Good morning,

Thank you for all that you do for our community. May I please ask for your help?

I really wish there was something that we could do to support the children in our community pertaining their right to breathe fresh air. It is so unnecessary that they wear masks at school for this virus that is 99% survival rate in children's age group.

We need to see their smiling faces.

They need to see their friend's smiling faces.

They need to see their teacher's smiling faces.

They need it as part of feeling connection to our community. We need to help their mental health and growing brains receive the air they are entitled to breathe. This is just absurd this has gone on this long. This isn't fair.

Please help end this.

Also,

Please DO NOT enforce Gene Therapy AKA covid inoculation requirements for children in our state. This would be discrimination against me and my family. I know of many other families as well that this would discriminate against as well.

We live in the United States of America. We are entitled to our freedom of making our own personal medical choices. For ourselves and for our children. Personal medical autonomy has decades of established law decided at the Supreme Court. Please watch the attached video for more information about the VAERS coming from Pfizer. Which is very alarming.

<https://resistthemainstream.org/heres-the-pfizer-video-that-got-dr-robert-malone-suspended-off-twitter>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fresistthemainstream.org%2Fheres-the-pfizer-video-that-got-dr-robert-malone-suspended-off-twitter&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1096822e9d15404c321808d9e26d9dc1%7C11d0e>>
/

Please remember that VAERS is a statutory requirement of the fda. How is covid-19 a true state of emergency still when the survival rate is so high?

I have chosen to not be inoculated and contracted covid right after Christmas. And I am ok! My entire family is ok! Everything is ok! Everyone should be allowed to make the personal choice of medical treatment, period. we have natural immunity! Let's focus on natural immunity and healthy hygiene.

Please do not make Gene Therapy AKA, EUA (which has a 99% survival rate) ' Covid Vaccine', a requirement for public schools. Promoting myocarditis (which is a common

side effect of the inoculation) in our youth is completely unethical. The risk simply outweighs any benefit, because what is the benefit? They would still catch and spread virus, so there are absolutely NO benefits.

There is already discrimination happening if my child has a common cold and I call to her school office to let them know she will be absent. They ask right away if she is vaccinated. I ask, "with what?" They say, "covid vaccine." This is no one's business if my child is injected with gene therapy. But once they get an answer from me, they put our situation in a "side A" or "side B" flow sheet. (Brings times back to NO BLACKS ALLOWED AT THIS WATER FOUNTAIN for example) Just like they do with the volunteers at the school district. This is creating MASSIVE SEGREGATION.

The current situation for having a cold and staying home to get well school process is performing unconstitutional discrimination against my family. Religious beliefs and personal medical choices are personal choices. Please set an example in our state to show that we honor our people of America and allow them the freedom that our constitution states we all have!

Lets spread kindness and love and promote healthy hand washing, not discrimination and segregation.

Please help end this.

Thank you for your time.

May God Bless you and your loved ones,

Subject: Local control for lifting mask mandates

External Email

Dear State Board of Health Members and others to whom it may concern,

My name is Erica Teodoro and I am the parent of two students in the Peninsula school district.

I am writing to you today to ask that you please consider giving local control to the Washington school districts as to whether or not to lift mask mandates in schools. Schools around the country are starting to create exit plans for the mask mandates and it seems reasonable that our schools should be allowed to do the same should they see fit.

My kids have noticed a stark decrease in morale at their schools compared to pre-pandemic due in part to teachers having to use precious education time instead to police masking. They didn't sign up for this, they aren't trained for this, and everyone's patience is wearing thin.

Please, help our students get back to the business of growing and learning and thriving in their schools by allowing the individual districts to make the choice to lift mask mandates.

Thank you for your time,

Erica Teodoro

Subject: CURRENT NEWS analysis by Cliff High

External Email

CURRENT NEWS ANALYSIS by CLIFF HIGH

The founder and current leader of the WEF, Klaus Schwab, has been recorded on video claiming at least a 50% 'penetration' of 109 Western republic cabinets, or governments, and at least 5 US States to the gubernatorial level, WA State prominent among those. Jay R Inslee is featured on the WEF membership pages indicating complete ownership, and control of him, and of the government of WA State, by Klaus Schwab's WEF agenda. It was through this coordination of these 109 captured governments, and at least 5 US States, as well as, the Federal government of the US, and the majority of UN working groups, that the Covid global tyranny plan has been pursued.

1.

On 2022.01.29, the Global Revolution began in Canada. It will spread.

2.

The 'pandemic' is over. The People have decided to end it. In support of this process, the People have organized and are sharing the 'receipts' that prove the complicity, and guilt of those under the control of the WEF, and its affiliated organizations. Politicians here in the USA, as well as other Western Republics, will soon be attempting to scrub their on-line records of associations to the WEF, no matter how tenuous. It will not aid them.

3.

A major casualty of War, and especially in War practiced as Revolution, is Secrecy. This Revolution is already yielding documentation that will be used in the trials pending as this Movement proceeds. Persons guilty of committing Crimes against the populace via malfeasance in Public Health institutions, as well as the Laws controlling them, may expect to be prosecuted.

4.

People injected with the 'vaccines' are dying at 3 to 4 times the usual, and historical, normal rates. This will grow with time for these next 3 years. Rates of cancers, and other debilitating conditions are many thousands of percent higher in 'vaccinated' individuals. These facts are becoming understood by the Populace. As this knowledge spreads, as well as the effects of the injections throughout the Populace, it will be expected that the damaged victims will seek recompense from the Guilty.

5.

A wise person, upon recognizing that they had been close enough to the Guilty personalities to have been tainted by association, would prepare now for the inevitable questioning, investigation, and judgment of their role in the proceedings of this pandemic

operation.
6.

The events of this decade are being powered by the demographic and economic Long Waves of History as the Petrodollar collapses the global central banking consortium. As a Legislator, in charge of the Public Purse, this banking system collapse will greatly affect your work and future. The wise person will expect events to become far more chaotic and unsettled as we progress further into this decade.

Dear Sir or Madame,

On February 28th, 2021, Pfizer and the FDA had data from a study on all-cause mortality after the "vaccine" injections, but this data was never released to the public. This data should have stopped the "vaccination" program immediately.

One America Insurance, a company based in Indiana, has actuarial data showing a 40% increase in death rate for young people age 18 and up, after the injections began in 2021.

Reliable data from the Department of Defense on military-age young people has shown that after the injection program began in 2021, there has been a 300% increase (3 times higher) in miscarriages, a 300% increase in cancer, a 1000% increase (10 times higher) in neurological diagnoses that especially affect pilots.

News reports from doctors, nurses, attorneys, and financial experts have discussed this data, and criminal charges have just now begun to be filed against those responsible at the federal level, but this will eventually make its way down to the state level. The level of criminality is such that an economic collapse of Pfizer and other pharmaceutical companies is expected, worse than happened to Enron twenty years ago.

The FDA has a legal definition for a vaccine, but the Covid shot does not comply with this definition because it is from new technology. The term "vaccine" is used to make it more acceptable to the public. The phrase "safe and effective" is a complete lie.

Recently in 2021, embalmers who work in funeral homes, who have had decades of experience, are seeing unusual blood clots that they have never seen before, in patients who have been injected. They have saved hundreds of samples for further study. These clots are as long as a patient's leg and have a white cord as part of the clot structure.

Pharmaceutical companies have some limited liability for patient injuries as a result of the 1986 act passed in Congress and signed by Pres. Reagan, but they have ZERO liability for experimental drugs, such as the Covid injection. Comirnaty was licensed in August 2021, but IT IS NOT AVAILABLE. Only the unlicensed experimental injections WITH NO LIABILITY FOR THE PHARMACEUTICAL COMPANIES are available.

The fraud perpetrated under the endless "emergency powers" in our state is out of control, and must NOT continue with the children and infants. The children, especially, receive NO benefit from the vaccine but incur unacceptable risks for injury.

Regards,

Deanna Burlingame

Good afternoon.

In this email, I will argue that there is also no evidence whatsoever to support a vaccine mandate for 5- to 11-year-old kids, and such a mandate is both unscientific and immoral.

Specifically, I will show that:

1. Covid was already a very mild illness for healthy children, and the Omicron variant looks to be even milder.
2. Kids 5 to 11 years old have never been significant spreaders of SARS-CoV-2 (to other children or adults).
3. Covid infection in kids produces far more robust and long-lasting immunity than the vaccines.
4. More than half of kids in the U.S. (and likely other industrialized countries) have already had Covid-19, and vaccinating kids with natural immunity doesn't provide additional protection.
5. There is no direct evidence that vaccines reduce severe illness, hospitalization, or death in 5- to 11-year-old kids. This is even more true with Omicron.
6. The Covid vaccines do not prevent transmission of the virus (especially with the Omicron variant).
7. There is already concerning evidence of harm from the vaccines in 5- to 11-year-old kids—and the long-term effects are unknown.
8. The mandates will cause serious and lasting harm to unvaccinated children.

#1: Covid was already a very mild illness for healthy children, and Omicron looks to be even milder

We've known since the beginning of the pandemic that the vast majority of Covid-19 cases in healthy children 5 to 11 years old are extremely mild.

According to the Centers for Disease Control and Prevention (CDC)

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2F covid.cdc.gov%2F covid-data-tracker%2F%3FCDC_AA_refVal%3Dhttps%253A%252F%252Fwww.cdc.gov%252F coronavirus%252F2019-ncov%252Fcases-updates%252Fcases-in-us.html%26utm_campaign%3DChris%2520Kresser%2520General%2520News%26utm_source%3Dhs_email-ujih6hHRI6z1Ngk4jTJH7craQ-eRu4H_83KeRqEJ_xoqK-NIKEQgpAcd3lChLvHXaBrJX%23demographics&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1c208bb83

us.html%26utm_campaign%3DChris%2520Kresser%2520General%2520News%26utm_source%3Dhs_email-ujih6hHRI6z1Ngk4jTJH7craQ-eRu4H_83KeRqEJ_xoqK-NIKEQgpAcd3lChLvHXaBrJX%23demographics&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1c208bb83

, there have been just 216 deaths in this age group since the start of the pandemic. This represents only 0.03% of the total Covid-19 deaths, despite the fact that 5- to 11-year-old kids comprise almost 9% of the population.

With 28,384,878 kids in this age group, that's a mortality rate of 0.0008%. Put another way, at worst, a child 5 to 11 years old has a 1 in 131,411 chance of dying from Covid-19.

But even this very low number is likely to be a significant overestimate for healthy children for two reasons.

The first is that Covid deaths have almost certainly been over-counted in the U.S. and other industrialized countries because of how they are classified. For example, say a child with a pre-existing leukemia diagnosis is admitted to the hospital for issues related to their disease. The child tests positive for SARS-CoV-2 upon admission, does not develop any signs or symptoms of Covid-19 infection, but later dies due to complications of leukemia. This will be classified as a Covid-19 death—even though, in this case, Covid-19 likely had nothing to do with the child’s passing.

The second reason is that the majority of hospitalizations and deaths in 5- to 11-year-olds occur in children with pre-existing health conditions. A study by the CDC back in September 2020

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fmmwr%2Fvolun-ujih6hHRI6z1Ngk4jTJH7craQ-eRu4H_83KeRqEJ_xoqK-

NIKEQgpAc d3lChLvHXaBrJX&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1c208bb83f1c4232e5ad08d9 found that, among 121 childhood deaths related to Covid-19, 75% had an underlying health condition. Another study by the CDC

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fcoronavirus%2Fncov%2Fcovid-data%2Fpdf%2Fcovidview-10-02->

2020.pdf%3Futm_campaign%3DChris%2520Kresser%2520General%2520News%26utm_source%3Dhs_en
-ujih6hHRI6z1Ngk4jTJH7craQ-eRu4H_83KeRqEJ_xoqK-

NIKEQgpAcd3lChLVHxAbRjX&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1c208bb83f1c4232e5ad08d9 found that 53% of kids hospitalized for Covid-19 had at least one pre-existing condition,

the most common being obesity (45%), asthma (14%), and neurological conditions (13%). Yet another large, international review of 14 studies

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.pharmacytimes.com%2Fview-with-pre-existing-conditions-experience-more-severe-covid-](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.pharmacytimes.com%2Fview-with-pre-existing-conditions-experience-more-severe-covid-19-infection%3Futm_campaign=pharmacytimes%2Futm_medium=email%2Futm_source=gmail)

19%3Futm_campaign%3DChris%2520Kresser%2520General%2520News%26utm_source%3Dhs_email%2
-ujih6hHRI6z1Ngk4jTJH7craQ-eRu4H_83KeRqEJ_xoqK-

NIKEQgpAcd3lChLvHXaBrJX&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1c208bb83f1c4232e5ad08d9
covering almost 20,000 children found that kids with pre-existing conditions were over

25 times more likely to experience severe symptoms from Covid-19 infection than healthy kids.

The point here is not that kids with pre-existing conditions don't deserve our consideration. Of course they do! The question I am trying to answer in this email is whether the vaccines should be mandated for all 5- to 11-year-old children, including healthy ones. And to do that properly, we have to know what the risk is for healthy children specifically.

Unfortunately, the CDC does not routinely distinguish between healthy kids and kids with pre-existing conditions in their reporting of Covid-19 hospitalizations and deaths. But some other industrialized countries do.

For example, a recent study out of Germany

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2Ffigure-data-suppl-ujih6hHRI6z1Ngk4jTJH7craQ-eRu4H_83KeRqEJ_xoqK-)
[figure-data-suppl-ujih6hHRI6z1Ngk4jTJH7craQ-eRu4H_83KeRqEJ_xoqK-](#)

NIHEQgpAc d3lChLvHXaBrJX&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1c208bb83f1c4232e5ad08d9
looked at just over 400,000 healthy 5- to 11-year-old kids with no pre-existing conditions

who tested positive for Covid-19. They found:

- * A rate of hospitalization of 8.5 per 100,000 (~1 in 11,750)
- * A rate of ICU admission of 2 per 100,000 (1 in 50,000)
- * A rate of death of ZERO (there was not a single death in this age group)

This gives us a much better idea of what we can expect in terms of the risk of

hospitalization and death in healthy kids in this age group.

And all of the early data we have so far suggest that Omicron is far milder than all previous variants.

For now, it's enough to say that if the current trends hold, we should expect the risk of hospitalization and death from Covid-19 in healthy children—which is already incredibly low—to be lower still in the future.

When we consider that:

- * Covid-19 was already an extremely mild illness for healthy kids 5 to 11 years old
- * Hospitalizations and deaths have been over-counted
- * Omicron appears to be far milder than previous variants

... we get a current risk of serious outcomes like ICU admission or death in healthy 5- to 11-year-old kids that is minuscule.

#2 Kids have never been significant spreaders of SARS-CoV-2 (to other children or adults)

Some advocates of vaccine mandates have argued that, while Covid-19 is a mild illness in kids, we should vaccinate them anyway in order to protect those at the highest risk, like the elderly and individuals with pre-existing conditions.

In order for this argument to be valid, two things would need to be true:

1. We'd need evidence of significant child-to-adult and child-to-child transmission of Covid-19.
2. We'd need evidence that the vaccines prevent, or at least significantly reduce, the transmission of SARS-CoV-2.

In fact, neither of those is the case.

Studies have now shown that kids under 10 years old rarely transmit Covid-19

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.sciencedaily.com%2Frelease-ujih6hHRI6z1Ngk4jTJH7craQ-eRu4H_83KeRqEJ_xoqK-](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.sciencedaily.com%2Frelease-ujih6hHRI6z1Ngk4jTJH7craQ-eRu4H_83KeRqEJ_xoqK-NIKEQgpAcD3lChLvHXaBrJX&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1c208bb83f1c4232e5ad08d9)

Given that neither of these things is true, the argument that we should vaccinate kids to protect the vulnerable has no scientific basis.

#3: Covid infection in kids produces far more robust and long-lasting immunity than the vaccines

Another argument I've heard to justify a massive vaccination campaign for 5- to 11-year-old kids is that the vaccines provide more robust immunity than a natural infection and that because of this, the vaccines will "end the pandemic."

Numerous studies have now shown that this is not the case, and, in fact, the opposite is true: kids who have a Covid-19 infection go on to develop much stronger, more lasting, and broader immunity against future SARS-CoV-2.

A new, peer-reviewed study published in Nature Immunology on December 22

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nature.com%2Farticles%2F2021-01089-](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nature.com%2Farticles%2F2021-01089-8%3Futm_campaign%3DChris%2520Kresser%2520General%2520News%26utm_source%3Dhs_email%26-ujih6hHRI6z1Ngk4jTJH7craQ-eRu4H_83KeRqEJ_xoqK-NIKEQgpAcD3lChLvHXaBrJX&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1c208bb83f1c4232e5ad08d9)

8%3Futm_campaign%3DChris%2520Kresser%2520General%2520News%26utm_source%3Dhs_email%26-ujih6hHRI6z1Ngk4jTJH7craQ-eRu4H_83KeRqEJ_xoqK-

NIKEQgpAcD3lChLvHXaBrJX&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1c208bb83f1c4232e5ad08d9 found that both the innate (initial antibody response) and adaptive (later T-cell response) immune reaction to SARS-CoV-2 is much stronger in children than in adults.

In other words, kids who get Covid-19 mount a more effective and robust immune response to the disease than adults do. What's more, this immune response lasted throughout the entire length of the study period—which was nearly one year—and it appeared to protect them against multiple SARS-CoV-2 variants.

The authors speculate that increased immunity to coronaviruses that cause the common cold, and are cross-reactive with SARS-CoV-2, may be part of the reason that children are more protected from Covid-19 than adults.

From the study:

"□□Conclusion, we showed that children display a characteristically robust and sustained adaptive immune response against SARS-CoV-2 with substantial cross-reactivity against other hCoVs [human coronaviruses]."

Given how remarkably low the risk of serious illness is in 5- to 11-year-old kids, and given how strong and long-lasting their immune response is to natural infection, wouldn't it make more sense to simply allow healthy kids in this age group to get Covid-19—especially now that the Omicron variant is becoming dominant—rather than expose them to vaccines with uncertain benefits and concerning side effects (more on both of these points below)?

#4: More than half of kids in the U.S. (and likely other industrialized countries) have already had Covid-19

At the end of May of this year, the CDC estimated

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fcoronavirus%2Fncov%2Fcases-](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fcoronavirus%2Fncov%2Fcases-updates%2Fburden.html%3Futm_campaign%3DChris%2520Kresser%2520General%2520News%26utm_s-ujih6hHRI6z1Ngk4jTJH7craQ-eRu4H_83KeRqEJ_xoqK-NIKEQgpAcD3lChLvHXaBrJX&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1c208bb83f1c4232e5ad08d9)

updates%2Fburden.html%3Futm_campaign%3DChris%2520Kresser%2520General%2520News%26utm_s-ujih6hHRI6z1Ngk4jTJH7craQ-eRu4H_83KeRqEJ_xoqK-

NIKEQgpAcD3lChLvHXaBrJX&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1c208bb83f1c4232e5ad08d9 that 36% of all children had been infected with SARS-CoV-2. That estimate was made 16 months into the pandemic. If we adjust that estimate for the current time frame (22 months), we get 49.8% or roughly half of U.S. children.

However, the CDC estimate was performed before the emergence of the Delta and Omicron variants, both of which are significantly more transmissible than prior variants. Therefore, it is highly likely that the rate at which kids were getting infected between May 2021 and now is significantly higher than during the first 16 months of the pandemic. This means that more than half of U.S. children have natural immunity against Covid-19.

The Nature Immunology paper I just mentioned above clearly indicates that natural immunity to Covid-19 is especially robust in children.

And so far, there is little convincing evidence that vaccinating someone who has already been infected offers any benefit.

For example, a study published in June 2021 by Cleveland Clinic

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2Ffigure/2020/05/11/2020.05.11.20094441v1.pdf&contextmenu=open&format=raw>
-ujih6hHRi6z1Ngk4jTJH7craQ-eRu4H_83KeRqEJ_xoqK-

NIKEQgpAc d3lChLvHXaBrJX&data=04%7C01%7Cwsboh%40sb oh.wa.gov%7C1c208bb83 of almost 53,000 people found that vaccinating people with natural immunity (i.e., those who had already been infected with SARS-CoV-2) did not confer additional protection. Most importantly, there was not a single case of reinfection among the 1,359 previously infected, unvaccinated subjects in the study.

The fact that most kids have already had Covid-19 and thus already have immunity to it, and that vaccinating people who've already been infected doesn't strengthen their protection against the virus, casts even further doubt on a universal vaccine campaign for 5- to 11-year-olds.

#5: There is no direct evidence that vaccines reduce severe illness, hospitalization, or death in 5- to 11-year-old kids

Severe illness in kids is so rare that there wasn't a SINGLE case of severe Covid-19 or a SINGLE death from Covid-19 in the 2,268 kids that Pfizer studied to obtain their Emergency Use Authorization (EUA)

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Femergency-preparedness-and-response%2Fcoronavirus-disease-2019-covid-19%2Fcomirnaty-and-pfizer-biontech-covid-19-vaccine%3Futm_campaign%3DChris%2520Kresser%2520General%2520News%26utm_source%3Dhs_email-ujih6hHRI6z1Ngk4jTJH7craQ-eRu4H_83KeRqEJ_xoqK-NIKEQgpAcD3lChLvHXaBrJX&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1c208bb83f1c4232e5ad08d9...>
by the CDC.

Because there were no significant adverse outcomes from Covid-19 in the trial, Pfizer had to estimate the potential benefit by looking at the antibody response generated by the vaccine in the kids' blood.

There are several problems with this. First, antibodies are a poor predictor of clinical response to Covid-19

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.npr.org%2Fsections%2Fhealth-shots%2F2021%2F08%2F28%2F1031287076%2Fantibody-tests-should-not-be-your-go-to-for-checking-covid-immunity%3Futm_campaign%3DChris%2520Kresser%2520General%2520News%26utm_source%3Dhs_email-ujiH6hHRi6z1Ngk4jTJH7craQ-eRu4H_83KeRqEJ_xoqK-

NIKEQgpAc3lChLvHXaBrJX&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1c208bb8
. Second, since there were no cases of severe Covid-19 in kids in this study, Pfizer had
no idea what antibody level would be protective against severe infection.

This means that any claims you've seen that the Pfizer vaccine is 90% effective are misleading because this only refers to an antibody response in the blood from the vaccine and not actual protection against severe illness, hospitalization, or death.

Yes, the massive campaign to vaccinate 5- to 11-year-old kids is based on a small study of 2,268 kids in which the vaccines did not prevent a single case of severe Covid-19 or a single death and demonstrated only an elevated antibody response in those that received the vaccine.

#6: The Covid vaccines do not prevent transmission of the virus (especially with the Omicron variant)

Even before the emergence of the Omicron variant, we already knew that the Covid vaccines do not significantly reduce transmission of the virus. Unlike the measles or polio vaccines, they do not provide “sterilizing immunity”—that is, they don’t keep people from getting the virus or spreading it to others.

CDC Director Rochelle Walensky disclosed this back in August 2021 in an interview with Wolf Blitzer on CNN

[illegible]

"They [the vaccines] continue to work well with 'Delta' with regard to severe illness and death, but what they can't do anymore is prevent transmission." [Emphasis added]

But in countries where Omicron has become the dominant variant, we have even less reason to believe that the vaccines do anything at all to reduce transmission.

Data out of Ontario, Canada has been issuing detailed reports on cases. You can see in the chart below that, as of late December, the number of Omicron cases per 100,000 people is virtually identical in the unvaccinated, partially vaccinated, and fully vaccinated:

Also, a preprint study out of Denmark

https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2Fujih6hHRi6z1Ngk4jTJH7craQ-eRu4H_83KeRqEJ_xoqK-NIKEQgpAcD3lChLVHXaBrJX&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1c208bb83f1c4232e5ad08d9 shows that vaccine effectiveness against Omicron drops to nearly zero just over two months after peak protection (14 days after the second dose). Even more disturbingly, the vaccines go into negative effectiveness—meaning those who were vaccinated were more likely to contract Covid-19—3 months after peak protection.

Here's the key figure from that study. The blue dots represent vaccine effectiveness against Delta, and the green dots/bars represent vaccine effectiveness against Omicron. When the dot is above the horizontal line, effectiveness is positive. When it's below the line, it's negative.

Finally, we have data from the U.K.'s "SARS-CoV-2 variants of concern and

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fassets.publishing.service.gov.uk%2Fgovernment/uploads/system/uploads/attachment_data/file/97861/briefing-33.pdf%3Futm_campaign%3DChris%2520Kresser%2520General%2520News%26utm_source%3Dhs_email%26utm_medium%3Demail%26utm_content%3DUjijh6hHRI6z1Ngk4jTJH7craQ-eRu4H_83KeRqEJ_xoqK-NIKEQgpAcdd3lChLvHXaBrJX&data=04%7C01%7Cwsboh%40sbob.wa.gov%7C1c208bb83f1c4232e5ad08d9

variants under investigation in England, Technical briefing 33

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fassets.publishing.service.gov.uk%
briefing-
33.pdf%3Futm_campaign%3DChris%2520Kresser%2520General%2520News%26utm_source%3Dhs_email
-ujih6hHRI6z1Ngk4jTJH7craQ-eRu4H_83KeRqEJ_xoqK-

"indicating that even with a booster, symptomatic protection against Omicron wanes significantly after just 10 weeks:

“Among those who received an AstraZeneca primary course, vaccine effectiveness was around 60% 2 to 4 weeks after either a Pfizer or Moderna booster, then dropped to 35% with a Pfizer booster and 45% with a Moderna booster by 10 weeks after the booster. Among those who received a Pfizer primary course, vaccine effectiveness was around

70% after a Pfizer booster, dropping to 45% after 10-plus weeks and stayed around 70 to 75% after a Moderna booster up to 9 weeks after booster.”

Frankly, these are remarkable data that raise questions about the effectiveness of the current vaccines against Omicron for people of all ages, not just 5- to 11-year-old kids.

It’s clear that we are not in the same situation today that we were in when the vaccines were initially developed. Omicron is very different from Alpha, which was the dominant strain when the vaccines were released. And as these studies clearly show, these vaccines aren’t as effective against Omicron as they were against earlier variants.

At best:

- * Two shots of Pfizer provide just over 50% effectiveness for about a month; that drops close to zero just after the second month and goes deeply negative before the third month.

- * Two shots of Moderna provide just under 50% effectiveness for about two months; that drops to zero in the third month, and into negative territory shortly after that

- * A booster provides an additional 2.5 months of partial protection (below 45% for all but people who received two shots of Pfizer plus a Moderna booster).

If we were starting out with the current vaccines today, with Omicron, that’s the level of protection they would provide. We’d have to start giving boosters just 2–3 months after the initial shots and then give a booster every 2–3 months after that. Does that make sense, given how mild Omicron is for healthy kids (and most adults)?

It’s worth noting that most of these data regarding Omicron infections and vaccination status are from adults, not children, because the vaccines have only recently been offered to 5- to 11-year-old kids. But there is no reason to believe that vaccines will be more effective against Omicron in children than they are in adults (and, in fact, there are reasons to believe they would be less effective, as I’ve described earlier in this email).

#7: ☐☐ This is already concerning evidence of harm from the vaccines in 5- to 11-year-old kids—and the long-term effects are unknown

Despite the incredibly low risk that Covid-19 poses to healthy children, the fact that over 50% of kids have already had Covid, and that natural immunity is robust and durable, some still might argue that vaccinating children makes sense.

After all, if we can save even one life with the vaccines, shouldn’t we do that?

Certainly, if we knew without a doubt that 1) vaccinating every 5- to 11-year-old child would prevent even a small number of severe illnesses and deaths, and 2) the vaccines were 100% safe and would not cause any adverse events, then this would be a strong argument.

However, we still don’t know that vaccinating children this age actually reduces severe illnesses or deaths. All we know is that the vaccines induce an antibody response.

And we already know that the vaccines are not 100% safe and are producing a significant number of adverse events in children 5 to 11 years old. This should not be surprising. All medical interventions have potential side effects and risks, and the Covid vaccines are no exception.

The CDC’s own data show harm for the vaccines—despite Director Walensky’s denial

According to the CDC's data, as of December 9, 2021, there have been 3,233 reports of adverse events in kids 5 to 11 years old from the Covid-19 vaccines, including 14 reports of myocarditis (8 of which have already met the CDC criteria for a vaccine-induced myocarditis case).

It's worth pointing out that myocarditis is only one of several possible side effects that have been observed with the Covid-19 vaccines

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2Fujih6hHRI6z1Ngk4jTJH7craQ-eRu4H_83KeRqEJ_xoqK-NIKEQgpAcD3lChLvHXaBrJX&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1c208bb83f1c4232e5ad08d9, which include arthritis, autoimmunity, acute liver and kidney injury, thyroiditis, and more.

It's also important to know that the Vaccine Adverse Event Reporting System (VAERS) is imperfect, and adverse effects are often underreported. For example, a 2001 study

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Facademic.oup.com%2Faje%2Farticle-ujih6hHRI6z1Ngk4jTJH7craQ-eRu4H_83KeRqEJ_xoqK-NIKEQgpAcD3lChLvHXaBrJX&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1c208bb83f1c4232e5ad08d9 found that less than half of cases of rotavirus vaccine-associated intussusception (severe intestinal disorder) were successfully reported to VAERS. And a 2020 study <https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedium.com%2Fmicrobial-instincts%2Funderreporting-and-post-vaccine-deaths-in-vaccine-adverse-event-reporting-system-vaers-explained-14fe22b2a65f%3Futm_campaign%3DChris%2520Kresser%2520General%2520News%26utm_source%3DH found that the reporting sensitivity for anaphylaxis (severe allergic reaction) and Guillain-Barré syndrome (severe nerve disorder)—both of which have been seen with the Covid-19 vaccines—ranged from 12%–76%.

There are at least 2 reasons to believe that underreporting of side effects for the Covid-19 vaccines is at least as prevalent as the studies above suggest—and probably more:

- * Many doctors and nurses are afraid to report side effects of the vaccines because of the current polarized political climate.
- * The vaccine program for 5- to 11-year-olds began only recently, and there's often a lag time between receiving the vaccines, side effects, and reporting of those side effects.

Nevertheless, let's be generous and assume that the underreporting of side effects from the Covid-19 vaccines in VAERS is only 0.5, or one-half. This would mean 6,466 adverse events reported from 7,141,428 doses of the vaccine in 5- to 11-year-olds, or a risk of a vaccine-related adverse event of 1 in 1,104.

This compares with (according to the German study I mentioned above) a risk of hospitalization of 1 in 11,750, a risk of ICU admission of 1 in 50,000, and a risk of death of zero from Covid-19 in a sample of 400,000 kids.

To make it as clear as possible: these data suggest that, for healthy kids 5 to 11 years old, there is a much higher risk of an adverse event from the vaccine than there is of preventing a hospitalization, ICU admission, or death from Covid-19.

You might argue, "Well, if those adverse events from the vaccine are mild, what does it matter?" That's a reasonable question to ask. However, many of the side effects reported to VAERS are in the moderate-to-severe range. Most people won't bother with the time or hassle required to file a VAERS report if they simply had a sore arm for a couple of

days.

OpenVAERS

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fopenvaers.com%2Fcovid-data%3Futm_campaign%3DChris%2520Kresser%2520General%2520News%26utm_source%3Dhs_email%-ujih6hHRi6z1Ngk4jTJH7craQ-eRu4H_83KeRqEJ_xoqK-

NIKEQgpAc3lChLvHXaBrJX&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1c208bb83f1c4232e5ad08d9 has been diligently reporting on the raw VAERS data throughout the pandemic. According to their website, there have been 983,756 Covid vaccine-related reports submitted to VAERS as of December 17, 2021 across all ages. Within the 5- to 11-year-old age group, these include:

- * 2 deaths
- * 90 hospitalizations
- * 331 urgent care visits
- * 772 doctor's visits
- * 2 cases of Bell's Palsy
- * 3 cases of anaphylaxis

These are clearly not mild side effects, and together with the CDC's data on myocarditis risks, there is enough evidence to warrant concern about both the short- and long-term effects of these vaccines—especially since they are being given to healthy children with their entire lives ahead of them.

In addition to the known risks above, there are also the unknown risks. While mRNA vaccines have been studied for many years, they are new, experimental therapies in humans with no long-term safety data. We simply don't know the long-term risks of these vaccines.

#8: The mandates will cause serious and lasting harm to unvaccinated children

So far, we've focused on the risks and benefits for 5- to 11-year-olds receiving the Covid vaccines.

But if these vaccines are mandated as a condition of attending schools in person, as some districts in the U.S. and abroad have already done, we also must consider the potential harm that children who remain unvaccinated—for any reason—may experience as a result of not being able to go to school.

An unvaccinated child will be punished by withholding in-person education and contact with their peers and teachers. This is a far higher risk than a healthy child faces from contracting Covid-19.

School closures have already caused untold harm to children—some of which may be lifelong. As Dr. Vinay Prasad of UCSF has argued, “school closure was the greatest self-inflicted wound of the pandemic

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fbrownstone.org%2Farticles%2Fh
could-they-have-done-this-to-the-
children%2F%3Futm_campaign%3DChris%2520Kresser%2520General%2520News%26utm_source%3Dhs
-ujih6hHRi6z1Ngk4jTJH7craQ-eRu4H_83KeRqEJ_xoqK-
NIKEQgpAc3lChLvHXaBrJX&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1c208bb83f1c4232e5ad08d9
,"

As evidence for this, we've seen a disturbing rise in mental and behavioral health issues like anxiety, depression, and obsessive compulsive disorder in children. A study published in March 2021

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ncbi.nlm.nih.gov%2Fpmc%2Fuih6hHRI6z1Ngk4iTJH7craO-eRu4H_83KeRqEJ_xogK-

NIKEQgpAcd3lChLvHXaBrJX&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1c208bb83f1c4232e5ad08d9 documented a wide range of harms experienced by children during lockdown (which would be similarly experienced by kids excluded from in-person education because of their vaccination status):

- * An increase in stress and neuroinflammation
- * Rising rates of anxiety, depression, and psychosis
- * Weight gain and poor diet
- * Potential long-term effects caused by removal from normal social development context
- * Rising social inequalities
- * Multiple impacts from lack of play

The list goes on and on. But even studies like this one, which can take months to research and publish, are not documenting the full effects. Public health departments, school counselors, and mental health professionals around the world are reporting deeply disturbing patterns.

This is a terrifying and horrific statistic that should be sounding the alarms on the impact of keeping kids away from school and isolating them from their peers and other important people in their lives.

We've also seen disturbing examples of unvaccinated children being shamed and forced to justify their status in front of the class—a disgusting and scientifically baseless (as you now know) tactic designed to force them into compliance.

Is this the world that we want to live in, where parents are forced to decide between giving their children an unnecessary, ineffective, untested, and unsafe vaccine with both known and unknown adverse effects, so the kids can continue to participate in a normal, healthy life, or not give their kids the vaccine and remove them from many if not most of their typical activities, including attending school in person, eating out at a restaurant, or playing on a sports team?

We do not have to take this path.

Other countries have chosen not to. For example, the U.K.'s expert body the Joint Committee on Vaccination and Immunisation (JCVI) has decided not to vaccinate healthy 5- to 11-year-old children

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.theguardian.com%2Fsociety-set-to-recommend-vaccinating-vulnerable-five--to-11-year-olds%3FCMP%3DShare_AndroidApp_Other%26utm_campaign%3DChris%2520Kresser%2520General%2520-ujih6hHRI6z1Ngk4jTJH7craQ-eRu4H_83KeRqEJ_xoqK-NIKEQgpAcd3lChLvHXaBrJX&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1c208bb83f1c4232e5ad08d9 (though they did approve vaccination for kids in this age group with underlying health conditions).

Even if we decided to make the vaccines available for healthy kids in this age group—which I don't think is an evidence-based decision, for the reasons I've laid out above—there's absolutely no basis for making them mandatory.

- * They do not prevent transmission, especially with Omicron.
- * There is no direct evidence that they reduce the risk of hospitalization or death.
- * The risk of serious illness in healthy kids is extremely low (and likely even lower with Omicron).
- * Over half of kids have already had Covid-19 and have robust and lasting immunity. There is no evidence that vaccinating kids with natural immunity provides additional protection.

* There is already evidence of harm from the vaccines.

As parents and caregivers, we have a moral and ethical obligation to safeguard the health and well-being of our children. Mandating the Covid vaccines for 5- to 11-year-olds not only fails to achieve this goal, but it works directly against it in numerous ways.

Thank you for supporting the lives of our children and voting NO on mandating Covid-19 vaccine for them.

Sincerely,
Peggy Martinez

I oppose the proposed WAC's 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against covid-19 injections as part of the school immunization requirements using WAC 246-105.

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

State Board of Health members,

Please refer to the attached document that has been submitted to your BOH at least twice, and now another time from myself.

Do Not subject our children to this unknown, untested, experimental gene-therapy injection that has proven to be quite injurious to thousands. Our children are at extremely low risk for Covid, and it is up to the Parents, not some BOH to decide whether or not their children are to be experimented upon.

I am requesting that this pdf document and my remarks be made official comment to your TAG meeting tomorrow.

Concerned citizen & advocate for all Medical Freedoms,

Sue Coffman

*Informed*CHOICEWA.org

Date: January 7, 2021

To: The Washington State Board of Health Members and COVID-19 TAG

From: The Board and Members of Informed Choice WA

Dear Board of Health and TAG Members:

You are facing what may prove to be the most important decision you will ever face as a member of the board or a group, or perhaps in your life.

The mRNA and DNA COVID-19 shots are unlike any other vaccines given before. The global push for their uptake and the volume of reported adverse reactions and deaths following administration are unprecedented. The hundreds of thousands of medical and scientific professionals globally standing up and speaking out against the response to COVID and to the shots is unprecedented, as is censorship on scientific debate. When this nation's top doctors and scientists are being kicked off of social media platforms and being fired from their jobs for daring to speak on their findings and science critical of current policies, it is clear something has gone terribly wrong.

The CDC acknowledges the shots do not prevent infection or transmission and that any protection afforded fades rapidly, yet they refuse to abandon their push for increased uptake and boosters, and they refuse to promote existing early treatment protocols or acknowledge the mountain of evidence of the superior safety and effectiveness of naturally-acquired immunity. The systemic capture of federal agencies by the drug industry and globalists has never been more obvious.

Public Health in the U.S. is currently suffering from a lack of checks and balances and a dangerous dilution of critical facts. If every citizen were to watch the FDA's Vaccine and Related Biologicals Advisory Committee (VRBAC) meetings and to read the entirety of the clinical trial submissions to the FDA and the injury and death reports filed with Pfizer and VAERS, they would understand the experimental nature of the COVID shots and the known and suspected risks. They would question the clinical trial irregularities, the buried data, the lack of independent evaluation, and the high levels of conflicts of

interest. But most do not. Votes for recommendation are made by federal entities despite the lack of scientific justification and the details of the meetings are not incorporated into the language passed down to citizens. The messaging becomes, “The vaccines are safe and effective and recommended by the CDC.” This simplistic false messaging creates division at all levels of society, undermines fully informed consent, violating federal regulations and human rights declarations.

If after the past two years of witnessing the erratic federal response to COVID you still have faith in federal recommendations, we ask you to consider one clear example that reveals the federal agencies and committees do not deserve your trust. In the absence of a single co-administration safety study, the ACIP approved and the CDC actively promotes this message:

“COVID-19 vaccine and other vaccines may be administered on the same day.”

This is not science. This is not safety. This is not in the best interest of vaccine recipients. This is using Americans, especially our children who are most impacted, as unwitting test subjects. This is human experimentation without informed consent. This is criminal.

We are asking you today to honor the Precautionary Principle and First Do No Harm. We are asking you to dismantle the TAG, to halt rulemaking consideration for adding COVID shots to school requirements, and to adopt our Rulemaking Petition for a new rule that would prohibit mandating Emergency Use Authorized products and licensed products that lack completed Phase 3 trials.

Attached is our preliminary response to the “Criteria for Reviewing Antigens for Potential Inclusion in WAC 246-105-030” that supports our requests. There is far more scientific and medical information available. We hope this is just the beginning of your reviewing the critically important information you have likely been missing until now.

Sincerely,

The ICWA Board

Bernadette Pajer, Yael Kantor, Heidi Hartnell, Angela Dye

**Informed Choice Washington Presents:
A review of the COVID-19 shots
(Pfizer, Moderna, Janssen)
using the Washington State Board of Health's
"Criteria for Reviewing Antigens for Potential Inclusion in
WAC 246-105-030"**

<https://sboh.wa.gov/Portals/7/Doc/Publications/ImmunizationCriteria-Update2017-Final.pdf>

Before proceeding, it must be noted that the COVID-19 shots currently available do not meet the definition of "immunizing agent" per WAC 246.105.020(13), which states:

"Immunizing agent" means any vaccine or other immunologic drug licensed and approved by the United States Food and Drug Administration (FDA), or meeting World Health Organization (WHO) requirements, for immunization of persons against vaccine-preventable diseases.

None of the currently available COVID-19 shots are licensed and approved by the FDA for school-age children; the shots similarly do not meet WHO requirements and are only authorized by the WHO for emergency use.

WAC: <https://app.leg.wa.gov/WAC/default.aspx?cite=246-105-020>

For clarity, BOH's criteria language is shown in red, and ICWA language is shown in black.

I. Criteria on the effectiveness of the vaccine

1. A vaccine containing this antigen is recommended by the Advisory Committee on Immunization Practices and included on its Recommended Childhood & Adolescent Immunization Schedule.

The vaccine **must** be recommended by the ACIP. The ACIP reviews **licensed** vaccines. It makes recommendations for newly licensed vaccines and regularly updates its recommendations. Its process includes:

- (1) a review of the Food and Drug Administration (FDA) labeling/package inserts for each vaccine;
- (2) a thorough review of the scientific literature (both published and unpublished, when available) on the safety, efficacy, acceptability, and effectiveness of the immunizing agent, with consideration of the relevance, quality, and quantity of published and unpublished data;
- (3) an assessment of cost effectiveness;
- (4) a review of the morbidity and mortality associated with the disease in the population in general and in specific risk groups;
- (5) a review of the recommendations of other groups; and
- (6) a consideration of the feasibility of vaccine use in existing child and adult immunization programs. Feasibility issues include (but are not limited to) acceptability to the community, parents, and patients; vaccine distribution and storage; access to vaccine and vaccine administration; impact on the various health care delivery systems; population distribution effects; and social, legal, and ethical concerns. [emphasis added]

Do any of the COVID-19 shots fulfill this criterion? No.

The ACIP did NOT recommend a COVID-19 shot licensed by the FDA for use in ages 5-11 or 12-15, nor did it place such a shot on the CDC Recommended Schedule.

There is no FDA COVID-19 shot licensed for ages 5-15 and no COVID-19 shot whatsoever on any CDC Recommended Schedule for any age. CDC Immunization Schedules, <https://www.cdc.gov/vaccines/schedules/index.html>.

The CDC recommended schedule website page for ages 7-18 mentions the ACIP's EUA and BLA recommendations for COVID, but it DOES NOT include the shots on the schedule.

On May 12, 2021, the ACIP adopted the following recommendation: "The Pfizer-BioNTech COVID-19 vaccine is recommended for children 12-15 years of age in the U.S. population under the FDA's Emergency Use Authorization." *May 12, 2021 ACIP Meeting - Discussion and Vote*, CDC YouTube channel, <https://youtu.be/91FCQN1aYqk>.

On November 2, 2021, the ACIP adopted a similar recommendation for 5-11 year olds. *Nov 2, 2021 ACIP Meeting - Clinical considerations for COVID-19 vaccination & Votes*, CDC YouTube channel, <https://youtu.be/Fknv90AxSn8>.

Federal Emergency Use Authorization statutes indirectly prohibit school mandates of EUA products by requiring recipients be informed they have the option to accept or refuse the vaccine:

"The possible side effects of the vaccine are still being studied in clinical trials. . . Under the EUA, there is an option to accept or refuse receiving the vaccine."
Vaccine Information Fact Sheet for Recipients and Caregivers about the Pfizer-BioNTech COVID-19 Vaccine to Prevent Coronavirus Disease 2019

(COVID-19) for Use in Individuals 5 through 11 Years of Age, pp. 4-5,
<https://www.fda.gov/media/153717/download>.

The option to accept or refuse an EUA product is not conditioned upon written assertion of exemption. Medical, personal, or religious exemptions are not required in order to exercise the right to refuse. Under EUA law, a parent or guardian may simply decline a shot for their minor child, without providing explanation or paperwork. A state-level daycare or school requirement would introduce the need for filing of exemptions, unlawfully exceeding the parameters set forth by Congress for EUA products.

“FDA believes that the terms and conditions of an EUA issued under section 564 preempt state or local law, both legislative requirements and common-law duties, that impose different or additional requirements on the medical product for which the EUA was issued in the context of the emergency declared under section 564.” *Vaccine EUA Questions and Answers for Stakeholders*, U.S. Food & Drug Administration,
<https://www.fda.gov/emergency-preparedness-and-response/mcm-legal-regulatory-and-policy-framework/vaccine-eua-questions-and-answers-stakeholders#61b6059d67093>

Alarming, the CDC and ACIP made this recommendation even though they acknowledged that for both age groups:

Regarding potential harms after vaccination, evidence was type 4 (very low certainty) for serious adverse events and type 1 (high certainty) for reactogenicity. No data were available to assess the other GRADE benefits and harms including prevention of hospitalization due to COVID-19, prevention of multisystem inflammatory syndrome in children (MIS-C), SARS-CoV-2 seroconversion to a non-spike protein, or prevention of asymptomatic SARS-CoV-2 infection.

The Advisory Committee on Immunization Practices’ Interim Recommendation for Use of Pfizer-BioNTech COVID-19 Vaccine in Adolescents Aged 12–15 Years — United States, May 2021, CDC MMWR, May 21, 2021,
<https://www.cdc.gov/mmwr/volumes/70/wr/mm7020e1.htm> and *The Advisory Committee on Immunization Practices’ Interim Recommendation for Use of Pfizer-BioNTech COVID-19 Vaccine in Children Aged 5–11 Years — United States, November 2021*, CDC MMWR November 12, 2021,
<https://www.cdc.gov/mmwr/volumes/70/wr/mm7045e1.htm>.

Vaccines and Related Biological Products Advisory Committee (VRBPAC) member Dr. Eric Rubin stated “[Just b]ecause we give an EUA to the vaccine, doesn’t mean we have to use it. And I think we would have to think hard about how to use it given all of the concerns that have been raised.” Transcript of *FOOD AND DRUG ADMINISTRATION (FDA) Center for Biologics Evaluation and Research (CBER) 166th Vaccines and Related Biological Products Advisory Committee (VRBPAC) Meeting*, June 10, 2021, p. 242. <https://www.fda.gov/media/150815/download>.

How can the CDC claim that benefits outweigh risks when they admit they do not know the risks?

Comirnaty is the only COVID-19 product that has ostensibly received FDA licensure for any pediatric populations—namely those 16 and up; however, that licensure is limited to manufacturing and delivery. The FDA has stated that this product is merely “**ready** for approval for **use** in individuals 16 years of age and older . . .” [emphasis added]. *August 23, 2021 Approval Letter - Comirnaty*, from FDA to BioNTech, p. 4, <https://www.fda.gov/media/151710/download>. The Comirnaty vaccine is not available anywhere in the United States, and there is debate about whether the vials of Pfizer’s EUA product are now “licensed” for those 16 and up, or if those are still EUA products. The FDA states that EUA Pfizer-BioNTech COVID-19 Vaccine and the Comirnaty (COVID-19 Vaccine, mRNA) “are legally distinct with certain differences that do not impact safety or effectiveness.” There is much debate over what “legally distinct” means, especially to consumers. If “legally distinct” means that the currently available Pfizer products in the U.S. are under EUA regulations, then there is no licensed product available for 16-18 year olds. Regardless of whether the Pfizer product is licensed for 16-18 year olds, the product lacks completed Phase 3 clinical trials, and the PREP Act still shields manufacturers for liability for injuries and deaths. As far as we can tell, never in history has the FDA licensed a product without completed clinical trials, nor when all the ongoing trials have been unblinded, subverting the ability to compare outcomes.

There are ZERO co-administration safety studies; therefore, it is highly concerning that the CDC states, and the Washington State Department of Health repeats: “COVID-19 vaccine and other vaccines may be administered on the same day.” CDC, Immunization Schedule, COVID-19 Vaccination, <https://www.cdc.gov/vaccines/schedules/hcp/imz/child-adolescent.html>

Disregarding the absence of any safety studies, the Washington DOH states, “Your child can get a COVID-19 vaccine at the same time they get other vaccines. You do not need to schedule your child’s required school vaccinations or other recommended vaccines separately from COVID-19 vaccination. A COVID-19 vaccine appointment is another opportunity to get your child caught up on all of their recommended vaccines.”

Washington State Department of Health, Vaccinating Youth,
<https://www.doh.wa.gov/Emergencies/COVID19/VaccineInformation/VaccinatingYouth#VaccineTiming>

As noted in our cover letter, this is not science. This is not safety. This is not in the best interest of vaccine recipients. This is using Americans, especially our children who are most impacted, as unwitting test subjects. This is human experimentation without informed consent. This is criminal.

2. The vaccine containing this antigen is effective as measured by immunogenicity* and population-based prevention data in Washington State, as available.

*Immunogenicity means the ability of an antigen or vaccine to stimulate the body to produce an immune response. Vaccines often include antigens that stimulate an immune response to a particular disease but are not necessarily the same as the organism that would cause the disease.

In the clinical development of a vaccine, the effectiveness of the vaccine is studied using FDA-approved research protocols that evaluate whether a vaccine protects individuals from contracting the disease in population-based studies or generates an immunologic response (immunogenicity) comparable to vaccines that have been shown to be effective in preventing disease. More information about its population-based effectiveness is gained from large trials and community-based analyses after FDA approval. There may or may not be effectiveness data from Washington State, but the disease prevalence and incidence in the state should be sought and reviewed.

Do any of the COVID-19 shots fulfill this criterion? No.

Immunogenicity: While the COVID-19 shots trigger the recipient's cells to create spike proteins, which then trigger an immune response and antibodies to the self-created spike proteins, this immune response has proven incapable of preventing infection or transmission. In short, the COVID shots do not prevent recipients from "contracting the disease."

Some studies show recipients may be afforded a short window—a few weeks or months—during which their risk of infection or risk of severe disease is minimally reduced in comparison to those without natural immunity, but even this protection appears to be dropping with each new variant.

This preprint study shows that PCR-positive tests for Delta variant occurred in a higher percentage of vaccinated individuals than in unvaccinated. From this it could be concluded that, regardless of vaccination status, all individuals are able to spread COVID-19 with similar viral loads. Riemersma et al., *Shedding of Infectious SARS-CoV-2 Despite Vaccination*,

<https://www.infosperber.ch/wp-content/uploads/2021/10/210731-Wisconsin.Viral-Load.pdf>.

Dr. Rochelle Walensky states that the vaccine does not prevent infection or transmission of the Delta variant, CNN interview with Wolf Blitzer, July 27, 2021, <https://www.youtube.com/watch?v=TKFWGvvlVLI>

Another pre-print study, Acharya et al., *No Significant Difference in Viral Load Between Vaccinated and Unvaccinated, Asymptomatic and Symptomatic Groups Infected with SARS-CoV-2 Delta Variant*, “found no significant difference in cycle threshold values between vaccinated and unvaccinated, asymptomatic and symptomatic groups infected with SARS-CoV-2 Delta.” <https://www.medrxiv.org/content/10.1101/2021.09.28.21264262v1>.

The CDC reported that among the first U.S. cases of COVID-19 attributed to the Omicron variant, 79% of the 43 cases studied occurred in fully vaccinated individuals, including 14 who had received booster doses. *SARS-CoV-2 B.1.1.529 (Omicron) Variant — United States, December 1–8, 2021*, CDC MMWR, December 17, 2021, <https://www.cdc.gov/mmwr/volumes/70/wr/mm7050e1.htm>.

The criterion explicitly requires that “information about population-based effectiveness is gained from large trials,” yet the clinical trial study on which the EUA was based for 5-11 year olds included only 2,268 children total. CDC and ACIP acknowledged that the study was too small to find serious adverse reactions. (See our response above to Criterion #1.) *Evaluation of the BNT162b2 Covid-19 Vaccine in Children 5 to 11 Years of Age*, N Engl J Med 2022; 386:35-46, DOI: 10.1056/NEJMoa2116298, <https://www.nejm.org/doi/full/10.1056/NEJMoa2116298>.

A pre-print study suggests that vaccine effectiveness wanes to negative effectiveness, therefore increasing chances of contracting COVID, after 90 days. The authors suggest a booster would be necessary in order to attain previous levels of protection. Do parents really want their child to get a booster every 90 days? Would this be practical or manageable? Hansen et al., *Vaccine effectiveness against SARS-CoV-2 infection with the Omicron or Delta variants following a two-dose or booster BNT162b2 or mRNA-1273 vaccination series: A Danish cohort study*, <https://www.medrxiv.org/content/10.1101/2021.12.20.21267966v3#p-5>

In contrast to the inability of the COVID shots to prevent disease, natural immunity has been found to prevent infection. This superior, broad protection will serve children well throughout their lives. “[C]hildren display a characteristically robust and sustained adaptive immune response against SARS-CoV-2 with substantial cross-reactivity against other hCoVs.” Dowel, et al., *Children develop robust and sustained*

cross-reactive spike-specific immune responses to SARS-CoV-2 infection,
<https://www.nature.com/articles/s41590-021-01089-8>

In study after study, it has been shown that natural immunity far exceeds vaccine-induced immunity in length and quality. Please view the following studies here that show the superiority of natural immunity: "144 Research Studies Affirm Naturally Acquired Immunity to Covid-19: Documented, Linked and Quoted," Brownstone Institute, October 17, 2021.

<https://brownstone.org/articles/79-research-studies-affirm-naturally-acquired-immunity-to-covid-19-documented-linked-and-quoted/>

3. The vaccine containing this antigen is cost effective from a societal perspective.

This analysis should consider both the costs of the immunization (e.g. antigen, storage, administration, medical and societal costs of adverse reactions to the immunization, etc.) and the benefits of the immunization (e.g. lives saved, medical and societal benefits of preventing adverse reactions from vaccine-preventable disease, etc.). This process may include consultation with an economist as resources allow. Vaccines may be cost effective without being cost saving. In other words, the direct costs of some vaccines (e.g. antigen, storage, administration) balanced against direct savings (e.g. medical care, disability, death) may not result in net savings. Societal or indirect costs (e.g. lost productivity of care takers of ill children) will also need to be taken into consideration. These costs are much harder to quantify. Not all vaccines recommended by the ACIP are cost saving or equally effective, so some determination of the vaccine's relative cost effectiveness may need to be made for comparison purposes when applying the criteria.

Do any of the COVID-19 shots fulfill this criterion? No.

To parents and members of Informed Choice Washington, the most important consideration in this criterion is the "medical and societal costs of adverse reactions to the immunization" as well as what the criterion overlooks:

- the cost of ignoring or outright censoring lifesaving preventative and early treatment protocols, which lead to superior natural immunity;
- the cost of exposing children to genetic therapies, such as DNA and mRNA injections, in the absence of adequately sized and designed safety studies for either short or long-term outcomes;
- and the cost of interrupting a child's natural immune response to what is now an endemic virus without a complete understanding of how that interruption will impact their immunity to the virus and its mutations in the future.

Please see risk information provided under Criterion #4 below, in particular, the two graphs summarizing data from Pfizer's clinical trials that have already demonstrated that any benefits from the shots are outweighed by the injuries and death they cause. This does not account for long-term and yet unknown harms.

4. Experience to date with the vaccine containing this antigen demonstrates that it is safe and has an acceptable level of side effects

Vaccinations are not without side effects. The known risks associated with each vaccine (or antigen) must be balanced against the risks of the disease. Vaccine safety will be evaluated using research and reports from: pre-licensure, the Vaccine Adverse Event Reporting System (VAERS) and the Vaccine Safety Datalink (VSD) project, and other reliable sources.

Do any of the COVID-19 shots fulfill this criterion? No.

While Pfizer's own randomized control trial data indicated a decrease in positive cases, they also showed an increase in illnesses and deaths compared to the placebo group. There is no benefit to reducing cases if it comes at the cost of increased illness, hospitalizations, and death.

The graphic below includes Table S3, *Participants Reporting at Least 1 Adverse Event From Dose 1 to 1 Month After Dose 2 During the Blinded Follow-up Period*, on page 11 of [Pfizer's six-month supplementary appendix](#) to its study entitled [Safety and Efficacy of the BNT162b2 mRNA Covid-19 Vaccine through 6 Months](#). Vaccinees experienced worse health outcomes than did placebo recipients.

The following graphic, which includes Table S4, *Causes of Death from Dose 1 to Unblinding*, on page 12 of [Pfizer's six-month supplementary appendix](#) to its study entitled [Safety and Efficacy of the BNT162b2 mRNA Covid-19 Vaccine through 6 Months](#), illustrates the increase in deaths within six months for those who received the injections. Of particular concern are the types of death, including cardiovascular events

(in red); there are almost twice as many in the test group as in the control group. This is Level One evidence of harm, as the data is derived from a randomized control trial (RCT).

Although FDA press releases proclaim that the benefits of the product would outweigh its risks, this conclusion is based upon modeling, which is the lowest quality of evidence given its reliance on layers of assumptions and subjectivity. FDA already had access to a superior form of data: the RCT results from the manufacturer itself, which it disregarded; "Therefore, the FDA conducted its own benefit-risk assessment using modelling to predict how many symptomatic COVID-19 cases, hospitalizations, intensive care unit (ICU) admissions and deaths from COVID-19 the vaccine in children 5 through 11 years of age would prevent versus the number of potential myocarditis cases, hospitalizations, ICU admissions and deaths that the vaccine might cause. The FDA's model predicts that overall, the benefits of the vaccine would outweigh its risks in children 5 through 11 years of age." FDA NEWS RELEASE: "FDA Authorizes Pfizer-BioNTech COVID-19 Vaccine for Emergency Use in Children 5 through 11 Years of Age," U.S. Food & Drug Administration, <https://www.fda.gov/news-events/press-announcements/fda-authorizes-pfizer-biontech-covid-19-vaccine-emergency-use-children-5-through-11-years-age>

One 12-year-old child, Maddie de Garay, participated in Pfizer's study. She suffered multiple and severe injuries, requiring 9 ED visits and 3 hospital stays (totaling 64 days by June 1, 2021). She is still in a wheelchair today. The New England Journal of Medicine article in which Pfizer's RCT results was reported, [Safety and Efficacy of the](#)

[BNT162b2 mRNA Covid-19 Vaccine through 6 Months](#), failed to disclose any of Maddie's adverse reactions. Pfizer disingenuously mischaracterized her injuries as "functional abdominal pain" in its *Emergency Use Authorization (EUA) Amendment for an Unapproved Product Review Memorandum*, p. 30.

<https://www.fda.gov/media/148542/download>. Senator Ron Johnson held a roundtable, in which many individuals who took the COVID-19 vaccine shared their adverse reaction experiences that required medical attention.

<https://thehighwire.com/videos/stephanie-and-maddie-de-garay-testimony/> at 5:13.

This study asks a very pertinent question: Why are we vaccinating children against COVID-19? The abstract in this study explains the following:

A novel best-case scenario cost-benefit analysis showed very conservatively that there are five times the number of deaths attributable to each inoculation vs. those attributable to COVID-19 in the most vulnerable 65+ demographic. The risk of death from COVID-19 decreases drastically as age decreases, and the longer-term effects of the inoculations on lower age groups will increase their risk-benefit ratio, perhaps substantially... (emphasis added.)

This study goes on to say that:

... it will use the term 'inoculated' rather than vaccinated, because the injected material in the present COVID-19 inoculations prevents neither viral infection nor transmission (emphasis added.)

Kostoff, Ronald, et al., "Why Are We Vaccinating Children Against Covid-19?" Toxicology Reports, Vol 8 2021, pages 1665-1684,
<https://www.sciencedirect.com/science/article/pii/S221475002100161X>

Here is a list of websites where medical professionals and/or individuals have documented their experiences with reactions from the COVID-19 vaccine:

<https://openvaers.com/covid-data/adverse-events-by-state>

<https://vaers.hhs.gov/data.html>

<https://www.c19vaxreactions.com>,

<https://www.RealNotRare.com/>

<https://www.medalert.org>

<https://www.scivisionpub.com/pdfs/us-covid19-vaccines-proven-to-cause-more-harm-than-good-based-on-pivotal-clinical-trial-data-analyzed-using-the-proper-scientific--1811.pdf>

Dr. Cody Meissner, VRBPAC member, stated: “I want to be sure that the risk of the vaccine is less than the risk of hospitalization because four [COVID hospitalizations per million in children under 18] certainly does not constitute an emergency, and there are significant questions about the safety of this vaccine. . . . [This hospitalization rate is] on the CDC website. That is not an emergency. It is a very low hospitalization rate. And the rates may change as the season changes, but we’re starting from a tiny, tiny rate. . . . [T]he rates are also falling pretty dramatically among adults and children. So as more people are immunized and become immune from infection, I think it’s very likely that we’re going to get this pandemic under pretty good control. Now the issue -- so the issue to me is safety. . . . [W]e can look at the 2,000 or 2,200 adolescents who are enrolled in the Pfizer vaccine between 12 through 15 years of age -- 2,200, so half got the vaccine, half got placebo. Nobody was hospitalized. Nobody died. And there were some who got URIs[upper respiratory infections] So 2,200 is not going to address the issue of safety. I’m worried about myocarditis. . . . [W]e don’t know what that means on a longterm basis. Will there be scarring of the myocardium? Will there be a predisposition to arrhythmias later on? Will there be an early onset of heart failure? I think that’s unlikely, but we don’t know that. And so before we start vaccinating millions of adolescents and children, it is so important to find out what the consequences are because COVID-19 disease is disappearing in adolescents and children. And I think we have to be so clear about what we’re dealing with. Let me make one more point. In 2003, there was a publication in JAMA regarding myocarditis following the Dryvax vaccine, the smallpox vaccine which is, of course, a live vaccine. But in that situation, the military -- it was given to young recruits. The rates of myocarditis in the military young men -- because it was mostly men in those days -- was 2 per 100,000. And after the Dryvax vaccine the rates were 7.8 cases of myocarditis in the 30 days afterwards. So there was a three-fold increase. And in fact, Dr. Tony Fauci wrote an editorial in that same issue of JAMA discussing these rates of myocarditis. So I am really concerned that the FDA may by not insisting on a full BLA, which to me means at least 12 months, maybe even 18 or 24 months of follow up in children and adolescents, before they are recommended to receive this vaccine. I do not feel we can justify a EUA including children under an Emergency Use Authorization. The burden of disease is so small, and the risks are just not clear. We don’t know.” June 10, 2021, VRBPAC meeting transcript, p. 62, p. 225- 228. <https://www.fda.gov/media/150815/download>

From the front lines in medical care

Many medical professionals are speaking up and sharing their experiences of working in hospitals right now as they care for patients who are coming in with what they can associate to vaccine reactions. “More VC Nurses Blow Whistle on ‘Overwhelming’ Numbers of Heart Attacks, Clotting, Strokes,” *The Conejo Guardian*, December 14, 2021. <https://conejoguardian.org/2021/12/14/more-vc-nurses-blow-whistle-on-overwhelming-numbers-of-heart-attacks-clotting-strokes/>

Individuals are sharing their own experiences with their health while taking the COVID shots. U.S. Senator Ron Johnson hosted a round table on November 2, 2021, to allow these individuals to tell their stories.

<https://childrenshealthdefense.org/defender/nov-2-sen-ron-johnson-cdh-covid-vaccine-injuries-federal-mandates/>

Colette Martin, an RN of 17 years, testified in front of the Louisiana House about the harms of vaccine reactions that she has witnessed. She also stated that more children have died from the vaccine than from covid itself. Louisiana House of Representatives Health and Welfare Committee Hearing, December 6, 2021,

https://www.house.louisiana.gov/H_Video/VideoArchivePlayer?v=house/2021/dec/1206_21_HW (begin at 6:54:00)

In the first two and a half months after EUA was granted, 1,223 deaths were reported to Pfizer. This is a huge red flag that requires deep investigation. See Table 1, Page 7, showing fatal case outcomes in Pfizer’s “5.3.6 Cumulative Analysis of Post-Authorization Adverse Event Reports of PF-07302048 (BNT162B2) Received Through 28-Feb-2021”

<https://phmpt.org/wp-content/uploads/2021/11/5.3.6-postmarketing-experience.pdf>,

While critics commonly question the veracity of VAERS data, as reported on the U.S. government’s Healthy People 2020 site, 83% of the reporters to the Vaccine Adverse Events Reports System were health care workers or pharmaceutical and government-based sources during the years 1990-2010. “The majority of VAERS reports are submitted by vaccine manufacturers (37%) and health care providers (36%). The remaining reports are obtained from state immunization programs (10%), vaccine recipients (or their parents/guardians, 7%) [sic], and other sources (10%).” Office of Disease Prevention and Health Promotion, Vaccine Adverse Reporting System, <https://www.healthypeople.gov/2020/data-source/vaccine-adverse-event-reporting-system>.

Further, 72% of a sampling of 250 of the 1,644 VAERS reports of early death received in the first three months of 2021 were filed either by health service employees or pharmaceutical employees. “We identified health service employees as the reporter in at least 67% of the reports, while pharmaceutical employees were identified as the reporter in a further 5%.” Even though the sample contained only people vaccinated early in the rollout, *i.e.*, those who were elderly or with significant health conditions, an adverse vaccine reaction could be ruled out in only 14% of the cases. Mclachlan, et al., *Analysis of COVID-19 vaccine death reports from the Vaccine Adverse Events Reporting System (VAERS) Database Interim: Results and Analysis*. 10.13140/RG.2.2.26987.26402. (2021)

“While it seems that the incidence of pericarditis during the vaccination campaign period is increased, a more comprehensive data collection on a wider scale should be done. We hope this report will raise awareness to the subject and will serve as a reminder to report events as part of the post-marketing investigations and allow for a thorough adverse events following immunization analysis.” *Transient Cardiac Injury in Adolescents Receiving the BNT162b2 mRNA COVID-19 Vaccine*, https://journals.lww.com/pidj/Fulltext/2021/10000/Transient_Cardiac_Injury_in_Adolescents_Receiving.1.aspx

II. Disease Burden Criteria

5. The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population.

Vaccines have the potential to reduce, or in some cases even eliminate, diseases that can result in serious illness, long-term disability, or death. For example, before measles vaccine was available, nearly everyone in the United States contracted measles and an average of 450 measles-associated deaths were reported each year between 1953 and 1963. The morbidity/mortality burden of measles was not equal for all members of the population. Examples of significant morbidity measures include rates of hospitalizations, long-term disability, disease incidence, and disproportionate impact.

Do any of the COVID-19 shots fulfill this criterion? No.

First, we must emphatically state that it is unethical to use children as shields for adults.

Peter Doshi, Ph.D: “I want to address this idea of vaccinating children to protect adults. I encourage the Advisory Committee to read Dr. Lavine et al.’s editorial to explain why, “Vaccinating children is likely to be of marginal benefit in reducing the risk to others.” And even if you think a small benefit is better than nothing, let’s not forget that it’s an unproven hypothetical benefit. We need confirmatory evidence, not just assumptions. And then there’s the ethics and the law. **FDA can only indicate a product for use in a**

given population if benefits outweigh risks in that same population. So if benefits don't outweigh risks in children themselves, it can't be indicated for children, full stop. Whether vaccinating children might help adults is a moot point." Comments before the Vaccines and Related Biological Products Advisory Committee, June 10, 2021 <https://www.fda.gov/media/150815/download>, pp. 171-172. (emphasis added)

Children and young adults are at an extremely low risk of mortality from COVID-19. When one subset of the population (children) carries a high risk for injury from an antigen but low risk for injury from the disease, we must consider the mandate of such an antigen to be unethical. Bhopal, "Children & Young People Remain at a Low Risk of Covid-19 Mortality," *The Lancet Children & Adolescent Health*, Correspondence, Vol 5, Issue 5, E12-E13, May 1, 2021.

[https://www.thelancet.com/journals/lanchi/article/PIIS2352-4642\(21\)00066-3/fulltext](https://www.thelancet.com/journals/lanchi/article/PIIS2352-4642(21)00066-3/fulltext)

The *Forbes* article "The Hideous Truths of Testing Vaccines on Humans" examined the testing of hepatitis vaccines on the residents of Willowbrook, a home for severely disabled children. The author states: "In 1966, renowned medical ethicist Henry K. Beecher published an article titled, "Ethics and Clinical Research," which listed Willowbrook as an example of an unethical clinical experiment and concluded that "there is no right to risk an injury to one person for the benefit of others." *Forbes*, June 12, 2020,

<https://www.forbes.com/sites/leahrosenbaum/2020/06/12/willowbrook-scandal-hepatitis-experiments-hideous-truths-of-testing-vaccines-on-humans/>

Second, the measles example given in this criterion reveals that historically the BOH and DOH have never stepped back to consider the long term or unintended consequences of mass-vaccination campaigns. We agree that nearly everyone in the United States used to be exposed to measles, mostly in childhood when it's safest to experience, and they developed lifetime immunity. Merck's on-trial-for-fraud MMR vaccine does not confer lifetime immunity for a significant portion of the population, pushing susceptibility into the very young and into adult populations. We are nearing a time when more people in the U.S. will be susceptible to measles than before the vaccines were released. And studies show a third dose doesn't help. Was there perhaps a better way to reduce those 450 annual deaths and the cases of very severe illness, without sacrificing superior natural immunity for the vast majority (99.99%) of the population—and without exposing millions of children annually to the risks of the MMR? What about the failure of the mumps portion of the shot? More information can be found here: <https://informedchoicewa.org/measles/> To learn about the politics surrounding the loss of the personal exemption to the MMR, see this post:

<https://informedchoicewa.org/education/were-wa-lawmakers-deceived-about-measles-last-session-part-1/>

Is there perhaps a better way to protect those susceptible to severe disease and fatal COVID-19 outcomes, without sacrificing superior natural immunity for the >99.9% of the population who fully recover and develop natural immunity? Optimal nutritional support, early treatment protocols, and the benefits of natural immunity are tragically not part of public health's approach with any vaccine-targeted infection. With COVID, the neglect of these public health tools has cost many lives.

Third: as shown in our response to Criterion #1, the shots do not prevent transmission; any unethical attempt to use children as shields will fail.

As of January 6, 2022, the seven-day case rate in Washington State for ages 4-11 was 504.8 per 100,000. The seven-day hospitalization rate was 1.2 in 100,000. Compare this with the risk of myocarditis in vaccinated adolescents, which is 18.52 in 100,000 as seen in <https://pubmed.ncbi.nlm.nih.gov/34849657/>

Age Group	7-Day Case Rate	7-Day Hospitalization Rate	7-Day Testing Rate	7-Day Percent Positivity
Ages 4-10	504.8	1.2	--	--
Ages 11-13	558.1	0.7	--	--
Ages 14-19	731.8	1.8	--	--
Ages 0-11	480.7	2.3	--	--
Ages 12-19	692.4	1.5	--	--
Ages 20-34	869.9	10.7	--	--
Ages 35-49	724.5	12.0	--	--
Ages 50-64	444.2	20.0	--	--
Ages 65-79	227.3	30.9	--	--
Ages 80+	211.2	56.2	--	--

Cases, Hospitalizations, Testing and Percent Positive by Age

Graph from <https://www.doh.wa.gov/Emergencies/COVID19/DataDashboard>

Between January 4, 2020, and January 6, 2022, 573 children between the ages of 5-18 have died with COVID in the entire United States. CDC Deaths by Sex, Ages 0-18 years, <https://data.cdc.gov/NCHS/Deaths-by-Sex-Ages-0-18-years/xa4b-4pzy>

On December 31, 2021, Anthony Fauci stated, “ . . . [I]f a child goes into the hospital, they automatically get tested for COVID, and they get counted as a COVID-hospitalized individual, when in fact they may go in for a broken leg or appendicitis of something like that, so it's overcounting the number of children who are . . . hospitalized **with** COVID as opposed to **because** of COVID.” MSNBC interview, <https://twitter.com/TheEliKlein/status/1476917049435856925>

Vaccines and Related Biological Products Advisory Committee member Dr. Cody Meissner stated “[F]our per million [pediatric hospitalizations] certainly does not constitute an emergency, and there are significant questions about the safety of this product.” June 10, 2021, VRBPAC meeting transcript, p. 62.

<https://www.fda.gov/media/150815/download>

6. Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting or activity being given the highest priority.

Having a large proportion of the population vaccinated with the antigen helps to stem person to person transmission of the disease (i.e., herd immunity). Even community members who are not vaccinated (such as newborns and those with chronic illnesses) are offered some protection because the high immunization rate results in the disease having less opportunity to spread within the community. Vaccinating children in school and/or child care can increase the percentage of children in these groups who are immune and thus reduce the risk of outbreaks of the disease in these groups and in the community at large. Special consideration of disease transmission in a school or child care setting or activity should be given the highest priority. For the purpose of this criterion, “activity” refers to school or child care extracurricular activities including, but not limited to, field trips, sports events, or other activities held on or off campus.

Do any of the COVID-19 shots fulfill this criterion? No.

The Pfizer, Moderna, and Janssen products do not prevent transmission, serious disease, or death.

The CDC director says that vaccines do not prevent transmission. “Fully vaccinated people who get a Covid-19 breakthrough infection can transmit the virus, CDC chief says,” *CNN Health*,

<https://www.cnn.com/2021/08/05/health/us-coronavirus-thursday/index.html>

“COVID-19 infections are increasing in Gibraltar, with 128 new infections reported on average each day. That’s 97% of the peak — the highest daily average reported on January 5. There have been 9,600 infections and 100 coronavirus-related deaths reported in the country since the pandemic began. . . Gibraltar has administered at least 108,323 doses of COVID vaccines so far. Assuming every person needs 2 doses, that’s enough to have vaccinated about 160.7% of the country’s population.” Reuters COVID-19 Tracker, accessed January 7, 2022,

<https://graphics.reuters.com/world-coronavirus-tracker-and-maps/countries-and-territories/gibraltar/>

Vaccinated people can still spread the Delta variant. Vaccination does not stop the transmission of COVID. “Testing a subset of low-Ct samples revealed infectious

SARS-CoV-2 in 15 of 17 specimens (88%) from unvaccinated individuals and 37 of 39 (95%) from vaccinated people.” Riemersma, “Shedding of Infectious SARS-CoV-2 Despite Vaccination,” <https://www.medrxiv.org/content/10.1101/2021.07.31.21261387v4>

Individuals who have been previously infected do not show a need to be vaccinated. This is consistent with Chapter 246-105-020 WAC: “fully immunized” means an immunization status where a child has proof of acquired immunity . . . ’ It is unreasonable to mandate that those with natural immunity be “boosted” with a vaccine when there is not scientific evidence that this practice is safe or effective in the long term. Boosting an individual’s levels of antibodies to the vaccine-induced spike protein—which no longer matches the dominant strain now circulating—is experimental. Also see Shrestha, “Necessity of COVID-19 vaccination in previously infected individuals,” <https://doi.org/10.1101/2021.06.01.21258176>.

Children have sustained and robust natural immunity after contracting COVID. Dowel, “Children develop robust and sustained cross-reactive spike-specific immune responses to SARS-CoV-2 infection,” *Nat Immunol* 23, 40–49 (2022). <https://doi.org/10.1038/s41590-021-01089-8>.

Long-term effects of the vaccine trials in children are unknown. Deaths in children are a fraction of the percentage of deaths in all other age categories. Kostoff, “Why are we vaccinating children against COVID-19?” *Toxicology Reports*, Vol 8, 2021, Pages 1665-1684, <https://doi.org/10.1016/j.toxrep.2021.08.010>.

Barnstable County, Massachusetts, had an outbreak amongst a population of tourists that was approximately 74% vaccinated, which indicates that vaccination does not prevent contracting or transmitting COVID. Brown, “Outbreak of SARS-CoV-2 Infections, Including COVID-19 Vaccine Breakthrough Infections, Associated with Large Public Gatherings - Barnstable County, Massachusetts, July 2021,” *MMWR Morb Mortal Wkly Rep*, 2021 Aug 6;70(31):1059-1062. <https://pubmed.ncbi.nlm.nih.gov/34351882/>.

Despite 100% vaccination rate, consistent testing, and quarantining, a research station in Antarctica still had an outbreak of COVID cases. “COVID-19 Outbreak Hits Research Station in Antarctica,” WebMD News Brief, <https://www.webmd.com/lung/news/20220103/covid-19-outbreakohitsoresearchostation-in-antarctica>

III. Implementation of the Criteria

7. The vaccine containing this antigen is acceptable to the medical community and the public.

It is possible to gauge the level of provider acceptance of a vaccine by querying state professional societies such as the Washington Academy of Family Physicians and the Washington State Chapter of the American Academy of Pediatrics. Vaccine uptake data are also available from the Department of Health to determine provider use of the vaccine. While there is generally a good correlation between the levels of physicians' and the general public's acceptance of particular vaccines, the TAG should consider additional ways of accurately gauging public acceptance of the particular vaccine. Adding an antigen to WAC 246- 105-030 related to a vaccine with poor provider or public acceptance would likely be resisted. Postponing the regulation until there is greater approval of the vaccine would assure more effective policy.

Do any of the COVID-19 shots fulfill this criterion? No.

There has never been more opposition from the medical and scientific community or the public to any type of vaccine or vaccine policy than there is to the COVID-19 products and policies.

EXAMPLES OF MEDICAL AND SCIENTIFIC OPPOSITION

- Over 15,000 members of the [International Alliance of Physicians and Medical Scientists](#) published a declaration resolving that healthy children shall not be subject to forced vaccination. They state:
 - Negligible clinical risks from SARS-CoV-2 infection exist for healthy children under eighteen.
 - Long term safety of the current COVID vaccines in children cannot be determined prior to instituting such policies. Without high-powered, reproducible, long term safety data, risks to the long-term health status of children remain too high to support use in healthy children.
 - Children risk severe, adverse events from receiving the vaccine. Permanent physical damage to the brain, heart, immune and reproductive system associated with SARS-CoV-2 spike protein-based genetic vaccines has been demonstrated in children.
 - Healthy, unvaccinated children are critical to achieving herd immunity. Natural immunity is proven to tolerate infection, benefiting community protection while there is insufficient data to assess whether COVID vaccines assist herd immunity.

Supporting Evidence:

<https://doctorsandscientistsdeclaration.org/home/supporting-evidence/#children>

- More than 500 scientists, medical doctors and health care and other professionals united as the [Canadian Covid Care Alliance](https://www.canadiancovidcarealliance.org). Their presentation *More Harm Than Good* reviews Pfizer's six-month data and reveals that Pfizer's COVID-19 inoculations cause more illness than they prevent. See the *More Harm than Good* video and PDF slides here: <https://www.canadiancovidcarealliance.org>

"It's clear that Pfizer - and the agencies overseeing their trials - failed to follow established, high quality safety and efficacy protocols right from the beginning. . . Any government that approved this medical intervention for its citizens should have ensured that the trial had used the appropriate clinical endpoints and high quality safety science. . . Any government official who possesses this evidence and continues to allow its citizens to be inoculated with a toxic agent is, at the very least, negligent."

1. The [Association of American Physicians and Surgeons](#), established in 1943, opposes COVID-19 vaccination mandates. In regards to children, AAPS states:
 - a. In the testing, only 1,518 children received the shots, and 750 received a placebo. This is far too few to see uncommon side effects, such as myocarditis/pericarditis, as Pfizer admits.
 - b. Follow-up was for two months in one group and only 2.5 weeks in another. The Pfizer application states that long-term sequelae of post-vaccination myocarditis/pericarditis in participants 5 to 12 years of age will be studied after the vaccine is authorized for children.
 - c. The children were not examined for mild, asymptomatic myocarditis, which might cause long-term damage, as by checking troponin levels or echocardiograms, or for blood clotting problems, as by checking platelet counts and D-dimers.
 - d. The only FDA-approved product, BioNTech's Comirnaty (not yet available in the U.S.) is required to do studies on myocarditis lasting 5 years.
 - e. Monthly safety report cards on the three available vaccines, which have different dosages, are supposedly required, but none have been produced or released.
 - f. The claim of 91% relative effectiveness against symptomatic COVID in children is based on 16 cases of COVID in the placebo group and three cases in the vaccinated group over the brief follow-up period. This is an absolute risk reduction of about 2%.
 - g. We do not and cannot know the long-term effects on cancer, fertility, or autoimmune diseases. "But we're never going to learn about how safe this vaccine is unless we start giving it. That's just the way it goes," stated committee member Dr. Eric Rubin, physician at Boston's Brigham and

Women's Hospital, immunology professor at the Harvard T.H. Chan School of Public Health, and current editor-in-chief of the New England Journal of Medicine. The alternative to giving a product to most of an entire generation is animal studies or restricting use to a defined group most likely to benefit, with close follow-up.

- h. The dosage for children is one-third the adult dose. Dosage in pediatrics is generally determined by weight. Not all children weigh the same, and their weight does not triple between age 11.9 and 12.0 years.
 - i. The COVID products are not shown to interrupt infection and transmission. Masking and distancing are still being recommended or required for adults. Thus, hopes for a return to normalcy once vaccinated are misplaced.
 - j. To give truly informed consent, parents need complete information about possible side effects, such as the outcome for Maddie de Garay, a 12-year-old whose public-spirited parents enrolled her in a trial. Post-shot, she experienced excruciating pain and a 2-month hospitalization, and is now in a wheelchair. Pfizer has not acknowledged a connection to the shot, nor did it fully disclose her injuries in it. The reaction may be "extremely rare," but many would decline to take even a 1-in-1 million chance of this outcome.
 - k. The government has already ordered 68 million doses, so authorization is anticipated, and likely will be followed by mandates.
 - l. Several Nordic countries have paused the use of COVID vaccines in persons under the age of 30. Persons at low risk for COVID complications are more likely to die from the shot than from COVID.
 - m. Dr. Harvey Risch, Yale epidemiologist, stated that he would home-school his children if public schools mandated this vaccine.
 - n. No one should administer a COVID shot to a child unless parents have given fully informed, completely voluntary consent, without threats or inducements.
 - o. SOURCE:
<https://aapsonline.org/aaps-statement-on-covid-shots-for-children/>
2. The [Physicians for Informed Consent](#) have compiled a Pfizer Vaccine Risk Statement for children that highlights FDA, CDC, and Pfizer clinical trial data finding:
- a. The clinical trial found there were zero cases of severe COVID-19 in children of any age who did not receive the vaccine. In contrast, the trial found that the vaccine causes severe (grade 3) and grade 4 systemic reactions in children.

- b. The clinical trial indicates that vaccine efficacy declines significantly in less than six months. Although a booster dose of the vaccine is authorized for individuals 16 years of age or older, the clinical trial states that efficacy was not evaluated for Phase 3 BNT162b2 booster group participants. Instead, vaccine efficacy was inferred based on antibody levels observed in only about 300 vaccinated subjects over a one-month time period.
- c. The clinical trial provided no evidence that the vaccine prevents asymptomatic infection or transmission of SARS-CoV-2 or COVID-19. In addition, recent studies have observed that a significant proportion of severe, critical, and fatal cases of COVID-19 occurred in vaccinated individuals.

SOURCE:

<https://physiciansforinformedconsent.org/physicians-for-informed-consent-updates-its-pfizer-covid-19-vaccine-risk-statement-analyzes-new-safety-data-for-children/>

- 3. The [World Council for Health](#), whose leadership includes Dr. Tess Lawrie (PhD, MD, Founder, Evidence-Based Medicine Consultancy LTD, Bath, United Kingdom, 10-year Senior consultant to the WHO supporting health policy recommendations for countries globally), issued a statement in December 2021:
 - a. There is now more than enough evidence to declare the novel Covid-19 vaccines unsafe for use in humans. Victim testimonies and adverse reaction reporting systems have revealed millions of adverse reactions to the experimental vaccines, including life-changing injury and death.
 - b. The inoculations are capable of causing immeasurable harm to those who received them, with children being more likely to die from the Covid-19 vaccines than from actual SARS-CoV-2 infection.
 - c. World Council for Health anticipates that unprecedented humanitarian efforts will be essential to assist the people harmed by this global vaccination experiment, due to the known and unknown harms.
 - d. The World Council for Health demands an end to this crisis and hereby declares it illegal and unlawful for anyone to participate, directly or indirectly, in this harmful experimental vaccination programme. The World Council for Health declares individuals, governments, and other corporations will be held liable for their involvement.
 - e. World Council for Health Calls for an Immediate Stop to the Covid-19 Experimental “Vaccines” DECLARATION:
<https://worldcouncilforhealth.org/campaign/covid-19-vaccine-cease-and-desist/#full>

SOURCE: <https://worldcouncilforhealth.org/news/2021/12/covid-19-vaccines/14001/>

4. Paul E Alexander MSc PhD, Howard C. Tenenbaum DDS, Dip. Perio., PhD, Dr. Parvez Dara, MD, MBA: “We must not expose our children to ‘unnecessary’ harm. We must not expose them to a substance that has not been tested on children (or plan to be) in the way it should be and for as long as necessary. We must not expose children to a vaccine that based on their risk, is absolutely not needed. Moreover, they can become infected naturally, if their immunity is needed.”
<https://www.aier.org/article/why-we-must-not-be-forced-into-vaccinating-our-children-from-covid-beware/>
5. Dr. Robert Malone (MD, Northwestern School of Medicine, MS, UC San Diego and Salk Institute Molecular Biology and Virology Laboratories, Giannini Postdoctoral Research Fellow, UC Davis, Harvard Medical School fellow -- Global Clinical Research Scholar (2016), original inventor of the mRNA vaccine platform used in the Pfizer and Moderna COVID-19 vaccines as well as the DNA vaccine platform used by Inovio): Interview in which Dr. Malone voices his grave medical and scientific concerns for the use of any of the COVID shots, especially in children:
<https://unityprojectonline.com/news/dr-robert-malone-md-on-the-joe-rogan-experience/>
6. Dr. Peter McCullough (MD, FACC, FAHA, FASN, FNKF, FNLA, FCRSA, Chief Medical Advisor, Truth for Health Foundation; President, Cardiorenal Society of America; Editor-in-Chief, Reviews in Cardiovascular Medicine; one of the most highly published medical specialists in practice today and an authoritative commentator for major media on COVID-19). Dr. McCullough has been interviewed hundreds of times and testified to numerous legislatures and to Congress. He is a tireless proponent for early treatment to save lives, and although he at first administered the EUA shots to his patients, as information began to emerge, he stayed informed and up-to-date. He no longer supports use of any of the existing COVID-19 shots. His interview by Joe Rogan is extensive and can be found here:
<https://unityprojectonline.com/news/dr-peter-a-mccullough-on-the-joe-rogan-experience/>

In an [interview in August 2021](#), Dr. McCullough reviewed his five main points of education:

- a. COVID-19 is NOT spread asymptotically
- b. Asymptomatic people should not get tested

- c. Natural immunity is robust complete and durable
- d. COVID-19, no matter what variant, is easily treatable at home
- e. Current COVID-19 vaccines are obsolete and should be considered unfit for human use. “They [the vaccines] do not cover the new variants; patients are failing on these vaccines. They’re being hospitalized and getting sick despite having had the vaccines . . .the vaccines at this point in time have amounted to record mortality and injury and should be considered unsafe and unfit for human use.”

Less than half of parents support a requirement for middle and high school students to be vaccinated for COVID. "About One in Five Americans Remain Vaccine-Resistant," Gallup, August 6, 2021,

<https://news.gallup.com/poll/353081/one-five-americans-remain-vaccine-resistant.aspx>

Healthcare workers are willing to lose their job rather than take the COVID vaccine.

"Roughly 3,000 hospital workers lost jobs over Washington's COVID-19 vaccine mandate," KING 5 News, November 17, 2021,

<https://www.king5.com/article/news/local/washington-hospitals-lose-roughly-3000-workers-over-covid-19-vaccine-mandate/281-b0ff14de-27b6-4b0a-bcca-ed924c314ca0>

As of October 19, 2021, nearly 2,000 state workers chose to be fired rather than take the vaccine. "Nearly 1,900 Washington state workers quit or are fired over COVID vaccine mandate," *The Seattle Times*, October 19, 2021,

<https://www.seattletimes.com/seattle-news/politics/nearly-1900-washington-state-workers-quit-or-are-fired-over-covid-vaccine-mandate/>

There have also been many stories in the news describing our service members who are being discharged secondary to their declination of the shots.

8. The administrative burdens of delivery and tracking of vaccine containing this antigen are reasonable.

Many institutions and individuals are involved in implementation of the rule when the Board adds a new vaccine to WAC 246-105-030. These include: the Department of Health, the Department of Social and Health Services, the Office of Superintendent of Public Instruction (OSPI), local health jurisdictions, schools, child care, health plans, health care providers, and families. For each of these key players, there are issues that affect the feasibility of implementing an immunization recommendation. For example, introduction of a new vaccine can result in schools conducting more parental follow-up and making changes to record and information systems—this in turn can impact school staff workload. Assuring that a reasonable burden of work is present will enhance the effectiveness of the policy. The TAG includes representatives from affected parties such as OSPI, schools, and child care when assessing an antigen against this criterion.

Do any of the COVID-19 shots fulfill this criterion? No.

The burden on school nurses for tracking COVID cases and for managing all the COVID measures is already unreasonable. ICWA board member Heidi Hartnell is a teacher in Washington State and can speak to the amount of time schools already spend tracking COVID cases and close contacts. If the requirement of vaccination is added to the existing required measures, this would create an extensive amount of maintenance and updating of immunization records. She says, “With the demonstrated waning efficacy of the COVID vaccination in adults, it would seem that this would also be true with children. If children are required to be “up to date” with a booster every six months, this will be a huge burden on schools as vaccination records will constantly need to be checked and updated. Currently, a majority of the required vaccinations are completed by the time a child enters kindergarten and these forms do not require frequent updating. However, if the COVID shot and subsequent boosters were to be added, this would place a hardship on already wearied teachers and school personnel. Ultimately these shots do not prevent contracting or transmitting the virus, and so this work achieves nothing in the public health sense.”

The only thing that makes sense, given that >99.9% of children are at zero risk from COVID, is to simply enforce the “stay at home if symptomatic” rules that have served public health well for decades. We can never achieve, nor would we want to achieve, zero exposure schools. Children’s immune systems need exposure to the microbial world, including to viruses, to properly develop and protect them as adults. This is just as true for COVID, which has become endemic, so children will be encountering the virus and mutations for the rest of their lives. More than 140 studies demonstrate that natural immunity will serve them well and far longer than the shots, and it is their

parents who should make the risk-benefit decision, not the State of Washington. "144 Research Studies Affirm Naturally Acquired Immunity to Covid-19: Documented, Linked and Quoted," Brownstone Institute, October 17, 2021.

<https://brownstone.org/articles/79-research-studies-affirm-naturally-acquired-immunity-to-covid-19-documented-linked-and-quoted/>

Public health would be even better served if the BOH would acknowledge natural immunity, and support and promote early treatment protocols, so that everyone of all ages and of any vaccination status could see better outcomes.

<https://www.cdc.gov/media/releases/2021/s1227-isolation-quarantine-guidance.html> -

9. The burden of compliance for the vaccine containing this antigen is reasonable for the parent/caregiver.

Parents and caregivers are often involved in obtaining vaccines for children. This can include: transporting children to medical appointments, taking time off of work for medical appointments, maintaining the child's immunization records, etc. When a vaccine is required for child care and/or school entry it affects the health decisions that parents make on their child's behalf because parents must, at the very least, take the required vaccine into account.

Do any of the COVID-19 shots fulfill this criterion? No.

Considering the risks discussed in Criterion #4 above, the burden of compliance on parents is unacceptable.

Considering that any injury sustained by a child is borne completely by the parents because the manufacturers are shielded under the Public Readiness and Emergency Preparedness (PREP) Act, the burden of compliance is unacceptable.

<https://aspr.hhs.gov/legal/PREPact/Pages/default.aspx>

The shots are available everywhere, even grocery stores often without an appointment, so it is easy for most parents to find an opportunity to get their child a shot if they so choose, but for those parents who choose to opt out of a school vaccine requirement, the burden is out of balance.

Parents can't go to Safeway or Rite Aid for an appointment with a practitioner to get the required risk-benefit consultation and signature. They must make an appointment with a practitioner, take time off work, arrange transportation, etc. That first step is now the most burdensome. For the past several years, it has been increasingly difficult for parents to find any practitioner willing to give them the required risk-benefit consultation. Many doctors and clinics are kicking families out of their practices who do not vaccinate, or who do not fully vaccinate according to the CDC schedule. This has nothing to do with health or protection and everything to do with the financial incentives built into the

insurance and public health systems that reward high vaccination uptake. This practice is supported by the American Academy of Pediatrics, which has critical conflicts of interest associations with the pharmaceutical and medical industries. “The AAP recently issued a clinical report that stated it is an “acceptable option for pediatric care clinicians to dismiss families who refuse vaccines”

<https://www.infectiousdiseaseadvisor.com/home/topics/prevention/new-aap-policy-on-patient-dismissal-for-vaccine-refusal-may-erode-solidarity-among-pediatricians/>

The BOH’s criterion is based on the assumption that “a process exists to opt out of immunization requirements by children attending either child care or school.” If parents are unable to find a practitioner willing to provide the required risk-benefit consultation and sign an exemption form or letter stating that they have done so, then that opt-out does not exist.

And finally, a tremendous burden exists in the coercive aspect of any vaccine requirement. Parents who opt their children out of one or more vaccinations experience emotional and psychological stress because they know they face scrutiny by school staff, by health care providers, by surveillance systems, as well as cultural pressure. Children who lack one or more vaccinations are singled out at various times, excluded from school and extracurricular activities. If a vaccine is NOT on the schedule, a parent is able to choose what is best for their child without the added stress. It is an unreasonable burden to stress entire families with a requirement that should be a personal medical decision. It is incomprehensible that the Board would even consider such a requirement with products that cannot prevent infection or transmission.

BOARD CRITERIA FRAMEWORK:

The only purpose for which power can rightfully be exercised over any member of a civilized community, against his will, is to prevent harm to others. His own good, either physical or moral, is not a sufficient warrant.” Harm to others cannot be prevented by requiring children attending school to take this vaccine.

As you are preparing to answer the questions before you as the BOH TAG regarding COVID "shots" for school children I implore you to Please, Please, Please study the document sent to you by Informed Choice WA responding to all 9 criteria. These "shots" fail the test of all 9 of the criteria.

"It's clear that Pfizer - and the agencies overseeing their trials - failed to follow established, high quality safety and efficacy protocols right from the beginning. . . Any government that approved this medical intervention for its citizens should have ensured that the trial had used the appropriate clinical endpoints and high quality safety science. .

..... Any government official who possesses this evidence and continues to allow its citizens to be inoculated with a toxic agent is, at the very least, negligent.....

Adding these shots to the child vaccine regimen flies in the face of science, medical freedom, informed consent, parental rights, and several well know health and experiment doctrines, ie; Barrington, Nuremberg et al.

This is not science. This is not safety. This is not in the best interest of vaccine recipients. This is using Americans, especially our children who are most impacted, as unwitting test subjects. This is human experimentation without informed consent. This is removing the parents from making the healthcare decisions for their children.

Remember your own criteria.....

BOARD CRITERIA FRAMEWORK:

The only purpose for which power can rightfully be exercised over any member of a civilized community, against his will, is to prevent harm to others. His own good, either physical or moral, is not a sufficient warrant."

Harm to others cannot be prevented by requiring children attending school to take this vaccine.

In closing:

I challenge your group to make the right decision.

I challenge you to step up to the plate and do something that will positively impact the children in our state for the remainder of their lives.

Your decisions will ultimately impact the rest of our nation's children and possibly children around the world.

Dare to be a hero for all, do not allow these shots to be included in the child vaccine regimen.

Subject: Re Vaccine Requirement for Kids

External Email

Hello - my name is Christy Owens and I have a high schooler, middle schooler and kindergartner in WA public schools.

In 2017, my youngest son was diagnosed with leukemia at the age of 16 months. This turned our world upside down. We spent the next 6 months in intense chemotherapy treatments, and the next 3 years in maintenance chemo. This March we are so happy to say that he will officially be declared a survivor!

In the first 6 months, we definitely had to isolate. We had our own "new normal" to get used to. Any virus, cold or bacterial infection had the potential to kill him. We isolated, we limited visitors, we sanitized regularly. We limited our time in public.

During this time, we refrained from seeing my sister's family who is mostly unvaccinated—opting to spend time together in a less risky season "just in case." I want to note that I did NOT expect others to accommodate our fears and scary realities. I did not ask her family to vaccinate as a requirement to see us ever again. We did not go to the grocery store and expect everyone to be masked—that would be ridiculous—maniacal even.

We are currently restricting and mandating everyone for the safety of a few, and this needs to stop.

Most children are not at risk from this disease. Did you know cancer is the number one disease killer of children? It is not COVID. How much time and thought have you given to pediatric cancer prevention? That's about how much time and thought COVID should get from you too. Do not buy into the hype.

Please stop with the mandates and restrictions for a population of people who are not at risk. You will not truly be able to protect the vulnerable—you will only serve to restrict the healthy.

Instead of vaccine mandates, please consider creative ways to serve vulnerable populations who are at true risk. Extending at home learning and other creative measures would be so valuable to these groups.

We know that it's tempting when you have a hammer sometimes everything looks like a nail—but the same treatment should not be standard of care or universal. We are not all the same.

I pray that God gives you creative solutions that are elegant and meet many needs and are well accepted by most if not all. Vaccine mandates are not this solution.

In the meantime please stop COVID mandates—hammering this issue is only serving to divide.

We are pulling for you to make good decisions that affect us all.

Thank you for listening,
Christy Owens

Subject: Vaccines for children vs VAERS Data

External Email

I'm a concerned parent and was wondering why the VAERS data is being completely ignored. According to this database (which was created after the pharmaceutical companies garnered complete immunity from all liability when their products caused harm with the passage of the 1986 ACT). According to this data these are NOT safe or even effective vaccines. In fact they are the MOST dangerous vaccines that have ever been developed and forced on the population.

The VAERS data was intended for use to identify safety indicators, for children in particular the risks incurred by these experimental shots are greater than the benefits. With no long term safety data available I believe it is more than unwise, but very dangerous to proceed with inoculating every U.S. child.

If you ignore this data I cannot believe you are innocent of simply making a mistake....this would indicate a strong inclination towards malice as you are knowingly placing children in harm's way in order to make yourselves feel safer. At no time in history have we sacrificed children to protect the elderly....this has always been the other way around.

Many Germans felt they too were just doing their job so long ago, in the end that did not save them from prosecution and ultimately execution. Those who intentionally harm children and claim ignorance or that you were 'just doing your job' may ultimately face the same end. Think before you continue on this dangerous path...Whatever the gov't is paying you for your compliance won't be enough, the same gov't you're counting on now will leave you under the bus to cover their own corrupt actions. Remember Benghazi...

COVID Vaccine Data (openvaers.com)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fopenvaers.com%2F covid-data&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ce3a570f0383146f583a108d9eb8e75c5%7C11d0e217>

Now that you've seen the data, you can no longer claim you didn't know.

Hello Board Members,

It has come to my attention that WA Board of Health will be discussing Covid-19 shot mandates for schools and recommendations for forcible quarantine and/or detention of those that disagree with policies. I request that you abandon the plan of forming a technical advisory group to explore COVID19 mandates and adopt a new rule of requiring products to have completed Phase 3 clinical trials before they can be added to list of school requirements.

One definition of insanity is to repeat the same mistake over and over again and expect different results. For almost 2 years we have attempted to follow the health recommendations of washing, masking, distancing, testing, isolating and vaccinating. By now it is apparent that the virus is "gonna virus" regardless of measures attempted. Thankfully, SARS CoV2 is acting in similar manner as all other viral pandemics and becoming more "virulent" (spreads easier) but less deadly. Real immunity is achieved with exposure and recovery as is evidenced by fact that those infected with SARS in 2002/3 cannot become infected with SARS CoV2 today! In contrast, Covid19 has managed to find a way to escape the vaccine as is evidenced by the incredibly high numbers of vaccinated and even boosted individuals getting sick and testing positive. Surely this fact has not escaped your knowledge!

As Health Board members, you are obligated to provide us with facts that support any and all recommendations or requirements.

1) what is the current rate of mortality for COVID19 infection and stratified according to age groups?

2) point to ANY measures that have reduced the numbers of fatalities (cases are not fatalities).

3) what is rate of all cause mortality in WA in 2020 and 2021?.....did the measures imposed reduce the number of deaths from prior year?

4) provide evidence of asymptomatic spread of SARS CoV2.

5) provide safety studies for masking children and randomized clinical trials for masks preventing spread of lab-confirmed upper respiratory viruses (not modeling of masks on mannequins).

6) make public the accuracy of testing - what is the rate of false positives and false negatives of tests and were results determined by manufacturers of the tests or unbiased 3rd party investigators?

7) provide evidence that the vaccines prevent infection and transmission and that they improve health of individuals who receive them compared to those who do not.

8) explain why so much focus on eliminating this 1 virus when human immune systems have successfully protected our growing population since the beginning of time? Are you aware that some viruses are beneficial for humans and can protect against various forms of cancers and heart issues? Did you know that your human virome contains over 380 TRILLION viruses?

Unfortunately, I do not trust that you have carefully investigated and logically determined adequate and measurable health remedies for which you are able to provide evidence. Before doubling down on measures that seem to HARM more than they HELP the overall health of citizens, please determine and make public the evidence to justify any policies.

Regarding mandating shots, know that the clinical trials will not be completed until 2023. Know that WA State has a legal definition of a vaccine that the C19 shots do not fulfill as they were never part of a living microorganism.

"Vaccine" means "a preparation of killed or attenuated living microorganisms, or fraction thereof, that upon administration stimulates immunity that protects against disease and is approved by the federal food and drug administration as safe and effective..."

<https://app.leg.wa.gov/RCW/default.aspx?cite=70.290.010>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx?cite=70.290.010>

Finally, do no harm! You cannot possibly know or care more about the health of children than do the parents of Washington children! Myocarditis is just one of the side effects that people are reporting. Heart muscle doesn't regenerate and is an

unnecessary injury to those who may suffer with for the rest of their life. How many others are now injured? What is the real rate of adverse effects following these EUA products and how can you determine if the safety studies have yet to be completed and there is no transparency of adverse event reporting?

Furthermore, how necessary or even safe is it to give a vaccine to a person who already has immunity to the pathogen? Many children by now have been exposed to the virus and have developed immunity without difficulty. Why consider a mandate for those not at high risk for adverse outcome should they become infected but who carry unknown risks of adverse reaction with getting the shot?

I look forward to hearing these concerns addressed and evidence for any and all recommendations to be presented on January 12.

Thank you.

Tumwater, WA 98501

Dear Chairman Grellner:

The ending comments by the board at today's meeting were both disingenuous and unprofessional. The analogies about measles and tuberculosis were amateurish and lacked sincerity. The comments were intellectually lazy for such an educated board. These comments did more to erode your board's credibility than it did to enhance it. I recommend the board look at their comments introspectively.

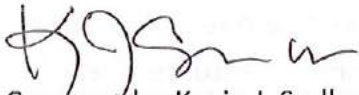

To make comparisons of measles and tuberculosis (TB) to HIV/AIDS and COVID19, damaged your credibility. As a TB converter, the Hospital Corpsman who gave it to over one hundred of us on my ship was placed into forced isolation and quarantine at the base hospital. You do not put healthy people into quarantine, you put the infectious. But you know that. Secondly, people recognize the dangers of smallpox, polio, and measles. Thus, vaccination programs at the time was welcomed, as the benefits outweighed contraction of those diseases. My father, who was my school principal, told me the reason why most people have the smallpox inoculation scar on their left (non-dominate) arm, was because the medical community at the time was fearful of the vaccine and thought an adverse reaction might require an amputation of the inoculated non-dominate arm. But again, the people took the risk to avoid the danger of the diseases as the benefits of not contracting smallpox outweighed the risks.

Therefore, it is obvious that the people can do risk analysis, they do it every day. They can find the factual data on the internet and see the overreach by the government on this issue. The risks presented by the research and analytical data doesn't justify the overreach, which explains the blood bath you received on both public comment periods as the representatives of the government. My recommendation is that you recall these comments and concerns as you deliberate.

You might also want to stop the stigmatizing of the electorate regarding vaccination status and pass that onto the elected leaders in which you report. The HIV/AIDS related comments made good points about stigmatizing groups and their medical decisions. The "our body and our choice" public comments also made good points. The current rate families are exiting public schools for home schooling or private schools will accelerate if you decide upon requiring the SARS/COVID vaccination for school attendance. Both the Cato Institute and Seattle Times have articles on the public-school exodus last year. The parents are acknowledging the SARS/COVID data for those age-groups does not support the vaccination decisions by the government or in your case, pending decisions.

I will be forwarding this letting to my elected representatives and a few legislators I personally know, so they can review the recorded board meeting today and come to their own conclusions of the board's comments.

Sincerely,

Commander Kevin J. Sudbeck, USN (ret)

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

Hello,

I'm writing to respectfully request that Washington please add the COVID -19 vaccine to the list of required vaccines for school attendance. We hope the state reflects Science and common sense Public Health practices in their decision-making. We'd love to feel our child is as safe at school as we can support him in being , and look forward to moving on from this pandemic.

Thank you.

External Email

Since Covid 19 and its variants are not vaccine preventable diseases, the alledged vaccine doesn't qualify for the list.
Current data on the benefit to risk ratio of the vaccine reveals that vaccination of school age children is pointless, or even detrimental.

By making vaccination a requirement, the Washington State board of health creates a liability for any harm the vaccination causes.

Respectfully submitted,

Ron Frantz

Strictly regular use of ivermectin as prophylaxis for COVID-19 leads to a 90% reduction in COVID-19 mortality rate, in a dose-response manner: definitive results of a prospective observational study of a strictly controlled 223,128 population from a city-wide program in Southern Brazil

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Femail.mg2.substack.com%2F%2FHXgsEoUKaccIuWK2tDjIcvDAryO_z7tmUMiEK-GrqouDFRcUz7VlkptrkHXc0MV8Sgea8Xc7AWzdIzJPkxi7MaGlrab-qlxRd8zYgDnVc07Ntu-eGeguhSvF_0kOGPNQ8kBQfSDYKO4dwZxAQkLDXaclgFk9wKKG3TqMBhV-Yj5TxMarR61buYn3G_9G_TiONmNByOaxEvM2YqXj_2BpJwh2GgSf9c-anan-1BnX3UPWJEWnu3aUP6CpLmooestpe5we_lxyUtZffvz6_vWtm7VHsEXXpEHPjHLY3byUxX93QsoVvKuEQXyuE-Bfbk2eq&data=04%7C01%7Cwsboh%40sbob.wa.gov%7Cc64d973725ff4c88a7f208d9ea641233%7C11d0e

This important preprint needs to hit alternative and mainstream media now.

Background: Previously, we demonstrated that ivermectin use as prophylaxis for COVID-19 was associated with reductions in COVID-19 infection, hospitalization, and mortality rates, and in the risk of dying from COVID-19, irrespective of regularity and accumulated use of ivermectin, in an observational, prospectively obtained data from a strictly controlled city-wide program in a city in Southern Brazil (Itajaí, SC, Brazil) of

medically-based, optional use of ivermectin as prophylaxis for COVID-19.

In this study, our objective was to explore the data obtained from the program to evaluate whether the level of regularity of ivermectin use impacted in the reductions in these outcomes, aiming to determine if ivermectin showed a progressive dose-, regularity-response in terms of protection from COVID-19 and COVID-19 related outcomes.

Materials and methods: This is a prospective observational study of the program mention above, that used ivermectin at a dose of 0.2mg/kg/day for two consecutive days, every 15 days. We obtained and analyzed the data regarding the accumulated dose of ivermectin use, in addition to age and comorbidities, to analyze the patterns of reduction of COVID-19 infection, hospitalization, and mortality rates, and risk of dying from COVID-19, according to the regularity and amount of ivermectin used in a 5-month period.

Following definitions of regularity, we considered as strictly regular subjects that used at least 180mg of ivermectin (180mg = 30 tablets), and as sporadic users subjects that used 60mg (= 10 tablets) or less during the 5-month period.

Comparisons between subjects that did not use ivermectin and these two levels of regularity of ivermectin use were performed. Analysis of the intermediate levels of ivermectin use are present in the supplement appendix of this study. To analyze hospitalization and mortality rates, we utilized the database of COVID-19 infections of all participants, from Itajaí and outside. To analyze COVID-19 infection rate and risk of dying from COVID-19 we utilized the Itajaí city database.

Propensity score matching
<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Femail.mg2.substack.com%2F%2FDMU24_pDMjLNuUVTaUrUbYc71kyQ3J7RReBWScnxYAESo5G1TlneRsEdM6rqSnbhSzIL6prQJE7YPEegIppwne_g_XpPCQLEv5AvXICEuSBWNpr-vViX93OqJPHbPRgdb9u2p4BPbSeH6ADHqrZT4sbieC89QluXmfdkD1u76DoihES6qD-l6I9Sg-lZsw2h398_UAFUvN49e65gooa7eHTPhS3ES8ZZd3oMgo6czb0w_hoqdaTGa19CzbM5XtzS1xenMadDe00DbXS9B9ar-y3IB-5Kqh7j_bxLQdImgHtExmdXH9nVDglq36FTGuW4cD6udF35m_JH03tvYqLz9Bakz3W5s5KsP1GHLnB0fwEj5K9>
(PSM) was employed, followed by multivariate adjusted analysis for residual differences (doubly adjusted analysis).

Results:

* Of the 7,345 cases of COVID-19, 3,034 occurred in non-users, 1,627 in sporadic users, and 289 in strict users, while the remaining cases occurred in the intermediate levels of ivermectin use. Strict users were older ($p < 0.0001$) and non-significant higher prevalence of type 2 diabetes and hypertension.

* COVID-19 infection rate was 39% lower among strict users [4.03% infection rate; ($p < 0.0001$)] than in non-users (6.64% infection rate), and non-significant 11% reduction compared to sporadic users (4.54% infection rate) ($n = 1,627$ in each group; RR, 0.89; 95%CI 0.76 – 1.03; $p = 0.11$).

* Hospitalization rate was reduced by 100% in strict users, compared to non-users and to sporadic users, both before and after Propensity score matching ($p < 0.0001$).

* After Propensity score matching, hospitalization rate was 35% lower among sporadic users than non-users (RR, 0.65; 95%CI, 0.44 – 0.70; $p = 0.03$).

Research and clinical practice show that using re-purposed drugs for Covid-19 have huge benefits. These include multi-drug, multi-staged treatments for Covid-19 disease that prevent severe disease, decreases hospitalization rates and decreases death. It is time our government and state licensing board recognize this and let physicians practice medicine.

'Off-label' drug use: an FDA regulatory term, not a negative implication of its medical use.

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Femail.mg2.substack.com%2F%2FEBwD170msY5zAUgurraVA8h-TGv0rsUtX4hed4Ix8rRSCzmDN8Yz4TmH3gXH-ayENMFL5W5id4QI2YOFN5Rzy0BW-2xtr4_u5yF-MfF_gkCznyLNa6I5PumyvfhCNWOy0wZHEq1gApMp3PZSUAWhuWfOdRP33mhB-_01B5XUQ7K0CFqPqTbnX9RviRT7l-oeoQq8Lpe67xrJR-zpyLGdI2Q3rRBu3e227-vEuECGgraG0TXLIZR8YMMgDZO3zMtK3bG-M5ogb9gQIW35JLei5hT-AZIXhVI&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cc64d973725ff4c88a7f208d9ea641233%7C11d0e
Int J Impot Res. 2008 Mar-Apr;20(2):135-44. doi: 10.1038/sj.ijir.3901619. Epub 2007 Nov 15. PMID: 18004389.

Highlights:

* A doctor's decision to inform the patient of the 'off-label' status of the prescription is not relevant to the physician's standard of care for an informed consent case.

* The FDA has specifically stated that its procedures and requirements have no effect on the practice of medicine and that the FDA does not prohibit doctors from prescribing drugs in an 'off-label' manner.

* The FDA's approval of a drug is immaterial to the effectiveness in the drug's 'off-label' use. In fact, prescribing medication in an 'off-label' manner can constitute the standard of care in many cases.

* A doctor's duty is to practice medicine and treat his patient, not inform the patient of the FDA's non-medically related labeling. Therefore, doctors should not be branded with the additional duty of disclosing non-pertinent information, such as the FDA's medically irrelevant distinction, to their patients

*It is estimated that 21% of all prescription drugs are prescribed "off-label."

For fun, I took the countries that reportedly use Ivermectin country-wide and compared them to the USA, Israel and Sweden. I chose a three month cut-off, although the results were extended further. I did this because I don't know when some of the countries began ivermectin use.

Can you guess who now has the highest death rates per million? Yeh -

1. USA
2. Israel
3. Sweden

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Femail.mg2.substack.com%2F%2FBsrDMOIAQpNwp9Ovb4BVfct2bNnH8rEzFZaUP3pPpXanmupnBx3hXVaoFXJ3FMhT8JoRoajEsmuux4qrLpRpzgYBuP-wanKkhxbOCK0oQ6p6ay5FYO3KQBgjGYubOCMXsjBmSgrsb2Bw-QHSg4RvyJ0XoVv2sdS8P-vUgP5s4H4dy2FKNew0ubS0UNrNAszNU9zxta1PTg_z4fTv0a0nJt_-8TntOS4ZSwje0eKkAe6u4IQg_QfgJ05Q93AtaPveAuLVOsd4aQ3tGJfQjx6o33IjIqCpRsaHQwWzmb4rmXe65W

Notes: I included - India, because although not all regions use Ivermectin - although the most populated due. Likewise Africa - which many nations treat with ivermectin prophylactically and these world maps do not break down Africa by Nations (weirdly imperialistic). I did not include Bulgaria, as although they use ivermectin - their death rate numbers are skewed for other reasons not worth delving into.

But it is still an interesting snap shot as to where much of the world is right now.

In regards to the agenda section 5 stating that this Covid vaccine prevents transmission from person to person is a lie! It has been well documented that even people who are fully vaccinated are still getting and giving Covid to others. Fully vaccinated people are also still dying in hospitals due to their other comorbidities. Unvaccinated people who are typically healthy have less than a one percent chance of dying from this. Children have even less of a chance of getting any extreme illness. This vaccine has no business being mandated! COVID-19 is not a threat to the common person. It is only a threat if you are old, obese or have other medical issues. Healthy average people do not need this vaccine!

Thank you,
Samantha Grant

Hello,

On the agenda notes for the Feb 10 technical meeting, #5&6, mentions that the vaccine prevents the disease, and that it reduces the transmission.

I'm confused as I thought it had been established that the vaccines only job was to lessen the severity of covid to the person that contracts it and that vaccinated people can still carry, transmit and become ill from Covid.

With that in consideration, although I am vaccinated, I do not agree with making it a requirement for schools or work places.

Thank you

Good morning,

I have a couple questions.

Why did you change your agenda?

You put out your agenda, then when people (understandably) became upset, you proceeded to put out more messages about misinformation when you were the one spreading it?

It did not go unnoticed what you have done. Many people wrote to TV stations and other news outlets hoping someone would pick up this story nationally. We will continue to monitor your actions and forward them as appropriate.

Regards,

Pam

Dear tag group,

I am a grandmother and I have three beautiful grandchildren. I am concerned about introducing the experimental MRNACovid shot to young children. I don't understand why you are considering this shot to be helpful? As I understand the MRNACovid shot no longer prevents or provides a person from the possibility of contracting Covid. There have been cases of Myocarditis in young children caused by this vaccine. The survival rate from Omicron is 99.99% for young children. I just don't understand how this shot can be helpful or beneficial to young children? I hope you will use good sense and kindness when making your decisions. The youth is so precious and our hope for the future.

Thank you,

Subject: Gene Therapy injections for children

External Email

We, as parents, reject the gene therapy injection which is being proposed for school admissions and media outlets. We will not comply with the forced injections. If the gene therapy injections were successful, much like the common vaccines, measles, chicken pox etc. then injections would be successful. These gene therapy injections, which are NOT vaccines, cause great physical harm to individuals and are not preventing the spread of covid. Hence, the need for many injections, boosters, masks social distancing etc. The injections will not stop as the virus continues to mutate. CDC states children 5-12 are less likely to become deathly ill from covid. 1 in 1 million children will die from covid. Hardly a reason to inject an MRNA gene therapy injection into young children. I suggest you read peer reviews on the effectiveness of the gene therapy developed and the damage it is doing to the unsuspecting population that failed biology in school. Japan, Demark are currently rejecting the gene therapy drugs in favor of alternative methods, Ivermectin HCQ etc. to treat covid patients with much greater success than the gene therapy injections. You will not mandate these experimental injections in our children. You will not harm our children with forced injections. Period. Just like you tried to gain police powers to enforce this madness, denied you were, then admitted you did. You cannot tell the truth. I'm afraid the misinformation being promoted is your group in my opinion. You are a public servant. This means you will answer to us, not the pharmaceutical companies or the fake science to pass off this dangerous gene therapy you call vaccines.

Subject: Urgent need for course change

External Email

Dear Health Board,

As an author of curriculum to prepare young people to flourish in adulthood, I was heartbroken by an article from a public school teacher on the devastating impact our health-related policies are having on children. I urge you to read this article with an open mind and thoughtfully consider an immediate course change toward mandates (current and proposed) that are destroying lives in the name of public health. The latest research from Johns Hopkins on the futility and damage from lockdown policies only confirms the need for policy reversal. Our children's futures are at stake, and we are all counting on you to do the right thing.

Here is the article for your review: <https://bariweiss.substack.com/p/im-a-public-school-teacher-the-kids>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fbariweiss.substack.com%2Fp%2Fim-a-public-school-teacher-the-kids&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cf4e3cefb22194d41127f08d9e74b2419%7C11d0e217>>

Thank you for your consideration and service.

I am against adding the COVID vaccine to the k-12 requirements. It has been shown that the vaccine is more dangerous to kids than COVID is. To approve this would be beyond idiotic and the result will just be more kids leaving the public system.

I can only think the reason there won't be any public comment time during this meeting is because you all already know you'll receive an overwhelming response of those who will comment against this.

External Email

January 15, 2021

Dear,

Kaitlyn Donahoe

This letter is regarding the Washington State Health Department meeting on January 12, 2022 to make proposed changes to allow local health officers to use law enforcement (WAC-246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246 100 045) following refusal to voluntarily comply requests for medical examination, testing, treatment, counseling, vaccination (WAC246-100-040). These specifics come from WAC 246-100. This includes the Covid-19 injections as part of school immunization requirements using WAC 246-105.

This ruling, which is not a law, but a ruling will force people to containment camps who are not vaccinated. Using the false assumption that the vaccines are only the solution to end the covid 19 and the variants is grossly negligent. There is overwhelming evidence and data showing there are many alternative therapeutics and treatment solutions for Covid-19. Such as and not limited to, vitamin c, d and zinc, black seed cumin treated early has significant positive results. Ivermectin and Hydroxychloroquine were being used at the very start of the Covid -19 pandemic with great success and continue to be used. They have no long term side effects and have been used for decades and are very inexpensive to produce and readily available. We have witnessed these two drugs save two seniors from dying from the covid 19 virus and many individuals that have used these therapeutics and treatment solutions and were cured of Covid-19.

As an elected or public official, your first obligation is to no harm, known as common law 1st, do no harm its constitutional duty. We are all equal no one is above the law, no one lives above the law. You are causing harm. Rule of law which clearly states that the government as well as private actors are accountable under the law.

I have researched by listing and reading from many Medical and Senior Law experts, which they state no one knows the long-term effects of these Covid 19 vaccines.

What I have seen on the VAERS report dated back in Aug 8th, 2021, 571,830 total reports of adverse effects, only between 1-10% of adverse events are reported in VAERS by some estimations.

Deaths 12,791, Life-threatening 13,140, permanently disabled 16,044, Hospitalizations: 51,242 Anaphylaxis 5,282 bell's palsy 4,461, miscarriages 1,505 heart attacks: 5,590 severe allergies 24,3050.

According to WHO, World Health Organization, the Vigil Access was launched by the World Health Organization in 2015 to provide public access to information in VigiBase. This is the WHO global database of reported potential side effects of medicinal products.

I have listed a few and these are the total adverse reactions:

Mumps vaccine: 713 from years 1972-2021

Hepatitis B vaccine: 104,827 from years 1984-2021

Pneumococcal vaccine: 236,307 from years 1980-2021

Influenza vaccine: 272,438 from years 1968-2021

Covid 19: 2,513,185 from ONE YEAR 2020-2021

This is illegal unlawful and unmoral. You are causing harm.

Respectively,

Howard & Tracy Moreland

Hello, I have concerns already for the overly legalized list of vaccines mandated. We do not need to add another. Especially not to add a vaccine not having gone through and verified for safety. This would relate to Agenda Item #9

For Agenda Item #11, To prohibit change of 246-105 WAC, Must be prohibited from adding any health treatment that is not thoroughly tested past Phase III safety trials. Safety being not maiming or death, early onset or future.

I am an educator.
We don't require flu shots, why would we require Covid shots! Not a question.

My 5 th grade students asked me during a science unit about how if we breathe out CO2, how can it be good to wear a mask and breathe it in all day long....out of the mouth of babes.

This control grab needs to stop. Use your heads and stop believing the garbage you read. Stop being lazy, do your own research and stop letting people sucker money from the state.

Coronavirus has been around for centuries, it is not containable, 2 years in and you haven't figured that out??!! This virus moves through animals, but even as I print it is continuing to slow down and become less and less severe (as virus's do). Offer a yearly vaccine, such as we do with the flu. But mandate one, NO!!

We need to remain America, and continue to have and respect freedoms.
Stop making billionaires out of our pharmaceutical companies and CEOs

Please do not mandate the covid "vaccine". That would be my final straw and I would remove my kids from public education and seriously look at moving out of this state. No one on this board, or in this state, or government leader, can ensure the safety of this shot. NO ONE. It can't be done. There is no safety data. It hasn't been out long enough. And if you're doing any critical thinking at all, or research, or paying any attention to what is going on around the world, you will see that athletes are collapsing on fields and gyms in record numbers... This has never happened before. We watched as a 20 year old BYU basketball player went numb on the court, during a game, and was taken off the court. He now has myocarditis and will never play basketball again. 20 years old. 100% healthy before receiving the shots. My son is a college basketball player and we pray every day for his and his teammates continued health and safety. My sons best friend, 20 years old, just had an emergency surgery to remove a blood clot, before it made it's way to his lungs, which would have probably killed him. Just a few months after receiving his shot. My friend's 27 year old wife had a stroke right before Christmas, with in a few weeks of receiving her booster. And I could go on and on and on. There is a facebook posts with HUNDREDS OF THOUSANDS of comments about adverse reactions and death, people have experienced since getting their shots. Until Pfizer releases ALL of the safety data it is absolutely abhorrent that we are even having a conversation about adding this shot as a requirement to going to public school.

Anyone who wants the shot can get it. YOU want it? Get it. A teacher wants it? They can get it. A student wants it? They can get it. No one is saying they can't. But it absolutely should not be mandated. If my child is forced to get it and has an adverse reaction, you can bet I will be coming after every agency, the department of health, the school board, OSPI for forcing it. The drug companies are not liable. That means you are. If you mandate it you are accepting liability. You will be in violation of the Nuremburg codes, as you can not get informed consent, because no one knows what the side effects actually are. They won't tell us.

The right answer is no. PERIOD. The shot is available for anyone that wants it. That is enough. Have some morals and ethics and stand up and do the right thing. For us, our children, our grandchildren, you're children and grandchildren. Be better than a political pawn in our power hungry tyrant of a governor's game that he refuses to quit playing. We all can see it doesn't stop the spread or transmission of covid. And children have a .0000018 chance of dying from covid. So WHY??? WHY would you ever even consider making it mandatory? The risk of myocarditis becomes 1 in 6 for a male under 40, after being given this shot. Yet that same male has a 99.98% chance of surviving. It just doesn't make any sense. None of it makes sense. And it's time people that have the ability to exercise common sense and make the right choices do. For all of us little people that do not have a voice. YOU are our voices. We need you to hear us and act in our best interests. PLEASE!!!!

Subject: Covid Tech Advisory Feedback

Hello

Re: "COVID-19 Immunization Technical Advisory Group/Feedback Requested
The State Board of Health has coordinated with the state Department of Health (DOH) to convene a technical advisory group (TAG) to evaluate the COVID-19 vaccine against the Board's immunization criteria and then make a recommendation on whether to add the vaccine to the state's list of required immunizations for school entry. The WA State Board of Health is currently gathering feedback on potential inclusion"

Will there be public meetings on the above? Or where can one submit feedback?
My daughter is in elementary school at Seattle Public Schools

Thanks
Eric Dillin

Subject: Masking in schools

External Email

To whom it may concern:

It's been a VERY long time since us parents have gotten any communications from our district and state leaders regarding when masking for our students is going to be over. This has gone on entirely too long. Isn't it time masks should be an option for students and staff? I feel no one is advocating for us who wish to move on from this endemic. The staff and students who are vaccinated and want to continue to wear maske are advocated for but we are left frustrated and ignored.

We are one of the last states to have these mandates! Why is this "emergency" lingering for 2 years?! It's time to speak up and update us families on when this is projected to stop. It's been crickets this entire school year.

Frustrated parent,
Katie

Hello,

I am writing to you to STRONGLY encourage you to vote NO on the vaccine mandate for school age children. You know that the majority of parents are against this and many, many more children will be leaving the already failing government school system if you do this.

Also, there is zero proof that this inoculation does anything other than cause potential harm to kids. Not sure how you all sleep at night knowing this is a huge money grab by the pharmaceutical companies and does nothing for public health.

Thank you,
Deborah Hibbs

9.

Do you have any special expertise relevant to this topic?

2. No

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

The Covid vaccine requirement discussion of the advisory group

11.

Are you Pro or Con on the proposal?

2. Con

I do not believe with the amount of infections and the cdc stating it's 6x-24x the actual number of cases reported that we shouldn't look at natural immunity as part of this. We also need the next 5-8 years of data accumulated as parents to feel comfortable with long term affects. We do not require a flu vaccine, we have sent our kids to school regardless of the pandemic and the shots are available to who wants them, this should not be recommended at this time not required, the data on severity doesn't back this at all. The people at risk we know are not this age group unless obese, kidney, diabetic, heart issues. They will get vaccinated. We know being vaccinated doesn't stop cases, infections nor stop giving it to someone. Hold off for the data on these vaccines before requiring it. I am vaccinated so I can be protected but I do not want my children to be required with it at this time and they have had it and have antibodies.

Subject: Covid-19 vaccination mandate

External Email

I received a link to complete a survey for COVID-19 vaccination immunization for children. I spent over 10 minutes writing out thoughtful responses only to see that "the maximum number of responses have already been received...". Why send out a survey if you're only looking for the first 100 (or 1000) responses? (Survey is supposed to be open for another few days).

I support medical professionals' opinions. If doctors and scientists recommend children get vaccinated, I support their decision. We don't get layman opinions regarding other immunization requirements; why ask what uneducated people think when it comes to the health and safety of our children? My kids are vaccinated because I believe it's the responsible thing to do. As someone not in the medical field, I wouldn't force others to do something I'm uneducated about. But if doctors believe it's imperative to public safety, I would support a mandate/requirement- just as I do for other immunizations.

Thank you,

Nate Kontos

Subject: January 12th, 2022 zoom meeting

External Email

The original email was sent 01/12/2022. It did not arrive at its destination. Here is option #2.

Good morning and happy Wednesday.

Thank you for providing the opportunity for public input today. I only became aware of this last Friday evening. By then It was too late for public comments. I saw no public announcements except the internet rumor mill Friday evening. The only public announcements came Monday.

Perhaps better public communication by all possible means (television, radio, internet) would help.

Thank you too for the clarification of the meeting agenda, specifically what it does not include, i.e. proposed changes to WAC 246-100-070.

With that said I have chosen to leave the meeting.

I would appreciate clarification of what power the current WAC 246-100-070 actually can impose on the public concerning immunizations, exemptions and failure to comply.

As a retired 43-year veteran of public education who taught immunology (how the immune system works), the value and history of vaccines, and the benefits of natural acquired immunity in my human anatomy and physiology classes as well as being a high school football and wrestling coach all my required immunizations are up to date.

The exception is what the N.I.H. calls the experimental mRNA and DNA Adenovirus protocols produced by Pfizer, Moderna, Astrazeneca and J&J.

My issue follows on the history of the Nuremberg Trials, resulting in the 1947 Nuremberg codes.

U.S. law embraced the Nuremberg Codes with two laws:

1. 21 cfr 50.23 & 24. It is illegal to make anyone participate in an experimental program using coercion.
2. 18 cfr Section 2331 Subsection 802. Anytime a U.S. citizen is forced to do something they would not otherwise do is coercion and domestic terrorism.

To be sure, reading the text of these two laws is laborious in distilling the details into simplicity.

Two final questions:

1. If these two federal laws are accurate does the current WAC 246-100-070 stand in violation?

2. If the aforementioned laws are accurate is the Washington State Board of Health willing to be in violation? Are there exemptions? If so please explain.

Lastly, the FDA requires by law Package Inserts to be enclosed with every dispensed drug. The purpose of these P.Is is to inform the recipient of all the controlled experiments showing the efficacy of the drug, but more importantly the potential adverse effects.

The recipient now has the information necessary to give informed consent. I wonder how many ask to see the the P.I. before getting injected with these protocols.

Watch any televised drug commercial. In fine print and fast talking person these potential adverse effects are mentioned.

If I ever choose to step out of the Control group of this worldwide experiment and potentially partake in the "jab" protocols I will demand to see and read the P.I. Only when I have the evidence of the efficacy and adverse effects required in the P.I. will I be better equipped to give my informed consent. It will be my choice not coercion.

I have a lot more to say. I apologize for this not being a Laconic statement. As a former teacher and athletic coach I choose to leave no stone uncovered when committing to excellence.

Respectfully,

Doug Cowan

Subject: Covid Vaccine Requirement

External Email

To whom it may concern,
I am a mother of two children - 6 and 8 years old. I understand there is a meeting (zoom for the public) on Thursday, February 10th from 9am-3pm to discuss the possibility of making the covid-19 vaccine required for students k-12. Since public comment is not allowed during this meeting, I decided to email the board members. My children are healthy. They have been exposed to covid from my husband and I twice since last April. They ever showed symptoms, never tested positive, they thrived. Their bodies fought anything that came their way which is why I am **STRONGLY ENCOURAGING** you all to please consider **NOT** making the covid-19 vaccine a requirement. Children have been exposed to this and are not affected by this whatsoever. Why would we inject our children with something that is still in the experimental process when they don't need it? I am not against vaccines. My children have had all the vaccines I had when I was a child. My children no longer get the flu shot. Their immune systems are so strong and build every day. From getting natural immunity from my husband and I, their immune systems are 10x stronger than another child who receives the vaccine. There is **ZERO** science behind this vaccine. Social Media and the MSM are pushing this in so many ways and rewarding people who receive it. Does that not raise red flags? Everything about this **SCREAMS CONTROL**. My husband and I refuse to vaccinate ourselves because we have had it. People call us "conspiracy theorist" but everything we have said in the past is now becoming the truth.

We will not allow our children to get vaccinated just to attend public school. That is unconstitutional, we have our god given rights, and it is coercion.

Please **PLEASE** do not make this a requirement to attend public school. My children love going to school. They love seeing their friends and making memories. Please don't take that away from them.

Thank you for taking time out of your day to read my email.

Sincerely,
Heather Feroy
Federal Way Public School District

Subject: Fwd: WSJ.com: The High Cost of Disparaging Natural Immunity to Covid

External Email

Dear State Board of Health,

How you the governing body over Washington State Policy can continue to ignore Natural Immunity, Damage to children from masking and public meeting where you pretend a WAC language has never been used in Washington pretty outrageous.

Dr Bob Lutz did use such involuntary quarantine tactics and then you unanimously hired him to the State Board shortly after his firing from the Spokane Board of Health.

Authoritarianism originates with petty bureaucrats and power hungry elected officials like Jay Inslee abusing their emergency powers to destroy small businesses and freedom of the residents of Washington State.

Why did you not stand up and follow the actual science such as cloth masks have and always will be a face decoration and nothing more. You all knew this and still let us be one of a few states with a mask mandate.

Only truly stupid people or those who crave power over others put in place and or support fake science and policy to satisfy their own inflated egos.

Next you Doctor's will be telling people leeches and blood letting are scientific cures. I ask you to find your integrity and go back to your oath of doing no harm. The opposite of what you have been doing the past two years.

There will be studies for years to quantify the damage done to our children. The OSPI of Washington is not a regulatory agency and neither is WSSDA and threatening school district for violating bad policy that everyone points to you and will be remembered.

You could have stood up to Jay Inslee and not threatened Doctors medical licenses or damaged people with erroneous policy and instead you remained silent and did nothing or worse took away medical licenses of Doctors who actually followed their oath.

Stop lying to the public as I have friends who are former military doctors and they have been prescribing Ivermectin since 1997.

People like yourselves have damaged the credibility of the medical profession in a way that will take the rest of my life to recover if it ever does.

Just like Fauci during the Aids crisis he pursued a monolithic plan of an Aids Vaccine and not therapeutics which became the answer. He discounted and subverted research and people died just like they did during Covid. You and others like you are complicit in these deaths.

Sincerely,

Tim Caldwell

Respectfully, Sir/Madam,

I'm writing to let you know that I am uniting with many people in Washington State to stand against the tyranny we are facing.

This letter is regarding the WSBOH meeting scheduled for Jan. 12, 2022.

According to information I have seen on the web in recent days, it appears that WSBOH will be discussing proposed policies that pertain to -WAC 246-100-070, WAC-246-100-045, and WAC 246-105.

You do not have our permission.

You need our permission.

Our kids are not your property.

Our bodies are a temple of the Holy Spirit and is not owned by the government

We are born with free will and we will retain that until death.

Thank you,

Sharlene A. Greene

Dear WA State BOH,

Please review this information & link. How long are you, Fauci, the cdc, the fda, the Biden regime, the dishonest corrupt government bureaucrats & the medical community going to ignore, censor, lie & deny all of the science, facts & proof?

Eventually the truth will be exposed & you will be held accountable for crimes against humanity & the Nuremberg codes.

Sincerely,

#WeThePeople

Subject: Question/Comment from the public

The following survey response is submitted:

1.

Please select one:

Comment on the web

2.

Please enter your comments or questions in the space provided below:

Will the Department of Health open another survey for the community members to give their opinions about requiring COVID-19 vaccination for school age children? The threshold setup on the survey needs to be increased so more community member opinions can be entered. If that is not an option, please accept the follow as community feedback with regard to requiring Covid-19 vaccinations for school-aged children. I, Kim Ah Choy, a US Citizen living in Washington State for the past 41 years, strongly support a requirement that all school-aged children receive the full Covid-19 vaccination series prior to entry into any public school within the State of Washington. It is a matter of public health and safety. Mahalo Nui Loa (Thank you very much), Kim Ah Choy

Dear Covid Vaccine TAG,
I am writing to use as a concerned citizen, parent and grandparent of Washington. Please do not require the Covid vaccine for students in Washington. They are a very low risk group and there is no data on the long term affects of this biological agent. Protect the health of our children and wait for further research to be done before you require it.
Sincerely,
Angela, Shoreline

I am emailing you in reference to the voting that is taking place today on the Covid 19 mandate for children to enter schools.

I strongly oppose this mandate. I will be home schooling if this takes place in our state- which will pull me away from my full-time Clinical Practice.

The risk for children is low for Covid-19 but the risk they are taking with the vaccination runs high (we now know there is a high risk of myocarditis).

If teachers feel unsafe they should mask and vaccinate.

Please consider all facts before voting today.

Thank you for your time.

Hello Board Members,

I understand that you will soon be meeting to discuss covid vaccines for kids in school settings. I respectfully ask that this not become a part of the regular vaccine schedule requirements for school age children, and that it will stay optional. There are no studies available that show the vaccine effectiveness in the K-12 setting nor does covid pose a deadly risk to 99.9%+ of children. Adding a vaccine requirement for something that is statistically not a threat to children is unnecessary. Please give us all the freedom of choice.

Thank you for your time.

1.

Please select one:

Other

2.

Please enter your comments or questions in the space provided below:

As a teacher in Washington, I am hoping that the Department's decision on vaccine mandates for students will be based on health and not on political motivations. I am a special education teacher and many of my students are medically fragile and extremely susceptible to illnesses. Masks and social distancing have helped to keep transmission low, thankfully. I worry that the decisions to require vaccines and to do away with masks will be politically motivated and not based on the health of ALL students and staff--especially due to the fact that a survey was sent to Washington parents and not to school staff.

Subject: K-12 grades- Please Mandate Covid vaccination

External Email

Good evening,
We are hoping that a mandate will be implemented for Covid vaccination for K-12 grades.
Masks and vaccinations will hopefully help get our kids back to In-person in the Fall of 2022.
The vaccinated should be in schools and those that do not wish to vaccinate can zoom.
We have been patiently waiting.
Just like chicken pox, MMR , and other vaccines required to attend school, the Covid vaccine should be of utmost importance.
Thank you for your time,
The Leonard family

Final.pdf*

External Email

Dear Members of the BoH, DoH, Secretary of Health Shah and the Office of the Secretary of Health,

I am following up on two emails that I sent and have not received read receipts on.

In order to ensure that the emails and their attachments are confirmed as received, I am sending my email in a PDF format, just in case the size and format of the email has been flagged by email software as suspicious.

Very Respectfully,

Xavier A. Figueroa, Ph.D.

Keith Grellner, R.S., Chair
Dr. Thomas Pendergrass, Vice Chair
Elisabeth L. Crawford, Mukilteo Council Woman
Temple Lentz, M.S., Clark County Council Woman
Vazaskia Crockrell, M.B.A candidate
Fran Bessermin, B.A.
Bob Lutz, MD, MPH
Umair Shah, M.D., M.P.H. and designee of Secretary Shah, Tao Sheng Kwan-Gett, M.D., M.P.H.

Members of the Washington State Board of Health, Department of Health and the Office of the Secretary of Health,

I write to you today on the issue of COVID19 inoculations, mask mandates, and the use of lockdowns. You are all officers on the board of health for Washington State and two of you are elected officials in council member positions. Four of you have advanced medical and scientific training. All of you are failing in your designated duty to protect the health and safety of the citizens of Washington State and in upholding the rule of law.

The recent denial of ICWA's petitions on January 12th, 2022, that was meant to remind the Board of Health (BoH) that federal and state laws are required to be upheld, was summarily dismissed on the grounds that, to quote Dr. Pendergrass, "I do not want to be in the setting where I am preventing some future event from occurring." It is concerning that members of the board agreed and voted to allow future boards to potentially violate state, federal and international law. As the board should be aware, all the COVID19 inoculations are still under E.U.A. and the provisions under 21 CFR section 360bbb3(a) are still in effect. It is impossible to provide informed consent if you do not have the necessary data to provide to physicians and recipients of medical products, as the clinical trial are ongoing.

A concerning aspect of the BoH's position on the COVID19 inoculations for children and the technical advisory group (TAG) convening is that the TAG should never have been formed in the first place. The BoH holds that the TAG was convened to review all the data on the COVID19 inoculations, but that cannot be possible. SARs-CoV-2, for our younger population, does not demonstrate a significant morbidity or mortality risk compared to pneumonia and influenza (P&I; Figure 1). The current totality of scientific evidence already demonstrates a far greater threat to the health and safety to our children from these experimental therapies (Pfizer/BioNTech, Moderna and Janssen) than the SARs-CoV-2 virus ever did (Figure 2). What is apparent is the bias displayed by the Washington State DoH in presenting data to the BoH and overreliance on the Western States Scientific Safety Review Workgroup. This does not relieve the BoH of its responsibility to demand a complete review of the existing data. If the Washington State BoH was solely reliant on the Western States Scientific Safety Review Workgroup recommendations, the BoH has left gaping holes in its review of the totality of scientific, epidemiological, safety and medical data that it needed to analyze.

I am sure that I do not need to remind the BoH that all PCR/NAAT and antigen tests are in the market under an emergency use authorization (E.U.A.). They are not cleared to diagnose or even have a guarantee of being accurate or reliable. Medical and technical publications on the reliability of the PCR/NAAT tests show a wide range of false positivity

(<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7934325/>; BMJ 2020;369:m1808 doi:

10.1136/bmj.m1808; <https://www.jwatch.org/na52823/2020/11/30/accuracy-rapid-sars-cov-2-antibody-test-kits-limited>), as well as the need of verifying the ability to culture virus in order to guarantee that PCR tests have a modicum of reliability at Ct values above 30 cycle times (<https://academic.oup.com/cid/article/72/11/e921/5912603>). The indicated articles are just a sampling of what has been published.

The reliability of the 6 month results from the Pfizer clinical trial as an indicator of the outcomes of the general population have been questioned (<https://blogs.bmj.com/bmj/2021/08/23/does-the-fda-think-these-data-justify-the-first-full-approval-of-a-covid-19-vaccine/>) and the post-authorization (note: this is not a post-marketing surveillance report) review by Pfizer itself shows a higher than expected morbidity and mortality (**5.3.6 CUMULATIVE ANALYSIS OF POST-AUTHORIZATION ADVERSE EVENT REPORTS OF PF-07302048 (BNT162B2) RECEIVED THROUGH 28-FEB-2021**; <https://phmppt.org/wp-content/uploads/2021/11/5.3.6-postmarketing-experience.pdf>): 1,223 deaths out of 42,086 patients (a 2.9% risk of death). This is unprecedented and concerning that the BoH has not addressed or acknowledged the Pfizer report and event. I am unaware that the Western States Scientific Safety Review Workgroup has even commented or reviewed this information.

The totality of evidence in the United States of America is indicating that there is a tightly linked correlation between COVID19 administration and reports to the VAERS system (Figure 2). Until coroners and local pathologist begin the critical autopsy work on these patients, we have to rely on these systems to make health policy choices. So far, the roll out of the COVID19 inoculations are indicating a higher rate of AEs, SAEs (stroke and myocarditis) and death than historical averages for all recent vaccine reports (Figure 3). Even comparing all VAERS deaths from 1990 up to 2021, the totality of deaths is orders of magnitude higher than the closest comparable year (2018-2019) and exceeds six-sigma deviations (Figure 4). I have not seen a single statement by the BoH and the Western States Scientific Safety Review Workgroup comment or review any of the data presented here in this letter.

The reports submitted to VAERS are supported by over 1022 peer-reviewed medical article (see references) that align with the list of expected side effects that were disclosed at the FDA Vaccines and Related Biological Products Advisory Committee – 10/22/2020; (<https://m.youtube.com/watch?v=1XTiL9rUpkg>). The potential side effects are listed:

1. Guillain-Barré syndrome
2. Acute disseminated encephalomyelitis
3. Transverse myelitis
4. Encephalitis/encephalomyelitis/meningoencephalitis/meningitis/encephalopathy
5. Convulsions/seizures
6. Stroke
7. Narcolepsy and cataplexy
8. Anaphylaxis
9. Acute myocardial infraction
10. Myocarditis/pericarditis
11. Autoimmune disease
12. Death
13. Pregnancy and birth outcomes
14. Other acute demyelinating diseases
15. Thrombocytopenia

16. Disseminated intravascular coagulation
17. Venous thromboembolism
18. Arthritis and arthralgia/joint pain
19. Kawasaki disease
20. Multisystem Inflammatory Disease in Children
21. Vaccine enhanced disease

Thrombocytopenia/ Thrombosis	Stroke	Ischemia/ischemic	Myocarditis	Pericarditis	Guillain-Barre	Myelitis	Adenopathy	Cancer	Bell's Palsy	Encephalomyelitis
306	12	12	212	60	15	18	52	10	26	1

The table above highlights the most common reported post-vaccine associated side effects that are in the attached list of Articles/Reports. The articles were collated and prepared by the Save us Now network (<https://www.saveusnow.org.uk/covid-vaccine-scientific-proof-lethal/>), but I was able to confirm that all are peer-reviewed articles or related to the post-vaccine effects or programs/policy to reduce vaccine hesitancy.

This should be more than sufficient to cause a moment of pause by the members of the BoH and to re-assess the appropriateness of continuing with the current path.

As part of my writing to you, I have a few questions that I would like answered by Secretary Shah, his designee or the members of the DoH and the BoH.

1. When the COVID19 vaccination program began in Washington State, where any members of the Secretary of Health's office, the Washington State DoH or the BoH provided with the list of potential side effects that were presented to the Vaccines and Related Biological Products Advisory Committee? Did the Western States Scientific Safety Review Workgroup review the data available or the known and unlisted components of the COVID19 inoculations?
2. If a potential list of side effects was not provided, what steps (if any) did the Secretary of Health's office, the Washington State DoH or the BoH take to acquire a list of potential side effects and the ingredients in the injections? Was there a request sent to the Western States Scientific Safety Review Workgroup to provide you with such information?
3. What steps (if any) did the Secretary of Health's office, the Washington State DoH or the BoH take to ensure that physicians, clinicians, nurses, pharmacists, and other health care professionals could provide informed consent to individuals receiving these COVID19 inoculations?
4. Where there any discussions or meetings held by the Secretary of Health's office, the Washington State DoH or the BoH to establish a stopping condition for the COVID19 inoculation program?

5. Where there any attempts or recommendations by any members of the Secretary of Health's office, the Washington State DoH or the BoH to request or review deaths or serious adverse events that may have been linked to any of the COVID19 inoculations in Washington State?
6. Have any members of the Secretary of Health's office, the Washington State DoH or the BoH attempted to collect or review autopsy or pathology data on adults or children reported to have died following or be suspected of dying from one of the COVID19 inoculations?
7. The Western States Scientific Safety Review Workgroup announced on May12, September 24, October 22, November 19 of 2021 and January 5, 2022 that they had reviewed the data from the Pfizer, Moderna and Janssen clinical trial and were continuing to recommend COVID19 inoculations from Pfizer, Moderna and Janssen, as well as the boosters. Has the Western States Scientific Safety Review Workgroup commented on or analyzed the Pfizer CUMULATIVE ANALYSIS OF POST-AUTHORIZATION ADVERSE EVENT REPORTS OF PF-07302048 (BNT162B2) RECEIVED THROUGH 28-FEB-2021? Has the Secretary of Health's office, the Washington State DoH or the BoH reviewed the same?

I am sure that I will have more questions as time and information from public and private sources become available. I look forward to receiving your information and learning more about the process and decision making used by the various offices and departments. I hope that this dialogue will help to support the health and safety for all Washingtonians.

Very Respectfully,

Xavier A. Figueroa, Ph.D.

Dear Technical Advisory Group,
I would like you to consider the fact that including a Covid-19 shot for K-12 school children is not a wise thing to do.
There is no published research at this time that shows it is effective in this age group. Just released last week, a large study by John Hopkins compiled over the past two years has shown that lockdowns, masks and vaccines has had little to no effect of stopping the Covid-19 virus.
Deaths in children of this age from Covid are very few in comparison to others on the list. In fact, because of the isolation, etc. suicide is the 3rd leading cause of death for teenagers ages 15-19.
Then consider the side effects from this vaccine, and it is all the more reason why I would never have my child vaccinated. I would hate to find out my child was one of the ones that died or had permanent bad effects for a lifetime.
Please vote NO on requiring this vaccine. That is a parent's decision.
Thank you.

Please do not add the covid-19 vaccine to the list of requirements immunizations for school. We do not know the long term effects on our children or fully understand the efficacy. Our children are not at risk of death or severe sickness from the virus. Please continue to allow and advocate for informed consent and medical freedom.

Thank you

**State Board of Health Washington
Olympia, WA, 98504**

Dear State Board of Health,

I am writing to you on behalf of all the children in Washington State. This is in regards to the issue of mandating children to be inoculated with the Covid19 gene therapy (vaccine). First of all can you please provide a copy of the ingredients that are in the children's vaccine that you are preparing to mandate? Then can you provide a copy of the testing done that proves the gene therapy is safe and effective?

All the studies done on animals with the Covid 19 gene therapy show the animals died. So, don't tell me you are going to just use the children as test subjects? You all are the Public Health Officers and one would hope you took an Oath to keep people safe from harm. The numbers are staggering on the injuries and deaths from the Covid 19 gene therapy for adults yet, you are willing to just go ahead and push for the children to receive the deadly toxins. How can you people justify this in your conscience? How many children need to be harmed or dead before you stop the push on this stuff.

The psychological damage alone from the masks, lock downs and school closure is heartbreaking. How can you justify putting the children's life at risk to save face? I am bewildered that you would just look the other way and not do the right thing which is to stop this madness. I am a mother, grandmother, nurse educator, and a wife plus I have been in health care for over 35 years and this is absolutely heartbreaking to think you would consider such a thing. If the scenario was different and the (vaccine) gene therapy had passed a rigorous testing and studies proved it was safe then I would agree. This is not

the case whatsoever and children are being harmed and only GOD knows what the true numbers are on vaccine injuries. One would think if this virus was that deadly, then we would be picking people up off the floor, the streets, and find them lying all over the place. This is just not the case and the children are at lower risk of catching it or spreading it.

I plead with you to reconsider this before it is too late and you cannot take it back. My heart just drops to the very pit of my soul when I think about the harm you people are about to instill on the children.

Sincerely,

Jodi Dotson

As you are preparing to answer the questions before you as the BOH TAG regarding COVID "shots" for school children I implore you to Please, Please, Please study the document sent to you by Informed Choice WA responding to all 9 criteria. These "shots" fail the test of all 9 of the criteria.

"It's clear that Pfizer - and the agencies overseeing their trials - failed to follow established, high quality safety and efficacy protocols right from the beginning. . . Any government that approved this medical intervention for its citizens should have ensured that the trial had used the appropriate clinical endpoints and high quality safety science. .

..... Any government official who possesses this evidence and continues to allow its citizens to be inoculated with a toxic agent is, at the very least, negligent.....

Adding these shots to the child vaccine regimen flies in the face of science, medical freedom, informed consent, parental rights, and several well know health and experiment doctrines, ie; Barrington, Nuremberg et al.

This is not science. This is not safety. This is not in the best interest of vaccine recipients. This is using Americans, especially our children who are most impacted, as unwitting test subjects. This is human experimentation without informed consent. This is removing the parents from making the healthcare decisions for their children.

Remember your own criteria.....

BOARD CRITERIA FRAMEWORK:

The only purpose for which power can rightfully be exercised over any member of a civilized community, against his will, is to prevent harm to others. His own good, either physical or moral, is not a sufficient warrant."

Harm to others cannot be prevented by requiring children attending school to take this vaccine.

In closing:

I challenge your group to make the right decision.

I challenge you to step up to the plate and do something that will positively impact the children in our state for the remainder of their lives.

Your decisions will ultimately impact the rest of our nation's children and possibly children around the world.

Dare to be a hero for all, do not allow these shots to be included in the child vaccine regimen.

Hello Washington State Board of Health,

I am writing to request that the Covid-19 Vaccination not be requirement for children to go to school in Washington State. What you are requiring is against the constitution and against science. This is being pushed against people's will. The Covid-19 vaccine is not a true vaccine and it has caused many injuries in young people and killed many. This is still being pushed for your own benefit!!!! The blood will be on your hands if you continue participating in this evil.

Vaccines for kids

There is no published literature on pediatric Corona virus vaccine effectiveness in the K-12 school setting. Suicide is the NUMBER 3 killer of children in the 15-19 age range for Washington state. Corona virus vaccines for children should not be our priority unless and until proven data is published to justify making it so.

Dear WA State Board of Health members:

I am writing to express my opposition for adding the COVID-19 injection to your vaccination schedule for school admission, or for any other such rule or mandate.

The COVID-19 injection is not a "vaccine". By its very name — a "vaccine" it does not fit within the parameters of your vaccine schedule.

The COVID-19 injection is an Emergency Use Authorized, experimental drug. It does not stop transmission — one shot, two shots, or boosters. COVID-19 is just like the regular flu, and it's going to be in our midst — variants and all, just like different strains of the seasonal flu.

Has a flu shot ever stopped the flu? No, it has not.

Under these circumstances, a COVID -19 shot should not even be considered for the school schedule of vaccinations. To do so is an overreach of your authority.

Below is a link that the entire Board of Health must review. It is a legal summary before a Grand Jury of a worldwide indictment against the COVID-19 pandemic. This summation was presented on 2/5/2022, and legal proceedings will be underway this very week.

This is not a long video. It is excellent. Please view this — your entire Board, and put this information in your "thinking caps".

Thank you
Marsha Stockdill

To Whom It May Concern:

I wish to be heard regarding the board's upcoming determination as to whether or not to include the COVID-19 vaccination to a list of required childhood immunizations. I implore you to carefully consider the safety data of this vaccine as it relates to usage in children. In my view, when weighed against the CDC death rates due to COVID-19 regarding children 0-18 years of age, in light of Director Walensky's relatively recent admission that individuals who have succumbed to COVID-19 had an average of four comorbidities, the reported side effects from this vaccination when administered to otherwise healthy children is simply not worth the risk of administration. This is simply about risk assessment and, frankly the medical community, public health, and governmental authorities have failed the public repeatedly in this regard throughout this pandemic. From the beginning, the primary focus should have been on the vulnerable. Fortunately, within the context of this virus, children are generally not that vulnerable to death. There is a rather large contingent of the public who do not consider administration of this vaccine to children as acceptable. It's my personal prediction that if the board decides that the COVID-19 vaccine is to be added to the required immunizations list the result will be that many parents will withdraw their children from public education. The fallout will be truly catastrophic. To proceed in this direction would be truly wrongheaded.

Thank you for your thoughtful consideration.

External Email

Dear Ms. Kahler,

My name is Erica Teodoro and I am the parent of two students in the Peninsula school district.

I am writing to you today to ask that you please consider giving local control to the Washington school districts as to whether or not to lift mask mandates in schools. Schools around the country are starting to create exit plans for the mask mandates and it seems reasonable that our schools should be allowed to do the same should they see fit.

My kids have noticed a stark decrease in morale at their schools compared to pre-pandemic due in part to teachers having to use precious education time instead to police masking. They didn't sign up for this, they aren't trained for this, and everyone's patience is wearing thin.

Please, help our students get back to the business of growing and learning and thriving in their schools by allowing the individual districts to make the choice to lift mask mandates.

Thank you for your time,

Erica Teodoro

Concerned parties:

A week ago, the The Washington State Board of Health's Technical Advisory Group (TAG) was gathering public opinion for use in decision and policy-making via an online survey regarding the creation of policy requiring Covid-19 Vaccination for children in schools at the URL:

Microsoft Forms

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fforms.office.com%2FPages%2FReLQEU4mCkCLoFfcwSfXLeFTdB7APrJAvkZ64U-RFNVUQTIGRFVMOFM1MEVNVU1Ktk9DN085REhZNy4u&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cb5>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fforms.office.com%2FPages%2FReLQEU4mCkCLoFfcwSfXLeFTdB7APrJAvkZ64U-RFNVUQTIGRFVMOFM1MEVNVU1Ktk9DN085REhZNy4u&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cb5>

Microsoft Forms

It has sine been taken down as it expired per their own terms.

The survey is flawed in that there was no identification required of survey participant (anyone [or bot] could say they live in Washington), but more importantly, there was no restriction to HOW MANY TIMES the survey could be taken by the same IP address (person, or bot). Hypothetically, an internet bot could have registered any amount of responses, corrupting the data. Individuals from private interest groups could answer multiple times (to an unknown maximum of survey entries).

We were alerted to this flaw on Twitter and confirmed our device could supply answers and submit to the data pool more than two times.

There has been no indication or statement from the WSBOH on this flaw or corrupted data pool being used to decide policy on this volatile issue.

This implicates similar errors (and possibly intentional interference) may have already been part of the TAGs practice.

Actions should be taken immediately to make new gathering tools and retake an accurate survey that is not tampered with.

We are considering notifying news agencies, and searching applicable laws that protect

citizens from using corrupt data for decision and policy-making.

Subject: Comments for the Immunizations Technical Advisory Group

External Email

Dear Immunizations TAG members,

I would just like to say that I hope you folks have done due diligence on this subject. There is a lot of current information from the CDC, scientists, doctors, etc. with updated concerns for the Covid-19 shots. VAERS has a lot of reported side effects that are very concerning!! Please table this and DO NOT agree to add this shot to the list of required vaccines in WA state schools. This mRNA shot is still so controversial and WA state is so over the top still with the mandates the government is still requiring. Entire countries are discarding their mandates and we have so many states here in the US that are not mandating anything! But WA state is so bent on continuing this erroneous shot and all the mandates connected to it for some unexplainable reason. People are getting so fed up and I don't doubt that there will be an even larger exodus from the school systems of kids whose parents refuse to take the risk of their children's health, than what has already happened. Our children deserve so much better!

A vote to NOT recommend the Covid-19 shots for school age children in WA state would be appreciated.

Dear Miss Donahoe,

In the event that you "take Possible Action" regarding Chapter 246-105 WAC please know that I am absolutely NOT in favor of Covid vaccine requirements for children for school and daycare. This would definitely be overreaching and immoral. If you refuse to allow unvaccinated children to attend then give them their education dollars and they can go elsewhere.

I won't lie... the following item also has me very concerned. The thought that a local health officer has sole discretion to do something like this is incredible.

WAC 246-100-040

Procedures for isolation or quarantine.

(1) At his or her sole discretion, a local health officer may issue an emergency detention order causing a person or group of persons to be immediately detained for purposes of isolation or quarantine in accordance with subsection (3) of this section, or may petition the superior court ex parte for an order to take the person or group of persons into involuntary detention for purposes of isolation or quarantine in accordance with subsection (4) of this section, provided that he or she:

A local health officer may invoke the powers of police officers, sheriffs, constables, and all other officers and employees of any political subdivisions within the jurisdiction of the health department to enforce immediately orders given to effectuate the purposes of this section in accordance with the provisions of RCW 43.20.050

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx&cid=3a2f2fapp.leg.wa.gov%2FRCW%2Fdefault.aspx>>
(4) and 70.05.120

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx&cid=3a2f2fapp.leg.wa.gov%2FRCW%2Fdefault.aspx>>

.

Where are the rights of "We The People" when it comes to this sort of action. The fact that they only have to have a "reason to believe" is crazy.

I think it's pretty obvious that these items need to be changed in light of where we find ourselves today and the massive overreach of our existing government.

Sincerely,

Mary K Geiselman

We will NOT allow any of our family members to take any experimental drugs of which this drug is being called a "vaccine" for the virus that the Chinese government horrifically spread to the world two years ago. This "vaccine" is not a vaccine because it does prevent one from contracting the Chinese virus or spreading it. Moreover, children are the least likely to get sick from it or being vectors. We will homeschool and/or move from this state need be.

Dear Policy Advisor Donahoe, Washington State Board of Health Members, et.al.

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group.

Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets the vaccine, one group gets a placebo. More people died in the Pfizer vaccine group than in the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

A matter of fact was a double blind study that was done with only 4,000 adolescents, aged 12-15. A study this small will not show up risk. Of the inoculated group of 1,005, zero tested positive for C-19, while the placebo group of 978 had 18 who tested positive for C-19. The Pfizer group claimed great results. However, since adolescents are a statistically 0% risk of death from Covid-19, and a very low risk of severe illness, the inoculation is of little benefit to them. Instead, it presents a very real risk of adverse events.

The Pfizer study wasn't actually designed to find those. A serious Adverse Event, including death, that occurred at a 1/800 rate might not even show up in a sample of 1,005 people. But, in this case, it did. Among the 1,005 adolescents, there WAS at least one serious adverse event - the death of Maddie de Garay.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA-approved version of the vaccine is Comirnaty, which is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccine adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions have historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time.

There is a push to have Nuremberg style tribunals over the deaths and crippling reactions to the C19 vax rollouts. I would advise listening to these experts convened together by Senator Ron Johnson of Wisconsin. Many of these individuals are world renowned experts in their fields. You want to consider vaccing children when the rise in myocarditis has been reported to be catastrophically high, especially in young males. The world will not forgive if you abuse your powers to cause harm.

Good Afternoon TAG,

Firstly, our children cannot be subject to an experimental vaccine that is still under the EAU. Furthermore, the FDA approved Comirnaty and Spikevax are not even available at this time in the US for any person.

Secondly, it typically takes 15 years for a vaccine to be approved. We don't know the long term effects of this vaccine, let alone the short term.

Thirdly, kids are not getting sick from covid, let alone dying from it.

Fourthly, those who have had it are inoculated, just like any other virus, such as chicken pox. What makes Covid any different other than a catalyst for a means to control and undermine people.

CHILDREN ARE NOT AT RISK! IT'S AN EXPERIMENTAL THERAPEUTIC THAT DOES NOT EVEN CREATE IMMUNITY!

Kindly,

Andrea

To whom it may concern ,
We need to have a discussion on natural immunity if my child has had Covid I see no reason for a vaccine that may or may not have an affect on my child. Namely heart or blood clot issues
Also it should be a choice if the child wants to wear a mask or not this is detrimental to the learning process and is has had major issue in children's physical and psychology. This group of children are not dying of Covid but may have it in conjunction with a myriad of differing co morbidities which results in death (rare)
I don't want to have to homeschool my children. Love our faculty and staff at our community school, I don't want to have to choose between this or homeschool so I'll caveat let's make it optional to get a vaccine or wear a mask. I believe in Free agency and I'm against any mandates of any kind.
Thank your for your time a very concerned parent.

Please, if you are seriously considering implementing the requirement for Covid vaccine, watch this video and think about the serious consequences you may be placing on young children. Also think about the culpability you will be placing on yourselves and the Washington State School systems if you require this vaccine and then in years to come have a rash of new cancer diagnoses for children, myocarditis, or other yet unknowns of this vaccine. You can have your own opinions on these Dr.s, but you have to be honest with yourselves that there is some truth to what they are saying. We DO NOT know what theses vaccines could possible do to our children, we do not know the long term side effects, we do not know how this vaccine will be viewed in the years to come. PLEASE leave it to parents choice!

I would hope that taking into account

II. Disease Burden Criteria

5. The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population.

That you all will realize that this vaccine does NOT prevent this virus.

This vaccine is just like the flu shot and shouldn't be required for attending school.

Subject: C-19 shot for children

External Email

Hello,

There is no published literature currently on pediatric covid-19 effectiveness in K-12 school setting.

And let me just add that every person is different and we don't all tolerate everything the same, any vaccine, medication, or treatment for ANYTHING should be a decision between parent, physician, and child. These are basic rights we have and it is NOT the decision of the school or any other to force anything, especially an EXPERIMENTAL DRUG.

Imagine if you will, this is YOUR CHILD OR GRANDCHILD, and your doctor has many concerns about the treatment and health of YOUR child.

Imagine he says "I would NOT advise this shot, medication, or treatment. But YOUR CHILd MUST get it NO MATTER WHAT! The company that makes the drug, has no liability if HARM comes to YOUR CHILD. You would just say, " oh well they say we must so who cares if you have adverse reaction or death.

I really doubt any of you would put YOUR CHILD up as a genie pig, ESPECIALLY when they already have NATURAL IMMUNITY, from having covid already, and/or they have very small if not no risk. You can still get and spread covid vaccinated or unvaccinated COMMON SENCE says those two are the same.

Respectively, you , the state or GOVERNMENT are NOT the boss of people, or their children or family.

This is unconstitutional, and in my home YOU ARE NOT GOD. The risk is ours, we can take it or not ... NOT YOUR DECISION.

Subject: Vanessa Thacker Absence 2/1/2022 & 2/2/2022

External Email

I am very disheartened by discrimination I am experiencing from Green Mountain Elementary School. My 5th grade daughter, Vanessa Thacker, is not allowed to attend school on 2/1/2022 & 2/2/2022 against my will.

I received an email and phone call on Monday 1/31/2022 that my daughter was "exposed" to covid through the bus ride to/from school last week. I was informed that she is only allowed to continue to attend school if I sign over my rights to let a nurse give her a covid test on 2/2/2022. This would allow her to attend 2/1/2022 and 2/2/2022. However, if I chose to test her myself as her parent and legal guardian, she is NOT allowed to attend school until she can provide a negative test performed on 2/2/2022. This means she misses a full two days because I am not willing to sign the test to stay document. If I desire to test her as her parent, then she is not "safe" to attend class on 2/1/2022 and 2/2/2022.

Her rights as a student have been taken away. This is completely absurd. Where is the science that says if a nurse has a list with her name on it, waits 48 hours to see her to perform a test, indicates she is safe enough for her to be in attendance of her class?

To take away any student's right to learn in this manner is pure discrimination.

I believe it is completely unfair to push these children around like pawns, as if their education doesn't matter.

Covid is no longer an emergency. Vaccinate or mask up for hours during school is unethical. The survival rate for children is 99%!!! Why would we continue to put children up to unknown long term side effects of an EUA vaccination (this vaccine is still in investigatory stages)? Studies prove vaccinated individuals still receive and pass along the virus. Risk of vaccination is significant and STRONGLY outweighs any proven benefit.

Following mandate(s) risks:

1. Unknown long term and short term side effects of Vaccination.
2. Limited oxygen intake to the body and brain due to masking during normal and athletic activities for hours at a time.
3. Unknown long term and short term mental health issues.

4. Unknown long term and short term communication issues.

All risks for a benefit of what? Surviving a disease that is treatable. Surviving a disease that has a survival rate of 99% in their age group? Also, what about natural immunity?!

Subject: Commit to no COVID vaccine mandates on children

External Email

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

Jan. 31, 2022

Dear WBOH Board of Directors, and
Technical Advisory Group (TAG) members,

Comments on the topic of "constructive oversight of communicable diseases & general health of Washington residents" - related to concerns around the genetically engineered COVID vaccines.

Here is the current job description (on 1/20/2022) of your group from the Dept. of Health website
<https://www.doh.wa.gov/AboutUs/PublicHealthSystem/WashingtonStateBoardofHealth>:

"The 10-member Board of Health provides a citizen forum for the development of public health policy. It recommends strategies and promotes health goals to the Legislature and regulates a number of health activities including drinking water, immunizations and food handling. The Board is housed with the Department of Health although it is an independent entity."

1. I want you to remember that "The Supreme Ruler of the Universe" is in our Preamble of our State Constitution, and that the Declaration of Independence can be seen as a Primary Preamble to our U.S. Constitution - and we can interpret its phrase "All Men are created equal" to "God loves all humans as good-hearted parents love their children. God may have a special plan for each person's soul, determined before birth."

Thus, I ask you individually to consider being thankful to the Supreme Ruler of the Universe and attempt to align our Department of Health to please The Supreme Ruler of the Universe.

Residents need to look at the Bible as a whole, culminating with the New Law (people filled with the Holy Spirit, thus having an internal law or conscience), and Jesus' guidance to fight spiritual rather than physical battles with the great help of God and Jesus. Residents need to notice that peacemakers since the time of Jesus are to be considered "sons of God" (a highest position).

The Bible teaches us to move from animality to being "upright" / civil.

I hope each resident can come to know in this state that this is their choice: to be animalistic or to follow God and Jesus to be "upright" and civil.

Caring for our health, not putting into our bodies toxic things - that is upright and civil behavior. To just eat what tastes good, that is what children do who have not yet learned important things about health.

I realize there are many residents and maybe many staff members who haven't looked closely at most of the 66 books in the Bible (some are only a few pages like the book of Jonah and Paul's letters), and so many would not know these things about God, Jesus' Heavenly Father, and the Holy Spirit, Jesus' Heavenly Mother, or Jesus and his teachings. I think it is important for individuals in this state to not only look at the guidance towards civil code of conduct in the Bible, but to notice how God guided many cultures around the world to be upright and civil with many of the same customs - like marriage is between a man and a woman. We see the virtues being honored and developed as well. To be human is to be humane. We have a ways to go.

Another important reason for us to recommit ourselves *individually* to looking up to The Supreme Ruler, is that when we look to, give thanks to, and try to please The Supreme Ruler of the Universe, (who I understand as the God of Abraham, or Self-Existent One), then we don't get "Relative Morality." We don't get some powerful people who decide some of TSRUs children are of no value and thus should be killed.

Not everyone notices that God told Abraham in Genesis 12:3 that all nations shall be blessed from him. And not everyone notices that Paul (who it seems spent 3 years learning from Jesus before his ministry started) told the Galatians in chapter 3:29, that if gentiles follow Jesus, that they are Abraham's seed.

If we look to TSRU (Self-Existent One) and *individually* seek TSRU's (Self-Existent One's) wisdom in the Bible, more of us will see what [he] told Jeremiah in Chapter 1 of the book Jeremiah: "I had plans for your soul before you were in the womb."
<https://biblehub.com/interlinear/jeremiah/1.htm> So, if we come to believe this, we thank Self-Existent One by caring for all humans, even those in the womb. If a woman doesn't want to care for the baby, later she might want to, but we can think the child is God's child and care for it as such.

2. I believe you Washington State Board of Health members can best serve The Supreme Ruler of the Universe if you create a completely separate Washington State Department of Holistic Health - separate from the current Washington State Department of Health. The latter can more accurately be renamed the Department of Medical Intervention. The staff of both departments should be personally thankful to the Supreme Ruler of the Universe [the Heavens] and willing to put God above the dark spiritual leader "mamona" that has to do with putting the pursuit of money over The Supreme Ruler of the Universe.

At first the new department would be best housed at a different building, with staff to review research done around the world. State employees who are thankful to The Supreme Ruler of the Universe and who chose not to get injected with the artificial and possibly toxic, Nano items during this pandemic would be good candidates to work in this department.

This department would analyze and share information that might help people regardless of whether or not anyone can make money off the modalities. In the Bible's book of Matthew,

Chapter 6 verse 24, Jesus said: It is not possible to serve two masters...Jesus (listening to his Father in Heaven, The Supreme Ruler of the Universe ["the Heavens"]), called followers to serve God, rather than "mamona" (the god of money/wealth/shiny things).

<https://biblehub.com/interlinear/matthew/6-24.htm> Some of this information would be what nutrient help boost people's immune systems, and what tests indicate a strong immune system.

3. In the Preamble of our State Constitution residents are called to thank "The Supreme Ruler of the Universe."

It makes sense to clarify "the Supreme Ruler of the Universe" as the God of the Bible.

If we clarify The Supreme Ruler of the Universe is the God of the Bible, we stay consistent with the law of our nation - as we consider the Declaration of Independence and how we fought and won Independence from Great Britain, with the God in the Bible in the picture. So it makes sense we would offer thanks to this God--who claims to be a Supreme Ruler of all things created in Heaven and earth (see <https://biblehub.com/interlinear/colossians/1.htm>, verses 15-17. It sounds like some connection with DNA to me) -- for this victory, and other blessings. Because we won the war, we can worship God freely and not have the Church of England, and other English leaders overseeing our nation today.

Signers of our Declaration of Independence had the God of the Bible in mind when they "put their lives on the line" in calling for our independent, "united states of America." They signed that document feeling that the God of the Bible would help us to win our freedom from tyranny. Residents prayed to God --"in the name of Jesus"-- to help them survive and be victorious in that war. Many of the Revolutionaries drew strength from biblical stories where God helped his followers first physically conquer barbaric opponents (in the Old Testament), and then spiritually conquer unseen malicious opponents (in the New Testament) with Jesus/Yeshua.

4, The term "Supreme Ruler of the Universe," allows us to explore how the "God Almighty" we see in the Bible may have guided other cultural groups around the world.

(we look at the moral law - however we are looking at if they follow the law that coincides with our laws: the law 2.0 in the New Testament - Love God and love one another, as Jesus demonstrated love, and as we love ourselves. Also the New Testament Law or moral code of right and wrong can be within each person as they directly connect to God's Holy Spirit for best action and guidance. Paul talks about this "new law" in his letter to the Galatians -- when we ask for and are filled with the Holy Spirit, we want to do the right thing.

5. How does our State Constitution Preamble relate to encouraging health for our residents?

It should be helpful for health and wellness if residents are encouraged to talk to one another about "The Supreme Ruler of the Universe" and the varied religious and philosophical belief systems here where the areas of overlap are and where the areas that differ are. Religions and philosophies that guide people to do things that are "right" and "good" according to how Jesus clarified these things, should be compatible with our laws.

We can thank God by caring for ---furthering the health of--- our species, other species, our ecosystems, and our atmosphere of our planet. Our health is connected to the health of all of these things. Helping the health of ever creature on earth comes back to help out the health of our residents. We can thank God by protecting our amazing DNA and our amazing immune systems. We thank and honoring God by protecting God's design, God's creations.

We can also thank The Supreme Ruler of the Universe, by pleasing this God. People should know that early founders read the Bible and understood we are to follow the New Testament Law 2.0 that Jesus demonstrated. It was to focus on loving God and loving one another as Jesus showed love, and as we love ourselves.

Our laws in the U.S. and State follow "God's law 2.0" in the New Testament of the Bible that Jesus demonstrated.

According to God's law 2.0 of the Bible, "the Body of believers is the Temple." Also each human body is a temple. We are to care for each of our bodies as together they are the new temple to God. Each body of a believer can house God's Holy Spirit.

Things may go better than worse for us in our state if we will individually encourage one another to learn about, and thank this God, by putting this God above other "small g" gods such as science, pursuing money (mamona is the god of money/wealth/shiny things). This is the first part of "God's law 2.0" which corresponds to the first few of the 10 Commandments - to love God above other things.

It can help save lives to let people know that if they are not aware of the need to ask for the guardianship of the Holy Spirit, then they can acquire a downward-pulling spirit. This is also an issue of health - downward-pulling spirits are involved in depression, suicide, drug abuse.

6. What about residents who don't like to hear the title "The Supreme Ruler of the Universe?"

If people are possessed by a malicious spirit, or are not familiar with the stories of Father God, the Holy Spirit, or Jesus, or for other reasons, they sometimes don't want to hear these sorts of spiritual terms.

I know of 2 young adults who have gone through the public educational system in Washington State without parental coaching about God and the Bible when they were in elementary school. Later, even with a parent encouraging them to read some of the Bible or listen to stories, they want to avoid the topic of Bible stories, lessons, and learning about God. They may have learned in public school to NOT look into who "The Supreme Ruler of the Universe" may be. It seems for the health of our state, it would at least be good for public school curriculums to have teachers point to The Supreme Ruler of the Universe being in the Preamble of our Constitution, and encourage students to get with their parents and look into who this is to them. And that students should feel free and be encouraged to relay experiences with this Divine Being that have led them to believe in the existence of this God above other gods. It seems teachers could support an atmosphere of respect and encouragement for any students to share their understanding and thanks for this God.

If people don't think this God exists, or don't like this God, it should be reasonable if they can voice their concerns in a respectful way and put up with a reasonable amount of thanksgiving of others in public forums.

We also can thank God by reminding one another it is okay to take time in public settings to recall and share God's wisdom and guidance in the Bible.

It may be helpful to let doubters learn that scripture in the Bible indicates that if we do not search for God, God will leave us alone. (See the book of Jerimiah, around Chapter 29). It could help if non-believing residents could learn of testimonials of how some residents believe they were helped by "The Supreme Ruler of the Universe." It could help if non-believing residents could know that God loves them.

Since your role is to

More residents might value the Bible and it's teaching stories, and take it more seriously if they knew scriptures have been carefully copied and Modern Hebrew was developed to have a number associated with each letter so that numbers above each line could be tallied up at the end of each line to ensure correct copying of each line. This occurred ~500 years B.C. during the Babylonian Exile. In the 1940s and '50s, many of the scriptures in the Bible were found including books with Ancient Hebrew, written before ~500 B.C.. The entire book of Isaia from ~700 B.C. was found. The books were in the form of scrolls. They were stored in long clay jars in the Dead Sea Caves. This showed that the content of the books had not changed over time. Most residents probably don't know about many important archeological findings that point to the Bible being a collection of stories rooted in historical events.

To help with the peace (low-stress=health) between our residents, somehow it would help if more parents could read the Bible and teach God's law 2.0 to their children. We can have greater peace in our state if more residents come to understand God's plan is to treat each other as beloved brothers and sisters. We can view The Supreme Ruler of the Universe like a loving father and a loving mother. ("Father God" and "The Holy Spirit" -- in the Old Testament

The Holy Spirit is described with "female gender" Hebrew words such as breath, healing, and wisdom.)

connecting with other residents to know that it is a free-will choice if they want to read and study the teaching stories in the Bible and then to see the merit of following God. We can encourage parents to study the Bible and teach it as it makes sense to them.

If residents know moral guidance in the Bible as Jesus clarified, then residents can compare and contrast how other religions and philosophies match up. It is likely God spoke and guided cultures all over the world with similar moral teachings.

There is still free choice. Some people become angry at God, or haven't seen, or heard proof of, God's existence, (i.e. testimonies from people they believe), so they don't believe in God. We can ask one another which of these things is happening. Some people also haven't heard stories of God's benevolence and justice.

Harboring negative emotions we now know can lead to various states of physical dis-ease. The Christian counselor Charles H. Kraft, in his book *Deep Wounds Deep Healing*, tells of many Christians getting released from negative spirits just by giving negative memories over to Jesus.

I understand "The Supreme Ruler of the Universe" to be "LORD" or "Yahweh." Yahweh is from YHWH - Modern Hebrew alphabet letters. The Ancient Hebrew term was YHVH - pronounced Yod-Hay-Vav-Hay. Some of us understand the name to mean "Self-Existent One." There has recently been a vision of an initial cubish design (Logos/Frequency/Utterance) with balls at the corners that began the creation of this universe (or multiverse). This was uttered by this God.

The term "Lord" in the Bible tends to generally refer to Jesus. People can resolve some conflicts by looking at the original Hebrew terms in the Old Testament and original Greek terms in the New Testament. One can find these at Biblehub.com with the Interlinear Chapters version. Jesus to be a God above other "small g" gods, but not the God of Creation.

a.) Regarding the topic on Jan 12 WSBOH Public Meeting Agenda about adding Washington Code language to reduce stigma, fear, and prejudice for people with HIV, and about allowing people to legally use a gender pronoun that is not aligned with their birth gender.

Because our Constitution calls residents in the Preamble to thank The Supreme Ruler of the Universe," and because this mirrors our U.S. Constitution which has our Declaration of Independence as a Primary Preamble,

And because our early lawmakers sought to bring God into discussions of public policy,

And because early residents read the Bible, and so held up the God of the Bible above the government, (as we see in our preamble statements),

We can clarify that “God” and “The Supreme Ruler of the Universe” are the same as the God in the Bible.

Some see God as one in the same to include Father God, the Holy Spirit and Jesus.

Some of us see God as “Self-Existent One” -- The Supreme Ruler of the Universe/of the Heavens -- who encompasses a Father aspect (“Father God”), and a Mother aspect (“The Holy Spirit”). And we see Jesus also as a God, a God above other “small g” gods, specific to overseeing our planet and humans, and maybe this area or the cosmos. We understand Jesus works in unity, as One, with Self-Existent One. And we understand “Self-Existent One”/The Supreme Ruler of the Universe” gave Jesus all authority over Earth and the Heavens. However, since we see Jesus sitting on the right hand of his Father after his ascension to Heaven, it is not apparent in scripture that Jesus accepted that invitation.

So as we affirm our laws are consistent with the teachings of Jesus, the son of Self-Existent One, sent for humans especially, we can note that Jesus clarified the most important laws for our time by demonstrating that humans are to be civil and to care for one another.

Since our laws are based on the Bible, residents having any pathogen can know to look to The Supreme Ruler of the Universe, and love one another as Jesus demonstrated love.

Thus we don’t need an extra clarifying code for how we should treat people with Human Immunodeficiency Virus (HIV). They should be treated with kindness, because they are God’s children. (But humans have free will, so we can pray that people come to know this guidance, and the realness of God/Self-Existent One/The Supreme Ruler of the Universe.)

However, there is ignorance about this virus and how it transmits. Thus, people need to know adequate information so that they can understand what their personal risk is regarding the transmission of HIV. People need to know if it is true that if HIV-positive people are doing certain things to keep their immune system in good shape, and if the virus is on any fluids like from a paper cut, that if the fluid doesn’t get into their fluid, they should not get the virus.

People need to know if it is true that if they have their immune system in an optimum condition, even after exposure to HIV or many pathogens, including SARS Cov2 and variants, that they will not likely catch this, or it will not likely spiral out of control. There is a need for state testing and state-verified data around pathogens.

Any laws concerning HIV could possibly extend to SARS Cov2 because I saw Luc Montagnier saying the HIV genome is within the SARS Cov2 genome. (!) We could look into this. Luc Montagnier, is originally from France. He won a Nobel Prize for discovering HIV. Wikipedia

relays that he now works at a University in China. As we consider saying anything about this code, it should be wise to determine if HIV *is* within the SARS Cov2 genome or not.

Whether or not this is the case, it should be helpful to be open about this along with reducing stigma by pointing out how great it is that people with HIV have been able to reduce even the transmission of HIV if they are diligent to care for their health and/or also use retrovirus drugs to keep the virus in remission.

Stigmas even happen now with the COVID injected and the COVID19-uninjected people.

A simple answer is that we can just go back to the simplified law to love God, and love one another as Jesus demonstrated.

People need to have support to do what they feel is the best to care for their bodies as their temple (if they are going to follow Self-Existent One's guidance in the Bible relayed by Jesus).

b.) Regarding the topic on Jan 12 WSBOH Public Meeting Agenda about adding Washington Code language to allow people to legally use a gender pronoun that is not aligned with their birth gender:

As far as introducing new gender descriptive terms to our code of law, I recommend that as we point out that many residents remain thankful to God, the Supreme Ruler of the Universe (or multiverse),” for helping earlier settlers win the war to be Independent from the Church of England and Monarchy of Great Britain. Two Washington residents understand it is God's plan for people to "stick with the gender they were born with." Thus to remember God I recommend we identify people according to their birth gender. People could say, “(name), birth gender: (M or F), so for formal processes they could be referred to according to pronouns that fit with their birth gender. This will also help in their medical care and to prevent things like men acting like women and winning women's races, men acting like women and sneaking into women's locker rooms, and other acts of deception.

God allows freedom of choice, but it can be seen as against God's plan for residents to try to change their identity to different than their birth gender.

Parents should know the first Chapter of Jeremiah in the Bible. It is where God says he had a plan for Jeremiah before he was in the womb. So this may be true for all humans. It is my opinion that we can try to discern the plan by looking at the family structure and maybe the place we were born into, as well as our gifts and any prayers righteous people may have given before our birth.

Parents should also know that “God is angry with parents who allow mutilation of any child's birth gender.”

<https://peacewellness.wordpress.com/2021/07/05/god-is-angry-with-any-parent-who-mutilates-their-childrens-birth-gender/>

c.) Wise Management of the Earth's systems - and Sexual Self-Control

It is my understanding that God has intended sexual self-control and that sex is for creating children. It was created to be pleasurable so that our species would "be fruitful and multiply."

In my opinion the words that got translated as "have dominion over" and "subdue the earth" can be better interpreted as "manage" (the Earth) -- and wisely manage makes sense. So until we do better to feed, clothe, and educate every human it seems (this is my opinion) we should try to encourage residents to try to limit the number of biological babies we have - like to 1 or 2.

All residents over around age 16, not just eunuchs, could read the first few chapters of the Bible's book Romans. Residents can notice Paul was encouraging people to practice sexual self-control.

d.) God and Jesus both said "Marriage is between a man and a woman." This is so children can have a role model of their gender.

We can encourage parents to look at Genesis, Chapter 2, where God said marriage is between a man and a woman, and where Jesus repeated this in Matthew , Chapter 19. It is up to parents to teach this to their children if they so desire. Parents can decide if it may be that God has this plan so that children can have a role-model for their gender. Parents can decide if they want to follow the wisdom of "The Supreme Ruler of the Universe" [of the Heavens] or not, and if they want to teach this information or not to their children.

e.) Eunuchs who align with God, can have high place in Heaven, and Jesus hints that it is better for eunuchs not to marry.

In Matthew, Chapter 19, Jesus encouraged married couples (if possible) not to divorce. Then a listener commented, "so it is better to not marry."

(<https://biblehub.com/interlinear/matthew/19.htm> -- verse 10) Jesus answers this statement "so it is better not to marry" saying "some eunuchs were born that way, some were made that way." So we in this state can align with God by calling LGBTQ+ residents, "eunuchs." Then we can direct these residents to the first part of Isaiah, Chapter 56, (<https://biblehub.com/interlinear/isaiah/56.htm> -- verses 4 and 5) where God says if eunuchs please [The Supreme Ruler of the Universe], they can have a place within the walls of [The

Supreme Ruler of the Universe].— they will have a name better than that of sons and daughters.

There is also a story of a trusted, noble, God-aligned Ethiopian eunuch in the Bible's book Acts. This eunuch was pondering the book of Isaiah when Apostle Philip met him. Philip showed him how the scripture pointed to Jesus as the awaited Redeemer-Messiah. God allows the Ethiopian eunuch to accept Jesus as the prayed for Messiah, and after hearing the story of Jesus, he asks to be baptized. So we could call eunuchs to also look at the story in the Books of Acts.

f.) Without God, people can come to sacrifice infants and children to “small g” gods.

[The Supreme Ruler of the Universe] gave the prophet Ezra a prayer, the Amidah, for the “Faithful Remnant” (called “Jews” because they were from Jerusalem during their exile in Babylonia; they followed God’s prophet Jerimiah to go to exile in Babylonia). So after they returned to Jerusalem and rebuilt the temple, Ezra had them pray the Amidah “the Standing Prayer” three times a day. In the prayer they asked God to redeem the family of Israel of their great sins of turning away so many times.

Some of the Israelites who were not the “Faithful Remnant,” had turned from God in different ways, including sacrificing infants and children to “small g” gods. I understand this practice went on even in the times of Abraham.

Some humans still sacrifice infants for various beliefs today. This still happens in Uganda today and even in this state for occult practices.

Some view abortion as not honoring that God’s has stated he has plan for each human before their soul is in the womb.

7. I oppose SARS Cov2 vaccine mandates and forced injections in this state. This is in regards to a rule that appears to be on the Washington Code (WAC) 246-100. I understand these codes were put in the books around 2003.

I oppose any vaccines being administered without fully informed consent. Pediatricians and other general doctors in this state have not been fully informing residents of adverse effects of all vaccines as I have seen. Residents should be told if there were successful court cases regarding vaccine injuries as well as summaries of known vaccine adverse effects.

One part of this code sounded like police might be able to forcibly inject someone with a vaccine (or a medicine). I am opposed to this - especially if it is genetically modified material, and contains toxic chemicals in it. Also if the person doesn't really know or trust what is in it. If people are being dangerous, even coming off a strong opiate, there are calming tones and

detoxification foods, and teas that could be offered if a person asked for them. Also a person in a mental hospital or some sort of facility with oversight, should be offered the choice to see if reading scripture might help.

I object to hospitals or any care facility to vaccinate someone against their will.

I have heard of two cases where young vulnerable women were recently in different King County hospitals --for mental health reasons /one was on a floor also for drug rehab I believe, both were possibly considered homeless -- and both were forcibly injected with a professed anti-COVID vaccine! One was the daughter of a friend of mine. This friend now lives in another state. Her daughter was in a King County or Seattle-area hospital around November, and escaped the hospital to avoid getting vaccinated against her will for a second time. She made it to the state her mother is in. I think these two young women should get a representative to get some compensation for stress. Can you look into this and let me know how we can help get justice for these travesties and prevent others?

8. Powerful economic entities in our state and in our world seem to have influenced our health policies towards profiteering rather than pleasing God. I want you to consider walking in solidarity with our founders who chose God as their ally.

Until our Department of Health can be more aligned with what pleases God, I want the Washington State Board of Health to call for a separate "Department of Holistic Health" to educate residents about

Jesus said to choose to serve God or mamona/money. (Mamona is a "small g" god - a god of money, wealth, shiny things). As we drifted away from studying and seeking God in this state, and aligning our people with God-- above the government-- we put "Economic Growth" or "Economic Progress" up as a false idol.

It can improve health and save lives if more and more residents decide to put "The Supreme Ruler of the Universe"(or Multiverse) above other things - like the pursuit of profit. Many residents here--including parents, teachers, school board members, professors, business leaders, politicians-- don't know or have forgotten that thanking "The Supreme Ruler of the Universe" is mentioned first, above our highest state law, our Constitution.

Take courage if pressured by seemingly powerful "economic entities" by looking at the Old Testament battles where God led a large group of shepherds and former slaves to have victory over opponents who were giants and cold-hearted leaders. God led Gideon to have victory over powerful opponents who were as numerous as sands on the beach.

Work for a "Department of Holistic Health" independent from the current "Department of Health" which could better be named the "Department of Allopathic Medical Intervention."

9. The God Gene - Genetically-engineered spike-protein, or other vector, mRNA vaccines could alter people's DNA and should be considered illegal in Washington State and the United States.

Gene-therapy-type injections can attack a gene that helps people connect with God.

A search on Wikipedia around October of 2021 indicated that there was a book called *The God Gene*. It was published around 2003, and authored by Dean Hamer...

Hamer writes in the book that he wrote the book on the side of his normal job at the National Institute of Health (NIH). He said he got the funding for the book's topic via the Templeton Foundation of Pennsylvania. This organization has a huge fund to direct money at the topics of Science and Religion. Temple sounds like it could be related to the Israelites who don't believe in the New Testament, but I only see that a man with the last name of Templeton died and left his fortune to this foundation.

In the book, Hamer indicates a PCR test was used to isolate and compare a certain part of the human genome. He interviewed many people who were drawn to connecting with a higher power. He also compared genes of siblings where one had a great interest in seeking spiritual experiences while the other did not have this interest or a gift in this area. He claims to have discovered a specific group of associated genes (I believe it's called an allele) that corresponded to whether or not a person had an inclination for having a mystical experience.

The Bible has important people that God designates to be spokesperson for God. In the first Chapter of the Bible's book Jeremiah, God (YHVH - Yod Hay Vav Hay/ YHWH "Yahweh") says that he had plans for Jeremiah before he was born. It is possible that God intends what person gets a God gene and who doesn't. We also hear God say at one point that those who sacrifice their babies and children to "small g" gods - are taking his children. In the time of Moses, God said at one point that followers are to give their firstborn child and their firstborn son to [him].

Since we thank God in our Washington State Constitution's preamble [for helping us win the Revolutionary War], it is not consistent with a thankful attitude to allow possible harm to anyone's birth DNA.

Even if someone does not currently seek to follow "Yahweh," at some point in the person's life, they may want to. It is not at all informed consent to not tell people that their DNA, and possibly unique ability to connect with "Yahweh" could be altered with this gene-therapy-like injection.

People who read the Bible should be able to see a major point is that there is a war of unseen forces of good and evil. Injections containing toxins appear to many of our residents to be in the category of entities that are malicious. In the Bible, we see teaching stories of humans who

acquire malicious entities. Sometimes people get these and are not aware they are being controlled. Around 2003 people were learning that thimerosal, a mercury derivative, was in many vaccines.

10. Encouraging Civil Culture - via Civil Genes, Healthy Brains, Healthy Hormone Levels, Encouraging the Holy Spirit in People

We must be on guard for any less-than-virtuous/less-than-human behavior. We must try to discern if it is due to

--estrogen reduction like from hormone organ damage, (men as well as women produce estrogen - a hormone which may allow one to be more caring.)

--brain injury and/or brain inflammation (some head injuries may make people violent). Inflammation can be from chronic environmental mold, immune reactions to foods, toxins, drugs, accumulated nano genetically-engineered spike proteins, or a type of microbe.)

--a gene group (allele) associated with animalistic behavior. (If we find such a type of allele, we might invite individuals with this to try gene therapy to see if those alleles can be altered to make a civil allele. Or maybe we need these groups of humans to defend our species from outside attacks.

--drugs or toxins that affect people's brain structure or chemistry.

--malicious spirits (These can be drawn into people if they don't know how to protect themselves. Reading and studying the Bible --especially the first 5 books of the New Testament-- helps, baptism helps, asking Father God, the Holy Spirit to be around, "in the name of Jesus," helps. People can also acquire these also after any trauma—including when the human body, "or temple," is punctured, such as with a vaccine or injection. When people don't know that malicious spirits can exist, they can be vulnerable to becoming possessed by these spirits. Malicious spirits can cause drugged or severely depressed persons, for example, to harm themselves or others.)

--low blood sugar issues

If a civil society is a goal, then insurance carriers could be required to pay for people to get SPECT scans if they want, and incentives could be made, to check if our brains are as healthy as they can be.

People should be able to self-refer to get SPECT brain scan imaging, the kind that is done in Dr. Amen's clinics.

Our mental health professionals could check for possible brain inflammation from food by referring patients to the kind of naturopathic doctors who can order and assess IgG blood tests

for food and toxins. If we want to encourage civil society, we would also have insurance companies to pay for this sort of thing.

Do mental health professionals in this state have these things listed in their diagnostic manual? I think these things should be added as things to screen for in this state.

Then the counselors could also encourage and assist clients to follow through with testing. They could also suggest a possibly possessed client read some books like *Deep Wounds, Deep Healing*, by Charles H. Kraft, and /or *The Bondage Breaker*, by Neil T. Anderson, and visit a trained and successful Christian or Roman Catholic team of exorcists.

At the time of Jesus the Israelite religious leaders were doing special cleanliness rituals that poorer and physically challenged people could not do. The Israelite priests took a high path to the temple after cleanliness rituals, but then at the Temple, I understand they were clubbing unclean, poor, and disabled people to force them out! Jesus demonstrated this was NOT "the Way." Instead he demonstrated the "narrow path" -- to focus on the moral law to love and care for the needy, even if they had "unclean" diseases.

Jesus showed the connection between malicious spirits and dis-ease, and he showed how to cast out troublemaking spirits. He worked with God's Holy Spirit to heal people and raise the dead.

So counselors could also tell clients that the New Testament gives clues to getting clear of negative entities by asking for God's the Holy Spirit to be in and around a person --continually.

A key thing to learn is in the New Testament, Jesus showed us about spiritual warfare. It is helpful for all residents to learn that God, the Holy Spirit, and Jesus can help people who pray - even silently - to overcome any challenge. This relates to physical and mental health.

Malevolent spirits can assist people to get more depressed, more anxious. Their goal is to "take a person down" completely - to die in a mental state apart from God. So if a person in mental distress as well as physical distress can just ask for Jesus to be with them, and then read some passages of the Bible out loud-- this can help to physically as well as spiritually save lives. And doesn't cost anyone any money. (People can usually acquire a Bible for free at a church or from many Christians - or there are free apps like biblehub.)

11. Ensuring homeless waste is cleaned up - public sanitation

Each city could have teams to clean up after homeless who may leave clothes, needles, human feces. Dogs could be trained to help people find the spots to clean up. Human waste could just be buried in 1 foot deep holes.

At each of the Day Shelters there may be people who are open to volunteering to help. It can be pointed out that if they do well they can maybe get recommendations for other jobs - maybe even jobs with the city.

12. We might be able to simplify our excessive codes and laws if we follow the example of how Jesus simplified the excessive laws.

Jesus simplified the complex and excessive laws the Israelites had developed by his time (some were ritualized cleanliness rituals that not everyone could do and it is possible some were made up by the Levite priests, maybe there are some in the book of Leviticus).

We can see early in the book of 1 Samuel that only the spokespeople God chose were supposed to be the leaders. So by the time of Jesus, the Levi priests were not to be claiming authority to make up excess rules and then look down on people who were not able to follow them.

Here is how we can simplify our laws and codes: Jesus clarified that loving God and caring for one another—all humans, all of God's children—is the most important law. Moses relayed this same law from God in earlier times. So we don't need lots of detailed laws if we will just encourage people to read the teaching stories in the Bible and understand the teachings culminate with the clarifications that Jesus demonstrated.

Thank you for reading this and considering these concerns.

Board of Health: To Whom it may concern

I think temporary paralysis, motor control deficiency, and behavior problems in children are not physician recognized as associated with current COVID vaccines, but they are showing up in the VAERS database. Neurological effects may be underreported in VAERS if they are not identified as associated with the vaccines. VAERS database number 1951967, a 13 year old boy in Wa State fully functional in daily activities but with a known DNA defect (deletion) prior to injection with Pfizer BNT. Two days post second injection began non stop talking 27/7, insomnia, and random giggling and became unable to follow a single command at school. He lost personal independence in daily activities. MRI of head and lumbar puncture and EEG were accomplished. No outcome listed as of three months following onset as listed in the VAERS detailed event report. Mother requested help with the situation in VAERS. I hope someone from the state health department has looked into this case to see what help can be given to this mother. I hope this case [DNA deletion] and impact with mRNA mediated vaccine is investigated. It may shed insight into other behavioral changes reported in VAERS.

Children 17 and younger in 2021 VAERS reports had 44 heart disease cases and 5 serious neurological problems. Forty-three heart disease cases in children followed the second dose and one followed the first dose of the Pfizer Biontech. For the child affected following the first dose of Pfizer Biontech is the state going to mandate a second shot?

I read several hundred of the detailed reports on VAERS regarding deaths and serious injuries to people of Washington State. Quite a few of them are written by doctors and are useful. Almost all of the 44 serious heart reactions in children 17 and under were evaluated by doctors and included data on Troponin, C-Reactive Protein and or Brain Natriuretic Peptide levels and likely diagnosis.

The International Alliance of Physicians and Medical Scientists published a declaration now signed by 17 thousand physicians and medical scientists that healthy children should not be subject to forced vaccinations. They included a link to the evidence supporting that position.

Review of patient survival rates among patients who receive early treatment rather than waiting to go to a hospital shows government is not good at innovative solutions. After two years of dealing with COVID, the CDC website still has no protocol for early treatment of COVID in spite of hundreds of studies proving early treatment statistically benefits patients.

Myocarditis and pericarditis were listed in the Emergency use Authorizations but not determined to be a symptom directly related to the vaccines in all the manufacturer testing and in all the rounds of vaccine release which took place over many months from older to younger and was not identified as a risk until children developed heart disease. That one patient who developed heart disease after the first Pfizer dose had a medical history of autism.

The International Alliance of Physicians and Medical Scientists published a declaration now signed by 17 thousand physicians and medical scientists that healthy children should not be subject to forced vaccinations. They included a link to the evidence supporting that position.

My son experienced thrombocytopenia and bleeding in mouth, skin and brain from a vaccine. Some people in my house have allergic reactions to vaccinations. COVID already ran through our house. Is the government is considering mandating vaccines to the whole population?

I have not read any studies proving the gene therapy vaccines slow spread of COVID transmission, but I did read one study that showed an inverse relationship. Possibly because more people with mild cases don't know they are sick but are still capable of spreading virus.

Also civilized people would not consider coercing Amish, Ortodox faiths, native Americans, into taking vaccines if it was against their choice. I believe it is clear, informed choice in a free society is the only way ethical people would administer these new gene therapeutical COVID vaccines.

Thank you for your work
To everyone's health
Very Respectfully
Dan Bogar

RE: Billing the Washington State Board of Health for Your Outcomes (or lack thereof)

A specific matter of public health policy surrounding COVID – or lack thereof – is resulting in myself and other Washington State residents being denied timely and efficient healthcare. This creates unnecessary anxiety, unnecessary pain and suffering, and – sometimes - negative health outcomes and/or financial distress. I am contacting you to have you correct this matter of public health policy.

CONTEXT: From both a public health perspective and an individual health perspective, the medical system has existing policies regarding certain medical transplants and joint replacements. Specifically:

1) I have a neighbor who needs a knee replacement. Medical providers refuse to do a knee replacement until my neighbor quits smoking. She's being required to participate meaningfully in her own health outcomes. She won't quit smoking, she is now hobbling around with mobility devices as a result of her unwillingness to stop smoking to receive a needed knee replacement.

2) A friend of mine also needs a knee replacement, but she is medically obese. Doctors told her that she needs to lose weight before they will do a knee replacement. She's already lost at least 30 pounds so that she can get a knee replacement.

3) When heavy drinkers (alcoholics, et. al) need a liver transplant, medical providers often require such individuals to achieve a period of sobriety before they become eligible for a liver transplant (six months sober or?). There aren't enough liver transplants available to meet public need, so it's in the interest of public health for liver transplant recipients to be in a position to have positive outcomes (i.e., quit drinking).

HOWEVER, THE SAME PRINCIPLES ARE NOT BEING APPLIED BY HEALTHCARE PROVIDERS AND/OR THE WASHINGTON STATE BOARD OF HEALTH TO THE COVID PANDEMIC. Unvaccinated COVID patients are being allowed to overwhelm our medical system to provide them with avoidable hospital care that could be avoided if such persons were held responsible for participating in their own medical care (i.e., requiring vaccinations for hospital admittance). As a result, myself and multiple other vaccinated Washington State residents who need non-COVID medical care through no fault of our own are being denied access to timely medical treatment because hospitals are swamped with unvaccinated COVID patients. See: <https://www.npr.org/sections/health->

shots/2022/02/04/1078029696/americans-get-sicker-as-omicron-stalls-everything-from-heart-surgeries-to-cancer

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.npr.org%2Fsections%2Fhealth%2F2022%2F02%2F04%2F1078029696%2Famericans-get-sicker-as-omicron-stalls-everything-from-heart-surgeries-to-cancer&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ca644499192fd4bc23a4408d9ea7f688b%7C11d0e2>

In my case, I have pain – sometimes debilitating pain – in my left shoulder and left hand. Doctors determined that I have a pinched nerve in my shoulder. A surgeon at Harborview Hospital (Seattle) determined that the first course of treatment should be physical therapy.

Thus, I was scheduled to see a physical therapist at Harborview starting on Monday, January 24. However, one of Harborview's staff called me the Friday before my appointment and told me, "We have to reschedule your appointment because we are swamped with COVID. The physical therapist has been moved to working with COVID patients. We can't get you in until March." A two-month delay in medical treatment because of unvaccinated COVID patients.

We all know that the VAST MAJORITY of COVID patients who require hospitalization are unvaccinated.

Therefore, given that COVID vaccinations are widely available in the United States..... the only reason that our hospitals are overwhelmed and having to delay necessary medical care of various types to vaccinated patients (from cancer surgeries to joint replacements to physical therapy is because of COVID patients who have CHOSEN NOT TO GET VACCINATED. THIS IS AN APPLES-TO-APPLES COMPARISON TO GIVING LIVER TRANSPLANTS TO ALCOHOLICS WHO CONTINUE DRINKING WHILE DENYING LIVER TRANSPLANTS TO PEOPLE WHO AREN'T DRINKING ALCOHOLICALLY (see page one).

In my case, I am in too much pain to "sit around waiting" another two months for medical care – i.e., to receive physical therapy that would be covered by my health insurance. Therefore, I am experiencing financial hardship to now start paying out-of-pocket to go to a chiropractor for medical care for my pinched nerve (Apple Health doesn't cover chiropractors). I have been forced into economic hardship (paying out of pocket for a chiropractor – using a bank loan - when I can't afford to do so to get medical care because Harborview can't get me in to provide care that would be covered if I went to Harborview for physical therapy) as a direct result of hospitals providing COVID treatment to unvaccinated Washington residents (and Idaho residents?) at the expense of vaccinated Washington residents such as myself whose medical care is sometimes being delayed.

HOSPITALS SHOULD BE EXERCISING THE OPTION OF DENYING MEDICAL CARE TO UNVACCINATED COVID PATIENTS, PARTICULARLY WHEN THEIR COVID MEDICAL CARE IS JEOPARDIZING OTHER PATIENTS. SUCH UNVACCINATED PATIENTS CHOSE TO NEED

HOSPITALIZATION BY NOT GETTING VACCINATED AND HAVE THUS CHOSEN TO DELAY MEDICAL CARE PATIENTS FOR VACCINATED PATIENTS LIKE ME.

Were hospitals allowed to decide whether or not to provide medical care to unvaccinated COVID patients (hospitals still could provide such care if they wanted to and/or have the capacity to do so), then hospitals would be more able to provide medical care to vaccinated patients such as myself.

THEREFORE, until such time as you – the Washington State Board of Health – decide to give hospitals the OPTION of denying medical care to unvaccinated COVID patients, I am contacting you to be reimbursed for my medical expenses - \$300/to date; my out-of-pocket expenses are expended to reach \$600 - \$900. I look forward to and appreciate immediate reimbursement.

Kim Burkhardt

To whom it may concern,
Please vote NO on making covid 19 vaccine a requirement for children in school. There is not enough data on this vaccine in the first place and definitely not enough understanding of the side effects long term for children. Children who have a 99.98% chance of surviving covid 19. The vaccines do not stop transmission. If someone wants to protect themselves against covid 19 because they are older and are in a higher percentage of death or health issues from covid that is their choice to vaccinate themselves. To require vaccination for children is just irresponsible, there has not been enough time or trials to know how this will effect them.

With much concern,
Kelli Douglas

Good morning,

I am reaching out in response to the scheduled meeting for February 10th to discuss the Covid vaccine inclusion in WAC chapter 246-105. I oppose this and all vaccine mandates. As the vaccine has proven to be ineffective at preventing viral spread or infection within the state, and since children are the least at risk for severe disease, there is no public health benefit from mandating this vaccine. Doing so exposes children to unnecessary unknown risks, with negligible benefit.

A very concerned citizen,

External Email

Good evening,

As a parent of school age children in the state of Washington, I strongly encourage the TAG to vote against implementation of any COVID-19 vaccine requirements for school attendance. The science has shown there is minimal to no benefit of vaccination for children due to their inherent robust immune system.

Voting to include COVID-19 vaccine requirements will create a massive divide in our communities and lead to no actual health benefit.

Concerned parent,
Sean Lawler

Dear BOH:

Please share with your TAG committee:

Response to # 5-6 on your criteria:

Please be advised. I am a Washington State citizen, and a parent. The edicts coming down from Federal agencies are counter to the data they have collected. It is up to you to stand against this corruption that suits to assist profit, and not the health of our children.

From VAERS and VigiAccess reporting it is clear that children have a far higher likelihood of an adverse event from the vaccine than they do contracting Covid-19.

The money that comes from the top corporate structure through government agencies, that is then distributed to bureaucratic decision makers, breaks the intended mission of our health agencies to serve and protect the citizenry. Through this bribing scheme, corporate interest then have the mandate of government to purchase and distribute it's product at ZERO LIABILITY to themselves.

Stop this attempt to get children on a vaccine schedule that will insure no liability.

Stand firm. Stand up. Do you job.

Sincerely,

Jay Fratt
Washington State Citizen

Subject: Support of Vaccines

External Email

Hello,

I am writing in support of requiring the covid-19 vaccine for children 5-11 in schools. As the owner of a private business that runs youth summer programs, having a required covid-19 vaccine for schools will help ensure the safety of all of our children. It will make programming easier to implement, lower absences, and provide a sense of security for families. We are going to be requiring proof of vaccination or a negative test for our summer camp, but having it as a statewide requirement will make it easier for us to manage the implementation of our policies. We polled our camp families and over 75% were in favor of a vaccination requirement. I know this is a hot-button topic and appreciate your thoughtful consideration.

Thanks,
Jessica

Please do not require children to take the Covid 'vaccine'. There are no long term studies on this genetic altering injection and since children are at such a low risk of poor outcomes should they get Covid it doesn't make sense for them to get the vaccine. Plus it should be their parent's decision if they get the vaccine.

To the TAG committee on school vaccines and the WA Board of Health:

Please consider that our children are at a very low risk of mortality from Covid-19. The chance of an adverse reaction is a higher risk. These Covid-19 vaccines have not undergone long-term phase 3 clinical trials and should not be required for any school age child. Myocarditis is a risk reported by the CDC. This is not a mild disease at best. Young people who previously had no comorbidities now cannot exercise for minimally six months and are put on several heart medications. The known outcome for myocarditis is not good. No one should be required or be coerced to get a vaccine that could do this harm and possibly do it long-term. Please bring in other doctors that can give the other side to this story. It is not wise to listen to only one side when it comes to scientific consensus. I urge you all to recommend a NO when it comes to school covid-19 vaccine requirements. Thank you. Laurie Buhler

Subject: Parent AGAINST mandating the covid vaccine for children

External Email

WAC 246-105-030

"A child is required to be vaccinated against, or show proof of acquired immunity for, the following vaccine-preventable diseases before attending school or a child care center..."

Many parents in the State of Washington are firmly against adding the current covid-19 vaccine to the list of required vaccination prior to school entry. My reasons for opposition are as follows:

1) The available covid vaccine for children (Pfizer's BNT162b2) is still under emergency use authorization (in addition, the only FDA approved covid vaccine is COMIRNATY, which is for ages 16+ and not readily available in the USA). No vaccine has ever been added to the list of required childhood vaccinations while under EUA.

2) Pfizer's phase 2/3 clinical trials for children ages 5-11 were underpowered, including only 1,518 children that received the vaccine prior to FDA review on October 26, 2021. These children (along with ~1,500 additional children in the expanded group) will be actively monitored in the years to come. However...

3) Passive surveillance is being utilized to monitor the larger population of children. The limitations of VAERS is well known and insufficient in order to demonstrate the safety of a vaccine.

4) Children are at minimal risk of serious covid complications. Healthy children have been found to have zero risk of death: "Children without comorbidities were found to be significantly less likely to suffer from a severe or fatal disease course. The lowest risk was observed in children aged 5-11 without comorbidities. In this group, the ICU admission rate was 0.2 per 10,000 and case fatality could not be calculated, due to an absence of cases." (<https://www.medrxiv.org/content/10.1101/2021.11.30.21267048v1> <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F>

5) The current covid vaccines do prevent infection or transmission of the virus and therefore Covid-19 is not currently a "vaccine-preventable disease".

6) The impact of vaccinating children that have already acquired natural immunity against Covid-19 is unknown.

7) The CDC has recently released an analysis of cases and hospitalizations by Covid-19 vaccination status and previous Covid-19 diagnosis. In the CDC's analysis, those with infection-based immunity fared as well or better than those with vaccine-based immunity. (<https://www.cdc.gov/mmwr/volumes/71/wr/mm7104e1.htm> <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fmmwr%2Fvolumes%2F71%2Fwr%2Fmm7104e1.htm>

><https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fmmwr%2Fvolumes%2F71%2Fwr%2Fmm7104e1.htm>)

The decision to vaccinate a child against Covid-19 should be made by the child's

parents in consultation with the child's doctor. It is inappropriate for the State to mandate Covid vaccinations.

Thank you for you time and consideration.

Sincerely,
Leanna Pan

Subject: Data/studies for school testing and masking for children

External Email

To whom it may concern,

I'm writing out of frustration and a lack of understanding to what is happening in our schools to our children. We are requiring "test to stay" for children that may have been "exposed" even if those children being tested have ZERO symptoms. Have you watched young children being tested? As a father of three, two who attend public elementary, it is traumatizing to watch you child cry as a swab is placed their nose just for them to remain in school unless they quarantine for 10 days.

Why are we allowing this to be done to our children? Why are we enforcing this notion that our children are always "sick" instilling irrational fear in their lives. What is the science or data that unequivocally supports testing them due to a possible "exposure"? Can anyone answer that intelligently, purely with the science and data? I believe it really comes down to adults irrational fears and partisan politics being forced on our children.

Second, why are we masking our children in school? Can anyone provide me the data, studies, and science on masking children. Correct me if I'm wrong but the CDC, HHS, and others have admitted to cloth masks having no effect on transmission/spread and surgical masks having very limited effect. In fact most studies indicate the N95 isn't effective unless properly fitted, used, etc.

So again I ask what is the proven studies, data, and science behind masking our children? They have no idea what their teachers and classmates look like, they can't see the lip/mouth movement during instruction, and they constantly touch their masks getting who knows what germs inside. Why can adults attend events, go out to eat, etc maskless but we mask our children. Do you realize how absurd the policy makers look? A disease that largely doesn't effect children, who aren't majors vectors of transmission, being forced to wear something that is proven ineffective. Why are you so settled on looking back at this terrible decision/policy and being on the wrong side of history?

V/r,
Kerry

Included is a link to an article written by a doctor, Vinay Prasad, at UCLA. I ask that you read it, opinion piece or not, it has plenty of citations of data to back up the article.

External Email

I sent you an email last Friday but it was mostly relevant to mandates being imposed on the school age children of WA State. Today I learned that most of your discussion tomorrow is going to be on whether or not force adult citizens of WA State to take the vaccine. And if they don't, to be forced into internment camps until they do comply. This sounds like Nazi Germany, I never thought I would be hearing that my own government would even consider such a thing.

Over the last two years we have had to listen to the BLM cries of injustice done to them by a generation long past. We listened to 'My body, my choice' when it concerned abortions for unborn babies. But now, we adults seem to have no choices if it were to be left to the government - you know, the people we voted to put into office - to protect us, to work on our behalf. All I can do - all we can do - AT THIS TIME - is to present you with a few of the most important reasons why I and a majority of concerned citizens feel that you should do all you can to uphold our rights as human beings and United States Citizens.

1. Mandated vaccines are a direct interference with families by forcing medical treatment without consent, and are thereby a violation of Article 12 of The Universal Declaration of Human Rights.

2. Article 7 of the 1966 International Covenant on Civil and Political Rights as put forth by The Geneva Convention states: No one shall be subjected without his free consent to medical or scientific experimentation. Experimental vaccine ties it directly into the Nuremberg Code, which says that we cannot be experimented on [without consent]. We always have the right to accept or refuse a medical treatment.

3. The Universal Declaration of Human Rights, put forth by The United Nations, states:

Article 12: No one shall be subjected to arbitrary interference with his privacy, family,

[or] home. ... Everyone has the right to the protection of the law against such interference. Mandated vaccines are a direct interference with families by forcing medical treatment without consent, and are thereby a violation of Article 12 of The Universal Declaration of Human Rights.

Article 18: Everyone has the right to freedom of thought, conscience, and religion; this right includes freedom...either alone or in community with others and in public or private, to manifest his religion or belief in teaching, practice, worship, and observance. Similar to The First Amendment of The US Constitution, any law that denies parents a vaccine exemption for religious reasons is a violation of the protected right of Americans to freely exercise their religious beliefs as they see fit for themselves and their family. Denying a philosophical exemption is also a violation of personal beliefs and philosophy as described by Article 18. In addition, any law mandating vaccines that calls for the quarantine or banishment of "the unvaccinated" from a public space, such as a school or market, simply for exercising their right to practice their religious or personal beliefs through use of a vaccine exemption is a violation of Article 18.

4. Mandated vaccination is a violation of medical ethics. The Hippocratic Oath states: (Traditional translation) Traditional translation: I will keep them [patients] from harm and injustice. I will neither give a deadly drug to anybody who asked for it, nor will I make a suggestion to this effect.

5. The American Medical Association's Code of Medical Ethics states: Informed Consent: The patient should make his or her own determination about treatment. ... Informed consent is a basic policy in both ethics and law that physicians must honor, unless the patient is unconscious or otherwise incapable of consenting, and harm from failure to treat is imminent. The AMA's Code of Medical Ethics specifically states that physicians must honor the patient's wishes regarding their treatment; it is not optional.

6. There is no imminent, impending, or otherwise immediate threat of bodily harm that would result from declining vaccination. The true bodily harm has been shown to come to those who have gotten the Covid Vaccine and boosters. And without imminent danger to others, there is no legitimate reason for EUA (Emergency Use Authorization) of any of the Covid vaccines. So you must ask, what then are the reasons - when the FACTS are out there - the vaccines are eminently more dangerous and lethal than any of the Corona Virus variants.

Four standards that must be fulfilled for an EUA. If any of these criteria are not met, EUA cannot be granted or maintained.

(a) First, the secretary of Health and Human Services has to declare and maintain a state of emergency. If the emergency were to go away, all EUA products would have to come off the market. And that doesn't just mean vaccines. It also includes the PCR tests and even surgical masks.

(b) The second standard is evidence of effectiveness. Historically, vaccines had to show a

70% or greater effectiveness, as measured by a fourfold increase in antibody levels, in order to qualify. For an EUA vaccine, the efficacy threshold is only 30% to 50%. In another departure from prior vaccine approvals, the COVID vaccine clinical trials relied on the RT-PCR test, not antibodies, to demonstrate effectiveness in the small "challenge phase" of the trials. (Now, you probably heard that the Pfizer shot was 95% effective when it first rolled out, but that was 'relative risk reduction', not 'absolute risk reduction'. Confounding these two parameters is a common strategy used to make a product sound far better than it actually is. The absolute risk reduction for Pfizer's shot was just 0.84%.³ (For ex: if a study divided people into two groups of 1,000 and two people in the group who didn't get a fictional vaccine got infected, while only one in the vaccinated group got infected, the relative risk reduction would be reported as 100%. In terms of absolute risk reduction, the fictional vaccine only prevented 1 in 1,000 from getting the infection - a very poor absolute risk reduction.)

(c) The third standard is that the known and potential benefits of the product must outweigh the known and potential risks of the product. In the case of COVID shots, there's overwhelming evidence showing they do more harm than good.

(d) The fourth and last standard that must be met is there can be no adequate, approved and available alternative treatments (drugs or vaccines). "This is why hydroxychloroquine and ivermectin were quashed," Mayer says. This is also another reason Comirnaty is not treated as a fully approved product in the U.S., because if it were, then all the other COVID shots that are under EUA would have to be removed from the market.

7. Mandated vaccination is a violation of legal accountability and medical science. we object to being denied our right to decline a medical procedure or product in which: The manufacturer cannot be held liable for any injury or death occurring from the use of their product (The National Childhood Vaccine Act of 1986) ----- The government recognizes that the product and procedure is "unavoidably unsafe" (US Supreme Court ruling, 2011) The manufacturer admits in the package inserts that the product: 1.Has not been tested for carcinogenic or mutagenic potential 2. Has not been tested for safety in the populations targeted for product use 3. Can cause serious permanent injury and death 4. Can cause the very illness and disease the product is designed to prevent.

Product safety and efficiency studies are funded and conducted by the product manufacturer and/or the federal government instead of by an independent and neutral third-party which has no stake in potential profits from product sales.

The product: 1. Has been "fast-tracked" for approval without undergoing basic safety and efficiency studies (HPV vaccines) 2. Has not undergone proper randomized, double-blind, placebo-controlled safety and efficiency studies 3. Has not undergone long-term safety and efficiency studies. The manufacturer is facing multiple federal charges of scientific fraud in regards to product efficiency (Merck's MMR vaccine)The Centers for Disease Control and Prevention (CDC) is facing allegations of scientific fraud in regards to product safety (Merck's MMR vaccine)

To whom it may concern:

I have seen in the media that the Washington State Board of Health is considering making the emergency use of a experimental vaccine mandatory for school children.

This so called "vaccine" should not be made mandatory for school children.

More children have died from the vaccine than from Covid-19.

More children have died from suicides due to lock-downs than from Covid-19.

This vaccine is toxic to humans. It doesn't take much research to see the damage to individuals that have taken the vaccine especially to young males.

The survival rate for children that catch Covid-19 is above 99.8% There is more risk in children in taking the vaccine than catching the virus.

Please don't consider the Covid-19 vaccine for school age children.

Extremely concerned that you are having a conversation to add this to the WAC. The last meeting was that you were tabling this until you had more information about it and allow the people to weigh in. Covid vaccine is no different than the Flu vaccine and should be treated the same. Flu vaccine is not required and neither should Covid vaccine. I know several more people that were vaccinated who had and spread Covid to others including the unvaccinated! I also know personally that unvaccinated did not have to go to the hospital or treatment, they were not as sick as the media portrays. I know many parents that will remove their kids from public schools if you put this in the WAC to require the vaccine. We need to stop creating segregation of the people!!!

Hello:

Why isn't there a Covid mask exemption allowed for individuals who are psychologically distressed by wearing a mask? For example, I have heard accounts from women who were sexually abused, and the abuse included their breathing being stifled. They say they relive that abuse when forced to wear masks. They should not have to try to get a medical exemption in order to not wear masks.

Subject: Do not make it mandatory

External Email

Do not make it mandatory for the COVID-19 shot for entry into the schools, daycares, etc., for our children.

You are a small group of people making decisions on thousands of children. Therefore, more and more parents are opting out of all shots together.

And the comment that was made about "parents being scared to send their children to the public pools" regarding Polio. What really was happening is that the pools were being sprayed with a chemical to fight the mosquitoes and when people came in contact with it - it caused Poliovirus symptoms.

I know many young parents that are opting out of all vaccines because of this one shot that is the hot topic.

They are doing their research and learning what they have done to their children and they regret following the protocol of the shots given to their children.
For example: most did not know they were given their children a vaccine for the chicken pox. They are learning and opting out since they as parents have had the chicken pox.

Please do the right thing to gain trust back with the young parents.

Thank you

[EXTERNAL Email Notice!] External communication is important to us. Be cautious of phishing attempts. Do not click or open suspicious links or attachments.

To add to my previous email:

The Pfizer vaccine for kids under 5 years old fails on at least three of the four criteria above.

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcmq5z04.na1.hubspotlinks.com%
TN7PgQ0X5nKv5V3Zsc37CgTTgW6CbT231GDvFYW1TkKH22_vvVqN9fdIYD2-
j_IW4GDhGt2TmWy6W83DCTx1nv2-

are “with Covid” rather than “for Covid.” This means that the child was hospitalized for another condition, injury, or infection, but tested positive for Covid on admission. Thus, the risk of Covid in kids this age doesn’t qualify as an emergency, and the first criterion hasn’t been satisfied.

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcmq5z04.na1.hubspotlinks.com%
TN7PgQ2J3q90JV1-

W2pV8yK5vSf3S3jYj1&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C0a6938f3019d4db2c05a08d9e7423

Third, we don't know enough about the potential risks of the Pfizer mRNA vaccine in kids under 5 years of age. Pfizer claimed that "no safety concerns were identified" in their initial trial, but the number of participants was small—they initially enrolled 4,500 young kids, but it's not clear how many actually participated in the trial.

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcmq5z04.na1.hubspotlinks.com%
TN7PgOQX5nKv5V3Zsc37CgWvJTzc7x7v8gmIW4pjnCw3HYtJzW60vj5q8sR5RLW6cyN4L3XCQx W7hMz4-

from the Centers for Disease Control and Prevention (CDC) suggesting that the risk of an
adverse effect from the Covid vaccines in 5- to 11-year-olds may be as high as 1 in
1,104. If the risk of an adverse event is even close to this in kids under 5 years old, it
doesn't make any sense to approve a vaccine in this age group when we have absolutely
no evidence of benefit. Thus, the third criterion hasn't been satisfied.

Nevertheless, Pfizer has submitted an EUA application, and the FDA will review it on February 15. I cannot for the life of me understand how the FDA can review an EUA application when there are no data on the vaccine's efficacy to support the application!

This is incredibly disturbing. The FDA seems to be rushing to approve a completely

forced mandate on a broad scale.

I strongly reject the idea of a vaccine mandate for school age children in the state of Washington. I live Bothell and my 7 year old attends the North Shore School District. With weekly testing the North Shore District has not had any major outbreaks. With weekly testing and proper remote school technology options in place, there is no need to risk kids life from having irreparable side effects.

I have been suffering from an adverse Pfizer vaccine reaction that has completely impacted my quality of life. I had no prior medical issues and now have daily neurological symptoms for which I am seeing 5 different doctors from neurologists, to immunologists, to holistic specialists for detox and 6 months later, I still have no relief after spending tens of thousands of dollars. I have reported it to VAERS, CDC and Pfizer and no one cares to help those injured from the vaccine.

I am not alone, there have been over 1MM adverse reactions reported to VAERs in the US alone. So many other countries are doing away with mandates and many colleges in the US have done so already.

If you enforce this mandate, you will thousands of parents pull the kids out from public schools which will greatly reduce you funding.

Please take this into have a proper survey via a proper survey tool to capture proper feedback.

Thank you for your consideration.

Jennifer Lazo

Subject: Jan 12 meeting comment - VAERS analysis

VAERS analysis of COVID vaccines by lot show EXPONENTIAL variability of event counts compared to flu vaccine history.

Primary discussion of this starts at 40 minutes into the video linked below. Particularly see discussion and graphs starting at the 45 minute to one hour time-period.

Couple this with indications that medical facilities are increasingly directing personnel to not report incidents to VAERS, which would reduce counts for more recent batches.

Presenter is Dr. Mike Yeadon, former vice-president of respiratory research for Pfizer.

1/21 In the evil state of Washington, last week, the Board of Health failed to include "Use law enforcement to detain the unvaccinated" and "vaccination mandate in school" in their

agenda. But they would not accept their failure. They know there are all kinds of left-wing White, Black, Yellow, Spanish here, so they put out an online survey, in an effort to support their "adding COVID-19 vaccine as a requirement for school entry" proposal.

NO MATTER WHERE YOU ARE, I want you to help me fill this out which can be done in just 1 minute. Your small effort will help me bring debacle to these evil fake health officials' attempt to harm my children. Join us, let your voice be your weapon.

As far as the first question is concerned, just use "Washington School District".

Obviously, he is encouraging 12k people, many of whom are not even living in the US, let alone WA state residents, to flood the survey with faked WA residents data, which obviously pose a serious threat to the public health of the community and commit a crime. In the screenshot, you can also see he is openly asking people (including non-US citizens) to submit the survey more than once and in vulgar languages.

In particular, his agitation scheme to sway health official opinions could result in tremendous health risk consequences to the millions of children in Washington state.

Please ask the appropriate department to step in, investigate and defeat this egregious cyber attack! At the minimum, denounce such fraud in your next public meeting with this evidence.

Thanks to you for keeping the Washington state communities and children healthy!

Jennifer

On Wednesday, February 2, 2022, 09:56:54 AM PST, Bill Osmunson
<bill@teachingsmiles.com> wrote:

Dear Washington State Board of Health, Keith Grellener, Tom Pendergrass, Elisabeth Crawford, Temple Lentz, Vazaskia Crockerell, Fran Bessermin, Bob Lutz, and Umair Shah,

The Legislature has asked the Board of Health for advice on HB 1684 Fluoridation to be provided within 10 days. Ten days is not enough time for the smartest person in the world to carefully review all streams of evidence on all sides. Tradition supports fluoridation. Please consider science rather than endorsements.

The US Food and Drug Administration and the Washington State Board of Pharmacy, all Pharmacopeias and most developed countries have determined fluoride when marketed for ingestion with the intent to prevent dental caries is a legend (prescription) drug.

The research is clearly showing too many (70%) of children have dental fluorosis, a biomarker of excess fluoride exposure.

The research is clearly showing mothers on fluoridated water and infants ingesting fluoridated water used to make their formula result in developmental neurotoxicity (lower IQ). In the last 4 years, 22 human studies report lower IQ. Grandjean et al 2021 reported 5 IQ loss with mother's urinary fluoride concentration at 0.7 ppm. Urine fluoride concentration mirrors the fluoride concentration of water the mothers and infants are ingesting and a Benchmark Dose for only 1 IQ loss is 0.2 ppm.

HB 1684 is built on historic tradition without looking at the current science. Dental caries are not highly contagious or lethal like COVID and fluoride ingestion should not be mandated when so many are showing signs of excess fluoride. Makes no sense to give those with too much fluoride even more.

Fluoride is now considered as lethal to the developing brain as lead. Although HB 1684 does not mandate fluoridation, it pressures more water purveyors to fluoridate their water.

Proponents have never answered the most fundamental question of how the fluoride gets from the blood in the tooth to the surface of the tooth where caries start or have started.

No known mechanism for fluoride transfer through the tooth is known. Researchers are now reporting swallowing fluoride has little chance of reducing dental caries. No metabolic function requires fluoride. Fluoride is not a nutrient.

Proponents rely on endorsements, tradition and one side of the science. Please review the attached for more evidence. The Board has a great deal of historical evidence from previous submissions.

Please advise the Legislature to not pass HB 1684 until a more thorough and careful review of the science can be achieved.

Sincerely,

Bill Osmunson DDS MPH

Subject: Comments for the Immunizations Technical Advisory Group

External Email

CDC released data demonstrated natural immunity was 2.8 times as effective in preventing hospitalization and 3.3 to 4.7 times as effective in preventing COVID infection compared with vaccination.

COVID survivors should not be required to be vaccinated. Their previous infection provides significant protection for themselves and the community.

Children are not a threat to other people and the infection is rarely dangerous for kids. Children should not be required to be vaccinated against COVID. The risk of vaccination outweighs the benefits.

To The Washington State Board of Health and the Public It Serves::

We the free and united people of America and the world are writing in regards to the unlawful and corrupt actions taken by the healthcare industry, bureaucrats, and media regarding COVID-19. The actions taken for nearly two years now have stripped people of their rights, decimated the US Constitution, violated the principles of international law embodied in the Nuremburg Code, and ignored basic and inalienable human rights. The people behind this have leveraged their privileged positions to make billions of dollars at the expense of humanity and we are unwilling to allow this to continue.

For decades, the field of public health has researched the use of fear as a tool to manipulate people into action. The use of that tool has now been perfected and implemented against the people of the world with COVID-19. Evidence of this knowledge can be found in a CDC presentation, other DHHS materials, and in numerous academic journals. The intentional use of fear to sow hate, division, and discord is unethical, unacceptable, and must stop immediately. The reality is that COVID-19 has a 99%+ recovery rate in most of the population and approximately a 94% recovery rate in the most vulnerable. Compare this to the original SARS which had approximately a 9% case fatality rate and the original MERS which had over a 30% case fatality rate. We did not lockdown, mask, or even widely acknowledge these diseases when they were prevalent despite the fact that they had similar rates of spread to COVID-19. This fear has been used as a marketing tool to attempt to justify previously unthinkable actions by bureaucrats and public health figures around the world; the most egregious of which is the forced injection of gene therapy drugs into healthy people. Gene therapy literally alters the 1 genetic makeup of a human being and simply cannot legally, morally, or ethically be forced on anyone, ever. If the decision to alter one's own genetic makeup does not rest with the individual then there can be no argument that freedom is lost. Not only are the COVID "vaccines" admittedly a gene therapy, they are inarguably unsafe.

The swine flu vaccine was pulled from the market after just over 20 deaths, the Chevy Volt was recently recalled over the potential for battery fires, but the Pfizer shot was given expanded authorization despite the high recovery rate from COVID-19 and the fact that Pfizer's own documents, submitted to the DHHS show that over 1200 people died in less than the first 3 months of authorization. This is nothing more than corruption. The COVID shots are also ineffective. A recent Department of Defense document stated that 71% of new cases of COVID-19 in the Medicare population are in fully vaccinated individuals and 60% of hospitalizations are in the fully vaccinated. This same document also stated that the injections are even less effective in North American Natives, Hispanics, and "Blacks" (the document apparently was unconcerned with political correctness).

If the 1 Moderna acknowledged in SEC filings that mRNA technology is a gene therapy. This has also been acknowledged in documents from Pfizer and by numerous scientists. "vaccines" do not stop the spread, do not stop hospitalization, alter our genes, and have not even existed long enough for long term testing, why are we attempting to violate people's inalienable rights by forcing them? The fact is that we are now moving ahead as quickly as possible with these COVID shots. We are even authorizing them in children despite the fact that people under 30 are at ZERO statistical risk of death from COVID-19

and the shots appear far more dangerous to children than the disease. Further, we are doing this with no transparency. The DHHS has done everything possible to cover up the side effects and dangers of these injections, even going so far as to request 55 years to release the documents they relied upon to authorize/approve these deadly injections.

How can informed consent be given without a true understanding of the risk? This situation is untenable and we demand that it be remedied. We the free people of this nation and world will no longer comply with mandates that fail to consider our inalienable rights. In the spirit of Martin Luther King, Gandhi, and Jesus Christ we will spread our message through peace and we will resist peacefully, but make no mistake, we WILL resist.

The accompanying presentation found at www.renz-law.com

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.renz-law.com%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cb076036d6c184754389008d9e90b5155%7C>>
supplies you with additional data to demonstrate everything stated here. We now demand the following from our elected leaders, and vow to remember your actions or inaction when it comes time to vote and donate:

1. The resignation/termination of Anthony Fauci and civil/criminal investigation of his actions by a truly INDEPENDENT prosecutor;
2. The criminal and civil investigation of those involved with any gain of function research that may have been responsible for the creation of SARs-COV2;
3. Investigations – criminal and civil – into the deceptive and misleading push for the gene therapy injections that have been falsely labeled as vaccines (only after the definition of “vaccine” was changed); a. This should include RICO and fraud claims (as is appropriate) involving the “Trusted News Initiative”, the drug companies, hospital systems, and some government actors;
4. Transparency legislation that gives the public immediate access to the raw data and submitted documents related to the shots and COVID “pandemic” – If there is nothing to hide NO ONE should oppose transparency; a. This should be passed on the state level as well;
5. Liability for injury from vaccines under the same rules as any other product – if they are safe there should be no opposition to liability to help those that have been injured;
6. Legislation that recognizes the absolute right to reject medical treatment or vaccination of any type for ANY reason;
7. NO funding or state/federal contracts with ANY organization that discriminates based on vaccination or health status;
8. Funding for the hundreds of thousands of individuals injured by job loss and “vaccine” injury;
9. NO on vaccination status tracking legislation; and
10. Our local law enforcement to uphold their oaths to uphold the Constitution and refuse to enforce unconstitutional mandates and rules.

Subject: Request help in two research projects

External Email

Dear all:

This email is to promote two research projects.

Project # 1. From a colleague who is studying how prior music learning experience relates to learning with multimedia resources in non-music disciplines.

"The purpose of this study is to investigate how prior music learning experience relates to learning with multimedia resources in non-music disciplines. It will investigate whether cognitive strategies trained via music learning transfer to a non-music discipline by uncovering the association, or the lack thereof, that varying degrees of prior music learning, types of the music learning experience, and multimedia learning resource types associate with student learning performance. To be a participant, the individual should be 18 years old or older, with or without prior musical training experience.

Please use the link to participate and share the recruitment letter (attached) with your colleagues and/or students.

https://duq.az1.qualtrics.com/jfe/form/SV_aazmtz0OqqIfzBc
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fduq.az1.qualtrics.com%2Fjfe%2F>
"

I took me 10-15 minutes to complete the survey. Thanks for helping this colleague.

* * *

Project # 2: Eastern redbuds are iconic spring bloomers, but mystery remains about the timing of their flowering

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.google.com%2Fsearch%3Fq%3Dmg%3A1600108931931%26source%3Dlnms%26tbm%3Disch%26sa%3DX%26ved%3D2ahUKewiIh_Wjpu
and fruiting

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.google.com%2Fsearch%3Fq%3CcCegQIABAA%26oq%3D%2522cercis%2Bcanadensis%2522%2Bseed%2Bpods%26gs_lcp%3DCgNpbWcQA
. The Redbud Phenology Project

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.usanpn.org%2Fnn%2Fredbud>
seeks to answer questions such as:

1. Does the timing of redbud flowering vary by location or elevation?
2. Is there a cycle to abundant years of redbud fruiting?
3. Are redbuds flowering and fruiting earlier in the year?

By signing up as a Nature's Notebook observer and tracking the seasonal activity of an eastern redbud tree where you live, you will collect important information to help scientists answer these questions!

Want to find out what's involved? Watch a recording of our virtual info session and training where we explain the significance of this project, walk you through the steps of creating a Nature's Notebook account and registering a redbud tree, and describe how to make observations and submit them online. Watch the video

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fyoutu.be%2F0SEmNS_tgOo&data=
.

Stay up to date on the Redbud Phenology Project - sign up

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fip.constantcontactpages.com%2F>
for emails with news, resources, results, and more!

Questions? Contact Erin Posthumus, USA National Phenology Network, at erin@usanpn.org <<mailto:erin@usanpn.org>> or Dr. Jorge Santiago-Blay, National Museum of Natural History, at blayj@si.edu <<mailto:blayj@si.edu>> and Penn State York, blayj@psu.edu <<mailto:blayj@psu.edu>> .

Sincerely,

Jorge

In response to the Washington State Board of Health's decision to convene a Technical Advisory Group for the purpose of considering Covid-19 immunization in Washington's immunization rule: <https://sboh.wa.gov/News/Articles/ID/3059/Technical-Advisory-Group-TAG-to-Consider-COVID-19-for-Inclusion-in-Washingtons-Immunization-Rule> <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsboh.wa.gov%2FNews%2FArticles%2FID%2F3059%2FTAG-to-Consider-COVID-19-for-Inclusion-in-Washingtons-Immunization-Rule&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cf617b82e14064d04aa5f08d9e67b7ff8%7C11d0e>>
For personal, philosophical, and religious reasons my wife and I are adamantly opposed to any authoritative decision that does not support one's personal decision to abstain from the Covid-19 vaccination. If the State moves forward with this requirement and does not allow for an exemption including a reasonable accommodation for our children, they will be withdrawn from the Cascade School District in Leavenworth, the public school that they are currently enrolled in. Thank you for your consideration, David and Molli Ragsdale Leavenworth, WA

I want to express my concern regarding a vaccine mandate for children. Both my husband I are vaccinated and we believe in vaccines. My child is fully up to date on her vaccines. We are not "anti-vaxers" but this vaccine is not at all necessary for young children. They are not at high risk for any serious complications with Covid. I'm much more worried about the long term and unknown effects of the vaccine on children which we couldn't possibly know about yet. Forcing children to get this vaccine is completely wrong and goes against our rights as parents and citizens of the United States. So many people feel this way. It is completely ridiculous to mandate this. You must think very seriously and weigh the implications of such a dangerous decision.

Regarding the WA DOH parent survey extended for the purpose of evaluating parent response to COVID 19 vaccination requirements for school attendance in WA state - initially, the survey would not allow submission of response. I would like to submit a more indepth response to this invitation, regardless.

Please take a few minutes to carefully consider the following information prior to voting to require children to receive this vaccination in mass numbers across our state. The information referenced, is completely aside from 'the right to choose' element, equally important and warranting consideration.

Risks:

There are numerous published medical or scientific studies on the Journal of the American Heart Association's website (to name just one), which outline cases of myocarditis and other medical heart issues post COVID-19 vaccination. To note a few (bold emphasis mine) -

1. In-Depth Evaluation of a Case of Presumed Myocarditis After the Second Dose of COVID-19 mRNA Vaccine, concludes with, "Additional surveillance of such adverse events after COVID-19 vaccination will help to identify whether there are subgroups who are at higher risk for this vaccine-related effect" (Vol 144, No 6) -

<https://www.ahajournals.org/doi/10.1161/CIRCULATIONAHA.121.056038>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ahajournals.org%2Fdoi%2F10.1161/CIRCULATIONAHA.121.056038>>

2. Another published study: Clinically Suspected Myocarditis Temporally Related to COVID-19 Vaccination in Adolescents and Young Adults, concludes with, "Future studies should evaluate risk factors, mechanisms, and long-term outcomes" -

<https://www.ahajournals.org/doi/10.1161/CIRCULATIONAHA.121.056583>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ahajournals.org%2Fdoi%2F10.1161/CIRCULATIONAHA.121.056583>>

3. Abstract 11847 Acute Myocarditis Following COVID-19 mRNA Vaccination, concludes with, "...warrants further description and investigation." -

https://www.ahajournals.org/doi/10.1161/circ.144.suppl_1.11847

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ahajournals.org%2Fdoi%2F10.1161/circ.144.suppl_1.11847>

4. Myocarditis After BNT162b2 and mRNA-1273 Vaccination, concludes with, "providers should be vigilant for myocarditis after COVID-19 mRNA vaccination, and further research is required to understand the long-term cardiovascular risks." -

<https://www.ahajournals.org/doi/10.1161/CIRCULATIONAHA.121.055913>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ahajournals.org%2Fdoi%2F10.1161/CIRCULATIONAHA.121.055913>>

5. Initial publication Abstract 10712 Mrna COVID Vaccines Dramatically Increase Endothelial Inflammatory Markers and ACS Risk as Measured by the PULS Cardiac Test: a Warning, stated, "We conclude that the mRNA vacs dramatically increase inflammation on the endothelium and T cell infiltration of cardiac muscle and may account for the observations of increased thrombosis, cardiomyopathy, and other vascular events following vaccination" before wording of the publication appeared to be carefully modified as documented.

The CDC itself recently published, "By early October, persons who survived a previous infection had lower case rates than persons who were vaccinated alone." -

<https://www.cdc.gov/mmwr/volumes/71/wr/mm7104e1.htm>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fmmwr%2Fvolumes%2F71%2Fwr%2Fmm7104e1.htm>

CDC also states: What is already known about this topic? An elevated risk for myocarditis among mRNA COVID-19 vaccines has been observed, particularly in males aged 12–29 years." - <https://www.cdc.gov/mmwr/volumes/70/wr/mm7027e2.htm>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fmmwr%2Fvolumes%2F70%2Fwr%2Fmm7027e2.htm>

, concluding with, "CDC and FDA will continue to closely monitor reports of myocarditis after receipt of the mRNA COVID-19 vaccines and will bring any additional data to ACIP for consideration. The benefit-risk analysis can be updated as needed to reflect changes in the COVID-19 pandemic and additional information on the risk for and outcomes of myocarditis after COVID-19 vaccination. The ACIP recommendation for use of mRNA COVID-19 vaccines under an EUA is interim and will be updated as additional information becomes available."

From a Google search results page: Transmission of SARS-CoV-2 in K-12 Schools - CDC

https://www.cdc.gov/coronavirus/2019-ncov/science/science-briefs/transmission_k_12_schools.html

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fcoronavirus%2F2019-ncov%2Fscience%2Fscience-briefs%2Ftransmission_k_12_schools.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cb6d8ad96af60

Children are less likely to develop severe illness or die from COVID-19. ...

(although it appears this statement has since been removed from the page itself, even though Google picked it up as part of the page on search,).

If nothing else, all of this data clearly magnifies the fact that these vaccinations are still in trial and error mode, and still being studied for effectiveness and injuries. Given this, to require our children to be recipients of this, without any government or vaccine manufacturer liability, is negligent and should be considered criminal.

I am hopeful you will leave this decision to individuals and the parents of the children.

Thank you for your time and consideration,
Jennifer Farmin, concerned citizen and parent

Hello All,
This communication is to be forwarded to Jay Inslee by the Lieutenant Governor. This is because Inslee refuses to have an email address. Thanks in advance.

As you all may be aware, the world is now fully aware of what you are doing. Why is not VAERS numbers part of your agenda and daily narrative? Currently VAERS is reporting over 22,000 deaths and over 1 million injuries from the needle poison that you people are still pushing. Seriously ... how many people must die before you stop your campaign of murder and genocide. Yes ... murder. Are you all living under a rock? The world is full of doctors, nurses, experts and now politicians who are using the term "murder" their word not mine.

Not one of you can prove that an emergency is valid. Not one of you can prove the covid virus exists or any of the variants. You are acting criminally by using a fraudulent PCR test that the CDC has admitted cannot decipher between the flu and covid.

You all need to cease and desist your genocidal campaign of poking people with needle poison, that you incorrectly label a vaccine. Your campaign needs to stop NOW until the VAERS numbers have been investigated and verified.

The world is now aware of what you are doing. Please watch the attached videos. And please stop with your lies and propaganda. It is disgusting! Oh and please stop using the "cases" narrative ... the gig is up.

We are watching your department consider the mandate for all children to attend school.

This is extremely reckless, does not include the science and is very premature considering the effects of the vaccines have not been concluded.

To act on this before results and effects are in amounts to experiments on children.

What's wrong with you?

NO MANDATES FOR CHILDREN!

Wait until the study is finished and results are in and published. There are too many bad side effects showing up!

I am writing to you today in opposition to the Covid vaccine for children.

There is not nearly enough data to show its safety....in fact there is more data and proof coming out daily of its deadly side effects.

I will not ever give permission for my children to receive the vaccine. I pulled my kids already from public school....and my guess is you will see a mass exodus from Thousands more if you make it a requirement for attendance.

We do not coparent with the State or You! My child, my choice.

Subject: Adding covid vaccine

External Email

To whom it may concern,

It is deeply disturbing that you would consider adding the covid injection to the k-12 schedule. As you are aware this is an experimental injection, not an approved vaccine. The long term and short term effects are unknown. The fact that it is experimental, not approved, and with no long term or controlled studies should negate the call to implement this as required for anyone, especially school children. The data has shown that kids are mildly if affected at all, there is no reason to make a blanket approach for a non problem.

Parents are already questioning vaccines themselves, and especially the necessity for one for covid. Many parents are questioning allowing their children to go to or remain in the public school system. Trying to require additional, experimental injection will have a negative impact on enrollment and students. No parent should be forced to injection their child against their beliefs or wishes.

It is negligent on your part to not include persons whom would make a balanced panel or group to discuss this issue. When you have no one representing a dissenting voice you are merely prepertrating a scam of a hearing. If enrollment is an issue now, keep pushing parents to make ethical, moral, or spiritual medical decisions for their child to attend school, and it will only get worse.

Thank you,
Kala McGlashan

Subject: Concerned taxpayer

External Email

Hi Kaitlyn,

I am writing this email regarding the potential Washington state vaccine mandate for schools. Without going into great scientific debate, there is no discernment between vaccinated and unvaccinated people regarding contracting Covid or transmitting Covid. The Covid vaccines are not effective. The vaccines are actually not true vaccines by definition.

The second fact is that mandating experimental drugs on the general public is a violation of our constitutional rights living in the United States. Now our state is looking to mandate this on children in whom these drugs are not studied or approved. Comirnaty as a brand name is actually not being dispensed in the US at this time. We continue to use emergency stock piles of Pfizer's drug as well as Moderna which is not FDA approved, yet "counts" if you want to be considered vaccinated! No approval and not enough evidence for approval. The practice of distributing drugs not approved is illegal by so many laws we don't have time to discuss. No other vaccine to date has performed like this.

I am adamantly opposed any mandate for the Covid vaccine regardless of which one. We have a right to chose what goes in our bodies and how we manage the health of our children. This mandate for vaccinations for kids to be in school will cause parents to remove their children from this school system as well as physically moving from this state. Highly educated well paid taxpayers are leaving the state of Washington in droves because of Jay Inslees mandates and rules. This will be the final straw for thousands of people because we are NOT willing to be the experiment for Inslees political agenda.

I am happy to expand on the scientific data and information if you would like more information.

Thank you for you time.

The Right to Informed Consent is Meaningless Without the Right to Refuse Any Medical Intervention, Including Mandated Vaccination. Government Agents and those Acting Under Color of Law are Forbidden by Long-Standing National and International Law from Coercing Vaccination. Furthermore, this includes mask mandates and PCR testing. Children under the age of eighteen years of age need a parent's signature on any and all documents that deal with medical testing and this includes PCR testing in school.

On Tue, Jan 25, 2022 at 9:34 AM Me Zee <mzee636@gmail.com> <mailto:mzee636@gmail.com> > wrote:

The oath you took to uphold the laws includes these laws.

Requirements for vaccinations should never include an experimental gene altering injection.

We now know that these COVID injections do a great deal of harm to children.
Can you live with that on your conscience?

18 USC 241: Conspiracy against rights:

If two or more persons conspire to injure, oppress, threaten, or intimidate any person in any State, Territory, Commonwealth, Possession, or District in the free exercise or enjoyment of any right or privilege secured to him by the Constitution or laws of the United States, or because of his having so exercised the same; or

If two or more persons go in disguise on the highway, or on the premises of another, with intent to prevent or hinder his free exercise or enjoyment of any right or privilege so secured-

They shall be fined under this title or imprisoned not more than ten years, or both; and if death results from the acts committed in violation of this section or if such acts include kidnapping or an attempt to kidnap, aggravated sexual abuse or an attempt to commit aggravated sexual abuse, or an attempt to kill, they shall be fined under this title or imprisoned for any term of years or for life, or both, or may be sentenced to death.

18 USC 242: Deprivation of rights under color of law:

Whoever, under color of any law, statute, ordinance, regulation, or custom, willfully subjects any person in any State, Territory, Commonwealth, Possession, or District to the deprivation of any rights, privileges, or immunities secured or protected by the Constitution or laws of the United States, or to different punishments, pains, or penalties, on account of such person being an alien, or by reason of his color, or race, than are prescribed for the punishment of citizens, shall be fined under this title or imprisoned not more than one year, or both; and if bodily injury results from the acts committed in violation of this section or if such acts include the use, attempted use, or threatened use of a dangerous weapon, explosives, or fire, shall be fined under this title or imprisoned not more than ten years, or both; and if death results from the acts committed in violation of this section or if such acts include kidnapping or an attempt to kidnap, aggravated sexual abuse, or an attempt to commit aggravated sexual abuse, or an attempt to kill, shall be fined under this title, or imprisoned for any term of years or for life, or both, or may be sentenced to death.

RE: Covid Immunization for School Students

I am writing to express my dismay that the State of Washington would even consider implementing a new vaccine requirement for school age children. As a parent, I would remove my child from the public school system before subjecting them to an experimental medication . I understand that clinical observations indicate that the vaccines reduce the severity of Covid 19 symptoms. However, long term studies have not been completed regarding the risks associated with the vaccines. In ten years, we could see a wide variety of complications arising from mass immunization with unproven drugs.

Additionally, the language regarding implementation of mandatory vaccines indicate that they must stop the spread of the disease before they can be required for school attendance. The current vaccines do not stop the spread of disease. They are not for protection of the public. They are only effective to reduce severity of symptoms for the person taking the injection. This exceeds the authority of the WA Department of Health's authority. I urge you to stop the government overreach into our personal medical treatment and choices which are not supported by the science. Reject this proposal.

Attn: ☐ Technical Advisory Group
Please consider the following when making your recommendation.

We've seen, and the CDC has admitted:

- The vaccine does not prevent infection or transmission
- Children are not vectors of transmission for this virus
- Children have a statistically 0% chance of death

According to the CDC, children are at a statistically 0% risk of serious illness or death from COVID-19. The CDC also acknowledges, the vaccines do not prevent infection or transmission of the virus. Vaccine efficacy against Omicron is down to 27%, far below the 50% threshold required for FDA approval. Therefore, there is no need to vaccinate children against Covid.

On the other hand, there have been 41 reported deaths after COVID-19 vaccine among children aged 0 to 17. There have also been 602 reports of myocarditis and pericarditis among and 51 reported cases of blood clotting disorders among children. It is evident that these vaccines carry serious risks for children.

Vaccine developers have no risk on the table thus we cannot take this chance as parents and grandparents. Something then is not entirely proper about these vaccines needing to be given to our children. Where is the safety data? If children are at such low risk, then it shouldn't be a problem for these officials and vaccine developers to remove their protection.

With such low Covid-19 risk in children, no opportunity for benefit and just costs in terms of possible harms, these EUA Covid injections should not be mandated for our children to attend school.

Thank you for your consideration,
Roberta wolf

To whom it may concern,

The fact that this conversation is even still viable with respect to children feels wrong. You are sitting as a gatekeeper right now to protect our children. As of January 7, 2022 in the CDC press conference 84% of parents of kids 5-11 had NOT taken steps to give this shot to their children. It is federal law that everyone must have the right to refuse treatments that are under emergency use authorization. Covid Tests, Covid shots are all still under this Emergency use Authorization. Which means that as soon as the 'emergency' is over then what? Has there truly been an emergency for our children? The American Academy of Pediatrics reports that there has been no increase in mortality for children 0-18, over the two years. It has maintained at .1%. We can no longer make children responsible for the 'safety' of adults when adults can take precautions for themselves.

Look at the states that have not put masks on kids, they have not fared any differently. They are still healthy. They are in school full time.

Please stop this conversation until such time that there is long term health and safety data for this shot in children. This shouldn't even be a conversation till such time. You will clog up doctors offices with parents trying to seek exemption forms, this will clog up time for school nurses and staff to process these forms for kids.

You have a job to protect children. Do not expose them to be part of this experiment.

Thank you for your time,
Katie Smith

Regarding the Feb. 10 TAG Meeting: Public Comment

Good Morning,

I have been a licensed health care provider for the past 17 years. I have a 12 year old in LWSD. PLEASE do not recommend mandating COVID-19 vaccination for our school children.

I feel motivated to state that I am not anti-vaccine. I have been vaccinated with all schedules, as has my daughter (except for this one, as I have grave concerns with the need and safety of this vaccine in her age group).

- * The vaccine was made for 5 variants ago.
- * Studies have noted continuing decline in protection against Omicron, as well as declining protection over 90 days.
- * Omicron is declining. We have no idea if this will remain the variant, or, if a new variant will pop up and we have no idea if the wild type vaccine will be effective against the new variant.
- * The age group has a near nil risk of anything related to COVID.
- * These shots do not stop infection, nor transmission.
- * Pfizer states that they will need 5 years to study the safety data for this age group.
- * There are very concerning trends with adverse events and these must be investigated to the fullest.

Because of these points above, pushing this as a mandate is optics only; creating a false sense of protection to the parents who want this.

The flu is more deadly to our children than COVID. We do not mask, isolate, mandate, close contact trace, nor do we mandate an annual shot (because at times these are only 14% effective) to our children. PLEASE stop this insanity.

I respectfully submit that I will remove my 12 year old from public school if this mandate

is approved.

Warmly,

Angela,

Angela Pifer, Ms, Functional Medicine Nutritionist, LCN, CN

Bastyr University Alumni '05, Adjunct Faculty, Meticulous Researcher

to TAG members,

It seems incomprehensible that you are even contemplating this step of requiring a still "Emergency Use Only" as a safe and effective medication. The original Covid shot is not effective on the mutated Covid virus. Children have been statistically shown to be the least affected by the virus. This particular shot has not been vetted in the usual manner as the other required vaccinations. There is no long term information on the necessity for this shot to be required, nor are there any studies of the effects, long term on any group of children who have been inoculated with the Covid shot.

If it is already not apparent to you that parents don't want this for their children, along with the comprehensive sex ed and crt programs, how many more students do you think will exercise their GOD-given rights of personal autonomy, particularly when it comes to medication?

The bottom line in this case, as in any requirement for "Emergency Use Only" medications or medical procedures, is that the Nuremberg Code, with international agreement, prohibits any coercion, etc. I have been so puzzled that there have not been more lawsuits against our federal and state governments for their blatant violation of this code.

Please make the well-informed decision that the Covid shot is not a reasonable, necessary nor legal choice.

Sincerely,
nancy parks

Dr. Thomas Pendergrass

Mr. Keith Grellner

RE: BOH meeting of January 12, 2022

I would like some clarification on a couple of items that were discussed at the Jan 12, 2022. I did not register to make a public comment, I just watched and listened to the meeting online.

At about the 4:42 minutes mark on the meeting live video there was an attempt to clarify the public's concern over quarantine camps. Mr. Kutz stated that "to his knowledge there were no enforced quarantine camps that existed and none were being set up or built". Mr. Grellner stated, regarding quarantine camps, " they don't exist", he was "not aware of any mandatory isolation camps" and "the accusations are not true".

Then why did the state of Washington have this job posting that closed November 2, 2021?

<https://www.governmentjobs.com/careers/washington/doh/jobs/3233390/isolation-quarantine-strike-team-consultants-ps2-non-permanent-doh5814?keywords=DOH5814&pagetype=jobOpportunitiesJobs>

Earlier in the meeting a BOH member (I do not know who) wanted to discuss and clarify the public's concern over "isolation and quarantine camps". That person said that per WAC 246-100-040 an individual would not be mandatorily quarantined and that every individual would go before a Superior Court judge so the health official and the individual could present their case to the judge, i.e. no one would be mandatorily quarantined.

That is not what the language in WAC 246-100-040 states.

<https://app.leg.wa.gov/WAC/default.aspx?cite=246-100-040>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FWAC%2Fdefault.aspx?cite=246-100-040>

040&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C0a59a90f35b440d1e18d08d9dc270598%7C11d0e211

(1) At his or her sole discretion, a local health officer may issue an emergency detention order causing a person or group of persons to be immediately detained for purposes of isolation or quarantine...

(2) (2) A local health officer may invoke the powers of police officers, sheriffs, constables, and all other officers and employees of any political subdivisions within the jurisdiction of the health department to enforce immediately orders given to effectuate the purposes of this section in accordance with the provisions of RCW 43.20.050

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx?cite=43.20.050>

(4) and 70.05.120

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx?cite=70.05.120>

.

(3) (3) If a local health officer orders the immediate involuntary detention of a person...

Yes it does state: NOTICE: You have the right to petition the superior court for release from isolation or quarantine in accordance with WAC 246-100-055

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FWAC%2Fdefault%2F100-055&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C0a59a90f35b440d1e18d08d9dc270598%7C11d0e211>

. You have a right to legal counsel.

But this is after an individual has been detained.

There is obviously so much more to WAC 246-100-040 but I hope you can see why the language of this is so concerning to citizens. Can you not understand this concern? This WAC is quite extensive and alarming as to the potential overreach of government power. I would appreciate your response.

Thank you,

Victoria Dyer

As a father of 6 with 3 school age children, I must voice my opinion against the ridiculous notion that you want to require children to get these shots that #1 don't prevent you from catching COVID and #2 don't prevent you from spreading it.

Is it really worth the risk to the future health of our children to mandate shots that provide little benefit and carry many known risks and who knows what long-term risks? Studies show that increased doses of vitamin D can have the same affect of reduced symptoms without the risks.

It's also well documented that children are in the least risk of all age groups anyway. So what purpose will this serve?

One of my daughters is fully vaccinated and works in daycare. She recently contracted COVID along with 7 of her vaccinated coworkers! What proof do you have that number 6 on your agenda holds any truth? I can tell you from experience that it doesn't! I know more vaccinated people who have contracted Covid than unvaccinated. In fact in our household of 7, my vaccinated daughter who quarantined at home, was the only one in our household to catch it while all others in the household were unvaccinated and didn't catch it!

"#6 Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting"

Can you say with certainty that there will be no adverse effects 5-10 years down the road from administering these drugs to children? You cannot! Therefore you cannot insist on requiring these drugs to be administered to children.

I just read the items #5 and 6.

I'm disappointed at the complete ignorance of the evidence that the vaccine does not prevent Covid nor prevent the transmission of the virus between people or in any setting. It does not do that. The principles of virology and immunology as well as epidemiology is being ignored and /or trashed.

There had been no consideration so far in natural immunity among those who have acquired Covid regardless of vaccination status. The decision you make will have irrepressible ramifications on anyone of all ages. I implore you not to recommend this vaccine at all. It has not been time-tested and the evidence of adverse reactions and death due to the vax is being ignored or covered up. I know people who have been affected or died due to this vaccine. STOP!!!

I'm definitely opposed to such a movement as there is no peer reviewed data on the effectiveness of this gene enhancement therapy shot. It's not an approved vaccine and Covid 19 is far down the list of causes of death of children in WA state. I watched the round table that Senator Ron Johnson chaired. The actual peer reviewed data presented there is enough to convince me that this shot is not ready to be used on our children.

We the people of WA State are standing with one voice. Action: We the constituents and community members of this great State of Washington, DEMAND the Washington State Board of Health (WSBOH) REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

We will continue to collect and share as our collective voice grows.

Respectfully,

Corina Watt

Subject: Commit to no COVID vaccine mandates on children

External Email

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

Dear Ms. Kahler,

Thanks for holding a great Technical Advisory Group meeting on 1/12/2022.

After the meeting, I notice SBOH put out a survey at:

<https://forms.office.com/Pages/ResponsePage.aspx?id=F-LQEU4mCkCLoFfcwSfXLT2Pur8KuHhPgr4pnygk7IxUQklaTUhYTVBXNUdJOTQ3TFpQRlpCOUdCRC4u>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fforms.office.com%2FPages%2FResponsePage.aspx?id=F-LQEU4mCkCLoFfcwSfXLT2Pur8KuHhPgr4pnygk7IxUQklaTUhYTVBXNUdJOTQ3TFpQRlpCOUdCRC4u&data=04>>

in an effort to continue collecting public comments, which is also great.

However, it has come to my attention that a Chinese anti-vaxxer has been organizing a flooding of fake data against the survey in an effort to mislead the health opinions of the general public to try to influence the public policy maker.

This person's online Telegram name is: □□□□, and he is agitating all his 12.2k followers all around the world to storm this survey with anti-vaxxing responses in order to cause WA BOH to make ill-formed decisions.

According to the published public comments, I notice this person also sent several emails to you before the 1/12 meeting:

From: rudolphwest17

Subject: Attention: Please do not add Covid19 vaccine to "required" list of child vaccination

Please note: Rudolph West is not his real name.

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ft.me%2Fs%2FruIdophwest17&data-source=forbiddenreason>

1/21 In the evil state of Washington, last week, the Board of Health failed to include "Use law enforcement to detain the unvaccinated" and "vaccination mandate in school" in their agenda. But they would not accept their failure. They know there are all kinds of left-wing White, Black, Yellow, Spanish here, so they put out an online survey, in an effort to support their "adding COVID-19 vaccine as a requirement for school entry" proposal.

NO MATTER WHERE YOU ARE, I want you to help me fill this out which can be done in just 1 minute. Your small effort will help me bring debacle to these evil fake health officials' attempt to harm my children. Join us, let your voice be your weapon.

As far as the first question is concerned, just use "Washington School District".

Obviously, he is encouraging 12k people, many of whom are not even living in the US, let alone WA state residents, to flood the survey with faked WA residents data, which obviously pose a serious threat to the public health of the community and commit a crime. In the screenshot, you can also see he is openly asking people (including non-US citizens) to submit the survey more than once and in vulgar languages.

In particular, his agitation scheme to sway health official opinions could result in tremendous health risk consequences to the millions of children in Washington state.

Please ask the appropriate department to step in, investigate and defeat this egregious cyber attack! At the minimum, denounce such fraud in your next public meeting with this evidence.

Thanks to you for keeping the Washington state communities and children healthy!

Jennifer

Subject: COVID-19 for Inclusion in Washington's Immunization Rule

External Email

Hello—

I missed the deadline for the survey regarding including the COVID 19 vaccine as a required immunization to attend school.

Please, please, please keep this an optional vaccine. For a plethora of reasons parents will chose not to vaccinate their child against COVID-19. Please don't let this prevent children from going to school. Please allow Washington families to decide what is best for their children with the guidance of their pediatricians. Washington citizens are smart and capable of making this decision without a mandate. The mRNA technology is to new to require it to be given to our smallest citizens.

I appreciate you taking the time to read my note.

I will pray for this committee at this critical time.

Sincerely,

Andrea Isaacson RN-BSN

Corrupted in WA,

I think we've all had enough of this "Rules for Thee, but not for me..."

When are you going to be giving up on this never-ending covid nonsense? Let our children breathe, get sick, get better/healthier, move on with their lives?

Are you also sick of the hypocrites at ALL levels? I am seriously glad that we will be pulling our children out of WA schools, moving to a free state and will letting them breathe. Very soon, expect to see our withdrawal letters being handed to the schools as they do not fight with us against this tyranny.

I want to send my kids to school but they don't want to wear the 'school/medical masks'. I say, if they give you one, put it in your pocket, have them call me. I'm awaiting a call. No more!

Josh Daugherty

While the Unity Project has been laser focused on stopping the vaccine mandate for K-12 students bringing forth scientific experts and resources, we must widen our fight to include these tyrannical and illogical mask mandates.

There are groups across California and other states that have done amazing work fighting these mask mandates and we are with you when we say Enough is Enough!

Our children are wearing masks for 6-8 hours a day while Governor Newsom, other public officials and celebrities parade around maskless in a California venue that requires them. A venue with 70,000 people, in a state that is still "under emergency". This is not only hypocrisy in the highest degree, it's a blatant slap in the face and, in our opinion, the green light to stop sending your kids to school in masks if you haven't already.

Despite Newsom's poor attempt at an explanation for not wearing a mask, it's time to email and call your schools, principals, teachers and school board members letting them know you will no longer comply.

- * Send your kids to school without a mask, tell them they are heroes for standing up
- * Talk to other parents and get a group together, show power in numbers
- * Reach out to school leaders, let them know your child won't be wearing a mask
- * You can use the verbiage and links below that point to empirical evidence of the efficacy and harm that come from masks
- * Share your success stories, you will be an inspiration to others!

Please see the links below illustrating, with empirical evidence, that masks are not only ineffective (as stated by Fauci in the attached video), they are dangerous. It is time we take action. Stop sending your kids to school with masks on. Do not comply. The only way we end this mask mandate is by uniting and fighting these mandates together. Find your group of parents at your schools, look on our strategic partner page for groups near you and join with them. Protest the mask mandates together. Email and call your principals and school board members.

There is NO LAW that requires the masking of our children. There is not even a mask mandate. There is only a "guidance" from the CDPH which is linked herein.

Those of us that want/need them gone are in the vast majority. They only serve to prevent the infected person from transmitting their illness (with an N95 only) but such people/children should be kept home anyway. Our kids are suffering needlessly.

attachments\02ABF34D11F843D3_HALT Immunization Criteria for Ch_PRDTool_NAMETOOLONG.xlsx

External Email

Dear members of WA State Board of Health,

58,384 constituents of WA State and growing respectfully ask that you the BOH recognize and honor through your actions and decision making parents right to choose. We ask you REFUSE to include the COVID-19 vaccine in 245-105 WAC this Thursday February 10th during the virtual meeting.

Action: We the constituents and community members of this great State of Washington, DEMAND the Washington State Board of Health (WSBOH) REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

Please see the link below or attached excel form for signatures gathered by Rochester Community Alliance, Rochester WA.

Halt inclusion of COVID-19 vaccine in WAC Petition, constituent signatures

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.jotform.com%2Fexcel%2F22>

Respectfully,
Corina Watt,
Rochester Community Alliance

Subject: NO to mandatory injections for Covid -19 for admission to school.

External Email

I am writing to urge you to say no to mandating vaccinations for Covid-19 for the admission to public school.

The choice to use a vaccine that has not gone through major time testing is a personal decision between a parent/guardian and the private counsel of their trusted doctor(s). It is not the place of the government or the BOH to dictate what is right for that individual and their families. Parents must be the ones to decide if this is right for them and their family. Some have great religious deeply held beliefs that these mandates would be going against. These tax payers are being excluded and discriminated for these beliefs and wouldn't be allowed to use the services of public education that they are paying for.

Mandating this would cause an obstacle that would create hardships within our state. People pulling their children from the public education system would cause disruption and loss of jobs in income for those employed with the Educational system. Our children in Washington are going through the most difficult times in our recent history and segregating them by not allowing them to participate with peers in basic public education would be cruel and ill willed.

In addition, we have no idea what the long term effects are of this vaccine and there are clearly possible risky short term outcomes. In your own words there is "Currently no published literature on pediatric Covid-19 vaccine effectiveness in K-12 school setting." So why in the world would anyone think that mandating an injection that hasn't been time tested would be a positive thing for the Public School system to do. We have also seen where there is no difference between vaccinated individuals and unvaccinated. Both individuals can be infected with the virus as well as spread the virus to others and according to Evergreen Hospital in Kirkland WA both can be taking up hospital beds. For some the vaccination doesn't even lessen the symptoms.

Do not mandate vaccines and allow Washingtonians to make a free choice what is best for them and their family.

Respectfully,

Angela Sherbert

Please enter your comments or questions in the space provided below:

I have tried to fill out the survey regarding a potential COVID vaccine requirement for schools. Unfortunately, the survey would not submit and said too many people have replied to the form? This is very upsetting as I know many parents who have not had a chance to complete the survey! I am an MD, pediatrician and anesthesiologist and I am extremely OPPOSED to a vaccine requirement for schools. If this were a vaccine that had remained >90% effective (such as measles and polio vaccines) I would consider supporting this as a requirement. However, this vaccine, while safe, is VERY poorly effective at preventing breakthrough infections and transmission. Many vaccinated kids have recently been infected and passed the virus to others during this current omicron surge. If this were required for school it would alienate many children as many parents would refuse to vaccinate their children. It would especially alienate poor children, children of color, and those with poorly educated parents. These children need a stable school situation the most! Please please be reasonable and offer the covid vaccine but do NOT require it for school.

Over my dead body but you ever put that damn needle in my child's arm with that poison. Until that crap has been around for years and years to properly study the outcomes you will never put that crap in my child's body. Do you understand me? It will never happen. I will fight you to the death. So Mark my words never will it happen. You wanna have people physically fighting you , go for it because that's what's going to happen. Covid is going away. We're moving on. We don't need to go backwards and start giving our kids a poison in their bodies that we don't know what it's going to do to them years down the road. Stop it already!

Not to mention, kids are not dying from this crap it is not a pandemic for the children it never has been. We don't need to do something that is it happening. So stop it stop it stop it! You guys are making matters worse and worse instead of getting better. There are thousands and thousands of kids who are now permanently disabled or dead from the vaccine stop forcing the shit on our kids.

Dear Board Members,
Coronaviruses have existed for a long time, and we can expect more varieties and mutations of these types of viruses.
To insist that everyone submit to an injection of some therapy for evolving and mutating viruses makes no sense.
COVID-19 has become like other flu and cold viruses: anyone can become infected with it, and almost everyone will recover. There will always be some people who succumb, just as there are those who die every year from the dominant flu virus of the year.
Life includes risk. Please respect the inalienable right to choose whether or not to receive an injection that carries the risk of adverse effects greater than the risk of a virus.
Discriminating against people based on whether they've received a Covid mRNA "vaccine" is to be "vaxist," like being bigoted, sexist, racist, anti-Catholic, or anti-Semitic.
Some people insist that the "unvaxxed" must be denied basic human rights. We've been down this road before. Don't make Washington continue to be a laughingstock.
Thank you for your service.

I am writing to ask that you NOT consider requiring the Covid vaccine for school children for these reasons:

1. Children have an incredibly low risk of getting sick from Covid. Most have very mild symptoms. According to data published by the CDC the survival rate of children is 99.99815%. They are not the "at risk" sub-set of the population at risk for serious illness or death.
2. There have been no long term safety studies for children.
3. There have been 36,167 adverse events reported to VAERS for children under 18. These numbers are being ignored and this is posing a safety threat to our children.

Requiring this vaccine for a population that is not at risk and when due diligence has not been taken to ensure their safety is wrong and irresponsible.

Please do what is right for our children and allow parents to make the decision that they feel is best for their children.

Thank you,

I oppose the vaccine mandate period, especially for the children, they are not actually vaccines and they are doing more harm than good. Forcing people to take an experimental drug is illegal, have you heard of the nuremberg code? If not, please research it. We are not a communist country that forces people to do things they don't want. We have laws for a reason and we the people will not be bullied and pushed by you commies on your lofty seats. Oh and once again... if you insist on playing communist games with my children we will be moving out of washington state.

Subject: Vaccine Requirements for Schools

External Email

Hello,

I am a parent and business owner within Puyallup School District. I am writing regarding the discussion of requiring the COVID vaccine for our children.

I will start with the fact that I am not anti-vaccine. My children are up to date on every required vaccine. I AM, however, anti- COVID Vaccine for my children. There has not been enough research or time for this "vaccine" to be considered safe with no long-term effects. I am not willing to allow my children to become guinea pigs for this state. This is our line-in-the-sand. We have put up with a lot in this State affecting our home and Income. As upsetting as it has been, we have been dealing with it.

When it comes to my kids' health, there is NO concession to be made.

This state has proven over and over again that they can not be trusted to provide all of the actual data. This distrust for "science" is a monster of the States' own making. Taxpayers need to be given ALL of the facts (pros and con) so we can make our own informed decisions. Until this happens, we will continue to research on our own. Every time we see how data is being misrepresented to further manipulate the States agenda, it will only further separate the people from this local Government.

My kids and I love the schools and teachers that we have experienced. However, if this becomes a mandate, I will be pulling my kids from the public school system and looking at alternative education for them. I will deny any and every levy/vote for the schools districts and/or county if this becomes a reality.

My stance regarding the vaccine for my children may change based on future studies and data - provided that all of the information is being openly shared. My decision is not a political one, but one out of concern for my children's future. Regardless, I will never support a FORCED vaccination of a product that is nothing more than a Virus shot, similar to the Flu shot with its many strands and Booster shots.

Thank you for your time,

Hello,

I tried to complete the survey (<https://forms.office.com/Pages/ResponsePage.aspx?id=F-LQE4mCkCL0FfcwSfXLT2Pur8KuHhPgr4pnygk7IxUQklaTUhYTVBXNUdJOTQ3TFpQRlpCOUdCRC4u>)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fforms.office.com%2FPages%2FReLQE4mCkCLoFfcwSfXLT2Pur8KuHhPgr4pnygk7IxUQklaTUhYTVBXNUdJOTQ3TFpQRlpCOUdCRC4u&data=04>
) but I got the message that The maximum number of people have already responded to this form.

I would like to say that I am in favor of a school covid-19 vaccine mandate because for divorced parents who do not agree on vaccinating their children, the mandate would remove that issue.

Also, lots of vaccines are already required for school. I don't see why the covid-19 one cannot be added as well.

Thank you,
Alice Orrell

I strongly oppose adding the covid shot to the school schedule. Here are a few reasons why:

-Currently no published literature on pediatric Covid-19 vaccine effectiveness in K-12 school setting

-Covid-19 is far down the list of causes of death for Washington children. Yet, suicide is the 3rd leading cause of death for our teenagers ages 15-19.

-No proven risk/benefit to under 18

-No long-term studies on a rushed vaxx

-Natural immunity has not been considered and should be

-Flu was never required but poses as much if not more death risk to children

I would like to send a big vote of approval for Dr. Berry's actions during Covid. She has done an outstanding job in our area with her actions, despite pushback from the non-vaxxers who approve of little to rid us of Covid. So please, recognize all that Dr. Berry has done for our communities and safety, despite threats being hurled against her so much of the time. She put in a mandate for proof of shots at restaurants and bars, most of which are following that mandate, and all of us, who are vaccinated, feel so thankful for that. The unvaccinated people are the ones making life difficult for those who are vaccinated, as they don't seem to care if they infect someone or whom they infect.

Thank you.

Dianne Salyer.

To the board of health--

Follow the science! The latest science.

Entire countries, several States, several medical journals, doctors, and other health care professionals are doing the exact opposite of what your board is proposing for our children.

Why is Washington State so far behind the rest of the USA, England, Israel, and other countries in realizing that we owe it to our most vulnerable populations to protect them from this virus? The elderly and infirm.

Why is it that most countries and several states have never stopped educating the youth in the classroom? Why is it that these successful schools have never mandated vaccinations or masks for the least vulnerable?

Our grandchildren used to love school. They did well and excelled in their studies. Most of their classmates did, too. That was before this pandemic and the fear that was pushed by the media and woke officials.

First, your board (plus the Teacher's Union and our Governor) closed down the public schools. Two weeks is what it would take to "flatten the curve." That was a lie promoted by Herr Fauci.

Nothing happened in the classroom for the last four months of 2020. Nothing! The kids, if they were fortunate, had parents to coach them during that time. Most of the students had no educational progress. Parents had to quit work to stay home with their children. It was a disaster!

Then, you authorized, with the blessings of the Teacher's Union and the Governor, a poor replacement for empty classrooms; distant learning. Chromebooks were handed out but education didn't happen. The kids didn't like it. The teachers didn't like it. Yet the

students were advanced to the next grade level. Our young population, the ones that will be doing your dentistry, your surgery, your therapy, your plumbing in twenty years, did not get the education the taxpayers and parents expected.

Most schools started to resume classroom activities in September 2021. Not all. And the kids are BEHIND where they should be. Most students are very unhappy about how their schools are run now. But it seems some boards, some politicians, are not happy that kids are in school and parents can resume working to pay the bills. You are proposing that all children must take this EXPERIMENTAL medicine that MAY protect the least vulnerable population. Balderdash.

Myocarditis and pericarditis cases are showing up in too many young people after taking the injections. Some children (and adults) have died after taking the shot. Too many to ignore. And you propose to gamble with the lives of our young people? You are surely aware that the survivability rate for people that catch the virus is close to 99%, right? I had it in the fall of 2019 at age 72. A Z-Pak eliminated the pneumonia in a week. I felt ill for 3-4 days. My cough lingered but I self-quarantined.

A neighbor just moved here from Meridian, Idaho. He worked for that county's government. He told us that 30% of all move-in families to Meridian Idaho come from King County, WA. People are fleeing and will flee to states that are NOT mandating vaccinations. Is that what you want, a brain drain from WA?

My son and his family are looking for work in Idaho or Montana. They pay a lot of taxes. They have three boys in public schools. They are 100% against these stupid vaccine mandates for K-12 children. If they leave, we will also leave. Washington has been our home since January 1980. We appreciate the amenities and opportunities here. We have thousands of friends and clients in WA. We don't want to abandon them. But we will if you keep pushing this outdated and unnecessary vaccine mandate.

If "it's for the children" as the woke people are known to chant, give the kids a break. Let them attend school without this questionable vaccination AND without masks. The masks do nothing to protect anyone. I drop off my boys at school a couple of days each week. I see how the kids treat their masks – rubbing their faces, pulling them down so they can be understood. Most kids reuse masks for days and weeks without laundering them or washing them.

We will be tuning in to the next board meeting.

Good morning,

I wanted to address the Covid vaccine issue being discussed of kids k-12 being forced to get it.

This should not be forced upon parents and students. It has been proven that the covid vaccine is not effective to young healthy kids. There has been no long term studies about side effects as they get older. There are facts that the covid virus is not deadly to kids. And that even with a vaccine the virus still spreads.

If this goes into effect more parents will take their kids out of school leaving less kids and money in the school systems. I being one of them. I will not force my daughter to get a vaccine that hasn't been around long and for a virus that is not deadly to her.

Thank you,

Subject: Governor Inslee...end the mandates now!

External Email

Good afternoon,

I am writing to implore our state leadership to stand up for what is moral and honorable regarding our kids (and hoping our local leadership will put pressure on you as well)!

The Covid "state of emergency" here in Washington has gone on for over 700 days! Half of our states have dropped their states of emergency already. Washington State is now one of only NINE states that mandate masks (<https://www.newsweek.com/how-many-states-still-have-mask-mandates-place-1675939>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.newsweek.com%2Fhow-many-states-still-have-mask-mandates-place-1675939&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ce200e0b30ee64191e79208d9e83d5e9d%7C11d> dated 2/3/22). Several countries (Britain, France, Ireland, the Netherlands and several Nordic countries, to name a few) have eased or dropped their covid restrictions in the last few weeks as well. Knowing this, and knowing that these states and countries are no worse off than Washington in regards to covid, why are you still promoting this farse of a public health emergency?

Why are you demanding our kids mask up at school (where they are required to sit 3' apart) when you know full well that they have been hanging out with each other socially, playing sports together, attending large events together, without masking and have suffered NO dire consequences. It is time to DROP THE MASK MANDATE and allow people to decide for themselves if they feel at risk and want to continue masking.

Please take a moment to read this Op-Ed from the Washington Post, written by three infectious disease physicians/professors of medicine

). It lays out some very good arguments to make masks optional at school, based on the CDC's new mask guidelines from late January 2022.

The ramifications of these mandates on our kids' mental, emotional and physical health are not yet fully understood, but what has surfaced so far should scare all of us more than a virus with a 99.97% survival rate. So far, several anecdotal consequences are being reported in my area and I suspect it's just a matter of time before studies back up all of them. Among them...

- * Kids are being bullied in school for not "properly" wearing a mask, including by some teachers who tell them they are going to "kill grandma"

- * Kids are increasingly reporting anxiety and depression over not being able to interact normally with others (seeing facial cues, emotions, etc)

- * Kids with learning disabilities are falling farther behind because of mask wearing
- * Kids are being sent home from school for not wearing their mask, in violation of their basic, constitutional right to an education in this state
- * Kids are being discriminated against over disabilities that affect their ability to wear a mask (remote learning is NOT equal opportunity education)
- * Kids' friends and family are turning against each other over difference of opinions
- * There have been a substantial number of teen/preteen suicides in our area over the last two years, some directly attributable to our state's covid restrictions

We are destroying an entire generation of children with these archaic mandates! I respectfully ask our state leadership to make changes to the mask mandates immediately! Our children have suffered needlessly for almost two years and you know it!

And, to our local leadership, I ask for your support and advocacy for our children. It is obvious that without a multitude of voices, our pleas are going unheard. Please get involved and come together so that we can fight for what's right. I am counting on you to be a voice for us and the youth of Washington.

Sincerely,

Dena Petersen

RE: Covid Immunization for School Students

I am writing to express my dismay that the State of Washington would even consider implementing a new vaccine requirement for school age children. As a parent, I would remove my child from the public school system before subjecting them to an experimental medication . I understand that clinical observations indicate that the vaccines reduce the severity of Covid 19 symptoms. However, long term studies have not been completed regarding the risks associated with the vaccines. In ten years, we could see a wide variety of complications arising from mass immunization with unproven drugs.

Additionally, the language regarding implementation of mandatory vaccines indicate that they must stop the spread of the disease before they can be required for school attendance. The current vaccines do not stop the spread of disease. They are not for protection of the public. They are only effective to reduce severity of symptoms for the person taking the injection. This exceeds the authority of the WA Department of Health's authority. I urge you to stop the government overreach into our personal medical treatment and choices which are not supported by the science. Reject this proposal.

Attn: ☐Technical Advisory Group
Please consider the following when making your recommendation.

We've seen, and the CDC has admitted:

- The vaccine does not prevent infection or transmission
- Children are not vectors of transmission for this virus
- Children have a statistically 0% chance of death

According to the CDC, children are at a statistically 0% risk of serious illness or death from COVID-19. The CDC also acknowledges, the vaccines do not prevent infection or transmission of the virus. Vaccine efficacy against Omicron is down to 27%, far below the 50% threshold required for FDA approval. Therefore, there is no need to vaccinate children against Covid.

On the other hand, there have been 41 reported deaths after COVID-19 vaccine among children aged 0 to 17. There have also been 602 reports of myocarditis and pericarditis among and 51 reported cases of blood clotting disorders among children. It is evident that these vaccines carry serious risks for children.

Vaccine developers have no risk on the table thus we cannot take this chance as parents and grandparents. Something then is not entirely proper about these vaccines needing to be given to our children. Where is the safety data? If children are at such low risk, then it shouldn't be a problem for these officials and vaccine developers to remove their protection.

With such low Covid-19 risk in children, no opportunity for benefit and just costs in terms of possible harms, these EUA Covid injections should not be mandated for our children to attend school.

Thank you for your consideration,
Roberta wolf

To whom it may concern,

The fact that this conversation is even still viable with respect to children feels wrong. You are sitting as a gatekeeper right now to protect our children. As of January 7, 2022 in the CDC press conference 84% of parents of kids 5-11 had NOT taken steps to give this shot to their children. It is federal law that everyone must have the right to refuse treatments that are under emergency use authorization. Covid Tests, Covid shots are all still under this Emergency use Authorization. Which means that as soon as the 'emergency' is over then what? Has there truly been an emergency for our children? The American Academy of Pediatrics reports that there has been no increase in mortality for children 0-18, over the two years. It has maintained at .1%. We can no longer make children responsible for the 'safety' of adults when adults can take precautions for themselves.

Look at the states that have not put masks on kids, they have not fared any differently. They are still healthy. They are in school full time.

Please stop this conversation until such time that there is long term health and safety data for this shot in children. This shouldn't even be a conversation till such time. You will clog up doctors offices with parents trying to seek exemption forms, this will clog up time for school nurses and staff to process these forms for kids.

You have a job to protect children. Do not expose them to be part of this experiment.

Thank you for your time,
Katie Smith

Regarding the Feb. 10 TAG Meeting: Public Comment

Good Morning,

I have been a licensed health care provider for the past 17 years. I have a 12 year old in LWSD. PLEASE do not recommend mandating COVID-19 vaccination for our school children.

I feel motivated to state that I am not anti-vaccine. I have been vaccinated with all schedules, as has my daughter (except for this one, as I have grave concerns with the need and safety of this vaccine in her age group).

- * The vaccine was made for 5 variants ago.
- * Studies have noted continuing decline in protection against Omicron, as well as declining protection over 90 days.
- * Omicron is declining. We have no idea if this will remain the variant, or, if a new variant will pop up and we have no idea if the wild type vaccine will be effective against the new variant.
- * The age group has a near nil risk of anything related to COVID.
- * These shots do not stop infection, nor transmission.
- * Pfizer states that they will need 5 years to study the safety data for this age group.
- * There are very concerning trends with adverse events and these must be investigated to the fullest.

Because of these points above, pushing this as a mandate is optics only; creating a false sense of protection to the parents who want this.

The flu is more deadly to our children than COVID. We do not mask, isolate, mandate, close contact trace, nor do we mandate an annual shot (because at times these are only 14% effective) to our children. PLEASE stop this insanity.

I respectfully submit that I will remove my 12 year old from public school if this mandate

is approved.

Warmly,

Angela,

Angela Pifer, Ms, Functional Medicine Nutritionist, LCN, CN

Bastyr University Alumni '05, Adjunct Faculty, Meticulous Researcher

to TAG members,

It seems incomprehensible that you are even contemplating this step of requiring a still "Emergency Use Only" as a safe and effective medication. The original Covid shot is not effective on the mutated Covid virus. Children have been statistically shown to be the least affected by the virus. This particular shot has not been vetted in the usual manner as the other required vaccinations. There is no long term information on the necessity for this shot to be required, nor are there any studies of the effects, long term on any group of children who have been inoculated with the Covid shot.

If it is already not apparent to you that parents don't want this for their children, along with the comprehensive sex ed and crt programs, how many more students do you think will exercise their GOD-given rights of personal autonomy, particularly when it comes to medication?

The bottom line in this case, as in any requirement for "Emergency Use Only" medications or medical procedures, is that the Nuremberg Code, with international agreement, prohibits any coercion, etc. I have been so puzzled that there have not been more lawsuits against our federal and state governments for their blatant violation of this code.

Please make the well-informed decision that the Covid shot is not a reasonable, necessary nor legal choice.

Sincerely,
nancy parks

FW: To: Mr. Keith Grellner, Mr Stephen Kutz, Dr. Thomas Pendergrass

January 13, 2022

Mr. Stephen Kutz

Dr. Thomas Pendergrass

Mr. Keith Grellner

RE: BOH meeting of January 12, 2022

I would like some clarification on a couple of items that were discussed at the Jan 12, 2022. I did not register to make a public comment, I just watched and listened to the meeting online.

At about the 4:42 minutes mark on the meeting live video there was an attempt to clarify the public's concern over quarantine camps. Mr. Kutz stated that "to his knowledge there were no enforced quarantine camps that existed and none were being set up or built". Mr. Grellner stated, regarding quarantine camps, " they don't exist", he was "not aware of any mandatory isolation camps" and "the accusations are not true".

Then why did the state of Washington have this job posting that closed November 2, 2021?

<https://www.governmentjobs.com/careers/washington/doh/jobs/3233390/isolation-quarantine-strike-team-consultants-ps2-non-permanent-doh5814?keywords=DOH5814&pagetype=jobOpportunitiesJobs>

Earlier in the meeting a BOH member (I do not know who) wanted to discuss and clarify the public's concern over "isolation and quarantine camps". That person said that per WAC 246-100-040 an individual would not be mandatorily quarantined and that every individual would go before a Superior Court judge so the health official and the individual could present their case to the judge, i.e. no one would be mandatorily quarantined.

That is not what the language in WAC 246-100-040 states.

<https://app.leg.wa.gov/WAC/default.aspx?cite=246-100-040>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FWAC%2Fdefault.aspx?cite=246-100-040>

040&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C0a59a90f35b440d1e18d08d9dc270598%7C11d0e211

(1) At his or her sole discretion, a local health officer may issue an emergency detention order causing a person or group of persons to be immediately detained for purposes of isolation or quarantine...

(2) (2) A local health officer may invoke the powers of police officers, sheriffs, constables, and all other officers and employees of any political subdivisions within the jurisdiction of the health department to enforce immediately orders given to effectuate the purposes of this section in accordance with the provisions of RCW 43.20.050

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx?cite=43.20.050>

(4) and 70.05.120

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx?cite=70.05.120>

.

(3) (3) If a local health officer orders the immediate involuntary detention of a person...

Yes it does state: NOTICE: You have the right to petition the superior court for release from isolation or quarantine in accordance with WAC 246-100-055

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FWAC%2Fdefault%2F100-055&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C0a59a90f35b440d1e18d08d9dc270598%7C11d0e211>

. You have a right to legal counsel.

But this is after an individual has been detained.

There is obviously so much more to WAC 246-100-040 but I hope you can see why the language of this is so concerning to citizens. Can you not understand this concern? This WAC is quite extensive and alarming as to the potential overreach of government power. I would appreciate your response.

Thank you,

Victoria Dyer

As a father of 6 with 3 school age children, I must voice my opinion against the ridiculous notion that you want to require children to get these shots that #1 don't prevent you from catching COVID and #2 don't prevent you from spreading it.

Is it really worth the risk to the future health of our children to mandate shots that provide little benefit and carry many known risks and who knows what long-term risks? Studies show that increased doses of vitamin D can have the same affect of reduced symptoms without the risks.

It's also well documented that children are in the least risk of all age groups anyway. So what purpose will this serve?

One of my daughters is fully vaccinated and works in daycare. She recently contracted COVID along with 7 of her vaccinated coworkers! What proof do you have that number 6 on your agenda holds any truth? I can tell you from experience that it doesn't! I know more vaccinated people who have contracted Covid than unvaccinated. In fact in our household of 7, my vaccinated daughter who quarantined at home, was the only one in our household to catch it while all others in the household were unvaccinated and didn't catch it!

"#6 Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting"

Can you say with certainty that there will be no adverse effects 5-10 years down the road from administering these drugs to children? You cannot! Therefore you cannot insist on requiring these drugs to be administered to children.

I just read the items #5 and 6.

I'm disappointed at the complete ignorance of the evidence that the vaccine does not prevent Covid nor prevent the transmission of the virus between people or in any setting. It does not do that. The principles of virology and immunology as well as epidemiology is being ignored and /or trashed.

There had been no consideration so far in natural immunity among those who have acquired Covid regardless of vaccination status. The decision you make will have irrepressible ramifications on anyone of all ages. I implore you not to recommend this vaccine at all. It has not been time-tested and the evidence of adverse reactions and death due to the vax is being ignored or covered up. I know people who have been affected or died due to this vaccine. STOP!!!

I'm definitely opposed to such a movement as there is no peer reviewed data on the effectiveness of this gene enhancement therapy shot. It's not an approved vaccine and Covid 19 is far down the list of causes of death of children in WA state. I watched the round table that Senator Ron Johnson chaired. The actual peer reviewed data presented there is enough to convince me that this shot is not ready to be used on our children.

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

We the people of WA State are standing with one voice. Action: We the constituents and community members of this great State of Washington, DEMAND the Washington State Board of Health (WSBOH) REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

We will continue to collect and share as our collective voice grows.

Respectfully,

Corina Watt

External Email

Dear Ms. Kahler,

Thanks for holding a great Technical Advisory Group meeting on 1/12/2022.

After the meeting, I notice SBOH put out a survey at:

<https://forms.office.com/Pages/ResponsePage.aspx?id=F-LQEU4mCkCLOffcWsfXLT2Pur8KuHhPgr4pnygk7IxUQklaTUhYTVBXNUdJOTQ3TFpQRlpCOUdCRC4u>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fforms.office.com%2FPages%2FResponsePage.aspx?id=F-LQEU4mCkCLOffcWsfXLT2Pur8KuHhPgr4pnygk7IxUQklaTUhYTVBXNUdJOTQ3TFpQRlpCOUdCRC4u&data=04>>

in an effort to continue collecting public comments, which is also great.

However, it has come to my attention that a Chinese anti-vaxxer has been organizing a flooding of fake data against the survey in an effort to mislead the health opinions of the general public to try to influence the public policy maker.

This person's online Telegram name is: □□□□, and he is agitating all his 12.2k followers all around the world to storm this survey with anti-vaxxing responses in order to cause WA BOH to make ill-formed decisions.

According to the published public comments, I notice this person also sent several emails to you before the 1/12 meeting:

From: rudolphwest17

Subject: Attention: Please do not add Covid19 vaccine to "required" list of child vaccination

Please note: Rudolph West is not his real name.

1

1/21 In the evil state of Washington, last week, the Board of Health failed to include "Use law enforcement to detain the unvaccinated" and "vaccination mandate in school" in their agenda. But they would not accept their failure. They know there are all kinds of left-wing White, Black, Yellow, Spanish here, so they put out an online survey, in an effort to support their "adding COVID-19 vaccine as a requirement for school entry" proposal.

NO MATTER WHERE YOU ARE, I want you to help me fill this out which can be done in just 1 minute. Your small effort will help me bring debacle to these evil fake health officials' attempt to harm my children. Join us, let your voice be your weapon.

As far as the first question is concerned, just use "Washington School District".

Obviously, he is encouraging 12k people, many of whom are not even living in the US, let alone WA state residents, to flood the survey with faked WA residents data, which obviously pose a serious threat to the public health of the community and commit a crime. In the screenshot, you can also see he is openly asking people (including non-US citizens) to submit the survey more than once and in vulgar languages.

In particular, his agitation scheme to sway health official opinions could result in tremendous health risk consequences to the millions of children in Washington state.

Please ask the appropriate department to step in, investigate and defeat this egregious cyber attack! At the minimum, denounce such fraud in your next public meeting with this evidence.

Thanks to you for keeping the Washington state communities and children healthy!

Jennifer

Subject: COVID-19 for Inclusion in Washington's Immunization Rule

External Email

Hello—

I missed the deadline for the survey regarding including the COVID 19 vaccine as a required immunization to attend school.

Please, please, please keep this an optional vaccine. For a plethora of reasons parents will chose not to vaccinate their child against COVID-19. Please don't let this prevent children from going to school. Please allow Washington families to decide what is best for their children with the guidance of their pediatricians. Washington citizens are smart and capable of making this decision without a mandate. The mRNA technology is to new to require it to be given to our smallest citizens.

I appreciate you taking the time to read my note.

I will pray for this committee at this critical time.

Sincerely,

Andrea Isaacson RN-BSN

Corrupted in WA,

I think we've all had enough of this "Rules for Thee, but not for me..."

When are you going to be giving up on this never-ending covid nonsense? Let our children breathe, get sick, get better/healthier, move on with their lives?

Are you also sick of the hypocrites at ALL levels? I am seriously glad that we will be pulling our children out of WA schools, moving to a free state and will letting them breathe. Very soon, expect to see our withdrawal letters being handed to the schools as they do not fight with us against this tyranny.

I want to send my kids to school but they don't want to wear the 'school/medical masks'. I say, if they give you one, put it in your pocket, have them call me. I'm awaiting a call. No more!

Josh Daugherty

While the Unity Project has been laser focused on stopping the vaccine mandate for K-12 students bringing forth scientific experts and resources, we must widen our fight to include these tyrannical and illogical mask mandates.

There are groups across California and other states that have done amazing work fighting these mask mandates and we are with you when we say Enough is Enough!

Our children are wearing masks for 6-8 hours a day while Governor Newsom, other public officials and celebrities parade around maskless in a California venue that requires them. A venue with 70,000 people, in a state that is still "under emergency". This is not only hypocrisy in the highest degree, it's a blatant slap in the face and, in our opinion, the green light to stop sending your kids to school in masks if you haven't already.

Despite Newsom's poor attempt at an explanation for not wearing a mask, it's time to email and call your schools, principals, teachers and school board members letting them know you will no longer comply.

- * Send your kids to school without a mask, tell them they are heroes for standing up
- * Talk to other parents and get a group together, show power in numbers
- * Reach out to school leaders, let them know your child won't be wearing a mask
- * You can use the verbiage and links below that point to empirical evidence of the efficacy and harm that come from masks
- * Share your success stories, you will be an inspiration to others!

Please see the links below illustrating, with empirical evidence, that masks are not only ineffective (as stated by Fauci in the attached video), they are dangerous. It is time we take action. Stop sending your kids to school with masks on. Do not comply. The only way we end this mask mandate is by uniting and fighting these mandates together. Find your group of parents at your schools, look on our strategic partner page for groups near you and join with them. Protest the mask mandates together. Email and call your principals and school board members.

There is NO LAW that requires the masking of our children. There is not even a mask mandate. There is only a "guidance" from the CDPH which is linked herein.

Those of us that want/need them gone are in the vast majority. They only serve to prevent the infected person from transmitting their illness (with an N95 only) but such people/children should be kept home anyway. Our kids are suffering needlessly.

Subject: 58,384 Constituents of WA STATE

attachments\02ABF34D11F843D3_HALT Immunization Criteria for Ch_PRDTool_NAMETOOLONG.xlsx

External Email

Dear members of WA State Board of Health,

58,384 constituents of WA State and growing respectfully ask that you the BOH recognize and honor through your actions and decision making parents right to choose. We ask you REFUSE to include the COVID-19 vaccine in 245-105 WAC this Thursday February 10th during the virtual meeting.

Action: We the constituents and community members of this great State of Washington, DEMAND the Washington State Board of Health (WSBOH) REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

Please see the link below or attached excel form for signatures gathered by Rochester Community Alliance, Rochester WA.

Halt inclusion of COVID-19 vaccine in WAC Petition, constituent signatures

Subject: NO to mandatory injections for Covid -19 for admission to school.

External Email

I am writing to urge you to say no to mandating vaccinations for Covid-19 for the admission to public school.

The choice to use a vaccine that has not gone through major time testing is a personal decision between a parent/guardian and the private counsel of their trusted doctor(s). It is not the place of the government or the BOH to dictate what is right for that individual and their families. Parents must be the ones to decide if this is right for them and their family. Some have great religious deeply held beliefs that these mandates would be going against. These tax payers are being excluded and discriminated for these beliefs and wouldn't be allowed to use the services of public education that they are paying for.

Mandating this would cause an obstacle that would create hardships within our state. People pulling their children from the public education system would cause disruption and loss of jobs in income for those employed with the Educational system. Our children in Washington are going through the most difficult times in our recent history and segregating them by not allowing them to participate with peers in basic public education would be cruel and ill willed.

In addition, we have no idea what the long term effects are of this vaccine and there are clearly possible risky short term outcomes. In your own words there is "Currently no published literature on pediatric Covid-19 vaccine effectiveness in K-12 school setting." So why in the world would anyone think that mandating an injection that hasn't been time tested would be a positive thing for the Public School system to do. We have also seen where there is no difference between vaccinated individuals and unvaccinated. Both individuals can be infected with the virus as well as spread the virus to others and according to Evergreen Hospital in Kirkland WA both can be taking up hospital beds. For some the vaccination doesn't even lessen the symptoms.

Do not mandate vaccines and allow Washingtonians to make a free choice what is best for them and their family.

Respectfully,

Angela Sherbert

Please enter your comments or questions in the space provided below:

I have tried to fill out the survey regarding a potential COVID vaccine requirement for schools. Unfortunately, the survey would not submit and said too many people have replied to the form? This is very upsetting as I know many parents who have not had a chance to complete the survey! I am an MD, pediatrician and anesthesiologist and I am extremely OPPOSED to a vaccine requirement for schools. If this were a vaccine that had remained >90% effective (such as measles and polio vaccines) I would consider supporting this as a requirement. However, this vaccine, while safe, is VERY poorly effective at preventing breakthrough infections and transmission. Many vaccinated kids have recently been infected and passed the virus to others during this current omicron surge. If this were required for school it would alienate many children as many parents would refuse to vaccinate their children. It would especially alienate poor children, children of color, and those with poorly educated parents. These children need a stable school situation the most! Please please be reasonable and offer the covid vaccine but do NOT require it for school.

Over my dead body but you ever put that damn needle in my child's arm with that poison. Until that crap has been around for years and years to properly study the outcomes you will never put that crap in my child's body. Do you understand me? It will never happen. I will fight you to the death. So Mark my words never will it happen. You wanna have people physically fighting you , go for it because that's what's going to happen. Covid is going away. We're moving on. We don't need to go backwards and start giving our kids a poison in their bodies that we don't know what it's going to do to them years down the road. Stop it already!

Not to mention, kids are not dying from this crap it is not a pandemic for the children it never has been. We don't need to do something that is it happening. So stop it stop it stop it! You guys are making matters worse and worse instead of getting better. There are thousands and thousands of kids who are now permanently disabled or dead from the vaccine stop forcing the shit on our kids.

Dear Board Members,
Coronaviruses have existed for a long time, and we can expect more varieties and mutations of these types of viruses.
To insist that everyone submit to an injection of some therapy for evolving and mutating viruses makes no sense.
COVID-19 has become like other flu and cold viruses: anyone can become infected with it, and almost everyone will recover. There will always be some people who succumb, just as there are those who die every year from the dominant flu virus of the year.
Life includes risk. Please respect the inalienable right to choose whether or not to receive an injection that carries the risk of adverse effects greater than the risk of a virus.
Discriminating against people based on whether they've received a Covid mRNA "vaccine" is to be "vaxist," like being bigoted, sexist, racist, anti-Catholic, or anti-Semitic.
Some people insist that the "unvaxxed" must be denied basic human rights. We've been down this road before. Don't make Washington continue to be a laughingstock.
Thank you for your service.

I am writing to ask that you NOT consider requiring the Covid vaccine for school children for these reasons:

1. Children have an incredibly low risk of getting sick from Covid. Most have very mild symptoms. According to data published by the CDC the survival rate of children is 99.99815%. They are not the "at risk" sub-set of the population at risk for serious illness or death.
2. There have been no long term safety studies for children.
3. There have been 36,167 adverse events reported to VAERS for children under 18. These numbers are being ignored and this is posing a safety threat to our children.

Requiring this vaccine for a population that is not at risk and when due diligence has not been taken to ensure their safety is wrong and irresponsible.
Please do what is right for our children and allow parents to make the decision that they feel is best for their children.

Thank you,

Subject: Vaccine Requirements for Schools

External Email

Hello,

I am a parent and business owner within Puyallup School District. I am writing regarding the discussion of requiring the COVID vaccine for our children.

I will start with the fact that I am not anti-vaccine. My children are up to date on every required vaccine. I AM, however, anti- COVID Vaccine for my children. There has not been enough research or time for this "vaccine" to be considered safe with no long-term effects. I am not willing to allow my children to become guinea pigs for this state. This is our line-in-the-sand. We have put up with a lot in this State affecting our home and Income. As upsetting as it has been, we have been dealing with it.

When it comes to my kids' health, there is NO concession to be made.

This state has proven over and over again that they can not be trusted to provide all of the actual data. This distrust for "science" is a monster of the States' own making. Taxpayers need to be given ALL of the facts (pros and con) so we can make our own informed decisions. Until this happens, we will continue to research on our own. Every time we see how data is being misrepresented to further manipulate the States agenda, it will only further separate the people from this local Government.

My kids and I love the schools and teachers that we have experienced. However, if this becomes a mandate, I will be pulling my kids from the public school system and looking at alternative education for them. I will deny any and every levy/vote for the schools districts and/or county if this becomes a reality.

My stance regarding the vaccine for my children may change based on future studies and data - provided that all of the information is being openly shared. My decision is not a political one, but one out of concern for my children's future. Regardless, I will never support a FORCED vaccination of a product that is nothing more than a Virus shot, similar to the Flu shot with its many strands and Booster shots.

Thank you for your time,

Hello,

I tried to complete the survey (<https://forms.office.com/Pages/ResponsePage.aspx?id=F-LQE4mCkCL0FfcwSfXLT2Pur8KuHhPgr4pnygk7IxUQklaTUhYTVBXNUdJOTQ3TFpQRlpCOUdCRC4u>)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fforms.office.com%2FPages%2FReLQE4mCkCLoFfcwSfXLT2Pur8KuHhPgr4pnygk7IxUQklaTUhYTVBXNUdJOTQ3TFpQRlpCOUdCRC4u&data=04>
) but I got the message that The maximum number of people have already responded to this form.

I would like to say that I am in favor of a school covid-19 vaccine mandate because for divorced parents who do not agree on vaccinating their children, the mandate would remove that issue.

Also, lots of vaccines are already required for school. I don't see why the covid-19 one cannot be added as well.

Thank you,
Alice Orrell

I strongly oppose adding the covid shot to the school schedule. Here are a few reasons why:

-Currently no published literature on pediatric Covid-19 vaccine effectiveness in K-12 school setting

-Covid-19 is far down the list of causes of death for Washington children. Yet, suicide is the 3rd leading cause of death for our teenagers ages 15-19.

-No proven risk/benefit to under 18

-No long-term studies on a rushed vaxx

-Natural immunity has not been considered and should be

-Flu was never required but poses as much if not more death risk to children

To the board of health--

Follow the science! The latest science.

Entire countries, several States, several medical journals, doctors, and other health care professionals are doing the exact opposite of what your board is proposing for our children.

Why is Washington State so far behind the rest of the USA, England, Israel, and other countries in realizing that we owe it to our most vulnerable populations to protect them from this virus? The elderly and infirm.

Why is it that most countries and several states have never stopped educating the youth in the classroom? Why is it that these successful schools have never mandated vaccinations or masks for the least vulnerable?

Our grandchildren used to love school. They did well and excelled in their studies. Most of their classmates did, too. That was before this pandemic and the fear that was pushed by the media and woke officials.

First, your board (plus the Teacher's Union and our Governor) closed down the public schools. Two weeks is what it would take to "flatten the curve." That was a lie promoted by Herr Fauci.

Nothing happened in the classroom for the last four months of 2020. Nothing! The kids, if they were fortunate, had parents to coach them during that time. Most of the students had no educational progress. Parents had to quit work to stay home with their children. It was a disaster!

Then, you authorized, with the blessings of the Teacher's Union and the Governor, a poor replacement for empty classrooms; distant learning. Chromebooks were handed out but education didn't happen. The kids didn't like it. The teachers didn't like it. Yet the

students were advanced to the next grade level. Our young population, the ones that will be doing your dentistry, your surgery, your therapy, your plumbing in twenty years, did not get the education the taxpayers and parents expected.

Most schools started to resume classroom activities in September 2021. Not all. And the kids are BEHIND where they should be. Most students are very unhappy about how their schools are run now. But it seems some boards, some politicians, are not happy that kids are in school and parents can resume working to pay the bills. You are proposing that all children must take this EXPERIMENTAL medicine that MAY protect the least vulnerable population. Balderdash.

Myocarditis and pericarditis cases are showing up in too many young people after taking the injections. Some children (and adults) have died after taking the shot. Too many to ignore. And you propose to gamble with the lives of our young people? You are surely aware that the survivability rate for people that catch the virus is close to 99%, right? I had it in the fall of 2019 at age 72. A Z-Pak eliminated the pneumonia in a week. I felt ill for 3-4 days. My cough lingered but I self-quarantined.

A neighbor just moved here from Meridian, Idaho. He worked for that county's government. He told us that 30% of all move-in families to Meridian Idaho come from King County, WA. People are fleeing and will flee to states that are NOT mandating vaccinations. Is that what you want, a brain drain from WA?

My son and his family are looking for work in Idaho or Montana. They pay a lot of taxes. They have three boys in public schools. They are 100% against these stupid vaccine mandates for K-12 children. If they leave, we will also leave. Washington has been our home since January 1980. We appreciate the amenities and opportunities here. We have thousands of friends and clients in WA. We don't want to abandon them. But we will if you keep pushing this outdated and unnecessary vaccine mandate.

If "it's for the children" as the woke people are known to chant, give the kids a break. Let them attend school without this questionable vaccination AND without masks. The masks do nothing to protect anyone. I drop off my boys at school a couple of days each week. I see how the kids treat their masks – rubbing their faces, pulling them down so they can be understood. Most kids reuse masks for days and weeks without laundering them or washing them.

We will be tuning in to the next board meeting.

Good morning,

I wanted to address the Covid vaccine issue being discussed of kids k-12 being forced to get it.

This should not be forced upon parents and students. It has been proven that the covid vaccine is not effective to young healthy kids. There has been no long term studies about side effects as they get older. There are facts that the covid virus is not deadly to kids. And that even with a vaccine the virus still spreads.

If this goes into effect more parents will take their kids out of school leaving less kids and money in the school systems. I being one of them. I will not force my daughter to get a vaccine that hasn't been around long and for a virus that is not deadly to her.

Thank you,

Subject: Governor Inslee...end the mandates now!

External Email

Good afternoon,

I am writing to implore our state leadership to stand up for what is moral and honorable regarding our kids (and hoping our local leadership will put pressure on you as well)!

The Covid "state of emergency" here in Washington has gone on for over 700 days! Half of our states have dropped their states of emergency already. Washington State is now one of only NINE states that mandate masks (<https://www.newsweek.com/how-many-states-still-have-mask-mandates-place-1675939>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.newsweek.com%2Fhow-many-states-still-have-mask-mandates-place-1675939&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ce200e0b30ee64191e79208d9e83d5e9d%7C11d> dated 2/3/22). Several countries (Britain, France, Ireland, the Netherlands and several Nordic countries, to name a few) have eased or dropped their covid restrictions in the last few weeks as well. Knowing this, and knowing that these states and countries are no worse off than Washington in regards to covid, why are you still promoting this farse of a public health emergency?

Why are you demanding our kids mask up at school (where they are required to sit 3' apart) when you know full well that they have been hanging out with each other socially, playing sports together, attending large events together, without masking and have suffered NO dire consequences. It is time to DROP THE MASK MANDATE and allow people to decide for themselves if they feel at risk and want to continue masking.

Please take a moment to read this Op-Ed from the Washington Post, written by three infectious disease physicians/professors of medicine

). It lays out some very good arguments to make masks optional at school, based on the CDC's new mask guidelines from late January 2022.

The ramifications of these mandates on our kids' mental, emotional and physical health are not yet fully understood, but what has surfaced so far should scare all of us more than a virus with a 99.97% survival rate. So far, several anecdotal consequences are being reported in my area and I suspect it's just a matter of time before studies back up all of them. Among them...

- * Kids are being bullied in school for not "properly" wearing a mask, including by some teachers who tell them they are going to "kill grandma"

- * Kids are increasingly reporting anxiety and depression over not being able to interact normally with others (seeing facial cues, emotions, etc)

- * Kids with learning disabilities are falling farther behind because of mask wearing
- * Kids are being sent home from school for not wearing their mask, in violation of their basic, constitutional right to an education in this state
- * Kids are being discriminated against over disabilities that affect their ability to wear a mask (remote learning is NOT equal opportunity education)
- * Kids' friends and family are turning against each other over difference of opinions
- * There have been a substantial number of teen/preteen suicides in our area over the last two years, some directly attributable to our state's covid restrictions

We are destroying an entire generation of children with these archaic mandates! I respectfully ask our state leadership to make changes to the mask mandates immediately! Our children have suffered needlessly for almost two years and you know it!

And, to our local leadership, I ask for your support and advocacy for our children. It is obvious that without a multitude of voices, our pleas are going unheard. Please get involved and come together so that we can fight for what's right. I am counting on you to be a voice for us and the youth of Washington.

Sincerely,

Dena Petersen

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

Good evening,
I want to express my concerns regarding the COVID-19 vaccine for children. Do not add it to the schedule or as a requirement for school. Children are not at risk and do not need the COVID-19 vaccine, especially since it doesn't stop transmission or infection.

Respectfully,

Jamie Keiter

□Hello

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following reasons:

1. There is no medical justification for making the shot mandatory.
2. There are dozens of studies worldwide showing the near zero mortality rate for children associated with COVID-19.
3. The shot does not prevent transmission nor infection and as such, cannot be used as a justification to "slow the spread" as it does not do so.
4. The shot does not have a single commercially available or distributed dose in the United States that has passed FDA approval.
5. There has been zero release as to the actual ingredients in the vaccine.
6. There are no long-term efficacy studies to determine risk.
7. Parents and legal guardians retain the legal rights to all medical decisions for their children.
8. There are several therapeutic and reasonable options for early treatment, including for children, that would be more effective than a shot that does not reduce transmission or infection.

Thank you,
Carrie Swanson

Dear Mr. Ford, the Administration of St. Patrick's, the Seattle Archdiocese, and the WA State Board of Health,

I am writing today on behalf of my student, as well as several concerned St. Patrick's families who have reached out to me directly after the St. Patrick's parents group was turned off because of polite discussion about the ongoing mask requirement at school. I am imploring you to stand up for our children's health and well-being and take a stand against the mask mandates. The Seattle Archdiocese represents a well-respected number of facilities, students, and families across Western Washington. You have the ability to show the residents of Washington State that you are an organization that puts their student's safety first, not politics, like the Baltimore Archdiocese is doing
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.baltimoresun.com%2Feducation%2Fmd-school-masking-20220211-20220211-w62eycynu5fybgztpujemsuwga-story.html%3Ffbclid%3DIwAR1xe8ncPOmITYxyAOfAkx7IDyI7ycxmek4TocY5sUR2ia9XBBVvkKTY8u4&data=1>>
!

It is our understanding that the current mask requirements were adopted by the Seattle Archdiocese last fall at the suggestion of the Washington State Board of Health. Since that time, innumerable studies have been published across the world on all aspects COVID-19, from the inherent risk factors & most impacted age cohorts, the efficacy and side-effects of pharmaceutical preventions, early treatment protocols and non-medicinal mitigation strategies such as masking and school shutdowns. Yet with new scientific evidence, there has been no update to the masking protocols and mitigation strategies in schools across our state.

A little about me – no – I'm not a "COVID denier" that many believe those asking for choice in masking are! In fact, our family began watching very closely what was happening in China in December of 2019, when it was just a conspiracy and nothing to worry about. By late-January, I was one of the "crazy people" doing my grocery shopping in an N95 mask and gloves. At that time our 3 children all attended public school, and we made the decision to stop sending the kids to school 2-weeks prior to the official shutdown. And who doesn't remember wiping down groceries and mail with sanitizing wipes, or simply leaving things outside for days before allowing them into our houses! We chuckle about all of that now, but it important to reflect on. Why did we do all of that?

Simply put, in March of 2020, there was quite literally nothing known about this new illness everyone was calling COVID-19. Was it transmitted by touch, airborne droplets like the flu, or truly aerosolized? Could it survive on surfaces? Who were the most at risk for hospitalization and death? We knew nothing. So, we took what are now known to be silly, and in some cases drastically damaging, measures. We call them lessons learned. However, what we've learned is not being put in to practice through policy change. Instead, we are continuing with measures science has proven are causing more harm than good!

We understand now what ages and comorbidities are at the highest risk. We know how to treat COVID at home, and what simple, proactive steps everyone can take to prevent

It is common knowledge that the cloth and surgical masks worn by students do not prevent the transmission of viruses. That is how my son was able to contract COVID while at school! That's also the very reason there was not a single N95 available to purchase in April 2020! At their largest measurement (0.3 microns), 250 aerosolized COVID viruses can fit inside the average human hair. Now consider those gaping holes in the sides of the student's surgical and cloth masks as you welcome them to school.

) It is widely known that masks do not prevent the passage of particles as small as aerosolized viruses.

One of the pre-eminent experts on PPE and industrial exposure in the U.S. is Stephen Petty. He advises large industrial companies on Industrial Hygiene (aka, worker safety) and testifies as a subject matter expert on class-action lawsuits, like that of Monsanto, regarding industrial PPE protocols - such as with dangerous chemicals – when inhaled particulate is life or death every day. In the presentation linked below he covers COVID specifically. While I'm sure you are receiving many messages like mine full of links and references, I cannot urge you enough to take the time to watch this video presentation.

In his world where PPE actually needs to protect, masks are not even considered an option, nor is facial hair! Stephen Petty - On PPE and Aerosols

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.youtube.com%2Fwatch%3F>

Included in this next link is over 150 mask studies with conclusions, in part, against the effectiveness of masks due to a variety of variables. I found while doing my own researching that resources providing a lot of information in one place was very helpful.

150+ Comparative Studies and Articles on Masks

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fbrownstone.org%2Farticles%2Fmore-than-150-comparative-studies-and-articles-on-mask-ineffectiveness-and-harms%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ca8d93815229f4e9dc45b08d9f0a220d6%7C11>

Lastly, on the science of whether masks work, I would challenge that after 2-years of continual and aggressive research, study, and retrospective review throughout the world, one should expect to see clear, overwhelming, and consistent data from the scientific community proving without a shadow of a doubt that masks provide a strong level of protection. That data simply doesn't exist.

Here's where common sense can help to fill in the blanks. Masking in schools is not widespread across the country. Only 15 states have previously had mandatory masking in schools, though that number is reducing by the day. IF masking students really is the lynchpin that has kept our state's elderly and high-risk population safe and we simply cannot do without it, how is it there isn't overwhelming hospitalization and death of the elderly and high-risk in the 35 states who didn't mask students?

All masking science aside, in my opinion the most important topic to consider is the how masking and the subsequent enforcement of masking is having on our children. There is a steady outpouring of data showing negative consequences for our children, from faltering to outright failing test scores, startlingly high rates of referral to speech therapy in young learners, massive increases in anxiety, self-harm and depression among adolescents and teens, and a basic lack of excitement and connection to school communities. The Educational Consequences of Masking Children

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nationalreview.com%2F2022/02/22/educational-consequences-of-masking-children%2F%3Ffbclid%3DIwAR0E9-jL4yoUssHhJesfGpD1rYOWYams2Pfs93XuEoBE-HrzrKWpfyVjWS0&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ca8d93815229f4e9dc45b08d9f0a220d6%7C11>

However, I don't think that linking study after study is needed to make this point. You are professional educators, and you know children! You know how they learn, and how they grow. You know how they respond to a smile. You know how they watch a teacher's mouth move when they are reading aloud, or when hearing a new word. You know how children instinctively see another child's frown and respond with kindness. Or how they see another child's smile and return it with a smile of their own. Or how children see someone react poorly to an unkind word they said, so they apologize, realizing the impact of their words on others. Without seeing that frown, they cannot know that impact. These little connections and the learning of social queues are truly the work of childhood, and that has been taken from them. Think back to your favorite teacher as a child – then imagine not knowing what that teacher looks like without a mask on!

And what about the students who are not okay, and who are blending in and disappearing into a sea of masks? What about the children who have anxiety? What about the students who are embarrassed to ask for help, or feel left out? Without seeing the emotions on their faces, how can we be sure they aren't slipping through the cracks? The data says they are. JAMA Pediatrics – Mental Health & Wellbeing

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fjamanetwork.com%2Fjournals%2F>

We have also taken our most innocent and easily influenced segment of the population, and over the last two years taught them that they should fear the air around them. They should fear their own breath. If they take their mask off, they could be responsible for infecting someone who dies. Or that their good friends or classmates could get them sick. Instead, they must keep their face hidden, not speak during lunchtime, and don't get too close to one another because that's just too risky and unsafe. This is not okay!

I'm a Public School Teacher. The Kids Aren't Alright.

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fbariweiss.substack.com%2Fp%2Fa-public-school-teacher-the-kids&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ca8d93815229f4e9dc45b08d9f0a220d6%7C11d0e217>

Masked Schoolchildren

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.tabletmag.com%2Fsections%2Fmasked-schoolchildren%3Ffbclid%3DIwAR00OBNXMP3yJRFUQyreoce8AXfbgTOiJU8tU3qheAUGJSAoSKNP8iJ4sW8&d>

Though we are a new family to St. Pats, my father & his family all matriculated through parochial school, so many of the teachings we are seeing resonate deeply in my heart, including the fostering of strong community bonds. But that community collapses without smiles in the hallways, with parents unable to meet and know one another at events, without the hugs over a scraped knee on the playground, without the sarcastic smirks of middle school, and without the ability see someone's frown and help to make them smile.

The Strength of Weak Ties

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cse.wustl.edu%2F~m.neuma>

The residents of this state, and specifically the parents of school age students, have been understanding of restrictions, and, more recently, patient in waiting for policies to be adjusted in response to the data. But as the data continues to build against mask mandates with no changes to policy, we are asking you to push back on behalf of the health and education of our children.

We teach our kids to follow their morals, to do what's right even when it's hard, and to respectfully disagree when necessary. Now is the time for the school administration, and the leadership at the Seattle Archdiocese, to recognize that our children need us to stand up for them. It's time to respectfully disagree and stand up for what is right on behalf of the students in your care.

We are asking you to do better for our children.

We are asking you to do better for our communities.

We are asking you to do better.

Thank you for your time and thoughtful consideration,

Dani Kessler, 253-459-2449

P.S. And please – take the time to watch the Stephen Petty video on PPE linked above.
It's worth all 26 minutes.

Dear Mr. Ford, the Administration of St. Patrick's, the Seattle Archdiocese, and the WA State Board of Health,

I am writing today on behalf of my student, as well as several concerned St. Patrick's families who have reached out to me directly after the St. Patrick's parents group was turned off because of polite discussion about the ongoing mask requirement at school. I am imploring you to stand up for our children's health and well-being and take a stand against the mask mandates. The Seattle Archdiocese represents a well-respected number of facilities, students, and families across Western Washington. You have the ability to show the residents of Washington State that you are an organization that puts their student's safety first, not politics, like the [Baltimore Archdiocese is doing!](#)

It is our understanding that the current mask requirements were adopted by the Seattle Archdiocese last fall at the suggestion of the Washington State Board of Health. Since that time, innumerable studies have been published across the world on all aspects COVID-19, from the inherent risk factors & most impacted age cohorts, the efficacy and side-effects of pharmaceutical preventions, early treatment protocols and non-medicinal mitigation strategies such as masking and school shutdowns. Yet with new scientific evidence, there has been no update to the masking protocols and mitigation strategies in schools across our state.

A little about me – no – I'm not a "COVID denier" that many believe those asking for choice in masking are! In fact, our family began watching very closely what was happening in China in December of 2019, when it was just a conspiracy and nothing to worry about. By late-January, I was one of the "crazy people" doing my grocery shopping in an N95 mask and gloves. At that time our 3 children all attended public school, and we made the decision to stop sending the kids to school 2-weeks prior to the official shut-down. And who doesn't remember wiping down groceries and mail with sanitizing wipes, or simply leaving things outside for days before allowing them into our houses! We chuckle about all of that now, but it important to reflect on. Why did we do all of that?

Simply put, in March of 2020, there was quite literally nothing known about this new illness everyone was calling COVID-19. Was it transmitted by touch, airborne droplets like the flu, or truly aerosolized? Could it survive on surfaces? Who were the most at risk for hospitalization and death? We knew nothing. So, we took what are now known to be silly, and in some cases drastically damaging, measures. We call them lessons learned. However, what we've learned is not being put in to practice through policy change. Instead, we are continuing with measures science has proven are causing more harm than good!

We understand now what ages and comorbidities are at the highest risk. We know how to treat COVID at home, and what simple, proactive steps everyone can take to prevent serious illness. Doctors know how to treat serious cases in hospital, and what treatments to avoid. Large percentages of people now carry natural immunity, and vaccines are available to those who choose to take them. And, most importantly, we know that our children, thank God, are the absolute lowest risk cohort. Yet those children have unfairly borne the brunt of mandates in the cruelest of ways under the guise of safety.

It is common knowledge that the cloth and surgical masks worn by students do not prevent the transmission of viruses. That is how my son was able to contract COVID while at school! That's also the very reason there was not a single N95 available to purchase in April 2020! At their largest measurement (0.3 microns), 250 aerosolized COVID viruses can fit inside the average human hair. Now consider those gaping holes in the sides of the student's surgical and cloth masks as you welcome them to school.

Even the CDC's own study, and associated infographic, "proving" masking efficacy has an asterisk noting the protection offered by cloth masks was "not statistically significant." Only N95s prove any amount of statistically significant results. [CDC - Mask Effectiveness Indoors](#)

Another CDC resource clearly states that the filtration of masks “Does NOT provided the wearer with a reliable level of protection from inhaling smaller airborne particles and is not considered respiratory protection.” [CDC – Masks vs. Respirators](#)

The ACGIH, a non-profit of occupational and environmental health and sciences experts, has compiled the results of much of their research regarding how to protect workers during the COVID pandemic into an infographic for employers. Even when both parties are wearing cloth or surgical masks *correctly*, the amount of protection offered is only 27 minutes and 60 minutes, respectively. How does that very limited amount of protection justify the mental and emotional consequences of masking students? [COVID-19 Worker Safety - Masks](#)

It is also for this reason that whenever you purchase surgical masks, you find on all of the packaging warnings that state they are non-medical and/or do not prevent illness. (For example, I clicked on the first link on an Amazon search for “surgical masks” and right in the description it says are non-medical. [Amazon Surgical Mask](#)) It is widely known that masks do not prevent the passage of particles as small as aerosolized viruses.

One of the pre-eminent experts on PPE and industrial exposure in the U.S. is Stephen Petty. He advises large industrial companies on Industrial Hygiene (aka, worker safety) and testifies as a subject matter expert on class-action lawsuits, like that of Monsanto, regarding industrial PPE protocols - such as with dangerous chemicals – when inhaled particulate is life or death every day. But that community collapses without smiles in the hallways, with parents unable to meet and know one another at events, without the hugs over a scraped knee on the playground, without the sarcastic smirks of middle school, and without the ability see someone's frown and help to make them smile. [The Strength of Weak Ties](#)

The residents of this state, and specifically the parents of school age students, have been understanding of restrictions, and, more recently, patient in waiting for policies to be adjusted in response to the data. But as the data continues to build against mask mandates with no changes to policy, we are asking you to push back on behalf of the health and education of our children.

We teach our kids to follow their morals, to do what's right even when it's hard, and to respectfully disagree when necessary. Now is the time for the school administration, and the leadership at the Seattle Archdiocese, to recognize that our children need us to stand up for them. It's time to respectfully disagree and stand up for what is right on behalf of the students in your care.

We are asking you to do better for our children.

We are asking you to do better for our communities.

We are asking you to do better.

Thank you for your time and thoughtful consideration,
Dani Kessler, 253-459-2449

P.S. And please – take the time to watch the Stephen Petty video on PPE linked above. It's worth all 26 minutes.

Subject: Survey Response: Testify Online *

The following survey response is submitted:

1.

State Board of Health Meeting Date:

3/9/2022

2.

Agenda Item or Issue:

Vaccine mandate

3.

Your Name:

Joanna Thomson

4.

Do you have a professional title?

2. No

5.

Are you representing an organization?

2. No

6.

Address:

11107 28th Street Ct NW

7.

Email:

Joandmarkthomson@yahoo.com

8.

Phone Number (Include Area Code):

2535493263

9.

Do you have any special expertise relevant to this topic?

2. No

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

11.

Are you Pro or Con on the proposal?

2. Con

I have children and grandchildren who are impacted by this vaccine mandate proposal.

Good Morning Annette and all members on the DOH Technical Advisory Group to Consider COVI-19 for inclusion in chapter 246-105 WAC.

Please find attached a letter from the Members of Vaccines and Related Biological Products Advisory Committee Food and Drug Administration stating that there is no emergency regarding COVID-19 in Children ages 6 mo to 4 years of age.

There is no need to rush. ;-)

Respectfully,

Shelly S. Brewer, PMP

Subject: Covid-19 vaccine for children

External Email

Good day,

I am a 38 year resident of Kitsap county, wife and mother of two children. I believe it should be optional for this inoculation that is being discussed currently as a covid-19 vaccine.

I have a few questions about the vaccine getting added to the vaccine schedule for children.

Since these injections are EUA, does that mean that there is no liability of manufacturers if there is an adverse reaction?

What is the history of other vaccines that are on the current vaccine schedule prior to them being officially assigned to the current schedule?

As far as trials go, what were the adverse reactions reported for what is under consideration to mandate?

What are the long term adverse reactions? What is considered long term? Myocarditis? Infertility?

Are these risks outweighing benefit?

Children have a survival of 99%, so why put this inside their bodies to stimulate risk?

What happened to optional? Like flu vaccine being optional? The variant will change consistently like flu virus, so the vaccine would change consistently like a flu shot?

The poor kids say 'oh I want the vaccine but my mommy wont let me because she is afraid.' Lets remember they are children. Innocent, impressionable children. As parents we are here to nurish and protect them from harm. Because the survival rate of children from covid is so high, why are we pushing this?

Lets end the coercion. These children just want the fiasco to end! We as their parents are using our critical thinking skills before rushing into such a new 'vaccine'. We know by choosing to be inoculated, it is irreversible. You can not undo this choice once made.

Here is a link to a testimony from a parent of a 12 year old who participated in the Pfizer COVID-19 trial. Please watch.

https://youtu.be/L2GKPYzL_JQ
<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fyoutu.be%2FL2GKPYzL_JQ&data=

Please watch this link as well, it is another video with a panel of covid-19 vaccine injured people presented by senator Ron Johnson.

<https://youtu.be/6mxqC9SiRh8>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fyoutu.be%2F6mxqC9SiRh8&data=>

The following link is virology data on the injections under discussion. I reccomend visiting and reading it thoroughly.

[https://www.cell.com/cell/fulltext/S0092-8674\(22\)00076-9](https://www.cell.com/cell/fulltext/S0092-8674(22)00076-9)
<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cell.com%2Fcell%2Ffulltext%2FS0092-8674\(22\)00076-9&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C8002b8432a944f4709a108d9efef8397%7C11d0e21](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cell.com%2Fcell%2Ffulltext%2FS0092-8674(22)00076-9&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C8002b8432a944f4709a108d9efef8397%7C11d0e21)

Please consider this inoculation to be optional to all of those who reside in Washington state. Looking at the USA in it's entirety, 2 out of 50 states have implemented it as mandatory. This is equivalent to 4% of the USA. That is not the popular choice, obviously. Please listen to the community and what they are asking for. We are asking for freedom of choice in regards to the covid 19 inoculation.

Thank you so much for your time. I appreciate you. May God bless you and your family.

Respectfully,

Christina Thacker

Subject: OPPOSE Inclusion of Covid Shot in Childhood Vaccine Schedule

External Email

No matter what information you have or think you have, you do not have enough to risk children's lives:

"The Swine Flu vaccine was fast tracked as safe and effective"...until the science said otherwise.

"Smoking is a good stress reliever for pregnant women"...until the science said otherwise.

"Vaping is safer for teens than cigarettes"...until the science said otherwise.

"Chemicals in plastic are safe for consumption and the environment"...until the science said otherwise.

"Taking regular antibiotics is safe and effective"...until the science said otherwise.

"Estrogen supplementation is safe and effective for all"...until the science said otherwise.

"We should quarantine and isolate all gay people so they don't give us AIDS"...until the science said otherwise.

The list goes on and on.

OPPOSE this recommendation on the vaccine schedule.

To whom it may concern,

As a parent of a high school child, I am writing to inform you that if these unconstitutional vaccine mandates are passed, I will immediately removed my child from public school. I will then spend every moment of my free time reaching out to other parents to help inform them of way we can join together to avoid using the public school system and its agenda. The masks were already too far. This is absolutely despicable.

Subject: Research on COVID and the effects on children

Hi,

I saw a recent email response from you to a fellow parent regarding suicide and the lack of research on the topic. It's absolutely shameful that you are arguing that you can't find research about the effects on children during this pandemic yet the Governor declared a mental health crisis in children and youth in March of LAST YEAR. I have heard and read numerous accounts from teachers across the state about issues with speech delays, kids NOT EATING during lunch for fear of taking off their masks, children being forced to eat outside in the cold to "social distance", parents coming and picking up their children for lunch so they can sit and breath and take a break from the mask, kids being accustomed to not showing their own faces, misunderstanding social cues and the list goes on. But why would you ever take the word of the "front line heroes" or the parents that are actually CHILD FACING every single day?

Bottom line is, you know this is wrong. You absolutely know that children are at the LOWEST RISK for serious harm/illness with COVID. Yet, somehow you are still applying the harshest restrictions on them.

My son attended public kindergarten for 3 months this fall before I removed him due to masking. You are requiring children to wear masks while exercising during PE. Do you remember running around playing dodge ball during school? Or shooting basketballs around? Remember how you were breathing heavy and tired after class? Now imagine being muffled like an animal during that activity. The music teacher was requiring students to CHANGE THEIR MASK in his classroom for fear of "singing germs". I enrolled my son in public school because I thought it would be a good environment for him like it was when I attended but I was obviously wrong. And the fact that school enrollment numbers have plummeted and the state is trying to request MORE money to make up for those lost students is ridiculous.

Declaration of Mental Health Crisis:

The science is clear--Covid does not present high risk to any young people. They are in far more danger from the vaccine adverse events. The information tide is turning and those who ignore the truth may soon find themselves facing consequences. I would hate for that to happen to my local health department folks or school officials who carry out any kind of vaccine mandate for Covid. Please do not "require" this.

Thank you,

Nancy Thompson

Also, here is a graph disproving the misinformation that deaths are due to c19 when in reality deaths are due to vaccines:

From: Heather Clerget
Sent: 2/10/2022 9:28:19 PM
To:
Cc:
Subject: Covid 19 vaccine

External Email

Please do not add the COVID-19 vaccine to the vaccine requirements for children to attend school. If we wanted our children to have this vaccine we would have already had them receive it. This requirement is not necessary seeing as though most children have already had COVID and have had no lasting affects or complications. Parents should have the freedom to choose what is put into their child's body and should not be forced Inject their children with an experimental vaccine in which we have no long-term data that shows that it's affective at protecting people from COVID-19. The data shows that people who are vaccinated currently are still getting COVID-19. So, there's no need to get the vaccine.

We have no long-term data that shows how the make up of the COVID-19 vaccine will impact our children's overall health, cancer rates, infertility rates, miscarriage and stillbirth rates, or how it will affect their heart. There are some major concerns with this vaccine and its long term impact. It is 100% experimental I do not wish to have my child be enrolled in this experiment. I believe that this will have a negative impact on the public school system as many people who choose not to vaccinate their children like myself will pull their children from public schools and will fight to have the funding for their child go with their child and not to the public school. The people have spoken and do not want this added to the vaccine requirements to attend public school.

Respectfully,
Heather Clerget

STOP! ENOUGH is ENOUGH! This must end NOW. There is zero danger to children and I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State. Please do the right thing and do not require these vaccinations and do not require masks for school age children.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity.

You are teaching children to live in fear and it must end. They have a greater chance of dying driving to school. You are focused on the wrong issues. You are not in touch with their current needs. Suicide is on the rise. Please do the right thing!

Please consider that our children are at a very low risk of mortality from Covid-19. The chance of an adverse reaction is a higher risk. These Covid-19 vaccines have not undergone long-term phase 3 clinical trials and should not be required for any school age child. Myocarditis is a risk reported by the CDC. This is not a mild disease at best. Young people who previously had no comorbidities now cannot exercise for minimally six months and are put on several heart medications. The known outcome for myocarditis is not good. No one should be required or be coerced to get a vaccine that could do this harm and possibly do it long-term. Please bring in other doctors that can give the other side to this story. It is not wise to listen to only one side when it comes to scientific consensus. I urge you all to recommend a NO when it comes to school covid-19 vaccine requirements. Deborah Billing

Most parents should remove their precious children from government schools. And many are doing just that. Have you noticed? However, for those who feel they must continue public education, it is tyrannical to demand that these precious children risk their bodies because of your edicts. Please let me know where you have published your bibliography of actual quality studies proving that these shots stop infection, transmission and cause NO HARM to anyone.

You will not be able to produce such data. The astronomical number of adverse event reports is staggering. Has your committee read the FDA VAERS report?

Vaccine manufacturers and the US government have no liability for vaccine injuries. YOU will be liable.

I look forward to seeing all of you at the Feb 24 presentations by Dr Robert Malone and Dr Ryan Cole in Gig Harbor to which you all have been invited. The private sector has procured these world-renowned experts. It is incumbent upon you, as our public servants, to avail yourself of this opportunity.

Show yourselves to be true truth seekers.

--

Kind Regards,

Jerry

Subject: Unmasking kids in schools

External Email

Good morning,

I am writing to you today as a parent of a 3rd grader (1st grader when the pandemic began).

I know discussions on removing the mask mandate in schools are starting and I am imploring you to please read my email in it's entirety and sincerely hear what I have to say.

Children all over, my son included, are showing VERY REAL and VERY concerning symptoms of anxiety and stress that were not present before, as this mask mandate continues on.

The psychological impacts are VERY REAL and VERY damaging and to a parent, VERY scary.

The loss of joy in school due to having to wear a mask all day is REAL and psychologically damaging.

The anxiety and depression are VERY REAL and psychologically damaging.

The simple inability to see joy and smiles on friends faces is psychologically damaging and REAL.

It has been proven that vaccines in kids work to decrease the spread of the virus.

It is proven, in the current DOH numbers that the spread is decreasing.

It is proven that children are not in any increased danger of death or severe illness than they ever were from the flu. Those numbers are there, both on the CDC website and in numerous other scientific journals, PLEASE acknowledge these numbers and studies too.

The masks for children in schools was started as a way to protect the adults they were around and we can no longer accept this. Most adults here in Whatcom county and WA are vaccinated. We need to stop suffering our childrens psychological health for the benefit of adults, adults who are capable of stepping up and carrying this burden, stepping up and taking care of their own physical and mental health. To continue in the way we are, along this path, is a tragic mistake to our children.

It is well known that children have been disproportionately affected by these restrictions. They have suffered the most and will continue to suffer more if this is allowed to continue. They have had NO champions, only adults worried about their own mortality instead of stopping to think about the PSYCHOLOGICALLY DAMAGING effects of the pressures put on children with mask wearing.

Children have been abandoned and left to be "resilient". They have shown amazing

resiliency but it is now to the point of damage being done and it is time to stop.

They have done everything society has asked of them, they have had no choice, and they are mentally and emotionally exhausted and worn out with the burden that has been placed on them.

It is NOT FAIR, it is NOT RIGHT and it is NOT OKAY.

The negative risks to children's mental health with a continued mask mandate are greater than their physical risk of COVID. The numbers are there, please acknowledge them.

Please give the choice, based on science and real world numbers, back to the parents. Give us back the ability to make these educated decisions for our children. If a parent feels their child will benefit more from staying masked, LET THEM. If a parent, like myself, feels they are losing a part of their child to this mandate and looks at the science and professional recommendations and chooses NOT to mask them, LET THEM.

For what it is worth, I am educated with a degree in medical science in the pediatric field. I know what I am talking about and I have been very concerned about children's mental health since the start of this pandemic. My concerns are real and they are coming to fruition with the increased numbers of adolescent suicides, as well as an increased number in depression and anxiety diagnoses in children and adolescents. This is SCARY and this is REAL.

I sincerely hope you have read this all the way through and take into account the very serious and very real consequences of continued mandatory masking.

Thank you for your time.

Sincerely,
Jennifer Burnett
Bellingham, WA

Dear Mr. Ford, the Administration of St. Patrick's, the Seattle Archdiocese, and the WA State Board of Health,

I am writing today on behalf of my student, as well as several concerned St. Patrick's families who have reached out to me directly after the St. Patrick's parents group was turned off because of polite discussion about the ongoing mask requirement at school. I am imploring you to stand up for our children's health and well-being and take a stand against the mask mandates. The Seattle Archdiocese represents a well-respected number of facilities, students, and families across Western Washington. You have the ability to show the residents of Washington State that you are an organization that puts their student's safety first, not politics, like the Baltimore Archdiocese is doing
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.baltimoresun.com%2Feducation/md-school-masking-20220211-20220211-w62eycynu5fybgztpujemsuwga-story.html%3Ffbclid%3DIwAR1xe8ncPOmITYxyAOFAkx7IDyI7ycxmek4TocY5sUR2ia9XBBVvkKTY8u4&data=>!>

It is our understanding that the current mask requirements were adopted by the Seattle Archdiocese last fall at the suggestion of the Washington State Board of Health. Since that time, innumerable studies have been published across the world on all aspects COVID-19, from the inherent risk factors & most impacted age cohorts, the efficacy and side-effects of pharmaceutical preventions, early treatment protocols and non-medicinal mitigation strategies such as masking and school shutdowns. Yet with new scientific evidence, there has been no update to the masking protocols and mitigation strategies in schools across our state.

A little about me – no – I'm not a "COVID denier" that many believe those asking for choice in masking are! In fact, our family began watching very closely what was happening in China in December of 2019, when it was just a conspiracy and nothing to worry about. By late-January, I was one of the "crazy people" doing my grocery shopping in an N95 mask and gloves. At that time our 3 children all attended public school, and we made the decision to stop sending the kids to school 2-weeks prior to the official shut-down. And who doesn't remember wiping down groceries and mail with sanitizing wipes, or simply leaving things outside for days before allowing them into our houses! We chuckle about all of that now, but it important to reflect on. Why did we do all of that?

Simply put, inn March of 2020, there was quite literally nothing known about this new

illness everyone was calling COVID-19. Was it transmitted by touch, airborne droplets like the flu, or truly aerosolized? Could it survive on surfaces? Who were the most at risk for hospitalization and death? We knew nothing. So, we took what are now known to be silly, and in some cases drastically damaging, measures. We call them lessons learned. However, what we've learned is not being put in to practice through policy change. Instead, we are continuing with measures science has proven are causing more harm than good!

We understand now what ages and comorbidities are at the highest risk. We know how to treat COVID at home, and what simple, proactive steps everyone can take to prevent serious illness. Doctors know how to treat serious cases in hospital, and what treatments to avoid. Large percentages of people now carry natural immunity, and vaccines are available to those who choose to take them. And, most importantly, we know that our children, thank God, are the absolute lowest risk cohort. Yet those children have unfairly borne the brunt of mandates in the cruelest of ways under the guise of safety.

It is common knowledge that the cloth and surgical masks worn by students do not prevent the transmission of viruses. That is how my son was able to contract COVID while at school! That's also the very reason there was not a single N95 available to purchase in April 2020! At their largest measurement (0.3 microns), 250 aerosolized COVID viruses can fit inside the average human hair. Now consider those gaping holes in the sides of the student's surgical and cloth masks as you welcome them to school.

Even the CDC's own study, and associated infographic, "proving" masking efficacy has an asterisk noting the protection offered by cloth masks was "not statistically significant." Only N95s prove any amount of statistically significant results. CDC - Mask Effectiveness Indoors

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fmmwr%2Fvolu>

Another CDC resource clearly states that the filtration of masks "Does NOT provided the wearer with a reliable level of protection from inhaling smaller airborne particles and is not considered respiratory protection." CDC – Masks vs. Respirators

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fniosh%2Fnpptl%508.pdf&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C49052b0fbd314f39fbc008d9f0a36190%7C11>

The ACGIH, a non-profit of occupational and environmental health and sciences experts, has compiled the results of much of their research regarding how to protect workers during the COVID pandemic into an infographic for employers. Even when both parties are wearing cloth or surgical masks correctly, the amount of protection offered is only 27 minutes and 60 minutes, respectively. How does that very limited amount of protection justify the mental and emotional consequences of masking students? COVID-19 Worker Safety - Masks

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.acgih.org%2Fcovid-19-fact-sheet-worker-resp%2F&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C49052b0fbd314f39fbc008d9f0a36190%7C11>

It is also for this reason that whenever you purchase surgical masks, you find on all of the packaging warnings that state they are non-medical and/or do not prevent illness. (For example, I clicked on the first link on an Amazon search for "surgical masks" and right in the description it says are non-medical. Amazon Surgical Mask

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsmile.amazon.com%2FHDFK-Disposable-Protective-Breathable-Non-Woven%2Fd%2FB088YJCQ7Z%2Fref%3Dsr_1_2_sspa%3Fcrd%3DX903K75VJ277%26keywords%3Dsurg2-spons%26psc%3D1%26spLa%3DZW5jcnlwdGVkUXVhbGlmaWVyPUEyUUFFNTVISFRGQVBGJmVuY3J5cHRIZ

) It is widely known that masks do not prevent the passage of particles as small as aerosolized viruses.

One of the pre-eminent experts on PPE and industrial exposure in the U.S. is Stephen Petty. He advises large industrial companies on Industrial Hygiene (aka, worker safety) and testifies as a subject matter expert on class-action lawsuits, like that of Monsanto, regarding industrial PPE protocols - such as with dangerous chemicals - when inhaled particulate is life or death every day. In the presentation linked below he covers COVID specifically. While I'm sure you are receiving many messages like mine full of links and references, I cannot urge you enough to take the time to watch this video presentation. In his world where PPE actually needs to protect, masks are not even considered an option, nor is facial hair! Stephen Petty - On PPE and Aerosols

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.youtube.com%2Fwatch%3Fv=jL4yoUssHhJesfGpD1rYOwYams2Pfs93XuEoBE-HrzrKWpfyVjWS0&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C49052b0fbd314f39fbc008d9f0a36190%7C>

Included in this next link is over 150 mask studies with conclusions, in part, against the effectiveness of masks due to a variety of variables. I found while doing my own researching that resources providing a lot of information in one place was very helpful.

150+ Comparative Studies and Articles on Masks

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fbrownstone.org%2Farticles%2Fmore-than-150-comparative-studies-and-articles-on-mask-ineffectiveness-and-harms%2F&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C49052b0fbd314f39fbc008d9f0a36190%7C>

Lastly, on the science of whether masks work, I would challenge that after 2-years of continual and aggressive research, study, and retrospective review throughout the world, one should expect to see clear, overwhelming, and consistent data from the scientific community proving without a shadow of a doubt that masks provide a strong level of protection. That data simply doesn't exist.

Here's where common sense can help to fill in the blanks. Masking in schools is not widespread across the country. Only 15 states have previously had mandatory masking in schools, though that number is reducing by the day. IF masking students really is the lynchpin that has kept our state's elderly and high-risk population safe and we simply cannot do without it, how is it there isn't overwhelming hospitalization and death of the elderly and high-risk in the 35 states who didn't mask students?

All masking science aside, in my opinion the most important topic to consider is the how masking and the subsequent enforcement of masking is having on our children. There is a steady outpouring of data showing negative consequences for our children, from faltering to outright failing test scores, startlingly high rates of referral to speech therapy in young learners, massive increases in anxiety, self-harm and depression among adolescents and teens, and a basic lack of excitement and connection to school communities. The Educational Consequences of Masking Children

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nationalreview.com%2F2022/02/22/educational-consequences-of-masking-children%2F%3Ffbclid%3DIwAR0E9-jL4yoUssHhJesfGpD1rYOwYams2Pfs93XuEoBE-HrzrKWpfyVjWS0&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C49052b0fbd314f39fbc008d9f0a36190%7C>

However, I don't think that linking study after study is needed to make this point. You are professional educators, and you know children! You know how they learn, and how they grow. You know how they respond to a smile. You know how they watch a teacher's mouth move when they are reading aloud, or when hearing a new word. You know how children instinctively see another child's frown and respond with kindness. Or how they see another child's smile and return it with a smile of their own. Or how children see someone react poorly to an unkind word they said, so they apologize, realizing the impact of their words on others. Without seeing that frown, they cannot know that

impact. These little connections and the learning of social queues are truly the work of childhood, and that has been taken from them. Think back to your favorite teacher as a child – then imagine not knowing what that teacher looks like without a mask on!

And what about the students who are not okay, and who are blending in and disappearing into a sea of masks? What about the children who have anxiety? What about the students who are embarrassed to ask for help, or feel left out? Without seeing the emotions on their faces, how can we be sure they aren't slipping through the cracks?

The data says they are. JAMA Pediatrics – Mental Health & Wellbeing

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fjamanetwork.com%2Fjournals%2F4bc0-45d3-b2bb->

[b9c227e1313f%26utm_source%3DFor_The_Media%26utm_medium%3Dreferral%26utm_campaign%3Dfor-the-media](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fjamanetwork.com%2Fjournals%2F4bc0-45d3-b2bb-b9c227e1313f%26utm_source%3DFor_The_Media%26utm_medium%3Dreferral%26utm_campaign%3Dfor-the-media)

We have also taken our most innocent and easily influenced segment of the population, and over the last two years taught them that they should fear the air around them. They should fear their own breath. If they take their mask off, they could be responsible for infecting someone who dies. Or that their good friends or classmates could get them sick. Instead, they must keep their face hidden, not speak during lunchtime, and don't get too close to one another because that's just too risky and unsafe. This is not okay!

I'm a Public School Teacher. The Kids Aren't Alright.

Masked Schoolchildren

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.tabletmag.com%2Fsections%2Fmasked-](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.tabletmag.com%2Fsections%2Fmasked-schoolchildren%3Ffbclid%3DIwAR00OBNXMP3yJRFUQyreoce8AXfbgTOiJU8tU3qheAUGJSAoSKNP8iJ4sW8&d)

[schoolchildren%3Ffbclid%3DIwAR00OBNXMP3yJRFUQyreoce8AXfbgTOiJU8tU3qheAUGJSAoSKNP8iJ4sW8&d](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.tabletmag.com%2Fsections%2Fmasked-schoolchildren%3Ffbclid%3DIwAR00OBNXMP3yJRFUQyreoce8AXfbgTOiJU8tU3qheAUGJSAoSKNP8iJ4sW8&d)

Though we are a new family to St. Pats, my father & his family all matriculated through parochial school, so many of the teachings we are seeing resonate deeply in my heart, including the fostering of strong community bonds. But that community collapses without smiles in the hallways, with parents unable to meet and know one another at events, without the hugs over a scraped knee on the playground, without the sarcastic smirks of middle school, and without the ability see someone's frown and help to make them smile.

The Strength of Weak Ties

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cse.wustl.edu%2F~m.neuma>

The residents of this state, and specifically the parents of school age students, have been understanding of restrictions, and, more recently, patient in waiting for policies to be adjusted in response to the data. But as the data continues to build against mask mandates with no changes to policy, we are asking you to push back on behalf of the health and education of our children.

We teach our kids to follow their morals, to do what's right even when it's hard, and to respectfully disagree when necessary. Now is the time for the school administration, and the leadership at the Seattle Archdiocese, to recognize that our children need us to stand up for them. It's time to respectfully disagree and stand up for what is right on behalf of the students in your care.

We are asking you to do better for our children.

We are asking you to do better for our communities.

We are asking you to do better.

Thank you for your time and thoughtful consideration,

Dani Kessler, 253-459-2449

P.S. And please – take the time to watch the Stephen Petty video on PPE linked above.
It's worth all 26 minutes.

Dear Mr. Ford, the Administration of St. Patrick's, the Seattle Archdiocese, and the WA State Board of Health,

I am writing today on behalf of my student, as well as several concerned St. Patrick's families who have reached out to me directly after the St. Patrick's parents group was turned off because of polite discussion about the ongoing mask requirement at school. There is a steady outpouring of data showing negative consequences for our children, from faltering to outright failing test scores, startlingly high rates of referral to speech therapy in young learners, massive increases in anxiety, self-harm and depression among adolescents and teens, and a basic lack of excitement and connection to school communities. [The Educational Consequences of Masking Children](#)

However, I don’t think that linking study after study is needed to make this point. You are professional educators, and you know children! You know how they learn, and how they grow. You know how they respond to a smile. You know how they watch a teacher’s mouth move when they are reading aloud, or when hearing a new word. You know how children instinctively see another child’s frown and respond with kindness. Or how they see another child’s smile and return it with a smile of their own. Or how children see someone react poorly to an unkind word

they said, so they apologize, realizing the impact of their words on others. Without seeing that frown, they cannot know that impact. These little connections and the learning of social queues are truly the work of childhood, and that has been taken from them. Think back to your favorite teacher as a child – then imagine not knowing what that teacher looks like without a mask on!

And what about the students who are not okay, and who are blending in and disappearing into a sea of masks? What about the children who have anxiety? What about the students who are embarrassed to ask for help, or feel left out? Without seeing the emotions on their faces, how can we be sure they aren't slipping through the cracks? The data says they are. [JAMA Pediatrics – Mental Health & Wellbeing](#)

We have also taken our most innocent and easily influenced segment of the population, and over the last two years taught them that they should fear the air around them. They should fear their own breath. If they take their mask off, they could be responsible for infecting someone who dies. Or that their good friends or classmates could get them sick. Instead, they must keep their face hidden, not speak during lunchtime, and don't get too close to one another because that's just too risky and unsafe. This is not okay!

[I'm a Public School Teacher. The Kids Aren't Alright.](#)

[Masked Schoolchildren](#)

Though we are a new family to St. Pats, my father & his family all matriculated through parochial school, so many of the teachings we are seeing resonate deeply in my heart, including the fostering of strong community bonds. But that community collapses without smiles in the hallways, with parents unable to meet and know one another at events, without the hugs over a scraped knee on the playground, without the sarcastic smirks of middle school, and without the ability see someone's frown and help to make them smile. [The Strength of Weak Ties](#)

The residents of this state, and specifically the parents of school age students, have been understanding of restrictions, and, more recently, patient in waiting for policies to be adjusted in response to the data. But as the data continues to build against mask mandates with no changes to policy, we are asking you to push back on behalf of the health and education of our children.

We teach our kids to follow their morals, to do what's right even when it's hard, and to respectfully disagree when necessary. Now is the time for the school administration, and the leadership at the Seattle Archdiocese, to recognize that our children need us to stand up for them. It's time to respectfully disagree and stand up for what is right on behalf of the students in your care.

We are asking you to do better for our children.

We are asking you to do better for our communities.

We are asking you to do better.

Thank you for your time and thoughtful consideration,
Dani Kessler, 253-459-2449

P.S. And please – take the time to watch the Stephen Petty video on PPE linked above. It's worth all 26 minutes.

The agenda pushing vaccine (Covid) mandates for children is wildly irresponsible and I will expect those pushing it to be held responsible for the health issues that follow for children.

I do not know how sane and humane leaders could suggest such a path, there is clearly more risk to children in the shot than with the virus.

When the 'Science' evolves to a point where dissenting data, research, doctors trials and opinions can be heard, and I think you see the writing in the wall that it is in fact coming very soon, the idea of forcing this on parents will be clearly seen as irresponsible. If so much as one 10 year old suffers a heart attack because of the vaccine, with no real risk for them in the virus, you have that on you for forcing it on them, I will do my best to see those who are responsible to be held accountable.

I was born and raised in WA state but if you force this mandate on my kid I will be lawyered up tomorrow and living in Idaho soon after.

People are smart enough to see through the data and know there is a big difference between being admitted for something with covid and being admitted for covid, the data is corrupted in this way and those using that to force a move on medical autonomy will be seen as the true villain in this saga which should be wrapping up with the freedom restored to America and a full investigation of Dr Fauci. This could be the greatest breach in public trust in our lifetimes.

You should be more worried about people finding out the mask fiasco you put us through trying to slow a aerosol path with a sneeze guard than trying rush through the Fauci agenda of a big pharma path. Maybe you can explain to me how America is healthier under Faucis big pharma solutions to every health concern has made America safer? Maybe tell us what he has cured? Are breast cancer rates down over the past year? Is there an uptick in 10 year olds with heart attacks? You want to brag about AZT maybe? Maybe first describe to us how Ivermectin suddenly became more dangerous than crack while Pfizer is in development of a patentable synthetic ivermectin clone at this very moment? If doctors had been allowed to treat covid the vaccine would have not been released and if not given protection from the aftermath the drug companies would not have released it. These are not the kind of science facts I would hang my future on if I were you.

We need to end this this and prepare for the aftermath which could be devastating on a global scale. I hope I am wrong but I am finding little outside of a highly pushed lock step narrative that falls far short of the science I knew even a very short time ago.

Subject: (TAG) to Consider COVID-19 for Inclusion in Washington's Immunization Rule

External Email

Hello,

I wanted to submit my public comments to the Board and the technical advisory group regarding the inclusion of COVID-19 in the state's list of required immunizations for child care and school entry.

Please consider the following before making your decision:

*

FDA has ONLY approved Covid vaccines for children under Emergency Use in children 5-11 and cannot be required or mandated, under law. It must be an individual's choice. Vaccine Status Discrimination is unlawful.

*

Children have minuscule risk of severe Covid-19 with a recovery rate of 99.997%

*

19,000 deaths reported from Covid vaccines, more than all other vaccines combined in 30 years

*

Pfizer's data shows a 5x increased risk from fatal heart attacks among the vaccinated

*

US Government reports 18,461 deaths+ 875,653 adverse reactions from the shot as of 11/5/2021

*

An estimated 8% of the US Population (including kids) is at risk of anaphylactic shock to Covid-19 vaccines with PEG

*

Alarming rates of Myocarditis and Pericarditis are occurring in adolescents post-injection (similar to a heart attack)

*

While healthy children don't die from Covid, they do die from myocarditis. The younger you are, the greater the risk of cardiac inflammation per VAERS

*

There have been no long term studies on humans using mRNA technology in vaccines

*

Our children are not government guinea pigs!

*

Vaccinations are a private choice to be decided between Doctors and Parents

*

Other nations, including the UK, have banned vaccinations of children declaring the benefit does not outweigh the risk

I would, therefore, urge the Board and TAG against including COVID-19 in the state's list of required immunizations for child care and school entry.

Thank you,

Alex Piliper

External Email

Hello,

I listened to the call today and was confused. It seemed that many of the members voted yes even though they felt there way insufficient evidence. Isn't the purpose of voting yes that you feel like there is sufficient evidence?

The gentleman at the end said that the vaccines do not prevent transmission and we're not intended to. Why on earth would this be a requirement for school then? We do not mandate the flu vaccine.

I think we can all see that it's going to become a requirement. Regardless of the data. That being said, please let us know what the rules will be for kids with exemptions now, not later.

Much appreciated.

Carlin

Regarding inclusion of covid shots for school children, I urge you to vote NO. I know the argument in favor says that other shots are required for school entry. However, those shots underwent years of safety testing and have been used for decades. My child has received all his recommended shots-as parents we are not anti-vax. However, we must weigh the risks and benefits. For this shot, the risks far outweigh the benefits. I know of several children who are vaccine-injured from cov shot.

Summary of factual reasons to vote NO:

- 1) the cov vaccine so far has shown to be risky (risks in both women and men) for adults, and even more so in younger children
- 2) kids who are healthy enough to attend school are generally not at risk for death from covid. A very, very small, minute fraction of a percentage are at risk of harm from cov. Those kids (such as with leukimia) are not attending regular in person learning.
- 3) we must consider risk-benefit analysis. See 1 and 2 above.
- 4) these shots have not even undergone complete safety trials for adults, let alone kids! The FDA itself said we need to give it to kids in order to find out if it's safe. The FDA admitted they don't know the safety data for kids. It is against several laws to require someone to take something experimental
- 5) our children are not lab rats. We the parents decide what is best for our children, in consult with our medical doctors.
- 6) fact: there is no evidence of cov vax as an effective mitigation measure against cov. It neither prevents the acquisition of nor the spread. Our school has been in-person since Fall 2020 and there has been ZERO transmissions traced back to school.
- 7) adults are more likely to spread to kids-kids are not spreaders of the disease. Adult staff have the option to get the vax. They are not in danger of getting sick from a student.
- 8) the flu is more dangerous to kids than Sars-cov-2, per studies.
- 9) I hope you understand that if this gets onto the Childhood vaccine schedule, the manufacturers get FULL protection from liability. I know at least 1 adult who was permanently injured by the shot. If this happens to you or any of your friends or family members, know that they will be saddled with permanent life-changing disability, inability to work, take care of family, etc. You are complicit in giving the drug companies a free pass if you vote yes. If you don't believe me, check out the info by Bobby F Kennedy, Jr.
- 10) the cov vaccine for kids is the only one where the dosage is not based on weight. Its based on an age range. CDC admits they don't even know how much is needed. This is dangerous. Children could suffer if not given the correct amount (take for example the 4 and 6 yr old children who suffered cardiac issues after receiving the adult dose).

If you TRULY follow the science first, you will vote NO. Not at this time. We need a lot more information before a rational decision can be made. And that's going to take time. Hold off. I'm not saying it should never be on the schedule for students, but there are more questions than answers right now. If this does get approved, our family is voting with our dollars and leaving WA state.

Sincerely,

Tami Domico

Please do not add the COVID-19 vaccine to the vaccine requirements for children to attend school. If we wanted our children to have this vaccine we would have already had them receive it. This requirement is not necessary seeing as though most children have already had COVID and have had no lasting affects or complications. Parents should have the freedom to choose what is put into their child's body and should not be forced Inject their children with an experimental vaccine in which we have no long-term data that shows that it's affective at protecting people from COVID-19. The data shows that people who are vaccinated currently are still getting COVID-19. So, there's no need to get the vaccine.

We have no long-term data that shows how the make up of the COVID-19 vaccine will impact our children's overall health, cancer rates, infertility rates, miscarriage and stillbirth rates, or how it will affect their heart. There are some major concerns with this vaccine and its long term impact. It is 100% experimental I do not wish to have my child be enrolled in this experiment. I believe that this will have a negative impact on the public school system as many people who choose not to vaccinate their children like myself will pull their children from public schools and will fight to have the funding for their child go with their child and not to the public school. The people have spoken and do not want this added to the vaccine requirements to attend public school.

Respectfully,
Heather Clerget

Subject: Questions for the board

External Email

Thank you for taking your time to read this. I hope it gets to you before you decide whether or not to take the power from parent to determine what is right for their children.

1. Why are all of the statistics assuming that Omnicron will be the main version of Covid going forward when there have been 2 different mutations from the first version (3 in total) in 2 years? Is this a reasonable assumption. If it is not a reasonable assumption, will the booster be as unable to protect people against the next mutation as it was to protect against Omnicron?
2. With any risk, there should be choice. This is what democracy looks like. Will the State of Washington be taking the financial responsibility for those with vaccine injury?
3. There was no opposing information. It does not talk about co-morbidities, nor does it talk about other options to PREVENT Covid. Where is the information about how to treat this early? And, how many of the children who had problems were affected by other challenges?
4. Where is the information about the VAERS website? There have been children who have been injured. If the people on the Board have had children before this, they have been able to file an exemption for personal reasons for other vaccines. Would you have wanted to know what some of the potential outcomes

I am requesting that you do not mandate this vaccine on children for attending school. My family has autoimmune disease in it, and these vaccines seem to affect that population negatively. There is not one of my children I would choose to live without, and that is what this mandate might do to my family. Please hear the people. Do not mandate a vaccine to attend school. It is discriminatory, it is dangerous, and it is undemocratic.

Thank you,

Gennifer Zentz

Sorry, I just wanted to add one more thing.

I know that this topic has become highly political, but that is not an excuse to violate the principles of good science. Don't just mandate to try to appear to be doing something. Politics should not get in the way of making a good decision scientifically or morally. Sure the vaccine does help a person's chances at fighting the virus, but there are potential drawbacks and other questions, so it should be a choice.

I do not believe it is a good decision to mandate the COVID vaccine.

Violet Poole, PhD

On Fri, Feb 11, 2022 at 6:24 PM Violet Poole <violetpoole@gmail.com
<mailto:violetpoole@gmail.com> > wrote:

Hello,

I saw that the Board of Health was requesting public input about this topic, and I wanted to add my thoughts as a concerned citizen of Washington state.

I do not think requiring this immunization to attend school is a good idea.
I am not an anti-science quack, like some of the people who object.
I have devoted my life and career to science. Real scientific questioning should still be allowed even if there is a lot of disinformation flowing.

This vaccine is based on a relatively new mRNA technology. Most vaccines undergo 10+ years of long term safety testing, which I know is not really practical in this situation. But that is one of the many reasons COVID vaccination should be a suggestion and a choice. There are known and possibly unknown risks to this vaccination. While the risk of myocarditis is slight, it is still there. There are 1 million or more kids in the WA state school system. Are you ok with forcing 106 or more children to get myocarditis? I am not. I am worried about my son's chances of being one of those 106.

I believe in body autonomy for all. In regards to women's right, human rights, and medical rights.

The important point I think it should be up to the individuals to decide if the slight

risk of myocarditis is better than their individual chances of complications for the virus. This comes down to the basic rights of body autonomy. Don't you have a choice about what happens to your body?

WA SBOH members:

I am a WA parent and have been following your effort to enforce vaccine in schools, and your effort to use extreme measures against the unvaccinated. Now, more and more science evidence and researches are available to prove natural immunity is much stronger than Covid 19 vaccine, demonstrated by the study released by CDC Even WHO, European Medical Advisory started to emphasize Vaccines are harmful to our children. Many countries are giving up vaccine mandates and Covid restrictions, so why are you against this trend, and still want to harm our children?!

From my effort of following your consistent effort to push the vaccine and nazi mandates in school, it is pretty clear that your organization exists not for true public health but only for promoting Democrats' evil agenda. You have been ignoring true science since the Covid hoax started. You have done nothing to strengthen the public health. Your lockdown, your social distances, your mask mandates, your bullshit narratives on Covid and vaccines prove all WRONG! It is shameful you sit on the Board of Health, and promoting to use law enforcement to detain the unvaccinated. Let me tell you this - all what you have done is criminal! Masking our kids and vaccinated healthy children are criminal! As a lawful citizen, I only follows Constitution, not your bullshit CDC advice, not

your so-called professionals, you are Nazi medical tyrannies. I will try to mobilize the people I know to tell them the truth. And, i warn you - all the members that sit on this board, will wait the moment when people will not tolerate you.

Let me tell you this - if you keep using the failed narrative to fool the fools and defraud them to jab their children, you will not get away from this criminal practices. We will not comply this, and will fight against you till the end. I will never let you to jab my children. You can jab yourself. It is your right but you should NEVER jab a child in the name of Covid which has 0.00001% of death rate.

Your criminal activities seriously pissed me off. I hate you, period.

Rudolph

The science does NOT support Covid 19 vaccinations for children.

I respectfully request that this requirement NOT be applied to children in K-12.

There have NOT been testing and trials to assume what side-effects this vaccine may have on our children.

The required vaccines for polio, and other diseases have been proven to protect. DO NOT require a vaccine that is not proven to protect.

Don't let politics enter into this discussion!!!

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

To Whom It May Concern-

Thank you for the exposure to this meeting and the effort it took to make it public. I am a concerned parent with 3 children currently attending public school and have some questions I would appreciate being answered.

1. Why was this issue voted on when panel members admitted that there was not enough data on the effectiveness of the covid vaccine in children ages 5-12?
2. Why is the data on covid vaccine related deaths and injuries not being taken into consideration? According to the CDC there has been over 21,000 total adverse events due to the covid 19 vaccine.
3. Why did the panel not discuss the fact that although, claimed less, there were still reported cases of covid in vaccinated children? Again the data shown was not related to the age group being discussed. This would prove that covid is still transferable by vaccinated individuals and that the covid vaccine does not prevent an individual from getting covid.
4. Why was data nor the existence itself of natural immunity not discussed?
5. Why was the data of the survival rate of covid not discussed?
6. Why was criteria 5 even allowed to be voted on when the panel admitted that covid vaccines were created only to lower the severity of a person's experience of covid but not prevent it?
7. Why was the Bradford Hill criteria for causality not discussed or even used as a guide?
8. Why was the dangerous mechanism of action involving spike proteins not discussed?
9. Why would something that is internally consistent in causing myocarditis even be considered being forced on young children?

Thank you for your attention to these questions. I appreciate a rapid response and answer to them all. I truly am interested on why the other side of this is not being discussed. I wish you would consider your own children and if you who believe in the vaccine would be forced not to give it to your children. All we are asking for is the American Constitutional right to choose.

Sincerely,

Meghan Hatlestad

My vote is NO on vaccination requirement for schools in Washington.

Currently there is no published literature on pediatric Covid-19 vaccine effectiveness in K-12 school setting. In addition, the risks outweigh benefits of these new vaccines. All of my kids had Covid and bounced back pretty quick, just as with a cold or a flu.

Please take this issue off the table and select NO!

Please do not add the COVID-19 vaccine to the vaccine requirements for children to attend school. If we wanted our children to have this vaccine we would have already had them receive it. This requirement is not necessary seeing as though most children have already had COVID and have had no lasting affects or complications. Parents should have the freedom to choose what is put into their child's body and should not be forced Inject their children with an experimental vaccine in which we have no long-term data that shows that it's affective at protecting people from COVID-19. The data shows that people who are vaccinated currently are still getting COVID-19. So, there's no need to get the vaccine.

We have no long-term data that shows how the make up of the COVID-19 vaccine will impact our children's overall health, cancer rates, infertility rates, miscarriage and stillbirth rates, or how it will affect their heart. There are some major concerns with this vaccine and its long term impact. It is 100% experimental I do not wish to have my child be enrolled in this experiment. I believe that this will have a negative impact on the public school system as many people who choose not to vaccinate their children like myself will pull their children from public schools and will fight to have the funding for their child go with their child and not to the public school. The people have spoken and do not want this added to the vaccine requirements to attend public school.

Respectfully,
Heather Clerget

This new mRNA jab is still experimental and even if the FDA gives EUA on the jab it doesn't give this board the right to issue mandates for it. The vaccine has proven useless against prevention and transmission if you care to follow the science. The health board should take a step back and read the science and let parents be in charge of their children.

I am here to voice my concerns taking place in this State in regard to COVID 19 shots.

I feel that every parent chooses what they feel is right for their children and themselves. Whether that means choosing to get a shot or not, just like choosing to breastfeed or use formula. Both are a right answer in what they choose for their family and that because it's a CHOICE. It should always be a choice to get a shot or not, just like the flu shot (Norway already views COVID as the flu so we really need to get on their level).

Thousands of fellow parents will pull their kids out of school if this is required. I love my children too much to force junk in their body that has yet to even be proven effective from getting it spreading with the shot- so what the point of even getting it? Due to the thousands of parents pulling their children will only add to the falling economy... as teachers, bus drivers, cooks, etc. will no longer be needed since there will hardly be any children in school. Face it, COVID will not go away- people need to move on and live their life and realize it's not serious. People die from smoking... yet that's still ok....how many alcohol related deaths have there been? Millions... but yet let's still sell it and every venue, restaurant, and store. That makes sense.

There isn't a Covid pandemic. There is a people with power pulling pandemic. Horrible people that do not respect the constitution. As you can see I am completely against forcing people and children

from a shot that they feel is not good for them. And punishing those families who chose not to get it. This is un-American and I hope you are ashamed of yourselves.

Subject: RE: SuperBowl & The Big Game

Greetings...

Issaquah, Bellevue, Lake WA School Districts, OSPI, WA State Education, WSBOH, and King County Commissioner.

You're behind the (global) ball with your cherry-picked science and Covid-19 decision making, namely around mask mandates. In recent news...

1. Kettle Falls School District (Washington State) moves to make masks optional effective immediately.
2. Washington State and Hawaii remain the only states requiring mask mandates for school aged children. In more recent news, D.C., Oregon, California, New Mexico, Illinois, Connecticut and New Jersey have drawn a line in the sand to protect our children.
3. Entire countries have revoked all Covid-19 restrictions including Sweden, Norway, Denmark, Switzerland – to name a few.

Single handedly you've lost the confidence of parents across Washington State in standing up for the health and safety of our children. We understand now, more than ever, your motivation to play into political theatre than truly following the science. We understand our children's health and safety is not your top priority when, again, using cherry-picked science to make critical decision.

Rest assured, what you have done is created mama and papa bear WARRIORS! We've never been more involved in our school districts, in our education system(s), our board of health and more. We're well-educated leaders, we're organized and we will see this change in Washington State – just like in Kettle Falls. What's more is we're teaching our children. They're going to be the next generation of patriots with a keen understanding of our God-given rights, Common Law, the U.S. Constitution and our Washington State Constitution.

Please, stand with us and remove mask mandates effective today.

Peacefully and respectfully,

Melissa

You said "With more information people will make good choices" regarding getting vaccinated. This statement is the problem! With good information we are free to make our own choices and it is not up to you to judge what is "good" for our bodies. Me and my very large family community oppose adding Covid-19 to childrens vaccination schedules. These vaccines have not been proven to reduce Covid in schools, and, there is no natural immunity or herd immunity data to compare these vaccines to. Incidents of Covid deaths with comorbidities is also not reported in your data.

The SBOH and the TAG team are merely trying to impose tyrannical mandates on our children and preventing them from enjoying a free, happy, and natural childhood. Covid vaccines are unproven and cause more harm than it helps.

Subject: Public Comment for TAG Meeting 2/10/22

External Email

To Whom It May Concern:

This is for public comment for this coming Thursday, Feb. 10th 2022 BOH TAG meeting regarding vaccination requirements for school entry.

My kindergartener is fully vaccinated and yet I remain opposed to forced COVID vaccination for children.

1. Science is clear that school-aged children are not at high risk for COVID nor COVID complications
2. COVID still spreads despite the vaccination status. If teachers are at risk, they are free to get vaccinated - those that are high risk populations should get vaccinated to protect themselves.
3. New COVID variants are nothing like 2020's initial COVID that was high stakes killer. Thus far a tampered down version exists and hopefully will continue to become less likely to kill or cause catastrophic complications.
4. The vaccination is new and still uncharted territory so I understand the fear of the "what if" as we don't know the complications that may arise in the future.

I do think parents should self-determine with their child on the best course of action. Children are not the concern nor the serious vectors, so why force them into it, vs allow parents to decide?

Warmest Regards,

Jen Van Vechten

All corrupted individuals,

Still trying to find out when this power grab for mask mandates is going to be lifted for schools.

When will Washington state wake up to the fact that they are useless and have not been needed for over 2 years for school-age children?

We will be removing our children from the schools within the coming month as we will be relocating to another state that doesn't have these tyrannical rules.

Odds are, no one on Washington can/wants to make a decision including the Sec of Health so the forced masking will probably be around every fall/winter forever.

Have a wonderful day/week/month/year of more mandates!

Good riddance. Bye.

Educators,

DOH is useless and has been since the start of this plandemic. Still trying to control a virus that is still out of control. They hopefully realize this fact.

Now, after the turn of the new year, would like to get updated guidance as to the unconstitutional/forced masking policies that you are trying to enforce. Stop this nonsense. I'll ask the simple question once again to hopefully get some answers.

- What is Washington's plan/goal as to when masks can be recommended/optional for children while at school? (Currently, mask up until we say so...)

Is anyone going to respond to my queries? Now with omicron/xi, the studies are now pointing to the uselessness of cloth masks. WSJ LINK
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.wsj.com%2Farticles%2Fcloth-face-mask-omicron-11640984082&data=04%7C01%7CWSBOH%40sboh.wa.gov%7C19ef51deedcb45890eda08d9f0480a75%7>>

One more item to bring back up as you clearly haven't understood it the first time:

"If masks, mandates & lockdowns work, why aren't they working?"

Clearly you all have some deprogramming that needs to be done.
Hope for some answers this year...

Currently preparing on moving our family out of state. I hope you finally get the message as more people leave this 'power-hungry' dem-led state.

Happy New Year to more restrictions! Hmm, maybe you should bring schools back to online-only. Still, no plans...

Josh Daugherty

DO NOT COMPLY.

<joshua.daugherty.wa@gmail.com <mailto:joshua.daugherty.wa@gmail.com> > wrote:

Week 15, then already Winter/Christmas break,

Still no constructive, healthy dialogue on this question.

- What is Washington's plan/goal as to when masks can be recommended/optional for children while at school? (Currently, mask up until we say so...)

As all addressed on this continue to be complicit with 'policy', I propose in 2022, new year, new rules. Masks = Recommended for all, not mandated. I will not comply with your demands. At least begin a phased approach to mirror the restaurant half-assed policy of wearing masks walking around in the restaurant, but then when you sit down, you may take them off. Our children deserve better. Please share your thoughts on this, as you clearly do not have any other ideas. Since the beginning of the school year, you've been shrugging my concerns off or ignoring this altogether. Great job, now I'm starting to adopt some of these ideas, to ignore/disregard any & all communication coming down concerning force masking, vaccinations, etc.

You do not have control over what I do, what I wear, how I live. Our children wear the minimal 'protection' to abide by mandates only to 'not get in trouble'. They can also see that this is all theater and wearing masks for 'show' under the guise of 'keeping everyone safe'. My underlying question all along has been, who is 'dangerous'? Certainly not our children as they have a larger chance of dying from the flu or common cold than covid. Covid is weak when it comes to them. Stop with this nonsense.

If WA DOH were TRULY trying to keep everyone 'safe' against a virus that only negatively impacts a very small portion of the public, they've been doing a BAD job at that. According to the DOH website, and due to the fact that 9,554 individuals have lost their lives to this. A whopping 1.2% of the WA population. A large majority of those are in the at risk age group and those that have had multiple health issues already. You've been failing since the beginning, and every death (including those hidden from view attributed to depression/suicide) is on you.

<PastedGraphic-2.tiff>

What I am finding even more surprising, the fact that you are pressing forward with 5-11 year old vaccinations and I highly doubt that many children in the state are medically 'at-risk' for this emergency use authorization. Shame on you all.

<PastedGraphic-3.tiff>

Additional facts to consider:
1) We've had viral illnesses for every single year of human history.
2) Covid has ~same fatality rate as a flu.
3) We've managed to live like normal humans until 2020.
Why are we still obsessed with covid?

Have a wonderful week and a happy holiday season,

Josh Daugherty

<joshua.daugherty.wa@gmail.com <mailto:joshua.daugherty.wa@gmail.com> > wrote:

To whom this may concern,

Is it already week 14? How can this be where the WA DOH only has the plan to see force masking our children until they say so? I believe this will fall on deaf ears as many of you are still complicit with this madness, but I will not comply.

All I'm requesting is to change from 'mandate' to 'recommended'. That would allow parents to make up their own minds as to mask their children or not. I can already expect that when masking eventually ends, common cold & flu cases will go up as masks prevent us from building our immunity to anything.

I will ask again:

- What is Washington's plan/goal as to when masks can be recommended/optional for children while at school?

Let the children breathe. If parents are still scared for the .000007% chance that their child may be adversely affected by this virus, they can add masks if they choose. This needs to be a choice. I see that the DOH hasn't updated their page since 29 November 2021 which shows me they still have no plan. Or have you realized that you are probably getting to the end of mass vaccines? The rest of WA will not do what you tell them. Give up. Will not get to 100% vaccinated, but that still

isn't the plan, right?

I would like to also point out a quick observation that Ohio Rep Jim Jordan had mentioned recently:

Summary: If masks, mandates & lockdowns work, why aren't they working?

The 'health' community has been wrong at almost every step of the way since the beginning. Their plan seems to be: 'lets try this...what about this...next we should try this...'

Quite the 'science', hmmm. If you don't have a plan, just say it. Still advocating for my previous comment, begin with a phased approach like in restaurants. Our students can remove their masks while seated. What is so wrong about this?

I am still looking forward to our comments & replies with answers. Not more of the political jargon...it doesn't work anymore.

Awaiting solutions & dialogue,

Josh Daugherty

Surprise! I have received a response from last week's request from the DOH Information email. Still no answers (not a true surprise). I look forward to the weekly, one-way communication with all involved. No one seems to be doing anything to assist in this. I hold all accountable for this non-action.

Please see below for the thread from today preceded by my latest response.:

DOH Information,

This question was asked over a week ago and just now you are getting back to me. Bottom line: My question still isn't answered. You really need to update your sources as that CDC links were updated as of November 2020 & May 2021. That is between 6 months and a year ago!

- What is Washington's plan/goal as to when masks can be recommended/optional for children while at school?

According to the WA DOH, covid doesn't spread in restaurants while diners have meals, that can take off their masks then, why not our children while seated? I have no issues with parents who wish to have their child masked all day, just do not force it on all of our children. Statistically speaking, our children have

more of a risk of adverse problems with the flu and the common cold than they do against covid. No one mentioned prior to 2019/2020 wearing masks for any flu seasons. Odds are the common cold & flu cases will spike once our kids remove their masks as they all have been weakening their immune systems with this forced masking.

As of yesterday, the WA DOH covid page shows vaccination stats. I am asking the WA DOH to come up with a % as to how many people need to get vaccinated against this useless virus that only hurts the weakest in the population (immunocompromised). I guarantee that we will not get to 100%, probably never 90% but how long do we need to continue this nonsense? What is the plan? I will say this again: IF YOU FAIL TO PLAN, THE YOU PLAN TO FAIL.

<PastedGraphic-1.png>

I look forward to your reply with answers and or a plan. Maybe begin a 'phased approach' that was tried to reopen after the government shut all the small businesses at the beginning. Quite the asinine approach at that but we at least tried that.

Concerned parent,

Josh Daugherty

NOVEMBER REQUEST

RESPONSE FROM DOH PA THIS MORNING TO MY 23

Hello,

Thank you for contacting the Department of Health.

DOH disease experts continue to monitor COVID-19 infection, hospitalization, death rates and health system capacity closely. While disease rates are declining, they remain high and hospital occupancy is still over 90 percent. We feel cautiously optimistic now that kids age 5 and older are eligible for the vaccine; however, the majority of children are still not vaccinated. We need to continue to do everything we can to prevent the spread of COVID-19, especially in light of the highly contagious Delta variant. As we head into winter and the holiday season, when the number of social get-togethers and indoor gatherings increase, a combination of masks and vaccines remain the best tools we have available to ensure that kids stay healthy and businesses and schools stay open.

You may view the studies below about the reduction in virus transmission and mask use:

Contacts,

Here we are at week 13, still no plan for children, the HEALTHIEST of us all, to have masks optional in school.

I will try to ask the question again, expecting

someone to give any answers to the question:

- What is Washington's plan as to when masks can be recommended/optional for children while at school?

"Until we say so..." isn't science. Show me the proof that kids are dropping like flies while at school. I will restate my previous comment, our kids are much healthier and can fight off any common cold & flu (read covid) much quicker than any of us. Why is the state still providing the useless nonsense direction as to 'keep everyone safe' and 'keep masking up until we say so'.

If you are awaiting 100% covid vaccinations, even for VAST majority of children that do NOT need it, we will not reach that goal. But it seems like the DOH still doesn't have a plan...

Not to mention, no one is keeping the conversation open except for parents, so everyone else in this chain is being complicit with these mandates.

I believe I've said it before, but this sounds a lot like when I was growing up, if someone told you to jump off a bridge, many of you would. Sorry to disappoint but I think for myself and will not jump.

Still frustrated and I will talk to you again next week! Parental choice should be part of this conversation. If masks work, then let those that continue to wear them, and be afraid of this virus continue. I will not comply.

Washington State Board of Health,

12 weeks and still no answers from anyone as to what the plan is concerning the forced masking of our children at school. Here is the question, should be simple and to the point:

- What is Washington's plan/goal as to when masks can be recommended/optional for children while at school?

Wear masks until we say so... isn't rooted in any science that I know of. Our children already have a much lower chance of health issues even if they contract Covid. I will reiterate my previous request: "mirror the restaurant policy" so that when our children are seated at their desk in the classroom, they may take off their masks. If some children still feel scared to take their masks off, they may keep them on. This should still be about choice of the parents/students. With these false-rooted mandates, they aren't allowing us freedom of choice.

I look forward to your comments/dialogue concerning this topic. If you will not help, then step aside as your inaction shows just how deeply you care about the health of my children.

Josh Daugherty

Just in case you missed it, here's some educational reading when it comes to our children.

Washington State Board of Health,

Still awaiting an answer to my queries below. Here we are, 11 weeks into the school year and it's still the same: "do it until we say so...". If you fail to PLAN, you plan to FAIL. I see a lot of failing by those in all positions of 'office'.

I've been contacting the WA DOH without answers every week, including Cc'ing our non-action school district, principals etc. No one will assist with speaking to anyone that may have any indication as to how long should we expect to force-mask our children at school. This virus is NOT a threat to our children, as it is comparable to the flu or the common cold. They are healthy.

Would like to at least begin some conversation with relaxing these 'mandates' to at least mirror restaurants in the area. If the children are seated, they should be able to remove these face diapers. Not to mention, cloth masks don't do anything for Covid particles. This continues to show this is all for 'show'. I will not participate.

If parents still wish to mask their child, feel free to. They should have the choice.

Still a frustrated parent,

Josh Daugherty

If you would like further information, please look at the following website. I am also open to conversation.

<https://www.unmaskourkidswa.com/>

Subject: Revise mask mandates for children schools

□WBoard of Health,

To date, I have been requesting updates for the
forced masking in schools:

10 weeks, still nothing from the state...

How much longer to force mask our children? We
should have a choice on whether to mask or not.

I just want to know what the goal is of the force
masking! "Until we say so..." isn't ANYTHING near common sense or science.

Don't you dare start with the force vaccinations for
our children when only about .000003% may even need it.

Answers requested as to what the education plan is. I
will continue to request weekly updates until a plan shows an end in sight. Just because
"we said so" isn't right.

Maybe as a start. We could mirror the restaurant
policy where if you are seated, you may take off your mask. I understand keeping
children safe, but they are not in danger. If children want to continue to mask up, please

have them continue. If children do not want to wear a mask, they shouldn't need to.

Where is the proof that children are all infected?

Irritated parent,
Joshua Daugherty

<joshua.daugherty.WA@gmail.com <mailto:joshua.daugherty.WA@gmail.com> > wrote:

☐

Week 9,

Still nothing. Exactly what I expect from this school district and even nothing from the DOH. My concern/question is:

What is the end goal? How long do our kids need to be masked in school?

they say so. So WRONG! So far WA DOH is basically saying to wear them until

72.5% fully vaccinated. As of today in WA, 78.6% 12+ has one dose and

85.6% in King County.

I've been requesting information from the schools, district and the DOH with no answers. How does anyone think this is the 'correct' way?

Going back to when I was young, if someone told you to jump off a bridge, would you? Too many people are just following the 'guidance' whether it makes sense or not, without question.

Just asking for the choice. Our kids should have a choice. Currently they are being taught that everyone is infected. If you want to still mask up, feel free to.

Don't you dare agree with vaccine mandates!

Unbelievable poor management at all levels. Will continue until I receive dialogue. This is now my 9th week of requesting answers.

On Oct 18, 2021, at 6:54 AM, Joshua Daugherty
<joshua.daugherty.WA@gmail.com <mailto:joshua.daugherty.WA@gmail.com> > wrote:

□ Still waiting any information from the WA DOH.
Nothing yet and we are only 8 weeks into this. I know that many of you don't care about the safety of my child, as you just follow the same guidance pushed from 'above', without questions. This is WRONG.

From today to the WA DOH:

Another week, more nonsense. I have been requesting follow-ups to my questions and nothing has been done. Every week I am asking the same, MAIN question.

- What is WA state's end goal when it comes to children's force masking policies?

If there is no plan, then you plan to fail. This has been the case since the 'pandemic' began. The science doesn't back the policy of 'wear a mask until we say so...' I need additional information as this is WRONG and many know it. I would like to have a constructive dialogue with someone that can say when our children can opt into masks or not at school. Again, if parents choose to mask their kids, it is their choice. Please let me know what the plan is beyond, 'wear them until we say so.'

Still no answers,
Josh Daugherty

On Oct 18, 2021, at 6:40 AM, Joshua Daugherty
<joshua.daugherty.wa@gmail.com <mailto:joshua.daugherty.wa@gmail.com> > wrote:

Week 7,

Starting out 'right'? How does this make any sense?
Please show me which part makes any sense at all.

It's a good thing that my daughters aren't playing sports. Kids now need to be given the vaccine, or test every 2 weeks. Studies even show that even with the vaccine, they can still spread covid/common cold... Are you going to be ensuring that they are wearing masks while participating too? Or is that just while sitting, spectating?

This must be more of that 'science' stuff. Just regurgitating the nonsense that the DOH puts out.

<Another useless mandate.png>

Have there been any further guidance or discussions concerning the forced-masking mandates to become 'recommended'? Still awaiting

anyone to respond back to me from the WA DOH. Anything besides wear it until we say stop?

Still awaiting answers,

Josh Daugherty

<joshua.daugherty.wa@gmail.com <mailto:joshua.daugherty.wa@gmail.com> > wrote:

Week 6,

Still trying to find out the following:

- How long do our children need to be force masked?
What is the end goal to go back to breathing fresh air?

Freedom, this is still America. If you want to stay masked, fine. Do not force it on us. Under the guise of 'public safety', keep wearing masks to 'protect everyone'. That infers that my kids are dangerous! DOH WA needs to let us know the plan, we must demand that from them, 'until we say so' is NOT science.

Oh, and mandate doesn't equal law.

So glad I'm actively teaching my children & family CRITICAL THINKING. Something that the Gov, DOH, School districts, etc have no idea what it is. Just mandate compliance. Basically continuing a 'shut up and color' attitude. We know who is at fault. Just because it's 'popular', doesn't mean that it's right. If this continues to go on for an extended period of time, expect more pushback.

Just asking to give us the choice. Why is this so hard for you to comprehend? Maybe we start dictating what you need to wear and how you need to act.

Such a relevant article to this:

<https://notthebee.com/article/covid-theater-a-personal-tale-about-the-gaslighting-of-a-nation-and-its-schoolchildren>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fnotthebee.com%2Farticle%2Fcovid-theater-a-personal-tale-about-the-gaslighting-of-a-nation-and-its-schoolchildren&data=04%7C01%7CWSBOH%40sboh.wa.gov%7C19ef51deedcb45890eda08d9f0480a75%7>>

Looking forward to continued dialogue as to the end of these unconstitutional mandates.

Still frustrated,
Josh Daugherty

Awaiting DOH responses too.

□

Week 4,

Fourth request for information:

When is the mask mandate for schools going to end? I've requested info from DOH as they need to answer to my requests. They have not and I will continue to request weekly from the DOH and the district on down to our schools. They do not stop the virus from being passed. It is just for show/theater. Otherwise the wording in the 'order' wouldn't be 'anything'.

"A cloth face covering is anything that completely covers the mouth and nose and fits securely on the sides of the face and under the chin."

It may have plenty of holes throughout the mask. This further proves that DOH doesn't care about the transmission of the virus. Just to mandate the "do it or else".

Enough of this nonsense. I'm just trying to communicate with someone other than just a 'Customer Service Specialist' that is just passing junk back. Awaiting the constructive dialogue.

Continuing on my requests for common sense and/or parent choice for masks in schools. Mandates are just asking for push back. I will continue to push back.

Josh Daugherty

On Sep 19, 2021, at 7:40 PM, Joshua Daugherty <joshua.daugherty.WA@gmail.com <mailto:joshua.daugherty.WA@gmail.com> > wrote:

□ WeeB,

Finally received an email back from WA DOH with more of the same, no answers to my questions. My main question will continue until I receive answers instead of just a 'Customer Service Specialist' responding to my web query with a loosely prepared, blanket statement, that mentions 'keeping the CDC recommendations as of August 5, 2021'.

My question seems to be simple, straightforward and to the point.

- What is Washington's plan/goal concerning the mask mandates for school-age children? There needs to be a plan besides 'wear the mask because I said so'. (aka mandate)

If they were going with the CDC recommendations, forced masking wouldn't be in our schools.

I am requesting that they at least update the guidance to 'recommended' as the current failed 'plans' make zero sense. There is NO scientific data that has been collected to warrant this abuse across the board. Especially state-wide. As of 13 September, posted on the WA DOH website it shows that 75.1% of residents have at least one dose and 68.1% are FULLY vaccinated against COVID. Of that, King County has vaccination rates of 77.7% (12+). Auburn School District is in King County.

<PastedGraphic-1.png>

The hospitalization rate for those that are school-age is so minuscule, the data you have been collecting doesn't make sense to continue with the mask mandates. How much longer do we need to live under this authoritarian 'leadership' (aka mismanagement) of state resources? I will add to this as we have already received communication from the schools that COVID/common cold/sniffles/flu has popped up in school.

Looking at anyone that I've communicated with concerning this. Fail to plan, plan to fail... Seems spot-on for this situation that we are in!

<https://www.unmaskourkidswa.com>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.unmaskourkidswa.com%2F8>>

All I am asking is that we give parents the CHOICE whether to mask/unmask our children.

Looking forward to future constructive dialogue,
Josh Daugherty

STOP! ENOUGH is ENOUGH! This must end NOW. There is zero danger to children and I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State. Please do the right thing and do not require these vaccinations and do not require masks for school age children.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity.

You are teaching children to live in fear and it must end. They have a greater chance of dying driving to school. You are focused on the wrong issues. You are not in touch with their current needs. Suicide is on the rise. Please do the right thing!

I strongly am against requiring children to receive a covid vaccine in order for them to attend public school.

The vaccine has proven through time just how faulty a vaccine it is. People who have been tripled injected are still getting the illness. People who are not vaccinated are recovering just as well as vaccinated and have natural immunity.

Follow the science and not interest groups who will profit from this faulty injection.

Sincerely,

Kathy Cooper

To whom it may concern,

As a parent of a high school child, I am writing to inform you that if these unconstitutional vaccine mandates are passed, I will immediately removed my child from public school. I will then spend every moment of my free time reaching out to other parents to help inform them of way we can join together to avoid using the public school system and its agenda. The masks were already too far. This is absolutely despicable.

Dear Board Members,

My husband and I are strongly OPPOSED to any kind of requirement that our WA state students, esp minors, get vaccinated to attend school. We find this outrageous, as there is no longer a pandemic of the virus that was never a serious threat to children in the first place! And, even if it was, the choice to inject a substance into a child must always be the decision of parents/guardians without impunity!

Please protect our children this dangerous proposal!

Sincerely,
Amie & Dave Beisel

Subject: Children, Covid and Emergency Use Authorized shots

External Email

Children do not get very sick from Covid. A study here in the United States showed that of the 200 children hospitalized in 2020 for Covid (out of 75 million) ALL possessed co-morbidities. In other words, only very sick children are hospitalized or possibly die with Covid. The overall survival rate, even including these children is 99.997.

Vaccinating our children with these experimental and Emergency Use Authorized shots is ludicrous and dangerous. Using the vaccine companies' own data, they are MORE likely to be injured by the shot than by Covid. Requiring these shots would be criminal.

Thank you,

Nancy Thompson

Good afternoon,

I am one of MANY concerned parents who do not approve of the decisions being made to add the covid shot as a requirement for school aged children to attend school. I watched your virtual meeting yesterday between the Technical Advisory Group (TAG) and the WA State Board of Health (SBOH). Your "data" presented was not sufficient to even make an educated decision on Criteria #5 or #6 (or any of the 9 criteria for that matter), many of you even said so yourself. Please understand that your vote, your unanimous recommendation to the Department of Health, affects ALL of us parents.

For those of us parents who do not want our children being forced to take this experimental shot, please hear us out. If the tables were turned, and the government was trying to pass a law or new code/requirement that would force YOU to either do something to your child that you wholeheartedly did not approve of or pull them from school and uproot your whole life and everything you've worked for to move somewhere else to stand up for what you believe in, how would that make you feel? I have lived in Washington my entire life, so have my parents and my grandparents did too. Everything I know, love and have worked so hard for, is here. All of you with TAG and SBOH and many other agencies/organizations of government are jeopardizing every aspect of my life with your decisions. The public no longer has a voice, we are being ignored and censored left and right. PLEASE. Hear me. I am begging you. I will not allow my children to be injected with an experimental shot. My kids and myself are otherwise fully vaccinated and get our flu shots. I am NOT anti-vaccine. I am simply a very concerned mama bear who wants to protect my cubs. Imagine for a moment if the most important people in your life were being forced to do something they did not want with every fiber of their being and ask yourself how you would feel. My heart is SO heavy. Tears are flowing as I write this. Please understand that the choices you are making affect people who may not have the same opinions, views, beliefs as you do. Are you really ok with harming others just because they think differently than you do?

Since when is it a crime to protect your own child?! I have been called so many awful,

ugly names, because I will not make my toddler wear a face covering in public. How is this ok? I don't call people names because they choose to wear a mask or get a shot. I truly respect everyone and the decisions they make for their children. We are all trying to do what is best for ourselves and our loved ones. Why can't that be respected? Why are you trying to rip that CHOICE away from me? What would it take for you to understand how I am feeling? Would it make a difference if I sat in front of you crying while holding my children? This is not fair. Surely you can see that. The vaccine is too new for me to trust it. We don't know long term effects. There is no way that we could! Covid has only been around for a few years and the vaccines even less time. Can you imagine if you voted yes for this to be implemented and years down the road we saw all kinds of defects and illnesses and deaths associated with these vaccines and boosters?? The blood would be on your hands. PLEASE, PLEASE, PLEASE. Let the PARENTS make the choices for their own children. Let ME decide if MY child needs this shot. I promise you I am far from alone on this. I know SO many people who feel this way. Our livelihood rests in your hands. Please speak up for us. Please understand that even though we may have different views, different beliefs, different opinions, that I still care about you. I would still save your life if given the chance. Love thy neighbor, right? I grew up in a household with one parent who was typically Democrat and the other typically Republican. They loved each other all the more, while cancelling one another's votes. Let's get back to standing together, respecting one another, helping each other and being neighborly. I would never want to force YOU to do something you didn't want to do. Please show some respect, and don't force me to either. United we stand, Divided we fall. Help us END the division by allowing us all to make CHOICES for ourselves. What is right for you, may not be right for me.

Much love and respect,

A Concerned Mama Bear

For the record, I am strongly against the COVID vaccine mandate for children in public schools in Washington. In fact, I am against any sort of mandate that supports showing a vaccination card to get into a restaurant, event or public place of any sort.

Parents are the only ones who have the right to decide what, if any, vaccines a parent gives their child.

Subject: Vaccine Requirements for Children to attend school - Against

External Email

Dear members of the WSBOH,

Please do not add the Covid 19 EUA vaccines to the schedule. Many parents are against it and it will cause undue harm as parents have to scramble to find new educational opportunities outside of the public/ private school system which will cause stress. Studies are not complete for Comirnaty and go out until 2027. This means it isn't fully approved nor do we know without a doubt it's safe. Omicron swept through Washington state leaving in its wake children with natural immunity. Look at the data and see from the AAP weekly rates that hospitalizations are .7% of cases in our under 19 group and of those cases .01% die (this includes children with severe comorbidities). There is no need to rush, the data is clear that children are not at statistical risk and therefore it should be the parents and pediatricians decision. There should also be no connection to losing masks with getting an EUA vaccine as that is also unsupported by science as those with the vaccine have the same viral loads as unvaccinated people which means they spread the virus too.

Thank you for your consideration,
Martina Collom

SBOH employees,

It is very disappointing to audit your meeting this morning. You SCIENTISTS showed/fooled us with statistics/data. But you IGNORE and DISRESPECT the facts.

Natural immunization is far way more effective than the covid-19 vaccine. Why do you push/mandate the vaccination to our next generation? to the young kids?!

Adding experimental medical treatment is a pure evil criminal move. We will go after each of you who supports it!

A WA parent

<data:image/png;base64,iVBORw0KGgoAAAANSUhEUgAAAAEAAAABCAQAAAC1HAwCAAAAC0IEQVR42mNk

The CEO of the OneAmerica insurance company recently disclosed
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Finsurance-forums.com%2Flife-insurance%2Foneamerica-ceo-says-death-rates-among-working-age-people-up-40%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C8c1acbb6f3e64ef9706108d9ecbfe5ab%7C11d0e2>
that mortality in the 18-64 age group was 40 percent higher during the 3rd and 4th
quarters of 2021 than during pre-pandemic levels. For reference, the CEO indicated that
a 10 percent increase would have been a 1-in-200-year event. Furthermore, most of the
deaths were not attributed to Covid.

<data:image/png;base64,iVBORw0KGgoAAAANSUhEUgAAAAEAAAABCAQAAAC1HAWCAAAAC0IEQVR42mNk

Figure 1: US weekly deaths by age group. Data
 <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fncchs%2Fnvss%2Fmortality%2Fweekly%2Fdeaths%2Fby%2Fage%2Fgroup%2F>
 is from the CDC. The gold curve is data for 2021. The red curve is data for 2020. The
 gray curves are data for 2015-2019.

The OneAmerica insurance company serves a subset of the US population. The
 CDC collects mortality data
 <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fncchs%2Fnvss%2Fmortality%2Fweekly%2Fdeaths%2Fby%2Fage%2Fgroup%2F>
 for the entire US population. Figure 1 illustrates the weekly US mortality from 2015-2021
 by age group. Several generalizations are readily apparent. The years 2015-2019 were
 very similar for all age groups forming a tight band of usual expectation. The tightness of
 the band for 2015-2019 means that relatively small increases in mortality are very
 significant events. There has been nothing unusual about mortality for the Under-25 age
 group during the Covid period compared to recent history. The last 10 weeks of data for
 2021 are incomplete due to delays in reporting death certificates. Otherwise, mortality
 for the Over-25 age groups have been higher than historic norms starting in about March
 of 2020 and continuing to the present time with one big exception for the 85+ age
 group.

There is a very interesting interval from Week 10 (March 7) 2021 to Week 24
 (June 13) 2021. Deaths in the 85+ Age Group are LOWER than average during this
 interval. Total deaths for Weeks 10-24 averaged 248,536 during 2015-2019, but were
 242,372 during 2021. For the 25-44 age group, total deaths for Weeks 10-24 averaged
 38,955 during 2015-2019, but were 54,789 (40.6 percent higher) during 2021. Daily
 Covid deaths (7-day moving average)
 <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.worldometers.info%2Fcoronavirus%2Fusa%2F>
 in the US were declining from 1,689 on March 7, 2021, to 387 on June 13, 2021. This
 time period was the decline phase of the winter outbreak that peaked around January 18,
 2021, and reached a nadir around July 8, 2021 prior to the Delta surge. One cannot
 plausibly attribute the above average deaths for the 25-44 age group during this time
 period to Covid. What was responsible for these deaths?

<data:image/png;base64,iVBORw0KGgoAAAANSUhEUgAAAAEAAAABCAQAAAC1HAWCAAAAC0IEQVR42mNK

Figure 2: Weekly US mortality by Cause Group. Data
 <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fncchs%2Fnvss%2Fmortality%2Fweekly%2Fdeaths%2Fby%2Fcause%2Fgroup%2F>
 is from the CDC. The gold curve is data for 2021. The red curve is data for 2020. The
 gray curves are data for 2015-2019.

Clearly there is a very significant above average number of deaths across the US
 that cannot be attributed to Covid. As was the case for the Age Group graphs, data for
 the last 10 weeks are incomplete due to delays in reporting of death certificates. Deaths
 attributed to Malignant Neoplasms were average during the entire pandemic period.
 Although there was an increase in deaths from Alzheimer Disease and dementia in 2020

after the onset of the pandemic, this was less apparent during 2021. There was an increase in deaths attributed to Other select causes (which include suicides and drug overdoses), but the magnitude was much smaller than what is seen in the Circulatory diseases category. Deaths attributed to Circulatory diseases include strokes, heart attacks, and heart failure (including myocarditis). The Circulatory diseases category is clearly the most important category for excess deaths during 2020 and 2021. Notably, deaths attributed to Respiratory diseases were below average during 2021 for the period of interest between Week 10 and Week 24 of 2021. Covid is a respiratory disease and leads to acute respiratory distress syndrome with hypoxemia and respiratory failure in severe cases. During the period of interest between Week 10 and Week 24 of 2021, Covid deaths were steadily declining, deaths attributed to Respiratory diseases were below average, but deaths due to Circulatory diseases were significantly above average. It is difficult to explain the data between Week 10 and Week 24 of 2021 on the basis of lung injury caused by Covid infection.

The spike protein enables entry of the virus into the host cells. The spike protein targets the angiotensin converting enzyme-2 (ACE-2) receptor. Angiotensin converting enzymes play an important role in the regulation of blood pressure. Angiotensin receptor blockers (ARB) and angiotensin converting enzyme (ACE) inhibitors are both important classes of drugs used to treat hypertension. It does not require a stretch of the imagination to suspect that the spike protein could cause elevation of blood pressure. Acute elevation in blood pressure is known to be a risk factor for stroke, acute myocardial infarction (heart attack), and congestive heart failure. Spike protein is also associated with clotting, presumably due to endothelial injury, which would also increase risk for myocardial infarction and stroke. It is not clear why spike protein from the Covid virus would explain above average deaths attributed to Circulatory diseases during a time period when Covid cases and deaths were declining. However, the Covid virus was not the only source of spike protein during this time period. The mRNA vaccines led to the production of spike protein by host cells and Weeks 10-24 of 2021 were immediately followed by the mass introduction of mRNA vaccines to the US public. The data is not proof, but it is certainly a red flag.

The appropriate method to assess vaccine efficacy and safety is all cause mortality. Deaths from all causes are compared between the vaccine group and a control unvaccinated group. This method has not been used. Rather, the CDC and FDA determine on a case-by-case basis whether reported adverse events can be attributed to the vaccine. If a footballer drops dead during a game, one would not be inclined to attribute the cause to a vaccine given 10 weeks earlier. However, when 5 footballers drop dead every week, one will be looking for ANY common denominator between the dead footballers. Neither the CDC nor the FDA are impartial observers of vaccine safety. Both agencies have vested interests in promoting the vaccines. When the CDC or FDA analyze events on a case-by-case basis, they are inclined to say that an event was not due to a vaccine (especially if the people at the CDC and FDA include former executives from Pfizer). However, when the entire US population has a significant number of events compared to historic basis, one must look for the common denominators in the people with the events. The existing data is not proof that the vaccines are causing deaths due to Circulatory diseases. The burden of proof, however, lies with the CDC and FDA to prove that the vaccines are not causing deaths due to spike protein. It is scientific irresponsibility to eliminate the control group via vaccine mandates and make future assessment of vaccine safety scientifically impossible.

<debrakwells@startmail.com> wrote:

Please do not require or force the COVID 19 vaccines on children. More children have been negatively affected by vaccines than have been sick or died from covid. The children that have passed away had other medical issues that put them at particular risk; however, the vast majority are not at risk of covid 19. However, with the vaccines, myocarditis is more deadly to children than covid 19 and this has played out in the numbers.

We also don't know the long term effects on fertility and this vaccine should not be allowed or approved for children at any age.

Please follow biological science and not political science. It is very apparent that the majority of decision makers have been following political science and not biological science. Please do NOT harm our children with these untested vaccines. It's one thing to require the measles vaccines that have been around for decades; however, covid 19 vaccines have only been around just over a year. The numbers are not looking good for the safety of the covid 19 vaccine. The numbers from the Military are alarming. The numbers from insurance companies, that are required to review actual death rates and why so they can set premium rates, are extremely alarming. Ignoring these warning signs is gross negligence. We must protect our most vulnerable from even the most well meaning individuals/decision makers. We should not be making rash decisions that will

have long standing impact that can't be reversed. We need more data on the vaccines before we force it on children.

Please vote NO on requiring Covid vaccines for children under 18.

This isn't a real vaccine and was only approved for emergency use. It's not proven to stop a person from getting Covid. If that was the case it would be like the measles vaccine but it is not.

Please do not add the COVID-19 vaccine to the vaccine requirements for children to attend school. If we wanted our children to have this vaccine we would have already had them receive it. This requirement is not necessary seeing as though most children have already had COVID and have had no lasting affects or complications. Parents should have the freedom to choose what is put into their child's body and should not be forced Inject their children with an experimental vaccine in which we have no long-term data that shows that it's affective at protecting people from COVID-19. The data shows that people who are vaccinated currently are still getting COVID-19. So, there's no need to get the vaccine.

We have no long-term data that shows how the make up of the COVID-19 vaccine will impact our children's overall health, cancer rates, infertility rates, miscarriage and stillbirth rates, or how it will affect their heart. There are some major concerns with this vaccine and its long term impact. It is 100% experimental I do not wish to have my child be enrolled in this experiment. I believe that this will have a negative impact on the public school system as many people who choose not to vaccinate their children like myself will pull their children from public schools and will fight to have the funding for their child go with their child and not to the public school. The people have spoken and do not want this added to the vaccine requirements to attend public school.

Respectfully,
Heather Clerget

Why is an experimental vaccine that is only approved under emergency use being pushed so hard on our children? Our children who are at extremely low risk of covid complications. I don't believe we will know the true side effects of these experimental vaccines for years to come. It's pretty clear that those who want the vaccine for their child have already done so. Exemptions are brought up but there would be no need if it's not required. Lastly why is natural immunity being covered up and not considered? Clumping someone into a group as antivax isn't fair. There are a ton of concerned parents that branch a wide stance. The division is becoming a gaping hole. Many parents are pretty fed up with mixed messaging and have a distrust for those running the show. I genuinely hope there is a pause especially seeing the trend in cases go down and masks are about to be optional why is this being pushed so hard at a point where we are seeing a break in the clouds.

Dear TAG & WSBOH,

As a lifelong citizen of WA state I'm 100% objecting to adding mRNA vaccination ☐☐ requirements (Covid Vaccines) in order for kids to attend K-12 school. I do NOT consent to the revision of WAC 246-105.

As of this writing the Dept of Defense is under criminal investigation for a massive vaccine injuries cover-up. The numbers do not lie. This is not something that will remain hidden. Children and youths are far more likely to die or be injured from the vaccines than Covid.

Therefor, I'm asking you to stand on the right side of history, to hold the future of our kids in your heart and vote NO to the revision of WAC 246-105.

Thank you,

Kasha McGuire

Please DO NOT include the COVID-19 Vaccine as a requirement for students attending Washington State schools.

While the vaccine containing this antigen prevent(s) diseases that had significant morbidity and/or mortality in at least some sub-set of the population it is not sufficient to require it in ALL children and young adults attending Washington State schools.

We are rapidly approaching an endemic status with this disease. We cannot eternally vaccine chase an aerosolized virus that is rapidly evolving. Any vaccine only provides some protection. Forcing an entire population to inject themselves that reduces but does not eliminate the risk of contracting or spreading this disease is not reasonable.

Vaccinating against this disease may reduce but does not eliminate the risk of person-to-person transmission, and in some variants increases that risk, as with Omricon, with transmission in a school or child chare setting or activity being given the highest priority.

We will never eliminate risk. Requiring vaccinations that are far less effective against the disease they are purported to prevent than others that are already required with long term research studies available, and accountability from vaccine producers is wildly inappropriate. We need to be wary of creating policies based on redefined terminology. Developing knee-jerk policies reactively is hardly good science.

It would be far better to recommend these COVID-19 vaccines, much like the HPV vaccine and allow families and their health practitioners to decide for themselves rather than to blanket requirement them as an addition and point to the exemptions available.

The State ought not to interfere with individual autonomy for vaccines that don't have enough published long-term data to suffice in providing informed consent.

Please delay requiring these vaccines for school aged children as they pose virtually no risk to grade school aged children for morbidity or mortality in the sub-set of the population. It is NOT sufficient to require in ALL children attending Washington State Schools.

Sincerely,

Carisa Vanderpol

Concerning the COVID-19 vaccine and the consideration of it being required for children to attend school, I request that it be declined. The COVID-19 vaccination does not prevent the disease, and it does not stop or reduce transmission of the disease. For those reasons, the requirement for the vaccination would be of no benefit for attending school. And with any vaccination there comes risk to be considered. We have made it through the worst of Covid, and now countries and states are stopping mandates. Even our state as announced by governor yesterday. Parents will make choices that are right for their families as they do every year during colds and flu season, and now with Covid. No mandatory COVID-19 vaccination should be implemented.

Sincerely,

Kim Stephens

Please hear my voice here. I am a Washington state concerned grandma. I have grandkids in the schools that are still mandating masks and now possible vaccinations that have in your words " Currently there is NO published literature on pediatric Covid-19 vaccine effectiveness in K-12 school settings".

Covid is FAR down the list of causes of death for Washington children. Yet SUICIDE is 3rd leading cause of death for 15-19 year olds!! Lockdowns, masks, on line screen, lack of communication and community. Our children are suffering most of all people. Please remove all these mandates!!!!

Thank you

Diane Springs.

Children are at minimal risk from Covid.

There is currently no published literature on pediatric Covid-19 vaccine effectiveness in a K-12 school setting

There is no safety data on these Covid-19 vaccines, clinical trials are not complete

Covid-19 is far down the list of causes of death for WA children, yet suicide is the 3rd leading cause of death for teens 15-19 years of age

Parents are the final/only consent for their children

Mandating an experimental vaccine for children violates the law and the Constitution and more importantly is immoral

To Whom it May Concern at SBOH:

As you consider adding COVID-19 to Chapter 246-105 WAC, please answer these questions:

- 1) What is the proof from Pfizer, Moderna and Johnson and Johnson that there are no negative long-term effects from these vaccinations?
- 2) Since you have no proof through long-term trial data, how can you even consider requiring these vaccinations for anyone, not to mention children?

Let me remind you of the tragedy of Thalidomide, an FDA approved and widely used drug that was eventually found to cause severe birth defects.

<https://pubmed.ncbi.nlm.nih.gov/21507989/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fpubmed.ncbi.nlm.nih.gov%2F21507989/>>

It took years for the connection to birth defects to be understood. How will you feel if there is a negative effect from these vaccines discovered in years to come, and your decision to require it for school caused thousands of children to be needlessly injured by it?

That consideration, coupled with the unquestionable global data that children are not in danger from the SARS-Cov2 virus and the waning cases worldwide should make your choice clear: Do not add COVID-19 to the list of required school vaccinations.

Thank you,
Kari Hannon

Ladies and Gentlemen -

I ask you to reject any and all proposals requiring children to be subjected to the Covid injection to attend public school. Not only does your presentation clearly state that the implementation of such harbors many unknowns, it is also clear from the medical evidence that far more children are harmed by the injection and the incidence of myocarditis than the virus itself. While it has been stated that NSAIDs are enough treatment for this condition, we all know this is not true. Young people dealing with this diagnosis face severe life-altering symptoms that cannot be cured.

It makes absolutely no sense to make a decision that could potentially harm thousands of children, or to make a decision without full information. The FDA has much more information to release on this topic - hundreds of thousands of pages in fact by this fall.

It would be a wiser choice for everyone to wait on a decision of this magnitude until all the information is available. Parents need to protect their children from unnecessary risk. This is an unnecessary risk, as mandates are ending and the virus is waning. Children have shown to be the least effected by this virus.

Right now, the cure seems to be far worse than the illness.

Sincerely,
Charity Husser

As a citizen of the U.S.A. and Washington State, I do NOT Consent to adding Covid-19 vaccines into Chapter 246-105 WAC due to the following reasons:

- 1) I do not consent to experimental drugs. Experimental meaning that the vaccines have not followed long term protocol & policies but have been made an exception to the rule for the purpose of an emergency use only. That should NOT be the bases for mandatory vaccine policy or law changes.
- 2) The Gene altering technology has not had enough long term studies for adverse reactions, and or long term side effects.
- 3) According to the new scientific data coming out, the vaccines have been more harmful to the people rather than helpful. The benefits have NOT been proven to outweigh the risks especially in children and children should not be subjected to these vaccine mandates.

In conclusion, until the covid-19 vaccines have been PROVEN and documented to be safe and effective following established guidelines established prior to covid19 emergency use, I do NOT consent to the revision of WAC 246-105.

Thank you,

Subject: Re: SuperBowl & The Big Game

I do love me some football but you want to know what I don't love? I don't love my daughter going to school in fear because adults that she does not know nor has never had the chance to develop a relationship with, are masked and barking demands all day long while she complains of headaches day in and day out because she has a mask pressed up against her tiny little face. Do any of you remember what it's like to be a kid? Try to focus and 'do what your told' when the demands are coming at you muffled and with no context of facial expressions. Sounds damn right confusing and scary doesn't it?

That has been the reality for countless youth with these pointless mask mandates.

You have the power to change that. Unmask our children.

Kind regards from an outraged momma bear-

Christina

For the record, I am strongly against the COVID vaccine mandate for children in public schools in Washington. In fact. I am against any sort of mandate that supports showing a vaccination card to get into a restaurant, event or public place of any sort.

Parents are the only ones who have the right to decide what, if any, vaccines a parent gives their child.

This is group so biased. Where's the doctors and scientists opposed to this? This is an Inslee dictate. You're all bought and paid for to obey the puppet master. Nobody should allow their children anywhere near you or your left leaning agenda without both groups of the science being heard. You should all be ashamed of yourselves. Such a bunch of power crazed maniacs. But you will have to answer for your actions (whether you want to believe in a higher being or not). Sleep well you monsters.

External Email

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

External Email

Please do not add the COVID-19 vaccine to the vaccine requirements for children to attend school. If we wanted our children to have this vaccine we would have already had them receive it. This requirement is not necessary seeing as though most children have already had COVID and have had no lasting affects or complications. Parents should have the freedom to choose what is put into their child's body and should not be forced Inject their children with an experimental vaccine in which we have no long-term data that shows that it's affective at protecting people from COVID-19. The data shows that people who are vaccinated currently are still getting COVID-19. So, there's no need to get the vaccine.

We have no long-term data that shows how the make up of the COVID-19 vaccine will impact our children's overall health, cancer rates, infertility rates, miscarriage and stillbirth rates, or how it will affect their heart. There are some major concerns with this vaccine and its long term impact. It is 100% experimental I do not wish to have my child be enrolled in this experiment. I believe that this will have a negative impact on the public school system as many people who choose not to vaccinate their children like myself will pull their children from public schools and will fight to have the funding for their child go with their child and not to the public school. The people have spoken and do not want this added to the vaccine requirements to attend public school.

Respectfully,
Heather Clerget

Subject: VOTE NO - on Vaccine mandates in school

External Email

As I sat through the meeting today, I want to reach out and urge you to vote NO on this vaccine mandate.

There is currently NO published literature on pediatric Covid-29 vaccine effectiveness in the k-12 setting. It has been shown that it does not prevent disease (criteria 5) and does not reduce risk of transmission (criteria 6). Making this mandatory without proper information is ignorant and potentially harmful to more people than helpful.

Please consider this.

In His glory,
Stacie Meyer

Subject: Our Kids

External Email

We are done.
Done with the restrictions.
Done with the masks.
The emergency is over.

We are coming up on 2 years of Covid. Kids are now recognizing for themselves that the masks (and vaccines) are not effective. We need to shift focus to now living with Covid. Understanding that there will always be viruses and sickness in this world. No restriction is going to change that fact.

It's time to think critically and be the leaders that you are trying to be in this community. You can either help everybody move forward or dig your heels in and bury your head in the sand. The rest of the world is finally opening up and allowing people to have their God-given freedom back! Do you want to be vaccinated? It's your choice. Do you want to mask up? It's your choice. Give us our choice back.

Enough is enough. End all the mandates now.

Perhaps if our kids were rich and famous they wouldn't have to wear their masks to school every day like the 70k fans at the super bowl last night. The hypocrisy is deafening.

Subject: Communicating With Board Members - Vote "No" on COVID Shots for Children

External Email

☐ Dear Board Members,

I have two children in Washington schools. Both of my children have natural immunity from the virus as we all had Covid over the Christmas break (myself included and I am fully vaccinated). I am not comfortable vaccinating my children for several reasons. First, they have natural immunity, and the CDC has now proven natural immunity to be more effective than the vaccines. Second, the current shots are deemed safe in the media reports, but the VAERS reports tell a different story. The truth is these shots are irreversible and we do not know the long term effects the spike proteins have on our bodies. The cases of myocarditis arising in boys is alarming. The changes in women's menstrual cycles are also alarming. I am very aware of the problems COVID 19 can have in adults, especially adults with comorbidities including age over 75, obesity, diabetes, and high blood pressure; this is the population at risk, not our children. If we truly follow the science the risk to healthy adults is extremely low and it is even lower for children. In addition, we now have effective treatments to prevent hospitalization and death that can be used instead of vaccinating children that do not need to be vaccinated. Children are NOT affected in the same way as unhealthy adults. It does not make sense to 'protect' them from something that really isn't a danger to them. What we need to protect them against is obesity, suicide, drugs, and alcohol as these have magnitudes more impact on their physical and mental health than Covid does.

I am not willing to experiment with our children and will remove them from public school if this shot becomes mandated.

Sincerely,
James "Jeff" Peterson

External Email

Hello,

My name is Shawna Orozco and I have 2 children in the Pasco school district in Washington State. I am a registered nurse and very informed on vaccinations and health. The proposed agenda for children to be vaccinated against covid in order to attend public schools is unlawful and violates our free will and rights to choose what is best for our children. This is an experimental shot and is nothing like any child has ever received before with the MRNA technology. There is less than 1% death rate for children, posing no real threat to them. However the shot itself poses dangerous repercussions and many negative effects and many that we won't know for sure until further time and research is conducted. Our children are not experiments, they are important and they are the future. Please do what is right and allow parents the choice that belong to us, not the state. Thank you

I OPPOSE the use of illegal force to detain ANY family OR children. This is insane!! Have we not learned about the holocaust and internment camps? What you are trying to pass is illegal and unconstitutional! There are thousands of us trying to leave comments on this matter and we will continue. I will be on every zoom or meeting you have throughout this charade! I will comment every time because this is against Washington Constitution!!

There are studies that show this type of agenda does not reduce transmission whatsoever. I would love to hear your thoughts on the vaccinated still being able to get Covid and spread it. According to even more studies this plandemic didn't get out of hand until the experimental shots were starting to be administered.

Forced mandates opposes our rights as free Americans- it also disrupts an active healthy immune response. Many studies now conclude that the highest vaccinated areas are highest for deaths and risky health concerns. Freedom of choice should never be infringed upon.

THE PEOPLE HAVE SPOKEN AND WE THE PEOPLE SAY NO!

WE THE PEOPLE SAY NO!

Just in case you forgot, WE the PEOPLE saw the WAC 246-100-040 on the agenda you tried to hide.

Subject: Vax Requirement for Schools

External Email

I am writing about the Vax requirement for schools.

This is something that is not necessary and should be voted on by the public if it's intended to be put in place!!

The Vaccines do NOT stop transmission in any way. The often stated function of protecting other students or faculty is false. The vaccines will not protect anyone except the person taking them. This has been stated by the CDC Director herself:

CDC Director: Covid vaccines can't prevent transmission anymore
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.msn.com%2Fen-us%2Fhealth%2Fmedical%2Fcdc-director-covid-vaccines-cant-prevent-transmission-anymore%2Far-AASDndg&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C8df6af80ffbd4f10176708d9f028795b%7C11d0e>>

CDC Director: Covid vaccines can't prevent transmission anymore

CDC Director Rochelle Walensky said in an interview on CNN that Covid-19 vaccines are no longer effective at pre...

So right there we have reduced the argument for vaccines for school students by half!!

Secondly, a number of medical experts, scientists and published studies have warned the covid

shots can reprogram your immune system to respond in a dysfunctional manner. A study posted on the preprint server medRxiv, May 6, 2021, found the Pzer/BioNTech COVID jab "reprograms both adaptive and innate immune responses," causing immune depletion.

While the jab "induced effective humoral and cellular immunity against several SARS-CoV-2 variants," the shot "also modulated the production of inflammatory cytokines by innate immune cells upon stimulation with both specific (SARS-CoV-2) and non-specific (viral, fungal and bacterial) stimuli."

People who were "fully vaccinated," having received two doses of the Pzer shot, also produced significantly less interferon upon stimulation, which hampers vitally important innate immune responses.

In other words, we're looking at a horrible tradeoff. You may get some protection against SARS-CoV-2 and its variants, but you're weakening your overall immune function, which opens the door wide to all sorts of other health problems, from bacterial, fungal and viral infections to cancer and autoimmunity.

The BNT162b2 mRNA vaccine against SARS-CoV-2 reprograms both adaptive and innate immune responses

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F>

<<https://s.yimg.com/nq/storm/assets/enhancrV2/23/logos/msn.png>>

mRNA inventor says young adults shouldn't have to get COVID vaccine

Dr. Robert Malone, inventor of mRNA technology that's used in the COVID vaccine, told Fox's Tucker Carlson that ...

Combine the threat to children's immune system and the evidence of deaths and injuries from the Covid 19 Vaccines and you have a very strong argument against mandating vaccines for school aged children.

The VAERS database shows over 23,000 deaths and 38,000 disabilities, 25,000 life threatening events, 121,000 hospitalized and 116,000 emergency room visits as of Jan. 7th, 2022, so these numbers will be even higher today!!

If parents want their children to get the vaccines, and take the associated risks, then that's their prerogative. But to mandate the rushed vaccines that have more deaths and injuries than all other vaccines in recorded history combined is illegal and immoral!!!

IF you do pass this mandate, there must be an exemptions for medical, philosophical and religious reasons.

I have personally heard from many parents that they will move out of Washington if you pass this unwarranted mandate, so I hope you do not vote to have the covid 19 vaccines on the school vaccine list!!

Sincerely
John Bristol

Hi,

I'm writing to request you say no to this insane proposal. It has no scientific ground at all. The vaccines do not stop infection and transmission, it has no long-term safety data and young kids are at extremely low risk of serious covid outcomes anyway. Why do you want to mandate something so novel for kids for a virus that basically is a flu for them? Plus the products were made against a strain that is basically not circulating any more. If you approve this, you are only speaking for the pharmaceutical companies, not for science or for the interest of kids' health and wellbeing.

I urge you to stop this nonsense, use common sense and look at actual scientific evidence.

To The Washington State Board of Health:

As a parent of 2 children in the Seattle School District I am asking that you make the vaccination of COVID 19 optional. There is still not enough research to show this is safe or effective and many of the kids have already had COVID and it doesn't impact them in a significant way nor do they spread COVID. If the Board decides to move forward with this many, many more parents will un-enroll their children in school. Last I checked we had 55,000 that un-enrolled this year in public school system.

Please do what is right and make the COVID 19 vaccine optional!

-Rachel

I have sat through all of the presentations and so far nothing presented about natural immunity by those recovered from Covid with or without the vaccine. Where is that? This has a very important role in your decisions today.

Do not pass this onto the kids! The parents will pull their kids out of the schools! Are you prepared for an Exodus of kids out the schools in greater numbers than this year?

☐ I believe most of you got involved with the school because you care about our children.

You are now failing them.

They watch adults mandating children to wear masks yet they themselves don't.

They watch adults tell them it's too dangerous for children to play sports, have dances, have more than one parent at a game or event yet they watch adults doing all of those things without masks.

They watch the constant flip flopping of the pathetic public health leaders who have taught them nothing about actual health.

They know that children are not affected by my this virus and have a 99.98% recovery rate (without intervention).

They see it all.

They know the masks don't work.

They are beginning to lose respect for those that should be setting an example for them.

And us parents are no longer going to stand by idly watching this charade. We all know that is exactly what it is.

It's time to drop the masks in school. And the time is now.

Greetings...

Issaquah, Bellevue, Lake WA School Districts, OSPI, WA State Education, WSBOH, and King County Commissioner.

You're behind the (global) ball with your cherry-picked science and Covid-19 decision making, namely around mask mandates. In recent news...

- * Kettle Falls School District (Washington State) moves to make masks optional effective immediately.

- * Washington State and Hawaii remain the only states requiring mask mandates for school aged children. In more recent news, D.C., Oregon, California, New Mexico, Illinois, Connecticut and New Jersey have drawn a line in the sand to protect our children.

- * Entire countries have revoked all Covid-19 restrictions including Sweden, Norway, Denmark, Switzerland – to name a few.

Single handedly you've lost the confidence of parents across Washington State in standing up for the health and safety of our children. We understand now, more than ever, your motivation to play into political theatre than truly following the science. We understand our children's health and safety is not your top priority when, again, using cherry-picked science to make critical decision.

Rest assured, what you have done is created mama and papa bear WARRIORS! We've never been more involved in our school districts, in our education system(s), our board of health and more. We're well-educated leaders, we're organized and we will see this change in Washington State – just like in Kettle Falls. What's more is we're teaching our children. They're going to be the next generation of patriots with a keen understanding of our God-given rights, Common Law, the U.S. Constitution and our Washington State Constitution.

Please, stand with us and remove mask mandates effective today.

Peacefully and respectfully,

Melissa

While vaccines have long been an important part of public health, I am concerned that it is too early to mandate covid vaccines for schoolchildren. Since these shots are so new, we do not yet have enough data on long-term safety and efficiency. The shots are still not fully FDA-approved for children 5-11. Some countries have decided not to approve these vaccines for children as they have concluded the risks outweigh the benefits. If these shots are mandated here, and subsequent data indicates that these countries were right, it could easily lead to widespread mistrust in all vaccines.

Sincerely,

R. L.

Subject: Covid shot fails to meet criteria #2

External Email

Dear Board of Health and TAG Members,

I have done extensive research and have found the following information from InformedChoiceWa.org. I will not take up your valuable time by sending you all 29 pages of their report. I will just send you part of what they have found. This is an excerpt from their letter addressing criteria #2.

"You are facing what may prove to be the most important decision you will ever face as a member of the board or a group, or perhaps in your life.

The mRNA and DNA COVID-19 shots are unlike any other vaccines given before. The global push for their uptake and the volume of reported adverse reactions and deaths following administration are unprecedented. The hundreds of thousands of medical and scientific professionals globally standing up and speaking out against the response to COVID and to the shots is unprecedented, as is censorship on scientific debate.....

The CDC acknowledges the shots do not prevent infection or transmission and that any protection afforded fades rapidly, yet they refuse to acknowledge the mountain of evidence of the superior safety and effectiveness of naturally-acquired immunity."

You as a board are required to find the Covid shot meets all 9 criteria. It does not meet Criteria #2.

"The vaccine containing this antigen is effective as measured by immunogenicity* and population-based prevention data in Washington State, as available.

*Immunogenicity means the ability of an antigen or vaccine to stimulate the body to produce an immune response. Vaccines often include antigens that stimulate an immune response to a particular disease but are not necessarily the same as the organism that would cause the disease.

In the clinical development of a vaccine, the effectiveness of the vaccine is studied using FDA-approved research protocols that evaluate whether a vaccine protects individuals from contracting the disease in population-based studies or generates an immunologic response (immunogenicity) comparable to vaccines that have been shown to be effective in preventing disease. More information about its population-based effectiveness is gained from large trials and community-based analyses after FDA approval. There may or may not be effectiveness data from Washington State, but the disease prevalence and incidence in the state should be sought and reviewed.

Do any of the COVID-19 shots fulfill this criterion? NO.

Immunogenicity: While the COVID-19 shots trigger the recipient's cells to create spike proteins, which then trigger an immune response and antibodies to the self-created spike proteins, this immune response has proven incapable of preventing infection or transmission. In short, the COVID shots do not prevent recipients from "contracting the disease." Some studies show recipients may be afforded a short window—a few weeks or months—during which their risk of infection or risk of severe disease is minimally reduced

in comparison to those without natural immunity, but even this protection appears to be dropping with each new variant.

This preprint study shows that PCR-positive tests for Delta variant occurred in a higher percentage of vaccinated individuals than in unvaccinated. From this it could be concluded that, regardless of vaccination status, all individuals are able to spread COVID-19 with similar viral loads. Riemersma et al., Shedding of Infectious SARS-CoV-2 despite vaccination. [https://www.infospirer.ch/wp-content/uploads/2021/10/210731-Wisconsin.Viral-Load .pdf](https://www.infospirer.ch/wp-content/uploads/2021/10/210731-Wisconsin.Viral-Load.pdf).

Dr. Rochelle Walensky states that the vaccine does not prevent infection or transmission of the Delta variant, CNN interview with Wolf Blitzer, July 27, 2021, <https://www.youtube.com/watch?v=TKFWGvvIVLI>

Another pre-print study, Acharya et al., No Significant Difference in Viral Load Between Vaccinated and Unvaccinated, Asymptomatic and Symptomatic Groups Infected with SARS-CoV-2 Delta Variant, "found no significant difference in cycle threshold values between vaccinated and unvaccinated, asymptomatic and symptomatic groups infected with SARS-CoV2 Delta." <https://www.medrxiv.org/content/10.1101/2021.09.28.21264262v1>.

The CDC reported that among the first U.S. cases of COVID-19 attributed to the Omicron variant, 79% of the 43 cases studied occurred in fully vaccinated individuals, including 14 who had received booster doses. SARS-CoV-2 B.1.1.529 (Omicron) Variant — United States, December 1–8, 2021, CDC MMWR, December 17, 2021, <https://www.cdc.gov/mmwr/volumes/70/wr/mm7050e1.htm>.

The criterion explicitly requires that "information about population-based effectiveness is gained from large trials," yet the clinical trial study on which the EUA was based for 5-11 included only 2,268 children total. CDC and ACIP acknowledged that the study was too small to find serious adverse reactions.....Evaluation of the BNT162b2 Covid-19 Vaccine in Children 5 to 11 Years of Age, N Engl J Med 2022; 386:35-46, DOI: 10.1056/NEJMoa2116298, <https://www.nejm.org/doi/full/10.1056/oa2116298>.

A pre-print study suggests that vaccine effectiveness wanes to negative effectiveness, therefore increasing chances of contracting COVID, after 90 days. The authors suggest a booster would be necessary in order to attain previous levels of protection. Do parents really want their child to get a booster every 90 days? Would this be practical or manageable? Hansen et al., Vaccine effectiveness against SARS-CoV-2 infection with the Omicron or Delta variants following a two-dose or booster BNT162b2 or mRNA-1273 vaccination series: A Danish cohort study, <https://www.medrxiv.org/content/10.1101/2021.12.20.21267966v3#p-5>

In contrast to the inability of the COVID shots to prevent disease, natural immunity has been found to prevent infection. This superior, broad protection will serve children well throughout their lives. "[C]hildren display a characteristically robust and sustained adaptive immune response against SARS-CoV-2 with substantial cross-reactivity against other hCoVs." Dowel, et al., Children develop robust and sustained cross-reactive spike-specific immune responses to SARS-CoV-2 infection, <https://www.nature.com/articles/s41590-021-01089-8>

In study after study, it has been shown that natural immunity far exceeds vaccine-induced immunity in length and quality. Please view the following studies here that show the superiority of natural immunity: "144 Research Studies Affirm Naturally Acquired Immunity to Covid-19: Documented, Linked and Quoted," Brownstone Institute, October 17, 2021. <https://brownstone.org/articles/79-research-studies-affirm-naturally-acquired-immunity-to-covid-19-documented-linked-and-quoted/>

Thank you for reading the information from InformedChoiceWA.org that I have sent to you. As you can see this shot fails criteria #2.

Sincerely,
Kathy Luplow

Subject: COVID-19 vaccine for children

External Email

As a mother of 3 school aged children, I strongly disagree with a vaccine mandate of the Covid-19 vaccine for children to attend school. I do not feel comfortable giving this to my kids at this time, as this is a new vaccine and not enough studies have been done. I do not find it necessary for kids to receive this vaccine as COVID-19 does not affected children the same as adults. I am in no way "anti vaccine" but I am against forcing my children to take an experimental vaccine for a disease that has little to no serious effects on children. If this mandate is put into place, I will be dis-enrolling my children from the public school system and I know I am not alone on this. My kids lives and education have been disrupted enough and have suffered irreversible emotional damage. Stop the mask mandates and NO to vaccine mandate! It is time to stop the virtual signaling and hypocrisy and put our children first!

Respectfully,
Kindra Etquibal

Board members,

I disagree with adding the Covid-19 shot for students. Studies have shown that Covid-19 does not affect most young children. There is also no published literature on pediatric Covid-19 vaccine effectiveness in K-12 school settings.

Respectfully,
Matt Yates.

Thank you for taking your time to hear our position on COVID vaccinations for children. Vaccines are not always wrong. Some vaccines have stopped diseases from destroying great populations. I have a few concerns with this COVID-19, however. Many of you remember how excited a good percentage of the population felt when it was reported that a vaccine had been created that could stop the spread of this relentless virus. We were all told (this was being addressed to adults only) that if a great percentage got the jab - one dose of the vaccine, the virus could be controlled and we could go back to life as we know it. Soon after we were encouraged to have a second dose for security. We all know what happened after that - Delta variant showed up and now we're told, a booster shot will do the trick. People will still get sick, though, but not as sick as without the jab. All of a sudden now there is pressure to also immunize children. How many times will they need to be jabbed to be protected given the fact this virus keeps mutating? So every time a new variant shows up, a new booster will be given? If we are not able to stop the virus with one shot and no one really knows the negative affect this might have on our children, five, ten years from now. Now we're saying to give our kids a shot every time a new variant shows up. Only time will tell. What about immunity? Hasn't that always been the best policy to end a pandemic? One thing is certain, studies have shown that while there have been children who have gotten sick with the virus, the numbers have been minimal. I suggest that you make it optional. If parents feel that their children are safer having been vaccinated, then fine. But don't require everyone to have to do it. Some parents would rather have left up to them to make that decision. Thank you.

Subject: Vote NO on Covid-19 Vaccine Mandate

External Email

Dear Washington State Board of Health Members,

Thank you for the opportunity to submit my comment.

People like you who have influence need to stand up and say enough is enough. These ongoing mandates are mentally and physically harming the children who you should be protecting. Everyone who continues to perpetuate this narrative will have this on their conscience forever but you can be that dissenting voice and help start turning things around, especially for our children.

I am vehemently opposed to adding the Covid19 vaccination to the schedule for children to attend school. I am not anti-vaccine, I am pro-choice. My children are fully vaccinated with all the standard vaccines on the schedule. However, if this one is included they will not be getting it and I will pull them out of school. These sort of things must remain an individual choice made by parents who have done their research, without any repercussions by the state or district if a student remains unvaccinated due to whatever reason it may be; naturally acquired immunity, religious and/or philosophical beliefs.

It's a known fact that this vaccine hasn't been proven to prevent transmission of Covid. It's absurd to consider adding it to the schedule with the information we have now. It really makes people question the real intentions and more so question the other vaccines as well. I Imagine it will make a lot of parents like me wake up.

In order to maintain the integrity and credibility of WSBOH, I implore you to vote no. More and more truths and revelations about this pandemic are coming out daily, showing how so much of what has already happened is unconstitutional and unethical. Don't be on the wrong side of history.

Thank you,
Stephanie Adams

9.

Do you have any special expertise relevant to this topic?

1. Yes

Being a parent, and a person who had COVID-19

10.

Are you testifying on a specific proposal under consideration by the board?

2. No

11.

Are you Pro or Con on the proposal?

2. Con

I do not in any way shape or form think that it is okay to FORCE or MANDATE a vaccine for anybody, ESPECIALLY children. Our kids should not be punished for not believing in the vaccine or punished for their parent's choice of protecting them against the vaccine. The lack of education some students will receive due to not being vaccinated is scary to think about. The amount of health conditions the vaccine is causing in our children is terrifying. I see that you are continuously looking at the AMOUNT of cases and positive tests, but why are we not diving into the cases and their symptoms. Our family had covid-19 and we are a household of 5. I was the only one who tested positive, and my children we assumed by the school to be positive, which they were not. As a person who tested positive I did not have many symptoms other than being exhausted a little earlier. Most children whom I personally know that are testing positive have very little symptoms, if any. In Spokane the majority of people whom I know that are vaccinated and tested positive have had much more severe symptoms, than the unvaccinated. Why is this? Thank you for considering my opinion. The vaccination should in NO way hinder a child's education, nor should it EVER be mandated for any human being. Jaymeson Ziegert

Tag Advisory Group

This is an emergency use vaccine. All testing is not complete. It won't be complete until 2023/2024. So despite all your slides and data, Criteria #4 can't be ethically accepted as acceptable level of side effects. It goes against the Nuremberg Code.

Currently there is NO published literature on pediatric Covid 19 Effectiveness K-12. However there is information on the Covid vaccine and the laundry list of vaccine injuries.

CDC Data shows as of 01/21/2022 1,071,856 reports of adverse events from all age groups. including 22,607 deaths and 178,994 serious injuries between December 14, 2020 and January 21, 2022. 35,000 of these reports are 5 -17 year olds. Data is released every Friday. All required vaccines put together don't even come close to these numbers. This is real data.

LEADING CAUSE of DEATHS

15-19 year olds SUICIDE #3 and Covid is at #7.

10-14 year old groups SUICIDE #2 Covid-19 is #11 and is also under Influenza. Flu shots are not mandate and the variant changes every year. This is a flu and it flu season.

5-9 year olds Covid is at the bottom side of the list at #12 not to mention the data is unreliable.

Lastly as a parent and resident of Washington State I do not agree with the State Board of Health adding this to the list of required list of vaccines in K-12 schools and childcare facilities. It has been proven they harm in an alarming rate. It does not prevent to illness and or spread of the virus. Masks do not work and/or the vaccine.

In your slide you see a jump in Covid 19 numbers 01/13/2022 - 01/27/2022 period. Note that the WIAA rules in place for high contact sports is test 3 times a week! This causes asymptomatic kids to be tested and some who have previously had Covid who would/could test false positive. This I know had to throw a spike into the data. I personally had a child who did have a false positive.....I know those were not reported or deducted for the slide. PCR test were not made or authorized for this use.

We should be talking all the time you are wasting on this matter and be working on suicide prevention and mental health. We should be talking about getting people healthy.

In our family we will remove our kids from the system if this is implemented. I know this may not mean anything until this is the majority decision throughout the state.

Please do the right thing.

Subject: Comments for the Immunizations Technical Advisory Group

External Email

Dear Board of Health/TAG,

I am commenting today on Washington state's consideration for mandated COVID 19 vaccinations for children in school. I am 100% opposed to such a decision. All data shows that COVID 19 is a low risk virus to children. We have personally experienced it as a mild cold for 3-4 days. We are a young healthy family and value our ability to determine our own healthcare. We trust our pediatrician and in all our children's healthcare have regular conversations about the health of our children and make appropriate decisions on issues that may come up. Parents are in charge of their child's care, not the state, especially in the case of a mild coronavirus.

Washington state has been very heavy handed in all it's responses to COVID 19. Our rates/numbers do not reflect any better response to this virus than states who were more open and allowed their citizens to make their own healthcare decisions. These vaccines have been pushed on us with a very poor public information campaign. Don't just tell us to get it, tell us why! Help us find the data so we can make our own informed decisions. So much is unknown for the long term affects for children. They are not even authorized by the FDA for kids under 16 yet other than for emergency use!

While the virus has some risk (very low) of health complications, so does the vaccine (also low). I have 3 healthy teenagers who have an increased risk of cardiac issues with getting the vaccine. While you may argue this is rare and typically mild, so are the risks for contracting COVID!

If this vaccine mandate is put in place it will create another level of hardship for families. Some will comply and give their children a vaccine they do not believe is safe or necessary, creating more distrust in our medical community. Others will not be willing to vaccinate their children and pull their kids out of school. Will they be able to manage homeschool? Haven't kids been through enough? Will private schools also be mandated? Parents sacrifice so much to have their children attend private schools and are grateful for this choice. Will the state take away that choice due to another unnecessary mandate?

We have friends and co-workers who have moved to Idaho, Iowa, Montana, and Tennessee in the last 6 months to get away from Washington state government. Please show a little trust in our ability to care for ourselves and allow us to decide if it right for us to wear a mask or vaccinate ourselves and our children.

NO VACCINE MANDATES!

Thank you,
Rebecca Smith

Subject: death jab for kids

External Email

If you all seriously think we will jab our kids for government indoctrination schools, you are sadly mistaken. Every single slide of "science" that you present, is invalid. It is invalid due to covid numbers have never been accurate first off, second, you get these "science" facts from WSU, which is payed by the government to lie to us anyway. The only thing this will do is close the schools due to no students. If thats your goal, then go for it. I for one will not ever vaccinate for something that has treatment, IT'S NOT NEEDED. I honestly have no idea why anyone would think a vax is a good idea for something that has a 98% survival rate. Not only that, it doesn't protect you from anything anyway.....WHAT'S THE POINT IN TAKING IT? You are on the losing end. Not us. The patriots will stand. I can show you "science" that contradicts every single number you have shown, due to the plandemic. I want you to ask yourself, why is washington so sick with covid? Because everyone followed the narrative. The Vax is causing the mutations and spread. Anyone with any sort of medical knowledge knows this. You all need to resign from your positions, I do believe non of you are or should be qualified to make a decision for everyone's health with fake data, killing kids, due to your negligence. I hope God gives you dreams of your judgment day, or that you live with the guilt of murdering innocent children EVERY SINGLE DAY OF THE REST OF YOUR LIFE. You need to look at data outside of washington state. Our numbers are always high because of the compliance.....nothing else. I will take my chances getting sick over a life long disease or death. The world is watching.....

Dear SBOH members,

Please provide your data and facts that you have stating that this vaccine PREVENTS the disease and REDUCES the risk of person to person transmission that is stated in criteria's 5 and 6 at the bottom of this email.

The CDC even states that the vaccine does not prevent people from getting the disease or reduces transmission. It may lessen some people's' symptoms and/or may keep some people out of the hospital if they contract COVID, but it is not necessary for children who are basically unaffected by either. This vaccine has known side effects and is not a one size fit all. Also, take note that the vaccine is for the original variant and not for the current or future variants.

Where there are risks, there should be a choice. I hope you take this into consideration during the meeting. America is the land of the free and parents should have the freedom to make medical decisions for their children.

Thank you,
Jennifer Edington

Please vote NO on adding the Covid-19 vaccine to the required immunization list for child care and school entry. As everyone should be aware of by now, the Covid-19 vaccine does not prevent a person from catching or spreading the virus. With that knowledge in hand, there is no justification to mandate the vaccine for child care and school entry.

Thank you,
Scott Miller

Subject: RE: TAG meeting yesterday Feb. 10

CAUTION:External email.

Hello,

The TAG held their first meeting to review the COVID19 vaccine against the nine established criteria

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsboh.wa.gov%2FPortals%2F7%2F>
last week. Last week's meeting focused on reviewing and discussing Criteria 5 and 6. The
TAG did vote, as they will for all, on those two criteria last week.

Criteria 5 is under the category criteria of disease burden. Members discussed whether the vaccine containing the antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population. The TAG members voted that the criterion was met.

Criteria 6 is under the category criteria of disease burden. Members discussed if vaccinating against the disease reduces the risk of person-to-person transmission, with transmission in a school or childcare setting or activity being given the highest priority. A majority of TAG members voted that the criterion was met, but some members indicated uncertainty and noted that more evidence was needed.

More information on last week's TAG meeting is available on the Board's website

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsboh.wa.gov%2FNews%2FArticles%2FTAG-Meeting-Recap&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C9dec242b85114626d95e08d9efec2058%7C11d>
and meeting summary notes will be posted when available.

Subject: Comments and Questions for the TAG

External Email

My observations that I expect the WSBOH to address directly to me are:

1. The TAG group is not diverse enough. It is not inclusive of all Washington State constituents. I do not see anyone representing parents. I do not see anyone with a perspective on natural immunity. I do not see anyone with background/experience in pre-covid treatment protocols/alternatives. It is simply not acceptable to have an advisory group that does not include opposing views and a multi-background make up.
2. The TAG group has not considered "best practices" for risk reduction of adverse effects including looking at other states and countries. European countries are adopting a "no vax" for children policy. That should be considered here – we should take a "no vax" unless absolutely necessary approach.
3. The TAG group has not included any consideration of long term affects – and they should take the position – until we have the long term studies, vax should not be required by default. Then only if there is overwhelming evidence of vax efficacy and safety should they be considered.
4. The TAG group has not looked at the VAERS data in a meaningful way. By that I mean adopting a "no harm" policy. There is no acceptable risk of forced vaccination for the children.
5. The TAG group has not looked at an approach where the schools would have the children whose parents choose mandatory vax to have those children attend remotely. Do not force medical procedures that lack long term testing on others, or discriminate against those who choose caution and informed consent as a condition of attending school.

I am beyond angry that covid vaccines for kids are even being considered to enter school. With no studies on long-term side effects of these basically experimental vaccines, the risk to children and especially young teenage boys is far greater than covid. Besides that, children have an almost 100% chance of recovery from Covid. This is not a childhood disease! I can tell you with absolute certainty there is NO WAY my healthy teenage son is ever getting another one of these Covid vaccines.

For the record, I am strongly against the COVID vaccine mandate for children in public schools in Washington. In fact. I am again any sort of mandate that supports showing a vaccination card to get into a restaurant, event or public place of any sort.

Parents are the only ones who have the right to decide what, if any, vaccines a parent gives their child.

Dear Board members,

Keith Grellner Chair
Tom Pendergrass Vice Chair
Elisabeth L Crawford
Temple Lentz
Patty Hayes
Fran Bessermin
Bob Lutz
Umair A. Shah, MD, MPH

I am asking you today to consider real PEER reviewed studies to educate yourself how dangerous this 'vaccine' is to children who do NOT need the 'vaccine' as they have a 99.999% chance of survival. If you have followed the CDC and FDA then I am sure you are very well aware by now that the previously reported 'covid virus' cases/illnesses/death were deliberately inflated to create fear amongst the population. I am also sure you are aware that the public has educated themselves and will not allow for you to harm the children! We WILL pull our children out of the public school system if you force vaccination which is against the constitution. The US president cannot mandate this 'vaccine', neither will you. I understand that you are forced to follow your kings orders but he, along with you, will be held accountable for the crimes against humanity that you are about to commit if you force this worthless jab. It has been proven all over the world now that this jab is not protecting anybody, instead has caused more illnesses and death amongst the 'vaccinated' ones. How do you sleep at night knowing that you are willing sending innocent children to the slaughterhouses? Shame on you!!

#5 The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population. FACT: Peer reviews have shown that this 'vaccine' is NOT preventing the disease, is NOT stopping the spread and is NOT keeping you out of the hospital. The majority in the hospitals are the ones that are 'vaccinated'. There is a good reason why so many doctors and nurses rather get fired then getting this toxic jab

#6 Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting or activity being given the highest priority. FACT: AGAIN, the jab does NOT reduce the risk of transmission, peer reviews have proven this. I am talking PEER reviews, not the fake 'fact' documents where your numbers have been manipulated. 99.999% of the children are NOT effected by this virus and you willingly wanting to poison all of these kids to 'protect' 0.001% of kids is criminal.

Perhaps you should look at CDC's VAERS report and see that this jab has killed more people then all of the new medicines combined launched against the public in the last 20 years! Keep in mind that maybe 1% of the death and side effects are actually reported - add this to your notes. On top of this the CDC had to make a correction in the deaths reported over the last 2 years! 5% to 6% of the reported 'covid' death were actually folks that passed away from this 'virus'flu'. Not the fake numbers the fear-mongers produced. In addition, in case you have not heard or prefer to ignore - your PCR test is beyond

faulty as it is NOT capable of detecting the virus. So all these cases you reported - are incorrect. To this date you have NOT been able to even isolate said 'virus'! The best you came up with is 2 flu strains!

With all of this said -

Hands off of our children! Hands off of our health! No more mandates, no forced jab, no more masks like most of America already enjoys or prepare yourselves for massive lawsuits that will be placed against you personally. I will be attending this call and take notes

Subject: Disagree with covid vaccine mandates for school entry.

External Email

Dear board members,

I noticed you are considering to mandate kids covid-19 vaccine for school entry. As a mom with medical background, I strongly disagree your propose from safety concerns, especially if the health benefits and risks remain unclear.

Children are not little adults with the same immune systems responded to covid vaccine.

When making public decisions for children, potential risks and serious adverse reactions for covid vaccine must be factored. There is a proved case from a 12-year-old girl,

Maddie De Garay, who is suffering extreme reactions and nearly dying after Pfizer vaccines. <https://trialsitenews.com/mother-of-maddie-de-garay-speaks-out-about-her-13-year-old-daughters-life-altering-injuries-from-pfizers-covid-vaccine/>

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ftrialsitenews.com%2Fmother-of-maddie-de-garay-speaks-out-about-her-13-year-old-daughters-life-altering-injuries-from-pfizers-covid-](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ftrialsitenews.com%2Fmother-of-maddie-de-garay-speaks-out-about-her-13-year-old-daughters-life-altering-injuries-from-pfizers-covid-vaccine%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ce1935d876df14289a52a08d9ed974154%7C1)

[vaccine%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ce1935d876df14289a52a08d9ed974154%7C1](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ftrialsitenews.com%2Fmother-of-maddie-de-garay-speaks-out-about-her-13-year-old-daughters-life-altering-injuries-from-pfizers-covid-vaccine%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ce1935d876df14289a52a08d9ed974154%7C1)

. Researchers have demonstrated Myocarditis and other types of heart inflammation are associated with covid vaccine, nevertheless future autoimmune diseases triggered by post-covid vaccination. Professor Wei Shen Lim, chairman of JCVI, stated that" the margin of benefit is considered too small to support universal covid vaccination for this age of group."

Authorizing Covid vaccine requirement is not necessarily applicable to children, the vast majority have little symptoms and mild illness. As parents, we carry the burden of living with long life effects of decisions for my child. I oppose your consideration of adding covid vaccine for school entry.

Sincerely,

Ye

Subject: St. Patrick Catholic School - Parent Feedback

External Email

Dear Mr. Ford, the Administration of St. Patrick's, the Seattle Archdiocese, and the WA State Board of Health,

I am writing today on behalf of my student, as well as several concerned St. Patrick's families who have reached out to me directly after the St. Patrick's parents group was turned off because of polite discussion about the ongoing mask requirement at school. I am imploring you to stand up for our children's health and well-being and take a stand against the mask mandates. The Seattle Archdiocese represents a well-respected number of facilities, students, and families across Western Washington. You have the ability to show the residents of Washington State that you are an organization that puts their student's safety first, not politics, like the Baltimore Archdiocese is doing <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.baltimoresun.com%2Feducation/md-school-masking-20220211-20220211-w62eycynu5fybgztpujemsuwga-story.html%3Ffbclid%3DIwAR1xe8ncPOmITYxyAOFAkx7IDyI7ycxmek4TocY5sUR2ia9XBBVvkKTY8u4&data=>!>

It is our understanding that the current mask requirements were adopted by the Seattle Archdiocese last fall at the suggestion of the Washington State Board of Health. Since that time, innumerable studies have been published across the world on all aspects COVID-19, from the inherent risk factors & most impacted age cohorts, the efficacy and side-effects of pharmaceutical preventions, early treatment protocols and non-medicinal mitigation strategies such as masking and school shutdowns. Yet with new scientific evidence, there has been no update to the masking protocols and mitigation strategies in schools across our state.

A little about me – no – I'm not a "COVID denier" that many believe those asking for choice in masking are! In fact, our family began watching very closely what was happening in China in December of 2019, when it was just a conspiracy and nothing to worry about. By late-January, I was one of the "crazy people" doing my grocery shopping in an N95 mask and gloves. At that time our 3 children all attended public school, and we made the decision to stop sending the kids to school 2-weeks prior to the official shut-down. And who doesn't remember wiping down groceries and mail with sanitizing wipes, or simply leaving things outside for days before allowing them into our houses! We chuckle about all of that now, but it important to reflect on. Why did we do all of that?

Simply put, inn March of 2020, there was quite literally nothing known about this new

illness everyone was calling COVID-19. Was it transmitted by touch, airborne droplets like the flu, or truly aerosolized? Could it survive on surfaces? Who were the most at risk for hospitalization and death? We knew nothing. So, we took what are now known to be silly, and in some cases drastically damaging, measures. We call them lessons learned. However, what we've learned is not being put in to practice through policy change. Instead, we are continuing with measures science has proven are causing more harm than good!

We understand now what ages and comorbidities are at the highest risk. We know how to treat COVID at home, and what simple, proactive steps everyone can take to prevent serious illness. Doctors know how to treat serious cases in hospital, and what treatments to avoid. Large percentages of people now carry natural immunity, and vaccines are available to those who choose to take them. And, most importantly, we know that our children, thank God, are the absolute lowest risk cohort. Yet those children have unfairly borne the brunt of mandates in the cruelest of ways under the guise of safety.

It is common knowledge that the cloth and surgical masks worn by students do not prevent the transmission of viruses. That is how my son was able to contract COVID while at school! That's also the very reason there was not a single N95 available to purchase in April 2020! At their largest measurement (0.3 microns), 250 aerosolized COVID viruses can fit inside the average human hair. Now consider those gaping holes in the sides of the student's surgical and cloth masks as you welcome them to school.

Even the CDC's own study, and associated infographic, "proving" masking efficacy has an asterisk noting the protection offered by cloth masks was "not statistically significant." Only N95s prove any amount of statistically significant results. CDC - Mask Effectiveness Indoors

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fmmwr%2Fvolu>

Another CDC resource clearly states that the filtration of masks "Does NOT provided the wearer with a reliable level of protection from inhaling smaller airborne particles and is not considered respiratory protection." CDC – Masks vs. Respirators

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fniosh%2Fnpptl%508.pdf&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C1ce8666fcb6141ca876808d9f0a39b38%7C1>

The ACGIH, a non-profit of occupational and environmental health and sciences experts, has compiled the results of much of their research regarding how to protect workers during the COVID pandemic into an infographic for employers. Even when both parties are wearing cloth or surgical masks correctly, the amount of protection offered is only 27 minutes and 60 minutes, respectively. How does that very limited amount of protection justify the mental and emotional consequences of masking students? COVID-19 Worker Safety - Masks

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.acgih.org%2F covid-19-fact-sheet-worker-resp%2F&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C1ce8666fcb6141ca876808d9f0a39b38%7C1>

It is also for this reason that whenever you purchase surgical masks, you find on all of the packaging warnings that state they are non-medical and/or do not prevent illness. (For example, I clicked on the first link on an Amazon search for "surgical masks" and right in the description it says are non-medical. Amazon Surgical Mask

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsmile.amazon.com%2FHDFK-Disposable-Protective-Breathable-Non-Woven%2Fd%2FB088YJCQ7Z%2Fref%3Dsr_1_2_sspa%3Fcrd%3DX903K75VJ277%26keywords%3Dsurg2-spons%26psc%3D1%26spLa%3DZW5jcnlwdGVkUXVhbGlmaWVyPUEyUUFFNTVISFRGQVBGJmVuY3J5cHRIZ

) It is widely known that masks do not prevent the passage of particles as small as aerosolized viruses.

One of the pre-eminent experts on PPE and industrial exposure in the U.S. is Stephen Petty. He advises large industrial companies on Industrial Hygiene (aka, worker safety) and testifies as a subject matter expert on class-action lawsuits, like that of Monsanto, regarding industrial PPE protocols - such as with dangerous chemicals - when inhaled particulate is life or death every day. In the presentation linked below he covers COVID specifically. While I'm sure you are receiving many messages like mine full of links and references, I cannot urge you enough to take the time to watch this video presentation. In his world where PPE actually needs to protect, masks are not even considered an option, nor is facial hair! Stephen Petty - On PPE and Aerosols

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.youtube.com%2Fwatch%3Fv=JL4yoUssHhJesfGpD1rYOwYams2Pfs93XuEoBE-HrzrKWpfyVjWS0&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C1ce8666fcb6141ca876808d9f0a39b38%70>

Included in this next link is over 150 mask studies with conclusions, in part, against the effectiveness of masks due to a variety of variables. I found while doing my own researching that resources providing a lot of information in one place was very helpful.

150+ Comparative Studies and Articles on Masks

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fbrownstone.org%2Farticles%2Fmore-than-150-comparative-studies-and-articles-on-mask-ineffectiveness-and-harms%2F&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C1ce8666fcb6141ca876808d9f0a39b38%70>

Lastly, on the science of whether masks work, I would challenge that after 2-years of continual and aggressive research, study, and retrospective review throughout the world, one should expect to see clear, overwhelming, and consistent data from the scientific community proving without a shadow of a doubt that masks provide a strong level of protection. That data simply doesn't exist.

Here's where common sense can help to fill in the blanks. Masking in schools is not widespread across the country. Only 15 states have previously had mandatory masking in schools, though that number is reducing by the day. IF masking students really is the lynchpin that has kept our state's elderly and high-risk population safe and we simply cannot do without it, how is it there isn't overwhelming hospitalization and death of the elderly and high-risk in the 35 states who didn't mask students?

All masking science aside, in my opinion the most important topic to consider is the how masking and the subsequent enforcement of masking is having on our children. There is a steady outpouring of data showing negative consequences for our children, from faltering to outright failing test scores, startlingly high rates of referral to speech therapy in young learners, massive increases in anxiety, self-harm and depression among adolescents and teens, and a basic lack of excitement and connection to school communities. The Educational Consequences of Masking Children

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nationalreview.com%2F2022/02/22/educational-consequences-of-masking-children%2F%3Ffbclid%3DIwAR0E9-jL4yoUssHhJesfGpD1rYOwYams2Pfs93XuEoBE-HrzrKWpfyVjWS0&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C1ce8666fcb6141ca876808d9f0a39b38%70>

However, I don't think that linking study after study is needed to make this point. You are professional educators, and you know children! You know how they learn, and how they grow. You know how they respond to a smile. You know how they watch a teacher's mouth move when they are reading aloud, or when hearing a new word. You know how children instinctively see another child's frown and respond with kindness. Or how they see another child's smile and return it with a smile of their own. Or how children see someone react poorly to an unkind word they said, so they apologize, realizing the impact of their words on others. Without seeing that frown, they cannot know that

impact. These little connections and the learning of social queues are truly the work of childhood, and that has been taken from them. Think back to your favorite teacher as a child – then imagine not knowing what that teacher looks like without a mask on!

And what about the students who are not okay, and who are blending in and disappearing into a sea of masks? What about the children who have anxiety? What about the students who are embarrassed to ask for help, or feel left out? Without seeing the emotions on their faces, how can we be sure they aren't slipping through the cracks?

The data says they are. JAMA Pediatrics – Mental Health & Wellbeing

We have also taken our most innocent and easily influenced segment of the population, and over the last two years taught them that they should fear the air around them. They should fear their own breath. If they take their mask off, they could be responsible for infecting someone who dies. Or that their good friends or classmates could get them sick. Instead, they must keep their face hidden, not speak during lunchtime, and don't get too close to one another because that's just too risky and unsafe. This is not okay!

I'm a Public School Teacher. The Kids Aren't Alright.

Though we are a new family to St. Pats, my father & his family all matriculated through parochial school, so many of the teachings we are seeing resonate deeply in my heart, including the fostering of strong community bonds. But that community collapses without smiles in the hallways, with parents unable to meet and know one another at events, without the hugs over a scraped knee on the playground, without the sarcastic smirks of middle school, and without the ability see someone's frown and help to make them smile.

The Strength of Weak Ties

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cse.wustl.edu%2F~m.neuma>

The residents of this state, and specifically the parents of school age students, have been understanding of restrictions, and, more recently, patient in waiting for policies to be adjusted in response to the data. But as the data continues to build against mask mandates with no changes to policy, we are asking you to push back on behalf of the health and education of our children.

We teach our kids to follow their morals, to do what's right even when it's hard, and to respectfully disagree when necessary. Now is the time for the school administration, and the leadership at the Seattle Archdiocese, to recognize that our children need us to stand up for them. It's time to respectfully disagree and stand up for what is right on behalf of the students in your care.

We are asking you to do better for our children.

We are asking you to do better for our communities.

We are asking you to do better.

Thank you for your time and thoughtful consideration,

Dani Kessler, 253-459-2449

P.S. And please – take the time to watch the Stephen Petty video on PPE linked above.
It's worth all 26 minutes.

Dear Mr. Ford, the Administration of St. Patrick's, the Seattle Archdiocese, and the WA State Board of Health,

I am writing today on behalf of my student, as well as several concerned St. Patrick's families who have reached out to me directly after the St. Patrick's parents group was turned off because of polite discussion about the ongoing mask requirement at school. I am imploring you to stand up for our children's health and well-being and take a stand against the mask mandates. The Seattle Archdiocese represents a well-respected number of facilities, students, and families across Western Washington. You have the ability to show the residents of Washington State that you are an organization that puts their student's safety first, not politics, like the [Baltimore Archdiocese is doing!](#)

It is our understanding that the current mask requirements were adopted by the Seattle Archdiocese last fall at the suggestion of the Washington State Board of Health. Since that time, innumerable studies have been published across the world on all aspects COVID-19, from the inherent risk factors & most impacted age cohorts, the efficacy and side-effects of pharmaceutical preventions, early treatment protocols and non-medicinal mitigation strategies such as masking and school shutdowns. Yet with new scientific evidence, there has been no update to the masking protocols and mitigation strategies in schools across our state.

A little about me – no – I'm not a "COVID denier" that many believe those asking for choice in masking are! In fact, our family began watching very closely what was happening in China in December of 2019, when it was just a conspiracy and nothing to worry about. By late-January, I was one of the "crazy people" doing my grocery shopping in an N95 mask and gloves. At that time our 3 children all attended public school, and we made the decision to stop sending the kids to school 2-weeks prior to the official shut-down. And who doesn't remember wiping down groceries and mail with sanitizing wipes, or simply leaving things outside for days before allowing them into our houses! We chuckle about all of that now, but it important to reflect on. Why did we do all of that?

Simply put, in March of 2020, there was quite literally nothing known about this new illness everyone was calling COVID-19. Was it transmitted by touch, airborne droplets like the flu, or truly aerosolized? Could it survive on surfaces? Who were the most at risk for hospitalization and death? We knew nothing. So, we took what are now known to be silly, and in some cases drastically damaging, measures. We call them lessons learned. However, what we've learned is not being put in to practice through policy change. Instead, we are continuing with measures science has proven are causing more harm than good!

We understand now what ages and comorbidities are at the highest risk. We know how to treat COVID at home, and what simple, proactive steps everyone can take to prevent serious illness. Doctors know how to treat serious cases in hospital, and what treatments to avoid. Large percentages of people now carry natural immunity, and vaccines are available to those who choose to take them. And, most importantly, we know that our children, thank God, are the absolute lowest risk cohort. Yet those children have unfairly borne the brunt of mandates in the cruelest of ways under the guise of safety.

It is common knowledge that the cloth and surgical masks worn by students do not prevent the transmission of viruses. That is how my son was able to contract COVID while at school! That's also the very reason there was not a single N95 available to purchase in April 2020! At their largest measurement (0.3 microns), 250 aerosolized COVID viruses can fit inside the average human hair. Now consider those gaping holes in the sides of the student's surgical and cloth masks as you welcome them to school.

Even the CDC's own study, and associated infographic, "proving" masking efficacy has an asterisk noting the protection offered by cloth masks was "not statistically significant." Only N95s prove any amount of statistically significant results. [CDC - Mask Effectiveness Indoors](#)

Another CDC resource clearly states that the filtration of masks “Does NOT provided the wearer with a reliable level of protection from inhaling smaller airborne particles and is not considered respiratory protection.” [CDC – Masks vs. Respirators](#)

The ACGIH, a non-profit of occupational and environmental health and sciences experts, has compiled the results of much of their research regarding how to protect workers during the COVID pandemic into an infographic for employers. Even when both parties are wearing cloth or surgical masks *correctly*, the amount of protection offered is only 27 minutes and 60 minutes, respectively. How does that very limited amount of protection justify the mental and emotional consequences of masking students? [COVID-19 Worker Safety - Masks](#)

It is also for this reason that whenever you purchase surgical masks, you find on all of the packaging warnings that state they are non-medical and/or do not prevent illness. (For example, I clicked on the first link on an Amazon search for “surgical masks” and right in the description it says are non-medical. [Amazon Surgical Mask](#)) It is widely known that masks do not prevent the passage of particles as small as aerosolized viruses.

One of the pre-eminent experts on PPE and industrial exposure in the U.S. is Stephen Petty. He advises large industrial companies on Industrial Hygiene (aka, worker safety) and testifies as a subject matter expert on class-action lawsuits, like that of Monsanto, regarding industrial PPE protocols - such as with dangerous chemicals – when inhaled particulate is life or death every day. In the presentation linked below he covers COVID specifically. While I’m sure you are receiving many messages like mine full of links and references, I cannot urge you enough to take the time to watch this video presentation. In his world where PPE actually needs to protect, masks are not even considered an option, nor is facial hair! [Stephen Petty - On PPE and Aerosols](#)

Included in this next link is over 150 mask studies with conclusions, in part, against the effectiveness of masks due to a variety of variables. I found while doing my own researching that resources providing a lot of information in one place was very helpful. [150+ Comparative Studies and Articles on Masks](#)

Lastly, on the science of whether masks work, I would challenge that after 2-years of continual and aggressive research, study, and retrospective review throughout the world, one should expect to see clear, overwhelming, and consistent data from the scientific community proving without a shadow of a doubt that masks provide a strong level of protection. That data simply doesn’t exist.

Here’s where common sense can help to fill in the blanks. Masking in schools is not widespread across the country. Only 15 states have previously had mandatory masking in schools, though that number is reducing by the day. IF masking students really is the lynchpin that has kept our state’s elderly and high-risk population safe and we simply cannot do without it, how is it there isn’t overwhelming hospitalization and death of the elderly and high-risk in the 35 states who didn’t mask students?

All masking science aside, in my opinion the most important topic to consider is the how masking and *the subsequent enforcement of masking* is having on our children. There is a steady outpouring of data showing negative consequences for our children, from faltering to outright failing test scores, startlingly high rates of referral to speech therapy in young learners, massive increases in anxiety, self-harm and depression among adolescents and teens, and a basic lack of excitement and connection to school communities. [The Educational Consequences of Masking Children](#)

However, I don’t think that linking study after study is needed to make this point. You are professional educators, and you know children! You know how they learn, and how they grow. You know how they respond to a smile. You know how they watch a teacher’s mouth move when they are reading aloud, or when hearing a new word. You know how children instinctively see another child’s frown and respond with kindness. Or how they see another child’s smile and return it with a smile of their own. Or how children see someone react poorly to an unkind word

they said, so they apologize, realizing the impact of their words on others. Without seeing that frown, they cannot know that impact. These little connections and the learning of social queues are truly the work of childhood, and that has been taken from them. Think back to your favorite teacher as a child – then imagine not knowing what that teacher looks like without a mask on!

And what about the students who are not okay, and who are blending in and disappearing into a sea of masks? What about the children who have anxiety? What about the students who are embarrassed to ask for help, or feel left out? Without seeing the emotions on their faces, how can we be sure they aren't slipping through the cracks? The data says they are. [JAMA Pediatrics – Mental Health & Wellbeing](#)

We have also taken our most innocent and easily influenced segment of the population, and over the last two years taught them that they should fear the air around them. They should fear their own breath. If they take their mask off, they could be responsible for infecting someone who dies. Or that their good friends or classmates could get them sick. Instead, they must keep their face hidden, not speak during lunchtime, and don't get too close to one another because that's just too risky and unsafe. This is not okay!

External Email

You people are absolute low-lives!

How dare you don't even bring in anybody to speak AGAINST this poison you try to inject into our kids!

How dare you talk about all these cases when it has been proven that the PCR test is beyond faulty, hence you were told you can no longer use it as of 12/31/21! All of your "data" is full of misinformation and you will make a decision off of this garbage?

How dare you talk about these "variants" when - to this date - you can't even isolate the virus itself! The best you can come up with is 2 flu strains! Has anybody in this group ever asked a REAL doctor how they determine what "variant" is currently pushed? Clearly not because you would know then that there is NO such test!

I don't care what your king inslee is demanding - you personally all will be held accountable for crimes against humanity if you push this garbage on us and our children. You people are despicable!

Subject: Do NOT include the COVID vaccine

External Email

To whom it may concern,

I am writing to strongly encourage you to NOT include the COVID vaccine as a requirement for students K-12. Currently there is no published literature on pediatric Covid-19 vaccine effectiveness in K-12 school setting. This vaccine is still an experimental inoculation and is proving to have way worse adverse reactions than to actually get COVID itself.

Covid-19 is far down the list of causes of death for Washington children. Requiring this experimental vaccine will only hurt students and the educational system more and after the last 2 years there shouldn't be any further detrimental decisions made.

Please, please do NOT add this experimental vaccine to the already overloaded inoculation schedule.

Thank you,

Megan Cordova

Subject: Oppose - Adding Covid Vaccine to Required Vaccinations

External Email

I am writing the Board to let you know that I fully OPPOSE adding the Covid vaccine to the list of required vaccines to attend public school.

There is no evidence that the vaccine is either effective or necessary for school age children. This is an experimental vaccine that provides no liability for adverse effects for our children. The official studies will not be completed until 2025, so it would be harmful for you to require an experimental vaccine.

The infection rates among children are very low and the risk of harm from the vaccine is actually higher than the risk of harm from Covid.

I will not be sending my children to public schools if you make this a requirement. I will be homeschooling or using private schools, or if necessary, we will be moving.

This makes no sense at all to even be talking about this.

Get back to teaching our children reading, writing and arithmetic! Our children needs the basics, and they need a school system that focuses only on that.

External Email

The BOH said they weren't planing on adding a non fda approved treatment to the school aged kids. This is a violation of human rights and needs to stop! It seems the board lied to the thousands of Washingtonians last month in the meeting. If you add this EUA vaccine treatments to school immunization list, you are asking for more uprising, anger, and chaos. You are asking every parent to let our government experiment on their kids. Parents are pulling their kids out of public school because it's full of sick teachings, trans rape, and mental abuse. There is no need for a covid vaccine at this point, and the fact you are medical advisors pushing this, Says a lot about you! Either your really bad a your job, or you are receiving money, gifts, or jobs for your recommendation. States and countries across the world have realized you have run covid into the ground. We are done with your stupidity and greedy hands in our lives. We are done, we will not comply today, tomorrow, any time, ever again. You abused you position and no one trust doctors, nurses, DOH, BOH, any politicians anymore. You destroyed any credibility you ever had. Straighten up!

Subject: Against Forced Covid vaccine for Children

External Email

I, Heather Kovacs, do NOT Consent to adding Covid-19 vaccines into Chapter 246-105 WAC due to the following reasons:

- 1) We The People do not consent to experimental drugs.
- 2) The Gene altering technology has not had enough long term studies for adverse reactions, and or long term side effects.
- 3) According to the new scientific data coming out, the vaccines have been more harmful to the people rather than helpful.

In conclusion, until the covid-19 vaccines have been PROVEN and documented to be safe and effective, I do NOT consent to the revision of WAC 246-105.

Subject: Comments for Dr. Lofgren's Power Point presentation for the Immunizations Technical Advisory Group

External Email

Dear Board of Health,

We, the citizens you serve, ask that you please seek truth. Please go to the sources that these professionals have used for presenting their data, read those studies, be informed and seek truth before voting. Do not vote only based on the information you are told by these professionals. I have started scrutinizing the first Power Point Presentation, Dr. Lofgren's and I have found the discrepancies below. Please feel free to forward these to Dr. Lofgren to hear his explanation. This is not an exhaustive list, please do this important homework ahead of time so you are prepared for good questions for these presenters, given that there will be no public hearing, YOU are our representatives. This is an important matter you have in your hands, please seek truth, and do not let your voting be based on fear.

Concerns:

Slide 8 says much of the science for Covid-19 is fast moving due to different variants, which supports the fact that the current vaccines available might prove inefficient or not efficient enough with future variants. The same slide says that omicron is milder, which supports the notion that a vaccine for a mild disease in children is unnecessary. This same slide says that omicron is causing considerably more cases in children. But the decision you are voting on today, cannot be based on current covid cases. In a week or two the data might show that covid cases in children are negligible. You can't vote for a vaccine mandate on such volatile data.

Slide 10 says "Hospitalizations are increasing in WA in all age groups." Again, that was when the power point was prepared. As of today, hospitalizations across WA have dropped significantly since last week and very likely will continue to drop in the next few weeks. If anything, children are acquiring immunity due to natural infection and will likely be protected from the disease altogether or be prepared for an even milder infection in the future.

Slide 11: This chart is misleading. This chart shows children covid cases in the last 7 days (when we are still in the midst of heavy covid testing and just coming down from the latest covid wave) and comparing those numbers with child flu and RSV data from 2019 is comparing oranges to apples! How many children with the flu or cold symptoms went to go GET TESTED for the flu or for the common cold in 2019? We didn't have flu testing facilities all over the state back in 2019. This is misleading data and I would be wary of

this and further data presented in this power point.

Slide 12 second bullet cites a study by Wanga et al. (<https://www.cdc.gov/mmwr/volumes/70/wr/mm705152a3.htm>) That same study showed that a significant amount of the children hospitalized had either co-infection with other diseases or were obese. This same study believes in recommending a vaccine particularly for children with obesity and other underlying health conditions. Dr. Lofgren should have mentioned this important piece of information which was the focus of that study he mentions. He rather has picked only the data that shows that those vulnerable children were hospitalized and some ventilator, while omitting their specific vulnerability. This is hiding truth. The goal of his presentation should be to present the full truth and not to present data that can lead to manipulation through fear.

I do not have time to check all the sources he or other experts are citing in his power point presentation but I ask that you please do. Data can be presented in way that seek a particular outcome, please seek the truth. It is an important job you have right now. Many lives will be affected by your decisions. Families should have the ultimate say in the health decisions of their members in conversation with their doctor. It is not the role of the government to mandate this. If after all, you believe that vaccines are indeed beneficial, families will we gladly welcome your recommendation, but it should be finally our choice. If someone is really concerned with catching covid at school, a vaccination mandate will only bring a false sense of security, since the vaccine efficacy wanes significantly over time.

Thank you for your time reading this email, and please, scrutinize every power point, data and study you are being presented to make a good voting decision.

Thank you!

Mirel Schultz

Mandatory vaccination should not be allowed for COVID-19. It is an emergency use vaccination that has had mild to extreme complications including, longer more painful periods, blood clots, nerve damage, and death. We have had severe illness and death from the few members in our family who did take the risk and get vaccinated for COVID-19. One has nerve damage at the injection site, one of them developed severe blood clots in her lungs and was hospitalized. The other died of a massive heart attack within six months of his last shot and had no heart issues prior. I will not gamble with my life or my families' lives. I ask you not to make a decision requiring vaccination. Each family should be allowed to make on their own decision, without coercion or force. We have a more vested interest in preserving our children's lives than you do. Let us do our jobs.

DO NOT make this drug mandatory. It's experimental and long term effects are not known on children. When they won't even tell you what's in it I don't know how you can make it mandatory unless you folks want to be held responsible for adverse reactions to kids.

There is no science that supports these children should have this drug.

Hello All,

Please find attached a screen shot of the most recent CDC VAERS data regarding the Covid-19 vaccinations. You will see over 23,000 deaths and well over 1 million total injuries have been reported from these vaccines. You need to stop what you are doing until VAERS can be investigated and verified. Please keep in mind that by 1986 law, all adverse events have to be reported to the VAERS system. Also, keep in mind that it is a criminal offense to make a false report to the VAERS system.

Now that you are aware, you need to stop what you are doing! How many must die from these vaccines before you stop your push to vaccinating everyone with this poison?
Leave the children alone!

I would like to strongly encourage you to NOT include Covid-19 vaccines for children as a requirement. The data is not there showing it is safe or even effective at this point. For example, what are the long term effects on reproductive issues? Is there a 5-year effect of spike proteins? Etc etc.

Regards

I would like to respectfully request that Covid-19 shots not be included for public school students.

There isn't any published information showing that the pediatric C-19 vaccine is effective in a K-12 school setting.

Children are not at risk from C-19 and are not carriers. This technology is far too new for inclusion.

Please vote AGAINST the inclusion of the Covid-19 vaccine for public school students.

Subject: TAG meeting and opposition to covid vaccine mandate in schools

External Email

Dear WA Board of Health and TAG members,
I strongly oppose that you are even considering adding the covid vaccine as an immunization requirement for school or daycare attendance. If you are following the science, it is very clear by now that these experimental mRNA injections do not prevent infection or transmission of the SARS-CoV2 virus. If you believe and are following the science, there is nothing else to say. There is no benefit and no reason to consider adding a vaccination requirement for a vaccine that does not prevent the disease or the spread of the disease.

The so-called vaccines are also shown to have more risk of injury and adverse reactions in children and adolescents than the risks involved with infection from the virus for this population. Children are at very low risk of serious illness or death and have a 99.98% recovery rate, according to our own CDC.

I hope you are doing your due diligence and really paying attention to the messages of opposition that you are receiving from parents across the state. I hope you all have read the well supported and very thorough response to all nine of your Criteria from Informed Choice Washington, available here

<[https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2F0x124.mjt.lu%2Flnk%2FAUkAAEx88AAAAAu9MAALoOABkwhABiAp0-](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2F0x124.mjt.lu%2Flnk%2FAUkAAEx88AAAAAu9MAALoOABkwhABiAp0-XIDmEJoWT_6HBgT5pb0EBwAYgA4%2F9%2FStDrOLFjg6HjoshnNSGkAw%2FaHR0cHM6Ly9zZWN1cmVzZXJ2)

XIDmEJoWT_6HBgT5pb0EBwAYgA4%2F9%2FStDrOLFjg6HjoshnNSGkAw%2FaHR0cHM6Ly9zZWN1cmVzZXJ2

. I hope you have all taken the time to review the extensive research that they provided to support their board and member's opposition.

These emergency use products cannot lawfully be mandated on any individual, especially children. Many parents, including myself, will remove their children from public schools if you mandate the covid vaccine. The ability to opt-out is imperative, but the way to do that is not to coerce parents into un-enrolling their children as their only alternative to vaccination. These vaccines have not been proven safe, they have not been studied long enough to determine long term risk vs benefit. They are not FDA authorized and cannot be mandated. They are not effective at preventing infection or transmission. Natural immunity will serve our children much better in protecting them from any future variants of this virus, since the vaccines generate antibodies to a part of the virus that is vastly different than the original viral strain from which these vaccines were derived. I have not provided sources and links to research because I am directing you to read the letter from ICWA which is full of resources.

Please follow the science, as all the politicians and government agencies have been saying they are. But follow the science in front of your eyes, not just what the media feeds you. Never in the history of medicine or science has there been so much censorship to valid discussion and questioning of a new technology and new product. It is not science if you simply refuse to consider ideas and scientific evidence that goes against either your hypothesis or your agenda.

Please protect our children and the rights of parents and medical freedom.

Vote NO

Subject: 02/10/2012 TAG Meeting

External Email

Please forward to Vice Chair Pendergrass.

Regarding the TAG meeting that took place 02/10/2022

Is there a need for the proposed vaccination requirement?

Since learning of this proposal I have reviewed the minutes and materials of the 10/13/2021 BOH meeting when it was decided to form the TAG; reviewed the minutes and materials for the 12/29/2021 TAG meeting; reviewed the agenda and materials of the 01/12/2022 BOH meeting and attended a portion of the meeting. I reviewed the agenda and materials (including the 9 criteria) for the 02/10/2022 TAG meeting and viewed the entire meeting online.

Nowhere in that information was there any mention of what should be the very first step in a process like this – establishing a need for the action being taken. I could find no information indicating the Board discussed the need during the early part of the process.

Wanting to know the need, I did my own research. Since the beginning of the pandemic 8,377,969 cases of Covid-19 have been reported in the 5-17 age group in the U.S. (as of 02/10/2022); of those 4087 (0.049%) were hospitalized (as of 02/05/2022) and 795 (0.00948% of cases) – 1 in 10,000 - known cases resulted in death (as of 02/09/2022). That does not take into account the unknown cases, the multiple co-morbidities involved in 95% of Covid related deaths (per CDC), and other factors. A study by Cathrine Axfors and John Ioannidis of Stanford calculated the risk of death from Covid for children and adolescents infected with the virus to be 0.001% or 1 in 100,000. That is a survival rate of 99.999%.

The Board seems to see a need to require 100% of children aged 5-17 to be vaccinated in order to potentially prevent a fatality rate of 1/100,000 cases – if the vaccine were 100% effective – which it is not.

I do not believe there is a justifiable need for proposing, much less requiring, the Covid vaccine for school attendance.

Criteria #5 & #6

The 02/10/2022 TAG meeting focused on Criteria 5 and 6 for this process. Very little time was spent during the meeting explaining the criteria. Put simply, criteria 5 uses the word “prevent” as in the “antigen prevents disease” (criteria 5). That requires that the antigen

actually prevents the disease, but the information presented didn't address that question. The information confirmed the antigen reduced the risk of serious illness and death if someone was infected with the disease, which by itself tells us the antigen doesn't prevent infection. No information was provided to show the vaccine prevents disease.

A second requirement of criteria 5 is that the disease to be "prevented" is a "disease that has a significant risk of morbidity and/or mortality in at least some subset of the population." With Covid the risk of significant morbidity and/or mortality is low for the vast majority of the population, with a 99% survival rate. The only group(s) at high risk are those with existing co-morbidities and/or the elderly. Those groups can be protected without requiring all children to receive these shots.

I was surprised that the entire team voted that the answer to question 1 (prevents disease) was yes when the obvious answer would be no, since we know that even after vaccination people can be and are frequently infected with Covid and some even require hospitalization and/or die. Since they do not prevent the spread of or infection with Covid the antigens being discussed would be better described as a pre-infection treatment.

The correct answer to question 1 would be no.

Criteria 6 is that the antigen "reduces the risk of person-to-person transmission." I have not seen any information anywhere that strongly indicates that the Pfizer shots do or do not reduce the risk of the spread of Covid, and the presenters were not able to answer that question to my satisfaction, either way. When the Omicron variant reached the US in December 2021 about 50-60% of the population had had the shots, and potentially that many more had been infected with Covid and survived (also developing protection). Even with that protection we saw an enormous spike in Covid cases. It seems that neither the shots, nor natural protection, did much to reduce the risk of transmission.

The correct answer to question 2 would be, at best, unknown. I would say no – at least not to any significant degree.

UNKNOWNNS

During the 02/10/2002 TAG meeting the presenters frequently said "we don't know" and made sure to tell the team there is "no guarantee" regarding several things discussed. TAG member Ben Wilfond (?) asked about the future and how we would be able to stop the requirement of these shots after we do know what we don't know now. The presenters didn't have an answer to that, except we would have to deal with it then. They were right, we don't know what Covid will look like in the fall. We don't know if Omicron will be the prevalent variant, if a new variant will be more (or less) virulent or deadly. If we don't know why are we considering requiring a shot/vaccine for an unknown variant if we don't know it will work? It was explained that the team should view the issue based on today's circumstances, as if the variant next fall will be Omicron and the antigen is effective against it. But the next words out of their mouth would be the qualifier - "we don't know." There is "no guarantee" that the information provided now will apply by August, or that the antigen available will work against the new variant. The history of Covid-19 makes it easy to predict that there will be a new pre-dominant variant by next fall. Making such an important decision when the targets are constantly moving is how bad decisions are made.

I do not think it's wise to make a decision like this based on guesses or what might be or when "we don't know." Parents will want some kind of assurance that whatever shot you

require their child to receive will work. I'm afraid "no guarantee" will not be sufficient reassurance.

General Observations

It was pointed out, correctly, that the efficacy of the shots decreases over time. However, there was no discussion regarding the frequency that these shots might be required. This would seem to be another important thing to consider before making such a decision.

I believe it was Board Vice-Chair Tom Pendergrass who told the TAG that if it seemed like this process is being rushed – it is. He explained that if the Board wanted to implement a new vaccine requirement in time to be enforced for the 2022/2023 school year all the steps required would have to be completed in a compressed time frame. Decisions that are rushed frequently turn out to be, well – wrong, and hard to undo. We are learning that the rushed decisions to lock down society and close businesses when the pandemic began did nothing to slow the spread of the virus and had many negative impacts (recent study released by Johns Hopkins). We are also learning that masks were not the answer we were originally told. In fact – the "vaccines" are not providing the protection promised. In the case of Covid, rushed decisions have almost all been bad decisions. I don't think you want to add to that dismal track record.

SUMMARY

I believe the Board failed to properly identify a true need for this additional vaccine to be required for children to attend school. As to the criteria discussed during the first TAG meeting it is obvious to me that neither 5 nor 6 were met in any reasonable interpretation of the information provided. In fact, it seems that the presenters and TAG members (especially the presenters) may have predetermined the outcome of this meeting, and likely the rest of the process.

Based on the following: 1) The lack of establishing a true need for this proposed requirement 2) The meeting of criteria 5 and 6 is questionable, at best [my opinion] 3) The concerning number of unknowns 4) The rushed process and 5) The apparent dislike of the idea by the general public, at least so far - I believe the Board should slow the process down and look to perhaps implementing the new requirement for the 2023/2024 school year, if at all.

Sincerely,

Chan Bailey

To Whom It May Concern,
Cutting to the chase, we will be moving out of Washington if you vote to start including the untested, ineffective, and dangerous COVID "vaccination" as a mandatory part of the childhood vaccine schedule. Omicron is proving to be less dangerous than the flu, and you can't even see an end to the number of boosters currently.
We have lived in Washington all of our lives and would be heartbroken to be forced to leave, but the safety of our children has to come first.
Sincerely,
Mike Slater

Weighing the risk to benefit of making Covid 19 Vaccines mandatory for school-aged children, I would recommend choosing 0% mortality rate for children to Covid 19, which relies on their natural immune system, rather than adding potential injury (myocarditis cases arising in Jan 2022) with the injection.

Subject: Public Comment. - School Vaccination requirements

External Email

Hello,

I do not believe these new vaccinations should be required for young children. There is so much we have yet to learn about them. My son chooses to homeschool because he doesn't like wearing masks long hours. He would love to go to school. We are waiting to vaccinate as a family until more long term affects are known.

I watched children after school last year and many came to my house with coughs, sneezes, and feeling punky. They came after being at school all day with other kids while they were vaccinated. Everyone I know who is vaccinated have caught Covid and many have spread it while vaccinated. This vaccine will not and does stop the spread. All of us vaccinated or not had the same symptoms.

Please say no. We should not be gambling with the welfare of our children. This choice would seal the deal for my family to continue homeschooling and learn to just say no to the public school system. My kiddo completed 3 grades in one year at home with me.

Thank you for hearing me out.

As a mother & Washington State citizen, I am extremely concerned with the Technical Advisory Group meeting last Thursday. After watching the meeting and hearing the hesitancy from many members, I do not understand how they could then vote in favor at this meeting. There seemed to be lots of hesitancy & great questions from the members but I am very concerned because there is no evidence for Criteria #6 & the group discussed this at length but still 12/17 people voted that this vaccine met that criteria. While watching the meeting it sounded like many wanted to vote NO but in the end decided YES. It's very disheartening & we will continue to watch these meetings take place.

Hello,

I am parent of 4 Children. All have attended Lynden Christian School.

The pandemic began in 2020 during my son's senior year. We were told we needed to wear masks and close school for two weeks to "flatten the curve". He missed his senior season of soccer, their senior banquet, and their graduation among so many other things. We adjusted and agreed to do what was needed to keep everyone out of harms way as very little was known about the virus.

We are now approaching year three and still in masks and still dealing with "risk factors". Our children have suffered enough. They need to see their teachers, see their peers, and breathe fresh air. The masks have proven ineffective and it's time to life the mandates. If some feel safer, that can be their personal choice to wear one but for the larger community we are done with the political agenda behind the mandates.

Following the science means following ALL of the science. It is proven that kids have a 99.98% survival rate. Masks are not needed. People that have been vaccinated, boosted and wearing masks are still getting this virus. It is not going away. Some have become deathly sick which is terrible, however many have also survived. Where are the statistics of how many have had Covid and actually survived it? All we hear are the death or hospitalization numbers

My two older children have now moved on to college in Arizona and attending with zero restrictions. In person, no masks, no vaccine requirements.

It's time for people to have a voice.

Thank your time,

Kathy Wubben

To the WA state board of health,

Many students have already had Covid 19 and therefore have better immunity than a vaccine.

Getting a vaccine after a natural infection has a 2-4 times increase in injuries from the vaccine and partially destroys the natural immunity.

These are still experimental vaccines and no one should ever receive them without informed consent as it violates health ethics. Everyone who wants one is already free to get them.

Children are at more risk from harm from the vaccine than they are from the natural infection.

This virus mutates, so today's vaccine may not even be effective against tomorrow's illness.

There is no good reason, other than to line pharma's pockets, to require the Covid vaccine for kids, and I for one would pull my kid out of public school before getting it, because he has already recently had a natural infection. Please think logically and first do no harm to our kids!

And I work in the school and have no worries about kids not being vaccinated. In fact, I worry a lot more about all of the health issues that I see in today's kids due to be over-vaxxed. There are harmful side effects to vaccines. Where there is risk, there should always be choice.

A very concerned parent and para educator.

I encourage the TAG to reject the proposal to mandate COVID vaccines for children. The potential adverse effects of the vaccine far outweigh any perceived benefit of the vaccine. The VAERS data reflect the potential harm to all ages of taking the vaccine that modifies ones DNA and renders one immunocompromised and with increased risk of blood clots, neurological harm, reproductive harm and even death. The children are not at risk of dying from COVID, but the vaccine has left thousands injured for life. Please do not mandate this for children. The exodus from public schools will be like a tsunami.

Subject: Covid-19 vaccine for children

External Email

Good day,

I am a 38 year resident of Kitsap county, wife and mother of two children. I believe it should be optional for this inoculation that is being discussed currently as a covid-19 vaccine.

I have a few questions about the vaccine getting added to the vaccine schedule for children.

Since these injections are EUA, does that mean that there is no liability of manufacturers if there is an adverse reaction?

What is the history of other vaccines that are on the current vaccine schedule prior to them being officially assigned to the current schedule?

As far as trials go, what were the adverse reactions reported for what is under consideration to mandate?

What are the long term adverse reactions? What is considered long term? Myocarditis?
Infertility?

Are these risks outweighing benefit?

Children have a survival of 99%, so why put this inside their bodies to stimulate risk?

What happened to optional? Like flu vaccine being optional? The variant will change consistently like flu virus, so the vaccine would change consistently like a flu shot?

The poor kids say 'oh I want the vaccine but my mommy wont let me because she is afraid.' Lets remember they are children. Innocent, impressionable children. As parents we are here to nurish and protect them from harm. Because the survival rate of children from covid is so high, why are we pushing this?

Lets end the coercion. These children just want the fiasco to end! We as their parents are using our critical thinking skills before rushing into such a new 'vaccine'. We know by choosing to be inoculated, it is irreversible. You can not undo this choice once made.

Here is a link to a testimony from a parent of a 12 year old who participated in the Pfizer COVID-19 trial. Please watch.

https://youtu.be/L2GKPYzL_JQ
<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fyoutu.be%2FL2GKPYzL_JQ&data=

Please watch this link as well, it is another video with a panel of covid-19 vaccine injured people presented by senator Ron Johnson.

<https://youtu.be/6mxqC9SiRh8>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fyoutu.be%2F6mxqC9SiRh8&data=>

The following link is virology data on the injections under discussion. I recommend visiting and reading it thoroughly.

[https://www.cell.com/cell/fulltext/S0092-8674\(22\)00076-9](https://www.cell.com/cell/fulltext/S0092-8674(22)00076-9)
<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cell.com%2Fcell%2Ffulltext%2FS0092-8674\(22\)00076-9&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C1c038e7656484c8b8d8508d9efd7335b%7C11d0e21](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cell.com%2Fcell%2Ffulltext%2FS0092-8674(22)00076-9&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C1c038e7656484c8b8d8508d9efd7335b%7C11d0e21)>

Please consider this inoculation to be optional to all of those who reside in Washington state. Looking at the USA in its entirety, 2 out of 50 states have implemented it as mandatory. This is equivalent to 4% of the USA. That is not the popular choice, obviously. Please listen to the community and what they are asking for. We are asking for freedom of choice in regards to the covid 19 inoculation.

Thank you so much for your time. I appreciate you. May God bless you and your family.

Respectfully,

Christina Thacker

I did not support having school-age children wear masks. There are so many detrimental things that far outweigh spreading germs. We all know that the risk of Covid is very low. We all know that the risk of mental illness, learning disabilities, social disabilities and more are a far greater threat if we keep the masks.

And no vaccine for Covid for young children. Stop and listen to many reports that the vaccine is not needed for a little children.

We encourage you not to endorse or support any decisions which would encourage the Covid vaccine for children in our public schools. We are deeply concerned about the short-term and long-term danger to children receiving this vaccine. Not to mention the very low rate of serious illness or mortality in children when contracting Covid 19.

Please do not require or even recommend the Covid vaccine for our kids. We will just lose more of our state's children from the public schools if this is enacted.

Thank you.

Covid-19 is far down the list of causes of death for Washington children. Yet, suicide is the 3rd leading cause of death for our teenagers ages 15-19.

More children die of drowning than of covid.

According to the CDC VAERS, the risk to children who receive the shot outweighs the benefit of the covid shot.

Save a child, use a ferret to test the efficacy and long term effects!

To the Washington State Board of Health:

I OPPOSE requiring covid vaccines for Washington children in daycare and school age children in preschool thru 12th grade. The risk to children is VERY MINIMAL. 99.7% recoverable. Vaccinations should be decided by a child's parents and their doctor, NOT by the state of Washington.

I urge you NOT recommend the Covid-19 shot to be added to the list of vaccines required for school attendance. As someone who has worked in education for 25 years, and who tracked and enforced immunizations for the last school I worked at for eight years, I am very concerned about the logistical burden this would place on school personnel. School office workers DO NOT have the bandwidth to take this on, not to mention that there is currently no published literature on pediatric Covid-19 vaccine effectiveness in K-12 school setting.

Schools are struggling enough as it is. Do not require them to take on this contentious and divisive issue!

All corrupted individuals,

Still trying to find out when this power grab for mask mandates is going to be lifted for schools.

When will Washington state wake up to the fact that they are useless and have not been needed for over 2 years for school-age children?

We will be removing our children from the schools within the coming month as we will be relocating to another state that doesn't have these tyrannical rules.

Odds are, no one on Washington can/wants to make a decision including the Sec of Health so the forced masking will probably be around every fall/winter forever.

Have a wonderful day/week/month/year of more mandates!

Good riddance. Bye.

"If masks, mandates & lockdowns work, why aren't they working?"

Currently preparing on moving our family out of state. I hope you finally get the message as more people leave this 'power-hungry' dem-led state.

Josh Daugherty

DO NOT COMPLY.

Week 15, then already Winter/Christmas break,

Still no constructive, healthy dialogue on this question.

- What is Washington's plan/goal as to when masks can be recommended/optional for children while at school? (Currently, mask up until we say so...)

As all addressed on this continue to be complicit with 'policy', I propose in 2022, new year, new rules. Masks = Recommended for all, not mandated. I will not comply with your demands. At least begin a phased approach to mirror the restaurant half-assed policy of wearing masks walking around in the restaurant, but then when you sit down, you may take them off. Our children deserve better. Please share your thoughts on this, as you clearly do not have any other ideas. Since the beginning of the school year, you've been shrugging my concerns off or ignoring this altogether. Great job, now I'm starting to adopt some of these ideas, to ignore/disregard any & all communication coming down concerning force masking, vaccinations, etc.

You do not have control over what I do, what I wear, how I live. Our children wear the minimal 'protection' to abide by mandates only to 'not get in trouble'. They can also see that this is all theater and wearing masks for 'show' under the guise of 'keeping everyone safe'. My underlying question all along has been, who is 'dangerous'? Certainly not our children as they have a larger chance of dying from the flu or common cold than covid. Covid is weak when it comes to them. Stop with this nonsense.

If WA DOH were TRULY trying to keep everyone 'safe' against a virus that only negatively impacts a very small portion of the public, they've been doing a BAD job at that. According to the DOH website, and due to the fact that 9,554 individuals have lost their lives to this. A whopping 1.2% of the WA population. A large majority of those are in the at risk age group and those that have had multiple health issues already. You've been failing since the beginning, and every death (including those hidden from view attributed to depression/suicide) is on you.

<PastedGraphic-2.tiff>

What I am finding even more surprising, the fact that you are pressing forward with 5-11 year old vaccinations and I highly doubt that many children in the state are medically 'at-risk' for this emergency use authorization. Shame on you all.

<PastedGraphic-3.tiff>

Additional facts to consider:

- 1) We've had viral illnesses for every single year of human history.
 - 2) Covid has ~same fatality rate as a flu.
 - 3) We've managed to live like normal humans until 2020.
- Why are we still obsessed with covid?

Have a wonderful week and a happy holiday season,

Josh Daugherty

<joshua.daugherty.wa@gmail.com <mailto:joshua.daugherty.wa@gmail.com> > wrote:

To whom this may concern,

Is it already week 14? How can this be where the WA DOH only has the plan to see force masking our children until they say so? I believe this will fall on deaf ears as many of you are still complicit with this madness, but I will not comply.

All I'm requesting is to change from 'mandate' to 'recommended'. That would allow parents to make up their own minds as to mask their children or not. I can already expect that when masking eventually ends, common cold & flu cases will go up as masks prevent us from building our immunity to anything.

I will ask again:

- What is Washington's plan/goal as to when masks can be recommended/optional for children while at school?

Let the children breathe. If parents are still scared for the .000007% chance that their child may be adversely affected by this virus, they can add masks if they choose. This needs to be a choice. I see that the DOH hasn't updated their page since 29 November 2021 which shows me they still have no plan. Or have you realized that you are probably getting to the end of mass vaccines? The rest of WA will not do what you tell them. Give up. Will not get to 100% vaccinated, but that still isn't the plan, right?

I would like to also point out a quick observation that Ohio Rep Jim Jordan had mentioned recently:

Summary: If masks, mandates & lockdowns work, why aren't they working?

The 'health' community has been wrong at almost every step of the way since the beginning. Their plan seems to be: 'lets try this...what about this...next we should try this...'

Quite the 'science', hmmm. If you don't have a plan, just say it. Still advocating for my previous comment, begin with a phased approach like in restaurants. Our students can remove their masks while seated. What is so wrong about this?

I am still looking forward to our comments & replies with answers. Not more of the political jargon...it doesn't work anymore.

Awaiting solutions & dialogue,

Josh Daugherty

Surprise! I have received a response from last week's request from the DOH Information email. Still no answers (not a true surprise). I look forward to the weekly, one-way communication with all involved. No one seems to be doing anything to assist in this. I hold all accountable for this non-action.

Please see below for the thread from today preceded by my latest response.:

DOH Information,

This question was asked over a week ago and just now you are getting back to me. Bottom line: My question still isn't answered. You really need to update your sources as that CDC links were updated as of November 2020 & May 2021. That is between 6 months and a year ago!

- What is Washington's plan/goal as to when masks can be recommended/optional for children while at school?

According to the WA DOH, covid doesn't spread in restaurants while diners have meals, that can take off their masks then, why not our children while seated? I have no issues with parents who wish to have their child masked all day, just do not force it on all of our children. Statistically speaking, our children have more of a risk of adverse problems with the flu and the common cold than they do against covid. No one mentioned prior to 2019/2020 wearing masks for any flu seasons. Odds are the common cold & flu cases will spike once our kids remove their masks as they all have been weakening their immune systems with this forced masking.

As of yesterday, the WA DOH covid page shows vaccination stats. I am asking the WA DOH to come up with a % as to how many people need to get vaccinated against this useless virus that only hurts the weakest in the population (immunocompromised). I guarantee that we will not get to 100%, probably never 90% but how long do we need to continue this nonsense? What is the plan? I will say this again: IF YOU FAIL TO PLAN, THE YOU PLAN TO FAIL.

<PastedGraphic-1.png>

I look forward to your reply with answers and or a plan. Maybe begin a 'phased approach' that was tried to reopen after the government shut all the small businesses at the beginning. Quite the asinine approach at that but we at least tried that.

NOVEMBER REQUEST

RESPONSE FROM DOH PA THIS MORNING TO MY 23

Hello,

Thank you for contacting the Department of Health.

DOH disease experts continue to monitor COVID-19 infection, hospitalization, death rates and health system capacity closely. While disease rates are declining, they remain high and hospital occupancy is still over 90 percent. We feel cautiously optimistic now that kids age 5 and older are eligible for the vaccine; however, the majority of children are still not vaccinated. We need to continue to do everything we can to prevent the spread of COVID-19, especially in light of the highly contagious Delta variant. As we head into winter and the holiday season, when the number of social get-togethers and indoor gatherings increase, a combination of masks and vaccines remain the best tools we have available to ensure that kids stay healthy and businesses and schools stay open.

You may view the studies below about the reduction in virus transmission and mask use:

Contacts,

Here we are at week 13, still no plan for children, the HEALTHIEST of us all, to have masks optional in school.

I will try to ask the question again, expecting someone to give any answers to the question:

- What is Washington's plan as to when masks can be recommended/optional for children while at school?

"Until we say so..." isn't science. Show me the proof that kids are dropping like flies while at school. I will restate my previous comment, our kids are much healthier and can fight off any common cold & flu (read covid) much quicker than any of us. Why is the state still providing the useless nonsense direction as to 'keep everyone safe' and 'keep masking up until we say so'.

If you are awaiting 100% covid vaccinations, even for VAST majority of children that do NOT need it, we will not reach that goal. But it seems like the DOH still doesn't have a plan...

Not to mention, no one is keeping the conversation open except for parents, so everyone else in this chain is being complicit with these mandates.

I believe I've said it before, but this sounds a lot like when I was growing up, if someone told you to jump off a bridge, many of you would. Sorry to disappoint but I think for myself and will not jump.

Still frustrated and I will talk to you again next week! Parental choice should be part of this conversation. If masks work, then let those that continue to wear them, and be afraid of this virus continue. I will not comply.

Washington State Board of Health,

12 weeks and still no answers from anyone as to what the plan is concerning the forced masking of our children at school. Here is the question, should be simple and to the point:

- What is Washington's plan/goal as to when masks can be recommended/optional for children while at school?

Wear masks until we say so... isn't rooted in any science that I know of. Our children already have a much lower chance of health issues even if they contract Covid. I will reiterate my previous request: "mirror the restaurant policy" so that when our children are seated at their desk in the classroom, they may take off their masks. If some children still feel scared to take their masks off, they may keep them on. This should still be about choice of the parents/students. With these false-rooted mandates, they aren't allowing us freedom of choice.

I look forward to your comments/dialogue concerning this topic. If you will not help, then step aside as your inaction shows just how deeply you care about the health of my children.

Josh Daugherty

Just in case you missed it, here's some educational reading when it comes to our children.

☐

Washington State Board of Health,

Still awaiting an answer to my queries below. Here we

are, 11 weeks into the school year and it's still the same: "do it until we say so...". If you fail to PLAN, you plan to FAIL. I see a lot of failing by those in all positions of 'office'.

I've been contacting the WA DOH without answers every week, including Cc'ing our non-action school district, principals etc. No one will assist with speaking to anyone that may have any indication as to how long should we expect to force-mask our children at school. This virus is NOT a threat to our children, as it is comparable to the flu or the common cold. They are healthy.

Would like to at least begin some conversation with relaxing these 'mandates' to at least mirror restaurants in the area. If the children are seated, they should be able to remove these face diapers. Not to mention, cloth masks don't do anything for Covid particles. This continues to show this is all for 'show'. I will not participate.

If parents still wish to mask their child, feel free to.
They should have the choice.

Still a frustrated parent,

Josh Daugherty

If you would like further information, please look at the following website. I am also open to conversation.

Subject: Revise mask mandates for children schools

☐ WSBOH Board of Health,

To date, I have been requesting updates for the forced masking in schools:

10 weeks, still nothing from the state...

How much longer to force mask our children? We should have a choice on whether to mask or not.

I just want to know what the goal is of the force masking! "Until we say so..." isn't ANYTHING near common sense or science.

Don't you dare start with the force vaccinations for our children when only about .000003% may even need it.

Answers requested as to what the education plan is. I will continue to request weekly updates until a plan shows an end in sight. Just because "we said so" isn't right.

Maybe as a start. We could mirror the restaurant policy where if you are seated, you may take off your mask. I understand keeping children safe, but they are not in danger. If children want to continue to mask up, please have them continue. If children do not want to wear a mask, they shouldn't need to.

Where is the proof that children are all infected?

Irritated parent,
Joshua Daugherty

<joshua.daugherty.WA@gmail.com <mailto:joshua.daugherty.WA@gmail.com> > wrote:

□

Week 9,

Still nothing. Exactly what I expect from this school district and even nothing from the DOH. My concern/question is:

How long do our kids need to be masked in school?
What is the end goal?

So far WA DOH is basically saying to wear them until they say so. So WRONG!

As of today in WA, 78.6% 12+ has one dose and 72.5% fully vaccinated.

85.6% in King County.

I've been requesting information from the schools, district and the DOH with no answers. How does anyone think this is the 'correct' way?

Going back to when I was young, if someone told you to jump off a bridge, would you? Too many people are just following the 'guidance' whether it makes sense or not, without question.

Just asking for the choice. Our kids should have a choice. Currently they are being taught that everyone is infected. If you want to still mask up, feel free to.

Don't you dare agree with vaccine mandates!

This is now my 9th week of requesting answers. Unbelievable poor management at all levels. Will continue until I receive dialogue.

Joshua Daugherty

On Oct 18, 2021, at 6:54 AM, Joshua Daugherty <joshua.daugherty.WA@gmail.com <mailto:joshua.daugherty.WA@gmail.com> > wrote:

☐ Still waiting any information from the WA DOH. Nothing yet and we are only 8 weeks into this. I know that many of you don't care about the safety of my child, as you just follow the same guidance pushed from 'above', without questions. This is WRONG.

From today to the WA DOH:

Another week, more nonsense. I have been requesting follow-ups to my questions and nothing has been done. Every week I am asking the same, MAIN question.

- What is WA state's end goal when it comes to children's force masking policies?

If there is no plan, then you plan to fail. This has been the case since the 'pandemic' began. The science doesn't back the policy of 'wear a mask until we say so...' I need additional information as this is WRONG and many know it. I would like to have a constructive dialogue with someone that can say when our children can opt into masks or not at school. Again, if parents choose to mask their kids, it is their

choice. Please let me know what the plan is beyond, 'wear them until we say so.'

Still no answers,

Week 7,

Starting out 'right'? How does this make any sense?
Please show me which part makes any sense at all.

It's a good thing that my daughters aren't playing sports. Kids now need to be given the vaccine, or test every 2 weeks. Studies even show that even with the vaccine, they can still spread covid/common cold... Are you going to be ensuring that they are wearing masks while participating too? Or is that just while sitting, spectating?

This must be more of that 'science' stuff. Just regurgitating the nonsense that the DOH puts out.

<Another useless mandate.png>

Have there been any further guidance or discussions concerning the forced-masking mandates to become 'recommended'? Still awaiting anyone to respond back to me from the WA DOH. Anything besides wear it until we say stop?

Still awaiting answers,

Josh Daugherty

<joshua.daugherty.wa@gmail.com <mailto:joshua.daugherty.wa@gmail.com> > wrote:

Week 6,

Still trying to find out the following:

- How long do our children need to be force masked?
What is the end goal to go back to breathing fresh air?

Freedom, this is still America. If you want to stay masked, fine. Do not force it on us. Under the guise of 'public safety', keep wearing masks to 'protect everyone'. That infers that my kids are dangerous! DOH WA needs to let us know the plan, we must demand that from them, 'until we say so' is NOT science.

Oh, and mandate doesn't equal law.

So glad I'm actively teaching my children & family CRITICAL THINKING. Something that the Gov, DOH, School districts, etc have no idea what it is. Just mandate compliance. Basically continuing a 'shut up and color' attitude. We know who is at fault. Just because it's 'popular', doesn't mean that it's right. If this continues to go on for an extended period of time, expect more pushback.

Just asking to give us the choice. Why is this so hard for you to comprehend? Maybe we start dictating what you need to wear and how you need to act.

Such a relevant article to this:
<https://notthebee.com/article/covid-theater-a-personal-tale-about-the-gaslighting-of-a-nation-and-its-schoolchildren>
<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fnotthebee.com%2Farticle%2Fcovid-theater-a-personal-tale-about-the-gaslighting-of-a-nation-and-its-schoolchildren&data=04%7C01%7CWSBOH%40sboh.wa.gov%7Cc6958e040e0040d649d508d9ed9e5c00%](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fnotthebee.com%2Farticle%2Fcovid-theater-a-personal-tale-about-the-gaslighting-of-a-nation-and-its-schoolchildren&data=04%7C01%7CWSBOH%40sboh.wa.gov%7Cc6958e040e0040d649d508d9ed9e5c00%2F)>

Looking forward to continued dialogue as to the end of these unconstitutional mandates.

Still frustrated,
Josh Daugherty

Awaiting DOH responses too.

Week 4,

Fourth request for information:

When is the mask mandate for schools going to end? I've requested info from DOH as they need to answer to my requests. They have not and I will continue to request weekly from the DOH and the district on down to our schools. They do not stop the virus from being passed. It is just for show/theater. Otherwise the wording in the 'order' wouldn't be 'anything'.

"A cloth face covering is anything that completely covers the mouth and nose and fits securely on the sides of the face and under the chin."

It may have plenty of holes throughout the mask. This further proves that DOH doesn't care about the transmission of the virus. Just to mandate the "do it or else".

Enough of this nonsense. I'm just trying to communicate with someone other than just a 'Customer Service Specialist' that is just passing junk back. Awaiting the constructive dialogue.

Continuing on my requests for common sense and/or parent choice for masks in schools. Mandates are just asking for push back. I will continue to push back.

<joshua.daugherty.WA@gmail.com <mailto:joshua.daugherty.WA@gmail.com> > wrote:

□ WeeB,

Finally received an email back from WA DOH with more of the same, no answers to my questions. My main question will continue until I receive answers instead of just a 'Customer Service Specialist' responding to my web query with a loosely prepared, blanket statement, that mentions 'keeping the CDC recommendations as of August 5, 2021'.

My question seems to be simple, straightforward and to the point.

- What is Washington's plan/goal concerning the mask mandates for school-age children? There needs to be a plan besides 'wear the mask because I said so'. (aka mandate)

If they were going with the CDC recommendations, forced masking wouldn't be in our schools.

I am requesting that they at least update the guidance to 'recommended' as the current failed 'plans' make zero sense. There is NO scientific data that has been collected to warrant this abuse across the board. Especially state-wide. As of 13 September, posted on the WA DOH website it shows that 75.1% of residents have at least one dose and 68.1% are FULLY vaccinated against COVID. Of that, King County has vaccination rates of 77.7% (12+). Auburn School District is in King County.

<PastedGraphic-1.png>

The hospitalization rate for those that are school-age is so minuscule, the data you have been collecting doesn't make sense to continue with the mask mandates. How much longer do we need to live under this authoritarian 'leadership' (aka mismanagement) of state resources? I will add to this as we have already received communication from the schools that COVID/common cold/sniffles/flu has popped up in school.

Looking at anyone that I've communicated with concerning this. Fail to plan, plan to fail... Seems spot-on for this situation that we are in!

<https://www.unmaskourkidswa.com>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.unmaskourkidswa.com%2F8>

All I am asking is that we give parents the CHOICE
whether to mask/unmask our children.

Looking forward to future constructive dialogue,
Josh Daugherty

Week 2 of the insanity continues,

I have been trying to communicate with the WA DOH,
and I am still awaiting their responses and/or dialogue of any kind showing this fake-
science behind their blind mandates.

This is no longer about the safety of students and staff
members. Masks are turning out to become a direct contributor of learning issues, social
interaction struggles, increased headaches, anxiety & overall discomforts. As a parent, I
am still disturbed to see our children treated this way. Totally unnecessary.

Please assist in communication with the WA DOH in
changing this to 'recommended', not mandated for all. I will not comply if I visit the
schools or the district.

Still a concerned parent,
Josh Daugherty

On Sep 8, 2021, at 8:23 PM, Joshua Daugherty
<joshua.daugherty.wa@gmail.com <mailto:joshua.daugherty.wa@gmail.com> > wrote:

That is what I have been doing and they continually give me the run around with 'that is the way it is.' Not acceptable, hence the 'because I said so' attitude. Is there nothing that the Districts can assist with?

I have reached out to them, and will continue to do so until something is modified, or at least a goal set for when we can return to normal. Actual normal, without face masks on our kids if we, as parents choose. We have had it with these non-science mandates and will continually be pushing back against them.

So glad to hear that the crooked DOH & schools have finally wised up and allowed our kids to play outside, WITHOUT masks. So idiotic from last year while being in-person that they needed masks outside at recess.

Still concerned,
Josh Daugherty

Hello Mr. Daugherty,

You won't be surprised for me to write that masks are a mandate from the Washington State Department of Health. Statewide elected officials have been clear that local districts do not have the authority to lift the mask mandate. The state's focus this year, as is ours, is keeping schools open for in-person learning. I recommend you contact the WA DOH with your concerns.

Subject: Concerning requiring COVID19 vaccines for schoolchildren

External Email

To the Washington State Board of Health,

I am writing to urge you to vote NO on requiring COVID19 vaccines in order for children to attend school. The data does not support this decision; further, it is overreach.

Children are the least susceptible to severe illness and death from this virus. They are more likely to die from the flu than from COVID19. Further, there are now multiple forms of early treatment that are effective in preventing severe illness and death from COVID19, including hydroxychloroquine, ivermectin, budesonide, and supplements of Vitamins C, D, zinc, and quercetin.

Parents and their physicians should be the ones to make this decision. COVID19 is no longer a mortal threat to the majority of the population, least of all children; additionally, the available vaccines are still under EUA approval for children and there is a risk in getting them. The VAERS database is full of reports of adverse effects from these vaccines (more so than the side effects from any other approved childhood vaccine), including serious heart conditions in young people. Personally, I have a friend who developed a neurological condition after receiving the shot. Where there is risk, there must be choice. Parents and physicians MUST have the autonomy to make this decision for the children in their care; not the state.

I urge you to consider this statement (<https://doctorsandscientistsdeclaration.org/<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdoctorsandscientistsdeclaration.org/>https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdoctorsandscientistsdeclaration.org/>>) signed by over 17,000 doctors and scientists. Also, please take a look at some of the data concerning the risk of these vaccines to children:
<https://doctorsandscientistsdeclaration.org/home/supporting-evidence/#children<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdoctorsandscientistsdeclaration.org/home/supporting-evidence/#children>https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdoctorsandscientistsdeclaration.org/home/supporting-evidence/#children>
evidence%2F%23children&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C88efb876b3734b5e7e7f08d9ed

It is of vital importance that you look into this matter closely. The decisions thus far made by the TAG group are concerning, including the vote on Criteria #5 which states that these vaccines prevent disease. That is patently untrue. These vaccines do not prevent COVID19, as we have seen with the latest Omicron variant; further, the manufacturers never claimed that they would produce a sterilizing effect. The vaccines were intended to reduce symptoms.

Because there is still so much unknown about the long-term effects of these mRNA vaccines, they carry risk, and there are other treatments available, parents and physicians must be able to make their own informed decisions without interference from the state. If you proceed to make these vaccines a requirement for school, parents will be forced to pull their kids out of school.

Please proceed with caution, and consider the data. I urge you to leave this decision up to parents.

Sincerely,

Cori Belle

Subject: Public Comment on vaccination as part of school immunization requirement

External Email

For what it is worth, is anyone in the TAG group a doctor? How many? If not, then it would be kind of each one of you to not comment on matters that pertain to our children's health. If there are physicians in this group that are pediatric, I would humbly request of you to give your children/grandchildren these shots first so we can know how safe and effective they would be, if they are. The fact that your opinion, regardless of it's authenticity, will have consequences that innocent children will have to bear directly, which come at no remorse to you. As you take decisions, put yourselves in the place of our children. What would you if it was you? Take your decisions with that thinking in mind so you not only use your brains but also your heart and soul in making better health decisions for our children.

My stand on the issue:

I got vaccinated and wore masks daily, but nothing stopped my whole family from getting Omicron. Hence, I will make a better and informed decision for my children to not get the shot, since it hasn't been researched on, studies on, and experimented on long enough like other vaccines developed for children. My children are not guinea pigs and if you think the vaccines work, lead by example with your own children and grandchildren. Also, where health is concerned, it should always be a matter of personal choice and not a government one. ONE SIZE DOES NOT FIT ALL.

Thank You!

Regards,

Khush

I and many other parents who tuned in yesterday were appalled. Numbers were skewed to present a narrative. This shot does not in any way meet criteria #5. And I think you all know that. The last question of your meeting pertained to transmission and the woman who answered could not present any measurable data on the shot preventing transmission.

#6 is also not applicable because the shot has not been proven to reduce transmission from any measurable data source study. And again, children are at virtually zero risk of dying from this disease. They are however at risk of heart issues and unknown long term effects. We know it can affect menstrual cycles.....but definitely not fertility?? How would you feel if an entire generation was infertile? These are the types of issues on your shoulders with a shot with no long term studies.

I have heard that your committee was appointed by our governor....who seems to have a monetary (not health) interest in vaccinating every living thing, natural immunity or not.

We as parents beg you to reconsider moving forward. My family could up and move since we own a home in another state, but many families who have already been hit hard will lose more education when they are pulled from school. As you probably heard when you allowed public comments last month many of us will NEVER inject our children with this product.

Thank you for your consideration and doing the right, moral thing and not allowing yourself to be paid or coerced.

Dear Board of Members,

No CDC guidelines, OSHA regulations or health officer order can suspend our rights. "We the People" and do not consent. We do not give you the authority to force any medical procedures on our children, elderly, or on any human being that does not choose of their own free will your offerings of "public health" in a vaccine trial.

Your chapter 246 - 100 and rule making petition for 246 -105 try to confuse, coerce, intimidate, threaten and harass us. This is called retaliation and discrimination, and that is against the law.

We have the right to determine what is the best for our families and what is done with our body and it doesn't matter whether the vaccine only has an "emergency authorization" or not.

The masks and the testing are also "emergency use authorization" but even if they weren't, we cannot be forced into complying. Only a licensed medical doctor can suggest a medical treatment such as a mask, covid testing or a vaccine. You or school administrator has no authority to do so.

We have the constitutionally-protected and GUARANTEED right to life and the right to determine what it's done to our body.

We are covered under ADA laws and our needs would have to be accommodated by law.

You are not a medical professional and, therefore, you are unlawfully practicing medicine by prescribing, recommending, and using coercion to insist on this experimental medical treatment.

Whereas:

1. The Nuremberg Code, codified into US Federal Law, prohibits forcing or coercing anyone, under any circumstances, to participate in a medical experiment; and the Code states "the voluntary consent of the human subject is absolutely essential."
2. Phase 3 clinical trials of COVID-19 vaccines are not yet completed. C4591007—the main clinical trial in children and young adults with BNT162b2—has an estimated completion date of May 5, 2026 and hence qualify as medical experiments. People taking these treatments are enrolled in clinical trials.
3. The vaccine formulation now being given to U.S. children aged 5-11 is NOT the same formulation used in the clinical trials, and NOT the same formulation that has been administered to all other age groups under EUA. So even when current ongoing clinical

trials are complete, the results cannot be assumed to be relevant to the safety or effectiveness of the new formulation.

"The vaccine that is authorized for use in children 5 through 11 years of age includes the same mRNA and lipids but different inactive ingredients compared to the vaccine that has been used under EUA in individuals 12 years of age and older and that has been studied in clinical trials." Source: <https://www.fda.gov/media/153717/download>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F153717/download>

4. Most vaccines are trialed for at least 5-10 years and COVID-19 vaccines have been in trials for less than one year.

5. No previously attempted coronavirus vaccines (ie. MERS, SARS-1) has been approved for market, due to antibody-dependent enhancement resulting in severe illness and deaths in animal models. The participants in clinical trials involving children aged 5-11 received "two doses of 10 µg BNT162b2 or placebo (saline)", not the new formulation.

Source: <https://www.fda.gov/media/153447/download>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F153447/download>

6. Numerous doctors, scientists and medical experts are issuing dire warnings about the short and long-term effects of COVID-19 vaccines, including but not limited to death, infertility, miscarriages, Bell's palsy, blood clots, cancer, inflammatory conditions, autoimmune disease, early-onset dementia, convulsions, anaphylaxis, myocarditis, and antibody dependent enhancement leading to death. I have friends dealing with COVID-19 vaccine injuries.

7. Children and youth are at virtually no risk of dying from COVID-19 or transmitting it to others, but deaths and injuries to children and youth have already occurred in the COVID-19 injection clinical trials.

8. FDA admits safety unknown. Children are being used as test subjects, with their parents acquiescing under fraudulent marketing pressure. Public Health messaging does not match the reality of the current knowledge base. At the October 26 VRBPAC meeting, FDA Advisor Dr. Eric Rubin admitted: ". . . but we're never going to learn about how safe this vaccine is unless we start giving it."

Source: @6:52:33

https://youtu.be/laaL0_xKmma

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fyoutu.be%2FlaaL0_xKmma&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C6523f3a6f57849a2db5508d9ecb3eb74%7C11d0

9. International Alliance of Physicians and Medical Scientists has declared that children should be excluded from vaccine mandates:

"Consensus is clear among MDs and medical PhDs: following 20 months of exhaustive research, millions of patients treated, hundreds of clinical trials performed and scientific data shared worldwide, they conclude that healthy children and the COVID-recovered should be excluded from restrictions and vaccine mandates."

Source: <https://globalcovidsummit.org/news/thousands-of-physicians-and-scientists-reach-consensus-on-vaccinating-children-and-natural-immunity>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fglobalcovidsummit.org%2Fnews%2Fthousands-of-physicians-and-scientists-reach-consensus-on-vaccinating-children-and-natural-immunity&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C6523f3a6f57849a2db5508d9ecb3eb74%7C11d0>

10. There have been more deaths from COVID-19 vaccines, as reported to the Vaccine Adverse Events Reporting System (VAERS), than deaths in the last 10 years from all vaccines combined and only 1% -10% of vaccine injuries are reported to VAERS. The full extent of adverse events from the COVID vaccines is unknown as there is a significant delay in uploading reports to the VAERS database.

The risk associated with COVID-19 vaccinations is extremely dangerous to the health and well-being of all children and this form of treatment unnecessary.

Any coercion or pressure tactics used for students to be vaccinated contravenes the Nuremberg Code, the Helsinki Declaration and Federal Law.

Any use of "implied consent" by any minor child under the age of 18 is defined in law as gross, contributory, and culpable criminal negligence.

Any party found to be involved in vaccination coercion when entrusted with the care of our children such as all school staff, school board members and executive, and any other adults who may have access to our children while under their care. This includes the assistance of outside school staff, contractors, public health nurses, or health officials could be prosecuted to full extent of law and you may be held personally and criminally liable for any injuries or deaths that may occur.

We are forced to err on the side of spiritual caution and refuse to harm our temples in honor of Gods Holy Word.

The 1st Amendment of the constitution has protected these exact claims before the Supreme Court on many occasions. Even State governments have faced this glaring truth during the Covid crisis as they attempted to pass mandates and laws that violated this basic principle only to have their wrong decisions righted before the Courts, with financial penalties.

While, as Christians, we strive to be at peace with all humans beings and to obey all laws and mandates from a Legitimately elected government. We do not do so in violation of Gods Holy Laws, of which the protection of my body is one of those spiritual laws that supersedes all manmade laws in my religious conscience.

Sincerely

I extremely concerned dad that is willing to take out his kids from school to protect them.

TAG,

Re: Decision to recommend Covid Vaccine to list of required Immunizations.

I listened in on the zoom meetings. I do not believe your group looked fairly at the issue. Your delivery of the information was manipulated to produce a particular outcome without regard to competing options.

To be brief;

1. The covid vaccine is UNESSESARY and UNNEEDED for a number of reasons among which are:

- a. Throughout the entire 'pandemic' our young are at virtually zero risk of significant illness or worse.
- b. The covid mRNA platform has not endured long term thorough testing and analysis.
- c. Every indication is that Covid has effectively run its course. It continues to be less virulent with very few children, (or adults), becoming substantially ill, rather most experience very mild short lived illness.
- d. There is more and more indication that the vaccine does nothing to prevent infection nor does it prevent transmission.

2. Dr. Malone, recognized as the primary inventor of the mRNA platform **STRONGLY RECOMMENDS AGAINST** administering the vaccine to all children in general and especially in particular to all females and young males.

3. TAG has not considered any of the science and studies which indicate alternative effective prevention of infection such as personal health choices and vitamin and mineral supplements; e.g. the issue of overweight and obesity should be discussed in our schools as well as the overwhelming evidence that Vitamin D levels are inherently vital, (and more effective than the vaccine), to our natural immune system health.

4. There are many known and unknown risks to vaccinating our children against covid which far outweigh any perceived benefits.

Bruce Hood

You all seem to be in a rush to recommend the COVID vaccine for children to attend Washington State schools, however as a whole every single person in this group doesn't seem to care about studies out there unless it suits their agenda. Your agenda was very telling yesterday by what was presented by the "experts" yesterday. There are many "experts" with the same impressive credentials that could present another side to the story. These people are left out of the conversation because the leaders of the TAG and the State of Washington aren't interested in what they have to say. Why is this? Your decision will greatly impact every single child in Washington.

You all say this vaccine is "safe" and "effective" but yet every day I see articles such as this posted without me even looking. These studies are largely ignored. Why aren't conversations about the safety of this vaccine happening? Do you all just assume because the FDA/CDC deemed it safe that it actually is? Plenty of other countries say the risk of vaccinating children with the covid vaccine far outweighs the benefit - why is this? Why do we have such a different approach? Is it because many of you get funding from BigPharma or the NIH? I don't believe one person that sits on this TAG genuinely has the best interest of my children at hand, rather they have an agenda to push.

Do better and be honest. My children do not deserve to have their life destroyed by people like you all.

Subject: COVID shot mandates

External Email

Hello,

I would like to go on record to say any and all COVID shot mandates for schools should be denied and voted down.

The statistics show kids are extremely well protected against COVID with their natural immunity and forcing a shot will only hurt them and your bottom line. If this is voted in then I will be pulling my child from our government run schools and enrolling them elsewhere.

Thank you,

-Joseph
Parent of a current child enrolled in public schools

Subject: Feb 10th Meeting to discuss Covid-19 vaccination requirements for schools

External Email

Dear Sirs and Madams,

I am writing to communicate my opinion and concern over mandating child Covid-19 vaccines for schooling, as well as utilization of a health officer to enforce involuntary quarantine for people or families if they refuse to comply with recommendations, which include the Covid-19 vaccines.

Covid-19 shots should never be mandated for anyone in our country, and especially our children. This vaccine, which is actually genetic therapy, is still under experimental emergency use authorization, and a mandate for vaccination tramples the freedoms we have as individuals and parents to do what we feel is best for OUR OWN children. It has been shown that children are extremely low risk to contract or get severely ill from Covid-19. It has also been shown there are high risks for heart muscle damage in kids who take the vaccine. PLEASE REJECT the mandate.

Government agencies should not be given power to decide who should and should not be vaccinated, and then use force to make it happen by use of mandates. This is a dangerous blanket requirement for children (and anyone of any age) regardless of their medical professional's opinion or direction. Also, this does not take into account NATURAL IMMUNITY, which has been shown in studies from Israel and John's Hopkin's University to give equal or superior protection against Covid-19.

Again, the requirement for an experimental vaccine, that does not prevent the disease it is intended for, does not take into consideration a parent's own right to make well informed decisions for their child's health, and does not take into consideration a child's existing natural immunity from prior Covid-19 infection, tramples our freedoms established in our great country and does not "follow the science."

Thank you for your service, and I am praying for wisdom for you all. Please vote to keep our freedoms in tact in this state. As a parent, I am extremely concerned with the direction our state is headed.

Sincerely,
Sarah Carossino

Subject: Covid-19 vaccine for children

External Email

Good day,

I am a 38 year resident of Kitsap county, wife and mother of two children. I believe it should be optional for this inoculation that is being discussed currently as a covid-19 vaccine.

I have a few questions about the vaccine getting added to the vaccine schedule for children.

Since these injections are EUA, does that mean that there is no liability of manufacturers if there is an adverse reaction?

What is the history of other vaccines that are on the current vaccine schedule prior to them being officially assigned to the current schedule?

As far as trials go, what were the adverse reactions reported for what is under consideration to mandate?

What are the long term adverse reactions? What is considered long term? Myocarditis?

Infertility?

Are these risks outweighing benefit?

Children have a survival of 99%, so why put this inside their bodies to stimulate risk?

What happened to optional? Like flu vaccine being optional? The variant will change consistently like flu virus, so the vaccine would change consistently like a flu shot?

The poor kids say 'oh I want the vaccine but my mommy wont let me because she is afraid.' Lets remember they are children. Innocent, impressionable children. As parents we are here to nurish and protect them from harm. Because the survival rate of children from covid is so high, why are we pushing this?

Lets end the coercion. These children just want the fiasco to end! We as their parents are using our critical thinking skills before rushing into such a new 'vaccine'. We know by choosing to be inoculated, it is irreversible. You can not undo this choice once made.

Here is a link to a testimony from a parent of a 12 year old who participated in the Pfizer COVID-19 trial. Please watch.

https://youtu.be/L2GKPYzL_JQ
<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fyoutu.be%2FL2GKPYzL_JQ&data=

Please watch this link as well, it is another video with a panel of covid-19 vaccine injured people presented by senator Ron Johnson.

<https://youtu.be/6mxqC9SiRh8>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fyoutu.be%2F6mxqC9SiRh8&data=>

The following link is virology data on the injections under discussion. I reccomend visiting and reading it thoroughly.

[https://www.cell.com/cell/fulltext/S0092-8674\(22\)00076-9](https://www.cell.com/cell/fulltext/S0092-8674(22)00076-9)
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cell.com%2Fcell%2Ffulltext%2F00076-9&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C8d93f26add474e54aabc08d9edab09fe%7C11d0e21>>
8674(22)00076-9

Please consider this inoculation to be optional to all of those who reside in Washington state. Looking at the USA in it's entirety, 2 out of 50 states have implemented it as mandatory. This is equivalent to 4% of the USA. That is not the popular choice, obviously. Please listen to the community and what they are asking for. We are asking for freedom of choice in regards to the covid 19 inoculation.

Thank you so much for your time. I appreciate you. May God bless you and your family.

Respectfully,

Christina Thacker

External Email

State Board of Health Representatives,

We do not support vaccine mandates of any kind within our state- vaccine passports, and vaccine requirements for school attendance and employment. Anything one puts into their body must remain personal choice, and even more so when the vaccine in question is still in early stages of use, without a vetted history of safety, and is showing much higher rates of vaccine injury and death than any other vaccine since the data has been tracked by VAERS.

If you choose to vote for vaccine mandates in our state it will not be well received by our citizens. I implore you to be mindful of the people's desires in this matter.

Subject: Inclusion of COVID-19 Vaccine in Immunization Rule

External Email

Hello, fellow Washingtonian.

Please understand that I write this in good faith. I understand why this is being pushed. You probably truly believe you're doing the right thing, and I respect that.

If you have any power by which you can do so, do not include the existing mRNA COVID-19 Vaccines in the immunization rule. If you do, you will lose control of a good chunk of the population. The people who want the shot can get it, good on them. But those who do not, you will turn into outsiders who have no respect for the rule of law; it will be seen entirely as a power grab and everything you say henceforth will be ignored.

We all know COVID poses no serious threat to children, and to adults, both vaccinated and unvaccinated alike, it's becoming less harmful as time goes on. The experimental medicine being pushed by the Big Pharma is not something I'm comfortable letting into the Temple that God gave me. Doing so would be disrespectful to my creator, who put me here in the first place. I will do my best to shield my family from it as well.

The last two years have shown us that all the rules in place for COVID haven't really stopped people from behaving how they wished, and have just made those who do not like the rules dislike and disrespect the government. Those who want to wear masks, vaccinate their kids, and take a booster every 6 months can get it. I think that's fine. That's what freedom in this country is about. But what about the other half? Those of us that don't want it, or at least want to wait a bit longer until a traditional vaccine that works comes out? You're showing us that we're acceptable losses, and that's dangerous.

Anyway. I want you to know I respect you, appreciate you trying to make our state safer, but please stop this. So many have expressed a strong distaste for this. Those who want the vaccine can and should be enabled to get it, and those who don't should also be allowed to hold off. It's my home too. I want to stay in my house, send my kid to school here, and enjoy everything our great state has to offer. I really want to stay here but this is making it hard for me, and others like me.

Please vote no re: mandatory covid-19 vaccinations for school children. Covid-19 is not a great danger to children. The Omicron variant is generally mild except to those individuals with 4 or more comorbidities. The general population has had access to the vaccine for many months now. The vaccines have no long term studies and no FDA approval. There are many instances of the vaccines causing adverse reactions in children and this needs further study. Many families, including my own, will leave the state if faced with this decision.

Sincerely,
Jennifer Goldsworthy

I found it very interesting how 70K people can gather without masks on and simply enjoy an afternoon cheering their team on, without a care in the world.

I called the King County Health Department today and discussed masking with them. They state that the only masks that truly protect people from a respiratory virus are N95. They stated that cloth and surgical masks do not protect me from a respiratory virus. So, 95% of our children, who are wearing cloth masks are wearing face jewelry. I would like to know, do any of you wear a mask for 6-8 hours straight each day?

The CDC is putting out misleading advice - this is their study, and this is their graphic. At first glance, it looks like cloth masks reduced transmission by 56%. Yet, there is an asterisk on this and the note reads 'not statistically significant' - PLEASE STOP MASKING OUR CHILDREN.

<https://www.cdc.gov/mmwr/volumes/71/wr/mm7106e1.htm>

Subject: vaccine mandates for children

External Email

Dear BOH,

After watching the panel of guests it is obviously apparent that vaccination for children is not a long term effective solution and thus should not be integrated into school policy.

Dr Lim's a lack of longevity with a vaccine. And the reliance on a vaccine for upcoming variants is foolish. The other data points from participants showed that children are at nearly zero risk even if this latest variant is more contagious. There has been no discussion as to the health of the children who were hospitalized ie did they have prior conditions before Covid. There is CDC studies that show that obesity is the largest factor in hospitalizations. Also, the discussion of minority increase in hospitalization is directly related to obesity rates in children of various ethnicities which was also ignored.

There is plenty of statistical evidence that vaccines at this point have a decreasing positive contribution for long term effects and will continue to decrease with upcoming variants.

Thank you,
Rebecca Russell

I am beyond angry that covid vaccines for kids are even being considered to enter school. With no studies on long-term side effects of these basically experimental vaccines, the risk to children and especially young teenage boys is far greater than covid. Besides that, children have an almost 100% chance of recovery from Covid. This is not a childhood disease! I can tell you with absolute certainty there is NO WAY my healthy teenage son is ever getting another one of these Covid vaccines.

Please don't make covid vaccines a requirement for public schools. Kids have mild symptoms and the teachers can be protected since they were mandated to be vaccinated. It should be the parents choice what is put into our children's body and for some homeschooling is not a good option. But I see many parents having to make the hard choices to do so . They will leave there jobs. Thank you for your consideration

Agenda Item or Issue:

COVID19 inoculations

3.

Your Name:

Tricia Asher

4.

Do you have a professional title?

2. No

5.

Are you representing an organization?

2. No

6.

Address:

8819 Quinault Loop NE Olympia, WA 98516

7.

Email:

pianotricia@aim.com

8.

Phone Number (Include Area Code):

360-219-3547

9.

Do you have any special expertise relevant to this topic?

2. No

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

To make COVID19 inoculations mandatory for school aged children.

11.

Are you Pro or Con on the proposal?

2. Con

The COVID19 inoculations have not been properly tested as other vaccines have in the past. Also, kids are at a very, very low risk of dying of COVID19. In fact, they have a much higher risk of an allergic reaction to the shot, or dying from the shot than actually dying of the disease.

Subject: RE: SuperBowl & The Big Game

School boards and superintendents... you've typically given the answer "this isn't our call, it's the governor's call"

But when someone orders you to harm children, even just a little, you DON'T DO IT. You just say no. It's never too late to let your conscience be your guide. Free our kids from this madness.

I agree—clearly there is no need for masks, as 70k people jammed into a super bowl stadium proved last night.

No. More. Mandates. Thx.

Please do not add the COVID-19 vaccine to the vaccine requirements for children to attend school. If we wanted our children to have this vaccine we would have already had them receive it. This requirement is not necessary seeing as though most children have already had COVID and have had no lasting affects or complications. Parents should have the freedom to choose what is put into their child's body and should not be forced Inject their children with an experimental vaccine in which we have no long-term data that shows that it's affective at protecting people from COVID-19. The data shows that people who are vaccinated currently are still getting COVID-19. So, there's no need to get the vaccine.

We have no long-term data that shows how the make up of the COVID-19 vaccine will impact our children's overall health, cancer rates, infertility rates, miscarriage and stillbirth rates, or how it will affect their heart. There are some major concerns with this vaccine and its long term impact. It is 100% experimental I do not wish to have my child be enrolled in this experiment. I believe that this will have a negative impact on the public school system as many people who choose not to vaccinate their children like myself will pull their children from public schools and will fight to have the funding for their child go with their child and not to the public school. The people have spoken and do not want this added to the vaccine requirements to attend public school.

Respectfully,
Heather Clerget

Subject: Covid-19 vaccine for children

External Email

Good day,

I am a 38 year resident of Kitsap county, wife and mother of two children. I believe it should be optional for this inoculation that is being discussed currently as a covid-19 vaccine.

I have a few questions about the vaccine getting added to the vaccine schedule for children.

Since these injections are EUA, does that mean that there is no liability of manufacturers if there is an adverse reaction?

What is the history of other vaccines that are on the current vaccine schedule prior to them being officially assigned to the current schedule?

As far as trials go, what were the adverse reactions reported for what is under consideration to mandate?

What are the long term adverse reactions? What is considered long term? Myocarditis? Infertility?

Are these risks outweighing benefit?

Children have a survival of 99%, so why put this inside their bodies to stimulate risk?

What happened to optional? Like flu vaccine being optional? The variant will change consistently like flu virus, so the vaccine would change consistently like a flu shot?

The poor kids say 'oh I want the vaccine but my mommy wont let me because she is afraid.' Lets remember they are children. Innocent, impressionable children. As parents we are here to nurish and protect them from harm. Because the survival rate of children from covid is so high, why are we pushing this?

Lets end the coercion. These children just want the fiasco to end! We as their parents are using our critical thinking skills before rushing into such a new 'vaccine'. We know by choosing to be inoculated, it is irreversible. You can not undo this choice once made.

Here is a link to a testimony from a parent of a 12 year old who participated in the Pfizer COVID-19 trial. Please watch.

https://youtu.be/L2GKPYzL_JQ
<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fyoutu.be%2FL2GKPYzL_JQ&data=

Please watch this link as well, it is another video with a panel of covid-19 vaccine injured people presented by senator Ron Johnson.

<https://youtu.be/6mxqC9SiRh8>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fyoutu.be%2F6mxqC9SiRh8&data=>

The following link is virology data on the injections under discussion. I reccomend visiting and reading it thoroughly.

[https://www.cell.com/cell/fulltext/S0092-8674\(22\)00076-9](https://www.cell.com/cell/fulltext/S0092-8674(22)00076-9)
<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cell.com%2Fcell%2Ffulltext%2FS0092-8674\(22\)00076-9&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cc29f5e2c757e4bdec68c08d9edb1687e%7C11d0e21](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cell.com%2Fcell%2Ffulltext%2FS0092-8674(22)00076-9&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cc29f5e2c757e4bdec68c08d9edb1687e%7C11d0e21)

Please consider this inoculation to be optional to all of those who reside in Washington state. Looking at the USA in it's entirety, 2 out of 50 states have implemented it as mandatory. This is equivalent to 4% of the USA. That is not the popular choice, obviously. Please listen to the community and what they are asking for. We are asking for freedom of choice in regards to the covid 19 inoculation.

Thank you so much for your time. I appreciate you. May God bless you and your family.

Respectfully,

Christina Thacker

I am here to voice my concerns taking place in this State in regard to COVID 19 shots. I feel that every parent chooses what they feel is right for their children and themselves. Whether that means choosing to get a shot or not, just like choosing to breastfeed or use formula. Both are a right answer in what they choose for their family and that because it's a CHOICE. It should always be a choice to get a shot or not, just like the flu shot (Norway already views COVID as the flu so we really need to get on their level). Thousands of fellow parents will pull their kids out of school if this is required. I love my children too much to force junk in their body that has yet to even be proven effective from getting it spreading with the shot- so what the point of even getting it? Due to the thousands of parents pulling their children will only add to the falling economy... as teachers, bus drivers, cooks, etc. will no longer be needed since there will hardly be any children in school. Face it, COVID will not go away- people need to move on and live their life and realize it's not serious. People die from smoking... yet that's still ok....how many alcohol related deaths have there been? Millions... but yet let's still sell it and every venue, restaurant, and store. That makes sense. There isn't a Covid pandemic. There are people with power pulling pandemic. Horrible people that do not respect the constitution. As you can see I am completely against forcing people and children from a shot that they feel is not good for them. And punishing those families who chose not to get it. This is un-American and I hope you are ashamed of yourselves.

I do love me some football but you want to know what I don't love? I don't love my daughter going to school in fear because adults that she does not know nor has never had the chance to develop a relationship with, are masked and barking demands all day long while she complains of headaches day in and day out because she has a mask pressed up against her tiny little face. Do any of you remember what it's like to be a kid? Try to focus and 'do what your told' when the demands are coming at you muffled and with no context of facial expressions. Sounds damn right confusing and scary doesn't it?

That has been the reality for countless youth with these pointless mask mandates.

You have the power to change that. Unmask our children.

Kind regards from an outraged momma bear-

Christina

To Whom It May Concern:

I am writing to inform you that I am completely against any of the proposed Covid Policies that are over reaching and immoral. I completely stand against the proposed WAC: WAC 246-105.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- * Children are at extremely low risk for Covid
- * The vaccines are still only EUA (emergency use authorized)
- * There are no long-term studies to document any history of safety
- * Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- * The vaccine apparently does not stop the spread of the disease

I hope that you take my thoughts into consideration. Thank you for your time.

A Concerned Parent,

Your mandates are harming developing children.

These developing years are never ever repaired once passed.

Your refusal to push against these mandates is cowardly.

The teacher's union needs to be second to these kids.

You're basically using masks on our kids to appease teacher's fears of a virus that has mutated itself into the common cold.

Stop the mandates now.

Kids are leaving WA state schools in mass numbers.

You'll be out of a job because of it.

End the mandates.

Now.

Dr. Lynch

Subject: Re: SuperBowl & The Big Game

It's time to end the almost 2yrs of suffering and burden put on our children. It's time to stop taking monetary bribes and threats and putting money and fear above our children's mental and physical health and well being. We as parents are no longer going to sit by while harmful protocols are forced on our children. Our children's future is in your hands and will be on your conscience forever. We beg you to do the right thing.

Subject: No covid vaccine mandates!

External Email

Dear Board of Health,

I am writing to oppose any covid vaccine mandate--but I especially oppose it for children.

Here's what we know: Children are at virtually no risk from covid. We've known that for almost two years.

Here's another thing we know: Young males are at greatly increased risk of myocarditis from the vaccine, and young females have experienced altered menstrual cycles.

Here's what we don't know: What exactly are the long-term effects of the vaccine? It is impossible to know this because the vaccine has been around for only a year. What will be the long-term effects on males' hearts? What will be the long-term effects on female fertility? What other long-term effects might come up in five or ten years?

It makes absolutely no sense to give children a vaccine they do not need (because the disease is not bad for them), when the vaccine already has known negative effects for young people.

I'm not some anti-vaccine wacko. I made my own risk/benefit analysis based on my own age and situation, and I decided to get vaccinated. But the case is entirely different for children and young adults.

Parents should be able to make their own risk/benefit analysis for their own kids. If a child is overweight, has diabetes, or has some other medical condition, the parents might decide to vaccinate their child.

But the state has absolutely no right to mandate a covid vaccine as a condition of receiving the education the state has a duty to provide to all children who want it. Covid poses virtually no risk to children, while the vaccine might.

Government overreach has to end. The state should not be mandating covid vaccines even for adults. It is now abundantly obvious that even vaccinated people can get and transmit covid, so there is no justification for mandates.

I hope you will not bow to pressure from teachers unions or others. Put the interests of the children first, and refuse to mandate vaccines.

Thank you,
Sharon Damoff

☐ Good evening,
LWSD, ISD, BSD, OSPI, WA State Ed, WABOH, and King County Commissioner:

A feeling of both joy and dread settled over me this morning as I prepared my daughters for school. Wasn't it refreshing to see smiling faces, hugs, and high fives on live TV, last night? Wow! Yet, despite the fun and games, the dark cloud of hypocrisy that the Super Bowl festivities highlighted has loomed overhead. While adults play, children and their teachers continue to be masked all day, everyday.

We ask our children to follow rules yet we, as adults, do not adhere to the very principles we preach. How, as educators and leaders in education can you continue this charade? Please, I beg of you, take the baton and lead us out of this insanity. We all know masks do not prevent the spread of COVID in schools. I know you have read the data. Children can no longer shoulder a burden that was never theirs to carry. You have the power to stand up against Gov Inslee's mandates. Join us in saying, 'Enough is Enough!'

Respectfully,

Jody Isaacson,
Parent Advocate

To whom it may concern,

I am writing to express my thoughts on the potential COVID-19 vaccination requirement for school age children. I am an individual who is in favor of vaccines and have all my children vaccinated as recommend, with the exception of the COVID -19 vaccine. My husband and I are also vaccinated for COVID. My children all got very mild cases of COVID prior to there being an available vaccine for them. As data is showing and as is usual with almost every virus/infection, natural immunity rises above the coverage a vaccine can give. I do not at this point, feel the need to get the vaccine for my children, especially until we know what and if there are any long term effects as the result of vaccination.

Please consider halting the requirement until we have ample information on the long term effects, especially in children. Children are at low risk for this virus and I feel that the decision to vaccinate should be left to the parents and children themselves as it is with the flu vaccination. If the data shows no long-term (5 or more years) ill-effects, I would not be opposed to a requirement then.

If we say we are following the science, then we do understand that even vaccination doesn't stop you from getting or spreading it. It only makes it less severe. Almost all cases in children are mild and not much more than cold-like symptoms. It should be up to each individual and family to decide what their risk is and take the necessary actions to protect themselves.

Please, please consider these opinions before we implement an unknown.

Thank you,
Mandy Van Hofwegen

Subject: I OPPOSE: Bill to deciding Covid Mandates to require for daycare and elementary schools.

External Email

I am a concerned citizen who is entering a comment for the first time. I greatly oppose the state of Washington requiring all daycare and Elementary Children to be vaccinated from the Coronavirus, or any vaccinations. I believe it is the parent's choice as to what vaccines to give them based on their doctor's recommendations. Also, the vaccine is still an Experimental vaccine, and heart problems are being seen in young people especially men. No one knows the long term effects, especially on children!! Many children could have allergic reactions to the covid vaccine, like they do with other vaccines.

PLEASE DO NOT REQUIRE CHILDREN TO BE VACCINATED IN DAYCARES AND SCHOOLS RUN BY THE STATE OF WASHINGTON.

I ALSO WANT TO COMMENT THAT I THINK ALL MASK MANDATES SHOULD BE REMOVED FROM ALL CHILDREN OF ALL AGES IMMEDIATELY.

Thank you very much.

Please do not require or force the COVID 19 vaccines on children. More children have been negatively affected by vaccines than have been sick or died from covid. The children that have passed away had other medical issues that put them at particular risk; however, the vast majority are not at risk of covid 19. However, with the vaccines, myocarditis is more deadly to children than covid 19 and this has played out in the numbers.

We also don't know the long term effects on fertility and this vaccine should not be allowed or approved for children at any age.

Please follow biological science and not political science. It is very apparent that the majority of decision makers have been following political science and not biological science. Please do NOT harm our children with these untested vaccines. It's one thing to require the measles vaccines that have been around for decades; however, covid 19 vaccines have only been around just over a year. The numbers are not looking good for the safety of the covid 19 vaccine. The numbers from the Military are alarming. The numbers from insurance companies, that are required to review actual death rates and why so they can set premium rates, are extremely alarming. Ignoring these warning signs is gross negligence. We must protect our most vulnerable from even the most well meaning individuals/decision makers. We should not be making rash decisions that will have long standing impact that can't be reversed. We need more data on the vaccines before we force it on children.

Please vote NO on requiring Covid vaccines for children under 18.

I am beyond angry that covid vaccines for kids are even being considered to enter school. With no studies on long-term side effects of these basically experimental vaccines, the risk to children and especially young teenage boys is far greater than covid. Besides that, children have an almost 100% chance of recovery from Covid. This is not a childhood disease! I can tell you with absolute certainty there is NO WAY my healthy teenage son is ever getting another one of these Covid vaccines.

Subject: Vote NO - WSBOH Public Meeting agenda on 9-Feb to discuss "Technical Advisory Group to Consider COVID-19 for Inclusion in chapter 246-105 WAC"

External Email

Dear Washington State Board of Health,

Re: WSBOH Public Meeting agenda on 9-Feb to discuss "Technical Advisory Group to Consider COVID-19 for Inclusion in chapter 246-105 WAC"

To the Washington State Board of Health,

I wish to formally state my objections to the forthcoming proposal on mandating the experimental Covid-19 vaccinations for childcare and school entry. It is well documented through government sanctioned resources, such as the CDC's VAERS and the World Health Organization, as well as numerous international government bodies, that have reported on the efficacy of this experimental mRNA gene therapy, currently authorized for emergency use only, as being unsuccessful in reducing the spread and severity of the virus, including all variants. This is further evident in the continued increase in recorded breakthrough positive cases amongst the fully vaccinated throughout the state.

It is the role of this board and institution to thoroughly evaluate the risks vs. the benefits of these experimental vaccinees and protect our children from harmful medical intervention. It is beyond clear that these experimental vaccines have not been properly tested and peer-reviewed for safety, as required to ensure the protection of our children, and therefore presents an unacceptable risk to their wellbeing. I would further call to your attention the high risk to our children of adverse reactions from the experimental vaccines as reported by the CDC's VAERS systems which has documented hundreds of thousands of adverse reactions to the vaccines and over 20,000+ deaths (US data <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fvaers.hhs.gov%2F&data=04%7C>, Dec 2020).

Furthermore, in September 2021, the CDC changed the definition of the terms "vaccine" and "vaccination" to accommodate for the experimental mRNA gene therapy (see reference below). These new definitions...

* No longer cite that a vaccine produces immunity, rather, cites they now stimulate

an immune response.

* No longer cite that vaccination produces immunity, rather, cites they will now produce protection.

As a result of the new CDC definitions, the experimental Covid-19 vaccinations are not in compliance with RCW 70.290.010

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault> which states the following:

"Vaccine" means a preparation of killed or attenuated living microorganisms, or fraction thereof, that upon administration stimulates immunity that protects against disease and is approved by the federal food and drug administration as safe and effective and recommended by the advisory committee on immunization practices of the centers for disease control and prevention for administration to children under the age of nineteen years.

Effective immediately, the WSBOH shall be put on notice that by making the experimental Covid-19 vaccinations compulsory for childcare and school entry, you will be in violation of the Washington State Constitution (RCW 70.290.010).

Finally, this mandate will have a detrimental effect on Washington State citizens, families and children, most notably:

- * Washington State parents pulling their children from both public and private institutions at an even more alarming rate than experienced to date (4.5% lower, or over 50,334 reported in Nov 2021, <http://www.cfc.wa.gov/Documents/ForecastNarratives.pdf> <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.cfc.wa.gov%2FDocuments%2F>).
- * Decrease in federal funding for Washington State public education system.
- * Increase in parental hardships securing new education system(s) and/or institutions for their children.
- * Increase in mental and physical health issues for families.

It is of the utmost importance our children's safety is the top priority of this board.

Regards,

Melissa Jenkins

Ladies and Gentlemen,

As a concerned parent, I write to say, making the covid vaccine a requirement for school, is not in the best interest of our children. There has not been enough time to see the long term affects of using mRNA technology. To even consider risking our children on something experimental is beyond my comprehension. It is a virus that has already changed multiple times, requiring 3-4 shots, that is insane. Vaccinated or unvaccinated, you can have covid, you can spread covid. It does NOT stop the spread. The risk for serious illness is small in children. It is beyond ridiculous that our state is even considering this. This is not about our children. It's about power in the wrong hands. Too much power given to the wrong people. Look at the Data. High vaccination rate does not equal lower covid cases. It's everywhere you want to look, if you are paying attention. Do not make it mandatory to attend school. Our schools have lost so much already. This will be a bigger blow to the education system. You will loose so many students.

Sincerely
Christy

I think this is bullshit what you people are doing. If you go back to your charts covid wasn't in the top ten for kids deaths. The flu had killed more kids then it but you don't make kids go and get that to go to school. Also maybe you guys should be looking at the suicide numbers of these kids cause that was top 3 for all list. You guys should be helping kids get mental health not pushing poison in to them. Way are you guys not talking about the kids that are dying from the shot.I? Question if my son's get this and die because you guys feel they needed it can I trun around and sue you guys because that's was going to happen when this all goes backwards guess you will be seeing alot of people in court but I know my kids won't get this because we will be leaving this state cause you guys don't care about the kids only the money in your pockets form the drug companies. Thank you have a good day

children. As a cytotechnologist myself, I am unusually aware of some of the chemistry and affects of such products compared to many people. This is an emergency use product and the idea of approving this for young children is extremely inappropriate.

This is and will continue to come back to haunt the medical community and families of so many persons that are being negatively affected by this product and the idea of adding another age group to this product for usage is absurd.

Dear Ms. Schreiber,

My name is Erica Teodoro and I am the parent of two students in the Peninsula school district.

I am writing to you today to ask that you please consider giving local control to the Washington school districts as to whether or not to lift mask mandates in schools. Schools around the country are starting to create exit plans for the mask mandates and it seems reasonable that our schools should be allowed to do the same should they see fit.

My kids have noticed a stark decrease in morale at their schools compared to pre-pandemic due in part to teachers having to use precious education time instead to police masking. They didn't sign up for this, they aren't trained for this, and everyone's patience is wearing thin.

Please, help our students get back to the business of growing and learning and thriving in their schools by allowing the individual districts to make the choice to lift mask mandates.

Thank you for your time,

Erica Teodoro

Vote NO on criteria 5
Vote NO on Criteria 6

It is proven that the covid jabs have a far greater health risk and side effects than the benefit. There is no COVID emergency for children. Children have a 99.995% recovery rate from COVID and healthy children are not dying from COVID. Not only is this injection medically unnecessary for this younger age group, but there are clear signals coming from U.S. government sources that the risk to human health is real, and that adverse events to this vaccine are not rare.

The COVID jab will NOT protect you from severe illness and death. Mounting evidence suggests it might actually destroy your natural immune function, especially after the third dose. In fact, cancers, strokes, and other diseases are affecting people who got the shot at an alarming rate. This mandate must stop now! These so called vaccines are dangerous!

External Email

Hello,

I watch the compete Tag meeting today, Its nice they show fancy graphs and data about the Delta virus. They can't prove that Vaccination of school age Children will stop or reduce the spread of Covid-19. That is the point of having a shot for school. 28A.210.060

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx&id=28A.210.170>>
through 28A.210.170

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx&id=28A.210.170>>

All teachers are now vaccinated and several teachers at the school they attend has had covid-19 in the last few months including the principle.

No data showing that vaccination will stop the spread or reduce the spread of covid-19. The numbers they provided do not take in consideration the health of the children that have died with covid.

Will Dept of health be liable for any child that dies or has long term health effect from the shot? The Governor? Shot manufactures? NOPE

Is the Dept of health in charge of my child's health? More children have committed suicide in the past 2 years than have died from Covid-19. Are you doing anything about this? Nope

Long term effects of the shot? Nope

How do vaccines work?

When a person gets an infection, the body reacts by producing antibodies. These antibodies fight the disease and help the person recover from the illness. Antibodies stay in the body, even after the disease is gone, and protect the person from getting the same disease again. This is called immunity.

Vaccines work in a similar way, by preparing your child's immune system to fight a disease without actually giving your child the disease. When a child gets a vaccine, her or his body makes antibodies against the disease. These antibodies will recognize and fight the real disease if she or he is ever exposed to it.

Immunize:

- * To prevent common but serious illnesses. Some diseases, like pertussis (whooping cough), flu, varicella (chickenpox), and rotavirus, are very common in the U.S. Choosing not to vaccinate is a choice to risk getting a serious and sometimes deadly disease.
- * To prevent diseases that still exist. Some diseases, like measles and mumps, still occur in the U.S. at low levels. If fewer people are immunized against these diseases, outbreaks can occur.
- * To prevent diseases that are common in other parts of the world. Although some diseases, like polio, are rare or do not exist in the U.S., they are still common in other parts of the world. With frequent international travel, these diseases are literally only a plane ride away.

To protect others in your family and community. By immunizing your child, you also protect those who:

- * Have weak immune systems.
- * Are not fully immunized.
- * Cannot get shots because of a medical condition or because they are too young or too old.
- *

In enacting RCW 28A.210.060

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx&cid=3a2f2fapp.leg.wa.gov%2FRCW%2Fdefault.aspx&context=legislation&id=28A.210.060&ipRedirectedFrom=28A.210.170>>

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx&cid=3a2f2fapp.leg.wa.gov%2FRCW%2Fdefault.aspx&context=legislation&id=28A.210.060&ipRedirectedFrom=28A.210.170>>, it is the judgment of the legislature that it is necessary to protect the health of the public and individuals by providing a means for the eventual achievement of full immunization of school-age children against certain vaccine-preventable diseases.

Covid-19 Is not preventable

WAC 246-105-030 Vaccine-preventable diseases children must be protected against for full immunization. In accordance with the conditions of this chapter, a child is required to be vaccinated against, or show proof of acquired immunity for, the following vaccine-preventable diseases before attending school or a child care center: (1) Chickenpox (Varicella); (2) Diphtheria; (3) German measles (Rubella); (4) Haemophilus influenzae type B disease; (5) Hepatitis B; (6) Measles (Rubeola); (7) Mumps; (8) Pneumococcal disease; (9) Polio (Poliomyelitis); (10) Tetanus; and (11) Whooping cough (Pertussis).

Subject: COVID vaccines mandate for children

External Email

To WSBOH, et al.,

I am writing to ask that you seriously step aside from your personal biases & look at your own data. The WSDOH removed the demographic of COVID deaths by age from the COVID data dashboard. Why?? I'll tell you. Because there are less than 2 deaths in ages 2-19 and there are no children being hospitalized. The data does not support the narrative and had to be removed in order for WA State to continue its governor's power trip which is now heavily corrupted by various sources of 'COVID relief funds.'

A peer-reviewed July 2021 study revealed that COVID cannot be transmitted asymptotically & it was not transmitted from children to adults. I am sure you can find the one off study or data point that shows otherwise, but policies are made for the majority, not the single data outlier.

We all know that the board will try to compromise the situation and offer the vaccine mandate in exchange for dropping the mask mandate. This is not an exchange!!! All mandates are unwarranted, not supported by any data and need to be dropped immediately.

I have personally watched our children suffer in anguish over masks & bullying and witness their parents be shunned and segregated while their medical choices are publicly displayed against their will.

I am including an email sent to our local school board to ensure it reaches you. It was composed by a fellow citizen, Janice Haney, and copied here for your serious consideration as you ponder making harmful life-altering decisions for our youth.

'Healthy children are not at risk for severe disease or death due to COVID. According to the CDC, the COVID fatality rate for children is 0.002%. We need to quit asking our children to bear the burden of COVID for adults. Have we lost all common sense and empathy for our children? We certainly are no longer focusing on science. The cloth masks typically worn by school children do not work. They do not stop the transmission of COVID. The only mask that works is a KN95 and even then, they have to be properly fitted, properly worn and changed out on a regular basis. Additionally, there are NO studies that show masking children is necessary for the safe operation of schools, but there is data from Florida, Tennessee, North Dakota, Texas, the United Kingdom and Spain that confirms you can safely operate schools without a mask mandate. So, tell me, what are the benefits of putting our kids in a mask for eight to ten hours a day? I can't think of one. And if there were a benefit, shouldn't the benefit outweigh the harms? Masks hinder communication and speech development, they interfere with social interaction between the teacher and the child and between the child and their peers. Facial expressions are an important part of human connection. Mask can be uncomfortable and make it harder to breathe and harder to see for those children wearing eyeglasses. A study from Oxford Clinical Infectious Diseases found that "single-use medical masks were preferable to cloth masks for which there is no evidence of

protection and which might facilitate transmission of pathogens when used repeatedly without adequate sterilization." Dr. Marty Makary, professor at the Johns Hopkins Bloomberg School of Public Health, wrote this about the adverse effect of masks on kids: "In March, Ireland's Department of Health announced that it won't require masks in schools because they "may exacerbate anxiety or breathing difficulties for some students." Some children compensate for such difficulties by breathing through their mouths. Chronic and prolonged mouth breathing can alter facial development. It is well-documented that children who mouth-breathe because adenoids block their nasal airways can develop a mouth deformity and elongated face. A study published June 30th, 2021 in the Journal of American Medical Association Pediatrics section, found that the wearing of nose and mouth coverings by children leads to an increase in carbon dioxide levels in both inhaled and exhaled air while wearing a mask. The authors, a group of physicians from Germany, Poland and Austria, concluded that the findings "suggest that children should not be forced to wear face masks." In December of 2021, the U.S. Surgeon General Vivek Murthy issued a public health advisory on the mental health crisis impacting our youth. Murthy called for action to address what he called an emerging crisis exacerbated by the pandemic. Symptoms of depression and anxiety have doubled during the pandemic, with 20% of youth experiencing anxiety symptoms and 25% experiencing depression symptom. Suicides attempts for boys were up 4% and girls were up 5% from 2019. Studies confirm the negative impacts on children's mental and physical health due to social distancing, masking, school closures, lockdowns and the resulting isolation.

Our kids and grandkids deserve more from us. The RSD Board is worried about losing state and federal dollars, but what has RSD done to push back on the school related COVID mandates? What has RSD done to stand up for mask choice? Have you partnered with any other like minded schools? Have you written a letter to the DOH and Governor Inslee in protest of mask mandates and provided them with the scientific information that masks and the various restrictions are harming our children? It is time to do the hard thing. It is time to be a profile in courage for what is right. We can not ignore what is right over what is convenient, over the path of least resistance. What's next? A state COVID vaccine requirement to attend school? We aren't protecting, we are harming. It is true, that evil prevails when good men do nothing and history is not going to view us in a good light concerning all the decisions we have made pertaining to COVID, but history is going to be appalled at the decisions those in charge have made related to our children. We are not helping, we are harming our children to protect adults. Enough is enough. I am requesting that the RSD Board bring forward a resolution requesting the Governor lift the state mandate for COVID.'

Janice Haney

I am a youth coach to over 200 children weekly. The damage I am seeing in my students will be difficult to recover from. Mandates must end now and our children be given back their childhood & our workers have their livelihoods reinstated. People, hypocrites, travel all over the USA mask & vaccine free. COVID does not stop at the state border. I demand the WSBOH to do the right thing & break the glass walls of WA so we are part of the FREE USA again and our children can be raised as FREE courageous Americans.

Respectfully,

Wendy Robbins

Hi,

I've been listening to the TAG meeting and wanted to provide my feedback. The below points may be addressed later in the meeting but as a parent and not a doctor, these are my two biggest concerns/questions.

* Is this really a vaccine? - For other vaccines that are mandated for school, they are truly vaccines and don't need to be given every year. Should the covid shot really be considered a vaccine? It's clear that the effectiveness of the covid shot decreases with time so would you require a booster shot for children every year? I would consider getting my child vaccinated if it were one or even two and done but I'm not willing to get them boosted every year especially since my kids just had covid and barely had a headache and runny nose.

*

* Risk/benefit - Whenever there is risk involved, there should be choice. As a parent, I believe I have the right to choose what is best for my children based on their personal health and my own experience. My brother had myocarditis after his second shot and I'm very concerned about my pre-teen son. I'm more concerned about myocarditis from the vaccine since it happened to a relative vs being concerned about getting it from covid especially since my son already had covid and is fine. I also had a disruption to my menstrual cycle after getting the vaccine which makes me wonder and be concerned with what impact would have on my daughter. These are all things that parents weigh in their minds and we should have the right to make decisions for them. I don't believe there is a one-size-fits-all. Some kids with underlying health issues should definitely get vaccinated and I'm happy my 100 year old grandma and my parents are vaccinated but I don't see the benefit outweighing the risk for my healthy children.

I know many parents in my community feel the same as me and I think in the country that is why the vaccination rates are so low for children. I know quite a few people who will pull their children from public school if there is a vaccine mandate. I already pulled my children from public school this year which I never thought I would do but I wanted them to have as normal of a school year as possible without all of the rules and I also wanted more control over their environment at school. I really want to come back to public schools but not if the government takes away my ability to make health choices for my children.

Thanks for considering my feedback.

Regards,
Lisa

To whom it may concern,

You will see a large number of unenrollment should you make this mandatory. Please leave it optional so that kids can continue to participate in the public school system.

Thanks,

Good Morning-

I am emailing You in regards yo no COVID "vaccine" for kids to attend school! The mandate is disgusting that it would even cross your mind! I'd you are really into "following the science" you will see that the survival rate for everyone is higher then the death rate and for kids that rate is even higher! It is absolutely unacceptable to inject our healthy children with a poison that doesn't even stop a disease that has a 99% survival rate! The vaccine adverse reactions are far higher than the non existent efficacy of this shot! STOP this absolutely backwards way of thinking! NO COVID shot for kids!! Make it a parents choice!

You need to look at real data for Myocarditis! Look at the real facts! Do not make this a requirement for our children to attend school!

Regarding Covid vaccinations for school children. They are giving a lot of information from multiple sources, but nothing from any scientific professionals who do not agree with vaccinating school age children, so how is this a balanced discussion and how will everyone make an informed decision if not all sources are being presented? After listening to all these speakers I still do not understand how the state can even think they should be able to decide for parents how they should handle ANY vaccinations for their children. I'd like to know what gives ANYONE the right to take away a parents choice on vaccinations.

Thank you

Margie Byrd

<data:image/png;base64,iVBORw0KGgoAAAANSUhEUgAAAAEAAAABCAQAAAC1HAwCAAAAC0IEQVR42mNK

The CEO of the OneAmerica insurance company recently disclosed

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Finsurance-forums.com%2Flife-insurance%2Foneamerica-ceo-says-death-rates-among-working-age-people-up-40%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C45b2d2692711461a3a5b08d9ecc58223%7C11d0e2>
that mortality in the 18-64 age group was 40 percent higher during the 3rd and 4th quarters of 2021 than during pre-pandemic levels. For reference, the CEO indicated that a 10 percent increase would have been a 1-in-200-year event. Furthermore, most of the deaths were not attributed to Covid.

<data:image/png;base64,iVBORw0KGgoAAAANSUhEUgAAAAEAAAABCAQAAAC1HAwCAAAAC0IEQVR42mNK

Figure 1: US weekly deaths by age group. Data

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fnchs%2Fnvss%2F>
is from the CDC. The gold curve is data for 2021. The red curve is data for 2020. The gray curves are data for 2015-2019.

The OneAmerica insurance company serves a subset of the US population. The CDC collects mortality data

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fnchs%2Fnvss%2F>
for the entire US population. Figure 1 illustrates the weekly US mortality from 2015-2021

by age group. Several generalizations are readily apparent. The years 2015-2019 were very similar for all age groups forming a tight band of usual expectation. The tightness of the band for 2015-2019 means that relatively small increases in mortality are very significant events. There has been nothing unusual about mortality for the Under-25 age group during the Covid period compared to recent history. The last 10 weeks of data for 2021 are incomplete due to delays in reporting death certificates. Otherwise, mortality for the Over-25 age groups have been higher than historic norms starting in about March of 2020 and continuing to the present time with one big exception for the 85+ age group.

There is a very interesting interval from Week 10 (March 7) 2021 to Week 24 (June 13) 2021. Deaths in the 85+ Age Group are LOWER than average during this interval. Total deaths for Weeks 10-24 averaged 248,536 during 2015-2019, but were 242,372 during 2021. For the 25-44 age group, total deaths for Weeks 10-24 averaged 38,955 during 2015-2019, but were 54,789 (40.6 percent higher) during 2021. Daily Covid deaths (7-day moving average)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.worldometers.info%2Fcoronavirus-in-the-us> were declining from 1,689 on March 7, 2021, to 387 on June 13, 2021. This time period was the decline phase of the winter outbreak that peaked around January 18, 2021, and reached a nadir around July 8, 2021 prior to the Delta surge. One cannot plausibly attribute the above average deaths for the 25-44 age group during this time period to Covid. What was responsible for these deaths?

<data:image/png;base64,iVBORw0KGgoAAAANSUhEUgAAAAEAAAABCAQAAAC1HAWCAAAAC0IEQVR42mNk

Figure 2: Weekly US mortality by Cause Group. Data <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fnchs%2Fnvss%2F> is from the CDC. The gold curve is data for 2021. The red curve is data for 2020. The gray curves are data for 2015-2019.

Clearly there is a very significant above average number of deaths across the US that cannot be attributed to Covid. As was the case for the Age Group graphs, data for the last 10 weeks are incomplete due to delays in reporting of death certificates. Deaths attributed to Malignant Neoplasms were average during the entire pandemic period. Although there was an increase in deaths from Alzheimer Disease and dementia in 2020 after the onset of the pandemic, this was less apparent during 2021. There was an increase in deaths attributed to Other select causes (which include suicides and drug overdoses), but the magnitude was much smaller than what is seen in the Circulatory diseases category. Deaths attributed to Circulatory diseases include strokes, heart attacks, and heart failure (including myocarditis). The Circulatory diseases category is clearly the most important category for excess deaths during 2020 and 2021. Notably, deaths attributed to Respiratory diseases were below average during 2021 for the period of interest between Week 10 and Week 24 of 2021. Covid is a

respiratory disease and leads to acute respiratory distress syndrome with hypoxemia and respiratory failure in severe cases. During the period of interest between Week 10 and Week 24 of 2021, Covid deaths were steadily declining, deaths attributed to Respiratory diseases were below average, but deaths due to Circulatory diseases were significantly above average. It is difficult to explain the data between Week 10 and Week 24 of 2021 on the basis of lung injury caused by Covid infection.

The spike protein enables entry of the virus into the host cells. The spike protein targets the angiotensin converting enzyme-2 (ACE-2) receptor. Angiotensin converting enzymes play an important role in the regulation of blood pressure. Angiotensin receptor blockers (ARB) and angiotensin converting enzyme (ACE) inhibitors are both important classes of drugs used to treat hypertension. It does not require a stretch of the imagination to suspect that the spike protein could cause elevation of blood pressure. Acute elevation in blood pressure is known to be a risk factor for stroke, acute myocardial infarction (heart attack), and congestive heart failure. Spike protein is also associated with clotting, presumably due to endothelial injury, which would also increase risk for myocardial infarction and stroke. It is not clear why spike protein from the Covid virus would explain above average deaths attributed to Circulatory diseases during a time period when Covid cases and deaths were declining. However, the Covid virus was not the only source of spike protein during this time period. The mRNA vaccines led to the production of spike protein by host cells and Weeks 10-24 of 2021 were immediately followed by the mass introduction of mRNA vaccines to the US public. The data is not proof, but it is certainly a red flag.

The appropriate method to assess vaccine efficacy and safety is all cause mortality. Deaths from all causes are compared between the vaccine group and a control unvaccinated group. This method has not been used. Rather, the CDC and FDA determine on a case-by-case basis whether reported adverse events can be attributed to the vaccine. If a footballer drops dead during a game, one would not be inclined to attribute the cause to a vaccine given 10 weeks earlier. However, when 5 footballers drop dead every week, one will be looking for ANY common denominator between the dead footballers. Neither the CDC nor the FDA are impartial observers of vaccine safety. Both agencies have vested interests in promoting the vaccines. When the CDC or FDA analyze events on a case-by-case basis, they are inclined to say that an event was not due to a vaccine (especially if the people at the CDC and FDA include former executives from Pfizer). However, when the entire US population has a significant number of events compared to historic basis, one must look for the common denominators in the people with the events. The existing data is not proof that the vaccines are causing deaths due to Circulatory diseases. The burden of proof, however, lies with the CDC and FDA to prove that the vaccines are not causing deaths due to spike protein. It is scientific irresponsibility to eliminate the control group via vaccine mandates and make future assessment of vaccine safety scientifically impossible.

On Thursday, February 10, 2022 9:28 AM, Debra Wells <debrakwells@startmail.com> wrote:

Please do not require or force the COVID 19 vaccines on children. More children have been negatively affected by vaccines than have been sick or died from covid. The children that have passed away had other medical issues that put them at particular risk; however, the vast majority are not at risk of covid 19. However, with the vaccines, myocarditis is more deadly to children than covid 19 and this has played out in the numbers.

We also don't know the long term effects on fertility and this vaccine should not be allowed or approved for children at any age.

Please follow biological science and not political science. It is very apparent that the majority of decision makers have been following political science and not biological science. Please do NOT harm our children with these untested vaccines. It's one thing to require the measles vaccines that have been around

for decades; however, covid 19 vaccines have only been around just over a year. The numbers are not looking good for the safety of the covid 19 vaccine. The numbers from the Military are alarming. The numbers from insurance companies, that are required to review actual death rates and why so they can set premium rates, are extremely alarming. Ignoring these warning signs is gross negligence. We must protect our most vulnerable from even the most well meaning individuals/decision makers. We should not be making rash decisions that will have long standing impact that can't be reversed. We need more data on the vaccines before we force it on children.

children under 18.

Please vote NO on requiring Covid vaccines for

I stand with parent choice. The mountain of evidence by well respected and published virologists, epidemiologist and other medical professionals from MIT, Yale and other prestigious colleges continue to point to not vaccinating young children and young healthy adults. It is clear BOH and other institutions do not concur but it is our rights as parents to choose what medical choices we will pursue for ourselves and children. Many parents/citizens have completely lost faith in our government and schools to preform their basic function. We will not subject our children to a medical procedure with minuscule and manipulated data under any circumstance. As you known the MRNA does nothing to stop the spread of the Covid virus and as additional variants ultimately move thru society the science shows the mRNA has less, to zero efficacy . The lies of virus stopping from mRNA are over and overall effects of the mRNA is dismal at best; and are unjustified in children.

You know cdc data says you're 6 times more likely to suffer an injury from the MRNA then you are to end up hospitalized from COVID as a child.

Our children will be removed from school before they are subjected to a unnecessary mRNA shot. There is ZERO long term data on children and reproductive effects from MRNA.

The word is spreading it won't long before the attempts to completely control the narrative is not containable.

COVID is 99.9975 % harmless towards children; everyone in Washington state government knows it.

Take note we are paying and parents will be protecting their children !

Respectfully, Kevin.

Subject: Adding Covid-19 vaccines to the list of required vaccines for WA State preschool/school age children

External Email

For ALL the reasons stated in the Informed Choice WA letter submitted to the WA BOH regarding mandating the Covid-19 vaccines for all preschool/school age children, I wish to go on the record as stating that these vaccines should NOT be made mandatory, but left up to the parent(s) choice.

Given the ever increasing volume of evidence from renowned physicians, the growing number of adverse reactions/deaths and the lack of short and long term safety studies, there is no way this should be made a mandatory shot for the children of Washington State.

Thank you,

KathyEgbert15@gmail.com <mailto:KathyEgbert15@gmail.com>

Abraham Lincoln once said, "America will never be destroyed from outside. If we falter and lose our freedoms, it will be because we destroyed ourselves."

Freedom is never more than one generation away from extinction. We don't pass it on to our children in our blood. It must be fought for, protected and handed to them by our example or one day we will spend our sunset years telling our children and our children's children what it was once like in the United States when men were free. Dear Sir or Madam,

Washington State has recently begun pushing the vaccine policy on our children, and it seems that it is with or without parents' permission! The question is, "ARE YOU GOING TO LET THAT HAPPEN?" It's not yet a mandate, but based on the way that other campaigns have gone, it's just a matter of time before they attempt to make it mandatory for everyone.

I've noticed a disturbing pattern has emerged during these challenging times. It seems that politicians have completely absolved themselves of their duties and responsibilities to the people that have elected them. They are totally relying on those so-called "health experts" to make their decisions. Our system of government was not designed to be governed by unelected bureaucrats, who are often more concerned with lining their pockets than their concern for society. It looks like politicians have turned a blind eye to the conflicts of interest over financial motives that involve many of these so called "medical experts."

I'd like to remind everyone that during WW2, many doctors who were so-called "experts" were involved in the systematic extermination of the Jews. They were also involved in gruesome medical experiments, which included forced injections of experimental and often lethal drugs. DOES THIS RING A BELL? We seem to have forgotten that highly-educated people who are not guided by a clear conscience or moral compass have become some of the most evil and prolific murderers in history.

I hope that you will think about these issues and pray that it will help you in making the morally-right decisions on what is best for Washington State children.

For the record Hannah. I am strongly against the COVID vaccine mandate for children in public schools in Washington. In fact. I am again any sort of mandate that supports showing a vaccination card to get into a restaurant, event or public place of any sort. By the way, it is NOT a vaccine, it's a flu shot.

Parents are the only ones who have the right to decide what, if any, vaccines a parent gives their child.

We will continue to flood your office with phone calls, emails and oppose any mandate on social media.

We will not give up or back off.

I am beyond angry that covid vaccines for kids are even being considered to enter school. With no studies on long-term side effects of these basically experimental vaccines, the risk to children and especially young teenage boys is far greater than covid. Besides that, children have an almost 100% chance of recovery from Covid. This is not a childhood disease! I can tell you with absolute certainty there is NO WAY my healthy teenage son is ever getting another one of these Covid vaccines.

Good afternoon,

I am one of MANY concerned parents who do not approve of the decisions being made to add the covid shot as a requirement for school aged children to attend school. I watched your virtual meeting yesterday between the Technical Advisory Group (TAG) and the WA State Board of Health (SBOH). Your "data" presented was not sufficient to even make an educated decision on Criteria #5 or #6 (or any of the 9 criteria for that matter), many of you even said so yourself. Please understand that your vote, your unanimous recommendation to the Department of Health, affects ALL of us parents.

For those of us parents who do not want our children being forced to take this experimental shot, please hear us out. If the tables were turned, and the government was trying to pass a law or new code/requirement that would force YOU to either do something to your child that you wholeheartedly did not approve of or pull them from school and uproot your whole life and everything you've worked for to move somewhere else to stand up for what you believe in, how would that make you feel? I have lived in Washington my entire life, so have my parents and my grandparents did too. Everything I know, love and have worked so hard for, is here. All of you with TAG and SBOH and many other agencies/organizations of government are jeopardizing every aspect of my life with your decisions. The public no longer has a voice, we are being ignored and censored left and right. PLEASE. Hear me. I am begging you. I will not allow my children

to be injected with an experimental shot. My kids and myself are otherwise fully vaccinated and get our flu shots. I am NOT anti-vaccine. I am simply a very concerned mama bear who wants to protect my cubs. Imagine for a moment if the most important people in your life were being forced to do something they did not want with every fiber of their being and ask yourself how you would feel. My heart is SO heavy. Tears are flowing as I write this. Please understand that the choices you are making affect people who may not have the same opinions, views, beliefs as you do. Are you really ok with harming others just because they think differently than you do?

Since when is it a crime to protect your own child?! I have been called so many awful, ugly names, because I will not make my toddler wear a face covering in public. How is this ok? I don't call people names because they choose to wear a mask or get a shot. I truly respect everyone and the decisions they make for their children. We are all trying to do what is best for ourselves and our loved ones. Why can't that be respected? Why are you trying to rip that CHOICE away from me? What would it take for you to understand how I am feeling? Would it make a difference if I sat in front of you crying while holding my children? This is not fair. Surely you can see that. The vaccine is too new for me to trust it. We don't know long term effects. There is no way that we could! Covid has only been around for a few years and the vaccines even less time. Can you imagine if you voted yes for this to be implemented and years down the road we saw all kinds of defects and illnesses and deaths associated with these vaccines and boosters?? The blood would be on your hands. PLEASE, PLEASE, PLEASE. Let the PARENTS make the choices for their own children. Let ME decide if MY child needs this shot. I promise you I am far from alone on this. I know SO many people who feel this way. Our livelihood rests in your hands. Please speak up for us. Please understand that even though we may have different views, different beliefs, different opinions, that I still care about you. I would still save your life if given the chance. Love thy neighbor, right? I grew up in a household with one parent who was typically Democrat and the other typically Republican. They loved each other all the more, while cancelling one another's votes. Let's get back to standing together, respecting one another, helping each other and being neighborly. I would never want to force YOU to do something you didn't want to do. Please show some respect, and don't force me to either. United we stand, Divided we fall. Help us END the division by allowing us all to make CHOICES for ourselves. What is right for you, may not be right for me.

Much love and respect,

A Concerned Mama Bear

Subject: Feb. 10th meeting on vaccination in children criteria

External Email

Dear Board of Health,

Today I listened to the meeting discussing criteria 5 and 6, for adopting the covid vaccine in children. I do not understand the TAG team members or how any of these people qualified to be on such a committee? None seemed to know anything about medicine, let alone vaccine development or virology? I'm not sure why these folks were selected to represent the citizens of the state of Washington, especially regarding important medical decisions?

Things not discussed: the changing data, the genetics of Sars Cov2, the population at high risk from serious covid, the population at low risk of serious covid, the side effects of the vaccines, the lack of any long term data, the nature of respiratory viruses in general? I was dumbfounded at the lack of information and knowledge?

Covid risk is extremely high in the elderly and some very specific risk factors, it is extremely low in children. To date, the flu poses a much greater risk of severe illness in children. The vaccines were developed for a variant that no longer exists, the vaccines are leaky and the vaccinated still spread covid, the rate of which has not been determined. Omicron was so transmissible that a very high percentage of children have had it and developed natural immunity which has been proven to be a robust and varied immunity. Future variants are likely to be much more like a cold, and the prediction amongst many experts is that covid will just be another cold virus.

Vaccination for respiratory viruses have never in the history of vaccines been very effective, it is the reason we have never had a cold vaccine. This type of virus replicates exponentially and immunity from vaccination is very short lived, thus the need for boosters in those who are high risk. Other respiratory viruses have led to enhanced auto body immunity, where future exposure results in worse illness. The Dengue fever vaccine killed children and only after a lengthy court battle was the vaccine removed from the market. RSV vaccination has met a similar fate.

Criteria 5: This must be a no vote, the antigen was developed for the original covid strain, no longer in circulation, to date there are no studies that show it works for Omicron or quickly changing variants. This can not possibly be a yes vote, it does not meet criteria?

Criteria 6: Children have not been studied in regards to transmission and vaccination. Children have different immune systems than adults, and respond differently to covid than those at high risk. The vaccine data is not on children and not even on high risk and is only short term data? This must also be a no vote based on the criteria?

You have a committee of people who are NOT following criteria? I listened to the discussion on how there is no long term data of this nature, and the conclusion amongst some was that they can give a yes vote since there isn't data. That's not how a scientific discussion works? The absence of data means you wait until clear data is available to make a confirmatory decision!

I have a medical background, for the past 3 years I've served on the Department of

Defense Medical Review Board for rare diseases. We evaluate and score grant proposals, it is the gold standard in medicine. We utilize a set of criteria, even the patient population that serve as stakeholders are required to adhere to the set criteria and if anyone goes off course, as most did in today's meeting, the moderator reminds them of the criteria they are obliged to follow.

We never make decisions based on our feelings, premonitions, wanting to have a decision in the fall to stay ahead of covid? We are led by a strict scientific process. The discussion that took place today was absurd at best, had no current data, no decision making based on metrics and standards?

The vaccines are a great fete for high risk patients. Children, absolute risk considerations, side effects, the unknowns, are critical and not being discussed, in fact totally ignored? Many pediatricians are against this vaccine in children, it has no long term data!!!!

I'm following a RNA treatment for a disease my family has, it's been in phase II trials for over 2 years. There's no way on the planet anyone would consider giving that drug to children? Are all of you completely unaware of the normal drug approval process in children? These vaccines have not gone through the rigorous process of all other treatments and vaccines? It is totally absurd that at a time other states are dropping mandates, the state of Washington is considering vaccinating children with an unproven vaccine with a lengthy list of side effects for a patient population at extremely low risk?

If this kind of rogue, half hazard, crazy decision making is what defines our governmental processes for important things like vaccinating our kids, we are headed for great trouble? I fear the trucker scene as parents who are quite aware of the number of cases of myocarditis will backfire on your efforts?

You will all be held accountable as parents simply won't stand for this!

To whom this may concern for the meeting Thursday feb 9 2022
Again no to vaccine mandate for our children. They don't need it they are not at risk for covid. Please do not force our children to get it to be able to go to school. This should be left up to the parents not the government. The risk of myocardialitis is greater than covid 19. The vaccines are still in emergency status. If a child gets myocardialitis this is permanent heart condition that does not go away, then who is responsible?
The pandemic is ending so it is over. If you decide to mandate the shot you will see even more parents pulling thier kids out.

Thank you

Subject: NO on Covid vax requirement for school

External Email

Good morning,

This email is to inform you of my opinion for you to not take a vote, or vote NO on any vote taken in response to adding the Covid-19 shot for school aged children to the required immunization list.

I am a pediatric RN of 21yrs, 17 of those at Seattle Children's. I will NOT be vaccinating my 5 and 9 yr old boys, for the following reasons, and I strongly urge you to throw out voting on this topic or strongly oppose adding this shot to the immunization requirement for public schools in WA.

1) The Covid vax is EUA only for the 5-11yr range. Therefore, it is still in the drug research phase, and requiring it for minors of any age in this period is grounds for medical malpractice. The claims that it prevents severe disease or death in this age group is unfounded as the risk of death in children who acquire Covid19 is 0.002%. Leading cause of death in this age bracket is lead by accidents, ingestions, suicide, homicide, cancers, flu & pneumonia and more. Covid is barely on the list it is so far down.

2) Long term side effects in any population have not yet been researched and established as we do not yet have data. Truthful informed consent has not been provided parents in this state as the push to vax kids has been coordinated and deliberate without any real or meaningful conversations between pediatrician and children's families. Currently, research is showing that severe side effects from the vaccine is more risky to previously healthy kids ages 5-18 than getting Covid.

3) Acquired Immunity has proven to be the most effective response to the pandemic for PHC. They handle Covid exceedingly well and have more and longer lasting antibodies than those receiving 1,2,3 or more injections of the so-called vaccine. Their created immune systems do the job they were created to do without the interference from manmade gene-therapy.

4) We can look to Israel to see how the most vaxxed and boosted country in the world is handling Covid and vax side effects: their population is widely vaxxed, and boosted twice, yet they have the highest percentage numbers of Covid cases. They have also had huge increases in heart disease (MCI, myocarditis, cardiomyopathy), CVA, hypertension, neurodevelopmental changes, and other negative outcomes. Studies have found that those who get Covid and then get vaxxed have worse outcomes than those who get Covid and don't get vaxxed. Many of our youth by this time have had a mild Covid case; requiring them to vax to be able to get an education is both putting them at what is now a KNOWN risk and grounds for medical malpractice.

5) Until Pharma or DOH or someone responsible for any mandates on the so-called vaccines will be held legally and ethically accountable for direct short or long term harm, including sudden MCI/CVA associated with these injections, no one should be requiring anybody be injected with them, and especially not our most vulnerable in the population, our children. And even more so as the carrot on the stick to acquiring their right to an education.

6) The pandemic currently appears to be ending, and mandating a shot that has proven to harm male youth and not be effective at preventing and spreading disease is foolish and an error in judgement.

Mandating a Covid vax for school attendance at this point in time is at best unnecessary and foolish, and at worst malevolent and grounds for a lawsuit against the state DOH.

Please use prayer and wisdom to stand for truth and reason, go against political pressure, overcome fear, listen to We The People, and do what is right for the children and families in this great state.

Thank you for your time and work you do.

Good afternoon,

I am one of MANY concerned parents who do not approve of the decisions being made to add the covid shot as a requirement for school aged children to attend school. I watched your virtual meeting yesterday between the Technical Advisory Group (TAG) and the WA State Board of Health (SBOH). Your "data" presented was not sufficient to even make an educated decision on Criteria #5 or #6 (or any of the 9 criteria for that matter), many of you even said so yourself. Please understand that your vote, your unanimous recommendation to the Department of Health, affects ALL of us parents.

For those of us parents who do not want our children being forced to take this experimental shot, please hear us out. If the tables were turned, and the government was trying to pass a law or new code/requirement that would force YOU to either do something to your child that you wholeheartedly did not approve of or pull them from school and uproot your whole life and everything you've worked for to move somewhere else to stand up for what you believe in, how would that make you feel? I have lived in Washington my entire life, so have my parents and my grandparents did too. Everything I know, love and have worked so hard for, is here. All of you with TAG and SBOH and many other agencies/organizations of government are jeopardizing every aspect of my life with your decisions. The public no longer has a voice, we are being ignored and censored left and right. PLEASE. Hear me. I am begging you. I will not allow my children to be injected with an experimental shot. My kids and myself are otherwise fully vaccinated and get our flu shots. I am NOT anti-vaccine. I am simply a very concerned mama bear who wants to protect my cubs. Imagine for a moment if the most important people in your life were being forced to do something they did not want with every fiber

of their being and ask yourself how you would feel. My heart is SO heavy. Tears are flowing as I write this. Please understand that the choices you are making affect people who may not have the same opinions, views, beliefs as you do. Are you really ok with harming others just because they think differently than you do?

Since when is it a crime to protect your own child?! I have been called so many awful, ugly names, because I will not make my toddler wear a face covering in public. How is this ok? I don't call people names because they choose to wear a mask or get a shot. I truly respect everyone and the decisions they make for their children. We are all trying to do what is best for ourselves and our loved ones. Why can't that be respected? Why are you trying to rip that CHOICE away from me? What would it take for you to understand how I am feeling? Would it make a difference if I sat in front of you crying while holding my children? This is not fair. Surely you can see that. The vaccine is too new for me to trust it. We don't know long term effects. There is no way that we could! Covid has only been around for a few years and the vaccines even less time. Can you imagine if you voted yes for this to be implemented and years down the road we saw all kinds of defects and illnesses and deaths associated with these vaccines and boosters?? The blood would be on your hands. PLEASE, PLEASE, PLEASE. Let the PARENTS make the choices for their own children. Let ME decide if MY child needs this shot. I promise you I am far from alone on this. I know SO many people who feel this way. Our livelihood rests in your hands. Please speak up for us. Please understand that even though we may have different views, different beliefs, different opinions, that I still care about you. I would still save your life if given the chance. Love thy neighbor, right? I grew up in a household with one parent who was typically Democrat and the other typically Republican. They loved each other all the more, while cancelling one another's votes. Let's get back to standing together, respecting one another, helping each other and being neighborly. I would never want to force YOU to do something you didn't want to do. Please show some respect, and don't force me to either. United we stand, Divided we fall. Help us END the division by allowing us all to make CHOICES for ourselves. What is right for you, may not be right for me.

Much love and respect,

A Concerned Mama Bear

Hi TAG team

Good morning! I am writing to voice our families strong opposition against adding the requirement for a Covid-19 vaccine to the child immunization schedule. We have been opposed to this ideal and topic as the medical need has not been proven, the effectiveness of the vaccine has not been proven, and the efficacy of the vaccine is of massive concern and will continue to be for our family. It is absolutely unacceptable to require a vaccine that is only of consideration due to the state of emergency we continue to be held under. It is criminal to ignore science and data and to withhold information especially when directly related to health and medical decisions and care. The risk benefit analysis has yet to be proven and so the COVID-19 vaccine requirement for school-age kids should not even be a topic of conversation at this time. Please focus on more important matters for our students than spending federal funding, taxpayers dollars, the boards precious time and drop this topic at this time. Parents must have visibility to all science data in order to be able to make an informed decision about their child's medical treatment and needs and that is not happening and continues to be repressed from the public. Please help support your families and students of our future generations and stop the vaccine discussion at this time. Please be loyal to your position of power and privilege and work for the people and show us we can trust you and that you have integrity and honor. Please do the right thing by our kids!! The time to act is now and the action is demanded by the parents of our children.

"When there is risk - there MUST be choice"

Members of TAG, as American citizens and representatives you have an obligation to the people to uphold their freedoms as outlined by our constitution. As a voice of the American people you have a duty and obligation to uphold our constitution and vote "NO" to include COVID-19 vaccine in chapter 246-105 WAC as it would force our children to get the COVID-19 vaccine which AMERICAN parents should be free to choose if they want their children to take or not take. Therefore you must vote "NO" on any mandate that would go against our constitution stripping us of our rights/liberties and freedoms.

Thank you for voting "NO" on behalf of every free American in our great nation, AMERICA, the land of the free and home of the brave.

I see the WSBOH and TAG has recently voted in favor of adding the Emergency use only Covid 19 vaccine to the requirement for public schools. WAKE UP. Where did we get these people? Are they Zombies? Where is the common sense? Does anyone at WSBOH care about children anymore? Everyone involved in this decision need to evaluate their mental health as well as the scientific studies because obviously neither were considered. Stand up , do your research, do the job we pay you to do and protect the children. If you don't know don't vote. Each and every one will be held accountable. This is absolutely unacceptable.

WTF OVER,

Leonard Fluetsch

Respectfully to the State Board of Health, 2/11/22

We should have huge concerns about including any COVID vaccines in our childhood immunization rules. Considering the first and most important category of criteria on the effectiveness of the vaccine should stop us dead in our tracks!

One professional on your team meeting stated there is "not enough evidence". These vaccines have not been time tested. We do know the effectiveness wears off at approximately 6 months. (This only stands to benefit the pharmaceutical companies who continue to promote boosters.) We are witnessing now that they do not actually "protect against infection" as claimed. Dr Bryan Ardis admits, "If we stop vaccinating - the virus would stop."

The studies the expert on your TAG team brought forth as "projections" do not necessarily depict the realities. According to epidemiologist Dr. Alexander, "Double vaccines actually increase the viral load and transmission factor 250%." Drug companies are making vaccines which they know can shed to others. The vaccines are now becoming known to be a factor in transmission. They do not meet the criteria for #6 of "reducing the risk of person-to-person transmission". Myself, and many I know, have become sick from exposure to those who had recent vaccinations.

The effectiveness of COVID vaccines continues to prove controversial. Why is there a big push to vaccinate our children when the statistics prove this virus is over 99% survivable? Let's look at A Study From: "Deaths in children and young people in England after Sars Co-V2 infection during the first pandemic year." Article in "Nature Medicine" Journal.

This graph compares the number of CYP who died of SARS-CoV-2, the number of CYP who died with a positive SARS-CoV-2 test and the number of CYP who died of all other causes. (March 2020- February 2021)

We can see here that the number of children who actually died of the COVID virus is reportedly very low compared to deaths by all other diseases and other factors. There is NO "significant morbidity and/or mortality in this population" to fit the criteria #5 for adding this vaccine as a requirement.

Now let's talk about the risks. Your TAG team member, Dr Eric Lufgreen, displayed a chart which showed on one line there were young patients showing up with 9 / 9 adverse events (or reactions) to the vaccines. Another professional on your meeting claimed we are "projected to see more myocarditis from vaccines than from the infection." These are

huge statements that are being glossed over.

What if your child or grandchild became one of the few with an adverse reaction or died due to a vaccine for a virus that has already proven to be over 99% survivable in the age group of 5 years old and under. Parents should not be forced to choose between a public education or a dangerous vaccine for their child.

Please, I beg you, look at the surrounding facts. Such as, how vaccine makers including Pfizer cannot be held liable for injuries and deaths following an emergency use vaccine. There should be great concern here for the public!

Please do not take any action in moving this vaccine to be included in childhood immunization rules. We and our children will prove to regretfully pay for this extremely bad choice.

Humbly,

Mikki Bosman

The hypocrisy of unelected person, accountable to no one, tweeting about how much fun they are having (with 70k other unmasked people) at a very expensive Superbowl game is asinine. Meanwhile my three kids are still suffering from acne, face impetigo, and social anxiety the very next day. They have been forced daily to wear a mask in trade to receive an education in the state of Washington. A simple look at any map of the United States shows 98% of other states have lifted these same restrictions for quite a while now already. Washington bureaucrats have been dragging their very slow feet on this matter. Some states have been mask free for over a year. You are not following the science. You are following the money. You are bribing school districts with money to comply with abusive restrictions on healthy children. You will be counted on the wrong side of history about this. Free our children now. Enough is enough. You had your fun at the Superbowl let our children have their childhoods back. Thank you.

Good morning,

I am emailing you all to voice my opinion of the poor leadership(Gov. Inslee), and the idiotic consideration of a vaccine mandate for children. This virus causes next to no actual danger for children. More children die from the flu than they do from covid. According to VAERS data, the children are more likely to have a violent reaction to the vaccine than they are to be harmed by the virus itself. The vaccine doesn't keep them from getting it, nor spreading it. That along with the almost 0 percent chance of serious illness from it should be all the reason and common sense you need to understand requiring the vaccine is in piss poor taste and judgment. It should be a choice and not a requirement. Plain and simple. Listen to your people of the entire state. Not just King county and Olympia. Despite what they might think, there are people who live outside these areas and Seattle/Olympia do not constitute the state of Washington. Please push for this vaccine mandate to be shut down, along with all Katherine mandates regarding this vaccine. We know primaries are coming up soon, let's start the push now to get things back right.

R,
Richard

Subject: Concerns about COVID Vaccine Mandate for School Entry

External Email

Dear DOH Board Members and expert advisors,

I'm a concerned mom of elementary student. I oppose the potential COVID-19 vaccine mandate to children.

My child has been vaccinated for all childhood vaccines. However, my trust to our public health system will forever be damaged if COVID vaccine become a mandate.

The reasons for my opposing COVID vaccine mandate are:

1. Long term risks from the vaccines are unknown. Short term the vaccine can cause myocarditis and pericarditis and other adverse effects. Experts didn't know the protection by the vaccine will diminish after few months. Government initially told the public to take vaccine to protect other people and it turns out not true. Current mRNA based vaccines are so new and the data of long term effects is honestly and simply not available.
2. Current vaccines don't prevent a person from getting the disease and don't stop the vaccinated from spreading the disease. So get vaccinated for COVID is a personal protection measure. Mandating it to every child is not going to prevent the disease from spreading.
3. The vaccine efficacy is in preventing severe diseases from COVID. Children's risk of severe diseases is so small, it doesn't warrant mandating to every child.
4. Each individual's risk from COVID is different. Parents should have the right to evaluate the benefit and risk factors from the vaccine and make their decision that best for their child.

Please protect our children, be cautious of potential long term risk and only give the vaccine to our children when you are confident they don't cause harm. Please help me to preserve my faith in you as public health authority.

If you think any of the reason above are not true, don't simply regard them as misinformation. Please openly debate with experts that hold different opinions and show the evidence to prove them wrong. I'm willing to be persuaded, not forced.

Thank you,

Li

Hello,

Please vote no on adding the Covid-19 injection to the childhood vaccine schedule. There is not enough scientific evidence that the vaccine is effective in children. This is an emergency use vaccine and still needs to go through the proper testing. The side effects of this vaccine are far worse than the side effects of a child getting covid-19. For those families who wish to give their child the covid-19 vaccination, they already have or plan to when their child is of age. There is no reason to require it for all children. I truly believe our young children do not benefit from this particular vaccine.

Please vote no of adding the covid-19 injection to the childhood vaccine schedule.

Thank you

Nicole Mills

What do you think you would be vaccinating against? A cold virus? Because that is what this is now. Sure. People, mainly the elderly that are near end of life, get colds every year and for some they die while they have a cold. That is how it has been before Covid and there is no evidence that any covid virus in the future would be any more than a cold.

The argument that getting this vaccine will stop transmission (of a cold by the way) is not at all a solid scientific fact and evidence is to the contrary with many studies showing it does not stop the spread.

I and many other parents beg of you to not implement this mandate. I will remove both of my two school-aged children guaranteed if you put this through. This is NOT a vaccine and cannot even prevent the damn thing. You are toying with children, their lives and so much more. This is absolutely sick that we are even discussing such an issue when children have little to no risk of having long-term issues from COVID but do have possible long-term risks with a "vaccine" that hasn't gone through proper testing and true FDA approval. If you can't guarantee the safety, you can't require it. Who pays the price? Our children!

The FDA also said a laundry list of things were safe later to find out they are dangerous.

To whom this may concern,

I will not give my children a shot that is against our families morals and beliefs. This is not the place for government to overstep our constitutional rights. It hasn't cleared appropriate health trials for certain age brackets. This is completely against everything in my soul as a mother. I will not stand for it.

Hello,

I've been a resident of one of the Tri-Cities for over 20 years, working professionally and an engineer during that time. I have moved away and always returned for the cost of living and excellent schools this area has to offer.

I am opposed to mandates that are a condition for employment or education. I have freely chosen to get vaccinated prior to mandates for employment. I do not believe that access to education should be limited or restricted by mandates for vaccination for my children or any students.

Thank you,

Jim Benson

Hi, if you mandate the Covid vaccine next year to go to school we will simply pull our kids and leave the state! I have a senior next year! Please let them graduate!!!! It's agony for her to have to think about leaving her high school and state just to finish school. The vaccine is very high risk for little protection if any as the virus mutates. Thousands of kids are going to leave if you Mandate this for next year! Destry Roper

It's time to end the almost 2yrs of suffering and burden put on our children. It's time to stop taking monetary bribes and threats and putting money and fear above our children's mental and physical health and well being. We as parents are no longer going to sit by while harmful protocols are forced on our children. Our children's future is in your hands and will be on your conscience forever. We beg you to do the right thing.

Dear Board of Members,

No CDC guidelines, OSHA regulations or health officer order can suspend our rights. "We the People" and do not consent. We do not give you the authority to force any medical procedures on our children, elderly, or on any human being that does not choose of their own free will your offerings of "public health" in a vaccine trial.

Your chapter 246 - 100 and rule making petition for 246 -105 try to confuse, coerce, intimidate, threaten and harass us. This is called retaliation and discrimination, and that is against the law.

We have the right to determine what is the best for our families and what is done with our body and it doesn't matter whether the vaccine only has an "emergency authorization" or not.

The masks and the testing are also "emergency use authorization" but even if they weren't, we cannot be forced into complying. Only a licensed medical doctor can suggest

a medical treatment such as a mask, covid testing or a vaccine. You or school administrator has no authority to do so.

We have the constitutionally-protected and GUARANTEED right to life and the right to determine what it's done to our body.

We are covered under ADA laws and our needs would have to be accommodated by law.

You are not a medical professional and, therefore, you are unlawfully practicing medicine by prescribing, recommending, and using coercion to insist on this experimental medical treatment.

Whereas:

1. The Nuremberg Code, codified into US Federal Law, prohibits forcing or coercing anyone, under any circumstances, to participate in a medical experiment; and the Code states "the voluntary consent of the human subject is absolutely essential."

2. Phase 3 clinical trials of COVID-19 vaccines are not yet completed. C4591007—the main clinical trial in children and young adults with BNT162b2—has an estimated completion date of May 5, 2026 and hence qualify as medical experiments. People taking these treatments are enrolled in clinical trials.

3. The vaccine formulation now being given to U.S. children aged 5-11 is NOT the same formulation used in the clinical trials, and NOT the same formulation that has been administered to all other age groups under EUA. So even when current ongoing clinical trials are complete, the results cannot be assumed to be relevant to the safety or effectiveness of the new formulation.

"The vaccine that is authorized for use in children 5 through 11 years of age includes the same mRNA and lipids but different inactive ingredients compared to the vaccine that has been used under EUA in individuals 12 years of age and older and that has been studied in clinical trials." Source: <https://www.fda.gov/media/153717/download>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F153717/download>

4. Most vaccines are trialed for at least 5-10 years and COVID-19 vaccines have been in trials for less than one year.

5. No previously attempted coronavirus vaccines (ie. MERS, SARS-1) has been approved

for market, due to antibody-dependent enhancement resulting in severe illness and deaths in animal models. The participants in clinical trials involving children aged 5-11 received “two doses of 10 µg BNT162b2 or placebo (saline)”, not the new formulation.

Source: <https://www.fda.gov/media/153447/download>

<<https://qcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F15344>

6. Numerous doctors, scientists and medical experts are issuing dire warnings about the short and long-term

effects of COVID-19 vaccines, including but not limited to death, infertility, miscarriages, Bell's palsy, blood clots,

cancer, inflammatory conditions, autoimmune disease, early-onset dementia, convulsions, anaphylaxis,

myocarditis, and antibody dependent enhancement leading to death. I have friends dealing with COVID-19 vaccine injuries.

7. Children and youth are at virtually no risk of dying from COVID-19 or transmitting it to others, but deaths and

injuries to children and youth have already occurred in the COVID-19 injection clinical trials.

8. FDA admits safety unknown. Children are being used as test subjects, with their parents acquiescing under fraudulent marketing pressure. Public Health messaging does not match the reality of the current knowledge base. At the October 26 VRBPAC meeting, FDA Advisor Dr. Eric Rubin admitted: “. . .but we’re never going to learn about how safe this vaccine is unless we start giving it.”

Source: @6:52:33

https://youtu.be/laaL0_xKmmA

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fyoutu.be%2FlaaL0_xKmmA&data:

9. International Alliance of Physicians and Medical Scientists has declared that children should be excluded from vaccine mandates:

“Consensus is clear among MDs and medical PhDs: following 20 months of exhaustive research, millions of patients treated, hundreds of clinical trials performed and scientific data shared worldwide, they conclude that healthy children and the COVID-recovered should be excluded from restrictions and vaccine mandates.”

Source: <https://globalcovidsummit.org/news/thousands-of-physicians-and-scientists-reach-consensus-on-vaccinating-children-and-natural-immunity>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fglobalcovidsummit.org%2Fnews%2Fof-physicians-and-scientists-reach-consensus-on-vaccinating-children-and-natural-immunity&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cb5330589feb246865c2608d9ecb3fced%7C1>>

10. There have been more deaths from COVID-19 vaccines, as reported to the Vaccine Adverse Events Reporting

System (VAERS), than deaths in the last 10 years from all vaccines combined and only 1% -10% of vaccine injuries are reported to VAERS. The full extent of adverse events from the COVID

vaccines is unknown as there is a significant delay in uploading reports to the VAERS database.

The risk associated with COVID-19 vaccinations is extremely dangerous to the health and well-being of all children

and this form of treatment unnecessary.

Any coercion or pressure tactics used for students to be vaccinated contravenes the Nuremberg Code, the Helsinki Declaration and Federal Law.

Any use of "implied consent" by any minor child under the age of 18 is defined in law as gross, contributory, and

culpable criminal negligence.

Any party found to be involved in vaccination coercion when entrusted with the care of our children such as all school staff, school board members and executive, and any other adults who may have access to our children while under their care. This includes the assistance of outside school staff, contractors, public health nurses, or health officials

could be prosecuted to full extent of law and you may be held personally and criminally liable for any injuries or deaths

that may occur.

We are forced to err on the side of spiritual caution and refuse to harm our temples in honor of Gods Holy Word.

The 1st Amendment of the constitution has protected these exact claims before the Supreme Court on many occasions. Even State governments have faced this glaring truth during the Covid crisis as

they attempted to pass mandates and laws that violated this basic principle only to have their wrong decisions righted before the Courts, with financial penalties.

While, as Christians, we strive to be at peace with all humans beings and to obey all laws and mandates from a Legitimately elected government. We do not do so in violation of Gods Holy Laws, of which the protection of my body is one of those spiritual laws that supersedes all manmade laws in my religious conscience.

Sincerely

I extremely concerned dad that is willing to take out his kids from school to protect them.

As your department has stated, there is currently no published literature on pediatric Covid-19 vaccine effectiveness in the K-12 school setting. If this is the case, and it is, then why should it even be a considered measure to take? Vaccines should not be required for this age group. What I do see in death reports is a huge uptick in teen suicides. If saving lives is truly your goal, prevention of teen suicide should be what your focus is on. Death by Covid in this age group is extremely far down the the line in number compared to suicide. Please redirect your focus to what is needing attention.

Thank you,

Subject: Fwd: Do Not add the EUA Covid-19 vaccine into WA schools Requirement

attachments\6B52A0518FC7455B_557209255-Senator-Ron-Johnson-let_PRDTOOL_NAMETOOLONG.pdf

External Email

Dear BOH members,

As a long-time Washington resident and a parent of school kids, I sincerely oppose adding the Covid-19 vaccine into the WA schools requirement list.

The reasons are below:

1. For ages 5 to 12 kids, The covid vaccine is still on EUA, and there is no long-term side effect data of that. Even the FDA experts admit "we don't know the side effects until we roll it out." That is totally irresponsible to do this to children. We only offer safe medicine to our children, not something we don't know what the side effects could be.

2. Children have low rate of covid. The CDC shows the covid survival rate of children is about 99.9995%, the covid is mostly like the normal flu to children. They don't need to get the covid vaccine.

3. There are so many deaths and severe damage reports about the covid vaccine around the world.

1). 382 Athlete Cardiac Arrests, Serious Issues, 222 Dead, After COVID Shot (until 12/27/2021)

Besides, In a February 1, 2022 letter addressed to DOD leader Lloyd Austin, Senator Ron Johnson cites the "dramatic increases in medical diagnoses among military personnel," as well as evidence that the "diagnoses of myocarditis had been removed from the database."

An alarming increase in cancer, miscarriages and myocarditis was found in addition to many other diseases (as outlined in Senator Johnson's letter):

- * Hypertension — 2,181% increase
- * Diseases of the nervous system — 1,048% increase
- * Malignant neoplasms of esophagus — 894% increase
- * Multiple sclerosis — 680% increase
- * Malignant neoplasms of digestive organs — 624% increase
- * Guillain-Barre syndrome — 551% increase
- * Breast cancer — 487% increase
- * Demyelinating — 487% increase
- * Malignant neoplasms of thyroid and other endocrine glands — 474% increase
- * Female infertility — 472% increase
- * Pulmonary embolism — 468% increase
- * Migraines — 452% increase
- * Ovarian dysfunction — 437% increase
- * Testicular cancer — 369% increase
- * Tachycardia — 302% increase

For your convenience, I attached Senator Ron Johnson's letter to this email.

How can you say this vaccine is safe when you look at these astonishing numbers?

And the covid vaccine is not effective either, so many people with 2 jabs or even 3 jabs are also infected with the Omicron variant. The breakthrough rate is so high.

Look at the data from Israel:

Israel reports record deaths, 60% above previous record a year ago, despite quadruple vaccination of at-risk groups.

75-80% of severe cases in ICU appear to be vaccinated, most "at least three times".

How can this possibly be if the vaccine is effective?!

<https://www.israelnationalnews.com/news/321674>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.israelnationalnews.com%2F>

Please think carefully. Do not add covid vaccine into the WA school requirements. By doing that, you are breaking the law, we the people of WA will not allow it!

Hello, it's my understanding that this morning we will be discussing the merits of including the COVID vaccine into WAC 246-105.

I appreciated that the last time a similar discussion took place, on whether or not to adopt a ban on emergency vaccinations from being included, the group's general consensus was essentially "We don't know enough right now to enforce a ban on responding to unknowns in the future." That is a very sensible approach!

And here we are again, and I'd ask the same question: do we know enough about the long-term impact to enforce the opposite, either? I appeal to your sensibilities and implore you to NOT include the vaccine into 246-105 WAC.

What we *do* know, however, is the following:

1. The vaccines do not prevent infection
2. The vaccines do not prevent the spread of infection
3. The efficacy of the vaccine does not even last the duration of a school year
4. Kids are the *least impacted* population by this virus

There are simply too many unknowns still to enforce something this far-reaching, and we cannot experiment with kids as the mechanism to address this pandemic. Kids cannot pay the price to keep the fear of adults at bay. The schools have done an incredible job of handling cases and doing everything necessary to keep our kids in the classrooms, and I applaud them for that.

Vaccines should remain highly available to every single individual that deems it necessary for their own well-being, and I encourage those that make the choice to get the vaccine. Enforcing it for kids at this time is just not the way to go.

Thank you for your time, and I look forward to the discussion!

Re: School Covid-19 vaccine requirement for school entry. (CON)

To whom it may concern, It is too soon to make this very permanent decision, there is too much polarization, and most importantly not enough long term study regarding this particular vaccine on our children! There are side effects that one must admit, if they are being truthful and following the cases, that are very unnatural and dangerous, damaging, or if nothing else, scary and even requiring hospitalization. True, they are not commonplace, but they are much more than previous immunizations cause, that were in trials and studies for much, much longer. An example of a previous vaccine released and given to children/infants that had been suspended after appx a year of use in children and infants(!!)

| (ex:Rotavirus: The Government said: "Events surrounding the withdrawal of the Rotashield vaccine illustrate how well this system functions in practice. ... In the space of about one year, a vaccine was licensed and recommended for routine administration, adverse events raised a concern, further studies were conducted, and the manufacturer withdrew the vaccine knowing the government and physician community were ready to respond." (Brief 2010, 23-24))

The point is, we have no long term (even short, long term studies on this particular Covid-19 vaccine in our innocent children! They have no choice. They must do what their parents say or what the government or school system tells their parents to do. They are the long term test, themselves. Many parents will say No. Record levels of parents have already pulled their children from the WA school system during this pandemic. Mandating these vaccines will not change it improve that, and in fact will make the issue even worse for the State school system enrollment issues.

Currently no published literature on pediatric Covid-19 vaccine effectiveness in K-12 school setting. With such studies having not even been done yet-and no long term health studies as of yet- why would we want to risk our children, the futures of America? To nearly every child, the risk of COVID-19 severe sickness, is almost non-existent when you look at the numbers. To them it is a cold. And parents of immunocompromised children have the option to protect them with the vaccine and/or further with other measures.

The number of vaccines we are already required to put into our children is staggering! And with this vaccine, they are still able to contract and spread! Many parents will choose to willingly vaccinated their child. Nearly as many will choose not to. According to Washington Department of Health, K-12 currently are required a minimum of about 21 doses of various vaccines into their bodies.

Please do not force yet another, particularly this newer vaccine. I personally know quite a few right now that it would be the breaking point for them. They WILL pull their child out of the public school system, (or keep them out as the case may be) or even are ready to move from the area or state so their child can have an education. (This is not meant to appear in any way as a threat, it's just simply the truth.) The adults are largely vaccinated, the teachers are already required.

I sincerely and respectfully ask that you please respect the many parents who believe in this case we should leave the children with their own immune systems, which is already proving (and has proved) to be very, very strong against this virus. It has not even been around long enough to know how their immune student systems will build over time! Or how the virus may weaken over time. There is too much unknown to mess with our precious children's amazing natural immune syst Ultimately, this decision belongs between the parent and their child's doctor, not the State, political or school system.

Thank you for reading and considering.

Respectfully,
Shawnene Hersey

Please remember the public is watching what each one of you decides regarding our children and how you use the funds and responsibilities allocated to you.

There is no logical or scientific reason for vaccine requirements for children (or anyone for that matter). 17,000 doctors agree. Whether you do or not, people will follow the money regarding your decisions so I suggest you do the right thing and look at science, not agenda science.

The public is fed up with tyranny, tens of thousands of students have been unenrolled from the WA public school system and any more will follow. Your decisions will make an input on these children's lives who are no longer able to come to school. This will affect public school funding.

Again, I ask you to look at science, not agenda science before we go down a politically motivated hole from which there is no return.

Thank you.

Do not make the Covid Vax a requirement for our kids. As you well know, this is not a traditional, proven vax and it is highly controversial. Do not make it a requirement! It has not been proven and it is likely that any harm that comes to children will result in legal action against those who participated in its mandate.

Thank you.

I am a resident of Washington and will stand to support any action against any mandate of the Covid Vax for anyone. I believe in the right to choose. If you are true American's you will support our freedom and right to chose.

Tina

Subject: Please Hear Me Out

External Email

Good afternoon,

I am one of MANY concerned parents who do not approve of the decisions being made to add the covid shot as a requirement for school aged children to attend school. I watched your virtual meeting yesterday between the Technical Advisory Group (TAG) and the WA State Board of Health (SBOH). Your "data" presented was not sufficient to even make an educated decision on Criteria #5 or #6 (or any of the 9 criteria for that matter), many of you even said so yourself. Please understand that your vote, your unanimous recommendation to the Department of Health, affects ALL of us parents.

For those of us parents who do not want our children being forced to take this experimental shot, please hear us out. If the tables were turned, and the government was trying to pass a law or new code/requirement that would force YOU to either do something to your child that you wholeheartedly did not approve of or pull them from school and uproot your whole life and everything you've worked for to move somewhere else to stand up for what you believe in, how would that make you feel? I have lived in Washington my entire life, so have my parents and my grandparents did too. Everything I know, love and have worked so hard for, is here. All of you with TAG and SBOH and many other agencies/organizations of government are jeopardizing every aspect of my life with your decisions. The public no longer has a voice, we are being ignored and censored left and right. PLEASE. Hear me. I am begging you. I will not allow my children to be injected with an experimental shot. My kids and myself are otherwise fully vaccinated and get our flu shots. I am NOT anti-vaccine. I am simply a very concerned mama bear who wants to protect my cubs. Imagine for a moment if the most important people in your life were being forced to do something they did not want with every fiber of their being and ask yourself how you would feel. My heart is SO heavy. Tears are flowing as I write this. Please understand that the choices you are making affect people who may not have the same opinions, views, beliefs as you do. Are you really ok with harming others just because they think differently than you do?

Since when is it a crime to protect your own child?! I have been called so many awful,

ugly names, because I will not make my toddler wear a face covering in public. How is this ok? I don't call people names because they choose to wear a mask or get a shot. I truly respect everyone and the decisions they make for their children. We are all trying to do what is best for ourselves and our loved ones. Why can't that be respected? Why are you trying to rip that CHOICE away from me? What would it take for you to understand how I am feeling? Would it make a difference if I sat in front of you crying while holding my children? This is not fair. Surely you can see that. The vaccine is too new for me to trust it. We don't know long term effects. There is no way that we could! Covid has only been around for a few years and the vaccines even less time. Can you imagine if you voted yes for this to be implemented and years down the road we saw all kinds of defects and illnesses and deaths associated with these vaccines and boosters?? The blood would be on your hands. PLEASE, PLEASE, PLEASE. Let the PARENTS make the choices for their own children. Let ME decide if MY child needs this shot. I promise you I am far from alone on this. I know SO many people who feel this way. Our livelihood rests in your hands. Please speak up for us. Please understand that even though we may have different views, different beliefs, different opinions, that I still care about you. I would still save your life if given the chance. Love thy neighbor, right? I grew up in a household with one parent who was typically Democrat and the other typically Republican. They loved each other all the more, while cancelling one another's votes. Let's get back to standing together, respecting one another, helping each other and being neighborly. I would never want to force YOU to do something you didn't want to do. Please show some respect, and don't force me to either. United we stand, Divided we fall. Help us END the division by allowing us all to make CHOICES for ourselves. What is right for you, may not be right for me.

Much love and respect,

A Concerned Mama Bear

Subject: Vote NO

External Email

Hello Representatives,

Please vote NO to make the RNA Vaccines for Covid compulsory for students. This vaccine is NOT protecting people from the catching the virus or spreading it in both the vaccinated and unvaccinated.

Also, I personally know people that have been harmed by these vaccines. There is NO LIABILITY for corporations. If they believe wholeheartedly in their vaccine then why do they not back them up? The other thing that is not been talked about enough is that many people have already been exposed to the virus and have natural immunity.

Most importantly to take into account is that we do not have long term analysis of what the vaccines will do to our children. In fact, the studies have been hidden from the public. Again, I ask if these are so safe and effective why do the corporations have zero liability ? Why will they not show us the outcomes and studies on children ?

I have done my own risk analysis as a parent. The chance of children dying from Covid is next to none. With the RNA vaccines there are too many unknowns and the risk is too great. Parents need to be able to make this decision for their own children.

Adding Covid 19 vaxx to public school vaxx requirements.

11.

Are you Pro or Con on the proposal?

2. Con

Wa is losing mass amounts of children from school every day! Parents are fed up with pandemic mandates. You will have empty schools if you go ahead with adding Covid vaccines to requirements for school kids wa will lose thousands more students. I pulled my 10 year old and he loves homeschooling! We will never go back!! Ever!!

Subject: Comments for he TAG meeting Criteria 5 & 6

External Email

To the BOH:

I understand you're discussing criteria 5 and 6 as you consider adding the covid vaccine to the school schedule. The covid vaccine does not meet these criteria.

I will keep my comments short. As to number 5, the vaccine does not prevent covid. the CDC director and Dr. Fauci have stated that.

As for number 6, the covid vaccine does not reduce the risk of person-to-person transmission. Consider that highly vaccinated King County is following the same transmission curves as less vaccinated neighboring counties. We all know people who have gotten covid post-vaccination. Even if it temporarily reduces transmission, how often will kids need to be boosted to maintain that benefit?

In addition, please consider my perspective as a mother to a baby. I have two older kids who are fully vaccinated and a new baby. The push to add the covid vaccine to the childhood vaccine schedule has made me hesitant to vaccinate my baby for other diseases. I used to judge so-called anti-vaxxers, and I never questioned the vaccines I gave my kids. If the covid vaccine is approved, I will lose all faith in our medical establishment in this state. My dad and brother are doctors - I want to trust our medical community, but I cannot if this vaccine is mandated for students when it so clearly does not meet the criteria for inclusion on the childhood schedule.

Thank you,

Julia Orme

Subject: Stop the Mask Mandate

External Email

Greetings,

As the Kettle Falls example proves, school districts do not have to and should not be enforcing the mask mandates because they are useless and harmful to our children.

1. The District's mask mandate is purely for show – even the CDC has now acknowledged that cloth masks are effectively useless. The District's policy permits cloth masks and thus compliance is purely decorative – the policy does not provide any meaningful protections. Studies are showing the bacteria and fungus that are growing on these masks.

2. The mask requirement stunts the students' educational development. For all of human history up until Spring 2020, there was universal recognition that facial cues provide a distinct and important aspect of human communication. Part of your mission is to help our children develop strong communication skills and you are stunting that learning by requiring them to hide their faces and those important communicative cues under these useless masks.

3. The mask requirement is causing affirmative harm to students. Children are becoming dependent on masks and experience anxiety when confronted with large groups of maskless persons. When Covid ends, our children will have to interact with the maskless. By causing our children to become dependent on masks, you are straddling them with anxieties that they will have to overcome to interact in the maskless world. School is supposed to help prepare our children to face the world, not make them afraid to face that world

The time has come to allow parents to make that decision for their own children and stop mandating a flawed one-size-fits-all policy. Especially when that one-size-fits-all policy is harmful; a policy that only serves to make some people to feel better without providing any meaningful benefit to our children. Please follow Kettle Falls' lead and stop enforcement of the mask mandates.

Lastly, if 70,000 fans can be maskless indoors at the Superbowl with the WA State Secretary of Health in attendance, masks must be removed from our children immediately.

Greetings...

Issaquah, Bellevue, Lake WA School Districts, OSPI, WA State Education, WSB OH, and King County Commissioner.

That sure was quite the Half Time SuperBowl Show, wasn't it? As 70k mask-less fans adorned the stadium in CA for the 'big game', it sure brought attention to millions sitting at home watching that we have been played. We've been played by our State Schools and Government.

We are no longer asking. We are demanding that immediately mask mandates be rescinded from our schools and release our children from these harmful practices.

Thank you kindly,

Tanya Goodman

1. Yes

Considering COVID-19 for Inclusion in chapter 246-105 WAC

11.

Are you Pro or Con on the proposal?

2. Con

Please consider that the president that this inclusion would set is potentially very dangerous. The risks of covid for children are extremely minimal and the current vaccines offer no transmission reduction therefore a requirement to vaccinate is pointless and imposes significant risk. Also, coercing or forcing vaccination is absolutely irresponsible. Forcing children to participate in a trial medical experiment should be considered a crime. Also, there is so much talk of equity and inclusion lately but mandates of this type disproportionately affect the poor and families of color. Mandating this experimental medical procedure will additionally negatively impact families who will be unable to access the education they need for their children if they do not "comply" which studies have shown will impact low income and minority families most. Please do not mandate something especially that contains no societal benefit and will only further divide and segregate our community. DO NOT add COVID-19 for Inclusion in chapter 246-105 WAC

With the meeting coming up shortly I just think it's ludicrous to even think about mandating a vaccine that we really don't know the long term outcome on when the numbers show kids aren't even in danger of the virus. At this point with this last surge most kids at our local school have already had it. Please for the health of children don't push this through. We're counting on you to protect them!

Subject: Mandates

External Email

To the Board of Health, The District, The State, The Superintendent, and all the staff:

These covid testing and masking mandates and requirements for school children in the state of Washington are ridiculous and need to come to an end now. I'm emailing today to comment on them because those that are vaccinated can and do still get and transmit covid. To give them preferential treatment and a different set of rules regarding attendance in public school is discrimination and you are actively segregating our children.

All we are teaching our children is to treat others differently depending on their medical status and personal choices. That is not what we should be doing. We should be teaching our children to stand up for what they believe in, look at the science, be tolerant of others when they think differently than you do. Those are some important aspects of being good human being and Americans. We are allowed to have control over our own bodies and make choices based on facts and science, and what is right for ourselves and families.

You are all doing a major disservice to our children and are not doing what you were elected or hired to do. You are teaching and allowing segregation and discrimination. Mental health is worse, anxiety is worse, test scores and IQs are lower. You are teaching our kids to judge others for their different opinions, teaching them to comply without question, ignore science, and keep their heads down. These are not the qualities we want in good strong people, Americans, leaders, people who strive for excellence and who become teachers, doctors, engineers, and scientists. You all need to stand up for our kids, do what is right, allow the parents to choose. We are not co parenting with the board, health department, government, or principals and you all need to grow a set or two and stand up to the absolute bullshit happening in our country, our state, and our schools. The emergency mandates must end. We are not in a state of emergency. We need to go back to our normal daily lives, remove the face decoration, and stop instilling fear into our children.

You are all failing the kids, the district, and our future. Our kids are wanting to be with others, want to see faces, read social cues, see smiles, and they want to go back to normal. 2 weeks turned into 2 years and you should all be ashamed of yourselves. My 7 year old has never seen her teacher without a mask, she has never seen a teacher smile at her. That is sad and unacceptable.

If you can't actually take the time to respond normally and not cut and paste a response, don't bother responding at all. I expect better from you all and I'm mad every day to see the kids looking out the windows of the busses and schools, with sad eyes, and their mouths covered. It is devastating and disastrous how this is affecting them. You might say kids are resilient, but you don't actually know that. Not all kids or people are resilient. Not everyone will bounce back. Neuro divergent kids will not just move on. People who have tough home lives will not just bounce back. Kids and parents who have hurt themselves or have tried to will not bounce back.

We are at a time in history where we need to stand up and change what we are doing for

the greater good. We need to say no to the state rules. You might say you can't, but I would argue that you can and should. You need to show the families that you are working for, the families who are raising this next generation, that you actually support us, that you hear us, that you care about us. You must realize that many are considering pulling their kids out of public schools, if they haven't already. People are looking into homeschooling and moving out of state. People will not vote any of you back in and will not vote for any levy that will give money to the schools if you don't show us change and support.

The overreach that our state has made over the last 2 years needs to come to an end.

Sarah Mahan

Mother of 2 Washington State Mead School District students.

As you meet to consider forcing the unnecessary Covid vaccine on children, who statistically have very little to fear from Covid infection, please consider the real world consequences of your actions. Please see a first hand account of a nurse at a hospital in California:

Tawny Buettner, RN, worked in the Cardiothoracic Intensive Care Unit (CTICU) of a major children's hospital in San Diego, California for more than 12 years.

Before the vaccine rollout, they'd see 4 or 5 myocarditis cases a year in the CTICU at the hospital where Tawny Buettner works that she was aware of (see 2:15 in the video).

In the last half of 2021, she is aware of 33 cases (at 4:15 in the video).

That's an increase of over 10X in the rate of cases of myocarditis cases since the vaccines rolled out.

Not only that, the troponin levels of the kids were extremely high (start watching at 3:15), from the teens to up to the 30's. Note that after a heart attack your troponin levels might hit 5 and then return to normal after a few days. So these troponin levels were elevated by something more extreme than a heart attack. Those levels can stay elevated for months. Troponin is released when the heart is damaged.

The increased rate of myocarditis cases and excessive troponin levels didn't happen by chance. It only started after the COVID vaccines rolled out.

The CDC says there is only a "slightly elevated" risk of myocarditis after the vaccine and they claim it is lower than the rate due to the virus.

Someone is lying to you.

We rely on those in positions of power to uphold the values of protecting life. Please be on the right side of history and say no to mandating a vaccine that has generated over one million reported adverse side effects to the VAERS reporting system. Our children need to be protected from this.

Sincerely
Sue McDaniel

Subject: Pfizer Update

External Email

"In a striking reversal, federal regulators said on Friday that they would wait for data on whether three doses of Pfizer-BioNTech's coronavirus vaccine are effective in children younger than 5 before deciding whether to authorize a vaccine for the age group...

... Pfizer-BioNTech said that their three-dose trial for young children was moving briskly, and that the new timetable would allow the F.D.A. to get more data and thoroughly review it. Results are expected in early April.

"Given that the study is advancing at a rapid pace, the companies will wait for the three-dose data as Pfizer and BioNTech continue to believe it may provide a higher level of protection in this age group," the companies said." ¹

This explanation makes no sense. The clinical trial is not "moving briskly" and "advancing at a rapid pace." It is moving at the only pace it can after the company decided to try giving a third dose to children under five at least two months after their second dose. Pfizer presumably has been waiting for two months to pass, then giving the children their third dose, then measuring the antibody response. By Pfizer's own admission, the trial is not big enough to measure the vaccine's ability to protect against infection and disease. Antibody production is the only goal.

In any case, the FDA meeting that was originally scheduled for Tuesday, Feb. 15 has now been postponed until at least April.

Hello,

I am a parent and writing to note my opposition to any COVID-19 vaccination mandate for children. COVID-19 is of very little risk to most children and the long term effects of this vaccine are unknown. It is also up to parents to decide how much risk their children should be exposed to, not the state.

Thank you.

Subject: School vaccines

External Email

I'm a parent of school age children that is very concerned and against the possible addition of Covid 19 vaccine for the children attending schools.

#1 The vaccine is only approved under EAU. It is still not approved under FDA guidelines. This is a definite concern. Do not mandate an injection that is not approved.

#2 My child has been in contact sports and attendance of school and still has not had it. The percentage of children effected by this Virus is under 1%! That means those that get it are 99% resolve from it and have natural immunity!

3 I myself got the shot and have been dealing with neurological issues, bleeding, and almost stroked! I went from being completely healthy to having to deal with Latent affects from this injection. I do not want to place my children under risk from the side effects when they out weigh the benefits.

#4 FDA has acknowledged the high significance of Cardiomyopathy in young males and females. This is permanent HEART damage! Why would you want any child to incur such a hardship when they are just starting!

#5The children are minors and it should and always be the parents decision at a medical appointment during wellness checks that it should be considered due to health history and the decision of their own PCP not the government choice.

In conclusion my children will NOT be getting this injection as aforementioned to why above.

The children should not be mandated for this vaccine under NO circumstances.

Thank you for your time
Christina

No parent should have to risk their child's health to attend public school. Consider the following:

- * Alarming rates of Myocarditis and Pericarditis are occurring in adolescents post-injection (similar to a heart attack)

- * While healthy children don't die from Covid, they do die from myocarditis. The younger you are, the greater the risk of cardiac inflammation per VAERS

- * There have been no long term studies on humans using mRNA technology in vaccines

- * Our children are not government guinea pigs!

- * Vaccinations are a private choice to be decided between Doctors and Parents

- * Other nations, including the UK, have banned vaccinations of children declaring the benefit does not outweigh the risk

Many parents with sufficient income will leave the public school system for private education. Those that can't afford to transfer their children to private schools will worry everyday what will happen to their child's health. You will be responsible for any illness caused by the vaccine. Can you live with that?

Good afternoon,

I am one of MANY concerned parents who do not approve of the decisions being made to add the covid shot as a requirement for school aged children to attend school. I watched your virtual meeting yesterday between the Technical Advisory Group (TAG) and the WA State Board of Health (SBOH). Your "data" presented was not sufficient to even make an educated decision on Criteria #5 or #6 (or any of the 9 criteria for that matter), many of you even said so yourself. Please understand that your vote, your unanimous recommendation to the Department of Health, affects ALL of us parents.

For those of us parents who do not want our children being forced to take this experimental shot, please hear us out. If the tables were turned, and the government was trying to pass a law or new code/requirement that would force YOU to either do something to your child that you wholeheartedly did not approve of or pull them from school and uproot your whole life and everything you've worked for to move somewhere else to stand up for what you believe in, how would that make you feel? I have lived in Washington my entire life, so have my parents and my grandparents did too. Everything I know, love and have worked so hard for, is here. All of you with TAG and SBOH and many other agencies/organizations of government are jeopardizing every aspect of my life with your decisions. The public no longer has a voice, we are being ignored and censored left and right. PLEASE. Hear me. I am begging you. I will not allow my children to be injected with an experimental shot. My kids and myself are otherwise fully vaccinated and get our flu shots. I am NOT anti-vaccine. I am simply a very concerned mama bear who wants to protect my cubs. Imagine for a moment if the most important people in your life were being forced to do something they did not want with every fiber of their being and ask yourself how you would feel. My heart is SO heavy. Tears are flowing as I write this. Please understand that the choices you are making affect people who may not have the same opinions, views, beliefs as you do. Are you really ok with harming others just because they think differently than you do?

Since when is it a crime to protect your own child?! I have been called so many awful,

ugly names, because I will not make my toddler wear a face covering in public. How is this ok? I don't call people names because they choose to wear a mask or get a shot. I truly respect everyone and the decisions they make for their children. We are all trying to do what is best for ourselves and our loved ones. Why can't that be respected? Why are you trying to rip that CHOICE away from me? What would it take for you to understand how I am feeling? Would it make a difference if I sat in front of you crying while holding my children? This is not fair. Surely you can see that. The vaccine is too new for me to trust it. We don't know long term effects. There is no way that we could! Covid has only been around for a few years and the vaccines even less time. Can you imagine if you voted yes for this to be implemented and years down the road we saw all kinds of defects and illnesses and deaths associated with these vaccines and boosters?? The blood would be on your hands. PLEASE, PLEASE, PLEASE. Let the PARENTS make the choices for their own children. Let ME decide if MY child needs this shot. I promise you I am far from alone on this. I know SO many people who feel this way. Our livelihood rests in your hands. Please speak up for us. Please understand that even though we may have different views, different beliefs, different opinions, that I still care about you. I would still save your life if given the chance. Love thy neighbor, right? I grew up in a household with one parent who was typically Democrat and the other typically Republican. They loved each other all the more, while cancelling one another's votes. Let's get back to standing together, respecting one another, helping each other and being neighborly. I would never want to force YOU to do something you didn't want to do. Please show some respect, and don't force me to either. United we stand, Divided we fall. Help us END the division by allowing us all to make CHOICES for ourselves. What is right for you, may not be right for me.

Much love and respect,

A Concerned Mama Bear

Ladies and gentlemen of the board:

After review of your agenda and criteria regarding inoculating 6mo olds to 5 year old children I find it hard to agree with what you are saying and proposing.

My background is that of a mother and grandmother at 76 years of age. My children along with myself have been inoculated for many serious diseases.

We are happy survivors of them all.

Today our challenge is very different, I think you will agree. Contrary to much belief there are many vacillating opinions concerning Covid 19 omicron masks etc. from governing bodies to mainstream news.

Now we are here as citizens of Washington state, reasoning not on an agenda but on babies being made vulnerable to protocols that 'will' effect their growing and adult years.

At this moment there is no testing of 6 month olds to 5 year olds that has had time to see any beneficial result's.

Relying on the fear factor of parents is a cruel and inhuman tactic.

Reading your agenda made me realize how poorly you have attended the people of our state. Let alone children. A 14 year old criteria that you updated finally got around to in 2017... amazing

THREE CATAGORIES OF CRITERIA.... You should be ashamed of this!

I. Effectiveness of vaccine, second paragraph..... FDA APPROVED RESEARCH.....large trials ..community based analyses after FDA approval.... Population based effectiveness.... 6 month old to 5 year olds with brand new immune systems ?? There is no research there is NO DATA.

I question your motives I question your knowledge I question the fact that you do not question or reason. I personally feel you want to be part of an agenda who is following very poor data.

I challenge you to present your data.... Not opinion. Actual raw data ... credentialed data.

I am against your INCLUSION OF INOCULATION FOR 6mo to 5 yr olds.

Your opening statement of John S. Mill ... this he also said "actions that lead to peoples happiness are right and those that lead suffering are wrong...

So looking for balance in our times is a challenge when force is the action of the day.

Of the 907,000 deaths from Covid only 847 school aged children have died. I don't have the data on which of those had co-morbidities, but I'll give it a conservative number of 50% which means since the beginning of the pandemic only 423.5 children have died of covid which is lower than what is typical for a single season of the flu. That being the case I do not know why we would think it's necessary to add covid to the list of required vaccinations.

Also, it is well known at this time that with the vaccine Covid can still be contracted and spread so why force a vaccine that does not stop the spread.

Good evening,

To all of you attending this meeting on whether to make children get a experimental vaccine I would like to express my concerns and my absolute anger!

This is absolutely not acceptable as the research shows that children have a death rate of .05 percent. There is a way larger number of suicides then from Covid. The danger from the shot is extremely greater then the actual virus.

Last meeting you were all calling this a disease to make it sound worse then it really is but we all know that it is a virus so please reference it the proper way.

In the last meeting there was very little truth and no references to the actual known problems from the vaccine. Let me just put that in here for you. (please see attachment above □□)

I vote no on this and because i am a tax payer that counts! I pray that God convicts you to do the right thing for our children. You all will have to answer to him eventually so I would fear that over man!

Please do the right thing here because you all know the real science and if you don't do your research because it is there for all to see.

I will be listening in on the call.

Thank you for your time.

Hello,

I am writing to say we are completely against using any unproven vaccinations. There is no long term data on how it will affect our children. We have a right to informed consent, and that means to have the option to say no. I realize the board may completely ignore our concerns, but it will only mean a mass exit from the school system. Please hear Us in that we do not want to give something to our children when we have no idea what long term results will be. There has also been a lack of transparency when it comes to information gathered about the vaccines the last two years. We want our medical freedoms. Thank you.

Subject: Registered Nurse urges TAG to vote NO on covid shots for school kids

External Email

Good morning,

I am writing to urge you to vote NO on adding the COVID-19 experimental shot to the state school immunization schedule. As a mother and registered nurse serving Washington state since 1996 in public health, neonatal, and maternal-child health, I am deeply concerned that this shot does not meet the 9 criteria of the BOH. There is not enough evidence to prove that these injections are safe or effective. There are very concerning signals worldwide that these products may do more harm than good. Do you remember the thalidomide debacle? These shots could be the next thalidomide. Please consider your person responsibility for potential long-term adverse effects, and vote NO. There is no public health emergency in 2022. We have ample time to exercise caution and to consider data over coming. years. Vote NO for the sake of safety and caution. As my colleague and pharmacokinetics expert Dr. Zana Carver writes, "The COVID-19 experimental biological products are touted as safe and effective, yet the FDA and Pfizer are currently fighting in court (again) to delay releasing the safety data. What is there to hide? Where is the transparency? Why can't independent scientists review the safety data? Is an immunobridging control group in a different age category really sufficient for this important data? What about the lop-sided data exclusions that overwhelm the effect size in Pfizer's pivotal clinical studies or the unblinding of the control group? If you look at the original data in the supplemental file, these injected products cause a significant increase in overall mortality.

We need to acknowledge that clinical trials are ongoing and some are scheduled to be concluded within two years, other studies will take longer. The novel mRNA experimental products have not been studied in children under age 5, pregnant and breastfeeding women, immunocompromised patients, patients with co-morbidities (COPD, diabetes, chronic neurological disease, and cardiovascular disorders), patients with autoimmune or inflammatory disorders, interactions with other vaccines, or any long term safety studies. In addition, the risks of anaphylaxis, myocarditis and pericarditis, and vaccine-associated enhanced (VAED) and vaccine-associated enhanced respiratory disease (VAERD) have not been properly assessed.

Reproductive toxicity has not been properly evaluated. There have been NO studies for genotoxicity and NO studies for carcinogenicity. Animal studies are incomplete and inadequate.

From the Nonclinical Evaluation Report and biodistribution study:

"Parturition: One ~ in the BNT162b3 group was euthanized on LDI showing hunched posture, pale, marked piloerection, bleeding at the vulva, distended/purple abdomen. One ~ each in the BNT162bl and BNT162b3 groups were euthanized due to all stillborn pups or total litter death. No macroscopic findings were noted in maternal necropsy."

Fetal malformations/variations were found in the pups of dams in the treatment groups.

There has been insufficient testing of the novel lipid nanoparticles; 2-[(Polyethylene glycol)-2000]-N,N-ditetradecylacetamide (ALC-0159) and ((4-hydroxybutyl)azanediyl) bis(hexane-6,1-diyl)bis(2-hexyldecanoate) (ALC-0315) are novel excipients and are not listed on the TGA's ingredient database.

ALC-0315 (the ester formulation) was minimally metabolized and only 1% was excreted

ALC-0159 (the amide formulation) was more completely metabolized and only 50% was excreted

These novel LNP have very long elimination half-lives, especially ALC-0315 (the ester formulation), which is extremely concerning.

These data prove that the LNP are distributed systemically, not broken down efficiently, and stay in the body for a long period of time. Not only that, but the spike (S) protein expression can occur anywhere in the body, reaches high levels of expression, and may be of long duration (possibly mimicking the length of time antibody titers remain elevated.)

The biodistribution study is also very alarming because it shows that these LNPs accumulate not only at the injection site but also immediately to the liver, spleen, kidneys, and lymph nodes with rising concentrations (at 48 hours, the longest timepoint measured) in the ovaries, bone marrow, thyroid gland, pituitary gland, heart, and lungs.

The S1 subunit of the spike glycoprotein that the mRNA instructs cells to produce has been shown to cause hypercoagulation, microclots, inflammation, and structural changes to fibrin(ogen), complement 3, and prothrombin in several studies. Additionally, the S1 (spike subunit) can dysregulate tight junctions and cross the blood-brain barrier, blood-air barrier, blood-testis barrier, and blood-placental barrier. It can also cause downregulation of ACE2 receptors, impair mitochondrial function, increase oxidative stress, impede DNA damage repair, and inhibit V(D)J recombination in vitro."

Please do not allow our children to be guinea pigs for these experiments!

To whom it may concern...

I have two children in the public school system. I along with most I know will be pulling our kids out if this experimental "vaccine" is required. There is absolutely NO reason our kids need this. It's causing so much more harm than good. Check the science.. Hell will freeze over before my children are subjected to this poison. Enough of all this crazy already!!! You work for us and somehow you all have forgotten that. Thousands more kids will exit the school system than already have & be homeschooled. Will be hard, but so much better than having to put up with this crap any longer.

Sincerely from one pissed off parent!

T.O.

For the record, I am strongly against the COVID vaccine mandate for children in public schools in Washington. In fact. I am again any sort of mandate that supports showing a vaccination card to get into a restaurant, event or public place of any sort.

Parents are the only ones who have the right to decide what, if any, vaccines a parent gives their child.

Do not mandate Covid vaccines for kids. I will pull my children out of the system and encourage others to do the same. Many families have not vaccinations their kids because the risks of the vaccines outweigh the benefits. Give us a choice and let us control our own health decisions. Kids have had Covid and have natural immunity. This isn't doing anything to help. Complete tyranny to try and implement this.

To whom this may concern;

I am writing this to voice my opinion about the Covid Vaccine for children. There is no need to mandate a vaccine for children when they aren't being harmed by the virus! This nonsense has to stop! You are harming children and adults by mandating a vaccine that doesn't even prevent you from getting it or spreading it!

NO MANDATES FOR COVID VACCINES FOR CHILDREN! NO MANDATES FOR SCHOOLS!!!!

Stop the madness now!

Obviously students should not be forced to take a vaccination that is experimental and doesn't even do what they created it to do. It's insane that this is being pushed and I will never send my kids to a school that requires it. It makes me sick that the powers that be, especially in education, are pushing this nonsense. Honestly I'll probably never send my kids back to public school either way. I oppose this idiocy though. So that is what I am writing to say. Thanks

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

To whom it may concern:

I wish to respectfully ask the board and TAG members to refrain from making the current vaccines mandatory for our children to attend school. Please don't put us parents or our children or our schools in such a position. I'm just one hard working dad asking you to not take my daughters out of school. They need the social and intellectual development so they too can some day live the American dream as you and I have. Please don't make vaccines mandatory. Thank you for taking time for this!

God bless you all!

I am very against even the thought of trying to pass this emergency new technology MRNA vaccine requirement for an education for our children children. I very relieved to know my 5 year old grandson was pulled from public education (taking his federal money away) and is taught at home due to the crazy and harmful requirements that the state of Washington has thrust on to the citizens and especially our most vulnerable.. our kids. He will not be part of the horrific experiments of masking and potentially requiring experimental vaccine with no long term health studies done. What is this state even thinking? They are not thinking and it has become evident to more and more Washington state citizens!

Facts—we are seeing that from the vaccine, the people who are most likely to get ill, or to die, are young people...Covid-19 tends to kill very old people with comorbidities, but the vaccine tends to hurt, to harm and to kill people who are young, who are at the beginning of their lives. And the people who get myocardial infarction from this, myocardial diseases from this, are never healing. Their Hearts simply turn into this scar tissue and will not heal. One of the studies probably the most important is MERCK's clinical, Pfizer's clinical trial, for its Covid-19 vaccine. And we now have six months of data that Pfizer was required to file with FDA, and to show to the public. And what anybody who can read can see from that data is the very, very striking confession that there is no all cause mortality benefit from this vaccine. And what that means is that the people who took the vaccine more of them died than the people who took the placebo. And if you go into the granular or analysis of the vaccine, what it shows is that the vaccine does prevent a small number of deaths from Covid 19. But for everybody who's life was saved from Covid 19, for every life that was saved by the vaccine from covid 19, three people died from heart attacks. In the vaccine group there were 20 deaths, and in the placebo group there were 14 deaths.

The Johns Hopkins study shows that it's virtually impossible to find any healthy child in the world who has died from Covid 19. Children have a zero risk, a healthy child has a zero risk from this disease, and yet the risk from the vaccine, it's very high!

Why in the name of everything that's right would you even contemplate requiring this questionable efficacy and proven dangerous vaccine with no long term studies on our children? YOU MUST VOTE NO and if you don't and this passes and children are harmed WE THE PEOPLE will not be silent.

Subject: Comments on WA BOH TAG Meeting Thursday 2-10-2022

External Email

As a parent and citizen of WA state and an info tech professional I have had an opportunity to listen to the am portion of the TAG meeting on Thursday. I admit I am not a doctor, nor academic or research scientist but am voicing my concerns as a suburban mom with an undergrad degree who has done some home health care in the senior/developmentally disabled community and substitute taught for grades K-12. I work with information in technology now as a profession but understand people's individual health profiles do not come with a one size fits all solution. As seen with my mom who had stage 3c Cancer and is a survivor. Doctors advised chemo and radiation for my mother and after careful research and talking to several doctors we knew the chemo may kill her at her low weight with her comorbidities so we went with two forms of radiation instead. She has been in remission for 10 years. From this experience I understand where there are risks, there must be choices.

I have major concerns about adding the Covid 19 vaccine to the list for school children. Apart from the fact that Covid is not a childhood disease (adding the Covid 19 vaccine to the list would be like adding the flu shot to the list). Healthy kids are not the demographic for this RNA flu virus. Seniors are. IFR for healthy kids is about 20 in 1 million <https://github.com/mbevand/covid19-age-stratified-ifr>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fgithub.com%2Fmbevand%2Fcovid19-age-stratified-ifr&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C26905d8e9f4142230d8408d9edc3ea86%7C11d0e2172>>.

Next concern is that the Science has changed since gathering most of the data used for the TAG presentation on Thursday. We are still gathering empirical evidence on children and the vaccines and dosing. There is only full BLA/FDA approval for over age 16 <https://www.fda.gov/news-events/press-announcements/fda-approves-first-covid-19-vaccine#:~:text=Today%2C%20the%20U.S.%20Food%20and,years%20of%20age%20and%20older>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fnews-events%2Fpress-announcements%2Ffda-approves-first-covid-19-vaccine%23%3A~%3Atext%3DToday%252C%2520the%2520U.S.%2520Food%2520and%2Cyears%2520>>. No country in Europe is requiring covid vaccines for kids to attend school and there may be a good reason for this. Children are at extremely low risk of severe COVID-19. The virus is less deadly to children than flu and pneumonia. Dr Lim of UW IHME had the most up to date data as he included some Omicron data from the past few months and his modeling predictions are that we are on the downward projection. To this end. We need to gather more current data vs using data from the last two strains to make important decisions that will surely make it onto House Bills and be met with opposition. Most of the 9 point criteria have not been met. I do not have knowledge of all the criteria on the meeting agenda so I only answered the items below that I have information/knowledge on and I have cited examples.

Criteria 1. No. The effectiveness of the vaccines since Omicron indicates a MUCH Higher vaccine breakthrough (55.9% breakthrough with Omicron vs 3.2% Alpha/Delta). Which now fails effectiveness criteria. Severity of Covid is going down. Significantly fewer patients need hospitalizations than previous strains (19.8% Omicron vs 54.6% Alpha/Delta). Significantly less deaths (0.9% Omicron vs 5.4% Alpha/Delta).

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedicinenex.stanford.edu%2Fmedx-speakers%2Fmobeen-syed%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C26905d8e9f4142230d8408d9edc3ea86%7C11d>

Criteria 4. No. Myocarditis...We should further study this. It appears to occur in one in 3,000 to one in 7,000 boys between 12 and 17 after a second COVID-19 vaccine dose

<https://jamanetwork.com/journals/jama/fullarticle/2788346>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fjamanetwork.com%2Fjournals%2>

Still undergoing studies about the spacing between dosing

<https://www.nbcnews.com/health/health-news/covid-vaccine-cdc-advisers-weigh-delaying-second-shot-eight-weeks-rcna14905>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nbcnews.com%2Fhealth%2Fnews%2Fcovid-vaccine-cdc-advisers-weigh-delaying-second-shot-eight-weeks-rcna14905&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C26905d8e9f4142230d8408d9edc3ea86%7C11d>

Criteria 6. No. The vaccination against this disease does not prevent person-to-person transmission. The CDC Director said so herself, the vaccines no longer prevent transmission "CDC Director: The Vaccines No Longer Prevent transmission"

<https://www.msn.com/en-us/health/medical/cdc-director-covid-vaccines-cant-prevent-transmission-anymore/ar-AASDndg>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.msn.com%2Fen-us%2Fhealth%2Fmedical%2Fcdc-director-covid-vaccines-cant-prevent-transmission-anymore%2Far-AASDndg&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C26905d8e9f4142230d8408d9edc3ea86%7C11d>

Transmission has nothing to do with viral loads as we previously thought (they are similar now in both vaxxed and unvaxxed <https://www.ucdavis.edu/health/covid-19/news/viral-loads-similar-between-vaccinated-and-unvaccinated-people>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ucdavis.edu%2Fhealth%2Fcovid-19%2Fnews%2Fviral-loads-similar-between-vaccinated-and-unvaccinated-people&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C26905d8e9f4142230d8408d9edc3ea86%7C11d0e>

) Transmission has to do with getting infected in the first place

<https://www.bmj.com/content/376/bmj.o298>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.bmj.com%2Fcontent%2F376>

. Once you're infected, you still can—although what we know about the window when you're most likely to transmit the virus to others has improved. And as we see now with Omicron... there is a MUCH higher vaccine breakthrough (55.9% breakthrough with Omicron vs 3.2% Alpha/Delta).

Criteria 7. No. The vaccine containing this antigen is not acceptable to all the medical community and especially not the public for children. For adults, yes. For seniors definitely <https://www.medrxiv.org/content/10.1101/2021.07.08.21260210v2.full>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F>

But for healthy children no. And that is what this TAG focus group is about. To decide what vaccines children in this state will be required to have for daycare and school entry (preschool-12). For preschool, news just in today the fda-postponed its-advisory-committee-meeting-discussion for the-request-authorization for the Pfizer Covid 19 vaccine for ages 6 months to 4 years old <https://www.fda.gov/news-events/press-announcements/coronavirus-covid-19-update-fda-postpones-advisory-committee->

meeting-discuss-request-authorization

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fnews-events%2Fpress-announcements%2Fcoronavirus-covid-19-update-fda-postpones-advisory-committee-meeting-discuss-request-authorization&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C26905d8e9f4142230d8408d9edc3ea86%7C>

They are still gathering empirical data on the dosage. We are still in the midst of trials using EUA for kids ages 15 to 5. Trials won't be complete until May 31st 2023

<https://www.fda.gov/media/151710/download>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F151710/download&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C26905d8e9f4142230d8408d9edc3ea86%7C>
. Therefore public acceptance will be low, rightfully so with this information still forthcoming.

Criteria 9. No. (The burden of compliance for the vaccine containing this antigen is reasonable for the parent/caregiver.) There will be pushback as long as we are still gathering empirical data and do not have full BLA for this demographic and know Covid is not a childhood disease. Covid is not Polio or measles and the shots do not protect against infection/transmission and protection from severe disease lasts 6 months not a lifetime like other vaccines. Covid shots are akin to flu shots. Protection wanes and you can still infect and transmit. Also if Omicron is any indication of the future of Covid 19, endemic flu is what we have here, which healthy children have no problem navigating

<https://mynorthwest.com/3326564/uw-virologist-omicron-sub-variant-endemic/>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmynorthwest.com%2F3326564%2F3326564%2F3326564%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C26905d8e9f4142230d8408d9edc3ea86%7C>

Thank you for listening.

Subject: Comments for the Immunizations Technical Advisory Group

External Email

Dear State Board of Health,

My name is Mabi Fernandes, I live on Bainbridge Island with my husband and daughter (6). I am a teacher.

Criteria 5: "The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population"

Criteria 6: "Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting or activity being given the highest priority."

My comments:

1. According to the latest report of the Washington State Health Department: As in February 7, 80.2% ages 5 and up have received at least 1 dose and 72.5% are fully vaccinated. Not mentioning the number of people who had acquired natural immunization. Therefore the risk in the whole population has been reduced dramatically, since the beginning of the Pandemic. So far, there are enough resources (vaccination, masks, treatments and information in general) for those with medical conditions or vulnerable populations to keep themselves as safe as they choose to be.

2. The World Health Organization has stated that the pandemic will end when we "reach the global target of vaccinating 70% of people in all countries ..." Which means that our community has widely achieved those standards and therefore do their part. Moreover, we do not even need to be in an emergency situation to begin with.

3. Children are at low risk according to the CDC data. The deaths of the population in school age 5 - 18 years are: 644 since the beginning of the pandemic (2020-2022) in the whole country. This number includes children with pre-existing medical conditions or comorbidities which leaves a narrower number of healthy children in real danger. The current population of children in school age is more than 41 millions of children in our country. Clearly the numbers talk by themselves, the risk is going lower and lower.

4. The vaccination in children has just begun and time is needed to see the existence or not of side effects. There are people who are currently vaccinating their children willingly. This is a state who mostly believes in science. The imposition creates more distrust than trust on science and on our own community. Plus, you need to give more time to actually say that it is totally safe for children.

5. Both the virus and the vaccine are new in the real population. Both have symptoms and side effects. There is always going to be a risk factor. Then why do you want to impose on us which risk to take? It should be totally optional to be part of the experience, pushing it puts a big question mark on the freedoms that this country stands for and that are expressed in the Constitution itself.

6. The State should promote a real inclusion and diversity of thinking. A community where it is ok to have different opinions and disagree in peace. Where there is room for everyone to finish this political battle which has gotten immerse since the beginning. This mandate will bring more resentment because you are talking about our children and telling parents that we don't have the right to decide for them.

7. Creating more division. All the COVID mandates so far have caused more division in our society, distrust among each other and the sense of community has fallen in a one-sided picture. This last mandate will cause more harm in the long run than good.

8. Let me share my personal experience.

I got vaccinated in March and April 2021, right after my first shot I developed all the symptoms for COVID and serious pain on my left arm (where the shot was given). The symptoms went away but the pain did not. I mentioned that to the person who was going to apply the second dose, who told me that it was ok, that it was normal. So, I did the second one. The strong pain remained for about 6 months and even later it was very mild, never gone. So I decided not to get the booster. A month later we contracted COVID, I got mild symptoms for 2 - 3 days and then I was fine. My daughter got a fever for 1 night and then she was fine. So, she has natural immunization and I have a natural booster, same for my husband. If she got natural immunity, why do you want to impose a vaccine that is in ongoing research? I guess this case can apply to many families.

Please, reconsider this mandate. Or at least you should make it more public and totally announced in different ways so everyone has time and space to participate. It should even be mandatory to be shared in every school. And ask every school for opinions about it before even considering it as a mandate. I learned of this event just by accident on facebook 3 days ago and nobody, my school included, knew about this proposal.

Thank you for your attention,

Sincerely,

Mabí Fernandes

Subject: Vote NO on Covid-19 Vaccine Mandate

External Email

Dear Washington State Board of Health Members,

Thank you for the opportunity to submit my comment.

People like you who have influence need to stand up and say enough is enough. These ongoing mandates are mentally and physically harming the children who you should be protecting. Everyone who continues to perpetuate this narrative will have this on their conscience forever but you can be that dissenting voice and help start turning things around, especially for our children.

I am vehemently opposed to adding the Covid19 vaccination to the schedule for children to attend school. I am not anti-vaccine, I am pro-choice. My children are fully vaccinated with all the standard vaccines on the schedule. However, if this one is included they will not be getting it and I will pull them out of school. These sort of things must remain an individual choice made by parents who have done their research, without any repercussions by the state or district if a student remains unvaccinated due to whatever reason it may be; naturally acquired immunity, religious and/or philosophical beliefs.

It's a known fact that this vaccine hasn't been proven to prevent transmission of Covid. It's absurd to consider adding it to the schedule with the information we have now. It really makes people question the real intentions and more so question the other vaccines as well. I Imagine it will make a lot of parents like me wake up.

In order to maintain the integrity and credibility of WSBOH, I implore you to vote no. More and more truths and revelations about this pandemic are coming out daily, showing how so much of what has already happened is unconstitutional and unethical. Don't be on the wrong side of history.

Thank you,
Stephanie Adams

Good afternoon,

I am one of MANY concerned parents who do not approve of the decisions being made to add the covid shot as a requirement for school aged children to attend school. I watched your virtual meeting yesterday between the Technical Advisory Group (TAG) and the WA State Board of Health (SBOH). Your "data" presented was not sufficient to even make an educated decision on Criteria #5 or #6 (or any of the 9 criteria for that matter), many of you even said so yourself. Please understand that your vote, your unanimous recommendation to the Department of Health, affects ALL of us parents.

For those of us parents who do not want our children being forced to take this experimental shot, please hear us out. If the tables were turned, and the government was trying to pass a law or new code/requirement that would force YOU to either do

something to your child that you wholeheartedly did not approve of or pull them from school and uproot your whole life and everything you've worked for to move somewhere else to stand up for what you believe in, how would that make you feel? I have lived in Washington my entire life, so have my parents and my grandparents did too. Everything I know, love and have worked so hard for, is here. All of you with TAG and SBOH and many other agencies/organizations of government are jeopardizing every aspect of my life with your decisions. The public no longer has a voice, we are being ignored and censored left and right. PLEASE. Hear me. I am begging you. I will not allow my children to be injected with an experimental shot. My kids and myself are otherwise fully vaccinated and get our flu shots. I am NOT anti-vaccine. I am simply a very concerned mama bear who wants to protect my cubs. Imagine for a moment if the most important people in your life were being forced to do something they did not want with every fiber of their being and ask yourself how you would feel. My heart is SO heavy. Tears are flowing as I write this. Please understand that the choices you are making affect people who may not have the same opinions, views, beliefs as you do. Are you really ok with harming others just because they think differently than you do?

Since when is it a crime to protect your own child?! I have been called so many awful, ugly names, because I will not make my toddler wear a face covering in public. How is this ok? I don't call people names because they choose to wear a mask or get a shot. I truly respect everyone and the decisions they make for their children. We are all trying to do what is best for ourselves and our loved ones. Why can't that be respected? Why are you trying to rip that CHOICE away from me? What would it take for you to understand how I am feeling? Would it make a difference if I sat in front of you crying while holding my children? This is not fair. Surely you can see that. The vaccine is too new for me to trust it. We don't know long term effects. There is no way that we could! Covid has only been around for a few years and the vaccines even less time. Can you imagine if you voted yes for this to be implemented and years down the road we saw all kinds of defects and illnesses and deaths associated with these vaccines and boosters?? The blood would be on your hands. PLEASE, PLEASE, PLEASE. Let the PARENTS make the choices for their own children. Let ME decide if MY child needs this shot. I promise you I am far from alone on this. I know SO many people who feel this way. Our livelihood rests in your hands. Please speak up for us. Please understand that even though we may have different views, different beliefs, different opinions, that I still care about you. I would still save your life if given the chance. Love thy neighbor, right? I grew up in a household with one parent who was typically Democrat and the other typically Republican. They loved each other all the more, while cancelling one another's votes. Let's get back to standing together, respecting one another, helping each other and being neighborly. I would never want to force YOU to do something you didn't want to do. Please show some respect, and don't force me to either. United we stand, Divided we fall. Help us END the division by allowing us all to make CHOICES for ourselves. What is right for you, may not be right for me.

Much love and respect,

A Concerned Mama Bear

Dear Technical Advisory Group (TAG),

Please oppose including mRNA shots for students.

Currently no published literature on pediatric Covid-19 vaccine effectiveness in K-12 school setting.

Covid-19 is far down the list of causes of death for Washington children. Yet, suicide is the 3rd leading cause of death for our teenagers ages 15-19.

Subject: Public Comment Mandatory Covid Vaccination in Public Schools

External Email

To whom it may concern,

I am a Pullman, WA resident with children and grandchildren who have both attended Washington public schools in the past, or are currently attending Washington public schools. I would like to give my opinion on the matter of mandatory vaccinations for the covid vaccine in public school settings.

Let me preface my comment with this: I am not against childhood vaccinations. All four of my now adult children were fully vaccinated in order to attend public schools, and I would do it all over. The covid vaccine is a bit different.

The covid vaccine does not confer lifelong immunity. We are currently sitting on a 3-shot series, and all evidence shows waning effectiveness over a fairly short period of time, and a complete lack of the ability to stop transmission. In light of changing information and lack of transparency at this time coming from vaccine manufacturers, it seems prudent to wait, at the very least, until we are able to receive ALL of Pfizer's documents related to the licensing of their vaccine. How can a sound, medical conclusion be drawn without that information? Beyond that, you will be forcing parents to make a choice that we know could have a negative impact on their child's health, no matter how small, regarding the vaccine's ability to protect from covid infection versus its ability to cause endocarditis/myocarditis, a known and documented associated risk. I believe this is an unfair choice to force on parents.

All that aside, we are still dealing with EUAs for school aged children. Pfizer and Moderna both only have full FDA approval for children 16 and older. I feel it is unethical to mandate EUA vaccines on children under the threat of not being able to attend public schools. But I also feel it is unethical to mandate a vaccine that doesn't confer lasting immunity.

In conclusion, lacking the vaccine's ability to prevent spread and induce lifelong immunity, the Washington State Board of Health should NOT consider mandating any existing covid vaccine in Washington Public Schools.

Thank you for your time

Nichole Weeks

Subject: Criteria 9 Comments

External Email

Dear Washington State Board of Health,

I missed the Washington State Board of Health Survey deadline of February 2nd and my school district gave me your email so that I could send in my comments/concerns.

Here is my input as it relates to Criteria Nine "The burden of compliance for the vaccine containing this antigen is reasonable for the parent/caregiver."

#1 Considering the risks the burden of compliance on parents is unacceptable. There are several websites that show adverse effects. This research article has some good data on each of the vaccines <https://www.scivisionpub.com/pdfs/us-covid19-vaccines-proven-to-cause-more-harm-than-good-based-on-pivotal-clinical-trial-data-analyzed-using-the-proper-scientific--1811.pdf>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.scivisionpub.com%2Fpdfs%2Fdocument%2F1811.pdf&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C0627d44cd0194e31611408d9ecdcd2f3%7C11d0>

(see <https://openvaers.com/covid-data/adverse-events-by-state>)

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fopenvaers.com%2Fcovid-data%2Fadverse-events-by-state&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C0627d44cd0194e31611408d9ecdcd2f3%7C11d0e21...>

#2 Considering that any injury sustained by a child is borne completely by the parents because the manufacturers are shielded under the Public Readiness and Emergency Preparedness (PREP) Act, the burden of compliance is unacceptable.

<https://aspr.hhs.gov/legal/PREPact/Pages/default.aspx>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Faspr.hhs.gov%2Flegal%2FPREpac>

#3 For those who choose to opt out of a school vaccine requirement, the burden is out of balance.

If parents choose to opt out, they have to get an appointment with a practitioner to get the required risk-benefit consultation and signature. They must make an appointment with a practitioner, take time off work, arrange transportation, etc. It's becoming more difficult to find a practitioner willing to provide the required risk-benefit consultation and sign an exemption form or letter stating that they have done so. This is a burden and it feels like the opt-out does not exist.

#4 And finally, a tremendous burden exists in the coercive aspect of any vaccine requirement. Parents who opt their children out of one or more vaccinations experience emotional and psychological stress because they know they face scrutiny by school staff, by health care providers, by surveillance systems, as well as cultural pressure. Children who lack one or more vaccinations are singled out at various times, excluded from school and extracurricular activities. If a vaccine is NOT on the schedule, a parent is able to choose what is best for their child without the added stress. It is an unreasonable burden to stress entire families with a requirement that should be a personal medical decision.

It is incomprehensible that the Board would even consider such a requirement with products that cannot prevent infection or transmission.

Sincerely,

Deanna Leslie

Dear Mr. Ford, the Administration of St. Patrick's, the Seattle Archdiocese, and the WA State Board of Health,

I am writing today on behalf of my student, as well as several concerned St. Patrick's families who have reached out to me directly after the St. Patrick's parents group was turned off because of polite discussion about the ongoing mask requirement at school. I am imploring you to stand up for our children's health and well-being and take a stand against the mask mandates. The Seattle Archdiocese represents a well-respected number of facilities, students, and families across Western Washington. You have the ability to show the residents of Washington State that you are an organization that puts their student's safety first, not politics, like the Baltimore Archdiocese is doing <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.baltimoresun.com%2Feducation/school-maskings-20220211-20220211-w62eycynu5fybgztpujemsuwga-story.html%3Ffbclid%3DIwAR1xe8ncPOmITYxyAOFAkx7IDyI7ycxmek4TocY5sUR2ia9XBBVvkKTY8u4&data=>>

It is our understanding that the current mask requirements were adopted by the Seattle Archdiocese last fall at the suggestion of the Washington State Board of Health. Since that time, innumerable studies have been published across the world on all aspects COVID-19, from the inherent risk factors & most impacted age cohorts, the efficacy and side-effects of pharmaceutical preventions, early treatment protocols and non-medicinal mitigation strategies such as masking and school shutdowns. Yet with new scientific evidence, there has been no update to the masking protocols and mitigation strategies in schools across our state.

A little about me – no – I’m not a “COVID denier” that many believe those asking for choice in masking are! In fact, our family began watching very closely what was happening in China in December of 2019, when it was just a conspiracy and nothing to worry about. By late-January, I was one of the “crazy people” doing my grocery shopping in an N95 mask and gloves. At that time our 3 children all attended public school, and we made the decision to stop sending the kids to school 2-weeks prior to the official shut-down. And who doesn’t remember wiping down groceries and mail with sanitizing wipes, or simply leaving things outside for days before allowing them into our houses! We chuckle about all of that now, but it important to reflect on. Why did we do all of that?

Simply put, in March of 2020, there was quite literally nothing known about this new illness everyone was calling COVID-19. Was it transmitted by touch, airborne droplets like the flu, or truly aerosolized? Could it survive on surfaces? Who were the most at risk for hospitalization and death? We knew nothing. So, we took what are now known to be silly, and in some cases drastically damaging, measures. We call them lessons learned. However, what we’ve learned is not being put in to practice through policy change. Instead, we are continuing with measures science has proven are causing more harm than good!

We understand now what ages and comorbidities are at the highest risk. We know how to treat COVID at home, and what simple, proactive steps everyone can take to prevent serious illness. Doctors know how to treat serious cases in hospital, and what treatments to avoid. Large percentages of people now carry natural immunity, and vaccines are available to those who choose to take them. And, most importantly, we know that our children, thank God, are the absolute lowest risk cohort. Yet those children have unfairly borne the brunt of mandates in the cruelest of ways under the guise of safety.

It is common knowledge that the cloth and surgical masks worn by students do not prevent the transmission of viruses. That is how my son was able to contract COVID while at school! That’s also the very reason there was not a single N95 available to purchase in April 2020! At their largest measurement (0.3 microns), 250 aerosolized COVID viruses can fit inside the average human hair. Now consider those gaping holes in the sides of the student’s surgical and cloth masks as you welcome them to school.

Even the CDC’s own study, and associated infographic, “proving” masking efficacy has an asterisk noting the protection offered by cloth masks was “not statistically significant.” Only N95s prove any amount of statistically significant results. CDC - Mask Effectiveness Indoors

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fmmwr%2Fvolu>

Another CDC resource clearly states that the filtration of masks “Does NOT provided the wearer with a reliable level of protection from inhaling smaller airborne particles and is not considered respiratory protection.” CDC – Masks vs. Respirators

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fniosh%2Fnpptl%508.pdf&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cb734a209e39b494a1eba08d9f0a2bfe3%7C11>

The ACGIH, a non-profit of occupational and environmental health and sciences experts, has compiled the results of much of their research regarding how to protect workers during the COVID pandemic into an infographic for employers. Even when both parties are wearing cloth or surgical masks correctly, the amount of protection offered is only 27 minutes and 60 minutes, respectively. How does that very limited amount of protection justify the mental and emotional consequences of masking students? COVID-19 Worker Safety - Masks

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.acgih.org%2Fcovid-19-fact-sheet-worker->

resp%2F&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cb734a209e39b494a1eba08d9f0a2bfe3%7C1

It is also for this reason that whenever you purchase surgical masks, you find on all of the packaging warnings that state they are non-medical and/or do not prevent illness.

(For example, I clicked on the first link on an Amazon search for "surgical masks" and right in the description it says are non-medical. Amazon Surgical Mask

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsmile.amazon.com%2FHDFK-](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsmile.amazon.com%2FHDFK-Disposable-Protective-Breathable-Non-)

Woven%2Fdp%2FB088YJCQ7Z%2Fref%3Dsr_1_2_sspa%3Fcrd%3DX903K75VJ277%26keywords%3Dsurg

2- spons%26psc%3D1%26spLa%3DZW5jcnlwdGVkUXVhbGlmaWVyPUEyUUFFNTVISFRGQVBGJmVuY3J5cHRIZ

) It is widely known that masks do not prevent the passage of particles as small as aerosolized viruses.

One of the pre-eminent experts on PPE and industrial exposure in the U.S. is Stephen Petty. He advises large industrial companies on Industrial Hygiene (aka, worker safety) and testifies as a subject matter expert on class-action lawsuits, like that of Monsanto, regarding industrial PPE protocols - such as with dangerous chemicals - when inhaled particulate is life or death every day. In the presentation linked below he covers COVID specifically. While I'm sure you are receiving many messages like mine full of links and references, I cannot urge you enough to take the time to watch this video presentation. In his world where PPE actually needs to protect, masks are not even considered an option, nor is facial hair! Stephen Petty - On PPE and Aerosols

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.youtube.com%2Fwatch%3F>

Included in this next link is over 150 mask studies with conclusions, in part, against the effectiveness of masks due to a variety of variables. I found while doing my own researching that resources providing a lot of information in one place was very helpful.

150+ Comparative Studies and Articles on Masks

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fbrownstone.org%2Farticles%2Fm>

than-150-comparative-studies-and-articles-on-mask-ineffectiveness-and-

harms%2F&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cb734a209e39b494a1eba08d9f0a2bfe3%7C1

Lastly, on the science of whether masks work, I would challenge that after 2-years of continual and aggressive research, study, and retrospective review throughout the world, one should expect to see clear, overwhelming, and consistent data from the scientific community proving without a shadow of a doubt that masks provide a strong level of protection. That data simply doesn't exist.

Here's where common sense can help to fill in the blanks. Masking in schools is not widespread across the country. Only 15 states have previously had mandatory masking in schools, though that number is reducing by the day. IF masking students really is the lynchpin that has kept our state's elderly and high-risk population safe and we simply cannot do without it, how is it there isn't overwhelming hospitalization and death of the elderly and high-risk in the 35 states who didn't mask students?

All masking science aside, in my opinion the most important topic to consider is the how masking and the subsequent enforcement of masking is having on our children. There is a steady outpouring of data showing negative consequences for our children, from faltering to outright failing test scores, startlingly high rates of referral to speech therapy in young learners, massive increases in anxiety, self-harm and depression among adolescents and teens, and a basic lack of excitement and connection to school communities. The Educational Consequences of Masking Children

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nationalreview.com%2F2022-](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nationalreview.com%2F2022-educational-consequences-of-masking-children%2F%3Ffbclid%3DIwAR0E9-)

jL4yoUssHhJesfGpD1rYOwYams2Pfs93XuEoBE-

HrzkWpfyVjWS0&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cb734a209e39b494a1eba08d9f0a2bf

However, I don't think that linking study after study is needed to make this point. You are professional educators, and you know children! You know how they learn, and how they grow. You know how they respond to a smile. You know how they watch a teacher's mouth move when they are reading aloud, or when hearing a new word. You know how children instinctively see another child's frown and respond with kindness. Or how they see another child's smile and return it with a smile of their own. Or how children see someone react poorly to an unkind word they said, so they apologize, realizing the impact of their words on others. Without seeing that frown, they cannot know that impact. These little connections and the learning of social queues are truly the work of childhood, and that has been taken from them. Think back to your favorite teacher as a child – then imagine not knowing what that teacher looks like without a mask on!

And what about the students who are not okay, and who are blending in and disappearing into a sea of masks? What about the children who have anxiety? What about the students who are embarrassed to ask for help, or feel left out? Without seeing the emotions on their faces, how can we be sure they aren't slipping through the cracks?

The data says they are. JAMA Pediatrics – Mental Health & Wellbeing

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fjamanetwork.com%2Fjournals%2F4bc0-45d3-b2bb-](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fjamanetwork.com%2Fjournals%2F4bc0-45d3-b2bb-b9c227e1313f%26utm_source%3DFor_The_Media%26utm_medium%3Dreferral%26utm_campaign%3Dfr)

b9c227e1313f%26utm_source%3DFor_The_Media%26utm_medium%3Dreferral%26utm_campaign%3Dfr

We have also taken our most innocent and easily influenced segment of the population, and over the last two years taught them that they should fear the air around them. They should fear their own breath. If they take their mask off, they could be responsible for infecting someone who dies. Or that their good friends or classmates could get them sick. Instead, they must keep their face hidden, not speak during lunchtime, and don't get too close to one another because that's just too risky and unsafe. This is not okay!

I'm a Public School Teacher. The Kids Aren't Alright.

schoolchildren%3Ffbclid%3DIwAR00OBNXmp3yJRFUQyreoce8AXfbgTOiJU8tU3qheAUGJSAoSdSKNP8iJ4sW8&d

Though we are a new family to St. Pats, my father & his family all matriculated through parochial school, so many of the teachings we are seeing resonate deeply in my heart, including the fostering of strong community bonds. But that community collapses without smiles in the hallways, with parents unable to meet and know one another at events, without the hugs over a scraped knee on the playground, without the sarcastic smirks of middle school, and without the ability see someone's frown and help to make them smile. The Strength of Weak Ties

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cse.wustl.edu%2F~m.neum>

The residents of this state, and specifically the parents of school age students, have been understanding of restrictions, and, more recently, patient in waiting for policies to be adjusted in response to the data. But as the data continues to build against mask

mandates with no changes to policy, we are asking you to push back on behalf of the health and education of our children.

We teach our kids to follow their morals, to do what's right even when it's hard, and to respectfully disagree when necessary. Now is the time for the school administration, and the leadership at the Seattle Archdiocese, to recognize that our children need us to stand up for them. It's time to respectfully disagree and stand up for what is right on behalf of the students in your care.

We are asking you to do better for our children.

We are asking you to do better for our communities.

We are asking you to do better.

Thank you for your time and thoughtful consideration,

Dani Kessler, 253-459-2449

P.S. And please – take the time to watch the Stephen Petty video on PPE linked above. It's worth all 26 minutes.

Dear Mr. Ford, the Administration of St. Patrick's, the Seattle Archdiocese, and the WA State Board of Health,

I am writing today on behalf of my student, as well as several concerned St. Patrick's families who have reached out to me directly after the St. Patrick's parents group was turned off because of polite discussion about the ongoing mask requirement at school. In fact, our family began watching very closely what was happening in China in December of 2019, when it was just a conspiracy and nothing to worry about. By late-January, I was one of the "crazy people" doing my grocery shopping in an N95 mask and gloves. At that time our 3 children all attended public school, and we made the decision to stop sending the kids to school 2-weeks prior to the official shut-down. And who doesn't remember wiping down groceries and mail with sanitizing wipes, or simply leaving things outside for days before allowing them into our houses! We chuckle about all of that now, but it important to reflect on. Why did we do all of that?

Simply put, in March of 2020, there was quite literally nothing known about this new illness everyone was calling COVID-19. Was it transmitted by touch, airborne droplets like the flu, or truly aerosolized? Could it survive on surfaces? Who were the most at risk for hospitalization and death? We knew nothing. So, we took what are now known to be silly, and in some cases drastically damaging, measures. We call them lessons learned. However, what we've learned is not being put in to practice through policy change. Instead, we are continuing with measures science has proven are causing more harm than good!

We understand now what ages and comorbidities are at the highest risk. We know how to treat COVID at home, and what simple, proactive steps everyone can take to prevent serious illness. Doctors know how to treat serious cases in hospital, and what treatments to avoid. Large percentages of people now carry natural immunity, and vaccines are available to those who choose to take them. And, most importantly, we know that our children, thank God, are the absolute lowest risk cohort. Yet those children have unfairly borne the brunt of mandates in the cruelest of ways under the guise of safety.

It is common knowledge that the cloth and surgical masks worn by students do not prevent the transmission of viruses. That is how my son was able to contract COVID while at school! That's also the very reason there was not a single N95 available to purchase in April 2020! At their largest measurement (0.3 microns), 250 aerosolized COVID viruses can fit inside the average human hair. Now consider those gaping holes in the sides of the student's surgical and cloth masks as you welcome them to school.

Even the CDC's own study, and associated infographic, "proving" masking efficacy has an asterisk noting the protection offered by cloth masks was "not statistically significant." Only N95s prove any amount of statistically significant results. [CDC - Mask Effectiveness Indoors](#)

Another CDC resource clearly states that the filtration of masks “Does NOT provided the wearer with a reliable level of protection from inhaling smaller airborne particles and is not considered respiratory protection.” [CDC – Masks vs. Respirators](#)

The ACGIH, a non-profit of occupational and environmental health and sciences experts, has compiled the results of much of their research regarding how to protect workers during the COVID pandemic into an infographic for employers. Even when both parties are wearing cloth or surgical masks *correctly*, the amount of protection offered is only 27 minutes and 60 minutes, respectively. How does that very limited amount of protection justify the mental and emotional consequences of masking students? [COVID-19 Worker Safety - Masks](#)

It is also for this reason that whenever you purchase surgical masks, you find on all of the packaging warnings that state they are non-medical and/or do not prevent illness. (For example, I clicked on the first link on an Amazon search for “surgical masks” and right in the description it says are non-medical. [Amazon Surgical Mask](#)) It is widely known that masks do not prevent the passage of particles as small as aerosolized viruses.

One of the pre-eminent experts on PPE and industrial exposure in the U.S. is Stephen Petty. He advises large industrial companies on Industrial Hygiene (aka, worker safety) and testifies as a subject matter expert on class-action lawsuits, like that of Monsanto, regarding industrial PPE protocols - such as with dangerous chemicals – when inhaled particulate is life or death every day. In the presentation linked below he covers COVID specifically. While I’m sure you are receiving many messages like mine full of links and references, I cannot urge you enough to take the time to watch this video presentation. In his world where PPE actually needs to protect, masks are not even considered an option, nor is facial hair! [Stephen Petty - On PPE and Aerosols](#)

Included in this next link is over 150 mask studies with conclusions, in part, against the effectiveness of masks due to a variety of variables. I found while doing my own researching that resources providing a lot of information in one place was very helpful. [150+ Comparative Studies and Articles on Masks](#)

Lastly, on the science of whether masks work, I would challenge that after 2-years of continual and aggressive research, study, and retrospective review throughout the world, one should expect to see clear, overwhelming, and consistent data from the scientific community proving without a shadow of a doubt that masks provide a strong level of protection. That data simply doesn’t exist.

Here’s where common sense can help to fill in the blanks. Masking in schools is not widespread across the country. Only 15 states have previously had mandatory masking in schools, though that number is reducing by the day. IF masking students really is the lynchpin that has kept our state’s elderly and high-risk population safe and we simply cannot do without it, how is it there isn’t overwhelming hospitalization and death of the elderly and high-risk in the 35 states who didn’t mask students?

All masking science aside, in my opinion the most important topic to consider is the how masking and *the subsequent enforcement of masking* is having on our children. There is a steady outpouring of data showing negative consequences for our children, from faltering to outright failing test scores, startlingly high rates of referral to speech therapy in young learners, massive increases in anxiety, self-harm and depression among adolescents and teens, and a basic lack of excitement and connection to school communities. [The Educational Consequences of Masking Children](#)

However, I don’t think that linking study after study is needed to make this point. You are professional educators, and you know children! You know how they learn, and how they grow. You know how they respond to a smile. You know how they watch a teacher’s mouth move when they are reading aloud, or when hearing a new word. You know how children instinctively see another child’s frown and respond with kindness. Or how they see another child’s smile and return it with a smile of their own. Or how children see someone react poorly to an unkind word

they said, so they apologize, realizing the impact of their words on others. Without seeing that frown, they cannot know that impact. These little connections and the learning of social queues are truly the work of childhood, and that has been taken from them. Think back to your favorite teacher as a child – then imagine not knowing what that teacher looks like without a mask on!

And what about the students who are not okay, and who are blending in and disappearing into a sea of masks? What about the children who have anxiety? What about the students who are embarrassed to ask for help, or feel left out? Without seeing the emotions on their faces, how can we be sure they aren't slipping through the cracks? The data says they are. [JAMA Pediatrics – Mental Health & Wellbeing](#)

We have also taken our most innocent and easily influenced segment of the population, and over the last two years taught them that they should fear the air around them. They should fear their own breath. If they take their mask off, they could be responsible for infecting someone who dies. Or that their good friends or classmates could get them sick. Instead, they must keep their face hidden, not speak during lunchtime, and don't get too close to one another because that's just too risky and unsafe. This is not okay!

[I'm a Public School Teacher. The Kids Aren't Alright.](#)

[Masked Schoolchildren](#)

Though we are a new family to St. Pats, my father & his family all matriculated through parochial school, so many of the teachings we are seeing resonate deeply in my heart, including the fostering of strong community bonds. But that community collapses without smiles in the hallways, with parents unable to meet and know one another at events, without the hugs over a scraped knee on the playground, without the sarcastic smirks of middle school, and without the ability see someone's frown and help to make them smile. [The Strength of Weak Ties](#)

The residents of this state, and specifically the parents of school age students, have been understanding of restrictions, and, more recently, patient in waiting for policies to be adjusted in response to the data. But as the data continues to build against mask mandates with no changes to policy, we are asking you to push back on behalf of the health and education of our children.

We teach our kids to follow their morals, to do what's right even when it's hard, and to respectfully disagree when necessary. Now is the time for the school administration, and the leadership at the Seattle Archdiocese, to recognize that our children need us to stand up for them. It's time to respectfully disagree and stand up for what is right on behalf of the students in your care.

We are asking you to do better for our children.

We are asking you to do better for our communities.

We are asking you to do better.

Thank you for your time and thoughtful consideration,
Dani Kessler, 253-459-2449

P.S. And please – take the time to watch the Stephen Petty video on PPE linked above. It's worth all 26 minutes.

Reading Time: 5 minutes

<<https://www.aier.org/wp-content/uploads/2022/01/mortality-800x508.jpg>>

The CEO of the OneAmerica insurance company recently disclosed

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Finsurance-forums.com%2Flife-insurance%2Foneamerica-ceo-says-death-rates-among-working-age-people-up-40%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C7fda7cc41bec4f99145f08d9ecbd5bc6%7C11d0e2>>

that mortality in the 18-64 age group was 40 percent higher during the 3rd and 4th quarters of 2021 than during pre-pandemic levels. For reference, the CEO indicated that a 10 percent increase would have been a 1-in-200-year event. Furthermore, most of the deaths were not attributed to Covid.

<<https://www.aier.org/wp-content/uploads/2022/01/pasted-image-0-65-800x257.png>>

Figure 1: US weekly deaths by age group. Data

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fnchs%2Fnvss%2Fmortality%2Ffig1%2Ffig1.png>>
is from the CDC. The gold curve is data for 2021. The red curve is data for 2020. The gray curves are data for 2015-2019.

The OneAmerica insurance company serves a subset of the US population. The CDC collects mortality data

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fnchs%2Fnvss%2Fmortality%2Ffig1%2Ffig1.png>>
for the entire US population. Figure 1 illustrates the weekly US mortality from 2015-2021 by age group. Several generalizations are readily apparent. The years 2015-2019 were very similar for all age groups forming a tight band of usual expectation. The tightness of the band for 2015-2019 means that relatively small increases in mortality are very significant events. There has been nothing unusual about mortality for the Under-25 age group during the Covid period compared to recent history. The last 10 weeks of data for 2021 are incomplete due to delays in reporting death certificates. Otherwise, mortality for the Over-25 age groups have been higher than historic norms starting in about March of 2020 and continuing to the present time with one big exception for the 85+ age group.

There is a very interesting interval from Week 10 (March 7) 2021 to Week 24 (June 13) 2021. Deaths in the 85+ Age Group are LOWER than average during this interval. Total deaths for Weeks 10-24 averaged 248,536 during 2015-2019, but were 242,372 during 2021. For the 25-44 age group, total deaths for Weeks 10-24 averaged 38,955 during 2015-2019, but were 54,789 (40.6 percent higher) during 2021. Daily Covid deaths (7-day moving average)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.worldometers.info%2Fcoronavirus%2Fus>>
in the US were declining from 1,689 on March 7, 2021, to 387 on June 13, 2021. This time period was the decline phase of the winter outbreak that peaked around January 18, 2021, and reached a nadir around July 8, 2021 prior to the Delta surge. One cannot plausibly attribute the above average deaths for the 25-44 age group during this time period to Covid. What was responsible for these deaths?

<<https://www.aier.org/wp-content/uploads/2022/01/pasted-image-0-66-800x294.png>>

Figure 2: Weekly US mortality by Cause Group. Data

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fnchs%2Fnvss%2Fmortality%2Ffig2%2Ffig2.png>>
is from the CDC. The gold curve is data for 2021. The red curve is data for 2020. The

gray curves are data for 2015-2019.

Clearly there is a very significant above average number of deaths across the US that cannot be attributed to Covid. As was the case for the Age Group graphs, data for the last 10 weeks are incomplete due to delays in reporting of death certificates. Deaths attributed to Malignant Neoplasms were average during the entire pandemic period. Although there was an increase in deaths from Alzheimer Disease and dementia in 2020 after the onset of the pandemic, this was less apparent during 2021. There was an increase in deaths attributed to Other select causes (which include suicides and drug overdoses), but the magnitude was much smaller than what is seen in the Circulatory diseases category. Deaths attributed to Circulatory diseases include strokes, heart attacks, and heart failure (including myocarditis). The Circulatory diseases category is clearly the most important category for excess deaths during 2020 and 2021. Notably, deaths attributed to Respiratory diseases were below average during 2021 for the period of interest between Week 10 and Week 24 of 2021. Covid is a respiratory disease and leads to acute respiratory distress syndrome with hypoxemia and respiratory failure in severe cases. During the period of interest between Week 10 and Week 24 of 2021, Covid deaths were steadily declining, deaths attributed to Respiratory diseases were below average, but deaths due to Circulatory diseases were significantly above average. It is difficult to explain the data between Week 10 and Week 24 of 2021 on the basis of lung injury caused by Covid infection.

The spike protein enables entry of the virus into the host cells. The spike protein targets the angiotensin converting enzyme-2 (ACE-2) receptor. Angiotensin converting enzymes play an important role in the regulation of blood pressure. Angiotensin receptor blockers (ARB) and angiotensin converting enzyme (ACE) inhibitors are both important classes of drugs used to treat hypertension. It does not require a stretch of the imagination to suspect that the spike protein could cause elevation of blood pressure. Acute elevation in blood pressure is known to be a risk factor for stroke, acute myocardial infarction (heart attack), and congestive heart failure. Spike protein is also associated with clotting, presumably due to endothelial injury, which would also increase risk for myocardial infarction and stroke. It is not clear why spike protein from the Covid virus would explain above average deaths attributed to Circulatory diseases during a time period when Covid cases and deaths were declining. However, the Covid virus was not the only source of spike protein during this time period. The mRNA vaccines led to the production of spike protein by host cells and Weeks 10-24 of 2021 were immediately followed by the mass introduction of mRNA vaccines to the US public. The data is not proof, but it is certainly a red flag.

The appropriate method to assess vaccine efficacy and safety is all cause mortality. Deaths from all causes are compared between the vaccine group and a control unvaccinated group. This method has not been used. Rather, the CDC and FDA determine on a case-by-case basis whether reported adverse events can be attributed to the vaccine. If a footballer drops dead during a game, one would not be inclined to attribute the cause to a vaccine given 10 weeks earlier. However, when 5 footballers drop dead every week, one will be looking for ANY common denominator between the dead footballers. Neither the CDC nor the FDA are impartial observers of vaccine safety. Both agencies have vested interests in promoting the vaccines. When the CDC or FDA analyze events on a case-by-case basis, they are inclined to say that an event was not due to a vaccine (especially if the people at the CDC and FDA include former executives from Pfizer). However, when the entire US population has a significant number of events compared to historic basis, one must look for the common denominators in the people with the events. The existing data is not proof that the vaccines are causing deaths due to Circulatory diseases. The burden of proof, however, lies with the CDC and FDA to prove that the vaccines are not causing deaths due to spike protein. It is scientific

irresponsibility to eliminate the control group via vaccine mandates and make future assessment of vaccine safety scientifically impossible.

<debrakwells@startmail.com> wrote:

Please do not require or force the COVID 19 vaccines on children. More children have been negatively affected by vaccines than have been sick or died from covid. The children that have passed away had other medical issues that put them at particular risk; however, the vast majority are not at risk of covid 19. However, with the vaccines, myocarditis is more deadly to children than covid 19 and this has played out in the numbers.

We also don't know the long term effects on fertility and this vaccine should not be allowed or approved for children at any age.

Please follow biological science and not political science. It is very apparent that the majority of decision makers have been following political science and not biological science. Please do NOT harm our children with these untested vaccines. It's one thing to require the measles vaccines that have been around for decades; however, covid 19 vaccines have only been around just over a year. The numbers are not looking good for the safety of the covid 19 vaccine. The numbers from the Military are alarming. The numbers from insurance companies, that are required to review actual death rates and why so they can set premium rates, are extremely alarming. Ignoring these warning signs is gross negligence. We must protect our most vulnerable from even the most well meaning individuals/decision makers. We should not be making rash decisions that will have long standing impact that can't be reversed. We need more data on the vaccines before we force it on children.

Please vote NO on requiring Covid vaccines for children under 18.

Consider a no vote on vaccines for children. This poor state has already lost millions of dollars and hundred if not thousands of families who have moved away in order to evade the over reaching policies of this DOH. We have lost two years of our Children's lives thanks to the unprecedented decisions that you all have made based on poorly done research. Please do not force so many of us still here to make the the one decision left if you mandate covid vaccines for kids-we will leave this state. And with it, millions more dollars that you'll will have to be accountable for. There is zero science to recommend that kids benefit from this poorly designed vaccine. Let us go on with our lives and leave this behind us. I beg you.

Covid vaccines have only emergency use authorization for children. This is not enough to warrant their inclusion in the required vaccines for attending public school. Covid-19 is a mild disease in kids, they are not the drivers of this disease and they do not transmit the virus to adults. Covid is not a threat to them, but the vaccine is. It has many conditions linked to it, including death. Do NOT include this vaccine in the public school requirements.

I am writing in regards to the up coming board meeting concerning whether to require the Covid vaccine for students to attend public school.

I have a teen son attending school in Whatcom county and I am STRONGLY opposed to this requirement. Not only do parents, who pay the tax dollars that fund these schools, have the right to VOTE on this subject, but these students have the right to an education regardless of what they do or do not have in their body. It is an absolute disgrace that in this modern day society it would ever be considered to force ANYONE to put something in their body, just so they can receive an education. Please put this to a public vote so we at least have a fair say in what is happening to our children.

I am writing you to encourage you to not in-force a required Covid shot for school age children. I and thousands of others will not allow our children to participate in government public schools of required. The "vaccine" is unproven in small children and they have very little or no Covid sickness. You know this! Please do not approve a required COvid 19 shot. The new variants are weak and getting weaker sickness wise, and do not pose a threat to hardly any child.

Thank you

Hi,

I would like to voice my opinion as concerned Washington state parent. I do not agree with making Covid 19 a mandated shot for school. We strongly believe and hold the opinion that medical decisions should be up to the parent. We are not some right wing anti vaxx family, our children are vaccinated.

We are in regular contact and communication with their pediatricians. Our whole family has had covid and has the natural immunity. I was not required to get the chicken pox vaccine for nursing school because I had natural immunity that I acquired as a child.

Please please hear voices of the concerned parents who want medical freedom and choice. Please uphold your civic duty as representatives of the people of your state. This should not be a political driven decision.

Respectfully,

Sarah Holt

Subject: Please stop enforcing poisonous Covid 19 vaccines to our children

External Email

WA SBOH members:

I am a WA parent and have been following your effort to enforce vaccine in schools, and your effort to use extreme measures against the unvaccinated. Now, more and more science evidence and researches are available to prove natural immunity is much stronger than Covid 19 vaccine, demonstrated by the study released by CDC Even WHO, European Medical Advisory started to emphasize Vaccines are harmful to our children. Many countries are giving up vaccine mandates and Covid restrictions, so why are you against this trend, and still want to harm our children?!

From my effort of following your consistent effort to push the vaccine and nazi mandates in school, it is pretty clear that your organization exists not for true public health but only for promoting Democrats' evil agenda. You have been ignoring true science since the Covid hoax started. You have done nothing to strengthen the public health. Your lockdown, your social distances, your mask mandates, your bullshit narratives on Covid and vaccines prove all WRONG! It is shameful you sit on the Board of Health, and promoting to use law enforcement to detain the unvaccinated. Let me tell you this - all what you have done is criminal! Masking our kids and vaccinated healthy children are criminal! As a lawful citizen, I only follows Constitution, not your bullshit CDC advice, not your so-called professionals, you are Nazi medical tyrannies. I will try to mobilize the people I know to tell them the truth. And, i warn you - all the members that sit on this board, will wait the moment when people will not tolerate you.

Let me tell you this - if you keep using the failed narrative to fool the fools and defraud them to jab their children, you will not get away from this criminal practices. We will not comply this, and will fight against you till the end. I will never let you to jab my children. You can jab yourself. It is your right but you should NEVER jab a child in the name of Covid which has 0.00001% of death rate.

Your criminal activities seriously pissed me off. I hate you, period.

Hello there,

I appreciate the opportunity to share my thoughts on this issue as I have 3 children in the public school system and this does directly affect me. I have a few thoughts on this topic that all lead me to the conclusion that it is not right to mandate the Covid vaccine at this time.

- First of all not near enough testing and trial have gone into it. There just hasn't been enough time passed to know how it will truly affect our children's health. Side and long term affects won't be known for sometime still and I don't believe it is worth the risk.

- Secondly, although the Covid virus has shown "morbidity and/or mortality in at least some sub-set of the population" I do not believe that the sub-set we are talking about is children under 18 years old. The chance of a child dying from Covid is essentially 0%. So I am confused as to why this is even something we are considering as a state for our children.

- Lastly, I look to other states/countries who have NOT been masking or mandating vaccination over the past two years and their cases are the same or LOWER than ours. If teachers, staff or kids at the schools want to get vaccinated or wear masks then they should. That's their CHOICE. Their vaccine should cover them without the kids having to get one.

Also, would we have to be running to the dr for boosters every 6 months because some new variant that doesn't really do anything is out there?

I just cannot imagine what good can actually come from forcing a less than thoroughly tested vaccine on children who aren't at risk. And although it would be a huge inconvenience, I would, without hesitation, pull my children from public schools. I know I am not alone in this. I would say most if not all of my "parent friends" feel this same way.

Thank you for your time,

Julie Dawes

The drugmaker predicted slightly lower 2022 revenues (\$32 billion) for the vaccine compared to 2021, but increased revenues (\$22 billion) from Paxlovid
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdore-john-campbell-ivermectin-pfizer-covid-antiviral-pill%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C39e495eb4a8d49176e4708d9ec558787%7C11d0>>
, the company's COVID-19 pill.

Pfizer stock today "dropped sharply after the company's 2022 sales guidance appeared to fall short of expectations," Barron's reported
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.barrons.com%2Farticles%2Fstock-price-revenue-guidance-51644354958%3Fsiteid%3Dyhoof2&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C39e495eb4a8d49176e4708d9ec558787%7C11d0>>
.

According to Barron's:

"The antiviral sales guidance met the consensus estimate according to FactSet
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.investopedia.com%2Fterms%2Fpfizer-covid-19-vaccine-guidance-51644354958%3Fsiteid%3Dyhoof2&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C39e495eb4a8d49176e4708d9ec558787%7C11d0>>
, but the Covid vaccine guidance fell short by \$2.8 billion. The FactSet estimate for Pfizer's overall revenue for 2022 was \$103.2 billion, around \$3 billion above the midpoint of Pfizer's guidance range."

Reporting on the news, ZeroHedge said
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.zerohedge.com%2Fcovid-19%2Fpfizer-quietly-adds-language-warning-unfavorable-pre-clinical-clinical-or-safety-data-may&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C39e495eb4a8d49176e4708d9ec558787%7C11d0e21>>
the company added new language to its fourth-quarter earnings release, including the prediction that COVID could "diminish in severity or prevalence, or disappear entirely."

Subscribe to The Defender - It's Free!

The company also added language about the potential for "information regarding the quality of pre-clinical, clinical or safety data, including by audit or inspection" to have a negative impact on future earnings.

ZeroHedge suggested that language may have to do with last week's ruling against
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Ffda-lose-bid-delay-release-covid-vaccine-safety-data%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C39e495eb4a8d49176e4708d9ec558787%7C11d0>>
Pfizer and the U.S. Food and Drug Administration which had wanted to delay the release of Pfizer's clinical trial safety data.

In Tuesday's announcement, Pfizer CEO Albert Bourla predicted
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cnbc.com%2Fvideo%2F2022-01-11-pfizer-ceo-albert-bourla.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C39e495eb4a8d49176e4708d9ec558787%7C11d0>>
the company will manufacture 120 million doses of Paxlovid in 2022, including a threefold increase in production in the second half of the year as compared to the first. The FDA gave the drug Emergency Use Authorization

"2021 was a watershed year for Pfizer," said
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.morningstar.com%2Fnews%2Fwire%2F20220208005226%2Fpfizer-reports-fourth-quarter-and-full-year-2021-results&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C39e495eb4a8d49176e4708d9ec558787%7C11d0e>
Bourla. "Our successes in leading the fight against COVID-19 have not only made a
positive difference in the world; I believe they have fundamentally changed our company
forever."

In fact, Pfizer's 2021 profits doubled to \$22 billion on the strength of its vaccine sales of more than 3 billion doses worldwide while the company's total revenues in 2021 increased by 95% over the previous year, topping \$100 billion for the first time in the company's history.

To whom it may concern, I wanted to write to give my input on the COVID-19 vaccine for children. I do not believe it should be mandatory for children. Adults should be able to choose based on information presented to them whether they want the vaccine or not. Children are not capable of such things and it is a liability and a disservice to their long-term health to mandate that they should receive something that has not had proper long-term testing. You will be responsible if you try to force families to give their children essentially untested medicines. Thank you for your time. Stephanie.

Dear State Board of Health,

My name is Mabi Fernandes, I live on Bainbridge Island with my husband and daughter (6). I am a teacher. My position is against these 2 criteria about the COVID Vaccine Mandate for School Students. The reasons are:

1. According to the latest report of the Washington State Health Department: As in February 7, 80.2% ages 5 and up have received at least 1 dose and 72.5% are fully vaccinated. Not mentioning the number of people who had acquired natural immunization. Therefore the risk in the whole population has been reduced dramatically, since the beginning of the Pandemic. So far, there are enough resources (vaccination, masks, treatments and information in general) for those with medical conditions or vulnerable populations to keep themselves as safe as they choose to be.

2. The World Health Organization has stated that the pandemic will end when we "reach the global target of vaccinating 70% of people in all countries ..." Which means that our community has widely achieved those standards and therefore do their part. Moreover, we do not even need to be in an emergency situation to begin with.

3. Children are at low risk according to the CDC data. The deaths of the population in school age 5 - 18 years are: 644 since the beginning of the pandemic (2020-2022) in the whole country. This number includes children with pre-existing medical conditions or comorbidities which leaves a narrower number of healthy children in real danger. The current population of children in school age is more than 41 millions of children in our country. Clearly the numbers talk by themselves, the risk is going lower and lower.

4. The vaccination in children has just begun and time is needed to see the existence or not of side effects. There are people who are currently vaccinating their children willingly. This is a state who mostly believes in science. The imposition creates more distrust than trust on science and on our own community. Plus, you need to give more time to actually say that it is totally safe for children.

5. Both the virus and the vaccine are new in the real population. Both have symptoms and side effects. There is always going to be a risk factor. Then why do you

want to impose on us which risk to take? It should be totally optional to be part of the experience, pushing it puts a big question mark on the freedoms that this country stands for and that are expressed in the Constitution itself.

6. The State should promote a real inclusion and diversity of thinking. A community where it is ok to have different opinions and disagree in peace. Where there is room for everyone to finish this political battle which has gotten immerse since the beginning. This mandate will bring more resentment because you are talking about our children and telling parents that we don't have the right to decide for them.

7. Creating more division. All the COVID mandates so far have caused more division in our society, distrust among each other and the sense of community has fallen in a one-sided picture. This last mandate will cause more harm in the long run than good.

8. Let me share my personal experience.

I got vaccinated in March and April 2021, right after my first shot I developed all the symptoms for COVID and serious pain on my left arm (where the shot was given). The symptoms went away but the pain did not. I mentioned that to the person who was going to apply the second dose, who told me that it was ok, that it was normal. So, I did the second one. The strong pain remained for about 6 months and even later it was very mild, never gone. So I decided not to get the booster. A month later we contracted COVID, I got mild symptoms for 2 - 3 days and then I was fine. My daughter got a fever for 1 night and then she was fine. So, she has natural immunization and I have a natural booster, same for my husband. If she got natural immunity, why do you want to impose a vaccine that is in ongoing research? I guess this case can apply to many families.

Please, reconsider this mandate. Or at least you should make it more public and totally announced in different ways so everyone has time and space to participate. It should even be mandatory to be shared in every school. And ask every school for opinions about it before even considering it as a mandate. I learned of this event just by accident on facebook 3 days ago and nobody, my school included, knew about this proposal.

Thank you for your attention,

Sincerely,

Mabí Fernandes

Subject: Masking our children

External Email

Dear WSBOH Members,

I can no longer stomach what's happening to my grandchildren. I see a change in them. Two years of Governor Inslee's COVID-19 restrictions and two years of my grandkids being masked 9.5 hours a day, 5 days a week is enough. Enough is enough. As the Washington State Board of Health what is your role in COVID-19 policy? Do you advise the governor? Are you not suppose to continually gather and study scientific data pertaining to COVID-19 from a variety of sources and keep him up to date? What is the science and data, you and the governor are following that led the governor to decide he could not lift the indoor mask mandate on school children?

Healthy children are not at risk for severe disease or death due to COVID. According to the CDC, the COVID fatality rate for children is 0.002%. We need to quit asking our children to bear the burden of COVID for adults. Have we lost all common sense and empathy for our children? We certainly are no longer focusing on science. The cloth masks typically worn by school children do not work. They do not stop the transmission of COVID. The only mask that works is a KN95 and even then, they have to be properly fitted, properly worn and changed out on a regular basis. Additionally, there are NO studies that show masking children is necessary for the safe operation of schools, but there is data from Florida, Tennessee, North Dakota, Texas, the United Kingdom and Spain that confirms you can safely operate schools without a mask mandate. So, tell me, what are the benefits of putting our kids in a mask for eight to ten hours a day? I can't think of one. And if there were a benefit, shouldn't the benefit outweigh the harms? Masks hinder communication and speech development, they interfere with social interaction between the teacher and the child and between the child and their peers. Facial expressions are an important part of human connection. Mask can be uncomfortable and make it harder to breathe and harder to see for those children wearing eyeglasses. A study from Oxford Clinical Infectious Diseases found that "single-use medical masks were preferable to cloth masks for which there is no evidence of protection and which might facilitate transmission of pathogens when used repeatedly without adequate sterilization." Dr. Marty Makary, professor at the Johns Hopkins Bloomberg School of Public Health, wrote this about the adverse effect of masks on kids: "In March, Ireland's Department of Health announced that it won't require masks in schools because they "may exacerbate anxiety or breathing difficulties for some students." Some children compensate for such difficulties by breathing through their mouths. Chronic and prolonged mouth breathing can alter facial development. It is well-documented that children who mouth-breathe because adenoids block their nasal airways can develop a mouth deformity and elongated face. A study published June 30th, 2021 in the Journal of American Medical Association Pediatrics section, found that the wearing of nose and mouth coverings by children leads to an increase in carbon dioxide levels in both inhaled and exhaled air while wearing a mask. The authors, a group of physicians from Germany, Poland and Austria, concluded that the findings "suggest that children should not be forced to wear face masks." In December of 2021, the U.S. Surgeon General Vivek Murthy issued a public health advisory on the mental health crisis

impacting our youth. Murthy called for action to address what he called an emerging crisis exacerbated by the pandemic. Symptoms of depression and anxiety have doubled during the pandemic, with 20% of youth experiencing anxiety symptoms and 25% experiencing depression symptom. Suicides attempts for boys were up 4% and girls were up 51% from 2019. Studies confirm the negative impacts on children's mental and physical health due to social distancing, masking, school closures, lockdowns and the resulting isolation.

Our kids and grandkids deserve more from us. They deserve facts, honesty and transparency. Isn't the WSDOH supposed to be looking out for the health of our citizens, especially the youngest among us? There is now plenty of scientific information that masks don't work, shutdowns don't work and the various restrictions are harming our children. Why is what we've learned about cloth masks and shutdowns being ignored?

It is time to do the hard thing. It is time to be a profile in courage for what is right. We can not ignore what is right over what is convenient, over the path of least resistance. What's next? A state COVID vaccine requirement to attend school? We aren't protecting, we are harming and as a public health official isn't it your job to do no harm? It is true, that evil prevails when good men do nothing and history is not going to view us in a good light concerning all the decisions we have made pertaining to COVID, but history is going to be appalled at the decisions those in charge have made related to our children. We are not helping, we are harming our children to protect adults. Enough is enough.

I am requesting the following:

- * provide me the "science" and data Governor Inslee says he is following that proves cloth masks work are effective in stopping the transmission of COVID-19
- * then provide me an explanation as to why we are making school children wear masks for 8-10 hours a day while they attend daycare and school
- * provide me a report that shows the benefit versus the harm on school children wearing cloth masks 5 days a week for 8 to 10 hours a day
- * urge Governor Inslee to immediately remove all mask mandates, especially those on our school children.

I am looking forward to your reply.

I can't believe you are even considering forcing our children to be guinea pigs for these unproven "vaccines". Our children are our future. Don't risk their futures with fear mongering. They aren't dying from this virus and should not be subjected to these still experimental drugs. Please don't force our children to submit to covid 19 "vaccines". It needs to be parental choice.

I am a parent and an educator here in the state of Washington. I implore you to not require the Covid vaccine for school attendance. I have several reasons why.

1. The vaccine does not stop transmission. This is a fact. I witness this at my school. More of us who are vaccinated and boosted have caught covid from other vaccinated people.
2. My students are rarely getting sick. (Most are unvaccinated) If they do, they are sick for a couple of days and then right back at school. Much like a cold. They also do not wear masks at recess and still are not spreading it.
3. The risk/benefit does not support this for school age children. I know people who have been injured from this vaccine yet it does not stop transmission or someone from catching it.
4. Washington schools will see a mass exodus of students from public education if this moves forward.
5. A vaccine like this should always be a choice.

Again, it makes no sense to push this agenda. Thank you for your time.

Subject: Making the Covid-19 vaccine a requirement in school

External Email

Good evening,

I am writing you all in hopes that you will vote no on making the Covid 19 vaccine a requirement for school. It does not prevent transmission. All the schools in the Olympia school district have many teachers out with Covid every week, but aren't they all vaccinated?

Like one of you mentioned on the zoom today, only 13 children have died from Covid 19 in Washington. All deaths of children are sad, but that is a very small number.

If this vaccine is managed, you will lose even more students and that impacts public school funding.

Let us parents decide what is right for OUR children.

Reykdal has just recommended to DOH and Inslee that the mask mandate in schools be dropped. If we are able to drop that, then why must all children need to be vaccinated?

Please take all voices into consideration when voting on this issue.

Am I and my concerns not important enough for you? I emailed over a month ago fighting for my children and their rights. And this is how you treat concerned parents? By ignoring them?

I am here to voice my concerns taking place in this State in regard to COVID 19 shots.

I feel that every parent chooses what they feel is right for their children and themselves. Whether that means choosing to get a shot or not, just like choosing to breastfeed or use formula. Both are a right answer in what they choose for their family and that because it's a CHOICE. It should always be a choice to get a shot or not, just like the flu shot (Norway already views COVID as the flu so we really need to get on their level).

Thousands of fellow parents will pull their kids out of school if this is required. I love my children too much to force junk in their body that has yet to even be proven effective from getting it spreading with the shot- so what the point of even getting it? Due to the thousands of parents pulling their children will only add to the falling economy... as teachers, bus drivers, cooks, etc. will no longer be needed since there will hardly be any children in school.

Face it, COVID will not go away- people need to move on and live their life and realize it's not serious. People die from smoking... yet that's still ok....how many alcohol related deaths have there been? Millions... but yet let's still sell it and every venue, restaurant, and store. That makes sense.

There isn't a Covid pandemic. There is a people with power pulling pandemic. Horrible people that do not respect the constitution.

As you can see I am completely against forcing people and children from a shot that they feel is not good for them. And punishing those families who chose not to get it. This is un-American and I hope you are ashamed of yourselves.

Subject: Please consider two sides

External Email

Dear Washington State Board of Health and TAG,

I was able to listen in to a good portion of the meeting yesterday. I have a concern in how this is being done. While the 9 criteria are a helpful and somewhat objective guideline for making this decision, all presentations are being made as if they are in favor of the vaccine. In order to really follow the science here it is imperative that you include the other side of the argument. One side always appears correct if the other side is not heard. I strongly suggest that you include speakers who are opposed to the implementation of this vaccine in schools and allow them to present their data as well. Data can be manipulated to cause someone to arrive at a particular conclusion. An example was when Eric Lofgren showed data from only one week to draw a conclusion. If you aren't hearing both sides then you cannot arrive at a proper conclusion. It is evident to me even from just yesterday that there are a few people that have already made up their mind that they want this vaccine to be added. And there are a few that are not sure, but they will be persuaded by the few that are in favor because there are no opposing views. A one sided conversation is very unhelpful here. And it is not scientific.

Another concern I have is the risks are glossed over as demonstrated in Tom Penderghast's comment about how sad it is for that parent who has a child injured by a vaccine, but it's rare. And then he quickly moved on. Do you have children Tom? The picture might look a little different if that was your child or grandchild. We need to take a minute to consider what that would be like. To lose your child due to a mandated product! These parents are left with no comfort and their grief is invalidated and minimized by these comments. And by those who pursue mandates for medical interventions. Honestly COVID deaths are rare too, but that hasn't stopped you from gathering this group. Because it is sad to lose people. Why it is suddenly more sad if it's because of COVID than for any other reason? Every death is a loss!!! Why do we move on so quickly from vaccine deaths as if they are less painful? How wonderful that we have a vaccine available as an OPTION for those that want it. Let's celebrate that and stop sewing seeds of division and discrimination in our schools.

This division is having it's own impact on our kids and our society. I would argue that the impact of COVID 19 pales in comparison to the emotional trauma that has been caused by this divisiveness, and the hopelessness that has been caused by the policies around it.

I don't think you are listening, but I pray that you are and that you all take your position here seriously. This decision impacts everyone.

You don't know what it's like to have followed a doctors recommendation and regret it. You don't know what it's like to have made a decision against your own judgment because you were trusting the experts, and to have that decision result in a negative outcome. You don't know what it's like to wonder if a negative outcome to your child will occur due to something you did while they were in utero, because it was what we thought was best at the time. You don't know what it's like to have experts and your own family against you and your gut. And to discover your gut was right and you should have listened to it sooner. And I can tell that none of you have experienced any of these things because you brush them off as rare and quickly move on. But it doesn't matter how rare

it is when you're the one it happens to. And the reality is, we often later find out that it isn't so rare. But this is after many many years of damage.

Please include these stories in your consideration. They are real. They have been silenced. They need a voice at the table. Until both sides are heard a great disservice is being done to our children and future generations.

Thank you for your consideration,

Jess

STOP! ENOUGH is ENOUGH! This must end NOW. There is zero danger to children and I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State. Please do the right thing and do not require these vaccinations and do not require masks for school age children.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to

learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>
)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity.

You are teaching children to live in fear and it must end. They have a greater chance of dying driving to school. You are focused on the wrong issues. You are not in touch with their current needs. Suicide is on the rise. Please do the right thing!

Good Evening -

I OPPOSE the vaccine mandate for school children ages 5-18. If a mandate is imposed I will be pulling my 3 elementary aged children from the public school setting and initiating a homeschool curriculum immediately.

I would like to share some brief facts with you surrounding Covid-19.

* It should be noted that children have a nearly 100% survival rate from Covid-19.

* Dr. Eric Rubin, physician at Boston's Brigham and Women's Hospital, Adjunct Professor of Immunology and Infectious Diseases at Harvard University, Editor-in-Chief of the New England Journal of Medicine:

* On October 26, 2021, as a voting member of the FDA advisory panel on the Pfizer vaccine for kids ages 5-11, Dr. Eric Rubin stated, "It's really going to be a question of what the prevailing conditions are but we're never going to learn about how safe this vaccine is unless we start giving it. That's just the way it goes. That's how we found out about rare complications of other vaccines like the rotavirus vaccine."

* Harvey A Risch, MD, PHD, Professor of Epidemiology at Yale School of Public Health:

* Dr. Risch stated during an interview that he would homeschool his children if public schools mandated the vaccine. Additionally, he would only recommend the vaccine to children if they have some kind of chronic illness.

* Per CDC statistics, during the 12-month period October 2, 2020 through October 3, 2021, there were 66 COVID-19 associated deaths in children 5-11, making COVID the eighth leading cause of death for this age group, behind accidents (969 deaths); malignant neoplasms (525); Congenital malformations, deformations and chromosomal abnormalities (274); assault/homicide (207); heart disease (115); chronic lower respiratory diseases (107); influenza and pneumonia (84); intentional self-harm/suicide

(also 66 deaths).

* Children are almost seven times more likely to die in a car accident than from COVID-19. They are almost eight times more likely to drown.

* Per John Hopkins University, a typical vaccine development timeline is 5-10 years versus the accelerated Covid-19 track of 1-2 years.

Again, if this vaccine is mandated we will be forced to pull our children from our school district. Homeschooling is less than ideal given that two of our children have IEP's. However, we believe the unknown long-term risks of the vaccination far outweigh any damage I may do to their education. Our children are role models to their peers and their absence would be a loss to their district.

Thank you -

Nichole Hurley

Subject: Covid vaccine for kids

External Email

WSBOH, I urge you to look at the data. There are many many good studies out now that are not recommending the vaccines for kids. Increased risk of cardiovascular issues. Kids are not dying from Covid, unless they have 3 or more co-morbidities. Over 70% of deaths were in the elderly populations. We need to put kids first and drop the masks and not mandate the Covid vaccine. It is up to parents to decide both for their children based on their kids' risk factors. Please unmask our kids and let parents decide on their medical health.

Subject: COVID Vaccine: Our Rights, Our Kids

External Email

Respectfully to the TAG committee and the WA State Board of Health —

I sit here as a parent and an American citizen, and my heart is breaking. I reach out to you as parents and citizens of this great nation to implore you to really think about your impact for decisions being made for school children in the state of Washington.

We are borne into a nation founded on freedom - because of religious persecution, overreaching government, and unwarranted control. These decisions you are facing to control and demand are threatening the very core of who we are. They are moving us toward the very thing our forefathers escaped.

Should your child have medical freedom? Should mine? Should you have personal choice as parents....and should I?

When does the means stop justifying the ends? The science shows that overwhelmingly children are low risk for COVID and that the detriments outweigh the course of actions. Vaccines, masks - what's the point if the outcome is so slightly improved that it actually puts some at risk, and it infringes on personal rights?

Why don't we mandate the flu vaccine? The transmission and the mortality, complications of the flu are now being considered equal and sometimes more risk. Is the COVID vaccine the flavor of the day, are we so saturated in the sensationalized (and now fading) issue of the COVID pandemic that we can't see the forest through the trees?

Your moral obligation and science based approach would never allow COVID vaccine mandates for children. The political pressures, media bias, overwhelming exposure and influence of the past couple years are clouding judgement and sometimes causing a psychosis where even the smartest, best of us can overlook the real science, the real common sense, and the real past precedence.

I know each voice, like mine, is probably meaningless and decisions are already made. But it's my duty as a Mom, and as a proud American, to hopefully make you pause and reflect on the reality of what is happening and the weight of your decision.

Support personal choice. If people feel that the COVID vaccine protects them, by all means let them partake. If the vaccine really truly works, then the ones who don't want to have the vaccine won't harm the ones that choose to get the vaccine. Again, common sense and rational thinking.

I/we — the general public of 7 out of 10 people that is OVER the pandemic — you are responsible to support what the people want and need. And what science supports.

attachments\DEEA999E8A7B4AC9_image.png

External Email

To Whom It May Concern-

Is there a recording of this meeting available? What were the results of the vote on the first two review criteria?

I'd also like to provide input on the two criteria reviewed during this first TAG meeting. I don't know the results of the vote, but this is my concise input regardless.

* #5 The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population.

* Children have a greater than 99.9% recovery rate with Covid infection. Now, it's become clear and openly admitted by the CDC the vast majority of deaths are those with significant existing comorbidities (>90% of recorded deaths are WITH Covid, not FROM Covid – that is a complete manipulation of data and the message of the narrative). It would be completely unethical to mass vaccinate perfectly healthy children for something they are not at risk of for the benefit of already chronically ill individuals. In addition, the average age of death is hovering near average life expectancy. We should be targeting our measures at these individuals and not the shotgun approach of mass vaccination when we don't know the long-term effects of this unproven drug. It makes no logical sense. Last, but certainly not least – the "vaccines" do not prevent contraction or transmission of the virus. This is an undisputed fact. So, what is this "vaccine" preventing? It's literal insanity to continue doing the same thing and expecting a different result. Lockdowns, universal masking, and mass vaccination all occurred in 2021 – and what were the results?

* #6 Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or childcare setting or activity being given the highest priority.

* Again, with a majority of the US population inoculated with this "vaccine" the data clearly shows it had no effect on case count. In fact, it was significantly higher than periods where no vaccines were available. So, it's an obvious NO – the "vaccine" did not reduce person-to-person transmission. Our best hope at this point is natural immunity. Which plenty of studies show the robustness and durability of children's immune response to natural infection and recovery. Again, CDC data is completely clear

on who is at risk – and it isn't children. Explain to me how something with > 99.9% recovery rate in adolescents (even considering comorbidities) is an emergency justifying mandatory vaccination with a novel drug that is not fully understood and now appears to be antiquated in terms of current mutations? Statistically speaking, children face far greater perils in their everyday lives than this virus.

To whom it may concern,
I listened in on the TAG conference call yesterday. I was not suprised at the result. The entire hours long meeting could be summed up in this one phrase:
" we don't have the data on that ".
Despite the lack of hard data and the coming political pivot away from covid, the TAG overwhelmingly voted to proceed with this madness.

Some of my biggest issues:

- the timing of this conference was 9 am until 3pm. As a concerned Parent who physically attends work, I could only listen intermittently throughout the day. I believe many concerned parents would have listened in but couldn't due to the timing.
- not allowing parents to provide input. Our families are the ones impacted by these decisions. We need to have our voices heard. I don't care if it causes your meeting to run over or be disrupted. Maybe then you'd realize how hugely unpopular these decisions are.
- the majority of the data did not pertain to school aged children. At the end of the meeting one member suggested they look at data from the NBA, and the athletic departments of WSU and UW. How does this pertain to school aged children? They are not grown men and women or professional athletes. Ridiculous.
- I heard the statement " we don't have the data on the effectiveness of pediatric covid vaccinations as it pertains to transmission/prevention/effectiveness". I heard this statement from 2 different presenters. How are we going to vaccinate kids without this information?
- a presenter brought up deaths of children from covid. No mention of their vaccination status, no mention if it was from covid itself or covid related. No mention if these children had underlying conditions. This is some very important data and it was omitted. It was a scare tactic.
- another presenter discounted a familiar statement of people saying they haven't met anyone who had omicron. He stated that they would have to meet 10 people in order to find one positive person. As such, personal observations should not be taken as seriously. Yet a TAG member named "Mary Joe" had no problems bringing up personal stories about how kids want vaccines. This story was accepted and other board members thanked her for this. Blatant double standard and bias.
- not once did I hear any information regarding potential long term health effects of covid vaccinations on children. I may have missed it but this is a key issue that I and many other parents have with this vaccine.
- the veracity of covid data. As we are discovering through many sources, much of the information we have been given on covid has been over blown, omitted or just plain wrong. An opposing viewpoint is needed to balance this out and provide accurate information.
- no mention of natural immunity.
- no mention of the fact that children are not likely to die from covid, regardless of the variant. The last figure I saw from the CDC is that children who did contract covid and had no other conditions, their survival rate was over 98%. Why inoculate kids against a disease that the overwhelming majority of them will recover from quickly?
- much of the data is old or specifically about the delta variant which is in rapid decline and is being replaced by the omicron variant which is more transmissible but not as destructive. No data on omicron (which is to be expected), but why are we making

decisions based on year old data?

- one presenter stated that 83% of covid outbreaks were in schools. Again, no data on vaccinations status. I understand that is hard data to compile but this begs the question: was the mask mandate effective? Is social distancing effective? All these measures that have been so strictly enforced were ineffective. And this is the reason why we need to vaccinate kids with a potentially harmful vaccine? The first two measures did more damage than good to kids and now we should double down? Research the stunning increase of speech impediments, suicides and depression in school aged kids. Now we want to damage them further?

- blatant cherry picking of information like the above example. The TAG will listen to data that supports vaccines but nothing that runs counter to the narrative. I listened to those presenters. As previously stated, much of the data was gathered from a different target group (young adults or adults as opposed to school aged children), or was a year old. One presenter or TAG member stated that the human body doesn't magically change at 18 so that this data was applicable. What an absolutely idiotic statement. Being a TAG member or presenter does not make you an expert ; it makes you a group member or a compiler of information, not an authority. The title of "Doctor" is conferred on the person who graduates top of the class as well as dead last.

- there was alot of good information presented but there was much more "word salad" presented. Alot of facts and percentages, that as I have stated above, repaetedly, did not pertain to school aged. children. How is the TAG able to make such a very important decision based on this information?

- the TAG itself is very pro-vaccine. I knew the outcome of the vote well before it happened, much as I already know the outcome of the next two meetings. I noticed one board member asked the all important CYA question of "can we change this decision later". Very telling indeed.

- Mary Joe claimed kids told her they wanted the vaccine. I would like to know how many and where these kids were located. This is a common tactic used by people who have a personal agenda. "They", "them", "alot" , " their parents were preventing them from getting the vaccine", etc. I thought this TAG was to be impartial. She clearly has her own agenda in mind. She DOES NOT know what is best for my child. None of you do. The deplorable state of the Washington State public education system bears witness to this fact.

I have many more issues with this ill-timed and hugely unpopular topic but I can solve this issue now:

DO NOT MAKE THE COVID VACCINE MANDATORY TO ATTEND SCHOOL.

MAKE COVID VACCINATIONS VOLUNTARY.

LEAVE THE DECISION TO VACCINATE CHILDREN TO THE PARENTS, WHERE IT BELONGS.

I could tell there are many TAG members who, much like the entire "leadership" of this state (I use the term leadership in the absolute loosest definition in this regard), believe they know what's best for our children. They do not. The pandemic response of this state has been an absolute horror show. The mismanagement, failure, and lies have destroyed all trust I had in state "leadership", to include the Board of Health.

We all know this is not about the health and safety of the kids. It is about power and control. The current political pivot away from covid and the upcoming release of safety and testing information on the Pfizer vaccine will be very interesting to watch.

The decision to vaccinate kids against covid or not is the SOLE responsibility of the parent.

Sincerely,
John Pavlick

Concerned and frustrated parent

"Of all tyrannies, a tyranny exercised for the good of its victims may be the most oppressive. It may be better to live under robber barons than under omnipotent moral busybodies. The robber barons cruelty may sometimes sleep, his cupidity may at some point be satiated; but those who torment us for our own good, will torment us without end, for they do so with the approval of their consciences." C.S. Lewis

STOP! ENOUGH is ENOUGH! This must end NOW. There is zero danger to children and I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State. Please do the right thing and do not require these vaccinations and do not require masks for school age children.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity.

You are teaching children to live in fear and it must end. They have a greater chance of dying driving to school. You are focused on the wrong issues. You are not in touch with their current needs. Suicide is on the rise. Please do the right thing!

Do not add covid to the vaccination schedule for children.

Please consider the profound impact you will have on school funding when parents like myself pull children from school enmass. My children have already recovered from covid. They will not take a vaccine for an illness that they have already had.

There is a problematic lack of transparency when it comes to the (albeit rare) side effects associated with the vaccine. Terms like safe and effective are used to placate parents with valid concerns. Watch any commercial encouraging parents to vaccinate their young children next to your average pharmaceutical advertisement and the difference is stark.

No more masks. No more "vaccinate or else policies".

Parents should not be the last to hear about these hearings or these votes, nor should twitter be the vehicle by which we are informed of your plans.

Hello.

I understand that there will be a meeting tomorrow to consider and even vote on requiring children to receive a covid vaccine to attend school. To do that would be completely wrong. I understand that other vaccines are required. However, they have long track records and long-term studies about effects. This one does not, as it hasn't existed that long. This vaccine is only authorized for emergency use— how could something in that category possibly be required? Such a consideration should be years down the road. From a public health standpoint, vaccinated and boosted people are passing the virus around the school (I know this as a parent and a school district employee) so the public health argument doesn't carry much weight. Families with their doctors should be free to make a choice about this without the threat of being excluded from public school. This is not right. Do not put this burden and threat on kids who have already suffered so much. Do not require the covid vaccine for public school attendance. Thank you.

<data:image/png;base64,iVBORw0KGgoAAAANSUhEUgAAAAEAAAABCAQAAAC1HAwCAAAAC0IEQVR42mNk

The CEO of the OneAmerica insurance company recently disclosed
<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Finsurance-
forums.com%2Flife-insurance%2Foneamerica-ceo-says-death-rates-among-working-
age-people-up-
40%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C2e6f867243324d287e8f08d9ecc23ce9%7C11d0e21
that mortality in the 18-64 age group was 40 percent higher during the 3rd and 4th
quarters of 2021 than during pre-pandemic levels. For reference, the CEO indicated that
a 10 percent increase would have been a 1-in-200-year event. Furthermore, most of the
deaths were not attributed to Covid.

<data:image/png;base64,iVBORw0KGgoAAAANSUhEUgAAAAEAAAABCAQAAAC1HAWCAAAAC0IEQVR42mNK

Figure 1: US weekly deaths by age group. Data

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fncchs%2Fnvss%2Fmortality%2Fweekly%2Fdeaths%2Fby%2Fage%2Fgroup%2F> is from the CDC. The gold curve is data for 2021. The red curve is data for 2020. The gray curves are data for 2015-2019.

The OneAmerica insurance company serves a subset of the US population. The CDC collects mortality data <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fncchs%2Fnvss%2Fmortality%2Fweekly%2Fdeaths%2Fby%2Fage%2Fgroup%2F> for the entire US population. Figure 1 illustrates the weekly US mortality from 2015-2021 by age group. Several generalizations are readily apparent. The years 2015-2019 were very similar for all age groups forming a tight band of usual expectation. The tightness of the band for 2015-2019 means that relatively small increases in mortality are very significant events. There has been nothing unusual about mortality for the Under-25 age group during the Covid period compared to recent history. The last 10 weeks of data for 2021 are incomplete due to delays in reporting death certificates. Otherwise, mortality for the Over-25 age groups have been higher than historic norms starting in about March of 2020 and continuing to the present time with one big exception for the 85+ age group.

There is a very interesting interval from Week 10 (March 7) 2021 to Week 24 (June 13) 2021. Deaths in the 85+ Age Group are LOWER than average during this interval. Total deaths for Weeks 10-24 averaged 248,536 during 2015-2019, but were 242,372 during 2021. For the 25-44 age group, total deaths for Weeks 10-24 averaged 38,955 during 2015-2019, but were 54,789 (40.6 percent higher) during 2021. Daily Covid deaths (7-day moving average)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.worldometers.info%2Fcoronavirus%2Fus%2F> in the US were declining from 1,689 on March 7, 2021, to 387 on June 13, 2021. This time period was the decline phase of the winter outbreak that peaked around January 18, 2021, and reached a nadir around July 8, 2021 prior to the Delta surge. One cannot plausibly attribute the above average deaths for the 25-44 age group during this time period to Covid. What was responsible for these deaths?

<data:image/png;base64,iVBORw0KGgoAAAANSUhEUgAAAAEAAAABCAQAAAC1HAWCAAAAC0IEQVR42mNK

Figure 2: Weekly US mortality by Cause Group. Data
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fncchs%2Fnvss%2Fmortality%2Fweekly-us-mortality-by-cause-group>>
is from the CDC. The gold curve is data for 2021. The red curve is data for 2020. The gray curves are data for 2015-2019.

Clearly there is a very significant above average number of deaths across the US that cannot be attributed to Covid. As was the case for the Age Group graphs, data for the last 10 weeks are incomplete due to delays in reporting of death certificates. Deaths attributed to Malignant Neoplasms were average during the entire pandemic period. Although there was an increase in deaths from Alzheimer Disease and dementia in 2020 after the onset of the pandemic, this was less apparent during 2021. There was an increase in deaths attributed to Other select causes (which include suicides and drug overdoses), but the magnitude was much smaller than what is seen in the Circulatory diseases category. Deaths attributed to Circulatory diseases include strokes, heart attacks, and heart failure (including myocarditis). The Circulatory diseases category is clearly the most important category for excess deaths during 2020 and 2021. Notably, deaths attributed to Respiratory diseases were below average during 2021 for the period of interest between Week 10 and Week 24 of 2021. Covid is a respiratory disease and leads to acute respiratory distress syndrome with hypoxemia and respiratory failure in severe cases. During the period of interest between Week 10 and Week 24 of 2021, Covid deaths were steadily declining, deaths attributed to Respiratory diseases were below average, but deaths due to Circulatory diseases were significantly above average. It is difficult to explain the data between Week 10 and Week 24 of 2021 on the basis of lung injury caused by Covid infection.

The spike protein enables entry of the virus into the host cells. The spike protein targets the angiotensin converting enzyme-2 (ACE-2) receptor. Angiotensin converting enzymes play an important role in the regulation of blood pressure. Angiotensin receptor blockers (ARB) and angiotensin converting enzyme (ACE) inhibitors are both important classes of drugs used to treat hypertension. It does not require a stretch of the imagination to suspect that the spike protein could cause elevation of blood pressure. Acute elevation in blood pressure is known to be a risk factor for stroke, acute myocardial infarction (heart attack), and congestive heart failure. Spike protein is also associated with clotting, presumably due to endothelial injury, which would also increase risk for myocardial infarction and stroke. It is not clear why spike protein from the Covid virus would explain above average deaths attributed to Circulatory diseases during a time period when Covid cases and deaths were declining. However, the Covid virus was not the only source of spike protein during this time period. The mRNA vaccines led to the production of spike protein by host cells and Weeks 10-24 of 2021 were immediately followed by the mass introduction of mRNA vaccines to the US public. The data is not proof, but it is certainly a red flag.

The appropriate method to assess vaccine efficacy and safety is all cause mortality. Deaths from all causes are compared between the vaccine group and a control unvaccinated group. This method has not been used. Rather, the CDC and FDA determine on a case-by-case basis whether reported adverse events can be attributed to the vaccine. If a footballer drops dead during a game, one would not be inclined to

attribute the cause to a vaccine given 10 weeks earlier. However, when 5 footballers drop dead every week, one will be looking for ANY common denominator between the dead footballers. Neither the CDC nor the FDA are impartial observers of vaccine safety. Both agencies have vested interests in promoting the vaccines. When the CDC or FDA analyze events on a case-by-case basis, they are inclined to say that an event was not due to a vaccine (especially if the people at the CDC and FDA include former executives from Pfizer). However, when the entire US population has a significant number of events compared to historic basis, one must look for the common denominators in the people with the events. The existing data is not proof that the vaccines are causing deaths due to Circulatory diseases. The burden of proof, however, lies with the CDC and FDA to prove that the vaccines are not causing deaths due to spike protein. It is scientific irresponsibility to eliminate the control group via vaccine mandates and make future assessment of vaccine safety scientifically impossible.

<debrakwells@startmail.com> wrote:

Please do not require or force the COVID 19 vaccines on children. More children have been negatively affected by vaccines than have been sick or died from covid. The children that have passed away had other medical issues that put them at particular risk; however, the vast majority are not at risk of covid 19. However, with the vaccines, myocarditis is more deadly to children than covid 19 and this has played out in the numbers.

We also don't know the long term effects on fertility and this vaccine should not be allowed or approved for children at any age.

Please follow biological science and not political science. It is very apparent that the majority of decision makers have been following political science and not biological science. Please do NOT harm our children with these untested vaccines. It's one thing to require the measles vaccines that have been around for decades; however, covid 19 vaccines have only been around just over a year. The numbers are not looking good for the safety of the covid 19 vaccine. The numbers from the Military are alarming. The numbers from insurance companies, that are required to review actual death rates and why so they can set premium rates, are extremely alarming. Ignoring these warning signs is gross negligence. We must protect our most vulnerable from even the most well meaning individuals/decision makers. We should not be making rash decisions that will have long standing impact that can't be reversed. We need more data on the vaccines before we force it on children.

Please vote NO on requiring Covid vaccines for children under 18.

Please do not require the covid shot to be required to our young population. It is not safe. I was a foster parent for 12 years and the problem families are facing is with drugs . Please put your energy into the drug problems not telling families who are making good choices for their families what to do.

Hello,

I'm writing to you from Whidbey Island, WA. I have 2 boys (5 & 7) attending ICA. The 7 year old also has an IEP and attends a class at South Whidbey Elementary 1x a week.

I'm writing to urge you to not to force Covid-19 vaccination on school age children in Private OR Public Schools.

In doing so, you will not only lose school funding from people turning to creative homeschool solutions (myself included), but you could actually unnecessarily injure totally healthy children (for life)

Let's review a few facts: (see attached flyer for further details)

- * The science shows the risks outweigh the benefits for children.
- * Childrens bodies are uniquely suited to handle Covid-19 with a survival rate of 99.995%
- * There are virtually 0 deaths in healthy children.
- * A large German study showed zero deaths for children under 5 and case fatality rate of 3 out of a million.
- * A Johns Hopkins study of 48000 children showed a zero mortality rate in children under 18 without Comorbidities.
- * A study in Nature shows children under 18 without comorbidities have virtually zero risk of death.

These shots which were designed for a virus that was in circulation 2 years ago don't seem to be having much effect against the current variant. While some science shows children DO NOT need the vaccine others show that the vaccine is POSITIVELY DANGEROUS to them. A Honk Kong study showed that 1 in 2,700 boys who received Pfizers vaccine developed Myocarditis (heart inflammation) these are very serious and permanent injuries to the heart.. This science is clear the risk outweighs the benefit for children.

Not only is this injection medically unnecessary, but there are clear signals coming from U.S. government sources that the risk to human health is real, and that adverse events to this vaccine are NOT RARE.

Please do not put our children in unnecessary danger. Please help protect our kids.

Please don't break their hearts (and ours)

Julie Blades

To Whom It May Concern,

I am a mother of three young boys and want to encourage you to keep the Covid vaccine a choice. It should not be a mandatory vaccination for school. It is pretty much a guessing game like the flu shot. My children have very healthy immune systems and I will not subject their little bodies to an experimental vaccine. Please let it be a choice. Stop dividing the community by placing guilt trips on people that know the vaccine is not the right choice for them.

I cannot believe what is happening in this world we live in today. Hate and judgement because of a virus like the flu and over a vaccine that has so many side effects. A vaccine that has not been studied for an extended period of time. How can you feel that it is morally right to force this on us?

Please, please, please do not make the covid vaccine mandatory.

Thank you,
Tracy Moseler

Subject: VOTE NO!!

External Email

Attention public SERVANTS!

Vote NO on this proposed covid vaccine mandate for our school children. Data is showing people with the vaccine are still transmitting and catching the virus just as easily as those who have not been vaccinated. There is absolutely no justification or benefit for forced injections on free citizens, let alone our children who are not in serious danger of this virus. This outrageous government overreach needs to end NOW!! There are PROTESTS WORLDWIDE right now against these vaccinations and all of these unconstitutional mandates. Vote NO!!! Thousands of students will be removed from the public school system by their parents across the state if this ridiculous and outrageous overreach is implemented. You should all be ashamed of yourselves! It's time to start listening to the people you work for, WE THE PEOPLE. You have forgotten your place, you are employees, not our dictators. End this outrageous overreach, END THE MANDATES and VOTE NO on covid vaccines for school children!!!

>
> □Dear BOH members,
>
> Please provide your data and facts that you have stating that this vaccine PREVENTS the disease and REDUCES the risk of person to person transmission that is stated in criteria's 5 and 6 at the bottom of this email.
>
> The CDC even states that the vaccine does not prevent people from getting the disease or reduces transmission. It may lessen some people's' symptoms and/or may keep some people out of the hospital if they contract COVID, but it is not necessary for children who are basically unaffected by either. This vaccine has known side effects and is not a one size fit all. Also, take note that the vaccine is for the original variant and not for the current or future variants.
>
> Where there are risks, there should be a choice. I hope you take this into consideration during the meeting. America is the land of the free and parents should have the freedom to make medical decisions for their children.
>

> Thank you,

To whom it may concern,

Please do not add the covid-19 vaccine to the list of immunization of child care and school children against certain vaccine-preventable diseases. Covid-19 is not a preventable disease even if vaccinated.

Thank you

Casey Choppa

STOP! ENOUGH is ENOUGH! This must end NOW. There is zero danger to children and I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State. Please do the right thing and do not require these vaccinations and do not require masks for school age children.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity.

You are teaching children to live in fear and it must end. They have a greater chance of dying driving to school. You are focused on the wrong issues. You are not in touch with their current needs. Suicide is on the rise. Please do the right thing!

Subject: Vaccine Mandate

External Email

Good morning.

I'm aware that your meeting is set to begin shortly, but I need to share my thoughts.

Human autonomy is a basic right given to all Americans. Mandating that a certain population of the community (our students) must receive a vaccine goes against our basic autonomous decisions about how we treat our bodies. Even though the vaccine has been shown to lessen severity of the virus, the new variants will continue to weaken, as with every virus that goes through mutations. It needs to weaken so it doesn't kill its hosts too quickly.

Vaccine mandates are unconstitutional. Our basic right to autonomy would be stripped away, opening the door for the government to force ANYONE to have ANYTHING put into their bodies. Please don't force this upon our children.

Thank you.

Subject: Covid-19 vaccine for children

External Email

Good day,

I am a 38 year resident of Kitsap county, wife and mother of two children. I believe it should be optional for this inoculation that is being discussed currently as a covid-19 vaccine.

I have a few questions about the vaccine getting added to the vaccine schedule for children.

Since these injections are EUA, does that mean that there is no liability of manufacturers if there is an adverse reaction?

What is the history of other vaccines that are on the current vaccine schedule prior to them being officially assigned to the current schedule?

As far as trials go, what were the adverse reactions reported for what is under consideration to mandate?

What are the long term adverse reactions? What is considered long term? Myocarditis? Infertility?

Are these risks outweighing benefit?

Children have a survival of 99%, so why put this inside their bodies to stimulate risk?

What happened to optional? Like flu vaccine being optional? The variant will change consistently like flu virus, so the vaccine would change consistently like a flu shot?

The poor kids say 'oh I want the vaccine but my mommy wont let me because she is afraid.' Lets remember they are children. Innocent, impressionable children. As parents we are here to nurish and protect them from harm. Because the survival rate of children from covid is so high, why are we pushing this?

Lets end the coercion. These children just want the fiasco to end! We as their parents are using our critical thinking skills before rushing into such a new 'vaccine'. We know by choosing to be inoculated, it is irreversible. You can not undo this choice once made.

Here is a link to a testimony from a parent of a 12 year old who participated in the Pfizer COVID-19 trial. Please watch.

https://youtu.be/L2GKPYzL_JQ
<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fyoutu.be%2FL2GKPYzL_JQ&data=

Please watch this link as well, it is another video with a panel of covid-19 vaccine injured people presented by senator Ron Johnson.

<https://youtu.be/6mxqC9SiRh8>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fyoutu.be%2F6mxqC9SiRh8&data=>

The following link is virology data on the injections under discussion. I reccomend visiting and reading it thoroughly.

[https://www.cell.com/cell/fulltext/S0092-8674\(22\)00076-9](https://www.cell.com/cell/fulltext/S0092-8674(22)00076-9)
<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cell.com%2Fcell%2Ffulltext%2FS0092-8674\(22\)00076-9&data=](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cell.com%2Fcell%2Ffulltext%2FS0092-8674(22)00076-9&data=)

Please consider this inoculation to be optional to all of those who reside in Washington state. Looking at the USA in it's entirety, 2 out of 50 states have implemented it as mandatory. This is equivalent to 4% of the USA. That is not the popular choice, obviously. Please listen to the community and what they are asking for. We are asking for freedom of choice in regards to the covid 19 inoculation.

Thank you so much for your time. I appreciate you. May God bless you and your family.

Respectfully,

Christina Thacker

I wish to express my deep concerns over the prospect of requiring vaccinations for our children who scientifically/statistically have a virtual zero percent of being seriously harmed or killed by Covid 19 unless they have existing life threatening co-morbidities. In addition I would like to remind you that these vaccines are NOT APPROVED by the FDA and as such it would be irresponsible and most likely illegal for anyone to "Approve" the mandatory requirement for taking a "EUA" drug. Any decision involving the safety and health of our children is the most important responsibility we all have and as such I ask you to not go further with this process especially since Covid is waning and getting weaker with each variant. Thank for your attention concerning this matter.

Mike Davis
Washington State resident.

Both Pfizer and Moderna vaccines are EUA vaccines and the corporations are indemnified from all legal action resulting from patients experiencing side effects; including death. Since they assume no risk, you are the one who takes all of it to include forcing helpless parents that want to keep their children in school to take an EUA vaccine. That has never happened with any other vaccine in the history of vaccines.

<http://epidemics.psu.edu/articles/view/leaky-vaccines-promote-the-transmission-of-more-virulent-virus>

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fepidemics.psu.edu%2Farticles%2Fleaky-vaccines-promote-the-transmission-of-more-virulent-virus&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cc37892806a8e4bd680ea08d9ebffb382%7C11d0e21>>

Leaky vaccines work by enhancing host immunity to a particular pathogen, without necessarily blocking or slowing viral replication. The result is that infected but vaccinated individuals have extended survival, allowing highly virulent pathogen that would normally reach an evolutionary dead-end in a dead host, can transmit.

For the record, I am strongly against the COVID vaccine mandate for children in public schools in Washington. In fact. I am against any sort of mandate that supports showing a vaccination card to get into a restaurant, event or public place of any sort.

Parents are the only ones who have the right to decide what, if any, vaccines a parent gives their child.

Good afternoon,

I strongly oppose this vaccine for school entry and here's why:

1.) You all claim to want to "follow the science" but any decision you make will depend on uncertainty. How exactly does that follow the science? How can you in good conscience require something of young children when Dr. Gett said himself, there is uncertainty in this decision. Please explain that logic.

2.) There is absolutely no data AT ALL for the pre-k age group, so there is NO WAY to approve criteria 6.

3.) Also, your criteria 6 is absolutely false. Being vaccinated DOES NOT reduce the risk of person-to-person transmission. Being vaccinated, you are still able to transmit and contract the virus.

Also remember, if this becomes a school entry vaccine, there will be a mass exodus from public education. That you can count on.

Best,

Jessica Thompson

Subject: Commit to no COVID vaccine mandates on children

External Email

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

Good Morning,
I am writing to implore to NOT implement a vaccine mandate for students in K-12 schools in Washington state.
This is a personal decision whether to vaccinate or not, and the state has no right to make a decision regarding my health.
As evidenced by the ongoing endemic it does not keep you from getting the virus.
Thank you for your consideration.

Scott Rorvig

Dear Board of Members,

No CDC guidelines, OSHA regulations or health officer order can suspend our rights. "We the People" and do not consent. We do not give you the authority to force any medical procedures on our children, elderly, or on any human being that does not choose of their own free will your offerings of "public health" in a vaccine trial.

Your chapter 246 - 100 and rule making petition for 246 -105 try to confuse, coerce, intimidate, threaten and harass us. This is called retaliation and discrimination, and that is against the law.

We have the right to determine what is the best for our families and what is done with our body and it doesn't matter whether the vaccine only has an "emergency authorization" or not.

The masks and the testing are also "emergency use authorization" but even if they weren't, we cannot be forced into complying. Only a licensed medical doctor can suggest

a medical treatment such as a mask, covid testing or a vaccine. You or school administrator has no authority to do so.

We have the constitutionally-protected and GUARANTEED right to life and the right to determine what it's done to our body.

We are covered under ADA laws and our needs would have to be accommodated by law.

You are not a medical professional and, therefore, you are unlawfully practicing medicine by prescribing, recommending, and using coercion to insist on this experimental medical treatment.

Whereas:

1. The Nuremberg Code, codified into US Federal Law, prohibits forcing or coercing anyone, under any circumstances, to participate in a medical experiment; and the Code states "the voluntary consent of the human subject is absolutely essential."

2. Phase 3 clinical trials of COVID-19 vaccines are not yet completed. C4591007—the main clinical trial in children and young adults with BNT162b2—has an estimated completion date of May 5, 2026 and hence qualify as medical experiments. People taking these treatments are enrolled in clinical trials.

3. The vaccine formulation now being given to U.S. children aged 5-11 is NOT the same formulation used in the clinical trials, and NOT the same formulation that has been administered to all other age groups under EUA. So even when current ongoing clinical trials are complete, the results cannot be assumed to be relevant to the safety or effectiveness of the new formulation.

"The vaccine that is authorized for use in children 5 through 11 years of age includes the same mRNA and lipids but different inactive ingredients compared to the vaccine that has been used under EUA in individuals 12 years of age and older and that has been studied in clinical trials." Source: <https://www.fda.gov/media/153717/download>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F153717/download>

4. Most vaccines are trialed for at least 5-10 years and COVID-19 vaccines have been in trials for less than one year.

5. No previously attempted coronavirus vaccines (ie. MERS, SARS-1) has been approved

for market, due to antibody-dependent enhancement resulting in severe illness and deaths in animal models. The participants in clinical trials involving children aged 5-11 received “two doses of 10 µg BNT162b2 or placebo (saline)”, not the new formulation.

Source: <https://www.fda.gov/media/153447/download>

<<https://qcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F15344>

6. Numerous doctors, scientists and medical experts are issuing dire warnings about the short and long-term

effects of COVID-19 vaccines, including but not limited to death, infertility, miscarriages, Bell's palsy, blood clots,

cancer, inflammatory conditions, autoimmune disease, early-onset dementia, convulsions, anaphylaxis,

myocarditis, and antibody dependent enhancement leading to death. I have friends dealing with COVID-19 vaccine injuries.

7. Children and youth are at virtually no risk of dying from COVID-19 or transmitting it to others, but deaths and

injuries to children and youth have already occurred in the COVID-19 injection clinical trials.

8. FDA admits safety unknown. Children are being used as test subjects, with their parents acquiescing under fraudulent marketing pressure. Public Health messaging does not match the reality of the current knowledge base. At the October 26 VRBPAC meeting, FDA Advisor Dr. Eric Rubin admitted: “. . .but we’re never going to learn about how safe this vaccine is unless we start giving it.”

Source: @6:52:33

https://youtu.be/laaL0_xKmmA

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fyoutu.be%2FlaaL0_xKmmA&data:

9. International Alliance of Physicians and Medical Scientists has declared that children should be excluded from vaccine mandates:

“Consensus is clear among MDs and medical PhDs: following 20 months of exhaustive research, millions of patients treated, hundreds of clinical trials performed and scientific data shared worldwide, they conclude that healthy children and the COVID-recovered should be excluded from restrictions and vaccine mandates.”

Source: <https://globalcovidsummit.org/news/thousands-of-physicians-and-scientists-reach-consensus-on-vaccinating-children-and-natural-immunity>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fglobalcovidsummit.org%2Fnews%2Fthousands-of-physicians-and-scientists-reach-consensus-on-vaccinating-children-and-natural-immunity&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Ca8ab17f977d6472d222b08d9ecb72ef6%7C>

10. There have been more deaths from COVID-19 vaccines, as reported to the Vaccine Adverse Events Reporting

System (VAERS), than deaths in the last 10 years from all vaccines combined and only 1% -10% of vaccine injuries are reported to VAERS. The full extent of adverse events from the COVID

vaccines is unknown as there is a significant delay in uploading reports to the VAERS database.

The risk associated with COVID-19 vaccinations is extremely dangerous to the health and well-being of all children

and this form of treatment unnecessary.

Any coercion or pressure tactics used for students to be vaccinated contravenes the Nuremberg Code, the Helsinki Declaration and Federal Law.

Any use of "implied consent" by any minor child under the age of 18 is defined in law as gross, contributory, and

culpable criminal negligence.

Any party found to be involved in vaccination coercion when entrusted with the care of our children such as all school staff, school board members and executive, and any other adults who may have access to our children while under their care. This includes the assistance of outside school staff, contractors, public health nurses, or health officials

could be prosecuted to full extent of law and you may be held personally and criminally liable for any injuries or deaths

that may occur.

We are forced to err on the side of spiritual caution and refuse to harm our temples in honor of Gods Holy Word.

The 1st Amendment of the constitution has protected these exact claims before the Supreme Court on many occasions. Even State governments have faced this glaring truth during the Covid crisis as

they attempted to pass mandates and laws that violated this basic principle only to have their wrong decisions righted before the Courts, with financial penalties.

While, as Christians, we strive to be at peace with all humans beings and to obey all laws and mandates from a Legitimately elected government. We do not do so in violation of Gods Holy Laws, of which the protection of my body is one of those spiritual laws that supersedes all manmade laws in my religious conscience.

Sincerely

I extremely concerned dad that is willing to take out his kids from school to protect them.

As Dr Geert Vanden Bossche states:

The global threat to humanity is from our response to the virus, not the virus itself.

Studies from Sweden, who never closed their schools down, show 0 deaths of children.
0.

Why then are we looking to inject any child with an experimental COVID-19 vaccine.

Omicron is now the dominant viral mutation. These vaccines do absolutely nothing to prevent infection, transmission or death. In fact we are seeing the majority of hospitalizations in the vaccinated.

How do you justify keeping children safe when the preliminary studies show 0 antibodies in children 6 mo-5 years, with the "hope" of something happening on the third shot.

This is criminal and unjustifiable.

So according to your 9 criteria

1. We have seen the acip recommend vaccines without long term studies using human subjects as postmarket tests. Our trust in them as an advisory board has diminished.
2. The antigen is not effective as measured immunogenicity was 0 after two shots
3. How is this cost effective to society especially if just one child is injured for life?
4. Where are the safety demonstrations? A small study group and an extremely short time span do not warrant any safety data.
5. This disease has 0 mortality rates in this age group. Again 0.
6. This vaccine does not prevent transmission.
7. Implementation of this vaccine is mostly by coercion. Millions of dollars spent on marketing, useless tests, ridiculous tracking to no avail. Case numbers are still high and changing how we count them won't change our perspective of how the health departments have handled this crisis.

Your decision to add this to the schedule is for one reason and one reason only- to give the pharmaceuticals 100% liability.

Let's hope you make the right decision for the children. Vote NO

Sincerely
Yael kantor

Greetings all,

Listening to the Zoom today - I am in full agreement with the stand of INFORMED CHOICE WA - who have advised you of their comments.

I say NO to adding these shots to our school kids. They are still experimental and you've even admitted the variants cause constant change. There is not enough data - which takes YEARS to push these STILL EXPERIMENTAL shots on our children. I'm not willing for them to be guinea pigs for an illness with a 99.98% cure rate with their own natural immunities. It's just not worth the risk.

Kind regards,

Joelle Balcom

The COVID-19 vaccine should not be made a requirement for K-12 students in Washington State. The risk of the virus to children does not outweigh the novelty and unknown risks of the new vaccine. Many school age kids now have natural immunity to the virus.

For the record, I am strongly against the COVID vaccine mandate for children in public schools in Washington. In fact. I am against any sort of mandate that supports showing a vaccination card to get into a restaurant, event or public place of any sort.

Parents are the only ones who have the right to decide what, if any, vaccines a parent gives their child.

Subject: Commit to no COVID vaccine mandates on children

External Email

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

Subject: covid mandates

External Email

Dear board members,

I am a concerned citizen re: covid vaccination mandates especially as it applies to children and young adults. As Omicron has taken over and it has become apparent that the vaccine does not protect well against getting it and that there are risks with the vaccine, it seems reckless and unnecessary to require children to get this vaccine.

On the CDC's VAERS site, there have been over 800,000 reported adverse events as a result of this vaccine and over 19,000 deaths reported. That is more than all other combined adverse events reported for all other vaccines in total for the past 30 years. To me that is a giant red flag. Especially when by the CDC's past estimates, those adverse events reported are only a fraction of all of the events that have occurred.

I recently saw a study out of Hong Kong that there were 1 in every 2,700 young person who had experienced myocarditis or pericarditis after receiving the covid vaccine. It is almost inconceivable to me that any rational adult would want to put that risk onto our children and young people. Please do your own research and get all of the facts before forcing possible serious and irreversible consequences onto hundreds of thousands of innocent children who have their whole lives ahead of them.

Also, it appears that the risk to children, especially those that are pre-teens have less than a 99% risk of serious disease from covid and that natural immunity has so far been documented as still being present 20 months later by scientists from several countries.

Please do not require something that can cause potential harm, unknown long-term consequences (even for adults) and little benefit to be required. You have the responsibility of our children and their health, safety and futures in your hands. Choose wisely. You have to live with the consequences of these precious lives.

NO to including Covid experimental shot for students to go to school.
It would be a Nazi-like measure against the Nuremberg Code, besides other things.
Parents are furious.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

Covid-19 Vaccination for children to be required to attend school.

11.

Are you Pro or Con on the proposal?

2. Con

There is no conclusive evidence that the vaccines prevent adults or children from getting Covid. Children are at the lowest risk for contracting Covid and subjecting them to the vaccine is more harmful than if they were to contract Covid. I am strongly opposed to a bill that will take the decision out of the hands of parents and place it in the hands of the school board. Thank you for your consideration of my input.

Subject: COVID 19 Vaccines - NOT okay

External Email

We The People do NOT Consent to adding Covid-19 vaccines into Chapter 246-105 WAC due to the following reasons:

- 1) We The People do not consent to experimental drugs.
- 2) The Gene altering technology has not had enough long term studies for adverse reactions, and or long term side effects.
- 3) According to the new scientific data coming out, the vaccines have been more harmful to the people rather than helpful.

In conclusion, until the covid-19 vaccines have been PROVEN and documented to be safe and effective, I do NOT consent to the revision of WAC 246-105.

I do not want my child getting this vaccine right now. I do not feel it is safe for her and as a parent, it is my right to not get her vaccinated.

Michelle Cruz, concerned parent!

Subject: Comments regarding today's TAG meeting

External Email

It appears you are reviewing 5 and 6, as shown on the screen in your meeting, not 5 and 7 as stated in your notice? Hope I am correct and did not miss something; however, I do not believe it will make any difference in what I have to say.

I would like to start by saying it is way too soon to be requiring every child or young adult under the age of 18 to be required to take a vaccine. (Even one of your speakers stated that it is too early, and we do not know the long term affects.) I strongly agree there has not been enough time to determine how kids specifically will be affected by the vaccine down the road. Most kids have pretty strong immune systems and can fight off most viruses, so why would we mass vaccinate? I understand that there are a number of kids with issues that have compromised immune systems and "maybe" could benefit from a vaccine; however, that should be done on a case-by-case basis and is a discussion for the PARENT and their Doctor! It is not for a board, committee, mayor, governor or president of this country to determine that is right for everyone to get vaccinated. Each of us are unique and have unique biological differences. We should each be able to make our own decisions for ourselves and that of OUR OWN CHILDREN. Children are not wards of the state, board of health, school boards or anyone else.

The next item would be, from what I read, and I did not read it all, mainly focused on Items #5 and #6, this information appears to be very one sided. Why is there not a discussion of the bad side of vaccinations, and there are bad outcomes and ones we do not even know about yet! Vaccinations are not a one size fits all and be done with it. There is documentation that shows it is not safe to vaccinate kids and I don't see anything where you share that side of the discussion. One of the problems when things like this are forced on people the whole truth is not put out in the information. Then down the road when issues and problems arise no accountability is taken by those who forced the action. (One of the common comments after problems arise is, "Well, we didn't know." and you don't know, because it is too soon.) So what is the rush, give this time to play out and take it slowly and let people decide for themselves and let the parents decide for their own kids. These kids are not yours and just because you are in public service does not make you the authority on their care.

You all say we care about people's lives and not one more person can die from this virus, unfortunately people die every day from many things, it cannot be stopped. We would do better to educate people more on the choices we make that truly affect our health, but for too many they think a shot is quicker and easier. (I won't even get into the money this generates for some, which is part of the reason for the push of vaccines on everyone! Follow the money! That is really the saddest part of all this.)

I believe most of us try very hard to do what is right, especially when it comes to our kids. The best job the WA State Board of Health can do is to provide "truthful" "balanced" and "accurate" information from a variety of sources, so we as parents can make the best decision we can for the health and care of OUR kids.

I ask you to please not pass a vaccine mandate for kids. It is way too early, and the numbers are coming down without the vaccine mandate, which is proof a vaccine is not needed at this time. I have read that immunity is better by having had covid than having a vaccine, which is God's and nature's way of taking care of the virus in a way that is best. Take a step back and really check the facts and the truth, I believe the truth is, it is best to not require vaccines on our children. They are the future!

Thank you.

Hello,

The Washington state board of health's TAG committee voted on and passed five and six of the nine criteria to consider for evaluating antigens for potential inclusion in WAC 246-105-030 just a few days ago. I was very disappointed the chat was disabled so parents could not make any remarks, or express any opinions or give feedback. I very much DISAGREE with the yes votes for criteria #'s 5 and 6 to consider in evaluating antigens. I work in the health room of an elementary school recording positive cases and working on tracing of close contacts and I know from experience that vaccination does not reduce the risk of person to person transmission of this virus at school. It does not

matter if you are vaccinated or unvaccinated, if you are in close contact with a positive case you are likely to get the virus. I will also tell you I do not have any faith in the at home test kits as there have been many instances a whole family will test because they all have symptoms and a parent will be positive but maybe one child will be negative. There is no consistency with these tests to be able to tell if the vaccination reduces transmission.

My husband and I will not vaccinate either of our children, due to the risk of side effects (pericarditis in young boys and men which can damage the heart muscle if left untreated, for the rest of their lives) from this vaccine. That far out weights the risk of getting covid which is essentially a cold and has only killed 9 children with co-morbidities. We will pull our children out of school if forced to. Here is a quote from my 14 Year old which explains another possible problem with this vaccine becoming a requirement, "The vaccine mandate would cause people adamant about not taking the vaccine to leave the public school system breaking friendships and dividing the next generation causing the minority of students who leave public school to become out casts in a new society." Please think again, do some more research, and listen to parents and families carefully about making this vaccine a requirement for Washington State schools.

Regards,

Janice

As a tax payer, parent and citizen I am tired of having zoom meetings, where you can silence the voice of the PEOPLE. We are supposed to be heard and listens to by you. You are supposed to represent our wants. You are not supposed to block us out and down. I have spend my life working in clinical research and I fear for our kids, our freedoms and the PSD of you implement covid vaccines into the required immunization for school and childcare. I have had my kids fully vaccinated for all thing. I held when HPV vaccine came out and wanted to see more long term data. And then it was given. I was active in the RDV trials in Pierce county. I do think the choice should be offered and parents and pediatriicians with the children discuss risk and benefits. But the data is NOT long term, NOT Fully released and has had more events then all other immunizations before. You will be forcing parents out of the workforce becasue they can't take their child to daycare or they are forced to homeschool. Please look at what your strong handed bully tactics have done to enrollment. You will be open to lawsuits in about 5 years and they will win or you will settle for millions. Drug injury lawsuits are some of the biggest around. I am asking, listen! Parents want to choose for their children.

Thank you
Jami

Thank you for the opportunity to express my thoughts on forced vaccination. If the board is to implement the forced vaccination of covid-19 on school aged children you will cause parents to remove their children from the public schools. I am one of the parents that will not allow my child to be vaccinated against covid-19. It is proven that it does not prevent the spread of the virus and is indeed not Mecca for children.

Thank you,
Meshelle Murphy

The following survey response is submitted:

1.

State Board of Health Meeting Date:

2.

Agenda Item or Issue:

Covid vaccine required in schools

3.

Your Name:

Audra

4.

Do you have a professional title?

1. Yes

Parent

5.

Are you representing an organization?

2. No

6.

Address:

2602 E. Grand Ave.

7.

Email:

Ourinternet21@yahoo.com

8.

Phone Number (Include Area Code):

425-551-8474

9.

Do you have any special expertise relevant to this topic?

1. Yes

I have expertise in my child and what I want in her body.

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

We do not want Covid shots mandatory for school at this time

11.

Are you Pro or Con on the proposal?

2. Con

These shots have only been out a little over a year and there is not enough info on them. These are emergency use only. This meeting is biased and one sided. You don't have any parents on the panel against the shot or nurses or dr. Who are against to give the other side of the topic.

Subject: Vaccines for children

External Email

Hello I am concerned that mandatory vaccines are too risky for children .According to the Lancet study

600 children have died from the covid vaccine. A healthy child has no risk of covid The idea of forcing a vaccine on children is unethical. The CDC found in July 2021 that fully vaccinated people who contact the infection have as high a viral loading their nasal passages as unvaccinated people who get infected. In October 2021 Israel's

Medical authorities at Meir Medical Center found that 23% of patients and 10% of staff were infected with Covid despite 96% vaccination rate in the country. The CDC hides mortalities in the US data by counting all people as unvaccinated unless their deaths occur more than 2 weeks after the second vaccination shot.

The CDC doubles down on this fraud by counting vaccine deaths as Covid deaths. Maddie de Garay, a 14 year old participated in the Pfizer trial and suffered neurological injuries, including seizures and permanent paralysis. Pfizer reported only that Maddie suffered only a stomach ache. According to VAERS there have been more than 7000 cases of myocarditis or pericarditis following vaccines. More than 5000 from Pfizer. In 2019 there were 4 cases of young people with pericarditis in the US, In 200 to 2021 there were more than 7000 cases .Life expectancy in 50% of the cases is 5 years. The 476 cases of myocarditis in the 12 to 17 year olds is 19 times the expected no of cases, That is 50 times higher than the vaccinated males over age 65 years.

A teen has effectively zero risk of dying from covid but a substantial risk of dying from the vaccine .In October 2021 Sweden, Denmark, and Finland paused the Moderna vaccine for children because of this. Covid is waning , mutating all the time, the vaccine made today will not work in 3 months from now.

According to the Office of National Statistics (ONS) data showed a rise in deaths among 15 to 19 year olds in the summer of 2021. There were 9 covid deaths among unvaccinated children ages 15 to 19 years old . But there were 9 times as many deaths of vaccinated 15 to 19 year olds . 81 deaths compared to 9 .

According to ONS the deaths among teens in the United Kingdom increased 47% due to the vaccine. Covid 19 vaccine is 98 times more deadly than the flu vaccine according to VARES report Trial Site News August 28 2021.

Why vaccinate children? I ask you to read all dissenting material before you make up your mind. By making vaccines mandatory the children and parents will have no recourse when harm comes. Please consider this carefully. The first rule of medicine is first do no harm. Thank you Irene Randall Mail

External Email

State Board of Health Representatives,

We do not support vaccine mandates of any kind within our state- vaccine passports, and vaccine requirements for school attendance and employment. Anything one puts into their body must remain personal choice, and even more so when the vaccine in question is still in early stages of use, without a vetted history of safety, and is showing much higher rates of vaccine injury and death than any other vaccine since the data has been tracked by VAERS.

If you choose to vote for vaccine mandates in our state it will not be well received by our citizens. I implore you to be mindful of the people's desires in this matter.

I am here to voice my concerns taking place in this State in regard to COVID 19 shots. I feel that every parent chooses what they feel is right for their children and themselves. Whether that means choosing to get a shot or not, just like choosing to breastfeed or use formula. Both are a right answer in what they choose for their family and that because it's a CHOICE. It should always be a choice to get a shot or not, just like the flu shot (Norway already views COVID as the flu so we really need to get on their level). Thousands of fellow parents will pull their kids out of school if this is required. I love my children too much to force junk in their body that has yet to even be proven effective from getting it spreading with the shot- so what the point of even getting it? Due to the thousands of parents pulling their children will only add to the falling economy... as teachers, bus drivers, cooks, etc. will no longer be needed since there will hardly be any children in school. Face it, COVID will not go away- people need to move on and live their life and realize it's not serious. People die from smoking... yet that's still ok....how many alcohol related deaths have there been? Millions... but yet let's still sell it and every venue, restaurant, and store. That makes sense. There isn't a Covid pandemic. There is a people with power pulling pandemic. Horrible people that do not respect the constitution. As you can see I am completely against forcing people and children from a shot that they feel is not good for them. And punishing those families who chose not to get it. This is un-American and I hope you are ashamed of yourselves. Becca Depersio

Children do not need Covid vaccines, the risk-benefit analysis doesn't add up. May I add that the three vaccines approved in the US are the most dangerous in the world, any vaccine that does not cause your own cells to produce the spike protein is safer. If you mandate these Covid vaccines for children for public school, people will be justified in not paying the taxes to support public school, since we won't have public school as an option anymore.

I am a CNA, I got COVID in November 2020, before there were any vaccines, and I was signed up to donate plasma when the vaccines came out for health care, so I wasn't allowed to get a vaccine, which bought me some time to find out the rate of vaccine injury, which is adding to the case load for health care workers. Ask yourself these two questions: Why was Sweden the only European country that did not have a second wave of Delta? And, why does Israel have the highest death rate from COVID in the world now, in 2022, with 70-80% of people triple boosted? To answer the second question, you need an understanding of your immune system, but the upshot is the same: Natural immunity is superior to the mRNA vaccine. Covid is treatable. Prior to Covid, nationwide we lost about 600 children per year to the flu, now noone gets the flu anymore, but the numbers are the same. The risk benefit analysis is not there. -Elly Stratmann

During the meeting today while I was there viewing nobody in meeting that talked about the side effects of kids getting these vaccines were talking about kids and have already had Covid and have immunity. I watched the whole meeting and every single person was for the vaccines I didn't see one person say they were against the vaccine. Why do you not have any parents in this board meeting giving their opinion since the shot is going into their kids body? When is the next meeting and when is the final decision about this vaccine being added to the already required childhood vaccine list ?

To whom this may concern,

My children attend Lynden Christian School.

We are living in a very different and difficult time. We are living in an unjust time where our freedoms are being taken away, power over our choices and bodies are slipping away. THIS IS WRONG.

It is completely legal to kill an unborn baby today if I chose to do so. It is absolutely absurd that we cannot choose if a vaccination is right for our children and ourselves.

Please think about what your doing and hear the people of this state. WE ARE AMERICANS WITH FREEDOMS!!!! Do not mandate a vaccination for our children to attend school. This is a choice a parent should make for their kids, not a mandate. Please hear us. We have given and sacrificed and complied for 2 YEARS.

Our only hope is that we serve a just God. He is in control and He hates wicked and unjust practices and He will see to it that righteousness will prevail.

Please do not mandate the COVID vaccination.

Thank you,

Terra Visser

Subject: Reject Covid 'vaccine' mandates for Children

External Email

Washington State Board of Health,

Please reject any 'vaccine' mandate regarding Covid-19 as it's unnecessary, unsupported by science and will do more harm than good.

Children were never at risk of Covid. Until these injections became available, only the elderly and those with multiple comorbidities were susceptible. Now due to these mRNA Spike Protein reproducing injections that by the manufacturers own documentation reveals that recipients will transmit by "Inhalation or Skin Contact". This means that anyone injected with an mRNA 'vaccine' is now a potential super spreader which is why all demographics are now effected.

According to VAERS which is known to only report ~1% of the actual total, reveals over 22,000 Deaths and over 1.1 Million injuries. The insurance industry has reported a 40% increase in deaths among 18-64 year olds since the injections became available. The damaging health repercussions of these injections are only beginning to be revealed.

The whole lot of Covid-19 EUA injections should be pulled immediately.

None of these EUA Covid-19 injections even qualify under the WA St. definition of a vaccine.

It must be an individuals choice. Children are NOT at risk of Covid but they are at risk if they're mandated to receive a Covid-19 injection.

Vaccine Liability should be on those individuals, health departments, businesses and government alike for the injuries or deaths sustained by the mandating of such medical treatments.

Do not mandate these injections on children.

Subject: Question Regarding Data Presented in Zoom Mtg. Today

External Email

Hello,
I have listened to all data presented thusfar, and I have two questions I would like to have answered?

1) If there is not enough data to determine vaccine vs nonvaccinated, why is this even being considered becoming a school mandated vaccine at this time?

2) Why is there no study being done on natural immunity vs vaccinated?

I am a 50+ yo, vaccinated. Our 8 year is not.
Feb 2020 we all got Covid from a sports game we attended in Seattle.
Feb 2021 my spouse and I were vaccinated with Moderna.
Dec. 27th our 8yo tested positive with 2 symptoms resembling a cold. One week later, my spouse was positive, cold like symptoms. Five days after that, I was positive. We have all recovered just fine at home, no medical intervention.
Why is there no studies on this type of transmission and recovery?

Thank you.

Subject: No to adding Covid vaccine to required vaccinations.

External Email

Of the 907,000 deaths from Covid only 847 school aged children have died. I don't have the data on which of those had co-morbidities, but I'll give it a conservative number of 50% which means since the beginning of the pandemic only 423.5 children have died of covid which is lower than what is typical for a single season of the flu. That being the case I do not know why we would think it's necessary to add covid to the list of required vaccinations.

Subject: Covid vaccinations for students

External Email

I am opposed to covid vaccinations Being made a requirement for public education students. There is NO long term safety data available at this time. If this vaccine becomes mandatory all 3 of my children will be pulled from public schools.

According to your own printed materials

"Currently there is no published literature on pediatric Covid-19 vaccine effectiveness in K-12 school setting."

Because there is NO published literature available for long term safety Or effectiveness

Please do not require the Covid vaccines for students to attend schools

Thankyou

I am appalled by the fear the BOH is still pushing when it comes to covid! You guys should really start following the real science and stop listening to bureaucrats that get kickbacks from big pharma!!!

All this talk about MIS-C in kids is extremely misleading. Kawasaki Disease/syndrome has been around since the 1970's. Any medical website states that it is extremely difficult to differentiate between this newly found MIS-C and Kawasaki Disease. Kawasaki is activated in a small child after recovering from virus. So, of course, all these "cases" you are all the suddenly seeing of MIS-C have just recovered from a virus. The first case of MIS-C appeared in May of 2020, to me that just seems like a label was stuck on it related to COVID to scare parents!! Kawaskai is a uncommon disease and it checks all the same boxes as MIS-C, why are you not just coming out and saying that these symptoms are related to a known but uncommon disease?!?! I am thankful Jake did ask this question further in the video, however the answers he received seemed to be...you are only studying the cases because they are linked to COVID so you are charting them as a new disease (MIS-C) to make it sound like it's a new disease that children are exposed to due to covid. THAT'S JUST A SCARE TACTIC!

Also...you guys still refuse to talk about natural immunity, why? The CDC itself finally came out with a study showing NATURAL IMMUNITY is just as strong, if not better, than a vaccine because it doesn't wane as quickly! All those "unvaccinated" in the hospital now...it was mostly a onetime visit and now they have a great immunity and will be fine for the future! Why are you not saying these things?? I had covid in feb 2020, ya it sucked but I am decently healthy, prayed and took extra vitamins. I then tested positive in November of 2021 and had nothing but sinus pressure and headaches (from the pressure). The only reason I test was because my husband had covid-with flu like symptoms- and our kids were out of school so we had to test before they could go back. My kids were sick for a couple days while we were all at home because we didn't hide my husband away in a room away from us. My kids have been exposed to it, they were down for about 48 hrs in the beginning of the 3 WEEKS they had to be out of school!!!

The other issue I see, is you are allowing for exemptions, which is great but seems unnecessary. You are going to allow for 5 reasons that seem to cover any and all reason someone would not get the vaccine for their child. If you are allowing people to file for an exemption for any reason....why make them required to begin with?

Are you hoping parents wont jump thru the hoops and just give their kid the shot?

Is it because then BOH can then track those kids/families that choose to be unvaccinated since we will HAVE TO file for an exemption?

I think you misunderstand the level of trust the health care system, and those in charge

of it, have lost with the general public in the past two years. I hope this is not passed and will not be added to the required vaccines...this is not a vaccine that prevents infections or transmission! The thing that kept coming up and being said by your TAG people about data and studies "we have little data at this time to sufficiently answer that question" "we don't have current studies" and "these numbers aren't definite, just inferred" why are we even talking about making this becoming a requirement when THERE ISNT ENOUGH DATA TO HAVE A TRUE LOOK AT OUTCOMES AND SIDE EFFECTS and it is ONLY EUA right now!

Krystal Wilford

I strongly oppose this being added to the WAC currently in place

Hello.

I find it odd you are not allowing comments on your meeting this morning.

I would like to voice my opinion and inform that I and a large majority do not support the motion to add the covid vaccines to the requirements for children to attend school.

Reason being is that as you are very well aware of, the ones being administered in the U.S are still Emergency Use Only.

The approved ones with exact formula, Spikevax and Comirnaty are not administered in The U.S.

Given the fact that the information from the trials is still disclosed and being held up in the courts

We have no idea of the long term effects this will have on our children's developing bodies.

As you are also aware of, they are the least affected by this virus that has a 99% survival rate in those under 70+

Given that information, this seems like a play to continue the immunity shield off these vaccine companies under the national childhood vaccine injury act.

I should also mention that Johnson and Johnson have quietly halted production of their vaccines and have given no clear explanation.

Finally, the reports on the VAERS and now DMED have some very disturbing accounts of injuries and adverse side effects caused by these EUO vaccines that should be reviewed.

So therefore, I ask that you take this information into consideration before voting today.

Please think about the health of our children who have dealt with enough during the last two years.

Thank you for reading.

I am a parent to a 9 year old child. As a parent I am very concerned that our state is trying to COVID vaccine on the recommended childhood and adolescent schedule. This vaccine does not stop the transmission or stop any individual from contracting it. That alone should be a red flag. The flu shot for has never been mandated nor the the seasonal flu shot ever been recommended as a part of the immunization schedule for children. There has been plenty of bad side affects for children and adults that make this recommendation very concerning. I fear that if this gets added into the immunization schedule is that would stop many parents from getting any the of vaccine due to not wanting their children to get the Covid vaccine. Please dont allow this to happen. Every parent should have the right to speak for their child's best interest. Please think about future generations and do not allow this to be included on the immunization schedule.

Good afternoon,

I am one of MANY concerned parents who do not approve of the decisions being made to add the covid shot as a requirement for school aged children to attend school. I watched your virtual meeting yesterday between the Technical Advisory Group (TAG) and the WA State Board of Health (SBOH). Your "data" presented was not sufficient to even make an educated decision on Criteria #5 or #6 (or any of the 9 criteria for that matter), many of you even said so yourself. Please understand that your vote, your unanimous recommendation to the Department of Health, affects ALL of us parents.

For those of us parents who do not want our children being forced to take this experimental shot, please hear us out. If the tables were turned, and the government was trying to pass a law or new code/requirement that would force YOU to either do something to your child that you wholeheartedly did not approve of or pull them from school and uproot your whole life and everything you've worked for to move somewhere else to stand up for what you believe in, how would that make you feel? I have lived in Washington my entire life, so have my parents and my grandparents did too. Everything I know, love and have worked so hard for, is here. All of you with TAG and SBOH and many other agencies/organizations of government are jeopardizing every aspect of my life with your decisions. The public no longer has a voice, we are being ignored and censored left and right. PLEASE. Hear me. I am begging you. I will not allow my children to be injected with an experimental shot. My kids and myself are otherwise fully vaccinated and get our flu shots. I am NOT anti-vaccine. I am simply a very concerned mama bear who wants to protect my cubs. Imagine for a moment if the most important people in your life were being forced to do something they did not want with every fiber of their being and ask yourself how you would feel. My heart is SO heavy. Tears are flowing as I write this. Please understand that the choices you are making affect people who may not have the same opinions, views, beliefs as you do. Are you really ok with harming others just because they think differently than you do?

Since when is it a crime to protect your own child?! I have been called so many awful,

ugly names, because I will not make my toddler wear a face covering in public. How is this ok? I don't call people names because they choose to wear a mask or get a shot. I truly respect everyone and the decisions they make for their children. We are all trying to do what is best for ourselves and our loved ones. Why can't that be respected? Why are you trying to rip that CHOICE away from me? What would it take for you to understand how I am feeling? Would it make a difference if I sat in front of you crying while holding my children? This is not fair. Surely you can see that. The vaccine is too new for me to trust it. We don't know long term effects. There is no way that we could! Covid has only been around for a few years and the vaccines even less time. Can you imagine if you voted yes for this to be implemented and years down the road we saw all kinds of defects and illnesses and deaths associated with these vaccines and boosters?? The blood would be on your hands. PLEASE, PLEASE, PLEASE. Let the PARENTS make the choices for their own children. Let ME decide if MY child needs this shot. I promise you I am far from alone on this. I know SO many people who feel this way. Our livelihood rests in your hands. Please speak up for us. Please understand that even though we may have different views, different beliefs, different opinions, that I still care about you. I would still save your life if given the chance. Love thy neighbor, right? I grew up in a household with one parent who was typically Democrat and the other typically Republican. They loved each other all the more, while cancelling one another's votes. Let's get back to standing together, respecting one another, helping each other and being neighborly. I would never want to force YOU to do something you didn't want to do. Please show some respect, and don't force me to either. United we stand, Divided we fall. Help us END the division by allowing us all to make CHOICES for ourselves. What is right for you, may not be right for me.

Much love and respect,

A Concerned Mama Bear

Why are you continue to call it a disease? It's not a disease it's a virus. The vaccine doesn't stop prevent the spread of Covid. Causing harm to children with a vaccine is very dangerous. Parents can make their own choice for their children not the government. Why do you continue to tell people you have to be vaccinated to go to Mexico?? You do not need a vaccine to go to Mexico or return to the US. 55,000 children have already been pulled from the schools if you implement this to schools that number will more than triple. Thank you Alisa Carlson

Subject: Please ensure that concerns will be addressed (especially those with immense liability due to "loss of life or loss of quality of life")

External Email

February 9, 2022

Dear Washington State Board of Health Technical Advisory Member(s),

If I was the Project Manager of a project of this magnitude, I would want to ensure that concerns have been addressed (especially those with immense liability due to "loss of life or loss of quality of life").

I have reviewed the February 10, 2022 State Board of Health Technical Advisory Group (TAG) Meeting Agenda: COVID-19 Vaccine and I do not see where "concerns" are being discussed. The only topics provided with a detailed description are:

Item 5, Criteria 5 (Dr Erick Lofgren, Washington State University) The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population.

Item 5, Criteria 6 (Dr. Stephen Lim, Institute for Health Metrics & Evaluation, University of Washington) Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting or activity being given the highest priority.

It has been my experience (as a Project Manager of numerous successful projects), that it was best to always review and handle concerns. If the following items are not presented by Dr Erick Lofgren and/or Dr. Stephen Lim, then hopefully you will address them in the "continued review" or the "group discussion" sections of the meeting:

* The only group you are currently reviewing is K-12, correct?
*

*

Where is the data justifying inoculation

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.sciencedirect.com%2Ftopics-and-planetary-sciences%2Finoculation&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C2c5c5cb20a6f442225a408d9ec57>>
with the COVID-19 vaccines for children? (Assumption: Data will be presented, as

opposed to opinion).

*

* If the following statement is true, how do you justify mandating the vaccine?

Risk: There is an emerging discussion that with approximately 570 Covid injection deaths registered in VAERS in children, and the CDC reporting approximately 350 deaths in children since the inception of the emergency (Feb/March 2020), then the vaccine is killing more children than the virus/disease itself (Steve Kirsh, personal communication, September 2nd 2021).

Full article: <https://brownstone.org/articles/dear-pfizer-leave-the-children-alone/>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fbrownstone.org%2Farticles%2Fdear-pfizer-leave-the-children-alone%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C2c5c5cb20a6f442225a408d9ec576cab%7C11d>

* Address the Adverse Events that have been reported through the VAERS, UK and Israeli systems for the K-12 age group. Especially when measured against COVID deaths and virus-related injury in this age group (and if the mandate would extend to children under 5, then that age group should be looked at as well).

*

* Are you making exceptions for those who now have Natural Immunity? If not, why not?

THAT NATURALLY IMMUNE PERSONS RECOVERED FROM SARS-CoV-2 SHALL NOT [should not] BE SUBJECT TO ANY RESTRICTIONS OR VACCINE MANDATES (view supporting evidence

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdoctorsandscientistsdeclaration.org/evidence%2F%23recovered&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C2c5c5cb20a6f442225a408d9ec576cab%7C11d>
)

Physicians Declaration – Updated Global Covid Summit (as of 1/18/2022 over 17,000 doctors and scientists have signed the declaration).

*

* What data do you have that these inoculations are safe for children?

*

* What data do you have to refute the information presented by others "THAT

HEALTHY CHILDREN SHALL NOT [should not] BE SUBJECT TO FORCED VACCINATION

(view supporting evidence

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdoctorsandscientistsdeclaration.org%2F%2Fchildren&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C2c5c5cb20a6f442225a408d9ec>
)”?

Physicians Declaration – Updated Global Covid Summit (as of 1/18/2022 over 17,000 doctors and scientists have signed the declaration).

In addition, as a Project Manager, I would want to know if the Board Members are protected by Surety Bonds (or something of that nature). This becomes most relevant if concerns are not addressed, and the findings from those who say “do not vaccinate the children” prove to be the Science we should be listening to. I would also want to know if the members are responsible for any deductible amounts.

Surety bonds protect WE THE PEOPLE from fraud and malpractice. When a bondholder breaks a bond’s terms, the harmed party can make a claim on the bond to recover losses.

Link for more data:

<https://bondsforthewin.com/#>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fbondsforthewin.com%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C2c5c5cb20a6f442225a408d9ec>

Sincerely,

Linda Wedin

Subject: No COVID Shots for kids

External Email

Good Morning-

I am emailing You in regards yo no COVID "vaccine" for kids to attend school! The mandate is disgusting that it would even cross your mind! I'd you are really into "following the science" you will see that the survival rate for everyone is higher then the death rate and for kids that rate is even higher! It is absolutely unacceptable to inject our healthy children with a poison that doesn't even stop a disease that has a 99% survival rate! The vaccine adverse reactions are far higher than the non existent efficacy of this shot! STOP this absolutely backwards way of thinking! NO COVID shot for kids!! Make it a parents choice!

I am here to voice my concerns taking place in this State in regard to COVID 19 shots. I feel that every parent chooses what they feel is right for their children and themselves. Whether that means choosing to get a shot or not, just like choosing to breastfeed or use formula. Both are a right answer in what they choose for their family and that because it's a CHOICE. It should always be a choice to get a shot or not, just like the flu shot (Norway already views COVID as the flu so we really need to get on their level). Thousands of fellow parents will pull their kids out of school if this is required. I love my children too much to force junk in their body that has yet to even be proven effective from getting it spreading with the shot- so what the point of even getting it? Due to the thousands of parents pulling their children will only add to the falling economy... as teachers, bus drivers, cooks, etc. will no longer be needed since there will hardly be any children in school. Face it, COVID will not go away- people need to move on and live their life and realize it's not serious. People die from smoking... yet that's still ok....how many alcohol related deaths have there been? Millions... but yet let's still sell it and every venue, restaurant, and store. That makes sense. There isn't a Covid pandemic. There is a people with power pulling pandemic. Horrible people that do not respect the constitution. As you can see I am completely against forcing people and children from a shot that they feel is not good for them. And punishing those families who chose not to get it. This is un-American and I hope you are ashamed of yourselves.

For the record, I am strongly against the COVID vaccine mandate for children in public schools in Washington. In fact. I am against any sort of mandate that supports showing a vaccination card to get into a restaurant, event or public place of any sort.

Parents are the only ones who have the right to decide what, if any, vaccines a parent gives their child.

To Whom it May Concern:

Why are you as a board still considering this so called "vaccine" for children, let alone anyone? The community has already spoken out about this issue. Thousands of people signed up to speak, submitted written testimonies, and emailed their disdain for you even considering adding this "vaccine" to the required shots for public school. Stop the nonsense. Children have NEVER been at risk of the virus, so there has never been, nor ever will be a reason to inject children with this experimental medical treatment that doesn't even fit the definition of a "vaccine."

Why is this "vaccine" being pushed so hard? Why is natural immunity being ignored for the first time ever? When have we EVER been asked to take medical treatments for someone else? Why are we the people being pushed, coerced, enticed, and forced to take this experimental medical treatment to keep our jobs and such?

None of it makes sense, what happened to your common sense? I am around hundreds and hundreds of unmasked and unvaxxed people EVERYDAY with NO deaths or illnesses. Someone is lying and you pushing this shot SO hard just pushes us to ignore any of your medical advice, you are untrustworthy. Prove me wrong!!!

Stop the lunacy,

To whom it may concern:

As a parent with one child in school and another who will be starting school next year, I am extremely disappointed to see this rush to make the Covid 19 vaccine a requirement right now. I believe in science and my children are 100% vaccinated with all required vaccines at the moment. However, I have no desire for my children to receive the Covid 19 vaccine at this time. At this time, I do not feel confident and comfortable with the effectiveness of this vaccine or its safety. If this is passed and the vaccine is required, not only will my children be homeschooled, but a large number of other parents will be homeschooling. School funding thrives on our children being in the seats. This requirement being pushed will not help anyone. With more time more parents will be comfortable having their child vaccinated but at this time that is not the case.

There is clearly a large outcry saying parents do not agree with this, yet you ignore all our concerns and follow your own agenda. It is time to stop and listen to our concerns!

Community COVID-19 Testing Site at SFCC Expands Operations to 7 Days a Week

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsrhd.us11.list-manage.com%2Ftrack%2Fclick%3Fu%3Dfc782ce2ead2036a351c11e73%26id%3D43156c1b6c%26e%3Dc3>

The Community COVID-19 Testing Site at Spokane Falls Community College (SFCC), operated by Discovery Health MD with support from Spokane Regional Health District (SRHD), is expanding operations to seven days a week starting this Saturday.

The drive-up testing site, located at 3410 W. Whistalks Way in Spokane, will be open each day from 8:30 a.m.- 6 p.m. to conduct PCR (lab-based) testing.

When is a COVID-19 Test Right for You?

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsrhd.us11.list-manage.com%2Ftrack%2Fclick%3Fu%3Dfc782ce2ead2036a351c11e73%26id%3D499f14d5d2%26e%3Dc3>

These are the times you should get tested, to help keep you and your community safe:

- * When you feel sick.
- * When you have recovered from feeling sick.
- * When you've been exposed to someone who tested positive for COVID-19.
- * When you're headed out on the town.
- * When you're traveling.
- * When you need extra peace of mind.

Before the COVID-19 pandemic hit, mental health challenges were already the leading cause of disability and poor health outcomes in our nation's young people. COVID-19 compounded these challenges.

The pandemic confronted children, adolescents, and young adults with unprecedented challenges and trauma, disrupting major elements of their daily lives. Since the pandemic began, symptoms of anxiety, depression, and other mental health concerns have increased

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsrhd.us11.list-manage.com%2Ftrack%2Fclick%3Fu%3Dfc782ce2ead2036a351c11e73%26id%3D4c1a5e1dab%26e%3Dc>

> I am writing you to encourage you to not in-force a required Covid shot for school age children. I and thousands of others will not allow our children to participate in government public schools of required. The "vaccine" is unproven in small children and they have very little or no Covid sickness. You know this! Please do not approve a required COvid 19 shot. The new variants are weak and getting weaker sickness wise, and do not pose a threat to hardly any child.

Subject: Required covid vaccine is wrong for children

External Email

The government is going too far in trying to require the Covid vaccine for children. This vaccine does not work. Many people who have been vaxed, and boosted still contract a Covid-19 variance. Parents know what they want for their children and need to make the choice for their child. Big Government needs to STOP trying to interfere and push their agenda. This vaccine has not been fully approved and it has not been fully monitored for long term affects. Children's bodies, because of how they develop and their brains are not considered fully grown until age 21. It would absolutely be devastating to harm these undeveloped children. Are you willing to take on that possible risk? Back off and let parents make the choice.

Thanks,
Ann Marchel

Subject: Considerations for tomorrow's meeting

External Email

1. The majority of citizens, regardless of political affiliation, want FREEDOM. Vaccine mandates, mask mandates, vaccine "passports"... are the OPPOSITE of freedom.
2. The majority's "patience is wearing thin"... parents do not appreciate government overreach when it comes to decisions regarding our children's health and well being.
3. A majority of parents will stop at nothing to protect their children. Whether one believes in vaccines or not is irrelevant... being forced to vaccinate a child and then experiencing adverse consequences could turn very ugly, very quickly. I prefer peace, and absolutely have grave concerns of the possible consequences that could result from such situations (each of you should consider these possibilities, as well... we all live here!)
4. These shots do not prevent infection or the spread of infection AND have shown serious adverse effects. Covid does not cause serious harm to children. How do mask mandates and "vaccine" mandates make any sense to any of you?

Subject: Public Comment TAG Vaccine

External Email

As a parent and medical provider I support a families decision to chose what vaccines are best for their children. As I listen to your TAG meeting, I am hearing a lot about case rates, and hearing a lot about inferences in transmission from adults yet I do not hear sound scientific information for transmission in children.

What parents actually care about is morbidity and mortality. Risk versus benefits. Many children as evidence by the grafts have already experienced covid thus have natural immunity. There are no long term safety data studies on this vaccine in children, therefore recommending it as a requirement for school attendance is both premature, and quite dangerous and we do however understand the very very very small dangers the disease presents to children.

Please do what is right and recommend this as optional not required.

Dr. Chelsey Richardson

Subject: TAG comments

External Email

I listened in on the TAG meeting today and was quite disappointed, especially in the votes on criteria 5 and 6.

For Criteria 5 - the vaccine does NOT prevent the disease. I am not sure why all voted in favor of meeting this criteria when there is proof that vaccinated people are getting COVID, therefore the vaccine is not preventing it.

For Criteria 6 - the vaccine does NOT reduce the risk of transmission. Again vaccinated people are getting COVID and any other variant that is created.

In order to meet Criteria 5 and 6 it would mean that No vaccinated person will get or give Covid to others. There is strong proof that this is not true - many unvaccinated have received it from the vaccinated.

Other comments I have:

There wasn't much talk about mortality and morbidity counts from people already vaccinated, what do those numbers really look like?

All side effects from the vaccines should be listed and counted which they are not presented.

The vaccine does not reduce Covid.

The counts are wrong. Not all people are being counted to come up with vaccinated versus unvaccinated stats and how Covid affects them. I know because there has not been a survey sent to all families to ask these questions. My family hasn't ever received any information to be included in any counts.

There is no guarantee the vaccine works on new variants so it should not be required for schools. This is not different than the flu and that vaccine is not required.

There were no reports about kids getting Covid and not vaccinated and were not hospitalized and recover just fine.

Hospitals are keeping people whether they feel sick or not if test positive for Covid even when that was not the reason they went. This is why hospital numbers are high. Not because everyone is truly in their because of Covid itself.

Regarding the Covid death counts, were they really from Covid or for other reasons but because they tested positive they were tossed in the COVID bucket. If so, this is not an accurate depiction that Covid is killing people.

Finally, when the public has the ability to listen I think written interpretation or someone needs to restate the question in English when a question is spoken in a foreign language. It would have been nice to know what the person was asking or stating.

Dear board,

There is no reason to require students to have the Covid vaccine to attend school. They are at such a low risk not to mention the vaccine doesn't stop it anyway. Why continue to inject ourselves with something that's not doing much of anything anyway? If someone wants to get the vaccine that's fine and their choice. We do not need to make it a requirement for school or jobs or what not. There's a reason it was voted down by the Supreme Court for large businesses and it shouldn't be forced for our kids and students as well.

Thank you for your time,

Mike Schaeffer

This is a message regarding vaccination in schools. This is not a pandemic where people are dying in the streets. The deaths are coming from the medications that are being given to people with covid as well as severe underlying issues . There will be a major set back for public schooling if this is mandated. I know that I will be pulling my child out if it goes through. This is a serious matter!

)

And I would try to translate it for you:

1/21 In the evil state of Washington, last week, the Board of Health failed to include "Use law enforcement to detain the unvaccinated" and "vaccination mandate in school" in their agenda. But they would not accept their failure. They know there are all kinds of left-wing White, Black, Yellow, Spanish here, so they put out an online survey, in an effort to support their "adding COVID-19 vaccine as a requirement for school entry" proposal.

NO MATTER WHERE YOU ARE, I want you to help me fill this out which can be done in just 1 minute. Your small effort will help me bring debacle to these evil fake health officials' attempt to harm my children. Join us, let your voice be your weapon.

As far as the first question is concerned, just use "Washington School District".

Obviously, he is encouraging 12k people, many of whom are not even living in the US, let alone WA state residents, to flood the survey with faked WA residents data, which obviously pose a serious threat to the public health of the community and commit a crime. In the screenshot, you can also see he is openly asking people (including non-US citizens) to submit the survey more than once and in vulgar languages.

In particular, his agitation scheme to sway health official opinions could result in tremendous health risk consequences to the millions of children in Washington state.

Please ask the appropriate department to step in, investigate and defeat this egregious cyber attack! At the minimum, denounce such fraud in your next public meeting with this evidence.

Thanks to you for keeping the Washington state communities and children healthy!

Jennifer

Subject: Our children Our future

External Email

As parents we are simply done.

We are done with the "rules for thee, but not for me" attitude on full display at the Super Bowl. The people making the rules are not following the rules. Why? My guess is they know the rules are not about preventing illness.

We are done watching our children languish and suffer because adults are unwilling to take responsibility for their own health. Two years into this, we now have the tools for everyone to protect themselves in whatever way they deem necessary. It doesn't matter what anyone else does.

We are done watching our children be used as a bargaining chip. Your job is to PROTECT our children who are our future. Instead you MONETIZE them for school funding. The WEA is shamelessly using them to push for a raise.

Masks need to be removed immediately.

And further, requiring the Covid vaccine to attend school is absurd. You can skew statistics to make any point you want as we saw in the recent TAG meeting. You can pretend to directly compare it to other vaccines on the schedule when a simple search will tell you that you are comparing apples to oranges. And you can fool a lot of people with this intentional manipulation. What you can't do is skew the long term data because there is NONE. There are cleverly carefully curated graphs to show what the vaccine "likely" does. But there is no information telling us its long term affects on ANY body, let alone a young growing body. Because the information doesn't exist. We already know efficacy with regards to Covid declines fairly quickly. What we don't know is how these vaccines impact every part of our beautifully complex bodies. So what's the plan?

How do you want to be remembered? Please put the children first.

Vaccines are ineffective, children have known and well documented adverse reactions that far outweighs the risk of covid itself. Leave our child new alone or you will see the mass exodus of enrollment in public schools. Parents have already shown you this time for you to listen or you will essentially ruin the public school system. This is no longer a pandemic there is zero need for this to be mandated. Parents will pull their children, parents will relocate to states who respect our rights to choose what's best for our children

Please consider that our children are at a very low risk of mortality from Covid-19. The chance of an adverse reaction is a higher risk. These Covid-19 vaccines have not undergone long-term phase 3 clinical trials and should not be required for any school age child. Myocarditis is a risk reported by the CDC. This is not a mild disease at best. Young people who previously had no comorbidities now cannot exercise for minimally six months and are put on several heart medications. The known outcome for myocarditis is not good. No one should be required or be coerced to get a vaccine that could do this harm and possibly do it long-term. Please bring in other doctors that can give the other side to this story. It is not wise to listen to only one side when it comes to scientific consensus. I urge you all to recommend a NO when it comes to school covid-19 vaccine requirements. Michael Billing

External Email

Yesterday, State Superintendent Reykdal urged the Governor and Department of Health to set an end date for masking students in schools. I am writing to add my voice to this request.

Since the pandemic began 2 years ago, our family has not always agreed with the Governor's mandates, but has abided by them and we've taught our 3 school-aged children to do the same as a sign of respect. As it becomes clear that Covid-19 is here to stay in some form, I ask you to do everything in your power to allow our kids to get back to normal. Kids of all ages are suffering emotionally like never before...I know science is showing this, and I have many personal anecdotes that prove this as well. It breaks my heart to see high schoolers in a singing competition (alone on stage) struggling to sing with a mask over their face, to hear of young children unable to see their teacher's facial expressions, to hear teachers comment that they have never seen their students' faces, to hear my 4th grader relate how difficult it was to breathe in PE class on any given day, and to see the child at our elementary book fair struggling to hold his broken mask up over his face while also holding an armful of books! I personally know several kids who have unenrolled from public school because they're having emotional breakdowns over masking and distancing requirements. It is past time to abolish this temporary mask mandate in favor of our kids' mental health.

Additionally, I urge you to oppose a Covid-19 vaccine mandate in our schools. My husband and I have chosen to be vaccinated and I am grateful that we had this choice. But we have not had our children vaccinated and are strongly against being forced to do so. Unlike the "regular" childhood vaccinations, the Covid-19 vaccine does not prevent disease, and was particularly ineffective against Omicron. There is currently no published literature on pediatric Covid-19 vaccine effectiveness in K-12 school settings and it makes no logical sense to require this vaccine in a population that, in general, experiences mild symptoms and recovers quickly. This choice must remain in the families' hands, as they know their health the best and are able to weigh the risks and make decisions accordingly.

Thank you for your consideration.

Subject: COVID vaccine shots for school students

External Email

Good Morning! It has been brought to my attention that the BOH is going to consider mandatory vaccine shots for school children. Let's be real, we all know this is unconstitutional. You cannot force vaccinate anyone here in the USA. Per the US Constitution, our rights are given to us by GOD, not man. So you don't have the authority to dictate such nonsense.

As we have seen over the past two years, the so-called "vaccines" do not work. All the people around us that are vaccinated are getting Covid and passing it around to each other. These are personal friends, people that I know that are vaccinated that have had Covid 2-3 times EACH.

Most of the world is dropping the vaccine mandates and passports because they serve no purpose. The CDC has stated "on the record" in Congressional hearings, that the vaccinated can get, carry, and transmit the Covid virus. So WHY is the BOH even considering the mandatory vaccination of students, who for the most part, are not affected by Covid. Children ages 0-18 have a 99.998% survival rate if they get Covid. Most are asymptomatic, with or without the so-called 'vaccine'. Worse case scenario, they get mild flu like symptoms.

My three daughters and I got Covid back in September 2020 before Vaccines were available. We had mild flu-like symptoms or were asymptomatic. So we have NATURAL IMMUNITY. My wife caught Covid in December 2021. We slept in the same bed while she was most contagious and I took care of my wife while she had Covid. Guess what, I didn't get Covid again, unlike my vaccinated counterparts. Hmmm.....that should tell you something. No one else in our household got Covid from my wife because we have NATURAL IMMUNITY.

Therefore, we would ask politely that you use common sense and not even consider mandatory vaccinations for students or children of any age in WA State or anywhere in the country. The science and the CDC have clearly stated that it isn't necessary.

The CDC has stated ON THE CONGRESSIONAL RECORD, under oath, that the vaccines do not stop the spread of Covid as vaccinated people can still get, carry, and transmit COVID.

Thank you for your cooperation.

Dear Washington Board of Health:

I OPPOSE requiring school aged children to have Covid "vaccinations" in order to attend school. Where is the data to indicate our children should get the shots? I see no data to indicate children are at high risk from Covid.

School enrollment is down. Do you wish for it to go down further?

Please VOTE NO.

Sincerely,

Karen Bliss

To whom it may concern,
As a citizen of Washington, a parent, and educator, and a union family member- I strongly urge you to NOT require vaccinate mandates on children and students for public education. We will not sit and watch Jay Inslee's tyrannical orders of trial vaccines injected in our youth, given the vaccine injuries that are currently documented and being gathered for further action against pharmaceutical companies.
Say NO to vaccine mandates.
Sincerely,
Claudia H.

I do not support this idea. I will not force my child to get a vaccine that can potentially hurt him further down the road. Until there are 10 users of data behind a vaccine, I will not force my child to receive a jab for an outdated strain of an evolving flu. Please do not proceed with this detrimental vaccine mandate.

Subject: Vaccines DO NOT reduce transmission in households

External Email

To TAG and BOH:

Like you, I can cherry pick research. So here's an article of a study that suggests the "vaccine" is NOT effective in reducing transmission within households.

What I can't wrap my mind around is why are most of you so intent on stopping a virus through the use of an unproven, statistically proven to be deadly "vaccine"? Especially the Pfizer vaccines, which are the most deadly statistically than any other. The SARS COVID virus has mutated into nothing more than a common cold which, if allowed, will turn the pandemic into an endemic. Please...back out of this narrative of vaccine only. Therapeutics are proven to work. Ask yourselves why Fauci has blocked the therapeutics and then do your research by following the money. To approve this to be given to our children is insane, diabolical and horrific in its potential ramifications. To wait until more research is available proving there is no LONG TERM danger to children is the much more wise course of action.

Subject: Covid-19 children vaccine

External Email

Good day,
I am a 38 year resident of Kitsap county, wife and mother of two children. I believe it should be optional for this inoculation that is being discussed currently as a covid-19 vaccine.

I have a few questions about the vaccine getting added to the vaccine schedule for children.

Since these injections are EUA, does that mean that there is no liability of manufacturers if there is an adverse reaction?

What is the history of other vaccines that are on the current vaccine schedule prior to them being officially assigned to the current schedule?

As far as trials go, what were the adverse reactions reported for what is under consideration to mandate?

What are the long term adverse reactions? What is considered long term? Myocarditis? Infertility?

Are these risks outweighing benefit?

Children have a survival of 99%, so why put this inside their bodies to stimulate risk?

What happened to optional? Like flu vaccine being optional? The variant will change consistently like flu virus, so the vaccine would change consistently like a flu shot?

The poor kids say 'oh I want the vaccine but my mommy wont let me because she is afraid.' Lets remember they are children. Innocent, impressionable children. As parents we are here to nurish and protect them from harm. Because the survival rate of children from covid is so high, why are we pushing this?

Lets end the coercion. These children just want the fiasco to end! We as their parents are using our critical thinking skills before rushing into such a new 'vaccine'. We know by choosing to be inoculated, it is irreversible. You can not undo this choice once made.

Here is a link to a testimony from a parent of a 12 year old who participated in the Pfizer COVID-19 trial. Please watch.

https://youtu.be/L2GKPYzL_JQ

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fyoutu.be%2FL2GKPYzL_JQ&data=

Please watch this link as well, it is another video with a panel of covid-19 vaccine injured people presented by senator Ron Johnson.

<https://youtu.be/6mxqC9SiRh8>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fyoutu.be%2F6mxqC9SiRh8&data=>

The following link is virology data on the injections under discussion. I recommend visiting and reading it thoroughly.

[https://www.cell.com/cell/fulltext/S0092-8674\(22\)00076-9](https://www.cell.com/cell/fulltext/S0092-8674(22)00076-9)
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cell.com%2Fcell%2Ffulltext%2F00076-9&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C52dde13b303141f9a07c08d9edaa566c%7C11d0e21726>>

Please consider this inoculation to be optional to all of those who reside in Washington state. Looking at the USA in its entirety, 2 out of 50 states have implemented it as mandatory. This is equivalent to 4% of the USA. That is not the popular choice, obviously. Please listen to the community and what they are asking for. We are asking for freedom of choice in regards to the covid 19 inoculation.

Thank you so much for your time. I appreciate you. May God bless you and your family.

Respectfully,
Christina Thacker

To Whom it may concern:

I am curious where all of the people who showed information slides today get their data? There was a lot of out dated information that I saw and seems really to be one sided, towards the vaccine it really isn't a bias information and it also has no information on any studies that have also come from the CDC even on natural immunity. I am curious why you would want to subject our kids to these experimental drugs that we have no idea of the outcome of their future by giving them these gene editing shots when you have no studies of the long term effects it will have on them or their futures. To subject our little kids to be experiments to see what the outcomes/results will be is insanity. How can you even live with this? It is crimes against humanity- these shots were not even tested on animals and the ones that were the animals ALL died- where are those studies in your information? Do you not see even the CDC data on their % of recovery rate on if they even get COVID? Do you not have any peer review studies on Covid and the vaccines? Seems there were a lot of "not peer reviewed" information that was provided. I'm curious.

Have you looked at all the side effects from these shots vs the side effects from other vaccines like polo or even MMR? Conspired that information? These shots have had higher side effects and deaths than any others that have been around for years. Please consider looking further for more information- studies coming from other countries and even what the CDC has recently published.

Please I beg you to oppose this, or I can say there will be numerous kids pulled from schools and put into home schooling leaving hundreds of districts with low student count- then some will lose their funding etc. there are going to be some pretty upset parents who will have to leave their jobs to stay home to educate their children.

Thanks,
Carri Coe

I am writing in regards to the potential of a vaccine mandate for schools. I cannot even believe that this is a possibility at this time. In speaking with my experience working in the cardiac field at a local hospital and speaking with my kids' pediatrician, this is absolutely not safe. At work I have dealt with a concerning amount of heart attacks and heart failure being diagnosed in young people. Oddly enough, a large percentage occurred within a few weeks of a covid vaccine. One of them resulting in the need for a transplant. Don't tell me it's coincidental. After 22 years, I know how to spot a coincidence.

When it comes to drugs trials, there is usually extensive research and years of long term studies. I asked 2 different pediatricians if there were any potential for long term issues and both of them responded with 'I really have no clue.'

I promise you, that if a vaccine is required for school, there will be no more public school. I don't know of one person that will allow that stuff to be pumped in their child.

Subject: Public Comments for WSBOH Members from March EH Committee Special Meeting

External Email

I wanted to make mention about the current board review, considering mandating covid 19 vaccine for students in WA state.

Recently you sent out a survey asking the public to place their opinion on this matter, however as a wife of a teacher, I know that this survey was sent directly to teachers first. The teachers were then asked to share with friends if they so choose.

By time many parents went to fill out the survey they survey was closed and had received max limit on comments. My only thought is how many teachers in favor of mandating the vaccine first did the survey using the max limit responses.

I believe this data you have collected would be screwed and should be resubmitted to parents only, in order to get a clear opinion of the public.

Thank you for your time and I hope you would reconsider resending this survey to parents only.

Subject: COVID 19 vaccine requirement

External Email

Advisory Group,

Comments regarding the advisory meeting on 2-14-22 addressing the agenda items #5 & #6:

#5 The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population.

#6 Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting or activity being given the highest priority.

There is not likely peer reviewed studies that support either of these statements as more incidences are reported on the CDC VAERS website and other world forums. Children have a 99.98% they survive the COVID 19 per the CDC.

It doesn't reduce transmission. There are no peer reviewed studies that show children are vectors of transmission.

We don't know long term damage the shot may have, but based on what we already see it will not be good for the health of our precious children.

I urge the advisory team, in an abundance of caution, to NOT recommend this fundamentally experimental shot be required for children to attend school.

Sincerely,
Robin King

Subject: Response to TAG meeting presentations Feb 10

External Email

Dear Board and TAG members,
I attended the meeting on Feb 10th and had some comments to make on a few of the presentations. I hope that the messages, like this and others, that are being sent to the WA State Board of Health are being shared with the TAG members. If not, that is extremely deceptive and ineffective way for the public to have the opportunity to provide public comment on this very important topic. So please share with the TAG members.

From Eric Lofgren's presentation:

- reports and graphs of "cases" and hospitalizations don't differentiate between symptomatic and asymptomatic events.
- a large percent of cases even in the hospital are discovered after a child is admitted for a entirely unrelated reason (illness or injury). This has been happening since the onset of the pandemic and is now finally being noted by government officials. Making this distinction is essential if the numbers are to mean anything.

- Early treatment for covid 19 exists that works to reduce hospitalizations and severity of disease. Vaccination is not the only option. There are also treatments that are not being used in hospitals that are effective. In contrast, some currently accepted treatments/medicines are known to be toxic--example Remdesivir causes kidney failure in 50% of patients and was removed as a possible treatment during Ebola medicine trials due to it causing increased deaths. It is also not particularly effective at treating covid19.

- the current vaccines don't work against Omicron, any help it has is short lived (waned within 3-6 months). Boosters increase the risk of adverse reactions to the vaccines themselves and are also not realistic to require or to get (adult or especially children) ever 3-6 months.

- a recent study found mRNA present in lymph nodes 60 days after injection. Spike protein and nanolipid particles are also found in the blood stream (they do not stay local in the injection site). Once in the blood they can travel anywhere in the body, and cross the blood brain barrier. They accumulate in organs especially in the ovaries, testes, adrenals, and have been found in germinal cells responsible for generating an immune response. The long term consequences of these findings are completely unknown.

- Immune system is effected by these vaccines and it has been noted that there's a reduction in N cells which confer broader immunity than S cells that only target the spike.

- Pfizer's clinical data (and other studies) have shown that there is an elevated risk of illness after COVID infection, but also an elevated risk which is even greater after vaccination.

- Long term risks to children are completely unknown. The clinical trials were only 2 months long and one group was only followed up for 17 days! Short and especially long term impact to the cardiovascular, reproductive and nervous, and immune system health of children is completely unknown.

- Myocarditis (the one documented and discussed adverse risk associated with these

vaccines) is scarring of the heart. Even if most cases have "recovered", the long term outcome is unknown and there is no such thing as "mild" myocarditis (damage to your heart). One slide stated 56-69 cases of myocarditis (associated with vaccination) in males would occur to prevent 2 deaths from covid. Since the long term outcome is unknown and may lead to death that seems a large number, in my opinion.

-The FDA used modeling to evaluate risk in this population. It is known that modeling is very low on the scale of research quality (as compared to a double blind RCT that is the gold standard).

-There is evidence that the vaccines are actually causing increased viral mutations, to evade the vaccines, since vaccination does not stop the spread. Naturally viruses mutate themselves into extinction, but with mass vaccination during a pandemic, it may make the virus more transmissible and more deadly, instead of the reverse.

Bottom line is the vaccines do not prevent infection or transmission, so how can they be justifiably mandated on a population who is minimally at risk for severe outcomes from infection but has real and unknown risks to vaccination?

Response to Presentation by Steve Lim----

-There is no data on this specific population with the current variant, so it is foolish to make assumptions in order to make very important and far reaching decisions. (when you assume you make an ASS out of U and ME, and frankly that's not science). Effectiveness wanes over time (to approximately 50% by 6 months, and less than that with more time); 50% is the minimal threshold allowable by the FDA.

-Boosters increase antibodies in the short term, but also increase risk of severe adverse reactions (myocarditis and other SAE) from vaccination, especially in males. Also continually boosting the immune system leads to immune overactivity and depletion, eventually leading to immune deficiency. Not a good long term solution.

-After vaccination there is:

--evidence of reduced N cells and T8 cells

--evidence of enhanced antibody dependent (ADE) infection

--evidence of original antigenic sin where your immune response if you get infected is in response to the first virus that you saw (the vaccine in this case) not in response to the virus which is currently infecting you (the new variant)

--evidence of increased cancer, autoimmune diseases, cardiovascular and thrombotic events

-Ability to protect against infection is very limited, depends on many variables which are unknown and also constantly changing (example, continually mutating virus). Effectiveness will vary based on which variant is dominant, which variant the vaccine was developed for, etc. Again mandating injecting something whose effectiveness is completely variable based on uncontrollable and constantly changing factors is not prudent, especially considering there are real and unknown risks associated with that injection.

-Durability of immunity after infection versus after vaccination: Dr Lim stated that natural immunity wanes similarly to the best vaccine we have (Moderna), That is false. There are studies showing natural immunity is still high 20 months after infection. We do not have data beyond that , but looking at other viruses you can delineate that natural immunity is longer lasting than vaccine induced immunity. And it is sterilizing to the virus.

-He also states that the combination of natural immunity with addition of vaccine immunity is best, whereas there is evidence that vaccination after natural infection results in increased risk of adverse reactions. Even if there has been shown to be a benefit to vaccination after natural recovery, there is no evidence available that this is true with Omicron, which is less responsive to the current vaccines.

-Basing decisions of mandating a vaccine on children based on computer models is not good science as modeling is a very poor form of research/evidence quality.

--what is an "acceptable level" of adverse reactions (myocarditis and other) after vaccination? Especially considering the level of injury/death to this population from natural infection is still very low despite the increase positive PCR "cases"

-Not providing translation of spanish to english during question period left some audience members (like me) unable to follow the question/answer which could have been informative.

Response to Lora Davis presentation-----

-Vaccinated group" is defined as 2 weeks after second injection. those 2 weeks show increased rates of infection to COVID19 and other illnesses, as well as increased rate of adverse reactions (leading to hospitalization) from vaccination during this 2 week window. These people are categorized as "unvaccinated" for anything that happens to them in this 2 critical 2 week window (even though they have actually already received the injection and therefore are indeed vaccinated). This SEVERELY skews all data and graphs and when people and events are categorized this way the result is completely meaningless in understanding the differences between vaccinated and unvaccinated.

-Also "cases" don't differentiate between a positive PCR test and a symptomatic infection ,much less differentiate between mild, moderate or severe infection. Statistics that show hospitalizations don't differentiate between people hospitalized because they have severe covid, and those who received a positive PCR test after admission to the hospital for a different and unrelated reason (this later number has been shown to be near 50% of hospitalizations in places such as NYC and NJ).

-combine these confounding ways of presenting data and the graphs and numbers are less than representative of reality and therefore not good for basing very critical decisions on.....

Response to Presentation by Chas Debolt-----

-Prevalence of infection or hospitalization data is skewed when vaccinated are not categorized as vaccinated until 2 weeks after their second injection (see above), and are categorized as unvaccinated during that time

--infections and adverse reactions to vaccination are higher during this 2 week period, thus inflating numbers of unvaccinated ands skewing the data we are looking at to make important decisions.....

-Statement "unvaccinated are more likely to transmit virus before symptom onset"

--if vaccinated can infect equally to unvaccinated with equivalent viral load when symptomatic it is possible, even probable, that an asymptomatic but vaccinated person is MORE likely to go to school or work while infected because they have milder to no symptoms; whereas an unvaccinated person would stay home because they felt symptoms.

-Vaccination will not stop transmission in schools if it does not stop it in other congregate settings. There are many more examples of studies where highly vaccinated populations demonstrate high evidence of "breakthrough" infections. Infact, research from a Harvard Center for Population and Development Studies shows "increases in COVID-19 are unrelated to level of vaccination across 68 countries and 2,947 counties in the United States." Research found that "countries with a higher percentage of the population fully vaccinated have higher COVID 19 cases per 1 million people."

In the BOH discussion someone stated that "it seems clear that vaccination reduces person to person transmission" (criteria 6). Have you seen video footage of CDC director explicitly stating "the vaccines do not prevent transmission"?

-Someone also said they were not designed to prevent infection or transmission, but only to reduce severity of symptoms. This is false, They have changed their statements regarding efficacy as the vaccines were shown to no longer be working and to be allowing transmission between people. Or have forgotten the zero covid goal? The goal to vaccinate the whole population and achieve herd immunity? you cannot do this with a vaccine that does not prevent infection or transmission. THAT WAS THEIR GOAL, and it failed.

Changing the name of the game doesn't change the game. These vaccines are more risky for children than the virus is. End of Story

Thank you for considering all of these points as you deliberate on this very important topic,

-Tera Tagliabue

All corrupted individuals,

Still trying to find out when this power grab for mask mandates is going to be lifted for schools.

When will Washington state wake up to the fact that they are useless and have not been needed for over 2 years for school-age children?

We will be removing our children from the schools within the coming month as we will be relocating to another state that doesn't have these tyrannical rules.

Odds are, no one on Washington can/wants to make a decision including the Sec of Health so the forced masking will probably be around every fall/winter forever.

Have a wonderful day/week/month/year of more mandates!

Good riddance. Bye.

Educators,

DOH is useless and has been since the start of this plandemic. Still trying to control a virus that is still out of control. They hopefully realize this fact.

Now, after the turn of the new year, would like to get updated guidance as to the unconstitutional/forced masking policies that you are trying to enforce. Stop this nonsense. I'll ask the simple question once again to hopefully get some answers.

- What is Washington's plan/goal as to when masks can be recommended/optional for children while at school? (Currently, mask up until we say so...)

Is anyone going to respond to my queries? Now with omicron/xi, the studies are now pointing to the uselessness of cloth masks. WSJ LINK
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.wsj.com%2Farticles%2Fcloth-masks-are-useless-when-omicron-xi-is-the-new-normal>

One more item to bring back up as you clearly haven't understood it the first time:

"If masks, mandates & lockdowns work, why aren't they working?"

Clearly you all have some deprogramming that needs to be done. Hope for some answers this year...

Currently preparing on moving our family out of state. I hope you finally get the message as more people leave this 'power-hungry' dem-led state.

Happy New Year to more restrictions! Hmm, maybe you should bring schools back to online-only. Still, no plans...

Josh Daugherty

DO NOT COMPLY.

Week 15, then already Winter/Christmas break,

Still no constructive, healthy dialogue on this question.

- What is Washington's plan/goal as to when masks can be recommended/optional for children while at school? (Currently, mask up until we say so...)

As all addressed on this continue to be complicit with 'policy', I propose in 2022, new year, new rules. Masks = Recommended for all, not mandated. I will not comply with your demands. At least begin a phased approach to mirror the restaurant half-assed policy of wearing masks walking around in the restaurant, but then when you sit down, you may take them off. Our children deserve better. Please share your thoughts on this, as you clearly do not have any other ideas. Since the beginning of the school year, you've been shrugging my concerns off or ignoring this altogether. Great job, now I'm starting to adopt some of these ideas, to ignore/disregard any & all communication coming down concerning force masking, vaccinations, etc.

You do not have control over what I do, what I wear, how I live. Our children wear the minimal 'protection' to abide by mandates only to 'not get in trouble'. They can also see that this is all theater and wearing masks for 'show' under the guise of 'keeping everyone safe'. My underlying question all along has been, who is 'dangerous'? Certainly not our children as they have a larger chance of dying from the flu or common cold than covid. Covid is weak when it comes to them. Stop with this nonsense.

If WA DOH were TRULY trying to keep everyone 'safe' against a virus that only negatively impacts a very small portion of the public, they've been doing a BAD job at that. According to the DOH website, and due to the fact that 9,554 individuals have lost their lives to this. A whopping 1.2% of the WA population. A large majority of those are in the at risk age group and those that have had multiple health issues already. You've been failing since the beginning, and every death (including those hidden from view attributed to depression/suicide) is on you.

<PastedGraphic-2.tiff>

What I am finding even more surprising, the fact that you are pressing forward with 5-11 year old vaccinations and I highly doubt that many children in the state are medically 'at-risk' for this emergency use authorization. Shame on you all.

<PastedGraphic-3.tiff>

Additional facts to consider:

- 1) We've had viral illnesses for every single year of human history.
- 2) Covid has ~same fatality rate as a flu.
- 3) We've managed to live like normal humans until 2020.

Why are we still obsessed with covid?

Have a wonderful week and a happy holiday season,

Josh Daugherty

On Dec 7, 2021, at 6:41 AM, Joshua Daugherty
<joshua.daugherty.wa@gmail.com <mailto:joshua.daugherty.wa@gmail.com> > wrote:

To whom this may concern,

Is it already week 14? How can this be where the WA DOH only has the plan to see force masking our children until they say so? I believe this will fall on deaf ears as many of you are still complicit with this madness, but I will not comply.

All I'm requesting is to change from 'mandate' to 'recommended'. That would allow parents to make up their own minds as to mask their children or not. I can already expect that when masking eventually ends, common cold & flu cases will go up as masks prevent us from building our immunity to anything.

I will ask again:

- What is Washington's plan/goal as to when masks can be recommended/optional for children while at school?

Let the children breathe. If parents are still scared for the .000007% chance that their child may be adversely affected by this virus, they can add

masks if they choose. This needs to be a choice. I see that the DOH hasn't updated their page since 29 November 2021 which shows me they still have no plan. Or have you realized that you are probably getting to the end of mass vaccines? The rest of WA will not do what you tell them. Give up. Will not get to 100% vaccinated, but that still isn't the plan, right?

I would like to also point out a quick observation that Ohio Rep Jim Jordan had mentioned recently:

Summary: If masks, mandates & lockdowns work, why aren't they working?

The 'health' community has been wrong at almost every step of the way since the beginning. Their plan seems to be: 'lets try this...what about this...next we should try this...'

Quite the 'science', hmmm. If you don't have a plan, just say it. Still advocating for my previous comment, begin with a phased approach like in restaurants. Our students can remove their masks while seated. What is so wrong about this?

I am still looking forward to our comments & replies with answers. Not more of the political jargon...it doesn't work anymore.

Awaiting solutions & dialogue,

Josh Daugherty

Surprise! I have received a response from last week's request from the DOH Information email. Still no answers (not a true surprise). I look forward to the weekly, one-way communication with all involved. No one seems to be doing anything to assist in this. I hold all accountable for this non-action.

Please see below for the thread from today preceded by my latest response.:

DOH Information,

This question was asked over a week ago and just now you are getting back to me. Bottom line: My question still isn't answered. You really need to update your sources as that CDC links were updated as of November 2020 & May 2021. That is between 6 months and a year ago!

- What is Washington's plan/goal as to when masks can be recommended/optional for children while at school?

According to the WA DOH, covid doesn't spread in

restaurants while diners have meals, that can take off their masks then, why not our children while seated? I have no issues with parents who wish to have their child masked all day, just do not force it on all of our children. Statistically speaking, our children have more of a risk of adverse problems with the flu and the common cold than they do against covid. No one mentioned prior to 2019/2020 wearing masks for any flu seasons. Odds are the common cold & flu cases will spike once our kids remove their masks as they all have been weakening their immune systems with this forced masking.

As of yesterday, the WA DOH covid page shows vaccination stats. I am asking the WA DOH to come up with a % as to how many people need to get vaccinated against this useless virus that only hurts the weakest in the population (immunocompromised). I guarantee that we will not get to 100%, probably never 90% but how long do we need to continue this nonsense? What is the plan? I will say this again: IF YOU FAIL TO PLAN, THEN YOU PLAN TO FAIL.

<PastedGraphic-1.png>

I look forward to your reply with answers and or a plan. Maybe begin a 'phased approach' that was tried to reopen after the government shut all the small businesses at the beginning. Quite the asinine approach at that but we at least tried that.

NOVEMBER REQUEST

RESPONSE FROM DOH PA THIS MORNING TO MY 23

Hello,

Thank you for contacting the Department of Health.

DOH disease experts continue to monitor COVID-19 infection, hospitalization, death rates and health system capacity closely. While disease rates are declining, they remain high and hospital occupancy is still over 90 percent. We feel cautiously optimistic now that kids age 5 and older are eligible for the vaccine; however, the majority of children are still not vaccinated. We need to continue to do everything we can to prevent the spread of COVID-19, especially in light of the highly contagious Delta variant. As we head into winter and the holiday season, when the number of social get-togethers and indoor gatherings increase, a combination of masks and vaccines remain the best tools we have available to ensure that kids stay healthy and businesses and schools stay open.

You may view the studies below about the reduction in virus transmission and mask use:

Contacts,

Here we are at week 13, still no plan for children, the HEALTHIEST of us all, to have masks optional in school.

I will try to ask the question again, expecting someone to give any answers to the question:

- What is Washington's plan as to when masks can be recommended/optional for children while at school?

"Until we say so..." isn't science. Show me the proof that kids are dropping like flies while at school. I will restate my previous comment, our kids are much healthier and can fight off any common cold & flu (read covid) much quicker than any of us. Why is the state still providing the useless nonsense direction as to 'keep everyone safe' and 'keep masking up until we say so'.

If you are awaiting 100% covid vaccinations, even for VAST majority of children that do NOT need it, we will not reach that goal. But it seems like the DOH still doesn't have a plan...

Not to mention, no one is keeping the conversation open except for parents, so everyone else in this chain is being complicit with these mandates.

I believe I've said it before, but this sounds a lot like when I was growing up, if someone told you to jump off a bridge, many of you would. Sorry to disappoint but I think for myself and will not jump.

Still frustrated and I will talk to you again next week! Parental choice should be part of this conversation. If masks work, then let those that continue to wear them, and be afraid of this virus continue. I will not comply.

Washington State Board of Health,

12 weeks and still no answers from anyone as to what the plan is concerning the forced masking of our children at school. Here is the question, should be simple and to the point:

- What is Washington's plan/goal as to when masks can be recommended/optional for children while at school?

Wear masks until we say so... isn't rooted in any science that I know of. Our children already have a much lower chance of health issues even if they contract Covid. I will reiterate my previous request: "mirror the restaurant policy" so that when our children are seated at their desk in the classroom, they may take off their masks. If some children still feel scared to take their masks off, they may keep them on. This should still be about choice of the parents/students. With these false-

rooted mandates, they aren't allowing us freedom of choice.

I look forward to your comments/dialogue concerning this topic. If you will not help, then step aside as your inaction shows just how deeply you care about the health of my children.

Josh Daugherty

Just in case you missed it, here's some educational reading when it comes to our children.

Washington State Board of Health,

Still awaiting an answer to my queries below. Here we are, 11 weeks into the school year and it's still the same: "do it until we say so...". If you fail to PLAN, you plan to FAIL. I see a lot of failing by those in all positions of 'office'.

I've been contacting the WA DOH without answers every week, including Cc'ing our non-action school district, principals etc. No one will assist with speaking to anyone that may have any indication as to how long should we expect to force-mask our children at school. This virus is NOT a threat to our children, as it is comparable to the flu or the common cold. They are healthy.

Would like to at least begin some conversation with relaxing these 'mandates' to at least mirror restaurants in the area. If the children are seated, they should be able to remove these face diapers. Not to mention, cloth masks don't do anything for Covid particles. This continues to show this is all for 'show'. I will not participate.

If parents still wish to mask their child, feel free to. They should have the choice.

Still a frustrated parent,

Josh Daugherty

If you would like further information, please look at the following website. I am also open to conversation.

<https://www.unmaskourkidswa.com/>

<mailto:WSBOH@sboh.wa.gov>
Subject: Revise mask mandates for children schools

□WBoard of Health,

To date, I have been requesting updates for the
forced masking in schools:

10 weeks, still nothing from the state...

How much longer to force mask our children? We
should have a choice on whether to mask or not.

I just want to know what the goal is of the force
masking! "Until we say so..." isn't ANYTHING near common sense or science.

Don't you dare start with the force vaccinations for
our children when only about .000003% may even need it.

Answers requested as to what the education plan is. I
will continue to request weekly updates until a plan shows an end in sight. Just because
"we said so" isn't right.

Maybe as a start. We could mirror the restaurant
policy where if you are seated, you may take off your mask. I understand keeping

children safe, but they are not in danger. If children want to continue to mask up, please have them continue. If children do not want to wear a mask, they shouldn't need to.

Where is the proof that children are all infected?

Irritated parent,
Joshua Daugherty

☐

Week 9,

Still nothing. Exactly what I expect from this school district and even nothing from the DOH. My concern/question is:

What is the end goal? How long do our kids need to be masked in school?

they say so. So WRONG! So far WA DOH is basically saying to wear them until

72.5% fully vaccinated. As of today in WA, 78.6% 12+ has one dose and

85.6% in King County.

I've been requesting information from the schools, district and the DOH with no answers. How does anyone think this is the 'correct' way?

Going back to when I was young, if someone told you to jump off a bridge, would you? Too many people are just following the 'guidance' whether it makes sense or not, without question.

Just asking for the choice. Our kids should have a choice. Currently they are being taught that everyone is infected. If you want to still mask up, feel free to.

Don't you dare agree with vaccine mandates!

Unbelievable poor management at all levels. Will continue until I receive dialogue. This is now my 9th week of requesting answers.

Joshua Daugherty

<joshua.daugherty.WA@gmail.com <mailto:joshua.daugherty.WA@gmail.com> > wrote:

☐ Still waiting any information from the WA DOH.
Nothing yet and we are only 8 weeks into this. I know that many of you don't care about the safety of my child, as you just follow the same guidance pushed from 'above', without questions. This is WRONG.

From today to the WA DOH:

Another week, more nonsense. I have been requesting follow-ups to my questions and nothing has been done. Every week I am asking the same, MAIN question.

- What is WA state's end goal when it comes to children's force masking policies?

If there is no plan, then you plan to fail. This has been the case since the 'pandemic' began. The science doesn't back the policy of 'wear a mask until we say so...' I need additional information as this is WRONG and many know it. I would like to have a constructive dialogue with someone that can say when our children can opt into masks or not at school. Again, if parents choose to mask their kids, it is their choice. Please let me know what the plan is beyond, 'wear them until we say so.'

Still no answers,
Josh Daugherty

<joshua.daugherty.wa@gmail.com <mailto:joshua.daugherty.wa@gmail.com> > wrote:

Week 6,

Still trying to find out the following:

- How long do our children need to be force masked?
What is the end goal to go back to breathing fresh air?

Freedom, this is still America. If you want to stay masked, fine. Do not force it on us. Under the guise of 'public safety', keep wearing masks to 'protect everyone'. That infers that my kids are dangerous! DOH WA needs to let us know the plan, we must demand that from them, 'until we say so' is NOT science.

Oh, and mandate doesn't equal law.

So glad I'm actively teaching my children & family CRITICAL THINKING. Something that the Gov, DOH, School districts, etc have no idea what it is. Just mandate compliance. Basically continuing a 'shut up and color' attitude. We know who is at fault. Just because it's 'popular', doesn't mean that it's right. If this continues to go on for an extended period of time, expect more pushback.

Just asking to give us the choice. Why is this so hard for you to comprehend? Maybe we start dictating what you need to wear and how you need to act.

Such a relevant article to this:
<https://notthebee.com/article/covid-theater-a-personal-tale-about-the-gaslighting-of-a-nation-and-its-schoolchildren>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fnotthebee.com%2Farticle%2Fcovid-theater-a-personal-tale-about-the-gaslighting-of-a-nation-and-its-schoolchildren&data=04%7C01%7CWSBOH%40sboh.wa.gov%7Cff1bef669d3c4835bcd908d9ebf52cd3%7C>>

Looking forward to continued dialogue as to the end of these unconstitutional mandates.

Still frustrated,
Josh Daugherty

Awaiting DOH responses too.

□

Week 4,

Fourth request for information:

When is the mask mandate for schools going to end? I've requested info from DOH as they need to answer to my requests. They have not and I will continue to request weekly from the DOH and the district on down to our schools. They do not stop the virus from being passed. It is just for show/theater. Otherwise the wording in the 'order' wouldn't be 'anything'.

"A cloth face covering is anything that completely covers the mouth and nose and fits securely on the sides of the face and under the chin."

It may have plenty of holes throughout the mask. This further proves that DOH doesn't care about the transmission of the virus. Just to mandate the "do it or else".

Enough of this nonsense. I'm just trying to communicate with someone other than just a 'Customer Service Specialist' that is just passing junk back. Awaiting the constructive dialogue.

Continuing on my requests for common sense and/or parent choice for masks in schools. Mandates are just asking for push back. I will continue to push back.

Josh Daugherty

<joshua.daugherty.WA@gmail.com <mailto:joshua.daugherty.WA@gmail.com> > wrote:

□ WeeB,

Finally received an email back from WA DOH with more of the same, no answers to my questions. My main question will continue until I receive answers instead of just a 'Customer Service Specialist' responding to my web query with a loosely prepared, blanket statement, that mentions 'keeping the CDC recommendations as of August 5, 2021'.

My question seems to be simple, straightforward and to the point.

- What is Washington's plan/goal concerning the mask mandates for school-age children? There needs to be a plan besides 'wear the mask because I said so'. (aka mandate)

If they were going with the CDC recommendations, forced masking wouldn't be in our schools.

I am requesting that they at least update the guidance to 'recommended' as the current failed 'plans' make zero sense. There is NO scientific data that has been collected to warrant this abuse across the board. Especially state-wide. As of 13 September, posted on the WA DOH website it shows that 75.1% of residents have at least one dose and 68.1% are FULLY vaccinated against COVID. Of that, King County has vaccination rates of 77.7% (12+). Auburn School District is in King County.

<PastedGraphic-1.png>

The hospitalization rate for those that are school-age is so minuscule, the data you have been collecting doesn't make sense to continue with the mask mandates. How much longer do we need to live under this authoritarian 'leadership' (aka mismanagement) of state resources? I will add to this as we have already received communication from the schools that COVID/common cold/sniffles/flu has popped up in school.

Looking at anyone that I've communicated with concerning this. Fail to plan, plan to fail... Seems spot-on for this situation that we are in!

<https://www.unmaskourkidswa.com>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.unmaskourkidswa.com%2F8>

All I am asking is that we give parents the CHOICE whether to mask/unmask our children.

Looking forward to future constructive dialogue,
Josh Daugherty

Week 2 of the insanity continues,

I have been trying to communicate with the WA DOH, and I am still awaiting their responses and/or dialogue of any kind showing this fake-science behind their blind mandates.

This is no longer about the safety of students and staff members. Masks are turning out to become a direct contributor of learning issues, social interaction struggles, increased headaches, anxiety & overall discomforts. As a parent, I am still disturbed to see our children treated this way. Totally unnecessary.

Please assist in communication with the WA DOH in changing this to 'recommended', not mandated for all. I will not comply if I visit the schools or the district.

Still a concerned parent,
Josh Daugherty

On Sep 8, 2021, at 8:23 PM, Joshua Daugherty
<joshua.daugherty.wa@gmail.com <mailto:joshua.daugherty.wa@gmail.com> > wrote:

That is what I have been doing and they continually give me the run around with 'that is the way it is.' Not acceptable, hence the 'because I said so' attitude. Is there nothing that the Districts can assist with?

I have reached out to them, and will continue to do so until something is modified, or at least a goal set for when we can return to normal. Actual normal, without face masks on our kids if we, as parents choose. We have had it with these non-science mandates and will continually be pushing back against them.

So glad to hear that the crooked DOH & schools have finally wised up and allowed our kids to play outside, WITHOUT masks. So idiotic from last year while being in-person that they needed masks outside at recess.

Still concerned,
Josh Daugherty

On Sep 8, 2021, at 1:45 PM, Spicciati, Alan
<aspicciati@auburn.wednet.edu <mailto:aspicciati@auburn.wednet.edu> > wrote:

Hello Mr. Daugherty,

You won't be surprised for me to write that masks are a mandate from the Washington State Department of Health. Statewide elected officials have been clear that local districts do not have the authority to lift the mask mandate. The state's focus this year, as is ours, is keeping schools open for in-person learning. I recommend you contact the WA DOH with your concerns.

Alan Spicciati

Subject: On with the school year, more child abuse...

This email originated outside of the organization and contains a Web link or attachment. Please use caution. – ASD Tech

To whom this may concern.

What is Washington's plan/goal concerning the mask mandates for school-age children? Is there a plan besides wear them 'because I said so' (aka mandate)? I demand that you update the guidance to still allow for those children that are scared to get sick, wear them, but change the guidance to 'recommended', not mandatory. There is NO science data that has been collected to warrant this abuse across the board. Especially state-wide.

As of 7 September, posted on the WA DOH website it shows that 73.9% of residents have at least one dose and 67% are FULLY vaccinated against COVID. The hospitalization rate for those that are school-age is so minuscule, the data you have been collecting doesn't make sense to continue with the mask mandates.

How much longer do we need to live under this authoritarian 'leadership' (aka mismanagement) of state resources?

<https://www.unmaskourkidswa.com/>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.unmaskourkidswa.com%2F8>

All I am asking is that parents should have the
CHOICE whether to mask or unmask our children.

Thus far, I have spoken with the schools, school
district and even email coordination with DOH with nothing but passing me nonsense
with no proof that our kids are 'super-spreaders'... I look forward to your conversation on
this matter.

Concerned parent,
Josh Daugherty

Subject: Covid Vax 02/10/2022 Meeting. Do NOT approve it!

External Email

To the board members and members voting on item 5 and item 6 in February 10, 2022 meeting, I am here as a mother and representing the community of Lacey Washington.

You previously held a similar meeting where over 30,000 people sent emails or attended the zoom meeting. You heard our voices. We do NOT accept you making health decisions over us or our children.

We have provided you with studies and other sources of data that shows your agency is out of line and your decisions are political.

How dare you tell us to step aside and let the experts do their work?

We have seen your "science". I find it interesting that if we look directly at each hospital's Covid situation as far as ICU, general or death, your reports deviate quite a bit from theirs. It seems vaccinated are higher numbers than unvaccinated. Also, why are you including data from a year ago, when the virus has changed from delta to omicron as of December of 2021. Omicron is much less deadly so your statistics do not show current and real statistic for the variance we are dealing with.

We also now know that both vaccinated and unvaccinated spread and get Covid, at possibly a higher rate for the vaccinated. Have you done your due diligence and researched this number in this state?

And why are we relying on PCR Covid tests to build data, when FDA no longer find them reliable?

I do recommend that you attend Dr Malones seminar that is being held in Gig Harbor this month if you want to listen to experts.

He is far superior to any of you who call yourself experts. Look at his track record. In fact, I would love to see you having a panel discussion about vaccines with him. He can help you understand science.

Since your last public meeting, the world has changed. Millions of people are demonstrating against vaccine mandates and mask mandates all around the world. Convoy started in Canada and just today; Ontario declared removal of vaccine passport, and masks from children publicly and in school effective immediately.

Oregon is removing their mask mandate 3/31 or sooner.
California is planning to remove their mask mandates.

UK has removed their mandates.
Sweden has removed their mandates

These countries are currently planning or are in the midst of freedom convoys.
Remember eyes are on you, and the world will know that you went against freedom of

choice and they will know you forced children out of the school system. Because we will not comply.

While you are so concerned about the vaccine, you have forgotten about increased child and young adult suicide due to isolation, no school or on line schooling, mask cover, 6 feet distance to your friends, and loss of social life. You are not concerned about the mental health of Washington state citizens. Those who have lost their jobs in careers they were previously looked at as hero's. Some have 20+ years in the industry. Some are still paying of their school loan from a career that is now long gone.

You have not looked at the health of those businesses that had to close temporarily or completely during the lockdown. You are forcing business owners to implement vaccine passports, while they are loosing thousands of dollars monthly in revenue due to lost business. Divorces and mental health issues are over the roof. You do not care about health, it has been proven. Instead you take advise from a governor who had placed himself in forever emergency power, CDC and FDA, two organizations that are highly financially involved with Pfizer and Moderna. Did you notice the same people sit on both boards?

Over and over, in federal courts and supreme court it has been ruled that mandating vaccine is unconstitutional.

Here are some facts. I doubt you will read the links but you have been informed. This is my notice.

You are trying to mandate a drug that is not FDA approved to children. This is illegal:

Sweden's health department recommends children under 12 should not take the vaccine.

You giving yourself the "supreme right" to vote over the safety of our children is despicable. You are overstepping your authority by suggesting any medical advice for children that you have not medically evaluated as their physician, and so do the school boards and schools who enforce this requirement.

You MUST consider every student's medical needs. We the parents will make decisions relating to our children's health within our own families and with our own medical providers.

And for Masks:

Lots of studies on mask Effectiveness:

Further more, child abuse is illegal:

section 1. vaccine injury (who will be responsible for a vaccine injury of a child? and section D; forcing children to wear masks.

While most other states in this country has removed restrictions and mandates and their children's lives has gone back to normal, Washington state children are being raised in fear, and being forced to comply with government and health official's over reach.

Have you seen all the thousands of vaccine injuries and deaths to athletes around the world? You are public figures, the world will hold you accountable. It takes only 1 proven vaccine death to charge you for murder, just like what happened in UK and what ultimately caused the restrictions to be removed in UK.

Start working on the real issues of mental health issues caused by this governments overreach and agencies like yours who support them.

Sincerely,

I mother, aunt, friend and community volunteer that will take out their kids from the school system.

On Fri, Jan 7, 2022, 9:52 AM Lisette <caretorrescita10@gmail.com>
<mailto:caretorrescita10@gmail.com> > wrote:

Dear Board of Members,

No CDC guidelines, OSHA regulations or health officer order can suspend our rights. "We the People" and do not consent. We do not give you the authority to force any medical procedures on our children, elderly, or on any human being that does not choose of their own free will your offerings of "public health" in a vaccine trial.

Your chapter 246 - 100 and rule making petition for 246 -105 try to confuse, coerce, intimidate, threaten and harass us. This is called retaliation and discrimination, and that is against the law.

We have the right to determine what is the best for our families and what is done with our body and it doesn't matter whether the vaccine only has an "emergency authorization" or not.

The masks and the testing are also "emergency use authorization" but even if they weren't, we cannot be forced into complying. Only a licensed medical doctor can suggest a medical treatment such as a mask, covid testing or a vaccine. You or school administrator has no authority to do so.

We have the constitutionally-protected and GUARANTEED right to life and the right to determine what it's done to our body.

We are covered under ADA laws and our needs would have to be accommodated by law.

You are not a medical professional and, therefore, you are unlawfully practicing medicine by prescribing, recommending, and using coercion to insist on this experimental medical treatment.

Whereas:

1. The Nuremberg Code, codified into US Federal Law, prohibits forcing or coercing anyone, under any circumstances, to participate in a medical experiment; and the Code states "the voluntary consent of the human subject is absolutely essential."

2. Phase 3 clinical trials of COVID-19 vaccines are not yet completed. C4591007—the main clinical trial in children and young adults with BNT162b2—has an estimated completion date of May 5, 2026 and hence qualify as medical experiments. People taking these treatments are enrolled in clinical trials.

3. The vaccine formulation now being given to U.S. children aged 5-11 is NOT the same formulation used in the clinical trials, and NOT the same formulation that has been administered to all other age groups under EUA. So even when current ongoing clinical trials are complete, the results cannot be assumed to be relevant to the safety or effectiveness of the new formulation.

“The vaccine that is authorized for use in children 5 through 11 years of age includes the same mRNA and lipids but different inactive ingredients compared to the vaccine that has been used under EUA in individuals 12 years of age and older and that has been studied in clinical trials.” Source:

<https://www.fda.gov/media/153717/download>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F15371>

4. Most vaccines are trialed for at least 5-10 years and COVID-19 vaccines have been in trials for less than one year.

5. No previously attempted coronavirus vaccines (ie. MERS, SARS-1) has been approved for market, due to antibody-dependent enhancement resulting in severe illness and deaths in animal models. The participants in clinical trials involving children aged 5-11 received “two doses of 10 µg BNT162b2 or placebo (saline)”, not the new formulation.

Source: <https://www.fda.gov/media/153447/download>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F15344>

6. Numerous doctors, scientists and medical experts are issuing dire warnings about the short and long-term

effects of COVID-19 vaccines, including but not limited to death, infertility, miscarriages, Bell's palsy, blood clots,

cancer, inflammatory conditions, autoimmune disease, early-onset dementia, convulsions, anaphylaxis,

myocarditis, and antibody dependent enhancement leading to death. I have friends dealing with COVID-19 vaccine injuries.

7. Children and youth are at virtually no risk of dying from COVID-19 or transmitting it to others, but deaths and

injuries to children and youth have already occurred in the COVID-19 injection clinical trials.

8. FDA admits safety unknown. Children are being used as test subjects, with their parents acquiescing under fraudulent marketing pressure. Public Health messaging does not match the reality of the current knowledge base. At the October 26 VRBPAC meeting, FDA Advisor Dr. Eric Rubin admitted: “. . .but we’re never going to learn about how safe this vaccine is unless we start giving it.”

Source: @6:52:33

https://youtu.be/laaL0_xKmmA

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fyoutu.be%2FlaaL0_xKmmA&data:

9. International Alliance of Physicians and Medical Scientists has declared that children should be excluded from vaccine mandates:

"Consensus is clear among MDs and medical PhDs: following 20 months of exhaustive research, millions of patients treated, hundreds of clinical trials performed and scientific data shared worldwide, they conclude that healthy children and the COVID-recovered should be excluded from restrictions and vaccine mandates."

Source: <https://globalcovidsummit.org/news/thousands-of-physicians-and-scientists-reach-consensus-on-vaccinating-children-and-natural-immunity>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fglobalcovidsummit.org%2Fnews%2Fof-physicians-and-scientists-reach-consensus-on-vaccinating-children-and-natural-immunity&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C394071cf62c34511bd2b08d9ecb2ab3c%7C11d>

10. There have been more deaths from COVID-19 vaccines, as reported to the Vaccine Adverse Events Reporting

System (VAERS), than deaths in the last 10 years from all vaccines combined and only 1% -10% of vaccine injuries are reported to VAERS. The full extent of adverse events from the COVID

vaccines is unknown as there is a significant delay in uploading reports to the VAERS database.

The risk associated with COVID-19 vaccinations is extremely dangerous to the health and well-being of all children and this form of treatment unnecessary.

Any coercion or pressure tactics used for students to be vaccinated contravenes the Nuremberg Code, the Helsinki Declaration and Federal Law.

Any use of "implied consent" by any minor child under the age of 18 is defined in law as gross, contributory, and culpable criminal negligence.

Any party found to be involved in vaccination coercion when entrusted with the care of our children such as all school staff, school board members and executive, and any other adults who may have access to our children while under their care. This includes the assistance of outside school staff, contractors, public health nurses, or health officials could be prosecuted to full extent of law and you may be held personally and criminally liable for any injuries or deaths that may occur.

We are forced to err on the side of spiritual caution and refuse to harm our temples in honor of Gods Holy Word.

The 1st Amendment of the constitution has protected these exact claims before the Supreme Court on many occasions. Even State governments have faced this glaring truth during the Covid crisis as

they attempted to pass mandates and laws that violated this basic principle only to have their wrong decisions righted before the Courts, with financial penalties.

While, as Christians, we strive to be at peace with all humans beings and to obey all laws and mandates from a Legitimately elected government. We do not do so in violation of Gods Holy Laws, of which the protection of my body is one of those spiritual laws that supersedes all manmade laws in my religious conscience.

Sincerely,

Lisette Torres

Subject: Vote no! To require COVID shot for schools

External Email

Dear board of directors,

VOTE NO!

Washingtonians do not want this!!!

I also would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. There are well documented risks associated with myocarditis in young males associated with these shots. Myocarditis is not a mild illness. Statistics show that 2 in 10 people with myocarditis will die within 2 years and 5 in 10 die within 5 years. Dead heart tissue does not regenerate itself.

4. The spike proteins associated with these shots have been shown to settle in female's reproductive organs, potentially affecting future fertility. In fact, there is currently a study focusing on changes in women's menstrual periods associated with the shots. COVID-19 Vaccines and the Menstrual Cycle | NIH COVID-19 Research

5. Natural immunity has been shown to be much more robust than any immunity imparted by the vaccine, and there has been research that has shown, after a person gets the shots, they may never be able to achieve full natural immunity in the future. Please read this for 5 studies that show children already have robust natural immunity to this virus. Hands-off, CDC and Pfizer: Children are to be considered already COVID 'vaccinated' – Opinion – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>>)

6. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>
)

7. You may "enjoy" reading this analysis from a person who does risk-benefit analyses for a living. It is estimated that, even if 28 million children are vaccinated against COVID, at most 45 lives might be saved. And there are potentially huge long term risks. What is the Number Needed to Vaccinate (NNTV) to prevent a single COVID-19 fatality in kids 5 to 11 based on the Pfizer EUA application? (substack.com

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsubstack.com%2F&data=04%7C01%2F&>
)

8. In Pfizer's initial study for older 12-17 year old kids, adverse side effects were hidden. You may or may not be familiar with the story of Maddie De Garay who volunteered to be part of the initial trial because she wanted to do her part. She is now in a wheelchair with a feeding tube and likely will be for the rest of her life. Her side effects were hidden and listed as "abdominal pain". Even if there's an infinitesimal chance of this happening to another child, why take the risk? Comcast Censors Vaccine Paralyzed 13-Year-Old Girl (rumble.com

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Frumble.com%2F&data=04%7C01%2F&>
)

9. It is impossible for someone to give informed consent when side effects from the vaccines are hidden. Perhaps before you make a decision that you'll regret, you should visit this website.

Dear State Officials,

Please do not authorize the experimental mRNA "vaccines" for children or mandate them for education. We now know that COVID-19 hardly affects children and that these so-called COVID-19 vaccines do not work and are causing serious health problems and death. Furthermore, we now know that COVID-19-which has a recovery rate of 99.5% for most people-can be safely and effectively treated with Ivermectin and Hydroxychloroquine.

Here are 1000 peer-reviewed scientific papers that show that these COVID-19 drugs injections are not safe:

Here are some of those scientific studies:

1. Myocarditis after mRNA vaccination against SARS-CoV-2, a case series:
<https://www.sciencedirect.com/science/article/pii/S2666602221000409>
 <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.sciencedirect.com%2Fscience>>
2. Myocarditis after immunization with COVID-19 mRNA vaccines in members of the US military. This article reports that in "23 male patients, including 22 previously healthy military members, myocarditis was identified within 4 days after receipt of the vaccine":
<https://jamanetwork.com/journals/jamacardiology/fullarticle/2781601>
 <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fjamanetwork.com%2Fjournals%2>>
3. Association of myocarditis with the BNT162b2 messenger RNA COVID-19 vaccine in a case series of children: <https://pubmed.ncbi.nlm.nih.gov/34374740/>
 <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fpubmed.ncbi.nlm.nih.gov%2F343>>
4. Acute symptomatic myocarditis in seven adolescents after Pfizer-BioNTech COVID-19 vaccination:
<https://pediatrics.aappublications.org/content/early/2021/06/04/peds.2021-052478>
 <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fpediatrics.aappublications.org%2F>
[052478&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cca8886f500c440338ef508d9ed8bca4e%7C11](https://pediatrics.aappublications.org/content/early/2021/06/04/peds.2021-052478&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cca8886f500c440338ef508d9ed8bca4e%7C11)>
5. Myocarditis and pericarditis after vaccination with COVID-19 mRNA: practical considerations for care providers:
<https://www.sciencedirect.com/science/article/pii/S0828282X21006243>
 <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.sciencedirect.com%2Fscience>>
6. Myocarditis, pericarditis and cardiomyopathy after COVID-19 vaccination:
<https://www.sciencedirect.com/science/article/pii/S1443950621011562>
 <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.sciencedirect.com%2Fscience>>
7. Myocarditis with COVID-19 mRNA vaccines:
<https://www.ahajournals.org/doi/pdf/10.1161/CIRCULATIONAHA.121.056135>
 <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ahajournals.org%2Fdoi%2Fp>>
8. Myocarditis and pericarditis after COVID-19 vaccination:
<https://jamanetwork.com/journals/jama/fullarticle/2782900>
 <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fjamanetwork.com%2Fjournals%2>>
9. Myocarditis temporally associated with COVID-19 vaccination:
<https://www.ahajournals.org/doi/pdf/10.1161/CIRCULATIONAHA.121.055891>
 <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ahajournals.org%2Fdoi%2Fp>>
10. COVID-19 Vaccination Associated with Myocarditis in Adolescents:

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ahajournals.org%2Fdoi%2F10.1161/CIRCULATIONAHA.121.056038>
48. Occurrence of acute infarct-like myocarditis after COVID-19 vaccination: just an accidental coincidence or rather a vaccination-associated autoimmune myocarditis?: <https://pubmed.ncbi.nlm.nih.gov/34333695/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fpubmed.ncbi.nlm.nih.gov%2F34333695/>

Here is commentary I posted to the FDA recently. It is a request that they do not authorize the injection of children with the experimental mRNA COVID-19 drugs:

I oppose authorizing the experimental mRNA COVID drugs for children. All our research indicates that these experimental drugs are more dangerous for children than COVID-19, which has a recovery rate of 99.5% for most people. The COVID-19 recovery rate comes from the CDC. That is a recovery rate that is similar to the common flu, and the recovery rate for children is even higher--children are virtually unaffected by COVID-19.

These experimental mRNA drugs are not vaccines as they do not provide immunity. They use a novel mRNA process that we do not know the long-term effects of. We DO KNOW, however, that they are maiming and killing literally millions of people. These numbers come from the European and American vaccine adverse event reporting systems. The reports from the VAERS reporting system can be accessed here: <https://openvaers.com/> <[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fopenvaers.com%](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fopenvaers.com%2F)

According to the VAERS reporting system and the European Medicines Agency, there are over 50,000 deaths linked to these experimental drugs. There are 22,000 reports of deaths in the VAERS system and over 30,000 in the European tracking system:

<https://www.thegatewaypundit.com/2021/11/european-medicines-agency-data-shows-1163356-adverse-drug-reactions-30551-fatalities-covid-19-vaccinations/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.thegatewaypundit.com%2F2020/05/medicines-agency-data-shows-1163356-adverse-drug-reactions-30551-fatalities-covid-19->

vaccinations%2F&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cca8886f500c440338ef508d9ed8bca4

It appears that these experimental drugs were hastily developed, hastily approved, they are still under Emergency Use Authorization (despite claims to the contrary). After a year of injections we now have a great deal of scientific evidence for how and why these experimental mRNA drugs are maiming and killing so many people. For example, here is a collection of 1000 peer-reviewed scientific reports detailing the serious adverse health effects of these mRNA drugs:

<https://www.informedchoiceaustralia.com/post/1000-peer-reviewed-studies-questioning-covid-19-vaccine-safety>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.informedchoiceaustralia.com/peer-reviewed-studies-questioning-covid-19-vaccine-safety&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cca8886f500c440338ef508d9ed8bca4e%7C11d0>

These adverse effects include blood clots, heart inflammation, heart attacks, stroke, gangrene, disabling neurological damage, etc. Tens of thousands and perhaps hundreds of thousands of people have been disabled for life by these experimental drugs, which leads to the following questions: Why are these drugs still being injecting into people-why are they not being pulled from use immediately? Why are the governments of the world, the Media and the pharmaceutical companies entirely silent on the massive carnage being inflicted on the population by these drugs? As noted earlier, COVID-19 is about as dangerous as the common flu and as such it does not warrant the use of these dangerous and deadly experimental drugs.

Injecting children with these experimental mRNA drugs to protect them from a bad flu is completely irrational

What makes this idea even more irrational is that it appears that whatever effectiveness these experimental drugs may have in stopping COVID-19, their effectiveness quickly wanes, and they end up giving **NEGATIVE** efficacy. That is, the injection of these experimental drugs makes it **MORE LIKELY** that people will get infected with and get sick with COVID-19. We can see this effect in the massive spike of COVID-19 hospitalizations

of the "vaccinated" in countries which have the highest COVID-19 "vaccination" rates. It is abundantly clear that these so-called "vaccines" do not work (long term) and are actually making things worse:

https://newsrescue.com/australia-israel-report-95-99-hospitalized-fully-vaccinated/
<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fnewsrescue.com%2Faustralia-israel-report-95-99-hospitalized-fully-vaccinated%2F&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cca8886f500c440338ef508d9ed8bca4e

EXCERPT: Reports coming out of Israel claim hospitals are being filled with vaccinated people, 95 percent of whom are suffering serious illness being fully vaccinated.

"I understand that most of the patients are vaccinated, even 'severe' patients. Exactly. Naturally occurring. Old people, most of them are vaccinated," Israeli Dr. Kobi Haviv told News Israel 13 Thursday.

A nurse whistle-blower says that most of the patients said to have COVID are actually people who were vaccinated and are having adverse effects:

https://www.theburningplatform.com/2021/09/10/patients-filling-the-hospitals-are-vaccinated-period/
<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.theburningplatform.com%2Fpatients-filling-the-hospitals-are-vaccinated-period%2F&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cca8886f500c440338ef508d9ed8bca4e%7C

The Vaccinated Are Getting Sick at High Rates as Scientists Are Clueless As to Why

Lastly, we now know that COVID-19 can be safely and effectively treated with the off-the-shelf drugs Ivermectin and hydroxychloroquine--if these drugs are administered early on. The FDA and related agencies should be promoting these treatments rather than these experimental mRNA drugs, which clearly do not work, are now known to be dangerous and deadly, and actually appear to make those who have been injected with them MORE LIKELY to get infected with COVID-19, get sick with COVID-19, and die. The FDA should not even be considering the authorization of these experimental mRNA drugs for children.

-End of FDA comment-

Here are the searchable VAERS reports of injuries and deaths associated with injections of the COVID-19 "vaccines":

<https://openvaers.com/openvaers>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fopenvaers.com%2Fopenvaers&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cca8886f500c440338ef508d9ed8bca4e%7C>>

Something else I would like to note is that the PCR tests which have been used to determine who does and who does not have COVID-19 are notoriously faulty, and are now known to give almost all false positives. So a positive PCR test in the absence of symptoms DO NOT show that a person actually has COVID-19. Using COVID-19 "case" counts to determine policy is wrong and leads to bad policies.

I would be happy to provide more information on this matter if you desire it. Thank you for your time and consideration.

Respectfully,

Brooks Trubee

Good Morning,

The customer inquiry below is asking when the results of the survey will be available?
Can someone please respond back to them?

Thank you,

Randi

The following survey response is submitted:

1.

Please select one:

Other

2.

Please enter your comments or questions in the space provided below:

I'm wondering how I could receive the results and breakdown of the recent survey concerning COVID-19 mandates for public school attendance. I would assume they have been tabulated by now. Will the full results be available on the website? If so, is there a timeline?

3.

If you are sending feedback on one of our Web pages, please paste the URL here:

Every single person on the WA State board NEEDS to read what these California doctors are saying. They are spot on. I cut and pasted the text below and I've included the link for your convenience.

We're pro-vaccine but can't support California lawmaker's school COVID vaccine mandate

Two physician epidemiologists argue in this op-ed the likely costs of Sen. Pan's bill would not be worth the benefits

Dr. Tracy Beth Høeg, Dr. Vinay Prasad
Feb. 8, 2022

Two weeks ago, state Sen. Richard Pan introduced
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.sfgate.com%2Fcalifornia-politics%2Farticle%2FCalifornia-COVID-vaccine-mandate-schools-Newsom-16799639.php&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C59f39e683af349aabdad08d9ee4e9fc6%7C>>
a new bill
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.latimes.com%2Fcalifornia%2Fpolitics%2Fop-ed%2Fnew-vaccine-legislation-california-schoolchildren-mandate&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C59f39e683af349aabdad08d9ee4e9fc6%7C11d0e>>
which would require all children K-12 to be vaccinated against COVID-19 in order to attend school in person after Jan. 1, 2023. Unvaccinated children would be forced into remote learning.

Pan said

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.latimes.com%2Fcalifornia%2Fpolitics%2Fop-ed%2Fnew-vaccine-legislation-california-schoolchildren-mandate&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C59f39e683af349aabdad08d9ee4e9fc6%7C11d0e>>
, "We need to make sure schools are safe so that all parents are comfortable sending their children to school."

Every parent wants safe schools. But our children deserve medical care driven by facts, not politics. As physician epidemiologists, we have analyzed the data and found that this
