Subject: No shots no school!

External Email

Hello, I'm a mother of four, I followed the doctors advice and Vaxxed all of my children, everyone had reactions, everyone did damage! Not every person can get shots! We have a genetic disposition that does not detox toxins, my daughter get a mosquito bite and it swelled up like an apple! 49-60% of the population have this genetic issue. It's called MFTHR! So forced medical procedures on children who are not in the risk group, high natural recovery, and risk to their lives or development is not acceptable!

Covid to young children has a recovery rate of 99.98% recovery! The shot not approved as a vaccine , is full of who knows what, due to no package insert, to list!

The animals in the animal trials, died!

VAERS is showing over 4K have died from the shots in the us alone!

This is a science experiment, and children should not lose out on education because unproven science, that poses risk!

Where there is risk, there must be a choice!

Thank you!

To whom it may concern:

It is extremely irresponsible and totalitarian to require parents to inject anything into a child's body in order for them to learn. Schools should never require a vaccine, or anything else for that matter, for a child to gain education. This is forcing the hand of parents and is inherently racist against people with religions that forbid such a thing. Please consider ALL situations and the consequences of a child's future if they aren't able to learn because they don't receive a vaccine with no long-term testing but known deadly side effects.

Children should in NO WAY be required to take this untested unapproved vaccine to attend public schools.

This is beyond ridiculous, you have the science in front of you and your REFUSE to stand up to the hysteria that has been created by the media and the politicians. PROTECT our youngest citizens of Washington state. STOP being the weapon used to divide this state. And while you are at it TAKE THE MASKS OFF of our children as well.

Remember if you FORCE the children to submit to this untested unapproved vaccine you might be open for lawsuits against you for damages, since the vaccine companies are exempt.

Subject: Take a STAND to Protect the Medical Freedom of Washington Citizens

External Email

Greetings,

I respectfully request that you Take a Stand to protect the medical freedom of WASHINGTON CITIZENS. Please use whatever authority you have to BAN and BLOCK any COVID Vaccine Requirement and support any such Ban. Many individuals have severe conditions that are not compatible with medications. There is no "one size fits all" treatment of any kind, why would the Covid-19 shot be any different? By forcing citizens to get vaccinated and/or show proof is causing major division in an already divided state. Please help bring us back together by continuing to support our medical freedom of an individual being able to make an informed choice of what's best for them and their families with their trusted primary care provider. Continue to support our Washington State and Federal Constitution. Show Washington Citizens that you have our best interests in mind.

Sincerely,
Jessica Myco

Subject: COVID policy concerns

External Email

Dear Board,

I am a parent of an elementary school child and property owner in Kirkland. I would like to relay some of my concerns regarding the state's COVID policy.

In particular, the mandatory masking of children in school, which I believe is psychologically and physically harmful. Their identities are being stripped away and their oxygen intake inhibited for many hours. What studies have been conducted on the long-term effects of mask use in children? Where is the evidence showing that masking of children is providing any benefit whatsoever? Being forced to rebreathe your own carbon dioxide and bacteria all day is not a healthy way to live.

Our family, alongside many others, have financially suffered under the harmful lockdown measures. Where is the evidence to support these draconian measures? e.g. Compare Florida and Texas to California and New York.

Of even more urgent concern is the encouragement of experimental gene therapy injections, commonly referred to as "vaccines" which have not been approved by the FDA. What studies have been conducted on the long-term effects of these injections? I am hearing considerable evidence that these injections cause harmful side-effects up to and including sterilization and death.

I will not tolerate any requirement for taking this experimental injection as a condition of employment or to enter any public place as that is a violation of our civil (human) rights.

I especially will not tolerate any requirement for my child to take this experimental injection in order to attend school. If this were to happen, I would remove my child from school immediately and consider moving to another state.

I strongly urge the Board to take a stand to protect the medical freedom and civil rights of Washington citizens and use whatever authority you have to ban or block any COVID vaccine requirement and to support any such ban. Remember that we are in a situation today where any information that does not fit the "establishment" agenda, regardless of the scientific or medical credentials of the source or the truthfulness of the content, is being actively suppressed. Facebook, for example, have already admitted as such. This is not healthy for our democracy and when you consider the threat of forcing people's personal medical decisions, the consequences of not conducting full due diligence on such health policy could be very grave indeed.

External Email

To whom it may concern,

I am writing to express my concern with the COVID vaccine and making it a requirement for children to attend school in the fall. I am strongly opposed to forcing this vaccine on anyone, especially those who can not possibly be given an informed consent due to being minors. There are just too many unknowns with this experimental biological agent. The deaths and vaccine injury, that have been reported, connected to this vaccine campaign, are staggering and unfortunately there are many more that are not getting reported.

I work in healthcare and have never been anti vaccine for myself or my children but I strongly oppose this vaccine and the way it is being forced. The way our governmental leaders are pushing this has many feeling like we have lost our civil rights.

I implore you to use whatever power you have to stand up for freedom.

Thank you,

Anonymous and Concerned Citizen

Regarding the potential threat of COVID "vaccine" requirements for school children to return in the fall: I am herein voicing my objection to the addition of COVID injections to the pediatric schedule.

I am being proactive in my opposition because such a proposal may be introduced in the near future. The WA State Board of Health must conduct due diligence to ensure people are not harmed by masks, isolation, and these experimental biologics.

Please refer to the Emergency Use Authorization (EUA) of such biological products which are investigational and cannot be mandated per federal law.

Please also refer to the Public Readiness and Emergency Preparedness (PREP) Act which leaves no liability/accountability for claims of loss (injuries and death) arising out of, relating to, or resulting from administration or use of COVID-19 vaccines by any and all entities and individuals involved in development, manufacture, testing, distribution, administration, and use of COVID-19 vaccines. Without liability, there's no accountability.

Furthermore, not only are vaccines for COVID-19 not proven safe, they are not proven necessary or effective.

Thank you for noting my objections to a potential requirement for children to be COVID-19 vaccinated before being allowed to return to school.

External Email

Dear Board Members,

Please take action to prevent any future possible requirements for the young members of our community to be vaccinated with the new and experimental Covid 19 vaccines in order to attend school or extracurricular activities.

As I am sure you are aware, the clinical studies, manufacturer and FDA fact sheets all state that these vaccines were not designed or evaluated to prevent infection or transmission.

There is no long term safety or efficacy data on these vaccines in particular when it comes the young people. The domestic and international scientific data is very clear that you people have almost zero risk of transmission and mortality in regards to Covid 19.

Please prioritize safety and protect our youth.
Sincerely,
Pami Garrett

Subject: Comments for upcoming board meeting

External Email

Dear Board of Health members,

Please allow me to express my concern for our children and students in the handling of the pandemic so far.

CDC data and WA state data clearly shows little to no risk of death or serious illness from a SARS-COV-2 infection for children and teens. As of May 26, the CDC had registered 300 COVID related deaths since 1/1/2020 for the 0-17 age group. Considering that per CDC only about 6% of total COVID related deaths are solely due to COVID and 94% included 1-3 co-morbidities I think it is safe to say that our children and teens have no risk of becoming ill from COVID. Yet our children have suffered the most burden from school closures, suspension of sports programs, isolation from their friends and peers. We may have averted triage in hospitals but now we are facing mental health issues in even our littlest kids.

We are also facing a huge push of COVID vaccinations for our teens. Healthy kids who don't have any risk of harm from COVID are pushed to get vaccinated with a product for which we have limited clinical trial data and NO long term data. A product that is still only approved for emergency use because of the lack of data and testing. Everyone who consents to a COVID vaccine assumes all liability, since there is none for the vaccine makers and none for the government. As a parent, why would I consent for my child to be vaccinated? Are you going to consent for your children?

I am very concerned that there will be a mandate for kids to be vaccinated in order to return to school in fall. As of May 21, 2021, just months after this novel vaccine has been rolled out, the US vaccine adverse events reporting system (VAERS) lists 262,521 adverse reactions and 4,406 deaths after the COVID-19 vaccine. Additionally, it is reported there have been 14,986 hospitalizations, 1,214 anaphylaxis, 12,219 severe allergic reaction, and 3,299 disabled. As shocking as these numbers are, it is well known that the VAERS system is vastly under-reported. Just last Tuesday Israeli health officials said there is a likelihood of a connection between receiving a second dose of the Pfizer COVID vaccine and the onset of myocarditis in young men aged 16-30.

<https://www.jpost.com/health-science/covid-health-ministry-finds-some-myocarditis-cases-linked-to-vaccines-669835>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.jpost.com%2Fhealth-science%2Fcovid-health-ministry-finds-some-myocarditis-cases-linked-to-vaccines-669835&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ccfa63b9ad93c4241b54908d927761ea7%7C11d0e>

Given this data, how could schools mandate such a vaccine for a virus that poses no danger to our children and students? School should be a safe place for children; a mandate of the COVID vaccine would be dangerous and will place our children at risk of severe injury and even death.

I am asking the Board of Health to strongly oppose any such measures or mandates. I am asking you to conduct due diligence to ensure the people of our state and especially the children of our state are not harmed by masks, isolation and vaccines. I am asking

you to protect the medical freedom of Washington citizens and to use your authority to block any COVID vaccine requirements or mandates.

Thank you,

Stephanie Benna

Subject: re: Board Meeting 6/9/21

External Email

Dear Members of the Board of Health for Washington State,

I am writing to ask you to consider carefully the facts of this Covid virus.

It is mainly a great danger for the elderly and those with comorbidities. The overall survival rate from COVID-19 infection is greater than 99%, with the majority of people experiencing only mild or moderate symptoms. Many people test positive for the virus but experience no symptoms. A positive test result does not mean someone is sick or contagious. And the antibodies gained after contracting the virus are robust and natural instead of artificially induced by an injection of experimental gene therapy that has never been used on humans before and with unknown side effects.

Moreover, nutrient and nutrient-drug therapies exist that have been shown to reduce your risk of infection and to reduce your risk for severe disease. Early treatment is essential. And there have been many doctors reporting from around the world that their patients with this virus recovered quickly, even from being near death, when given inexpensive treatments that are easy to get and use, like vitamin C. If it's truly a pandemic, why are people being told to go home and wait to see if they get worse and need hospitalization, which then may happen, then comes the ventilator and almost certain death. What kind of health care is that? If it is a pandemic, whatever shows effectiveness (without the horrible side effects we're seeing with this covid shots) should be used to help people recover. It should NEVER be a 'wait until a vaccine gets here' response, which unfortunately is exactly what has happened.

Unfortunately, the suppression of treatments drove up the rate of fatalities in the United States, and suppression continues to cause unnecessary deaths. Countries that provide ambulatory-treatments and kits with Vitamin D, HCQ, or Ivermectin, fair far better than the U.S. I am absolutely appalled that you did not immediately disseminate that information to the people of Washington so that everyone knew how to prevent themselves from getting sick, or at least from getting sick enough to be hospitalized.

As the Board of Health, you are charged with protecting the access to health for the people of Washington State. That means the breathing of fresh air which fosters health, the free association with family, friends, and others which fosters emotional health, the access to the jobs which keep people in their homes and food on the table for their children, the ability of the people to get the vitamins, supplements, and drugs that have been shown to be effective against this virus. Studies as well as experience over this last year and a half have shown that masks, lock-downs, and now the vaccine have not been effective at preventing contracting or spreading of this virus. You can find the studies with little effort if you care to look.

I am, as a citizen of Washington, reminding you that the health freedom of the people of this state MUST be preserved. Especially because the shot that is being pushed on everyone is experimental, does not prevent sickness, does not prevent spread, (according to the manufacturers themselves,) and is showing terrible side effects. Please, in the name of God, do not require any longer, or institute new rules that require masks (which Dr. Fauci himself said last year were ineffective at stopping transmission,)

lock-downs that are harming people psychologically, financially, and physically, and SPECIFICALLY do not make the shots mandatory for students of any age. These are experimental and there are no long term studies to show just how harmful they may be. Our children, especially, are not lab animals. We are not lab rats.

Thank you for your consideration and decisions for the health and health freedom of the people of Washington State.

Sincerely,

Elizabeth Fleming
Chattaroy, WA

Subject: Covid - 19 vaccine - oppose adding this to the school schedule

External Email

Dear esteemed Board of Health

I understand you are having an upcoming meeting and I wanted to ensure my voice is heard on this issue.

1.

This has been approved for emergency use - it's not fully approved and as such is still in trial. The unfortunate situation is that all of the millions of people getting vaccinated at this point are participating in the largest trial ever.

2. Long term side effects are not known. There are reports of blood clots, menstrual cycle issues, and more.

3. There is very little risk to children and kids are not spreading the virus.

4. This is a virus with a very high survivor rate!

Thank you for your time.
Nicole Richard

Subject: Covid Injections

External Email

Dear Board of Health Members,

Please take a stand to protect the medical freedom of Washington State citizens. Please use your authority to ban or block any Covid-19 vaccine/injection requirement. The Covid-19 vaccine is experimental and many people are experiencing significant side effects. Please insist that schools and place of employment do not require these injections. Please insist that our medical decisions remain private matters between ourselves and our doctors, and that the State must not require people to present proof of vaccination in order to work or access public accommodations. Please also consider the Fauci emails that reveal the truth about masks and how they do not protect against viruses. There are many studies that show this as well as OSHA guidelines that discuss the dangers of long-term mask wearing. Please end this useless and dangerous practice of requiring masks for all citizens regardless of vaccination status.

Thank you for your consideration,

Lisa Poole
Seabeck, WA

From: Ruth Wright
Sent: 6/4/2021 10:31:45 AM

Subject: Please do not require masks, social distancing or vaccines

External Email

Dear Board members:
Please do not require masks, social distancing or vaccines in daycares or schools for Fall, 2021 enrollments.

You can look at other states such as Arkansas where schools were open during Covid and they did not have the vaccine. The governor just lifted the mask mandate which includes schools.

Please think of our children first. They have low case counts. If a parent feels that their child is vulnerable, then it should be up to the parent to have the child vaccinated, not the health department.

Regards,
Ruth

Subject: June 2021 Meeting Agenda

External Email

Good morning Board Members -

I am not one to typically reach out and express my concerns or opinions but with the ongoing pressures being applied by many I felt it was time to stand up for those who can't. With the ongoing media and government narratives to accept the COVID injection as the norm, I urge you to please reconsider. For those of us who have already suffered vaccine injuries, the VAERS data for this experiment is alarming and we need to take a pause to do an honest evaluation of the goal. Our medical freedoms should be a sacred right under moral law and it feels as they are now at stake of being taken away for good. I believe we are all held accountable of our actions and I pray that you will take the time to consider the risks involved here.

Please use your authority as best you can to put a stop to this harm. The lockdowns, mask mandates and social chaos has gone on for too long and destroyed too many...especially the children.

May God give you strength and courage today to take a stand for those who have no voice.

God bless and peace be with you.

Subject: Email Comment for June 9 BOH meeting

External Email

It is abundantly clear now, from VAERS reports, and from scientific analysis of adverse reactions and their reporting, that the covid-vaccines, as currently being employed, are doing more harm than good. This is especially true for kids, who have essentially no risk from the virus.

For this reason, I ask the BOH to please commit now NOT to enact mandates regarding the covid vaccines.

If these are added to the pediatric schedule, you will be guaranteeing needless suffering and injury in kids.

It's also recently become a matter of public record that Anthony Fauci has been lying to the public on a number of topics. The public can also no longer trust recommendations from the CDC and WHO, which are both apparently manipulated by commercial interests.

Look at the science and the VAERS reports.

Consider also the ethics and morality of what you are doing.

No covid vaccines on the schedule, please.

Subject: Strongly oppose schools mandating medical interventions

External Email

Good morning,

I strongly oppose schools (whether elementary, secondary, or college/university level) mandating medical interventions such as the COVID-19 vaccine. Medical care belongs between the child/patient/parents, and chosen medical care provider. Coercing families into medical interventions such as the COVID-19 vaccine are in direct opposition to the Nuremburg Code, especially considering that the COVID-19 vaccine has not been available long enough for adequate LONG TERM SAFETY studies...and considering that they obliterated the control group by offering the vaccine to those who were in the control group!

We have no idea if the COVID-19 vaccine will cause infertility or autoimmune disorders. As one who has several autoimmune disorders in my and my husband's family tree, schools that mandate the vaccine will be discriminating against many who have medical reasons for declining the vaccine - and medical exemptions are hard to come by, thanks to the pharmaceutical industry bullying medical professionals into standard operating procedures where they follow the book instead of treating the patient right in front of them.

There is also the concern of immune enhancement - it is the reason we did not get a marketed SARS-CoV vaccine. The ferrets in the animal study of the SARS-CoV vaccine DIED when they encountered the wild SARS-CoV virus. THEY DIED. What could happen to the millions who have been vaccinated with the COVID-19 vaccine? Who knows, the long term safety studies have NOT BEEN DONE.

Anybody who mandates or bullies people into getting this vaccine, are complicit if that individual dies.

Subject: Covid Vaccine Concerns

External Email

To whoever it may concern,

I am writing to address concerns and opposition over any future legislation regarding covid vaccine mandates for adults or school aged kids; or any segregation or discrimination practices in public spaces.

Covid vaccines are currently emergency use, and by definition are investigational. Millions of Americans have had and recovered from Covid, studies show lasting natural immunity, making immunization unnecessary. Furthermore, manufacturers of these injections have no liability for their products and are under no obligation to share or be aware of safety concerns. Children are of little to no risk of contracting or spreading Covid and in Washington state there have been zero deaths in the 0-19 age group. Any future requirements for this vaccine in schools would not be founded in health or science.

I strongly encourage you to use whatever power is available to you to prevent discriminatory medical practices by our government, business and schools. Medical freedom and bodily autonomy is of utmost importance and must be protected.

Thank you,
Lindsey Richardson

It is unfortunate to say that our public health has failed us and mostly our children. Lockdowns, isolation, masks and possibly covid vaccines have and continue to be devastating to our children. Influenza is more dangerous to this age group. Please look at the science indicating the mental, psychological and physical damage our children have suffered who have 0 risk of being harmed or dying from covid. Not once has public health talked about prophylactics (of which there are many), or treatments (of which there are many) or focused or promoted how to keep healthy or stay healthy. How important it is to get outside, get sunshine and exercise. It is shameful.

Please post all the science being used to continue these draconian measures. It is appalling that open conversations, discussions and debates are not being allowed. Will the school be willing to be liable for any injuries that these children will incur from wearing masks (bacterial infections), or possibly having to be vaccinated with an experimental product (to date there have been multiple Deaths, evidence of myocarditis in teenagers and other adverse reactions), etc?

It is time for open discussions on these issues. Other states have fully opened with no increase in breakouts or deaths. Other states have no mask mandates. So what science is our state basing its decisions off?

We need transparency. Show us documentation (other than useless data based on computer modeling)

For the children's sake make the right decisions

Thank you

All,

This week all the "conspiracy theorists" were proven to be correct - that Dr. Anthony Fauci was working in league with the Chinese Communist Party to create and release the deadly virus known as Covid-19. The end-game of their dastardly plan was not so-much the Plague itself, but the so-called "solution" to the falsified pandemic that they created - the Covid-19 vaccine and the stripping of the rights and freedoms of all those who refuse to take it. With shame, disgust, and growing fear, I watched as the government of the state of Washington fell in-line with this blatant assault on American freedom. Led by the lies and incompetence of Jay Inslee, Washington has fallen into a state of panic, disarray, and division around this so-called pandemic and the means in which to best move forward in its wake - especially in regards to the "vaccine."

It is high past time for the Board of Health to take a stand to protect the medical freedom of all Washington citizens. This "vaccine" is killing people by the thousands. Under no circumstances should a CV-19 vaccine requirement be implemented in the state of Washington. People should be free to choose what to do with their own bodies when it comes to experimental substances. "The common good" is an insufficient reason for people to be forced into taking injections of any kind. If this so-called "vaccine" is effective, then the spread of CV-19 will die-out. The need for forced-vaccination of any kind (for school attendance, sporting events, or use of commerce) proves not only the ineffectiveness of the injection, but that something more sinister may very well be at work. This week's release of Dr. Fauci's emails points unequivocally in that direction...

I denounce in the strongest terms any and all forms of forced or pressured vaccination - be it in the form of school requirements, requirements for employment, or the rumored "Covid-passports" - as they are a form of discrimination against a large percentage of Washingtonians. We are better than that.

Subject: Covid Vaccine Concerns

External Email

Dear WA State Board of Health,

I am emailing to express opposition over any future legislation regarding Covid vaccine mandates for both adults and school aged children or any segregation/discrimination practices in public spaces.

These vaccines are currently only approved for emergency use and are considered investigational. Studies show natural immunity makes immunization unnecessary and many people have recovered from Covid. It is also known that having had Covid and getting the vaccine has caused adverse reactions in people. Vaccines are not a one size fits all and many people already have natural immunity. The fact that vaccine manufacturers have no liability for their products (unlike any other product) and are under no obligation to share or be aware of safety concerns is extremely concerning. It is also known that children are at very low to no risk of contracting or spreading Covid. In Washington state there have been no deaths in the 0-19 age group. Any future requirements for this vaccine in schools would not be founded in health or science.

I am asking that you please use whatever power is available to you to prevent discriminatory medical practices by our government, businesses and schools. Medical freedom and bodily autonomy is of utmost importance and must be protected!

Thank you very much!

Subject: Mandatory medical procedures for our children

External Email

Good afternoon,

I am writing to address the matter which will be before you today or in the coming days of making a medical procedure mandatory for our children in school. Medical procedures (vaccines included) should in no way ever be mandatory. These procedures come with risk and possible harm, with that there must always be choice. The medical professional's oath states "do no harm" for a reason. Each medical procedure must be weighed for each individual patient to consider previous medical conditions, current concerns, weight, age, etc. The state should not and can not interject itself into a decision that should be made between a parent, doctor and child. I would ask not only for you to consider your constitutional duty, your medical oath but also your duty to human rights to ensure that vaccines are not mandatory for anyone, at any age in our country! The Nurmberg codes established the necessity of choice after the atrocities we saw during WW II of medical experimentation and forced medical procedures. Let's join together to ensure we don't walk a road similar to ones in history and allow all Washingtonians to make the right decision for themselves with their doctor without interference in that relationship from our government or state boards.

Thank you,
Alexandra Ehlert
Concerned Washingtonian

Dear Washington State Board of Health staff,

There are many scientific studies proving masks are physically and psychologically unhealthy. In addition, masks do not stop viruses. In regards to covid19 that has a 99.9 percent survival rate in most age groups, the past year of data will also confirm with science what common sense and critical thinking had already told us. By pushing these unconstitutional and harmful mandates on WA state residents and children, you are complicit in creating the untold damage that has been caused to the health and livelihoods of the citizens in our state. Your position of a few weeks to flatten the curve has turned into more than a year of a government agency overstepping its bounds, failing to promote true health and wellness, restricting citizens rights to activities that do so, outright propagating lies, and creating health hazards and mental health issues for Washington citizens and their children. You have become nothing more than a propaganda arm and terror organization of a communist form of government if you do not concede your position on these mask mandates immediately. There is no other description that accurately describes WA State Board of Health until they lawfully return to the purposes of serving the people they are paid to assist. We demand that you step back from your senseless position on mandatory masks immediately.

We look forward to hearing your response,

The harassed and fed up citizens of WA State.

Dear Mr Grellner,
On behalf of live theatre, please read and share with your committee the following.
We know how busy you are. We just need a little common sense to prevail.
Thank you so much for listening.
Helen Machin-Smith

STATE COVID REGULATIONS DISCRIMINATE AGAINST LIVE THEATRE

There is no COVID regulatory scenario for fully vaccinated actors to perform under appropriate safety restrictions in the state of Washington. With an audience seated 20'+ from actors, phase 3 still requires on-stage distancing and masks, even outdoors. We request that a fully immunized cast be allowed to work outdoors unmasked, just as they are permitted to meet privately – even indoors – and do all the same things they would do on stage.

Unless action is taken now, thousands of desperately unemployed theatre workers will be prevented from preparing safely staged outdoor productions in time for this summer. Specifically:

1. The regulations take no account of vaccinations. Island Stage Left requires all cast and crew to be fully vaccinated before arrival. All of our work takes place outdoors. State regulations ignore guidance for vaccinated individuals, who may socialize freely with each other.

2. Theatre is treated differently from other businesses. Unvaccinated restaurant patrons may sit in groups without masks while eating, drinking and talking in an enclosed space surrounded by strangers. Yet fully vaccinated actors cannot rehearse on an outdoor stage without masks. This is unequal treatment. Are indoor restaurants inherently safer than outdoor stages? Are restaurants considered more important businesses than theatres, to be given special treatment?

3. Other performers already work under the conditions theatre needs. Dancers – who breathe much more heavily than actors – may rehearse maskless if their dance requires facial expression or heavy exertion (lifts, tumbles, etc.). Dancers may perform entirely without masks (phase 3 outdoors), and partner dancing dispenses with 6' distancing. Facial expression and body movement are crucial in acting as in dance; and theatre scenes involving romantic partners (or enemy swordsmen) need dispensation from the 6' requirement.

There is a difference, of course: actors speak. This is why we require all cast and crew to be fully vaccinated, and we will maintain 20' between actors and the masked, socially distanced

audience.

Actors outdoors cannot be understood through masks, much less convey the emotions professional acting requires. Microphones costs thousands of dollars to purchase or rent; small professional theatres can't afford them. **The key to all of this lies in one word: vaccination.**

We are very concerned about COVID spread. We follow all rules and recommendations. But when regulations that could safely be loosened are decimating an industry, we need action. If regulations are changed now, there is still time for some theatres to prepare summer performances.

We ask only for this change: no 6' distancing and no masks in performance for a fully vaccinated cast and crew, in phase 3 outdoors. All other regulations strictly enforced.

Please help us bring back live theatre with sensible regulations.

Sincerely,
Helen Machin-Smith, Island Stage Left, San Juan Island WA

Subject: PFAS Drinking Water Standards
Date: Friday, April 16, 2021 2:18:55 PM

External Email

Dear WA Board of Health WA State Board of Health,

Please move forward with adopting strong drinking water standards for PFAS. It's crucial we act now to reduce these immune-compromising toxics and follow the lead of other states that have started turning the tap off PFAS pollution. The draft rule is a positive step to begin to address PFAS in drinking water supplies, but I urge you to keep the process moving and incorporate the following recommendations into the final rule:

1. Ensure the state action levels address all PFAS. The rule should recognize that other harmful PFAS may be present in water and should establish monitoring, limits, and action requirements designed to capture as many of the large PFAS class as possible.
2. All Group A water systems should be required to test on an ongoing basis to make sure contaminated water sources are identified; the rule should not exclude important water systems such as churches, motels, or allow for waivers.
3. Since detection of any of these compounds is an indicator of the presence of other PFAS, the final rule should require that water systems take action to address all PFAS when drinking water exceeds the state action levels.
4. Finally, resources should be sought from the state legislature to support testing of other water systems and private wells and to address contamination.

Sincerely,
Colleen Milbee

I would like to say that you guys are doing a good job!

I also want you to remember that this pandemic crap will be over soon and those who go to the extreme will be remembered badly!

We WILL get back to OPEN meetings and public involvement in public rule making!

Giving the governor too much power over HEALTH issues will be questioned hard later on.

Please remember that Covid 19 has a 99.97% recovery rate and people are sick and tired of all the shut downs!! It is going to come back to bite a lot of people in the butt!!

Keep working for the people, not the government!!!

Thank you for your hard work and dedication!

Best regards

Michelle Anderson

Subject: Public Comment regarding COVID-19 Vaccinations in Schools
Date: Tuesday, May 25, 2021 1:46:05 PM

External Email

Dear Jennifer Johnson and the Skagit County Board of Health,

I am writing with the interest of advocating for COVID-19 vaccinations to be required in Washington State public schools, the same as other vaccinations are required.

As we have all continued to experience this pandemic unfolding, witnessing the death toll continue to increase has been disheartening. The vaccination plays a huge role in helping to stop continue the spread of COVID-19.

I understand that while the Washington Board of Health (WSBOH) has the sole authority to set immunization requirements for students, this is dependent on the recommendation from the Advisory Committee on Immunization Practices (ACIP) and Food and Drug Administration (FDA) approval of the vaccination itself. However, advocacy coming from individuals such as yourself on behalf of this topic could be beneficial in helping to get a vaccination requirement policy on the table. It could also bring attention to Governor Inslee regarding this issue.

Currently, as you know, the Pfizer-BioNTech vaccine is FDA approved for emergency use in those who are age twelve and older. Because of this emergency approval, it is indicated that this vaccination is extremely important, and warrants being considered required for those over age 12 attending public school. Doing so would contribute to achieving herd immunity and help put an end to this pandemic.

Personally, in my work as a District Nurse for Tukwila School District, as well as my pursuit in higher education to become a Doctor of Nursing Practice Family Nurse Practitioner, I have witnessed the impacts of this pandemic firsthand. Every day I conduct contact tracing, COVID-19 testing, screening/monitoring students for symptoms, notifying and checking in with sick families, etc. Having mandated vaccination, with cases of exceptions, could greatly mitigate COVID transmission in schools and the community as well limit the interruptions in student learning. According to current CDC guidelines, vaccinated students would be able to avoid a 14-day quarantine that causes them to miss out on in person learning if they were to be exposed to the virus at school or in the community and not experiencing symptoms.

As excited as I am that all students will have the opportunity to learn in person full-time again come this fall, I would be much more excited if I knew those who were eligible for vaccination were in fact vaccinated. Washington State Legislature Chapter 246-105 WAC states "Students have the right to attend school without the threat of exposure to certain vaccine preventable disease." It is evident that the COVID-19 vaccination is effective in protecting against infection. Washington State Public Schools would be much safer places for all students come this fall if vaccinations were required for all eligible staff and students.

As a long time, Skagit County resident, and voter, it is important to me that the values of elected officials align with my own. Issues such as this one that not only impact Skagit County and its residents but the state of Washington as a whole and should be considered in the

upcoming WSBOH meeting on May 27 , 2021.

Thank you for your time.

Sincerely,

Regarding #7

I am NOT OK with adding ANY florideation to our drinking water! The people of Spokane have REPEATEDLY VOTED NO!!

We DO NOT want florideation in our water!!

We don't care how much money they are offering.

The answer is NO and we will remember who votes yes on this.

You guys are doing a great job! Keep it up!

To whom it may concern:

I would like to give a comment and implore the board to remove mask mandates from schools.

To share factual information, the California OSHA has said "Cloth face covers are not protective equipment and do not protect the person wearing a cover from COVID-19." (<https://dir.ca.gov/dosh/coronavirus/COVID-19-Infection-Prevention-in-Logistics.pdf>)

According to the WHO, "One study suggested children between 5 and 11 years old were significantly less protected by mask wearing compared to adults." They've also said that there is an "absence of strong scientific evidence" and they have very limited data on masking children. They also state that the best interest, health and well-being of the child should be prioritized."

Let's discuss what we know about children and the spread of Covid-19. A January 2021 study involving 100,000 students and staff found that 99.98% of children did not get covid from school. There were 32 reported cases of infection (0.032%) and zero instances of a child infecting an adult. (<https://www.aappublications.org/news/2021/01/08/covid-north-carolina-schools-study-010821>)

Pediatric professors Christele Gras-Le Guej and Regis Hankard, Vice President of the French society of pediatrics and coordinator of Pedstart pediatric clinical research network, respectively, have adamantly stated "Covid-19 is not a pediatric disease. Children must not be subjected to drastic measures, painful to live with, that could disrupt their daily lives, when this microbe really is of little concern to them." (<https://up-magazine.info/le-vivant/sciences/65177-la-covid-19-nest-pas-une-maladie-qui-concerne-les-enfants/?login=true>)

I could share many more instances where masks have proven unnecessary for children.

Are masks harming children? Yes. A German study done in October 2020 with 30,000 mask wearing children found that 68% of the parents reported the following complaints: irritability, headache, difficulty concentrating, less happiness, reluctance to go to school, malaise, shortness of breath, impaired learning, and drowsiness or fatigue. Accelerated respiration, tightness in chest, weakness, and short-term impairment of consciousness were also reported. (<https://www.researchsquare.com/article/rs-124394/v1>)

I have personally seen the negative effects of masks on children. I have elected not to send my kindergarten aged son to public school because of the mask mandates, social distancing mandates and complete disregard for the emotional and psychological health of children in the

schools in the state of WA, but we have close friends who have sent their children to school. One child, in first grade, is told he is not permitted to drink water in school because he cannot pull his mask down. He is threatened with punishment for playing tag outdoors, while wearing a mask. He comes home with headaches and has said he would rather stay home and not attend public school if he has to keep wearing a mask. This is one example of hundreds of children having negative experiences in the schools due to the lack of regard for emotional health of children.

With the DOH guidelines for the 2021-2022 school year recently being updated, myself and many community members are outraged that the restrictions have not been lifted. States across our nation have banned the use of masks and social distancing in schools, yet the state of Washington continues to disregard the factual information and emotional well being of our children. As public employees, funded by taxpayer dollars, schools and the DOH should be basing decisions regarding children as the highest priority, following what the community is asking for and demonstrating by leaving public schools in droves. This will only continue and exponentially increase if the restrictions are not lifted and the testing guidelines are implemented in schools, per the DOH updated guidelines as of May 13, 2021.

Please, I implore you to consider the mental and emotional well-being of children as the highest priority, with the data and science to prove that the mask mandates are not warranted.

Thank you for your time,
Emily Porter

Hello Board of Health,

Where do I begin? What kind of message are we sending our masked children?

They have learned to live in fear and be quiet while doing so. Many of these young children are/will be abuse victims. Are they learning to just deal with it and accept it? Are we not worried about the long term mental anguish that they will be suffering from? Especially, since they are scientifically proven to not be Covid-19 spreaders. Stop this madness. They are traumatized!

Can the Washington State citizens receive an insert from the FDA EUA vaccines? Add a healthcare provider, many of my patients are on medications for auto-immune disorders. These Covid-19 vaccines have not been studied in combination with the prescribed medications. I prefer to only prescribe knowingly safe ingredients. When will we know the amounts and types of metals? These can counteract most medications I prescribe. I'm not able to advise the vaccine without a proper document proving its ingredients. The "fact sheet" is not equivalent to a vaccine insert.

Do the citizens not deserved the right to know? Especially, with high adverse reactions reported and no antidote to rid unsafe ingredients in the event of unsafe reaction.

What explanation is there for magnetic field response after injection? This is why is healthcare providers need more literature. We are asked about the 'tiktok' videos of keys sticking to injected arms. How do we explain this? How do I explain massive breast pain, redness, texture change, and axillary lumps with swelling? I'm not okay with informing my patients that they need to be quiet, because this is "normal". How do I explain massive vaginal bleeding accompanied by baseball sized clots? Especially with no patient history, until 3 weeks post vaccine?

Please, do not allow this vaccine to be mandatory. Just like all medications, some are not meant for all. This is dangerous and there is no possibility for true informed consent when providers aren't given the information for transparency.

Asking someone to provide personal health information to a store clerk, wedding planner, hair dresser, bus driver, and dog walker is absolute invasion of privacy. If this vaccine works, then those who are vaccinated should not worry about those who are not. If it doesn't work, it shouldn't be injected into any human without willing permission. Coercion, bribery, lies, gaslighting, fear mongering, and tyranny will never win in the long term. Bottom line; give the Washington state tax payers their lives back with the freedom of choice. Freedom for all and all for freedom.

Please consider dropping the mask mandates for public schools and our children in WA State.

Make it optional. Let the children, laugh play and breath freely. Let them smile and see facial expressions. Not being able to hug their friends and teachers, unable hold hands and also stand six feet apart is punishment enough. The data and the science do not add up. Kids are already behind and teachers have a huge job to do, let us lighten their load but not having them be mask enforcers while they could be teaching instead. It is exhausting and we are all tired!

Medical freedom and body autonomy are the most important aspect. We need to let children learn and grow. And masking them only prohibits that. Kids need exercise and oxygen. Allowing them to choose is allowing them to critically think and make decisions for themselves. Let's remember that is the main goal, helping them grow to be responsible confident adults.

Lets keep vaccines a choice too. But if anyone has had a vaccine they need to stay home for two weeks because they can shed and spread illness. Remember these aren't FDA approved, they don't stop the disease itself, like true vaccines do, (only lowers symptoms) they have documented deaths and adverse reactions from these injections. Where there is risk there must be choice. Let's not segregate, it only makes the problem worse. America is the land of the free, let's keep it that way please!

Unmask the children! They are our future.

Thank you for your time.

Letter

I want to commend you for your hard work, concern, and efforts over the last year. It has not been an easy season to be an administrator and I regularly pray for our local leaders, teachers, small business owners, pastors, and physicians- that God would give them wisdom and courage in this time. I recognize your efforts to keep children safe, and I know that most leaders are trying to do what they think is best. I want to challenge you to seek truth amongst adversity, and do what is best for the children of Washington.

As a resident, and mother of 2 children, I implore you to remove the mask mandate in schools for our children and their teachers. It is an overreach of power, an assault on our human rights, and a grave danger to our kids. More importantly, it has been proven ineffective as we review a year's worth of data between states and cities that have had mask mandates, lockdowns, etc. versus those that have not. COVID-19 will continue to follow a seasonal curve as it works through various populations, regardless of lockdowns, masking, and business closures. Continuing measures based on feelings and not facts is simply wrong. My children recently returned to in person school 2 months ago, 3 months before school ends for summer. Whether you are in agreement or not, seeing the school mascot painted on the sidewalk every six feet, the masks on all of our children, them separated from their peers was heart wrenching to see. It has been a tough year of understanding, comprehending and absorbing the information the teachers are trying to teach through a screen.

Children have spent almost an entire year with coverings over their faces. They are participating in athletics with masks strapped over their noses and mouths, making it difficult to breath. Children who have been abused, assaulted, and have mental health issues are spending 8 hours a day in masks. They are unable to see each other's faces. They are unable to see the faces of their teachers. Facial expressions are part of our children's development. They are breathing in dangerous amounts of carbon dioxide. There are reports of collapse, lightheadedness, fatigue, and anxiety. We are on the wrong side of history, requiring children to live in masks while claiming they are resilient. It is inhumane. Our children are not resilient!

It's not just the mask, temperature check, health screen, and plastic shield. It's dropping my son at the door, to be questioned by a staff member about his health and demanded to use hand sanitizer before entering the building every single morning. It's a hand washing schedule and the incessant

cleaning of surfaces. It's a painful swab and another quarantine. It's virtual learning, cancelled sports, and a parent free campus. It's masked teachers, distanced desks, and a year without performances, school assembly's, game nights, and proms. It's the appeasement of the local health department and added interventions to meet Washington Education standards. It's a face covering for a hearing impaired, autistic, sexually abused, asthmatic, claustrophobic, or anxious child. It's a filthy cloth mask increasing the incidence of illness and infection in our children. ***It's the long term psychosocial effects of not seeing the faces and emotions of other humans for an entire year and counting.*** While we do not have all the final data and consequences today, we will read about them in history books.

Cases of abuses and neglect are soaring. Childhood anxiety, depression, and panic attacks are being normalized. We're witnessing record setting childhood suicides- children as young as 9 years old. Self-harm and eating disorders are on the rise. Childhood obesity and diabetes are growing exponentially. Child pornography and the online exploitation of children has spiked. The microbiomes of children are being destroyed, their immune systems weakened. We've broken their trust in 'science' and the understanding of what the word even means. We are witnessing the collapse of the mental health of a generation of children.

In-person learning is the bare minimum. We have so far to go. The so-called cure is exponentially worse than the disease. It is discriminatory and cruel and we are standing by, watching it happen. By accepting this as our "new normal," we set a precedent for our future. I'm not suggesting we throw all caution to the wind. I am highlighting that as we stack measure after measure without a second thought, it's wearing on our kids. ***It is time to reevaluate.***

Children are being sacrificed to appease an irrational, fearful society that refuses to see the truth. The virus is real, but the narrative is not. The curve is unbothered by the abuse being done. More importantly, kids aren't driving the pandemic. History books will tell of this crime against humanity- of when we sacrificed a generation of children in the name of 'loving others' all the while ignoring the beloved science. Where are the coalitions and city task forces committed to repairing the physical and mental health of our children? Where are the research studies on the death toll caused by our interventions? The consequences of our complacency will last for years, far outlasting any virus.

COVID-19 is substantially less dangerous to children than the flu. They rarely transmit the virus to adults and most often present mild or asymptotically. The literature is overflowing with proof that our obsessive, anxiety riddled interventions do not create different outcomes, transmission rates, or mortalities. Anytime I address mandatory masks with the school staff, they tell me they have to follow these rules, that "their hands are tied," due to regulations set forth by OHA and the CDC. This must change. ***We need to follow evidence based medicine.***

Although, I commend your efforts to get our children back into the classroom, I am disappointed in your leadership, I'm disappointed that so many agree with me on these issues, yet very few will stand up, push back or even question these outrageous regulations. There is no evidence that masks are protecting children or teachers. Surface spread is not documented. Temperature checks do not decrease transmission or discover more than a tiny fraction of cases. ***These interventions are harmful. Our children need normalcy.*** They need to see their teacher's faces. They need to have a

normal Christmas program and perform with their parents in the audience. They need to sit with their desks facing each other. They need to sing and play with their friends at recess.

Please unmask our children. Please stand up for them. Please fight for them. What we are asking them to endure is wrong, and we are responsible if we allow it to continue. I know there are hard decisions to be made. I am praying for you- for wisdom, discernment, and courage as you make decisions and as you seek guidance from local officials. I have contacted them as well. As a concerned mother, and follower of Christ, I feel led to speak up. I will not stop speaking the truth into this issue- it is so important. I have listed a small portion of my references below.

Dear BOH members,
Remember the lessons of Thalidomide! Remember the lessons of big tobacco! Remember the lessons of non-existent weapons of mass destruction!

Remember the consequences of all those deceptions?

Yet here, you have whole-heartedly sanctioned and abetted an equally deceptive and harmful mRNA gene therapy program that is unnecessary, ineffective, untested, unapproved and counter to international law as well as standard, ethical medical practices.

And now you want to expand that barbarity by imposing it on children!

That is an unconscionable and criminal act of sheer horror. Your own local holocaust: a medical experiment on healthy, innocent children.

What will you offer individually and collectively as an excuse when you are held to account? And there *will* be a time when the people who created, supported, exploited and benefitted from this criminally fraudulent experiment will be held accountable.

Step up now. Cease and ban all school mRNA gene therapy programs.

Thank you,
Raven

To the Washington Board of Health --

Given this board's and the governor's profound overreach over the last year, do not dare to presume the members know anything about health, let alone health freedom.

You are hereby on notice to cease & desist ALL covid 19 mandates & regs, as well to reject ANY requirements for these experimental gene vaccines, especially for children — whether for schools, daycare, camps, etc.

As there has never been anything resembling "informed consent" for these horrific vaccination experimentations -- the entire medical-pharma complex, the mainstream media, legislators & boards, the educational system, etc, are ALL completely liable for criminal negligence & acts under the Nuremberg Codes — thus ALL will be held accountable.

If this board is unfamiliar with the Nuremberg Trails, and the Nuremberg Codes, this citizen mandates every one of you does so.

This list will assist.

A team of over 1,000 lawyers and over 10,000 medical experts led by Dr. Reiner Fuellmich have begun legal proceedings against the CDC, WHO & the Davos Group for crimes against humanity.

The “experimental” vaccine is in violation of all 10 of the Nuremberg Codes which carry the death penalty for those who seek to violate these International Laws.

The following violations of the Nuremberg Code are as follows:

Nuremberg Code #1: Voluntary Consent is Essential.

No person should be forced to take a medical experiment without informed

consent.

Nuremberg Code #2: Yield Fruitful Results Unprocurable By Other Means.

The gene-therapy does not meet the criteria of a vaccine and does not offer immunity to the virus. There are other medical treatments that yield fruitful results against Covid such as Ivermectin, Vitamin D, Vitamin C, Zinc and boosted immune systems for flu and colds.

Nuremberg Code #3: Base Experiments on Results of Animal Experimentation and Natural History of Disease.

This gene therapy skipped animal testing and went straight to human trials.

Nuremberg Code #4: Avoid All Unnecessary Suffering and Injury.

Since the rollout of the experiment and listed under the CDC VAERS reporting system over 4,000 deaths and 50,000 vaccine injuries have been reported in America. In the EU over 7,000 deaths and 365,000 vaccine injuries have been reported. This is a grievous violation of this co

Nuremberg Code #5: No Experiment to be Conducted if There's Reason to Think Injury or Death Will Occur

See #4, based on fact-based medical data this gene-therapy is causing death and injury.

Nuremberg Code #6: Risk Should Never Exceed the Benefit.

Covid-19 has a 98-99% recovery rate. The vaccine injuries, deaths and adverse side-effects of mRNA gene-therapy far exceed this risk.

Nuremberg Code #7: Preparation Must Be Made Against Even Remote Possibility of Injury, Disability or Death.

There were no preparations made. This gene therapy skipped animal trials. The pharmaceutical companies' own Phase 3 human clinical trials will not conclude until 2022 /2023. These vaccines were approved under an Emergency Use only act and forced on a misinformed public. They are NOT FDA-approved.

Nuremberg Code #8: Experiment Must Be Conducted by Scientifically Qualified Persons.

Politicians, media and actors claiming that this is a safe and effective vaccine are not qualified.

Nuremberg Code #9: Anyone Must Have the Freedom to Bring the Experiment to an End At Any Time.

Despite the outcry of over 85,000 doctors, nurses, virologists and epidemiologists – the experiment is not being ended. In fact, there are currently many attempts to change laws in order to force vaccine compliance. This includes mandatory and forced vaccinations.

Nuremberg Code #10: The Scientist Must Bring the Experiment to an End At Any Time if There's Probable Cause of it Resulting in Injury or Death.

It is clear in the statistical reporting data that this experiment is resulting in death and injury yet all the politicians, drug companies and so-called experts are not making any attempt to stop this gene-therapy experiment from inflicting harm on a misinformed public.

Consider yourselves served.

Subject: NIH Research - Natural Immunity Against Covid19 & Variants
Date: Monday, May 31, 2021 3:51:56 PM

External Email

If our decisions and guidance are based on science, I would like to ask if the BOH is aware of the National Institute of Health's news on the lasting immunity from Covid19 infections and variants, and if it will make use of that information? Links below.

With the application of vaccines by the high risk groups, the rest of the population, who is not at risk for hospitalizations or death, should not need to vaccinate if natural immunity is durable even against variants? In fact, the NIH states that is what the vaccine attempts to mimic.

It is time to apply science with sound policy and let individuals decide what type of immunity they want so that schools, businesses, and churches can carry on as normal.

Subject: Comment to WHO on 6/16/2021 Meeting
Date: Monday, May 24, 2021, 11:28 AM (PST)

External Email

Dear Sirs,

I would like to comment on your agenda items #4, 6, and 8 regarding COVID-19 policy, possible actions, and child communications. When I first became aware of this virus in late January 2020, and saw the Chinese government's response in Wuhan and other cities, I became very concerned. And, easy to see, I supported the early lockdown and mask policies here -- despite the warnings of constitutional activists, negative impacts to mental health, etc. (I'm a white-collar worker, it was easy for me to work from home full-time, making the same good salary as before, and failing to empathize with the masses of "lean and pop" shops.)

However, after a few months, I (like many) began to notice that (a) the virus wasn't as dangerous as initially thought, (b) our loss of liberties was increasingly concerning, (c) children (who were largely immune to the worst effects of the virus) were taking hits to their all-important social development, (d) many small businesses were forced to close their doors for good (while the "essential" large corporations made money hand-over-fist), and (e) there are effective and inexpensive treatments like hydroxychloroquine plus zinc, and intravenous (https://go2.usa.gov/links-protection-outlet.html?url=https://www.fda.gov/oc/2020/05/20/covid-19-treatment-04473031509469682508082481162657C1148217264640a0baf57dce127d7267c7097c7837380638781955797C1unknown7C7TW7p6ZAb5bcey7W7p3bMc4ed4a=MDAALCJQ6pnV26aM4dLCBTRB8IhaWwvdLZXYC30b6dP%3D%7C3000&source=whd.PF36a05%2BAWhgZg8hgKZnCZQ8yC6G677p%3D&reserved=0).

Now, as supporters "vaccine" (gene therapy) is all but being forced upon us, with political creatures, traditional media, and social media attempting to paint us and corner anyone questioning it. We are expected to be the lab animals in the field trials for a liability-free, irreversible medical procedure, which has already harmed or killed many (and the data reported in VAERS is said to be only a fraction of all the vaccine injuries).

It makes me sad to think that a country founded upon the noble ideals of liberty and limited government has become just the opposite -- esp. in some states like Washington, Oregon, California, New York, etc. It is just not feasible for me to just pick up and move my family to a Red state, or to homeschool my child, or to switch to a private school that more aligns with my values. People who want to get the "vaccine" are welcome to do so; people who are conscientious cannot choose to stay away from the public square (as in yesterday), and for the remainder, I beseech you to respect the principles of informed consent (which came out of the Nuremberg trials) and do not try to make this (or any) "vaccine" mandatory.

Sincerely,
David Hinkle

Subject: covid vaccination for schools
Date: Monday, May 31, 2021 2:48:28 PM

External Email

It is outrageous to me that an experimental, dangerous, and ineffective vaccine could potentially be mandated for children to attend school! What an amazing over reach of power and infringement to personal liberties this would be.

This covid vaccine has caused more than 4000 deaths so far, an extremely dangerous vaccine. It is not preventing the many breakthrough cases that we have witnessed. And to think, this virus is even less deadly than the usual annual flu! And there are many effective treatments, not to mention children seem to fair very well even if they got the virus.

I realize that mandates are not here yet, but we all know the trend of the Washington Health "experts". They disregard science to promote their current agenda. And the current agenda is to increase uptake of this dangerous "vaccine". I hope that you will consider that many are not on board with this promotion with longterm effects that are unknown, especially when it comes to children. I stand for freedom of choice every time, I hope that you will as well.

Sincerely,
Lisa Beckert

Subject: Objection to forced Vaccination
Date: Tuesday, June 1, 2021 12:38:53 PM

External Email

Dear WA Board of Health members,

Please do not vote to require vaccinations as a prerequisite to school attendance, travel or activities. This is a private health decision that should be thoughtfully made in cooperation with a licensed physician familiar with each individual's unique health status and risk factors. There have already been thousands of casualties from the experimental use authorization vaccines. People should not be forced or coerced into making dangerous decisions regarding their health and that of their families in order to preserve basic rights and freedoms. Medical autonomy should not ever be considered a privilege.

Respectfully,

Dr. Katherine Dahlgren

Hello,

I want to please request that the WA BOH *not* mandate any of the COVID vaccines as a prerequisite to enter daycare or school at any level (elementary through university years). With the mounting cases of myocarditis in young people occurring in King County, such that Seattle Children's Hospital now has to have a new screening for this complication in children presenting with certain symptoms, it is reckless endangerment to require children and young adults to take these experimental biologic agents. They have almost no risk of serious illness from COVID and are not spreaders of this infection to any great extent. My family is closely watching the state's approach around mandating these medications and will be moving out of state if they are mandated for school entry.

Thank you,
Rebecca Oshiro

Greetings,

I am a mother to a 6 year old special needs child with documented vaccine reactions. The DOH has instilled so much fear into medical professionals that should medical professionals advocate for their patients on the harms of vaccines, particularly CV, there is professional retaliation. The practice of medical professionals fearing to speak facts against the narrative needs to stop.

Covid vaccines are not safe. They are not effective. They are extremely harmful to some and shockingly the mainstream media is finally reporting a few of the complications from these vaccines. It is imperative these vaccines cease existence for 12-18 year old market, and are never available for younger children. Children are rarely and mildly impacted by the alleged covid, to which even raises the question of faulty and fraudulent PCR testing.

Over 4400 people have died directly from the vaccine. Do we really want to put that risk on children when they are not at risk to begin with?

1. Please review the data referenced above

a. <https://informedchoicewa.org/news/fast-facts-on-covid-19-vaccine-concerns/>

2. Dr. Peter McCullough, MD. Board certified cardiologist and Doctor of Internal Medicine. I urge the BOH to review this 16 minute video before you make decisions that will systematically destroy Washington's Children.

To whom it may concern:

I would like to give a comment and implore the board to remove mask mandates from schools.

To share factual information, the California OSHA has said "Cloth face covers are not protective equipment and do not protect the person wearing a cover from COVID-19." (<https://dir.ca.gov/dosh/coronavirus/COVID-19-Infection-Prevention-in-Logistics.pdf>)

According to the WHO, "One study suggested children between 5 and 11 years old were significantly less protected by mask wearing compared to adults." They've also said that there is an "absence of strong scientific evidence" and they have very limited data on masking children. They also state that the best interest, health and well-being of the child should be prioritized."

Let's discuss what we know about children and the spread of Covid-19. A January 2021 study involving 100,000 students and staff found that 99.98% of children did not get covid from school. There were 32 reported cases of infection (0.032%) and zero instances of a child infecting an adult. (<https://www.aappublications.org/news/2021/01/08/covid-north-carolina-schools-study-010821>)

Pediatric professors Christele Gras-Le Guej and Regis Hankard, Vice President of the French society of pediatrics and coordinator of Pedstart pediatric clinical research network, respectively, have adamantly stated "Covid-19 is not a pediatric disease. Children must not be subjected to drastic measures, painful to live with, that could disrupt their daily lives, when this microbe really is of little concern to them." (<https://up-magazine.info/le-vivant/sciences/65177-la-covid-19-nest-pas-une-maladie-qui-concerne-les-enfants/?login=true>)

I could share many more instances where masks have proven unnecessary for children.

Are masks harming children? Yes. A German study done in October 2020 with 30,000 mask wearing children found that 68% of the parents reported the following complaints: irritability, headache, difficulty concentrating, less happiness, reluctance to go to school, malaise, shortness of breath, impaired learning, and drowsiness or fatigue. Accelerated respiration, tightness in chest, weakness, and short-term impairment of consciousness were also reported. (<https://www.researchsquare.com/article/rs-124394/v1>)

I have personally seen the negative effects of masks on children. I have elected not to send my kindergarten aged son to public school because of the mask mandates, social distancing mandates and complete disregard for the emotional and psychological health of children in the

schools in the state of WA, but we have close friends who have sent their children to school. One child, in first grade, is told he is not permitted to drink water in school because he cannot pull his mask down. He is threatened with punishment for playing tag outdoors, while wearing a mask. He comes home with headaches and has said he would rather stay home and not attend public school if he has to keep wearing a mask. This is one example of hundreds of children having negative experiences in the schools due to the lack of regard for emotional health of children.

With the DOH guidelines for the 2021-2022 school year recently being updated, myself and many community members are outraged that the restrictions have not been lifted. States across our nation have banned the use of masks and social distancing in schools, yet the state of Washington continues to disregard the factual information and emotional well being of our children. As public employees, funded by taxpayer dollars, schools and the DOH should be basing decisions regarding children as the highest priority, following what the community is asking for and demonstrating by leaving public schools in droves. This will only continue and exponentially increase if the restrictions are not lifted and the testing guidelines are implemented in schools, per the DOH updated guidelines as of May 13, 2021.

Please, I implore you to consider the mental and emotional well-being of children as the highest priority, with the data and science to prove that the mask mandates are not warranted.

Thank you for your time,
Emily Porter

TO: Members of the Washington State Board of Health

From: Patricia Butterfield, PhD, RN
Professor Emerita, Elson S. Floyd College of Medicine and
Dean Emerita, College of Nursing
Washington State University
Spokane, WA

Regarding: May 27th Board of Health Meeting to discuss findings from the preliminary investigation into the termination of Dr. Bob Lutz, former Spokane Regional Health District (SRHD) Health Officer

I urge members of the State Board of Health (BOH) to take the step of scheduling a hearing to determine whether Ms. Amelia Clark, SRHD Administrator, is guilty of failing to obey or enforce provisions of RCW 70.05.50. And at that time of that hearing, if the evidence warrants, use your authority to remove Ms. Amelia Clark from her position.

I have reviewed the preliminary findings in the independent report. If there is anything we have learned over the past year, it is that public health competence matters. Lives are lost when health departments are undermined, either from within or from external stakeholders. The report's findings provide evidence that Ms. Clark failed to demonstrate a basic understanding of personnel procedures in her own organization. She put our community at risk when she attempted to terminate Dr. Lutz without due process. Her reckless and inappropriate actions threw our health department into chaos as COVID19 cases were peaking in our region. Ms. Clark's flagrant misconduct created a climate of uncertainty and fear in Spokane, just at a time when we needed competent leaders (such as Dr. Lutz) at the helm.

I urge you to act boldly and thoughtfully within the scope of your authority. When the time comes and if the evidence warrants, remove Amelia Clark from her position. Send a message to our community that public health matters, due process matters, and the lives of people in the Spokane region matter. Thank you for consideration of my input.

We need to end these lockdowns. All the states that are completely open and have few cases are making our state and other "BLUE" states look like a joke. There is a treatment for covid, a proven treatment plan of hydroxichloriquin, and Ivermectin. There is NO reason to require this experimental vaccine. You cannot require people to get vaccinated. What happened to My Body My Choice.? Or does that only work when it works for "BLUE" agenda?

We need to get back to normal, we have great immune systems that can fight anything if we get back to nature with our health.

Many parents have pulled their kids from public schools and if you require this experimental vaccine you will have many more pulled from school. The vaccine does more harm than good. Look at the CDC website and you will find the harmful side effects of this, also those that have died from this vaccine.

Dear Legislators ,

We have experimental Covid 19 drugs that under Nuremberg convention can not be forced on anyone, especially children. Military tribunals protect that. In years, experimental status goes away.

C19 has a 99.99% survival rate in kiddos. In US history we NEVER exceeded 25 deaths/ drug before recall- swine flu '76. We now have a solid 4,000 dead due to C19 vaxes and 200,000+ serious/crippling injuries.

Hello??? 4,000 and 200,000 casualties for something 99.99% survivable?? On who's watch?

The Facts. The cover up. Which will YOU support on public record?

Tide shifted. Not going so well for Mr Fauci, Gates, or Newsome. Profit Game over. Top 7 people orchestrating pandemic made \$20 billion so far. The curtain of OZ is being lifted. WHO and CDC on mainstream media are unveiled as private, linked, corporate, self-serving entities.

Finances and collusion are reportedly linked to gain of function bio weapon virus and, COINCIDENTALLY, vaccine and test development! The band is warming up, we're going to hear a lot of singing. Masses of peasants and lanterns light the horizon in global unity.

Thousands of Drs WORLDWIDE are joined and advocating a halt to C19 Vax because of 4,000 dead for something 99.99% survivable. More safety data is required-Fact.

Manufacturers and vax clinicians can't be sued-yet. But legality did prevail requiring employers to be liable for damages to employees required to get the C19 vax. Hungry Lawyers are hungry lawyers. It's a time proven bet, when the house of cards falls, the chain of people scape goated- perhaps those in this case requiring/legislating C19 vax, may be gas lighted and held personally responsible by lawyers and/ or masses. It's an INESCAPABLE story. Masses need a scapegoat. In history, it's been those who mandated the rules. History is just history.

It just makes sense to be on the prudent side of the fence supported by Drs, objective real science, conscience, and karma. Makes sense to let real science lead the way, in due time.

We look forward to your personal integrity, and public record of delay for science, doing the right thing for our kids and grandkids.

Respectfully,

Christopher Hansen

Subject: Masks and mandatory vaccines
Date: Thursday, June 3, 2021 11:06:32 PM

External Email

Hello. I have been informed that you will be having a meeting on Wednesday. As I will be working and cannot attend, I would like to email you with some concerns that I would have brought up had I been able to speak in person.

First off, I would like to address you as a person who works in a medical field. Although I am at the lower tier of medical fields, I still do go through training. Something that training never taught me was to wear a mask around sick people. I just had a conversation about this with a doctor earlier today. When have we ever been trained that a thin piece of fabric could protect people from deadly viruses? When have we gone into hospitals in the past and saw everyone wearing masks in case others might be contagious? Never because it was always known that it would be illogical. Even Fauci initially publicly scoffed at the idea of masks then did one of many 180s and suddenly masks were mandatory everywhere. Now, it's just for unvaccinated folks because vaccinated people need protection? If vaccines are effective then why does it matter what unvaccinated people wear or don't wear. By now, it should be clear that we are willing to assume the supposed risk to ourselves and it's our right to do so. There is also plenty of evidence to suggest that masks themselves are making people sick and causing conditions such as "mask mouth".

I also have deep concerns about businesses requiring proof of vaccination as a condition of to go maskless and employers requiring proof of vaccination in the same way. I feel that this will just somersault straight into requiring vaccines for services in general, as a condition of employment (which is already happening here in some cases), and as a condition of education (already happening in higher education). I think the next step will just be vaccine passports which will segway into other forms of tracking and control outside the medical sector. It's pretty clear the direction that things are going in and you have the power to change some of this.

The facts are that the Covid case and death numbers were amped up in various ways. Many non Covid deaths were counted as Covid deaths and not just in the US. As for the number of illnesses, the use of PCR tests might as well render every positive test as null because there is literally no way to know if any of the positive tests were accurate.

Whereas, it's very clear (despite massive censorship of this fact) that people are getting hurt by these vaccines. When before were we ever told that side effects are good? This has led to many feeling like they should not seek treatment for side effects, nor should they report them. Still, the VAERS system has never seen reporting like this. The vast majority of reports are from Covid vaccines. There are over 4,000 deaths reported and hundreds of thousands of adverse reactions reported in the US alone. The EU reporting system is much worse. The UK also has high numbers. All reporting systems are underreported, estimated at only 1-10% of the actual number of adverse reactions. I think that if you really care about public health then it's your duty to start looking at all these side effects. If a vaccine is required and leads to

injury then all parties involved in requiring the vaccine should be held accountable as should those who stood in positions to stop that requirement yet chose not to.

Next, there is the issue of informed consent. From the ingredients, to the lack of FDA approval, to the lack of knowledge of valid and proven safe and proving effective treatments such as Ivermectin and hydroxychloroquine, to the gaslit and basically propagandized knowledge set of "safe and effective" and overly fearful mindset based upon daily relentless onslaughts of fear porn, to the steadily rising number of adverse events, to the ingredients in the vaccines themselves, I would wager that almost nobody had true informed consent before taking this vaccine and still, those getting it are not informed. Those who are truly informed of all these facts are mostly choosing not to get it and by law, this is their right to choose.

As for children, it's extremely clear already that there is more risk to them from the vaccines than from Covid. Which they have essentially zero chance of dying from. This should at all costs never be mandated to our children, our future.

So many laws have been broken over the past year. Both domestic and international laws. Do you want to take part in preventing more laws and civil rights being violated? Or, would you prefer to be a part in protecting them. If you truly want to abide by the greater good, the choice should be abundantly clear.

Thank you for your time.

-Jennifer Cook

Good Morning Washington Board of Health Members,

I won't take too much of your time. Parents across the state can see the writing on the wall when it comes to any mandates coming down the pike. The board of health must uphold all dignity and recognize any mandated covid shot to attend school will be met with great pushback. There is zero chance my children will take this shot. If that means removing my child from tax-payer funded/government run schools then so be it.

By now, you should be able to recognize the sheer politicization of covid—19. With the Fauci e-mails released through a FOIA request it is apparent that nothing adds up and the American people have been lied to time and time again. Our children have suffered enough from the lack of backbones with our "leaders". We have had this shot shoved in our faces at every turn- highway signs, facebook ads, free beer, free doughnuts, and now the latest from Gov. Inslee- a chance to win a million dollars. You've got to be kidding!

We know the truths- covid rarely effects children, asymptomatic spread is not a thing, the shot is available to those that want it. If someone has the shot they have accepted the risk/benefits and can proceed in their daily lives. And for the population who has declined the shot, same, we have accepted the risks/benefits and will proceed with life.

I urge you to decline any school mandated covid shots for kids.

Sincerely,

Cynthia Ives

To whom it may concern:

I am writing to you today to voice my concern as a WA State resident in regards to adding mandatory Covid-19 shots to children's immunization schedules.

Covid-19 is not a childhood disease. The legal ramifications of mandating an experimental EAU biological that is intended for a high risk demographic (not healthy youth) under emergency use are immense. Once full BLA is granted by the FDA I foresee House Bills rolling in with mandates. I am here to express my concern beforehand.

Covid-19 is NOT a childhood disease. This isn't measles, this is a fast mutating RNA virus like the flu that will require additional possibly annual shots.

And unlike the flu Covid is not deadly to youth. The shots are intended for emergency use for high risk (elderly, long term care facility, people that work with covid patients or that work with the high risk population). That's who these shots benefit the most. Children are not the demographic for this virus: <https://www.aarp.org/.../coronavirus-deaths-older-adults>

Children and adolescents account for only 1% of reported coronavirus cases across countries: <https://jamanetwork.com/journals/jamapediatrics/fullarticle/2771181>

The death/IFR rate for kids is 0.001:

<https://www.acsh.org/news/2020/11/18/covid-infection-fatality-rates-sex-and-age-15163>

People over the age of 65 are where the benefits really outweigh the risks for this shot but only after full BLA. To this end, I beg you to keep this off the children's immunization schedules. Thank you.

Concerned,

Jean; Redmond, WA

To Whom it may concern,

As a parent of 3 children in the public education system in Washington State, it infuriates me to hear that there may be a requirement for my children to be vaccinated to attend public school next fall or ever. The public school system is supposed to be made available to any and all who would like to use it. This system would no longer be made available to everyone, if a vaccine (without the right of exemption) is required. As American citizens it is our right to decide what is best in regards to our health and well being. This "right" is rapidly being stripped away from us. No child should be denied a public education ever. If a child is denied a public education because of a vaccine, not only has that child's rights been stripped away, but also his or her privacy. This state prides itself in the slogan "My body, my choice". If this is approved, then the "right to "my body, my choice" becomes a double standard and hypocritical. I beg you not to make this irresponsible decision. Please don't take public education away from my children.

Thank you for your time and consideration,

Subject: Masks, vaccines for kids
Date: Thursday, June 3, 2021 8:40:58 PM

External Email

Dear Board of Health Members:

I am writing to you regards to our upcoming school year.

I just want to say that this last year and a half was a disaster!!! The people in charge of our schools let our kids down big time. Not allowing them to attend school in person, taking their friends away from them with these school closures, taking sports away from our kids, taking life away from our kids. You people who allowed this to take place need to be ashamed of yourselves. This was totally wrong. F.Y.I. kids are not GETTING THIS VIRUS!!!! Look at the CDC web sight and it will show you that kids under 17 are NOT GETTING THIS VIRUS!!!! Let me say that again, KIDS UNDER 17 ARE NOT GETTING THIS VIRUS!!!! The masking does nothing but cause more problems. You are taking away joy, love, laughter, peace and happiness with these totally unnecessary masks. In fact, they are probably causing people to contract COVID.

Vaccines for COVID must not happen to anyone especially our kids. First off, it is NOT a vaccine. It contains NO VIRUL COMPONENT TO IT. Do you understand that? It is not a vaccine. Secondly, people are dying and having adverse reactions from the vaccine. Last I checked, there were over 4,000 people in the U.S.A. alone that have died from getting the vaccine and yet it stays on the market and the government is pushing it on us. Last I heard, when this happens, a "vaccine" should be taken off the market. Third, KIDS ARE NOT GETTING THE VIRUS!!!!!! Forth, the vaccine was for emergency use only but yet the government wants everyone to get it. Let me explain what emergency use means. It means there is no other way to combat a disease or illness. We do have other ways to combat this illness that is much safer and proven to work. They are ivermectin, hydroxychloroquine, and vitamins such as Vitamin C, Vitamin D. Plus getting out with sunshine and exercising. Your home turns into a box of germs because no one is leaving the house. That is why people are getting sick. Staying home and not living. Another big factor, CASES DOES NOT MEAN DEATH!!!! Let me say that again, CASES DOES NOT MEAN DEATH!!! You have a 99.7% of recovering if you contract this virus. Plus the virus cannot be contained because it mutates every time it enters another person. There has never been a "vaccine" for a virus before, NEVER. We don't even have a vaccine for the common cold. I have talked to people who have gotten COVID and everyone has different symptoms. Did I say that CASES DOES NOT MEAN DEATH!!!! Just incase you missed it. The "vaccine" should NOT be given to children or anyone for that matter. It has not been tested like any other vaccine before. There were no animal studies done, no testing for long term side effects, no testing of any kind and yet we are the guinea pigs. Do you get that??? We are being tested with this unproven "vaccine". We have already seen the side effects of millions and yet it's being pushed.

In the past 20 years of giving out our normal vaccines there were only 4 deaths in 20 years. Look at how many for this vaccine in only 3 months, over 4,000 in our country alone.

Oh by the way.....KIDS ARE NOT GETTING THIS VIRUS. If you look on the CDC web sight for COVID,

it's the 65 plus that are at risk. Yet everyone and their mother is treated like they have the virus with unnecessary masks. This is criminal what people are doing to our kids and each other with those stupid wok masks.

Do not make our kids the lab rats. These are our precious children that should be cherished, nurtured, loved, cared for and protected from all evil and wrong doing. We need to keep our children safe, help them to grow up and be good productive adults, teach them to be good citizens, but above all we must protect them from evil men and women who mean to do them harm. I love my kids with all my heart. They are my precious cargo in my car and my home. I would not want anything to happen to them that could have been prevented. This virus is not deadly. It's a lie put on us by the media. Protect our children with all your might, life and heart they are our future.

Sincerely,
Jane M. Rodriguez

External Email

Dear Washington State Board of Health,

I understand you will be meeting to discuss requiring school children to uptake a covid-19 vaccination in order to return to school in the fall. Please stop with this fascism. I know that the word “fascism” just now triggered you, but it is appropriate because in the aftermath of World War II, the entire world came together in agreement that we should never, ever coerce people to undergo medical treatments without ***informed consent***. This thinking was codified into something called the Nuremberg Code, which the entire civilized world adopted.

Stop coercing children to undertake medical treatments that their parents don’t find useful or safe. Psst, everyone who wants the vaccines has, at this point, had an opportunity to take them – and if the vaccines work, they are safe – leave the other people alone.

I am concerned about the current state of emergency that is being upheld by the governor and how it is impacting my children now, and how it will impact them in the new school year in the fall. When will you be discussing this issue again? Forcing medical experimentation upon my children in a school environment is illegal, unlawful and immoral and reprehensible. It is a violation of our God-given, Natural, and Common Law rights, as expressed and confirmed in the American Declaration of Independence, and as reflected in the constitution of this state and the constitution of the United States. Requiring my children to wear a mask to attend school is forcing a medical experiment upon them. There is no scientific data that indicates that wearing a mask will stop or slow the spread of Covid-19; in fact, there are many scientific studies that show masks have no statistically significant effect. I would be happy to forward those studies to you. Please do not further perpetuate this medical experimentation by requiring the Covid vaccine for entry into school in the fall. This is an experimental drug, and can not be forced upon an individual according to the law. Furthermore, every individual must be aware of the risks to make an informed decision. Currently, the risk of the vaccine is more risk to my child than a Covid infection. Each family must be allowed to make these decisions for themselves. This should not be a mandated vaccination. You are losing the trust of the community you serve by these continued measures.

Please do not require the Covid vaccine for children to attend school. The vaccine is causing many injuries in children and our passive vaccine injury reporting system is not catching these.

Additionally, the risk of a child having a severe case of Covid is 1.6 per million. They have more risk of getting struck by lightning! The risk of getting the shot outweighs the risk of a child contracting Covid. Children are not spreading cases asymptotically to adults even in their household- despite the mainstream narrative. A recent study published showed they did not find any cases spread that way, rather from adults to children was found. It does not make sense to vaccinate one patient to possibly protect the health of another. It's not fair to put the children at risk. stats also show you have to vaccinate 136 children to protect one (so 135 have zero benefit and all risk).

Please leave the children out of this. Allow parents to make the best decisions for their families.

Hi there,

With the return of students to full time school next year I am concerned that the untested Covid vax will be required to attend school.

Numerous studies have shown this vax to be unsafe, with side effects ranging from deafness to sterilization to blood clots to death. In addition, not every family has the luxury to turn to home schooling to avoid such things.

I am asking that BEFORE any vaccination requirements are added in order to return to school, that due diligence is done, with objective studies and with common sense. Medical freedom for all, and giving people the freedom to choose what they do with their bodies is paramount to having a free and fair society.

Thank you,

Subject: June 9th Meeting
Date: Thursday, June 3, 2021 6:48:51 PM

External Email

Hello,

I'm writing you with hope that you will read my concerns with regards to making the Covid "vaccine" a requirement for school children.

I realize your June 9th meeting agenda isn't speaking about this, nonetheless I think time is of the essence and it is important you know the wishes we have for OUR children.

These vaccines utilize new biotechnologies that have never been licensed for human use in vaccines before. You will hear that testing was not rushed, that they performed the same level of safety studies as other vaccines. Sadly, that is true. No vaccine on the market today has been put through safety trials of adequate design, length, or scope. While effectiveness studies may go on for years, safety studies last just a few days, weeks, maybe months.

According to the [Public Readiness and Emergency Preparedness \(PREP\) Act](#), the entities and individuals involved in the development, manufacture, testing, distribution, administration, and use of COVID-19 vaccines are **shielded from liability for claims of loss caused** (meaning injuries and deaths), arising out of, relating to, or resulting from administration or use of COVID-19 vaccines. In the event of injury or death, your only recourse is applying to the [Countermeasures Injury Compensation Program \(CICP\)](#) for compensation. The statute of limitations is one year.

Without liability, there's no accountability. Would those working in public health be so eagerly preparing to promote and distribute experimental vaccines if they were responsible for the injuries or deaths caused by those products?

Studies are showing that natural immunity to COVID-19 is long-lasting. [A study published In October](#) finds that exposure leads to the development T-cell immunity. They write, "The observation that many individuals with asymptomatic or mild COVID-19 had highly durable and functionally replete memory T cell responses, not uncommonly in the absence of detectable humoral [antibody] responses, further suggests that natural exposure or infection could prevent recurrent episodes of severe COVID-19." And a [recent study in Nature looking at bone marrow](#) clinches it: "Overall, we show that SARS-CoV-2 infection induces a robust antigen-specific, long-lived humoral immune response in human."

The overall survival rate from COVID-19 infection is greater than 99%, with the majority of people experiencing only mild or moderate symptoms. Many people test positive for the virus but experience no symptoms. A positive test result does not mean someone is sick or

contagious. [Learn more.](#)

It is for these reasons, and so many more that I implore you to use whatever authority you have to ban or block any Covid "vaccine" requirement. DO NOT go along with making our children guinea pigs for the pharmaceutical companies when they ask you to mandate this trash for our children to attend school, please stand up and say NO.

Thank you for your time.

Jill

Please, do not make the covid vaccine mandatory for school age kids, let it be an individual family decision. You need to take into account some families already take extra precaution to build up their child's immune system. The government has NO right to impede on that. Not to mention, the studies and facts show kids are hardly impacted negatively by this virus. Do them a favor to allow their little bodies to learn how to fight virus's rather than injecting them with more toxins that negatively impact them. Before you label me as an anti-vaxxer, you are wrong. I believe in vaccination for the right virus/disease - this is not one!

Have you taken into consideration the other side of your views? We are strongly considering to move out of Washington due to its extreme non-proven tactics during this pandemic.

I urge you to take a reasonable and fair approach and consider ALL sides.

Thanks

Dear board members:

As a Washington parent of school-aged children and someone who cares about all children, I am gravely concerned about the recent expansion of the experimental Pfizer COVID-19 injections to children between the ages of 12 and 15. As you know, these fast-tracked shots are not licensed by the FDA, the manufacturers and administrators bear no liability for deaths and injuries, and testing in this age group was limited to fewer than 2300 children for a median of two months. Our children's risk of serious illness or mortality from a COVID infection is statistically zero, but these investigational biologics pose a known substantial risk in the short term and unknown risks in the long term. There is no substitute for the test of time, which is needed to gather data regarding the long-term potential to cause cancer, impair fertility, mutate genes, or cause autoimmune, neurological, or any other chronic or serious adverse effects.

More concerning is that the public is being told that there is no contraindication for administering COVID shots concurrently with any other vaccine. How can this advice be given in the complete absence of any data supporting the safety of this practice?

Please, do your duty to serve the public; pause this reckless and irresponsible program of performing medical experiments on our children, including targeting those as young as 12 to participate without parental knowledge or consent. It is unethical to continue given that there is simply no medical necessity for people this age to risk an intervention.

Thank you.

Subject: Covid Injections for schools
Date: Thursday, June 3, 2021 8:56:00 AM

External Email

Dear Members of the BOH,

As Biden and Inslee are beginning to put pressure on businesses and schools to require COVID injections for access, I am writing you to ask you to skip the politics and look at the facts. Requiring covid injections for schools not founded in science. Let's look at a few recent studies.

First, requiring covid vaccine for those who have had the virus is unprecedented. No virus in the history of the world has ever conferred inferior immunity to its synthetic vaccine counterpart because the vaccine doesn't actually trigger the entire immune response, only a part of it. This study from October is just one study showing that natural immunity is long term. [https://www.cell.com/cell/fulltext/S0092-8674\(20\)31008-4?rss=yes](https://www.cell.com/cell/fulltext/S0092-8674(20)31008-4?rss=yes)

This one discusses how other corona virus strains are protective <https://directorsblog.nih.gov/2020/07/28/immune-t-cells-may-offer-lasting-protection-against-covid-19/> and this study out of Israel, which confirmed another study out of Belgium shows that natural immunity is conferring immunity in line with that conferred by the injections. <https://www.medrxiv.org/content/10.1101/2021.04.20.21255670v1.full.pdf> The policies being floated of requiring injection by those who have natural immunity are not based in science. There is some evidence that those who have had the natural infection and recovered are at greater risk of side effects from the injection though, and some other recent studies suggesting that injection after natural infection reduces antibodies.

As for the injections, they are not subject to any liability. Thousands of deaths associated with this particular vaccine have been reported, more deaths than for all vaccines over the past 20 years. To require individuals to partake of a medical treatment without liability or true informed consent is unconscionable. These practices, even in the name of "health" are unacceptable. According to the FDA testimony, <https://www.fda.gov/media/144245/download> these injections don't interrupt the spread of the virus and don't prevent someone from contracting the virus. They only may lower the symptoms of the person receiving the injection. Therefore, another person's injection does not provide protection for me. Only mine can.

To that end, these injections were authorized for EUA assuming no suitable treatments for the virus were available. This is not true. Ivermectin is being widely distributed now and in countries where it is being given to the citizens, their death rates and hospitalization rates are plummeting. <https://pubmed.ncbi.nlm.nih.gov/32251768/> News out of the UK shows that deaths are dropping by 75% when Ivermectin is used <https://www.dailymail.co.uk/news/article-9297449/Drug-used-treat-lice-scabies-drug-cut-Covid-deaths-75-research-suggests.html>

And another one: [https://journal.chestnet.org/article/S0012-3692\(20\)34898-4/fulltext](https://journal.chestnet.org/article/S0012-3692(20)34898-4/fulltext) and here is a list of many studies <https://c19ivermectin.com/>

The point is that there are existing treatments available and that reduce the already low mortality rates of the ever mutating covid-19 virus.

There are too many unknowns, rising cases of myocardio episodes in otherwise healthy individuals, unknown effects on fertility, and safe and effective alternative treatments. Injecting all people in WA regardless of previous infection is unsound and unscientific and ignores critical human rights issues like informed consent. Consent can't be given if there is no choice. There is risk with these vaccines and therefore, choice must remain.

I urge the board to reject any efforts to require covid-19 injections for schools or businesses.
Marisa Corless

RE: ACIP sold our children to the drug industry

Dear Board of Health Members:

Over the past several years, we have brought to those occupying your seats our concerns regarding the lack of adequate vaccination safety studies and the corporate-capture of the state and federal agencies that are supposed to be protecting us. We have pleaded with you to take action at the state level when guidelines coming down from the federal level put WA citizens at risk. You have never taken action.

On May 12, 2021, the United States Advisory Committee on Immunization Practices (ACIP) revealed their absolute corruption to the world when they cast a vote so dangerously reckless, they put the lives of our nation's children at risk.

Not only did the ACIP vote to recommend the Pfizer investigational Emergency Use Authorization (EUA) Pfizer shot to children ages 12 to 15 in the absence of medical indication and adequate safety studies, but they also voted to end restrictions around co-administration with other vaccines. They freely admitted there has not been a single clinical trial administering any of the shots with any other vaccine. Not even in animals.

What happens when a 12-year-old child is injected with Merck's Gardasil with its highly reactogenic aluminum AAHS adjuvant in one arm and the Pfizer mRNA shot in the other? What happens when the child's cells begin pumping out genetically altered spike protein in the presence of an adjuvant that is revving up their immune system to go on the attack?

ACIP has no idea. Nobody does.

After the public comment period, during which several citizens expressed their grave concerns over authorizing the shots for this age group and their alarm about co-administration, the ACIP added a bullet point to their slide:

"It is unknown whether reactogenicity is increased with coadministration, including with vaccines known to be more reactogenic, such as adjuvanted vaccines."

And then they voted to allow it.

The next morning, the drug industry's insider magazine Fierce Pharma wrote:

“As revenues for several Big Pharma players slumped to start the year, execs blamed part of the problem on the accelerating COVID-19 vaccine rollout. The Centers for Disease Control and Prevention (CDC) had recommended people don't get another shot within two weeks of their COVID-19 vaccine, hitting sales for key products.

Now, the CDC is doing away with that suggestion entirely in an effort to boost routine immunizations among teens. The move could spell financial rewards for leading vaccine companies such as Merck, GlaxoSmithKline and Pfizer.”

What was the reaction by the WA State Department of Health to the ACIP vote? Their FAQ page on COVID-19 vaccination now states, “People can now get the COVID-19 vaccine within 14 days of other vaccines, including on the same day.”

That's it. No warning, no explaining that safety of co-administration is not known.

This is how our failed public health system operates. Captured agencies make decisions in the best interest of the drug industry, states turn the decisions into blanket statements and policies that falsely imply safety, the information is pushed out to the medical community and the public, and then a mother brings her child to her trusted pediatrician. She is told by the pediatrician—who uses the “presumptive” script taught by the DOH and CDC—that the child is due for several “routine” vaccinations and the Covid shot, and if the mother questions giving them at the same time, she is told that the ACIP now recommends it.

As you read this, a child in this state may be in an office, being injured or killed by the experimental co-administration of a Covid shot with other injections.

Will you take action?

In August of 2020, before any EUA was granted to any of the shots, we petitioned you to convene a committee of knowledgeable frontline practitioners so that existing COVID-19 treatments could be discussed, shared, made known to the medical community and the public, and lives could be saved.

Although you acknowledged the importance of such a committee, you denied our request, saying it was the responsibility of those at the federal level. Almost a year later, people in this state are still dying needlessly because you refused to act.

The federal agencies did not convene a committee and they have been ignoring or denigrating highly effective treatments like ivermectin. Why? Because if they acknowledge or support them, they would have to pull all the EUA's from the shots. They are allowing people to die in order to push their vaccine agenda.

Pfizer and Moderna have now applied for full licensing. Phase III clinical trials have not been completed—and they never will be because they have all been unblinded. Unprecedented numbers of reported adverse reactions and deaths have been reported to VAERS and to every vaccine adverse event reporting system in the world, and yet it is clear the FDA intends to rapidly license the shots, the ACIP will recommend them to children, and manufacturers will move from the liability shield of the PreP Act to the liability shield of the 1986 Act.

Where does that leave WA citizens?

After learning what they have done, do you still have any trust in recommendations coming from the ACIP?

Will you continue to insist that they are experts whose recommendations should be followed? If so, then the board and members of Informed Choice WA have lost what little hope we had remaining in you.

But if you do now understand that we are at a critical juncture of public health history and that drastic changes must be made in order to restore scientific integrity into the public health system, then you could be heroes to every man, woman, and child in this state.

We understand that as a board you are limited in your authority, so we are requesting the following, which fall within your capabilities:

1. Through your network of resources at the BOH and DOH, ensure everyone in the state knows there is no safety data behind coadministration.
2. Do not consider beginning the rule-making process of adding COVID-19 shots to daycare or school requirements.

Please protect our children.

Sincerely,

Bernadette Pajer
ICWA Public Policy Director
On behalf of the Board and Members of ICWA

Subject: Covid Vaccine Concerns

External Email

Dear WA State Board of Health,

I am emailing to express opposition over any future legislation regarding Covid vaccine mandates for both adults and school aged children or any segregation/discrimination practices in public spaces.

These vaccines are currently only approved for emergency use and are considered investigational. Studies show natural immunity makes immunization unnecessary and many people have recovered from Covid. It is also known that having had Covid and getting the vaccine has caused adverse reactions in people. Vaccines are not a one size fits all and many people already have natural immunity. The fact that vaccine manufacturers have no liability for their products (unlike any other product) and are under no obligation to share or be aware of safety concerns is extremely concerning. It is also known that children are at very low to no risk of contracting or spreading Covid. In Washington state there have been no deaths in the 0-19 age group. Any future requirements for this vaccine in schools would not be founded in health or science.

I am asking that you please use whatever power is available to you to prevent discriminatory medical practices by our government, businesses and schools. Medical freedom and bodily autonomy is of utmost importance and must be protected!

Thank you very much!
