COVID-19

UPDATE

- Light at the end of the tunnel
- Cases declining statewide
- Hospitalizations also declining
- Vaccines are our path forward

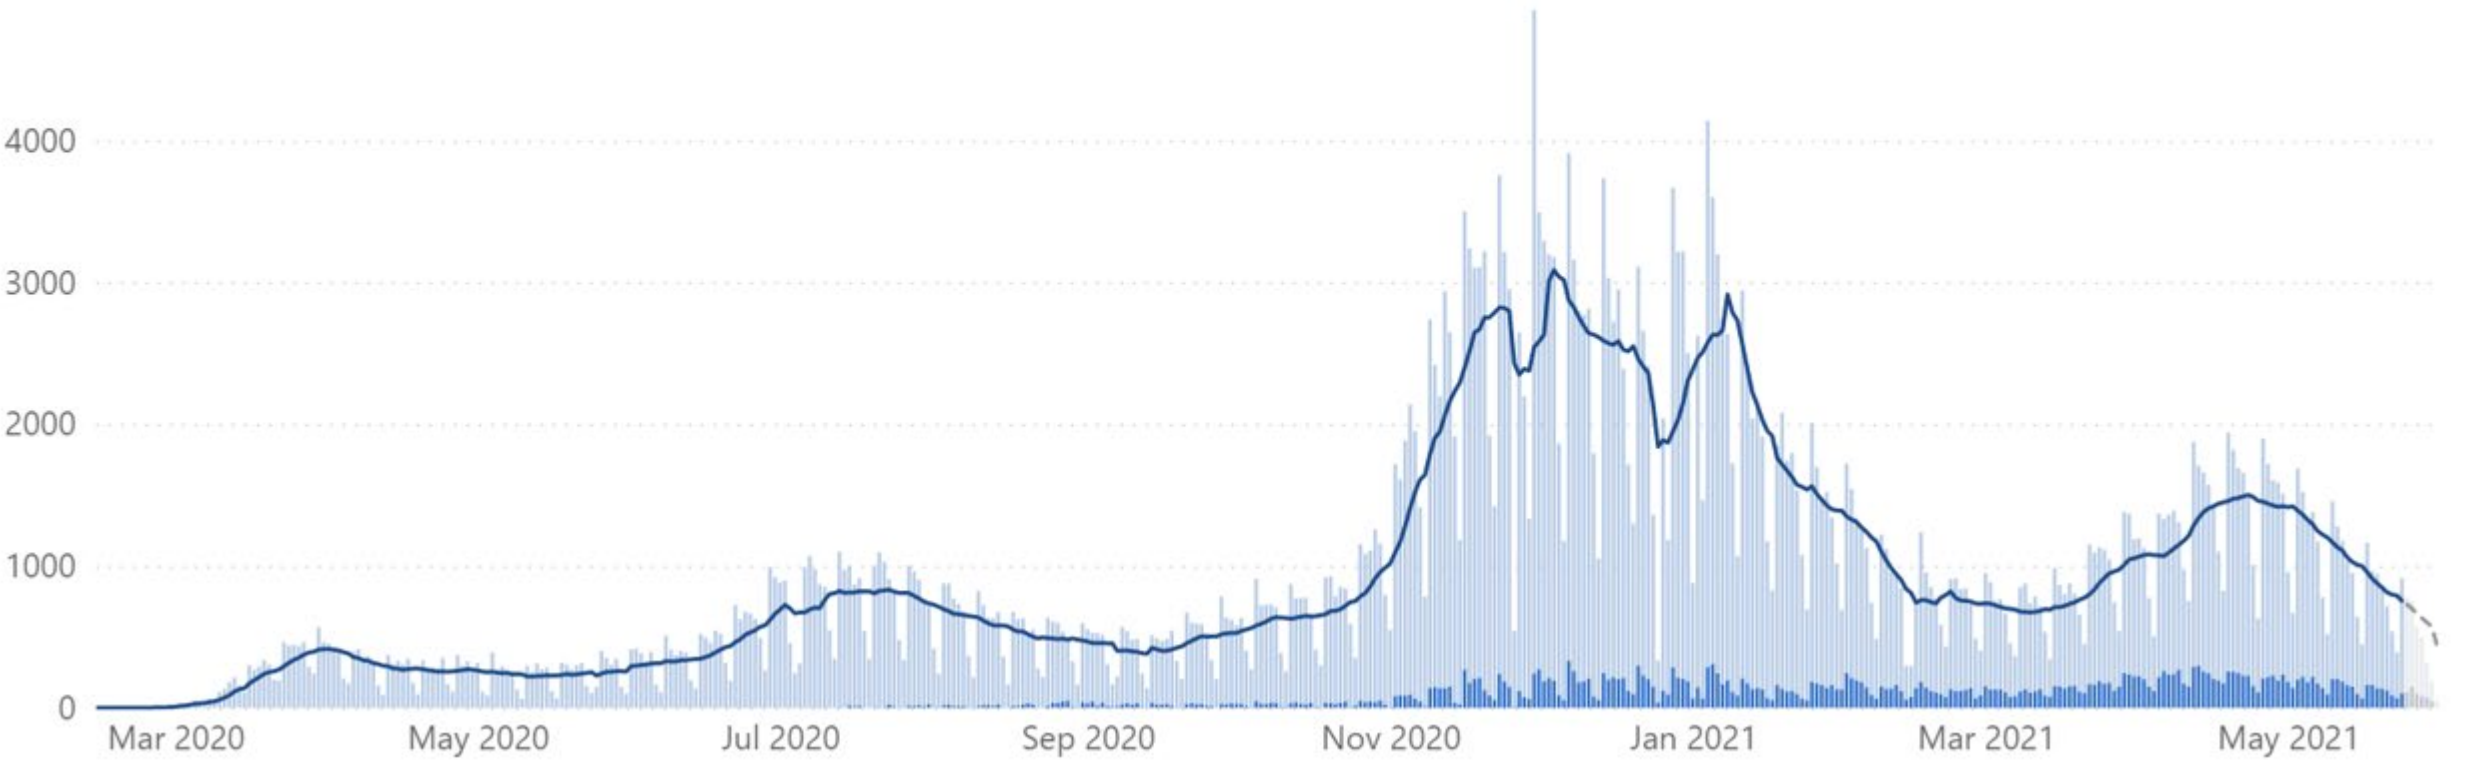

Robust COVID-19 Response: Communication, Coordination and Collaboration

KEY EFFORTS

1. Data Monitoring
2. Timely Testing
3. Epidemiologic Investigation
4. Contact Tracing
5. Expedient Quarantine and Isolation
6. Healthcare/Hospital Support and Therapeutics
7. Communications/Community Engagement
8. 4Ws (Wear Mask, Wash Hands, Watch Distance, WA Notify)
9. Financial & Social Supports
10. Vaccines & Process of Assuring Vaccinations

CASE COUNTS

● Probable Cases ● Confirmed Cases ● Incomplete (Probable Cases) ● Incomplete (Confirmed Cases) — Total Cases (7 day avg.) - - - Incomplete (7 day avg.)

COVID-19 Vaccine Rollout in Washington State

Conceptually, vaccine rollout can be thought of as a three-legged stool: supply, logistics, and demand.

All three legs are necessary to be effective in balancing goals of getting as many Washingtonians vaccinated quickly and equitably. Any imbalance in the “legs” of the stool during different phases of vaccine rollout will lead to challenges in the ultimate goal of achieving adequate vaccine coverage across Washington.

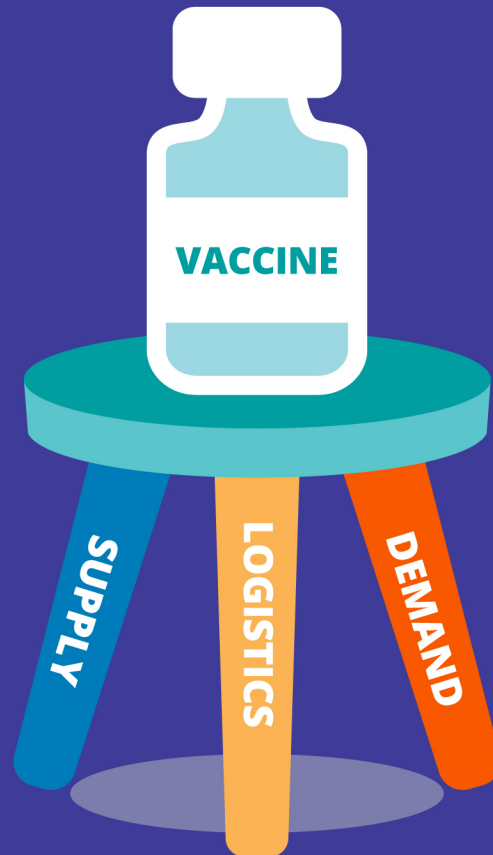

SUPPLY

Number of vaccine doses coming into state of Washington and then to local communities

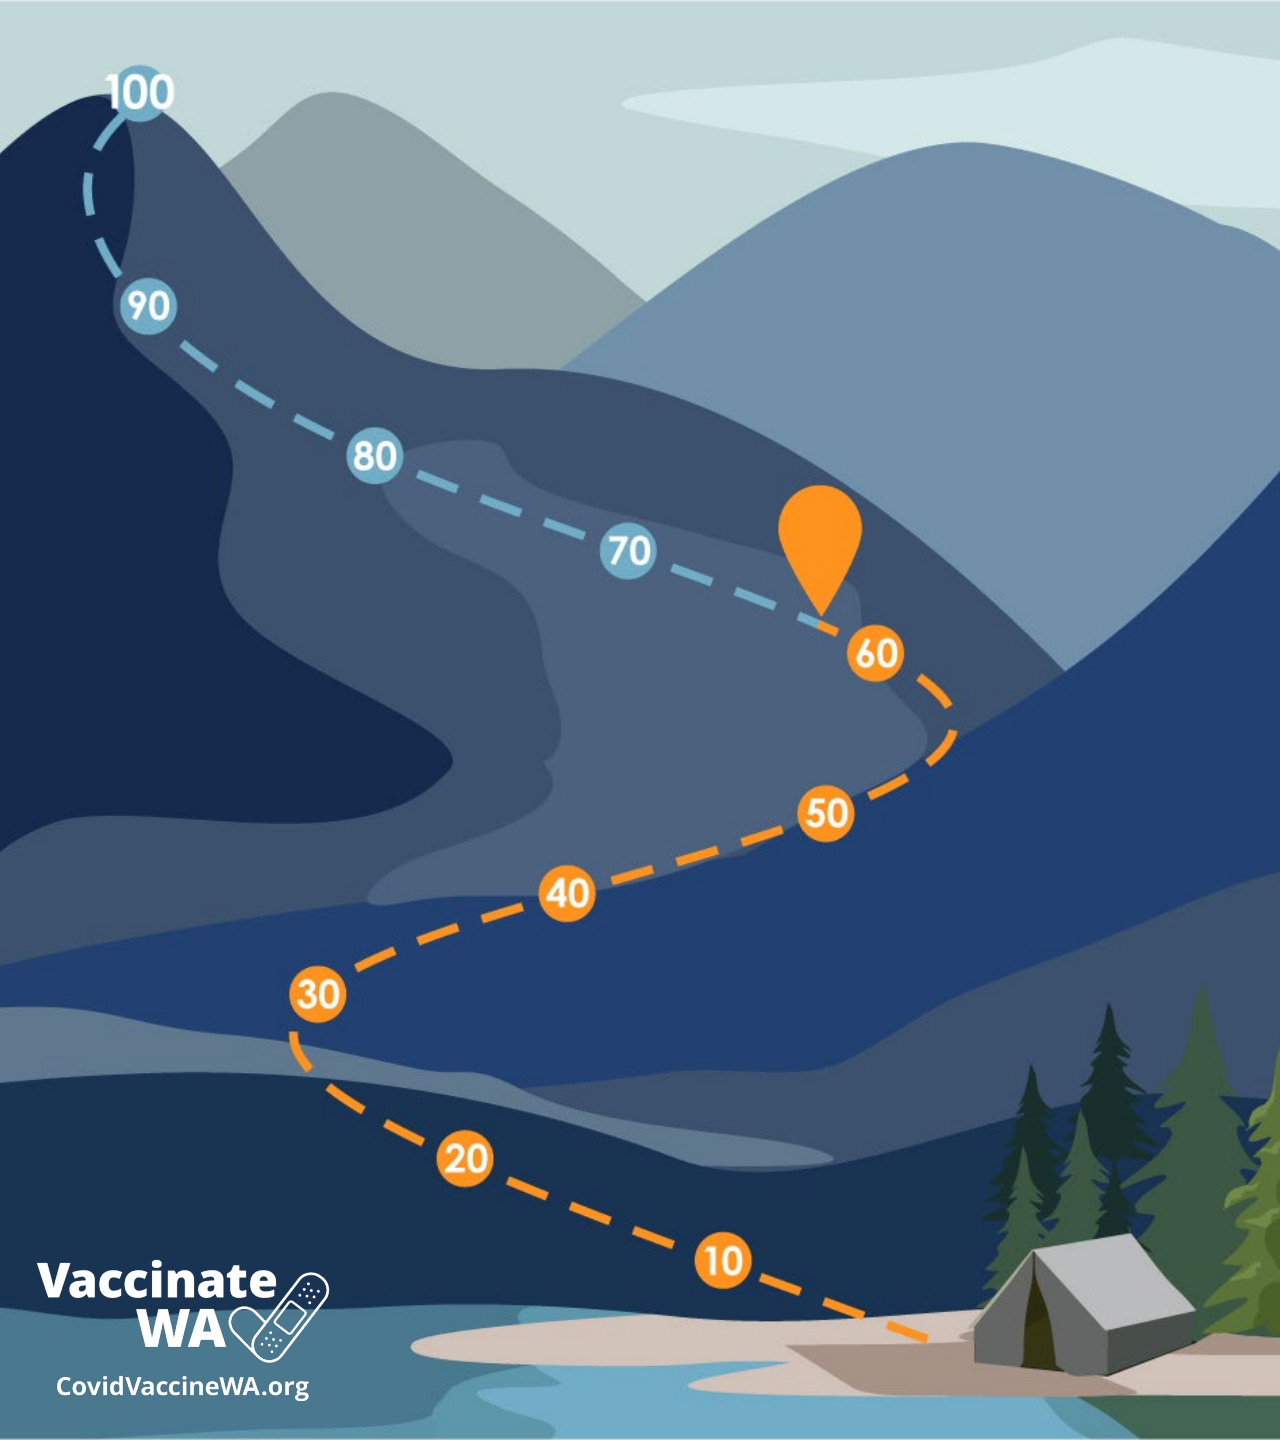

LOGISTICS

Ability to administer vaccine doses when available in a timely and effective manner

DEMAND

Willingness of Washingtonians to seek and/or receive vaccine when eligible and available

As of June 5,
more than

63%

of population 16+
has received at least
one dose. That's
almost

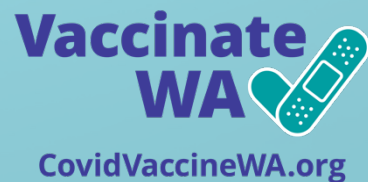

**4 million
people.**

As of June 5, more than
3.4 million people

in Washington are fully
vaccinated, which is nearly

56%

of the population
ages 16 and up.

As of June 5,
more than
7 million doses
of COVID-19 vaccine
have been given out
in Washington.

Thank you to everyone
who helped make our
state-led mass vaccination
sites a success!

Over the past four months, these
sites gave out more than

303,000 doses
of COVID-19 vaccine.

Changes for COVID-19 Vaccine Providers

- Blended inventory model
- 100% demand-based allocation
- Dropped requirement for providers to use 95% of their COVID-19 vaccine inventory within 7 days

Myocarditis and Pericarditis

UPDATE

- Small number of cases in some patients, post-vaccination
- Further investigation needed to see if they are connected to COVID-19 vaccines

VACCINE INCENTIVES

**Goal of full
reopening
on or
before
June 30th**

Healthy Washington | Roadmap to Recovery

New mask guidance

- Masks required for people who are not fully vaccinated
- Respect the 'rules of the room'
- Masks required for all in some settings (for example: health care, schools)

Washington State Department of
Labor & Industries

Updated guidance for employers

- Fully vaccinated employees do not have to wear a mask or socially distance at work, unless their employer still requires it
- Before ending mask and social distance requirements, employers must confirm workers are fully vaccinated – by having the worker either sign a document attesting to their status or provide proof of vaccination
- Employers must be able to demonstrate they have verified vaccination status for workers who are not masked or physically distanced

What will school look like in the fall?

Pasco School District to be a part of COVID-19 school testing program

Posted: February 17, 2021 5:47 PM

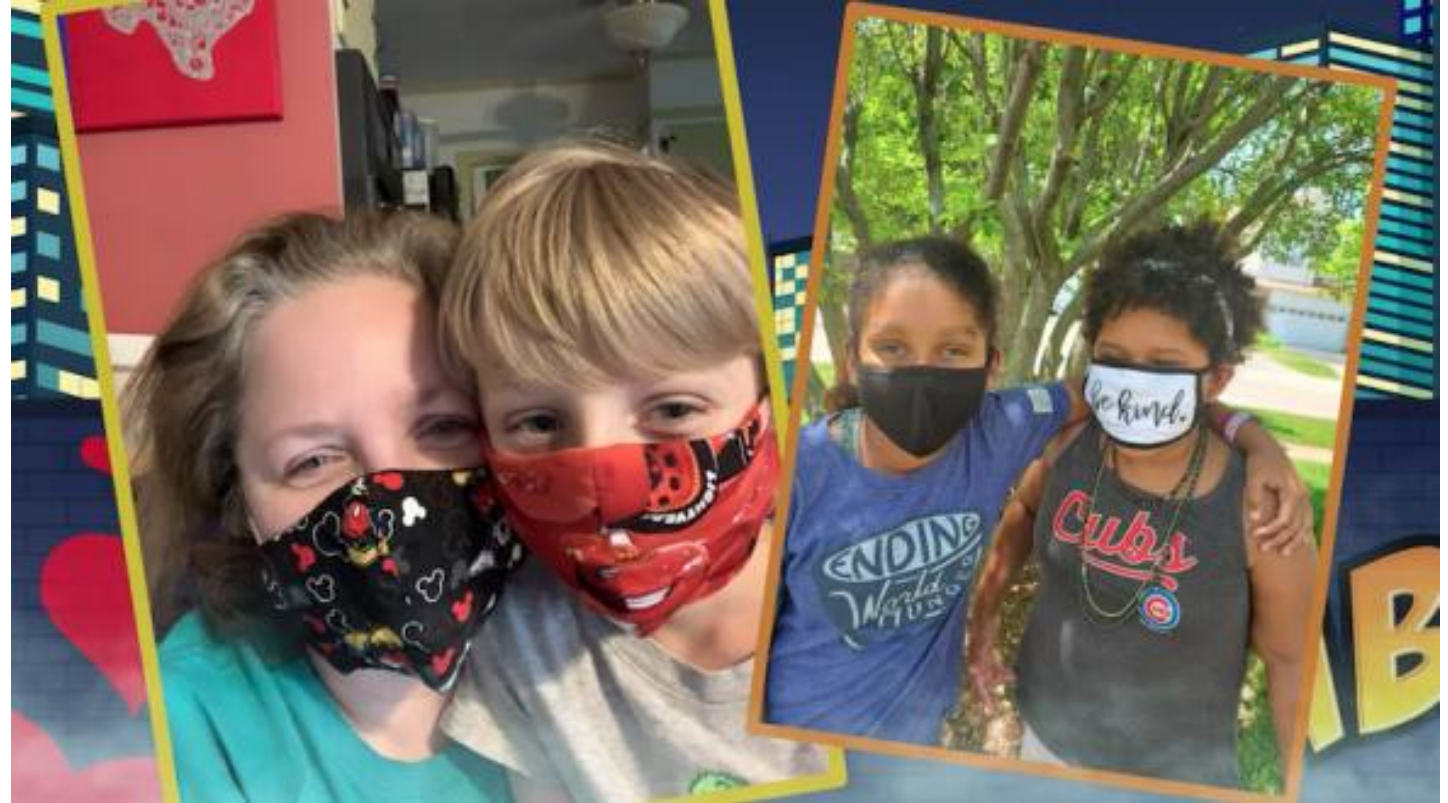

by Madeleine Hagen

Expanding COVID-19 testing in schools

New Overnight Summer Camp Guidance

- Masks required for staff and campers, with some exceptions
- Campers and staff must either be fully vaccinated or have a negative COVID test no more than three days prior to arrival
- Campers should sleep at least six feet apart

Guidance for Fairs, Parades, Festivals and Special Events
