

Updated Shift: Benefits vs. Costs

| SHIFT | | |
|----------|----------------------|-----------------|
| Benefits | Deaths averted | 0.039 |
| | LTD averted | 0.043 |
| | Value of LTD prever | \$ 64,303.58 |
| | Value of a life | \$11,600,000.00 |
| | Value of lives saved | \$447,552.89 |
| | less tx costs | (\$75,580.28) |
| | TOTAL Benefits | \$436,276.18 |

| | | |
|-------|--------------------|---------------|
| Costs | costs of screening | \$ 594,241.00 |
| | costs: false(+) dx | \$ 38,938.55 |
| | TOTAL costs | \$ 633,179.55 |

| | |
|--------------------|----------------|
| Benefit/Cost ratio | 0.69 |
| net benefit | (\$196,903.37) |

**This slide reflects the correction of an error in the original presentation. This error affected two key values: the benefit/cost ratio and the net benefit. Meeting participants were notified of the discrepancy and shown this updated slide during the meeting. The information presented in this slide represents the most accurate and up-to-date version of the analysis and supersedes the values that were shown in the original presentation.*
