far as management of an emergency situation, and was received with grateful appreciation by the community.

When Clallam County COVID-19 infections exceeded 1,000 per 100,000 residents, Dr. Berry took quick steps to protect our community, which is full of elderly, infirm, and long-term elderly care facilities. With little regard to her own safety she invoked a mandate for inside-dining facilities patrons to show proof of vaccination. Her brave action has doubtless saved innumerable lives, and helped push down the upward curve. Of course, no good deed goes unpunished, as extremist anti-vaxxers and anti-maskers are now showing us.

After storming the Clallam County Courthouse to get at Dr. Berry, they marched on what they thought was her house. Thankfully their misplaced zeal exceeded their bearings and they threatened the wrong household.

It is a sad day when a qualified and well educated and experienced Public Health Officer such as Dr. Berry has to take precautions to protect her life.

We ask you to please support Dr. Berry, and all the other Public Health officers in rural countries across the state, who are putting their lives on the line to protect public health, and protect us all and our loved ones, including unvaccinated children and the immune-comprised elderly, from this present scourge.

Dr. Berry deserves the highest appreciation for putting her life on the line to help protect us all.

Sincerely,

Alex and Teresa Fane

Dr. Berry announced on Sept 2nd that restaurants were mandated to require proof of vaccinations starting Sept 4th. This was only two days prior to Labor Day, one of the highest profiting weekends a year for restaurants. They had already ordered food and scheduled staff to prepare for the usually busy Labor Day weekend. This extremely unexpected mandate was pushed onto restaurants without any REAL notice. Restaurants have already suffered SO much, and this was such a low blow to add to it. The health boards' paychecks might have been consistent and secure throughout this pandemic, but that is not the case for all of our community members. Local businesses are the heart of this town and you're putting an unreasonable and, frankly, inconsiderate amount of pressure and stress on an already stressed industry. The death of a local economy should also be taken into consideration and prevented.

Respect is a much better tool to rule with than fear... respect and trust has absolutely been lost in the board and with our health official... and business owners and citizens alike are absolutely fearful. Fear is ruling, on both sides. There is zero respect for businesses operations or wellbeing. These are the people that make our county thrive; they provide jobs and opportunity, attract tourists and new residents, and promote growth within our community and its economy... and yet it doesn't seem like you're taking into account any of the damages falling upon our small businesses when making these decisions. Not even allowing us public commentary before instituting this mandate, as we are due, further proves that claim.

I heard someone say in the commentary earlier that people have weaponized and politicized these issues with protests and threats. I want to start this by stating they I don't believe it is EVER okay to threaten violence upon someone. The 3 protests I have been to in Port Angeles have been peaceful and nonviolent. Loud, maybe, but not threatening violence or harm to anyone's physical well-being. When people feel threatened, they sometimes jump to threats in return... I condone no violence, but I do recognize and understand the threat that unvaccinated people and business owners are feeling right now. Standing up for your rights with assertive and nonviolent protests is an act for

change, not for violence, and the few extremists who do take it too far do NOT make up the many. If anything has been weaponized, it is the vaccine mandates that are being used to coerce people into permanently altering their bodies by threatening their livelihoods and basic rights and privileges. I also heard that this has been “highly politicized” by anti-vax/maskers... OF COURSE this is a political issue... political, by definition, means relating to the government or the public affairs of a country. This IS a political issue... but not on the part of just “one side.” If what you mean is that it has become a “partisan” issue, as in relating to the “right” or “left” I can assure you that people from BOTH parties take issue with this; and vice versa, I’m sure.

The real issue here is not misinformation. People are wondering WHY? I’ve heard multiple times throughout this meeting and the community people questioning the “what-ifs” and “why’s” of this vaccine. Why isn’t immunity should be considered? Why are they pushing this so hard? If vaccinated people can also spread the virus, why is this happening? If vaccinated people are already protected from symptomatic illness like you guys are saying; why do they need extra protection? None of these questions have anything to do with misinformation. It’s not MISinformation, it’s a LACK of information. It’s not VACCINE hesitancy... it’s mRNA vaccine hesitancy... it’s not ANTI-vaccine, it’s making a cautious health decision about ONE new vaccine that nobody TRULY knows the long term side effects of. And not knowing the long term side effects is not misinformation, that’s just the reality, is there any disagreement on that front?

We also keep hearing to “follow the real science.” If the science is that unvaccinated people are spreading covid in restaurants then why are we still allowing unvaccinated children to dine in?? Dr. Berry’s speech about being “reasonable” in that regard seems very unscientific to me. Are we going off of the science or what’s “reasonable” to her??? People are wondering WHY? We want TRUE information and actions that correlate to that information. We are only misinformed when that information is withheld.

We are also told that Ivermectin cannot be used in the treatment of COVID-19 because of a “lack of scientific research” or some kind of “double blind study” issue. Do those same types of studies exist in regards to the effectiveness of masks?? Why do doctors and scientists have to prove at the highest level without doubt (basically) that a well known, safe, and CHEAP drug can help treat COVID-19 like tons of studies are showing it is... but the CDC doesn’t

have to provide the same research in regards to mask wearing preventing the spread of COVID? These are questions we have, and being told to comply without this knowledge and trying to appease us with conflicting answers meant to pacify is a major reason for vaccine hesitancy, among many others. Our government brings in \$13Billion a year in taxes on cigarette sales and \$9.5Billion a year in taxes on alcohol sales. The FDA approves junk food with things that are known to be bad for you in it. On average the FDA recalls 4,500 drugs and medical devices a year. This is NOT misinformation. Wondering if our health is truly what's being considered based on this information is not selfish or unreasonable. And continually stating that hesitancy is only created DUE to misinformation is misinformation in and of itself... taking medications out of context by saying it's a "horse dewormer" when it's also WIDELY used to treat humans, is misinformation... they also prescribe Vicodin and Benadryl to dogs, but advertising it as JUST that as a headline like is being done with Ivermectin is just purposefully misleading. How can anybody not agree with that? It doesn't matter if you agree with it being a potential treatment for covid or not... describing it in a way that makes it look ridiculous to even prescribe to humans is dishonest and manipulative.

Has anyone from the board of health even inspected the schools and how they're instituting these mask mandates?? Children are getting blistered faces from them and some schools are forcing these poor kids to do PE with them on... are you kidding me? I have over 15 different articles and studies about the potential risks of long term mask wearing, a lot of them from credible scientific study sites (like pubmed) and quite a few articles and videos from diff doctors and scientists. How can any of you say that this research is "misinformation" without even seeing it? And if it isn't, why aren't you telling us BOTH the risks and benefits that we should be privy to? The way they store the masks in schools is completely unsanitary and counter productive (photograph of the pocket chart the is used to store masks when kids go to meals and recess attached below. Each pocket has a kids name on it and the kids stuff them in the pockets on their way out the door. Right next to each other. How is that in compliance with any safety measures?? Gross! Why is our health board not addressing this or actually guiding establishments through their mandates successfully and safely? It's it's TRULY about our health, then why aren't you making sure that these mandates are being carried out properly?

-Reagan Lausche

Dear State Board of Health,

I am writing to be put on your agenda for your ZOOM hearing tomorrow. Where is this at as I will be in Tacoma in the am, and maybe I can attend in person?

I do not support Dr. Allison Berry's Restaurant VAX Passport.

1. This is an egregious assault on the Freedom's of American citizens. This is against the 1st, 4th and 14th Amendments of the Constitution For the United States of America. in Marbury vs. Madison, 1803; it says the Supreme Court said "That any laws that are against the Constitution are "Null and Void." I have a whole list of Supreme Court rulings I wish I could send to you. If I have time I will have my husband scan them to you.
2. This is against the Civil Rights Act of 1964. This VAX ID PASSPORT is clearly discriminating against those that choose for whatever reason to not get vaccinated. One Commission said he would recommend that restaurants put the VAXXED on one side of their Restaurant and the Unvaxxed another. Does that sound like segregation?
3. This is also against the ADA/HIPAA laws....as you start asking for people to reveal their Health status by asking if they have been VAXXED.
4. This is also Against the Nuremberg Code of Ethics.

I highly recommend that the Wa. State Board of Health, research the above,, and rescind Dr. Allison Berry's position as Health Director or recommend the Clallam Commissioners that voted her in take action to remove her. She does not deserve this position. If you do not...you are complicit in the breaking of the 4 Laws above.

Thank you for your attention.

Sincerely,
Rose Marschall

I hope that I can speak at this meeting tomorrow.

Sincerely,
Rose Marschall

Per the Vaccinated only access to sit down eating in restaurants.

What DATA evidence did Dr. Berry provide to the County board to show patron Covid transmission prior to the mandate in order to qualify the decision.

What were those numbers over what period of time?. Not percentages. Actual numbers as percentages can be misleading.

And thus, what DATA has Dr. Berry provided to support her assertion of a 45% decrease in cases that she associates with that mandate? This would presume that there is a verifiable patron case count reduction.

It is easy to suggest a 45% reduction if there were 2 cases before the mandate across the whole county and now there is only 1 case.....please ask her to provide verifiable DATA of numbers from confirmed patron transmission. The apparent impetus for the mandate.

Thank you,

To Dee Boughton, (how shall I refer to you?)

Perhaps you did not thoughtfully consider my letter to the Undersheriff? It appears to me that there was no consideration to proper administrative procedure in this recent declaration that citizens should be conscripted to act as workers for the County Health Dept. or as some form of police force. The original email copied below outlines just a few of my concerns. This imposition on private citizens and businesses is an unfunded mandate for which virtually NONE of the business owners or employees have been trained, licensed or prepared in the least for this role. Further, it appears to have been capriciously applied without any known evidence as to its requirement from a public health or safety standard. It has been applied by the declaration of an appointed public official, Alison Berry, who does not even bother to obey her own mandates (see attached image).

I am not an expert in the application of public policy law, but it seems obvious to me that this expectation that private citizens should participate in the undermining of their own right to conduct commerce must have some form of :

- proven justification identifying and quantifying the hazard and the benefit for which this mandate is imposed across the full economic spectrum,
- a process to implement fairly among all business models proven to present this "hazard", not just the low-hanging fruit of restaurants and bars
- paid training programs with legislatively approved funding source to conduct training, since it would be tax funded,
- official approved and justified content for training sessions,
- safety concerns for the employees and owners who will have to confront patrons, and possibly eject them from businesses.
- Safety concerns for patrons who may be asked to conform to mandates that are inappropriate for their personal health conditions
- substitute income or stimulus package to offset the loss of income for business owners

who are negatively affected by this capricious imposition.

- Income replacement for the employees who are negatively affected
- and that this income should be provided at prevailing wage since it is a government mandate.

Further, under what such authority does the health department or the director of health act in such a capacity as to require citizens to act as "enforcers" of such a mandate? How can the department relinquish their responsibility and unofficially deputize common citizens to perform their work in an untrained and uncompensated capacity? How can the department require citizen business owners to perform actions that limit and could destroy or undermine their own businesses? How has this authority been delegated and through what due process can citizens seek to redress the harm caused?

These are just a few of my concerns with the imposition of mandatory medical mandates in any business setting. Considering the potential hazards and economic hardships this interference would cause, such an unprecedented action, poorly planned, and erratically applied, this act is certainly in violation of established administrative procedure. Let us identify together what sort of process would apply under any other sort of similar public policy and compare whether the correct process has been applied. I believe our administrative processes have been violated and I request an evaluation and administrative hearing on this matter.

Please provide this information to me. This is my second request.

According to the WA State Constitution, the government cannot capriciously interfere in commerce in this way.

[redacted] But wait! There's more! If you didn't make it to our first Summer Camp, know that we fully intend to keep this up in years to come. First Generation campers are submitting these amazing photos (Thank [redacted] and others!) and feedback—and we're learning so much. Stay tuned, be a part of the conversation, and we'll see you for Capture the Flag 2022, punks.

my Original complaint:

To whom it concerns.

Please initiate an administrative review of procedure regarding the requirement of business owners to act as health department workers in determining vaccine status of patrons.

Administrative law appears to have been circumvented in the implementation of this mandate

- Restaurant employees have neither the training or the license to act in a health care capacity or as a pseudo police authority. The health department has not provided for this.
- The Health department lacks the authority to enforce restaurant staff to perform these duties for which they are unequipped.
- The health department has failed to conduct a study to evaluate the impact of these policies on the community, the tax shortfall, hardship to businesses, the impact to tourism, etc
- This plan is being unequitably applied to restaurants and bars as the cause of outbreaks without any verification that this is true.
- The health department lacks the manpower to perform these duties itself and cannot defer responsibility or authority to citizens for its own lack of planning

- The health department has failed to conduct adequate public hearings to collect input from business owners on the various impacts of this mandate
- The health department has failed to conduct adequate public hearings to collect input from business owners on staffing requirements and compensation for such.
- The health department has failed to properly inform lay citizens in advance of the details of this plan
- The Health Department has failed to consider liability and costs or recompense for the impacts of this decision
- This policy as it applies towards mandating vaccine proof in all other industry in Washington state is also likely suspect for breach of administrative procedure.

There may well be other causes for which this mandate is likely unlawful. We reserve the right to accommodate for future discovery of these additional facts.

Please inform me of a hearing date set for administrative review of this poorly enacted and major policy change.

Ms. Wilke,

I am reaching out to you on behalf of the Clallam County Sheriff's office. You emailed Undersheriff Ron Cameron requesting an administrative review. I am emailing you, because you initially contacted the Sheriff's Department via email. I work in the civil division of the Clallam County Prosecutor's office, and I represent the C.C.S.O. I am hoping that you can clarify your request so that we can understand what it is you are requesting. You mentioned in your original email a "procedural evaluation" and that citizens should be able to have access to "this kind of process". The Sheriff's Department is unclear regarding what you are referring.

Could you contact me via email or phone to discuss your request? I look forward to talking with you and getting a better understanding so that we can take appropriate action on your matter.

Best Regards,

Bert Dee Boughton | Deputy Prosecuting Attorney | Clallam County

RE: Complaint against Dr. Alison Berry, Clallam County Public Health Officer

Dear WSOH:

The purpose of this comment is to urge you to stop the mandate put forth by Clallam & Jefferson Countys' public health officer, Alison Berry for the following reasons:

It violates

The mandate currently in place in Clallam County is:

1. Unconstitutional, particularly the 1st, 4th and 14th Amendments.
2. Unlawful-violating HIPAA, the Health Insurance Portability & Accountability Act, by requiring vaccination certificates be publicly displayed to enter a restaurant. No such certificates have ever been required for any other communicable diseases such as aids or small pox. They are NOT ALLOWED under the law.
3. Unlawful-violating the ADA act, which models the Civil Rights Act of 1964, discriminating against unvaccinated persons, those who choose not to have an experimental, untested mRNA injection forced into their bodies; an injection that forever interferes with their own Creator-designed immune system. Prior to Covid 19, no vaccines have ever been approved without 4-10 years of thorough testing. This vaccine was granted an "experimental, investigatory injection" status in less than a year, bypassing all safety standards applied to vaccine testing protocol. It is dangerous and untested. No one knows the longterm effects of this thing.
4. Immoral-violating all 10 of the Nuremberg Codes written & agreed upon in 1947 by all civilized nations, that no person shall ever again be forced to accept medical procedures (as perpetrated by the Nazis during WWII) without *informed consent*; INFORMED CONSENT without any duress, manipulation, coercion or force of any kind. This mandate is nothing but coercion. Each person has the inalienable right to choose what is put into their own bodies.
5. There is mounting evidence worldwide these vaccines are more of an endangerment to human health than covid itself. Eminent doctors and scientists are urging an immediate halt to vaccine mandates. Why?
Vaccines:

1. Do not prevent infection or re-infection; do not prevent breakout cases. The most highly vaccinated countries in the world have the highest breakout rates (86% in Israel & 77% in Iceland of breakout cases are fully vaccinated persons). Pharmaceutical companies are now dictating boosters are necessary to maintain effectiveness. Why? Because the vaccines are not working.

2. Do not prevent transmission. Why do masks and social distancing continue to be required even after one is vaccinated? Vaccines are not working.
3. Do not "Keep our communities safe" as so falsely prescribed in the media.
4. Vaccines are actually generating vaccine-resistant variants.
5. Vaccines compromise natural immunity (as provided by the Creator) via delivery of synthetic mRNA & spike protein which penetrates every organ system as well as crossing the blood-brain barrier. As spike proteins attach to ACE2 receptors throughout the body, microclots are formed. There is great concern among doctors & scientists worldwide that these clots are leading to debilitating & chronic diseases; diseases such as multisystem inflammatory syndrome, herpes, shingles, cancer and more.
6. County's Dept of health and Human Services (CCHHS) is utilizing skewed CDC guidelines to justify rollout of this mandate. For example item #8, page 3, states, "94% of those hospitalized for covid 19 in WA State between Feb 1, 2021 and August 21, 2021 were not fully vaccinated. 92% of those who died during that same time period in WA State were not fully vaccinated. In other words these statistics are pointing to VACCINATED INDIVIDUALS!. The CDC criteria as 'unvaccinated' are those who have received one covid 19 injection, or received 2 covid 19 injections & within a 14 day period, having suffered an adverse outcome event or death, are listed as 'unvaccinated' in the statistical data. This is a gross deception of criminal proportions! The unvaccinated are simply being used as a scapegoat to take attention away from overwhelming evidence that the vaccines themselves are the cause of breakout cases worldwide, are the cause of variants, and are the cause of viral transmission. They do not prevent infection, transmission or spread of the virus over time.
7. The CDC advocates vaccinating the population with the same vaccines to control covid 19 variants. Just as in the case of the flu, there are questions whether the vaccine for any given season will prevent infection from the most current variant of the flu virus. The same holds true for covid 19

I urge you on the basis of

- Overwhelming evidence that the vaccines are endangering the health & lives of all populations when the recovery rate for covid 19 for most age groups is 99%. The VAERS site clearly shows 10's of thousands of post-vaccinated people have succumbed to serious injury, permanent disability and death;
- Have not been thoroughly tested; we do not know the long-term effects of mRNA vaccines;
- That mRNA technology has never been approved for human use,
- That in the 2nd phase of clinical trials 100% of the ferrets died.

I urge you to stop this mandate in Jefferson & Clallam County as well as any other location in the state where it may be implemented.

Sincere regards, E. Renee Renninger

Comments for the Board, as I did not have time for this in my public comment:

Regarding the pediatric COVID-19 injections, this may be the first time in history that adults, at a societal level, are not *protecting* children, but are instead expecting children to suffer in order to protect *adults* from an infectious disease that is statistically no worse than annual influenza except for in the very old and infirm. Public health policy is turning our children into human shields. This is a violation of medical and moral ethics.

I implore you to do everything in your power to prevent mandates of COVID-19 vaccines, experimental or otherwise, for our children.

Sincerely,

Lisa Templeton

Dear WSBOH Members:

We are writing in support of Dr. Allison Berry, North Olympic Peninsula health officer and her actions to help stem the spread of the coronavirus and the delta variant.

As the official in charge of public health, it is necessary to implement guidelines to protect all the citizens of Clallam County. A mandate to be vaccinated to enter a restaurant, bar, etc. is one of those actions. Living in a community requires that we obey rules to protect others and ourselves, such as motor vehicle laws, no smoking regulations, school vaccinations, building codes, etc. The stakes are high for all of us with Covid 19 and none of this is political or personal (as if Dr. Berry enjoys to boss others). It is time to act as reasonable adults.

To whom it may concern:

Please be aware that I, a resident of Jefferson County, strongly support Dr Berry and her work and wise, tough decisions regarding Covid-19 precautions. The Delta variant has shown how at risk we are, even fully vaccinated. Clallam and Jefferson Counties have large populations of senior citizens, many with fragile health. Having mask mandates and vaccination mandates are intelligent means of keeping us safer. They make sense, especially for indoor dining - we would not feel safe doing so without these precautions in place. They also help ensure kids can stay in school, which is really important, especially in light of how much in-person learning they have lost over the course of the pandemic.

Please dismiss any and all charges brought against Dr Berry. She is doing her job, WELL.

Thank you

Dr. Allison Berry, Health Officer for Clallam County, is our hero. She put the health and safety of Clallam County residents above her own safety and interests and stood up to the anti-vaxers. Governor Inslee is considering modeling a state-wide mask mandate on her leadership in Clallam County. Please know that many of us who live in Clallam County value her work and commitment to our health and safety. We just wish more of our leaders had her courage and integrity;.

Dear Washington State Board of Health:

The threats of physical harm and other intimidating, extremist tactics being used against doctor Allison Berry, Public Health Officer for the North Olympic Peninsula for doing her job, by the anti-vaccination movement are appalling.

These tactics are frighteningly similar to those used by right-wing fanatics in Washington, DC back on January 6th. These people are spewing lies when they say that mandatory vaccinations are "unconstitutional".

Are vaccinations against polio, the mumps, and measles "unconstitutional"? In my opinion, COVID-19 vaccinations, like vaccinations against other deadly, contagious diseases should be required for school attendance.

This COVID-19 pandemic has taken the lives of too many people throughout our state. Too many are still un-vaccinated. If we hope to ever get a handle on this pandemic, we need to ensure everybody is vaccinated against it, except those with medical exemptions.

Citizens of our state are truly fortunate to have a team of consistent professionals like Doctor Allison Berry that are dedicated in bringing this pandemic under control.

Thank you, and Sincerely,

Hello,

I'm writing to you in support of Dr. Berry . She is our public health official for Clallam and Jefferson Counties. She has mandated masks in restaurants and bars in order to keep the public safe from Covid. She is being attacked by anti vaxxers and anti maskers in order to intimidate and threaten her and her family. Their agenda is to get her to rescind this mandate for the simple reason that they are crazy. Enough said. I support her completely and I'm grateful for her courage and commitment to keeping us all safe.

Sincerely,

Hanna Luther

Dear Esteemed Board members

There has been a lot of controversy as of late due to mandates being imposed to stem the tide of the COVID virus. This appears to be due to many people not understanding the science behind all of these measures. This is affecting many of our public servants in a negative way. Dr. Allison Berry is one of those whose courage in the face of threats has stood out to me and others in our community on the Olympic Peninsula.

I understand that a complaint has been filed against her by a small group of uninformed individuals. Dr. Berry acted within her authority in issuing a vaccine mandate affecting bar and restaurant patrons. I support these sensible measures, and applaud her willingness to stand up to those who try to bully and defame her.

Dr. Berry is a valued public servant, and I would urge you to dismiss any complaints against her or attempts to have her removed,

Thank you for your consideration.

Sincerely,
Lauren Churchill
Sequim, WA

Dear Washington State Board of Health Members,

This is a letter of support for our Public Health Officer, Dr. Allison Berry. I am a 90 year old, 25 year resident of Port Angeles, WA.

I am appalled at the ignorance, hysteria, and fanaticism aimed at our heroic Dr. Berry. I also find it difficult to understand why the simple requirements of protective masks, social distancing, vaccination assurances are considered criminal. The real crime would be for an unvaccinated person to infect someone who later dies of COVID. The COVID carrier becomes a human killer!

The "Know-Nothings" shouting "Treason" and "Nazis" are, in fact, acting more like the people they are accusing Dr. Berry of being like! There is a fascist element in insisting on one's own freedom at the rights of trampling others' rights. Their freedom means the freedom to infect the vulnerable and elderly near them.

Dr. Berry has been a responsive and communicative leader throughout this perilous time. As an example: The residents at our Senior Independent Living apartment building were fortunate to have the Health Dept. set up pop-up clinics for those without cars or mobility. This happened because a resident contacted her office describing our vulnerable and virtually stranded elderly population. The response was immediate! Vaccinations were given to at least 80 of our elders. Thus far, only 2 people in 100 residents here have contracted COVID (note: they were each unvaccinated).

It is disappointing to know that there is such a vicious and uncaring part of our population in this beautiful County. Thanks for reading. Sincerely, Sylvia M. Meyer, 1703 Melody Circle, Apt. 310, 98362 Tel: 360 461-6408

Dr. Berry has been a superb public servant during the covid crisis. She has been upstanding in her duties and acted completely in accordance with state and national officials. I feel that Dr. Berry has been well within her authority in any and all health measures surrounding the current health crisis. She's an asset to both the county and the State of Washington and we are quite lucky to have her here.

I urge the State Board of Health to dismiss the outrageous, misinformed, and egregious complaints against her.

Additionally, for the county here, Dr. Berry's updates on the status of covid in Clallam county are professional, constantly updated, and valuable. I'm a bit of a data nerd and a 65+'er so I monitor the covid county and state numbers daily so those being provided by the Washing State Department of Health and my county are helpful to large numbers of us in Washington. They are appreciated!

Thank you for taking the time to read this and please enjoy your day!
