Subject: Do NOT mandate covid vaccines for Wa public schools- it is a PARENTS decision

External Email

Each family should decide for themselves if they want their own children to get a vaccine or not.

It is not the role of the Wa public schools to mandate what people decide to do with their own children's health.

Vaccines are a decision that each child's parents should decide based on their individual child's health - not the government.

Subject: My Public Comments

External Email

Good Morning,

I am writing today to express my view regarding mandating Covid Vaccines for youth in order to attend school in person in Washington State.

I would like to start off by stating the risk of death associated with COVID-19 in healthy children is virtually non-existent, as children have significant immunologic advantages relative to the older adult population (> 65 years) which comprises the high risk cohort for COVID-19. The risk of death and disease in children has become even more rare with Omicron. Yet even prior to the advent of Omicron, a peer reviewed study clearly demonstrated (using safety data accumulated during past variant circulation) that the genetic COVID-19 vaccines carry a risk/benefit ratio of five deaths in the older, high risk cohort for every one life saved from COVID-19 (and those data did not account for the reporting bias inherent in US deaths due to COVID consequent to inappropriate use of PCR tests). See "Why are we vaccinating children against COVID-19?"

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.sciencedirect.com%2Fscience/article/pii/S0950268821001665>>
" (Toxicology Reports, Volume 8, 2021, Pages 1665-1684).

The new variant of COVID-19, Omicron, has exploded onto the scene. What was already an inverted risk benefit ratio for genetic vaccination in children and adults (greater risk of death from vaccine than from COVID-19) will become even more inverted since the risks of COVID-19 are further reduced with Omicron. The Omicron variant is different in five essential ways:

- * More infectious and will soon be the dominant variant in the USA
- * Less pathogenic
- * Poorly matched to currently available vaccines
- * Natural immunity is providing good protection against Omicron
- * Disease symptoms are more similar to the common cold

The International Alliance of Physicians and Medical Scientists (16,000+ physicians from around the world) released a resolution concerning these exact issues. HERE

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdoctorsandscientistsdeclaration.org>>
is the link to that resolution where they state:

- * Negligible clinical risks from SARS-CoV-2 infection exist for healthy children under eighteen.
- * Long term safety of the current COVID vaccines in children cannot be determined prior to instituting such policies. Without high-powered, reproducible, long term safety data, risks to the long-term health status of children remain too high to support use in

healthy children.

* Children risk severe, adverse events from receiving the vaccine. Permanent physical damage to the brain, heart, immune and reproductive system associated with SARS-CoV-2 spike protein-based genetic vaccines has been demonstrated in children.

* Healthy, unvaccinated children are critical to achieving herd immunity. Natural immunity is proven to tolerate infection, benefiting community protection while there is insufficient data to assess whether Covid vaccines assist herd immunity.

With this information, it is my strong belief and the data empirically shows that using COVID-19 Gene Therapy in children has a strong probability to do more harm than good, and attempting to force said therapies on the children of our state would be a gross violation of medical ethics, individual rights, and parental rights. In addition, it would inevitably force families to remove their children all together from public education. This action would not only affect children in general, but would disproportionately affect minority and economically challenged families across our state.

It is in the best interest of our state, our people, and most importantly our children, that there is no further attempt to force COVID-19 Gene Therapy on our youth!

Sincerely,

John Lockard
Othello, Washington

To our local government officials,

It has come to my attention that we have a very important upcoming vote regarding schools and our children. I am astounded that this vaccine with no history of side effects would be on the table for a vote to mandate it for CHILDREN! If this trend continues I will be joining the thousands of other parents that have chosen to seek education outside of the local school district. I urge you to consider the consequences of mandating an experimental shot for children when there is no data to tell us long-term effects. PLEASE VOTE NO!

Thank you,
Kelsie Hubbard

To whom it may concern I strongly oppose you mandating our children to be vaccinated for Covid 19. The FDA only approved version the vaccine is Comirnaty. It is not currently available and is different than the emergency use authorized Pfizer-BioNtech vaccine. 21 US code 360BBB Protects ones right to refuse any emergency us authorized medical products, therefor it is illegal to mandate an EUA vaccine. Our medical freedoms are being infringed upon. Janie Johnson

Subject: Vaccine mandates

External Email

To who will listen;

Please do not mandate our children to receive this vaccine. This should be a decision that is made in private with their doctor and parents. Educational personnel are not doctors and are not parental guardians this is a matter that should be decided upon privately on a case by case instead of a mandate or requirement. It's time to take a stand and not give in to political pressures or other threats of funding cuts. This has gone too far. It should be pretty obvious that the vaccine does not work entirely how the public was lead to believe it would. We don't know the long term effects on children's developing bodies and minds. I for one am not against anyone who would like to give the vaccine to their child but that should be a decision that is made privately amongst the family and their family doctor. You're going to find more people are against another mandate than are for this nonsense. I've done my best to be a rule follower and conform to what the consensus is among the general public. I'm sick about this along with other parents who will probably have a stronger worded objections to this. Stop the mandates let us make decisions for our own childrens health the way it should be with our doctor and guardians. This is a violation of rights. Take a stand for us and tell our government it's time to stay out of our personal decisions.

Please do not require school age children to receive the Covid-19 vaccination. It is dangerous and immoral. As a grandparent I'm vet worried about my grandchildren being harmed. If I still had kids in school I would pull them out before risking their health and life!

Subject: NO COVID Vax Requirement for Children

External Email

Hello,

As a Seattle resident and a registered voter, I am writing to provide my comment on the topic of Covid Vax requirements for children that will be discussed during the WSBOH meeting coming up on January 12th. Covid vaccinations should absolutely NOT be a requirement for our children. It is wrong to create such a policy. Lawmakers and policy makers are not scientists. Let's give this vaccine a few more years to be proven, refined and the risks mitigated. This vaccine is experimental and nobody knows the long term effects. Vaccinating children will not help us get out of the pandemic. It has been proven that schools can open and operate safely without vaccines for children. Covid provides nearly zero risk to children.

Regards,

Bryan Rush

Good morning,

If you pass this and force this serum on children, I for one will immediately remove my child from your school and will advocate for the same action from all parents.

This serum is NOT FDA approved. None of these "brands" have been cleared as safe to use nor are they effective. Informed consent is not being adhered to when this is being administered and that is also illegal. What you're proposing is wrong on so many levels.

Do some research. Find a medical insert on this serum. Look at the risks for something that can kill you without protecting anyone from anything.

If you push for this you are part of the problem with our government system, our freedoms, the constitution standing as rule.

Subject: Covid concerns

External Email

Sirs and madams, I am writing as a very concerned parent and American.

I am writing in regards to the upcoming January 12, 2022 meeting.

It is time to stop the hysteria. From masks, to forced vaccines (threatening people with job loss is not a choice, it's extortion.). and now the covid camps.

WAC 246-100-070 is a gross overstepping of the government and breaks civil rights.

We are only 80 years post WWII and the hoocaust. Have we learned nothing? How can the voices of millions of people be silenced when the data shows Covid is not the mass death threat it was toted as.

Ignoring natural immunity, and suppressing side effect data is irresponsible.

Omicron is 40% less dangerous than the original strand and yet the hysteria by the media and government is still being spilled out.

Please vote AGAINST mandatory covid vaccines for school, jobs, and absolutely against the covid camps.

No one, including the government, has the right to force an unproven "vaccine" on our children. As property owners, we pay for public education. That education is guaranteed through our Constitution and the RCWs. You cannot make that right conditional upon a vaccine whose mid- and long-term side effects are unknown. COVID-19 has proven to be statistically harmless to children. Many of our children already carry natural immunity from having had the virus. In the words of the MRNA inventor, Dr. Robert Malone, and Dr. Peter McCullough, the vaccine presents far more harm than benefit to children! Our children are not experiments! Public education cannot be dependent on them partaking in this sick experiment!

Disgusted WA Resident,
Cassandra Erickson

another example of what penalties will be faced when a pharmaceutical company puts profits ahead of patient welfare."

"The size and seriousness of this resolution, including the huge criminal fine of \$1.3 billion, reflect the seriousness and scope of Pfizer's crimes," said Mike Loucks, acting U.S. Attorney for the District of Massachusetts. "Pfizer violated the law over an extensive time period. Furthermore, at the very same time Pfizer was in our office negotiating and resolving the allegations of criminal conduct by its then newly acquired subsidiary, Warner-Lambert, Pfizer was itself in its other operations violating those very same laws. Today's enormous fine demonstrates that such blatant and continued disregard of the law will not be tolerated."

The company then went on to pay off 60.2 million in charges of bribery in 8 countries in 2011 and 23.85 million in 2018 for false claims. <https://www.justice.gov/opa/pr/drug-maker-pfizer-agrees-pay-2385-million-resolve-false-claims-act-liability-paying-kickbacks> <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.justice.gov%2Fopa%2Fpr%2Fdrug-maker-pfizer-agrees-pay-2385-million-resolve-false-claims-act-liability-paying-kickbacks&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ce2e530ede9b64203369008d9d0434479%7C11d0e1>

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine, Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine. <https://www.law.cornell.edu/uscode/text/21/360bbb> <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.law.cornell.edu%2Fuscode%2Ftext%2F21%2F360bbb>

Mandates also breach the following laws: 20 Code of Federal Regulations, Section 50.23 & 24 <https://www.ecfr.gov/current/title-21/chapter-I/subchapter-A/part-50/subpart-B/section-50.23> <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ecfr.gov%2Fcurrent%2Ftitle-21%2Fchapter-I%2Fsubchapter-A%2Fpart-50%2Fsubpart-B%2Fsection-50.23&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ce2e530ede9b64203369008d9d0434479%7C11d0e1> in which it is illegal to make anyone participate in an experimental program using coercion:

The obtaining of informed consent shall be deemed feasible unless, before use of the test article (except as provided in paragraph (b) <[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ecfr.gov%2Fcurrent%2Ftitle-21%2Fsection-50.23%23p-50.23\(b\)&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ce2e530ede9b64203369008d9d0434479%7C11d0e1](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ecfr.gov%2Fcurrent%2Ftitle-21%2Fsection-50.23%23p-50.23(b)&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ce2e530ede9b64203369008d9d0434479%7C11d0e1) of this section), both the investigator and a physician who is not otherwise participating in the clinical investigation certify in writing all of the following:

(1) The human subject is confronted by a life-threatening situation necessitating the use of the test article.

(2) Informed consent cannot be obtained from the subject because of an inability to communicate with, or obtain legally effective consent from, the subject.

(3) Time is not sufficient to obtain consent from the subject's legal representative.

(4) There is available no alternative method of approved or generally recognized therapy that provides an equal or greater likelihood of saving the life of the subject.

Are there really no available alternatives, especially for children? Here is a study, among many other treatments, showing a theoretical zero mortality risk from SARS-CoV2 infection in all persons with vitamin D levels over 50 ng/ mL.

<https://www.mdpi.com/2072-6643/13/10/3596>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.mdpi.com%2F2072-6643%2F13%2F10%2F3596&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ce2e530ede9b64203369008d9d0434479%7C11d0e>

Is COVID statistically life-threatening to children? Here is what Dr. Paul Alexander, Health Research Methodologist Evidenced Based Medicine, testified at 4:55 in the 8+ hour 167th Vaccines and Related Biological Products Advisory Committee – 9/17/2021 FDA hearing <https://www.youtube.com/watch?v=WFph7-6t34M>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.youtube.com%2Fwatch%3Fv=WFph7-6t34M&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ce2e530ede9b64203369008d9d0434479%7C11d0e>

"Look, we want these vaccines to work...We currently do not have the safety data, we absolutely do not, and for anyone in the CDC, anyone in the NIH, and anyone in the FDA to say so is being disingenuous to the public. Now I wanted to end by saying this. When I, I looked at the study this morning by Chan...yes its a rat model, but we have to extrapolate to humans. That showed that the lipid nanoparticle, the constituency of the vaccine are accumulating in the ovaries, in the testes, in the spleen, in the adrenals, etcetera....people want to make this a joke and parody, etcetera, but this is a very, very serious consideration, because we even have animal data that shows us that there's a drop in fertility in the animal model. So we need this properly investigated. The public needs this answer properly, and I want to end by saying this: Under no condition, none, zero, based on the evidence, must children be indicated for these vaccines. There is no risk to children, no statistical, zero, in terms of spreading and in terms of getting serious illness or dying of this....Dr. Martin of John Hopkins....we looked at the children in America that have died, and we found that save 1, most, these children had at least 1 serious illness. So the reality is COVID is not a life-ending, life-threatening situation for children. Right now the CDC and NIH has not prosecuted the case as to why these children should be vaccinated, period. I say, do not do this, and I beg your consideration, thank you."?

Under 18 U.S. Code Section 2331, subsection (5):

<https://www.law.cornell.edu/uscode/text/18/2331>

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.law.cornell.edu%2Fuscode%](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.law.cornell.edu%2Fuscode%2F18%2F2331)

(5)the term “domestic terrorism” means activities that—

(A)involve acts dangerous to human life that are a violation of the criminal laws of the United States or of any State;

(B)appear to be intended—

(i)to intimidate or coerce a civilian population;

(ii)to influence the policy of a government by intimidation or coercion; or

(iii)to affect the conduct of a government by mass destruction, assassination, or kidnapping; and

(C)occur primarily within the territorial jurisdiction of the United States; and

Would mandating these experimental EUA vaccines to our most vulnerable population be considered domestic terrorism under the laws of our country knowing that intended coercion and intimidation tactics are being used within the united states which are potentially dangerous to human life, knowing that some children will die and be harmed from these inoculations? And if so, why is this even being considered?

I have multiple further questions that I hope the DOH considers:

We already know that there are reproductive problems associated with these vaccines, and the NIH received a 1.6 million grant to study "why."

<https://www.nichd.nih.gov/newsroom/news/083021-COVID-19-vaccination-menstruation>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nichd.nih.gov%2Fnewsroom%2FCOVID-19-vaccination-menstruation&data=04%7C01%7Cwsboh%40sbob.wa.gov%7Ce2e530ede9b64203369008d9d0434479%7C>
Why would DOH WA state consider mandating these to young children with developing bodies?

Is broad vaccination in an Emergency Use Authorization trial considered safe if those injected are not monitored and few autopsies are done? How can the public be given true informed consent on safety without rigorous follow-up? Is 1 year long enough to prove something is safe? Do smokers get cancer immediately or is the damage found later, about 20 years later? Why did authorities vehemently deny that smoking had consequences for years and years? That DDT had longterm effects? What about x-rays for pregnant women? Widespread asbestos use and lead paint? Why did authorities argue that these were safe? If the FDA regards the term "safe" as having the benefits outweigh the risks, is this current covid vaccine, of unknown adjuvants and longterm complications, safe for children? <https://www.youtube.com/watch?v=WFph7-6t34M>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.youtube.com/6t34M&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ce2e530ede9b64203369008d9d04>

If Guillan Barre can show up 10 months after a vaccine according to the 2015 textbook "Vaccines & Autoimmunity," by Yehuda Schoenfeld, et al., is it ethical to tell parents that the vaccines are safe for their children if the breadth of benefit versus risk is not known for that individual? What about the many autoimmune disorders associated with adjuvants through Autoimmune/ Inflammatory Disorder Induced by Adjuvants (ASIA syndrome)? Or cancer risks? Why are adjuvants in the EUA vaccine not known even to doctors?

Steve Kirsch estimated back in September that for every 1 youth actually saved from dying of COVID, 6 will die from the vaccine. Dr. Toby Rogers PhD estimates it for the 5-11 year old age group as 117 deaths from vaccine/ treatment for 1 possible save from a COVID death. If it takes vaccinating 28 million children to potentially save 45 from a COVID death, does the risk outweigh the benefits for this age group?
<https://stevekirsch.substack.com/p/we-will-kill-117-kids-to-save-one>
<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fstevekirsch.substack.com/p/we-will-kill-117-kids-to-save-one&data=04%7C01%7Cwsboh%40sbh.wa.gov%7Ce2e530ede9b64203369008d9d043>

Why was Maddie de Garay's data from the clinical trials listed in the results as "stomach pain" as an adverse event in the Pfizer clinical trials? She is 12 years old and can no longer walk after the vaccine, but the vaccine industry has no legal liability to do anything. <https://twitter.com/SenRonJohnson/status/1409882643827658766?s=20>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ftwitter.com%2FSenRonJohnson%2Fstatus%2F1409882643827658766%2Fs=20>

Are there really no other options except mass-experimentation with an injection that bypasses the gut and skin barriers, can potentially hit the circulatory system and go straight to the heart when injected, and which causes known reproductive issues? Would the EUA have passed and normal safety trials been expedited and dismissed if we had used treatments that have shown great effectiveness in other countries? In 100 years, do we not have any antiviral medications that are cheap, easy, and proven safe for 40 or 65 years?

The definition of vaccine was changed from something that provides immunity to something that provides protection by the CDC in September 2021.

"Vaccine" Previous: vaccination: the act of introducing a vaccine into the body to produce immunity to a specific disease."

"Vaccine" *New: vaccination: the act of introducing a vaccine into the body to produce protection to a specific disease."

"Vaccination" Previous: "a product that stimulates a person's immune system to produce immunity to a specific disease"

"Vaccination" *New: "a preparation that is used to stimulate the body's immune response against diseases."

<https://www.miamiherald.com/news/coronavirus/article254111268.html>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.miamiherald.com%2Fnews%2Fhealth%2Fstory%2F2020-07-15%2Fmiami-herald-covid-vaccine-07-15-2020>
Since, at best, this vaccine lowers symptoms for an unspecified length of time, it is still leaky, meaning, the kids can still get the virus, and spread it. It does not provide immunity, but instead protection and stimulates a response. At best, it slows the spread of the virus, and prolongs the pandemic. Will vaccinating the young and healthy further put evolutionary pressure to cause Vaccine Enhanced Disease like in all other coronavirus vaccines in the past 20 years of trials in which initial robust immunity was observed, followed by death of susceptible animals when exposed to the wild virus?

. As Christina Parks PHD Cellular & Molecular Biology said in her testimony to House Bill 4471: "So I'm very well versed in the science of both these mRNA, gene therapy vaccines, and the fact that this is extremely complex science that has been oversimplified by the media to basically take away our freedom of choice...do the covid vaccines prevent transmission? No." What about the cost in terms of autoimmune disorder risks? Heart issues? Reproductive health? If the vaccine does not stop transmission, then how can it contribute to herd immunity unless most people acquire breakthrough infections or "exposure through infection?"

vaccines&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ce2e530ede9b64203369008d9d0434479%7C11d

See Dr Toby Rogers PhD article from October: NNT for 5-11 year olds

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ftobyrogers.substack.com%2Fp%2Fis-the-number-needed-to-vaccinate>

vaccinate&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ce2e530ede9b64203369008d9d0434479%7C11d

. From this article, concerning the NNT (Number Needed to Treat):

* "At best, the Pfizer mRNA shot might be 80% effective against hospitalizations and death. That number comes directly from the FDA modeling (p. 32

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F15344>

). I am bending over backwards to give Pfizer the benefit of considerable doubt because again, the Pfizer clinical trial showed NO reduction in hospitalizations or death in this age group. So injecting all 28,384,878

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdatacenter.kidscount.org%2Fdata-center%2Fchild-population-by-age-group%23detailed%2F1%2Fany%2Ffalse%2F574%2C1729%2C37%2C871%2C870%2C573%2C869%2C3>

children ages 5 to 11 with two doses of Pfizer (which is what the Biden administration wants to do) would save, at most, 45 lives (0.8 effectiveness x 57 fatalities that otherwise would have occurred during that time period = 45).

* So then the NNTV to prevent a single fatality in this age group is 630,775 (28,384,878 / 45). But it's a two dose regimen so if one wants to calculate the NNTV per injection the number doubles to 1,261,550. It's literally the worst NNTV in the history of vaccination.

* 31,761,099 people (so just about 10% more people than in the 5 to 11 age bracket) ages 12 to 24

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcovid.cdc.gov%2Fcovid-data-tracker%2F%3FCDC_AA_refVal%3Dhttps%253A%252F%252Fwww.cdc.gov%252Fcoronavirus%252F2019-ncov%252Fcases-updates%252Fcases-in-us.html%23vaccination-demographic&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ce2e530ede9b64203369008d9d0434479%7C11d

have gotten at least one coronavirus shot.

* The COVID-19 vaccine program has only existed for 10 months and younger people have only had access more recently (children 12 to 15 have had access for five months; since May 10) — so we’re looking at roughly the same observational time period as modeled above.

- * During that time, there are 128 reports

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fopenvaers.com%2Fcovid-data%2Fmortality&data=04%7C01%7Cwsboh%40sbh.wa.gov%7Ce2e530ede9b64203369008d9d043447> of fatal side effects following coronavirus mRNA injections in people 12 to 24. (That's through October 22, 2021. There is a reporting lag though so the actual number of reports that have been filed is surely higher).

* Kirsch, Rose, and Crawford (2021) estimate

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdocs.google.com%2Fdocument%2F1vXUj8BqR-7YDQ9oWwz3eZtTfEgG6mHd3yW3VnK1S>
that VAERS undercounts fatal reactions by a factor of 41 which would put the total fatal
side effects in this age-range at 5,248. (Kirsch et al. represents a conservative estimate
because others have put the underreporting factor at 100
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdigital.ahrq.gov%2Fsites%2Fdefault%2Ffiles%2Fmedia%2Fdocuments%2FVAERS%2FVAERS-final-report-2011.pdf&data=04%7C01%7Cwsboh%40sbob.wa.gov%7Ce2e530ede9b64203369008d9d0434479%7C11c32a79-4350-4680-a930-309330933093%7C>
.)

* With potentially deadly side effects including myo- and pericarditis disproportionately impacting youth

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fopenvaers.com%2Fcovid-data%2Fmortality&data=04%7C01%7Cwsboh%40sbh.wa.gov%7Ce2e530ede9b64203369008d9d043447>>
it is reasonable to think that over time the rate of fatal side effects from mRNA shots in children ages 5 to 11 might be similar to those in ages 12 to 24."

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccine adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. By January 2022, over 21,000 deaths and over 110,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children. He is quoted in a COVID Revealed interview with Dr. Patrick Gentempo as saying: "We can't take what's is normally a decade long process for developing a product in ensuring its safety and efficacy, and compressing it into 6 to 9 months and not cut some corners, that's just absurd."

Please vote against mandates for children, and protect our most vulnerable.

Thank you for your time.

Subject: Vaccines for students

External Email

Hello.

I'm writing as a concerned citizen, parent, and educator. I request that you do not add the COVID-19 vaccine to the list of required immunizations for students. Although I am in support of vaccines, I'm very hesitant and concerned about mandating this one so quickly for our youngest population. It is too early in this vaccine's history and development to require it. There has not been enough time to study the effects of this vaccine, and requiring it for our most vulnerable is a careless and rash decision. We need more time to study and evaluate potential dangers before requiring it.

I'm afraid that mandating it will push even more families and students out of the public school system, as well.

Social distancing and masking is already in place in schools which lessens the risk of contagion, according to many sources. That is enough protection at this point.

Please respond with your individual thoughts, not a cut-and-paste response.

Thank you.

Connie Lander

This has gone on too long and too far. The masking is bad enough. There are more than 16,000 physicians that agree that our children should not be vaccinated. We are prepared to take our kids out of the state school system if you mandate this vaccine.

Attached is a longer document explaining the reasons I oppose this addition. But the best argument is the one put forth by Robert Kennedy JR: that the reason why this is being pushed is to provide vaccine manufacturers with a liability shield they would not otherwise have for an experimental vaccine that does more harm than good for young children.

To whom it may concern,

I oppose a vaccine mandate for children ages 5+ who attend public school in the state of Washington. Many many parents will pull their children out of public schools if they are forced to vaccinate their children. I am one of those parents. I would rather find a way to homeschool my kids, then vaccinate them for an illness that doesn't harm them. I am fed up with the masks as well.

Subject: No mandatory vaccination rules for EUA vaccines.

External Email

There should be no discussion about this as children are infected much less, and the long term data on any injection to combat covid has not been published. We have seen that once, twice, and thrice "vaccinated" individuals are having "breakthrough" infections, which means the efficacy of the injection is minimal, and the potential effects could be catastrophic to growing, developing individuals.

No injection that is being administered under EUA should not even be discussed for mandatory administration. The current injections are NOT the FDA approved version, and thus no liability is taken by the manufacturer of the injectable. People can argue they are the same, but the FDA and CDC say they are not the same.

This process needs to slow down considerably for data to be gathered on if this virus is going to burn itself out, ala omicron, be a seasonable virus, before a potential life altering injection is given to a child that cannot give consent.

I am writing in regards to the board considering adding Covid vaccinations to the children's vaccines required for school. This is an inappropriate proposal as none of the Covid vaccines available to children are FDA approved and children have extremely low risk of severe symptoms of this virus. Please do not consider these vaccines as required for public education.

Thank you,

Amy Michel

Subject: IN OPPOSITION of a covid EUA vaccine being added to the childhood schedule-
with respect

External Email

To the Dept of Health regarding covid vaccination,

I appreciate you for taking the time to read this email. I am writing in as a very concerned parent and citizen.

It is unethical, immoral and illogical to place this unapproved EUA product on the children's vaccine schedule. The effects of covid on children are negligible to nonexistent.

We would be sacrificing innocent, healthy children to risks of injury and death from a product that has NO longterm safety data.
Thousands of experts at the Global Covid Summit have declared that these vaccines should NOT be used on children.

The Vaers database is signaling risks of heart inflammation, Myocarditis, Pericarditis, period irregularities, blood clots, etc. after covid vaccination.

If placed on the children's vaccine schedule to attend school, we run the risks of uninformed parents assuming "approval" and "safety," neither of which are true. Especially among those with language barriers.

If placed on the children's vaccine schedule to attend school, we run the risk of exemptions being eroded and a future of compulsory experimental vaccination of healthy, innocent children.

If placed on the children's vaccine schedule to attend school, we run the risk of continuous, compulsory, untested booster shots, further endangering healthy, innocent children.

If placed on the children's vaccine schedule to attend school, we run the risk of causing severe long-term health consequences of healthy, innocent children.

I am pasting part of the Global Covid Summit Declaration here:

NOW THEREFORE, IT IS:

RESOLVED, THAT HEALTHY CHILDREN SHALL NOT BE SUBJECT TO FORCED VACCINATION (view supporting evidence

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdoctorsandscientistsdeclaration.org/evidence%2F%23children&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C66ce053fcfc48d408f208d9cfcf>
>)

* Negligible clinical risks from SARS-CoV-2 infection exist for healthy children under eighteen.

* Long term safety of the current COVID vaccines in children cannot be determined prior to instituting such policies. Without high-powered, reproducible, long term safety data, risks to the long-term health status of children remain too high to support use in healthy children.

* Children risk severe, adverse events from receiving the vaccine. Permanent physical damage to the brain, heart, immune and reproductive system associated with SARS-CoV-2 spike protein-based genetic vaccines has been demonstrated in children.

* Healthy, unvaccinated children are critical to achieving herd immunity. Natural immunity is proven to tolerate infection, benefiting community protection while there is insufficient data to assess whether Covid vaccines assist herd immunity.

In conclusion, anyone involved in the approval and implementation of an experimental product which causes future injury & death will be morally responsible for harming innocent, healthy children.

If there exists any financial incentives for placing these experimental products on the child vaccine schedule, the immorality increases tenfold.

We need your help now to stop this process. We need your help now to protect our children. We need your help.

Please consider the words of terrified parents everywhere. Parents who are trying to protect their children from unnecessary harm. And with all of my heart, I appreciate you reading this email.

Sincerely,

Jennifer Groeneweg

Subject: Covid Vaccines for school

External Email

Regarding the rumor that you intend to add an covid vaccine requirement to attend school. You would be underestimating how many parents choose not to put such a experimental non vetted "vaccine" already proven to have adverse side effects on children that far outweigh the slight risk of symptoms they may have from the diminishing virus itself.

Parents will pull their children in a mass exodus from the public school system without hesitation in order to protect their health against something that is proven to cause issues and no science to back the potential long term side effects.

Leave our children alone. We as parents are the only person that should ever decide what is injected into out children not the government. This vaccine is ineffective, and unsafe.

There has already been a large number of parents who have pulled their children from public schools so much so that it is already impacting potential federal funding. You attempt to force a unwanted vaccine on our children and the mass exodus of children from public schools will essentially be the downfall of any sort of public education system. The public education system can not afford to run on local and state dollars alone, it needs the federal funding which come from how many children are in the schools. That will be gone.

Yes I am vaccinated but I will not under any circumstance vaccinate my child. I will follow suit if the thousands of parents who will pull their children from the public school system as well as likely leave to a state that respects a parents right to choose what's right to protect the health and well-being of their child.

Hello,

In regards to your upcoming meeting on January 12, 2022, I would like to comment on agenda #11 regarding immunization and children. I am deeply opposed to making COVID vaccinations a requirement with school-aged children and do not support this measure. Not only does COVID pose a zero-to-low risk for children, but the vaccine testing data are starting to show moderate to significant risk to some children. I believe it would be unethical and irresponsible to mandate COVID vaccinations of children.

Please do not endanger our vulnerable next generation.

Thank you for your time,

To whom it may concern,
Before implementing this, I feel it's mandatory to have an independent review of the data up to this point. Both the Moderna and Pfizer clinical trials did not have Clinical Events Committees (CEC), or Data Safety Monitoring Boards, (DSMB). This is very concerning, as this is required in most studies. We need an independent review for the safety of our children.

Sincerely,
Monte Madsen

Subject: Immunization Criteria for Child Care and School Entry (Covid-19)

External Email

As a parent, medical employee and a member of the community, I implore you to please stop the push to require Covid-19 vaccinations for ANY child in child care or school. Covid vaccines should absolutely NOT be a requirement for our children! Children are at an extremely low risk for Covid-19. The Covid-19 vaccines have no long-term testing on adults and they have even less testing on children. Covid 19 vaccines are not stopping the virus as many with the vaccine are contracting and spreading Covid-19. The vaccine has not been tested enough to ensure its efficacy and safety in children. Requiring this vaccine does not protect our children!

The disease burden in this case does not meet your criteria. There is NOT a significant morbidity and/or mortality in at least some sub-set of the population. The survival rate is well over 90% and even the long term effects of Covid-19 do not represent a significant amount. Additionally, this vaccine is not meeting your criteria because it is not reducing the risk of person-to-person transmission.

As for the criteria of Implementation, the vaccine is NOT acceptable to the medical community and the public. There is an extremely large amount of both the medical and the general public who do NOT accept this vaccine as safe.

And finally in regard to vaccines effectiveness, this vaccine does not work. It is not on the Recommended Childhood & Adolescent Immunization Schedule. It is not preventing Covid-19 nor is it preventing the spread of Covid-19. The vaccine is not cost effective for our nation. Perhaps it is cost effective or free or maybe even puts some money into the local schools, but as a nation, it is destroying our financial position at an alarming rate. "Experience to date with the vaccine containing this antigen demonstrates that it is safe and has an acceptable level of side effects." Yeah. Not even close. Tell that to the parents of the kids who are having heart attacks. Tell that to my friends who have had massive auto immune flare ups and other medical issues arise immediately after their second dose. This is not a safe vaccine for all people.

Please PROTECT our children by NOT requiring a covid-19 vaccination to attend child care or school.

Thank you,

Brett Elizabeth Spore

Subject: Mandatory vaccination for K-12

External Email

Dear Board of Health,

It has come to my attention that you will be meeting on January 12th to discuss requiring K-12 children to be fully vaccinated in order to attend public school.

As a parent of three children in the school system, the thought of requiring children to be vaccinated is insanity. You are not the parents, you do not get to decide what medical treatment children are required to have. Especially treatment that does not stop infection or transmission.

If vaccines are required, our children will be removed from public education. We will not allow our children to be vaccinated.

Thank you,
Bryan

While parents may choose to vaccinate their own children, these mandates are unethical and unlawful. Advocates of mandating Covid vaccines equate them with standard childhood shots against polio, chickenpox, TDaP (tetanus, diphtheria and pertussis) and MMR (measles, mumps and rubella). But those decades-old vaccines have gone through the full FDA testing regime. The Covid vaccine has received only emergency-use authorization for this age group, meaning its safety and efficacy have not yet been established to the FDA's satisfaction.

The Covid-19 vaccines are too new to have been studied for long-term effects. There are no studies of whether it is safe to vaccinate children who have recovered from Covid-19. Many states don't require vaccinating children against diseases they have already had, like measles or chickenpox, because they acquire natural immunity. Why should Covid be any different?

To whom it may concern:

I truly appreciate your invitation for public comment on whether or not the Covid vaccine should be required for K-12 students. My answer is a resounding no! As taxpayers and invested parents, my husband and I do not feel that we should decide between giving our children a vaccine or an education. We strongly oppose Covid vaccine mandates.

Please continue the good work of educating the children of Washington state and allow parents to make healthcare decisions for their own children.
My children will not attend a school with Covid vaccine mandates.

Sincerely,
Holly Kimm

Subject: January 12 meeting

External Email

To whom it may concern,

I am a citizen of Washington, a worker of Washington state, and a mom. I am writing you today to voice my concern about the agenda of the meeting on January 12.

Washington state is already one of the most unconstitutional states concerning COVID-19. While 41 other states get to live freely without mandates, the citizens of Washington live behind the bars of non stop mandates. How is it that 41 states are able to breathe freely, while nine of the communist states continue to beat down their citizens.

What concerns me the most is our children. You guys want to mandate the vaccine for our children just to be able to get an education. That sounds discriminating, racist, and segregating to me. COVID-19 was never even a threat to children and yet you want to mandate them to get a vaccine that was pushed out in a short amount of time without the proper testing? You guys want to be responsible for ruining the health of children? Ever since the vaccine came out in December 2020, one variant after the next after the next after the next has come to surface. It's almost as if the vaccines are creating variants. Since the vaccine has come out the numbers in the US just keep going up. Originally you guys said the COVID-19 vaccine would keep you safe from getting Covid. Then you guys switched to it doesn't stop you from getting Covid unless 100% of the citizens get vaccinated. That was never how vaccinations have worked. It's funny how all of a sudden a vaccine doesn't work unless everyone has it. If you have a vaccine it should protect you from that virus. If it doesn't you guys have a very bad product. The vaccine does not keep you from getting sick. The vaccine does not keep you from dying from COVID-19. So what the vaccine does I do not know. So why on earth would you mandate our children to get this when it doesn't even work. Children were never even at risk. You guys said so yourself. The narrative changes so much that only someone without a brain wouldn't question it. I already know many citizens who have decided to homeschool their children or move out of state to get away from Jay Inslee's tyranny. And I can guarantee you that if you mandate this vaccine that doesn't work for our children many more will decide to move and homeschool including myself. Washington used to be a wonderful state it's sad to see the ruling of one power-hungry governor ruin it.

Let's not forget you guys are talking about detaining people to your quarantine camps on January 12. I never thought history will repeat itself, but Here we are in the beginning stages of what happened to the Jews in Nazi Germany. It did not start with murder. It started with shaming the Jews, calling them a disease, segregation, locking them up, and then the mass genocide. It looks like we are more than halfway there.

This is unconstitutional. This is not right. This is a fight for our children. As far as I know I carried my child for nine months, I brought my child out of my body, and everything that I buy from my child is from working hard to be able to provide for them. You the government have no say in my child.

I hope you decided to listen to the children and follow your "science" of how children were barely affected by Covid -19.

Since the vaccine came out the cases have gone up, more people have died, and things have gotten worse. This is an utter failure of our government.

To whom it may concern,

As a parent and a public school educator I am adamantly opposed to a covid vaccine requirement for school aged kids and daycares. This vaccine has not had any long term (or relatively short term) safety studies done and is only approved for emergency use. The SCIENCE shows that though this virus is becoming more transmissible it is also becoming LESS severe symptom wise (especially in children). No parent wants their child to get sick, not even with the common cold (which is where covid is heading in mutation). However the reality is that if they don't catch it at school they will catch it at the grocery store, the library, from mom or dad who got it from work etc. DESPITE vaccination status! It is absolute discrimination to refuse children access to public school because their parents don't feel comfortable giving them an experimental vaccine (and it's only considered a 'vaccine' because the definition of a vaccine has recently been amended). When my husband and I chose to have children we intended to raise them as a couple, the TWO of us. We are NOT interested in a menajhtwa or co-parenting situation with the government. Thank you for your time.

External Email

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets vaccine, one group gets placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccines adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time.

I adamantly oppose any Covid vaccine requirement for Washington State school children. This should be a decision made between parents and their children's physician, not politicians. The day the law and courts make every one of you that vote in favor of any type of Covid mandate individually and communally liable for the damage caused by your forced political views on the citizens of this state is the only time this should even be suggested for discussion!

Subject: NO for child vaccine requirements

External Email

Good morning,

I want to make known my strong opposition to any covid vaccine requirements for school children. Our children have had covid and the only ones in the household who had the worst symptoms were the fully vaccinated ones.

My husband had adverse reactions to the vaccine also. Whether there is something more sinister going on with this vaccine and its impact on our human bodies, this is not appropriate to do to our children! Just the fact that we are here, trying to protect our children from this freedom being taken is shocking.

Please, please do the right thing and do not pass a vaccine requirement for our precious children. Thank you.

External Email

Greetings

I plead with you to please uphold our Constitutional Rights and NOT support implementing the vaccine passport. This will not persuade my family and I know many others to get the "vaccine". This is not about politics and whether you are for OR against this said "vaccine" this is about us American citizens valuing our constitution and understand that it much harder to get these rights back once we give them up. Many agree with me that this has crossed over a line that is no longer about protecting us from a virus. We now see this about protecting our freedom and losing this negatively affects the next generation.

Benjamin Franklin once said: "Those who would give up essential Liberty, to purchase a little temporary Safety, deserve neither Liberty nor Safety."

This quote came from the only founding father to have signed all four of the key documents establishing the U.S. We need to remember wisdom that our founding fathers helped build a foundation that has become our great free country. Let's not give up our freedoms. We have fought hard to be a free country! Let's not go back to the beginning creating another Civil War. Choosing to not step down from this position puts our livelihood at stake and we are willing to fight for this.

Have you personally sat down and realized the magnitude of this situation and what would happen to each county if this takes place?! Just spend at least 10 minutes thinking of both sides not just your side...it scares the hell out of me thinking what people are going to do and willing to do to fight for their families, for food, for a job etc. what price if your freedom worth? Your kids freedom worth? This is SOO much more and bigger than a just a vaccine and a vaccine passport.....

Then you taking away our rights as parents to choose what vaccines OUR children will receive is beyond wrong. That is not your place to bully or coerce people into these decisions. You will see more and more parents pulling their children from school which in turn hurts the district but parents will do what they need to do to protect them from you! Some people were willing to comply and lay down when it came to their job in order to feed their family; but will not lay down when it comes to their children!!!!

God bless America and may God give you the strength to do what is right. Fight for the people who vote for you! I'm sure if you did a study you would find most don't want this even if they have are vaccinated. This is so violating!

Meghan Lucas and family

Subject: Vaccine mandate for K-12

External Email

Good afternoon,

I am writing in regards to the potential requirement of a forced experimental "vaccine" on our children to attend public schools. Enforcing such a requirement would wreck our small communities especially. Our family as well as many others in our small community and surrounding communities have already stated that we will not send our children to any school if there is a requirement for an experimental vaccine such as the Covid-19 vaccine for our children to attend school. Enforcing this requirement with no options for parents to their rights of choice, will result in the loss of children in our schools and the potential collapses of the schools and communities. I imagine this would be a domino effect in bigger cities as well. If they haven't already, parents will quit their jobs to homeschool and we will see an even greater economic downfall. This would be a detrimental decision on so many levels. Please think about if you are ready to be held personally responsible for enforcing a requirement on children when you have no idea of the immediate and/or long terms effects these shots will have on children. Children that will be subjected to the potential risks of a shot because their parent(s) feel that they have no other option.

God entrusted each of us with our children not the government to decide what is best for our children. It needs to be the parents choice.

Thank you for your time and consideration.

Subject: IN OPPOSITE of EUA covid vaccine on childhood schedule

External Email

BOH,

I appreciate you for taking the time to read this email. I am writing in as a very concerned parent and citizen.

It is unethical, immoral and illogical to place this unapproved EUA product on the children's vaccine schedule. The effects of covid on children are negligible to nonexistent.

We would be sacrificing innocent, healthy children to risks of injury and death from a product that has NO longterm safety data.
Thousands of experts at the Global Covid Summit have declared that these vaccines should NOT be used on children.

The Vaers database is signaling risks of heart inflammation, Myocarditis, Pericarditis, period irregularities, blood clots, etc. after covid vaccination.

If placed on the children's vaccine schedule to attend school, we run the risks of uninformed parents assuming "approval" and "safety," neither of which are true. Especially among those with language barriers.

If placed on the children's vaccine schedule to attend school, we run the risk of exemptions being eroded and a future of compulsory experimental vaccination of healthy, innocent children.

If placed on the children's vaccine schedule to attend school, we run the risk of continuous, compulsory, untested booster shots, further endangering healthy, innocent children.

If placed on the children's vaccine schedule to attend school, we run the risk of causing long-term health consequences of healthy, innocent children.

I am pasting part of the Global Covid Summit Declaration here:

NOW THEREFORE, IT IS:

RESOLVED, THAT HEALTHY CHILDREN SHALL NOT BE SUBJECT TO FORCED VACCINATION (view supporting evidence

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdoctorsandscientistsdeclaration.org/evidence%2F%23children&data=04%7C01%7Cnathaniel.thai%40sboh.wa.gov%7C946bbf14a712457530a9>
)

* Negligible clinical risks from SARS-CoV-2 infection exist for healthy children under eighteen.

* Long term safety of the current COVID vaccines in children cannot be determined prior to instituting such policies. Without high-powered, reproducible, long term safety data, risks to the long-term health status of children remain too high to support use in healthy children.

* Children risk severe, adverse events from receiving the vaccine. Permanent

physical damage to the brain, heart, immune and reproductive system associated with SARS-CoV-2 spike protein-based genetic vaccines has been demonstrated in children.

* Healthy, unvaccinated children are critical to achieving herd immunity. Natural immunity is proven to tolerate infection, benefiting community protection while there is insufficient data to assess whether Covid vaccines assist herd immunity.

In conclusion, anyone involved in the approval and implementation of an experimental product which causes future injury & death will be morally responsible for harming innocent, healthy children.

If there exists any financial incentives for placing these experimental products on the child vaccine schedule, the immorality increases tenfold.

We need your help now to stop this process. We need your help now to protect our children. We need your help.

Please consider the words of terrified parents everywhere. Parents who are trying to protect their children from unnecessary harm. And with all of my heart, I appreciate you reading this email.

Sincerely,

Jennifer Groeneweg

External Email

Hello, I am a parent in Washington State, and I greatly oppose the COVID vaccine becoming a mandated vaccine. Who can I contact to get my voice heard?

This is a leaky vaccine and my kids have already been confirmed to have COVID. They have immunity which is better than the vaccine.

Please send me info on who to contact to let them know as a tax paying citizen, I oppose the COVID vaccine being mandated.

Thank you,

Tracy Stevens

Subject: mandated vaccinations for children - or ANYBODY!

External Email

I am writing to express my extreme dissatisfaction in the required and mandated vaccinations that you are imposing on not only our children, but on the people in Washington State.

Vaccinations should be tested and proved as safe; these are not. The long-term results and implications are still yet inconclusive. There is no documentation that having a covid vaccination prevents you from getting covid - in fact it is the opposite. Many, many, MANY people who are vaccinated continue to get covid, so clearly the vaccination is not doing it's job. A vaccination is supposed to PREVENT you from contracting a disease - this covid vaccination does not do that! This vaccination is weakening peoples' immune system and should not be required at a government level. This is a personal choice issue and governmental agencies have NO BUSINESS being involved with the (our, as parents) decision.

Childrens' immune systems are strong. Their rate of infection with Covid is low and their hospitalization is lower. As this vaccination is still in its trial stages, please do not inject, or force our children to be injected, with an unknown long-term substance that we do not know, nor will we know the effects of the vaccination, for years to come.

Stay out of our homes and the governing our children. It is our jobs to monitor our children, what they inject or ingest into their systems, and their beliefs. Please, do your jobs and not ours.

My kids will not be getting this vaccine. As a respiratory therapist I know and see the reality of what this vaccine is doing to not only our kids but adults also. People are dying and having life changing complications from the vaccines. Our kids do not need this vaccine. They are healthy kids who have great immune systems which god gave them. He created our bodies to defend itself. All we need to do is exercise, take vitamins and eat nutritious foods. Our kids are not at risk! The vaccinated are no different than the unvaccinated regarding covid. The vaccine is not stopping the spread. Look at the other countries in the world! Herd immunity is the key! If your immune system is compromised then stay home. Let the healthy get herd immunity and move on with life. We have a right to what goes into our bodies and what doesn't. This Mandate is unconstitutional. Once again my family will not be receiving this vaccine. WE WILL NOT COMPLY!

Subject: VOTE NO on VACCINE mandates for School Aged Children

External Email

Attn: WA State Board Health Representatives

I am a beleaguered WA resident and a parent of school-aged children, just one of many, living through non-sensical mandates and forced medical tyrannies. I've already chosen to remove my children from school to avoid having them be traumatized by the policies that have been adopted since this pandemic began, but if our state chooses to make an experimental drug that is proving to maim and kill thousands of people mandatory for children to be enrolled in school, I am certain many, many more will be removing their kids by the droves. Let's stop destroying this beautiful state with bad policy.

Please support freedom of medical choice for children and their parents!

Sincerely,
Candice Cheadle

Subject: NO covid vax requirement for school age children

External Email

I realize you are hearing this from everyone. But I would like to go on to say that it is completely unconstitutional to force vaccines or any other experimental medical procedure without full disclosure to the patient. The VAERS report on its own shows massive adverse effects from the back scene. The CDC has also stated that children are at very low risk. On top of everything else you work for us we do not work for you. That's how the Constitution was set up. And it still is the law of the land. Our children belong to us not to the state.

I am asking the state of Washington and the Board of Health to stay out of our business. And if you cannot stay out of our business we will not comply!

Subject: January 12th Decision

External Email

Hello Washington State Board of Health Members,

I am writing to you on this day regarding your decision to recommend the vaccine requirement for school aged children on January 12.

My name is Marisa Stephens and I am a teacher, a mom of a 4 year old and expecting my second baby. I am writing to express my concerns about making this shot, which many think will "stop this pandemic", a requirement for school aged children.

Over the last 2 years, we have been living in an extremely hard time as a nation, as COVID has continued to mutate and spread despite the rise in vaccinations and boosters. I have many family members and friends who have received the shot and have still gotten sick with COVID and have also spread it to others. To think that requiring the shot for more people is the right answer is mind boggling to me. The narrative is, "get the shot to protect yourself and others", but as we can see by the rapid rise in cases, this is not true.

There are many natural ways to prevent getting COVID, and honestly, most people who get COVID recover from it. I am in no way saying that COVID is not serious. My dad was hospitalized in August with COVID, but we were able to send him to the hospital with Hydroxychloroquine, Vitamin D, Zinc, Vitamin C, and they put him on high flow oxygen. He was in the hospital for 10 days, and a few times they thought they were going to move him to the ICU. He recovered in a couple of months. It is January and he is back up teaching PE. He is shot free, and has done a lot of research on other ways to combat COVID.

There are so many ways to fight COVID once you get it. A shot that does not prevent you from spreading the virus or prevent you from getting it, is not the answer. If the shot truly worked, we would not have to wear masks anymore and if the masks truly worked, then we would not be in this position. But we are still at square one. Making a requirement for a shot that does not stop the spread to adults and children alike, is beyond crazy.

COVID is real, yes. I know many people who have had it very severely, but there are many proven therapeutics used to combat this virus. I have many friends and family members who have used therapeutics along with preventative care such as exercise, vitamin D, vitamin C, Quercetin, Zinc, and eating a balanced diet. I have had family and friends who have taken Hydroxychloroquine, Ivermectin, and went to medical facilities to get the Monoclonal Antibody Treatment. These have all worked very well. Treating their

symptoms with cold medicines, Tylenol, ibuprofen, and staying hydrated, resting, getting fresh air, and making sure to get up and move, are things that ACTUALLY help with COVID recovery.

As a mom of a young child, a teacher, and a citizen of Washington State, I am asking that you really consider this decision you are about to make. Requiring our most vulnerable community to put an experimental substance in their body when we do not know how it will affect them in the future is irresponsible. Every person is unique with an amazing immune system. Anything you do to or put into your body affects each individual person differently. Health decisions should always be a personal decision, not a requirement.

So once again, as a concerned WA state citizen, I believe you should reject this requirement and let parents make the best choice for each individual child. If a parent believes the shot is best for their child, then by all means, that is their prerogative. If a parent believes that the shot is not the best health decision for their child, then that should be respected, as well. Choice is important, and we are living in the land of the free, right?

I will be praying for all who are part of the health board as you make this major decision for our state. I know that God is in control, and He has all of you wrapped up in His hands. With the grace of God, I pray you will be able to make the best decision for our state.

Thank you for reading my email. I hope you really listen to the public on this very important decision.

Sincerely,

Marisa Stephens

I vehemently oppose adding the Covid vaccine as part of the school vaccines. We don't mandate kids take the flu shot! So why the Covid shot? It is already proven that virus just mutates. So Covid vaccine is not a vaccine! Not if you keep having to take shot after shot!

Kids do perfectly fine when sick with Covid. No need to put an experimental drug in their bodies!

Please note I am against vaccine mandates for children. Children are at low risk for covid and vaccines are still only Emergency Use Authorization. The school website agrees that the vaccine may cause myocarditis in young men/boys. It still has not been tested properly. Please, do not agree to require the vaccine for children.

Hello,

It is my understanding that you will soon be meeting to discuss Covid vaccine mandates for students of Washington State. I am writing to implore you that this not become mandatory in our state. It's an emergency use authorized vaccine only. And what about all the students, including my 14 year old daughter, who already had Covid this fall? Why would she be mandated to get a vaccine for an illness she already had? This makes no sense.

I am a teacher in Spokane and do not want my students mandated to be Covid vaxxed either.

Thank you for your consideration-

Firstly, before anything should be implemented in as a required vaccine to OUR children's (not YOUR) vaccine schedule, there should be thorough consideration of the VAERS reporting (which is only 1% of those that report or experience adverse reactions). Secondly there is NO approved COVID vaccine that is being distributed in the United States. Furthermore a COVID vaccine is not even FDA approved for ages 5-11 (it's under EAU). There needs to be a printed list of ALL vaccine ingredients with risks and benefits for every Covid vaccine that is offered. This is a direct violation of informed consent and a COMPLETE disregard for natural immunity and asymptomatic cases in children!! This virus had a 99% recovery rate BEFORE any vaccines! There is NO logical science to back up requiring the COVID vaccine for children to attend school. Protect our freedom to choose, protect bodily autonomy, and protect our children!

SAY NO TO COVID VACCINE FOR CHILDREN TO ATTEND SCHOOL!

Subject: King County breakthrough Cases!

External Email

Before you make any decisions wait for the state breakthrough cases.

The vaccine is not working!

King County COVID Breakthrough Report!

Breakthrough Cases: The Fully Vaccinated that Get COVID!

King County somewhat honestly presents the breakthrough data by including the actual numbers. They still present it as comparison to the unvaccinated which gives a biased view. WSDOH data is on a different report and is marginally useful. KPHD actually manipulates the data to favor the vaccine.

You will not see this type of analysis anywhere else. It should be everywhere.

You can see the vaccine is marginally effective.

This is important information when they are mandating all be vaccinated. Do these statistics warrant a vaccine mandate?

The vaccinated are spreading and getting the virus, going to the hospital and dying at a significant rate.

The only people that are truly safe from the virus are the naturally immune and those that have been tested in the last 72 hours.

Those with one Pfizer or Moderna injection or have not waited the two weeks are not included in the fully vaccinated, yet they are included in the unvaccinated.

If someone dies of the vaccine there is no record. We need three categories for the deaths!

30 days Ending 12-22-21 – 4,339 Cases 40% of the Cases

30 days Ending 12-22-21 – 26 Hospitalization 31% of the Hospitalizations

30 days Ending 12-22-21 – 6 Deaths 43% of the Deaths

They update it daily!

Subject: Vaccine requirements for ANYONE

External Email

To whom it may concern,

I completely and wholeheartedly disagree with any forced vaccine for any human; particularly, in order to work, provide, educate and be a part of society. I feel we dropped the ball as free Americans back when vaccines were allowed to be required for public school attendance. Although, never did we think we would have a Governing party that would take advantage of their position to use such a thing as this, to push an agenda on the general public. However, that is why everything is being unveiled now. We trusted our Government and that was our first mistake. They are liars, thief's, greedy, and power hungry with evil intent, but I did not realize that until COVID; so thank the Lord for that. It also sickens me that our "ELECTED PARTY" would use a form of gaslighting and abuse to force an opinion and hatred to people living different than he wants them to. Inslee and Biden both have caused many hate crimes by stating, "THE UNVAXXED ARE KILLING PEOPLE", "IF YOU ARE SICK, IT IS THE UNVAXXED FAULT", "THE UNVAXXED KILLED YOUR FAMILY MEMBER"! This is the epitome of discrimination, segregation, and pure evil. How is this an example of leadership? How is this an example of being an unbiased leader in a position whose opinion, quite frankly does not matter. I find this a form of defamation of character to individuals who are forced to state their vaccine status and treated accordingly based off the image Inslee and Biden have both portrayed to the American people. Inslee and his team, along with the Biden administration, has painted pictures of the un-vaxxed. They have created an image and planted it in every person's mind. So, when you hear of an individual who rightfully chooses to not be vaccinated, automatically, this image of a murderer, selfish, self-absorbed, poverty stricken, no body, pops into the minds of the individuals. You no longer have the ability to choose for yourself if you want to be a part of society. You no longer have the ability to be different and have a perspective that might not fit the vast majority, because the narrative of your image has already been determined. I personally have never been an anti-vaxxer; however, the push for this does not make any sense to me. I do not trust it. I do not trust their agenda. Same for the global warming crap they are pushing for. It is another means of gaining tax dollars to pad their pockets. I personally would like there to be an extensive audit of all the tax dollars we pay out. There is an unseen war going on, on the verge of explosion. If the push for children's vaccines is forced, you will lose most of your funding for schools because people are already pulling their children from public school. On that note, the quality of public education is garbage! What exactly are we teaching our children and other than a daycare center what are we paying for? My heart hurts for everything that is going on. It hurts because God gave us free will! We were the land of the free, with liberty and that is exactly what we are rapidly losing.

Sincerely,
A Mother

Subject: Re: NEW COVID protocols

Here's a thought...

Maybe have all players wear masks, during the participation, not just when seated... This goes for basketball, wrestling & cheer. We all know that masks stop covid...smh

This is the WA state 'science'. So glad that our children don't need to participate in this further nonsense, asinine behavior. They will not be tested for the common cold or flu at school. You teach education, not lecture us about health. The 'health' community has been wrong at just about every turn since this came up...

BOTTOM LINE: Let kids get it, build up their immunity and move on. covid is over, this is just the flu & common cold.

2022, no mandates, lets try it? Maybe we can even decrease the depression/emotional issues that have been climbing since these mandates took effect.

I'll leave you with one IMPORTANT thought:

IF MASKS, MANDATES & LOCKDOWNS WORK, WHY AREN'T THEY WORKING?

I will not comply.

Josh Daugherty

This email is regarding: Sakura Daugherty.

A couple important new COVID protocols to update you on:

1) we will be starting our Test to Stay program after break. This will allow any students who come in close contact with a positive case at school to take COVID tests at school, and if negative stay at school rather than having to go home! More info coming soon on that from the district. Watch your email.

2) the state health department has updated protocols for basketball and wrestling effective immediately. If your child is participating in basketball at school now (boys), or will participate in basketball (girls) or wrestling at school later this year, please see the info below and take the necessary actions.

The testing permission link below will cover your child for all testing at school (test to stay and/or sports) if/when it is needed. We will still contact you prior to doing any testing every time!

Dear Parents/Guardians of Basketball, Wrestling and Cheer Athletes:

The health and safety of our students and staff is our top priority. This letter is to inform you that on December 17, 2021 Public Health-Seattle & King County and Washington State Department of Health issued updated K-12 COVID-19 requirements for ALL sports considered High Contact/Risk Indoors sports such as Basketball, Wrestling, and Cheer. The updated mandate requires ALL vaccinated and unvaccinated athletes, coaches, athletic trainers and team support personnel to be tested 3 times per week. For high school, we will start testing on December 18 & 20 and middle school will start testing on January 3.

In addition, the Washington State Department of Health issued an update to the K-12 Schools Requirements 2021-2022 (wa.gov)

<<https://nam10.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.doh.wa.gov%2FPortals%2F105-K12Schools2021-2022.pdf&data=04%7C01%7Cgbrown%40auburn.wednet.edu%7Cb6c1f2f4b97945ff29d908d9c1a14010%7>>
in response to these recent outbreaks.

Summary of December 17, 2021 Changes

- In response to recent sports-related outbreaks, the testing requirements for high-risk sporting activities has been updated to require screening testing of all athletes, coaches, trainers and supporting personnel, regardless of vaccination status. Further, the testing frequency has increased to 3 times weekly. Among those screening tests, at least one must occur no sooner than the day before the competition; ideally and whenever possible, the day of the event.

Here is the link to the online consent form for the rapid testing. Please complete this online form immediately <https://forms.gle/bJhFb8e4ZsdpVacD6>

<<https://nam10.safelinks.protection.outlook.com/?url=https%3A%2F%2Fforms.gle%2FbJhFb8e4ZsdpVacD6>>

If this online consent form is not completed, your student athlete will not be able to participate in athletics for Basketball, Wrestling or Cheer.

You and your student need to watch carefully for the following COVID-19 symptoms; fever of 100.4 or higher, cough, shortness of breath, difficulty breathing, chills, fatigue, body aches, headache, sore throat, runny nose or congestion, nausea, vomiting, diarrhea or new loss of taste or smell. If experiencing any symptoms, your student must stay home.

If you or anyone you know need a COVID-19 test, you can test for free at 2400 Perimeter Rd, Auburn, Monday through Saturday from 8:30 a.m.-5:30 p.m. This is a drive through location but at times, you do need an appointment to get tested based on the needs of the site. This is a link to the site to make an appointment, COVID-19 testing locations and guidance - King County

<<https://nam10.safelinks.protection.outlook.com/?url=https%3A%2F%2Fkingcounty.gov%2Fdepts%2Fhealth%2Ftesting.aspx&data=04%7C01%7Cgbrown%40auburn.wednet.edu%7Cb6c1f2f4b97945ff29d908d9c1a14010%7>>

There are also now two Curative trailer sites where you also can test for free in Auburn. One is located in the parking lot on the visitor side of Auburn Memorial Stadium on 4th ST NE. The other site is in the parking lot at Rainier Middle School, 30620 116th AVE SE. These sites are open to staff, students and the public for COVID-19 testing. Hours of operation are Monday through Friday from 7:30 a.m. to 3:30 p.m. For more information about Curative or to book a testing appointment there, please visit COVID-19 Testing & Health Services | Curative

<<https://nam10.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcurative.com%2F&data=04%7C>>

If you have any health-related questions, please contact your healthcare provider.
If you have specific questions about your student's sports schedule or the testing requirements, please contact the coach.

Sincerely,

Rob Swaim, CMAA

Un par de nuevos protocolos COVID para actualizarlo:

1) comenzaremos nuestro programa Test to Stay después del descanso. Esto permitirá que cualquier estudiante que entre en contacto cercano con un caso positivo en la escuela tome una prueba de COVID en la escuela y, si es negativo, se quede en la escuela en lugar de tener que irse a casa. Más información próximamente sobre eso del distrito. Mire su correo electrónico.

2) el departamento de salud del estado ha actualizado los protocolos para el baloncesto y la lucha con vigencia inmediata. Si su hijo está participando en baloncesto en la escuela ahora, o participará en baloncesto o lucha libre en la escuela más adelante este año, consulte la información a continuación y tome las medidas necesarias.

El enlace de permiso de prueba a continuación cubrirá a su hijo para todas las pruebas en la escuela (prueba para quedarse y / o deportes) cuando sea necesario. ¡Aún nos comunicaremos con usted antes de realizar cualquier prueba cada vez!

Estimados padres / tutores de los atletas de baloncesto, lucha y porristas:

La salud y seguridad de nuestros estudiantes y personal es nuestra principal prioridad. Esta carta es para informarle que el 17 de diciembre de 2021, el Departamento de Salud Pública de Seattle y King County y el Departamento de Salud del Estado de Washington emitieron requisitos actualizados de COVID-19 K-12 para TODOS los deportes considerados deportes de alto contacto / riesgo en interiores como baloncesto, lucha libre, y animar. El mandato actualizado requiere que TODOS los atletas, entrenadores, entrenadores atléticos y personal de apoyo del equipo vacunados y no vacunados sean evaluados 3 veces por semana. Para la escuela secundaria, comenzaremos las pruebas el 18 y 20 de diciembre y la escuela intermedia comenzará las pruebas el 3 de enero.

Además, el Departamento de Salud del Estado de Washington emitió una actualización de los Requisitos para las escuelas K-12 2021-2022 ([wa.gov](https://www.doh.wa.gov/Portals/1/Documents/1600/coronavirus/820-105-K12Schools2021-2022.pdf)) <<https://www.doh.wa.gov/Portals/1/Documents/1600/coronavirus/820-105-K12Schools2021-2022.pdf>> en respuesta a estos brotes recientes.

Resumen de cambios del 17 de diciembre de 2021

- En respuesta a brotes recientes relacionados con el deporte, se actualizaron los requisitos de prueba para actividades deportivas de alto riesgo para exigir pruebas de detección de todos los atletas, entrenadores, entrenadores y personal de apoyo, independientemente del estado de vacunación. Además, la frecuencia de las pruebas ha aumentado a 3 veces por semana. Entre esas pruebas de detección, al menos una debe realizarse no antes del día anterior a la competencia; idealmente y siempre que sea

posible, el día del evento.

Aquí está el enlace al formulario de consentimiento en línea para la prueba rápida. Complete este formulario en línea de inmediato <https://forms.gle/bJhFb8e4ZsdpVacD6>

Si no se completa este formulario de consentimiento en línea, su estudiante atleta no podrá participar en atletismo para baloncesto, lucha libre o porristas

Usted y su estudiante deben estar atentos a los siguientes síntomas de COVID-19; fiebre de 100,4 o más, tos, falta de aire, dificultad para respirar, escalofríos, fatiga, dolores corporales, dolor de cabeza, dolor de garganta, secreción nasal o congestión, náuseas, vómitos, diarrea o nueva pérdida del gusto u olfato. Si experimenta algún síntoma, su estudiante debe quedarse en casa.

Si usted o alguien que conoce necesita una prueba de COVID-19, puede realizar la prueba gratis en 2400 Perimeter Rd, Auburn, de lunes a sábado de 8:30 a. M. A 5:30 p. M. Este es un recorrido por la ubicación, pero a veces, necesita una cita para hacerse la prueba según las necesidades del sitio. Este es un enlace al sitio para hacer una cita, ubicaciones de prueba COVID-19 y orientación - Condado de King.

<<https://kingcounty.gov/depts/health/covid-19/testing.aspx>>

Ahora también hay dos sitios de avances curativos donde también puede probar gratis en Auburn. Uno está ubicado en el estacionamiento en el lado de visitantes del Auburn Memorial Stadium en 4th ST NE. El otro sitio está en el estacionamiento de Rainier Middle School, 30620 116th AVE SE. Estos sitios están abiertos al personal, los estudiantes y el público para las pruebas COVID-19. El horario de atención es de lunes a viernes de 7:30 a.m. a 3:30 p.m. Para obtener más información sobre Curative o para reservar una cita de prueba allí, visite COVID-19 Testing & Health Services | Curativo. <<https://curative.com/>>

Si tiene alguna pregunta relacionada con la salud, comuníquese con su proveedor de atención médica. Si tiene preguntas específicas sobre el horario deportivo de su estudiante o los requisitos de las pruebas, comuníquese con el entrenador.

Subject: mandated school vaccines

External Email

Good morning,

I am writing to join those who oppose mandatory school covid vaccinations. I oppose it on several grounds.

1. It is an experimental vaccine.
2. Are you willing to take the responsibility and cover costs for side effects?
3. Studies are showings that myocarditis is a side of effect of this vaccination particularly for males in the teens to fifty. Studies are not yet established for children but studies do indicate that children do not have a severe reaction to covid itself unless they are immune compromised or have a co-morbidity.
4. VAERS information is being withheld from the public; consequently there is no such thing as informed consent.
5. Alternative treatments are not readily available- this is a failure, at best, of our government which limits trust.

I OPPOSE the issuance of Covid vaccination requirements for school attendance.

Sincerely,

Connie K Stiller,
resident of Otis Orchards, WA

I support a covid vaccine mandate statewide and in my school district, Mead 354. I am a registered nurse in this state and I believe that requiring a covid vaccine is no different than requiring an MMR vaccine during the state mumps outbreak in 2017. I am vaccinated and also administer vaccines in my community health clinic in Spokane. The vaccine is safe, effective and has very few side effects as I have observed. This is the best hope we have to keep kids safe and in-person schooling. This keeps our community safe and the school districts safe.

Sincerely,
Katrinka Phillips

To Whom it May Concern:

I am the mom of 3 school-age children. I have seen the impacts of the choices of unelected and elected officials in the state of Washington on my children. This virus, covid, is not going away. We are no longer in a pandemic. However, our governor is still using emergency powers to rule our state. This shot that is provided was touted as a way to prevent getting covid. It does not. It was touted as a way to stop transmission of covid. It does not. The messaging has now changed to state that this shot will help keep you from getting severely sick, hospitalized, or dying of covid. It may do that, but at what risk? So, if this shot that we are being told we MUST take and our children MUST take to be a part of society doesn't do what we have been told it is supposed to do, how can you make it a part of the required vaccinations? I urge you to remember what a vaccination is and does, and then ask whether this covid shot should be included in that definition. The efficacy of said shot is so poor that the CDC is now changing the recommendations for boosters from 6 months to 5 months. Does that mean if your child doesn't get the booster, they will be asked to leave school? Using scientific data and determinations, listening to actual health personnel that are questioning whether our children should even be receiving this shot, please do not add this to the required list for schools.

Thank you,
Shannon Castelda

The science does not show that a vaccine mandate for school children would be in the best interests of the children. Especially now with the Omicron variant being the dominant variant. We also don't know how many children could end up with long term or later term adverse effects. If you vote for the mandate you will be responsible for the future health issues of these children. Not enough data nor long term studies to support this!!

Subject: Vaccine mandate for children

External Email

Greetings WA State Board of Health,

Please do not mandate our children to get a vaccine that is clearly proven now to be ineffective in preventing infection and transmission of Covid-19.

This experimental drug simply needs more time to prove and improve.

Your job is critical in protecting the children of our future it would be unconscionable to make every child get immunized when the true long-term effects are not known - no one truly knows- clinical trials don't end for a few more years and vaccine injuries are real.

Please take the time to watch this expert panel talk about the vaccine and the impacts that some have experienced.

<https://childrenshealthdefense.org/defender/nov-2-sen-ron-johnson-cdh-covid-vaccine-injuries-federal-mandates/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdefender/nov-2-sen-ron-johnson-cdh-covid-vaccine-injuries-federal-mandates%2F&data=04%7C01%7CNathaniel.Thai%40sboh.wa.gov%7C0340c7d5851841b90b8908d9d066>>

If only a fraction of this is true, there needs to be more consideration taken before a blanket mandate is enforced.

I recognize that you are very busy and if you can't watch the whole session, please fast forward to the 2:29:00 mark. Please look at Maddie De Garay and please think about all those children and their livelihoods you hold in your hands.

Please watch Ernest Ramirez at 1:16:26, and as a parent, please listen to his story and know that you have the power to save many from suffering the most unbearable loss a parent could ever suffer

What we need is more time to figure out and study what makes one child react differently from others. We need more time to study and learn - that is all that I am asking for, time to make sure this is the best for all our children.

Sincerely,
Erina Kong

To the Washington State Board of Health,

I am writing to you today to voice my extreme concern with the policy of forcing the covid-19 vaccine to be included in the immunizations to attend public school. As a parent it is my job to ensure the health and safety of my children. To protect them against people and things what want to do them harm. I see this vaccine as one of those things that could potentially cause them harm if not now, then further into their years as they grow. This vaccine was rushed into production to say the least and is not even approved by the FDA! We do not know what the outcomes of such a vaccine will do to our already vulnerable child still in development. To require such a thing in order for a child to obtain an education is simply cruel and unjust. It is MY responsibility to take care of my children...NOT YOURS! If this should pass, I, among thousands of Washington parents will be pulling our children from public school and that will definitely impact the schools ability for federal funding as well as keep our already short staffed schools even more short staffed. I as well as my children will not be forced into a corner.

I urge you to please not require this vaccine as part of school immunization...its not right, its not ok and I will stand up for the rights of my children until they are old enough to do so themselves!

Thank you for your time

Regards,

Angela Wells

To Whom It May Concern-

I WILL NOT vaccinate MY child. If the board decides to mandate it, I WILL pull MY child out of public school and home school her. And I know for a fact there are many parents who will do the same.

I have discussed vaccinating MY child with our family physician. He has informed me it is not medically necessary for MY child or any other member of our family. Given the EXTREMELY low risk Covid poses to MY child and the fact that vaccination will not prevent her from contracting or spreading the virus, she WILL NOT BE VACCINATED!

The board of health doesn't get to decide what medical treatments and/or vaccines MY child receives. That is SOULY mine and my husband's decision. End of discussion.

With sincerity-
Diana Hutchison

Good morning. If pushing the vaccine onto children is on the agenda, which I'm assuming it is, I would like to say that if you require vaccines for school aged children I will be pulling my children out and home schooling them. My children have already tested positive for covid, therefore they have antibodies and do not need a vaccine that no one knows the long term effects of. My daughter has to use an antibiotic gel twice a day to treat the rash on her face from having to wear a mask all day. It finally cleared up over Christmas break, just in time for her to go back to having to wear a disposable mask that is absolutely useless in combatting the virus. So many parents and people are disgusted and disappointed in the way that children have suffered at the hands of people in power, you are NOT protecting them if you mandate the vaccine for kids and you will most definitely be setting back education by forcing parents to pull their children out and trying to find others ways to teach them instead of allowing them to attend school, in fear of a virus that has an incredibly high survival rate and is proven to not significantly affect children. Parents need to have the right to choose what they want for their children.

Hello.

I am a Washington state resident of 40 years, and pediatrician MD for 40 years. I am writing to express my extreme opposition to a COVID 19 vaccine mandate for children. There is no legitimate health reason to mandate this vaccine for children, who really do not get any serious symptoms from COVID. The risk of this experimental vaccine with no long term data on safety is much greater than the benefit, if any, they would get from the vaccine. As a pediatrician, mother and grandmother, I am vehemently opposed to this insane proposal and I will not allow my grandchildren to be vaccinated.

I urge you to vote with the science, which does not support a risky vaccine for children who have minimal or no risk from COVID. I urge you to vote for the freedom of parents to make decisions for their own children's health. I urge you to listen to the citizens of Washington state, a majority of which oppose a vaccine mandate for children.

Sincerely, Elizabeth Tomeo MD

Subject: Vaccine Mandates

External Email

I don't think it is a good idea to include the Covid Vaccine as a required vaccine for K-12 school kids. I have the luxury of getting time off to take my children to their pediatrician so he and I can discuss vaccination for my kids (they carry a rare genetic disease that I have). There are a lot of small groups of people that don't have the luxuries that I do (indigenous people, people of color, etc). I can't see this as being a good move to help include those that are farthest from equity.

Subject: VOTE NO ON VACCINE MANDATES

External Email

Hello all,

I just read that the Washington State Board of Health is voting on Friday on a mandate to make OUR children take the Covid-19 vaccine in order to attend school.

Have you seen that the LA County school district pulled their mandates because so many families decided to pull their kids from school? How many families currently have pulled their children in 2020 and 2021??? I know many families that have either 1) moved out of state, 2) put their kids in private school, or 3) have enrolled their kids in an on-line school.

I guarantee you, I WILL pull my three kids out of the Washington state school district if this happens. They WILL NOT be taking weekly Covid tests either if that's your solution.

NOPE

Vote no!!!

Subject: NO Mandates for Kids

External Email

Dear Washington State Board of Health,

I urge you to consider the real science (or lack thereof, since we really do not have enough data on kids and these vaccines) and the full spectrum of medical data (again, lack thereof) when considering requiring a COVID vaccine for day care and school attendance.

"A voting member of a Food and Drug Administration (FDA) advisory committee admitted Tuesday that whether or not Pfizer's Covid-19 vaccine is safe for 5 to 11-year-old children won't be known fully until it begins being administered.

"We're never gonna learn about how safe the vaccine is until we start giving it," said panel member Dr. Eric Rubin during the hearing. "That's just the way it goes." "

We do know they handle sarscov2 infection well.

Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets a vaccine, one group gets a placebo. More people died in the Pfizer vaccine group than the placebo group in the 6 month trial. Before the trials were unblinded, which obfuscates future data. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different from the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use of authorized medical products, therefore it is illegal to mandate an EUA vaccine. Comirnaty is NOT available yet.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccine adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children. Especially when their innate immune systems do SO well with the disease. Their thymus glands create more T cells than adults, thus they can respond faster to infection. We have NO long term safety data on what the vaccines will do to them, we do know they

handle sarscov2 extremely well.

Thank you for your time.

I say NO to vaccinating my child against COVID!!! It is my choice, let's look at the facts:

1. Children are not at risk
2. The vaccine poses a bigger risk to kids than COVID
3. It is my choice what I put in my body as well as MY CHILD
4. Why are we sacrificing the safety, well being and livelihood of the many to protect the few that already have pre existing conditions? Immune compromised people should be taking extra precautions!
5. If you have gotten the vaccine it supposedly protects you from COVID why do I need to be vaccinated?
6. It is our choice!!!!
7. You will lose funding because people will be pulling their children out of school, I will be.
8. I believe in vaccines , happy to get the one that was tested for the right amount of time like all the other vaccines we use. Not one that effect our RNA and could result in autoimmune disease later on.
9. Why is the fact that my family has had COVID and carry antibodies (which is what the vaccine does) not a replacement for having to get the vaccine? It doesn't make sense.
10. How is this not unconstitutional?
11. Make it stop!!!!

Thank you for your time,

Greetings,

Regarding Wednesday January 12ths' meeting, in no way should we be mandating EAU, non-FDA-approved Covid vaccinations for children. We have no way of knowing the long-term effects of this is "vaccine" has on children. And we're talking about a virus with a 99.8% recovery rate. And it's even greater for children. As a tax payer and concerned citizen I'm disgusted this is even up for consideration. DO NOT approve this horrendous mandate. We are watching.

Sincerely,

Concerned Citizen

Dear Washington State Board of Health,

As a concerned parent I wanted to reach out and voice my opposition to any vaccine mandates for school children. I have checked the data repeatedly and it is clear that the flu has caused more deaths for children 18 and under in the US in the past year than the coronavirus. For a risk that is less than the flu, mandating a new technology vaccine (mRNA) seems like a risky, high liability decision. New data is just now starting to come in related to higher risk of negative consequences of the vaccine as it is now looking like the spike protein generated by the vaccines might be crossing the blood/brain barrier which can cause problems that previous vaccine technology would not cause.

It is imperative that we wait for more data and understanding of this technology before we mandate its use in children whose risk profile from the Covid virus is so vanishingly low. Especially at this time when the Omicron variant seems to be spreading with significantly less virulence (even if it has a higher R-naught value) forcing children to take this vaccine at this time seems like a highly risky, imprudent thing to do.

Thank you for your time.

Regards,

Subject: Jab requirement for school aged children

External Email

Hello,

I am a registered voter and life long Washington State resident.

Our kids health decisions are not a state agency's choice. That is the choice of the child's parent.

The fact that these jabs are experimental, non FDA approved and that they are for a virus that has never been isolated is also cause for concern.

You do not have the authority to jab the children, all this will do is cause a further exodus from the state run schools.

Good Evening,

My name is Connor Paysse and I along with my wife are concerned parents regarding the potential to make the Covid 19 vaccine mandatory for our children. As a father of two (2.5 years and 8 months) I have some very strong concerns with making this vaccine required in schools for our children.

Covid-19 as shown in studies has little to no effect on children. In most cases they are shown to not even transmit the virus. With the vaccine being such a rushed option in fighting this "pandemic" I do not believe we need to be injecting our children with an experimental vaccine which is exactly what this is.

There have been numerous documented side effects in young people regarding this vaccine. While it does not seem to effect the elderly in the same way, the younger generation is having a lot more issues. I will not sit back and watch my children become a lab rat for an experimental vaccine.

I strongly oppose this requirement and urge you to reconsider and vote no to this becoming mandatory for schools. I can tell you right now if it is mandatory my children will not be attending public school and will be going to a private school. I know many parents who feel the same way. I went through the public school system and have turned out just fine but where you're wanting to take this now is the line I will draw in the sand and stand up for all children and say no. Do not make the vaccine a requirement for school.

Thank you for your time.

Connor Paysse

Subject: Vaccine mandate

External Email

To whom it may concern,

Let me first start out by saying i am by no means an antivaxer. All of my children have had all regular required vaccines up to this point.

I am writing you to let you know that it would be highly unacceptable to force the Covid19 vaccine as a requirement for schools for a few reasons.

Number 1 this vaccine is NEW and has not even been fully FDA approved! That by its self should be enough to understand that you shouldn't require a vaccine for kids to be educated that's not even fully approved.

Number 2 the flu vaccine has been around for many years and many people die from the flu but the flu vaccine has never been required just recommended.

Number 3. This vaccine does not prevent you from getting the virus. I understand that while measles, Varicella etc. They are required. They are Fully FdA approved and prevent you from getting it. This vaccine does not.

Since these children can catch and spread this virus no matter the vaccine status , why should it matter if they are vaccinated against it. Those who want it have received it and those who don't will then be given no choice but to find alternatives to education. This will create an even bigger divide in our already seriously lacking educational system.

We have already lost many kids to homeschooling due to mask mandates and I don't think you understand how many will leave if you force this vaccine into their education. This was approved for emergency use ONLY. How is it acceptable to force it upon our children to endure they get an education? When its not fully approved, has not been around long enough to know if there is any long term side effects?

No Vaccine Mandates for our Children in school!

Thank you

Casey

Subject: Vaccine mandate for elementary school students - STOP IT

External Email

WSBOH Members:

Please reconsider and re-think the mistake of mandating Covid vaccines for elementary school children in our state.

Instead of mandating vaccines for other people's children, please:

- Mandate Covid vaccines only for your own children, for whom no one else has that rightful responsibility for their lives & healthcare, particularly given their relative low-risk of death or hospitalization.
- Reconsider that your BOH authority to supersede a parent's responsibility for their children's lives and health must be based on better Covid hospitalization and death data than what is currently being given to the public.
- Consider that under our Washington State Constitution the state itself educates our children as an "en loco parentis" entity, that is, under the authority and on behalf of their parents or legal guardians, and that, as our children's medical care is a far more critical concern & responsibility of parents than is their education, it SHOULD also remain and even higher responsibility and authority of parents than it is of the state – unless voluntarily given to another entity.
- Consider that were the documented risks of death or hospitalization from this virus to this population be applied to other health risks common to normal life, what other responsibilities would you be taking out of the hands of our citizens – in the name of their health & safety?

I believe fervently that the vaccine mandates you are now considering constitute a serious overreach of state authority by you, as a non-elected board. Therefore, I will do what I can to expose the meager science behind the alleged health risks you are stating, and I will non-violently resist and protest its compliance at local school board meetings - continually.

Sincerely,

C. R. Harris II

To whom it may concern,

The covid 19 vaccine should not be made mandatory for school entry or daycare entry. Children are at low risk and the vaccine does not slow the spread of covid 19. The vaccine is still only EUA (emergency use authorization).

Thank you,

Washington State Board of Health
PO Box 47990
Olympia, WA 98507-7990
wsboh@sboh.wa.gov

Dear Washington State Board of Health Board Members:

I am writing in follow up with a question related to the first Technical Advisory Group (TAG) meeting held on December 29th, 2021 and considering Covid-19 for inclusion in WAC 246-105.

During that meeting, as staff was briefing the participants using a PowerPoint presentation, they indicated that the group was at the point of the fourth box in the process as shown on the below included slide. My question for Board of Health members is how is it that the TAG has progressed to step four when step one of the process has not yet been met. Step one states that the Advisory Committee on Immunization Practice recommends a **fully FDA approved immunization** against a specific antigen for the school aged population.

Board Process

The only fully FDA approved Covid 19 vaccine at this time is the Pfizer-BioNTech vaccine, marketed as Comirnaty, for individuals 16 years of age and older. There are currently no fully FDA approved immunizations for the majority of school aged children.

How is it that the Board of Health has ignored its own process to move this forward to the point of convening a technical advisory group? How can the public trust a process established by the Board of Health that is not followed by the Board of Health? How can the citizens of Washington, in particular parents of school aged children, have

confidence that the Board of Health and the TAG are fairly assessing and judging the information and criteria? I believe that in ignoring step one of this process and moving forward at a brisk pace, the Board has already "showed its hand" related to this critical decision.

There are many who believe as I do that it is far too early and there is not enough data and scientific evidence to ensure safety of the Covid 19 immunizations for children. A decision to require a Covid-19 immunization for school entry will be catastrophic and both inhumane and unethical. I implore you to not include the Covid-19 vaccine among those required for school attendance.

Sincerely,

Laura Price
Washington parent and grandparent

Subject: COVID-19 Vaccine Mandate Proposal for Schools

External Email

To the Washington State Board of Health,

As a parent and 12-year resident of Anacortes, I wanted to take the opportunity to express my concern regarding the discussion/decision to mandate COVID-19 vaccinations for students in order for them to attend in-person learning and participate in school-sponsored extracurricular activities.

Before voting to recommend implementation of such a drastic measure, I would encourage each of you to consider the following:

It is well known and documented, as reported by the CDC, FDA and vaccine producers, that the COVID-19 vaccine does NOT prevent a person from contracting COVID-19.

It is well documented that a person who is vaccinated is still able to spread COVID-19 after having contracted the virus.

It is well documented that the vaccination ONLY protects the person who is vaccinated by decreasing (not eliminating) the likelihood of experiencing more severe symptoms from COVID-19.

It is well documented and reported that ANY person who has previously been infected by, and recovered from, COVID-19 possesses a higher level of immunity than a person who has not had COVID-19 and is vaccinated.

According to the Washington State Department of Health, since March 2020, in Skagit County there have been ZERO deaths from COVID-19 among kids aged 0-19. There have been only 12 hospitalizations for COVID-19 in the same age group.

It is well documented that the Flu virus is significantly more harmful to kids than COVID-19, yet Flu shots have never been mandatory to attend school.

Vaccinated individuals are able to transmit COVID-19 to others who are vaccinated.

Current K-12 COVID-19 protocol allows vaccinated individuals who have been exposed to COVID-19 and are asymptomatic to remain in contact with others. Even though it is known that a vaccinated individual is still able to contract and transmit COVID-19 while asymptomatic as mentioned above. With this practice in place, you could argue that an asymptomatic vaccinated individual could be more likely to infect others.

Considering the above points of fact (not opinions), it is reasonable to conclude the following when analyzing the risk with respect to COVID-19:

The only person assuming increased risk with respect to COVID-19 is the individual who is NOT vaccinated.

The un-vaccinated individual poses NO INCREASED risk to ANYONE else who is vaccinated.

Given the incredibly low rate of death (ZERO) and hospitalization among kids aged 0-19 in Skagit County since March of 2020, COVID-19 poses a VERY LOW risk to students.

The overall risk of COVID-19 to students is negligible and ONLY assumed by the UNVACCINATED. Therefore, it makes no sense to implement and enforce a Vaccine Mandate for COVID-19 under the threat of denying students the opportunity of in-person learning and school-sponsored extracurricular activities should they (and their parents) choose to not get vaccinated.

Regarding the concern about the risk to teachers and staff - again, the only risk is assumed by the unvaccinated. Those who are vaccinated are protected. And vaccinated people can transmit COVID-19 among other vaccinated people.

This is a very different scenario than the Mumps, Measles, and Rubella vaccine requirements in that symptoms and complications for anyone exposed to MMR can result in pneumonia, seizures, encephalitis, immunosuppression, hearing loss, blindness and death if contracted. Again, to date, we have NOT seen anything to this level among children aged 0-19 with respect to COVID-19.

In conclusion, given the points of fact laid out above, I implore you - as our duly elected officials - to honor and defend our rights to Privacy and Medical Freedom as laid out by both the US and Washington State Constitutions by NOT implementing such a mandate. If such a mandate is implemented, you are setting the State up for legal action for something that is of negligible risk.

It is incumbent upon you all to do your due diligence and research on this subject prior to levying such an unconstitutional mandate on your community. This is about choice. Do the RIGHT thing, not the EASY thing, and DO NOT RECOMMEND A COVID-19 VACCINE MANDATE FOR OUR CHILDREN TO ATTEND SCHOOLS.

Thank you for your time and consideration on this very important matter.

Sincerely,
Jason Zaharris

Subject: Vaccines for school children

External Email

As a concerned grandmother who is taking care of my grandson I want this group to know I am very opposed to mandated Covid vaccines for school children.

There have been many side effects from these vaccines for children who have had them.

There have not been enough research done to see what the effects could be in future years for the children being vaccinated.

It is a parents right to determine their child's health care not the schools.

I want to be on record that I am opposed to mandates for vaccines for COVID-19.

Subject: Kids over Vaccine mandate

External Email

To whom it may concern,

Thank you for taking the time to read this email and your willingness to do what is best for our kids and communities.

I have been informed that on Jan 12th there will be discussions and a decision made on whether to impose a vaccine mandate on our public schools and all the children that attend. I appreciate the desire to protect our kids and create a safe learning environment; however, forcing a vaccine on our kids is unsafe and unconstitutional. The health decisions of a child is a parent's responsibility especially when this virus is not an emergency for children and this is not a true vaccine that prevents them from getting or transmitting Covid.

As elected leaders I implore you to lead within the community by promoting open discussion and rebuild trust. Now is not the time for agenda's or fear to cause us to make rash decisions which will divide our communities and force parents to make unnecessary decisions.

Thank you for your time and I pray that you will make the right decision for our public school families.

Respectfully,
Robert Day

Subject: Vaccine Requirement for children

External Email

To whom it may concern:

I can not believe the WA State Board of Health is even considering requiring vaccination for any children to be able to go to school. This is atrocious and a complete grab of power. Perhaps you don't know the data but here are some facts to consider before you make such an egregious decision:

* Pursuant to the CDC, the fatality rate for children from COVID-19 nationwide is .00003%. Accordingly, children are not warranted to be vaccinated for COVID-19.

* Pursuant to the CDC, the CDC Director and Dr. Fauci in his New York Times November 12 interview, the COVID-19 vaccine will not prevent infection or transmission of the COVID-19 virus, nor will it prevent serious injury, hospitalization or death any longer. Therefore, the vaccine is no longer the best tool for prevention of transmission. It is now a medical treatment, at best, hence it cannot be mandated as treatments are a personal medical choice pursuant to the state and federal Constitutions.

* Pursuant to the FDA, the vaccine manufacturers, and multiple scientists across the nation and the world, these vaccines pose grave risks of severe myocarditis, blood clotting, and neurological damage to name a few, predominantly prevalent in adolescents. As such, the risks of taking the vaccine strongly and significantly outweigh the benefits especially as it pertains to the pediatric community.

Sincerely,
Brandi Butler

Subject: Mandatory jab is illegal and against Nuremberg Cord

attachments\1AA851EB654B452A_image0.jpeg

External Email

Dear, board members

It is unconstitutional and illegal to mandate any jab without personal consent. Federal judge just ordered to block mandatory jab to military as "There is no Covid 19 exception to The First Amendment."

It is also against Nuremberg Cord, Article 6, Section 3, "No government can mandate or force medical treatment without individual consent."

You may be liable for the rest of your life if mandate, and "I was just following the orders," will not excuse you from liability as it didn't work for Nazis workers.

Parents has had enough with this Covid nonsense.

Sincerely,

Very concerned parent of 12 and 17 years old

Subject: Vaccine Mandate

External Email

Good evening. I understand the Board is about to have a meeting to make a decision (Thursday)on whether the covid vaccine should also be required for students attending school. In the past there weren't so many health risks AFTER getting a vaccine. There are medical documents of children dieing or severely getting sick after getting the shot. The numbers of younger students under age 12 don't have very many covid cases or deaths as adults do. It's too new. Please vote NO. If this gets pushed through, I fear our public school system will see more students being withdrawn & put in private schools. Our public school system isn't the place to push this political agenda. We as educators, you as professionals should have the best interest of ALL kids. Not the political scene or medical companies. It's about attending school in the UNITED STATES OF AMERICA. We value freedom yet rules & laws get made (without a vote to the people) taking away more freedoms of choice or the parents rights to parent. I hope you will take medical & religeous freedoms into consideration. Please say NO!

Thankyou,

Teresa A. Kollmar

Subject: WSBOH Vaccination Requirement for School Aged Children RE: January 12, 2022

External Email

To all Board of Health Directors/Members/Delegates,

It has been brought to my attention the meeting to be held on January 12, 2022 to recommend vaccination for all school aged children. I am writing to inform you NOT to require such a vaccine for our youth. There has not been enough time to test the repercussions of such "vaccine." You are overstepping parental rights and the right to choose what is best for THEIR children's health. It is not up to you to make these decisions for OUR children.

The data has repeatedly shown that children are not affected by COVID-19 in a deadly manner. "Keep in mind it is rare for children to die from either virus. CDC data shows COVID-19 and the flu combined make up less than 1% of all pediatric deaths since the start of the pandemic in March of 2020." <https://www.msn.com/en-us/health/medical/verify-covid-19-has-caused-more-pediatric-deaths-than-the-flu-in-the-last-18-months/ar-AANmi6V>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.msn.com%2Fen-us%2Fhealth%2Fmedical%2Fverify-covid-19-has-caused-more-pediatric-deaths-than-the-flu-in-the-last-18-months%2Far-AANmi6V&data=04%7C01%7CNathaniel.Thai%40sboh.wa.gov%7C6002e8e4b1af4d1a9acf08d9d06e613f%2F>>

We all watch the data, the overreach, the insanity that has come with this virus. Children will lose greatly with a push of a vaccine like this. Not only are you risking their health with the many side effects that could come for years, but you will force parents to withdraw their children from public schools. That will be a major ripple effect as far as funding, depression, and complete hardship; with children taking the greatest hit from that.

Again, I am voicing my concerns to NOT REQUIRE THE COVID-19 VACCINE to any one, let alone our children.

Sincerely,

Ashley Pratt

Hello-

Please send me the science that says our CHILDREN need to have such a new vaccine injected into their body... For a virus that they would beat (with OVER 99% survival rate).

There is a reason that families are leaving this state and seeking freedom, OR withdrawing their kids for homeschooling in the safety of their own home, like my family. I pulled my family out of the public schools when you guys decided to cross lines before.

I'm upset that this is happening. I'm upset that children are being targeted. I'm upset that the schools think parents are co-parenting with them. I'm upset because this is all propaganda that we're not allowed to question. I realize there is a virus (I'm not denying that), but to force parents into having their children get the shot is hilarious, especially since those vaccinated are spreading it at the same rate as those who are not vaccinated.

I'd love a personalized email, but doubt I'll get that.

I'm looking forward to your general email that will be copied and pasted.

Subject: Mandates for vaccines

External Email

I absolutely oppose vaccine mandates of any kind and especially for school-aged kids. There is absolutely no basis behind this recommendation given vaccines do not stop the person from getting the virus or spreading it. The CDC has also stated the viral load is essentially the same between vaccinated and unvaccinated people. There is no logical reason to mandate this other than abusing your power.

In addition, Omicron, the main variant is shaping up to be a mild virus where all people who contract that variant have an even higher survivability rate than many other risks we readily accept every day. Please see studies coming out of S Africa that validate this.

Pfizer's own vaccine trial analysis was flawed and well-documented in a video by the Canadian Covid Care Alliance.

<https://www.canadiancovidcarealliance.org/media-resources/the-pfizer-inoculations-for-covid-19-more-harm-than-good-2/>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.canadiancovidcarealliance.org/media-resources%2Fthe-pfizer-inoculations-for-covid-19-more-harm-than-good-2%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cf54aef96afae45f538cc08d9cffb165a%7C11d0e2172>>

If you can implement mandates after watching this then you are operating under pure evil intentions.

With over a million VAERS incidents reported related to this vaccine (more than all other vaccines combined since the 70s) there is a strong warning signal for our children's health that is being blatantly ignored.

Also, look at the studies on the mask - they don't work and should be dropped for our schools.

I don't know how you could ethically mandate this vaccine.

Subject: Kids vacine mandate

External Email

I am against the mandate for vaccinations in order for kids to attend school. Kids are low risk for covid and my kids have already had covid. I do not want mandates for kids and the vaccine ever. If this should pass, we will be removing our child from public school.

Thank you
M. Fox

No to the vaccine mandate. I do not believe it is right to force our kids to take this vaccine. It is not proven safe or effective.

Also, in LA County 30,000 children would not comply to their mandate. So the mandate was pulled. How many more kids do you want pulled from public schools? This is not a one size fits all problem. Those at high risk from Covid etc. should be free to get the vaccine if they choose. Healthy kids do not need an EUA drug that does not stop risk of infection.

Hello,

Please do not make the COVID vaccine mandatory for our children to attend school next year. This vaccine does not stop COVID from happening. Children have a high rate of recovery. The decision should be up to the family to decide what is right for them. My family and I do not support FORCED vaccine requirements and think it is wrong. Please stand up for our freedom and EVERYONES right (no matter what they believe) to do what we think is best for our families.

Thank You

Washington State Board of Health, to whom it may concern,

My name is Autumn Zesch, a mother in Tacoma Wa. Who hopes that one day my child will be able to not only attend, but enjoy, grow, and prosper in the same public schools that I attended. However, that will not be happening if you require the very new Covid-19 Vaccine for school age children.

If Washington state passes this abuse of power, you have my word that not only will my son never attend your corrupt public school system, but the schools will never receive any financial or physical support from my family.

Leave our children out of it.

Hello

I am writing this email to express my concern to force my child to get vaccinated against my will.

It is wrong and against the law to violate my rights as a parent. If my child developed a heart condition from this vaccine or any other side effect you will not accept responsibility.

It is wrong on all levels to misuse your power to force these in schools.

As parent I will not accept anyone or any government to put anything on my child's body because it is my God given right to protect my child.

Thank you.

Subject: January 12, 2022 Board Meeting Agenda - Immunization Criteria

External Email

To Whom it May Concern,

This message is in regards to the upcoming January 12, 2022 meeting. Included on the agenda is immunization criteria for childcare and school entry. It has been brought to our attention that this time will be used to discuss adding the COVID 19 vaccine to the list of requirements for public schools.

The COVID vaccine should absolutely NOT be a requirement for our children. Not only are children extremely low risk for Covid, the CDC classifies their symptoms as mild and even asymptomatic. Furthermore

there is only one vaccine that would even be available for those under 12 (such as our daughter) and it does not even have full FDA approval. EUA should not be mistaken for full clearance. The vaccine itself does not prevent against contracting the virus. At best, it produces a reduction in symptoms, but we know that regardless of vaccine status, children already present with mild symptoms if any at all. This decision should be made by each child's parents after careful thought and consideration. You are not our child's parents, and you should not call the shots!

Subject: My Public Comments

External Email

To Whom It May Concern-

I WILL NOT vaccinate MY children. If the board decides to mandate it, I WILL pull MY children out of public school and home school them. And I know for a fact there are many parents who will do the same.

I have discussed vaccinating MY children with our family physician. He has informed me it is not medically necessary for MY children or any other member of our family. Given the EXTREMELY low risk Covid poses to MY kids and the fact that vaccination will not prevent them from contracting or spreading the virus, they WILL NOT BE VACCINATED! The board of health doesn't get to decide what medical treatments and/or vaccines MY children receives. That is SOULY mine and my husband's decision. End of discussion.

With sincerity-
A. Martinez

Subject: For your Jan 12th meeting

External Email

I am writing in regards to the potential requirement of a forced experimental "vaccine" on our children to attend public schools.

Enforcing such a requirement would wreck our small communities especially. Our family as well as many others in our small community and surrounding communities have already stated that we will not send our children to any school if there is a requirement for an experimental vaccine such as the Covid-19 vaccine for our children to attend school.

Enforcing this requirement with no options for parents to their rights of choice, will result in the loss of children in our schools and the potential collapses of the schools and communities. I imagine this would be a domino effect in bigger cities as well. If they haven't already, parents will quit their jobs to homeschool and we will see an even greater economic downfall. There has already been a big number of children who are not attending public schools at this time.

This would be a detrimental decision on so many levels. Please think about if you are ready to be held personally responsible for enforcing a requirement on children when you have no idea of the immediate and/or long terms effects these shots will have on children.

Children that will be subjected to the potential risks of a shot because their parent(s) feel that they have no other option. God entrusted each of us with our children not the government to decide what is best for our children.

It needs to be the parents choice.

Thank you for your time and consideration.

Sincerely,

Kellie Krogh

Subject: January 12th Meeting - Concerned Citizen

External Email

Board Members,

I write to you as a mother of two young boys and ask that you pump the brakes on your decision making efforts the last two years and really review the evidence around covid-19 protocols. What is working? Are you considering the long term health and safety of our children?

Where is the long term safety data on the covid-19 vaccine? Is the board reviewing the VAERS data to determine if mandates are safe and effective for all children? Is the board reviewing the safety of mask wearing? Where is the evidence that masks prevent the transmission of viruses? What about the lack of developmental cues our children are receiving as they cannot see the faces of their peers and teachers? What will the long term mental health effects be when generations of children are forced to comply to fear mongering tactics?

To be clear here is what we support and oppose:

1. I oppose the Board's formation of a Technical Advisory Group to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose COVID-19 shot mandates, period!
2. I support Informed Choice Washington's Petition for Rulemaking (item 11 on the agenda). This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

As a parent, it is my choice on what is best for my child, not the board of health. More parents are waking up and questioning the hasty decisions and we will not tolerate poorly informed decisions that will have lasting effects in our communities.

Subject: January 12 BOH Public Meeting

External Email

Hello,

In reviewing the agenda for the upcoming January 12 public meeting, I see that there will be discussion regarding the Immunization Technical Advisory Group (TAG) and a petition regarding Chapter 246-105 WAC.

I'm writing to express opposition to any COVID-19 shot mandates, and especially so for school-aged children. Though obfuscated by the CDC, FDA, and other arms of HHS, there is plenty of evidence indicating lack of efficacy and lack of safety for the current inoculations on the market for COVID-19.

Perhaps the most succinct resource is the Canadian Covid Care Alliance, which has a pdf summary on their website (<https://www.canadiancovidcarealliance.org/wp-content/uploads/2021/12/The-COVID-19-Inoculations-More-Harm-Than-Good-REV-Dec-16-2021.pdf>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.canadiancovidcarealliance.org/wp-content/uploads/2021/12/The-COVID-19-Inoculations-More-Harm-Than-Good-REV-Dec-16-2021.pdf&data=04%7C01%7CWSBOH%40sboh.wa.gov%7Caa35eaf4599045ea764f08d9d0123d1c%7C11d>). A video going through this pdf can be found on their home page as well. All of the information presented is linked, much of it directly to Pfizer's own study, which was unblinded well prior to Phase 3 of the trial being completed, but yet still indicates major safety and efficacy concerns.

Furthermore, the publicly available data on mortality rates in children for COVID-19 indicates rates well under other causes of death such as homicide, car accidents, cancer, suicide, and numerous other maladies. When this is taken into account along with clear signs of risk with the inoculation (permanent disability, myocarditis, etc.), it becomes glaringly obvious that most parents are not getting the entire picture when it comes to informed consent of the COVID-19 inoculations.

Based on the current inoculations on the market, there is no logical justification for any shot mandates for school-aged children.

Please confirm the BOH (and the TAG) have reviewed these resources along with publicly available mortality and adverse event data prior to discussions on any possible mandates. It is not acceptable for the BOH to take a stance similar to the FDA, which stated during the FDA approval process of Pfizer's inoculation: "We're never going to learn about how safe this vaccine is unless we start giving it. That's just the way it goes." This is unacceptable, especially when discussing whether children should be taking these shots.

Lastly, I support the petition put forth by Informed Consent Washington for this meeting (Item 11 on the agenda).

Respectfully,

Curtis Earl

Subject: Vaccine requirement Jan 12th

External Email

Hello Washington State Board of Health Members,

I am writing to you on this day regarding your decision to recommend the vaccine requirement for school aged children on January 12.

My name is Marisa Stephens and I am a teacher, a mom of a 4 year old and expecting another baby. I am here to express my concerns about making this shot that many think will "stop this pandemic" a requirement for school aged children.

Over the last 2 years we have been living in an extremely hard time as a nation, of people getting sick from COVID. BUT, once the shots and booster shots have come out, we still are seeing the numbers spike, not only in the unvaccinated people, but in the vaccinated as well. I have many family members and friends who have gotten the shot and still have gotten sick with COVID and ALSO have spread it to others. To think requiring the shot for more people is the right answer is mind boggling to me. The narrative was "get the shot to protect yourself and others." But it doesn't do any of that.

There are many natural ways to prevent getting COVID, and honestly, most people who get COVID, recover from it. I am in no way saying that COVID is not serious, my dad was hospitalized in August with COVID, but we were able to send him with hydroxychloroquine, Vitamin D, Zinc, Vitamin C, and they put him on high flow oxygen, he was in the hospital for 10 days, and a few times they thought they were going to move him to the ICU. He recovered in a couple of months. It is January and he is back up teaching PE. He is shot free, and has done lots of research on other ways to combat COVID.

There are so many ways to fight COVID once you get it and a shot that first of all does not prevent you from spreading the virus or prevent you from getting it, is not the answer. If the shot truly worked, we would not have to wear masks anymore, if the masks truly worked, then we wouldn't be in this position. But we are still at square one. So making a requirement for a shot that does not even stop the spread for anyone, including children who will mostly only get cold like and flu like symptoms when they get COVID unless they have an underlying condition, is beyond crazy.

As a mom of a young child, a teacher, and a citizen of Washington State, I am asking that you really consider this decision you are about to make, about having our most vulnerable community put a substance in their body that we do not know how it will effect them and we know, it is proven, that it is not combatting COVID effectively. I truly believe that getting this shot is like a flu shot. It should be a personal choice not a requirement.

COVID is real, yes, I know many people who have had it very severely, but there are ways other than this shot to combat this beast of a virus, and I have many friends and family members who have tried the other things. Like preventative care with exercise, vitamin D, vitamin C, quercetin, Zinc, and eating a balanced diet. I have had family and

friends who have gotten COVID who have taken hydroxychloroquine, ivermectin, and went in to get a monoclonal antibody, along with treating their symptoms with cold medicines, tylenol, ibuprofen, and staying hydrated, resting, getting fresh air, making sure to get up and move, and those things seem to ACTUALLY help with recovering once they have been sick.

I will be praying for you as a whole health board as you make this huge decision for our state. I know God is in control, and He has got you all wrapped up in His hands and with the grace of God you will be able to make the best decision for our state.

Really think about what could happen if we continue forcing a shot on people that are not doing the job that our public health professionals say should be "stopping the spread" of this crazy virus. These kids are our future, and have immune systems, if our health officials would give some natural health advice, I bet the number of cases would start to drop. This shot is not the answer to fixing our health crisis.

Our leaders have found a way to control the people, by spreading so much fear into people, that everyone is following this narrative, living in fear, and thinking this shot is the only thing that will save them. But it's not.

So once again I really think you should reject this requirement, and let parents make the best choices for each individual kid. If parents think the shot is best for their kids, then by all means, they should let their kids get it, but if a parent thinks that the shot is not the best thing for their own kids then that should be okay too.

Every person is different, everything you do to and put into your body affects every individual person differently. So if people are feeling like the shot is not a good idea for them personally, I think people should understand that just like an allergy to dairy, or to a cat for one person, it might affect another person completely differently.

Anyway, thank you for reading my email. I hope you really listen to the public on this one.

As a concerned WA state citizen, I disagree with the decision of making this shot a requirement for our school age kids. Choice is important, and we are living in the land of the free, right?

Best Wishes,
Marisa Stephens

Subject: NO COVID vaccine mandates for children

External Email

I am writing to let you know that as a parent of 3 Washington state students, I strongly OPPOSE any COVID vaccine mandates. My children all have had covid and have natural immunity. We are currently seeing that with Omicron, the vaccines do little to nothing to even stop transmission. Where there is any risk, there must be a choice. You do not have the right to take parent's medical choices over their children away. I will pull my children from the public school system before I will let you force me to give them an experimental gene therapy that won't finish long term studies for several more years. Do the right thing. No covid vaccine mandates for our children in Washington state.

Sincerely,
Sara Johnson-Buell

Subject: Do NOT REQUIRE the C-19 vax for school children

External Email

To Whom It May Concern,

I am very concerned about requiring the Covid-19 shots for children and adding this "vaccine" to the required vaccinations for school aged children. This "vaccine" is absolutely too new to be required for children. There are absolutely NO long term studies done on these vaccines and they are still only approved under EUA. This alone makes it so you cannot and should not require or mandate these "vaccines" for children. Further, children do not have a high risk of dying from COVID-19. They just don't! So why would you push an untested vaccine, that has known side effects of causing heart problems on children who have a very small chance of actually dying from the illness?? This is not right. If parents want to make an informed decision and get their child vaccinated for covid-19 then that is one thing, but it is not right for you to require or mandate that children have this vaccine. I hope that you will look at all the studies that are being done, adverse reactions that are happening because of the vaccine, and realize that it is not your place to require or mandate this vaccine for anyone but especially for children.

Thank you for your time and honest consideration!

A concerned mother of 4 daughters,

I am a mother of 3 and a Pharmacist by profession. This mandating of unproven vaccines is a stain on the medical profession and an unconstitutional overreach by people who have no boundaries or common sense. Children have been almost completely protected from the devastation that this virus has caused more vulnerable adults. Yet the college students were immediately discriminated against, setting the stage for what was to come for the rest of civilization. No one should be made to take a medication which has a very small population and history of use. There will most definitely be a mass pulling of children from public school and also encourage a movement of families out of Washington. Of course for many families, especially the more disadvantaged, these choices will not be an option and they will be left to ignore their own better judgement to fit the profile expected of them and their children. This is a tragic turn this state and country has taken. And just like Germany almost a century ago, the world will judge us for it. Omicron is spreading like wildfire. Vaccinated kids can go to school even after exposure though all the data says they are not protected from getting or spreading the virus. Meanwhile healthy unvaccinated kids sit at home. Every mandate from lockdowns to masks to vaccines have done nothing to stop this virus. It is time to start letting people learn how to improve their health and weight and stop the illegal treatment and discrimination of our citizens. The government needs to get busy on fixing the problems they created and let families make their own decisions on how to protect themselves. God help us if that does not happen.

To Whom It May Concern:

This entire idea is a total infringement and stretch to consider "including" COVID-19 vaccines under WAC 246-105-030! It's also a total waste of tax payers money!! This WAC says it all....."IMMUNIZATION OF CHILD CARE AND SCHOOL AGAINST CERTAIN VACCINE-PREVENTABLE DISEASES"! I am focusing on the word "preventable" in this WAC. The message from the drug companies, our government, and local municipalities from the start was that the vaccine would "prevent" a person from getting and or spreading the COVID-19 virus in adults. Since then we have learned this to be untrue! Not only can vaccinated get COVID-19, they can also spread it just as easily. Not to mention every 6-12 month there have already been 2 widely known variants in Delta and Omicron and many more variants to come, as Coronavirus has been around for decades. It has already been proven the vaccine in adults did not prevent, stop, or even mitigate these variants in industries with 97%+ vaccination rates such as the NFL, NBA, and NHL to mention a few. All of which have had higher rates of COVID than the previous seasons/year with "choice" vaccinations! Or the Airline industry which is cancelling flights at unprecedented rate that they say is COVID related. Interesting, since almost every Airline demanded employees' be vaccinated!

Chicken Pox, Measles, Polio, Mumps, etc. listed under WAC 246-105-030 in Numbers 1-11 are preventable with an early childhood vaccine regiment between parent and physician. Again, the word "preventable". This whole process is unnecessary! Allow choices to be made on all FLU vaccines, just as we have for decades. It's unconstitutional and against our civil rights to force an experimental vaccine that hasn't been properly tested in our kids or adults.

All this discussion, fear, and misuse of emergency power will create chaos, distrust, and massive un-enrollment in the public school systems of Washington State. Ultimately harming the public school system, the amount of staff they employ, disrupting our children's education, the quality of education, and community division! We and many others will unenroll or kids immediately if this is forced. We have enough reasons and problems in the world creating division already, we don't need our local school systems creating more! And remember that covid is a 99.9% SURVIVAL rate not a DEATH rate, more people die from the normal flu every year!

Subject: RE: Covid-19 Vaccines for Children - Are You Kidding???
Importance: High

External Email

Dear Washington State Board of Health,

Our children are not for human experimentation. Mandates for inoculating anyone without full disclosure of experimental gene-therapy injections should never be an acceptable tactic for our government agencies to approve. Even though the media continues to tell us that these injections have received FDA approval, that is a lie. Pfizer's only approval is to license BioNTech as Comirnaty and even with that, Comirnaty has not been distributed in the U.S.

<https://dearpandemic.org/comirnaty-is-available-in-us/>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdearpandemic.org%2Fcomirnaty-is-available-in-us%2F&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cb1e5cd08b8814d34f61308d9cfbf34ad%7C11d>>

This is copy/pasted directly from the Congressional Research Services:

Pfizer and BioNTech are marketing their licensed vaccine under the new brand name Comirnaty (pronounced koe-MIR-na-tee). Comirnaty has the same ingredients and formulation as the Pfizer BioNTech vaccine that is authorized under the EUA. The two products differ in branding and labeling but can be used interchangeably without any impact on safety or effectiveness. Although Comirnaty is fully approved by FDA for

Subject: Vax mandate for schools

External Email

I'm a parent of 2 kids in public school who is 100% against the Vax for kids. The threat of covid for kids is non existent and the risk of side effects outweighs any benefits. If you really care about our kids stop terrorizing them with this insane overreaction to covid, and do not make this Vax a requirement.

Subject: Vaccine requirement for school

External Email

We are Washington state citizens with 3 school-aged children, and are very against a covid vaccine requirement to attend school.

Any vaccine without determined long term safety information is not something that we will risk having injected into our children. They are not at severe risk of harm from this virus and the possible vaccine side effects are not worth any possible benefits for them.

I know for a fact that many other people share my opinion and will also simply pull their children out of the school system entirely if need be. Their health is more important than anything and we will not comply. We will remain in control of our children's health, not the government.

Thank you for your time.

Sincerely,
Katie Woodard

Subject: Mandated covid vaccinations for students

External Email

I don't believe that the time is right for mandating additional vaccinations for students. First off, this vaccine is not like any others from the past. It works differently. Then comes the question of how well does it work. Obviously if you're still able to contract as well as spread covid after being vaccinated, then it's not nearly as effective as the vaccines for polio and the others. In no way is it going to eradicate this disease. The next thing is that if this virus acts like every other virus that's come down the pike throughout history, it will become less deadly and possibly more contagious. Sounds a lot like colds and flu. Every person I know that takes a flu vaccine still catches the flu from time to time because of the number of variants of the virus and the fact that a vaccine will never provide protection against all the variants. Lastly, if politicians hadn't politicize this issue so much and kept it down to the actual science and not up to their own interpretation with their own agendas being at the root of their decision-making, then there would have been more to talk about. As it stands now, I'm not for mandatory vaccinations for anyone. That being said, I have been vaccinated but I can assure you that it was not because of any mandates. Since no one has figured human nature into the equation, I'll put my two cents in and just say. People don't like being told what to do and a lot of times if you try that on them they will just go in the opposite direction.

No to mandated covid vaccination, they don't know enough about the disease, they don't know enough about the vaccine, they don't know enough about human nature. What they do know is using this as an opportunity to get their political agenda through using fear and intimidation to reach their goal.

In closing, what you may find is that you end up with a half full classroom because parents will do what they have to do. They don't have to rely on the government to get their children educated which is barely happening now anyway

Subject: NO to vaccine mandate

External Email

As a parent to three school aged children I'm writing because I am vehemently opposed to mandating the Covid vaccine for school aged children. There are three main reasons why.

First, the current vaccine does not have any long term safety studies done yet, they are simply too new. The studies and evidence currently available show that receiving the vaccine poses far greater health risk to children than Covid does. VAERS data as well as many other studies prove this. Children have a 99.998% survival rate with Covid, a vaccine with possible side effects is not necessary nor a smart risk assessment.

Secondly, the vaccines do not stop the transmission of Covid. There is no argument that vaccinating someone helps protect anyone other than themselves. If children have basically no risk of harm from the disease, a vaccine is not necessary. Teachers and staff are already vaccinated so they should be protected if their vaccine works to lessen symptoms. Our hospitals are not overwhelmed with Covid patients, if they are struggling it is because of the firing of unvaccinated workers, delayed/improper care for other issues, and/or extreme quarantine and safety precautions unnecessarily being taken because of Covid.

The third reason I am opposed to mandating this vaccine for school entry is that while the FDA did approve the Comirnaty version of the Pfizer vaccine, it is currently unavailable anywhere in the US. Public schools may not require an experimental vaccine that is under EUA. The only vaccine currently available to our children is NOT the FDA approved version.

Thank you for your time,
Alissa H

Subject: OPPOSE vaccine mandates for children

External Email

To Whom it May Concern:

I am opposing your formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school-aged children.

I am writing to vehemently OPPOSE any vaccine mandate in children. The shots are still EUA and haven't gone through the proper 3 phase trials for all ages. (Yes, I know the word game the FDA and CDC did for Comirnaty approval which isn't even available in the USA). These shots DO NOT prevent you from contracting covid. More and more vaccinated individuals are contracting covid despite being told early on they wouldn't get it if they were fully vaccinated against it. This is not a vaccine per definition because it doesn't stop one from contracting it. Children are not in danger of dying from covid. There is over a 99.9% survivability rate for children. Contracting covid is not a death sentence. Just because cases of covid are going up doesn't mean deaths are. This is a virus that will never go away despite efforts to vaccinate against it. Viruses constantly mutate and become less deadly over time. The choice to inoculate for this virus should be left up to parents and the doctor. Just say NO to required covid shots for school aged children.

I am in full SUPPORT of the rulemaking petition set forth by Xavier Figueroa PhD on behalf of Informed Choice Washington. This needs to be looked at and supported by all involved.

Thank you for your time.

Subject: Informed Choice WA- Petition to Adopt a New Rule

External Email

Good afternoon! I am writing to express my deep concern over the prospect that WA will require children in our school system to take medical procedures under any circumstances, but in particular, those that are still under EUA.

I oppose the the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose any kind of vaccine or other medical procedure mandate, period!

I support Informed Choice Washington's Petition for Rulemaking, item 11 on the January 12th agenda. It was filed by Xavier Figueroa, PhD, on behalf of ICWA, and asks the Board to establish a new rule that prohibits the board from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

After almost 2 years of experience with the COVID19 pandemic we've all seen the well documented fact that children 1) Aren't at an increased risk of death or serious illness from COVID 19 and 2) They do not spread the virus.

How can we morally require that they undertake a treatment that we know will not help them but that we know could be harmful or even fatal to them?

It would seem that the CDC and other government authorities are pressing for this, even in the absence of any compelling data to support a vaccine mandate in children. We look to you, our fellow Washingtonians, to look into this carefully. Your decision will impact hundreds of thousands of children and their families.

Thank you for your consideration.

Dear Washington State Board of Health member,

I strongly oppose recommending these experimental vaccines for children. There is no data that proves that they are without risk. There are MANY FDA approved vaccines and drugs that over time were proved to be detrimental. Swine flu, for example. We simply do not have enough information to deem these as safe, especially in developing children.

Sincerely,
Pauline Salo

Hello,

I am writing this email in regards to our children and their rights to be able to attend public school. This education is funded by tax payers and should not be withheld from ANY child of WA state based on their religious beliefs or personal preferences. We have always had exemptions for vaccines and a covid vaccine should be no different. All of our children deserve access to equal education and without discrimination. I am beyond appalled by how heartless this state has operated during the pandemic by way of promoting division and supporting isolation of our children by encouraging learning online as opposed to in person.

Covid is something we have to live with and OBVIOUSLY masks and vaccines have not solved the issue. I am firmly against requiring vaccines for children to attend schools as this was not voted on by the public nor is it accommodating for all of our children. Segregation will not cure covid but only increase childhood depression and anxiety and eventually suicidal tendencies.

This entire state has been a laughing stock across the country and this is just one more example of how you've failed us. Do not fail our children again.

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaxx to the WAC 246-105 schedule of required vaccines for children to attend schools. These covid vaccines aren't working to stop the spread of covid or from getting covid. I got my covid vaccine and I've had nothing but side effects from the vaccine and now have had covid twice (much worse than my family members who aren't vaccinated). These covid vaccines aren't FDA approved and are doing more harm to our health than good. Natural immunity is all that's needed to fight covid. Please don't force children to get these covid vaccines!

To Whom it May Concern,

I am adamantly opposed to any and all increased policies and practices intended to inhibit the spread of SARS COV 2 in the population of Washington State residents.

The misuse of emergency powers based on a stated pandemic is egregious and tyrannical. We as a state and nation have 2 years of knowledge regarding transmission, infection and early treatments, 3 widely available vaccines, and an over abundance of tests to identify the illness early in the elderly.

To further remove or restrict the liberties of the people of Washington State are scientifically unfounded and only serve to perpetuate fear in the already terrified vulnerable.

Children are off limits for mandates of any kind. Data has proven and continues to prove they are not a significant vector of spread and they are not at risk for severe illness. Any action to for inject children with an experimental vaccine or reinstitute isolation or restrictions of our youngest and most emotionally fragile population are abusive and disgusting.

Stop mandating, start educating.

Stop restricting, start encouraging.

Stop experimenting, start researching.

Subject: Consideration of adding Covid-19 Experimental Use Authorization shots to WAC 246-105

External Email

To the State Board of Health,

I am writing to strongly OPPOSE adding ANY and ALL covid 19 mRNA treatments to the WAC 246-105 list of required vaccines for children to attend school.

All vaccines come with some risk to children and society, be they small or great, and no vaccine should be added to this list lightly. But, these new treatments called 'vaccines' for SARS COV2 should never be considered for the reasons listed below.

1. All covid-19 'vaccines' being used are still listed under EXPERIMENTAL USE AUTHORIZATION, and therefore, by law, use MUST be voluntary. No person can legally be required to take them. And no parent can legally be required to authorize them for their children.
2. This SARS COV2 virus has been statistically proven to be benign in children. Children have less chance of serious illness or death from Covid-19 than the average cold. Statistically 0%. We have never required a vaccine for a benign illness in children with a statistical death rate of zero.
3. Children have been proven to not be carriers of this disease and therefore do not asymptotically spread it to adults.
4. The many SARS COV2 'vaccines' now in use under EUA have been proven to be dangerous and deadly by the CDC's own VAERS system, and also by many, many peer reviewed papers based on the CDC's own statistical collection data.
5. MRNA technology is new and has not been proven safe or effective, in any age group, in long term studies.
6. The cost to society from medical treatment for vaccine injury in all age groups is already mounting. It cannot be cost effective to require this treatment in healthy children who are not at risk of serious illness or death.
7. Washington State citizens have overwhelmingly demonstrated that SARS COV2 mRNA technology treatments are not wanted or acceptable, especially in children. Less than half the population of our state is considered 'fully vaccinated' despite them being widely pushed and available. The public does not want these 'treatments' nor do we want them for our children.
8. The above points make it completely clear that these treatments do not meet the 9 criteria required when Reviewing Antigens for Potential Inclusion in WAC 246-105-030 <https://sboh.wa.gov/Portals/7/Doc/Publications/ImmunizationCriteria-Update2017-Final.pdf>

Be it known, that if, after review of the information above and peer reviewed studies and data collection of the vaccine injured, these treatments are approved by this board to be added to the list of required vaccines under WAC 246-105, the members of this board will be held responsible under Nuremberg codes for all maimed and injured children as a result of these EUA 'vaccines' forced without consent. The citizens of this state know and understand the freedoms and responsibilities we are afforded in our state and national Constitutions. And we stand on them.

In closing, I strongly request that no SARS COV2 EXPERIMENTAL USE AUTHORIZATION drugs be approved for inclusion in WAC 246-105.

Thank you,
Julie Michener

Subject: No more mandates!

External Email

Happy New Year! It is now 2022 and we are still pretending there is a state of emergency related to a virus from 2019. It is time to move on. Most of us have already moved on and it is time for the board of health to try to keep up. It is time to end the emergency declaration and all associated mandates. It is definitely not time to add more mandates to the list. It would be a particularly bad idea to mandate COVID vaccinations for children. Those of us who are opposed to the idea will not be complying anyway, so don't waste your time. Please review the declaration and information at the following link as you consider your decisions: <https://doctorsandscientistsdeclaration.org/>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdoctorsandscientistsdeclaration.org>>
. It is important that you get this decision right for the sake of our society and for the sake of your own credibility and reputation.

Thank you.

Subject: OPPOSE - COVID 19 Shot Mandates in Schools

External Email

I listened to the TAG meeting for the COVID 10 shots last week and it was a complete JOKE! This committee is not impartial, and in some cases definitely not qualified to make such an important decision. This TAG should not have been formed. They should not be tasked with reviewing information about COVID 19 shots for consideration of mandating the shots for school. We are OPPOSED to COVID 10 shots mandates period.

I support Informed Choice Washington's Petition for Rulemaking. The Board should establish a anew rule that prohibits them from adding an EUA product or any licensed product that lacks a completed Phase 3 trial study to the school required list. This is a complete waste of time and tax payer money at this point. There is ABSOLUTELY no reason this shot should be under review for requirement in schools. Effectiveness has not been proven, not have the proper trials been completed.

WSBOH Members,

We oppose the mandate to have our children vaccinated with the experimental COVID vaccine.

Our children's immediate and long term health is our top priority. We understand the risk for side effects as well as many other long term health problems is a potential outcome. We do not accept this risk by giving this experimental vaccine to our children. Along with our children's healthcare providers, we say no to this mandate for our children.

Thank you,

Mike & Stephanie Bradshaw

Subject: COVID Vaccination Requirement for School aged Children

attachments\E8D9D9C6E7FC461B_image.png

External Email

Good Afternoon -

I am strenuously opposed to the COVID vaccination requirement currently being considered for all schools in the state of Washington for school aged children including college aged children/adults.

This "vaccine" which is better classified as a shot, is still in the trial stage. It's still a EUA and it's illegal to mandate an EUA product.

The state department of health has this information currently on their website regarding the three types of shots currently available:

How can you possibly mandate a "shot" that is still unproven to be effective past 2 months? Boosters are not required but they're out there? It's clear that there is already great concern on the effectiveness of this/these shot/shots that are still in the trial stage. There is no logical rationale behind this possible mandate.

If you mandate this ridiculous shot as a requirement to attend public school in the state of Washington including colleges, universities, trade schools and/or any other educational organization, we will pull our children and home school them.

Regards,

Corina Maser
Hockinson School District Parent

I as a Parent/Professional and Member of our community I, oppose the bill which would mandate school children to receive a vaccine for Covid before entry to school.

I believe this would be an irrational decision and one definitely not based on science; especially since it does nothing for the transmission of Covid and simply sets up a system requiring multiple boosters.

This decision is about the health of our children and the Covid vaccine does not provide either health or safety from Covid infection.

In health,

Tanya Brayer DC MSc

External Email

To Whom it May Concern,

I am reaching to relay my stance on the State's position on involuntarily quarantines, and adding C19 Vax mandates for Children. I unapologetically and furiously oppose both efforts.

Children are off limits for mandates of any kind. Data has proven and continues to prove they are not a significant vector of spread and they are not at risk for severe illness. Any action to inject children with an experimental vaccine or reinstitute isolation or restrictions of our youngest and most emotionally fragile population are abusive and disgusting. The mere fact that these efforts are under consideration is extremely concerning.

-Chris

I strongly oppose any efforts to mandate the Covid-19 vaccine for school children of any age. The young population has been shown to be the least threatened by the disease. Current case trends show that the vaccine does not mitigate spread. Combined, these facts are evidence against any urgency that this proposal may stem from, or any assumptions that mandating said vaccine would offer significant public health benefits. Considering the unknown long-term effects of the vaccine due to insufficient time to perform the rigorous studies necessary, requiring this therapeutic would be irresponsible. The decision should be left to the parents, free from the coercion that the threat of unenrollment represents.

Sincerely,
A very concerned citizen (Shelly Osmonson)

External Email

Good afternoon dear Board Members,

We see that you are beginning the process of considering the covid vaccine addition to the list of immunizations required for children to attend school. Our family OPPOSES this addition as no children have died due to covid according to the Public Health website for Clark County as of Dec 30, 2021. In fact, Clark County has not had any deaths for anyone under the age of 19yrs, and only 1 loss of life under 29yrs of age since the onset of covid.

Our family also SUPPORTS the Informed Choice Washington's Petition for Rulemaking. We have read the petition and see the value in making sure that the products complete all clinical trials and are found safe before being required for our children in order for them to get their education.

Passionately, your tax payer and mom of 3,
Peggy Retzlaff

Subject: Oppose Mandating Covid-19 shot

External Email

Washington State Board of Health,

I am writing today because I understand that you will soon be making a decision on whether to add the Covid-19 shot to the school age vaccination schedule in order to attend K-12 school.

I oppose mandating the Covid-19 shot in all forms including for employment, accessing services, travel, restaurants, entertainment, sports, and in order to attend K-12 school. This shot is NOT necessary and is causing more damage than it is causing good. Children are the least affected by the Covid virus and Washington State has not seen one child death from Covid. 42 other states are successfully operating their schools without mandating masks or the Covid-19 shot. It is ridiculous and morally reprehensible to force anyone to take this shot. Our children have been hurt enough in the past 2 years with lockdowns, virtual learning, masks, etc. Please stop the madness and don't continue to make it worse by mandating the Covid-19 shot in order to attend school. Please also note that the Los Angeles Unified School District tried to mandate the Covid-19 shot and failed miserably.

In addition, I oppose the mandatory masking of students (and staff) as well. Masking is not healthy for our children and their ability to learn is affected. For example, when children are learning to read, they need to hear the sound and see the way the sound is made. When a teacher is wearing a mask the student hears a muffled "th" sounds for example. When a teacher is wearing a mask the student cannot see the lip/mouth formation of the sound. In addition, the teacher cannot see the way the child is making the sound when the child is wearing a mask.

Medical decisions (including masking and vaccines) are personal decisions for parents to make and between parents and their child's pediatrician. The Board of Health should respect these personal choices and put an end to mandatory masking and mandatory Covid-19 shots.

I also would like to point out that I support Informed Choice Washington's Petition for Rulemaking (Item 11 on the January 12th agenda) which asks the Board to establish a new rule that prohibits the Board from adding any Emergency Use Authorized product, or any licensed product that lacks completed Phase 4 trial studies (and beyond), to the school vaccine required list.

Thank you for your time.

Subject: Covid 19 vaccinations for school children

External Email

I strongly oppose requiring Covid 19 vaccinations for school children. I also strongly suggest you get educated on the vaccinations and Covid 19. There is excellent early treatment and kids are at higher risk from vaccine reactions than Covid 19. I am not an anti vaxxer, I am just against this vaccine. There is a lot of information out there regarding what is happening. I suggest you look at other countries and their success with Covid 19 including Uttar Pradesh in India, Japan, Sweden and more. There are thousands of highly educated scientists, attorneys and physicians who are against this and I suggest you look into why. Please question the narrative.

Thank you for your time,

To Whom:

RE: Upcoming meeting being held to consider the use of law enforcement to enforce COVID mandates.

A very large number of Washingtonians are very well informed about what's afoot. They know Covid isn't fatal if properly treated. They know the vax doesn't work. They know our officials cannot keep their stories straight. They know we are being lied to.

If, against this backdrop, our officials choose to pursue a course of action that paints the innocent into a corner, it cannot end well, not for anyone.

This meeting may be our last chance to deescalate. We must oppose the further weaponization of the Health Department, and furthermore, throttle back their power to levy fines and otherwise oppress the innocent.

Yours,

Arne Herstad

Subject: Opposition to the Upcoming January 12, 2022 Covid-19 Vaccine Requirement Recommendation

External Email

To Whom it May Concern;

I am submitting this email in regards to the upcoming January 12, 2022 decision recommending the Covid-19 Vaccine for school age children.

Public education is funded by taxpayers and should not be withheld from ANY child in Washington State based on their personal or religious beliefs and preferences. Our children deserve equal access to education without discrimination. Segregating our children by forcing parents to make decisions to un-enroll their children in Public Education and find alternate means of education or in many cases, leaving the state completely, will not cure Covid-19. It will only increase childhood depression and anxiety and, as you all should know, even increase suicidal tendencies in Washington State Youth.

Washington State, in my opinion and that of numerous fellow parents I have spoken with in regards to the subject, has operated at an extremely poor level during this pandemic. It has promoted division and supported the isolation of our children by implementing online learning as opposed to in-person learning, and the requirements that have been imposed on our children when they were allowed to return to in person learning are proving to be detrimental to their mental health and well-being even now. I implore you to talk to students at all grade levels and actually see what they are thinking and how they feel being in the situations they are in with the restrictions in place. Given that Washington State has seen a withdrawal of students from their Public Education program over the past two years in excess of 55,000 students, this should be a blatantly obvious indication that the decisions being made that effect the students of Washington are not "Popular". If this becomes a requirement, the number of students pulled from Public will grow exponentially. Washington State is already disregarded across the country with the poor handling of the pandemic and the excessive restrictions that leadership has put in place, don't add any 'Fuel to the fire' by adding yet another layer to this already disgraceful situation.

The Covid-19 virus and it's continued variants are something that we are ALL going to have to live with going forward. It is abundantly clear at this point that vaccines and masking have not solved the issue. It is being reported that upwards of 70% of Omicron infected patients are all vaccinated. I personally know of several Breakthrough cases of Covid-19 in family and friends, and some of them were severe enough to end up in ICU BEING FULLY VACCINATED! The rules for masking, types of masks, etc. change so often a person could get whiplash attempting to keep up with current protocols. My family and I have all had, and recovered, from Covid-19 even with the protocols in place.

I am firmly against the requirement of the Covid-19 Vaccine for our children to attend public school. This is not something that was put forth by a vote of the People of Washington State, nor is it accommodating for all of our children. As a parent of 3 children in Public Education, I am imploring you oppose making the Covid-19 Vaccine a requirement to attend Public School in Washington State.

I thank you for your time.

Washington State Board of Health Members:

I'm writing today to share my concerns about an item on your agenda for your January 12 meeting. I strongly oppose the proposal of requiring the COVID vaccine for our children. Not only is this a new drug that has had limited time to be studied, it has proven to not be effective at spreading disease.

Experts around the world agree that COVID is not a life threatening risk to our youth. We are also seeing increased risks from the vaccine, which should tell us that our focus should be researching why these side effects are happening before we push this on our kids.

Parents should have the right to choose what is best for their children and their individual health. Mandating a new experimental drug that has proven to not be effective at stopping the spread of COVID is not the answer.

I strongly urge you to listen to the parents and not support this proposal.

Kind regards,,

I am absolutely opposed to mandatory vaccinations for children. I personally know a number of individuals that died after receiving a vaccination or had critical life threatening reactions that landed them in the hospital for days. My sister died after receiving the J&J. No health authority asked if she had recently received a vaccination or performed an autopsy. I know of two other individuals this happened to. A friend went into Afib after getting the vaccine and almost died. Another had to have heart surgery 8 months after getting the vaccine and was told by the VA doctors that his heart issues were caused by the vaccine.

The truth is that no one wants to acknowledge there are serious health issues related to the vaccines. Healthy children are not likely to die from contracting Covid and are probably more likely to die or have long term health issues from the vaccine. This should be the choice of the parents who know what is best for their children. The public is being kept in the dark about the vaccine risks and that is criminal. That poor woman that wanted to volunteer in her child's classroom got it and died and now her child is motherless. NO MANDATORY VACCINATIONS!!

External Email

Hello,

I am writing this email in regards to our children and their rights to be able to attend public school. This education is funded by tax payers and should not be withheld from ANY child of WA state based on their religious beliefs or personal preferences. We have always had exemptions for vaccines and a covid vaccine should be no different. All of our children deserve access to equal education and without discrimination. I am beyond appalled by how heartless this state has operated during the pandemic by way of promoting division and supporting isolation of our children by encouraging learning online as opposed to in person.

Covid is something we have to live with and OBVIOUSLY masks and vaccines have not solved the issue. I am firmly against requiring vaccines for children to attend schools as this was not voted on by the public nor is it accommodating for all of our children. Segregation will not cure covid but only increase childhood depression and anxiety and eventually suicidal tendencies.

This entire state has been a laughing stock across the country and this is just one more example of how you've failed us. Do not fail our children again.

Subject: Opposition of Mandated Vaccination

External Email

Respectfully,

I am writing to you as a concerned parent of a 14 year old boy and a 17 year old girl. I am writing to you to oppose any mandates for children that require Covid-19 vaccination as a condition of attending public education.

As a parent, I judge the risks of covid-19 vaccines to be greater and more harmful to my children than actual infection from the covid-19 virus. As such, I will not tolerate, be forced or coerced into jeopardizing the health of my children for a vaccine whose long term side effects are unknown and which doesn't even grant immunity to the covid-19 virus.

My goal, (which should be the same as our lawmakers/policy makers) is to protect my children from harm. Mandatory, forced and coerced vaccination is in direct opposition to that goal. While vaccinations themselves are not a new requirement I would like to point out that existing required vaccines had a longer development and testing phase. They were not subject to hiding of side effects and squashing of experiences of people experiencing side effects that the covid-19 vaccines are currently producing. As a parent, I see the rushed production of the vaccine, propaganda, silencing and shaming people of differing points of view, as a misguided attempt to do "something" rather than risk being prudent and be accused of doing "nothing".

My answer, to forced mandatory vaccination for covid-19 is NO, it will continue to be no until safety is proven and the vaccine becomes able to grant immunity. My husband and I will remove my children from the public education system if it becomes necessary in order to protect them from derelict policy making.

Sincerely,
Melissa Eylar

I would like my opinion on record. As a WA state citizen with 3 school age children, I am in strong opposition of making the Covid-19 vaccine mandatory. There is not nearly enough time or scientific study to validate adding it to the list of mandatory vaccines. There is also not enough evidence that the risks out way the benefits for the age group under 18.

I will remove my children from public school or apply for an exemption if this shot goes on the list of required shots.

Please provide valid scientific studies to support the decision to add this to the list of mandatory vaccines.

STOP THE MANDATES!!! MEDICAL FREEDOM! PROTECT OUR CHILDREN!!

Subject: Public Comment - covid vaccine mandate for children

External Email

WSBOH Members,
I oppose the mandate to have our children vaccinated with the experimental COVID vaccine.

Even the scientist who invented the MRNA technology said publicly that the covid vaccine is dangerous to children. Follow the science. As it happens no one can PROVE based on any studies that the covid vaccine is safe for children.

As a parent, my children's immediate and long-term health is my top priority. With my own personal research, I know that the risk for cardiomyopathy as well as many other long-term health problems is a potential outcome. I do not accept this risk by giving this experimental vaccine to my children, nor should other parents be forced to. Along with our healthcare providers, we say NO to this mandate for our children.

Respectfully,
Devorah Nelson

Subject: Comments for Jan. 12 BOH meeting RE adding Covid-19 to infectious disease
WACs--OPPOSE

External Email

To Whom It May Concern:

I am writing in regard to an item on the agenda for your upcoming meeting on January 12, 2022. I OPPOSE adding Covid-19 to the current infectious disease WACs, and I OPPOSE adding COVID to school immunization requirements.

According to the CDC's own numbers, covid has a 99.74% survival rate
<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nbc26.com%2Fnews%2Fcoronavirus%2Fhealth%2Festimates-covid-19-fatality-rate-including-asymptomatic-cases&data=04%7C01%7Cwsboh%40sbob.wa.gov%7Cf47a2260e84d4a83f82f08d9d09ab38e%7C11d0e218.html>
 . What warrant is there for requiring children and potentially adults take a risk on a product that has no long term safety data available, is still in experimental trials for two more years, and doesn't stop infection or transmission
https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.theepochtimes.com%2Fover-100-fully-vaccinated-people-in-washington-state-test-positive-for-covid-19_3757218.html&data=04%7C01%7Cwsboh%40sbob.wa.gov%7Cf47a2260e84d4a83f82f08d9d09ab38e%7C11d0e218.html
 ? A .26% death rate is still in line with the viral death rate that circles the planet every year. With a bar (death rate) that low, any annual flu or cold could be a candidate for inclusion as an infectious disease. That would be a terrible precedent to set.

Also worth noting, according to the CDC's own numbers
https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fnchs%2Fnvss%2Fpub%2Fpub_000007.htm
 , (scroll down to the section "Comorbidities and other conditions") only 6% of the deaths
 being attributed to Covid are instances where Covid seems to be the only issue at hand.
 In other words, reduce the death numbers you see on the news by 94% and you have
 what is likely the real numbers of deaths from just Covid. These are not death numbers
 worthy of adding Covid-19 to the infectious disease WACs.

Forced quarantines for not wanting to take a risk on an experimental product that has been demonstrated to be neither safe (see VAERS data <https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fopenvaers.com%2F&data=04%7C>) nor effective by the CDC's own admission are not the right public health measure to be considering. There are known effective therapeutics and highly successful early treatment options available which should be promoted and pursued by the WA Board of Health instead.

For the above reasons, please discontinue your consideration of adding Covid-19 to the

infectious disease WACs and school immunization requirements and turn your attention to early treatment and proven, highly successful therapeutics.

Thank you for your time.

Subject: NO to vaccine mandates

External Email

As a parent to three school aged children I'm writing because I am vehemently opposed to mandating the Covid vaccine for school aged children. There are three main reasons why.

First, the current vaccine does not have any long term safety studies done yet, they are simply too new. The studies and evidence currently available show that receiving the vaccine poses far greater health risk to children than Covid does. VAERS data as well as many other studies prove this. Children have a 99.998% survival rate with Covid, a vaccine with possible side effects is not necessary nor a smart risk assessment.

Secondly, the vaccines do not stop the transmission of Covid. There is no argument that vaccinating someone helps protect anyone other than themselves. If children have basically no risk of harm from the disease, a vaccine is not necessary. Teachers and staff are already vaccinated so they should be protected if their vaccine works to lessen symptoms. Our hospitals are not overwhelmed with Covid patients, if they are struggling it is because of the firing of unvaccinated workers, delayed/improper care for other issues, and/or extreme quarantine and safety precautions unnecessarily being taken because of Covid.

The third reason I am opposed to mandating this vaccine for school entry is that while the FDA did approve the Comirnaty version of the Pfizer vaccine, it is currently unavailable anywhere in the US. Public schools may not require an experimental vaccine that is under EUA. The only vaccine currently available to our children is NOT the FDA approved version.

Thank you for your time,
Alissa H

The action of mandating a vaccine to the least impacted age group is unconscionable. You are going to destroy the already failing public schools. Many parents are already home schooling their kids and this will send other parents in that same direction. Think about who you are helping. You cannot say you have the kids in mind when you talk of mandating vaccines for a virus that is becoming more like the flu every day and impacts kids 0-19 years of age the least, if at all. Follow the data! The virus is safer than the vaccine for children. This is a dangerous plan! Please end this conversation NOW!!!

Thank you for your consideration to read my important words on your upcoming meeting to recommend the Covid shot for Children.

We as a society rely heavily on our parental instincts, the aid of our pediatricians, the advice of our family and friends to guide us in raising healthy children. We have now come to an age, just as in 1971 when our country left the Gold Standard and created inflation with fiat currency in order to control our society and make way for classism that Sars-Covid-19 will create with vaccinations of the mRNA classes. I appreciate science and what it has done for the health of our community. We in our family, follow the school district and state recommendations of vaccinations in order for our children to enter public school, but with the control you think you are going to have over this next group of up and coming tax paying citizens it will be unforgiving.

Not one official can tell me what the Covid-19 vaccination will or how it will affect my daughter in her possible fertile years. BUT - you will say, because you've been taught to say that 'nothing will happen.' You will tell me that the vaccination is safe for my 2 year old son, but if he were to develop a heart condition, one of which we have no family history of, the Pharma companies cannot be held liable for the side effects. You are part of the Mass Formation Psychosis, welcome aboard.

When will you stop and let nature take its course? We have seen through science and medicine that the Covid-19 virus has mutated into a more contagious BUT LESS SEVERE virus. Which is more important to you, the more contagious part or the less severe part?

Our household will not be getting the Covid-19 shot, until there are years of data behind it and that the pharma companies be held liable for major health side effects. We have no issues removing our child from public government schooling and teaching them on our own, giving them global learning. If you were to implement this vaccine as a requirement, as a 'law,' for children to remain in school you will lose many students. Yes, the public schools will still get their share of property taxes, but for each child that un-enrolls in school, that district can lose up to \$14,000 in value for that child (

<https://schoolchoiceweek.com/guide-school-choice-washington/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fschoochoiceeweek.com%2Fguide-school-choice-washington%2F&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C5a0992af97ba49e74f8908d9cf2c7fea>).

You are teaching children they have no rights over their own body, you are not good leaders if you vote for this to pass. You are showing our communities that body autonomy is soon to be a thing of the past.

I have attached for you, in my own handwriting the years in which I was born and my children. It shows when the required vaccines were FDA approved (you can do your own google search to verify) and how long the vaccine was out, before we got whatever shot is on the list. The closest shot that I received to FDA approval was 8 years. That is about my comfort level from testing to final usage, not like Covid-19 vaccine, which had final approval just in August of 2021.

Sincerely,

Michele Pearson

The action of mandating a vaccine to the least impacted age group is not in anyone's benefit, especially the children.
99.99% survival rate and you are entertaining this as a requirement? WHY? Where is the data to support this dialog??
You are going to 'force' the hand of as many parents to possibly submit to this option if they have no other resources to support thier children with an alternative to education if you implement. Maybe that's the point?

In children, COVID is much safer to get than the vaccine. There have been many adverse reactions, especially in children.

THINK about who you are helping..... Your own egos or the kids. You cannot say you have the kids in mind when you talk of mandating vaccines for a virus that is becoming more like the flu every day and impacts kids 0-19 the least, if at all!

The CDC has walked back its quarantine policy from 10 to 14 days to 5 days for those who have a positive PCR test (no matter jabbed or not jabbed) in the middle of a supposed massive surge in COVID variant cases.

Not only this, but there's even a no-quarantine option if quarantine "isn't feasible." Like if you have a major football game to play or something...Then you can just wear a mask! WOW! Really? So are they saying it's not so infectious or dangerous that you need to quarantine and can just wear a mask and be o.k to not spread it to others when you are SYMPTOMATIC?! Then why the quarantine guidelines? Masks are both ineffective and a health hazard. And you follow thier guidelines?

The CDC has also stated that if you are directly exposed to someone who tests positive, you are in the same boat as the unvaccinated when it comes to isolation if you are vaccinated but NOT boosted. If I were a double jabbed individual, I'd be mad because this would mean it is as if I was never jabbed at all. Why would we do this to our children????

Surely the CDC must have a solid reasons for this change in policy right? The CDC's website explains that "The change is motivated by science demonstrating that the majority of SARS-CoV-2 transmission occurs early in the course of illness, generally in the 1-2 days prior to onset of symptoms and the 2-3 days after."

□□

DID YOU CATCH THAT?! There is no such thing as asymptomatic spread. Never has been. Never will be. They are basically telling us to stay home if we're sick and to stay there until symptoms go away.

sick= symptomatic...

We have known this from day one. The narrative on asymptomatic spread and vaccine efficacy is falling apart quickly. However, I have yet to see any walk back on mandates and vaccines. None.

<https://www.cdc.gov/media/releases/2021/s1227-isolation-quarantine-guidance.html>

<https://www.cnn.com/2021/12/27/cdc-recommends-shorter-covid-isolation-quarantine-for-all.html>

Ultimately, who does this "mandate" benefit? Not the children. Not the parents. It is a virus. A Flu. It needs to be a choice. It should ALWAYS be a choice. Please end this conversation NOW.

Subject: Mandatory COVID vaccination for children

External Email

To the Washington State Board of Health:

As you consider requiring vaccination against COVID-19, I respectfully draw your attention to the reality that these vaccines have not been proven by the required extensive period of testing for safety and efficacy to be either safe or effective in children, adolescents, or young adults. By mandating these vaccinations in our children as a requirement to attend schools, you are being coercive, and such action is not only unjustified on any scientific basis, it is unethical, immoral, and frankly criminal to apply a greater risk of death and adverse effects on a population that has a much lower risk of these from the virus itself. If parents or teachers themselves consent to be vaccinated, they must be fully informed and deal with the consequences. While your motivation to "save lives" may help you feel better about making these vaccinations mandatory, how many lives must be lost or ruined to pay for that?

As a retired Family Physician, I am very concerned by the serious overreach by the various government health-related agencies (CDC, NIH, FDA, WHO, etc) in the mandates (largely unscientific and even counterproductive), and especially the efforts to tie the hands of medical practitioners in the care of their patients by restricting access to safe and effective prophylactic and early treatment for COVID-19. The trust we previously had in these government entities - and even some medical professional organizations - will be difficult or impossible to restore.

Sincerely,
Donald G. Hill MD (retired FP)

I hear you are attempting to justify giving the mRNA gene DNA altering therapy to children as a requirement to be educated with the money taken/stolen from taxpayers.

I am increasingly against the communist controlled government school indoctrination programs, but this would take the cake. If you play Jesus Christ (which you're obviously not even closely related to), I hope this will inspire even more home schooling and taking away of your "targets" for indoctrination.

Dr. Robert Malone, the inventor of this un-tested serum, states it should not be used on children. There has been over a 250% increase in emergency heart problems, including death, to European soccer players due to communist governments in Europe forcing them to receive this experimental serum. Numerous medical doctors who treat victims of the China virus (sometimes called Covid 19) who are vociferously opposed to this sort of genocidal policy.

What side of history will you be on? Just say no, and allow personal choice to continue as it has for since this biological warfare attack was launched. South Africa has been saying all along, with the Communist propaganda media (CNN, MSNBC, NBC, ABC, CBS, Huffpo, etc) ignoring it, that the South African variant (sometimes called Omicron) is mild. Are you part of the communist propaganda machine? Just say no, and hold the course. You're going to incite normal Americans, who believe in their freedom, if you go down this path. JUST SAY NO!!!!

He lives in one house with someone who thinks these vaccines are risky and under-tested, and in another house with someone who believes they are safe but not necessary for kids. He doesn't want one. He has made it clear multiple times to us he doesn't, and he is a mature, intelligent kid. But if you guys move forward with this, you are stripping him of medical freedom, and washington parents at large of the ability to raise their kids with their values and beliefs.

Don't you do dare do that to us after the past year or two. I appreciate all you folks do to keep our state running, but you cannot continue making the mistake of putting new variant fears over simple rights and ethics.

I am a mother of 5 children. I am writing to you because of a vaccine that has not been tested, and it has been proven that it is experimental and does not protect against Covid-19, but only brings harm to health. I am opposed to this liquid being forced to take my children.

As of 1/1/22. Why kids do not need Covid vaccine. Data above. The vaccines have not had long term results studied and the manufacturers are not held liable for any damages suffered by vaccine recipients. This needs to be parental choice not a school requirement.

The action of mandating a vaccine to the least impacted age group is unconscionable. You are going to destroy the already failing public schools. Many parents are already home schooling their kids and this will send other parents in that same direction. Think about who you are helping. You cannot say you have the kids in mind when you talk of mandating vaccines for a virus that is becoming more like the flu every day and impacts kids 0-19 years of age the least, if at all. Follow the data! The virus is safer than the vaccine for children. This is a dangerous plan! Please end this conversation NOW!!!

Washington State Board of Health,

We are not injecting and will not inject our three school age children with this non FDA approved "Emergency Use Authorized" Covid-19 injection. It is simply not LEGAL to mandate such an injection. We know it, and you know it. We will pull them from public school immediately without hesitation if this ever were to somehow make it to the point of a required "vaccination" to attend school. We are, and they are, fully prepared (curriculum is lined up), to homeschool.

Dr. Robert Malone is the inventor of the nine original mRNA vaccine patents, which were originally filed in 1989 (including both the idea of mRNA vaccines and the original proof of principle experiments) and RNA transfection. Dr. Malone, has close to 100 peer-reviewed publications which have been cited over 12,000 times. Since January

2020, Dr. Malone has been leading a large team focused on clinical research design, drug development, computer modeling and mechanisms of action of repurposed drugs for the treatment of COVID-19. Dr. Malone is the Medical Director of The Unity Project, a group of 300 organizations across the US standing against mandated COVID vaccines for children. He is also the President of the Global Covid Summit, an organization of over 16,000 doctors and scientists committed to speaking truth to power about COVID pandemic research and treatment.

He has this to say about vaccinating our children, "There are three issues parents need to understand:

The first is that a viral gene will be injected into your children's cells. This gene forces your child's body to make toxic spike proteins. These proteins often cause permanent damage in children's critical organs, including:

- Their brain and nervous system
 - Their heart and blood vessels, including blood clots
 - Their reproductive system, and
 - This vaccine can trigger fundamental changes to their immune system
- The most alarming point about this is that once these damages have occurred, they are irreparable.

You can't fix the lesions within their brain.

You can't repair heart tissue scarring.

You can't repair a genetically reset immune system, and

This vaccine can cause reproductive damage that could affect future generations of your family."

This information should at the very least pique your interest concerning your decision making on an injection mandate for children. We would recommend watching his entire 3 hour interview with Joe Rogan that took place on December 31, 2021.

Again, we will pull our three school age children from WA public schools. Consequently, our youngest (7th grade) has one foot out the door as it is, attending two electives a day in Middle School and homeschooled the rest. That has to do with masks. Stop masking

our children while you are at it and let them breathe fresh air as their sovereign bodies were intended to do.

Sincerely,

Dan and Amy Reber

Good Morning and happy new year.

I am writing to let you know I will pull both my children out of our public schools (Seattle) if you choose to require an experimental shot for children to attend school. You cannot, in good conscience, recommend something that has no long standing research. You cannot guarantee this is safe and will be safe for my children in one year, 3 years, or 5 years. Do your jobs well and let actual time and data be available before you require something. Otherwise this is purely political and many families will leave.

Thank you.

WA State Board of Health members,

I am a public health employee who works in the Immunization Program. I am also a mother and grandmother.

This email is being sent to voice my OPPOSITION to including the COVID -19 vaccine as part of school required vaccines.

It is far too early in the vaccine development to make this determination. The evidence at this point does not demonstrate that children are either at high risk from COVID or are transmitters of COVID.

Any adult who is afraid of having a bad outcome from COVID has likely been vaccinated and boosted.

In addition, the new variant, Omicron, is quickly overtaking the Delta variant and, while much more transmissible, it is far less severe. This is how viruses behave. They continue to mutate until they are extinct or, no more harmful than a cold.

To consider taking this action of mandating the COVID-19 vaccine (a.k.a. Pfizer) at this point in time would be both premature and a potentially negligent move on the part of our State Health Department.

The study of new vaccines takes many years to be certain of both the short and long-term effects on the population. These vaccines have been used in the general population for less than a year.

I am surprised and disappointed by your recommendation to effectively mandate its use in children.

They are the most vulnerable and have no say in what happens to their body.

I am not anti-vaccine by any means. My job is all about providing vaccines to protect individuals and the community.

I do oppose the mandating of vaccines with no consideration to opt out or for those who have natural immunity from having had the illness.

Thank you for your consideration of my comments.

I am writing to plead with you to NOT make the Covid "vaccine" mandatory for children to attend school. There are many reasons not to move forward with this. First of all, children ARE NOT at risk from Covid and the current panic driving variant, Omicron varies from basically no symptoms to a very mild flu. For most it seems to be like a head cold. So, should we also require vaccines for the common cold? Or allergy shots? The CDC even just admitted that the severity of Omicron had been overblown. Children have gone through this supposed pandemic for two years with no vaccine and come through it fine but now that we have a much less deadly variant, they must be mandated a vaccine to obtain an education? The emergency situation is and has been grossly exaggerated both in response and case numbers, particularly for children. There is no emergency situation for children outside of the policies which are destroying their childhoods. Driven by agencies like the BOH. They are absolutely at more risk from these shots and from detrimental policies than from Covid. Even if you go by the official data, you will see that the numbers do back up this statement.

Another reason not to force injections on children, is that adults can all get the shot if they want it and that has been the case for some time now. This is actually the same reason to force it on NOBODY, regardless of age. If these shots work then anyone who thinks they need them can get them and should be protected. Anyone who doesn't think they need them or not badly enough to assume the possible risk should be allowed to make that decision for themselves. If they don't work then nobody should get them quite frankly. It's no less than assuming risks with no benefits. To argue that children should get these shots to protect adults who already have chosen to get injected themselves is NOT scientific, is contrary to even minimal common sense, and is frankly extremely cowardly. Which brings me to my next point, these shots are NOT working, clearly. First, they said 99% effective, then 95%, then it was in the 80s, then 70s... Eventually, a booster was announced as essential. Now, they are already saying that a fourth shot will probably be necessary. Talk of a booster anywhere from every 9 months all the way down to every 2 months is getting tossed around. It's now looking like the powers that be would like boosters to be given at least every three months. CLEARLY these shots don't work as a vaccine should. Natural immunity is and has always been superior. The science on that didn't suddenly change. Only the narrative changed. By now, anyone who hasn't gotten the shot more than likely has natural immunity. Obviously superior to something that only supposedly lessens symptoms for a few months and doesn't stop transmission or spread (publicly admitted by the CDC, Fauci, and all other highly questionable authorities that we are supposed to blindly trust). So, what sense does it make to mandate them?

Next point, these are experimental and not all information on them is available. You cannot force experimental injections and you cannot force injections without FULLY INFORMED CONSENT. We do not have all information available still on these shots. So nobody has had fully informed consent. That CAN'T be denied under any stretch of the truth. Tell me, what are all the ingredients? What are the long term effects? Bet you can't answer either. Go to your local pharmacy and ask the pharmacist. They also cannot accurately answer those questions. Before you go off on the Pfizer FDA approval narrative, stop. Comirnaty, the FDA approved version isn't available in the US and isn't being given. The emergency use version is still being given. I'm going to go out on a limb and say this is because Pfizer has legal protection under the EUA. An EUA which isn't

valid for the following reasons: 1. We are NOT in an actual emergency situation. The only emergency happening right now is the fear mongering, reactions by officials, and policies being enacted. 2. As soon as an FDA version was approved the EUA became null. Both cannot legally exist simultaneously. The EUA should have ended right then and there upon approval. The lame excuses for not omitting the EUA and replacing it with Comirnaty DO NOT add up. It's all about liability protection and nothing more. 3. There are and have been since the beginning, viable effective and safe treatments available for Covid. I'm not talking about the harmful and potentially deadly protocol of using Remdesivir, or Midazolam, or intubation that most hospitals used throughout the pandemic. I'm talking about Ivermectin, Hydroxychloroquine, supplements, elderberry, zinc, other fairly benign therapeutics, etc. If valid, effective, and safe drugs are available then the EUA can't be enacted. Which is exactly why they demonized Ivermectin, a drug which has proven very safe for humans from infancy to geriatrics for decades. Our own government previously called it a wonder drug. So, no the EUA isn't valid. Not by any stretch of the imagination.

Another point, the officials and pharmaceutical companies involved have been caught blatantly lying and contradicting themselves about safety and efficacy of the vaccine and the severity of Covid over and over again. They have been caught lying with data, lying with intentionally fudged and inadequate clinical trials, lying in press briefings, and lying by omission. Just in the past month, they have told us that two shots aren't enough and a third will be necessary. Then, they began saying ok, looks like a fourth will be necessary. Are you going to mandate children get a Covid booster every two or three months to attend school? The CDC has recalled their PCR tests because they aren't accurate but this isn't new. They new for quite some time that they aren't accurate for diagnostics and are prone to false positives and very quietly admitted as much months ago. Yet, they stated that they wouldn't recall them until December. They also stated just a couple of days ago that people should not test after quarantine (as was their previous recommendation) because they could still test positive for two weeks even though they are no longer contagious. They also just shortened the quarantine time to 5 days stating that they had previously made it as long as they thought people would tolerate. What is that supposed to mean? Is that scientific? Is it scientific for Biden's vaccine mandate to not have been planned to be implemented until after Christmas? Why wait if there's a supposed emergency with no other valid treatment options? Why wait a whole year after vaccines were available? So much of this doesn't make sense and it's being pushed by people who keep contradicting, exaggerating, and just flat out lying. Many of whom have questionable investments or financial interests ties to the pandemic. So, we are supposed to use their word as the basis of whether to give families the choice of an education for their child or bodily autonomy?

We can see from outbreaks in the most vaccinated countries in the world (Israel, Gibraltar, Iceland, and Singapore are examples) as well as a multitude of outbreaks from vaccinated only events and vaccinated only cruises that these shots do not work and almost seem to be generating illness. It has to be noted that we didn't see talk of scary variants and didn't see as many cases before the vaccine rollout. After the rollout, as the injections multiplied so did the case numbers. Not concrete proof but compelling enough reason to be hesitant and to investigate why. If nothing more, it's certainly proof of ineffectiveness. If you force everyone to get the shots, you do away with the control group. Maybe that's part of the point? Control groups are part of the scientific process. Doing away with them isn't trusting the science. It's actually dangerous and negligent. Particularly in an experimental situation.

The vast majority of reports on VAERS are from the Covid injections. As of December 17th, due to the Covid shots: 20,622 deaths reported, 108,572 hospitalizations, 983,756 reports. Almost 1,000,000 VAERS reports and you have the nerve to pretend these are safe in your Zoom meeting? Dispicable. Quit lying to yourselves and everyone else. You're ruining the lives of adults, families, and children so you can keep your jobs and maintain some authority and feel like you're a right fighter but you're teetering on an edge that

you could fall from very rapidly. We are seeing way too many side effects and "breakthrough cases" to call either rare. Stop these ridiculous, tyrannical policies! In your Zoom meeting you just boldly claimed without supplying anything substantial or otherwise to back it up that these shots are safe, effective, and cost effective. False, false, and false! Play Russian roulette with your own body and money. Not mine and not my child's body.

Mandating experimental injections is a violation of the Nuremberg code. The emergency situation isn't valid. It cannot be demonstrated under our current situation, especially not in children. Start thinking about how you will defend yourself in court if you enact this because you will deserve to be tried for war crimes and against children at that. It is also a violation of UNESCO-

<https://en.unesco.org/themes/ethics-science-and-technology/human-genome-and-human-rights>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fen.unesco.org%2Fthemes%2Fethics-science-and-technology%2Fhuman-genome-and-human-rights&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C63b1cba59e2f4c1e0e9b08d9cbd45377%7C11d0e2>

This is simply a violation of common decency, laws aside. The stripping away of bodily autonomy, stripping away of medical privacy, stripping the ability to acquire money, ability to achieve an education, and freedom of movement based upon a false emergency should scream to everyone that it is evil and wrong and must have an underlying agenda. Particularly when children get dragged into the situation. If you're really interested in doing the right thing then you won't do this.

I am more than happy to send anyone at the BOH links to a multitude of information, including from governmental sites, from the mouths of dissenting scientists and doctors, from whistle blowers, from articles, from videos, and from scientific studies. This is too important to go on ideology, talking points, conjecture, and "just doing my job". Please make the right choice. You have a lot of lives in your hands. History will judge you harshly if you go through with this. How high do you want to stack your deck of cards?

Dear Kelie Kahler (Kelie.kahler@sboh.wa.gov <mailto:Kelie.kahler@sboh.wa.gov>)
I hope this email finds you and your family well.
A few days ago, during a WA State Board of Health meeting, the advisory group spoke of whether they should recommend adding Covid vaccination to the current WA vaccine schedule for school and daycare entry. Unfortunately public comments were not allowed. The advisory group would be making a recommendation for our children without hearing from the parents.
I oppose the Covid vaccine being added to the school and daycare schedule. Children have mild to no symptoms from the virus, and are thus the safest. Covid Vaccine inserts are none existent to the public, leaving us without a knowledgeable and informed choice. Pharmacists themselves do not have access to a vaccine insert. We are told to believe and take the plunge yet so many have had horrible and evenly deadly complications from these vaccines. Please urge the advisory group to be cautious and not make recommendations for the Covid vaccine to be added to the school and daycare schedule. Thank you for taking the time to read my opposition and concerns. I look forward to reading your reply.

I am not sure who you people think you are but you are not law makers and you are not elected officials.

I have saved a screen shot of who you all are and will distribute far and wide to make sure EVERYONE knows who to file Nuremberg charges against if you continue to try to vaccinate CHILDREN against a virus that has a 99.9998% death rate for children!!!! More children die from influenza than covid!!

We will not tolerate your interference in our lives or our children's lives!! I have the right to refuse ANY vaccination that I do not see as beneficial or safe and I will exercise those rights FULLY!!

Tread very lightly with your "mandates"

I strongly urge you to oppose adding Covid shots to the children's immunization recommendations. The safety data is conspicuously absent, especially due to abbreviated trials. Data at the CDC report a survivability for children having Covid of 99.987% WITHOUT early treatment. The risks associated with these injections are far more dangerous, making the mandatory use an upside-down decision. The dangers to children from these drugs are both debilitating and permanent. Our job is to protect our children--not sentence them to a lifetime of pain and suffering.

The CDC admitted the other day that the numbers of children being hospitalized due to Covid were misrepresented and artificially increased the data--skewed the data. Please do not make any recommendations based on flawed data, incomplete data, or clearly biased data. Our children deserve SAFETY and long, happy, and prosperous lives. They also deserve a future with their own families...I don't believe any studies could possibly have been completed in such a short time period which guarantee a healthy reproductive ability. There are far too many questions and not nearly enough information to provide parents with informed consent.

Persons allowing children to be harmed because of poor scientific methodology or for want of personal gain will have to answer to God. Even considering giving these shots to children is sinister at best.

Thank you for your time and efforts in making a sound decision.

Dear Kelie Kahler,

I hope this email finds you and your family well.

A few days ago, during a WA State Board of Health meeting, the advisory group spoke of whether they should recommend adding Covid vaccination to the current WA vaccine schedule for school and daycare entry. Unfortunately public comments were not allowed. The advisory group would be making a recommendation for our children without hearing from the parents.

I oppose the Covid vaccine being added to the school and daycare schedule. Children have mild to no symptoms from the virus, and are thus the safest. Covid Vaccine inserts are non-existent to the public, leaving us without a knowledgeable and informed choice. Pharmacists themselves do not have access to a vaccine insert. We are told to believe and take the plunge yet so many have had horrible and even deadly complications from these vaccines. Please urge the advisory group to be cautious and not make recommendations for the Covid vaccine to be added to the school and daycare schedule.

Thank you for taking the time to read my opposition and concerns. I look forward to reading your reply.

Sincerely,

Angelina Zahariia
Clark County Resident

I oppose mandatory vaccinations in school! We need to protect our children from harmful experimental vaccines. In fact, so harmful that producers of it don't want to take responsibility for injuries from it. (What a shame!) Cowards and criminals they are!

Subject: Covid-19 vaccine should not be on the schedule of childhood vaccines

External Email

There are already too many vaccines on the schedule of childhood vaccines in the state of Washington. The Covid-19 'vaccine' has not yet been proven safe and still has many issues to overcome. Some of these reasons are as follows:

Antibody Dependent Enhancement (ADE) also known as Vaccine Enhanced Disease (VED) occurred in testing and can cause death and has not been solved.

The vaccine has not been proven effective and access to the raw data has not been made available. It is also clear that the vax does not prevent the disease, evidenced by many thousands of breakthrough cases.

There has been NO long term safety testing, especially for children.

There is an unusually high rate of reported adverse events and deaths following the COVID-19 vaccines compared to other vaccines. Some adverse events are more common in the young, especially myocarditis. Where potential harm exists from an innovation and little is known about it, the precautionary principle dictates to first do no harm.

There has been serious under reporting to VAERS; there are many testimonials by health care professionals stating that they were told not to report adverse reactions. Even with the level of under reporting there is a high number of serious adverse reactions including death.

The survival rate from Covid is near 99% and there are several excellent treatments including a new medication. Highly treatable diseases don't require a vaccine. Vaccination policies rely on expected benefits clearly outweighing the risk of adverse events from the vaccination. The risk/benefit analysis for the COVID-19 vaccines points to a high potential risk versus no benefit for children and young people.

The Covid-19 virus continues to mutate, making it impossible for vaccine makers to keep up with all of the mutations.

It is unethical to put children and young people at risk to protect adults. Altruistic behaviors such as organ and blood donation are all voluntary.

In my opinion, these vaccines should not be put on the schedule of childhood vaccines. It should be voluntary, similar to the flu vaccine.

Subject: Do not agree: COVID vaccination requirement for children

External Email

Happy new year,
I understand you are considering requiring Covid vaccinations for children. I have already been super disheartened with the lack of care towards our children and parents in the requirement use of masks and not allowing this to be a parental choice. This is a airborne and parents have already seen every child experience one cold, the masks do not work. Now you are going to consider requiring vaccinations for something that is not a childhood disease. It makes sense when there is something that is a predominantly a childhood disease this is not the case with COVID and on top of that children are not high risk. They are part of the lowest risk population of all! Why would we inject them with something that could cause them more harm than the virus itself?
Please do not force injections onto our children. This is a attack against children.
Care for our children and refuse forcing them to have this vaccination. Let parents decide what they want to do. This is not for the board.
Understand our concern as parents of children that have already been hurt so badly by the state board. That have developmental delays and mental issues due to your harmful decisions. Please have a heart and do not force this vaccination on our children.
Thank you for reading and understanding our concerns.

The action of mandating a vaccine to the least impacted age group is unconscionable. You are going to destroy the already failing public schools. Many parents are already home schooling their kids and this will send other parents in that same direction. Think about who you are helping. You cannot say you have the kids in mind when you talk of mandating vaccines for a virus that is becoming more like the flu every day and impacts kids 0-19 years of age the least, if at all. Follow the data! The virus is safer than the vaccine for children. This is a dangerous plan! Please end this conversation NOW!!!

Washington State Board of Health,

We are not injecting and will not inject our three school age children with this non FDA approved "Emergency Use Authorized" Covid-19 injection. It is simply not LEGAL to mandate such an injection. We know it, and you know it. We will pull them from public school immediately without hesitation if this ever were to somehow make it to the point of a required "vaccination" to attend school. We are, and they are, fully prepared (curriculum is lined up), to homeschool.

Dr. Robert Malone is the inventor of the nine original mRNA vaccine patents, which were originally filed in 1989 (including both the idea of mRNA vaccines and the original proof of principle experiments) and RNA transfection. Dr. Malone, has close to 100 peer-reviewed publications which have been cited over 12,000 times. Since January

2020, Dr. Malone has been leading a large team focused on clinical research design, drug development, computer modeling and mechanisms of action of repurposed drugs for the treatment of COVID-19. Dr. Malone is the Medical Director of The Unity Project, a group of 300 organizations across the US standing against mandated COVID vaccines for children. He is also the President of the Global Covid Summit, an organization of over 16,000 doctors and scientists committed to speaking truth to power about COVID pandemic research and treatment.

He has this to say about vaccinating our children, "There are three issues parents need to understand:

The first is that a viral gene will be injected into your children's cells. This gene forces your child's body to make toxic spike proteins. These proteins often cause permanent damage in children's critical organs, including:

- Their brain and nervous system
 - Their heart and blood vessels, including blood clots
 - Their reproductive system, and
 - This vaccine can trigger fundamental changes to their immune system
- The most alarming point about this is that once these damages have occurred, they are irreparable.

You can't fix the lesions within their brain.

You can't repair heart tissue scarring.

You can't repair a genetically reset immune system, and

This vaccine can cause reproductive damage that could affect future generations of your family."

This information should at the very least pique your interest concerning your decision making on an injection mandate for children. We would recommend watching his entire 3 hour interview with Joe Rogan that took place on December 31, 2021.

Again, we will pull our three school age children from WA public schools. Consequently, our youngest (7th grade) has one foot out the door as it is, attending two electives a day in Middle School and homeschooled the rest. That has to do with masks. Stop masking

our children while you are at it and let them breathe fresh air as their sovereign bodies were intended to do.

Sincerely,

Dan and Amy Reber

I am a mother of 3 and a Pharmacist by profession. This mandating of unproven vaccines is a stain on the medical profession and an unconstitutional overreach by people who have no boundaries or common sense. Children have been almost completely protected from the devastation that this virus has caused more vulnerable adults. Yet the college students were immediately discriminated against, setting the stage for what was to come for the rest of civilization. No one should be made to take a medication which has a very small population and history of use. There will most definitely be a mass pulling of children from public school and also encourage a movement of families out of Washington. Of course for many families, especially the more disadvantaged, these choices will not be an option and they will be left to ignore their own better judgement to fit the profile expected of them and their children. This is a tragic turn this state and country has taken. And just like Germany almost a century ago, the world will judge us for it. Omicron is spreading like wildfire. Vaccinated kids can go to school even after exposure though all the data says they are not protected from getting or spreading the virus. Meanwhile healthy unvaccinated kids sit at home. Every mandate from lockdowns to masks to vaccines have done nothing to stop this virus. It is time to start letting people learn how to improve their health and weight and stop the illegal treatment and discrimination of our citizens. The government needs to get busy on fixing the problems they created and let families make their own decisions on how to protect themselves. God help us if that does not happen.

I would like to voice my concern about making the Covid-19 vaccination mandatory in schools.

It is being proven more everyday that this experimental untested vaccine is injuring and killing our children.

Vaccines take years of testing and I find it odd that so called 'scientists' tout the safety of this jab. This is completely politically motivated and my grandchildren will not be taking this gene altering substance to attend school.

I am strongly against this mandate and implore you to drop the idea of mandatory COVID-19 vaccinations for school aged children.

Sincerely,

HI, Washington State Board of Health:

The history of smallpox includes both "natural" immunity from contraction and survival from the disease, and "naturally acquired" immunity. The naturally acquired immunity came about because a Doctor discovered milkmaids working on a farm who were passing out the information that a "cowpox" infection was rampant in the dairy where some were working. All the milkmaids in the area were showing up to milk those cows, so that they too could catch cowpox and thereby become immune to smallpox. A 30% death rate is not uncommon from smallpox. Cowpox had almost no deaths from it.

The cowpox virus (same genus, different species than smallpox), when contracted by humans, confers "immunity" to smallpox.

Edward Jenner, a British physician, conducted an experiment on his own son to "prove" that cowpox provides that smallpox immunity. He inoculated his own eight year old son with the fluid from a smallpox lesion, after his son had endured a bout of cowpox.

If Mr. Jenner's eight year old son had died, I suspect that Mr. Jenner would not have ever been tagged as "the father of immunology".

Smallpox is deadly. It has now considered to have been eradicated worldwide. That is a good thing.

The common cold has also been considered deadly, but historically, only a very small percentage of infected people die from it. It is considered a "normal" part of childhood, and most certainly it is credited with a process considered to develop the immune system in young people. It is a fact that without challenges from pathogenic organisms, the

human immune system does not develop to as high a level.

This covid-19 virus was and remains problematic. There is no numerical objectivity available on sensitivity or specificity of the testing methods. This leads to utter falsification of outcomes. If no one has any information regarding accuracy of the testing, there can be no truly objective outcome measures- whether people undergo "vaccination" from it or not.

Did they die of covid? We have no idea if the testing is accurate, therefore, we have no idea if covid was even involved in the death.

We do know that "vaccinated" individuals (vaccine is truly an incorrect term) are still dying- different than the cowpox/smallpox connection. We also know that those deaths are attributed to "covid"- but we know that could be completely incorrect, the tiny amount of research that is available is equivocal, and we have no information regarding long-term outcomes. We do know that our national average life expectancy is no longer increasing, and may be decreasing. We know that "autism spectrum disorder" is at higher numbers than ever before in history. Autoimmune diseases have gone up about 15% in the past ten or so years. Why? That information is not yet available.

This new "vaccine" is virtually untested technology, it is RNA based. No "vaccine" in history has been RNA based, it is new technology.

I am not against either new technology, or against untried technology a la Edward Jenner. But I find the fact that he used his own young child as a guinea pig to inoculate with the material from a smallpox pustule reprehensible.

I find your consideration of mandatory vaccination with this unproven new technology especially of young individuals just as reprehensible as the stunt Mr. Jenner pulled on his own son.

Please reject it.

To Whom It May Concern:

I am writing to you in hopes that you will listen and not make the Covid 19 vaccine among the list of mandated vaccines for children. To be clear, I am not an anti vaxxer. I have four children, all of which are fully vaccinated against disease that could kill them. Covid 19 is not killing our children. Most that have gotten it (if they show symptoms at all) merely have a cold. Mandating a vaccine that has no long term side effect studies is just absurd. We are heading into an endemic like the flu (which is not a mandated vaccine) and are gaining herd immunity. Please continue to make this vaccine an option for kids and not a mandate. We should have the right to choose what goes in our children's bodies as to what we feel best for their future health. Feel free to contact me with any questions. Thank you for listening.

Subject: Covid-19 Vaccine Requirement

External Email

Washington State Board of Health:

I, along with many other concerned Parents across this State have grave concerns about adding the Covid-19 Vaccine to the list of required vaccinations amongst children of any age.

Requiring an mRNA injection that DOES NOT PREVENT DISEASE was never the intent of the legislature in it's delegation of authority to the State Board of Health to approve a schedule of immunizations for "vaccine preventable diseases". As you are all aware, this vaccine does not prevent one from getting the virus, or spreading it, even with follow up boosters.

Children are not at high risk of death from Covid-19. The latest variant comes to the majority of them as cold symptoms or nothing at all, and that INCLUDES children who's parents made the choice to vaccinate.

Requiring me to put my child at risk by getting a vaccine that offers perceived safety rather than actual immunity- is reason enough for me to pull my child from the public school system, and that is what I will do if this becomes a requirement.

Subject: Covid19 Vaccine Requirements for Schools Consideration via TAG team.

External Email

Department of Health,

In consideration of the deliberations of including Covid 19 Vaccine in the vaccine requirements for children in a school or childcare environments I offer the following comments. Please pass this on to the entire TAG team if they are not included in the email above.

First regarding the framework of the Board:

"The only purpose for which power can rightfully be exercised over any member of a civilized community, against his will, is to prevent harm to others.

His own good, either physical or moral, is not a sufficient warrant."

Please consider carefully what risks warrant exercising this incredible power over individuals who may not want to receive this vaccine. Each individual must weigh the risks and benefits of receiving a medication that impacts their or their children's body. If individuals are harmed, that impacts the individual, the family and the community -- in that order. Many of you discussed the joy that your children and grandchildren brought to your holiday celebration. If they were to be irreparably harmed because of this medication that would most severely impact your family. If they did not get the vaccine, they would not have had that negative impact, and it seems very unlikely that they would have negatively impacted someone for a disease that they may or may not have gotten. How do you quantify that? I encourage you to look carefully at that equation if you are asking people to put their loved ones at risk.

You will be hearing from many experts through your time of consideration. In light of the risks that you will be recommending to the State of Washington and specifically the children of Washington I ask that you pay close attention to the following 4 criteria in particular.

Vaccine Effectiveness

- * The vaccine containing this antigen is effective as measured by immunogenicity and population-based prevention data in Washington State
- * Experience to date with the vaccine containing this antigen demonstrates that it is safe and has an acceptable level of side effects

Disease Burden

- * The vaccine containing this antigen prevents disease that has significant morbidity and/or mortality in at least some sub-set of the population
- * Vaccinating against this disease reduces the risk of person-to-person transmission, with a transmission in a school or childcare setting or activity being given the highest priority

Vaccine Effectiveness

People are getting Covid and spreading Covid regardless of their vaccination status. Is that true? What is the comparative number of people who get vaccines and still get COVID? How many are hospitalized?

The vaccines are still an experimental, emergency use gene therapy medication. There have been an unusual number of adverse events including severe life-long impacts up to and including death. Please be sure to study carefully and closely VAERS reporting system which has been set up to monitor Vaccines efficacy. How do the impacts for this vaccine compare to other vaccines? What is the impact of the disease currently? How many are hospitalized or dying from this disease today as opposed to 1 year ago, before vaccinations were introduced? Ask the questions that are not being asked? Where are the experts asking you to look and what is being overlooked?

Disease Burden

Are there other ways of treating Covid once someone gets it? Early treatment seems important since people are getting it with or without the vaccine. Are there ways that we can get the best outcome possible for those that catch this disease? We have been living with this for almost 2 years – what treatments are doctors finding that are effective? Are there ways to reduce risk without the vaccine? This disease seems to be an extremely low risk for children. What is the risk? Without the vaccine? Again, are there effective treatments for children? For caregivers?

Please look for ALL perspectives and viewpoints. I believe that it is by looking at multiple studies and listening to different perspectives is scientific and effective. Listening to a variety of perspectives and viewpoints will allow you to come to a good decision, if you only listen to one perspective, how can you be sure you are not missing something? There may be an important detail that you are not seeing.

This is a difficult decision, please leave your assumptions and biases behind so that you can think outside the box and really listen for solutions that may be surprising.

Thank you for your consideration and your curiosity in helping Washington citizens to find a good solution that will build health with as low risk as possible.

Sincerely,

Melissa Eller

The action of mandating an experimental Emergency Use-Only vaccine to the least impacted age group is unconscionable! These vaccines are not FDA approved (EMU doesn't constitute FDA approved) and we've already seen the damning side effects (heart attack, brain function, and death to name a few). Under EMU the manufacturers are legally protected and no one knows what the side effects will be long term. STOP kidding yourselves. YOU'RE NOT FOOLING ANYONE.

You are going to CRIPPLE our already failing public schools and ultimately a generation. So many parents are already ready to HomeSchool their kids and this act will send them over the top.

THINK about who you are helping..... Your own egos or the kids? You cannot say you have the kids in mind when you talk of mandating vaccines for a virus that is becoming more like the flu every day and impacts kids 0-19 the least, if at all! Follow the data (VAERS and data from all over the world) and please end this conversation NOW!

Thanks,

Matt

To whom it may concern

I was watching the show Yellowstone last night with Kevin Costner and there was particularly good scene that happened when all the interested parties of piece of land including the current owner, The owner of the land was there fighting to keep his land and the other interested parties were there to take it and make themselves and including the state a super large amount of money. In the show the state and people didn't not care about the farmer losing his land. This was a very waking moment to know that even know we have laws and things put in place to stop this kind of horrible stuff, The inevitable pull of large amounts of money will take what best for the rights of the land owner to be thrown out the window.

Keep a few things in mind when making this very big decision,

1 we know that the death toll is up 40 percent and being hidden from us. Soft Cancers are up 400 percent. What will those numbers be next year or the year after?

2 it is well know and documented that the covid Jab (vaccine) does not stop the virus, There is a lot of data out there that says it actually causing it.

3 it is also very quietly noted that the FDA released a blood thinner for kids to take to stop the clotting of the Jab. Why would this be done if it was safe.

4 The people who have taken the Jab can no longer donate blood or plasma. Please keep this in mind for the future as if ever need blood or plasma there will be none to be had.

5 this has been pushed on us only because of an emergency, It is not an approved Jab(vaccine) and the long term side effects are not known. We do know that every animal that took the MRNA all died.

6 it is also well documented that children are not effected by this virus, So then why is this department of health even being asked to make this decision this soon? Unless there is some major money sitting out there and a large piece of that money will be heading into certain bank accounts.

The Children are the next generation and if they all die or are sick because of the jab our future is bleak, as it is most of the world has the jab in us, Do not make this fate of the children also.

Thanks

A concerned parent and grand parent.

Subject: Covid-19 Vaccine Opposition -Children

External Email

Good Evening,

My husband and I come to you in opposition of adding the Covid-19 vaccine to the list of required vaccines. As tax payers, our children have the right to a public education. We have grave concerns about this vaccine and should not be in fear of losing our children's right to an education over a medical decision that we are not confident is safe for our children. This is a family decision and parents deserve the right to chose if we will submit our children to an experiment or not. We, along with many other concerned Parents across this State are demanding a choice.

Requiring an mRNA injection that does not stop the spread or prevent infection is not the intent of the legislature in it's delegation of authority to the State Board of Health to approve a schedule of immunizations for vaccine preventable diseases. This vaccine is neither effective in stopping the spread or preventing illness and should not be added to the list of required vaccines.

Children are not at high risk of death from Covid-19, they have a 99% chance of survival. They are also not causing community spread. The latest variant presents as cold symptoms or nothing at all. People who have been vaccinated are getting it in higher numbers than those with natural immunity.

Children, males in particular, are at a far greater risk of an adverse reaction to the vaccine than serious complications from covid. It is not right or constitutional to threaten to withhold an education from a child if the parents do not comply to your opinion of what is best for our children. There is enough data and research to indicate these vaccines are unnecessary and unsafe for children.

We will not allow our children to be a science experiment to make adults feel safe. Our children will NOT receive the experimental vaccine under any circumstances. We will go to the ends of the earth to protect them. This deserves to be a family choice, they are our children, not yours. We will immediately pull our children from the public school system.

I leave you with this, from a mother to mother or parent to parent. Imagine being forced to give your child something that you are not 100% confident is safe for them but having another adult try to take that option away from you? This is what you are doing to us by trying to take our right to chose away. Where is your compassion?

We the people of Washington fully DISAGREE with forced or coercion of vaccinations of any kind but especially Covid 19 untested very danger, life threatening vaccine. We do not want this to happen and our votes in the future will fully show this. The people know there is a way to fight this with good drugs, vitamins and health giving interventions. This is what we want to use.

Subject: December 29th meeting on COVID vaccination requirements for kids

External Email

Hello BOH members,

I received a summary of the meeting that was held today on vaccine requirements for children in schools. I have some concerns, and would like you all to consider views other than the proposed requirements.

First things first, there are no FDA approved vaccines available inside the US. Informed choice is something I, and others I know, take seriously. With that said, there are a plethora of questions about the physical makeup of each of the available vaccines. There are reports, true or false, of dangerous side effects from receiving the vaccines. The biggest concern is the major push to cancel everyone that disagrees with the mandates. Painting the American people into a corner is never a good idea, and would only result in varying degrees of push back. I believe I speak for millions of Americans when I say that I want this country to remain peaceful and free from tyranny. This push to require/mandate what goes into our bodies—especially products that have not been properly tested nor approved by the FDA—does not pass the test of a free society.

I would strongly urge you all to reconsider what you are about to do here. I also urge you to think about your own children. If there was a group of people requiring you to allow them to shoot your children up with Heroin or another toxin, “for the good of the health of our society,” what would you do? Heroin was previously used in the medical field, so what’s the harm, right? It doesn’t have to be Heroin. There are other examples that may strike that nerve for you personally. Many people have gotten the vaccine, and many have vaxxed their children. That was their choice, and they took the risk the same as with all vaccines in the past. Think about all the commercials on TV that describe a new drug recommended for various illnesses or conditions. All of them have a mile long list of possible side effects, some include death. Why then don’t these vaccines get the proper attention required to give informed consent.

With all this said, we—the average Americans—value our children as the most precious commodity on this earth. We don’t believe the state has authority, beyond that of us parents, over our children. No matter how you frame this argument, we will not comply. We understand this will enrage you, and that you may not understand our stance, but you are officially on notice that we have had enough of this attempted coup of the sovereignty, liberty, and freedom of the American people. Please reconsider and do the right thing.

Signed:
Average American Citizen, with both state constitutional rights and US constitutional rights.

To Whom it May Concern,

You encouraged those on the advisory group to be an active member. To ask questions if one did not know the meaning behind an acronym. We are encouraged to reach out if we have questions or concerns. I pray you do not see my questions as an irritation, as questioning your years of practice and expertise, but as a concerned citizen who sees inconsistencies.

"Reports in VAERS claim that 32 children have died from COVID-19 shots.

The Centers for Disease Control and Prevention
[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fheadlineusa.com%2Ftag%2Fcenters-for-disease-control-and-prevention%2F&data=04%7C01%7Cwsboh%40sbh.wa.gov%7C0b42477646974598b2f708d9cb16edb6%](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fheadlineusa.com%2Ftag%2Fcenters-for-disease-control-and-prevention%2F&data=04%7C01%7Cwsboh%40sbh.wa.gov%7C0b42477646974598b2f708d9cb16edb6%7C)
's data claims that about 760 children have died from the COVID-19 illness, though upon further examination almost all these deaths appear in children with severe underlying diseases, including cancer and genetic abnormalities.

Extrapolating this data with the underreporting factor leads to the conclusion that 1,312 children have died from the vaccines—about 173 percent more than have died from the illness."

With this alarmingly high mortality rate, the administering of the vaccine needs to be stopped.

Often, adverse effects from vaccines is underreported. VAERS has an underreporting number of 41, meaning that 4,100 percent more adverse affects occurred than was reported.

"In the peer-reviewed journal *Science*, *Public Health Policy*, and the *Law*, Rose estimated an excess death number far higher than the conservative estimate of 150,000."

Please read her peer-reviewed article:

https://cf5e727d-d02d-4d71-89ff-9fe2d3ad957f.filesusr.com/ugd/adf864_0490c898f7514df4b6fbc5935da07322.pdf
 <[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcf5e727d-d02d-4d71-89ff-9fe2d3ad957f.filesusr.com%2Fugd%2Fadf864_0490c898f7514df4b6fbc5935da07322.pdf&data=04%7C01%](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcf5e727d-d02d-4d71-89ff-9fe2d3ad957f.filesusr.com%2Fugd%2Fadf864_0490c898f7514df4b6fbc5935da07322.pdf&data=04%7C01%2F)

Her main points are:

"15,326 Americans have died from the COVID-19 vaccines, while 1,338,404 people will face permanent disabilities, 4,217,134 people were hospitalized, and 693,638 people had or have myocarditis or pericarditis."

"These wide-ranging estimates all lead to the same conclusion: that the COVID-19 vaccines, when distributed on a population-wide scale, cause more harm than benefit."

This vaccine, with a staggeringly high mortality rate, should not continue to be administered to children. We need to protect the most vulnerable and those who cannot defend themselves.

Sincerely,

Candace Batsford

Washington State Board of Health,

We are not injecting and will not inject our three school age children with this non FDA approved "Emergency Use Authorized" Covid-19 injection. It is simply not LEGAL to mandate such an injection. We know it, and you know it. We will pull them from public school immediately without hesitation if this ever were to somehow make it to the point of a required "vaccination" to attend school. We are, and they are, fully prepared (curriculum is lined up), to homeschool.

Dr. Robert Malone is the inventor of the nine original mRNA vaccine patents, which were originally filed in 1989 (including both the idea of mRNA vaccines and the original proof of principle experiments) and RNA transfection. Dr. Malone, has close to 100 peer-reviewed publications which have been cited over 12,000 times. Since January 2020, Dr. Malone has been leading a large team focused on clinical research design, drug development, computer modeling and mechanisms of action of repurposed drugs for the treatment of COVID-19. Dr. Malone is the Medical Director of The Unity Project, a group of 300 organizations across the US standing against mandated COVID vaccines for children. He is also the President of the Global Covid Summit, an organization of over 16,000 doctors and scientists committed to speaking truth to power about COVID pandemic research and treatment.

He has this to say about vaccinating our children, "There are three issues parents need to understand:

The first is that a viral gene will be injected into your children's cells. This gene forces your child's body to make toxic spike proteins. These proteins often cause permanent damage in children's critical organs, including:

- Their brain and nervous system
 - Their heart and blood vessels, including blood clots
 - Their reproductive system, and
 - This vaccine can trigger fundamental changes to their immune system
- The most alarming point about this is that once these damages have occurred, they are irreparable.

You can't fix the lesions within their brain.

You can't repair heart tissue scarring.

You can't repair a genetically reset immune system, and

This vaccine can cause reproductive damage that could affect future generations of your family."

This information should at the very least pique your interest concerning your decision making on an injection mandate for children. We would recommend watching his entire 3 hour interview with Joe Rogan that took place on December 31, 2021.

Again, we will pull our three school age children from WA public schools. Consequently, our youngest (7th grade) has one foot out the door as it is, attending two electives a day in Middle School and homeschooled the rest. That has to do with masks. Stop masking our children while you are at it and let them breathe fresh air as their sovereign bodies were intended to do.

Sincerely,

Dan and Amy Reber

To Whom It May Concern:

I am writing to express my desire that the State Board of Health, and local school districts, cease promoting unnecessary fear and mandates on our children. The mandates(masking, remote learning, prohibiting social gatherings, etc) have been ineffective and very detrimental to children. I ask that our leaders cease the fear mongering, and, instead, focus on doing what is best for the kids. The objective science shows that Covid the risk to children of a negative outcome is minimal. Many other states went back to "normal" schooling months ago, while Washington lags behind with wholly ineffective and unreasonable restrictions.

Please stop the madness. There is no need for a mask mandate, and no need to engage in remote learning.

Subject: COVID-19 vaccine requirement

External Email

I am writing in regards to the decision of whether to require a COVID-19 vaccine for students in school. We do have children in our family in the school system and some are vaccinated, some are not, but it was a decision made by parents as to what they believed was in the best interest of their children. I am strongly opposed to requiring the COVID-19 vaccine for children. I believe this should be a choice left up to the parents and/or the student depending on age. Several countries including Japan are not recommending this vaccine for children as they are finding the risks associated with the vaccine is greater than the complications associated with children contracting COVID-19. This should be a decision left to the family to make based on their concerns and perceived exposure. Also, given that this is not a uniform standard throughout the nation and levels of requirements vary from state to state. The precedent is not set that this is something of equal concern or perceived level of risk within our state even. Please consider leaving this decision to the parents to make based on their family's need(s).

Sincerely,

The Rosos

CDC Updates and Shortens Recommended Isolation and Quarantine Period

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsrhd.us11.list-manage.com%2Ftrack%2Fclick%3Fu%3Dfc782ce2ead2036a351c11e73%26id%3D581b557d2f%26e%3Dc3>

Given what we currently know about COVID-19 and the Omicron variant, CDC is shortening the recommended time for isolation for the public. People with COVID-19 should isolate for 5 days and if they are asymptomatic or their symptoms are resolving (without fever for 24 hours), follow that by 5 days of wearing a mask when around others to minimize the risk of infecting people they encounter. The change is motivated by science demonstrating that the majority of SARS-CoV-2 transmission occurs early in the course of illness, generally in the 1-2 days prior to onset of symptoms and the 2-3 days after.

A Discovery 225 Years Ago Transformed Our Health

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsrhd.us11.list-manage.com%2Ftrack%2Fclick%3Fu%3Dfc782ce2ead2036a351c11e73%26id%3D9b5e3d07f5%26e%3Dc>

The arrival of COVID-19 vaccines in December 2020 changed the course of COVID-19 in Washington — with many people getting vaccinated to protect themselves and their communities. Currently, about 75% of people 12 and older in Washington are fully vaccinated against COVID-19. As more people get vaccinated, we get closer to putting the pandemic behind us.

COVID-19 Cases Spike Significantly in the Past Week

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsrhd.us11.list-manage.com%2Ftrack%2Fclick%3Fu%3Dfc782ce2ead2036a351c11e73%26id%3D1cb355b1de%26e%3Dc>

The state of Washington is seeing a spike in COVID-19 cases, and transmission is expected to rise in the coming weeks. While it is still too early to tell how much of the increase is due to Omicron, epidemiologists with the Washington State Department of Health (DOH) agree that Omicron prevalence is increasing and is most likely the dominant strain.

Subject: Mandatory vaccines for school-aged children

External Email

Hello. I'm writing this email to express my opinion that covid-19 vaccines not be mandated for school-aged children. I had two shots myself and became very ill after receiving the second shot. I believe that parents should determine whether or not their children participate.

Thank you for your time.

Sincerely,
Laurie Dix

Subject: Covid-19 Vaccines for Children

As a citizen, father, and grandfather residing in this state I want to voice my objection to mandatory vaccinations of children.

They are a perpetual money making machine and investment for Big Pharma and its investors.

Respectfully,

Utilizing Repurposed Drugs to Treat COVID-19 Virus

By E.J. Ledet and Dean L. Gano

January 1, 2021

In the latest edition of The World Health Organization's [*Ongoing Living Update of Potential COVID-19 Therapeutics: Summary of Rapid Systematic Reviews*](#),¹ they say there are more than 200 therapeutic options or combinations thereof that are being investigated in more than 1,700 clinical trials treating COVID-19 infection. In this November 30, 2020 review they examined 58 of these therapeutic options. Among the therapeutics being studied are Vitamins C & D, and manmade drugs like Hydroxychloroquine, Remdesivir, and Ivermectin.

So typical of everything our trusted health care institutions do, their analysis is anything but objective or scientific. At the core of their failures is the total lack of evidenced based causal analysis, but it is much more than that. They provide declaratory statements like: "the body of evidence on hydroxychloroquine (HCQ), showed no benefit in terms of mortality reduction." But, when we look more closely at their evidence for this statement, we find they only looked at 30 studies and of those, only 6 showed that HCQ worked to prevent infection. So, given their "body of evidence," this is a valid statement.

However, had they looked at the entire body of scientific evidence, and performed a simple search for "hydroxychloroquine effective treatment for coronavirus," at the National Institute of Health (NIH) website, PubMed they would find over [800 scientific papers](#)² have been written on this subject and most of them show it works. When you find a review that says it doesn't work, you nearly always find the study patients are in the late stages of COVID-19 infection, where no antiviral drug can be expected to have much effect, and/or no Zinc was administered. As [Dr. Zelenko](#)³ has said, Hydroxychloroquine is the gun and Zinc is the bullet, yet these people don't seem to know anything about these causes.

So, given this clear observation that they cherry-picked their evidence, what's going on and where can we find the real science on this subject?

The Real Science

First and foremost, the problem here is the total failure of all the government-controlled health organizations to provide the simple causal relationships surrounding these viruses so you, the normal citizen, can make up your own mind. This is how life works! From the time we start learning about the world as small children, we observe, test, and determine the many causal relationships that guide us down the path to success. Like learning that fire is hot and will burn you if you don't avoid it. Or, that if people lie to you, you can't trust them in future interactions.

So, what are the causal relationships of a coronavirus so we can act accordingly and prevent infection? Just like we learned to avoid fire to prevent getting burned. It can't be that complicated, can it?

Indeed, it is not that complicated, but you have to be curious and look for all the causes, not just the ones that support preconceived ideas or support political propaganda. When a coronavirus enters the body, it tries to get inside a cell somewhere on the surface of the respiratory tract so it can reproduce, and we know that nose cells are likely the [key infection source for COVID-19](#).⁴ If the virus does enter a cell, it replicates, kills the cell, and spreads the newly produced viruses through breathing or coughing. When you breath in, the viruses go deeper into the lungs and the process repeats itself. As the immune system responds with too many killer T-Cells, your lungs fill with fluid and you suffocate. But this doesn't happen to healthy young people, so what's going on?

Our natural immune system defense against all viruses occurs when compounds in the foods we eat (called ionophores), from Vitamins like C, D, and E, flavonoids like Quercetin, or hormones like Melatonin create a slightly basic/alkaline environment in and around the cell. This alkaline environment disassembles the virus proteins rendering them harmless. Also, the body is made up of many [epithelial cells](#)⁵ found on the surfaces of our bodies that act like gatekeepers; keeping out environmental problems like dirt and pathogens but allowing healthy cell biology to function. One of the mechanisms these special cells use is to allow zinc to attach to a specific receptor site on the cell's surface, like a little door entrance, called an ACE-2 receptor site. (ACE stands for Angiotensin-converting enzyme which acts as a biological catalyst in normal cell biology.)

This site is used as a primary defense to prevent a virus from entering a cell, by keeping it in the alkaline environment long enough to disassemble the virus. The Zinc transporters, called ionophores, that create this alkaline environment also help Zinc get inside the cells through this "door." Once inside, the zinc acts as a backup defense mechanism to disassemble the virus if they get inside.

But this is only one way Zinc is used to protect us. As defined in this NIH study, [The Potential Impact of Zinc Supplementation on COVID-19 Pathogenesis](#),⁶ July 2020, Zinc works in nine different ways to prevent a viral infection and maintain a healthy immune system. Making sure we have enough blood serum zinc is most important in the elderly and patients with various inflammatory and autoimmune diseases. And obesity, which is present in 40% of Americans, causes Zinc deficiency and may account for why deaths are so high in the US.

So, because Zinc is so important to a healthy immune system we can see why older and unhealthy people, who are zinc deficient, are so much more likely to die. All of the COVID-19 [co-morbidity causes identified by the CDC involve Zinc-deficiencies](#).⁷ They either cause it, like obesity, or are caused by it, like old age, and their treatment involves Zinc-ionophores and Zinc supplements. Since Zinc is involved in over 300 bodily functions it should be no surprise that such a deficiency could cause so many problems.

So, in summary, the cause of death is uncontrolled virus replication, which is caused by a failure of the immune system to stop the virus from entering our lung cells. This failure

is caused by a lack of zinc and zinc ionophores, which is caused by many medical conditions, the greatest of which is old age.

When 97.5% of the COVID-19 deaths are people over 45 years old and 94% of those who die have an average of 2.6 comorbidity causes linked to zinc deficiency you know there has to be a causal connection and now you know what it is, so take action to protect yourself from this horrible disease.

Prevention

Now that we know how the immune system works to prevent infection, we know that the first line of defense is Zinc and zinc ionophores on the outside of our cells. Please note, you do not “kill” a virus, because it is not a living organism; it is just a protein molecule made of Ribonucleic acid (RNA), a basic building block of life, and by subjecting it to a low-acid environment called a “base compound” it disassembles and falls apart. This occurs when enough zinc ionophores like Vitamins C, D, and E and/or Zinc are present in the blood stream.

But there are other kinds of Zinc ionophores. In fact, there are over two billion of them and they have been identified in the [ZINC20 database](#)⁸ provided by the American Chemical Society funded by a subsidiary of NIH (National Institute of Health). When you look at this database you will find that nearly all of the proposed synthetic drug treatments for the COVID-19 virus, like Hydroxychloroquine, Chloroquine, Remdesivir, and Ivermectin and other natural substances are all listed as zinc ligand (metal transporter) ionophores. And they work by first disassembling the virus via pH modifications on the outside of the cell or if that fails, they take zinc inside the cell to stop the replication process. In effect, you have two compounds, zinc and zinc ionophores fighting both outside and inside our cells. When you are young, this all happens naturally and is why to date, [only 147 children under the age of 18](#)⁹ have died from COVID-19 in the US.

While we have heard a lot about drugs like Hydroxychloroquine and Remdesivir, we haven’t heard much about Ivermectin, which is a repurposed drug normally used as a medical preparation that effectively copes with many kinds of parasites. It is a prescription drug used to treat lice, scabies, as well as onchocerciasis (river blindness) and other nematodes in humans and animals. It is applied externally in a cream and internally as a pill, depending on the disease.

Appearing as a witness on Dec. 8, 2020, before the Senate Committee on Homeland Security and Governmental Affairs—which held a hearing on “Early Outpatient Treatment: An Essential Part of a COVID-19 Solution”—Dr. Pierre Kory, President of the [Frontline COVID-19 Critical Care Alliance \(FLCCC\)](#),¹⁰ called for the government to swiftly review the already expansive and still rapidly emerging medical evidence on Ivermectin.

The data shows the ability of the drug Ivermectin to prevent COVID-19, to keep those patients with early symptoms from progressing to the hyper-inflammatory phase of the disease, and even to help critically ill patients recover. [Dr. Kory testified](#)¹¹ that Ivermectin is effectively a “miracle drug” against COVID-19 and called upon the government’s medical authorities—the NIH, CDC, and FDA—to urgently review the latest data and then issue guidelines for physicians, nurse-practitioners, and physician assistants to prescribe Ivermectin for COVID-19.

In the process of learning about Ivermectin, the Frontline COVID-19 Critical Care Alliance created, based on feedback from doctors from around the world who were treating COVID-19 patients, a protocol for treatment called MATH+ and published a paper in the Journal of Intensive Care Medicine titled: [Clinical and Scientific Rationale for the “MATH+” Hospital Treatment Protocol for COVID-19](#).¹²

MATH+” stands for Methylprednisolone, which is a corticosteroid and zinc ionophore; Ascorbic acid (Vitamin C), which is a zinc ionophore; Thiamine (Vitamin B1) also a zinc ionophore; Heparin, which is a blood thinner and zinc ligand/ionophore; and the “+” stands for hospital care and co-interventions including Ivermectin, which is a strong zinc ionophore; Vitamin D and Melatonin, which are also zinc ionophores; Zinc, and Famotidine which is an antacid and zinc ligand/ionophore.

Notice how all of these therapeutics provide the exact causal defense our natural immune system uses (Zinc and Zinc Ionophores) to effectively fight the virus when you are young and healthy! It should be no surprise then, that they are highly effective at treating and preventing COVID-19 infection in the rest of the population. However, Big Pharma does not disclose that all of these synthetic drugs are zinc ligand ionophores because they can’t make big money selling zinc or these repurposed existing drugs that have been around for decades.

Given this causal evidence that supports the use of the MATH+ protocol, it begs the question of why our trusted scientific institutions have failed to follow the science and instead provide obfuscation and non-causal narratives focused on personalities and politics. Remember how the corporate media attacked the use of Hydroxychloroquine simply because President Trump said it works after hearing the real science? Instead of following the evidenced-based science, they proceeded to sell fear and hate and killed hundreds of thousands of people in the process.

Incompetence or Planned?

In every negative analysis of these repurposed drugs, the authors totally fail to acknowledge the causal relationships between the virus and immune system like we just laid out for you. Instead, they focus on presenting a narrative about outcomes of specific studies that have nothing to do with the causes of the problem. So, the question becomes: how can you possibly provide a solution to any problem if you don’t understand and state the causal relationships of the event? You can’t, and that means they are grossly incompetent or deliberately deceiving us. This is not rocket science.

We all know, as a basic human strategy, that to solve a problem you first have to know what the causes are; and they never do this in these phony studies.

Also, given that effective problem-solving is not taught by our education system, it is possible that these people are just ill-trained incompetents, but there is another possibility and we need to explore it.

Just ask yourself, if the anti-HCQ or anti-Ivermectin papers were actually peer reviewed why didn't the peer scientists ask the same simple questions we have? Like, why did they ignore the causal relationships we have presented; that are common knowledge, supported by hundreds of studies? Why didn't they check the blood-serum Zinc level of the patients in their study? Because if they had, they would have probably found that most of those who responded well to HCQ or Ivermectin, had high blood serum Zinc levels and those who did not respond well, had low levels of Zinc.

And why didn't they question the supposed adverse effects of HCQ, when we know that not only is HCQ not dangerous, it is safer than Aspirin. A [study at Oxford University](#) ¹³ of 956,000 people from all over the world showed no deleterious effects when recommended doses are used.

And why are our trusted medical journals printing false information? For example, the Journal of the American Medical Association (JAMA) [published an article](#) ¹⁴ claiming HCQ didn't work and also could cause heart rate problems and should not be used without medical supervision. Problem is, they used 400mg twice a day and **did not use Zinc** in their treatment. Toxic doses that are 14 times what is recommended equals toxic results.

And once again, on May 22, 2020, *The Lancet*, a highly respected online medical journal also published a paper saying HCQ was ineffective and dangerous. Because both *The Lancet* and JAMA studies reported that HCQ is dangerous, the FDA rescinded its emergency order allowing HCQ to be prescribed for COVID-19. This also caused several state governors to issue orders to local pharmacies not to fill HCQ prescriptions ordered by many board-certified Doctors for their COVID-19 patients. Something that has never happened before and certainly resulted in more unnecessary deaths.

Also, *The Lancet* finally asked for a detailed peer review regarding the article they published on May 22, 2020 and as reported in [WebMD](#) ¹⁵ they retracted the article because the authors would not provide data that could be adequately peer reviewed, and it was eventually found to be completely false; so at least someone is following scientific protocol. But it speaks volumes to how corrupt the scientific peer review process is. Let's look a little closer.

Whistle Blowers

Several Family Doctors, who have successfully treated many COVID-19 patients, came out in public to question the path our government officials have led us down. One of

them is Dr. Simone Gold, who [exposes the truth about Coronavirus and Hydroxychloroquine](#).¹⁶ These doctors fully understand the causal relationships and hence know the truth.

Also, there are over 50,000 medical professionals from all over the world who are focused on preventing deaths and they have signed the [Great Barrington Declaration](#)¹⁷ asking our government officials to wake up and focus on preventing death. Among other things they state:

Current lockdown policies are producing devastating effects on short and long-term public health. The results (to name a few) include lower childhood vaccination rates, worsening cardiovascular disease outcomes, fewer cancer screenings and deteriorating mental health – leading to greater excess mortality in years to come, with the working class and younger members of society carrying the heaviest burden. Keeping students out of school is a grave injustice.

Also, in an article by the [Alliance For Human Research Protection](#)¹⁸ on June 5, 2020, they report that Dr. Philippe Dousty-Blazy, the former French Health Minister, publicly stated that *The Lancet* and the *New England Journal of Medicine* editors admitted to being pressured by pharmaceutical companies to publish certain results.

When *The Lancet* editor Dr. Richard Horton was asked why it initially published the discredited article discussed above, he said: “*If this continues, we are not going to be able to publish any more clinical research data because pharmaceutical companies are so financially powerful; they are able to pressure us to accept papers that are apparently methodologically perfect, but their conclusion is what pharmaceutical companies want.*”

Also, Marcia Angell, former Editor-In-Chief of the NEJM writes in her 2004 book "The Truth About the Drug Companies": “*The combined profits for the ten drug companies in the Fortune 500 (\$35.9 billion) were more than the profits for all the other 490 businesses put together (\$33.7 billion) [in 2002]... Over the past two decades the pharmaceutical industry has moved very far from its original high purpose of discovering and producing useful new drugs. Now primarily a marketing machine to sell drugs of dubious benefit, this industry uses its wealth and power to co-opt every institution that might stand in its way, including the US Congress, the FDA, academic medical centers, and the medical profession itself.*”

In a recent [open letter](#)¹⁹ to Sir. Anthony Fauci, three board certified doctors made it very clear that he has grossly mishandled the pandemic response by asking him 122 very pointed questions highlighting his inconsistencies, and concluded the following:

“Americans must not continue to die unnecessarily. Adults must resume employment and our youth return to school. Locking down America while awaiting an imperfect vaccine has done far more damage to Americans than the coronavirus. We are confident that thousands of lives would be saved with early treatment of high-risk

individuals with a cocktail of hydroxychloroquine, Zinc, and azithromycin. Americans must not live in fear. As Dr. Harvey Risch's [Newsweek article](#)²⁰ declares, "The key to defeating COVID-19 already exists. We need to start using it."

More evidence to support what these leading Physicians said can be found in what the Big Pharma Company "Gilead Sciences" has done. Their magic medicine, which the very reverend Dr. Anthony Fauci wholeheartedly endorses, is Remdesivir and they have put a lot of money pressure on MDs, Medical Journals, Press, Academia, NIH, WHO, and the CDC to discredit HCQ - even though it has 65 years of safe use as a malaria drug and 40 years of safe use to treat lupus and some forms of arthritis.

[Gilead contributes big money](#)²¹ to the [income of 20% of the National Institute of Health](#)²² (NIH) Board Members and since Dr. Fauci heads the NIAID, one of 27 institutes that make up the NIH it might be hard for him to contradict them. And, oh-by-the-way, he is [not required to disclose any ties to Big Pharma](#).²³ Gilead also funds Academic Medical Research and as we learned above, cleverly influences Medical Journal Publishers.

Gilead, being focused on money not saving lives, has spent hundreds of millions of dollars in research, marketing, and propaganda, to sell its 5-day injection treatment for \$2,340 versus \$25 or less for HCQ pills that can be bought over-the-counter in most of the world.

Bottom Line

Given what we know about how simple it is to treat and prevent COVID-19 infections using off label medicines and easily available compounds that mimic how a healthy immune system works, why are our trusted leaders not telling us this? Who created and spread this virus and why? And while we don't have evidenced based causes to answer these questions, we do know one thing. We still live in a free country, for now, but if "we the people" continue to act like sheep, all of our freedoms will be taken away, so we must act now. Please do everything you can to get this simple solid science out to everyone you know and let your leaders at every level of government know we are not going to accept their phony narratives and lying anymore!

COVID-19 “ Experimental” Vaccines

You have the right to make an informed decision about your health and your future and you may be asking: Should I take this experimental vaccine? Here are a few facts you should consider to help you make an informed decision.

Facts:

1. According to the Pharmaceutical Companies themselves, these vaccines may not prevent the SARS-CoV-2 virus: Evidence:
 - a. From the [Moderna](#) and [Pfizer](#) Vaccine Fact Sheets: *The (Moderna/Pfizer) COVID-19 Vaccine is a vaccine and may prevent you from getting COVID-19. There are no FDA approved vaccines to prevent COVID-19.*
 - b. However, the [handout](#) you get when they give you the shot, says it “...has been authorized to prevent COVID-19”, so they are lying about it. They are experimental and have been approved by FDA and CDC via an Emergency Use Authorization (EUA) but have not been fully tested, so are not proven safe.
2. These vaccines are experimental compounds that use “synthetic messenger RNA (mRNA)” housed in fat cells. In 2005 an [animal study](#) was done with SARS-CoV-1 mRNA vaccines on ferrets. Because of major issues, the SARS-CoV-1 vaccine was not further developed.
3. In many previous [clinical trials since the 1960's](#) attempts to [vaccinate against Respiratory Syncytial Virus](#) (RSV) (a pneumonia type virus), [Dengue](#), SARS and MERS, the studies each failed during the animal phase. [Cats, ferrets, monkeys, and rabbits each and every time experienced Antibody Dependent Enhancement](#) (ADE), also known as pathogenic priming or a cytokine storm. This occurs when the immune system creates an uncontrolled and overwhelming inflammatory response upon being confronted with the pathogen in the real world, and the outcome, tragically, is death. The same immune system overreaction took place in a number of infants in [clinical trials who received an attempted RSV shot](#), as well as some six hundred Filipino children who died following early vaccination against Dengue Fever, so [this outcome remains a viable concern today](#).
4. Big Pharma has asked for the normally required animal studies for the CoV19 vaccine to be waived. It was waived for EUA purposes, so there have been no long-term animal studies to see if this could happen with these new mRNA vaccines. WHY?
5. Because these vaccines may or may not prevent infection, and as [some reports show](#), only reduce symptoms, why take something that does not **prevent** the infection in the first place. It is a proven fact, with [hundreds of scientific studies to prove it](#), that Zinc and Zinc ionophores can prevent or mitigate infection in the first place; take them as supplements and you are protected. [The CDC recently said that 80%](#) of all people who were infected with COVID-19 were deficient in Vitamin D, another Zinc ligand (metal binding) ionophore (transporter). And this helps explain why Sub-Saharan Africa and other countries where most people are in the sun a lot [only have marginal deaths from this virus](#).
6. Hydroxychloroquine (HCQ) is a 65-year-old drug that has been shown [to stop an infection](#) if taken within the first 2 – 7 days of getting symptoms from COVID-19. So, if you are taking your preventative Vitamins like C, D, E and Quercetin, and/or other supplements like Melatonin plus Zinc, and for some reason this doesn't prevent infection, you can stop it with Ivermectin + zinc; which is [readily available online](#).

COVID-19 “ Experimental” Vaccines

7. Other synthetic drugs like Budesonide, Dexamethasone, Ivermectin as well as natural substances (i.e., vitamins, flavonoids, amino acids, and hormones) can be found in the Pharmaceutical Zinc20 database, a database funded by a subsidiary of NIH. This database is comprised of ligands, which carry metals like Zinc, Calcium and other micronutrients present in our blood serum and transport them across cell membranes into the body of the cell (cytoplasm) to help our immune system fight infection. Like HCQ, these synthetic drugs need zinc and other micronutrient metals to work. [Dr. Zelenko](#) uses the analogy “the drug is the gun and zinc is the bullet” which is essential to stopping the viral reproduction and resulting infection.
8. Ivermectin is a proven drug for treating all three phases of the COVID-19 disease. Perhaps the best proof is found in India where one [province distributed Ivermectin](#) to most citizens and now they have very few cases and no deaths from the virus. Given such a useful therapeutic exists, it is illegal to authorize the use of vaccines, yet the psychopathic leaders do it anyway.
9. Because these “Vaccines” are unproven experimental substances, we won’t know what side effects may occur for months or years to come, but it may result in a long-term unnatural human manipulation of our DNA building blocks. Do you really want to take that risk or risk your children’s lives? Especially since:
10. There is no pandemic. The number of deaths from COVID-19, [which is highly inflated](#), is no worse than a bad flu season. And your chances of dying from it, even if you do nothing to protect yourself as defined in #5 and #6 above, are [very small according to CDC data](#). For children 17 and under they are 154 times more likely to die from something else. As of April 17, 2021, only 266 children have died with COVID-19. Not a single healthy child has died from COVID-19 alone. If you are under 64 years old, your chance of surviving is 99.99%.
11. There is not a cold or flu season, there is a vitamin D deficiency season. Colds and flues occur when the sun is low in the sky and we don’t get enough of it. Or if you live in a big city, you don’t get enough sun all the time and big cities are where most of the COVID deaths have occurred. Take your Vitamin D supplements and your immune system will thank you.
12. Since both experimental vaccines are EUA, both Pfizer and Moderna are indemnified from all legal action resulting from patients experiencing side effects; including death. Since they assume no risk, you are the one who takes all of it! And according to [Dr. Sherri Tenpenny](#) that is not a good idea.
13. According to [Dr. Richard Fleming](#), Ph.D, MD, JD, a renowned cardiologist and researcher, there is a chance that the mRNA from the vaccine can be incorporated into your human DNA by action of the [reverse transcriptase enzyme present in the vaccine](#). This may affect your auto immune system and result in various auto immune diseases. However, for all you who are taking zinc supplements + ionophores and decide to get vaccinated, Dr Fleming stated that he believes Zinc does appear to interfere with the mRNA process of the vaccines to make the spike protein. This means it will probably reduce the symptoms you can get, so make sure you are taking them.
14. The vaccine nano particles of lipid/fat composition, in which the mRNA is transported into your cells, has never been used before in human trials and long-term health effects have not been determined. These lipid nano particles bind with the normal fats in cell

COVID-19 “ Experimental” Vaccines

membranes and allow [entry of thousands of the synthetic mRNA vaccine into your muscle cells](#). Unlike the virus RNA which has to enter through the ACE-2 receptors found on cells, the nano particles create new pathways into cells. Because the ACE-2 receptor sites are where the normal entry of the virus occurs, bypassing this path means a greater amount of mRNA can enter the cell producing increased amounts of the spike protein exacerbating the immune response to the virus. This increased immune reaction can produce the very InflammoThrombotic Response (ITR) responsible for so many deaths. Again, long-term health effects are not known since long-term studies in lab animals have not been conducted. We humans have become the lab rats, and many doctors are reporting large increases in the number of cancer cases since the vaccines started.

15. The CDC [VAERS database](#) only captures about 1% of all the adverse reactions to vaccines, and so far the Pfizer vaccine has 1,218 blood clot reports, Moderna has 1,034, and J & J has 1,000. Therefore, blood clot disorders reported totals 3,272, so if the 1% is accurate, this would mean 327,200 people have had this problem from the vaccines.
16. Like real lab animals you cannot sue these pharmaceutical companies for suffering from any side effects after taking these experimental vaccines. However, companies requiring CoV19 vaccinations as a requirement for employment may be subject to legal action since it violates our civil rights. For an example of a law suit against the government go here: <https://factcheckedorg.files.wordpress.com/2021/09/joseph-jensen-lawsuit.pdf>
17. It's against the [Nuremberg code](#) to force vaccinations on a person, and [informed consent](#) overrides public policy. Federal law prohibits employers and others from using vaccines under EUA as a [condition](#) of employment.
18. For 35 more facts on the potential dangers of these vaccines, go to [No Jab For Me](#).
19. Or, for 18 more reasons not to get these Experimental Vaccines see: [18 Reasons I Won't Be Getting a Vaccine](#) by Christian Elliot.
20. The choice to take an experimental EUA COVID-19 vaccine is yours to make. Hopefully we have given you the facts to make a better-informed decision.

Good luck and good health to you all.

Dean Gano and EJ Ledet; February 19, 2021; Updated August, 2021; Updated September 22, 2021.

Depiction of Novel Corona Virus Infectious Disease 2019 (CoVid 19 aka SARS CoV 2)

Problem: CV19 Inhibits Human Body's Immune Regulatory Response/Defense System.

Where: Primary Lungs and Secondary other major organs and nervous system.

When: 2-14 days after Initial infection date.

Significance : The human body's immune defense is compromised leading to prolonged illness and high mortality in populations with previous underlying inflammatory, immunosuppressive diseases/conditions: Elderly, Afro/Native Americans ; Obesity, Smokers, Alcoholics, Addicts, HBP, Diabetes, Arthritis, Heart Disease, Arteriosclerosis, Stroke/Ischemia, Blood vessel inflammation, Cycle Cell Anemia, Cancer, Lupus, MS, AIDs, Nephritis, Kawasaki disease, etc.

Zinc is vital to promoting healthy hair, skin, and nails and is required for a proper sense of taste and smell. Zinc plays an integral role in immune function, protein synthesis, wound healing, DNA synthesis and cell division and is involved in over 300 regulatory processes. Zinc is also important for lipid, carbohydrate, and protein metabolism, as well as cell signal transduction, and reduction/oxidation (redox) regulation. In males, zinc has been shown to protect the prostate gland from infection and enlargement, which has been linked to being a risk for prostate cancer. In females, zinc can help treat menstrual problems and alleviate associated symptoms. Zinc may also protect from night blindness and prevent the development of cataracts. Children need zinc to grow, maintain a healthy body weight, fight off diseases such as pneumonia, diarrhea and diabetes, as well as shorten the length of the common cold.

Evidence: shown Zinc transported across SARS CoV 1 infected cell membranes using non protein, synthetic ionophore , carrier molecules has been to inhibit viral RNA reverse transcriptase (RT) enzyme and prevent virion reproduction in vitro.

Hypothesis: CV19 inhibits zinc transport across infected cell membranes leading to Zinc Immune regulatory deficiencies causing initial acute exacerbation of chronic obstructive pulmonary disease and secondary acute exacerbation of heart, kidney, blood vessels, brain, large intestine, skin, joints, and nervous system exemplified by cytokine storm and inflammation.

Causes: Low blood serum zinc concentration/availability.

Inhibition of zinc zip protein carrier "ionophores" which transport zinc across cell membranes for human DNA/RNA synthesis, cellular control, and immune response.

Solutions : Increase blood serum zinc through proper diet, digestion, and gut flora; avoid phytate rich foods; eat zinc rich foods; supplement zinc.

Supplement/administer "non protein" Zinc ionophore carrier molecules:

A. Synthetic, Big Pharma Drugs like Pyrithione, Hydroxychloriquine, and/or other synthetic zinc ligand-ionophores.

B. Natural fruit and vegetable polyphenol flavenoid ionophores like Quercetin, Reseveratrol, Curcumin, ECGC.

Effective: Timely Solutions Implement Zinc plus non protein ionophores to transport zinc across infected cell membranes and inhibit viral RT, prevent virion reproduction, and restore human cell DNA and RNA synthesis, cellular control, and immune regulatory response/defense.

Subject: NO COVID mandated vaccines for school children!!!

External Email

The action of mandating a vaccine to the least impacted age group is unconscionable! I have a child that has reactions to many vaccines so far and another who has had very mild Covid not long ago. Home school is on the table for many of us, many are already doing it with excellent results and are more happy with this education route vs the ever increasing woke programming our children are receiving today.

You are going to CRIPPLE the already failing public schools. So many parents are already ready to Home School their kids and this will send them over the top.

THINK about who you are helping..... Your own egos or the kids. You cannot say you have the kids in mind when you talk of mandating vaccines for a virus that is becoming more like the flu every day and impacts kids 0-19 the least, if at all! Follow the data!

Please end this conversation NOW.

Analysis Overview: COVID-19 Genetic Vaccine Safety in Children

In fact, preliminary data suggests that compared with the Delta variant, Omicron appears to be causing milder illness in children, similar to early findings for adults.”

The risk of death and disease in children has become even more rare with Omicron. Yet even prior to the advent of Omicron, a peer reviewed study clearly demonstrated (using safety data accumulated during past variant circulation) that the genetic COVID-19 vaccines carry a risk/benefit ratio of five deaths in the older, high risk cohort for every one life saved from COVID-19 (and those data did not account for the reporting bias inherent in US deaths due to COVID consequent to inappropriate use of PCR tests). See "Why are we vaccinating children against COVID-19?

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Femail.mg1.substack.com%2F%2FHPuEuqaAHX2qcvuk3IzOTjI8P8xuqM9yUeal1SJmcY8rGiCrimCXPGSLaEcfBOCQmy5VISP6gEKw3xaRgj4qz9pMBWzr7vdbKXyfmINTd2mYv-r5VKx-ztdFar9yV-ALBGCKqBUcpa9lnx29PrCgR_94_NVMATWsqkIF5BcTHglPUCaF9DzZ2h0hjhOtdYzaD-eT7k_t35qqHzndVpMyLr-3V-g0T1q4MuN2eyOpYhLr1AGUqet-DzMWDQZkKntcyQ5Bfyi95wx4CxrMINOivWNRtrec8IF80LTwHaFPZty1tSGrultvAq7rOeCqvZ_QEkCJb7&data= (Toxicology Reports, Volume 8, 2021, Pages 1665-1684).

"Thus, our extremely conservative estimate for risk-benefit ratio is about 5/1. In plain English, people in the 65+ demographic are five times as likely to die from the inoculation as from COVID-19 under the most favorable assumptions! This demographic is the most vulnerable to adverse effects from COVID-19. As the age demographics go below about 35 years old, the chances of death from COVID-19 become very small, and when they go below 18, become negligible."

The new variant of COVID-19, Omicron, has exploded onto the scene. What was already an inverted risk benefit ratio for genetic vaccination in children and adults (greater risk of death from vaccine than from COVID-19) will become even more inverted since the risks of COVID-19 are further reduced with Omicron. The Omicron variant is different in five essential ways:

- * More infectious and will soon be the dominant variant in the USA
- * Less pathogenic
- * Poorly matched to currently available vaccines
- * Natural immunity is providing good protection against Omicron
- * Disease symptoms are more similar to the common cold

The issue of COVID-19 gene therapy technology -based vaccine mandates for children is a pressing issue confronting parents, grandparents, and public health officials throughout the world. Unfortunately, the topic has become highly politicized, and active censorship by legacy media outlets has made it difficult for parents and stakeholders to obtain access to the actual data required for the full informed consent prior to acceptance of a medical procedure required by law (see for example members of the Trusted News Initiative including Thompson-Reuters

Subject: NO COVID MANDATED VACCINES FOR SCHOOL CHILDREN

External Email

The action of mandating a vaccine to the least impacted age group is unconscionable!

You are going to CRIPPLE the already failing public schools. So many parents are already ready to Home School their kids and this will send them over the top. This state has lost 55,000+ children from the public School system and many more will follow!
THINK about who you are helping..... Your own egos or the kids. You cannot say you have the kids in mind when you talk of mandating vaccines for a virus that is becoming more like the flu every day and impacts kids 0-19 the least, if at all! Follow the data!
Please end this conversation NOW.

Allison Baxter, concerned citizen and public school parent.

Subject: Covid-19 Vaccine School Requirement Public Comment

External Email

Greetings,

I'm writing regarding the Board of Health meeting today, putting together a TAG panel in regards to requiring COVID 19 immunizations for children in school/daycare. As a resident of the state, I want to express my lack of support for requiring the COVID 19 vaccine in underage persons. My reasons are as follows:

1. Severe illness from COVID-19 is uncommon in children, even with the new Omicron variant. According to UNICEF, the greatest impacts of the pandemic on children are not the virus but its indirect effects on their caretakers, such as poverty and disruption of children's lives.
2. Of the three vaccines, only one is approved for children over 5, and only under emergency FDA approval. With the lack of options and without full approval, it is unethical to me that parents should be required to immunize their children without at least concessions made for philosophical or religious beliefs.
3. There have been several ongoing developments with the vaccines in general even though they have only been available for under a year. Johnson & Johnson has been paused once, and now is again under scrutiny. Protection against the virus via any of the three vaccines given to adults earlier this year is already waning under a year's time since administration. It seems futile and foolish to require immunizations when we are still learning what those requirements ought to be in order to provide optimal protection against the virus.
4. While the risk for vaccine injuries is low, there is still a risk as with any medical treatment. I object to the idea the state has the right to decide what medical treatments and therefore which risks are appropriate for individuals. This decision should be left to parents and legal guardians who best know the status of their children's health and family medical history.
5. While vaccines are part of the solution to creating safety for our communities, it is not the only option. My five-year-old's school's approach is small class sizes, ventilation, testing, and quarantining, and we have had zero outbreaks in the classroom. With rapid testing and other treatments soon becoming available, I believe a dynamic and multifaceted approach that allows families to choose what is most appropriate for them and their children is the best way forward through these uncertain times.

I know this is a difficult decision, but I urge the Board of Health to support individual and parental rights as well as consider the ongoing scientific developments happening both within and outside of the vaccines before making a long-term decision that will impact thousands of children and their families. Thank you for your time.

Cheers,

Bailey Loveless

Washington State Board of Health,

We are not injecting and will not inject our three school age children with this non FDA approved "Emergency Use Authorized" Covid-19 injection. It is simply not LEGAL to mandate such an injection. We know it, and you know it. We will pull them from public school immediately without hesitation if this ever were to somehow make it to the point of a required "vaccination" to attend school. We are, and they are, fully prepared (curriculum is lined up), to homeschool.

Dr. Robert Malone is the inventor of the nine original mRNA vaccine patents, which were originally filed in 1989 (including both the idea of mRNA vaccines and the original proof of principle experiments) and RNA transfection. Dr. Malone, has close to 100 peer-reviewed publications which have been cited over 12,000 times. Since January 2020, Dr. Malone has been leading a large team focused on clinical research design, drug development, computer modeling and mechanisms of action of repurposed drugs for the treatment of COVID-19. Dr. Malone is the Medical Director of The Unity Project, a group of 300 organizations across the US standing against mandated COVID vaccines for children. He is also the President of the Global Covid Summit, an organization of over 16,000 doctors and scientists committed to speaking truth to power about COVID pandemic research and treatment.

He has this to say about vaccinating our children, "There are three issues parents need to understand:

The first is that a viral gene will be injected into your children's cells. This gene forces your child's body to make toxic spike proteins. These proteins often cause permanent damage in children's critical organs, including:

- Their brain and nervous system
 - Their heart and blood vessels, including blood clots
 - Their reproductive system, and
 - This vaccine can trigger fundamental changes to their immune system
- The most alarming point about this is that once these damages have occurred, they are irreparable.

You can't fix the lesions within their brain.

You can't repair heart tissue scarring.

You can't repair a genetically reset immune system, and

This vaccine can cause reproductive damage that could affect future generations of your family."

This information should at the very least pique your interest concerning your decision making on an injection mandate for children. We would recommend watching his entire 3 hour interview with Joe Rogan that took place on December 31, 2021.

Again, we will pull our three school age children from WA public schools. Consequently, our youngest (7th grade) has one foot out the door as it is, attending two electives a day in Middle School and homeschooled the rest. That has to do with masks. Stop masking our children while you are at it and let them breathe fresh air as their sovereign bodies were intended to do.

Sincerely,

Dan and Amy Reber

Subject: In regards to Agenda item 11 - Jan12, 2022

External Email

Board Members

In regards to agenda item11 for the January 12, 2022 meeting - "Rulemaking Petition - Chapter 246-105 WAC, Immunization Criteria, Child Care and School Entry - Possible Action". At this time there is, in my view, a complete lack of evidence of the necessity of inclusion of a COVID vaccination requirement in WAC 246-105.

Quoting from 246-105-010: "The purpose of this rule is to protect children and the public against certain vaccine-preventable diseases. Under the authority of the board of health, this rule describes the immunization requirements of children attending schools and child care centers."

The facts are the current COVID vaccines do not prevent catching the disease, and therefore are ineligible for inclusion in the list of "vaccine-preventable" diseases. The current COVID "vaccines", as is demonstrated by the vast number of "breakthrough" cases, are not able to prevent COVID to a comparable level as actually effective vaccines for the section 030 listed diseases, but merely to be a pre-treatment for the disease that generally reduces the severity.

Compare and contrast the number of COVID breakthrough cases (and rates) to breakthroughs for those vaccinated against the diseases listed in 246-105-030. Who has heard of breakthrough cases of chickenpox? Diphtheria? Rubella? Measles? Mumps? Pertussis? And the rest of the list, for that matter. The simple fact is, the number of "breakthrough" cases of the -030 currently listed diseases is so small as to be negligible - it would be major local news of an outbreak of Measles or Mumps in our local schools, yet these are all but unheard of. Yet the number of COVID cases that breakthrough the current vaccines is significant. Therefore, as a matter of definition, COVID is not a vaccine preventable disease. Compare and contrast COVID to one of the listed diseases with an actually effective vaccine - Mumps. According to the CDC, there were only 139 cases in 2021.

Considering that the best available evidence as of this writing indicates that on average children suffer no worse from COVID than the normal seasonal flu, and considering the unknown potential long term side effects of the current COVID vaccines, the risk-reward profile indicates negligible benefit to the children of Washington, while imposing unquantified potential risk upon them. Compare to the current policy for seasonal flu: Flu is an equal, if not a greater risk to children (and never mind the ability of children to spread seasonal flu to adults) AND the seasonal flu vaccine risk profile is well known and low, yet there is no mandate to vaccinate children for the seasonal flu. Yet, this Board is considering mandating a vaccine for a disease, COVID, that is equal or lower risk to children AND has a vaccine with an unknown long term risk profile? That would be illogical and would indicate other non-fact based motivations for such a mandate.

I respectfully urge the board to not add COVID to the list of diseases in WAC 246-105-

030.

Sincerely.

Barry Teschlog

You cannot approve a requirement of children in Washington state for the covid-19 vaccine as there is no FDA approved vaccine available. All brands of covid-19 vaccines available to the public are EUA only.

Hello,

I am writing to you tonight because I am very concerned about the TAG group that has recently gathered to start the process to recommend the Covid-19 vaccine as part of the required vaccines for children in schools. I have many concerns about the safety of the vaccine as well as the effectiveness of the vaccine. I have questions as to why the specific TAG members were chosen and how. Are they a representation of the parents of Washington state? Are they parents of school age children themselves?

Thank you,

Kylie Brodie

I am writing to implore you not to pass legislation requiring vaccines for school aged children in order to attend school. Kids are at virtually no risk from COVID and the potential known and unknown risks from the vaccine FAR outweigh the potential benefits. I will be forced to pull my kids out of school and homeschool if this legislation is passed.

I am deeply against the implementation of making the covid vaccine mandatory for students to enter or be enrolled in public school. However I am supportive of creating a catalyst of change that will help many parents realize that the public school system never truly was about putting kids first. Teacher unions and the Progressive left have crippled public education and will continue to demolish the quality of education it offers. As a parent and an educator ,I welcome the day that me and my kids can gladly walk away from public school due to the obvious disrespect of our medical freedom. You will be opening that door for me if you change the criteria for vaccines in public schools. I will be part of a movement to completely reenergize education and recreate it to be a richer, deeper, truer experience for students from all cultures. My goal will be to get as many families away from public education as possible so that the funds no longer go to the state government. Families will work together to enjoy freedom, life and the pursuit of happiness without government interference. It is time for a better choice for kids and parents will play an essential part in disarming the state of its power as we move towards a better way of educating our most precious resource.

With regards,
Kirsten Cox

Hello, Ms. Kaler;

Why are FDA-approved and scientifically proven therapeutics not allowed in this fight?
Why are vaccines the only option available?

Where are the peer-reviewed, scientific studies demonstrating that "children are the main reservoir for this virus"?

Why are we being forced to accept a vaccine without knowing its contents for another 70 years?

Where are representatives presenting ANY OTHER OPINION other than the vaccines?
Why are they not present in this discussion?

Where are the peer-reviewed studies demonstrating the efficacy and safety of these vaccines AFTER A YEAR IN VIVO/ IN THE POPULATION????

Regards,
Sophia Wilson

Subject: Covid-19 Vaccine Requirement

External Email

Washington State Board of Health:

I, along with many other concerned Parents across this State have grave concerns about adding the Covid-19 Vaccine to the list of required vaccinations amongst children of any age.

Requiring an mRNA injection that DOES NOT PREVENT DISEASE was never the intent of the legislature in it's delegation of authority to the State Board of Health to approve a schedule of immunizations for "vaccine preventable diseases". As you are all aware, this vaccine does not prevent one from getting the virus, or spreading it, even with follow up boosters.

Children are not at high risk of death from Covid-19. The latest variant comes to the majority of them as cold symptoms or nothing at all, and that INCLUDES children who's parents made the choice to vaccinate.

Requiring me to put my child at risk by getting a vaccine that offers perceived safety rather than actual immunity- is reason enough for me to pull my child from the public school system, and that is what I will do if this becomes a requirement.

I ha two elementary grandchildren in your district. They don't like the masks. I see a change in their personalities. They are sad and withdraw compared to before. Also, I see a fear in them about the injections. I am concerned about their physical & mental health.

The action of mandating an injection of, what I know to be, the possibly harmful contents, to the least impacted age group is unconscionable!

You are going to CRIPPLE the already failing public schools. So many parents are already ready to Home School their kids and this will send them over the top. I will be homeschooling my grandchildren if you follow through on a mandate that has been ridiculed by SCOTUS, & abandoned by POTUS, is harmful and unlawful

THINK about who you are helping..... Your own egos or the kids. You cannot say you have the kids in mind when you talk of mandating injecting for a virus that is becoming more like the flu every day and impacts kids 0-19 the least, if at all! Follow the data!

Please end this conversation NOW!

A loving an concerned grandmother & citizen

To Whom it may concern,

Thank you for your leadership during the difficult past two years. I think we can all agree that we are tired of covid-19, that we want it to go away, and we want our children and teens to return to normal living, freedom from ineffective, outdated, overly restrictive covid-19 policies that are more damaging to children than effective at transmission.

The thing that many do not agree on is the best route forward. With that said, I am particularly concerned about the COVID-19 shot clinics at schools. According to VAERS, severe adverse reactions and death rates are alarming for those who receive COVID shots. I am also concerned about the possibility of COVID-19 vaccination mandates. My teens are healthy. They have natural immunity after having COVID during the summer months. They are in a low risk age group. I believe, based on the vast amounts of research I have done over the past several months, that the COVID-19 shots are far riskier to my teens than the covid virus.

I urge you, as our leaders, to leave medical information-seeking and medical treatments up to parents. I believe that the lives of our blessed children should not be put at risk with this experimental shot. Any communications related to covid-19 needs to be well-informed and fair, with emphasis to the community that both unvaccinated and vaccinated people can be infected by and infect others, and that the same rules, rights, and treatment apply to everyone regardless of vaccination status. As compassionate human beings we must stop pointing the finger of blame at the unvaccinated, and we must stop violating the rights of the individual. We must immediately stop all forms of exclusion and separation between people. As epidemiologist Gunter Kampf states "Social cohesion should not be jeopardized because of an erroneous and narrow view of the epidemiological situation."

As a mother and mental health counselor, I cannot support this experimental mRNA injection for children because I have grave concerns over the known risks, the known harms, and the unproven safety and efficacy. In keeping with the number one rule of medicine, we have a duty to "First, do no harm."

After much research, I conclude, without a doubt, that the Pfizer and Moderna mRNA vaccines have an unacceptably high risk and no benefit. The Johnson and Johnson shot also has a large number of adverse reactions and therefore not acceptable. There is no credible risk-benefit analysis that justifies these Covid-19 shots being publicly available, much less required. To prevent unnecessary childhood death and disability, we must immediately cease promoting, advertising, requiring, or mandating covid-19 shots for teens and kids.

We must protect our children from being experimented on. The evidence is growing and we will look back in history on this as a tragedy. The only question is, how many children must die or be disabled before we cease this tragic experiment?

Please do not mislead parents by promoting mRNA vaccines as safe or effective for children. The truth is that these injections are not FDA approved. They are authorized only under Emergency Use Authorization, for experimental use in humans.

It is reckless and irresponsible to carry out this mass experiment on children. I am appalled at the irresponsibility of the FDA advisor, Dr. Eric Ruben, who admitted at the 10/26 FDA meeting that we don't know if the vaccines are safe, "We're never going to know how safe the vaccine is unless we start giving it, that's just the way it goes."

There are no adequate long-term safety studies of mRNA covid vaccines because the placebo group was "unblinded" and allowed to get the vaccine.

The Pfizer mRNA vaccine causes catastrophic side effects, particularly myocarditis and pericarditis in youth. The CDC's own analysis of "Myopericarditis following COVID-19 vaccination: Updates from the Vaccine Adverse Event Reporting System (VAERS)"

<https://www.cdc.gov/vaccines/acip/meetings/downloads/slides-2021-08-30/03-COVID-Su-508.pdf>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fvaccines%2Facip%2Fmeetings%2Fdownloads%2Fslides-2021-08-30%2F03-COVID-Su-508.pdf&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cb72309bebe0146f2458408d9cece362a%7C11>

showed astonishing increases in the youngest age brackets. Five European countries have halted the Moderna vaccines in youth under 30 due to concerns over cardiac adverse effects

<https://www.lifesitenews.com/news/iceland-the-fifth-european-country-to-halt-moderna-covid-vaccine/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.lifesitenews.com%2Fnews%2Ficeland-the-fifth-european-country-to-halt-moderna-covid-vaccine%2F&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cb72309bebe0146f2458408d9cece362a%7C11>

And the CDC investigation of rates of adverse cardiac effects from both Pfizer and Moderna vaccines in youth is ongoing

<https://www.cdc.gov/vaccines/covid-19/clinical-considerations/myocarditis.html>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fvaccines%2Fcovid-19%2Fclinical-considerations%2Fmyocarditis.html&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cb72309bebe0146f2458408d9cece362a%7C11>

Healthy adolescents aged 12-17 who have been given covid vaccines have experienced blood clots, myocarditis, neurologic symptoms and extreme fatigue.

Regarding safety and efficacy, please consider the statement of abstention on the 10/26/2021 FDA advisory meeting by Dr. Michael Kurilla, with full text in the references below. I am alarmed that so many scientists and doctors voiced serious concerns at this meeting over the known risks and unknown long-term effects of these experimental injections, yet the vaccines for children were authorized (not approved) for experimental use anyway.

Our children are meant to live out their fullest potential and we have a duty to protect them from the short and long-term risks of injury from a vaccine for an illness for which they have a 99.99% chance of complete recovery. It is a travesty and fear-mongering to discuss "keeping children safe" from covid-19. If we truly want to embrace safety for our children, we will focus on real childhood safety issues such as the accidents, motor vehicle accidents, cancer, mental health, and suicide.

According to CDC data there have only been a few hundred deaths in the 62 million population of the United States, and the vast majority of these children had underlying morbidities. <https://data.cdc.gov/NCHS/Provisional-COVID-19-Deaths-Focus-on-Ages-0-18-Yea/nr4s-juj3>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdata.cdc.gov%2FNCHS%2FProvisional-COVID-19-Deaths-Focus-on-Ages-0-18-Yea%2Fnr4s-juj3&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cb72309bebe0146f2458408d9cece362a%7C11d0e>

Therefore, children have a greater than 99.9% chance of surviving a covid-19 illness without harm. Why risk any harm in children when they are at extremely low risk of morbidity or mortality from covid-19 infection? In the vast majority of cases, children have mild or asymptomatic infection, due their immune systems being very different from adults. The infection fatality rate for children with covid-19 illness is calculated at 0.0027%, (<https://www.medrxiv.org/content/10.1101/2021.07.08.21260210v1.full-text>)
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F10.1101%2F2021.07.08.21260210v1.full-text&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cb72309bebe0146f2458408d9cece362a%7C11d0e>
) There is no covid emergency for children, except for the emergency of fear being pushed by Big Pharma and your school by promoting harmful and unnecessary vaccination.

Covid-19 illness is treatable and almost always mild in healthy children. You can learn more about early, at-home treatment protocols here*Pediatric perspectives on covid-19 illness, treatment, and vaccine decisions

We know so much more in 2021 than we did in 2020 about effective covid-19 policies. Centers for Disease Control Director Rochelle Walensky told CNN on 8/16/2021 that, "Fully vaccinated people who get a COVID-19 breakthrough infection can spread the virus to others even if they are not symptomatic... Our vaccines are working exceptionally well. They continue to work well with delta with regard to severe illness and death, but what they can't do anymore is prevent transmission."

https://www.realclearpolitics.com/video/2021/08/06/cdc_director_vaccines_no_longer_prevent_you_from_spreading_covid-19.html

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.realclearpolitics.com%2Fvideo%2F2021-08-06-cdc-director-vaccines-no-longer-prevent-you-from-spreading-covid-19.html>
!

Why are we giving risky vaccines to children (who are at no serious risk from covid-19 illness) that do not stop transmission in order to stop transmission? Think about it. How would you explain that to a child? Now that we know that mRNA vaccines do not prevent transmission, the societal reason for sacrificing our children's health completely collapses. Even if asymptomatic transmission rarely occurred, a society that knowingly

harms all children in order to protect a minority elderly and frail adults has completely lost its moral compass.

Both vaccinated and unvaccinated persons transmit virus, and vaccination may be causing increased spread of more virulent strains of SARS-CoV2, as described here

<https://brownstone.org/articles/this-is-not-a-pandemic-of-the-unvaccinated/>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fbrownstone.org%2Farticles%2Fthis-is-not-a-pandemic-of-the-unvaccinated%2F&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cb72309bebe0146f2458408d9cece362a%7C>

The vaccine does not stop infection, transmission, hospitalization, nor death. A recent study from the Harvard Center for Population and Development Studies states it plainly: "Increases in COVID-19 are unrelated to level of vaccination across 68 countries and 2,947 counties in the United States." Researchers found that, "countries with higher percentage of the population fully vaccinated have higher COVID-19 cases per 1 million people. Notably, Israel with over 60% of their population fully vaccinated had the highest COVID-19 cases per 1 million people in the last 7 days."

https://www.ncbi.nlm.nih.gov/pmc/articles/PMC8481107/pdf/10654_2021_Article_808.pdf
<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ncbi.nlm.nih.gov%2Fpmc%2Farticles%2FPMC8481107/pdf/10654_2021_Article_808.pdf

I urge you to include natural immunity, which many children already have, in any covid-19 communications by (school or org name) to parents. Parents deserve to know that T-cell testing for existing immunity is a valid option, and that natural immunity is durable, long-lasting against current and future variants. The vaccine is not effective against new variants, which is a major failure. When the evidence shows that naturally acquired immunity is equal to or superior than vaccines, we should not mandate vaccines for anyone, especially for children. Instead, we must respect the right of parents to make decisions for ourselves and our children.

<https://brownstone.org/articles/79-research-studies-affirm-naturally-acquired-immunity-to-covid-19-documented-linked-and-quoted/>

In closing, stick to your mission, cease any promotion of these injections

I hope that the decision of whether or not to give a child the Experimental Use Authorization covid-19 shot is up to parents, not school districts.

I urge you to protect our children and immediately cease any current or future plans for vaccine requirements, endorsements, or vaccination clinics at schools as completely unethical and unsafe for our children. There are too many unanswered questions to allow the experimental mRNA injections to continue.

Knowingly harming our children constitutes child abuse and is reportable to Child Protective Services, as eloquently described by this California teacher

After two years of covid-19 research, we now know that:

- *Children are at negligible risk from covid-19 and many children already have durable, sterilizing, natural immunity

- *The mRNA vaccine may actually hamper children's innate immunity

- *These injections are non-sterilizing, do not prevent transmission, and are estimated to have 4-6 months of waning immunity, paving the way for cumulative risk with twice-yearly boosters for life

- *This is an unauthorized, experimental, irreversible medical therapy with unknown long-term safety data for cancer and reproductive harm.

- *Covid-19 illness in children is treatable and for adults is treatable with early, at home, safe, effective multi-drug treatment protocols

- *Natural immunity from prior SARS-CoV infection is sterilizing, long-lasting, and superior to waning and non-sterilizing vaccine immunity.

- *Many Nordic countries have hit the brakes on mRNA injections in youth

Please also consider this information about the risks of harm to children that substantiate the facts above:

- *Pediatric perspectives on covid-19 illness, treatment, and vaccine decisions

- *Ten Reasons Not to Let Your Child Get a Covid Shot

- *What You Should Know About Children's Immunity When Considering the Covid Shot

- *An Overview of Natural Immunity and Transmission of Covid-19

- *A moving plea from 93 Israeli doctors to not vaccinate children with the mRNA shots

As parents, we do not trust the Pharma giant Pfizer who appears to be motivated by profit, not health

I am concerned about the trustworthiness of Pfizer, given the British Medical Journal's November 2 report that Pfizer has been accused of falsifying their covid-19 vaccine trial data and the study production speed came "at the cost of data integrity and patient safety." Pfizer's track record of fraud includes the 2009 opioid crisis for which Pfizer paid a 2.3 billion dollar fine for fraudulent marketing. Why would we trust our precious children with a Pfizer product? And how much public safety confidence does the FDA merit?

How can the media report accurately on covid-19 vaccines when Pfizer spends twice as much on advertising as on research, according to Forbes in 2019?

<https://www.forbes.com/sites/greatspeculations/2019/12/09/pfizer-spending-twice-as-much-on-selling-than-research/?sh=20fd550c4b37>

If these vaccines are safe, then why did Army surgeon Lt. Col Theresa Long ground 3 pilots in 3 days due to vaccine injuries and file an affidavit in a preliminary injunction for the US Military to immediately cease covid-19 vaccinations?

https://americasfrontlinedoctors.org/2/press_releases/americas-frontline-doctors-support-the-filing-of-a-preliminary-injunction-to-halt-further-vaccinations-for-all-military-staff-pilots-and-covid-recovered

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Famericasfrontlinedoctors.org%2F2/press_releases/americas-frontline-doctors-support-the-filing-of-a-preliminary-injunction-to-halt-further-vaccinations-for-all-military-staff-pilots-and-covid-recovered&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cb72309bebe0146f2458408d9cece362a%7C11>

Consider that statistician Toby Rogers concludes that we will kill 117 kids for every kid we may save from covid-19 illness? What if new safety belts killed 117 kids for every one kid saved in motor vehicle accidents? <https://tobyrogers.substack.com/p/ten-red-flags-in-the-fdas-risk-benefit>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ftobyrogers.substack.com%2Fp/ten-red-flags-in-the-fdas-risk-benefit&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cb72309bebe0146f2458408d9cece362a%7C11>>

Consider the 17, 619 reported death and disability reports in VAERS related to the covid-19 vaccine as of 10/22/2021 <https://openvaers.com/covid-data/mortality>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fopenvaers.com%2Fcovid-data%2Fmortality&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cb72309bebe0146f2458408d9cece362a%7C11>>

I am troubled that any risk-benefit analysis using VAERS data is incomplete because Dr. John Su at the CDC neglected to include the VAERS URF (under reporting factor) in his myopericarditis adverse effects following covid-19 vaccination reports, and it seems that the actual incidence is much higher than even the unacceptably high current reports

<https://www.cdc.gov/vaccines/acip/meetings/downloads/slides-2021-08-30/03-COVID-Su-508.pdf>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fvaccines%2Facip/meetings/downloads/slides-2021-08-30%2F03-COVID-Su-508.pdf&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cb72309bebe0146f2458408d9cece362a%7C11>>

One researcher states, "Using the VAERS database and independent rates of anaphylaxis events from a Mass General study, we computed a 41X under-reporting factor for serious adverse events in VAERS, leading to an estimate of over 150,000 excess deaths caused

by the vaccine." <https://www.skirsch.com/covid/Deaths.pdf>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.skirsch.com%2F covid%2FDeaths.pdf>>

How many kids have to die before we stop this experiment?

I am deeply troubled by the 14 deaths of teens in the July 16, 2021 CDC Vaccine report and the still- pending incomplete investigations into causal relationships between covid-19 vaccines and deaths. Also, this report describes 663 needing medical care, and 56 hospitalizations after vaccination in the Pfizer study. How many deaths and hospitalizations will occur when millions of children are experimented on?

<https://www.cdc.gov/mmwr/volumes/70/wr/mm7031e1.htm>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fmmwr%2Fvolumes%2F70%2Fwr%2Fmm7031e1.htm>>
How can we approve vaccines for 5-11 year olds when we have incomplete safety data for teens?

On request to NCATS Information Officer <ncatsinfo@mail.nih.gov>
<<mailto:ncatsinfo@mail.nih.gov>> >

The following was emailed as the complete text of the Please find below the written statement from Dr. Kurilla at the 10/26/2021 FDA Advisory meeting on covid-19 vaccines for ages 5-11: Statement on Abstention

The October 26, 2021, VRBPAC meeting concerned the Emergency Use Authorization (EUA) for Pfizer's mRNA vaccine for children ages 5 through 11 years old, which utilizes the same primary vaccination as the FDA-approved vaccine for adults and the EUA version for the 12 – 17 age group. The basis for my abstention was the specific wording of the question to be voted on and the following considerations:

- The longest follow-up for a subset of the trial subjects was only 3 months (immunogenicity and efficacy was assessed at 2 months post 2nd dose).
- Children already demonstrate asymptomatic COVID infections about 50% of the time (and this increases with younger ages). Since the trial endpoint only evaluated symptomatic disease, it likely overestimated overall 'infection' prevention.
- About 20% of subjects in the trial had evidence (serologic or +PCR test) of past infection, and none of these in either the vaccine or placebo arms experienced reinfection.
- CDC presented data to suggest at least 40% of children ages 5 through 11 years have experienced a prior COVID infection.
- Real world evidence involving adults suggest the 3-week dosing interval is suboptimal in terms of durability and is likely to be similar in children, leading to waning immunity within 4 – 6 months.
- Because the Pfizer vaccine offers protection against serious disease even after antibody titers have waned, there is some other basis for immunity, but at the lower dose in children, there is no expectation that those same immune processes will behave similarly to the higher adult dose.

While there are clearly high-risk groups within the 5 – 11 age group for which this vaccine would significantly reduce serious disease, I do not expect protection from infection to last more than a few months and this may negatively impact public perception of vaccines.

Taken together, I don't see the need for 'emergency use' of this vaccine across the entire age group and would have preferred a more nuanced approach.

Michael Kurilla, M.D., Ph.D., is an expert on infectious diseases and pathology. He has been a member of the Vaccines and Related Biological Products Advisory Committee since August 2018. He currently serves as Director, Division of Clinical Innovation, at NIH's National Center for Advancing Translational Sciences.

The action of mandating a vaccine to the least impacted age group is unconscionable. You are going to destroy the already failing public schools. Many parents are already home schooling their kids and this will send other parents in that same direction. Think about who you are helping. You cannot say you have the kids in mind when you talk of mandating vaccines for a virus that is becoming more like the flu every day and impacts kids 0-19 years of age the least, if at all. Follow the data! The virus is safer than the vaccine for children. This is a dangerous plan! Please end this conversation NOW!!!

Washington State Board of Health,

We are not injecting and will not inject our three school age children with this non FDA approved "Emergency Use Authorized" Covid-19 injection. It is simply not LEGAL to mandate such an injection. We know it, and you know it. We will pull them from public school immediately without hesitation if this ever were to somehow make it to the point of a required "vaccination" to attend school. We are, and they are, fully prepared (curriculum is lined up), to homeschool.

Dr. Robert Malone is the inventor of the nine original mRNA vaccine patents, which were originally filed in 1989 (including both the idea of mRNA vaccines and the original proof of principle experiments) and RNA transfection. Dr. Malone, has close to 100 peer-reviewed publications which have been cited over 12,000 times. Since January 2020, Dr. Malone has been leading a large team focused on clinical research design, drug development, computer modeling and mechanisms of action of repurposed drugs for the treatment of COVID-19. Dr. Malone is the Medical Director of The Unity Project, a group of 300 organizations across the US standing against mandated COVID vaccines for children. He is also the President of the Global Covid Summit, an organization of over 16,000 doctors and scientists committed to speaking truth to power about COVID pandemic research and treatment.

He has this to say about vaccinating our children, "There are three issues parents need to understand:

The first is that a viral gene will be injected into your children's cells. This gene forces your child's body to make toxic spike proteins. These proteins often cause permanent damage in children's critical organs, including:

- Their brain and nervous system
 - Their heart and blood vessels, including blood clots
 - Their reproductive system, and
 - This vaccine can trigger fundamental changes to their immune system
- The most alarming point about this is that once these damages have occurred, they are irreparable.

You can't fix the lesions within their brain.

You can't repair heart tissue scarring.

You can't repair a genetically reset immune system, and

This vaccine can cause reproductive damage that could affect future generations of your family."

This information should at the very least pique your interest concerning your decision making on an injection mandate for children. We would recommend watching his entire 3 hour interview with Joe Rogan that took place on December 31, 2021.

Again, we will pull our three school age children from WA public schools. Consequently, our youngest (7th grade) has one foot out the door as it is, attending two electives a day in Middle School and homeschooled the rest. That has to do with masks. Stop masking our children while you are at it and let them breathe fresh air as their sovereign bodies were intended to do.

Sincerely,

Dan and Amy Reber

Just making sure you all saw this info, especially about the meeting today-

IMPORTANT NOTICE and CALL TO ACTION about VACCINATION MANDATES

The State Board of Health (BOH) is having 2 meetings very soon to consider 2 requirements for Covid vaccination for school children:

1) Adding covid-19 to the list of required childhood vaccinations

Zoom meeting tomorrow Wednesday 12/29/2021 from 1:00 to 2:30pm. Here is the link to register to attend. I will attend and speak up if they allow comment.

https://us02web.zoom.us/webinar/register/WN_TEfkoisQBqjZDJH4gsPlw

Here is a link to WAC 246-105 below concerning: IMMUNIZATION OF CHILD CARE AND SCHOOL CHILDREN AGAINST CERTAIN VACCINE-PREVENTABLE DISEASES

<https://apps.leg.wa.gov/wac/default.aspx?cite=246-105>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapps.leg.wa.gov%2Fwac%2Fdefault.aspx?cite=246-105&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C29fc63c19da14e7d883108d9cbadf2ab%7C11d0e>>

2) Potential vaccine mandates for students

The WA State Board of Health will be meeting on Wednesday, January 12, 2022 regarding potential vaccine mandates for students. From now until Friday, January 7 at Noon, they are accepting public comment via this link -

<https://sboh.wa.gov/Meetings/ProvidePublicComments>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsboh.wa.gov%2FMeetings%2FPro>

I will be commenting and I encourage you to join me. As many of you as possible.

Cc:
Subject: COVID-19 Vaccine addition to school vaccine requirements

External Email

To: WA Board of Health Technical Advisory Group

With all due respect, I urge you to recommend postponing the addition of the COVID-19 vaccines to WA State school vaccine requirements until after long-term safety studies of these injections (via double-blind, randomized, controlled clinical trials) have been completed.

I spent 12 years as a Cardiovascular and Metabolic Specialist for a large pharmaceutical company, and witnessed time and again as new products were released with strong efficacy and safety data, only to later be proven less effective and far more dangerous than initially reported.

The alarmingly large number of reports of vaccine-induced injury and serious side-effects, including myocarditis and pericarditis in young people after covid injections, must be investigated thoroughly before any more children are required to submit to these injections.

To proceed with this mandate without acceptable long-term safety data violates medical ethics and potentially places our children at risk of great harm.

Again, respectfully.

Subject: RE: Covid-19 Vaccines for Children - Are You Kidding???

External Email

Dear Washington State Board of Health,

Our children are not for human experimentation. Mandates for inoculating anyone without full disclosure of experimental gene-therapy injections should never be an acceptable tactic for our government agencies to approve. Even though the media continues to tell us that these injections have received FDA approval, that is a lie. Pfizer's only approval is to license BioNTech as Comirnaty and even with that, Comirnaty has not been distributed in the U.S.

<https://dearpandemic.org/comirnaty-is-available-in-us/>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdearpandemic.org%2Fcomirnaty-is-available-in-us%2F&data=04%7C01%7Cnathaniel.thai%40sboh.wa.gov%7Ca88a444e4623454ef41508d9cfac46d%7C>>

This is copy/pasted directly from the Congressional Research Services:

Pfizer and BioNTech are marketing their licensed vaccine under the new brand name Comirnaty (pronounced koe-MIR-na-tee). Comirnaty has the same ingredients and formulation as the Pfizer BioNTech vaccine that is authorized under the EUA. The two products differ in branding and labeling but can be used interchangeably without any impact on safety or effectiveness. Although Comirnaty is fully approved by FDA for administration to individuals 16 years and older, an EUA remains in effect for the Pfizer-BioNTech COVID-19 vaccine. Among other things, the reissued EUA authorizes the Pfizer-BioNTech vaccine for uses that FDA had previously authorized but fall outside the scope of FDA's approval of Comirnaty. Such uses include the administration of the vaccine to children aged 12 to 15 and third doses of the vaccine regimen for certain immunocompromised individuals. The EUA also authorizes use of Comirnaty for those purposes to allow for interchangeable administration of the two vaccines.

<https://crsreports.congress.gov/product/pdf/R/R46913>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcrsreports.congress.gov%2Fproduct/pdf/R/R46913>>

Even Pfizer admits that the FDA only approved the licensing for Comirnaty...it is still under EUA:

The Centers for Disease Control and Prevention (CDC) is issuing Emergency Use Instructions (EUI) to provide information about the use of the formulation of the COVID-19 vaccine by Pfizer-BioNTech which is approved (licensed) by the Food and Drug Administration (FDA) for the prevention of COVID-19 in individuals 16 years of age and older. 1 These EUI provide information about the use of the COVID-19 vaccine by Pfizer-BioNTech as an additional primary dose in certain immunocompromised persons aged ≥12 years and as a booster dose in persons aged ≥16 years after completion of primary

Subject: Do Not add the EUA Covid-19 vaccine into WA schools Requirement

External Email

Dear Board of Health members:

As a long-time Washington resident and a parent of school kids, I sincerely oppose adding the Covid-19 vaccine into the WA schools requirement list.

The reasons are below:

1. For ages 5 to 12 kids, The covid vaccine is still on EUA, and there is no long-term side effect data of that. Even the FDA experts admit "we don't know the side effects until we roll it out." That is totally irresponsible to do this to children. We only offer safe medicine to our children, not something we don't know what the side effects could be.

2. Children have low rate of covid. The CDC shows the covid survival rate of children is about 99.9995%, the covid is mostly like the normal flu to children. They don't need to get the covid vaccine.

3. There are so many deaths and severe damage reports about the covid vaccine around the world.

Subject: Immunization requirements

External Email

Hello and thank you for reading my email.

As a parent and person who works in clinical research I have long supported vaccinations. I have worked first hand with covid and treatment studies. I understand research studies as wonderful opportunities but the core is patient ability to say no, without loss of benefit. We have zero long term data on the vaccine not the virus and are still collecting it. I myself have received the vaccine, but in NO Way should it be required for anyone, let alone for kids who have the most to lose long term and the best outcomes should they get the virus. We are not digging deep enough into precious infection and the impact it had on reinfection and on vaccination post recovery.

The parents are standing up and begging you to hear us, should you be like other places and turn a deaf ear, you will increase the divide and deepen the casum that is growing between parents and school boards/teachers. At a time we need to heal and listen, we need to be allowed to question and have voices not canceled but encouraged. Those who want the vaccine can get it and those who don't should not. This vaccine has unknown risks. The vaccine does not stop infection or transmission. The hope early on was for the virus to mutate to a variant that prosecuted milder symptoms and it seems we may have received that gift. The CDC acknowledged the majority cases had to be corrected for first 3 weeks in December and the majority of cases were not omicron but we're still delta. Do not react and act in fear of a virus but honor parents rights. Offer eduction but balanced and honest but do not demand. More over, listen, truly and actively listen. Active listening is opening your mind to their words without trying to form a reply until you have finished listening. Give an open heart and be willing to be wrong and say so.

Thank

You,
Jami

Subject: Johnson and Johnson-Covid 19 Negative Side Effects

attachments\AA465C7B95794237_image001.png

External Email

I wish to report the negative side effects I have experienced since being forced to take the Covid-19 vaccine or lose my job. I received the Johnson and Johnson one time vaccine on September 10, 2021. Two days after, I awoke during the night with numb, stinging, painful sensations in both arms from my shoulders to my fingers. This continued to occur every night for approximately one week painfully every night and I still experience a mild case of this. In addition, on September 12th, I awoke in the morning with severely swollen joints in the first joint of two fingers on my right and the main thumb joint of my left hand. These were not swollen or painful prior to the injection. These joints have remained swollen, and I experience intermittent stinging, burning, stabbing, aching pain in these joints as well as cramping. My hands do not have the grip and strength as they did prior to the shot and my hands shake when I attempt to do fine work such as intricate painting. I am more fatigued and find I need to sleep longer than normal. Prior to, I would sleep an average of 8 hours per night to feel fully rested and now need 10 or 11 hours of sleep to feel fully rested and functioning. I am very active as well, and I find I am short of breath, unable to regulate my breathing pattern during my work outs. I work out every morning Monday-Friday and am not able to maintain the same intensity and strength levels as I was able to prior to the injection. In addition, I find that I become more easily lightheaded with headaches in my frontal lobe, particularly on the right side. Not only have these issues caused me physically to suffer, but I am also suffering emotionally from being forced against my will to take this shot to keep my job and support myself, but also the emotional aspect of not feeling as healthy, active and strong as I was prior. This has been a very devastating thing for me to endure. I wish for my situation and detrimental side effects to be recorded.

Please feel free to contact me with any additional information you may require. I am providing my personal email and address below for any further necessary contact.

Thank you for your time.

Subject: K-12 Vaccine Mandates

External Email

I wrote a letter of objection to the prospect of a Covid vaccine mandate in Washington schools yesterday. My eight year old son said that he also wants to say something about it and children's voices should matter. So, these are his words, spelling errors corrected.

-Jennifer Cook

"Kids should be able to go to school without getting the Covid vaccine or to wear a mask. It's not fair what you guys are doing to kids. I only got to go to Kindergarten for half a school year. Then, I had to go to school on a computer but that wasn't working very well. So, my Mom had to start working less and making less money to homeschool me. So we have less money and I don't have a normal life for a kid. Then they opened school up again but only part time and only some days. Does Covid take off sometimes? That's dumb. Then they made kids be 6 feet apart and wear masks. So, we couldn't really play together and it's sad. I can't wear a mask without feeling like I am suffocating or going to pass out. So I didn't go back to school. I decided to stay homeschooled. There wasn't any reason to go when I couldn't even have fun with other kids anyways. You all got to have fun when you were kids. It's not fair. Now, I am 8 years old and I hardly remember ever going to school. Now, you guys are thinking about making kids get a vaccine that has hurt a lot of people and will definitely hurt more kids than Covid. My Mom told me how lots of healthy guys are getting heart problems. Lots of people are getting blood clots. Lots of people are getting other problems from these shots. Just because it's not every person doesn't mean it's rare. Too many people are getting hurt. My Mom works with people who are old or disabled and she saw one of her clients get blood clots and die after his vaccine and he was young. Lots of people are getting sick like they have the flu from these shots that are for a virus that's like a flu. How does that even make sense? I thought I could go back to school eventually after they stopped these dumb mask mandates but now after two years you guys are suddenly going to make kids get these shots that kids don't need and could get really sick from for a virus that kids aren't really getting sick from just to be able to go to school with other kids who could get the shot if they want to and teachers who can get the shot if they want to and who have families who can get the shot if they want to. This is all stupid. I am eight and I can figure out that it doesn't make sense. So, pretty much I will never get to go to school because you people are bullies. You are being bullies and I don't know why but I don't think it is to protect anybody. I think it is probably the same sort of reason that anyone is a bully. There is something wrong inside them and it makes them feel better to have power over other people and it makes them feel important. Well, I don't want to be bullied and if you would do these things then I don't think you are important or very nice. I just want a normal life. Why is a normal life of playing with other kids and being able to go places too much to ask for now? Why do I need your permission or anybody's permission to have a normal life? You aren't my parents and I am really glad about that."

-Tristan

Subject: No child vax mandate

External Email

Hello,

I am writing to express my strong disagreement with any new proposed covid vaccine requirement for Washington State students. I am a WA resident, life long Democrat voter and parent of two young children and feel this policy would be a huge over step of governmental authority. When the risk of serious harm from covid to young kids is statistically near zero, and there is no long term health safety data for these new vaccines, the choice to vaccinate young children should rest with parents, not the government.

Implementing a vaccine requirement for kids to attend school would be a mistake history will not look kindly upon.

Do the right thing and allow parents to make the call for their families.

Sincerely,
Alex Greene

Dear Kelie Kahler

I hope this email finds you and your family well.

A few days ago, during a WA State Board of Health meeting, the advisory group spoke of whether they should recommend adding Covid vaccination to the current WA vaccine schedule for school and daycare entry. Unfortunately public comments were not allowed. The advisory group would be making a recommendation for our children without hearing from the parents.

I oppose the Covid vaccine being added to the school and daycare schedule. Children have mild to no symptoms from the virus, and are thus the safest. Covid Vaccine inserts are none existent to the public, leaving us without a knowledgeable and informed choice. Pharmacists themselves do not have access to a vaccine insert. We are told to believe and take the plunge yet so many have had horrible and evenly deadly complications from these vaccines. Please urge the advisory group to be cautious and not make recommendations for the Covid vaccine to be added to the school and daycare schedule.

Thank you for taking the time to read my opposition and concerns. I look forward to reading your reply.

Subject: Covid-19 Vaccine Opposition -Children

External Email

Good Evening,

My husband and I come to you in opposition of adding the Covid-19 vaccine to the list of required vaccines. As tax payers, our children have the right to a public education. We have grave concerns about this vaccine and should not be in fear of losing our children's right to an education over a medical decision that we are not confident is safe for our children. This is a family decision and parents deserve the right to chose if we will submit our children to an experiment or not. We, along with many other concerned Parents across this State are demanding a choice.

Requiring an mRNA injection that does not stop the spread or prevent infection is not the intent of the legislature in it's delegation of authority to the State Board of Health to approve a schedule of immunizations for vaccine preventable diseases. This vaccine is neither effective in stopping the spread or preventing illness and should not be added to the list of required vaccines.

Children are not at high risk of death from Covid-19, they have a 99% chance of survival. They are also not causing community spread. The latest variant presents as cold symptoms or nothing at all. People who have been vaccinated are getting it in higher numbers than those with natural immunity.

Children, males in particular, are at a far greater risk of an adverse reaction to the vaccine than serious complications from covid. It is not right or constitutional to threaten to withhold an education from a child if the parents do not comply to your opinion of what is best for our children. There is enough data and research to indicate these vaccines are unnecessary and unsafe for children.

We will not allow our children to be a science experiment to make adults feel safe. Our children will NOT receive the experimental vaccine under any circumstances. We will go to the ends of the earth to protect them. This deserves to be a family choice, they are our children, not yours. We will immediately pull our children from the public school system.

I leave you with this, from a mother to mother or parent to parent. Imagine being forced to give your child something that you are not 100% confident is safe for them but having another adult try to take that option away from you? This is what you are doing to us by trying to take our right to chose away. Where is your compassion?

Subject: Forced vaccinations on children

External Email

Hello,

Through my own research it has been established through the Phase Two testing of Pfizer and Moderna that the spike proteins attach in great numbers to the testicles, ovaries and lungs. It is unknown why, but this is a huge concern whether this will lead to infertility of the Phase Three subjects or all of us.

Also, just learned that by including these vaccines in the schedule of childhood vaccines completely secures the drug companies of no legal liability in case of death or injury. Seems very nefarious to me.

Please do not force our children to be killed or injured by a vaccine they don't need, as concluded earlier by the CDC and Fauci. In addition, it's been proven by most vaccinated countries, US and Israel, that the vaccines do not prevent transmission of the virus. The boosters will permanently damage T-cells and create AIDS which is what Israel is concerned about with a fourth booster. In fact, almost 80% of hospitalized have been fully vaccinated, according to the CDC. Another fact, all the test animals in Phase Two died once vaccinated and then sickened with Covid-19. With humans, this could mean death within 5 years via blood cancer, AIDS, blood clots leading to heart attacks and strokes.

Good sources of where I've gathered this knowledge is through, Dr. Robert Malone, one of mRNA technology inventores, Dr. Mike Yeadon, former director of Pfizer, Dr. McCollough, Dr. Sheri Tenpenny, Dr. Teri Madej, Dr Ardis. Dr. Ardis is involved with federal lawsuit regarding 48,000 who died within 3 days in Aneheim, CA. after getting the jab.

Thank you,
Pat

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group is given the vaccine, one group is given a placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccine adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time.
Lindsay Donahue
Spokane, WA

Subject: Do Not add the EUA Covid-19 vaccine into WA schools Requirement

External Email

Dear Board of Health members:

As a long-time Washington resident and a parent of school kids, I sincerely oppose adding the Covid-19 vaccine into the WA schools requirement list.

The reasons are below:

1. For ages 5 to 12 kids, The covid vaccine is still on EUA, and there is no long-term side effect data of that. Even the FDA experts admit "we don't know the side effects until we roll it out." That is totally irresponsible to do this to children. We only offer safe medicine to our children, not something we don't know what the side effects could be.

2. Children have low rate of covid. The CDC shows the covid survival rate of children is about 99.9995%, the covid is mostly like the normal flu to children. They don't need to get the covid vaccine.

3. There are so many deaths and severe damage reports about the covid vaccine around the world.

1). 382 Athlete Cardiac Arrests, Serious Issues, 222 Dead, After COVID Shot (until 12/27/2021)

<https://goodsciencing.com/covid/athletes-suffer-cardiac-arrest-die-after-covid-shot/>

To Whom it may Concern,
I ask that you would not require the Covid-19 vaccine for school students. There has not been enough research and evidence to show that the vaccine is safe ☐and effective. Also covid does not seem to have a great negative effect on children and young adults when they get it.
Please leave it up to each individual to decide for themselves.
Respectfully,
Tara Wilkins

Just making sure you all saw this info, especially about the meeting today-

IMPORTANT NOTICE and CALL TO ACTION about VACCINATION MANDATES

The State Board of Health (BOH) is having 2 meetings very soon to consider 2 requirements for Covid vaccination for school children:

1) Adding covid-19 to the list of required childhood vaccinations

Zoom meeting tomorrow Wednesday 12/29/2021 from 1:00 to 2:30pm. Here is the link to register to attend. I will attend and speak up if they allow comment.

https://us02web.zoom.us/webinar/register/WN_TefkoeisQBqjZDJH4gsPlw

Here is a link to WAC 246-105 below concerning: IMMUNIZATION OF CHILD CARE AND SCHOOL CHILDREN AGAINST CERTAIN VACCINE-PREVENTABLE DISEASES

<https://apps.leg.wa.gov/wac/default.aspx?cite=246-105>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapps.leg.wa.gov%2Fwac%2Fdefault.aspx?cite=246-105&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Ceb2debcf92bc4b87b60f08d9cbca0b08%7C11d0e2>

2) Potential vaccine mandates for students

The WA State Board of Health will be meeting on Wednesday, January 12, 2022 regarding potential vaccine mandates for students. From now until Friday, January 7 at Noon, they are accepting public comment via this link -

<https://sboh.wa.gov/Meetings/ProvidePublicComments>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsboh.wa.gov%2FMeetings%2FProvidePublicComments>

I will be commenting and I encourage you to join me. As many of you as possible.

Subject: No school covid vaccine

External Email

To WSBOH,

As a parent of four school age children I am deeply concerned that it is being considered to add a Covid Vaccine requirement to public education. This virus is a minor cold for most children, and is currently so virulent a large majority have already had it or will get it soon. If a child is high risk their parents and physicians can determine if the risk of the vaccine is the best choice for THAT child. Looking at the risk of vaccine vs. the virus for teenage males regarding Myocarditis should cause anyone to pause in suggesting/mandating it for all school age children. I am very alarmed you would even consider adding this to the vaccines required.

Thank you for your time,
Stephanie Beck

I don't believe our kids should be required have a mandatory vaccine to stay in public school. There's not enough research...and so many unknowns! I am vaccinated myself and by no means am anti vax.

The only way I would consider is if our kiddos could take their masks off...but that won't happen cause the vaccine isn't 100% effective.

Subject: NO Mandating COVID Vaccine's

External Email

The action of mandating a vaccine to the least impacted age group is unconscionable!
First, the evidence that they are even effective against recent variants is questionable.

You are going to CRIPPLE the already failing public schools. So many parents are already ready to Home School their kids and this will send them over the top.

THINK about who you are helping..... Your own egos or the kids. You cannot say you have the kids in mind when you talk of mandating vaccines for a virus that is becoming more like the flu every day and impacts kids 0-19 the least, if at all! Follow the data!

Please end this conversation NOW.

Thank you,

Dana Walker

I would like to say I am not for or against the vaccine. But I do not think this vaccine which is causing more harm than good should be placed on our children to be forced to have it to have a public education. It should be a choice and a parents choice if they decide to have their kids vaccinated with the Covid shot. They shouldn't require anything if the parents do it want to take a chance on giving this shot to their kids. No one knows the long term effects this will have on anyone. There are no long term studies done, what if they give it to their kids and this causes long term effects or are infertile or worse die because you are requiring it? This is ridiculous and taking away our choice and freedom as parents and our childrens rights. You should be ashamed at yourselves for taking away a child's right to have an education- get the shot or get the education.

Please do not vote for this and do not support this.

We the people need to take back our freedoms as we are losing them and will not stand for this!! If you vote for this there will be thousands of kids pulled from schools and

homeschooled. The education system will fall apart. Just as our jobs are going to fail if this is mandated on the job markets as well. Do not be one who will let this country fall apart, please!!

Thank you,

Carri Coe

I am appalled that this is even a discussion. The Covid-19 shot has not completed phase 3 trials for children and is under Emergency Use Authorization. Children have never been a vector for the virus and more and more data coming out is showing the risks for the shot are higher than the risk of illness. Do not pass any mandates for children.

Subject: No Covid vaccines for school children

External Email

To the Board of Health:

Covid-vaccines for children are completely unnecessary and potentially harmful. There are so many unknowns with these new vaccines that the risks outweigh the benefits. The vaccines have emergency use authorization; by forcing these vaccines on children, you are enrolling them in a vaccine trial. We should be protecting our children, not putting them at risk!

The adverse reporting system shows these vaccines have significant side effects, including myocarditis, pericarditis, pulmonary embolism, Bell's Palsy, appendicitis, blood clots, herpes zoster infection and cardiac arrest.

Children have a very low risk of Covid-19 infection. They are unlikely to get the disease, or if they do get the disease, they often have mild symptoms or are asymptomatic. They do not transmit the disease in any significant way, so are not the drivers of Covid-19 (Dr. Fauci). In fact, it is more likely that adults will pass on the disease to children. Furthermore, more children die of influenza than Covid-19 (CDC). There are too many unknowns with these new vaccines and the risks outweigh the benefits. Thank you.

Considering a vaccine requirement for school children is one of the most absurd ideas during this entire pandemic. Children are virtually at ZERO risk from COVID, while the risks of injury from these "vaccines" are extremely high. These inoculations are still in clinical trials and if one does just a little research they will find many, many reports of injury and death caused by these jabs. Please look up the VAERS data reports and then consider if you would ever want your child or anyone else's child to take this experimental jab! It is immoral and unethical to force an experimental drug on anyone! Especially children who don't know better and don't get to make the decision for themselves.

Please don't force children to get the vaccine . Statistically they are the least likely to get it and if they do they rarely have serious problems. We have known countless families where Covid has already gone through the family, much like the flu, and everyone recovers. It made the rounds in my family and my husband and daughter did not get it. My daughter is 19 and has been vaccinated and is in the Transition program . Since she is older and has Down syndrome and won't be bearing children I decided to vaccinate her, only because of all the restrictions put on us from Special Olympics and job work sites.

Having Lupus my doctor advised me not to get the vaccine and I know several people including my future daughter in law who can't get the vaccine. She had a two month bout with Covid and she has built up immunities. It should be a personal choice made by each individual family as with any vaccine. The government should not be overreaching in this area.

Many families I know will pull their kids out of schools and/or move out of state. Seven families I know have already moved to Spokane area and Idaho.

Sincerely,
Deborah Sweeney

I am a resident and taxpayer of Washington and demand you not mandate a covid vaccine for school children.
There is no proof these new mRNA vaccines won't cause longterm harm. Children's symptoms if they even get covid are very mild.
Forcing the covid vaccine on children is immoral and must not happen.

Good afternoon,

I am writing you at BOH upon finding out that there is discussion to force and require children/young adults to get the still experimental Covid-19 Vaccines, and extra injections to boot. This is absolutely outrageous.

There are more dangers that go with the Covid-19 vaccine to children and young adults, then the virus itself.

This discussion should conclude with an emphatic and resounding NO! to the Covid-19 vaccine requirement and enforcement to attend school.

Subject: No vaccine for school aged children

External Email

Good morning,

I'm sending this email in objection to any required COVID vaccine for children attending school in Washington State. My son is a 6th grader and will not be taking this shot. I will pull him out of school if this unreasonable measure is made, and I'm sure many others will do the same. If vaccinated you can still get COVID and spread it to others. It makes absolutely no sense to vaccinate any child, who has a much higher chance of perishing in a car accident than hospitalization or death from COVID 19.

Like many other families, we have already had COVID. We have natural immunity which is a wonderful thing. Please recognize that!

Further, this shot goes against my family's religious beliefs. This is something that must be honored for all families should this ridiculous policy be put into place. Please respect individual family rights. The kids have suffered enough.

Thank you,
Vivian Hircko

Subject: NO vaccine requirement

External Email

Considering a vaccine requirement for school children is one of the most absurd ideas during this entire pandemic. Children are virtually at ZERO risk from COVID, while the risks of injury from these "vaccines" are extremely high. These inoculations are still in clinical trials and if one does just a little research they will find many, many reports of injury and death caused by these jabs. Please look up the VAERS data reports and then consider if you would ever want your child or anyone else's child to take this experimental jab! It is immoral and unethical to force an experimental drug on anyone! Especially children who don't know better and don't get to make the decision for themselves.

External Email

Hello,

Coercing school kids to get the shot in WA is unjust and unsafe. Check out the VAERS reports if you want to profess an understanding of the details pertinent to your discussion. The "broad understanding" you just now in the meeting claimed to have is meaningless if you cut out consideration of health risks with the shot.

Subject: NO Vaccination for COVID for children needed

External Email

Hello,

I'm going to tell you straight up that my children will be home schooled if the State mandates the COVID vaccination. There is plenty of evidence that exists that children are not a risk and that transmission is not happening at school. This vaccination needs more studies and actual facts prior to being implemented on children as mandatory. If you do mandate ensure that you allow yourselves and the school districts to be sued by parents if you are so sure that it is safe.

V/R,

Luke Chermak

The action of mandating a vaccine to the least impacted age group is unconscionable!

You are going to CRIPPLE the already failing public schools. So many parents are already ready to Home School their kids and this will send them over the top.

THINK about who you are helping..... Your own egos or the kids. You cannot say you have the kids in mind when you talk of mandating vaccines for a virus that is becoming more like the flu every day and impacts kids 0-19 the least, if at all! Follow the data!

Please end this conversation NOW.

Hello, my name is Angelina. I am writing to let you know that I am strongly against the BOH pushing to make the covid vaccine a mandate for school children. Not only would this be taking away our parental rights on deciding what we think is best for our children but also taking away our children's education if we choose not to vaccinate our children. This is a subject that we parents have the responsibility to decide on whether we want our children to participate in or not. Each parent should have the right to make their own decisions for their children. Thank you.

A covid mandate means I remove my children from public schools. Almost zero deaths in this age group. Rediculous measures were overkill from the very beginning. No long term studies on future fertility, or long term effects. Please consider the parent's wishes when it comes to making new policies. You are unelected and do not represent the majority of people with these concerns of government overreach. You do not answer emails except for form letters. Extreme use of "emergency" powers 600+ days in.

I would like to say I am not for or against the vaccine. But I do not think this vaccine which is causing more harm than good should be placed on our children to be forced to have it to have a public education. It should be a choice and a parents choice if they decide to have their kids vaccinated with the Covid shot. They shouldn't require anything if the parents do it want to take a chance on giving this shot to their kids. No one knows the long term effects this will have on anyone. There are no long term studies done, what if they give it to their kids and this causes long term effects or are infertile or worse die because you are requiring it? This is ridiculous and taking away our choice and freedom as parents and our childrens rights. You should be ashamed at yourselves for taking away a child's right to have an education- get the shot or get the education.

Please do not vote for this and do not support this.

We the people need to take back our freedoms as we are losing them and will not stand for this!! If you vote for this there will be thousands of kids pulled from schools and homeschooled. The education system will fall apart. Just as our jobs are going to fail if this is mandated on the job markets as well. Do not be one who will let this country fall apart, please!!

I'm the parent of 2 school aged children who attend Tahoma School District. Both my daughter's had severe reactions to previous vaccines and have had exemptions in place since 2013. I will immediately pull my children from public schools the moment any Covid Vaccine is mandated for them to attend. My homeschool station is ready to go at a moment's notice. I know many other parents who will do the same.

Public school funding as you know it will crumble if this is enforced. Please know "We the People" will not stand for this. Homeschool is already the 3rd largest district in the state of Washington. Be prepared for it to become #1 if this is passed.

Please reconsider this, think of the children who need to continue the schooling their parents are paying for. We should have a say 100% in regards to our children's health, safety and well-being while in the hands of the school system.

This is lunacy. Our children are more likely to have a side affect from the vaccine than any benefit at all.

The only accomplishment will be more parents removing their children from the public schools. There goes your federal funding.

Please reconsider enforcing such a needless mandate. At the very least we need to wait 5-10 years (like we have with other vaccines) to see what long term affects these vey new vaccines may have. There should be no rush to endanger our very low risk youth.

Thank you for your consideration,

Paula Donlan

To whom it may concern,

It has come to my attention that you are deciding whether to include covid vaccines as required vaccinations and a prerequisite for children to attend public school. I am violently opposed to this. Children have the lowest risk for any kind of serious effects from covid. They do not need to be injected with experimental drugs. (True trials take much longer -- we all know that!)

Hi there,

I feel the need to share that mandatory vaccines for children to attend school should not be allowed. If doctors aren't even worried about kids catching covid then we shouldn't be worried either. If the vaccines worked then those vaccinated shouldn't be worried either. I have spoke with many different doctors that have said that kids catch it but usually with little to no symptoms. So please tell me why it makes sense to vaccinate them?

Also, most things done for covid don't make any logical sense. Does it make sense to make an unvaccinated person test for covid when a vaccinated person can still catch and spread covid. This makes zero sense to me other than trying to segregate people into groups. Which is what is happening. Oh here is another one, these kids have to wear their masks all day at school, but during lunch they take it off and eat. I think this is good proof that covid isn't spreading as much as they say, as these kids are talking, laughing, and eating for a half hour and covid still doesn't spread through these kids. You would think it would spread like wildfire, but it hasn't.

I know tons of families both pro and against vaccinations that will be pulling their children out of the school system if a mandate for covid vaccine goes through. Schools will lose tons of money. I am prepared to homeschooling my girls and have found some amazing homeschooling sites. I keep going back and forth on if I want to just homeschooling anyways mainly because the schools keep following what you put out there blindly. Again what sense does it make to have vaccinated kids not have to test or wear masks to play sports but unvaccinated kids have to test twice a week and wear a mask. Again vaccinated can still spread covid and catch it, so how does this make sense. It doesn't make sense yet people are still pushing for it.

My family and I try to be as safe as we can. We wear our masks, wash our hands, and stay away from large crowds. I refuse to watch the news any more because all they are doing is spreading fear. I think my last straw was when I was checking the weather this last week and on the weather websites it shows the amount of covid cases and deaths. Pierce County was at 111,000 cases and only 1,009 deaths. This is in a two year period. This is not a high amount of deaths.

So please consider our children when trying to mandate vaccines. I guarantee thousands of parents will not agree to this!

Thank you for taking the time to read this. I wish you a happy and healthy 2022.

Take care,

Lori

It has come to my attention that the Washington State Board of Health is considering having the Covid-19 vaccines a requirement for children to go to public schools in Washington state. As a parent I have researched the risks and benefits with the Covid-19 vaccines and have found the risks far outweigh any perceived benefit. For this reason I urge you not to make any Covid-19 vaccine a requirement for children to get public education in the state of Washington.

To whom it may concern,

Do not require the experimental covid injection into the school requirements. There are global protests against the mandates. The founder of the vaccine itself Dr. Robert Malone, just admitted that the vaccines are causing more illness than they treat, over 30,000 deaths reported from the experimental vaccines, and it does not stop infection or transmission.

Our children are not lab rats.

Listen now, NO MEANS NO!!

Signed,

A concerned parents.

Hi, I am a parent of an 11-year-old boy in the Lake Washington School District. We decided that all the adults in our household would benefit from covid vaccination. We did have 5 family members get breakthrough cases over the summer, including my son, who had a mild case. everyone recovered without need for medical attention.

I believe that covid poses very little risk to him at this point. And the side effects of the vaccine, particularly the heart inflammation, is a higher risk to him than another case of covid. He won't be getting the vaccination. He is UTD on all of his regular vaccines.

I am writing to let you know that I object to WA state mandating covid vaccine for schools. If the state does this anyway, I have every intention of homeschooling or moving, as this will be the last straw for me. I have resources and time to do either option. I can not see any valid reason for vaccinating my child, and will not comply with any mandates instituted.

I am writing in opposition to requiring the experimental COVID 19 gene therapy shot for school children. The yearly flu is much more deadly for children yet parents and their child's doctor are allowed to determine the medical procedures their child takes. More children die of flu and drowning and car accidents than of COVID. Shall we ban children from riding in cars or taking baths or swimming? Shall we close schools every flu season? The medical trial for this COVID shot is ongoing into 2023. Our kids should not be forced to be guinea pigs. We have no idea if this new technology is safe. NO TO A COVID SHOT MANDATE FOR SCHOOL CHILDREN. Gail McGaughey

Considering a vaccine requirement for school children is one of the most absurd ideas during this entire plandemic. Children are virtually at ZERO risk from COVID, while the risks of injury from these "vaccines" are extremely high. These inoculations are still in clinical trials and if one does just a little research they will find many, many reports of injury and death caused by these jabs. Please look up the VAERS data reports and then consider if you would ever want your child or anyone else's child to take this experimental jab! It is immoral and unethical to force an experimental drug on anyone! Especially children who don't know better and don't get to make the decision for themselves.

There should be no discussion about this as children are infected much less, and the long term data on any injection to combat covid has not been published. We have seen that once, twice, and thrice "vaccinated" individuals are having "breakthrough" infections, which means the efficacy of the injection is minimal, and the potential effects could be catastrophic to growing, developing individuals.

No injection that is being administered under EUA should not even be discussed for mandatory administration. The current injections are NOT the FDA approved version, and thus no liability is taken by the manufacturer of the injectable. People can argue they are the same, but the FDA says they are not the same, but interchangeable.

This process needs to slow down considerably for data to be gathered on if this virus is going to burn itself out, ala omicron, be a seasonable virus, before a potential life altering injection is given to a child that cannot give consent.

WSBOH,

I believe kids should not be mandated to get vaccinated. We do not have the proper testing of possible long term effects the vaccine may cause. This seems immoral to allow this. I believe we all want the best for our children, and keeping them safe. In this case the risk is not worth it. With the very low mortality rate for kids this should not even be considered. Please do the right thing and not mandate this vaccine on our children.

sincerely Jeremy Beck

Subject: no experimental covid vaccines for kids

External Email

Attention WA State BOH:

There is no reason to mandate this experimental vaccine for children. The risk of the virus is minimal to none for kids and the injury rate for this particular shot has been alarming. There was a Senate Hearing in the Fall on the catastrophic injuries occurring with these vaccines. It was heart breaking to hear from a heart doctor, a pilot and several athletes who could no longer do their jobs. One was in a wheel chair and several had constant seizures.

The death count is over 18k now and there is no reason to gamble on school age children developing blood clots or heart problems.

Do not add the covid vaccine to the school schedule. There is no data that supports such a move, only financial incentives that will be investigated.

Do the right thing and leave the decision to the parents and students and their doctors.

Sincerely,

Ken & Doreen Dings, Renton WA

I am writing as an interested party but one who has studied the data on vaccines including Americas Frontline Doctors who are far more up to date than the official channels. I am not anti vax and have had two shots but i will not have another. The Mrna vaccines are a gene therapy whose long term side effects in children are not proven and which are demonstrating damage to human immune systems the more the boosters are given. You have NO data to confirm the child vax is less harmful than a child's natural immunity. Also children that contract covid heal and have a long term immunity which eliminates the need for dangerous boosters which WILL harm their immune systems.

There are now therapies which taken in the 1st 5 days eliminate the need for hospitalization if covid is contracted by a child

You can't justify giving a MRNA vax to a child who already has natural immunity

When you don't know what you are doing, the best thing to do is STOP until you do!! The scientific evidence is flipping on covid vaccines and heading toward

therapeutics. Most of the covid cases from the cruise ships are proving fully vaccinated people in confinement does nothing to stop the spread.

My vote is no vax mandates on our kids

Considering a vaccine requirement for school children is one of the most absurd ideas during this entire plandemic. Children are virtually at ZERO risk from COVID, while the risks of injury from these "vaccines" are extremely high. These inoculations are still in clinical trials and if one does just a little research they will find many, many reports of injury and death caused by these jabs. Please look up the VAERS data reports and then consider if you would ever want your child or anyone else's child to take this experimental jab! It is immoral and unethical to force an experimental drug on anyone! Especially children who don't know better and don't get to make the decision for themselves.

I oppose making COVID-19 shots mandatory for school admission or childcare for the following reasons:

The vaccines are still only emergency use authorized making it unethical, as it is forcing children to participate in a medical experiment without informed consent. There are no long-term studies to document any history of safety. We do not know how these treatments impact the growing bodies and brains of children.

Studies now show that both vaccinated and unvaccinated transmit Covid, therefore, the vaccine does not stop the spread of the disease, making the mandate ineffective at accomplishing it's goal. It is well-known and documented that Covid poses very little risk to the health of children and that natural immunity is a more robust defense against future infection. It is unethical to require medical treatment on any person when there is no viable benefit to either the person or to the community.

Mandating this vaccine for children is irresponsible and unethical.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Forcing ANYONE to take an injection, especially CHILDREN, goes against informed consent, is unconstitutional, and is immoral. There is evidence that these so-called vaccines are an effort toward population control, rather than for public health. I wish to publicly oppose the injections for all children. May God have mercy on anyone who attempts to make them mandatory.

My husband and I are totally against the covid vaccine, and booster for a requirement for children to attend school. We have grandchildren, and great grandchildren in school even with the vaccines children are still get the Covid, and variants. This should be a parent's decision, not the Government. No one can tell you what the long term affects will be.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

The vaccine does not protect against COVID transmission, it is ONLY authorized for "Emergency" use, transmission of COVID among the young is extremely low, and there are no long term studies showing the effects of this vaccination.

I understand that none of the decision makers care what the citizens think or how they feel, because they truly feel that they know what's best for everyone. They believe that none of us adults have sense enough to make decisions for ourselves and our families (and perhaps there's a point to be made there, judging from the types of individuals the majority of the people have voted in)...but for what it's worth, I have to be able to tell my kids that I tried. If this vaccination mandate does come to pass for the children of Washington state, I can promise you that there will be a large exodus of students from publicly funded schools, mine included. Allow us the freedom to choose for our kids. You don't even know them.

Sincerely,

Andrea Frydenlund

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

* Natural Immunity should count for protection against COVID-19 and many have already had the infection.

* We now understand that the vaccine does not prevent the transmission of the COVID-19 infection so there really is no reason to take an experimental injection that does not work.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. Plenty of evidence exists that people under the age of 60, especially young school age children, are not at risk of becoming seriously ill or dying from any of the Covid-19 variants. Even older adults have a low risk of becoming seriously ill or dying from Covid.
2. The Covid vaccines have been shown to be less than 40% effective, especially against the new Omicron variant.
3. Schools should be focused on PREVENTION through healthy school meals and physical activity, not forced vaccination.
4. VAERS data shows a significant risk of side effects (including myocarditis) from vaccinations. Any other drug with significant risk of dangerous side effects would have already been pulled off of the market. The only reason these vaccines are still on the market and able to be pushed or even forced on the public is due to the Emergency Authorization.

I could cite additional reasons to not mandate the vaccines for school children or anyone else, for that matter. However, the four reasons listed above should be enough reason to not mandate these vaccines for anyone.

Thank you for your time.

Washington State Board of Health:
Young children should not be mandated to receive Covid vaccines.
Medical decisions for children should be between their caregivers and their doctors. I find it very dismaying that even though the CDC has said numerous times that children are not at great risk of Covid, and the fact that these vaccines are under an Emergency Use Authorization not fully approved, you would consider requiring this.
We are told to follow the science and the science does not support such a requirement. Please truly consider our children, follow the science and do not impose this, since we truly do not not what the future effects will be.

Sincerely,
Heather LaFranchi

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- Vaccines have not been fully tested for all side effects.
- CoVid Death rates among all age groups are the same as the FLU.
- CoVid death rates among children are the lowest of all age groups.
- Teachers and staff are all mandated by Gov. Inslee to be vaccinated against CoVid.
- CoVid vaccines do not prevent a vaccinated person to spread CoVid.
- CoVid vaccines do not prevent a vaccinated person from becoming infected or re-infected

Hello,

I'd like to comment on the upcoming Board meeting scheduled for January 12th.

I OPPOSE Agenda Item #8, the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose COVID-19 shot mandates, period!

I SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Dear members of the board

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State .

As a parent, and a member of the community, I implore you to please stop the push to require Covid 19 vaccinations for ANY child in child care or school. Covid vaccines should absolutely NOT be a requirement for our children! Children are at an extremely low risk for Covid 19. The Covid 19 vaccines have no long-term testing on adults and they have even less testing on children. Covid 19 vaccines are not stopping the virus as many with the vaccine are contracting and spreading C19. The vaccine has not been tested enough to ensure its efficacy and safety in children. Requiring this vaccine does not protect our children!

The disease burden in this case does not meet your criteria. There is NOT a significant morbidity and/or mortality in at least some sub-set of the population. The survival rate is well over 90% and even the long term effects of C19 do not represent a significant amount. Additionally, this vaccine is not meeting your criteria because it is not reducing the risk of person-to-person transmission.

As for the criteria of Implementation, the vaccine is NOT acceptable to the medical community and the public. There is an extremely large amount of both the medical and the general public who do NOT accept this vaccine as safe.

And finally in regard to vaccines effectiveness, this vaccine does not work. It is not on the Recommended Childhood & Adolescent Immunization Schedule. It is not preventing C19 nor is it preventing the spread of C19. The vaccine is not cost effective for our nation. Perhaps it is cost effective or free or maybe even puts some money into the local schools, but as a nation, it is destroying our financial position at an alarming rate. "Experience to date with the vaccine containing this antigen demonstrates that it is safe and has an acceptable level of side effects." Yeah. Not even close. Tell that to the parents of the kids who are having heart attacks. Tell that to my friends who have had massive auto immune flare ups and other medical issues arise immediately after their second dose. This is not a safe vaccine for all people. Even the FDA board that was approving those vaccines to they young kids did it with the impression that will be absolutely voluntary and will never be mandated which CDC guaranteed. Will you take upon you the responsibility for the health and well being on innocent children who you will be subjecting to unknown risks in order to receive education which is an ingrained right of every child? Will you create segregation and discrimination based on the medical choices made?

Please PROTECT our children by NOT requiring a C19 vaccination to attend child care or school.

Thank you,

Julia Kulyk

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- * We do not know the long-term effects these shots will have on children.
- * Some children are having serious reactions to these vaccines.
- * It infringes upon their right to informed consent as we and they cannot know the health effects down the road. We do not fully have a clear picture of the health consequences of these experimental vaccines.
- * All have a right to public education. It is discriminatory to those who are needle-phobic, have had a serious reaction to a vaccine but still cannot be granted a medical exemption, and those who oppose due to their religious beliefs.
- * This requirement is extreme and many parents will oppose it. The number of families choosing to home school is growing and will build further if children are required to have a vaccine which many parents are against.
- * Potential loss of revenue to the school district as concerned parents will opt out of public school.
- * Most of us know someone who had an aversive reaction to a covid vaccination. More and more parents are hesitant and scared seeing what is happening to children in our community - much of these reactions are never reported to VAERS.

Please do not discriminate against children. They do not have a voice; we are their voice. But they are the ones who will suffer the long term health consequences if in time more is revealed about the harms of these vaccines. Some children do not want the vaccine. They still deserve an education and their parents pay taxes to fund the schools. We should all have a say.

Remember, the vaccine does not fully prevent infection. Teach children hygiene instead. Handwashing and hygiene and good self care can prevent illness.

Sincerely,
Robyn Crout

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: as you know, children are a very low risk for Covid. It is like a cold to them, especially with this new milder variant. You also should know that this vaccine does not stop the spread of covid. Why would you mandate an experimental vaccine that is not effective and the risks are not know? Are you purposely trying to wipe out a whole generation? If you are for protecting children, you will vote against this proposal. If you are not for protecting children, resign immediately.

Sincerely,
Lisa D. Sonneman

Please see the attached PDF of my comments for the above upcoming meeting on January 12th 2022.

Thank you,

David Hall

To whom this concerns,

The upcoming January 12th 2022 board meeting will discuss the rule-making Petition to alter WAC 246-105-030 to include a Covid-19 Vaccine. I would like to add the following points/discussion:

- 1) The Vaccine being discussed for inclusion MUST be a FULLY FDA approved Vaccine. (See reference 1), as was mentioned in the previous board meeting.
- 2) The only FDA approved vaccine for Covid-19 is Comirnaty. Comirnaty was granted full approval by the FDA on August 23, 2021.
- 3) Per the CDC and FDA, Comirnaty is a **legally distinct** vaccine from the Pfizer-BioNTech COVID-19 vaccine. The Pfizer-BioNTech COVID-19 vaccine is currently authorized for emergency use under the EUA. The two **are not legally interchangeable**. (See references 2 and 3).
- 4) I have personally called a Walgreens in Centralia, Olympia, Spokane, and New York, and they told me they did not offer Comirnaty, nor could they tell me where I could get it.
- 5) The WSBOH cannot legally make a recommendation for the EUA authorized Covid-19 vaccine for inclusion to WAC 246-105-030. WSBOH can legally make a recommendation for Comirnaty, however Comirnaty is not available in WA state to my knowledge. Approval of Comirnaty amounts to a ruse on the public if it is not manufactured and available. The burden of compliance to obtain an unavailable product is beyond reasonable.

If the WSBOH makes a recommendation to approve a COVID-19 Vaccine, parents will inevitably have to obtain the Pfizer-BioNTech COVID-19 vaccine to allow their children to attend school and daycare. The Pfizer-BioNTech COVID-19 vaccine is an experimental product that lacks sufficient long term data to support its safety in children.

I implore you to allow parents to make the choice whether to immunize their children with an experimental medical procedure, with a product that has not been thoroughly tested. Once a person is immunized, you cannot go back and reverse the decision. It is final.

center only by providing the required COE form.

(10) "Full immunization" or "fully immunized" means an immunization status where a child has proof of acquired immunity or has been vaccinated with immunizing agents against each of the vaccine-preventable diseases listed in WAC **246-105-030** according to the national immunization guidelines described in WAC **246-105-040**.

(11) "Health care practitioner" means a physician licensed under chapter **18.71** or **18.57** RCW, a naturopath licensed under chapter **18.36A** RCW, a physician assistant licensed under chapter **18.71A** or **18.57A** RCW, or an advanced registered nurse practitioner licensed under chapter **18.79** RCW.

(12) "Health care provider" means a person licensed, certified or registered in a profession listed in RCW **18.130.040**(2), if administering vaccinations is within the profession's scope of practice.

(13) "Immunizing agent" means any vaccine or other immunologic drug licensed and approved by the United States Food and Drug Administration (FDA), or meeting World Health Organization (WHO) requirements, for immunization of persons against vaccine-preventable diseases.

(14) "Local health officer" means the individual appointed under chapter **70.05** RCW as the health officer for the local health department, or appointed under chapter **70.08** RCW as the director of public health of a combined city-county or combined county health district.

(15) "Medically verified immunization record" means a valid record that is:

(a) An electronic or written medical health record from a health care provider or facility at which the provider practices; or

(b) A document from a secure, web-based application that records and tracks immunization dates such as an immunization registry.

(16) "National immunization guidelines" means guidelines that are:

(a) Approved by the Advisory Committee on Immunization Practices (ACIP); and

(b) Published in the *Morbidity and Mortality Weekly Report (MMWR)*; and

(c) Consistent with the terms and conditions set forth in WAC **246-105-040**.

(17) "Out of compliance" means a type of immunization status where a child:

Comirnaty and Pfizer-BioNTech COVID-19 Vaccine

[f Share](#) [t Tweet](#) [in LinkedIn](#) [✉ Email](#) [🖨 Print](#)

January 3, 2022: FDA expands eligibility for the Pfizer-BioNTech COVID-19 Vaccine to include the use of a single booster dose in individuals 12 and older at least 5 months after primary vaccination with Pfizer-BioNTech COVID-19 Vaccine. Read the [press release](#) or view [booster eligibility](#).

On August 23, 2021, FDA announced the first approval of a COVID-19 vaccine. The vaccine has been known as the Pfizer-BioNTech COVID-19 Vaccine, and will now be marketed as Comirnaty, for the prevention of COVID-19 in individuals 16 years of age and older.

Pfizer-BioNTech COVID-19 Vaccine is authorized for emergency use and is available under the EUA as a two-

dose primary series for individuals 5 years of age and older, as a third primary series dose for individuals 5 years of age and older who have been determined to have certain kinds of immunocompromise, and as a single booster dose for individuals 12 years of age and older at least five months after completing a primary series of the vaccine.

The Pfizer-BioNTech COVID-19 Vaccine is also authorized for use as a heterologous (or “mix and match”) single booster dose for individuals 18 years of age and older following completion of primary vaccination with a different available COVID-19 vaccine. For example, Moderna and Janssen COVID-19 vaccine recipients 18 years of age and older may receive a single booster dose of the Pfizer-BioNTech COVID-19 Vaccine.

On November 17, 2021, CDC, in consultation with FDA, issued emergency use instructions to provide information about the use of the vaccine as an additional primary series dose or as a booster dose in certain individuals who completed vaccination with certain non-FDA-authorized or -approved COVID-19 vaccines.

**VACCINE INFORMATION FACT SHEET FOR RECIPIENTS AND CAREGIVERS
ABOUT THE PFIZER-BIONTECH COVID-19 VACCINE TO PREVENT
CORONAVIRUS DISEASE 2019 (COVID-19) FOR USE IN INDIVIDUALS
5 THROUGH 11 YEARS OF AGE**

FOR 5 THROUGH 11 YEARS OF AGE

Your child is being offered the Pfizer-BioNTech COVID-19 Vaccine to prevent Coronavirus Disease 2019 (COVID-19) caused by SARS-CoV-2.

This Vaccine Information Fact Sheet for Recipients and Caregivers comprises the Fact Sheet for the authorized Pfizer-BioNTech COVID-19 Vaccine for use in individuals 5 through 11 years of age.¹

The Pfizer-BioNTech COVID-19 Vaccine has received EUA from FDA to provide a two-dose primary series to individuals 5 through 11 years of age.

The Pfizer-BioNTech COVID-19 Vaccine has also received EUA from FDA to provide a third primary series dose to individuals 5 through 11 years of age who have been determined to have certain kinds of immunocompromise.

**VACCINE INFORMATION FACT SHEET FOR RECIPIENTS AND CAREGIVERS
ABOUT COMIRNATY (COVID-19 VACCINE, mRNA)
AND THE PFIZER-BIONTECH COVID-19 VACCINE TO PREVENT CORONAVIRUS
DISEASE 2019 (COVID-19) FOR USE IN INDIVIDUALS 12 YEARS OF AGE AND
OLDER**

FOR 12 YEARS OF AGE AND OLDER

You are being offered either COMIRNATY (COVID-19 Vaccine, mRNA) or the Pfizer-BioNTech COVID-19 Vaccine to prevent Coronavirus Disease 2019 (COVID-19) caused by SARS-CoV-2.

This Vaccine Information Fact Sheet for Recipients and Caregivers comprises the Fact Sheet for the authorized Pfizer-BioNTech COVID-19 Vaccine and also includes information about the FDA-licensed vaccine, COMIRNATY (COVID-19 Vaccine, mRNA) for use in individuals 12 years of age and older.

The FDA-approved COMIRNATY (COVID-19 Vaccine, mRNA) and the Pfizer-BioNTech COVID-19 Vaccine authorized for Emergency Use Authorization (EUA) for individuals 12 years of age and older, when prepared according to their respective instructions for use, can be used interchangeably.¹

COMIRNATY (COVID-19 Vaccine, mRNA) is an FDA-approved COVID-19 vaccine made by Pfizer for BioNTech. It is approved as a 2-dose series for prevention of COVID-19 in individuals 16 years of age and older. It is also authorized under EUA to provide:

- a 2-dose primary series to individuals 12 through 15 years of age;
- a third primary series dose to individuals 12 years of age and older who have been determined to have certain kinds of immunocompromise;
- a single booster dose to individuals 12 years of age and older who have completed a primary series with Pfizer-BioNTech COVID-19 Vaccine or COMIRNATY (COVID-19 Vaccine, mRNA); and
- a single booster dose to individuals 18 years of age and older who have completed primary vaccination with a different authorized COVID-19 vaccine. The booster schedule is based on the labeling information of the vaccine used for the primary series.

Kelie,

I am a resident of Kitsap county. And have been for 22 years. I have worked in the public school setting for almost 10. I am a mother of four children and I am against any requirement for Covid-19 injection/vaccination/immunization/booster/shot for school attendance, entry, or other form of participation based on C-19 injection status. It is not and should not be the responsibility of this group, the department of health, the office of the governor, or any other public group or office to determine what is a matter of personal health and certainly is a gross misuse and abuse of power to consider usurping the parents roles and responsibilities in deciding what is prudent, health or otherwise, in the lives of THEIR children. Shame on this group for taking this unethical and abhorrent attempt! Shame on this group for assuming to make health decisions for parents and for their children! Shame on this group for considering a Covid-19 shot requirement for schools!

Sincerely,

Stephanie Newcomb

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. It has been proven time and time again with a variety of studies that children are NOT as affected nor do they typically spread this virus.
2. the "Vaccine" is causing myocarditis in our young boys and young men
3. the "vaccine" is going to the ovaries of females causing sterility
4. It has KILLED too many children already.
5. the FDA went against the advice of their own advisory board. Follow the money here.

Our kids DO NOT NEED another vaccine. They need to be able to build up a natural immunity (if they actually get covid) that is stronger than any vaccine can produce much like everything else.

I encourage you all to do the right thing and STOP THIS INSANITY in its tracks.

Linda Ryan

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

There are no long term studies document on how the COVID-19 vaccine will affect our children in the future. Children are low risk for Covid and the Vaccine does not stop the spread of Covid. Mandating the Vaccine will put so many families in a difficult position. Many will be forced to go against their beliefs and vaccinate or they will be forced to homeschool which can put a financial burden on them. Let parents decide what is best for their own children.

Thank you.

To Whom It May Concern:

As a lifetime resident of Washington state I am AGAINST any mandatory shot for anyone which includes CHILDREN for the following reasons:

- * Children are at extremely low risk for Covid
- * The vaccines are still only EUA (emergency use authorized)
- * There are no long-term studies to document any history of safety
- * Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- * The vaccine apparently does not stop the spread of the disease

Lets get back to living our lives as AMERICANS and live by the constitution which provides FREEDOM for ALL AMERICANS.

Thank you

Shauna Washburn

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

The vaccine is is under emergency use approval. No long term effects on children have had time to be studied.

Children are low risk for Covid or complications.

The vaccines are not working for any age group.

There are too many vaccine injuries to risk these on children.

This is unconstitutional both in Washington state law and US government law.

This feels like crime against humanity.

I oppose this act against our children.

Sincerely,

Deborah Billing

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

I believe it's very unethical and is taking away our rights and forcing us to do something that nobody has any idea what will happen long term from the vaccine. This agenda will just force the working class that can't homeschool or pay for private childcare into accepting the vaccine because they can't afford to miss work.

If you can still get sick from the virus and also carry or spread it after you've had the vaccine what is the point of forcing everyone into getting it if it's obvious it's not solving anything. I'm completely against forcing our children to get a shot that nobody knows what will happen in a year or ten years down the road.

Thanks,
Mike

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. There are No FDA approved vaccines that are Not in an Emergency Use status.
2. It is a war crime to force medical experiments, procedures, etc on anyone. See Nuremberg Code. And current international cases of crimes against Humanity in regards to the COVID 19 Tyrannical edicts. Saying I was only following orders does not exempt you from a mandatory death sentence. See WWII history.
3. It's against our federal laws, Constitution, Bill of Rights. See the US Navy Seal teams recent win in Court setting case law and a precedent. Violation of 1st Amendment rights. Etc
4. It's against International laws and human rights.
5. There is zero study's on children. VAERS at CDC and the other versions show severe vaccine side effects and death.
6. Who is excepting full liability?

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Because this whole COVID pandemic is a scam!!

I walked away from my job in Healthcare because of this BS mandatory vaccination crap. I CERTIANLY will NOT let my child be poisoned by an illegal "mandate"!! A mandate forth by a government, federal or state, that doesn't have the authority to impose such a lawless, unconstitutional demand.

We will never give consent for our child because I am informed. I know this shot causes sterility, prions disease, it weakens your immune system and cripples it and so much worse..

My child doesn't need a vaccine for a disease with a 99.997% survival rate.

There was a study released recently that provided evidence that you were actually 76% MORE LIKELY to get sick with COVID after receiving your 2nd shot, Moderna was 39%.

The vaccines are POISON and you can't prove they aren't!!!

I know more about this garbage jab than a lot of people don't. I have researched its ingredients, I have seen the vaccine injuries, and I know they have already killed MILLIONS with this graphine oxide filled, spike protein manufacturing, DNA altering clot shot.

They aren't safe, they aren't effective, you can still catch and transmit this so called COVID virus. A virus that has never been produced in its physical form, or sample of any kind.

I listen to the professionals, Dr. Robert Malone, Dr. Peter McCullough, Dr. Sherri Tenpenni, Dr. Christian Northrup, Dr. Carrie Madej.....etc...

I know the truth that not one of these jabs are really FDA approved. That being said, I nor will anyone in my family be a part of this genocidal experiment that is currently being performed on the world public.

I have so many more reasons why my children will NEVER get this jab, but I know that the criminals trying to oppress, poison, and ultimately MURDER us already know this too.

This will not stand.

It is against my child's rights and I will never let you tell me what I have to do for my child.

Sincerely,

Arthur G. Tunstall

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

There are no FDA approved vaccines for COVID-19. They are all experimental and voluntary. EUA vaccines cannot be mandated under Federal law, Nuremburg and the constitution. There are no studies, let alone long-term studies on the adverse affects of these experimental shots and should never be experimented with on our innocent children. It is illegal, unethical and tyrannical! Anyone responsible for implementing such mandates will be held liable to the full extent of the law under crimes against humanity. Stay away from our children.

Hello,
I am a Mother and Grandmother here in Spokane, WA
We raised six children through the public schools and now the first ones of our 11 grandchildren are entering school age.

I can speak for all the people in my family, workplace, social group and church that a forced vaccination of this kind, placed upon innocent children whose risk of illness is so low it can hardly be measured goes against our medical freedoms.

Parents who willingly get the shots for their kids should be respected. So, too, those who choose not to get an experimental shot for their children should be respected.

Please govern accordingly,

Hello board members!

I am the mother of a Spokane public school student. He is a healthy boy. Covid-19 has come through home already and we've recovered completely with no after affects. To see that you're having to consider mandating vaccines for students is appalling. Just reading the criteria that is required shows this should not be mandated. It has come to light the vaccination will not prevent the spread of infection. The increase in heart conditions for the vaccinated youth is not worth the risk for so many youth who get Covid and have no ill effects. Mandating a vaccine for a virus that continues to mutate and new variants indicates that we should be looking towards managing care for the ill, rather than vaccinations that do not stop infection/spread of infection. Please vote against mandating this for our children.

Thank you,
Danielle Douglas

External Email

Hi,

Covid shots should absolutely not be a requirement for children to attend school.

Children are not at risk for Covid-19. These "vaccines" are not yet FDA approved, only EUA and have not been properly tested.

Please do not make this a requirement without having good data. The risk of dying from covid for anyone is so low and even lower still for children. The risks from these shots are still unknown. Why would we require this of our children?

Don't forget how immunity works. Remember chicken pox parties? Getting a virus and letting your body fight it off used to be a valid method for immunization. Have we forgotten this? Data on natural immunity shows that it's better than any shot can give.

Please consider this viewpoint that is held by many people.

Sincerely,
Ashleigh Tasche

Subject: Comment to Washington State Health board regarding covid

External Email

This is a message to all of you in the health department of Washington State. I'm totally against any covid inoculation mandates, of any kind. For kids or any person period!

First of all, they are not a vaccine! Even if someone changed the definition of vaccine, it still doesn't make these injections vaccines! A pig is still a pig, even if you put lipstick on it! They don't stop infection or spread.

Second, these inoculations are under the EUA! None of them have been approved. We know what they're doing! The manufacturers want to get them approved for babies so they will never be accountable for the damage they cause! We know about the fact that they have zero liability or responsibility for adverse reactions! We know it's only about the money.

Third, Our kids are our treasure and if you want to see mama bears come at you, if you want a mass exodus of kids out of the schools, if you're all for those smaller class sizes and you want to be responsible for all the adverse affects and have a class action lawsuit against you, then choose the mandate! There are plenty of people who still have fight in them!

Fourth, All the treatments and cures for this "virus" have been suppressed by the CDC, NIH, WHO and anyone else I left out! Doctors and other healthcare professionals who speak about the treatments and cures, that work by the way, have been vilified, canceled, fired and destroyed by corrupt individuals who definitely don't have "the peoples health" as their priority! We know this is a fact! There are many treatments and cures and they have been suppressed because the inoculation manufacturers would never have gotten their EUA for their jabs if there were available and appropriate treatments or cures for said disease! It's right in the EUA! They had to suppress them to get the EUA in the first place! This whole thing is about the money to be made and the depopulation plan by jabbing the world!

Fifth, There is a complaint filed with the ICC in the Hague against Anthony Fauci et al (go look it up), for their crimes against humanity! Everything about these inoculations, mandates, vax passports, lockdowns, destroying lives etc. reeks of totalitarianism and goes against the Nuremberg code, the US constitution and breaks many laws. We either have our civil rights, freedom to choose what's right for our bodies and OUR kids or we fight! The kids aren't the possession of the state! I seriously hope you get that! All who knowingly engage in this tyranny will be held accountable!

Sixth, don't know how many of you are going to say "well, kids have always been required to get "vaccines" to attend school"! For those of you who do think this way, THE COVID JAB IS NOT A VACCINE! This Mrna technology is a gene therapy! It alters a person's body via a synthetic spike protein that was made in a lab then unleashed on the public! Do you see what you're doing by even suggesting we give this to our kids? What is the motivation here? I want an answer because we know it has nothing to do with health!

Last, I sincerely hope you all are critical thinkers and will choose the right path forward after some research and deep soul searching!! I'm not even sure why this has been

brought to the table and have never sent in a letter but, this is critical! You are on a very precarious tipping point, don't fall off the wrong side!

Thank you for your consideration of my shared facts, thoughts and opinions!

Cari Williams

I am strongly opposed to your vaccination mandates against anyone, but especially children. I have been informed that you are trying to force experimental science on our children and into their little bodies by threat to discriminate against them and their families by barring them use of publicly funded schools and daycare services as well as admission to all schools and daycare centers. Even we who do not have children pay for these services by taxation, as do their parents. You are not representing the will of the residents of this state, in fact you are heinously violating and attacking the people of this state.

I am writing to inform you that these are sinister and prejudicial actions against Washington state citizens. I also consider your behavior as being purposefully predatory against the young and vulnerable children of this state as well as those of lower incomes and resources.

You must STOP this mad science approach. If you have a shred of humanity left in you, STOP this insane, unfounded agenda of harming and division and preying on those you were sworn to protect and serve.

Subject: Comment for January 12th meeting

External Email

Hello,

RE: #11 on agenda of the January 12th meeting.

As a mother, I strongly oppose any recommendation for Washington Schools to require children to take the Covid-19 vaccine to attend in person school. We parents will make this decision for our families. Children are not at high risk of severe disease and WA has already required all school employees to be vaccinated to lessen the risk for them to be in our schools. Also, for ages 15 and below, FDA has not given full approval and these vaccines are still only under EUA. A recommendation to require children to be vaccinated is premature and irresponsible and will surely do more damage to the mental health of our children by creating an unwelcoming and chaotic environment in our schools. The state's past decisions regarding the closure of schools due to Covid-19 has already been shown to have damaged mental health and academics. How much more is the state willing to sacrifice our children for the sake of adults? Furthermore, there are many new treatments on the horizon that are already FDA EUA approved for adults, if they choose to take them to further protect themselves.

Please do NOT recommend our children be required to take this vaccine at this time.

Thank you,
Stacy McKnight

To whom it may concern RE: Washington state board of health, vaccines for school aged children

There are countless examples in history when what was once thought of as "virtuous" or "safe" or even "legal" turned out to be anything BUT.

1930's Germany, slavery, the Tuskegee experiments and thalidomide, for example.

Do not willingly be on the wrong side of history.

Children are not at great risk from this virus and they are not the drivers of spread. Allow adults to make the decision to vaccinate and allow parents the right to decide whether this new vaccine is safe or right for their children, instead of being forced to choose between sacrificing their education or their health.

Say no to mandates for this vaccine.

Say no to removing parental rights.

Do the right thing and remember that "we the people" pay your salary and reserve the right to remove a tyrannical government.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- 1) There are a growing number of children ending up in the ICU with heart conditions after the vaccine. My daughter's best friend was one of them. There have been several deaths related to the vaccine.
- 2) The data which is being used to determine the effectiveness of the vaccine is anecdotal at best. Every time we turn around there is conflicting data given by the "experts" - and those who are actually in the professional fields and even created the testing for the virus are being censored when they speak out against the vaccine. There is no long term peer reviewed data as we are still in the human trials portion until 2023.
- 3) The breath through cases of COVID are primarily with the vaccinated. Yes I know CDC and DoH are refuting that information. Actual data from hospitals and staff says otherwise. The vaccine has failed to do anything but create more issues.
- 4) As a vaccine-injured adult myself who suffers daily from the side effects of blanket medical procedures, I am urging you to stop this now. This should be the parents' choice - not yours.

Finally I have this to say. You have made my job easy. You see, I am a homeschooling advocate, among other things. You all are making it way too easy to pull kids out of public school. You make this mandatory - your budget will fail. I suggest you look at the numbers of those who are pulling their kids now over some of the other poor decisions made by school boards in the arena. Keep it up and you will do my job for me.

The attached pictures are what I live with daily now...and are graphic. Do you really wish to have children suffer the same thing?

Subject: Children vaccine mandate

External Email

To the Washington Board of Health Tag Members:

I am a parent to two active and healthy boys ages 10 and 12. I understand your team is working to decide if you should implement a mandatory Covid vaccine as part of school vaccine requirements. I listened in on your meeting on December 29th and thank you for that opportunity. I am writing today to share my thoughts and feelings regarding this.

It is my firm belief that while a Covid vaccine may be a wonderful choice in the healthcare of some individuals, it is not an appropriate option for all children, especially those who are otherwise considered typical and healthy. The overwhelming experience of most children who have tested positive with Covid is a minor cold-like illness and avoiding this is absolutely not worth the risk of the reported adverse reactions. We are currently experiencing a record number of positive Covid cases in both unvaccinated and vaccinated individuals. This vaccine appears to be leaky; not at all the breakthrough in fighting this pandemic that we hoped it would be. In the last few months there has been a campaign to get booster shots as we have learned that the effectiveness may only last 4 to 6 months. Do we really expect our children to endure this for a vaccine that doesn't prevent getting sick but only slows the transmission? It takes three people to hold down my son to get a simple blood draw. My co-workers 5 year old daughter got hives a few days before getting her first Covid vaccine. The stress this puts on children who already have wonderfully functioning immune systems is beyond necessary. We've seen more adverse reactions for this vaccine than any other. Do we really want that risk for every child?

Some in the scientific community argue that this leaky vaccine actually may allow for resistant strains of the virus to infect more people. If children really are the "reservoir of this disease" as Tom said in the meeting, then wouldn't we be unnecessarily accelerating the disease even further by vaccinating a population that almost entirely wouldn't need it? How long should we expect to boost ourselves and in effect prolong the waves of variants?

Mandates make parents feel that the Board does not trust them to make responsible choices in protecting the health and safety of our own children. Furthermore, mandating a vaccine that some parents do not yet feel safe giving their children further pushes us in a direction of not wanting to give it to them AND making us question our trust in YOU. My husband and I love our school district and it's teachers and we hope to be able to

continue our children's education there. Please do not make us choose to educate them at home because of a mandate for a vaccine that does not feel safe to us yet. Can we please continue to offer vaccines to those that feel it is the best solution in their healthcare regimen and not make this a universal requirement? Parents know about this vaccine. It is advocated for on television, the radio, billboards, social media and news outlets. It can be administered at any grocery store pharmacy, doctor office, or mass vaccination clinic. Getting them isn't the obstacle. Finding the time isn't the obstacle. Furthermore, access for families that DO feel comfortable is there. Please allow more time for parents to feel comfortable. Not everyone feels safe at the same rate as others. While a year may seem like plenty of time for some, it isn't for others.

Communicating to you about this is a very big deal to me. I have never before felt a need to write any leadership in our state over an issue. In the case of this mandate, I cannot sit idly by and not say how not only I but others feel as well. As our state's healthcare leaders, I urge you to trust and allow parents to continue to evaluate their own children's need for this vaccine. I appreciate your consideration and feel obligated to say, whatever you decide, this vaccine at this time is not appropriate for my children.

Respectfully,

Christine Packard

To whom it may concern,

I would like to start off by saying I am not anti vaxx, my 3 children are all vaccinated with the current school vaccine requirements. However, if Washington state is going to require this covid-19 'vaccine' for schools I will be removing all of my children from public school, and I know many families who will as well.

A vaccine prevents people from getting the illness it is made to fight, the covid-19 shot does not. So many of the cases of covid are in people who are fully vaccinated. How can you even consider requiring a vaccine that doesn't even do what it's made to do? Our children are at very little risk of having complications, or even symptoms of covid. Most of the 'covid deaths' in children aren't even from covid, they are from an underlying condition and the kid just happened to have covid on top of it. I am not scared of my children coming down with cold symptoms, which we now have to call covid, like they do every year. Their bodies are made to fight off these sicknesses and they will have a better immune system afterwards.

With so little risk of having complications or dying of covid I don't understand how any parent would choose to inject their children with a shot that has no long term research or testing. All of the other vaccines were tested for years and years before being required to the public. We have no idea what kind of long term side effects these covid-19 shots will have on our children and that's not a risk I am willing to take for a 'vaccine' that 1) doesn't have a high rate of preventing the sickness and 2) our children, and most adults are not at high risk from having complications with this virus.

Please remember the state of Washington is not only made up of the voices in Seattle, even though their's tend to be the most heard and considered. We have many smaller towns filled with people that are against covid-19 vaccine requirements in schools and whose public schools will be empty if this kind of mandate goes through.

Sincerely,
Maria Waslohn

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

The vaccines DO NOT protect against the transmission of the virus. Israel and South Korea are prime examples of how well the vaccines work... over 90% of their population are vaccinated "against" Covid-19, and yet they are experiencing/have experienced uncontrollable increases in Covid-19 cases. The vaccine mandate for adults is ridiculous, and a vaccine mandate for children is absurd. Over 99% of children who do get Covid-19 develop minimal symptoms and handle it like they handle any typical cold. The death rate for children without any underlying conditions is almost non-existent. The risk a child faces of getting extremely ill from a Covid-19 vaccination grossly outweighs the risk they face if they get sick from the virus itself. The vaccines cause an alarming number of heart issues as well as reproductive problems. We are doing our children and our future a huge injustice by even contemplating mandating this vaccine for them. This is the exact reason my children will not be going to school in Washington State. Washington followed California in their sex education endeavor, and they will follow California in this. The leaders of this state should be ashamed of themselves.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Vaccines have not prevented vaccinated or non vaccinated from COVID. Healthy children have died from the vaccine. Would you want your child vaccinated under this risk when not enough is known on the long time risk to children?

Sincerely,
Anita Peterson

Subject: Scientific Information for Technical Advisory Group (TAG) meeting to consider COVID-19 for inclusion in chapter 246-105 WAC.

External Email

Dear TAG Committee: :

I am sending in this email, as I am APPALLED that this group is ACTUALLY discussing

adding a EMERGENCY USE AUTHORIZED ONLY, still experimental shot to the list of school vaccinations.

FIRST....

as I mentioned above, this EXPERIMENTAL, STILL NOT PROPERLY TESTED, NOT deemed SAFE mRNA medication that has even thus far deemed to (as was stated by the FDA right before prior to the EUA RECENTLY for children 12 yrs - 18 yrs old, that they will not know if it is safe until they give them to the kids), and therefore, is not something that should EVEN be LEGITIMATELY considered to add to the schedule when it is NOT an even approved drug, and is ONLY allowed to be used for EMERGENCY PURPOSES, and NOT be now added to immunization schedules! THAT is unethical,... the "FDA Approved" COVID shot is not even currently available (see attached screenshot and link from the CDC Website stating so from today):

<https://www.cdc.gov/vaccines/programs/iis/COVID-19-related-codes.html>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fvaccines%2Fpro>
19-related-
codes.html&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cc24fbc0fffa467dcbe908d9d0bc83f7%7C1

THEREFORE, how can an experimental, EUA available only, not properly tested, shot even be considered to be added to the shot "schedule"???

We are all currently involved in this massive scale experimental drug trial — this is using mRNA technology, and has never been done before. This was NOT intended to be forced upon the children, who are NOT at risk, to then be slyly forced (unknowingly) into partaking in this experiment — this is ethically wrong, and goes against the Nuremburg Code that arose from what occurred in World War 2. Why the under handed, misleading route that this TAG committee is being placed to embark upon. YOU ALL should be highly concerned of the implications for this shadowy path you being lead down to be the false of (see my SIXTH and final point below).

SECOND...

It has been shown, that the RISKS of this shot FAR OUT WEIGH the benefits — if there are any — for children. Children are NOT at risk from this virus, even left untreated they have a 99.998% survival rate — and the seasonal flu has been deemed to have a higher risk for children, than this virus, so that doesn't add up.

The younger the person, the higher the risk of myocarditis — this has been well documented, and every week there is an increasing number of athletes (median age

range of 20s-30s) collapsing on the field from heart issues, dying from heart issues, and becoming disabled and no longer able to play professionally because of heart issues: THIS is NOT normal, and OBVIOUSLY a HUGE INDICATOR that there is an issue with this shot. I would further like to note, that all these professional sports players are required to get the shot, and yet and many of these players, are out because of contracting/testing positive for covid; demonstrating, which has been confirmed by the CDC, that this shot DOES NOT PREVENT transmission, therefore COMPLETELY defeats the WHOLE purpose for why it is SAID that it is even being considered.

See screen shot below of a two recent articles demonstrating this (though the numbers are in the hundreds as of this year already with sports players, including 3 deaths this week alone from spontaneous heart conditions):

I would further like to note, that all these professional sports players are required to get the shot, and yet and many of these players, are out because of contracting/testing positive for covid; demonstrating, which has been confirmed by the CDC, that this shot DOES NOT PREVENT transmission...

THIRDLY, ON THAT NOTE....

The shot does NOT prevent transmission — therefore COMPLETELY defeats the WHOLE purpose for why it is SAID that it is even being considered.

AND the longevity of the benefits for SELF protection from the virus (which the children do not need), has been said to wane THEREFORE, how often and how many of these shots would the children be required to take???? Is that why legislation was being proposed here in WA State to have medical clinics in EVERY public school??? Do you know about that?? I do not have that handy to share in this email, but I can locate it if you wanted to request that of me. Look at this article of a college that requires their students to have the Covid shot:

<https://nypost.com/2021/12/14/cornell-university-closes-campus-amid-omicron-covid-outbreak/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fnypost.com%2F2021%2F12%2F14%2Fcornell-university-closes-campus-amid-omicron-covid-outbreak%2F&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cc24fbc0ffffa467dcbe908d9d0bc83f7%70>

FOURTHLY, ON THE NOTE of the PREVIOUS 2 points...

The more shots, the exponential increase of risk for children! This was revealed during the FDA Committee when determining whether to give EUA for aged 12-18. This Dr. revealed that by the time of Booster (third shot), 1 in 4 boys will acquire myocarditis — this is life threatening and IRREVERSIBLE!! And is unacceptable for children who have virtuously NO RISK from this virus — WHY would anyone risk doing that! For something they have almost NO CHANCE of harm, even if not treated! It doesn't rationally NOR mathematically make sense, no matter how you run the numbers!

https://www.medrxiv.org/content/10.1101/2021.08.30.21262866v1.full-text
<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F10.1101%2F2021.08.30.21262866v1.full-text&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cc24fbc0ffffa467dcbe908d9d0bc83f7%7C11d0e21

Full Version: <https://youtu.be/ZCXqxQHg7kk>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fyoutu.be%2FZCXqxQHg7kk&data>

Study: <https://www.nature.com/articles/s41591-021-01630-0>
 <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nature.com%2Farticles%2Fs41591-021-01630-0&data=04%7C01%7CWSSBOH%40SBOH.WA.GOV%7Cc24fbc0ffffa467dcbe908d9d0bc83f7%7C11d0e2172>>

And you can't say that this is SAFE (nor effective, as I have pointed out previously): This JUST happened this week, the day after he shared on social media about getting his booster....and sadly this is NOT an isolated innocent!! These innocents happen FREQUENTLY and are highly suppressed, discredited and denied as having anything to do with the person getting the shot!!! Why?

FIFTHLY....

VEARS, which is well known as being HIGHLY UNDER REPORTED through even pre-COVID, and through investigations its been shown that many hospitals are suppressing and flat out REFUSING to report adverse reactions or deaths, to what is CLEARLY being caused by the shots.

As of today there are MORE THAN 20,000 DEATHS, 23,000 LIFE THREATENING EVENTS, and ALMOST A MILLION adverse reactions!!! This is crazy! For a virus that has a 99.98% recovery rate!! As of today:

<https://vaersanalysis.info/2021/12/25/vaers-summary-for-covid-19-vaccines-through-12-17-2021/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fvaersanalysis.info%2F2021%2F12-17-2021%2F&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cc24fbc0fffa467dcbe908d9d0bc83f7%7C11d>

If you look at these graphs that are actually registered on VAERS alone (see link above), it is EXTREMELY alarming to see not only the numbers of deaths and adverse reactions from this shot, but also the MASSIVE and stark difference in the numbers of deaths compared to ALL other vaccines COMBINED for the last 30 YEARS!!!! It is noted that it is MORE THAN DOUBLE!! (See screen shot below)...

And interestingly, with this shot supposedly saving lives, why is there a 40% INCREASE this year compared to this time last year????!!!!

As was stated during this meeting by Tao Sheng Kwan-Gett, "the science will be looked at", therefore ALL the science and FACTS MUST be looked at; such as what is reported to VEARS and what was revealed from the Pfizer's own data that was collected already by Feb 2021, which was more that 1,200 reports of death, 10(s),000 of adverse effects, 23

cases of spontaneous abortions (out of ONLY 270 pregnancies), and MORE THAN 2,000 cardiac disorders — THAT'S HUGELY DISTURBING AND ALARMING!!! No wonder they were requiring the courts to give them 55 and even 75 years to release their documents of these TRIALS for this shot (yes the trial period is still active even as of today!) AND releasing them with information REDACTED! Why would they need to spend SO much time redacting information, OR really the question even should be WHY are they even needing or WANTING to redact anything AT ALL? What are they hiding? What are we not being told, but discovering for ourselves? See Attached PDF document from Pfizer's released documents:

SIXTHLY... and my last main point

We are being told to blindly "follow the science" but yet their hasn't been any science presented to follow; I have scoured the WA State websites, the school district websites and the health departments : not ONE referenced or cited study to back up anything that is being claimed OR what we are being told to do — where's the science???... when you attempt to present science that goes against the "science" they are telling you to blindly follow, you are NOT allowed to have the discussion or have open dialogue regarding — why is that? If the science will prove what we are being told, then why aren't these conversations occurring?? Anywhere??? Obviously, there is a reason no one is conducting this open, public dialogue!!!

When you compare just the brief bit of information that I ALONE have shown you in this email, compared to what we are blanketly being told to adhere to, it becomes clear things are not lining up, and that we are not being given honest information.

I would like for you all to see and keep ever before you as you sort through all the data and weigh what is ACTUALLY in the best interest of the children, and NOT the institutions....

This would NOT be the first time that we as Americans even, are forced unknowingly into an experiment without our knowledge and NOT given ACTUAL informed consent:

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.latimes.com%2Farchives%2Fstory.html&data=04%7C01%7CWSSBOH%40SBOH.WA.GOV%7Cc24fbc0fffa467dcbe908d9d0bc83f7%7C11xpm-1995-10-04-mn-53213->

Why is the shot that clearly isn't working being pushed SO hard, and all the things that would actually be of benefit to us, like diet, nutrition/vitamins, and exercise NEVER discussed!!!??? And why are the early treatments that have been demonstrated to successfully work, being SO highly discredited (without warrant) and being suppressed, and even now in many cases, hospitals having to be court ordered to allow the patients in the hospital to be treated with them even after having had been prescribed by a licensed medical doctor???!! It all just doesn't add to a picture of transparency OR honesty! Something is very wrong here, and clearly no one can deny what we are ALL actually seeing with our own eyes, and yet being told, what we are seeing isn't actually happening!!

Should you like any further information about what I have shared here with you, or would like to inquire further about other information that I have not shared but I am well aware of, by all means, please ask and I will AGAIN take the time, in which I do not have to spare, to share with you — because the truth needs be discussed and everyone involved needs to be informed, because NO ONE can plead ignorance in this, especially once you have been presented with the facts.

Sincerely,

Janell Hulst

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- 1.). To take an experimental vaccine gene therapy product is a very serious medical decision. Our governments and leaders do not have the moral right to make that decision for others.
- 2.). There are no long-term safety studies for these products.
- 3.). Our young are at very low risk of complications or serious symptoms from COVID.
- 4.). Young people are experiencing negative side-effects from the vaccines, including heart inflammation.
- 5.) The vaccines do not prevent transmission.
- 6.) The vaccines are only about 30% effective against Omicron.

In summary, too much risk without enough benefits.

Sincerely,

Kelley Flaherty

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- No long term documented study showing adverse effects
- Very low risk for children
- There is mounting evidence that the "vaccination" provides little to no protection against multiple variants of the virus.
- It is only a vaccination based on the fact they changed the definition of what a vaccine is.

Christy,

I am a resident of Kitsap county. And have been for 22 years. I have worked in the public school setting for almost 10. I am a mother of four children and I am against any requirement for Covid-19 injection/vaccination/immunization/booster/shot for school attendance, entry, or other form of participation based on C-19 injection status. It is not and should not be the responsibility of this group, the department of health, the office of the governor, or any other public group or office to determine what is a matter of personal health and certainly is a gross misuse and abuse of power to consider usurping the parents roles and responsibilities in deciding what is prudent, health or otherwise, in the lives of THEIR children. Shame on this group for taking this unethical and abhorrent attempt! Shame on this group for assuming to make health decisions for parents and for their children! Shame on this group for considering a Covid-19 shot requirement for schools!

Sincerely,

Stephanie Newcomb

Chair, Members, and Staff of the Washington State Board of Health:

Greetings.

1. My wife and I have been residents of Yacolt, Clark County, since December 1995.
2. We are retired, and are considered medically vulnerable to the Covid-19 virus.
3. We have both received two Pfizer vaccine shots and the Pfizer booster.
4. The area in which we live has the lowest rate of vaccination penetration in this County's population and the highest rate of Covid-19 infection (per Clark County Public Health).
5. We support all science-based measures to reduce the spread of all Covid-19 mutations, including the mandatory vaccination of school students against Covid-19, in alignment with all other mandated vaccinations already in law and regulation.
6. We urge you to reject the spurious and inflammatory arguments made by opponents of mandated vaccinations that are based on irrelevant references to the Constitution of the United States and on inaccurate or falsified information.
7. We believe that the duty of the government and legislature of Washington State, and of the State's boards and agencies, is to preserve the health and safety of its population and that the Board of Health is in a prime and critical position to fulfil that duty.

Sincerely,

Charles N and Rebecca L Peck

I am AGAINST making COVID-19 shots mandatory for school admission or childcare in WA state. Many parents, myself included, have already pulled their kids from public school due to the mandates Washington state has forced on public schools. What is that doing to your funding? Are you receiving that much Covid money that you do not care people are pulling their children?

The science does not support mandating the shot. A person with the "vaccine" is still able to get and transmit Covid. Covid has a 99% survival rate. A person without the shot has immunity far longer than a person with the shot. The shot you want to force on the children has shown they are more likely to get myocarditis and blood clots.

Other states are wide open with no issues. Our state is still locked down and continues to force mandates. People are leaving the state in droves over these mandates.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- * We know that children are at extremely low risk for Covid
- * Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- * The vaccine apparently does not stop the spread of the disease
- * The vaccines are still only EUA (emergency use authorized)
- * There are no long-term studies to document any history of safety – in fact the majority of people who are covid positive are vaccinated
- * It is immoral and unconstitutional to vaccinate anyone against their will or against the will of parents

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: children are at little to no risk of this disease, especially Omicron which has a death risk less than the flu. There are no long term studies to show this is safe for children. The shot does not prevent against getting or spreading Covid-19. The basis behind mandatory vaccinations for children are in regards to terminal illness that can be prevented through inoculation, not for common illnesses equated to that of the flu or common cold that can not be prevented nor stop the spread of through a shot that does not qualify as a vaccine and currently requires boosters because efficacy wears off. This mandate will not keep kids safe. It exposes children to unnecessary risk regarding a disease they are not in danger from. It is a complete government overreach and it is for political optics rather than the health, safety and well being of students. This is an abhorrent lack of judgement based on opinion not fact or science.

To whom it may concern,
Parents and students should NOT be constrained to take a shot that is against their moral, medical or religious convictions. School age kids are at a very low chance of risk. I vote NO to school vaccine mandates. I am not anti-vaccine, but I am anti-mandate.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: last time they tried to force a people (black) to get a shot they injected them with syphilis.. I do not trust the government, they have no rights to tell us what we can do with our own bodies. This is turning into a nazi like state where you are required to have your vaccine papers and are discriminated against if you do not comply. You have a chance to be a leading voice by not forcing us to inject our body with something that doesn't even work that well if you look at how many "breakthrough" cases there are.

It is not and should not be the responsibility of this group, the department of health, the office of the governor, or any other public group or office to determine what is a matter of personal health and certainly is a gross misuse and abuse of power to consider usurping the parents roles and responsibilities in deciding what is prudent, health or otherwise, in the lives of THEIR children. Shame on this group for taking this unethical and abhorrent attempt! Shame on this group for assuming to make health decisions for parents and for their children! Shame on this group for considering a Covid-19 shot requirement for schools!

Sincerely,

Stephanie Newcomb

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

You may not force people or coerce a population to take an experimental treatment. Doing so violates the Nuremberg code.

I have a question for you: Why are you so interested in vaccinating our least vulnerable population in terms of contracting or transmitting COVID-19? Study after study is showing that children are not vulnerable in terms of dying from COVID-19. I believe the percentage is some thing like 99.997% survivability for children 18 and under. And this figure is without early treatment prophylactics that we know have been suppressed.

Add on the fact that the CDC is now saying that these experimental injections are not even preventing the transmission of COVID-19 and you have yourself a big open door for a lawsuit. We know what you're doing and you will not be injecting our children. If you continue to go down this diabolical path of attempting to strip us of our rights as parents and trying to force an EXPERIMENTAL jab, we will simply pull our children out of school. There are plenty of other states that are not requiring, mandating or even suggesting that children take this experimental jab in order to go to school.

So if your plan is to make Washington a "blue" hell hole with Inslees support, all while trying to push your agenda, go for it. We will pack up and leave. You will get exactly \$0 tax dollars from us. Then you can have you 100% vaccinated schools all to yourself. Oh, and don't forget to keep mandating masks. Because we know those work so well...

We will not be bullied, intimidated or coerced into doing something that is proving to be deadly to all! Just look at the VAERS numbers of children dying from these jabs. These are crimes against humanity and there will be justice for those committing these crimes.

Subject: Comment on requiring c-19 vaccinations for students

External Email

Hello Kelie. I could not find the comment email on DOH website. Would you please forward to staff at the agency that is gathering comments on the boards consideration of adding c-19 to immunization requirements for students.

I support requiring students to receive all vaccines to attend public or private schools. The only way we keep our children and the community safe is by vaccinating all community members except those with medical exemptions (ie, cancer, allergic, etc). That is how we have eliminated sever diseases such as polio and small pox, and are on our way to eliminating ther diseases such as measles, chicken pox, etc.

Other ideas I would like to share with the Board of Health, that are tangentially related to the c-19 vaccination topic:

1. I think annual flu shot should be a requirement as well.
2. To make sure students receive required vaccines, it would be nice to have local health districts or other service provides administer vaccinations at school during the school day.
3. Eliminate religious exemption and retain medical exemption. Religious exemption is not based in facts or science, while medical exemptions are science based. Religious exemptions create a loophole that is abused by the public.

Thank you for your service. DOH is doing great work during this challenging time.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. The real life cases for children are not life threatening.
2. Just like the flu shot, it should be optional.
3. COVID is a virus not a disease.
4. There are more life threatening diseases for children to be protected against where no immunizations or medications are mandated for, i.e., HPV, addiction, mental health, venereal diseases and so on.
5. Viruses mutate and immunity needs to be built not prevented.
6. There is not enough time for this vaccine to determine long term effects.
7. Every person is unique and should not be forced to inject anything into their system just because someone else might be vulnerable. The vulnerable must protect themselves always, not just when a new virus shows itself.
8. Vaccinated people are getting the virus and unvaccinated people, in my circle, IF they get it, have been less ill and less time being ill. No proof of the vaccination being better. Example: a husband and wife were tested positive. He's vaxxed, she is not. She barely had a cough, no fever, etc., and he had the full on symptoms. Real life people I know.

Common sense living is not rocket science and I vehemently oppose this mandate.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are 6 times more likely to suffer injury from MRNA than COVID. The shots do not stop the spread of COVID so why would I risk a mRNA shot on my children. This is unethical and I will never submit my children to an unnecessary COVID shot. Parts of Europe no longer giving shots to people under 16 due to heart inflammation. Science that does not allow for discussion is not science it's propaganda; there is massive amounts of respected medical discussion against mRNA. I will pull my kids from school if the jab is mandated and move from the state if necessary.

Here are the WSDOH statistics.

Please review the children's information.

Also you may want to wait for the latest WSDOH breakthrough information from Dec 16th.

I am sure the vaccine is starting to lose its value.

Here is the Washington State Weekly Virus Report.

A virus is all local. State and country statistics are interesting, but you really can't make decisions on them.

This is where Fauci failed! Treating them everywhere like the hotspot of NYC. Each county should have had specific recommendations by the CDC instead of putting it in the hands of the governors.

Washington state, Inslee and the WSDOH have used draconian mandates and the state has fared no better than states that did not have mandates that are thriving and living mask and vaccine mandate free.

You have to download the data from the WSDOH COVID dashboard to get this info.

Epidemiological Curve>Tabular View>Weekly Download

It includes all of the counties' data.

They update it weekly.

<https://www.doh.wa.gov/Emergencies/COVID19/DataDashboard#tables>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.doh.wa.gov%2FEmergencies>

Cases Week ending 12-18-21

This is in a population of 7.8 Million in 22 months

Weekly total 13,186

Total Tested Cases 808,264

An estimated 3,233,056 people have been infected and now are naturally immune

You can see most of the cases are in the groups that are healthy and will easily recover and become naturally immune.

Ages

0-11 1475 Cases 83,139 Total

12-19 2581 Cases 87,951 Total

20-34 3,608 Cases 232,745 Total

35-49 2,927 Cases 188,519 Total

50-64 1,748 Cases 134,537 Total

65-79 678 Cases 60,367 Total

80+ 167 Cases 20,438 Total

Hospitalizations Week Ending 12-18-21

Weekly total

Total Hospitalizations 44,372

About 1888 a month, 472 a week

This is spread among 39 counties.

Again you can see those under 50 fare very well.

I hope this information reduces the fear many are trying to create about this virus.

Ages

0-11 8 Hospitalizations 526 Total
12-19 2 Hospitalizations 587 Total
20-34 44 Hospitalizations 4,370 Total
35-49 80 Hospitalizations 7,774 Total
50-64 133 Hospitalizations 12,127 Total
65-79 141 Hospitalizations 12,309 Total
80+ 55 Hospitalizations 6,679 Total

Deaths Week Ending 12-18-21

99.7% have survive the virus in Washington State

This is an interesting statistic I have found in most places.

Kitsap County 99.7%

King County 99.7%

United States 99.6%

We need to see the details on these deaths, since the demographics have not changed in 22 months and are virtually all older folks with underlying health conditions. Nationwide 95% have died with underlying health conditions. Which means if you are marginally healthy there is little chance of you dying. If you are under 50 and healthy the chance drops significantly.

As you can see under 20 there are very few deaths, It quadruples at 35-49. It would be interesting to find out the detail that causes this jump. Again 50+ make up 93% of the deaths. Being under 50 and healthy should not be worrying about dying.

Total Deaths 9800

Weekly Total 105

About 417 a month, 104 a week

This is spread among 39 counties.

Ages

0-11 0 Deaths 4 Total

12-19 0 Deaths 13 Total

20-34 2 Hospitalizations 124 Total

35-49 8 Hospitalizations 554 Total

50-64 24 Hospitalizations 1770 Total

65-79 41 Hospitalizations 3465 Total

80+ 30 Hospitalizations 3840 Total

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

I am a mother of 4, a pediatric nurse and a supporter of the public schools in my neighborhood. It has come to my attention that there is a consideration of adding the latest covid vaccine to the list of required vaccines for school attendance. This is of great concern to me because this vaccine and its side effects have not been properly tested especially on children. It is known that children while just now are testing positive for Covid more often it is a very mild case for 99% of them. It has also been shown that children aren't giving it to adults rather it's the adults giving it to children. Their immune systems are proving to be robust enough to handle it. We do not know or understand the longterm effects this vaccine will have on them. Also recent real life stories have shown that the so called vaccines don't actually do anything to stop one from getting Covid or spreading it. They simply may help offset severe symptoms. To add it to the list of required vaccines for school attendance seems outrageous! I understand for an illness with much higher percentages of death but for something that is no more than the common cold for these kids it's reckless. Dr Malone who was the inventor of the MRNA technology himself recommends against kids getting vaccinated stating it is dangerous to their growing and developing brains and organs. He wrote a paper and had 16,000 drs worldwide sign it asking for them to not allow these vaccines to be given to kids. He stated it's one thing for adults and the elderly to get the vaccine but it is dangerous for children. Now you are wanting parents to choose whether to risk taking an experimental gene therapy or sending their kids to school. Public school where their tax dollars are going but they won't be able to use them. Public school that guarantees a free and appropriate education to all students regardless. There are children who can't get vaccinated, there are children whose families have religious convictions about vaccines what about those children?? I am asking you to please allow parents the right to choose what is best for their children and do not mandate these vaccines for school attendance in the state of Washington.

Thank you, Ruth Walker

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- * Children are at extremely low risk for Covid
- * The vaccines are still only EUA (emergency use authorized)
- * There are no long-term studies to document any history of safety
- * Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- * The vaccine apparently does not stop the spread of the disease

I am opposed to involuntary quarantine for anyone. This goes against the Constitution regardless of the severity of the disease.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following REASON:

THERE IS NO FDA-APPROVED VACCINE YET ON THE MARKET IN THE UNITED STATES. You are mandating an experimental drug with zero safety data. That is criminal, it is a crime against humanity and so far we know that close to a million adverse events have been reported to VAERS from these so-called "vaccines" which do not even work to prevent spread or transmission.

You people have lost your mind and if this passes you will invoke the wrath of the people. Maybe not a small percentage in crazy King County, but the rest of us WILL rise up and take our power back from you tyrants.

The time for your control is over. Give up. You know you have lost the narrative, and this is your last chance to regain some form of control. It will only take you down faster.

We are watching.
And we won't stand for it.

External Email

It's come to the attention of myself and many others that Chris Reykdal WA State Superintendent and WA State Secretary of Health Umair A. Shah are having a meeting this week regarding the vaccination requirement

For school aged children. You do understand that forcing the public to vaccinate against their will in order to feed their families not only violates the constitution but violates our rights as human beings? And now you want to force our children to be vaccinated to attend school? Are we never going to have peace in this? Are you going to constantly make this a power game that only you can win at? I can guarantee if this law is passed you will lose funding to public schools and most people will not be sending their children to school any longer. Forcing the adults to do it is one thing but forcing it amongst our children is cruel. Get a clue and stop. Vaccinating isn't stopping Covid from spreading. All this is, is a power game. If it wasn't, then the meeting that these two are having wouldn't be so hush hush. You guys know this is wrong.

I'm against this 100% my children will not be part of your chess game for control. Absolutely not.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Too much is not known about the long-term effects of this vaccine that is only in use through Emergency Authorization. Our children are growing and to force them to take a vaccine to attend school (schools which the citizens pay for) is an atrocity.

As a grandparent of many grandchildren in public school within this state, I am against the mandatory requirement.

To Whom it May Concern;

I am writing this comment as a very concerned mother, who will/may be sending my son to kindergarten in the fall. I strongly disagree with the addition of the covid-19 vaccination as a requirement for children to attend school. Our children are not at risk of severe symptoms related to the covid-19 virus. In fact, both of my young children have had covid with no symptoms other than a runny nose. There are no long term studies on the risks related to the covid 19 vaccination however, and we already know there are risks in the short term, such as myocarditis and clotting. I and many others will pull our children from the public school system if this becomes a requirement. My children's health is my number one priority and I will not compromise it to give the adults working in the public school system a false sense of security, considering that the vaccine does not prevent one from getting or spreading covid. It is irresponsible to not consider the adverse reactions this vaccine may have on a young child's body, and it is not the place of the public school system to make any medical decisions for children in our communities.

Respectfully,

Angela Bell

Hello WSBOH,

I wanted to take a moment to voice my reasons for believing that we are jumping the gun on this possible requirement and I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following reasons:

US researchers claim healthy boys may be more likely to be admitted to a hospital with a rare side-effect of the Pfizer/BioNTech Covid vaccine that causes inflammation of the heart than with Covid itself. The Guardian

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.theguardian.com%2Fworld%2Fmore-at-risk-from-pfizer-jab-side-effect-than-covid-suggests-study&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cea3ebc4ad80540d08a4b08d9d15bf5a0%7C11d0e2>>

1. Omicron is causing a milder infection than the previously dominant Delta variant.
2. This vaccine has not been approved for anything but emergency use by the FDA.
3. The vaccine containing this antigen is effective against the omicron variant in population-based prevention data for in Washington State, as available
4. The vaccine containing this antigen is not accepted by the public, which is a State requirement.
5. Children are more likely to be asymptomatic with much lower morbidity/mortality as a result of COVID infection.
6. There have not been any long-term studies specifically on school-aged children.
7. Vaccines are not keeping pace with the variants.

Respectably,

Mike Freimann

To whom it may concern

These so called covid vaccinations are a definite strike against humanity. I strongly oppose the forcing of these toxins into our systems and especially vulnerable are children, elderly as well as other compromised individuals. Please consider big picture and do everything in your power to give informed consent and stop the narrative that is false and oppressive. We are a people of choice and deserve dignity and honor rather than dictatorship and heavy oppression. The vaccinations are not equal to freedom and health and well-being. Choice with voice. Kindness and Truth. May you be blessed and open to truth being spoken and received.

Karen

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

It's unconstitutional, it's wrong and invades on our personal healthcare choices.
The "vaccine" is simply a flu shot not an actual Vaccine so it will make no difference as we have seen that the "vaccinated and boosted" are still contracting and spreading the virus as much or more than the non-vaccinated.

This will cause more people to move away from out state and deter new people from moving in.

This has been entirely handled the wrong way and Jay Inslee is to blame. These codes would only cause division and destruction of an already poorly operated school system. Won't be to long till anyone with a brain will be in private school or homeschooled.
I do not support mandated vaccination against Covid 19.

Dear Board of Health Members,

I am providing comment on agenda item #11 - Rulemaking Petition – Chapter 246-105 WAC, Immunization Criteria, Child Care and School Entry.

I am an educator in Central Kitsap School District and as an educator I am fully vaccinated and I have survived the actual COVID-19 virus, so please do not toss aside my remarks as those of an extremist. I work with an average of 25 students each day ranging from Kindergarten to 5th grade. The students in my school have been amazing at complying with the restrictions and mandates in order to attend in person school again. Some of these mandates (like mask wearing) interfere with teaching and learning by reducing voice transmissions and blocking facial expressions while others (like hand washing and sanitizing) reduce germs and increase personal cleanliness habits. As we have acted on each of the requirements we have had the opportunity to see which ones make a positive difference and which ones do not.

I recognize that the public concern over transmission of the COVID-19 virus, and its varieties, has caused public officials and law makers to create restrictions and mandates to show the public that their government leaders are working for the health and safety of the public. While I appreciate those efforts I do not appreciate having my choice removed when it pertains to my health and the health of my family.

Please do not create a mandate requiring a COVID-19 vaccine for school or childcare entry. Viruses change all the time, as we know from the annual flu virus. Requiring a vaccine for a virus will increase costs in many areas for example: new vaccines will have to be created and purchased annually to administer to the entire student and childcare populations to keep everyone updated. I believe that the COVID-19 vaccine should be made a yearly option, like the flu vaccine, to decrease a person's likelihood of catching the virus or suffering from extreme effects of it. As public officials you can continue to educate the population about good health and sanitation and keep them informed about their options without taking away their freedom of choice. People should not blame the government for their personal choices and the government should not cater to fixing everyone's personal problems.

Thank you for taking the time to read and consider my comments on not creating a

mandate for or requiring a COVID-19 vaccine for school or childcare entry.

Sincerely,
Ruth Perkins

Subject: comment on proposed policies to be discussed Jan 12th

External Email

To the WA State Board of Health,
I am writing to voice my concern over the proposed policies to be discussed at the Jan. 12th meeting. (SEE BELOW) The 4th Amendment of the US Constitution guarantees us the right to be secure in our PERSON and papers...this proposed policy violates that right. You as "health officials" do not have the right to kidnap citizens and hold them hostage until they comply with your rules. DO NOT enforce this policy.
Your job as public servants is to support and preserve our freedoms and rights, as guaranteed by the US Constitution, not to make your own rules and punish people who don't follow them. You do not have the right to forcibly quarantine people; that is tyranny. Are you tyrants?
Sincerely, Kayla DeWaard

PROPOSED POLICIES: • Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100. • Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Sincerely,

Stephanie Newcomb

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

A Covid-19 vaccine mandate clearly does not pass the 9 criteria required when Reviewing Antigens for Potential Inclusion in WAC 246-105-030. I am not taking issue with the vaccine itself, and in fact continue to encourage vaccination in my community. My lack of support for a mandate stems from the following criteria not being met under sections II and III on the list of criteria:

II. Disease Burden Criteria

5. The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population.

- The vaccine has been directly available to every vulnerable sub-set of the population for some time.

6. Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting or activity being given the highest priority.

- It is widely proven that vaccinated individuals can and do continue to transmit the virus. We know this because this was the science used to justify mask mandates. Masks are mandated in schools already, regardless of vaccination status, to prevent the vaccinated from transmitting the virus.

III. Implementation of the Criteria

7. The vaccine containing this antigen is acceptable to the medical community and the public.

While the vaccine may be acceptable to the medical community (although we will note that even within the medical community, the vaccine adoption rate was not acceptable enough to preclude a forced mandate), we cannot gloss over the fact that public acceptance does not even represent a strong majority.

- Under 51% of Spokane County residents are vaccinated. (srdc.org)
- Less than 40% of kids 12-17 are vaccinated. (srdc.org)
- Only 36% of the entire black community in Spokane County is vaccinated, and it is reasonable to assume this number is far lower among ages 12-17. A vaccine mandate in schools would disproportionately affect students of color in our community. (srdc.org)

8. The administrative burdens of delivery and tracking of vaccine containing this antigen are reasonable.

- Our administrators and nurses have already given feedback that a vaccine mandate would create an unreasonable and insurmountable administrative burden involving tracking.

9. The burden of compliance for the vaccine containing this antigen is reasonable for the

parent/caregiver.

- As stated in the above vaccination statistics, parents are choosing not to vaccinate their children. Forcing them to do so (as with other segments of our society who were coerced under the threat of losing their jobs and livelihoods) does not fall within a reasonable burden of compliance. It does not seem logical to vaccinate a group (ages 0-19) with such a low, even insignificant, rate of hospitalization or death, while claiming that will protect a more vulnerable group (ages 50-90) with a dramatically higher rate of vaccination (between 62%-82% based on age). Thusly, our state would propose forcing vaccination on those who do not need it, to protect those who already have it and/or could easily get it.

The vaccine is widely available to any age group now. Vaccination rates reflect individual health choices that must be protected. We have to acknowledge that individuals can make their own health decisions for themselves and their families. There simply is not a case to be made for forcing someone to get vaccinated to protect someone else who can easily get vaccinated themselves.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

As AFLDS' recent lawsuit against OSHA details

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsable.madmimi.com%2Fc%2F351>
, these injections are merely "treatments" that, for some people, may reduce symptoms.

The importance of this cannot be overstated. Keep reading...

For example, the CDC Director Walensky herself stated, "What the vaccines can't do anymore is prevent transmission."

Dr. Anthony Fauci says, "We know now as a fact that [vaccinated people with Covid-19] are capable of transmitting the infection to someone else."

Moderna's Chief Medical Officer Dr. Tal Zaks agrees, "There's no hard evidence that it stops [the Covid-19 vaccinated] from...potentially infecting others who haven't been vaccinated."

With this testimony and over 50 other citations, AFLDS' case against OSHA

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsable.madmimi.com%2Fc%2F351>
breaks new legal ground by proving Covid-19 "vaccines" are mere treatments and therefore have no legal grounds for forced use.

This case ends all justifications for the OSHA to segregate injected and non-injected people.

Their mandate is a reckless abuse of power without justification in case law.

Why are you going to force this upon our children? What will time tell about the adverse effects from this injection in children? You and I don't know, nor does anyone else. So is it a good idea to do it? THINK about what you are doing, please. Intelligent decision time!

Thank you,
Larry Ohman

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

The current shot dose not protect against Delta or new versions of Covid.

Children are almost immune to Covid with out the shot.

If children do get Covid they run less of a risk then that of the side effects of the jab.

The Supreme Court may rule that you can't mandate anyway because with live in a country with civil liberties and a constitution.

Furthermore I would read the Nuremberg code real closely before make a decision if I were in your position of authority.

O and who or you were elected to make such decision? Just because you did in the past doses not mean it was legal.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- * Children are at extremely low risk for Covid
- * The vaccines are still only EUA (emergency use authorized)
- * There are no long-term studies to document any history of safety
- * Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- * The vaccine apparently does not stop the spread of the disease

Why are we not focused on things that could help with the symptoms of Covid. Ivermectin and Vitamin D, Quercitine and many other supplements, (and please don't say it is not FDA approved for Covid, my own mother has dementia and takes a drug that is not "FDA approved for dementia" but helps some of the symptoms of dementia. The Covid Vaccines are experimental at best and most of the friends and family members that I know that have been triple vaxed all have had covid and spread covid to others.

Please let us make decisions for ourselves and our children. You can make decisions to get it if you want to. If you believe that it works so well than you should be safe.

Please do vote against this ridiculous, overreaching politized agenda.

Bye the way, I am not anti-vax. I am anti covid vaccine until far more studies have been done and also when you start taking into consideration the VAERS reports.

Thank you,

Serena Vilhelmsen

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

My child does not need a vaccine to prevent Covid-19 when children already have such a high recovery rate of survival. The vaccine itself has not been proven to prevent the transmission of Covid-19, but instead the vaccinated can transmit the same as the unvaccinated. Pushing a mandatory covid-19 vaccination is an infringement of our personal health care decisions. I am 100% against mandatory vaccinations to receive an education. Please spare the children. This will come down to vaccinate or homeschool for many parents including myself.

My body, my choice.

Hannah,

I am a resident of Kitsap county. And have been for 22 years. I have worked in the public school setting for almost 10. I am a mother of four children and I am against any requirement for Covid-19 injection/vaccination/immunization/booster/shot for school attendance, entry, or other form of participation based on C-19 injection status. It is not and should not be the responsibility of this group, the department of health, the office of the governor, or any other public group or office to determine what is a matter of personal health and certainly is a gross misuse and abuse of power to consider usurping the parents roles and responsibilities in deciding what is prudent, health or otherwise, in the lives of THEIR children. Shame on this group for taking this unethical and abhorrent attempt! Shame on this group for assuming to make health decisions for parents and for their children! Shame on this group for considering a Covid-19 shot requirement for schools!

Sincerely,

Stephanie Newcomb

All,

It has come to my attention that that there is yet another potential new over stepping of power from the state in the veil of covid safety.

I am against allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from (WAC 246-100). If health officers hold this much power, this power should be coming from the people not the position. It is bad enough the governor will not let go of his emergency powers as the state enters a third year of an emergency while most other states have returned to living without all the hubbub of the virus.

I am against including the Covid-19 injections as part of school immunization requirements using (WAC 246-105.). Kids are already least effected group from covid, all this shot is going to do is increase and speed up deterioration of their bodies, create a hardship for the families who will then have to take care of the kid because of the vaccine immunity with no thanks to HR 5546 (see below) protecting the pharmaceutical companies over the safety of the children.

This virus does not go after children as it goes after the older adults with comorbidities. The children who have fallen ill are ones who are already compromised or have been injected with this untested shot in the name of health. Especially when children have a less then .5% chance of dying from this!!

This entire procedure is yet another overstep of those who were elected and making sure those who they appointed pushes forward an agenda that is not in the best interest of the people or the children.

Do the right thing and not pass these proposed WACs

□

How Do We Know the COVID-19 Vaccine Won't Have Long-Term Side Effects? - MU Health

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.muhealth.org%2Four-stories%2Fhow-do-we-know-covid-19-vaccine-wont-have-long-term-side-effects&data=04%7C01%7Cnathaniel.thai%40sboh.wa.gov%7C3dd58e45fd7a43121d7508d9d1632593%7>

One of the reasons some people haven't signed up to receive the COVID-19 vaccine is that they're worried there might be unknown side effects that will show up months or years later. Although it's true there are still a lot of things we're learning about the vaccines — like how effective they are against variants and how long their protection lasts — there are plenty of things we do ...

www.muhealth.org

H.R. 5546:

Passed House amended (10/14/1986)

(Measure passed House, amended)

National Childhood Vaccine Injury Act of 1986 - Title I: Vaccines - Subtitle 1: National Vaccine Program - Amends the Public Health Service Act to establish in the Department of Health and Human Services a National Vaccine Program to: (1) direct vaccine research and development within the Federal Government; (2) ensure the production and

procurement of safe and effective vaccines; (3) direct the distribution and use of vaccines; and (4) coordinate governmental and nongovernmental activities. Requires the Director of the Program to report to specified congressional committees.

Establishes the National Vaccine Advisory Committee to recommend: (1) ways to encourage the availability of an adequate supply of vaccines; and (2) research priorities.

Authorizes appropriations for FY 1987 through 1991.

Subtitle 2: National Vaccine Injury Compensation Program - Part A: Program Requirements - Establishes the National Vaccine Injury Compensation Program as an alternative remedy to judicial action for specified vaccine-related injuries.

Prescribes the contents of any petition for compensation.

Grants U.S. district courts authority to determine eligibility and compensation. Requires the district court in which the petition is filed to designate a special master to serve as an adjunct to the court. Sets forth the responsibilities of the court.

Lists factors to be considered when determining the amount of a compensation award. Sets forth a table of injuries deemed vaccine-related for compensation purposes. Permits the Secretary of Health and Human Services to: (1) promulgate regulations to revise such table; and (2) recommend changes to the vaccines covered by the table.

Provides that compensation awarded under the Program shall be paid out of the National Vaccine Injury Compensation Trust Fund. Limits awards for actual and projected pain and suffering and emotional distress to \$250,000. Prohibits awards for punitive damages.

Establishes the Advisory Commission on Childhood Vaccines to: (1) advise the Secretary on the implementation of the Program; (2) recommend changes to the Vaccine Injury Table; and (3) recommend research priorities.

Part B: Additional Remedies - Sets forth procedures under which the person who filed a petition for compensation under the program may elect to file a civil action for damages.

Provides that no vaccine manufacturer shall be liable in a civil action for damages arising from a vaccine-related injury or death: (1) resulting from unavoidable side effects; or (2) solely due to the manufacturer's failure to provide direct warnings. Provides that a manufacturer may be held liable where: (1) such manufacturer engaged in the fraudulent or intentional withholding of information; or (2) such manufacturer failed to exercise due care. Permits punitive damages in such civil actions under certain circumstances.

Part C: Assuring a Safer Childhood Vaccination Program in the United States - Requires each health care provider who administers a vaccine listed in the Vaccine Injury Table to record certain information with respect to each such vaccine. Requires each health care provider and vaccine manufacturer to report certain information to the Secretary.

Requires the Secretary to develop certain vaccine information materials for distribution to the legal representatives of any child receiving a vaccine listed in the Vaccine Injury Table.

Directs the Secretary to promote the development of safer childhood vaccines.

Sets forth recordkeeping and reporting requirements for vaccine manufacturers. Imposes civil and criminal penalties for destroying, altering, or concealing any such report or record.

Part D: General Provisions - Allows any person to commence a civil action against the

Secretary where the Secretary allegedly has failed to perform a duty under this Act. Provides for judicial review of the Secretary's regulatory actions in a court of appeals of the United States.

Allows the Secretary to provide licensing for unpatented vaccines for naturally occurring human infectious diseases under certain circumstances.

Requires the Secretary to conduct studies on pertussis, rubella, and radiculoneuritis vaccines and publish the results of such studies.

Directs the Secretary to study the risks to children associated with each vaccine listed in the Vaccine Injury Table and establish guidelines respecting the administration of such vaccines. Directs the Secretary to periodically review and revise such guidelines.

Directs the Secretary to review the warnings, use instructions, and precautionary information presently used by manufacturers of vaccines listed in the Vaccine Injury Table. Directs the Secretary to require manufacturers to revise and reissue any warning, instruction, or information found inadequate.

Grants the Secretary recall authority with respect to any licensed virus, serum, toxin, antitoxin, vaccine, blood, blood component or derivative, allergenic product, or other licensed product which presents a danger to public health. Establishes civil penalties for recall violations.

Directs the Secretary to make annual reports to specified congressional committees on the impact this Act has on the supply of vaccines.

Title II: Miscellaneous - Provides that certain Federal provisions designed to reduce paperwork shall not apply to information required to carry out this Act.

My children have already had the virus and have had almost no symptoms. Why should I be forced to immunize them when they have such a small risk of hospitalization or death from a reinfection. Please recognize prior infection and natural immunity. It is as effective at preventing death and hospitalization as the vaccine. The vaccine is not effective at preventing the disease any longer. It is effective at lowering death and hospitalization for high risk people. I have the vaccine but I see no reason to make my children feel the effects of the vaccine or risk an adverse side effect. This isn't even FDA approved. Please, let us decide what is best for our children.

There is absolutely no just cause to even consider mandating a covid vaccine for public school children. There will be a serious backlash. Do not further this agenda. Vaccines have serious potential side effects and are the personal choices of families. Their participation in public school programs should not be dependent on risking their safety with an experimental injection.

Are you Pro or Con on the proposal?

2. Con

This is a violation of our constitutional rights. This vaccine is dangerous and we will not give it to our children. I, along with many concerned parents across this state, have major concerns about adding the C-19 vaccine to the list of required vaccinations for children. Requiring an mRNA injection that DOES NOT PREVENT DISEASE was never the intent of the legislature in it's delegation of authority to the State Board of Health to approve a schedule of immunizations for "vaccine preventable diseases." This vaccine does not prevent on from getting the virus or spreading it, even with boosters. Children are not at a high risk of death from Covid-19. The latest variant comes to the majority of them as cold symptoms or nothing at all, and that INCLUDES children who's parents made the choice to vaccinate. Requiring me to put my children at risk by getting a vaccine that offers perceived safety rather than actual immunity is reason enough for me to pull my child from the public school system, which is what I will do if this becomes a requirement.

COVID-19 vaccine for inclusion in chapter 246-105 WAC

11.

Are you Pro or Con on the proposal?

2. Con

I don't feel that we have significant evidence to show that the COVID virus poses serious health risks for school age children. If a child has underlying conditions that would make them more at-risk from the virus, it should be a private decision to get vaccinated between the parents and their doctor.

I am not anti vaccine. I am anti government mandating anything we put into our body's. Let alone our kids, on a vaccine that has no long term study's and NOT proven anywhere that it works.

If you mandate this for kids to go to school, my kids will be pulled out immediately.

I think you need to remember you work for us!

It's called FREEDOM to choose.

The Covid vaccine has not been fully tested on the effects on children and adults long term. Children have strong immunity and with the mask mandate they are "protected" that much more. Until we know long term effects nothing should be mandated. Parents must have full control of what happens with their children NOT some board member or for that matter the President.

The decision of whether or not to give the Emergency Use Authorized COVID 19 vaccine to children should be left SOLELY up to the parents. This vaccine has been shown to not stop transmission of the virus and at best only decreases symptoms in the patient receiving the vaccine. If you add this to the childhood schedule for required vaccines for school, there will be thousands of children leaving the school system. Please take this into consideration.

Covid has shown to be mild with children with the new variant being more mild overall. The death and hospitalization rate for kids is very low. This is a new vaccine which hasn't been long term tested. This should not be required for kids. Measles killed one out of 11 people. That made sense. The death rate for kids is .0005%. States with no mandates have similar infection rates as WA. There is no proof that this would help anything.

Subject: Vaccine Requirements for Schools including the Covid 19 Shot

External Email

To Whom It May Concern:

I understand that you are exploring the possibility of adding Covid 19 shots to the vaccination requirements for school children. I am vehemently against this idea, and I believe if you look at all that has transpired over the last two years (government overreach, hypocrisy, contradictions, lying, big pharma unprecedented profits, etc. etc.) you will come to the same conclusion. Please consider the following:

Children are not at high risk from covid infections, do not drive excess hospitalizations, have an extremely low death rate and do not spread covid.

A one size fits all medical plan does not work for individual people who have individual strengths and weaknesses in their bodies. The decision to give children covid shots should remain with the people who know those children best, their parents.

Many families are very proactive in protecting their health on a daily basis via diet, supplementation, etc. so as not to need the prescription drugs/treatments pushed by Big Pharma. Our God given immune systems work very well against disease if supported properly. Our family had covid in early September and dealt with it very well most likely due to the steps we have been taking for months prior to our infection. The decision to take a medical treatment is a personal one and bodily autonomy should never be infringed upon by the government.

Eventually, everyone will contract covid. You cannot stop a virus with a vaccine as we have seen with the flu vaccine. And, like the flu vaccine, the covid shot is "leaky" which leads to the more variants.

Natural immunity should not be overlooked or discounted. Those with natural immunity have broad spectrum, long-term immunity.

Lasting immunity found after recovery from COVID-19 | National Institutes of Health (NIH)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nih.gov%2Fnews-events%2Fnih-research-matters%2Flasting-immunity-found-after-recovery-covid-19&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C9c2e394e59724e76e29e08d9cf311b6a%7C11d0e2172>>

Study Shows Natural COVID Immunity Lasts At Least 13 Months (brjm.org)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fbrjm.org%2F2021%2F12%2Fstudy-natural-covid-immunity-lasts-13-months%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C9c2e394e59724e76e29e08d9cf311b6a%7C11d0e2172>>

Getting the Covid shot does not prevent individuals from contracting or spreading covid. Those who take the shot with the idea that it will prevent others from getting infected are sadly mistaken. "If" it does in fact protect from severe illness, then it is the personal choice of individuals to decide. There is emerging data from the UK that shows that more

people have died from covid after having two doses of a covid shot compared with those who have had none.

SARS-CoV-2 variants of concern and variants under investigation
(publishing.service.gov.uk)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fassets.publishing.service.gov.uk%>

Since these shots lose effectiveness over a short period of time, continuous boosters will be needed for continued "protection". (For example, look at Israel. Over 80% of their eligible population had their covid shots as of August 2021. As cases began to rise, their covid passports were nullified until they received a third shot. They are currently looking into making their covid passports only valid for 6 months at a time so they can determine the need for more boosters. That is insanity!!!) No studies have been done on the safety of continuous boosters, especially in regard to children. How many boosters will people need to have to remain compliant with the requirements? Monthly, weekly, daily? Children have another 70-80 years of life to live; the unknown, long-term effect of these shots is too risky to experiment with our children.

It's 'reckless' to vaccinate children for COVID-19: Former HHS coronavirus advisor - LifeSite (lifesitenews.com)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.lifesitenews.com%2Fnews%2Freckless-to-vaccinate-children-for-covid-19-former-hhs-coronavirus-advisor%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C9c2e394e59724e76e29e08d9cf311b6a%7C1>

Vaccine Acquired Immune Deficiency Syndrome (VAIDS): 'We should anticipate seeing this immune erosion more widely' | America's Frontline Doctors
(americasfrontlinedoctors.org)

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Famericasfrontlinedoctors.org%2Ffr
acquired-immune-deficiency-syndrome-voids-we-should-anticipate-seeing-this-immune-
erosion-more-
widely%2F&data=04%7C01%7Cwsboh%40sbh.wa.gov%7C9c2e394e59724e76e29e08d9cf311b6a%7C11

Another example of the covid shot failure is in our own backyard. Seattle and King County area have an 82% covid shot rate and had instituted a covid passport policy back in October to enter any business yet they now have record covid cases.

Not to forget the VAERS data which we know shows just a tiny picture of the damage these shots have wreaked.

basedoc (doctors4covidethics.org)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdoctors4covidethics.org%2Fwp-content%2Fuploads%2F2021%2F12%2Fend-covax.pdf&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C9c2e394e59724e76e29e08d9cf311b6a%7C11d>

Bottom line, this shot is experimental as we barely have one years' worth of data which has not included studies on children. It does not work as advertised, the manufacturers are immune from any liability, and we are being told we need to continue taking this product, even being threatened with loss of freedoms and our jobs.

Pfizer Admits It Used Israel As A 'Laboratory' To Test Its COVID Vaccine : World :

Christianity Daily

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.christianitydaily.com%2Farticle%2Fadmits-it-used-israel-as-a-laboratory-to-test-its-covid-vaccine.htm&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C9c2e394e59724e76e29e08d9cf311b6a%7C1>

Please seriously consider all the inconsistencies that have gone on since this all began. Please seek out information and perspectives that conflict with the governmental/big pharma narrative and at least weigh it alongside the other information you are using to make your decision. Finally, if you do choose to include the covid 19 shot in the requirements for school children, you must allow medical, religious and personal exemptions as are available with every other required vaccine for school attendance.

Thank you for your consideration.

As the CDC looks to define "fully vaccinated" as having received a booster with a 6 months of previous shots, we risk the health and well being of our developing and maturing school age children. Scientists do not have long term data on the safety of this specific vaccine and side effects are as prevalent and sometimes more serious than contacting the illness in this population. The risk of adverse effects in this generation and future offspring are too great at a time where science, efficacy reports are constantly changing and politics are driving polarizing decisions made across the US.

I am a healthcare worker and mother of three boys to name a few titles and have felt first hand the divisive tactics of this virus. Our country was already in a divisive state and this made it worse. Our state leaders are not helping matters by allowing mandates to rule. Our livelihood in this state has been suppressed and demoralized and many leaders continue to lead in this way. Research shows that parent involvement is the leader in successful students. The policies in our state have lead us to have little parent involvement and now schools are requiring parents to be vaccinated to work with students and redundant non symptomatic testing to play athletics. This is detrimental to our schools and livelihood considering 99% of people live through the virus even before vaccinations came out. Putting something in our bodies should be voluntary not a mandate set by government leadership. At this point many families have been mandated to vaccinate or have natural immunity. Please stop the division and work surrounding something we can not eradicate by mandating peoples livelihood! Here is a link that supports natural immunity: https://www.theepochtimes.com/is-natural-immunity-more-effective-than-the-covid-shot_4188524.html?utm_source=News&utm_campaign=health-2022-01-03-2&utm_medium=email

I am 100% vaccinating my children for Covid. 75% of parents also agree with me. Vaxx rates among children are lower than predicted too. A perfect way to defund public school would be to have a COVID vaccine mandate required for school.

Vaccines reduce symptoms only and do not prevent spread:

Rates of myocarditis among boys:

This study from @KPNorthwest corroborates what we warned about w/our VAERS preprint (but now w/much higher # s): rates of post-vax myo "higher than that reported in..US studies & at VBRPAC & ACIP meetings"

1/2650 males 12-17

1/1862 males 18-62 after dose 2

Vaccines carry risk, even those that have been researched for years, which the covid vaccines have not. Children are at very low risk for disease complications and mortality. You would be vaccinating the lowest risk population with a substance that has a higher likelihood of hurting them than the disease itself. It should be up to each individual, or their parent if they are a child, to decide if they want to inject anything into their body. And a child's education should not be bargaining chip. A child has a right to an education, particularly if there is any hope of an educated society in the future. The state is far overstepping with the suggestion of this mandate. As for any risk that unvaccinated children pose to the surrounding community, the community members are more than welcome to get vaccinated to protect themselves if they believe that this vaccine is such a panacea that all children should get it or be forced to give up their public school education.

Washington State Board of Health,

I am writing to voice my concerns about the recommendations being considered for adding the Covid vaccines to the list of required vaccines required to attend school in Washington State.

I am requesting that you consider NOT adding the Covid vaccinations to the list of required vaccines. Each new variant has proved that there will need to be more boosters and vaccines in the future, similar to the flu vaccine. The flu vaccine is not mandatory and this should be treated in the same way.

It seems that the panel that you have assembled are all very pro-vaccination. I am not anti-Vax, but I am pro medical choice. I hope that you will consider adding more members that have a broader view and are in favor of medical choice.

Thank you,
Rebekah Petersen

If students are required to need the covid vaccine to attend school, I will pull my 2 children out of school. My children will not be used as a pin cushion to make others "feel better" about a virus. I am not anti vaccine, I myself am vaccinated but I will not be subjecting my children to a experimental vaccine, especially just to attend school. Please rethink using this as a requirement for kids.

We are Washington state citizens with 3 school-aged children, and are very against a covid vaccine requirement to attend school.

Any vaccine without determined long term safety information is not something that we will risk having injected into our children. They are not at severe risk of harm from this virus and the possible vaccine side effects are not worth any possible benefits for them.

I know for a fact that many other people share my opinion and will also simply pull their children out of the school system entirely if need be. Their health is more important than anything and we will not comply. We will remain in control of our children's health, not the government.

Thank you for your time.

Sincerely,
Katie Woodard

Subject: Three Points of Information

External Email

Good afternoon,

I would like to submit three points of information for your consideration in today's meeting as to whether or not the EUA vaccines for Covid-19 should be included for school attendance.

I feel strongly that, as a parent of school-aged children impacted by your decisions, there should be a much longer trial period with adequate safety studies before requiring this medical treatment for our children.

Additionally, as our district and others around the state have now begun testing both vaccinated and unvaccinated athletes after the covid outbreak from wrestling tournaments, it is undeniable that covid can be transmitted and passed regardless of vaccination status.

This local admission is comparable with the Lancet study published Oct. 29, 2021 wherein they found that, "fully vaccinated individuals with breakthrough infections have peak viral load similar to unvaccinated cases and can efficiently transmit infection in household settings, including to fully vaccinated."

Why is this SO important?

The 1905 SCOTUS case *Jacobson v Massachusetts* held that mandates can only be considered to "prevent the spread of contagious disease."

Clearly, then, if these vaccinations do not "prevent the spread of contagious disease," any mandate or school requirement would, according to the 1905 ruling, be illegal.

I am attaching three other important health considerations for your review below that are very worrisome with regard to these injections.

I feel strongly that we need more time and long-term studies completed before we begin to mass vaccinate our youth who have proven to be at virtually no risk of the disease itself.

Please find three, important points of information below:

This study from the American Heart Association indicates a 25% increase of an adverse cardiac event post-vaccination:

https://www.ahajournals.org/doi/10.1161/circ.144.suppl_1.10712
<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ahajournals.org%2Fdoi%2F10.1161%2Fcirc.144.suppl_1.10712

This study demonstrated that 93% of those who died shortly after vaccination were killed by the vaccine following pathology reports.

<https://doctors4covidethics.org/wp-content/uploads/2021/12/end-covax.pdf>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdoctors4covidethics.org%2Fwp-content%2Fuploads%2F2021%2F12%2Fend-covax.pdf&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cbe8549988a8748d2b4c808d9cb0f5e7e%7C>

And then, of course, the CDC themselves have agreed that youth, especially young, males, are at an increased risk of a cardiac event from these injections. I personally have a friend whose son was impacted by this very condition post vaccination.

Lastly, my family is covid recovered along with 99 out of every 100 people who contract the virus. Just as anecdotal evidence suggests and scientific evidence demonstrates, our

children were minimally impacted by the virus at all. Now that we have natural immunity, we see no reason at all to require them to be a part of this long-term vaccination study or to enroll them in it just so they can have their protected right to an education. The risk is far greater than the benefit for them.

Please vote "no" on requiring the covid vaccine for public school attendance.

Mandating this requirement would be neither legal, per SCOTUS' 1905 ruling, nor do we have enough long-term risk/benefit studies to know for certain that we would not be putting millions of children unintentionally in harm's way.

Thank you, for your consideration.

Are you testifying on a specific proposal under consideration by the board?

2. No

11.

Are you Pro or Con on the proposal?

2. Con

Many students have already had Covid and have natural immunity which has proven most effective against reinfection. We do not yet know the long term effects of this vaccination and there is no way we should be vaccinating children who have not yet even been able to finish developing, growing or begun to have children of their own. The vaccines, even with the boosters are not fully effective and many are still getting Covid after 3 vaccinations. In addition, there will continue to be variants that are not protected by current vaccinations. From what we have been told by the district, our children have been safe at school following masking and better cleaning standards than were in place prior to Covid.

1. Yes

WAC 246-105 below concerning: IMMUNIZATION OF CHILD CARE AND SCHOOL CHILDREN AGAINST CERTAIN VACCINE-PREVENTABLE DISEASES

11.

Are you Pro or Con on the proposal?

2. Con

I am deeply concerned about the potential mandate of the COVID vaccination of school-aged children. I have reviewed the nine criteria your board is using to determine whether to proceed with the mandate and I have concerns about several of them. First, the vaccination is still in its emergency use stage and has not been fully vetted for long term use by the FDA. It is not proving to reduce the transmission of the disease (criteria #6) as people who are vaccinated continue to see breakthrough cases. Further, this vaccine has yet to be considered acceptable by the public (criteria #7). This will cause undue burden upon our families with school-age children. They have suffered through two years of COVID restrictions, masking, adult-mandated vaccines affecting parenting, employment, social, and mental health. As a public school educator, I believe that students, who are at the lowest risk of suffering adverse affects from COVID itself, should not be mandated to receive the vaccine to attend public school. Anecdotally, I have seen a student who received the vaccine and missed four weeks of school due to adverse reactions (both to the initial vaccine and then the subsequent) (criteria #4). The reactions were severe including the temporary loss of the ability to walk. I urge you to consider not making this vaccine mandatory. Parents should have the right to choose what's best for their children. At this point, there is not enough information about the long-term effects, nor public support for the vaccine to put our state's public school children at state-mandated risk. Parents should have the right to choose whether or not it is appropriate to vaccinate their children. It is a risk that the state should not be mandating.

The COVID vaccines have proven to not protect those who have taken them from contracting the disease. They have also not stopped vaccinated people from spreading the disease. There are known side effects from the vaccines. Children have a less than 1% chance of having a severe reaction to the virus, hospitalization or death from the virus. Mandating COVID vaccines to children is malpractice.

Hello,

As a parent of two Washington state students and a state certified teacher I do not recommend this forced vaccination onto our children. It is awful enough that I was required in order to keep my career. There is no isolation of the specific antigen and the side effects of these "vaccinations" is irreversible. Young teens are having major heart complications and there are nanoparticles of the spike protein found in ovaries. Please do us all a favor and let our medical freedom, be freedom. Our State is about to lose even more students and teachers because of these issues. We've lost enough already from having our students wear masks all day long. Enough is enough. Please proceed with caution.

Sincerely,
Denise Roberts

I oppose mandatory vaccinations. Number one thing is they use aborted fetal cells in the vaccines (which I am strongly against). Secondly Moderna and the Government own the patents on the MRNA vaccines. Of course they are going to require everyone to get vaccinated, even if they are not safe. It's all about the money. The small pox vaccine took 13 years to develop. You can't seem a vaccine "safe" after a year. The virus is weakening. We need to be strengthening our immune system naturally and not by an experimental vaccine that is ineffective. The virus will always find a way around the vaccine and form variants. This virus isn't going away and we need to be offered the choice of taking it or not. I just lost my father in law due to a blood clot from the vaccination. Let's see some realistic reports on deaths and serious side effects from these vaccines.

Hello,

I am a mother, veteran, military spouse, firefighters wife, and mental health professional.

I can speak for all the people in my family, workplace, social group and church that a forced vaccination of this kind, placed upon innocent children and their parents, will change our voting habits substantially. We DO NOT approve, nor do we fail to recognize the political and financial nature of the vaccine hype. Science will verify the vaccine mandates, shaming, snitching and creating second class citizens (regardless how extreme their views may be) has done little in stopping the spread and done alot in dividing this country.

Please govern accordingly.

Public Health RN, Maternal Child Health RN for 12 years-I have trained and worked in childhood vaccination and community Covid-19 response

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

Covid 19 is not comparable to other viruses and illnesses for which current important routine and required childhood vaccines are in effect. Even if it were, the data for safety and efficacy for the current Covid-19 vaccines has not been transparent and the available vaccines in the US are still EUA. Unlike required and acceptable childhood vaccines, the current Covid-19 vaccine was only effective for a strain no longer in circulation, has been proven to wane, has no proof of reducing or preventing transmission, and causes life altering injury and death to children

11.

Are you Pro or Con on the proposal?

2. Con

I am a mother and a nurse and I love vaccination. I have never seen a public health response as inconsistent with reality, science, and the good of humanity in my career. I have seen individuals seriously harmed by this vaccine. I have seen all of my children get through Covid-19 (delta) with nothing more than a runny nose.

I, along with many other concerned Parents across this State have grave concerns about adding the Covid-19 Vaccine to the list of required vaccinations amongst children of any age. Requiring an mRNA injection that DOES NOT PREVENT DISEASE was never the intent of the legislature in it's delegation of authority to the State Board of Health to approve a schedule of immunizations for "vaccine preventable diseases". As you are all aware, this vaccine does not prevent one from getting the virus, or spreading it, even with follow up boosters. Children are not at high risk of death from Covid-19. The latest variant comes to the majority of them as cold symptoms or nothing at all, and that INCLUDES children who's parents made the choice to vaccinate. Requiring me to put my child at risk by getting a vaccine that offers perceived safety rather than actual immunity- is reason enough for me to pull my child from the public school system, and that is what I will do if this becomes a requirement.

<https://globalcovidsummit.org/news/live-stream-event-physicians-alerting-parents> Listen to this speech from a pro-vaccination doctor. He's against this vaccine for so many reasons (and to be technical, this is not a vaccine because it's mRNA which changes your DNA - so different from how any other vaccine is made) Here's just a portion of the attached article I linked. The first is that a viral gene will be injected into your children's cells. This gene forces your child's body to make toxic spike proteins. These proteins often cause permanent damage in children's critical organs, including Their brain and nervous system Their heart and blood vessels, including blood clots Their reproductive system, and This vaccine can trigger fundamental changes to their immune system The most alarming point about this is that once these damages have occurred, they are irreparable Finally, I will NOT inject my children with this. I will NOT make my children lab rats for a virus that will not harm them and they don't put others at risk. I will not be another sheep blindly following the political game promoting this to put fear into people.

Good afternoon,

Please consider the data, scientific data, and scientific evidence that shows COVID vaccine is not needed, or effective against the COVID disease.

The physical effects are so negative to children that we should not place or allow such a mandatory requirement on our children.

The rights of citizens in according to the constitution, and private property (My Body My Choice) should be the standing ground for not allowing this vaccine to be mandatory for anyone!

Thanks for listening

Brian Poje

Subject: Vaccine requirement for school

External Email

We are Washington state citizens with 3 school-aged children, and are very against a covid vaccine requirement to attend school.

Any vaccine without determined long term safety information is not something that we will risk having injected into our children. They are not at severe risk of harm from this virus and the possible vaccine side effects are not worth any possible benefits for them.

I know for a fact that many other people share my opinion and will also simply pull their children out of the school system entirely if need be. Their health is more important than anything and we will not comply. We will remain in control of our children's health, not the government.

Thank you for your time.

Sincerely,
Katie Woodard

9.

Do you have any special expertise relevant to this topic?

1. Yes

Common sense and an immune system.

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

Children, ages 4-18, who have had little to no symptoms related to the COVID virus in no way should be required to receive a mandatory vaccination that has proven not to provide protection to those who have received the vaccination.

11.

Are you Pro or Con on the proposal?

2. Con

I am not for the mandatory vaccination for our school aged children as this is complete nonsense! It has been proven that our children ages 5-18 have had little to no symptoms related to the COVID virus and history has shown that the current vaccine has been less than effective at keeping individuals at all ages from contracting the virus. Use your common sense.

Subject: TAG zoom meeting 12/29/21

External Email

I just finished viewing the zoom meeting of the Technical Advisory Group assigned to the task of advising the Washington Board of Health on the question of including the covid vaccine to the list of required vaccines for children in educational and childcare settings. Thank you for the opportunity to witness the meeting through zoom. I look forward to following the process of the TAG as you work toward a recommendation.

During a brief presentation of the "nine criteria" by Samantha Pskowski, I was struck by the fact that many of the criteria appear entirely inappropriate to the consideration at hand. I am referring to the numerous instances in which the phrase, "vaccine containing this antigen" is used.

The "vaccine" in question is not actually a vaccine. It does not contain weakened or dead viral material like other vaccines. It contains no antigens. It is a medical/genetic protocol containing strands of synthetically produced mRNA. When injected into human tissue these strands program human cells to produce the spike protein associated with the disease, Covid 19. The body then produces antigens against those spike proteins.

This new technology has never been used on humans outside of a brief flurry of testing prior to the issuance of an Emergency Use Authorization. Is it not then reasonable to expect that new, accurate and appropriate criteria be employed in the assessment of the mRNA treatments prior to considering the requirement that practically all Washington children be injected with those treatments?

I find the inaccurate criteria particularly troubling in light of the fact that the mRNA treatments are still being administered under an EUA. The manufacturers have secured for themselves complete immunity from civil liability under the EUA. With these facts in mind, it appears the TAG could be the last line of defense against what may in the future prove to be a terrible medical error involving a segment of the population with no power to influence the decision.

I strongly suggest that another criterion be added. That is: How will we as a society address the harm in the form of injury and death to children?

There are several studies showing the VAERS system has a history of vastly underreporting adverse events. Current statistics from VAERS show over 20,000 people killed by the mRNA protocol. The number of adverse reactions associated with the mRNA protocol are unprecedented in the history of vaccines. Will the TAG suggest a tolerable limit on the amount of injury or death of our children?

The alternative is to ignore the injury and death currently being documented in our adult population and hope that our children won't be equally affected.

Respectfully,

Jon M. Borchering

The Flu vaccine is not required for school children. Therefore, the COVID19 vaccine should not be required since it is similar to flu virus and not deadly to children. Also, there is not enough data for long term affects on our children with this vaccine that was rushed and tested on the public as emergency use.

I implore the members of this board to carefully consider the lives of the children they are charged with "protecting". We know from recent studies that children have the highest Covid recovery rate of all age groups and a less than .002% risk of dying from this virus. We know that according to VAERS there have been over 19,000 deaths reported to date as a direct result of this injection. We know from the amount of "break thru" cases that this injection does not have the efficacy we had once hoped for. We also know that this injection was not FDA approved, only emergency use authorization extended, and that Corminity won't be widely available in US until 2023. We know that there have been several recent cases of myocarditis and blood clots in otherwise healthy young individuals after receiving this injection, not to mention reports that in some cases it could cause sterility/fertility issues.

There have not been adequate safety trials of long term effects of this mystery concoction and we have no idea how this will affect our children in the long run. Do you really want to be responsible if mandating this injection turns out to be some sort of death sentence for our children years from now? Please do not mandate this drug trial/experiment on the children as a condition to get an education, let parents decide what is best for their child's health!

Thank you,
Miranda Lucht.

Subject: Vaccine requirements for students

External Email

To Whom it May Concern,

We should not be mandating experimental medical procedures for children that do not require it for the following reasons:

Mandatory vaccination against COVID-19 has proven to be ineffective against the spread of COVID-19. Those that have been vaccinated are still capable of getting and spreading the virus. Why would you mandate a vaccine that does not prevent the spread of illness among the vaccinated? Seattle alone has a vaccination percentage of over 80% and yet the Omicron variant is causing cases to spike. The Omicron variant is mild and no worse than the common cold.

Secondly, COVID-19 is not particularly threatening to children. During the entire pandemic, less than 1,000 (I'm being generous, last I checked the stats it was under 500) children have died from COVID-19. Why on earth would we mandate a vaccine to prevent illness in those that are seemingly unaffected by the disease? Those that did pass away died WITH COVID-19, not OF COVID-19.

Moderna has been pulled in other countries because of the negative health impacts it's had on people under age 30. Why would we give or mandate a "vaccine" to children as young as 5 something that has been deemed unsafe for younger populations?

I will take my children out of the public school system if they are mandated to undergo a medical procedure that will likely cause them more harm than good. The risk isn't worth the "reward." I will not abuse my children to give the adults around them a false sense of security.

Take care and thank you for your consideration,

Crystal

Subject: TAG meeting Dec 29 2021 discussion on adding Covid - 19 vac to schools requirements

External Email

Dear TAG & Pierce County council members,

We are in complete agreement with the contents of the letter sent to you below by many alarmed people and parents. As concerned, responsible parents in Gig Harbor, Peninsula School District and throughout the Puget Sound region and for the following reasons we do NOT consent or support in any way, you adding the experimental Covid-19 vaccination to the schools vaccination requirements. Many have died or have serious life-damaging side effects. Athletes are dropping dead all over the world! Check with VAERS at CDC to see how many others have died from this experiment. 1000 attorneys and 10,000 health practitioners have already filed multiple lawsuits in Germany and California against people who have mandated these fake PCR tests and experimental quasi-vaccines. Other teams are rising up to stop this insanity. We hope you will protect our children from harm and yourselves from harm and litigation. Thank you.

Rev. Robert Bily
253-514-6870

BE WARNED!

WE PUT YOU ON LEGAL NOTICE: "The United States Government has extraterritorially prosecuted, convicted and executed Medical Doctors who have violated the Nuremberg Code on Medical Experimentation. Aiders and abettors of Nuremberg Crimes are equally guilty and have also been prosecuted, convicted and executed.

Every court of law in any location has original jurisdiction (Universal) to hear and try Crimes Against Humanity; and violations of the Nuremberg Code are classified as Crimes Against Humanity, which carry a maximum penalty of Death.

You are hereby put on NOTICE that any further effort to coerce, intimidate, persuade, trick or compel our children to receive any experimental gene therapy injection ("Covid Vaccine") or any other medical device, drug or procedure against their will, implicates you as aiding and abetting in the Capital Offense of a Crime Against Humanity. I hereby reserve my rights to swear to a criminal complaint against you in the nearest available law enforcement agency or court of law. I do not contract with you in any way and expressly deny any contractual relationship with you.

I hereby reserve my rights and put you on NOTICE that you may also be liable for civil damages under various Tort claims including but not limited to: negligence, fraud (in the Inducement), Assault, Battery, Intentional Infliction of Emotional Distress, Loss of Consortium, Trespass and Products Liability. The following resource and LETTER OF NOTICE serves as one of the best legal points of defense and protection against what seems to be a clear violation of the Nuremberg

Code. Anyone that participates in the promotion of Jay Inslee's push to violate a person's legal right to choose(experimental covid vaccine) should be put on legal NOTICE:

WEBSITE: <https://www.vaxxchoice.com>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.vaxxchoice.com%2F&data=0>

With so many deaths and irreparable damage being done by these experimental DNA altering vaccines, why would we mandate something that already has multiple successful therapeutics with no harmful side effects? Hydroxychloroquine and Ivermectin have been proven by thousands of doctors around the world to be highly safe and effective.

Vaccines and masks seem like the modern day trains of Hitler's reign of terror. "Für Ihre Sicherheit", "It's for your safety". Sound familiar?

Those who do not learn from history are doomed to repeat history. And those ignorant to the plans of evil men and evil agencies are used as 'Useful Idiots', a phrase coined by Lenin and Stalin to label those who are foolish enough to promote their harmful agenda. These mandated vaccines are no different and are a clear violation of the Nuremberg Code.

Will you stand for true freedom or become pawns of harm to humanity, and God forbid our children!!?

Our children are our future, are you working towards their real safety and wellbeing, or are you going to be conduits of this evil plan to harm them?

Choose wisely, FREE America is watching.

Please vote NO on this human, children rights violation.

Mandating Covid-19 vaccinations for students

11.

Are you Pro or Con on the proposal?

2. Con

I urge you to reasonably consider all feedback regarding the mandating of the Covid-19 vaccine for students in Washington. As a resident of Washington State and a parent of school-aged children, I'm very concerned about the following, and respectfully urge the State of Washington to leave the decision to vaccinate against Covid-19 up to individuals rather than the government:

1. Lack of data on long-term safety. There is no study to mention here because it's impossible to report, as the vaccine was recently created and tested. There is simply no long-term data.
2. Children are at extremely low risk for having complications from Covid-19.
3. Vaccinations do not prevent transmission of Covid-19.
4. Exemptions: the state has been clear in its unwillingness to accept philosophical exemption for a vaccine that only (possibly) affects the person that is injected with it. The likelihood that if mandated for students, the state would also apply this logic, is unacceptable.
5. The mandating of this vaccine in other sectors of the state and country has been divisive and highly controversial. Government officials abusing powers puff their chest and push forward regardless of valid citizens input. The widely-available vaccine is thankfully available to anyone who desires it. Why mandate something that (possibly) protects the individual but not others?
6. There are effective treatments available to those who do suffer from more than mild symptoms of Covid-19. Promising research and testing is ongoing for even more treatments.

Subject: Vaccinating school children

External Email

It will be unwise to enforce vaccination of school children for these reasons:

- * The pandemic will likely run its course in the next few months.
- * Forcing Americans, or any world citizens, to take an experimental drug against their will is illegal according to The Geneva Convention and US law.
- * There is insufficient medical evidence documenting that the risk/reward warrants vaccinating school-age children.
- * If a single child dies from taking the vaccine after being warned against it, then school districts will face enormous lawsuits.
- * Parents of children who want all children to be vaccinated will not vote against incumbents in the next election if they are not. Parents who don't want their children vaccinated definitely will remember and vote against incumbents in the next election.

Please contact me if you have any questions. I'll be glad to explain in more detail.

Inclusion of the Covid-19 vaccine as part of Chapter 246-105 WAC.

11.

Are you Pro or Con on the proposal?

2. Con

Covid 19 vaccines are very new. The Covid-19 risk is too low to place a blanket mandatory requirement requiring students to be exposed to this medication. There are reported side effects and the link between the vaccine and side effects has not been determined. Research is needed to understand the risk of these side effects that allows families to make informed decisions if the vaccine is a good choice for them.

9.

Do you have any special expertise relevant to this topic?

2. No

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

The proposal is to require students to be vaccinated against Covid-19.

11.

Are you Pro or Con on the proposal?

2. Con

There have been no long term studies on the effects of the vaccine on adults or children. Children are not at significant risk from Covid-19, but may be at significant risk from myocarditis and other adverse health conditions related to the vaccine. The yearly influenza virus is much more deadly than Covid-19 for children. The effectiveness of the vaccine has been shown to drop substantially over just a matter of weeks. In sum, the costs outweigh the benefits.

My children are 7 and 10. I will remove them from the public school system if the COVID-19 vaccine becomes a Requirement to attend public school. The vaccine is not necessary. My kids immune system is better defense and less risk than the COVID-19 vaccine. Please do NOT mandate that children get COVID-19 vaccination in order to get a public education.

To whom it may concern:

I am a concerned Washington state citizen and mom of two young children in public school. I am writing today to voice concerns of the vaccine mandate for children in Washington schools. My children have had quite the difficult challenge the last couple of years with the Covid restrictions, one of whom was a premature baby who had underdeveloped lungs. We did remote learning for a time, as well as an online learning program while kids were getting pulled in and out of in-person learning. After which, we re-enrolled them back into in-person learning in the public school system. My children, one of whom is terrified of needles, will not be getting any MRNA vaccine. I've been informed clinical trials are ongoing and most of which will not conclude until 2026. My family and I are not against vaccines. We have all the necessary ones up until now. We believe mostly that vaccines work and are effective. However, without proper documentation of Covid vaccine injuries and the lack of accountability with this particular vaccine, and the fact they would need 3 at this point in time to become fully vaccinated, they will remain unvaccinated for Covid. We believe they had Covid two years ago in October or November.

My children thrive with other kids. When my youngest refused to sit and do homework with me (Mom), when she went to in-person learning, she learned to write her name the first month and is beginning to read her first books. We are so proud of the progress she has made and the amount of friendships she has developed over the course of this school year. She has worn her mask like a champ, and hasn't complained once, unlike some of her classmates who have been in tears over wearing them.

We as a family would be hurt socially if my children were not able to attend because of a mandate, not a law, that is based on science that hasn't completed and has shown to not stop the spread of the virus or stop her from getting it. She has done rapid testing when ill so she can return to the classroom after each illness, and thankfully, has tested negative each time.

I urge you to continue to carefully weigh the negatives of the vaccine, the devastation most children will face when they cannot return to their friends and classrooms, and critically think whether this vaccine that has questionable efficacy, is truly necessary. Although I would never enjoy removing my children from their friends, teachers and important school environment, we will not be attending in-person learning in the public school system if this goes forward.

I ask you to reconsider such an unnecessary step, as in my community, I am a majority of those that feel this way. And many more of us will pull our children out because they've either already had Covid or the research and vaccine injury data has not concluded. We hate to make such a difficult decision as parents, but for some of us, it's a matter of life and death.

Please reconsider so our children may have a normal school experience as much as possible, even if this means continuing social distancing, masking and testing.

Respectfully,
Kathryn Pelcha

The fact this is even a proposal is mind blowing. You've already damaged our children and have ruining their childhoods on a daily basis with masks. The people will stand for what's right and there won't be kids in school. Teachers will lost their jobs because they won't have anyone to teach. Washington Board of health should be ashamed of themselves. You are awful misguided and scares human beings with no backbone. Fuck you!!!!!!

You must absolutely NOT pressure children to receive the Covid 19 vaccine by making it mandatory for school attendance. This is a dangerous, experimental drug that has some terrible side effects. Experimenting on children violates the Nuremburg code! Children do NOT die from Covid 19!!!! This is only to make more money for big pharma and people like Bill Gates! Do what's right for our children!

It is not, nor will it EVER be, anyone but a parents responsibility to choose whether or not to vaccinate their child. You've already lost tens of thousands of students from public school enrollment over your asinine mask mandates. Get ready to see public schools in WA state become extinct, as well as being sued for everything you're worth, if you pass this. Use your damn heads. If this is passed: it will not end well for any of you.

It seems like the decision is already made to force "vaccinate" our children, so the mtg was just theater. NONE of you asked any questions on the efficacy, or the adverse reactions we are seeing already from this shot. What about the VAERS reports? The fact that children are NOT at risk from covid? 0.0003%, really???

The only concerns/questions heard were about the extra admin work it will create. Unbelievable. How much are you being paid to ignore the facts? This is sick and you ALL will be held accountable for crimes against humanity!

Covid poses no more threat to children than the annual flu and the experimental gene therapy Covid vaccines have many unknown threats to our children, especially to their immune system and their respiratory and heart systems. Long term data is not available for years. The current mutation of SARS Cov2 Omnicron carries no threat to children as well as to adults. In fact it is less deadly to the entire population than any of the Covid 19 vaccines! Do not add these gen therapy shots to the childhood vaccine requirement lists!!

Subject: Vaccine requirement in schools

External Email

Requiring COVID vaccines in Washington schools is unnecessary and possibly dangerous to our children. Children rarely catch and do not spread the virus. COVID does not rise to a level of danger to warrant forcing our kids to take an experimental vaccine that we do not yet know the long term effects of. The choice whether or not to vaccinate children belongs to parents. I've personally heard of many incidents of my coworkers ending up in the ER after getting the vaccine, as well as long term side effects. Also, I know many fully vaccinated people including family members who have contracted COVID. I also know a number of unvaccinated people (also family members of mine) who've had COVID and are fine. It seems natural immunity is in fact our greatest defense against the virus. Please do the right thing and let parents make this decision for their children.

Thank you.

I am 100% against requiring a minor to get the covid vaccination in order to attend school. There is still research going on with these vaccines and I believe these minors should have the choice whether to get this put into their body or not when they're older! No one should be forced to do something they are against, or do not want in their bodies, in order to get an education that is needed to survive when they're older. I was forced to get the shot in order to keep a job, and within 2 hours I began an extremely heavy menstrual cycle that I should not have had at the time, and have never bled like that before. I got the first dose 11/5 and for the last 2 months I have bled almost every single day. Excessively. No one has answers and all I'm being told my doctors and nurse advice lines is that there is an ongoing research on this topic! There are thousands of women dealing with this and I'm in a group on Facebook where several people have had the same issues. 2 months of bleeding, no answers, no one knows if this is causing fertility issues because there wasn't enough research done before this vaccine came out. Please don't take the education away from a child because of a "vaccination mandate." This is OUR bodies, and should be OUR decision. Not yours.

Subject: Vaccine mandate for elementary school students - STOP IT

External Email

WSBOH Members:

Please reconsider and re-think the mistake of mandating Covid vaccines for elementary school children in our state.

Instead of mandating vaccines for other people's children, please:

- Mandate Covid vaccines only for your own children, for whom no one else has that rightful responsibility for their lives & healthcare, particularly given their relative low-risk of death or hospitalization.
- Reconsider that your BOH authority to supersede a parent's responsibility for their children's lives and health must be based on better Covid hospitalization and death data than what is currently being given to the public.
- Consider that under our Washington State Constitution the state itself educates our children as an "en loco parentis" entity, that is, under the authority and on behalf of their parents or legal guardians, and that, as our children's medical care is a far more critical concern & responsibility of parents than is their education, it SHOULD also remain and even higher responsibility and authority of parents than it is of the state – unless voluntarily given to another entity.
- Consider that were the documented risks of death or hospitalization from this virus to this population be applied to other health risks common to normal life, what other responsibilities would you be taking out of the hands of our citizens – in the name of their health & safety?

I believe fervently that the vaccine mandates you are now considering constitute a serious overreach of state authority by you, as a non-elected board. Therefore, I will do what I can to expose the meager science behind the alleged health risks you are stating, and I will non-violently resist and protest its compliance at local school board meetings - continually.

Sincerely,

C. R. Harris II

Subject: Re: TAG zoom meeting 12/29/21

External Email

I just finished viewing the zoom meeting of the Technical Advisory Group assigned to the task of advising the Washington Board of Health on the question of including the covid vaccine to the list of required vaccines for children in educational and childcare settings. Thank you for the opportunity to witness the meeting through zoom. I look forward to following the process of the TAG as you work toward a recommendation.

During a brief presentation of the "nine criteria" by Samantha Pskowski, I was struck by the fact that many of the criteria appear entirely inappropriate to the consideration at hand. I am referring to the numerous instances in which the phrase, "vaccine containing this antigen" is used.

The "vaccine" in question is not actually a vaccine. It does not contain weakened or dead viral material like other vaccines. It contains no antigens. It is a medical/genetic protocol containing strands of synthetically produced mRNA. When injected into human tissue these strands program human cells to produce the spike protein associated with the disease, Covid 19. The body then produces antigens against those spike proteins.

This new technology has never been used on humans outside of a brief flurry of testing prior to the issuance of an Emergency Use Authorization. Is it not then reasonable to expect that new, accurate and appropriate criteria be employed in the assessment of the mRNA treatments prior to considering the requirement that practically all Washington children be injected with those treatments?

I find the inaccurate criteria particularly troubling in light of the fact that the mRNA treatments are still being administered under an EUA. The manufacturers have secured for themselves complete immunity from civil liability under the EUA. With these facts in mind, it appears the TAG could be the last line of defense against what may in the future prove to be a terrible medical error involving a segment of the population with no power to influence the decision.

I strongly suggest that another criterion be added. That is: How will we as a society address the harm in the form of injury and death to children?

There are several studies showing the VAERS system has a history of vastly underreporting adverse events. Current statistics from VAERS show over 20,000 people killed by the mRNA protocol. The number of adverse reactions associated with the mRNA protocol are unprecedented in the history of vaccines. Will the TAG suggest a tolerable limit on the amount of injury or death of our children?

The alternative is to ignore the injury and death currently being documented in our adult population and hope that our children won't be equally affected.

Respectfully,

Jon M. Borcharding

You will all be held accountable for your actions. The Nuremberg Code was put in place for a reason.

You should not have the ability to make any kind of rule on what a person is required to be injected with.

You are all lucky the call is on zoom. One day you will not be able to hide behind a computer. You will need to face the people in person.

Consider your actions carefully as you will have consequences.

I find the inaccurate criteria particularly troubling in light of the fact that the mRNA treatments are still being administered under an EUA. The manufacturers have secured for themselves complete immunity from civil liability under the EUA. With these facts in mind, it appears the TAG could be the last line of defense against what may in the future prove to be a terrible medical error involving a segment of the population with no power to influence the decision.

I strongly suggest that another criterion be added. That is: How will we as a society address the harm in the form of injury and death to children?

There are several studies showing the VAERS system has a history of vastly underreporting adverse events. Current statistics from VAERS show over 20,000 people killed by the mRNA protocol. The number of adverse reactions associated with the mRNA protocol are unprecedented in the history of vaccines. Will the TAG suggest a tolerable limit on the amount of injury or death of our children?

The alternative is to ignore the injury and death currently being documented in our adult population and hope that our children won't be equally affected.

Respectfully,

Jon M. Borcharding

Subject: RE: TAG meeting Dec 29 2021 discussion on adding Covid - 19 vac to schools requirements

External Email

Dear TAG & Pierce County council member,

As concerned, responsible parents in Gig Harbor, Peninsula School District and for the following reasons we do NOT consent or support in any way, you adding the experimental Covid-19 vaccination to the schools vaccination requirements.

BE WARNED!

WE PUT YOU ON LEGAL NOTICE: "The United States Government has extraterritorially prosecuted, convicted and executed Medical Doctors who have violated the Nuremberg Code on Medical Experimentation. Aiders and abettors of Nuremberg Crimes are equally guilty and have also been prosecuted, convicted and executed.

Every court of law in any location has original jurisdiction (Universal) to hear and try Crimes Against Humanity; and violations of the Nuremberg Code are classified as Crimes Against Humanity, which carry a maximum penalty of Death.

You are hereby put on NOTICE that any further effort to coerce, intimidate, persuade, trick or compel our children to receive any experimental gene therapy injection ("Covid Vaccine") or any other medical device, drug or procedure against their will, implicates you as aiding and abetting in the Capital Offense of a Crime Against Humanity. I hereby reserve my rights to swear to a criminal complaint against you in the nearest available law enforcement agency or court of law. I do not contract with you in any way and expressly deny any contractual relationship with you.

I hereby reserve my rights and put you on NOTICE that you may also be liable for civil damages under various Tort claims including but not limited to: negligence, fraud (in the Inducement), Assault, Battery, Intentional Infliction of Emotional Distress, Loss of Consortium, Trespass and Products Liability. You are hereby notified of potential liability and this NOTICE shall serve as actual NOTICE in support of these claims."

The following resource and LETTER OF NOTICE serves as one of the best legal points of defense and protection against what seems to be a clear violation of the Nuremberg Code. Anyone that participates in the promotion of Jay Inslee's push to violate a person's legal right to choose(experimental covid vaccine) should be put on legal NOTICE:

WEBSITE: <https://www.vaxxchoice.com>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.vaxxchoice.com%2F&data=0>>

With so many deaths and irreparable damage being done by these experimental DNA altering vaccines, why would we mandate something that already has multiple successful

therapeutics with no harmful side effects? Hydroxychloroquine and Ivermectin have been proven by thousands of doctors around the world to be highly safe and effective.

Vaccines and masks seem like the modern day trains of Hitler's reign of terror. "Für Ihre Sicherheit", "It's for your safety". Sound familiar?

Those who do not learn from history are doomed to repeat history. And those ignorant to the plans of evil men and evil agencies are used as 'Useful Idiots', a phrase coined by Lenin and Stalin to label those who are foolish enough to promote their harmful agenda. These mandated vaccines are no different and are a clear violation of the Nuremberg Code.

Will you stand for true freedom or become pawns of harm to humanity, and God forbid our children!!?

Our children are our future, are you working towards their real safety and wellbeing, or are you going to be conduits of this evil plan to harm them?

Choose wisely, FREE America is watching.

Please vote NO on this human, children rights violation.

Sincerely,

Troi N. Cockayne & Natasha V Cockayne

9.

Do you have any special expertise relevant to this topic?

1. Yes

The topic is related to requirements to attend public school, and I am a School Board Director representing a local district with over 10,000 students.

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

The proposal under consideration is to include the Covid-19 vaccine in the required vaccinations to attend school.

11.

Are you Pro or Con on the proposal?

2. Con

A Covid-19 vaccine mandate clearly does not pass the 9 criteria required when Reviewing Antigens for Potential Inclusion in WAC 246-105-030. I am not taking issue with the vaccine itself, and in fact continue to encourage vaccination in my community. My lack of support for a mandate stems from the following criteria not being met under sections II and III on the list of criteria: II. Disease Burden Criteria 5. The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population. • The vaccine has been directly available to every vulnerable sub-set of the population for some time. 6. Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting or activity being given the highest priority. • It is widely proven that vaccinated individuals can and do continue to transmit the virus. We know this because this was the science used to justify mask mandates. Masks are mandated in schools already, regardless of vaccination status, to prevent the vaccinated from transmitting the virus. III. Implementation of the Criteria 7. The vaccine containing this antigen is acceptable to the medical community and the public. While the vaccine may be acceptable to the medical community (although we will note that even within the medical community, the vaccine adoption rate was not acceptable enough to preclude a forced mandate), we cannot gloss over the fact that public acceptance does not even represent a strong majority. • Under 51% of Spokane County residents are vaccinated. (srdc.org) • Less than 40% of kids 12-17 are vaccinated. (srdc.org) • Only 36% of the entire black community in Spokane County is vaccinated, and it is reasonable to assume this number is far lower among ages 12-17. A vaccine mandate in schools would disproportionately affect students of color in our community. (srdc.org) 8. The administrative burdens of delivery and tracking of vaccine containing this antigen are reasonable. • Our administrators and nurses have already given feedback that a vaccine mandate would create an unreasonable and insurmountable administrative burden involving tracking. 9. The burden of compliance for the vaccine containing this antigen is reasonable for the parent/caregiver. • As stated in the above vaccination statistics, parents are choosing not to vaccinate their children. Forcing them to do so (as with other segments of our society who were coerced under the threat of losing their jobs and livelihoods) does not fall

within a reasonable burden of compliance. It does not seem logical to vaccinate a group (ages 0-19) with such a low, even insignificant, rate of hospitalization or death, while claiming that will protect a more vulnerable group (ages 50-90) with a dramatically higher rate of vaccination (between 62%-82% based on age). Thusly, our state would propose forcing vaccination on those who do not need it, to protect those who already have it and/or could easily get it. The vaccine is widely available to any age group now. Vaccination rates reflect individual health choices that must be protected. We have to acknowledge that individuals can make their own health decisions for themselves and their families. There simply is not a case to be made for forcing someone to get vaccinated to protect someone else who can easily get vaccinated themselves.

I, along with many other concerned Parents across this State have grave concerns about adding the Covid-19 Vaccine to the list of required vaccinations amongst children of any age. Requiring an mRNA injection that DOES NOT PREVENT DISEASE was never the intent of the legislature in it's delegation of authority to the State Board of Health to approve a schedule of immunizations for "vaccine preventable diseases". As you are all aware, this vaccine does not prevent one from getting the virus, or spreading it, even with follow up boosters. Children are not at high risk of death from Covid-19. The latest variant comes to the majority of them as cold symptoms or nothing at all, and that INCLUDES children who's parents made the choice to vaccinate. Requiring me to put my child at risk by getting a vaccine that offers perceived safety rather than actual immunity- is reason enough for me to pull my child from the public school system, and that is what I will do if this becomes a requirement.

Are you Pro or Con on the proposal?

2. Con

This disease poses miniscule threat to children but the "vaccine" does pose threats to the heart health of children, hence the addition of tromethamine to the injection, a treatment commonly used to treat patients post heart attack or bypass for blood alkylsis. The "vaccine" that has been temporarily FDA "approved" is Comirnaty, and it is not available in the United States. Stop putting kids at risk for something that poses less risk than the intervention.

Covid Vaccines for our children

11.

Are you Pro or Con on the proposal?

2. Con

I have many concerns about adding the Covid vaccine to our required vaccinations for our children in public schools. This is an experimental vaccine and we do not know the long term side affects. Covid is not a threat to our children. Save the vaccines for those who are at high risk. These vaccines have proven to not stop the spread of the virus. We will be pulling our daughter from public school if this vaccinations becomes a requirement.

Injuring school children with COVID "drugs"

11.

Are you Pro or Con on the proposal?

2. Con

As a 30-year veteran of the pharma/biotech industry, I conduct extensive research into new therapies and drug development including adverse events and side effects. Having had COVID in May 2021, and the 1-shot J&J shot, I can provide a unique perspective on this subject. My hundreds of hours of research into these so-called vaccines confirms that no one under 30 should get these shots, let alone children. The injuries suffered by children, especially myocarditis, are PERMANENT and cannot be reversed. Children have a very strong immunity system and do NOT need these experimental drugs. There are hundreds of articles that support this info, and even hundreds more detailing permanent injury to kids who have already had the shots. There are also hundreds of articles out there documenting almost 300 European professional soccer players who have collapsed on the field holding their heart. These are extreme athletes that are collapsing, with many dying. So, unless the members of this board are willing to accept PERSONAL RESPONSIBILITY for each and every vaccine injured child in WA, I suggest this proposal be scrapped. Many of us in the medical field see Nuremburg type trials happening in the US in the near future. Are you prepared to stand trial yourselves?

I am truly worried about the risk vs. benefit of my kids in receiving the mRNA vaccine. I have vowed they do not get this vaccine. I will leave our school district of UPSD in University Place WA. My kids have had Covid and it was a sore throat for one day. My kids have increased risk for ASE from vaccines due to prior infection. I have a 14 year old son who is at extreme high risk for myocarditis, I cannot give him this shot.

A very concerned parent

According to testing. My youngest has had Covid twice. My oldest once. It was had more of a mental impact on my kids missing school than anything. I believe it is a persons choice to get vaccinated or not. We should not be segregating our society over this. It saddens my heart to hear anything about Covid now bc of the toll it has taken on our family and our society. Not from a health standpoint, but from hatred and being outcast. I'm almost positive we have all had Covid in our family, but the time we have had to spend apart from school, friends, family, public has been far worse than the virus itself.

From: Ruth Walker

To: DOH WSBOH
Cc:
Subject: To whom it may concern:

External Email

To whom it may concern:

I am a mother of 4, a pediatric nurse and a supporter of the public schools in my neighborhood. It has come to my attention that there is a consideration of adding the latest covid vaccine to the list of required vaccines for school attendance. This is of great concern to me because this vaccine and it's side effects have not been properly tested especially on children. It is known that children while just now are testing positive for Covid more often it is a very mild case for 99% of them. It has also been shown that children aren't giving it to adults rather it's the adults giving it to children. Their immune systems are proving to be robust enough to handle it. We do not know or understand the longterm effects this vaccine will have on them. To add it to the list of required vaccines for school attendance seems outrageous! I understand for an illness with my higher percentages of death but for something that is no more then the common cold for these kids it's reckless. Dr Malone who was the inventor of the MRNA technology himself recommends against kids getting vaccinated stating it is dangerous to their growing and developing brains and organs. He wrote a paper and had 16,000 drs worldwide sign it asking for them to not allow these vaccines to be given to kids. He stated it's one thing for adults and the elderly to get the vaccine but it is dangerous for children. Now you are wanting parents to choose whether to risk taking an experimental gene therapy or sending their kids to school. Public school where their tax dollars are going but they won't be able to use them. Public school that guarantees a free and appropriate education to all students regardless. There are children who can't get vaccinated, their are children whose families have religious convictions about vaccines what about those children?? I am asking you to please allow parents the right to choose what is best for their children and do not mandate these vaccines for school attendance in the state of Washington.

Thank you, Ruth Walker

Have a great day!
Ruth

Hello,

We are longtime residents of Washington state, and have 3 children currently in the school system. As members of the WA state public, we do not accept the COVID vaccine. We know many other WA state residents with children in school who also do not accept this vaccine. Therefore none of us will be continuing with the public school system if this vaccine becomes required for attendance.

I trust that you will not make this vaccine mandatory as it does not meet the criteria for a safe or useful vaccine for the children of our state.

Sincerely,
K. Woodard

You will all be held accountable for your actions. The Nuremberg Code was put in place for a reason.

You should not have the ability to make any kind of rule on what a person is required to be injected with.

You are all lucky the call is on zoom. One day you will not be able to hide behind a computer. You will need to face the people in person.

Consider your actions carefully as you will have consequences.

I wish to remain anonymous. This vaccine has not been around long enough to show whether or not there are long term side effects. My kids are up to date on all other vaccinations, and when this one has been around for years, maybe then can it be required like the other vaccines. They just recently started requiring these other vaccinations. Why rush into this one? Give the COVID vaccine years of testing, like the others have had. Besides the variants are coming out faster than new vaccines can be created. So we will force our children to be test subjects for this ever changing virus and vaccine or not allowed to attend school? Doesn't sound morally or ethically right.

This vaccine is still under emergency use authorization and is experimental. Kids are extremely low risk to have serious complications from Covid-19, please do not mandate a new type of vaccine whose long term effects are not known. If this mandate goes through, I will be pulling my 4 kids from public schools and will have to home school. As a single mom, this is going to be extremely difficult but my children's health is more important.

Specific to the Student COVID 19 vaccine requirement that is being proposed.

11.

Are you Pro or Con on the proposal?

2. Con

I do not agree with the stance on making the vaccine a requirement for immunizations. The vaccine has proven ineffective at preventing the virus. This goes against other vaccines against "normal" childhood illnesses that have been effective and proven. There is not enough scientific data to support its use, therefore not enough data to justify the rights of parents to chose what is best for their children being removed. This would be no different than a requirement for the common flu (which, I may add, is not on the requirement list). Other forms of the flu and their related vaccines are proven and effective. The current status of the COVID 19 vaccines does not have this track record. The rights of the parents choice regarding vaccine status still stands and cannot be taken away. It violates the rights of parents to judge the well being of their own children which is NOT the responsibility of the state. Unless the health of the children are proven at risk, based on courts verdict in the matter of a specific parent, family, etc. the state has no stance in imposing such a requirement. If this passes, we will not be enrolling our children in any Washington state school district and will look for alternative options in our childrens education.

To the Technical Advisory Group:

I'm disappointed that efforts were not made to involve parents.... I am just hearing about this and would like to be informed about legislation that would directly effect the 13 year old I'm responsible for raising.

Thank you for providing the opportunity for public comments and inquiries regarding adding the Covid 19 vaccine to the regular schedule of vaccines for school aged children.

I was surprised to hear that this was being considered and hope that there will be a broad outreach effort to all the parents of WA to inform them of this development. Feedback from across the state is critical given the implications to the welfare of our children.

I have questions in several areas that I would like addressed by the TAG.

Safety

1. Has the DOH ever added a vaccine to the schedule that has been in use for under 6 months with no long term data?
2. Were any children harmed during the studies of these vaccines? Who is providing that data to TAG?
3. Who is tasked with investigating the record number of injuries and deaths reported in the VAERS system and factoring that into TAG work?
4. How do we justify mandating a novel vaccine with known increased risk of myocarditis, especially in young boys?

Risk for kids

1. Given the low risk of severe COVID 19 outcomes for kids (less than annual influenza), how does WA state DOH justify adding this novel vaccine to the schedule?

<https://data.cdc.gov/NCHS/Provisional-COVID-19-Deaths-by-Sex-and-Age/9bhg-hcku>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdata.cdc.gov%2FNCHS%2FProvisi>
COVID-19-Deaths-by-Sex-and-Age%2F9bhg-
hcku&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C2f60e34a72cc49ef088208d9cbf12af3%7C11d0e217

Effectiveness

1. Data now shows that current vaccines wane in efficacy to a great degree within 6 months. These vaccines do not seem to actually function like traditional vaccines that impart long time immunity and controlled transmission. Why are we considering mandating vaccines that are non-sterilizing?

2. Do we expect the definition of "fully vaccinated" will be routinely assessed to include additional boosters? How is this logical and appropriate with no long term studies, including no studies on mixing vaccines? Are boosters of older version vaccines even appropriate given new variants that evade older versions of vaccines?
3. Many states with higher vaccine rates are now experiencing higher rates of Covid, how does adding Covid vaccines to the schedule justify these lingering positive cases due to variants especially with regard to children and the long term side effects?

Liability

1. Are there actually any approved and licensed Comirnaty Vaccines available in WA state? If not, then how can we mandate the EUA BioNtech vaccines which are legally distinct?
2. Who is liable for injuries from mandated vaccines? If injuries are caused by EUA vaccines instead of Comirnaty then who is liable? The school system? The medical providers of the vaccines? Parents of injured children?

This is a beginning list of questions that I would like addressed as you move forward with your investigation.

I'm looking for answers and am no longer convinced that all the information that is necessary to ensure the health and safety of my child is being considered.

I believe that we are rushing ahead with policies that will potentially have long lasting harms on our children, just as earlier policies (lockdowns, school closures, etc) wreaked havoc on their wellbeing. Now we are facing the unintended consequences of another epidemic of unprecedented mental health issues. What other unintended consequences are we setting our kids up for due to rushed policies? That's what I want to find out before creating more harm. I hope that you will, too.

Thank you for your attention to these concerns and your work on this important subject that can potentially negatively effect the future generations in Washington State.

Please let me know that you received this email and provide a response.

Can you tell me of any FDA approved COVID vaccines in the USA? If not, how do you think you are going to legally get away with mandating an experimental drug which is clearly against the Nuremberg Code and unconstitutional! Our children are guinea pigs! Expect lawsuits and a mass exodus from public schools. Schools will lose funding for the next year!

Hello,

I am a mother, veteran, military spouse, firefighters wife, and mental health professional.

I can speak for all the people in my family, workplace, social group and church that a forced vaccination of this kind, placed upon innocent children and their parents, will change our voting habits substantially. We DO NOT approve, nor do we fail to recognize the political and financial nature of the vaccine hype. Science will verify the vaccine mandates, shaming, snitching and creating second class citizens (regardless how extreme their views may be) has done little in stopping the spread and done alot in dividing this country.

Please govern accordingly.

TAG considering adding the experimental COVID-19 vaccine to the list of required vaccines for entry into Washington schools.

11.

Are you Pro or Con on the proposal?

2. Con

Past vaccines have been fully vetted and proven safe for our children. They have taken years to perfect. If a vaccine had a death rate of more than 25 the plug was pulled. You are purposely ignoring the fact that this vaccine is still experimental in the eyes of the FDA. Children literally have a 99.9% survival rate to COVID-19. The variants are becoming weaker and weaker. We are going into our third year of mandates. Please note that by this time everyone has had an opportunity to make their choice on whether to get vaccinated or not. I highly recommend you do not make it a requirement our precious little children be forced to take this experimental "vaccine", thank you.

The Covid.... Is a form of the "cold".... Yes it is much stronger and is causing deaths much like the flu. It is a virus....it will continue to "mutate". This is not new knowledge.. a new "variant" is always going to come... as it has for many years. The vaccination should be pushed to get-yes- much like the flu shot... which is changing every year to... to whatever they think that variant is going to be too... however not mandated. It does not prevent Covid but helps when you do become sick with the virus. The vaccination is going to continue to change... It does not stop or prevent Covid. It helps with the symptoms of when you become ill. People still get it- less symptomatic ... therefore passing it. I agree the children should get it like the flu shot. I do not agree they should have it to go to school and be mandated for children to get an education.

Subject: 12 Jan 2022 Board of Health Meeting/ Regarding K-12 Vaccinations/ Item 11 @ 2:30 pm

External Email

Dear Board Members,

I implore you not to mandate Covid-19 vaccinations in order for students to attend K-12 School. Please familiarize yourself with CDC, WHO & NCBI studies concerning increased incidences of myocarditis and pericarditis after Covid -19 inoculations in children, before making this decision. Having experienced chest pains for several months after receiving my Pfizer Covid vaccinations, I can not in good conscience inoculate my children with these vaccines until legitimate vaccination trials occur, and they are not under the Emergency Use Authorization (EUA) Authority. By mandating this vaccine you will be driving a significant amount of students and families out of the Washington State education system; families that have happily complied with childhood vaccination protocols up until this point.

Please do not compound the psychological damage that has already been done to Washington State students with past school closures, and further prevent students from attending school. Please do not discriminate against students and dictate student health outcomes that should be left between Doctors and patients.

Your current K-12 Covid-19 Flowchart already discriminates against unvaccinated students that test NEGATIVE for Covid-19, but are contact-traced. It keeps unvaccinated students out of school for 7 to 10 days, despite having a NEGATIVE test, while their vaccinated peers are allowed to return to school with a NEGATIVE test. Please update your policies and flowchart with new CDC guidance, to prevent this discrimination. Equitable educational outcomes can not be achieved when students are denied school access based on their vaccination status. Please encourage all Washington State School Districts to offer the Washington State recommend "Test to Stay" program, which allows students that test Negative for Covid-19 to attend school. This program is not offered in our District.

Thank you for your time and careful consideration on this monumental decision.

Sincerely,

Michelle Wagner

Dear health board of wa

I am writing you as a concerned parent. I will keep it brief as I hope you have thousands of other parents emails to read.

To make mandatory a shot that is not even a vaccine (under cdc definition) but is a computer programmed code to initiate a spike protein and has none of the Covid virus in it and that has not undergone proper testing and is not stopping the spread of Covid 19 at all. Is absolutely unconstitutional and un lawful. We as U.S. citizens who are a free people in a free nation have a right to choose what goes into our bodies. Not anyone else at anytime. And then to make children put it in their bodies is just pure asinine. According to the wa doh website ZERO children have died from Covid!

Thank you for keeping our bodies our choice.

Subject: 1/12/2022 Washington State Board of Health Meeting

External Email

Dear Board Members,

I am writing to share my opposition of WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals.

I also oppose adding a C-19 vaxx to the WAC 246-105 schedule of required vaccines for children to attend schools. Currently there are no allowable contraindications even for those at risk for adverse reactions to the vaccine. This would prevent those that need a medical exemption from obtaining one. Additionally, the data on increased risk of myocarditis in young boys / men needs significantly more time to be assessed and addressed.

Mandates of new mRNA technology aren't wise on any level before we have enough data to make sound evidence based decisions. Mandating a product that does not stop transmission or that has proven excessive immune escape will not end the pandemic as we all would hope.

There has to be another way, but mandates and involuntary quarantine are not the answers.

Sincerely,
Dani Graham

Subject: 1/12/2022 Proposed Covid-19 Vaccine Meeting - Public Comment

External Email

To whom this may concern,

This email is to publicly express my position to remain having a choice when it comes to vaccinating my children, especially for Covid-19!

This is too new of a vaccine, children already have been proven to be at a extremely low risk, and again this vaccine DOES NOT prevent Covid-19 only lessens the symptoms.

I am expressing my position of being adamantly against this vaccine, especially when it is being brought up that it could become a mandate for students in educational settings and school age children in order to attend PUBLIC schools.

I vote NO on mandating Covid-19 vaccines in schools for children under the age of 18.

Respectfully,
Jaden Singh

Subject: Child vaccine mandate

External Email

Hello,

I'm writing you in regards to the possibility of the child's vaccine mandate. First off, what has this world come too? As a parent I brought my child into this world to make decisions on how I want them raised. What I want them to believe in. Not what they are forced to believe in. This is not the American way. You don't get to decide what is best for my child. That's my decision as a parent. I decide what is put in my child's body. We don't mandate actual important things like eating healthy, mandating security at schools to help with school shootings that's actually lethal to ALL kids! Those are things that you should be focusing on! We don't mandate the flu vaccine so how is this different? It's time to rethink.

External Email

To Whom It May Concern,

In regards to vaccination for school aged children against Covid-19 and variants, if this becomes a requirement my two children will be among many others who will be pulling their children from the Sedro-Woolley School District in favor of a homeschool option not run by Washington State. Not only will you be losing hundreds of children in your schools but also the funding that comes with them being enrolled.

My children are healthy, as is my family and I see no reason they need to be forced to vaccinate against a flu-like virus that cannot be eradicated by a "vaccine". Especially one that does not actually keep you from getting it nor spreading it. Flu-like virus will continue to mutate and create new strains to effectively "stay alive". We know this based on the hundreds of flu virus' and the multiple vaccines against them that we already deal with every year.

Covid-19, delta, and omicron are no different. There will be multiple new ones over the next few months if not years, just as there are consistently new flu variants.

By enforcing this as a requirement to attend school in our district, you will be forcing funding out of the district. If enough children unenroll, which I believe will happen based upon the number of parents against this, you are essentially firing staff due to lack of students and limiting the already low funds needed to run the district.

Think long and hard if this is honestly the right choice for Sedro-Woolley, or if this is another political move on the agenda. Listen to your parents and their wishes. You work for us, as does every other government agency. If you choose to ignore us, the consequences will be hard and swift.

Subject: advisory vote

External Email

Dear Advisory Board for the Washington State Board of Health:

I am writing to protest against recommending a vaccine for Covid for school aged children who attend school in Washington State. I am a 36-year veteran teacher. I am against imposing this vaccine on our children. I believe this to be a horrible abuse of power.

The available Covid vaccines are still of an experimental nature and have not been tested to prove their value and lack of long-term consequences. Never have we been forced to inject our children with a vaccine that has not undergone years of safety trials. Never have we forced children to receive a vaccine for a disease that primarily poses a risk for adults with comorbidities or are elderly.

School aged children have a 99.9998% survival rate from Covid. The vaccines do not provide protection against getting Covid as is seen by the number of "breakthrough" cases of those already vaccinated and boosted. Why require it?

The vaccines currently available are still only EUAs. Congress permitted the FDA to grant Experimental Use Authorization (EUAs) so that any American in a personal emergency can choose whether to explore potentially lifesaving treatments that have not gone through the full testing regime. In other words, the legal basis for EUAs is a matter of the individual right to access experimental treatments, not of government right to compel such treatments.

It is irresponsible to impose covid vaccines on children when there are side effects as grave as myocarditis already being reported and no long-term tests have been done. Parents must be able to make this decision for their children. You must honor their right to choose what is best. You must not marginalize parents' rights to take care of their children.

I live in Spokane, and I believe my side of the state is certainly underrepresented on this panel. Please look long and hard at what long term consequences of this kind of recommendation could have on our children, our school system and our communities.

Sincerely,

Barbara Miller

To the Washington State Board of Health.

At your 1/12/22 hearing I see you plan to discuss adding the experimental inoculations for Covid 19 to the requirements (as a vaccine that prevents disease) for all children attending school in Washington. I believe the BOH would be jumping the gun to approve this requirement. As we learn of so many break through instances of injected people experiencing cases of Covid, and passing it to others, we see that the inoculations are not as effective as we had hoped. We are learning more and more about the disadvantages of this inoculation not just for children, but for adults as well. It does not appear to prevent Covid 19 effectively. The CDC even has reported through VAERS that there have been over a million reports of adverse events. That is more adverse events than all other vaccines combined! <https://openvaers.com/covid-data/covid-reports?start=10>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fopenvaers.com%2Fcovid-data%2Fcovid-reports%3Fstart%3D10&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C8e708f7d00334247793008d9d09>

Adolescents and young adults appear to be susceptible to myocarditis and pericarditis as well. <https://www.cdc.gov/vaccines/covid-19/clinical-considerations/myocarditis.html>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fvaccines%2Fcovid-19%2Fclinical-considerations%2Fmyocarditis.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C8e708f7d0033424779>

I do not believe we have thoroughly tested the MRNA injections, and am alarmed that the huge drug companies profiting immensely from this hold no responsibility for adverse reactions to their own products. If my child had an adverse reaction to this drug, or problems arising in the future I could not hold Pfizer or Merck responsible! Will parents be suing the State of Washington and the BOH if you are responsible for mandating this drug? There is just too much we do not know about after effects.

In closing, my point is that this current inoculation does not prevent the spread of disease, does not protect the receiver from contracting the disease, and its effects have not been satisfactorily studied for adults, let alone children. I believe it could be dangerous to mandate all children receive the MRNA inoculation.

* Cases of myocarditis reported to the Vaccine Adverse Event Reporting System (VAERS)
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fvaers.hhs.gov%2Findex.html&data=...>
have occurred:

- * After mRNA COVID-19 vaccination (Pfizer-BioNTech or Moderna), especially in male adolescents and young adults
- * More often after the second dose
- * Usually within a week of vaccination

* Most patients with myocarditis or pericarditis who received care responded well to medicine and rest and felt better quickly.

* Patients can usually return to their normal daily activities after their symptoms improve. Those who have been diagnosed with myocarditis should consult with their cardiologist (heart doctor) about return to exercise or sports. More information will be shared as it becomes available.

Both myocarditis and pericarditis have the following symptoms:

- * Chest pain
- * Shortness of breath
- * Feelings of having a fast-beating, fluttering, or pounding heart

Seek medical care if you or your child have any of the specific or general symptoms of myocarditis or pericarditis especially if it's within a week after COVID-19 vaccination.

Please do not mandate these vaccines for children, let the decision be left up to families to do as they see fit for their child.

Thank you,

Alison Handsaker

Hello,

I heard that there will be discussions about making Covid 19 a mandate for public school children. This is a huge overreach of government.

I pay taxes for my child to get an education; not to be a scientific medical test subject. These vaccines do not prevent the spread or infection of Covid and the long term damaging effects are unknown (cdc).

We have rights as parents over our own bodies and our children's bodies. Forced mandates are about power and not health; please do not rush into a decision. Let parents make decisions for their children based off of education, family doctor care and medical history. It is not ethical or within constitutional guidelines to force anything on parents or children. Focus on education not politics. Know your place.

Thank you for your time,
Heather H.

Subject: Against potential COVID-19 Vaccine mandate for kids 5+

External Email

Dear Department of Health and To Whom It May Concern:

>>

>> The potential COVID-19 vaccine mandate for kids 5+ in order to attend public school is extremely concerning to me. I am totally against forcing our children to take such a new vaccine, especially considering the experimental nature of its creation. As sovereign citizens of a free country, it is illegal, immoral and totally unconstitutional to force any of us, especially our most vulnerable, to inject something into our bodies.

>>

>> I have two grandchildren that currently attend a local public school. If this mandate goes through, they will no longer be attending. There are multiple other parents and grandparents who feel and plan on doing the same.

>>

>> Thank you for being willing to take public opinions into account when making this decision. I look forward to hearing the outcome of your January 12 meeting.

>>

>> Sincerely,

>>

>> Martha L. Lauber

Subject: Adding COVID to list of required vaccines is a very bad idea

External Email

Washington State Board of Health:

I am writing to you as a concerned Washington state resident and parent with regards to the possibility of the Washington State BOH approving adding the COVID vaccine to the list of required vaccines in order for children to attend Washington State schools/daycares.

The very thought of adding this to the list of vaccines required to attend schools/daycares within the state at this point is beyond careless. The safety profile of this particular vaccine is not known and it cannot be equated to the MMR vaccine that is required for students to receive. As Dr. Cody Meisner MD, one of the pediatricians who sits on the VBRPAC panel said, "This is quite different from the MMR vaccine," referring to the measles, mumps, and rubella vaccine given to all children in the U.S. "We know that vaccine is safe. We have tested that vaccine for decades. And we know, we have a very good sense, of what the adverse events are. We do not have that with this particular messenger RNA vaccine." Furthermore the VBRPAC was also hesitant to approve this vaccine for children 5-12 years because they knew exactly what their approvals would bring; mandates to attend school and participate in society. By adding this to the list of required vaccines, you're doing exactly what they were afraid of. How careless would it be to add this vaccine as a requirement only to find out 10 years down the road it had significant impacts on children?

As of late there are many studies out there that talk about the effectiveness of this vaccine and the numbers don't look good - the vaccine isn't effective long term. There are studies out Denmark and Ontario that report negative vaccine effectiveness to specifically Omicron. Parents aren't going to give their children "boosters" every 5-6 months to keep their immunity from waning. That's straight up cruel.

* <https://www.medrxiv.org/content/10.1101/2021.12.30.21268565v1>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F10.1101%2F2021.12.30.21268565v1>>

* <https://covid19danmark.dk/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcovid19danmark.dk%2F&data=04>>

If you want to look at how popular it would be with the public to add this vaccine to the list of required vaccines, you should look no further than rates by which parents are vaccinating their kids. I heard Chris Rykdahl on FoxQ13 talking about the rates and 25% of kids 5-11 have been vaccinated and around 35% of kids 12-15 have been vaccinated. To me that says a vast majority of parents aren't interested in their children being a test

subject and by adding this to the list, you would be telling 65-75% of parents to do something they don't want to do; that my public servants is not public support, that is dictatorship on your part.

All the vaccines that are currently on the requirement list are childhood diseases and impact children greatly. COVID does not.

I implore you to do the right thing, table this discussion 5-10 years down the road when more safety data is available. If/when it is decided that these vaccines are safe long term then continue the conversation then. Doing it right now would be extremely reckless and many children will become injured from the vaccine itself.

Sincerely,

Betsie Elliott

Subject: Against COVID-19 as a school vaccination requirement

External Email

Hello,

I am against COVID-19 as a school vaccination requirement. I urge you to not consider this anymore.

Please reminded that:

- Children are at extremely low risk for Covid
- The vaccines are still only EUA (emergency use authorized)
- There are no long-term studies to document any history of safety
- Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore, the vaccine does not stop the spread of the disease

These are HUGE red flags. To ignore them is irresponsible on your part.

Please take this issue off the table.

Respectfully,

Michelle Katsel

My question is why if the vaccine is voluntary, why would you make it mandatory for everyone. I know people with blood clotting issues and religious exemptions. Individuals need to be treated according to these things. So are you going to make any exceptions?

To whom it may concern,

I believe requiring covid 19 vaccines will have devastating consequences. Not all people/children are medically able to receive a vaccine. Not all people or children's religions agree with vaccines. This will interfere with freedom of personal choice. It is to my knowledge that public schools may not discriminate anyone for any reason and this requirement would definitely discriminate against many people and children.

Thank you,
Theresia Gregersen

To Whom It May Concern,

In regards to vaccination for school aged children against Covid-19 and variants, if this becomes a requirement my two children will be among many others who will be pulling their children from the Sedro-Woolley School District in favor of a homeschool option not run by Washington State. Not only will you be losing hundreds of children in your schools but also the funding that comes with them being enrolled.

My children are healthy, as is my family and I see no reason they need to be forced to vaccinate against a flu-like virus that cannot be eradicated by a "vaccine". Especially one that does not actually keep you from getting it nor spreading it. Flu-like virus' will continue to mutate and create new strains to effectively "stay alive". We know this based on the hundreds of flu virus' and the multiple vaccines against them that we already deal with every year.

Covid-19, delta, and omicron are no different. There will be multiple new ones over the next few months if not years, just as there are consistently new flu variants.

By enforcing this as a requirement to attend school in our district, you will be forcing funding out of the district. If enough children unenroll, which I believe will happen based

upon the number of parents against this, you are essentially firing staff due to lack of students and limiting the already low funds needed to run the district.

Think long and hard if this is honestly the right choice for Sedro-Woolley, or if this is another political move on the agenda. Listen to your parents and their wishes. You work for us, as does every other government agency. If you choose to ignore us, the consequences will be hard and swift.

Subject: AGAINST recommendation for Covid-19 being a requirement for school aged children

External Email

I am against this recommendation. I am absolutely horrified that the health department is talking about making this recommendation for an illness that does less harm to our school aged children than the seasonal Flu has in years past, according to the CDC.

The decisions regarding children and Covid 19 are not putting their safety first. The decision to vaccinate MUST outweigh the risks of the illness. In the case of COVID-19, the risks of illness absolutely are NOT greater than the risk of vaccine.

We need leaders to step up. If not you, then who?

I am writing to urge you to stand against mandating the covid-19 vaccine for children in any capacity, but specifically to attend school.

It is clear that there are still a lot of questions about the efficacy and safety of the covid-19 vaccine in general, and clearly in children.

We are seeing evidence that transmission even when fully vaccinated does not stop the transmission of covid-19, this was exemplified in the recent cruise ship outbreaks where passengers and crew were all vaccinated.

There are no covid-19 vaccines that have been fully FDA approved available in the United States.

There is clear data showing that the covid-19 vaccines can cause harm in children, the CDC website states:

What You Need to Know

* Cases of myocarditis reported to the Vaccine Adverse Event Reporting System (VAERS)
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fvaers.hhs.gov%2Findex.html&data=04&nav=VAERS%2Findex.html>>
have occurred:

* After mRNA COVID-19 vaccination (Pfizer-BioNTech or Moderna), especially in male adolescents and young adults

* More often after the second dose

- * Usually within a week of vaccination

- * Most patients with myocarditis or pericarditis who received care responded well to medicine and rest and felt better quickly.

- * Patients can usually return to their normal daily activities after their symptoms improve. Those who have been diagnosed with myocarditis should consult with their cardiologist (heart doctor) about return to exercise or sports. More information will be shared as it becomes available.

Both myocarditis and pericarditis have the following symptoms:

- * Chest pain

- * Shortness of breath

- * Feelings of having a fast-beating, fluttering, or pounding heart

Seek medical care if you or your child have any of the specific or general symptoms of myocarditis or pericarditis especially if it's within a week after COVID-19 vaccination.

Please do not mandate these vaccines for children, let the decision be left up to families to do as they see fit for their child.

Thank you,

Alison Handsaker

Hello Board Members,

Having researched information on the Covid-19 virus and the lack of safety data as shown in Pfizer's own trial's data and the CDC's own VAERS reporting system of vaccine injury, I am absolutely against the State of Washington's and it's Health Department's adopting the Covid-19 virus and Covid-19 experimental vaccines into WAC code.

* THERE ARE A NUMBER OF PROVEN TREATMENTS FOR COVID-19.

* The experimental injections have not prevented breakthroughs (vaccine failure) and have a high rate of harmful side-effects as documented in the CDC's VAERS database .

As a mother and a grandmother and a registered voter in Washington State, I DEMAND that you DO NOT incorporate Covid-19 or Covid vaccines into WAC code.

Subject: Against any and all Mandates

External Email

To whom it may concern and who is supposed to protect us and our children. I'm deeply grieved by the proposed mandates. It's absolutely sickening that this is even happening. Children should not be forced to get a vaccine that is not even fully FDA approved for them in order to attend school. Not only that, families should not be sent to internment camps if they refuse a medical decision for their families. If this goes through, mine and many other families will not stay in Washington state to be apart of this nightmare.

Subject: Board of health meeting Jan. 12th

External Email

I am Amy Jackson, Certified Health Coach in Kitsap County. I want to plainly state that the covid vaccine is a failure, and everyone should see that by now. There's no lack of quality information and data to support the fact that the covid jab does not prevent anyone from getting sick or spreading the virus. So there is no need to force, mandate or require this shot for any reason.

If your board recommends this jab be required for children, you will be going against the Nuremburg Code, "...should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, over-reaching, or other ulterior form of constraint or coercion". Preventing a child from public education because of denial of an experimental medication is illegal. The covid vaccine is not FDA approved, the approved "Comirnaty" is not available for use in the US. The information put out by FDA is very misleading, but in fact the EUA Pfizer vaccine is still being used.

In closing, any requirements for any population to receive this jab is unconstitutional and illegal and will open you and many others up to severe lawsuits, not to mention public outrage. We are nearing the end of this pandemic, we all know deaths are way down and a majority of the people have natural immunity.

Think logically and critically, do not recommend covid vaccines be required for anything.

To the Washington Board of Health Tag Members:

I am a parent to two active and healthy boys ages 10 and 12. I understand your team is working to decide if you should implement a mandatory Covid vaccine as part of school vaccine requirements. I listened in on your meeting on December 29th and thank you for that opportunity. I am writing today to share my thoughts and feelings regarding this.

It is my firm belief that while a Covid vaccine may be a wonderful choice in the healthcare of some individuals, it is not an appropriate option for all children, especially those who are otherwise considered typical and healthy. The overwhelming experience of most children who have tested positive with Covid is a minor cold-like illness and avoiding this is absolutely not worth the risk of the reported adverse reactions. We are currently experiencing a record number of positive Covid cases in both unvaccinated and vaccinated individuals. This vaccine appears to be leaky; not at all the breakthrough in fighting this pandemic that we hoped it would be. In the last few months there has been a campaign to get booster shots as we have learned that the effectiveness may only last 4 to 6 months. Do we really expect our children to endure this for a vaccine that doesn't

prevent getting sick but only slows the transmission? It takes three people to hold down my son to get a simple blood draw. My co-workers 5 year old daughter got hives a few days before getting her first Covid vaccine. The stress this puts on children who already have wonderfully functioning immune systems is beyond necessary. We've seen more adverse reactions for this vaccine than any other. Do we really want that risk for every child?

Some in the scientific community argue that this leaky vaccine actually may allow for resistant strains of the virus to infect more people. If children really are the "reservoir of this disease" as Tom said in the meeting, then wouldn't we be unnecessarily accelerating the disease even further by vaccinating a population that almost entirely wouldn't need it? How long should we expect to boost ourselves and in effect prolong the waves of variants?

Mandates make parents feel that the Board does not trust them to make responsible choices in protecting the health and safety of our own children. Furthermore, mandating a vaccine that some parents do not yet feel safe giving their children further pushes us in a direction of not wanting to give it to them AND making us question our trust in YOU. My husband and I love our school district and it's teachers and we hope to be able to continue our children's education there. Please do not make us choose to educate them at home because of a mandate for a vaccine that does not feel safe to us yet. Can we please continue to offer vaccines to those that feel it is the best solution in their healthcare regimen and not make this a universal requirement? Parents know about this vaccine. It is advocated for on television, the radio, billboards, social media and news outlets. It can be administered at any grocery store pharmacy, doctor office, or mass vaccination clinic. Getting them isn't the obstacle. Finding the time isn't the obstacle. Furthermore, access for families that DO feel comfortable is there. Please allow more time for parents to feel comfortable. Not everyone feels safe at the same rate as others. While a year may seem like plenty of time for some, it isn't for others.

Communicating to you about this is a very big deal to me. I have never before felt a need to write any leadership in our state over an issue. In the case of this mandate, I cannot sit idly by and not say how not only I but others feel as well. As our state's healthcare leaders, I urge you to trust and allow parents to continue to evaluate their own children's need for this vaccine. I appreciate your consideration and feel obligated to say, whatever you decide, this vaccine at this time is not appropriate for my children.

Respectfully,

Christine Packard

Subject: Against potential COVID-19 Vaccine mandate for kids 5+

External Email

Dear Department of Health and To Whom It May Concern:

The potential COVID-19 vaccine mandate for kids 5+ in order to attend public school is extremely concerning to me. I am totally against forcing our children to take such a new vaccine, especially considering the experimental nature of its creation. As sovereign citizens of a free country, it is illegal, immoral and totally unconstitutional to force any of us, especially our most vulnerable, to inject something into our bodies.

I have two grandchildren that currently attend a local public school. If this mandate goes through, they will no longer be attending. There are multiple other parents and grandparents who feel and plan on doing the same.

Thank you for being willing to take public opinions into account when making this decision. I look forward to hearing the outcome of your January 12 meeting.

Sincerely,

Martha L. Lauber

Subject: Caitlin-Listen What the FDA Advisory Board Says About Mandating COVID Vaccine for Children

External Email

Hello Caitlin,

I am writing as a concerned parent of two children in the Bellevue School District. Before you vote on whether or not to make this vaccine a requirement for school, I am asking you to listen to this 1- hour compilation of critical questions brought up by the FDA Advisory Board when deciding to approve Pfizer's COVID vaccine for 5-11 year old's. In case you are unable to listen, I have provided key points from the meeting below. Please note myself and thousands of other parents will be unenrolling our children if this is required to attend school. Before you vote - please make sure you are informed on the benefits and risks to our children.

Key Points from the FDA Advisory Board Meeting - Oct 26th:

***Link to 1-hour highlights video here.

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.youtube.com%2Fwatch%3Fv=qdhoBVrM&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C2d13c75093e044811dc808d9d14bdd7d%7>>

- * Advisors do not recommend healthy children get this vaccine
- * Advisors do not recommend this vaccine be required to attend school
- * Doctors do not expect the vaccine to prevent infection
- * They have no data or expectations it will prevent transmission
- * Based on current data and modeling, the risks of the vaccine to children outweigh the benefits
- * Children's vaccine is based on the alpha variant and has little to no protection against Delta or Omnicron
- * Children's vaccine includes Tris (hydroxymethyl)aminomethane), a stabilizing agent, however the vaccines given during the clinical trials did not include this new ingredient so no one knows the potential risks to our children.

- * Advisors very concerned about increase in myocarditis and pericarditis especially in young boys
- * Approval was given based on the vaccine being available to immune compromised children

I will leave you with a quote from Dr. Eric Rubin

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.hsph.harvard.edu%2Feric-rubin%2F&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C2d13c75093e044811dc808d9d14bdd7d%70>>
, an adjunct professor of immunology and infectious diseases at Harvard University and editor-in-chief of the New England Journal of Medicine. Referring to approving the Pfizer vaccine for 5-11 year olds, "We'll never know how safe it is until we start using it"

Thank you in advance,

LaRena Archer

To Whom It May Concern:

It is my understanding that the State Board of Health will be discussing immunization criteria and childcare/school entry.

I would like to caution the board in making the COVID-19 vaccine mandatory for childcare and schools. These vaccines are still in their infancy and mid to long term affects are not known for everyone, but what a high risk it could potentially be for children. Long term affects will not be known for some time. Can you imagine if there are issues that arise 10-20 years later and most, if not all children were affected? Traditionally, vaccines have had to go through numerous studies and meet many standards before ever being approved for the general public. Not this one! It is still in emergency use and should not be mandatory. If a parent wants their child to have the COVID-19 vaccination, then let them do that. If a parent has reservations and they do not feel comfortable giving that vaccine to their child, they should have that choice. Making this mandatory will require some to go against their conscience and science. This would be going against their rights to make the best health decisions for their children.

What if the COVID-19 vaccine causes the next generation to suffer all because we didn't do our due diligence, but rushed/forced a vaccine without proper research and time? What a shame that would be.

Your decisions could affect millions of children and their futures. You have a responsibility to be prudent, thorough, and accurate. Please leave this vaccine choice to parents.

This was discussed in the Agenda for Nov 10th meeting. It was suggested that the 5 "emergency rules" adopt a 6th to make it move from emergency status to a permanent rule. This WAC and its content cannot be found anywhere on your site. I'd like a copy of the Emergency Rules and this WAC or precisely where to find it. Adopting any permanent rule for a disease with a 99.9% survival rate and that is NO LONGER AN EMERGENCY is unacceptable. The SOE is unmerited and should have been lifted last year. In any case I'd like up to date info on this WAC as well as its relativity to CR-103E. I'd also like to know if this permanent rule is affective of WACs 246-100 - 040, 045, 070, 100,105? Also I'd like a copy of the "rules" regarding Inslee's SOE. I'd appreciate this info ASAP.

Thank you for your timely response
Denise Anderson

Hello,

I heard that there will be discussions about making Covid 19 a mandate for public school children. This is a huge overreach of government.

I pay taxes for my child to get an education; not to be a scientific medical test subject. These vaccines do not prevent the spread or infection of Covid and the long term damaging effects are unknown (cdc).

We have rights as parents over our own bodies and our children's bodies. Forced mandates are about power and not health; please do not rush into a decision. Let parents make decisions for their children based off of education, family doctor care and medical history. It is not ethical or within constitutional guidelines to force anything on parents or children. Focus on education not politics. Know your place.

Thank you for your time,
Heather H.

I am writing to express my deep-felt contempt and disagreement to the proposal by WSOBH to recommend the Covid vaccine requirement to school-aged children on January 12.

WSOBH should not require any vaccine, specifically an Emergency Use Authorization (EUA) vaccine to be administered to children as a condition of accessing public education that is paid for by the taxpayers. Additionally, WSOBH should not require COVID testing as an alternative method to accessing public education. The data is clear and COVID has a 99.8% survivability rate and therefore is not an emergency, a pandemic, or a threat to U.S. children. On the contrary, the massive numbers of adverse events being reported to the Vaccine Adverse Event Reporting System (VAERS) makes it clear that this vaccine should absolutely never be required for any reason. The vaccine is widely available and at a low or no-cost to all who seek it. Therefore, it should not be a requirement for our children to access public education.

Once the vaccine (which it is not a true vaccine) is added to the childhood immunization schedule, the National Childhood Vaccine Injury Act of 1986 (H.R. 5546) takes effect on the vaccine. This act "Provides that no vaccine manufacturer shall be liable in a civil action for damages arising from a vaccine-related injury or death : (1) resulting from unavoidable side effects; or (2) solely due to the manufacturer's failure to provide direct warnings. Provides that a manufacturer may be held liable where (1) such manufacturer engaged in the fraudulent or intentional withholding of information; or (2) such manufacturer failed to exercise due care." The manufacturers are certainly intentionally withholding safety information, as evidenced by their request to take over 50 years to release the safety data gathered prior to releasing this vaccine. Also, the amount of blatant censorship around this vaccine is proof that the information is not being given to citizens, specifically PARENTS, so that they can make an informed decision on whether or not to take the vaccine.

Vaccine manufacturers cannot market this vaccine to the public unless they have the liability immunity that is provided by H.R. 5546, which is only put in place once the vaccine has been placed on the immunization schedule. Pfizer tested the vaccine on only 1300 children. One child, Maddy Gary, had extreme reactions and is now in a wheelchair for life and needs a feeding tube to eat. Pfizer officially reported her injury to the FDA as a stomachache. This is absolutely unacceptable.

The sole reason that the manufacturers want to add this vaccine to the childhood immunization schedule is to maintain their ZERO LIABILITY safety net that they currently enjoy via the EUA status. Once EUA status goes away, their liability protection goes away UNLESS it is added to the childhood schedule. This is their true motive for pushing the addition to the immunization schedule and is completely evil and despicable. I hope you will not be complicit in committing this grievous attack on our precious children, who are the future of not only the state of Washington, but humanity.

This is absolutely wrong, unjust, immoral and should be discarded immediately. In the United States, every citizen (this includes CHILDREN) has certain unalienable rights given to us by OUR CREATOR, and NO ENTITY has the power to deprive us of these rights. These rights absolutely include sovereignty over our bodies and completely protects us from unwanted medical procedures. The American people wholeheartedly REJECT medical tyranny and WSBOH and all other federal, state, and local government entities must cease and desist this gross violation of our God-given human rights. To make this vaccine a requirement for anyone, but specifically our children, is nothing less than evil and should not be allowed to pass. We will not sacrifice our children to pharmaceutical companies under the guise of public health.

Michelle, Melanie, Christy, Stuart, Samantha, Kaitlyn, Caitlin, Lindsay, Tracy, Hannah, Kelie, Nathaniel - are any of you parents? If you are, have any of you done any research outside of the official narrative? Health professionals all over the country are speaking out against this vaccine but are being censored. The public is waking up to the truth, and we will not stand for the government attempting to sacrifice our children any longer. I encourage you all to read the extensive work for Robert Kennedy, Jr. at the Children's Health Network who tirelessly fights for the rights of our children. Please look within your hearts and ask yourself if making this recommendation is the morally right thing to do.

Sincerely,

Jason Aunspaugh (a concerned FREE AMERICAN HUMAN BEING)

I am writing to urge you to stand against mandating the covid-19 vaccine for children in any capacity, but specifically to attend school.

It is clear that there are still a lot of questions about the efficacy and safety of the covid-19 vaccine in general, and clearly in children.

We are seeing evidence that transmission even when fully vaccinated does not stop the transmission of covid-19, this was exemplified in the recent cruise ship outbreaks where passengers and crew were all vaccinated.

There are no covid-19 vaccines that have been fully FDA approved available in the United States.

There is clear data showing that the covid-19 vaccines can cause harm in children, the CDC website states:

What You Need to Know

- * Cases of myocarditis reported to the Vaccine Adverse Event Reporting System (VAERS) 

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fvaers.hhs.gov%2Findex.html&data=...>>
have occurred:

- * After mRNA COVID-19 vaccination (Pfizer-BioNTech or Moderna), especially in male adolescents and young adults

- * More often after the second dose

- * Usually within a week of vaccination

- * Most patients with myocarditis or pericarditis who received care responded well to medicine and rest and felt better quickly.

- * Patients can usually return to their normal daily activities after their symptoms improve. Those who have been diagnosed with myocarditis should consult with their cardiologist (heart doctor) about return to exercise or sports. More information will be shared as it becomes available.

Both myocarditis and pericarditis have the following symptoms:

- * Chest pain

- * Shortness of breath

- * Feelings of having a fast-beating, fluttering, or pounding heart

Seek medical care if you or your child have any of the specific or general symptoms of myocarditis or pericarditis especially if it's within a week after COVID-19 vaccination.

Please do not mandate these vaccines for children, let the decision be left up to families to do as they see fit for their child.

Thank you,

Alison Handsaker

I am writing this to ask you to please not mandate the Covid-19 vaccinations for school-age children, up through high school. It is clear that anyone, vaccinated or not, can catch and spread Covid-19. Because of this, it should be up to parents to decide if their children will be vaccinated or not. I also have extreme concern about the occurrence of myocardial issues, especially in teenage boys/young men. There is health risk whether you get the vaccinations or not. Please let parents and children maintain their current rights to decide what medical treatments they do or do not get.

Thank you,

Melaine Minson

Good morning. I'm a mother of twins in the district of UP in Washington State. I'm not on favor for the mandate on kids vaccine . We already now this vaccine do not affect kids . Please do not make the same mistake the gobernador make on mandated vaccine on workers and people . Also as parent I will like to know why you mandate something and ask for a sign waiver on the same time without knowing the ingredients of this vaccine . My vote is no to the vaccine mandate.

Subject: Agenda for Jan Meeting

External Email

Hello,

I understand you will be talking about 2 very important topics at your Jan meeting.

1. Mandatory vaccines for school children: Mandatory anything goes against the rights of every citizen of the US. But this is particularly egregious as there is a lot of information (despite censorship) about the possible ill effects of this vaccine - not just for children but for everyone, To force children to take an experimental drug and especially one that has no proven track record as to safety is criminal. As members of the health department you should protect - at all costs - our children and NOT let them be the subjects of an procedure for which you do not know the outcomes or health risks derived from such as this gene therapy experimental "vaccine".

Also, it is now well known that most of the people getting sick from and spreading the "variants" are the vaccinated. Therefore it baffles me as to why you would force this on our children. Since you probably do not believe me - please look up the articles about the many cruise ships that are 100% vaccinated and suffering from major outbreaks of Covid. (<https://www.wkyc.com/article/news/nation-world/covid-19-cases-cut-cruise-short-cancel-other-sailings/507-71de396b-4b64-42bf-ac6d-9509a2083113>)

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.wkyc.com%2Farticle%2Fnews%2Fworld%2Fcovid-19-cases-cut-cruise-short-cancel-other-sailings%2F507-71de396b-4b64-42bf-ac6d-9509a2083113&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cb84531e3ed90437df68c08d9d15b8714%7C>>
)

Children are not getting being overly effected by Covid so why would we force vaccination on them. Vaccines are linked to many childhood issues like Autism, ADHD and other problems. Why take a chance we will damage children for a disease that is not overly dangerous for them.

PLEASE DO NOT MANDATE COVID "VACCINES" FOR SCHOOL CHILDREN.

2. Involuntary Quarantine: This practice is not only "Orwellian" it is down right scary. Thomas Jefferson told us that when the government starts taking away your rights in the name of protecting us- that basically - we are in deep trouble. Our nation is in deep trouble if you start to violate individual rights through involuntary quarantine. To remove people from their homes and put them in concentration camps is very reminiscent of Germany and Hitler. Even if it starts out as a "refuge" for homeless or for whatever "good" reasons you may have - it will be only a baby step to start quarantining normal people who may disagree with the ANY current thought.

Please do not go down that road. It will end well for NO ONE.

Besides - since it is the vaccinated who are getting sick - how will this really help anything? Please do not ignore the "facts". Media outlets are censoring valid information about Covid and the vaccine. .

People must make their own way in this world. People do not always make the best decisions for themselves or for others but that is the way of life. It is our life and the glory of that is that we get to succeed or make mistakes - and we get to pay whatever consequences comes with the decisions we make. That is called FREEDOM and it is the most precious of all things. Do not take our freedoms away. Authoritarian, socialists type government experiments have all ended the same - grandeur for the elites but desolation and poverty for the citizens. Again, for the sake of humanity, do not go down this road.

Regards,

Ronne

Medical Technologist (MT, ASCP)

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets vaccine, one group gets placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccine adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time.
Michelle in Bellingham, WA

Dear Department of Health and To Whom It May Concern:

>> The potential COVID-19 vaccine mandate for kids 5+ in order to attend public school is extremely concerning to me. I am totally against forcing our children to take such a new vaccine, especially considering the experimental nature of its creation. As sovereign citizens of a free country, it is illegal, immoral and totally unconstitutional to force any of us, especially our most vulnerable, to inject something into our bodies.

>> I have two grandchildren that currently attend a local public school. If this mandate goes through, they will no longer be attending. There are multiple other parents and grandparents who feel and plan on doing the same.

>> Thank you for being willing to take public opinions into account when making this decision. I look forward to hearing the outcome of your January 12 meeting.

>> Sincerely,

>> Martha L. Lauber

As a citizen of WA state, I am commenting on what is on the agenda:

PROPOSED POLICIES: • Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination.

Nuremburg Code!!

Covid-19 injections as part of school immunization requirements using WAC 246-105.

I vehemently stand against these issues. You have no right to police my children or my family members. My child will NOT be vaccinated! I will pull him out of school, I will go live in a hole if need be!

Standing Firm,

Marianne McGuire

External Email

I am writing this to ask you to please not mandate the Covid-19 vaccinations for school-age children, up through high school. It is clear that anyone, vaccinated or not, can catch and spread Covid-19. Because of this, it should be up to parents to decide if their children will be vaccinated or not. I also have extreme concern about the occurrence of myocardial issues, especially in teenage boys/young men. There is health risk whether you get the vaccinations or not. Please let parents and children maintain their current rights to decide what medical treatments they do or do not get.

Thank you,

Melaine Minson

Subject: FW: Board of Health to discuss requiring Covid jab for school attendance

External Email

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets vaccine, one group gets placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccine adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time.

Subject: Canada COVID Care Alliance Analysis Shows Pfizer's Vaccination for Kids is 'ALL RISK' and No Benefit – Pfizer Acknowledges it Will Cause Myocarditis in Children

External Email

To: WA State Board of Health

Please ensure you are fully aware of the following information before making your decision on Covid vaccines for children.

Thank you.

Russ Hamerly

Seattle

Canada COVID Care Alliance Analysis Shows Pfizer's Vaccination for Kids is 'ALL RISK' and No Benefit – Pfizer Acknowledges it Will Cause Myocarditis in Children

The Canadian COVID Care Alliance consists of over 500 independent Canadian doctors, scientists, and health care practitioners who are committed to providing quality, balanced, evidence-based information to the Canadian public about COVID-19 so that hospitalizations can be reduced, lives saved, and our country safely restored to normal as quickly as possible.

According to its website

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.canadiancovidcarealliance.org>

, the Pfizer 6 month data shows that Pfizer's COVID-19 vaccines cause more illness than they prevent. Also, an overview of the Pfizer trial flaws in both design and execution.

Now, let's talk first about the 12 to 15-year-old adolescent trial. According to page 24 of their in-depth analysis, the vaccination for adolescents is really all risk and no benefit. Adolescence are at statistically zero risk of death from COVID-19 and very low risk of severe illness. Among the vaccinated kids in the trial, there's at least one serious adverse event.

For the adolescents, inoculation is really all risk and no benefit. The trial was severely underpowered. As a study, this small will not reliably show up risk for adverse events. There was an inoculated group of 1,005 and zero of them tested positive for COVID-19 and a placebo group of 978, and 18 of them tested positive for COVID-19.

So Pfizer claimed these were great results, but since adolescence are at statistically zero risk of death from COVID-19 and very low risk of severe illness. In fact, the New York Times said in October of this year that for children without a serious medical condition, the danger of severe COVID is so low that it's difficult to quantify.

The inoculation is of very little benefit to them, but it does present a very real risk of adverse events. However, the adolescent Pfizer study wasn't actually designed to find adverse events because a serious adverse event, including death that occurred even in 1 out of 800 kids might not even show up in a sample size of 1,005 people. But in this case, the danger signal did come through. Among the inoculated adolescents, there was at least one serious adverse event, and her name was Maddie De Garay.

<<https://www.thegatewaypundit.com/wp-content/uploads/Screen-Shot-2021-12-31-at-11.22.54-AM.jpg>>

Maddie de Garay is a 12-year-old trial participant who developed a serious reaction after her second dose of the inoculation and was hospitalized within 24 hours. She developed gastroparesis, nausea, vomiting, erratic blood pressure, memory loss, brain fog, headaches, dizziness, fainting seizures, verbal and motor ticks, menstrual cycle issues, lost feeling from the waist down, lost bowel and bladder control, and she had to have a feeding tube because she lost her ability to eat.

She's been hospitalized many times since then, and for the past 10 months she's been wheelchair-bound and fed via a tube. In their report to the FDA, Pfizer described her injuries as functional abdominal pain, and there's a link to the FDA report (page 30)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F14854>>. This is unconscionable and certainly opens up the possibility that other adverse events have been suppressed or misrepresented.

In terms of the 5 to 11-year-old Pfizer COVID-19 vaccination trial, the Canadian COVID Care Alliance said the vaccination is an unacceptable risk to their health. Even Pfizer acknowledges the vaccine will cause myocarditis in children.

<<https://www.thegatewaypundit.com/wp-content/uploads/Screen-Shot-2021-12-31-at-11.51.59-AM.jpg>>

In terms of 5 to 11-year-olds, the inoculation is an unacceptable risk to their health. In this table, Pfizer using predictive modeling, acknowledges that the inoculations will cause myocarditis in children.

See the columns in red, but they optimistically claim that there will be zero deaths from

this myocarditis. See the column in yellow, it's speculation on their part, the low-level evidence of a predictive model. But let's just say it's true and there will be no deaths. There's still no justification for giving children myocarditis. First do no harm should apply here. But the government has now normalized the expectation of heart problems from these inoculations among children to the point that sick kids are actually putting out brochures on how to deal with them.

The way to deal with them is don't give them products that will harm their hearts because myocarditis is actually very serious. It's damaged to the heart, and it's not reversible.

So while Pfizer may be correct in that their inoculations might not cause any immediate deaths, we maintain that a one in five chance of dying in six and a half years is unequivocally, an unacceptable risk for children.

But the FDA says it is an acceptable risk for children. They have actually abandoned the first do no harm principle. Remember, medical interventions are supposed to be proven safe before they're rolled out in the population. Yet Dr. Eric Rubin, one of the 18 members of the FDA advisory panel who voted to approve the inoculations for children from five to eleven, actually said the opposite and suggested that a population level rollout was an appropriate way to test for adverse events.

A German news site actually put together a list of over 75 known cases of athletes collapsing and even dying in the last five months. These incidents are supposed to be rare and we can't ignore that they no longer are.

SHORT VIDEO: <https://www.youtube.com/watch?v=KDHwhrOh0Eo>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.youtube.com%2Fwatch%3F>

Remember when the whole world went into panic mode and shut down over a few fake videos of Chinese people collapsing, but crickets over dozens and dozens of real instances of people most specifically athletes collapsing.

Pfizer also admits in their report that their studies weren't powered to find rare side effects because their long-term immune response efficacy and safety data is limited.

In addition to admitting that their inoculations can cause myocarditis Pfizer also admits right in their report that their long-term immune response efficacy and safety data is limited and that their studies weren't powered to find rare side effects.

And that's true, as the inoculation was only tested on about 1500 kids, how many parents know that? How many would take their kids to get this shot if they were informed of this? The law of informed consent says that they should be, but it's not happening.

The British Medical Journal, one of the oldest and most respected medical journals in the world, has actually called Pfizer out for serious issues in the execution of their trials. On November 2, 2021, they released an article about their investigation into Ventavia <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.bmj.com%2Fcontent%2F37>, which was one of the research companies that Pfizer hired to conduct the trials.

The Whistleblower is a regional director who actually reported her company to the FDA for falsifying data for unblinding participants, for not following up and testing participants who reported symptoms and for mislabeling specimens. Several other employees backed up her account. Despite all this, neither Pfizer nor the FDA ever audited or investigated the research company. Pfizer never disclosed the problems in its emergency use authorization application, and in fact, Firs has now hired that same researcher, Ventavia,

to run four more COVID-19 trials. So all this to say that it's not surprising that we're seeing the issues that we are in the six-month trial report and also in the six-month report, Pfizer actually manipulated their efficacy data.

They took the results from their adult trial, which started in July of 2020, and then they mixed in the results from the twelve to 15-year-old trial, despite the fact that the adolescent trial actually started four months later. So since it's well known that the efficacy of the inoculations wanes over time, this gave a false boost to the efficacy numbers. The efficacy of those two cohorts should have been reported separately, not presented as one combined result, but without that boost, their efficacy number likely would have fallen.

<<https://www.thegatewaypundit.com/wp-content/uploads/Screen-Shot-2021-12-31-at-12.14.27-PM.jpg>>

See their detailed presentation attached (PDF VERSION) below to know more and some damning revelations.

I am writing to urge you to stand against mandating the covid-19 vaccine for children in any capacity, but specifically to attend school.

It is clear that there are still a lot of questions about the efficacy and safety of the covid-19 vaccine in general, and clearly in children.

We are seeing evidence that transmission even when fully vaccinated does not stop the transmission of covid-19, this was exemplified in the recent cruise ship outbreaks where passengers and crew were all vaccinated.

There are no covid-19 vaccines that have been fully FDA approved available in the United States.

There is clear data showing that the covid-19 vaccines can cause harm in children, the CDC website states:

What You Need to Know

* Cases of myocarditis reported to the Vaccine Adverse Event Reporting System (VAERS)  <https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fvaers.hhs.gov%2Findex.html&data=...> have occurred:

* After mRNA COVID-19 vaccination (Pfizer-BioNTech or Moderna), especially in male adolescents and young adults

* More often after the second dose

* Usually within a week of vaccination

* Most patients with myocarditis or pericarditis who received care responded well to medicine and rest and felt better quickly.

* Patients can usually return to their normal daily activities after their symptoms improve. Those who have been diagnosed with myocarditis should consult with their cardiologist (heart doctor) about return to exercise or sports. More information will be shared as it becomes available.

Both myocarditis and pericarditis have the following symptoms:

- * Chest pain
- * Shortness of breath
- * Feelings of having a fast-beating, fluttering, or pounding heart

Seek medical care if you or your child have any of the specific or general symptoms of myocarditis or pericarditis especially if it's within a week after COVID-19 vaccination.

Please do not mandate these vaccines for children, let the decision be left up to families to do as they see fit for their child.

Thank you,

Alison Handsaker

Subject: Against school requiring COVID vaccine - a parent

External Email

I am a parent. I am a mom. I am a wife. I am a employee. I am a friend. I am a daughter. I am a niece. I am many many more things than these things. I am my own person. I believe in the United States of America. I believe in our rights as an America. I also believe it is my decision on what I get to put into my child's body.

I got the COVID vaccination because I wanted to see my parents who I had not seen since the start of COVID. I missed out on so much throughout the pandemic, and yet this vaccine was suppose to be the end to having to wear mask. At least that is what Governor Inslee said. Get the vaccine and you can quit wearing a mask. Well, that was shortly lived. I am vaccinated and yet, I still have to wear a mask when I go into places. I still have to show my vaccination card to eat anywhere in King County.

I have heard so many different things about the vaccines and kids. These things are about the myocarditis that kids are getting. Not all of them, not half of them, but some of them. As a parent, I do not want to do anything that could cause any heart condition in my child. Her dad has heart issues and this vaccine has me on edge for her. She is 13. I have heard things from people who work at Valley Multicare. People who have seen teenagers come in with side effects from the vaccine, that they didn't have before. Healthy kids. I have heard stories from nurses who refuse to get the vaccine for their kids as well. Because of the people they have seen come into the ER/hospital with problems from the vaccination. I have also read once about not knowing if this will cause fertility issues in our kids. I know that was a long time ago that I read that, but you can't honestly tell me that you know for a fact that this vaccine WILL NOT cause any issues in my kids fertilization when she decide to have kids. I am 41 years old. I am done having kids. If it messed with my fertility, so be it. But I refuse to get a vaccine for my kid who the long term side effects are not know.

I do not believe that this should be a requirement for children to be able to attend schools. What baffles me is this:

You get COVID you can spread COVID.

You get the vaccine, you can STILL spread COVID.

So, why should YOU choose for my kid a vaccination that us parents are not comfortable with? Especially since they can spread COVID with or without the vaccine. Let us parents deal with our decision to vaccinate or not to vaccinate. When my child turns 18, I will

definitely let her make her own decisions about her body, but until then, I feel like it is my and her father's decisions on what goes in her body and what doesn't. We have talked to her about the vaccine as well and right now she does not want to get it.

I really hope you listen to US parents. We know what is best for our kids, even if you think our decision is not the best. I grew this child in my body. I delivered her and together with her father we have raised an incredible young lady. I do not want to put something into her body that doesn't have enough studies showing what long term side effects will be.

Below are just some articles I found and some research that I have found about some of my concerns. Yes, these numbers have limited number of students, but with her father's history with heart conditions, this scares me to death!

Thank you for listening and please do what is right and DO NOT require the vaccination for COVID to be a requirement at school.

Thank you!
Michelle Cruz

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medpagetoday.com%2Finfectiousdisease/covid19vaccine/94892>

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccine adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time.

Subject: Board of Health Meeting 1/12/2022/Covid Vaccine Mandate and School Aged Children

External Email

Ladies and Gentlemen,

I am writing to let you know that I am absolutely against any involuntary detention and/or quarantine! In addition, the medical decision to receive a vaccine for a flu that has over a 99% recovery rate should rest with each individual and should not be mandated by the government. We are a democracy, not a dictatorship and therefore, each should determine the decision for themselves.

We, as citizens, are perfectly capable of making our own decisions about our healthcare. Especially when the vaccination doesn't even prevent you from contracting the virus to begin with. This isn't even rational thinking to consider this type of response. Not to mention that the vaccination is not even FDA approved. The one that is FDA approved isn't available anywhere and all those that are being offered are still under an Emergency Use Authorization.

I am also expressly opposed to the mandatory vaccination of children. There are a number of overwhelming reasons NOT to vaccinate children, but three that come directly to mind are:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

I will definitely be joining the Zoom call next week but wanted to get my opposition in on record before the meeting.

Thank you for your time and consideration.

Subject: 1/12/22 Board Meeting Comment

External Email

Dear Washington State Board of Health,

I am a life long resident of the State of Washington and I currently reside in the City of Enumclaw, Washington. I am writing to you tonight to relay my concern for an issue you are addressing at your next board meeting. My concern is specifically around your consideration of WAC 246.100.070 and WAC.246.100.040.

I have heard that the Washington State Board of Health is considering allowing local health officers to use law enforcement to force an emergency order to involuntarily detain a person or group of people who refuse to voluntarily comply with the request for medical examination, testing, treatment, counseling or vaccination. I understand the Board is considering COVID 19 vaccination to be included in this WAC. I am requesting that the board vote to decline any language that would allow such a stance. In this time of polarized opinion on the best course of managing the pandemic, inserting such a barbaric method of public health policy will only inflame the polarization.

I respectfully request that the Washington State Board of Health look for way to manage the crisis in our health care system. Explore and implement plans to increase staffing of hospitals, clinics and long term care facilities. Provide treatment of the sick rather than forced detention of our citizens.

I am a health care worker. I am completely vaccinated. The past 2 years have taken a toll on me and my work family. I know of good, honest people who are not vaccinated. I would never consider placing them in detention for not being vaccinated. I would be the first to treat them with care and duty.

I appreciate the work the Board does on behalf of the citizens of the State of Washington. Thank you for your service.

Respectfully,

William Evans

Re: Cease and desist order

Dear Sirs:

We The People, men and women of the Republic for the United States of America, bring to your immediate attention and order you to cease and desist, ALL, the Genocide and Crimes against Humanity under Natural Law, Common Law, Treaty Law, Articles 6 and 7 of the International Criminal Court Statute, the Nuremberg Code, The Geneva Convention, The United Nations Convention, The United Nations Declaration on the Rights of Indigenous Peoples, in your jurisdiction.

- 1) All Covid19/coronavirus19 vaccinations and experimentation (genetic bio-warfare) Nationally,
- 2) All PCR Testing (Nationally),
- 3) All Masking (private and public spaces, all transportations by land, water, air and sea - Nationally),
- 4) All Lockdowns (Nationally),
- 5) All Quarantines (Nationally),
- 6) All closures of Provincial/States and Territorial (boundaries),
- 7) All closures of International Borders.

This will serve as your **lawful notice** to cease and desist all further actions described above, effective immediately.

Furthermore, we declare all of the Republic for the United States of America, OPEN, upon publication of this order.

Special notes:

- a) Joseph (Joe) Biden is not President of US, and the US Armed Forces has been in control since January 14, 2021.
- b) An email from the Commander-in-Chief of US Armed Forces has been sent to the Armed Forces of Canada, May 27, 2021, acknowledging and confirming the Authority of, HRH Queen Lady Romana Didulo, as Head of State and Commander-in-Chief of the Republic of Canada, Head of Government of Canada, and Queen of Canada.
- c) **For Global Peace and Prosperity only.** Endorsed by, HRH Queen Lady Romana Didulo, Head of State and Commander-in-Chief of the Republic of Canada, Head of Government of Canada, Queen of Canada. **~Transitioning from Democratic Government to Republic Government~**

Govern yourselves accordingly.

Signed and sealed,

By: We The People (men and women) of the Republic for the United States of America

Subject: 1/7/2022 WAC Meeting

External Email

Hello,

As a concerned citizen in Washington, I am disgusted that the likes of WAC's 246-100-070, 246-100-045, 246-100-040, 246-100, and 246-105 are even being discussed. Where have we gone as a society when the idea of detaining good, upstanding people against their will in the name of "safety" is being brought about. Have we learned nothing from the horrors of history? This is reminiscent of creating internment camps for Japanese Americans in WWII because of the possibility that they might be Japanese agents. This is disgusting and morally wrong. These policies are far over-reaching and speak to a police state. What's more despicable than these WAC's themselves is the way that those on the board of health would try to enact such horrors in the name of health and safety. This is nothing more than authoritarianism and control by way of instilling fear into the community. I stand wholeheartedly against any of these WAC's and ask that you on the board do your jobs by not enacting ANY of these WAC's.

Respectfully,

Andrew Gordon

Subject: Child Vaccine Mandate

External Email

I am writing as a VERY concerned parent. My children are happy and very healthy, super active in our community, schools and church. The thought that an experimental vaccine could strip all of that from us is devastating.

We have done our research, we have watched hours and hours of videos from all across the world on the COVID virus and this experimental vaccine (which it is still experimental) and have come to the conclusion that our bodies are better at fighting this than any vaccine is. We have all had it in our house already and of the kids 4 out of 5 who tested positive were asymptomatic and 1 had minor cold like symptoms. This is absolutely ridiculous that something which barely affects kids can ruin their lives.

We teach our kids that they have body autonomy and nobody can force you to do something physically, but "here ya go, you now have to take this by FORCE in order to live a normal life". And by normal life I mean school, play sports, have school lunch for heavens sake. At what point will we say our children have paid enough for this? At what point do we stand by our constitution and say that freedom is important?

I know for a fact that if you force this experimental therapy on our kids you will have a mass exodus of kids from the school systems. I for one will be pulling 4 kids and know many, many other families who will be doing the same.

And how can we not even be talking about natural immunity? Does it all of a sudden not exist?? Those kids that have already had COVID apparently don't matter and then need an experimental vaccine anyway? Please realize the things you are talking about doing by mandating a vaccine make no sense. The vaccine is here for those that want it, that should be enough.

Please, please stand for our freedom to choose. Our children cannot do this for themselves, we must stand and speak for them.

This is in regard to the following proposed policy-

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

I'm writing to remind you to be on the right side of history, and not even consider that anyone should be involuntarily (forcefully) detained and placed in a quarantine facility, and even force vaccinated.

This is an appalling proposition, and you should be ashamed. If you are not noticing the parallels to concentration camps in the past, then you aren't paying attention, and you have been highly deluded to think it is for "the greater good." Eroding our basic human rights to refuse any treatment is flat out WRONG. The people will not stand for it and you can bet it will get very ugly for you before it is made right again.

Now is your chance to stand up for what are basic human rights. If our human rights are taken away, it's not about health anymore. Some day will you be explaining to your

grandchildren (1) How you demolished the basic human rights of your constituents, or
(2) How you stood up for them despite the current lying, false mainstream narrative?

Think hard before you decide. Be on the right side of history. Listen to your conscience.

Choose wisely.

Sincerely,

Cassandra Hare

Whether you think the jab is the best thing ever or not, this should NOT be mandated for our children. There are millions of reported injuries, close to 50,000 deaths, more if you count seniors that die within 2 weeks of getting it, because you know those deaths don't count, healthy young athletes are collapsing on courts and fields, because of blood clots and myocarditis, and it goes on and on... and on. People should get to choose if they want it or not. Especially for their children.

Subject: (public comment) to the WA State health Board about considering requiring the COVID vaccines for school age children

External Email

I am writing to you to state that you should NOT consider mandating any of the COVID vaccines to our school age children.

All of these "vaccines" are still under Emergency use authorization - so you can't and shall not mandate it. I believe the state can and would be held liable if they mandate these vaccines and then it resulted in a serious health issue(s) or death - because you would be requiring it. As you know, under EUA, you can't sue the vaccine manufacturer, so the schools/state are therefore incurring all the risk.

NOTE the vaccinations aren't working like other vaccinations do. People are still getting COVID, including the boosted, so it's basically stupid to even try to mandate it. Covid isn't a threat to Kids' health and never has been. The vaccine however, does show that there is a very real threat to kids and their hearts (myocardium) at an alarming rate.

You will just see many students and families leaving the area, which will result in less funding, less teaching jobs, etc. It's not a smart move. Also, note, if you are paying attention the variants are getting more transmissible and less dangerous, so the current variant of "Omicron" is playing out to be a bad cold, which is very easy to recover from.

Subject: Against requiring Covid Vaccines

External Email

Dear Advisory Board for the Washington State Board of Health:

I am writing to protest against recommending a vaccine for Covid for school aged children who attend school in Washington State. I am a 36-year veteran teacher. I am against imposing this vaccine on our children. I believe this to be a horrible abuse of power.

The available Covid vaccines are still of an experimental nature and have not been tested to prove their value and lack of long-term consequences. Never have we been forced to inject our children with a vaccine that has not undergone years of safety trials. Never have we forced children to receive a vaccine for a disease that primarily poses a risk for adults with comorbidities or are elderly.

School aged children have a 99.9998% survival rate from Covid. The vaccines do not provide protection against getting Covid as is seen by the number of "breakthrough" cases of those already vaccinated and boosted. Why require it?

The vaccines currently available are still only EUAs. Congress permitted the FDA to grant Experimental Use Authorization (EUAs) so that any American in a personal emergency can choose whether to explore potentially lifesaving treatments that have not gone through the full testing regime. In other words, the legal basis for EUAs is a matter of the individual right to access experimental treatments, not of government right to compel such treatments.

It is irresponsible to impose covid vaccines on children when there are side effects as grave as myocarditis already being reported and no long-term tests have been done. Parents must be able to make this decision for their children. You must honor their right to choose what is best. You must not marginalize parents' rights to take care of their children.

I live in Spokane, and I believe my side of the state is certainly underrepresented on this panel. Please look long and hard at what long term consequences of this kind of recommendation could have on our children, our school system and our communities.

Sincerely,

Barbara Miller

Subject: child Covid immunizations

External Email

To Board of Health

I am writing to say you SHOULD NOT require Covid shots for children to participate in any life activity in WA state, including entrance to school. These shots have no long term data and we won't know for 50+ years about long term health consequences. Children are not at risk of Covid, either for hospitalization or death. There is a risk associated with these shots. Myocarditis is NEVER mild and can cause long term heart damage. As an RN of 35 years, I have read the research. I personally know several people who have suffered strokes and blood clots from the famous Covid shot. If the Covid shot protected against infection or the spread of the virus, mandating immunizations might make some sense. I does neither of these functions. The shot is a higher risk to children than the Covid virus. STAND UP FOR THE TRUTH, as the data comes in. Science is an evolving exploration as data comes in. Try to be courageous and fight against those who want power and control.

I believe in personal medical freedom and parental choice as to the medical treatment of children. I and plan to leave the state if the discrimination against medical freedom continues. I have encouraged my kids and grandkids to leave for a state with more freedom and respect for parental rights. They are gone, thankfully. I am concerned about all the other kids who will be harmed by your decisions.

External Email

Hello,

My name is Jenny Tsinker, I am a WA state resident and a mom to three kids.

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals.

I also oppose adding a C:19 vaccination to the WAC 246-105 schedule of required vaccines for children to attend schools.

The reason for my concerns is that the rates of Myocarditis in young boys, compared to the risk from COVID-19 do not justify the mandate, unfinished trials, short follow up window for monitoring adverse reactions, lack of evidence the kids need it, doesn't stop transmission... there are a million concerns we all have. And on addition there is evidence that the vaccine causes more risk for side effects to kids who already had Covid-19

Thank you,
Jenny Tsinker

Subject: C-19 vaccine for children

External Email

I am AGAINST requiring children to be vaccinated for C-19 to enter school. This is a virus with a 0.1% death rate with the most vulnerable still being elderly and those who are immunocompromised (ie other health considerations such as diabetes, cancer, etc). It is as impractical to require this vaccine as it would be to require the flu shot. All other required vaccines are for diseases/viruses that you don't need to continue to take on a seasonal basis. Also, there is a lack of information on how many boosters everyone should have and how often as they are still learning about the virus on a daily basis. Why would it be necessary to require something we still don't fully understand!? The CDC states effectiveness of the vaccines with 1-2 doses is 35% and an additional booster brings efficacy to 75% but they still estimate that this wanes after 3-6 months. Furthermore, the vaccine does not prevent spread of the virus, it was made to reduce symptoms in those who contract the virus. Please do not require this for children.

Sincerely,

A concerned parent who is capable of making medical choices for my child without the need of intervention from others!

Subject: Covid-19 vaccine requirement for entry into public schools

External Email

Hello,

I am writing to you today as a parent of a child in the public school system in Washington state. I have great concerns over the idea of mandating the Covid-19 vaccine for our children. While studies appear to show this vaccine has benefits in preventing severe infection, hospitalization and death, it fails to provide any studies on long term effects; especially on children. We need to see what happens over the course of the next few years to have any real assurance that this vaccine is 100% safe. And let me be absolutely clear - I am NOT anti-vaccine. Both of my children have been fully vaccinated against all recommended diseases, but this vaccine is nothing like those vaccines. As much as we want to say it's no different, it most certainly is different. Much more testing was done on the other vaccines, not to mention those vaccines actually work to prevent those diseases. I implore you to wait on this kind of a requirement until we can see what kind of long term effects these vaccines might have on our children. It is way too soon to be talking about a requirement for the covid-19 vaccine.

Thank you,

Shannan Ramey

One of your agenda items concerns me.

The possibility of making the covid vaccine a requirement for attending public/private school. I want to know why this is even being considered.

Not one official can tell me what the Covid-19 vaccination will or how it will affect my grandchildren during their growing formative years. This is an experimental drug, yes the FDA has approved it but as an emergency. You can't sue them if a child has a terrible reaction to getting the vaccine. These children are our future, let them live and not frighten them. Do you know if this makes them sterile? Females are born with the eggs that will be with them as they mature. They won't produce any more like a male produces sperm. Will this drug help drop the population growth as some people would like.

When will you stop and let nature take its course? Covid-19 virus has mutated into a more contagious BUT LESS SEVERE virus. Which is more important to you, the more contagious part or the less severe part? With this third variant some say it's not as severe and more like the flu and if you should get it, your resistance will build against covid.

I am not against vaccines, I believe it should be your choice.

Thank you

Harriet Cooper

Subject: Board of health meeting Jan. 12th

External Email

I am Amy Jackson, Certified Health Coach in Kitsap County. I want to plainly state that the covid vaccine is a failure, and everyone should see that by now. There's no lack of quality information and data to support the fact that the covid jab does not prevent anyone from getting sick or spreading the virus. So there is no need to force, mandate or require this shot for any reason.

If your board recommends this jab be required for children, you will be going against the Nuremburg Code, "...should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, over-reaching, or other ulterior form of constraint or coercion". Preventing a child from public education because of denial of an experimental medication is illegal. The covid vaccine is not FDA approved, the approved "Comirnaty" is not available for use in the US. The information put out by FDA is very misleading, but in fact the EUA Pfizer vaccine is still being used.

In closing, any requirements for any population to receive this jab is unconstitutional and illegal and will open you and many others up to severe lawsuits, not to mention public outrage. We are nearing the end of this pandemic, we all know deaths are way down and a majority of the people have natural immunity.

Think logically and critically, do not recommend covid vaccines be required for anything.

Dear TAG,
I tuned into your first meeting yesterday regarding considering the covid Vax for school and daycare children in the state of WA.
I have done some research and discovered quite a bit of scientific studies & professional opinions regarding this subject.
I'm sending you a declaration written by a plethora of scientists & physicians on COVID-related Info. There are two MD's from Seattle, (UW School of Med.) who have signed this declaration.

I also have a video from Dr. Malone who presents to politicians in Australia on the dangers & adverse reactions of covid Vax given to children.
Please let me know if you desire to hear this presentation.

Thank you for your service & attention to this vital issue.
Sincerely,
Mrs. Pat Backlund, BSN

Subject: Covid inoculation requirement for public school attendance

External Email

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets vaccine, one group gets placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine. The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccine adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time.

Subject: COVID vaccination recommendation for WA students

External Email

Good morning,

As the child of two lifelong WA public school teachers, and the parent of two current WA public school students, I am writing to express my concern over the possibility of imposing a COVID vaccine requirement to attend public school in our state.

Where there is risk, there must be choice.

1. US research from 2021 medical data provides that boys aged 12-15, with no underlying medical conditions, are FOUR to SIX times more likely to be diagnosed with vaccine-related myocarditis than ending up in the hospital with COVID.
2. As of July 2021, the COVID-19 mortality rate for ages 0-19 was 0.0027%, which is a 99.9973% survival rate. Children have the lowest rates of hospitalization and deaths.
3. Why are we debating a vaccine mandate for a "vaccine" that does not stop the spread of a virus? The efficacy of COVID-19 vaccines is less than compelling, and constantly waning.
4. How can the department of health dictate that healthy children take an Emergency Use injection that is not FDA approved? This is unethical government overreach. We are the experiment, and we will not know the true side effects for years to come. The COVID vaccine should not be lumped into the same school-required vaccine list as vaccines that have been clinically tested and FDA approved for decades.
5. Imposing more mandates breeds discrimination and segregation. How will schools handle students with vaccine exemptions? Will they be treated different than those who are vaccinated? We are already seeing this play out with regard to close contact quarantine and testing protocols. This is discriminatory. Parents who rely on public school services will be forced to comply, leaving zero option for discernment. This is coercion.

Experimental vaccine mandates have no place in a free society. Vaccine mandates leave little to no option for personal, philosophical and even religious exemptions. Medical exemptions are often hard to come by depending on the doctor's opinion and influence. Parents should not have to co-parent with the government. This feels criminal and unconstitutional.

I ask you to research vaccine injury data from multiple sources, including VAERS. I ask you to question efficacy and analyze the infection rate of populations that are highly vaccinated, like Israel. The narrative doesn't match up if you're willing to look at all sides. Do the work. Lead without fear, propaganda or media bias. The future of WA public school students (and staff) leans on your decision.

Sincerely,

Brynn Wilson

To the Washington Board of Health Tag Members:

I am a parent to two active and healthy boys ages 10 and 12. I understand your team is working to decide if you should implement a mandatory Covid vaccine as part of school vaccine requirements. I listened in on your meeting on December 29th and thank you for that opportunity. I am writing today to share my thoughts and feelings regarding this.

It is my firm belief that while a Covid vaccine may be a wonderful choice in the healthcare of some individuals, it is not an appropriate option for all children, especially those who are otherwise considered typical and healthy. The overwhelming experience of most children who have tested positive with Covid is a minor cold-like illness and avoiding this is absolutely not worth the risk of the reported adverse reactions. We are currently experiencing a record number of positive Covid cases in both unvaccinated and vaccinated individuals. This vaccine appears to be leaky; not at all the breakthrough in fighting this pandemic that we hoped it would be. In the last few months there has been a campaign to get booster shots as we have learned that the effectiveness may only last 4 to 6 months. Do we really expect our children to endure this for a vaccine that doesn't prevent getting sick but only slows the transmission? It takes three people to hold down my son to get a simple blood draw. My co-workers 5 year old daughter got hives a few days before getting her first Covid vaccine. The stress this puts on children who already have wonderfully functioning immune systems is beyond necessary. We've seen more adverse reactions for this vaccine than any other. Do we really want that risk for every child?

Some in the scientific community argue that this leaky vaccine actually may allow for resistant strains of the virus to infect more people. If children really are the "reservoir of this disease" as Tom said in the meeting, then wouldn't we be unnecessarily accelerating the disease even further by vaccinating a population that almost entirely wouldn't need it? How long should we expect to boost ourselves and in effect prolong the waves of variants?

Mandates make parents feel that the Board does not trust them to make responsible choices in protecting the health and safety of our own children. Furthermore, mandating

a vaccine that some parents do not yet feel safe giving their children further pushes us in a direction of not wanting to give it to them AND making us question our trust in YOU. My husband and I love our school district and it's teachers and we hope to be able to continue our children's education there. Please do not make us choose to educate them at home because of a mandate for a vaccine that does not feel safe to us yet. Can we please continue to offer vaccines to those that feel it is the best solution in their healthcare regimen and not make this a universal requirement? Parents know about this vaccine. It is advocated for on television, the radio, billboards, social media and news outlets. It can be administered at any grocery store pharmacy, doctor office, or mass vaccination clinic. Getting them isn't the obstacle. Finding the time isn't the obstacle. Furthermore, access for families that DO feel comfortable is there. Please allow more time for parents to feel comfortable. Not everyone feels safe at the same rate as others. While a year may seem like plenty of time for some, it isn't for others.

Communicating to you about this is a very big deal to me. I have never before felt a need to write any leadership in our state over an issue. In the case of this mandate, I cannot sit idly by and not say how not only I but others feel as well. As our state's healthcare leaders, I urge you to trust and allow parents to continue to evaluate their own children's need for this vaccine. I appreciate your consideration and feel obligated to say, whatever you decide, this vaccine at this time is not appropriate for my children.

Respectfully,

Christine Packard

Subject: 1-12-22 hearing for public statement

External Email

To Whom it May Concern:

I have lived in Washington State for the majority of my life, that being 50+ years. As a taxpayer, a citizen, and a registered voter, I believe it is the ultimate choices, of persons such as myself, which should be the deciding factors regarding any actions taken by the Washington State Board of Health.

I stand before you, via my emailed public statement, as a voice that deserves to be heard. I speak on behalf of the citizens of my community, my city and my state, who do not give permission for the State Board of Health to make decisions on our behalf without our consent.

The first Amendment of the United States Constitution states:
"Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the government for a redress of grievances."

This Amendment applies to forms of all governing in the United States of America, including the WA State Board of Health. Any decisions made by yourselves can be seen as an infringement upon the rights of U.S. Citizens, when we have not been allowed to participate in our own exercise of free speech, pertaining to any and all regulations. This includes the opposition of regulations which you are considering.

The Bill of Rights prevents speculation and regulation of Constitutional and Amendment rights, which have been deemed of special importance to this nations citizens. This means that your governing body of the State Board of Health, cannot overstep the bounds of the Bill of Rights, to make decisions which pertain to the nations citizens, without our input and/or our agreement. Public Health Emergency declarations do not overstep the boundaries set forth by the Bill of Rights, or the U.S. Constitution.

Regarding any actions being considered by the State Board of Health, it is imperative that each and every member realize that they will be held personally responsible for attempting to bypass the United States Constitution, the Amendments, and the Bill of Rights. This applies to all regulations applicable to citizens, made by the SBOH, whether related to Covid-19 vaccinations or not.

For the purposes of this email, I am directing you toward the topic, which is the 1-12-22 hearing. I am asking you to refrain from regulations for school age children, college age adults, special needs persons, or residents of the state of WA, which would require the covid-19 vaccine or any vaccination pertaining to covid-19 variants. To speculate about, or regulate any such vaccination, goes against both the Bill of Rights, and the United States Constitution and it's Amendments.

Many citizens of WA state feel that such an action violates our freedom of choice, and our religious freedoms. Freedom of Choice is a big issue in WA state. It is said that every

woman has the right to make any choice pertaining to her body, and that nobody has the right to interfere with that choice. I offer my opinion that young female children are little women, and they too have the choice to decide what goes into their bodies, what remains in their bodies, and who is allowed to make any decisions pertaining to their bodies. I also offer the opinion that males, whether young or old, have this choice as well, based upon the 14th Amendment to the United States Constitution which forbids sexual discrimination, and the robbing of any person of the right to their life choices, liberty, or property. These things cannot be debated and no decision or ruling which violates these principles can take place without due process of law. To deny to any person within its jurisdiction the equal protection of the laws, breaks the 14th Amendment to the United States Constitution.

How an individual citizen feels about a vaccination is important to that person, but perhaps not important to your State Board of Health. Therefore, I'm breaking it down for you in terms of the rights of American Citizens to have Personal Choices pertaining to their own bodies, and how any regulation to remove those choices will break the laws of the United States Constitution and the Bill of Rights. I have already explained to you that each of you on the State Board of Health will be held personally responsible, should you vote in favor of a regulation that robs Washington State Citizens of the rights I've laid out before you. Should you decide to do this, you'll be personally liable for financial restitution, and you should therefore consider that every citizen who opposes your decision to rob them of the "Personal Choice to Govern Their Own Body" may take legal recourse against you.

Thank you for hearing my opinion. As a citizen of WA State, I have worked to support a citizens right to choose, the majority of my work life. I have worked for Planned Parenthood, for State & Non-Profit Organizations as a Case Manager, Counselor, Social Worker, etc., and I can tell you that my opinions are that of a very common, ordinary, citizen of WA state. My opinions are so common that you'll find them among Democrat, Independent, and Republican voters. My opinions regarding the statements within this email are in fact so common that you'll find that they represent the majority of our citizens in Washington State. That's a lot of voices. That's a lot of legal rights to consider.

Thank you for your consideration, your time and attention,
Kim Lohr

I do not believe that masks should be required for children at all. The damage to them socially, and the unknown complications that could occur from wearing them for long periods could be catastrophic. It is not worth the risk.

Covid shots should absolutely NOT be a requirement for our children. Children are at extremely low risk for Covid.

Subject: Children's Vaccine

External Email

Dear Washington State Board of Health,

I urge you to vote NO to any COVID vaccine mandate for our children, and adults alike in our state. Our children are being pulled from public schools at the highest rate ever due to the current COVID requirements and restrictions. A mandate or law requiring all children to be vaccinated to attend schools/daycares will not only create an even higher rate, but also an additional economic disaster in homes of all our Washington State citizens.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccines adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. Subject: Adding COVID to list of required vaccines is a very bad idea

External Email

Washington State Board of Health:

I am writing to you as a concerned Washington state resident and parent with regards to the possibility of the Washington State BOH approving adding the COVID vaccine to the list of required vaccines in order for children to attend Washington State schools/daycares.

The very thought of adding this to the list of vaccines required to attend schools/daycares within the state at this point is beyond careless. The safety profile of this particular vaccine is not known and it cannot be equated to the MMR vaccine that is required for students to receive. As Dr. Cody Meisner MD, one of the pediatricians who sits on the VBRPAC panel said, "This is quite different from the MMR vaccine," referring to the measles, mumps, and rubella vaccine given to all children in the U.S. "We know that vaccine is safe. We have tested that vaccine for decades. And we know, we have a very good sense, of what the adverse events are. We do not have that with this particular messenger RNA vaccine." Furthermore the VBRPAC was also hesitant to approve this vaccine for children 5-12 years because they knew exactly what their approvals would bring; mandates to attend school and participate in society. By adding this to the list of required vaccines, you're doing exactly what they were afraid of. How careless would it be to add this vaccine as a requirement only to find out 10 years down the road it had significant impacts on children?

As of late there are many studies out there that talk about the effectiveness of this vaccine and the numbers don't look good - the vaccine isn't effective long term. There are studies out Denmark and Ontario that report negative vaccine effectiveness to specifically Omicron. Parents aren't going to give their children "boosters" every 5-6 months to keep their immunity from waning. That's straight up cruel.

* <https://www.medrxiv.org/content/10.1101/2021.12.30.21268565v1>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F10.1101%2F2021.12.30.21268565v1>

* <https://covid19danmark.dk/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcovid19danmark.dk%2F&data=04>

If you want to look at how popular it would be with the public to add this vaccine to the list of required vaccines, you should look no further than rates by which parents are vaccinating their kids. I heard Chris Rykdahl on FoxQ13 talking about the rates and 25% of kids 5-11 have been vaccinated and around 35% of kids 12-15 have been vaccinated. To me that says a vast majority of parents aren't interested in their children being a test

subject and by adding this to the list, you would be telling 65-75% of parents to do something they don't want to do; that my public servants is not public support, that is dictatorship on your part.

All the vaccines that are currently on the requirement list are childhood diseases and impact children greatly. COVID does not.

I implore you to do the right thing, table this discussion 5-10 years down the road when more safety data is available. If/when it is decided that these vaccines are safe long term then continue the conversation then. Doing it right now would be extremely reckless and many children will become injured from the vaccine itself.

Sincerely,

Betsie Elliott

Subject: Covid 19 Vaccine Requirement for Schools!

External Email

Washington State Board of Health:

I am a Parent of 3 children. I am writing to you in protest of these crazy mandates for children you guys are thinking of putting in place. I completely disagree with these mandates and will not allow this to happen to my children or any of the children or parents who chose not to do this. This is our choice to vaccinate our children and can I remind you this is an experimental vaccine under emergency order, which therefore you do not have full approval and can NOT mandate this for Schools. Using an experimental drug against your will is illegal!!!! I beg of you to not do this for our children's sake! There is no evidence that says children need to have this vaccine or are more susceptible to this virus than adults. You need to show us all the data in which you will not. Which then means I will not comply with this tyranny and will be pulling all 3 of my kids out of my small town school!

Thank you,

Chere Dormier

Here are the WSDOH statistics.

Please review the children's information.

Also you may want to wait for the latest WSDOH breakthrough information from Dec 16th.

I am sure the vaccine is starting to lose its value.

Here is the Washington State Weekly Virus Report.

A virus is all local. State and country statistics are interesting, but you really can't make decisions on them.

This is where Fauci failed! Treating them everywhere like the hotspot of NYC. Each county should have had specific recommendations by the CDC instead of putting it in the hands of the governors.

Washington state, Inslee and the WSDOH have used draconian mandates and the state has fared no better than states that did not have mandates that are thriving and living mask and vaccine mandate free.

You have to download the data from the WSDOH COVID dashboard to get this info.

Epidemiological Curve>Tabular View>Weekly Download

It includes all of the counties' data.

They update it weekly.

<https://www.doh.wa.gov/Emergencies/COVID19/DataDashboard#tables>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.doh.wa.gov%2FEmergencies>

Cases Week ending 12-18-21

This is in a population of 7.8 Million in 22 months

Weekly total 13,186

Total Tested Cases 808264

An estimated 3,233,056 people have been infected and now are naturally immune

You can see most of the cases are in the groups that are healthy and will easily recover and become naturally immune.

Ages

0-11 1475 Cases 83,139 Total

12-19 2581 Cases 87,951 Total

20-34 3,608 Cases 232,745 Total

35-49 2,927Cases 188,519 Total

50-64 1,748 Cases 134,537Total

65-79 678 Cases 60,367 Total

80+ 167 Cases 20,438 Total

Hospitalizations Week Ending 12-18-21

Weekly total

Total Hospitalizations 44,372

About 1888 a month, 472 a week

This is spread among 39 counties.

Again you can see those under 50 fare very well.

I hope this information reduces the fear many are trying to create about this virus.

Ages

0-11 8 Hospitalizations 526 Total

12-19 2 Hospitalizations 587 Total

20-34 44 Hospitalizations 4,370 Total

35-49 80 Hospitalizations 7,774 Total

50-64 133 Hospitalizations 12,127 Total

65-79 141 Hospitalizations 12,309 Total

80+ 55 Hospitalizations 6,679 Total

Deaths Week Ending 12-18-21

99.7% have survive the virus in Washington State

This is an interesting statistic I have found in most places.

Kitsap County 99.7%

King County 99.7%

United States 99.6%

We need to see the details on these deaths, since the demographics have not changed in 22 months and are virtually all older folks with underlying health conditions. Nationwide 95% have died with underlying health conditions. Which means if you are marginally healthy there is little chance of you dying. If you are under 50 and healthy the chance drops significantly.

As you can see under 20 there are very few deaths, It quadruples at 35-49. It would be interesting to find out the detail that causes this jump. Again 50+ make up 93% of the deaths. Being under 50 and healthy should not be worrying about dying.

Total Deaths 9800

Weekly Total 105

About 417 a month, 104 a week

This is spread among 39 counties.

Ages

0-11 0 Deaths 4 Total

12-19 0 Deaths 13 Total

20-34 2 Hospitalizations 124 Total

35-49 8 Hospitalizations 554 Total

50-64 24 Hospitalizations 1770 Total

65-79 41 Hospitalizations 3465 Total

80+ 30 Hospitalizations 3840 Total

Subject: Covid-19 vaccine

External Email

Dear Washington State Board of Health,

The covid 19 vaccine is not a full FDA approved vaccine. It doesn't prevent illness or transmission of covid 19, nor can it be proven to prevent severe illness that requires hospitalizations. Covid 19 in youth is rarely serious or deadly. The long term effects of the covid 19 shot have yet to be determined fully but heart conditions are documented and increasing at a high rate since the shot was authorized for use in youth. Requiring this shot in any form before it is fully approved is unacceptable. The situation Washington state is in right now due to the mandates surrounding this shot have put health care, road crews, first responders and education severely understaffed and we are now in a crisis of different proportions. Now vaccinated people are getting covid 19 in astronomical numbers and seeking medical help at high rates. Considering the situation means looking at all the facts not just the hand picked numbers that support the opinion that the covid 19 vaccine is working. Chicken pox, measles, mumps, small pox vaccines prevent transmission and illness whereas covid 19 shot does not and for youth has very little benefit. The other very serious thing to consider is that unlike those vaccines I mentioned they don't need a booster every 5 months to continue to be effective. There is no logical way to require a vaccine that needs boosters to remain effective unless you own stock in the pharmaceutical companies.

This covid 19 vaccine should remain optional and not allow discrimination to children to receive the education that is required by law and paid for by taxes collected.

Thank you,
Crystal Bergman

Please keep our children safe by not requiring the covid shots for school age children. At this time the vaccine available is still experimental—which means this is against Nuremberg. One cannot even see ingredients of this vaccine and information is “intentionally blank” when you ask a pharmacist to show you the paperwork. VAERS data on the CDC website shows multiple side effects and deaths. Myocarditis is the most known affect for children. Requiring this shot paves the way for lawsuits against the WA state health department and state, and perhaps you personally. Please do not support this requirement until this vaccine has been fully studied, tested, and stood the test of time.

Subject: Covid Vaccine for Children - Vote NO

External Email

Why on earth would you even consider requiring a vaccine that does not prevent the spread of Covid or keep you from getting Covid? Especially a vaccine that only has the Emergency Use Authorization as the approved vaccine is not available yet. AND with the spike in people experiencing unusual health issues with "no explained cause" or "rare" side effects. The risk of the vaccine severely outweighs the benefits. The known side effect of forcing this vaccine on children will be a mass exodus of kids leaving the public school system.

Do NOT force this on our precious children, it is not like other vaccines....it is not safe nor effective.

As an RN with 20 years nursing experience and as a mom, I am asking you to not add the Covid 19 vaccine to the list of required vaccines. There is not enough long term data on these vaccines, especially in children. There are many reported injuries and deaths from this vaccine, many more than from the virus. As children barely even get sick from the Covid virus, they do not need protection from it, as they do with other viral illnesses. The risk versus reward is much higher for children to receive the vaccine than not receive the vaccine.

Subject: Concerns About School Vaccine Mandate

External Email

0. Dear Members of the State Board of Health,

I am the parent of three children ages 3, 5 and 7. I am concerned that the state will mandate parents vaccinate their children to attend school, and I am writing to ask that you please not support a vaccination mandate.

The emergency nature of the pandemic should focus the government's vaccine mandates on the people for whom the virus is truly an emergency and are most impacted by the disease. Children are not affected by high death or hospitalization rates. The safety of the adult, non-vaccinated community should not rest on the backs of young children who risk unknown short-term and long-term effects from any medicine.

I am concerned about the unknown, long-term effects of the COVID vaccines on small children. Scientists have not studied the vaccine long enough to ensure its safety for young people. While I am grateful there is a vaccine, I want the decision to give my young child this vaccine to be between my doctor and me.

Thank you.

Subject: AGAINST recommendation for Covid-19 being a requirement for school aged children

External Email

I am against this recommendation. I am absolutely horrified that the health department is talking about making this recommendation for an illness that does less harm to our school aged children than the seasonal Flu has in years past, according to the CDC.

The decisions regarding children and Covid 19 are not putting their safety first. The decision to vaccinate MUST outweigh the risks of the illness. In the case of COVID-19, the risks of illness absolutely are NOT greater than the risk of vaccine.

We need leaders to step up. If not you, then who?

Subject: Do not force vaccinations on our children

External Email

Hi there. I am writing because I have children in elementary school in Clark County and want you all to know that I will pull my children from public schools if you force this vaccination on students. The science is still out on what long-term effects this type of shot has on people especially fertility in girls. Even Dr. Malone sites this as a concern. Please allow my children to stay in the school that they love by not forcing this experimental shot on them.

Also, they have had covid and have the antibodies which studies have shown protects them better for future infections than the "vaccine". Please consider natural immunity as a form of protection alongside the shots. Children are least at risk of getting really sick and dying from Covid. Why would we force a shot on them that has such bad adverse side effects with very little benefit? Follow the science, not the propaganda!

Subject: Comments for Friday meeting

External Email

I listened to the other call a few weeks back regarding "race groups disproportionately affected by covid". That was interesting. EVERYONE has been affected. From the majority of comments received then hopefully you will understand that a mandate for schools would not be well received by the majority of parents. Here are my main issues:

- Risk vs benefit for under 18
- No long term studies, new technology "vaccine". Heart issues, possible fertility issues
- The "FDA approved" Pfizer product Comirnaty not available in the US still
- Non-sterilizing vaccine still allowing for transmission
- After Omicron most will have natural immunity....vaxxed or not
- No allowance for natural antibodies
- Transmission in schools very low

Although some will cave and inject their kids so they can go to school so parents can work and feed their family, many of us will not. Public schools will lose many more students as more will homeschool or move out of state. This is not about public health as the shot has done nothing to stop transmission as we are now seeing. We beg you to use common sense and not force more children to be part of the experiment.

Subject: Covid vaccine required

External Email

Do not require the Covid vaccine to be included for children. There is enough scientific study & evidence that. Children & young adults are at minimal risk fro Covid, in fact so low as to not be statistically measurable. Not 1 healthy child died OF covid. The risk / benefit of the vaccine is higher risk than from a Covid infection. The risk of heart issues like myocarditis has exploded in young males especially, according to the VAERS reporting. Why are the thousands of injuries & deaths from the vaccine not allowed in discussions? Pfizer vaccine is NOT FDA approved. It continues to be EUA only. Comirnaty, the approved brand is not available in the US. Media, CDC, FDA & NIH (Fauci) have outright lied & mislead in multiple communications to the American people. If you aren't aware of these things you have no business making important decisions about our children's health. Get families with the Nuremberg Trials & the rules that resulted. " doing your job or what your ordered to do is no defense when harm or death is caused. Please, Do the right thing.

Subject: covid vaccine required for kids to go to school??

External Email

To whom it may concern,

I would like to express my sincere protest against mandating a Covid vaccine for children to be able to go to school.

I am fully vaccinated, as are the other members of my family. I am still sincerely against your forcing people, especially children, who have a right to education.

First of all, this vaccine does not meet the 9 requirements, and will not qualify to meet these requirements for years to come.

mandating this will likely instigate families and further divide our state.

If you do this many children are going to get pulled out of school, and suffer a disadvantaged form of homeschooling.

Washington state schools should be supportive of families no matter where they stand on COVID-19 vaccines. Masks are already required so a vaccine will not improve any outcomes. Additionally, forcing vaccines that have no long term safety data could lead to some significant legal action in the future.

To take away an education of a child because the parents don't want to be forced to give them the vaccine is ridiculous.

Christine

Subject: COVID 19 Mandate

I strongly believe the decision to mandate this vaccine, especially while approved for emergency purposes for this age group, will hurt all of our schools. I believe strongly in medical freedom as well as the right to a robust public education earned thru our tax dollars. Regardless of if someone or I am pro or anti covid vaccine our schools stand to lose an even larger number of students if this is pushed thru. As of last reported WA schools overall enrollment is down 55k since the beginning of the pandemic and estimated to grow larger not smaller per reports. OSPI has asked for more funding to bridge this gap that has been filled with Covid dollars, which will not last. Each student is estimated to equal 18k in yearly funding. So my question is simple how many more families will pull their children out in search of homeschool, charter or private options and what will be left for the children left in our public system regardless of vaccination status. Even if only a few more % leave there will be districts that will be left behind.
#stopthemandate

I have personally pulled my two children out of public school both last year and this current year. This decision will be the tipping point to going back next year or continuing with homeschool. I have also begun exploring charter and private options. I am not alone I have over a dozen friends in our state that have removed their children as well. Including mine we now have over 8 new homeschool friends, and 8 friends in private or charter options. Recently I have had 5 others reach out to me to ask about homeschool to gear up in case of a mandate. I'm just one Mom who knows 16+ students that have left.

I am currently leaving my children unvaccinated for the reasons of one, they have had covid and recovered fine and two because I of the a growing risk of Myocarditis. This is vaccine that has proven to not stop the spread of this disease. Vaccinated people can still both get covid and spread covid. So in relation to a group that has less than a 1% chance of severe illness and even less of death the decision should be left to the parents. I would never tell anyone what to do with their children nor should anyone tell me what to do with mine.

Thank you for you time,

Alisha Ridgely

Subject: Covid 19 vaccinations for school children

External Email

I strongly oppose requiring Covid 19 vaccinations for school children. I also strongly suggest you get educated on the vaccinations and Covid 19. There is excellent early treatment and kids are at higher risk from vaccine reactions than Covid 19. I am not an anti vaxxer, I am just against this vaccine. There is a lot of information out there regarding what is happening. I suggest you look at other countries and their success with Covid 19 including Uttar Pradesh in India, Japan, Sweden and more. There are thousands of highly educated scientists, attorneys and physicians who are against this and I suggest you look into why. Please question the narrative.

Thank you for your time,

Subject: Do not allow the vaccine mandate for our school kids.

External Email

Hello,

As a mom of two kids I ask you to not pass the vaccine mamdate. These covid19 vaccines are not like other required vaccines, this one is still in the experimental phases and to require this for all students would be criminal and a vast over reach of power.

Covid spread in schools is extremely low, and transmission rate between kids are also low. If a child does get covid, they are most likely to have cold symptoms vs the issues that the elderly with health complications have. The vaccine does not stop the spread either so all arguments pro child vaccine mandate have huge flaws in their requests.

In addition to this, Inslee has majorly breached his limits of power and is treating this state as a 1 ruler state. He has broken the WA state constitution and has lost in court when trying to establish laws through his executive power. Now he is trying to circumvent this court ruling through 3rd party agencies and boards such as yours.

Years down the road the COVID vaccine may be required in schools, but right now the Cdc does not know how it will affect children both in the short and long term so why push this Emergency Use vaccine now? This mandate can cause irreputable damage to our children and even death. Look at the VAERS website, keeping in mind false reporting is a classified felony. More children have reported to die and/or have life long complications from the vaccine than actually be affected by COVID.

Risk vs. Benefits = No vaccine mandate.

Do not experiment on our children. Do the right thing and abolish this irresponsible vaccine mandate.

I oppose the Covid vaccine being added to the school and daycare schedule. I think it is extremely irresponsible to even be discussing such a mandate when the science does not come close to suggesting there is any advantage to doing so. Children have mild to no symptoms from the virus, and are thus the safest. Covid Vaccine inserts are none existent to the public, leaving us without a knowledgeable and informed choice. Pharmacists themselves do not have access to a vaccine insert and yet we are told to take the shots even though many have had severe and others even deadly reactions to it.

Please urge the advisory group to be cautious and not make recommendations for that Covid vaccine to be added to the school and daycare schedule.

I will welcome any reply that might sway my opinion. Please include any data that would show that vaccinated children are less likely to contract or spread Covid than unvaccinated. Also any absolute assurance that there is NO risk whatsoever if children receive this shot.

I look forward to hearing from you.

Thank you,

Anna S. Kozlov

I strongly oppose these shots being mandated for our children. These shots are proving to have severe adverse reactions and to risk our most preschools age group and force this on them when data shows they are least at risk is unbelievable to me. I sincerely request that you vote against this mandate.

Hello,

As a mom of three kids I ask you to not pass the vaccine mandate. These covid19 vaccines are not like other required vaccines, this one is still in the experimental phases and to require this for all students would be criminal and a vast over reach of power.

Covid spread in schools is extremely low, and transmission rate between kids are also low. If a child does get covid, they are most likely to have cold symptoms vs the issues that the elderly with health complications have. The vaccine does not stop the spread either so all arguments pro child vaccine mandate have huge flaws in their requests.

In addition to this, Inslee has majorly breached his limits of power and is treating this state as a 1 ruler state. He has broken the WA state constitution and has lost in court when trying to establish laws through his executive power. Now he is trying to circumvent this court ruling through 3rd party agencies and boards such as yours.

I am going to quote Sen. Ron Johnson today in voicing my concern regarding vaccines for children in public schools, as well as a screen shot of the CDC's own data from the VAERS report. As an older adult I made the decision to be vaccinated because 75% of deaths occur in my peer group. Conversely, in children, their risk of death in healthy children is fundamentally ZERO. To inflict this EXPERIMENTAL treatment, to MANDATE it as a condition of getting an education, is WRONG! (we cannot label it a true vaccine because we now know that it does not prevent us from getting the virus) This "vaccine" is NOT without serious side effects, to say nothing of what we do not know about long term effects! For it to benefit children in any way the risk would have to be absolute ZERO, and we cannot say this! There are already reports of young children having heart issues and brain clots as a result of these vaccines. Mandates are tumbling everywhere, and we have done enough damage to our precious children with all the shutdowns and "remote learning".....we KNOW that damage was done to them! Please stop this vaccine mandate insanity when it comes to our kids! Let parents decide! Children cannot make an informed consent, I will speak for them!!

A very concerned citizen,

Lynne Lane

External Email

Over decades and decades, Health care has come out with incredible vaccines that have stopped disease in its track by eradicating them. This shot is not a conventional vaccine, it is a SHOT. Nonetheless a shot that has not been proven to be effective. In fact, it's been shown to cause more harm than good. I appreciate the fact that in a time of crisis, scientists are working hard to learn as much as they can about this new virus to help everyone. But a good vaccine takes years upon years to perfect. This is nowhere ready. We are forcing this upon people for "the safety of themselves and others", yet abortion is legal? The medical industry is disrespecting our rights for our health for something that isn't even promised yet taking away lives without concern? It feels a little contradictory. I love my children, and I will not take the risk of this vaccine chemically sterilizing my children, or making them immunocompromized for something that isn't safe or effective. Do you not realize that families are risking everything to pay for private school if this is forced? Let this be optional.
Concerned mother.

Subject: Covid-19 Vaccine Opposition -Children

External Email

Good Evening,

My husband and I come to you in opposition of adding the Covid-19 vaccine to the list of required vaccines. As tax payers, our children have the right to a public education. We have grave concerns about this vaccine and should not be in fear of losing our children's right to an education over a medical decision that we are not confident is safe for our children. This is a family decision and parents deserve the right to chose if we will submit our children to an experiment or not. We, along with many other concerned Parents across this State are demanding a choice.

Requiring an mRNA injection that does not stop the spread or prevent infection is not the intent of the legislature in it's delegation of authority to the State Board of Health to approve a schedule of immunizations for vaccine preventable diseases. This vaccine is neither effective in stopping the spread or preventing illness and should not be added to the list of required vaccines.

Children are not at high risk of death from Covid-19, they have a 99% chance of survival. They are also not causing community spread. The latest variant presents as cold symptoms or nothing at all. People who have been vaccinated are getting it in higher numbers than those with natural immunity.

Children, males in particular, are at a far greater risk of an adverse reaction to the vaccine than serious complications from covid. It is not right or constitutional to threaten to withhold an education from a child if the parents do not comply to your opinion of what is best for our children. There is enough data and research to indicate these vaccines are unnecessary and unsafe for children.

We will not allow our children to be a science experiment to make adults feel safe. Our children will NOT receive the experimental vaccine under any circumstances. We will go to the ends of the earth to protect them. This deserves to be a family choice, they are our children, not yours. We will immediately pull our children from the public school system.

I leave you with this, from a mother to mother or parent to parent. Imagine being forced to give your child something that you are not 100% confident is safe for them but having another adult try to take that option away from you? This is what you are doing to us by trying to take our right to chose away. Where is your compassion?

Dear Washington State Board of Health member,

I strongly oppose recommending these experimental vaccines for children. There is no data that proves that they are without risk. There are MANY FDA approved vaccines and drugs that over time were proved to be detrimental. Swine flu, for example. We simply do not have enough information to deem these as safe, especially in developing children.

Sincerely,
Pauline Salo

Subject: covid vaccine requirements in school

External Email

To whom it may concern,

I'm a mother of two healthy and happy girls who are currently in district 81 in Spokane Both my children are and always have been up to date on needed vaccines to attend school.

That being said, those vaccines have been out for many years and have been tested on millions.

I do have a concern like millions of others over the new covid -19 vaccine and dont feel we have enough research to make this mandatory on young children. This should be a choice made by the parents/guardians not government, school boards or local health officials. I do understand side effects are rare and data for now is showing it to be mostly safe, my major concern is the long term effects this vaccine could have. I'm asking you to please take in consideration the parents who feel this way and let the vaccine BE A CHOICE AND NOT A REQUIREMENT.

Thank you,

Jamie MacDonald

Subject: Covid Vaccines for School Children

External Email

Hello,

My name is Alissa Miller and I am the mother of a third grader, first grader, and preschooler. I implore you all to respect our rights as parents to choose what is best for our children. My children have had all their normal childhood vaccines, but I am extremely hesitant to give them the Covid vaccine, and at this time am unwilling to do so. If Covid vaccines are mandated for schools, I will ultimately end up homeschooling my kids, or moving to a different state if necessary, to avoid the risk to my children and this usurpation of my parental rights. I am not convinced the Covid vaccine is safe or necessary, and like many other parents I've spoken with, will absolutely unenroll my kids if it comes to that. Personal and religious freedom should always be respected. I beg of you not to mandate the Covid vaccine for schools.

Respectfully,
Alissa Miller

External Email

We the constituents and community members of this great State of Washington, DEMAND the Washington State Board of Health (WSBOH) REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19. See VAERS data below.

Leave the personal health choices to the parents. I cannot justify vaccinating my perfectly healthy children with an experimental drug when they are not categorized as high risk.

Thank you,
Brittany Fladager

To whom it may concern

I am raising my voice and my vote in strong opposition to the proposed mandate to vaccinate children of 13 and even much younger .

I am extremely concerned about the health risks that the vaccine may incur and say - "NO! Stop this !" No more. No more children vaccinated against under 13! It's way too risky for children to receive a vaccine that had not been thoroughly tested for adverse reactions!

Subject: comments for January 12 meeting

External Email

I am sending in comments on two of the agenda items for the meeting.

Item 4: Department of Health Novel Coronavirus (COVID-19) and Other Updates:
The state's mask and vaccine requirements need to be lifted. Put simply, neither masking nor vaccination shots provide enough protection against this virus to justify the extraordinary measures of forcing people to mask and vaccinate, especially without approval from the legislative branch.

Item 11: Regarding potentially requiring a Covid vaccine for entry into the public schools:

A Covid vaccination requirement for the state's students does not make sense, and given the evidence we have so far, would be needlessly hasty if adopted for the 2022-23 school year. Let's keep in mind that the Covid vaccines still have not received full regulatory approval for children.

A sensible analogy regarding a requirement is to the flu shot, which seems to be roughly similar to the Covid vaccines in effectiveness, but offers protection against an illness that does more harm to kids than Covid. Furthermore, if twice-annual Covid booster shots become standard, a kindergartner would face the prospect of having to get 20 or more shots in order to one day graduate from high school. That does not strike me as fair, reasonable, or practical.

Hello, I am writing to express opposition to making vaccines mandatory for school attendance.

Children are very low risk for COVID, and while I am both vaccinated and encourage others to get the vaccine, I am very concerned that poor and minority students will be disproportionately effected by a mandate and will suffer due to an additional barrier to entry for education. Please continue to allow all children access to in person schooling regardless of their vaccination status.

Subject: Covid Vaccine Mandates for School Age Children

External Email

I understand you will be having a meeting and making a decision regarding Covid vaccine mandates for school age children.

Statistics have shown that children have virtually no risk from Covid 19. While the Covid 19 vaccine is still in the trial phase until 2023, openvaers.com

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fopenvaers.com%2F&data=04%7C>>
has had thousands of deaths reported (presumed to be a very low number), and many more severe injuries. Myocarditis and heart related complications have been widely reported, and the younger population are at a greater risk of these complications.

As per the CDC, the Covid vaccine does not prevent infection, nor does it prevent the spread of the disease. Given the low risk to children, it seems reckless to make this a mandatory vaccine as a requirement to attend public school. I am concerned also, as I believe mandating this would cause a huge backlash of parents pulling their children from the school, causing a huge financial crisis for districts all over the state.

I urge you to vote NO. Thank you for your time.

Tina Holan

Subject: Covid Vaccine Requirement for schools.

External Email

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets vaccine, one group gets placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccine adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time.

Children are at extremely low risk for covid and complications from covid. Covid shots should not be a requirement for our children to attend school. These vaccines are still only EUA and we do not know the long term risks of giving them to our children.

If the covid shot were to become a requirement for attending school there would be more harm than good. Especially at a time where parents are pulling their kids from school faster and faster, this would be another reason for parents to pull their children.

Thank you,
Terry Larson

Subject: COVID Vaccination Requirement for School aged Children

attachments\9A72A98CA44343D4_image.png

External Email

Good Afternoon -

I am strenuously opposed to the COVID vaccination requirement currently being considered for all schools in the state of Washington for school aged children including college aged children/adults.

This "vaccine" which is better classified as a shot, is still in the trial stage. It's still a EUA and it's illegal to mandate an EUA product.

The state department of health has this information currently on their website regarding the three types of shots currently available:

How can you possibly mandate a "shot" that is still unproven to be effective past 2 months? Boosters are not required but they're out there? It's clear that there is already great concern on the effectiveness of this/these shot/shots that are still in the trial stage. There is no logical rationale behind this possible mandate.

If you mandate this ridiculous shot as a requirement to attend public school in the state of Washington including colleges, universities, trade schools and/or any other educational organization, we will pull our children and home school them.

Regards,

Corina Maser
Hockinson School District Parent

Subject: Comments for the Immunizations Technical Advisory Group

External Email

WSBOH,

Please see the questions/comments below pertaining to the subject:

1. I am an engineer by profession and am not a doctor so am unable to provide any professional comments regarding changes to WAC 246-105. Dr. Robert Malone on the other hand, is an internationally recognized scientist/physician, a pioneer of the original mRNA technology used in the COVID-19 vaccine, who has always believed in the development of vaccines to preserve human life. Dr. Malone has serious specific concerns regarding vaccines, particularly for children.

2. Have you consulted with Dr. Malone to properly understand his (and other doctors like him) concerns to be absolutely certain about the overall safety of the children of this great State of Washington?

3. What are the results of consulting Dr. Malone?

4. Dr. Robert Malone website; <https://www.rwmalonemd.com>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.rwmalonemd.com%2F&data>>

5. If you have not consulted with experts like Dr. Malone, why not? And then, what evidence do you have that would support the benefit vs the risk of requiring children to receive the COVID-19 shot?

6. If the SBOH were to require a COVID-19 shot to allow admittance, who assumes all the risk from medical complications from creating this requirement? Is it the director? Is it the board?

7. Has the SBOH considered that the COVID-19 shot is evidently not effective?

8. Has the SBOH looked at the low risk of death to children due to infection specifically by Covid-19?

9. When the SBOH looks at the data pertaining to school age children and the risk of death due specifically to infection by COVID-19, how much quantified risk is there to those children? Also, how does that risk of death compare to other childhood death risks?

10. I believe that the parents of the children of this great state deserve the SBOH to do their due diligence to understand the risk versus reward prior to considering requiring a COVID-19 shot for children because number 1, we're talking about protecting the innocent, and number 2 because the long term liability for the SBOH and its actors if this immunization does not stand the test of time would be devastating. This is why I (along with countless other Washington State parents) urge you to consult with Dr. Malone to understand his concerns.

Very Respectfully,

Dear Board of Health,

Let me start by saying I am not an anti-vaxxer. I am also not someone who believes that the effectiveness of vaccinations I have received depend on my neighbors, my families, or a strangers vaccination status. The decision to be vaccinated or not lies with the individual being vaccinated or their parent or guardian. With regards to Covid 19 shots, or any shot or vaccination, they should not be mandated for anyone, but especially not children. Children are at a very low risk from any adverse effects from a Sars Covid 2 infection, so the benefit of the Covid 19 shot does not outweigh the risk of an adverse reaction to the shot itself for almost all children and most healthy adults. The shot maybe giving high risk individuals some protection against severe disease, but even individuals in high risk categories should have the right to receive the shot or not. Furthermore, people who have received the Covid 19 shot/s are still contracting and spreading the disease, the shot/s are not terminating the virus. Instead of mandating the Covid 19 shot, focus should be placed on early treatment and overall healthy lifestyle practices. We should all have the right to decide whether or not we want our children or ourselves to receive the Covid 19 shot and all of the subsequent boosters required. or any other shot or vaccination. Those mandating any shot or vaccination should be prepared to assume the liability from any adverse reaction or death caused by the shot or vaccination. When you take the informed choice away from individuals you assume the responsibility of that choice.

Sincerely,
Michelle van der Merwe

Subject: Covid Vaccine Approval for school

External Email

Dear DOH,

I do not believe this should be on the table, The reason being is that there is NO approved covid vaccine available in the USA for one, the one they say is approved is also on the EUA and is not available until 2023 after the trials are over. You can not have both, it can not be approved and be on the EUA list.

Two, we do not know the long term side effects that it will have but we do know that there are already issues with teenagers coming down with heart issues, blood clots, death, and many more problems after getting these shots. We have athletes dying on the field after receiving the shot.

The states that have a high vaccination rate are also the one with high hospitalization. This can not be a coincidence!

They have manipulated the deaths, saying you are not considered to be fully vaccinated unless you have taken both shots and it is two weeks after the second shot. They are also saying someone died a couple days after the vaccine they were unvaccinated, If you were to have a side effect this would be the time frame you would have it, but it is being brushed under the table.

There is a CEO from a major Life Insurance company that has come out saying that there is a 40% increase in deaths since the vaccine came out. These are all things that show you should not even be thinking about giving this to our children.

This is not safe or effective. All this is, is propaganda. It is effective until you get the two shots then it is no longer effective and needs a third shot. This is not how immunity works.

Finally, this is an overreach of authority. You have no right to poison or sterilize our children.

Please remember that when this is done and the deaths from this are counted everyone that helped or was complicit will be held accountable. There is no such thing as I was just doing my job, and there will be new Nuremberg trials here in America.

PS: you might want to rethink the decision on the Covid PCR test for athletes. Parents know that there is Eo on this and it is considered a cancer causing agent and the state will be held responsible. Also the CDC took it off the EUA because it was unreliable.

Thank you for reading. If you have any questions don't hesitate to email or call.

Subject: I'm against school Covid vaccine mandate

External Email

I'm against children forced to take the Covid vaccine to attend school. My coworker a few weeks ago was in a Spokane Costco, a mother was screaming , she just had the vaccine, referring to covid, as her teen daughter lay dying of a heart attack at our local Costco, while getting cpr.

No way in HELL is my child getting a vaccine even if it's mandatory for school. I will homeschool my child before she gets this vaccine. There are NO LONG TERM studies and it's still emergency approved by FDA. Our children are being used as guinea pigs and I'm supposed to vaccinated my child for the greater good? The CDC's own data show kids are far more likely to die from cancer, drowning, the flu, homicide, suicide, etc. than covid 19.

So, no i don't approved of a covid vaccine mandate for children to attend school. I'll pull my child out of school before she's forced to get a vaccine just to attended public school. Many of my friends agree with me, we are prepared to homeschool. I wonder how that'll effect funding if more parents pulled their kids from the public school system? I know 20,000 more families chose to homeschool in the state of WA this year because of the mandates.

Concerned parent,
Carolee Spradley

Subject: Do Not Mandate the Covid Shot for Children.

External Email

Knowing firsthand an 8 year old boy who was hospitalized with an enlarged heart after receiving the covid shot, shows me there is great risk with this shot. Children have an extremely small risk of serious infection, let alone death from the illness. Fauci himself has said the vast majority of kids coming to the hospitals with covid are just that- they test positive when they've gone to the hospital for another reason, they are there WITH covid, not because of it.

I recorded the hearing on whether or not to approve the shot for 5 to 12 year olds. The ratio was FAR higher of doctors saying it is unneeded, unnecessary, and premature. Did you watch any part of it? I'd like to know that the people making these life or death decisions have gathered all the info they possibly can. Here is one small screen shot from those who spoke out against approving it...

Several members of the FDA's advisory panel pushed back on the agency's rush to clear Pfizer's vaccine for 5- to 11-year-olds.

"I'm just worried that if we say yes, that the states are going to mandate administration of this vaccine to children in order to go to school, and I do not agree with that," committee member Dr. Cody Meissner said. "I think that would be an error at this time until we get more information about the safety."

Temporary committee member Dr. James Hildreth said some estimates indicate that over 40% of all children nationwide have some form of immunity against Covid.

"It just seemed to me that in some ways we're vaccinating children to protect the adults when it should be the other way around," Hildreth said, adding that he supports vaccines for high-risk children. "If 30 million children already have some form of immunity, they've made their contribution to herd immunity already and our focus should be to get the adults vaccinated to protect the children."

—Robert Towey

Again, do NOT mandate this shot for anyone, let alone children who do not need it and it has proven to have much more serious risks than the illness itself.

Subject: COVID-19 Vaccine Requirements For School

External Email

To whom it may concern,

I wanted to reach out to let you know that I do not support adding these vaccines as requirements for school whatsoever. Nor does anyone in my family or anyone I know. It would be negligent to do so considering they have not been proven safe nor effective and are using a new form of vaccination that was created in too short of a time to possibly even pretend all side effects could be known, just as is the issue with all vaccines as their history and public record proves, but especially RNA vaccines which have had a horrible track record in the past hence why they were not introduced before. Our children deserve better and deserve to be given a choice as to whether or not they alter their immune systems with vaccines or let their immune systems do what they are meant to do naturally.

To act as though the immune system requires toxic injections, yes filled with registered toxins as you should know, is immoral and negligent especially when forced upon anyone let alone our children! They are humanities future and they need to be left alone, especially from these vaccines. Although the media tries to hype them up as safe and effective, as do our politicians and often health boards, when being honest with oneself we see many people dying and being injured from these vaccines, like the others, and we see many studies connecting them with horrific side effects and death. We aren't all falling for the media, the pharmaceutical and politicians mass psychological warfare here. Please do the right thing and say hell no to mandating them on anyone for any reason, especially our children. Schools are losing students left and right because of the already ridiculous COVID-19 mandates. Please just put a stop to this for humanities sake. Thank you so very much. Think of your kids, grandkids everyone else's kids and their rights to medical freedom!

Sincerely,
Carrie Lyman

Subject: Feedback on Covid 19 vax requirement

External Email

To whom it may concern,

I am writing to provide feedback on the potential requirement for Covid vaccine to be added to the requirement list for school and believe me if this is a requirement you will get a pushback from parents and drop in enrollment in kids throughout Washington State. The Covid 19 vax does not even meet the criteria you go by. Do not make this a requirement, and also drop the mask wearing for kids in school. It's abuse and no proven science that it's working. END MASKS and the push for vaccine! Let the parents decide what is best for their own kids and not the State of Washington!

Thank you for your time,
Stacey

Subject: Covid vaccine mandate

External Email

I am 100% opposed to a vaccine mandate for kids to attend schools. I say this as a physician and as someone who got vaccinated early on during the pandemic. Covid is not a health threat to the young, and while side effects from the vaccines are rare, they do occur. Why should children be forced to be vaccinated against an illness that poses almost zero threat to them using a vaccine that has known risks in the same young population.

Health care is supposed to be a personal choice that no one else is entitled to know out especially to mandate what you do regarding your own healthcare. Keep it that way!

Subject: Covid vaccine mandates for kids - just say no

External Email

There is no science behind mandating Covid vaccines for kids. More kids die from the flu every year than die from Covid. You have never mandated flu vaccines. Covid is spreading like wild fire among vaccinated people, so if it doesn't stop the spread of the virus and the kids aren't getting very sick from it, the mandate doesn't make sense. It is anti-science. Furthermore, mandating the vaccine and not leaving it up to the parents will cause a red wave in the next election. Think about ALL of the consequences of a mandate.

Subject: Covid-19 school vaccination

External Email

I am a parent of three and have two school age kids in school. It has been proven in our area that kids are not the spreaders of covid. They have been in school for over the past year without having huge outbreaks, our school district has facts to back it up. White River school district 416 has led the way to keep our children in school without having this requirement. Vaccination in children for covid is completely irresponsible. We have no long term data on how this will affect children/people long term. All other vaccinations that are required for school have gone through testing for years. I, along with many other parents (per a petition started by another parent we have over 250 kids in our district alone) will be pulling our kids from school if this is going to be made a requirement.

It 1000% should be the parents disgression to choose to vaccinate or not. Please listen to parents and DO NOT move forward.

Thank you!

Subject: Against school requiring COVID vaccine - a parent

External Email

I am a parent. I am a mom. I am a wife. I am a employee. I am a friend. I am a daughter. I am a niece. I am many many more things than these things. I am my own person. I believe in the United States of America. I believe in our rights as an America. I also believe it is my decision on what I get to put into my child's body.

I got the COVID vaccination because I wanted to see my parents who I had not seen since the start of COVID. I missed out on so much throughout the pandemic, and yet this vaccine was suppose to be the end to having to wear mask. At least that is what Governor Inslee said. Get the vaccine and you can quit wearing a mask. Well, that was shortly lived. I am vaccinated and yet, I still have to wear a mask when I go into places. I still have to show my vaccination card to eat anywhere in King County.

I have heard so many different things about the vaccines and kids. These things are about the myocarditis that kids are getting. Not all of them, not half of them, but some of them. As a parent, I do not want to do anything that could cause any heart condition in my child. Her dad has heart issues and this vaccine has me on edge for her. She is 13. I have heard things from people who work at Valley Multicare. People who have seen teenagers come in with side effects from the vaccine, that they didn't have before. Healthy kids. I have heard stories from nurses who refuse to get the vaccine for their kids as well. Because of the people they have seen come into the ER/hospital with problems from the vaccination. I have also read once about not knowing if this will cause fertility issues in our kids. I know that was a long time ago that I read that, but you can't honestly tell me that you know for a fact that this vaccine WILL NOT cause any issues in my kids fertilization when she decide to have kids. I am 41 years old. I am done having kids. If it messed with my fertility, so be it. But I refuse to get a vaccine for my kid who the long term side effects are not know.

I do not believe that this should be a requirement for children to be able to attend schools. What baffles me is this:

You get COVID you can spread COVID.

You get the vaccine, you can STILL spread COVID.

So, why should YOU choose for my kid a vaccination that us parents are not comfortable with? Especially since they can spread COVID with or without the vaccine. Let us parents deal with our decision to vaccinate or not to vaccinate. When my child turns 18, I will

definitely let her make her own decisions about her body, but until then, I feel like it is my and her father's decisions on what goes in her body and what doesn't. We have talked to her about the vaccine as well and right now she does not want to get it.

I really hope you listen to US parents. We know what is best for our kids, even if you think our decision is not the best. I grew this child in my body. I delivered her and together with her father we have raised an incredible young lady. I do not want to put something into her body that doesn't have enough studies showing what long term side effects will be.

Below are just some articles I found and some research that I have found about some of my concerns. Yes, these numbers have limited number of students, but with her father's history with heart conditions, this scares me to death!

Thank you for listening and please do what is right and DO NOT require the vaccination for COVID to be a requirement at school.

Thank you!
Michelle Cruz

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccines adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time.

Subject: halt covid vaccine requirement

External Email

Good morning,

I will be short and sweet, I humbly ask you ALL to deny having this particular "vaccine" required for all children to attend school, I request that real science, not political leanings would dictate your decision. If you do your homework you will find that this is not actually a vaccination, I also ask that you do some research of the Nuremburg Code and how it is illegal to force people to take anything into their body that they do not consent to. I would like to also mention that this "vaccine" is not only killing our youth and young adults but it is only still experimental. I recommend reading up on the laws surrounding this because us parents are not going to be caving to political demands that do not suite our families. I will be pulling my children from Washington schools if this passes and you and I all know that I am not the only family that would be lost to the public schools.

Sincerely,

Venita Davis

Hello,

I strongly oppose COVID vaccine for any human being. There have been zero safety studies. This is unethical to push a highly dangerous product on our very vulnerable children. VAERS numbers from the COVID vaccine have increased tremendously since the rollout of this vaccine. Side effects such as blood clots, paralysis and death are very common with this vaccine, how is this okay to mandate for children. Take a minute to look at this issue as a parent who does not want their kids lives to be toyed with in the name of making an extra dollar for the pharmaceutical industry.

Thank you.

To whom it may concern,

I emphatically request that you do NOT mandate a Covid shot. It's been proven that having the shot doesn't stop the spread and doesn't make children any safer.

Stop perpetuating fear and government over reach into the lives of our children. This must be a personal choice and not a government "mandate."

Thank you for your consideration.

Subject: Covid vaccine in schools

External Email

To Whom it may concern at Washington State Board of Health-

It is my understanding that that discussion for requiring children to be vaccinated against Covid 19 in order to attend public school is on the table. I would like to voice my opinion, which is shared by many other families in our state. I think this it would be a terrible decision to require the vaccine for children. I know many people who would pull their children out of public schools if this were the case (including myself). Some of these families would be able to give their children a wonderful homeschool environment, while others wouldn't. The divide that exists between children now would only get greater. Some children who's only safe place away from an abusive or neglectful home, would no longer have that safe place as an option. My children would be fine, but many would not be. I only see families in the Seattle area being fine with this. The rest of the state would not sit well with this decision. Do not let Seattle be the voice for the whole state. Our children have lost out on a great many "normal" things over the last year and a half.... don't force families to make a decision they were not ready to make and remove them from something that feels mostly normal. Families and communities will be divided (more that they already are). People are undecided about the vaccine for a great many reasons.... they should be allowed to have whatever feelings about it that they have. Validate our families in Washington state, they are thoughtful, caring people, who are not making this decision lightly. Do not bully them into making a decision they do not want to make. The vaccine has not kept people from being covid, nor has it stopped people from giving it to others. That alone should be food for thought. If it prevented covid and ceased transmission, this would be a different conversation.

Please consider the people of Washington state and do not make this mandatory... you will lose families, and many children will lose out on high quality educational opportunities.

I hope you all have a wonderful day and will make decisions not based in fear fed by the media.

Subject: Covid Vaccine opposition

External Email

Hello,

I hope this email finds you and your family well.

A few days ago, during a WA State Board of Health meeting, the advisory group spoke of whether they should recommend adding Covid vaccination to the current WA vaccine schedule for school and daycare entry. Unfortunately public comments were not allowed. The advisory group would be making a recommendation for our children without hearing from the parents.

I oppose the Covid vaccine being added to the school and daycare schedule. Children have mild to no symptoms from the virus, and are thus the safest. Covid Vaccine inserts are none existent to the public, leaving us without a knowledgeable and informed choice. Pharmacists themselves do not have access to a vaccine insert. We are told to believe and take the plunge yet so many have had horrible and evenly deadly complications from these vaccines. Please urge the advisory group to be cautious and not make recommendations for the Covid vaccine to be added to the school and daycare schedule.

Thank you for taking the time to read my opposition and concerns. I look forward to reading your reply.

The fact that there have been so many cases entered into VAERS in such a short time is especially troubling.

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.theepochtimes.com%2Ffeigh>

cdc_4163066.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C3cfa247b1c57427bcd6f08d9cb1bed49

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.theepochtimes.com%2Ffeigh>

cdc_4163066.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C3cfa247b1c57427bcd6f08d9cb1bed49

While most of the reports were of mild reactions like pain at the injection site or headaches and fatigue, roughly 10 percent of the reports indicated that the experimental jab had left them “unable to attend school” and about 5 percent said that they were incapacitated to the point that they were “unable to perform daily activities.”

That is A LOT of young, otherwise healthy children suffering in order to stave off a virus that is effectively no risk to them – not to even mention the fact that the experimental vaccine does not provide immunity from catching the virus.

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.thegatewaypundit.com%2F2>

video%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C3cfa247b1c57427bcd6f08d9cb1bed49%7C11d0

Subject: Covid vaccines for school children

External Email

Good afternoon,

I'm writing to voice my concern over requiring our k-12 students to receive a Covid vaccine in order to attend school.

The need for covid vaccinations is dropping. The new variant, omicron, is proving itself to not cause serious harmful symptoms but rather resembles more of a cold.

The covid vaccine isn't designed to prevent catching Covid, but rather to reduce severe illness. If the risk of severe illness has dropped dramatically because over 80% of eligible Washingtonians have been vaccinated or have natural immunity, and given that the new variants are less harmful - there is no emergency and no need to require the least vulnerable sector or the population - our kids - to receive this vaccine.

Parents should have the final decision on what medical intervention their kids should receive. Taking away this right over a vaccine that is absolutely not necessary for our kids will only create more of a distrust of our education/health system. And right now more than ever we need unity.

Sincerely,
C Rogers

Subject: RE: covid vax as a school requirement

External Email

Ladies and Gentlemen,

I would like to add a voice of STRONG dissent on the issue of making the Covid Vaccine required for school attendance.

While I could expound ad nauseam in long paragraphs of objection, for the sake of time and attention span, I'll address this issue in bullet points:

- * The vaccine does NOT prevent catching Covid, example all the break through cases. Even a 100% vaccine rates, would NOT eliminate this virus.
- * The vaccine does NOT prevent spread.
- * The vaccine is inconclusive at mitigating the extremes in symptoms. Following the "scientific method" of ALL things being equal EXCEPT with or without the vaccine is impossible, therefore to say it reduces symptoms is merely speculation.
- * The vaccine (all of them) DO contain cell lines of aborted fetal tissues which is objectionable to be used and injected into the body for those individuals with RELIGIOUS BELIEFS that guides them into a Pro-Life stance. Requiring a vaccine of this nature FORCES A VIOLATION OF RELIGIOUS FREEDOM.
- * The vaccine is NOT FDA APPROVED for regular use, only EMERGENCY.... WHEN NO OTHER COURSE IS AVAILABLE. There are other courses available.
- * Several other countries, if observed, have pulled vaccines from use in general, or by age specific because of the side effects tracked in their countries.
- * Per the BROAD spread and SEVERE side effects tracked in VAERS, if it was any other vaccine, it would have already been pulled from the market.
- * Children at the LEAST AFFECTED demographic of all those who get Covid. It is illogical to mandate a vaccine onto a demographic of people that is minimally effected by a virus.... yet THE RECORDED SIDE EFFECTS of the VACCINE are FAR MORE HARMFUL.
- * PARENTS HAVE THE RIGHT TO RETAIN DECISION MAKING OVER THEIR OWN CHILDREN!!! You can't possibly know each child's needs/beliefs to accommodate, nor bear the responsibility of the liability that a mandate would bring.

I sincerely hope that you heed the voices which say NO to a MANDATE, that you err on the side of maintaining the freedom of CHOICE, to include maintaining sovereignty over our own personal beliefs, and subsequently our bodies. This country has written in the founding documents and is known for FREEDOM; people flock to the country for this treasured characteristic, so don't chisel away at liberty one chip at a time, one issue at a time.

Should this vaccine become a requirement, I WILL pull the rest of my children from the public education system.

Subject: Covid vaccine schools

External Email

Please keep our children safe by not requiring the covid shots for school age children. At this time the vaccine available is still experimental—which means this is against Nuremberg. One cannot even see ingredients of this vaccine and information is “intentionally blank” when you ask a pharmacist to show you the paperwork. VAERS data on the CDC website shows multiple side effects and deaths. Myocarditis is the most known affect for children. Requiring this shot paves the way for lawsuits against the WA state health department and state, and perhaps you personally. Please do not support this requirement until this vaccine has been fully studied, tested, and stood the test of time.

Subject: Covid Vaccine Mandates

External Email

Dear Washington Board of Health,

I am writing because I am very concerned about the vaccine mandate that is being proposed in order for children to attend school.

Children are NOT at high risk for Covid-19. There ARE risks associated with vaccination. Where there is risk there must be choice. Are you truly considering segregating and denying a public education to those practicing bodily autonomy?

If you choose to mandate this liability free experimental shot, you & schools would be in violation of 21 US Code, 360bbb-3 which states "No EMERGENCY AUTHORIZED MEDICAL PRODUCT CAN BE MANDATED." Section e 1 A ii III gives me and my family "the option to accept or refuse administration of the product." This includes masks, the PCR test and the Covid vaccine for children which are all Emergency Authorized.

Regardless of authorization:

Help me understand how we can teach children that their "No" should be respected when we force medical products on them?

Help me understand how it is not discrimination to refuse a public education to a child based on the fact that they are choosing not to inject an experimental medical product?

Help me understand how an institution like the Washington Board of Health that dedicates itself to diversity, inclusion and belonging regardless of creed (as implied in your nondiscrimination policy) would turn a child away from school?

You are overstepping your bounds when you step in to tell families that they are not able to make these decisions for themselves. Coercing children to be jabbed for an education is criminal.

Sincerely,

Celina Green

A WA state citizen who WILL fight when you come after my children & a mother who has a child injured by childhood vaccines.

Dear BOH Members,

Please read today's post by mRNA scientist and pioneer Dr. Robert Malone.

Public Health is suffering from a structure that lacks checks and balances and alternative viewpoints. This is remedied at the local level, with individuals such as yourselves taking the time to listen to the doctors and scientists outside of the public health system.

I also encourage you to read: Over 200 Scientists & Doctors Call For Increased Vitamin D Use To Combat COVID-19 at <https://vitamindforall.org/letter.html>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fvitamindforall.org%2Fletter.html&>

. As many have been reporting to the BOH for nearly 2 years now, Vitamin D is critical for protection and recovery. It is necessary for both vaccinated and non-vaccinated to avoid severe disease. The federal level agencies are doing nothing to tell the public about Vitamin D and the many early treatment protocols. In fact, the federal agencies are doing all they can to suppress such information. While some nations are distributing Vitamins C & D and Ivermectin to their citizens (see all the studies at <https://c19early.com>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fc19early.com%2F&data=04%7C0>), our FDA is threatening doctors and pharmacists who prescribe or fill prescriptions. We need action at the local level to put health over Pharma profits.

Why, in all this time, has the BOH not issued a single recommendation for Vitamin D, nutritional and nutraceutical support, and early treatments?

Sincerely,
Bernadette Pajer

Dr. Eric Rubin, FDA advisory panel member, Harvard professor Editor-in-chief of the New England Journal of Medicine

spend the last two days gathering up my documentation. There is so much of it, that trying to organize it is problematic. Of course, once I have my full response – I will post it here also as well as sending it off to Reuters.

Therefore, this Substack is not going to be an essay but instead a synthesis of some of what I have discovered.

In this discovery process, I have uncovered this amazing video made by the Canadian COVID Care Alliance

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Femail.mg2.substack.com%2F%2FQjeQvM5vRxSj4IxshupHkqwu7NsZk6JcbqPK0g1Tnx08yrXTzCczmOyaPAXyzMnJMHsrR31Nn7dxL9-rusaLCRWHpLNv95ZKAghvCQOuWz9TcTepQVrPovF2ittR3qs_j8W6lO2Z3h_sNI1F_qeQvmidxlyQ7lAibTskuuXsJLdAM3yemNJKMS0Z_0DrmKd5ZEpwSXquy92VTlkIE4wuj8daKRV&data=04%7C01%7Cwsboh%40sbob.wa. This video goes through the Pfizer 6-month data shows that Pfizer's COVID-19 inoculations cause more illness than they prevent. Plus, an overview of the Pfizer trial flaws in both design and execution.

Please take the time to watch it and pass it on to your friends.

They also have a power point presentation called "More Harm than Good

> <https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Femail.mg2.substack.com%2Fc%2IX5niKSYG61ruV0fjqJl2b7vncWIjgP0aYv7yxkhBAOiV3K16NnpTbFirE2sa0hgSstE0zwFrho7u2G9Mff99dnyi_0MkzWsoVPR7pVjcTb46UC3HhveDnoRMDSpQcNFOo5h6c7twsw_qx-FPPlqvoyjaVCvazs2kh2azwgbm0WpMWSu0i1oPf2PSyRV_vI0aYAroH2vq40Dfs8YoRc7ucG6Earno26GFgWjL-INnY9-rMBsElaxtdalPR5H2B0LAU7j-aTKei&data=04%7C01%7Cwsboh%40sbob.wa.gov%7C8c1b03f22ab7459f1d6808d9caeb8f1c%7C11d0e21
". This presentation is extremely detailed and shockingly direct - it is basically the video
above in power point form.

Finally, for those that haven't seen it the primary document that the Canadian COVID Care Alliance used – one might wish to read the actual Pfizer Adverse Events report. This is a FOIA document of the first 2.5 months after the vaccine roll-out.

5.3.6 CUMULATIVE ANALYSIS OF POST-AUTHORIZATION ADVERSE EVENT REPORTS OF PF-07302048 (BNT162B2) RECEIVED THROUGH 28-FEB-2021

I have had about 70 direct reports of young athletes dying after vaccination from around the world. I am still trying to verify and correlate that data. Not to mention other deaths of young men, such as Ernesto Ramirez, Jr. Then there are the reports of the deaths from the British database. There are also the deaths of children listed in the VAERS database that the USG has yet to investigate and report on, but others have. This is all to be shared later.

I also have been compiling my references. I have 140 references so far that related to harms done by the vaccines. For those that are interested, the list can be found by clicking here.

Subject: Covid 19 Vaccine Consideration for 5-12 yo

External Email

Dear Unelected Person assigned by the WA B of H to Evaluate this Vaccine:

As you consider the Covid Vaxx mandate for school age children in WA this Friday, please consider:

Mandating an Experimental vaccine goes against the Nuremberg Code, Federal and State Statutes.

There IS NO APPROVED vaccine AVAILABLE within the US. Mandating this vaccine is therefore breaking laws at all levels, including international. This can then qualify as crime against humanity. Individuals are therefore liable for their own decisions within this matter; legally, "just doing my job" is not a defense.

Have you ever heard of Thalidomide? It may be before your time. Look it up. THAT WAS AN APPROVED medication. There are people still alive living with the detrimental results of that approved medication. This experimental gene modification therapy is not.

More Children have ALREADY died from this vaccine than EVER died since the first lockdown, per VAERS--which is notorious for drastically suffering under-reported adverse events.

The PCR test, per Kary Mullis (the inventor of the PCR test); was never to have been used to diagnose ANYTHING. Flu and colds virtually disappeared the past 2 years. WHY? The CDC no longer recommends the PCR test and admits it gave far too many false positives, which have been the justification for all of this medical tyranny. Using these numbers to REQUIRE an EXPERIMENTAL 'vaccine' is ethically wrong on all levels.

I implore you to DO THE RIGHT THING. STAND for LAW. STAND for FREEDOM and our liberty--while there is still some left. DO YOUR JOBS.

Jay McAfee
Bellingham, WA

Subject: 12 Jan 2022 Board of Health Meeting/ Regarding K-12 Vaccinations/ Item 11 @ 2:30 pm

External Email

Dear Board Members,

I implore you not to mandate Covid-19 vaccinations in order for students to attend K-12 School. Please familiarize yourself with CDC, WHO & NCBI studies concerning increased incidences of myocarditis and pericarditis after Covid -19 inoculations in children, before making this decision. Having experienced chest pains for several months after receiving my Pfizer Covid vaccinations, I can not in good conscience inoculate my children with these vaccines until legitimate vaccination trials occur, and they are not under the Emergency Use Authorization (EUA) Authority. By mandating this vaccine you will be driving a significant amount of students and families out of the Washington State education system; families that have happily complied with childhood vaccination protocols up until this point.

Please do not compound the psychological damage that has already been done to Washington State students with past school closures, and further prevent students from attending school. Please do not discriminate against students and dictate student health outcomes that should be left between Doctors and patients.

Your current K-12 Covid-19 Flowchart already discriminates against unvaccinated students that test NEGATIVE for Covid-19, but are contact-traced. It keeps unvaccinated students out of school for 7 to 10 days, despite having a NEGATIVE test, while their vaccinated peers are allowed to return to school with a NEGATIVE test. Please update your policies and flowchart with new CDC guidance, to prevent this discrimination. Equitable educational outcomes can not be achieved when students are denied school access based on their vaccination status. Please encourage all Washington State School Districts to offer the Washington State recommend "Test to Stay" program, which allows students that test Negative for Covid-19 to attend school. This program is not offered in our District.

Thank you for your time and careful consideration on this monumental decision.

Sincerely,

Michelle Wagner

Subject: Covid vaccination requirement for children

External Email

I do not support this recommendation for school children to be required to be COVID vaxxed.

The data is overwhelming that this is a MILD disease for children and that the potential HARM from vaccines is very real. So real that the risk of hospitalization from the vaccine is HIGHER, especially in young males, than the rate of hospitalization from COVID.

Additionally, if you can show me the long term data sets regarding the efficacy of the vaccine in the children cohorts, maybe this discussion could continue. If you can show me the long term data regarding side effects of the vaccine in children, maybe the discussion should take place. But this cannot happen, because it has NOT been studied.

There is no "informed" consent when it comes to the vaccine because there are no long term data to be able to compare and analyze risk/benefit for children.

Do not DO HARM to our children. Do not do POTENTIAL HARM to our children. If the risk outweighs the benefit, and it does, you cannot and SHOULD NOT force this on children.

Washington State Board of Health

I was sent an email and survey, regarding the WA Board of Health, discussing the potential requirements for all WA State School Districts to require Covid-19 vaccinations for children of 5-11 years old. There are tremendous different views regarding Covid, vaccines, information our elected leaders are spreading, use of therapeutics, mask mandates and on and on and on. I am not only a small business owner, here in the state, I have a Bachelors degree in Science from WSU, father of twin boys in the Mead School District, husband and a General Contractor, helping home owners.

I was speechless to hear, mandating Covid-19 vaccination for children 5+ years old in our public schools. The SCIENCE has shown, there is a much larger risk for the kids to get the Covid-19 vaccine, than to not receive the vaccine. Here is the SCIENCE, not POLITICAL reasons.

1. Children and young people have a mostly asymptomatic presentation when infected with SARS-CoV-2. They are at near zero risk of death from COVID-19.
2. There is an unusually high rate of reported adverse events and deaths following the COVID-19 vaccines compared to other vaccines. Some adverse effects are more common in the young, especially myocarditis. Where potential harm exists from an innovation and little is known about it, the precautionary principle dictates to first do no harm. Better safe than sorry.
3. Medium and long-term safety data about the COVID-19 vaccines are still lacking. Children and young people have a remaining life expectancy of 55 to 80 years. Unknown harmful long-term effects are far more consequential for the young than for the elderly.
4. Vaccination policies rely on expected benefits clearly outweighing the risk of adverse events from the vaccination. The risk- benefit analysis for the COVID-19 vaccines points to a high potential risk versus no benefit for children and young people.
5. Transmission of SARS-CoV-2 from children to adults is minimal and adults in contact with children do not have higher COVID-19 mortality.
6. It is unethical to put children and young people at risk to protect adults. Altruistic behaviors such as organ and blood donation are all voluntary.
7. Several prophylactic treatments as well as the COVID-19 vaccines are available to high-risk individuals so they can protect themselves.
8. Natural immunity from infection with SARS-CoV-2 is broad and robust and more

effective than vaccine immunity, especially in combating variants. Children and young people are safer with natural immunity.

9. There are several prophylactic (preventive) protocols and effective treatments available to children and young people with comorbidities.

10. Vaccinating children and young people is not necessary for herd immunity. After a year and a half of the pandemic, most people either have pre-existing immunity from other coronaviruses, have recovered from COVID-19 or have been vaccinated.

I hope this can find its way into the hands of the board members and their advisers, so a decision will be made, to allow the parents to make this decision on what is in the best interests of their children. Its may be in the best interest for some children to be vaccinated, but not all. This is the same for teens and adults. People should speak with their doctor, who actually knows the background of each and every INDIVIDUAL. Elected or appointed politicians do not know me or my family. I do not think this gives them the right to mandate what I do to myself or family. Unfortunately, this has become a political movement and not SCIENCE based issue.

Thanks

Paul Nix

Subject: Comments for 1/12/22 meeting...

External Email

Dear Board of Health Members,

I am providing comment on agenda item #11 - Rulemaking Petition – Chapter 246-105 WAC, Immunization Criteria, Child Care and School Entry.

I am an educator in Central Kitsap School District and as an educator I am fully vaccinated and I have survived the actual COVID-19 virus, so please do not toss aside my remarks as those of an extremist. I work with an average of 25 students each day ranging from Kindergarten to 5th grade. The students in my school have been amazing at complying with the restrictions and mandates in order to attend in person school again. Some of these mandates (like mask wearing) interfere with teaching and learning by reducing voice transmissions and blocking facial expressions while others (like hand washing and sanitizing) reduce germs and increase personal cleanliness habits. As we have acted on each of the requirements we have had the opportunity to see which ones make a positive difference and which ones do not.

I recognize that the public concern over transmission of the COVID-19 virus, and it's varieties, has caused public officials and law makers to create restrictions and mandates to show the public that their government leaders are working for the health and safety of the public. While I appreciate those efforts I do not appreciate having my choice removed when it pertains to my health and the health of my family.

Please do not create a mandate requiring a COVID-19 vaccine for school or childcare entry. Viruses change all the time, as we know from the annual flu virus. Requiring a vaccine for a virus will increase costs in many areas for example: new vaccines will have to be created and purchased annually to administer to the entire student and childcare populations to keep everyone updated. I believe that the COVID-19 vaccine should be made a yearly option, like the flu vaccine, to decrease a person's likelihood of catching the virus or suffering from extreme effects of it. As public officials you can continue to educate the population about good health and sanitation and keep them informed about their options without taking away their freedom of choice. People should not blame the government for their personal choices and the government should not cater to fixing everyone's personal problems.

Thank you for taking the time to read and consider my comments on not creating a mandate for or requiring a COVID-19 vaccine for school or childcare entry.

Sincerely,
Ruth Perkins

Subject: Do NOT mandate covid vaccines for Wa public schools- it is a PARENTS decision

External Email

Each family should decide for themselves if they want their own children to get a vaccine or not.

It is not the role of the Wa public schools to mandate what people decide to do with their own children's health.

Vaccines are a decision that each child's parents should decide based on their individual child's health - not the government.

Dear Sirs and Ms;
I have grandchildren, nieces and nephews that attend Washington public schools. Please DO NOT force these innocent children to get the Covid shot.
Not one single human being knows what the long term effects will be! I would hate to think that any of you would want to be responsible for medically injuring otherwise healthy kids.
Please think, look at the harm these shots have already done to thousands! The information is out there. VAERS (Vaccine Adverse Event Reporting System) is a good place to start.

Subject: Opposition to COVID vaccine mandate for schools

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdeallen-winsor-pfizer-eua-comirnaty-vaccines-interchangeable%2F&data=04%7C01%7CNathaniel.Thai%40sboh.wa.gov%7C5793de46824f426913af08d9>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. There are well documented risks associated with myocarditis in young males associated with these shots. Myocarditis is not a mild illness. Statistics show that 2 in 10 people with myocarditis will die within 2 years and 5 in 10 die within 5 years. Dead heart tissue does not regenerate itself.

4. The spike proteins associated with these shots have been shown to settle in female's reproductive organs, potentially affecting future fertility. In fact, there is currently a study focusing on changes in women's menstrual periods associated with the shots. To Whom it May Concern,

As the mother, and step mother, of 5 school aged children in this state, I STRONGLY oppose any measures to require Covid-19 vaccinations for our children. I am not opposed to vaccines in their nature, but do absolutely believe there needs to be more time to see what the long-term effects this specific set of vaccinations will hold before our children should be required to receive them.

That simply cannot happen yet with vaccinations just being released for school aged children, and boosters already being pushed.

I believe our children are our most important treasure, and pushing them into forced medical trials, for lack of any better terminology, will absolutely be detrimental to an entire generation entrusted to our care.

Please stand with parents when it comes to our ability to make the best decisions for our children in the middle of unprecedented times.

Jan. 5, 2022

Dear Kelie Kahler,

I am a parent to 3 young children (under 12) in the White River School District (Pierce County). I appreciate the need to keep our children safe in the school environment. There are many, many safety concerns to consider. But after 2 years of very difficult rules and regulations for our young children regarding COVID. I don't believe that this should any longer be the number #1 concern regarding our children. I think we need to find a way to carry on with "normal" life cautiously.

Our children can not carry on wearing masks to school indefinitely. It has caused interruption to learning for my 2nd grader. She was learning to read just as schools closed in 2020. Through all the zoom, partial open schools and irregular teaching lessons. She did not learn to read as she should have as a 1st grader. If the student can not see the teachers mouth to hear her pronounce and sound out words, learning to read is going to be extremely difficult. These youngest students are losing learning that they will never get back! Now she is a year behind in reading and I am doing everything I can to catch her up, because this affects all her other learning subjects too! I even hired a private tutor because I was so concerned about her falling behind. I am lucky that I have the means to pay for a tutor. But many parents do not, therefore their kids will just stay a grade behind. There is no clear evidence that masks are affective in the school environment. I don't know if you have been in a school lately... but you should really go and spend time in these classrooms. You will see that the kids are not even wearing their masks appropriately and the job of the teachers should not be "the mask police". They should just be able to freely teach their students.

I believe that requiring the Covid Vaccine for young children is NOT NECESSARY! I am not opposed to the vaccine, I actually received it myself. I am not opposed to vaccinations for children. All of my children have received all their regular vaccines. But Covid is not killing nor hospitalizing children! My entire family was sick with Covid over Christmas break (my husband and I are vaccinated) and it was no more than a minor cold/flu. Now that we have had Covid studies show that natural immunity is much more

powerful and longer lasting than the vaccine. So why do my children need to be vaccinated? I feel the possible long term affects to this very new vaccine could be far more damaging than very minisule possibility of death to covid. I would like to see another year at least of testing on this vaccine before it is administered to every child. I can see in the future it may be like receiving an annual flu shot and I think that is great! I do not believe in making it a requirement to attend school. I should have the choice as a parent if my child receives the vaccine and it should not be a vaccine or education choice!

Thank you for hearing my concerns and I trust that you will consider these as you make choices for the families and communities you represent.

Sincerely,

Amy Molen

Subject: Parent comment about public schools vaccine requirement

External Email

Dear Washington State Board of Health members,

I, along with many other concerned Parents across this State have grave concerns about adding the Covid-19 Vaccine to the list of required vaccinations amongst children of any age.

Requiring an mRNA injection that DOES NOT PREVENT DISEASE was never the intent of the legislature in it's delegation of authority to the State Board of Health to approve a schedule of immunizations for "vaccine preventable diseases". As you are all aware, this vaccine does not prevent one from getting the virus, or spreading it, even with follow up boosters.

Children are not at high risk of death from Covid-19. The latest variant comes to the majority of them as cold symptoms or nothing at all, and that INCLUDES children who's parents made the choice to vaccinate.

Requiring me to put my child at risk by getting a vaccine that offers perceived safety rather than actual immunity- is reason enough for me to pull my child from the public school system, and that is what I will do if this becomes a requirement.

I am a former elementary school teacher and a huge proponent for the public school system, however, I feel this is a slippery slope that our school systems will be falling into as to the future of vaccine/shot requirements and parent's freedoms to choose what is right for their children.

Thank you,
Jennifer Edington

Hello Members of the Board of Health,

This email is in regards to the proposal to add the vaccine for SARS-CoV-2 to the 2022-2023 school vaccine schedule.

At this time, I vehemently oppose any and all efforts to mass vaccinate the younger members of our society to a virus. The current vaccines have not had nearly enough time to undergo high-quality random control studies to truly determine the long-term safety and effectiveness of these vaccines in our children. (As you are all aware, vaccine development is generally a decade plus, not mere months.) The concerns of myocarditis in children (particularly male children) has not been alleviated. There is still plenty of legitimate concern about the currently available vaccines and their potential long-term effects on fertility, the immune system, and autoimmune disorders. The sample size used during testing was abysmal to anyone with even the slightest bit of knowledge about research methodology. The lack of data and transparency from the vaccine manufacturer is appalling (and should be a red flag to anyone).

This virus is not deadly to healthy children. The CDC's own data shows less than 1000 deaths to children from 0-19 since the beginning of this pandemic. While those deaths are absolutely tragic it must not be forgotten that the vast majority of those children had other comorbidities and were medically fragile. The CDC also fails to differentiate between those deaths from Covid and those with Covid.

Mass vaccinations fail to take into account immunity stemming from prior infection. While there is some debate amongst scientists how long natural immunity lasts, most support a minimum of 6 months strong immune response following infection. I will remind you that natural immunity provides the person who has survived infection with T cells, B cells, NK cells, and immune cells in the mucosal tissue (to stop reinfection and to prevent further spread during reinfection). As much as we would like to say that the vaccine also provides this protection, we can't because it does not give the recipient the entire virus. At this time the vaccines available are focused solely on the spike protein.

I realize that during the case counts are currently skyrocketing. If the current variant of the month was one of the earlier variants, I, too, would be very concerned for everyone, but we are talking about Omicron. This variant is for most of its sufferers a common cold in severity. It is not deadly. Hospitalizations are not surging, not even among Children according to today's report from Seattle Children's Hospital. The only thing surging is the fear driven narrative. My point in mentioning this is what happens if Omicron is a gift, and through all this suffering we actually achieve herd immunity (isn't that what you've been trying to sell us on the last 22 months?). Please, just wait and see.

Finally, let me remind you that covid cases in children are generally very mild and go away without any medical intervention. So, while Covid can be life threatening to the older members of society, our children should not incur risks that are not their own without the very best, sound scientific evidence (that is free from politicization or greed). And that evidence is going to take years, not months.

In summation, please consider the absolute risk and benefit of this vaccine and our kids.

This is a decision that cannot be made lightly, but at this time there is just not the evidence to support a mass vaccination requirement for any human, not to mention children. Please oppose any efforts to add this to the school vaccine schedule.

Thank you for your time and consideration.

Kindly,

Dionne Miller

Subject: My New Position

Hello all,

I just wanted to let you know that today I received my appointment letter for my new position. I'll be moving to PCH where I'll be working with Colleen Thompson in their policy shop. As I understand the position, I'll be providing policy support to the other analysts on the team with their various projects (i.e., not in charge of any projects myself ☐☐). I think my position description lists my title as Legislative Assistant, but I will certainly be changing that, as I don't want to be referred to as an LA! If you have any thoughts on a good working title, please let me know, as I can't think of any!

It's now official and I will be starting my new position on January 16.

Thanks again for such a beautiful send off yesterday. ☐

Christy Curwick Hoff, MPH (she/her)

Manager, Governor's Interagency Council on Health Disparities

Subject: No Covid vaccine mandates, please

External Email

Good morning. I am writing to voice my opposition to mandatory covid vaccinations for all public school children. Please don't further harm children and families by forcing us to choose between public education (which our taxes pay for) and potentially harmful substances injected into their bodies. You were hired or elected to represent the citizens of Washington State. Please honor your constituents by refusing to mandate covid vaccinations.

Thank you,

Lynnetta Ellis

Subject: Vaccine Mandate for Washington Students

External Email

To Whom It May Concern,

I write this letter in effort to make known my strong stance AGAINST mandating Covid19 vaccinations for our public school children. Over the holidays, my family had Covid run rampant through our gathering. Of the 10 people (8 adults and 2 children) who contracted the virus, only one of them was not vaccinated. He/she is the only one who experienced anything other than a mild cold. The one who chose not to get vaccinated is surely experiencing more severe symptoms, however is doing well. I realize this is only one example of thousands. I feel very thankful that our family had these mild symptoms and do not take that lightly. All that to say... the vaccine seems to be helpful. Obviously not Covid19-proof, but we all knew that would be the case. And your job is now done. Thank you for the initial vaccine push and for surely being in support of the FDA emergency release. Now it is up to individuals. Enough control. The spread of Covid 19 CLEARLY cannot be stopped. It is now part of our culture. We will get it. You. Me. Everyone. Please stop trying to stop the spread... it is a dead end. That being said, if families CHOOSE to vaccinate their children, GREAT! If not, they will get it. Maybe not today or tomorrow, but absolutely they will get it. And that's ok! As you surely are aware, after reading ANY study that has been done, children are truly not severely affected by Covid 19. Citing all the sources to prove that fact is pointless as the evidence is so obvious. Without acknowledging that fact and adopting this perspective, this disaster we have allowed our country to endure will never end. Please know that my entire family, which includes many public school students along with teachers will ALL pull directly out of the public school system and seek private education going forward if the Covid 19 mandate goes into effect for our youth. I beg you to reconsider and let American families have choice.

Thank you,
Jenna Starr

2. Con

I hope this email finds you and your family well. A few days ago, during a WA State Board of Health meeting, the advisory group spoke of whether they should recommend adding Covid vaccination to the current WA vaccine schedule for school and daycare entry. Unfortunately public comments were not allowed. The advisory group would be making a recommendation for our children without hearing from the parents. I oppose the Covid vaccine being added to the school and daycare schedule. Children have mild to no symptoms from the virus, and are thus the safest. Covid Vaccine inserts are none existent to the public, leaving us without a knowledgeable and informed choice. Pharmacists themselves do not have access to a vaccine insert. We are told to believe and take the plunge yet so many have had horrible and even deadly complications from these vaccines. Please urge the advisory group to be cautious and not make recommendations for the Covid vaccine to be added to the school and daycare schedule. Thank you for taking the time to read my opposition and concerns. I look forward to reading your reply. Douglas County Resident

Subject: FW: Opposition to the Upcoming January 12, 2022 Covid-19 Vaccine Requirement Recommendation

From: S J <ewdnbbd@yahoo.com>
Sent: Wednesday, January 5, 2022 5:27 PM
To: monroe.artist114@yahoo.com
Subject: Opposition to the Upcoming January 12, 2022 Covid-19 Vaccine Requirement Recommendation

External Email

To Whom it May Concern;

I am submitting this email in regards to the upcoming January 12, 2022 decision recommending the Covid-19 Vaccine for school age children.

Public education is funded by taxpayers and should not be withheld from ANY child in Washington State based on their personal or religious beliefs and preferences. Our children deserve equal access to education without discrimination. Segregating our children by forcing parents to make decisions to un-enroll their children in Public Education and find alternate means of education or in many cases, leaving the state completely, will not cure Covid-19. It will only increase childhood depression and anxiety and, as you all should know, even increase suicidal tendencies in Washington State Youth.

Washington State, in my opinion and that of numerous fellow parents I have spoken with in regards to the subject, has operated at an extremely poor level during this pandemic. It has promoted division and supported the isolation of our children by implementing online learning as opposed to in-person learning, and the requirements that have been imposed on our children when they were allowed to return to in person learning are proving to be detrimental to their mental health and well-being even now. I implore you to talk to students at all grade levels and actually see what they are thinking and how they feel being in the situations they are in with the restrictions in place. Given that Washington State has seen a withdrawal of students from their Public Education program over the past two years in excess of 55,000 students, this should be a blatantly obvious indication that the decisions being made that effect the students of Washington are not "Popular". If this becomes a requirement, the number of students pulled from Public will grow exponentially. Washington State is already disregarded across the country with the poor handling of the pandemic and the excessive restrictions that leadership has put in place, don't add any 'Fuel to the fire' by adding yet another layer to this already

disgraceful situation.

The Covid-19 virus and its continued variants are something that we are ALL going to have to live with going forward. It is abundantly clear at this point that vaccines and masking have not solved the issue. It is being reported that upwards of 70% of Omicron infected patients are all vaccinated. I personally know of several Breakthrough cases of Covid-19 in family and friends, and some of them were severe enough to end up in ICU BEING FULLY VACCINATED! The rules for masking, types of masks, etc. change so often a person could get whiplash attempting to keep up with current protocols. My family and I have all had, and recovered, from Covid-19 even with the protocols in place.

I am firmly against the requirement of the Covid-19 Vaccine for our children to attend public school. This is not something that was put forth by a vote of the People of Washington State, nor is it accommodating for all of our children. As a parent of 3 children in Public Education, I am imploring you oppose making the Covid-19 Vaccine a requirement to attend Public School in Washington State.

I thank you for your time.

Shiriah Jelenek

Subject: Vaccine mandates

External Email

To all state health board members:

If the past few weeks have taught us anything, it's that the vaccinated population is still catching and spreading COVID-19. Please DO NOT propose any more mandates, especially for our children. Since the beginning of this pandemic, studies have shown children are the least affected by the virus, and to require vaccines for them that have been proven to cause adverse symptoms, such as myocarditis, is RECKLESS. We do NOT have long term data on what this will do to these children 10, 15, or even 30 years from now. The risk versus the benefit is not at all worth it. All vaccine mandates should be stopped.

Thank you,
Beverly Winsor

Subject: No Covid Vaccine Mandate

External Email

To whom it may concern,

Let me start off by saying I am NOT anti-vax, never have never will be. This one is different for me. With the vaccine in its current state of not stopping contracting or spreading of Covid, I do not see how you can mandate THIS vaccine! We ALL have to admit that this vaccine is not doing its intended purpose. The narrative keeps changing as we go along. First we were told you WOULD NOT get Covid if you were vaccinated, then it was you cannot spread it but you may get it. Science shows that the viral load is the same, vaccinated or not. Now, months down the line, we are at the point where it is doing nothing but "possibly" preventing some serious illness. Those that feel they need to be vaccinated to help alleviate some symptoms, let that be their choice. But to mandate something that is neither preventing, nor stopping Covid is insanity. If thousands and thousands of people were getting chicken pox after being fully vaccinated we would ALL be questioning the efficacy of the vaccine. The fact that we are not questioning this one, but instead trying to move forward with making it mandatory is just asinine. My two healthy teenage boys will not be getting this vaccine. If this becomes a mandate, my 4.0 GPA 3 sport students will be pulled from public school. After working on our local school bond committee, I am well aware of the cost effect that will have on the school district and state. I also know hundreds of families that will follow suit. This will shut down these smaller 2AA schools and therefore subsequently destroy towns across this State. Parents are TIRED of being told how to raise our children by someone who has never even met them. Let this vaccine be a personal family choice and leave it at that.

Thank You,
Katie Ogle

Subject: NO to additional COVID mandates

External Email

Dear WSBH members,

I am a parent and am urging you to vote NO to any Covid mandates for our school children.

I am gravely concerned about the health effects on my children from ANY mandates, let alone NEW mandates, regarding their vaccination status, masks, or testing. It is known that children are at extremely low risk of catching or passing on Covid and there is a higher risk of morbidity or mortality to any child from a Covid shot.

See the actual Pfizer data explained here:

<https://www.canadiancovidcarealliance.org/wp-content/uploads/2021/12/The-COVID-19-Inoculations-More-Harm-Than-Good-REV-Dec-16-2021.pdf?fbclid=IwAR1O1PmNu3-TE0A-PYpPz1nFdNzmvJwW77a7I3hJiI7K-7j3KDnfl-nZzww>

Subject: COVID-19 Vaccine Mandate Proposal for Schools

External Email

To the Washington State Board of Health,

As a parent and 12-year resident of Anacortes, I wanted to take the opportunity to express my concern regarding the discussion/decision to mandate COVID-19 vaccinations for students in order for them to attend in-person learning and participate in school-sponsored extracurricular activities.

Before voting to recommend implementation of such a drastic measure, I would encourage each of you to consider the following:

It is well known and documented, as reported by the CDC, FDA and vaccine producers, that the COVID-19 vaccine does NOT prevent a person from contracting COVID-19.

It is well documented that a person who is vaccinated is still able to spread COVID-19 after having contracted the virus.

It is well documented that the vaccination ONLY protects the person who is vaccinated by decreasing (not eliminating) the likelihood of experiencing more severe symptoms from COVID-19.

It is well documented and reported that ANY person who has previously been infected by, and recovered from, COVID-19 possesses a higher level of immunity than a person who has not had COVID-19 and is vaccinated.

According to the Washington State Department of Health, since March 2020, in Skagit County there have been ZERO deaths from COVID-19 among kids aged 0-19. There have been only 12 hospitalizations for COVID-19 in the same age group.

It is well documented that the Flu virus is significantly more harmful to kids than COVID-19, yet Flu shots have never been mandatory to attend school.

Vaccinated individuals are able to transmit COVID-19 to others who are vaccinated.

Current K-12 COVID-19 protocol allows vaccinated individuals who have been exposed to COVID-19 and are asymptomatic to remain in contact with others. Even though it is known that a vaccinated individual is still able to contract and transmit COVID-19 while asymptomatic as mentioned above. With this practice in place, you could argue that an asymptomatic vaccinated individual could be more likely to infect others.

Considering the above points of fact (not opinions), it is reasonable to conclude the following when analyzing the risk with respect to COVID-19:

The only person assuming increased risk with respect to COVID-19 is the individual who is NOT vaccinated.

The un-vaccinated individual poses NO INCREASED risk to ANYONE else who is vaccinated.

Given the incredibly low rate of death (ZERO) and hospitalization among kids aged 0-19 in Skagit County since March of 2020, COVID-19 poses a VERY LOW risk to students.

The overall risk of COVID-19 to students is negligible and ONLY assumed by the UNVACCINATED. Therefore, it makes no sense to implement and enforce a Vaccine Mandate for COVID-19 under the threat of denying students the opportunity of in-person learning and school-sponsored extracurricular activities should they (and their parents) choose to not get vaccinated.

Regarding the concern about the risk to teachers and staff - again, the only risk is assumed by the unvaccinated. Those who are vaccinated are protected. And vaccinated people can transmit COVID-19 among other vaccinated people.

This is a very different scenario than the Mumps, Measles, and Rubella vaccine requirements in that symptoms and complications for anyone exposed to MMR can result in pneumonia, seizures, encephalitis, immunosuppression, hearing loss, blindness and death if contracted. Again, to date, we have NOT seen anything to this level among children aged 0-19 with respect to COVID-19.

In conclusion, given the points of fact laid out above, I implore you - as our duly elected officials - to honor and defend our rights to Privacy and Medical Freedom as laid out by both the US and Washington State Constitutions by NOT implementing such a mandate. If such a mandate is implemented, you are setting the State up for legal action for something that is of negligible risk.

It is incumbent upon you all to do your due diligence and research on this subject prior to levying such an unconstitutional mandate on your community. This is about choice. Do the RIGHT thing, not the EASY thing, and DO NOT RECOMMEND A COVID-19 VACCINE MANDATE FOR OUR CHILDREN TO ATTEND SCHOOLS.

Thank you for your time and consideration on this very important matter.

Sincerely,
Jason Zaharris

Parent, Anacortes School District

Subject: Mandating Vaccines for school age children

External Email

Please consider voting against mandating the COVID-19 vaccine for children at this time. The studies that have been conducted have very few participants and the long-term effects have not been considered. There also seems to be a rather large percentage of young men who are developing heart conditions, until it is determined why this is, the vaccine should not be mandated for anyone. There are too many adverse effects being reported and ignored.

Thank you,
Dana Walker

Washington State Board of Health

Please please do not mandate vaccine on all of our children! This vaccine has not been studied long enough and we do not know the side effects! Not all children are the same, my children have had Covid and recovered very very well and quickly from it and now it's been over a year of natural immunity, and we've never done better. Children are at such low risk, taking the vaccine has a higher risk than just getting Covid! Please let parents make the best decision for their kids, the government should never ever implement any type of vaccine on children or adults for that matter. Please know I am not anti-VAX, my kids have every other deadly disease vaccine, this is just not one of them, we would ever consider for our children!

We are begging you please leave the children alone!!!!

Kindest regards, Valentina Koszorus

Subject: We as parents should be able to decide

External Email

Please do not take our rights to decide what is best for our children away from us parents. This is a slippery slope to start taking away that right. Requiring our children to get the covid vaccination to go to school is not right - you do not have any rights to decide what is best for our children as we don't have any rights to tell you how to care for your children.

Thank you Elizabeth Wilson

Subject: January 12th Decision

External Email

Hello Washington State Board of Health Members,

I am writing to you on this day regarding your decision to recommend the vaccine requirement for school aged children on January 12.

My name is Marisa Stephens and I am a teacher, a mom of a 4 year old and expecting my second baby. I am writing to express my concerns about making this shot, which many think will "stop this pandemic", a requirement for school aged children.

Over the last 2 years, we have been living in an extremely hard time as a nation, as COVID has continued to mutate and spread despite the rise in vaccinations and boosters. I have many family members and friends who have received the shot and have still gotten sick with COVID and have also spread it to others. To think that requiring the shot for more people is the right answer is mind boggling to me. The narrative is, "get the shot to protect yourself and others", but as we can see by the rapid rise in cases, this is not true.

There are many natural ways to prevent getting COVID, and honestly, most people who get COVID recover from it. I am in no way saying that COVID is not serious. My dad was hospitalized in August with COVID, but we were able to send him to the hospital with Hydroxychloroquine, Vitamin D, Zinc, Vitamin C, and they put him on high flow oxygen. He was in the hospital for 10 days, and a few times they thought they were going to move him to the ICU. He recovered in a couple of months. It is January and he is back up teaching PE. He is shot free, and has done a lot of research on other ways to combat COVID.

There are so many ways to fight COVID once you get it. A shot that does not prevent you from spreading the virus or prevent you from getting it, is not the answer. If the shot truly worked, we would not have to wear masks anymore and if the masks truly worked, then we would not be in this position. But we are still at square one. Making a requirement for a shot that does not stop the spread to adults and children alike, is beyond crazy.

COVID is real, yes. I know many people who have had it very severely, but there are many proven therapeutics used to combat this virus. I have many friends and family members who have used therapeutics along with preventative care such as exercise, vitamin D, vitamin C, Quercetin, Zinc, and eating a balanced diet. I have had family and friends who have taken Hydroxychloroquine, Ivermectin, and went to medical facilities to get the Monoclonal Antibody Treatment. These have all worked very well. Treating their

symptoms with cold medicines, Tylenol, ibuprofen, and staying hydrated, resting, getting fresh air, and making sure to get up and move, are things that ACTUALLY help with COVID recovery.

As a mom of a young child, a teacher, and a citizen of Washington State, I am asking that you really consider this decision you are about to make. Requiring our most vulnerable community to put an experimental substance in their body when we do not know how it will affect them in the future is irresponsible. Every person is unique with an amazing immune system. Anything you do to or put into your body affects each individual person differently. Health decisions should always be a personal decision, not a requirement.

So once again, as a concerned WA state citizen, I believe you should reject this requirement and let parents make the best choice for each individual child. If a parent believes the shot is best for their child, then by all means, that is their prerogative. If a parent believes that the shot is not the best health decision for their child, then that should be respected, as well. Choice is important, and we are living in the land of the free, right?

I will be praying for all who are part of the health board as you make this major decision for our state. I know that God is in control, and He has all of you wrapped up in His hands. With the grace of God, I pray you will be able to make the best decision for our state.

Thank you for reading my email. I hope you really listen to the public on this very important decision.

Sincerely,

Marisa Stephens

Subject: Parent Letter Re: Child Vaccine Requirements

External Email

Jan. 5, 2022

Dear Christy Hoff,

I am a parent to 3 young children (under 12) in the White River School District (Pierce County). I appreciate the need to keep our children safe in the school environment. There are many, many safety concerns to consider. But after 2 years of very difficult rules and regulations for our young children regarding COVID. I don't believe that this should any longer be the number #1 concern regarding our children. I think we need to find a way to carry on with "normal" life cautiously.

Our children can not carry on wearing masks to school indefinitely. It has caused interruption to learning for my 2nd grader. She was learning to read just as schools closed in 2020. Through all the zoom, partial open schools and irregular teaching lessons. She did not learn to read as she should have as a 1st grader. If the student can not see the teachers mouth to hear her pronounce and sound out words, learning to read is going to be extremely difficult. These youngest students are losing learning that they will never get back! Now she is a year behind in reading and I am doing everything I can to catch her up, because this affects all her other learning subjects too! I even hired a private tutor because I was so concerned about her falling behind. I am lucky that I have the means to pay for a tutor. But many parents do not, therefore their kids will just stay a grade behind. There is no clear evidence that masks are affective in the school environment. I don't know if you have been in a school lately... but you should really go and spend time in these classrooms. You will see that the kids are not even wearing their masks appropriately and the job of the teachers should not be "the mask police". They should just be able to freely teach their students.

I believe that requiring the Covid Vaccine for young children is NOT NECESSARY! I am not opposed to the vaccine, I actually received it myself. I am not opposed to vaccinations for children. All of my children have received all their regular vaccines. But Covid is not killing nor hospitalizing children! My entire family was sick with Covid over Christmas break (my husband and I are vaccinated) and it was no more than a minor cold/flu. Now that we have had Covid studies show that natural immunity is much more

powerful and longer lasting than the vaccine. So why do my children need to be vaccinated? I feel the possible long term affects to this very new vaccine could be far more damaging than very minisule possibility of death to covid. I would like to see another year at least of testing on this vaccine before it is administered to every child. I can see in the future it may be like receiving an annual flu shot and I think that is great! I do not believe in making it a requirement to attend school. I should have the choice as a parent if my child receives the vaccine and it should not be a vaccine or education choice!

Thank you for hearing my concerns and I trust that you will consider these as you make choices for the families and communities you represent.

Sincerely,

Amy Molen

FDA recently approved Emergency Use Authorization of COVID-19 booster vaccination for children aged 12-15.
Urgent review of these unpublicized facts should be of utmost concern to the healthcare community, particularly anyone recommending or administering genetic vaccines to children.

Children are at negligible risk of death from COVID-19
Risk of death from COVID-19 among all causes is 1% for younger than 18 years, lower than death from car crash or suicide.

COVID-19 genetic vaccines are very different from traditional vaccines
COVID-19 genetic vaccines distribute widely throughout the body and force expression of the cell damaging viral spike antigen in many tissues (manufacturer regulatory filings).
Adverse events are much more prevalent following COVID-19 genetic vaccines as compared to traditional vaccines.

Are you fulfilling the legal requirement to provide Informed Consent to those receiving genetic vaccines under Emergency Use Authorization?

On Mon, Jan 3, 2022 at 8:52 PM Jon Borcharding <jonreadsitall@gmail.com> <<mailto:jonreadsitall@gmail.com>> > wrote:

I just finished viewing the zoom meeting of the Technical Advisory Group assigned to the task of advising the Washington Board of Health on the question of including the covid vaccine to the list of required vaccines for children in educational and childcare settings. Thank you for the opportunity to witness the meeting through zoom. I look forward to following the process of the TAG as you work toward a recommendation.

During a brief presentation of the "nine criteria" by Samantha Pskowski, I was struck by the fact that many of the criteria appear entirely inappropriate to the consideration at hand. I am referring to the numerous instances in which the phrase, "vaccine containing this antigen" is used.

The "vaccine" in question is not actually a vaccine. It does not contain weakened or dead viral material like other vaccines. It contains no antigens. It is a medical/genetic protocol containing strands of synthetically produced mRNA. When injected into human tissue these strands program human cells to produce the spike protein associated with the disease, Covid 19. The body then produces antigens against those spike proteins.

This new technology has never been used on humans outside of a brief flurry of testing prior to the issuance of an Emergency Use Authorization. Is it not then reasonable to expect that new, accurate and appropriate criteria be employed in the assessment of the mRNA treatments prior to considering the requirement that practically all Washington children be injected with those treatments?

I find the inaccurate criteria particularly troubling in light of the fact that the mRNA treatments are still being administered under an EUA. The manufacturers have secured for themselves complete immunity from civil liability under the EUA. With these facts in mind, it appears the TAG could be the last line of defense against what may in the future prove to be a terrible medical error involving a segment of the population with no power to influence the decision.

I strongly suggest that another criterion be added. That is: How will we as a society address the harm in the form of injury and death to children?

There are several studies showing the VAERS system has a history of vastly underreporting adverse events. Current statistics from VAERS show over 20,000 people killed by the mRNA protocol. The number of adverse reactions associated with the mRNA protocol are unprecedented in the history of vaccines. Will the TAG suggest a tolerable limit on the amount of injury or death of our children?

The alternative is to ignore the injury and death currently being documented in our adult population and hope that our children won't be equally affected.

Respectfully,

Jon M. Borcharding

To Whom it May Concern,

My name is Summer Pruitt and I am a wife, a mother, and a life long resident of Washington State. I am completely OPPOSED to any mandate of the Covid vaccine for public school children. This is unconstitutional and would be of great detriment to the Washington State public school system. With enrollment already down by nearly 60,000 this would cause an even greater nose dive as I fully believe a majority of parents would pull their kids from public schools immediately. I want my voice to be heard! The parents of Washington State will not sit by and let this happen. We will stand our ground for our freedoms and the freedoms of our children!

Sincerely,
Summer Pruitt

Subject: Violations of moral and ethical treatment of children

External Email

Regarding the discussion of covid-19 vaccination requirements for children. The fact that you as individuals would even consider such a heinous, evil and morally bankrupt approach is beyond a lack of moral character, it borders on a level of evil that is unprecedented.

This goes beyond any political decision, it is a decision point for you all as individuals that will follow you for the rest of your lives.

Simply put (all of this data is well researched and available – and you all know this):

- * The data is empirically proven that these vaccines do NOT prevent anyone from getting or transmitting covid to others.
- * The data is empirically proven that these vaccines do NOT create ANY safety for anyone else, beyond the undetermined and temporary reduction of individual symptoms.
- * The data is empirically proven that children have an almost zero statistical risk of covid symptoms.
- * The data is empirically proven that children do not have high transmission rates to pass on covid to adults, in fact the transmission rates are far lower than the flu.
- * There is ZERO long term testing on the impacts of these vaccines on children. By definition, we have no longitudinal studies on side effects or long term health impacts.

In addition, what we see across the world, are that those places with lockdowns and vaccines mandates show no measurable difference in covid rates at all.

So, what we have are three factors:

1. The vaccines do not prevent transmission.
2. The vaccines have no long term testing for side effects and health impacts.
3. Children have almost no risk from covid in any rate.

So, to risk long term consequences for no appreciable benefit is beyond idiotic and misguided, it is evil. Our role as adults and parents is to protect our children, not use

them as political pawns in misguided and ill conceived political stances.

If you are to put these requirements in place then our response will be to immediately withdraw from the school system and move out of this State.

I hope you think long and hard about this, and do the right thing.

Michael

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaxx to the WAC 246-105 schedule of required vaccines for children to attend schools.

You all should be ashamed of yourselves for taking this as far as you have!

Subject: vaccine requirement for Washington students

External Email

Hello all-

We are sending this email in strong opposition to any potential mandate calling for the required vaccination of Washington students. This needs to remain a family decision and should have no bearing on whether or not a child can attend school. We feel that the risk of vaccine injury is greater than the benefit of vaccination at this point.

We appreciate your time and consideration,
Jill & Curtis Bruun

Subject: Vaccine mandate for K-12

External Email

Good afternoon,

I am writing in regards to the potential requirement of a forced experimental "vaccine" on our children to attend public schools. Enforcing such a requirement would wreck our small communities especially. Our family as well as many others in our small community and surrounding communities have already stated that we will not send our children to any school if there is a requirement for an experimental vaccine such as the Covid-19 vaccine for our children to attend school. Enforcing this requirement with no options for parents to their rights of choice, will result in the loss of children in our schools and the potential collapses of the schools and communities. I imagine this would be a domino effect in bigger cities as well. If they haven't already, parents will quit their jobs to homeschool and we will see an even greater economic downfall. This would be a detrimental decision on so many levels. Please think about if you are ready to be held personally responsible for enforcing a requirement on children when you have no idea of the immediate and/or long terms effects these shots will have on children. Children that will be subjected to the potential risks of a shot because their parent(s) feel that they have no other option.

God entrusted each of us with our children not the government to decide what is best for our children. It needs to be the parents choice.

Thank you for your time and consideration.

Jan. 5, 2022

Dear Washington State Board of Health Representative,

I am a parent to 3 young children (under 12) in the White River School District (Pierce County). I appreciate the need to keep our children safe in the school environment. There are many, many safety concerns to consider. But after 2 years of very difficult rules and regulations for our young children regarding COVID. I don't believe that this should any longer be the number #1 concern regarding our children. I think we need to find a way to carry on with "normal" life cautiously.

Our children can not carry on wearing masks to school indefinitely. It has caused interruption to learning for my 2nd grader. She was learning to read just as schools closed in 2020. Through all the zoom, partial open schools and irregular teaching lessons. She did not learn to read as she should have as a 1st grader. If the student can not see the teachers mouth to hear her pronounce and sound out words, learning to read is going to be extremely difficult. These youngest students are losing learning that they will never get back! Now she is a year behind in reading and I am doing everything I can to catch her up, because this affects all her other learning subjects too! I even hired a private tutor because I was so concerned about her falling behind. I am lucky that I have the means to pay for a tutor. But many parents do not, therefore their kids will just stay a grade behind. There is no clear evidence that masks are effective in the school environment. I don't know if you have been in a school lately... but you should really go and spend time in these classrooms. You will see that the kids are not even wearing their masks appropriately and the job of the teachers should not be "the mask police". They should just be able to freely teach their students.

I believe that requiring the Covid Vaccine for young children is NOT NECESSARY! I am not opposed to the vaccine, I actually received it myself. I am not opposed to vaccinations for children. All of my children have received all their regular vaccines. But Covid is not killing nor hospitalizing children! My entire family was sick with Covid over Christmas break (my husband and I are vaccinated) and it was no more than a minor cold/flu. Now that we have had Covid studies show that natural immunity is much more powerful and longer lasting than the vaccine. So why do my children need to be vaccinated? I feel the possible long term affects to this very new vaccine could be far more damaging than very minisule possibility of death to covid. I would like to see another year at least of testing on this vaccine before it is administered to every child. I can see in the future it may be like receiving an annual flu shot and I think that is great! I do not believe in making it a requirement to attend school. I should have the choice as a parent if my child receives the vaccine and it should not be a vaccine or education choice!

Thank you for hearing my concerns and I trust that you will consider these as you make choices for the families and communities you represent.

Sincerely,

Amy Molen

Sorry I forgot to identify myself on the first email. This is the corrected email.

☐Dear Sirs and Ms;

I have grandchildren, nieces and nephews that attend Washington public schools. Please DO NOT force these innocent children to get the Covid shot.

Not one single human being knows what the long term effects will be! I would hate to think that any of you would want to be responsible for medically injuring otherwise healthy kids.

Please think, look at the harm these shots have already done to thousands! The information is out there. VAERS (Vaccine Adverse Event Reporting System) is a good place to start.

Subject: Vax mandate for kids

External Email

Please consider the science. Children are at little risk for side affects from this virus and it appears vaccinated are still getting it. Hospitals that are honest admit over 50% of children admitted to hospital are for other reasons than Covid.

This is not necessary. No mandates for children.

WSBOH Members, I oppose the mandate to have our children vaccinated with the experimental COVID vaccine. Even the scientist who invented the MRNA breakthrough said publicly that the covid vaccine is dangerous to children. Follow the science. As it happens no one can PROVE based on any studies that the covid vaccine is safe for children. As a parent, my children's immediate and long-term health is my top priority. With my own personal research, I know that the risk for cardiomyopathy as well as many other long-term health problems is a potential outcome. I do not accept this risk by giving this experimental vaccine to my children, nor should other parents be forced to. Along with our healthcare providers, we say NO to this mandate for our children. Respectfully, Devorah Nelson

Subject: Upcoming policy topic (involuntary detainment etc)

External Email

This is in regard to the following proposed policy-

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

I'm writing to remind you to be on the right side of history, and not even consider that anyone should be involuntarily (forcefully) detained and placed in a quarantine facility, and even force vaccinated.

This is an appalling proposition, and you should be ashamed. If you are not noticing the parallels to concentration camps in the past, then you aren't paying attention, and you have been highly deluded to think it is for "the greater good." Eroding our basic human rights to refuse any treatment is flat out WRONG. The people will not stand for it and you can bet it will get very ugly for you before it is made right again.

Now is your chance to stand up for what are basic human rights. If our human rights are taken away, it's not about health anymore. Some day will you be explaining to your grandchildren (1) How you demolished the basic human rights of your constituents, or (2) How you stood up for them despite the current lying, false mainstream narrative?

Think hard before you decide. Be on the right side of history. Listen to your conscience.

Choose wisely.

Sincerely,

Cassandra Hare

Subject: Public Comment

External Email

Hello -

This is my public comment for the upcoming meeting on adding the Covid Vaccine to the line of up required vaccines for K-12 education.

According to the Board of Health's own criteria, a vaccine must be fully FDA approved in order to make it mandatory for school attendance. The current Pfizer vaccine in use for children in this country is still an Emergency Use Authorization only vaccine, so I do not see how this meets the Board of Health requirements. I recommend against mandating for school until the vaccine proves immunity to stop transmission like other common vaccines do, which was the requirement under consideration in the 1905 Jacobson vs. Massachusetts SCOTUS case in which it stated mandates could only be considered which "prevent the spread of contagious disease." So far, it is evident that this vaccine does not stop transmission and, therefore, should NOT be added to the list of vaccines needed.

More and more parents are pulling their children from public school due to the mandates and vaccine requirements. I know I'm just one person but what goes in my body and my children's body is my choice. I'm sure you wouldn't like being forced to take Heroin or Meth even if just once. Please consider our children and that they determine our future. Vaccine mandates will lead to unhealthy children who don't make it out of high school.

Thank you for your time.

Subject: NO for poisoning our children!

External Email

Ladies and gentlemen,

I need to implore you as a parent of nine children do not require, unconstitutionally, that our children receive a vaccine that is unproven, in completely tested, and has caused countless cases of life debilitating sickness and disablement, even death.

Everyone in the United States of America has the right to choose for themselves what they will put in their body. It is not governments privilege or responsibility to force us to do anything like this. Not to adults, and certainly not children. I implore you to leave it up to the intelligent, responsible, and loving decision making powers of each parent for each family. Please, do not take this power away from us.

The results of this vaccine have already been devastating and fatal; do not add to that pool of damage by forcing this again **unconstitutionally** against peoples well-being and health. Just for the sake of power and money. It is wrong. You would be completely wrong in forcing it no matter what you believe about the vaccine.

Leave the choice with the people.

Thank you for your time,
Erika

Subject: Vaccine Mandate.. for CHILDREN???

External Email

To all of whom it may concern,

Hello,

My name is Brandon Thompson, and I am a parent of 2 school age children, soon to be 3 kids going to school. We are located in Colville, WA. I have worked in law enforcement for 13 years, and am well aware of our constitutional freedoms, and the dangers of losing them.

I heard that there was a quiet meeting coming up regarding the implementation of experimental-genetic-therapy-treatments, that are mistakenly called a vaccine (due to the CDC recently altering their definition of the terms "Vaccine", and "Immunity").

Children are statistically in more danger from the "vaccine". The age groups of children are NOT what covid targets.... so why the mandate of genetic therapy? This is about something more sinister than you are willing to comprehend, and you need to wake up.

A free country needs to remain free, and it escapes all conceivable logic that anyone would want to lose complete control of their own health decisions.

To make a long story short, I will pull my kids out of school if you implement forced experimental-drugs on my kids. There is no long-term data. NONE. Kids are dying world wide from heart problems, so honestly WTF? You are all doing this due to 'Financial Incentives' (am I wrong?). You are being paid by the devil himself to kill children.

You will have the blood of children on your hands by forcing this, statistically speaking, and it will never wash off. You all will face your creator someday and own your decisions. You will not throw my kids into the sacrificial mass grave.

All of this.. this cult.. is in complete violation of the Nuremberg Code, and it is completely against Traditional American Values. There are countless laws, that this would violate, but it's not about laws, or voting anymore is it? If I pay taxes for my kid to go to school, I want my money's worth. You literally owe me that.

No doctor has the authority to force anything on my children, so what is your authority/credentials... honestly who do you think you are? You have no authority, and to have audacity to claim such authority will simply show the devil inside of you. My children will remain out of the state's grasp, and it is so sad that I have to remain vigilant against this ultra-liberal, fallen, soulless indoctrination system that is referred to as a school. What an abomination it has become.

Thanks for your time. Make the right choice for those that would be fooled into poisoning their own children.

Sincerely,

Brandon Thompson

Subject: Please No Shot Mandates for kids

External Email

All,

I worked everyday as a substitute bus driver for the last 4 years and all thru Covid. Not once was there an issue with a massive amounts of sickness. Kids playing with masks off and on, crammed on a bus, you would think there would be more cases.

2 years of Covid, without kids getting it, why would we now need to give them a shot for it? Ludicrous.

Even the districts' stats showed less then 0.1% cases. Survival rate is over 99%.

The public schools have already bred 3 generations of kids that can't think and are just cookie cutters and too many weak male characters. Some teenage girls told me they like the mask so they can hide behind them. There is some real self-confidence!

I actually homeschooled my kids for 20 years because I grew up in the system that is flawed.

Please provide data that proves all this masking, jabbing is necessary.

Thank you,

Subject: Parent Letter Re: Child Vaccine Requirements

External Email

Jan. 5, 2022

Dear Caitlin Lang,

I am a parent to 3 young children (under 12) in the White River School District (Pierce County). I appreciate the need to keep our children safe in the school environment. There are many, many safety concerns to consider. But after 2 years of very difficult rules and regulations for our young children regarding COVID. I don't believe that this should any longer be the number #1 concern regarding our children. I think we need to find a way to carry on with "normal" life cautiously.

Our children can not carry on wearing masks to school indefinitely. It has caused interruption to learning for my 2nd grader. She was learning to read just as schools closed in 2020. Through all the zoom, partial open schools and irregular teaching lessons. She did not learn to read as she should have as a 1st grader. If the student can not see the teachers mouth to hear her pronounce and sound out words, learning to read is going to be extremely difficult. These youngest students are losing learning that they will never get back! Now she is a year behind in reading and I am doing everything I can to catch her up, because this affects all her other learning subjects too! I even hired a private tutor because I was so concerned about her falling behind. I am lucky that I have the means to pay for a tutor. But many parents do not, therefore their kids will just stay a grade behind. There is no clear evidence that masks are affective in the school environment. I don't know if you have been in a school lately... but you should really go and spend time in these classrooms. You will see that the kids are not even wearing their masks appropriately and the job of the teachers should not be "the mask police". They should just be able to freely teach their students.

I believe that requiring the Covid Vaccine for young children is NOT NECESSARY! I am not opposed to the vaccine, I actually received it myself. I am not opposed to vaccinations for children. All of my children have received all their regular vaccines. But Covid is not killing nor hospitalizing children! My entire family was sick with Covid over Christmas break (my husband and I are vaccinated) and it was no more than a minor cold/flu. Now that we have had Covid studies show that natural immunity is much more

powerful and longer lasting than the vaccine. So why do my children need to be vaccinated? I feel the possible long term affects to this very new vaccine could be far more damaging than very minisule possibility of death to covid. I would like to see another year at least of testing on this vaccine before it is administered to every child. I can see in the future it may be like receiving an annual flu shot and I think that is great! I do not believe in making it a requirement to attend school. I should have the choice as a parent if my child receives the vaccine and it should not be a vaccine or education choice!

Thank you for hearing my concerns and I trust that you will consider these as you make choices for the families and communities you represent.

Sincerely,

Amy Molen

Subject: Public Comments for WSBOH Members from March EH Committee Special Meeting-Regarding Covid 19 Vaccines for children.

External Email

☒ Covid 19 vaccines should not be mandated for children to attend any type of schooling or childcare.

Children are not at risk for Covid-19 and that these "vaccines" are not yet FDA approved, only EUA and has not been properly tested.

Regarding the question of vaccinating children against Covid to attend school and daycare, I say the following:

1. The current vaccines do not cover the Omicron variant which is now the dominant strain.
2. Children have very mild symptoms when they have any form of Covid. This isn't smallpox, folks.
3. This vaccine is still for emergency use only and is considered experimental. Mild cold symptoms are not an emergency use situation.
4. Omicron is more mild (I've had it) than the common cold even for adults. We don't require vaccines for the common cold so requiring it for a variant that's mild AND that the vaccine doesn't address, is ridiculous and unnecessary.
5. You will see an army of parents pulling their children out of public school if you choose the path of mandatory vaccines to attend school. So consider how your school levies will look going forward in the years to come. It won't go well for school funding because everyone will be using online schooling at home. Except the low income people who don't have the same resources, that is. So you will end up with a public school system largely comprised of low-income families which makes this whole idea ultimately discriminatory against low income children who will be left with a shell of the current public education system.

To Whom It May Concern:

My name is Amy Ayers.
I am a mother of 2 & a lifelong resident of Washington State.

My family & myself are completely OPPOSED to enforcing the covid vaccine for K-12 students.

We are already homeschooling our youngest & should this pass, we will 100% pull our oldest out of public school as well.

There has not been nearly enough time to see what potential risks could occur from these vaccines on children. Please don't roll the dice with our children's future.

Sincerely,
Amy Ayers

Subject: Voting on Covid 19 vaccines

External Email

As a parent of school age children, I am highly concerned about how you all will vote on January 12, 2022 as to requiring the C19 gene therapy shot for school attendance next year.

All you have to do is look at the data to see this experimental shot is not working. It is abundantly clear that this shot does not stop infection or transmission as there have been well over 100,000 breakthrough cases. I have heard so many people I personally know share that they have still contracted covid post vaccination. What I have also witnessed in my line of profession, is a great number of adverse reactions to this EXPERIMENTAL SHOT. High fevers, Neurological issues, development of heart conditions, extreme sickness, strokes and even death after the shot.

As a parent of both a boy and a girl, I have great concerns, women of all ages experiencing significant problems with reproductive health. And young healthy athletic men dropping on the field and developing myocarditis, which is PERMANENT SCARRING of the heart, leading to a LIFETIME of heart medications and physical limitations. The death count found on VAERS for this gene therapy is now over 19,000 dead because of severe bad reactions to the shot. In years past, vaccine injury has been grossly under-reported for several reasons. The report is long, the system is not user friendly with no way to save progress so that when a medical provider is pulled away to care for another person, they have to start all over again, and in the emergency room, how many physicians or nurses are going to take the time to file the report? Any other medical treatment would have been pulled from the market before half that many people died from it.

As we watch more mutations of this virus come on, it is clear that our current vaccine IS NOT effective at preventing infection with this new strain, in fact, data suggests that the vaccinated are seeing infection higher than the unvaccinated, and this strain so far presents milder than the common cold. Young people have a much greater risk of having significant long term health problems from the shot than the virus itself. It is time to stop the madness, stop the crazy mandates that are pushing people over the edge and allow people to make the best medical decisions for themselves. You on the board are NOT DOCTORS, you are ignoring common sense and science, especially when you will not acknowledge natural immunity from recovery. A vote to make this shot mandatory steps all over medical freedom, religious and philosophical freedoms. When a person cant reject this shot based on medical history, big fat alarms should be going off. Big Fat Alarms should be going off right now!!!! You owe it to every tax payer to vote to reject mandating this vaccine.

Please know that if you vote to make this EXPERIMENTAL and not fully studied and approved for ANY LONG TERM SAFETY, shot mandatory for attendance for school next year, I will pull my children out of the public school and will hold each and everyone of you responsible for the any injury or death that happens to our youth because of this shot. Stop playing God, you are not good at it.

VOTE NO! VOTE NO! VOTE NO! Take time to research the numbers, it does more harm than good! VOTE NO!

Subject: School required vaccine schedule

To whom it may concern,

I am writing to you as a concerned mother of school-aged children. I want to be clear that I am writing to express my opinion against the idea of possibly adding a covid vaccine requirement for school. White River School District has done an amazing job at collecting data on our students in regards to their rate of infection and transmitting of covid to their classmates, teammates, and adult staff. The evidence is clear- our children are not the risk/liability when it comes to this virus. To mandate this vaccine for school attendance is absurd. First of all, it is still in experimental stages and it has been proven highly ineffective with nasty side effects and unknown long term consequences. So many vaccinated are still contracting the virus and spreading it. My biggest point of contention though has to do with natural immunity. So many studies prove that natural immunity is more effective than a manufactured vaccine could ever be YET, it is not even looked at as a counter to a vaccine. For all the other required school vaccines, blood titers were an option to prove immunity in lieu of getting unnecessary vaccines. Why is this not an option for covid??? Also, you don't mandate flu vaccines for our school children. How could you possibly mandate a vaccine requirement for this virus? It is constantly changing with new variants, constant changes with how many of which vaccines are needed to reach some level of immunity (which I again, is nowhere near the protection offered from natural immunity). Do you realize how many families are willing to pull their kids out of school over this possible mandate? Does that not say something to you...Vaccines are available for those that want it, please don't try to force it on our kids.

Sincerely,
Janell Doyle

Hello, I am writing this email in regards to our children and their rights to be able to attend public school. This education is funded by tax payers and should not be withheld from ANY child of WA state based on their religious beliefs or personal preferences. We have always had exemptions for vaccines and a covid vaccine should be no different. All of our children deserve access to equal education and without discrimination. I am beyond appalled by how heartless this state has operated during the pandemic by way of promoting division and supporting isolation of our children by encouraging learning online as opposed to in person. Covid is something we have to live with and OBVIOUSLY masks and vaccines have not solved the issue. I am firmly against requiring vaccines for children to attend schools as this was not voted on by the public nor is it accommodating for all of our children. Segregation will not cure covid but only increase childhood depression and anxiety and eventually suicidal tendencies. This entire state has been a laughing stock across the country and this is just one more example of how you've failed us. Do not fail our children again.

Subject: No Mandate to Vaccinate School Children against Covid-19 and variants

External Email

Dear Washington State Board of Health members,

I am deeply opposed to any recommendation for a vaccine requirement for school aged children and ask that you not adopt any such requirement.

I am not convinced that this would be in the best interest of our children based on the lack of evidence for long term effects of the vaccine.

I ask that you leave the decision to the parents whether they vaccinate their children against Covid.

I would ask that you encourage everyone to eat healthy, get plenty of exercise, and build their immune systems with necessary Vitamin D, Vitamin C, Zinc, etc to help their bodies function at the best disease fighting capacity possible. This is good science!

Thanks for considering my plea to Not Mandate Vaccines for school aged children.

Sincerely,
Treva Mahar

Subject: VOTE NO ON VACCINE MANDATES

External Email

Hello all,

I just read that the Washington State Board of Health is voting on Friday on a mandate to make OUR children take the Covid-19 vaccine in order to attend school.

Have you seen that the LA County school district pulled their mandates because so many families decided to pull their kids from school? How many families currently have pulled their children in 2020 and 2021??? I know many families that have either 1) moved out of state, 2) put their kids in private school, or 3) have enrolled their kids in an on-line school.

I guarantee you, I WILL pull my three kids out of the Washington state school district if this happens. They WILL NOT be taking weekly Covid tests either if that's your solution.

NOPE

Vote no!!!

Subject: Do NOT REQUIRE the C-19 vax for school children

External Email

To Whom It May Concern,

I am very concerned about requiring the Covid-19 shots for children and adding this "vaccine" to the required vaccinations for school aged children. This "vaccine" is absolutely too new to be required for children. There are absolutely NO long term studies done on these vaccines and they are still only approved under EUA. This alone makes it so you cannot and should not require or mandate these "vaccines" for children. Further, children do not have a high risk of dying from COVID-19. They just don't! So why would you push an untested vaccine, that has known side effects of causing heart problems on children who have a very small chance of actually dying from the illness?? This is not right. If parents want to make an informed decision and get their child vaccinated for covid-19 then that is one thing, but it is not right for you to require or mandate that children have this vaccine. I hope that you will look at all the studies that are being done, adverse reactions that are happening because of the vaccine, and realize that it is not your place to require or mandate this vaccine for anyone but especially for children.

Thank you for your time and honest consideration!

A concerned mother of 4 daughters,

Becky Tolf

Subject: NO to vaccine mandates

External Email

As a parent to three school aged children I'm writing because I am vehemently opposed to mandating the Covid vaccine for school aged children. There are three main reasons why.

First, the current vaccine does not have any long term safety studies done yet, they are simply too new. The studies and evidence currently available show that receiving the vaccine poses far greater health risk to children than Covid does. VAERS data as well as many other studies prove this. Children have a 99.998% survival rate with Covid, a vaccine with possible side effects is not necessary nor a smart risk assessment.

Secondly, the vaccines do not stop the transmission of Covid. There is no argument that vaccinating someone helps protect anyone other than themselves. If children have basically no risk of harm from the disease, a vaccine is not necessary. Teachers and staff are already vaccinated so they should be protected if their vaccine works to lessen symptoms. Our hospitals are not overwhelmed with Covid patients, if they are struggling it is because of the firing of unvaccinated workers, delayed/improper care for other issues, and/or extreme quarantine and safety precautions unnecessarily being taken because of Covid.

The third reason I am opposed to mandating this vaccine for school entry is that while the FDA did approve the Comirnaty version of the Pfizer vaccine, it is currently unavailable anywhere in the US. Public schools may not require an experimental vaccine that is under EUA. The only vaccine currently available to our children is NOT the FDA approved version.

Thank you for your time,
Alissa H

Subject: Opposition to the Upcoming January 12, 2022 Covid-19 Vaccine Requirement Recommendation

External Email

To Whom it May Concern;

I am submitting this email in regards to the upcoming January 12, 2022 decision recommending the Covid-19 Vaccine for school age children.

Public education is funded by taxpayers and should not be withheld from ANY child in Washington State based on their personal or religious beliefs and preferences. Our children deserve equal access to education without discrimination. Segregating our children by forcing parents to make decisions to un-enroll their children in Public Education and find alternate means of education or in many cases, leaving the state completely, will not cure Covid-19. It will only increase childhood depression and anxiety and, as you all should know, even increase suicidal tendencies in Washington State Youth.

Washington State, in my opinion and that of numerous fellow parents I have spoken with in regards to the subject, has operated at an extremely poor level during this pandemic. It has promoted division and supported the isolation of our children by implementing online learning as opposed to in-person learning, and the requirements that have been imposed on our children when they were allowed to return to in person learning are proving to be detrimental to their mental health and well-being even now. I implore you to talk to students at all grade levels and actually see what they are thinking and how they feel being in the situations they are in with the restrictions in place. Given that Washington State has seen a withdrawal of students from their Public Education program over the past two years in excess of 55,000 students, this should be a blatantly obvious indication that the decisions being made that effect the students of Washington are not "Popular". If this becomes a requirement, the number of students pulled from Public will grow exponentially. Washington State is already disregarded across the country with the poor handling of the pandemic and the excessive restrictions that leadership has put in place, don't add any 'Fuel to the fire' by adding yet another layer to this already disgraceful situation.

The Covid-19 virus and it's continued variants are something that we are ALL going to have to live with going forward. It is abundantly clear at this point that vaccines and masking have not solved the issue. It is being reported that upwards of 70% of Omicron infected patients are all vaccinated. I personally know of several Breakthrough cases of Covid-19 in family and friends, and some of them were severe enough to end up in ICU BEING FULLY VACCINATED! The rules for masking, types of masks, etc. change so often a person could get whiplash attempting to keep up with current protocols. My family and I have all had, and recovered, from Covid-19 even with the protocols in place.

I am firmly against the requirement of the Covid-19 Vaccine for our children to attend public school. This is not something that was put forth by a vote of the People of Washington State, nor is it accommodating for all of our children. As a parent of 3 children in Public Education, I am imploring you oppose making the Covid-19 Vaccine a requirement to attend Public School in Washington State.

I thank you for your time.

Subject: Vaccination Mandate in Schools

External Email

Good Afternoon,

I am writing to you today to ask that you vote against implementing the Covid vaccine for school aged students.

Children are at an extremely low risk from being seriously ill from Covid. Additionally there are zero long term studies on the negative side affects of these injections.

If this vaccine becomes mandatory for students I will immediately remove mine from the public school system.

Thank You,

Katie Moran

Subject: Opinion re Mandate on Vaccine for school aged children

External Email

To Washington State Board of Health members,

Hope this email reaches you well. As a parent of a child (soon to be 2 children) attending an elementary school in Stevens County, I am writing to make it known that myself, among many others, are strongly against the covid vaccine being mandated for school aged children. I believe that this is a decision that should be made at local level, or, in fact, made specifically by the parents or guardians. Although I understand that covid-19 can be serious for adults, I just do not believe that it is harmful enough to children to justify a mandate. This vaccine does not stop them from getting covid or stop them from spreading it. I am personally not comfortable giving the vaccine to my children, at this time, and would have to pull them out of public school to homeschool, which is not ideal for any of us. Please think of the children's future and make the right choice. Please just let this be a choice.

Thank you for your consideration and taking the time to read this email.

Sincerely,

Rachael Smith

Attention board of health members:

I am vehemently opposed to any type of forced isolation or quarantine! Please strike this option down.

RE: "Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100."

Subject: Opinion on vax for school children

External Email

Good afternoon,

As a parent I am very concerned about the state trying to force a vaccine on our children that has not had sufficient testing and is not safe. When the last SARS vax came out it killed 5 people and it was pulled. The Covid shots have killed 20,000 thus far, causing young people extreme heart issues, including smaller children. It is not normal for children to have a heart attack or severe issues. I have seen firsthand amongst my acquaintance and friends, not only the side effects but how incredibly ill they become after they have the shot; whether it be the initial 1 or 2 or the booster. Each comes from different walks of life and are of a wide age range as well. Each and every one of them have had issues. This is simply not safe and should NOT be forced on our children.

We still live in a free country and we are the parents. We should decide what is right for our children's health! Not the state or anyone else, it is NOT the school's job to police the health care choices of our children. We have the freedom to choose. If someone feels that it is safe and they choose to vax their children, that is their choice and I will not stand in their way or get in their face about it. They have that right! But we also have a right to say NO!

I also want to point out the fact that if this vax works, then why are people so scared of us? If it works, then they shouldn't have anything to fear from me or my child. It's no different if a kid can't be vaxed for MMR. I'm not worried because my kid has had those shots. I'm not knocking them all, I'm saying this particular one is not safe and should not be forced. public-school, in-home learning or home school. Should NOT be a forced thing. I pulled my child from school after last year because I saw the hand writing on the wall.

These shots have not been properly tested and we as parents should have the final say! If we don't want our kids to have it then we should be able to at least fill out an exemption form. Forcing people to get something injected into their body they don't want there is not any different that the sexual abuse I suffered. It was something I did NOT want in my body and it was forced. Not any different. Without long term testing on the side effects (heart problems, blood clots, sudden death, again to name a few that HAVE happened) these things should not be forced! Everyone is entitled to choose. Freedom of choice! My body my choice remember. We are the parents, we created our children and we should decide what is best for our kids. Not the State! This is NOT Russia, China, North Korea or Nazi Germany. We decide, not the state

Katy Braucher ☐

Subject: Vaccine Mandates

External Email

I don't think it is a good idea to include the Covid Vaccine as a required vaccine for K-12 school kids. I have the luxury of getting time off to take my children to their pediatrician so he and I can discuss vaccination for my kids (they carry a rare genetic disease that I have). There are a lot of small groups of people that don't have the luxuries that I do (indigenous people, people of color, etc). I can't see this as being a good move to help include those that are farthest from equity.

Subject: RE: Vaccine Mandate for Children

External Email

Washington State Board of Health:

We are opposed to a COVID-19 child vaccine mandate in the state of Washington.

There is no reason to vaccinate a healthy child with no pre-existing conditions or comorbidities, as they are not at risk for COVID-19. To date, there have been zero deaths among healthy children in the United States from COVID-19. Yet there have been numerous side effects that have been documented from the vaccine in children including myocarditis.

I know the argument is forming that children can be spreading the virus and therefore we should vaccinate. Data has shown that kids are not the super spreaders of the disease. And, the vaccine is proving insufficient against the omicron, which has quickly become the newest variant spreading through our state.

I know we are searching far and wide to put an end to covid. But mandating this vaccine just does not make sense. Our children have suffered the greatest the last two years from COVID-19; Not from the physical disease itself, but from schools shutting, sports being canceled, and all other extracurricular activities put on hold. These kids are our future leaders, doctors, nurses, educators, farmers, politicians, etc. When will we start putting the future of our beautiful state and country first? When will they get our first and best? We don't need them to protect us. WE need to protect THEM.

Please leave the decision to vaccinate children in the hands of the parents who can make a decision best for their children and their family. Please trust parents to do their own research, communicate with one another and their children's health provider to make their choice for their own children.

Thank you,

Robyn Demirjian

External Email

Jan. 5, 2022

Dear Lindsay Heredeen,

I am a parent to 3 young children (under 12) in the White River School District (Pierce County). I appreciate the need to keep our children safe in the school environment. There are many, many safety concerns to consider. But after 2 years of very difficult rules and regulations for our young children regarding COVID. I don't believe that this should any longer be the number #1 concern regarding our children. I think we need to find a way to carry on with "normal" life cautiously.

Our children can not carry on wearing masks to school indefinitely. It has caused interruption to learning for my 2nd grader. She was learning to read just as schools closed in 2020. Through all the zoom, partial open schools and irregular teaching lessons. She did not learn to read as she should have as a 1st grader. If the student can not see the teachers mouth to hear her pronounce and sound out words, learning to read is going to be extremely difficult. These youngest students are losing learning that they will never get back! Now she is a year behind in reading and I am doing everything I can to catch her up, because this affects all her other learning subjects too! I even hired a private tutor because I was so concerned about her falling behind. I am lucky that I have the means to pay for a tutor. But many parents do not, therefore their kids will just stay a grade behind. There is no clear evidence that masks are affective in the school environment. I don't know if you have been in a school lately... but you should really go and spend time in these classrooms. You will see that the kids are not even wearing their masks appropriately and the job of the teachers should not be "the mask police". They should just be able to freely teach their students.

I believe that requiring the Covid Vaccine for young children is NOT NECESSARY! I am not opposed to the vaccine, I actually received it myself. I am not opposed to vaccinations for children. All of my children have received all their regular vaccines. But Covid is not killing nor hospitalizing children! My entire family was sick with Covid over Christmas break (my husband and I are vaccinated) and it was no more than a minor cold/flu. Now that we have had Covid studies show that natural immunity is much more powerful and longer lasting than the vaccine. So why do my children need to be vaccinated? I feel the possible long term affects to this very new vaccine could be far more damaging than very minisule possibility of death to covid. I would like to see another year at least of testing on this vaccine before it is administered to every child. I can see in the future it may be like receiving an annual flu shot and I think that is great! I do not believe in making it a requirement to attend school. I should have the choice as a parent if my child receives the vaccine and it should not be a vaccine or education choice!

Thank you for hearing my concerns and I trust that you will consider these as you make choices for the families and communities you represent.

Sincerely,

Amy Molen

Subject: No Covid Vaccine Mandate for Children

External Email

To the committee discussing Covid Vaccine Mandates for schoolchildren:

Kids are not susceptible to Covid-19. They have a 99.995% survival rate. In testing they could not even find a child to have a severe reaction to Covid-19. The vaccine does not prevent transmission or replication. The kids being vaccinated do not protect grandma. The kids can spread asymptomatic covid easier when they are vaccinated.

I am extremely upset that the FDA is letting our nations' children become lab rats in the name of collecting data about the Covid-19 vaccine's effects on children. "We're never gonna learn about how safe the vaccine is until we start giving it. That's the way it goes"-Dr. Ruben on the FDA panel. Test subjects in actual drug trials get paid, get free medical care if they have issues with side effects. We American citizens can't even get emergency medical care that we have to pay good money for because of Vaccine Mandates and the tremendous understaffing/overworking of current medical staff. What happens when my child develops cardiac issues from the vaccine? Who is going to treat him? Who is going to pay for treatment? We have to sign away our rights to sue the drug maker when we get the Covid vaccine. If my child dies, no one is going to be held responsible. This is EVIL!

It took decades to get a safe polio vaccine for children. Many children had severe side effects, they ended up in iron lungs. This Covid vaccine has been studied in children for a couple of months. The long-term effects and severe side effects of this vaccine need to be studied for YEARS before forcing the nation's children to have it injected into their bodies.

Pediatricians say the mental health crisis among kids has become a national emergency. "Between February and March of 2021, emergency room visits for suspected suicide attempts were up 51% compared to the same period in 2019, according to the Centers for Disease Control and Prevention," according to data from the Centers for Disease Control and Prevention. The impact of this ongoing use of children as political pawns while politicians continue to ignore the science of Covid-19 cannot be understated. We need to support this generation's mental health, let them have normalcy at school, get these kids off the fear train (children in the 0-18 age group have a covid survival rate at 99.995% with very little ongoing covid symptoms). Denying children who do not need a vaccine life, liberty, education, and a future is immoral and illegal and you freakin' know it.

Truly, it is looking like there will be a forced Vaccine Mandate to attend public school (and most likely, private too) in at least Washington State. You have the opportunity to stop this evil preying on of our children--our future. Say NO to approving the use of Covid-19 vaccines on children. Give the children a voice! Protect their rights!

Do not mandate covid vaccines for children! Parents, not government bureaucrats, have the right to make sound medical decisions for their children. Also, it is completely

IMMORAL and ILLEGAL to deny a child a quality education based on personal philosophical and medical decisions. Access to education for ALL CHILDREN! Protect the medical liberties of all citizens!

Signed by a VERY concerned citizen,
Kirsten Nordstrom

Subject: Covid concerns

External Email

Sirs and madams, I am writing as a very concerned parent and American.

I am writing in regards to the upcoming January 12, 2022 meeting.

It is time to stop the hysteria. From masks, to forced vaccines (threatening people with job loss is not a choice, it's extortion.). and now the covid camps.

WAC 246-100-070 is a gross overstepping of the government and breaks civil rights.

We are only 80 years post WWII and the hoocaust. Have we learned nothing? How can the voices of millions of people be silenced when the data shows Covid is not the mass death threat it was toted as.

Ignoring natural immunity, and suppressing side effect data is irresponsible.

Omicron is 40% less dangerous than the original strand and yet the hysteria by the media and government is still being spilled out.

Please vote AGAINST mandatory covid vaccines for school, jobs, and absolutely against the covid camps.

Subject: Potential vaccine requirement for children

External Email

I am writing in opposition to any mandate for children in the state. Data shows that the health risk to children is de minimis. Also, the current dominant variant is much less virulent than the prior ones as evidenced by a recent NY Times morning briefing discussing the less severe nature of Omnicron, both in terms of hospitalization and death.

Furthermore, there are risks from taking the treatment. Families should be the judge of what to do to promote their children's health.

Please do the right thing and not mandate this vaccine for our state's children.

Sincerely,
Ron Crawford

Subject: Pandemic response or Panic response?

External Email

□

Thank you for hearing my input regarding the rules and regulations you are considering for mandatory covid-19 vaccinations for school age children. These actions look like panic responses, not rational, reasoned responses.

I am vaccinated, but that is my own voluntary decision. The vaccine is too new, and the lethality of the disease in youth too low for us to even be considering mandatory vaccinations of our youth. Please be calm and rational as you look into this issue, and DO NOT increase the panic with draconian forced vaccines on an unwilling public.

As is common in viruses, the mutations are becoming less lethal. The death rate for the Omicron variant is nearly non-existent. Omicron may be a blessing in disguise, providing natural immunity that may be much more robust than the vaccines, while hardly causing more than a mild, cold-like experience.

I know we WANT to help solve the problems, but be aware of the higher omicron infection rate in the vaccinated, be aware of the serious incidence of heart complications in vaccinated young athletes, and be aware, there are always unintended consequences of every action. Yes, there can also be consequences of inaction, but weighing the information available to us at this time makes it clear; it is WRONG to be considering vaccine mandates and forced compliance.

Subject: Fw: Oppose Mandating Covid-19 shot

External Email

Washington State Board of Health,

I am writing today because I understand that you will soon be making a decision on whether to add the Covid-19 shot to the school age vaccination schedule in order to attend K-12 school.

I oppose mandating the Covid-19 shot in all forms including for employment, accessing services, travel, restaurants, entertainment, sports, and in order to attend K-12 school. This shot is NOT necessary and is causing more damage than it is causing good. Children are the least affected by the Covid virus and Washington State has not seen one child death from Covid. 42 other states are successfully operating their schools without mandating masks or the Covid-19 shot. It is ridiculous and morally reprehensible to force anyone to take this shot. Our children have been hurt enough in the past 2 years with lockdowns, virtual learning, masks, etc. Please stop the madness and don't continue to make it worse by mandating the Covid-19 shot in order to attend school. Please also note that the Los Angeles Unified School District tried to mandate the Covid-19 shot and failed miserably.

In addition, I oppose the mandatory masking of students (and staff) as well. Masking is not healthy for our children and their ability to learn is affected. For example, when children are learning to read, they need to hear the sound and see the way the sound is made. When a teacher is wearing a mask the student hears a muffled "th" sounds for example. When a teacher is wearing a mask the student cannot see the lip/mouth formation of the sound. In addition, the teacher cannot see the way the child is making the sound when the child is wearing a mask.

Medical decisions (including masking and vaccines) are personal decisions for parents to make and between parents and their child's pediatrician. The Board of Health should respect these personal choices and put an end to mandatory masking and mandatory Covid-19 shots.

I also would like to point out that I support Informed Choice Washington's Petition for Rulemaking (Item 11 on the January 12th agenda) which asks the Board to establish a new rule that prohibits the Board from adding any Emergency Use Authorized product, or any licensed product that lacks completed Phase 4 trial studies (and beyond), to the school vaccine required list.

Thank you for your time.
Liz Berrigan

Subject: Oppose Covid-19 Shots for School Children

External Email

I would like my opinion on record. As a WA state citizen with 3 school age children, I am in strong opposition of making the Covid-19 vaccine mandatory. There is not nearly enough time or scientific study to validate adding it to the list of mandatory vaccines. There is also not enough evidence that the risks outweigh the benefits for the age group under 18.

I will remove my children from public school or apply for an exemption if this shot goes on the list of required shots.

Please provide valid scientific studies to support the decision to add this to the list of mandatory vaccines.

STOP THE MANDATES!!! MEDICAL FREEDOM! PROTECT OUR CHILDREN!!

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals.

I also oppose adding a Covid-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

External Email

Hello,

I am a parent of an absolutely healthy child, who didn't have a flu in her 14 years or colds. I beg you not to enforce Covid vaccine in schools as we don't know health implications on our children in 10 and 20 years and the future generations of the planet. Also I beg you to protect rights of parents to make choices for their children.

Regards,

Yuliya Tenks

Subject: Strong objection for institution EUA that are still in trials as required

External Email

Hello Everyone,

As a scientist, a parent and an educator, I am appalled that the state is considering requiring a vaccination that is only approved under Emergency Use Authorization and is still in clinical trials as part of vaccination requirements for students. I would appreciate an acknowledgement that my comments are made public and considered. Below is the detailed discussion of my reasons and rationale for strong objection against requiring Covid EUA vaccines in schools (or elsewhere, for that matter).

Thank you,

Era Pogosova-Agadjanyan
15930 131st Place SE
Renton, WA 98058
425.208.6483

Objections to including EUA COVID-19 vaccines into list of required vaccinations for public school enrollment:

1. Such a requirement is illegal, unethical and immoral: Since currently available vaccines are still in trials, individuals have to receive and sign informed consent to participate in the trial and have the right to NOT participate. Coercion into participation violates ethical and moral codes. Consent is absolutely essential and for minors, parental consent is also a must.

Title 21 U.S.C. § 360bbb-3(e)(1)(A)(ii)(I-III) of the Federal Food, Drug, and Cosmetic Act states:

individuals to whom the product is administered are informed—

- (I) that the Secretary has authorized the emergency use of the product;
- (II) of the significant known and potential benefits and risks of such use, and of the extent to which such benefits and risks are unknown; and
- (III) of the option to accept or refuse administration of the product, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks.

EUA products are by definition experimental and thus require the right to refuse. Under the Nuremberg Code, the foundation of ethical medicine, no one may be coerced to participate in a medical experiment. Consent of the individual is "absolutely essential." A federal court held that the U.S. military could not mandate EUA vaccines to soldiers. *Doe #1 v. Rumsfeld*, 297 F.Supp.2d 119 (2003). The court held: "...the United States cannot demand that members of the armed forces also serve as guinea pigs for experimental drugs." *Id.* at 135. No court has ever upheld a

mandate for an EUA vaccine.

2. The vaccine has proven to be less effective than originally thought. Vaccinated and boosted individuals continue to get, spread and die from Covid. Within the pediatric group, the risk of dying from Covid is minimal. Natural immunity is also discounted for some reason in our State and the US, which makes no logical nor scientific sense. The clinical trials are continuing well into 2023, with certain arms of the studies looking at rare side effects well into 2025, hence more results are expected in the coming years to determine its true effectiveness and efficacy.

https://clinicaltrials.gov/ct2/results?cond=covid+vaccine&Search=Apply&recrs=a&recrs=f&recrs=d&age_v

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fclinicaltrials.gov%2Fct2%2Fresults>

3. The rare side effects are concerning and require more follow up studies. Since when did the schools hire physicians to have on staff in order to mitigate potential issues that arise while children are at schools? The incidence of pericarditis and myocarditis in pediatric patients is truly alarming. <https://pubmed.ncbi.nlm.nih.gov/34374740/>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fpubmed.ncbi.nlm.nih.gov%2F34374740/>
and this is just one of many reports of concern. In addition, there are no long term follow up studies to assess any other organ systems.

4. It is not the State's or Board of Education's role to define how parents choose to raise their children. I do not welcome the State or any other governing bodies in deciding my family's medical decisions. I rely on my religion, moral compass and heritage to make medical decisions for myself and my children. I am the one who is solely responsible for their well being, both morally and financially. When I send my children to schools that I support with my tax dollars, I send them there to be educated, not to determine what treatments they should receive in order to attend the public school that my tax money supports. My family fled their birth country (USSR) as refugees to pursue freedom of religion, thought, speech, etc. I grew up proudly in the country of the free and the home of the brave only to now fend for my children the ways that I had never imagined possible in the US, the country founded on the concept of Freedom.

I am alarmed that you are promoting the idea of mandatory vaccination for children for Covid-19. There have been no peer reviewed long term studies of how children's health will be impacted by this new mRNA technology. This is a very new technology and does not truly fit the definition of a vaccine. Traditional vaccines have been long accepted, and prevent the spread. This technology does not.

As you vote on this ask yourself whether you are also willing to assume the liability of forcing parents to make this choice for their child against their will and instincts, should their child suffer adverse effects.

Thank you,
Jamie Brakken

I wish to indicate that I am very much opposed to mandating Covid19 "vaccines" to children. It is unnecessary for their health. Children are very unlikely to receive ill effects due to an infection from SARS-COV2. There is an apparent higher risk of injury from being injected with the "vaccine" (according to Dr. P. McCullough, Dr. D. Brownstein, Dr. R. Malone, Dr. P. Cory and others). It is not worth the risk of mandating a situation in which kids are forced to be injected with a Covid19 "vaccine".

With due respect, I ask you to sincerely consider this information.

Subject: Vaccine for Children

External Email

Hello,

I am writing to all of you because I am very concerned over what I am hearing regarding a vaccine requirement coming down the pipeline, in order to attend school and/or childcare. I ask you to reconsider this as the vaccine has not had proper vetting yet, even the vaccine makers themselves won't know the safety and efficacy of the vaccine until they start putting it in the arms of children. If parents want to allow this vaccine for the children that is their right, however it is also absolutely my right to opt out of an experimental vaccine for my healthy children who have already had covid and now have been manufacturing their own antibodies to the virus via their healthy immune system. Putting this vaccine into my children's body would be of no benefit to them but rather exposing them to the unknown risks having to do with the vaccine. The biggest of which is myocarditis. Who making these decisions can guarantee this will not occur in our precious children. This risk to most children is very low, and those around them that want to be vaccinated have been. Our children have suffered enough and quite frankly the most throughout this pandemic, enough is enough. If this vaccine is going to be a requirement you will see a mass exodus from public schools, as parents are fed up, we know what is best for our children, not the state. I ask you to take all of this into consideration as you make this extremely important decision on behalf of parents and their children. Thank you.

Dear Washington State Board of Health members,

As a parent, I urge you not to recommend a COVID-19 vaccine requirement for schoolchildren in Washington state. As much of the world recognizes, the risk of this vaccine to children far outweighs the risk of the COVID-19 infection to otherwise healthy children. Please do not take the right to an education away from families who believe in the right to determine what is best for their children.

Respectfully,

Marni Harrington
Washington State parent, concerned citizen and voter

Subject: Thoughts and facts about a proposal to require school children be vaccinated

External Email

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets vaccine, one group gets placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccine adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time,

Brian

Subject: Parent Letter Re: Child Vaccine Requirements

External Email

Jan. 5, 2022

Dear Nathaniel Thai,

I am a parent to 3 young children (under 12) in the White River School District (Pierce County). I appreciate the need to keep our children safe in the school environment. There are many, many safety concerns to consider. But after 2 years of very difficult rules and regulations for our young children regarding COVID. I don't believe that this should any longer be the number #1 concern regarding our children. I think we need to find a way to carry on with "normal" life cautiously.

Our children can not carry on wearing masks to school indefinitely. It has caused interruption to learning for my 2nd grader. She was learning to read just as schools closed in 2020. Through all the zoom, partial open schools and irregular teaching lessons. She did not learn to read as she should have as a 1st grader. If the student can not see the teachers mouth to hear her pronounce and sound out words, learning to read is going to be extremely difficult. These youngest students are losing learning that they will never get back! Now she is a year behind in reading and I am doing everything I can to catch her up, because this affects all her other learning subjects too! I even hired a private tutor because I was so concerned about her falling behind. I am lucky that I have the means to pay for a tutor. But many parents do not, therefore their kids will just stay a grade behind. There is no clear evidence that masks are affective in the school environment. I don't know if you have been in a school lately... but you should really go and spend time in these classrooms. You will see that the kids are not even wearing their masks appropriately and the job of the teachers should not be "the mask police". They should just be able to freely teach their students.

I believe that requiring the Covid Vaccine for young children is NOT NECESSARY! I am not opposed to the vaccine, I actually received it myself. I am not opposed to vaccinations for children. All of my children have received all their regular vaccines. But Covid is not killing nor hospitalizing children! My entire family was sick with Covid over Christmas break (my husband and I are vaccinated) and it was no more than a minor cold/flu. Now that we have had Covid studies show that natural immunity is much more powerful and longer lasting than the vaccine. So why do my children need to be vaccinated? I feel the possible long term affects to this very new vaccine could be far more damaging than very minisule possibility of death to covid. I would like to see another year at least of testing on this vaccine before it is administered to every child. I can see in the future it may be like receiving an annual flu shot and I think that is great! I do not believe in making it a requirement to attend school. I should have the choice as a parent if my child receives the vaccine and it should not be a vaccine or education choice!

Thank you for hearing my concerns and I trust that you will consider these as you make choices for the families and communities you represent.

Sincerely,

Amy Molen

Subject: No covid vaccine mandate for children

External Email

DO NOT enact a covid vaccine mandate for children of any age. If you do you will be responsible for the deaths and injury of hundreds to thousands of children. Don't be fooled by the federal government's propaganda. If you do your research, you'll understand that the covid vaccines are responsible for tens of thousands of deaths worldwide and over 1 million adverse effects. They are causing more harm than good. The vaccines have been proven to be ineffective. There are more people getting covid who have been "fully" vaccinated than those who are unvaccinated. There is no point other than for financial reasons for greedy pharmaceutical companies and state and local government agencies clambering for federal funds to get vaccinated.

Keep the government at all levels out of the family decision making process and out of the doctor patient relationship. Family decisions and medical decisions are personal and private.

What you should be spending your time on is enabling early treatment solutions that are widely available to all Washingtonians. The biggest crime of this century is that the government at all levels and medical administrations at all levels have failed to recognize that Covid can be treated early with existing medications that are already widely available.

DO NOT MANDATE VACCINES FOR CHILDREN OF ANY AGE.

Subject: Public Comment for upcoming meeting

External Email

I am a parent of a public school 3rd grader.

I write today to request that the covid immunization not be added to the required immunizations for public school.

Covid is not showing to be a large risk to children and is still under emergency use authorization.

I am concerned and torn about my son's future if this trial vaccine becomes required as my son thrives in the public school environment but I can't with good conscience give him an immunization that is so new, no long-term studies and for a virus that has been proven to not cause significant damage to the younger ages.

I will be forced to home school if this immunization becomes required. Washington state has already lost 55,000 enrolled public school children this school year. I am active and involved in multiple mothers groups in my community and the large majority are in the same situation, I fear if you make the immunization a requirement you will lose many many more thousand enrolled students, which will drastically decrease federal funding and cause voters to no longer approve bonds and levies; therefore, impacting the children still in the public school system.

I fear that the communities of color will be the hardest hit by the loss of these funding sources, as statistics and history have proven those communities do not have resources to home school, they will have no choice but to immunize their children to continue attending public school which will be struggling due to the loss of federal funding and the inevitable loss of bonds and levys.

Please consider my words and look at the big picture when you vote on the immunization requirements for this next school year.

Thanks for your time

All,

I don't know what kind of influence one email will make. But as a mother of two I ask that please consider a different perspective before making rash decisions about mandating relatively recently created vaccines. Especially, since politics is blocking even reasonable debate within the medical community itself. Kids are very low risk with this virus, please don't make a decision that you might one day regret as the future unfolds new twists and turns along this bumpy road. We can already see that these vaccines are not stopping the spread or we would be seeing this slow down by now. At this point the vaccine is more of a therapeutic that should be optional, especially with such a low-risk age group.

Thank you for listening,

Jessica

Subject: Vaccines for students

External Email

As an educator, I do not see the benefits of inoculating students for the COVID-19. mRNA vaccines -products have been known to trigger the body's immune system to cause inflammation for the heart muscle and the lining outside the heart. These experimental vaccines have caused myocarditis and pericarditis in children. There is no safety of efficacy data for individuals 18 years and younger.

These shots wear off in 6 months and causes damage for 15 months as the body continuously produces toxic spike protein. The spike protein causes blood clots, myocarditis and pericarditis, strokes, heart attacks and neurological damage, just to name a few. Children aged 12 to 17 are five times more likely to be hospitalized with COVID jab-induced myocarditis than they are to be hospitalized for COVID-19 infection. Children have a natural immunity. That is not even being considered! Or how about early treatment if the student does become infected?

Vaccine makers are immune from liability. They are not responsible for any adverse events or deaths their products cause. Will you be responsible?

These vaccines don't stop transmission or infection. They don't stop the spreading of the virus. Getting vaccinated doesn't mean you won't get COVID.

And then there is the issue of consent. You are completely disregarding bioethics. These mandates of an experimental vaccine are explicitly illegal and inconsistent with the Nuremberg Code.

Why not build our future students with better nutritional lunches? Why not help keep their natural immunity strong?

Bottom line, as a teacher, I do not want to see my students suffer or die from these vaccines. Invest in humanity---not genocide.

Subject: Washington State Board Mandated COVID vaccine meeting.

External Email

To whom it concerns,

I am a WA resident and mother of two, writing to you on behalf of those who are pleading with those who hold the future health of our children in their hands. A power that should remain with the parents. There is no benefit for our children or family to be vaccinating children against the small risks of the virus, given the known health risks of the vaccine that as a parent, you and your children may have to live with for the rest of their lives..

Dr. Robert Malone

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.rwmalonemd.com%2F&data>>, immunologist, virologist, top researcher and inventor of the mRNA vaccine technology is speaking out to warn parents against Covid shots for children. I believe we should use our common sense and listen to the man who has dedicated his entire career to this.

Over 16,000 physicians and medical scientists around the world signed a declaration <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdoctorsandscientistsdeclaration.org>> publicly declaring that healthy children should NOT be vaccinated for Covid.

Dr. Malone's statement in its entirety and his video:

My name is Robert Malone, and I am speaking to you as a parent, grandparent, physician and scientist. I don't usually read from a prepared speech, but this is so important that I wanted to make sure that I get every single word and scientific fact correct.

I stand by this statement with a career dedicated to vaccine research and development. I'm vaccinated for COVID and I'm generally pro-vaccination. I have devoted my entire career to developing safe and effective ways to prevent and treat infectious diseases.

Before you inject your child – a decision that is irreversible – I wanted to let you know the scientific facts about this genetic vaccine, which is based on the mRNA vaccine technology I created:

There are three issues parents need to understand:

- The first is that a viral gene will be injected into your children's cells. This gene forces your child's body to make toxic spike proteins. These proteins often cause permanent damage in children's critical organs, including

- ☐ Their brain and nervous system

- ☐ Their heart and blood vessels, including blood clots

- ☐ Their reproductive system
- ☐ And this vaccine can trigger fundamental changes to their immune system
- The most alarming point about this is that once these damages have occurred, they are irreparable
- ☐ You can't fix the lesions within their brain
- ☐ You can't repair heart tissue scarring
- ☐ You can't repair a genetically reset immune system, and
- ☐ This vaccine can cause reproductive damage that could affect future generations of your family
- The second thing you need to know about is the fact that this novel technology has not been adequately tested.
- ☐ We need at least 5 years of testing/research before we can really understand the risks
- ☐ Harms and risks from new medicines often become revealed many years later
- Ask yourself if you want your own child to be part of the most radical medical experiment in human history
- One final point: the reason they're giving you to vaccinate your child is a lie.
- ☐ Your children represent no danger to their parents or grandparents
- ☐ It's actually the opposite. Their immunity, after getting COVID, is critical to save your family if not the world from this disease

In summary: there is no benefit for your children or your family to be vaccinating your children against the small risks of the virus, given the known health risks of the vaccine that as a parent, you and your children may have to live with for the rest of their lives.

The risk/benefit analysis isn't even close.

Subject: Vaccine requirement for K-12 students

External Email

Good afternoon,

I am writing in regards to the potential requirement of a forced experimental "vaccine" on our children to attend public schools. Enforcing such a requirement would wreck our small communities especially. Our family as well as many others in our small community and surrounding communities have already stated that we will not send our children to any school if there is a requirement for an experimental vaccine such as the Covid-19 vaccine for our children to attend school. Enforcing this requirement with no options for parents to their rights of choice, will result in the loss of children in our schools and the potential collapses of the schools and communities. I imagine this would be a domino effect in bigger cities as well. If they haven't already, parents will quit their jobs to homeschool and we will see an even greater economic downfall. This would be a detrimental decision on so many levels. Please think about if you are ready to be held personally responsible for enforcing a requirement on children when you have no idea of the immediate and/or long terms effects these shots will have on children. Children that will be subjected to the potential risks of a shot because their parent(s) feel that they have no other option. God entrusted each of us with our children not the government to decide what is best for our children. It needs to be the parents choice.

Thank you for your time and consideration.

External Email

Good Morning,

I am writing today to express my view regarding mandating Covid Vaccines for youth in order to attend school in person in Washington State.

I would like to start off by stating the risk of death associated with COVID-19 in healthy children is virtually non-existent, as children have significant immunologic advantages relative to the older adult population (> 65 years) which comprises the high risk cohort for COVID-19. The risk of death and disease in children has become even more rare with Omicron. Yet even prior to the advent of Omicron, a peer reviewed study clearly demonstrated (using safety data accumulated during past variant circulation) that the genetic COVID-19 vaccines carry a risk/benefit ratio of five deaths in the older, high risk cohort for every one life saved from COVID-19 (and those data did not account for the reporting bias inherent in US deaths due to COVID consequent to inappropriate use of PCR tests). See "Why are we vaccinating children against COVID-19?" (Toxicology Reports, Volume 8, 2021, Pages 1665-1684).

The new variant of COVID-19, Omicron, has exploded onto the scene. What was already an inverted risk benefit ratio for genetic vaccination in children and adults (greater risk of death from vaccine than from COVID-19) will become even more inverted since the risks of COVID-19 are further reduced with Omicron. The Omicron variant is different in five essential ways:

More infectious and will soon be the dominant variant in the USA

Less pathogenic

Poorly matched to currently available vaccines

Natural immunity is providing good protection against Omicron

Disease symptoms are more similar to the common cold

The International Alliance of Physicians and Medical Scientists (16,000+ physicians from around the world) released a resolution concerning these exact issues. HERE is the link to that resolution where they state:

Negligible clinical risks from SARS-CoV-2 infection exist for healthy children under eighteen.

Long term safety of the current COVID vaccines in children cannot be determined prior to instituting such policies. Without high-powered, reproducible, long term safety data, risks to the long-term health status of children remain too high to support use in healthy children.

My daughter had a open heart surgery when she was 8 months old. She had ventricular septal defect, basically she had two holes between the two bottom chambers of her heart. The CDC has stated how this could effect people (and children) who have had myocarditis. Which is an effect of the heart condition my daughter had. I have asked doctors for a medical exemption and I keep getting the run around and the term "This is above me". That is both disheartening and concerning. As a mother I am appalled that I would be forced to inject my daughter who could have major complications. As a citizen of this state I urge you to not make families be forced into this choice. I would strongly consider to pull my daughter from school if it comes down to it. I would rather not. Parents should ultimately decide what gets out into their child's body and what is best for them. I've included a screen shot from comirnaty.com

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fcomirnaty.com%2F&data=04%7C>
(I was directed here through the CDC website).

Children risk severe, adverse events from receiving the vaccine. Permanent physical damage to the brain, heart, immune and reproductive system associated with SARS-CoV-2 spike protein-based genetic vaccines has been demonstrated in children.

Healthy, unvaccinated children are critical to achieving herd immunity. Natural immunity is proven to tolerate infection, benefiting community protection while there is insufficient data to assess whether Covid vaccines assist herd immunity.

With this information, it is my strong belief and the data empirically shows that using COVID-19 Gene Therapy in children has a strong probability to do more harm than good, and attempting to force said therapies on the children of our state would be a gross violation of medical ethics, individual rights, and parental rights. In addition, it would inevitably force families to remove their children all together from public education. This action would not only affect children in general, but would disproportionately affect minority and economically challenged families across our state.

It is in the best interest of our state, our people, and most importantly our children, that there is no further attempt to force COVID-19 Gene Therapy on our youth!

Sincerely,

Amaris Garza

Subject: Please say NO to vaccines for children

External Email

Good afternoon,

My husband and I are writing to encourage you to please vote NO on mandating vaccines for children. There is so many unknowns of what reaction can happen, and parents need to be able to decide what medical intervention is needed for their individual child and background. Please leave us parents our rights to keep our children safe from harm and know what is best for them. We don't just think about ourselves, we do try to look at the whole picture so it is not a matter of "I don't like this vaccine" but a matter of weighing the good of society against what could my child react to and cause severe or mild health problems.

Thank you,

Sincerely, Virginia and Pace Amidon

External Email

To whom it may concern,

We have seen the effects on jobs across the State of Washington due to the vaccine mandate. We have seen the effects of mental health across the state in adults AND our children. If the Covid vaccine is mandated in schools there will be a mass number of children leaving the public school system, which will have ripple effects on many levels. Why put an even bigger strain on our public school system and families across this state. We as parents beg you to please vote NO to any Covid related vaccine mandates regarding our children.

Respectfully from a parent,
Dawn Mulrony

Subject: COVID-19 Mandates- Enough is Enough!

External Email

To Whom it may Concern,

I am a registered nurse and have worked on a floor with COVID patients. I have been fully vaccinated and have had both of my children receive all of the vaccines that are recommended by their pediatrician. I believe in vaccines and science. I also believe that mandating the COVID-19 vaccine for our children to attend school is NOT the answer. I know for a fact that if this becomes a requirement, I will be pulling my child from the public school system. Enough is enough!

The COVID-19 requirements have directly affected my child and his ability to learn at school. My child has had to wear eye glasses for several years now. They have made a world of difference for him. But, since mandating the masks, my child has been struggling in school because he cannot see. The masks make his glasses fog up. He comes home every day complaining that he was not able to see what was being taught in the classroom. He is struggling in school because of the mask mandate. Enough is enough!

Isolating children from others and "social distancing" is not the answer. Our children need social interaction with one another. They need to play with friends. They need to develop social skills. They need to develop their psychosocial skills. The pandemic is leaving kids feeling lonely and depressed. They are not allowed to have close contact with others and it is directly affecting them. The mental health of our children is being pushed aside. Depression, anxiety and even suicide rates are climbing to an all time high. The measures that are taken to slow the spread of COVID-19 are directly affecting our children's mental health! Enough is enough!

I plead with you to please look at what is best for our children. Vaccine mandates are not the answer!

Sincerely,

Rachael Bisnett, RN, BSN

As an Educator and a mother of 3 children it is not within our Governments democracy to require emergency authorized or approved medications into humans that do not have informed consent of all possible lifetime side effects.

No absolutely not should an organization such as Washington state or even Federal government, remove parental or individual civil rights to care for our own bodies including the children parents produce and are responsible for.

In the pursuit of happiness for me & mine,

The fact that the DOH would even consider forcing children of any age to get a chemical injection that does not only not prevent disease but does not prevent the spread should be considered criminal. The original inventor, Robert Malone, specifically states it should not be given to every adult let alone Any children, and to force it should be a crime. NO vaccine has been approved like this for adults without studies let alone children, and there are very high reaction rates including but not limited to guillian Barre, paralysis, severe cardiac issues including but not limited to death, as well as chronic pain. Your job is to protect our children and the death rate for healthy children from c19 is almost non-existent.

I can guarantee that forcing children to test, being regularly exposed to the carcinogen EO, or forcing them to inject this chemical will cause a MASSIVE dropout of children from conventional schools, and many new and private co-ops will pop up all over-they already are because forcing masks on children is wrong. It's already criminal of you to disallow Drs from using the tried and true medications other countries use-for example, Dr. Shankara Chetty, of South Africa, has treated 7000 patients WITHOUT ONE hospitalization.

Protect our children from this new mRNA chemical injection and do not violate our God Given, Constitutional freedoms to choose.

For if even one child suffered side effects or death by being forced to be injected, the responsibility would be yours.

To whom it may concern,

I was recently informed by numerous people that there would be an opportunity for us to share our views on mandating these experimental shots for children as a requirement for schooling. My husband and I are 100 % opposed to this, our children will not receive these shots, we have already removed our children from public education and are now attending a private school. We will gladly pull our children and homeschool if this is coming down the line.

After reading numerous studies and articles, it sounds like 70-80% of children have already had Covid, most not even showing symptoms. These children have better immunity than anyone with the shot. The most obvious reason to not mandate is this is highly experimental with no long term studies to prove this does not cause auto immune disorders, infertility, heart issues....the list goes on!

I pray that you hear us all loud and clear, this will be the mass exodus of the public and private schooling system if you mandate this. Many got the shot to keep their jobs thanks to mass coercion, but there are so many that will not have their children get these unnecessary shots, that clearly, are not stopping the spread. When do the boosters end, if I have to get 4 shots in a year that still does not stop a virus and they had to change the definition of a vaccine for it to somewhat make sense.....there is a huge problem! Common sense is lost!

Sincerely,

A very concerned parent of 3 children that will be jabbed ever!

Subject: re: Proposal to add Covid inoculation requirement for public school attendance

External Email

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group got the vaccine, one group got the placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, not currently available and is different than the Emergency Use Authorized (EUA) Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's rights to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database used for vaccine injuries in the USA. A Harvard report in 2010 shows that fewer than 1% of vaccine adverse events are reported to the VAERS database. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows approximately 158 deaths due to vaccines per year. By January 2021, over 17,000 deaths and over 70,000 hospitalizations from the COVID vaccines were reported. This high number of lethal reactions shut down vaccine programs in the past.

The CDC reports that the COVID hospitalization risk for children is similar to the risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology, Dr. Robert Malone, warn of the extreme dangers of this experimental COVID drug. It is not safe, it is not proven and it is not legal to require this experimental drug for children.

Thank you for considering my input.
Sincerely,

Karin Carlson Morgan

Subject: Oppose Covid-19 Vaccine Mandate in School Children

External Email

Hello,

As a father of two young boys, I am writing to you this morning to urge you to oppose a vaccine mandate to attend school in Washington. As has been shown throughout this entire pandemic, young children are the least at risk from Covid-19 and vaccinations are not stopping the spread. I will not willingly jeopardize the health of my children on a vaccine in which several shortcuts have been taken to obtain approval in younger children, the most recent of which occurred just this week when the FDA approved booster shots while bypassing it's own scientific advisory committee. The requirement should be voluntary and it should be made by parents, not the government.

Thank you for your time.

Aaron Kurashige

I am emailing in regards to your upcoming meeting on 1/12

Specifically agenda item #11 :

11. Rulemaking Petition – Chapter 246-105 WAC, Immunization Criteria, Child Care and School Entry
—Possible Action

We are fully against the mandate of a covid vaccine. While we are vaccinated ourselves there is absolutely no reason to mandate that children are for school. Especially considering recent data is that vaccinated and non-vaccinated are equal carriers, meaning that whether you are vaccinated or not - you are not a larger threat to others in the classroom.

Please note this vote against

Subject: PLEASE DO NOT REQUIRE MY CHILD TO GET VACCINATED!

External Email

To whom it may concern,

There are talks that Washington state schools will soon require covid vaccines in order for children to attend public schools. I am respectfully asking that you do not mandate this. Children are the least effected by this virus and there is no need for them to be vaccinatdd with a substance that doesn't even provide full immunity. Our children are currently fully vaccinated for all approved vaccines including the flu vaccine, but we do not know enough about this covid vaccine. We are very concerned for our children and will not give them this vaccine, we will take our children out of public school if this is mandated. Thank you.

I am against any mandated "vaccines". These injections are all still under Emergency Use Authorization and each adult has the right to decide whether or not to get it for themselves and their children, without reprisal.

My son was a healthy 40's adult until his injection for his job. Then he had a stroke. These injections have not been proven to be safe for adults, let alone our children. NO to mandated injections of any type or reason.

Subject: Parent Opinion Regarding Covid Vx Requirement for Public Schools

External Email

Hello Board of Heath Technical Advisory Group,

I attended the TAG meeting yesterday regarding adding the Covid Injections to the schedule for public school vaccine requirements and would like to share my thoughts for your consideration while you are in the process of making a highly poignant recommendation affecting public policy for our schoolchildren.

I would like to start by saying that my family has already survived one of the early variants of "Covid" and I believe the "science" on a global scale suggests that natural immunity is at least, if not more, effective than the injections are proving to be as we reflect back on the last year. As a society, we are already on a 3rd booster shot in a year in an attempt to vaccinate our way out of the "pandemic", and it is reported that people are getting virus symptoms even after the 3rd injection, many of my friends included, since the vaccines are not stopping the spread. From my view, that does not appear to be effective, and it certainly would be an administrative burden for schools to track multiple boosters each year moving forward.

My family tested positive for antibodies 8 months after initial infection and understand that it is very likely that T-cells in our bone marrow will carry immunity memory long after the antibodies subside. I would even go so far as to say that we feel blessed we got it naturally first and have real natural immunity instead of having relied on an uncertain injection. I come from having a passionate belief in holistic living, adequate daily supplementation, and daily non-toxic self-care with the objective of chronic disease prevention, living by the gifts of the Earth endowed by my creator. Because I participate in the knowledge sharing from the now silenced, "functional medicine" community, I had enough knowledge, well before the injections were released, about how to prime the immune systems of my family members that we were able to beat the virus at home using natural remedy, without ever setting foot in a hospital or taking a drug. Based on sound knowledge about immune support and cell function, we chose to elevate our Vitamin C, D, Zinc, Selenium, and Quercetin supplementation before the injections were even released and well before we were infected. I believe recent statistics that show deficiencies in these nutrients added to the severity of some people's extreme symptoms. It is terrible in my opinion, that our leaders suppressed promoting these simple protections and available early treatments in favor of a new, high dollar pharmaceutical product, which is being funded at the expense of the common taxpayer. Sadly, I am not surprised, because we also have seen decades of history in which the big corporate machine has stood boldly against natural remedies, putting profits over people, in favor of patented products that often come with a list of side effects. Isn't side-effects the reason we have previously been allowed "informed consent"?

Because my family stepped back and waited to see how these injections would work out

and have meticulously examined the ever evolving story, we become further concerned with the numerous reports of injuries reported by people after receiving the injections. I have personal friends who have developed immune system dysfunction and severe cases of shingles almost immediately after receiving their shots and they express regret for having been persuaded to receive the injections. I hear story after story about VAERS reports of Myocarditis, Pericarditis, Bell's Palsy, and numerous other relevant reactions and side-effects after receiving the injections. This makes me extremely uncomfortable as a parent that I should be forced to inoculate myself and my child against a virus that we have already survived and built immunity to, with a product that was rushed to market while having some devastating shortcomings. It would certainly not be the first time the FDA has approved a drug that was recalled years later following litigation from side-effects. So, for my family, our assessment is that the risk of the vaccine side-effects is greater than any further benefit we would receive from being injected with it given we already have the naturally acquired antibodies.

We see this virus is symptomatically similar to a cold/flu and the statistical survivability rate is also similar. In fact, it was shared early on that the children are the least likely to suffer severe symptoms and the new variants are evolving with less severity in symptoms as time goes on. If it is still about children protecting Grandma, I would argue that Grandma now has injections available to protect her as long as boosted regularly, and I hold the view that natural herd immunity is still going to be a better long-term immunity solution for humanity, especially for the children. At this point, it is evident to me that this virus will have to run through the population with or without the injections.

With that comparison in mind, the flu shots have been around for decades and we do not yet mandate them onto the vaccination schedule for children and most of those that are (except the newer exception for MMR), allow medical, religious, philosophical, and personal exemptions. Further, I would like to hope that at the very least, the exemptions be allowed if Covid injections are even put on the schedule for children, and perhaps that natural immunity should be recognized as valid where blood tests proving naturally acquired antibodies can be provided in place of the vaccines.

At the end of the day, though, I believe it is the parents' rights to choose what is best for their child and for themselves, and there needs to be some avenue of which we can be free to continue to make the healthcare decisions for our family without being further damaged by our children experiencing a loss of education as a result of choosing the natural path over a laboratory creation, whether it be for religious, philosophical, or medical reasons. I would be devastated if my young teen boy acquired Myocarditis from a vaccine that I don't believe he needs at this point, especially given he has the naturally acquired antibodies. Further, if these exemptions will remain accessible, then is it even worth the administrative burden on schools to track boosters several times per year?

Surely, you have seen that school enrollments declined in 2020 and 2021 over mask mandates, causing loss of revenue in each school district. As with the trend of adults choosing to be fired from their jobs, over being forced to take a pharmaceutical product they don't want to put in their own body, I suspect those same adults will also be declining for their children. I would think that a forced vaccination schedule onto our children will further exacerbate the enrollment issue, with possibly another 30-40% drop in school enrollments, which would certainly be a huge disruption to funding the operations of public schools. Is that really a cost one state agency wants to put onto

another state agency?

I truly hope that as your recommendations are put together, politics, agendas, and corporate interests will be set aside in favor of non-tyrannical compassion to children and families who have already suffered enough over the last couple years. It is clear that there is not a win-win situation in respect to the evolving virus and/or the "vaccines", and we will live with its existence whether or not these new vaccines are mandated. There has been enough divisiveness created around this pandemic, and I believe it is time to stop divisive public policy in its tracks and instead come together to create communities with respect and support for individuals to make their own educated health choices, with ALL of the facts instead of cherry-picked statistics presented by an untrustworthy media. Of course adults and our children should always stay home and isolate when sick with any virus, but at the same time let healthy people be free to choose without supporting a false narrative that healthy people can get somebody sick because they have chosen not to take these injections that have failed to adequately prove to safely stop the spread.

If I could add one more suggestion, that while you are gathering your data, you consider having each school district send out an anonymous survey to enrolled families to determine the percentage of school enrollees who already have naturally acquired antibodies. I think you may be surprised by the findings of the currently incomplete statistic regarding the number of schoolchildren who already have natural immunity. I believe this information is absolutely relevant to a sound recommendation for the future of our children's health and well-being.

I respectfully thank you for your sincere consideration of my views as a parent and Covid survivor.

Erika Clough, Mother and Citizen of Washington State

Hello,

Our family of 5 is against mandatory vaccinations for children, including those attending school. Our school has been open for almost all the last two years of Covid. Our school's administration and teachers have followed all the recommended protocols, parents have cooperated fully, and we have only had one small outbreak where our school closed for a few days last October when a few students in one class tested positive. The vaccines do not stop the disease and there has not been enough research and data gathered to know the negative impact from the vaccinations, especially on children. The most important fact is the children are at an extremely low percentage to contract the virus and nearly none die from covid if they are healthy otherwise. There are even few cases when children with at-risk conditions get covid and do not survive. Children are not in the at-risk groups and it is dangerous to experiment on them without a valid reason, proven research, or statistical backing. Forced vaccinations will push more students, families, and teachers into further isolation, putting off needed care out of fear, and hurt our State's children and families even more.

The Christiansen Family

Everett, WA

Subject: Proposed policy of citizen detainment

External Email

I see the WA state board of health is considering a policy that allows them to enforce emergency orders that allow people to be involuntarily detained in quarantine facilities.

As a Washington state citizen I want to voice my opinion that that would be crossing a line that could be detrimental to our basic rights. We are relying on you to keep our citizens health and safety first and foremost, and moving towards that much government control is not what's best for the health or safety of the people of our state. Involuntary detainment is no longer keeping personal bodily autonomy, and the fact it is even being considered is quite unbelievable. In my opinion basic human rights being eroded is the least safe option possible for citizens. Please do not let it come to this, for all our sakes.

I know you just want to do what is right, and your heart is in the right place. Just like we teach our kids in school, you need to just listen to your heart instead of following the peer pressure. Topics are so politicized now that remembering basic human decency is a good place to start.

Thank you for your time, I look forward to hearing the outcome.

Subject: Please DO NOT mandate vaccines for public school!!!

External Email

Dear Washington State Board of Health,

I am deeply concerned about the push to mandate the Covid-19 vaccine in Washington public schools. I have friends, children, and my own family who will be gravely impacted by this mandate. Children are already suffering in academic performance. So many moms I know are buckled under the stress of virtual learning. Children are at an unbelievably low risk for Covid-19, and it does not make sense risk their health and safety. Please let our little kids go back to school in their natural state, and prevent any further damage from these mandates.

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets vaccine, one group gets placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccine adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time.

Thank you for even opening. I know you must have 1 million letters and feel the weight of the world on your shoulders.

We are afraid. We are skeptical. We are confused, please don't push us further by mandating something none of us truly understand. If things have gone the way we were told they were we would not be in the situation. There is a lack of trust and please don't punish us further for that. Please allow our children to experience the freedom of medical choices as well as daily life that our grandparents gave up their life's for. Please stop destroying what little trust we have left.

If you're still reading, I thank you very much. I want to tell you my experience with the vaccine. My daughter is an ICU nurse so I took this all very seriously and got vaccinated very early. It destroyed my body for three months. I could barely walk and my knees were swollen to the size of small watermelon's. After three months it spread to my hands and I could barely move them for almost 2 months. Each and every day was and still is but to a lesser degree extremely painful. We don't know enough to inject our children with something no one understands.

In conclusion, please review the statistics of the flu which we have never mandated a vaccine for and Covid. If that was listened to and respected and acted accordingly upon, we wouldn't be here and that... Is science.

Much appreciation for your time,

Brandi Cohen

With regards to the board,

I am a very concerned parent of a student enrolled at Stanwood High School. This is an important article I implore you to read this scientific research that in good conscience should be read before any decisions made.

<https://www.sciencedirect.com/science/article/pii/S221475002100161X>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.sciencedirect.com%2Fscience>

I feel the vaccines are not necessary for anyone under thirty especially our young students. The omicron variant is not a high threat to those under 18. Covid is dwindling. Everyone pretty much has had it and has natural immunity. It is not a safe vaccine for anyone in many Doctors opinions for those under thirty years of age. Even though they say it's safe, many are having lung and heart problems, and other health ramifications that can last a lifetime.

The risk is less from covid itself for young people. It does not stop anyone from getting covid. Most people getting Omicron are actually the vaccinated people. It is very low risk of death for unvaccinated children. Lower than influenza, which we don't mandate for every year to attend school because it is not a high threat either.

Most Parents will get an exemption as the risk of damage from a fully untested vaccine that is terrifying, they have not even divulged the ingredients but we know there is Nanotechnology in it as well as fetus cells. Why would we want any part of that in our children? Our kids are not Guinea pigs and should not be treated as such. We all should have the right to choose what goes into our own bodies.

The vaccine does not stop the spread. It is unnecessary especially for students who are at extremely low risk of dying from covid-19, any variant included.

Also proven that masks are also entirely unnecessary, they do nothing except reduce much needed oxygen intake, causing headaches, also hard to focus on studies. The masks also take away their ability to communicate as well, unable to read each other's faces, and makes everyone look like a criminal. Detrimental to social clues, and especially their mental health.

If you truly want to keep the children of our state healthy you would study exactly what is in this vaccine you are pushing and recheck the real ramifications this is having on children who did get the shots and see what the Doctors are seeing. Blood clots, strokes, seizures, lung infections, autoimmune problems and much more.

Please read this medical article with all the real facts about the vaccines before you make any devastating decisions, I implore you. Our children are our future.

Regards,

Sarah Kramer

Hello,

I am writing in opposition to any state mandated vaccine for Covid for children. As a general supporter of vaccines, I am not comfortable giving an emergency approved covid vaccine to my children. Covid has proven to be minor for children and the vaccines are not preventing infection as we're seeing across the country. I do not think they should be prevented from attending public school for this vaccine that ultimately has no benefit to them or the public since it does not prevent infection.

Also, my children going to school in person is a huge benefit to not only their mental health but their social development. Blocking them from that due to an emergency vaccine that is not proven to prevent the virus, would bias them in an unfair way.

Best,
Christi

Hello

This email is in regards to the vaccine mandate of the covid-19 vaccine for children to attend school.

I have a grandson who attends school in Whatcom County. I believe all that vaccines, including the covid-19 vaccine, should be up to the discretion of each family for each individual child. This is something that should be left up to the family and their doctor to discuss and make appropriate decisions for each child.

I know that if you mandate this particular vaccine, the covid-19 vaccine, that many parents will pull children out of school and choose other school options. Other families may decide to move out of state if this vaccine is put on the mandated list to attend public school.

I believe the government should not impose these vaccines on children or adults alike.

Regards,
Marti Moore Baillargeon

As an RN here in Spokane I have heard/seen of many patients getting bad reactions from this covid vaccination, stroke symptoms, heart problems, and even have had friends who have died from complications from this shot.

So, as a mom of four I will be pulling my kids out of the lake spokane school district if this becomes a mandatory vaccination.

This shot will not prevent the virus from spreading. Let us parents do what we think is best for our babies and don't force what you think is best for our family.

Thank you for hearing our voices and please don't take away this school from my kids.

Subject: please deliver this information to the TAG considering COVID-19 for inclusion in
chapter 246-105 WAC

Happy new year, Samantha and Hannah,

Will you please deliver the following message to the members of the Technical Advisory Group that is considering COVID-19 for inclusion in chapter 246-105 WAC. May I ask that you reply to this message to confirm that you have done so? Thank you.

Dear TAG members,

To assist your deliberations regarding including COVID-19 in 246-105 WAC, Informed Choice Washington respectfully requests that you view The Canadian Covid Care Alliance's 39-minute video "The Pfizer Inoculations for COVID-19: More Harm Than Good <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.canadiancovidcarealliance.org>>." It sets forth facts regarding the hierarchy of evidence; absolute versus relative risk; Pfizer's poor trial designs, missing data, and the mischaracterization of their results; adverse events; misleading post-marketing surveillance reports; conflicts of interest; governments' indemnification of this drug maker; and recommended reading.

The accompanying PDF document at the above site includes citations for your reference.

Thank you for your time and effort in reviewing this critical information. During your public orientation meeting on Wednesday, Drs. Pendergrass and Kwan-Gett advised you to keep an open mind. We join the doctors in this exhortation, because in order to properly carry out your duties, it is necessary to examine evidence being provided by those who are opposed to requiring these pharmaceutical products for Washington State children.

Feel free to contact me for additional information.

Sincerely,

Lisa Templeton

Executive Secretary to the Board

Informed Choice Washington

--

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets vaccine, one group gets placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccine adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time.
Sara Johnson, Spokane Washington

The most powerful way to manifest is through subtle intention and choice less awareness—intend to let go and flow.

Hello,

As a taxpaying citizen of Olympia I do not agree with the "need" to make shots mandatory for school entry. If you want to refund me all of my public tax funds that goes to the Olympia school district then you may completely do that and then you may do whatever you wish. I do not agree with this potential thought of forcing shots on two children as there is no permanent studies for the long-term effect. Thank you for your time.

The Covid shot should never be forced on our kids. I am completely against not this totalitarian idea. Kids are not dying from Covid. This is unconstitutional.

As a 76 year old grandmother of 11 grandchildren from 5 to 18 I am alarmed and ashamed of nearly every "group" of adults on both sides of the political, social, economical and biological side of the aisle. Never in our country's history have our children been subjected to mandated drugs that are still experimental and have undetermined or unknown life long consequences.

This is insanity, and it is wrong.

I was a child of post World War II and the stories of atrocities done to children in Germany and allowed or ignored by an entire country were something I could not believe could have been done. Now 70 years later it's our children and grandchildren that are being used as experimental animals mandated by "officials" with no authority to make these decisions for any child other than their own. Period.

External Email

Jan. 5, 2022

Dear Samantha Pskowski,

I am a parent to 3 young children (under 12) in the White River School District (Pierce County). I appreciate the need to keep our children safe in the school environment. There are many, many safety concerns to consider. But after 2 years of very difficult rules and regulations for our young children regarding COVID. I don't believe that this should any longer be the number #1 concern regarding our children. I think we need to find a way to carry on with "normal" life cautiously.

Our children can not carry on wearing masks to school indefinitely. It has caused interruption to learning for my 2nd grader. She was learning to read just as schools closed in 2020. Through all the zoom, partial open schools and irregular teaching lessons. She did not learn to read as she should have as a 1st grader. If the student can not see the teachers mouth to hear her pronounce and sound out words, learning to read is going to be extremely difficult. These youngest students are losing learning that they will never get back! Now she is a year behind in reading and I am doing everything I can to catch her up, because this affects all her other learning subjects too! I even hired a private tutor because I was so concerned about her falling behind. I am lucky that I have the means to pay for a tutor. But many parents do not, therefore their kids will just stay a grade behind. There is no clear evidence that masks are affective in the school environment. I don't know if you have been in a school lately... but you should really go

and spend time in these classrooms. You will see that the kids are not even wearing their masks appropriately and the job of the teachers should not be "the mask police". They should just be able to freely teach their students.

I believe that requiring the Covid Vaccine for young children is NOT NECESSARY! I am not opposed to the vaccine, I actually received it myself. I am not opposed to vaccinations for children. All of my children have received all their regular vaccines. But Covid is not killing nor hospitalizing children! My entire family was sick with Covid over Christmas break (my husband and I are vaccinated) and it was no more than a minor cold/flu. Now that we have had Covid studies show that natural immunity is much more powerful and longer lasting than the vaccine. So why do my children need to be vaccinated? I feel the possible long term affects to this very new vaccine could be far more damaging than very minisule possibility of death to covid. I would like to see another year at least of testing on this vaccine before it is administered to every child. I can see in the future it may be like receiving an annual flu shot and I think that is great! I do not believe in making it a requirement to attend school. I should have the choice as a parent if my child receives the vaccine and it should not be a vaccine or education choice!

Thank you for hearing my concerns and I trust that you will consider these as you make choices for the families and communities you represent.

Sincerely,

Amy Molen

To whom it may concern,

For those of you who may be involved in the process of considering the Covid "vaccines," Please do not recommend COVID-19 "vaccines" to be added to the list of required immunizations for school attendance.

The covid "vaccines" are not vaccines, The covid "vaccines" are experimental COVID gene therapy injections. All three current COVID injections are experimental gene therapies, not vaccines. The COVID gene modification injections permanently change human genetic material, cause infertility, cancer, birth defects, and more. VAERS through 12/24/21: 1,000,227 adverse events reported. 21,002 deaths, 110,609 hospitalizations, 109,245 urgent care, 156,456 doctor office visits, 8,673 anaphylaxis, 12,532 Bell's palsy, 22,117 3,435 miscarriages, 10,640 heart attacks, 22,117 myocarditis/pericarditis, 35,650 permanently disabled, 5,011 Thrombocytopenia/low Platelet, 23,892 life threatening, 36,492 severe allergic reaction, and 11,462 shingles.

<https://openvaers.com/covid-data>. Based on these numbers, the COVID injection roll out should have been stopped a long time ago. And these are just the adverse events reported, under-reporting is a major issue. Additionally I have seen many alarming videos of athletes dropping suddenly with heart symptoms in the past year. Athletes that were required to receive the COVID injection in order to participate. Check out a link to VAERS to view individual VAERS records which include the recorded deaths of children following COVID injections.

<https://medalerts.org/vaersdb/findfield.php?medalerts.org/vaersdb/findfield.php?IDNUMBER=1576798> ; I have watched numerous videos of athletes collapsing during sporting events. One article reported counting 395 athletes collapsing, 231 dead, last year around the world. All athletes were required to get the COVID injection to participate.

<https://goodsciencing.com/covid/athletes-suffer-cardiac-arrest-die-after-covid-shot/>. ; According to Dr. Jane Ruby, (Dr. Jane Ruby's sworn affidavit) the COVID gene modification injections are under EUA, not approved by the FDA, therefore consent should not be coerced or required. The only recently approved injection is Cominarty, and it is currently not available in the US. The COVID shots are considered "genetic vaccines" which should be under a fifteen-year regulatory cycle with annual visits for safety evaluation by the researchers according to the FDA. We do not know the long term effects of these gene therapies, and it will take a long time before we do. Additionally, these gene modification injections should not be offered without proper consent and proper follow up. Unfortunately the FDA and CDC are not offering follow up methods to assess risk of serious adverse side effects. No one should be pressured or coerced to receive these COVID injections. <https://www.fda.gov/regulatory-information/search-fda-guidance-documents/long-term-follos-after-administration-human-gene-therapy-products>. ; Informed consent to be injected with these gene modification therapies must be attained, however the package insert is blank, and there has not been full disclosure as to what is in the injections. The manufacturers do not include study results for safety that would adequately inform persons being injected (again, package insert is blank). Those who have been injected with the COVID gene modification injections have essentially become part of the world's largest experiment. Phase trials are being run concurrently rather than consecutively which is a questionable procedure. On June 24, 2021 the CDC announced there might be a link between the COVID vaccines and

myocarditis. <https://www.advisory.com/daily-briefing/2021/06/24/heart-inflammation>. ; On July 12, 2021, the FDA warned about Guillain-Barre Syndrome or ascending paralysis for J&J vaccine. <https://www.fda.gov/media/150723/download>. ; The FDA issued a warning for teenagers, particularly boys experiencing higher rates of heart inflammation and heart failure. It is of concern that the reported rates of heart injury, blood clots, strokes, teen heart attacks, paralysis, permanent motor impairment are not listed as possible side effects on the label. Dr. Philipe VanWelbergen, Dr. Barbel Ghitalla, and others have reported on "COVID injection side effects, and yet this information is not disclosed on the label. Dr. Robert Young recently discovered evidence of nanoparticles of bismuth, titanium, vanadium, iron, copper, silicon, aluminum, steel aggregations, graphene oxide, and lethal parasites embedded in vials of Pfizer, Moderna, Johnsons & Johnson, and AstraZeneca when he put the contents of the vials under visual microscopy. <https://www.drrobertyoung.com/post/transmission-electron-microscopy-reveals-graphene-oxide-in-covid-19-vaccines>. ; Dr. Jane Ruby points out that the COVID shots are particularly risky for 12-29 year olds. "Heart failure has a five-year 50% survival and would markedly reduce the lifespan of a child or young adult who develops this complication after vaccine-induced myocarditis" (McCullough PA, Philbin EF, Spertus JA, Kaatz A, Sandberg KR, Weaver WD; Resource Utilization Among Congestive Heart Failure (REACH) study.

A quote from the American Heart Association: "We conclude that the mRNA vaccines dramatically increase inflammation on the endothelium and T Cell infiltration of cardiac muscle and may account for the observations of increased thrombosis. Cardiomyopathy, and other vascular events following vaccination."

https://www.ahajournals.org/doi/10.1161/circ.144suppl_1.10712. ;

A viral gene is injected into the cells which forces the body to make toxic spike proteins. These proteins often cause permanent damage in organs. Damage can occur to the brain, nervous system, heart and blood vessels, reproductive system, and immune system. Blood clots are a common adverse effect. Damages that occur are irreparable and irreversible. Children are not a danger to their parents or grandparents. The risk-benefit analysis shows these shots are high risk with low benefit. ADE (antibody dependent enhancement) is a concerning side effect of the covid injections. Sycharit Bhakdi, MD and Arne Burkardt, MD presented at the Doctors for COVID Ethics symposium on 12/10/21, calling for an immediate stop of the use of gene-based COVID-19 injections. They demonstrate that the COVID injections do not protect against COVID infection, and there are no positive effects, instead, the "vaccines can then trigger self-destructive processes that lead to debilitating illness and death." They say the breakthrough infections among covid injected persons are confirmation of the problems with the covid injections. They describe how the covid injections cause cells to express a spike protein, then the cell comes under attack by the immune system, occurring in major organs in the body, which can lead to myocarditis, cardiac arrest, and death. They reported evidence of vaccine-induced autoimmune-like pathology in multiple organs of persons who passed away as a result of vaccine injuries.

<https://doctors4covidethics.org/on-covid-vaccines-why-they-cannot-work-and-irrefutable-evidence-of-their-causative-role-in-deaths-after-vaccination/>. ;

Many scientists and doctors around the world are currently, speaking out about the dangers of these COVID injections at great risk to their reputations, livelihoods, and licenses. These doctors and scientists are being censored for raising concerns about the COVID injections. In short, msm has been promoting these COVID injections as "safe and effective" at nauseum, however, I am of the belief that in actuality, these COVID injections are unnecessarily risky for students and provide low benefit. Those who receive a covid injection have become part of the largest experiment in world history, and I believe that should remain a personal choice. Students should be allowed to choose whether or not to subject themselves to a gene modification therapy that appears to be high risk for many severe adverse reactions, including death. I would like to request Mead school district resist and refuse to comply with requiring COVID injections.

Concerned parent

I am strongly against forced vaccinations for covid 19. This is a virus, not a disease and the vaccine does nothing to eradicate a virus. Please do not force an unknown untested shot on the innocent children when we do not know the long term side effects from this new type of technology. Our job as parents is to make medical decisions for our children, not the government. If the state should choose to pursue forced vaccinations for school kids my children and hundreds of thousands of kids throughout the state will be pulling our kids out of public schools.

Mandating a vaccine that has not been properly vetted and studied is an unwise decision for any leadership to make.

Please note that the efficacy rate continues to go down with every covid vaccine.

Therefore, not an actual vaccine.

Taking an emergency use "vaccine" and mandating it for children, our future, has so many far reaching implications that you as public leaders do not want that on your hands.

You will see public education crumble in the state of Washington. The current state, which is already seeing huge reduction in numbers.

I know for me, as a mom of four, you will not have my children in public education if this is mandated and I know many that feel the same way.

Subject: Opinion re Mandate on Vaccine for school aged children

External Email

To Washington State Board of Health members,

Hope this email reaches you well. As a parent of a child (soon to be 2 children) attending an elementary school in Stevens County, I am writing to make it known that myself, among many others, are strongly against the covid vaccine being mandated for school aged children. I believe that this is a decision that should be made at local level, or, in fact, made specifically by the parents or guardians. Although I understand that covid-19 can be serious for adults, I just do not believe that it is harmful enough to children to justify a mandate. This vaccine does not stop them from getting covid or stop them from spreading it. I am personally not comfortable giving the vaccine to my children, at this time, and would have to pull them out of public school to homeschool, which is not ideal for any of us. Please think of the children's future and make the right choice. Please just let this be a choice.

Thank you for your consideration and taking the time to read this email.

Sincerely,

Rachael Smith

If the Covid vaccine GUARANTEES that it will prevent transmission of Covid while knowing all the side effects, then making it mandatory makes sense. However, if it does NOT, then making it mandatory is unethical is puts children in an unknown position in the future considering that we do not know what the side effects are, just yet.

Give it at least 10 years to think about making it mandatory.

Subject: OPPOSE vaccine mandates for children

External Email

To Whom it May Concern:

I am opposing your formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school-aged children.

I am writing to vehemently OPPOSE any vaccine mandate in children. The shots are still EUA and haven't gone through the proper 3 phase trials for all ages. (Yes, I know the word game the FDA and CDC did for Comirnaty approval which isn't even available in the USA). These shots DO NOT prevent you from contracting covid. More and more vaccinated individuals are contracting covid despite being told early on they wouldn't get it if they were fully vaccinated against it. This is not a vaccine per definition because it doesn't stop one from contracting it. Children are not in danger of dying from covid. There is over a 99.9% survivability rate for children. Contracting covid is not a death sentence. Just because cases of covid are going up doesn't mean deaths are. This is a virus that will never go away despite efforts to vaccinate against it. Viruses constantly mutate and become less deadly over time. The choice to inoculate for this virus should be left up to parents and the doctor. Just say NO to required covid shots for school aged children.

I am in full SUPPORT of the rulemaking petition set forth by Xavier Figueroa PhD on behalf of Informed Choice Washington. This needs to be looked at and supported by all involved.

Thank you for your time.

To whom it may concern, in no way shape or form do any government officials have the right to mandate what should be an entry for our children to go to a school we pay for. I decide what is best for my child not anyone else. This is very unsafe for children so follow the science in that one and not the science that fits your agenda. I and some many will pull my kids from school if this is mandated but I will also never stop fighting or shutting up about an over reach is you so choose to mandate this. Leave it up to the parents you do not know what is better for my children then I do!

Good afternoon -

It's my understanding there will be a rule making petition regarding WAC 246-105, Immunization of child care and school children against certain vaccine-preventable diseases. Specifically with regard to 246-105-030, Vaccine-preventable diseases children must be protected against for full immunization, and a possible recommendation to add Covid-19 vaccine to the list.

The following are my comments for your consideration on the matter:

First and foremost, Covid-19 is not a "vaccine preventable" disease. The current vaccines do not prevent contracting or spreading Covid-19, especially the two most current variants (delta and omicron). Clear and current data establishes that as fact.

The WAC centers around vaccine preventable diseases. The addition of a vaccine requirement for a contagious disease that cannot be prevented with said vaccine does not align with the other diseases, or the effectiveness of the vaccines to prevent them, listed in section 105.

Additionally, the only Covid-19 vaccine available for children is the Pfizer vaccine and it is only under Emergency Use Authorization (EUA) and is still technically in its research window. It is unfathomable to consider making a vaccine that is not fully studied, vetted, and approved a requirement for school-aged children. School-aged children who are more likely to have a negative reaction to the vaccine than to contract severe illness, be hospitalized, or die from the virus itself.

Getting children to take the Covid-19 vaccine is not your job or your choice. It is that of their parents and/or guardians.

Thank you for your time and attention in this very serious matter.

Sincerely,
Angela Roberts

Dear TAG

I am concerned that children may be encouraged or required to take an experimental vaccine for Covid when there are hundreds of injuries from myocarditis, and to their immune systems, which outweigh the risks from Covid. Please let parents decide whether their children would benefit from vaccination and freely choose it or not.

There is little or no benefit in preventing transmission (that's why the vaccinated wear masks too), based on studies from Vietnam, Israel, UK, and a county in Massachusetts. The only benefit is a reduction in symptoms and risk of death, so the elderly and those with comorbidities may choose to vaccinate FOR THEIR OWN benefit. There is no benefit to others or society, so no logical justification for a mandate.

Please consider the following data, attached, showing the infection fatality rate (IFR) for children, compared to other risks:

0.04% Covid, children with comorbidities (Stockholm University)
0.015% risk of death/yr in automobile accidents (40k/250M)

0.002% all children (CDC)
0.00004% healthy children (Stockholm University)

Note that the risk of automobile death is 7x the IFR for covid for the average child! The risk of automobile death for a healthy child is 375x the risk of death from Covid! (0.015/0.00004) Would you make it illegal for parents to drive their kids to school?

The VAERS system is reporting 24,900 adverse reactions for U.S. children and 31 deaths out of 13 million vaccinated as of 11/30/21 according to NPR. And the underreporting for VAERS is probably at least 5x. Since children have minimal risk from Covid, and since the vaccine prevents their immune system from developing into resilient adult immune systems, it is harmful to vaccinate any children who are healthy. Since the vaccine does little or nothing to prevent transmission, there is no social benefit to mandating vaccination, and doing so may actually prolong this crisis by forcing variants. There is no need, and much concern for harm; why require it?

Yours truly
Frank O'Neill

I am submitting my comment regarding mandating the covid jab for students to attend school- NO! NO! NO!

Can I be any clearer? Have you researched the children who have been damaged from the poison? Myocarditis, death, neurological damage, infertility, to name a few!

NO NO NO!

God protect our children from evil doers!

Covid vaccine mandates should absolutely not be a requirement for our children. Not enough is known about the safety of these vaccines. The decision to vaccinate or not should be a private decision between physicians, parents, and the child (depending on child's age).

Thank you,
Jerri Lien

Over my dead body will my children be receiving this jab.

If this passes all 3 of my children we be pulled to homeschool or better yet this would be the straw that breaks the camels back and we will move from this state.

I have a 6 year old daughter in public school, who by any means necessary will not be receiving the Covid vaccine. There is not enough data to suggest a legitimate reason for kids to get the vaccine. Kids are much more vulnerable to side affects not yet known, we have tested this drug for months not years. I will not submit my daughter to what I think is a health risk.

Sincerely a Washington state parent and tax payer.

Hi Keli,

I just learned that there was a meeting about mandating COVID vaccine to all schools children, and it was done without public comments or questions being accepted.

There is no science behind this shot, we now that children are at very low risk. We need to stop this experiment on children!

I highly oppose this mandate!

If you aware of any scientific evidence that this shot is good for children and the studies to back it up, I would love to read through them.

Thank you for listening to concerned parents and doing your best to do what's right!

Best regards,

Tatiana Balan

To whom it may concern,

Good afternoon. Can we please not mandate the "Covid-19 Vaccine" for children 5 and older. That would be greatly appreciated as the vaccines are becoming more therapeutic than actually stopping the spread. This virus has become overtly politicized and to say otherwise would be a bold face lie.

Also, the vaccine is still in emergency use authorization with no long term studies even though the FDA says it safe, but their track record, integrity, and consistency as of recent has been questionable.

If you do proceed to mandate it, I can only assume that a long drawn out legal process will ensue as so many citizens will object. None of this is helping our kids or our teachers--it's just making so many of us feel good about ourselves in times of social media fear mongering and cancellation.

I appreciate your consideration in this matter.

Sincerely,

J. Endlish

I am appealing to you to vote against Covid 19 vaccine mandates for children. Children are at extremely low risk for Covid and the vaccines are still only EUA (emergency use authorization). For data to uphold this statement, please go to the World Council for Health website at <https://worldcouncilforhealth.org/resources/covid-vaccine-for-children/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fworldcouncilforhealth.org%2Fresources%2Fvaccine-for-children%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1274bbc75e3b4e6d681b08d9cfcbed21%7C1>

You would be taking a great risk for those children as well as yourself.

Please do not vote for this vaccine mandate...it is too early to know all the risks!

Even my grandsons asthma doctor says that RSV is more dangerous to children than Covid. I should know, we almost lost one of them to RSV!

Sincerely,

Karen Rohrbach

External Email

Members of the Washington State Board of Health

Re: Proposed Covid-19 "Vaccine" Requirement for Children

The fact that you as a board member are even considering making this experimental covid "vaccine" mandatory for entrance into school, daycare, and preschool is a mystery to me.

How many healthy children have died from the actual corona virus or its variants? What is the actual percentage? How many children have contracted covid? Why is natural immunity all of a sudden ignored? When have we ever gotten an inoculation to "protect others?" Why are we forced, coerced under threats and duress, and enticed to get experimental injections that the manufacturers state themselves do not keep one from getting or transmitting the virus? Why are the side effects and death numbers from these experimental jabs ignored? Why would one need an experimental inoculation for a virus that is almost 100% survivable? Is it possible to eradicate a virus completely? Have we ever been able to stop a virus with a shot? Why were there so few flu or pneumonia deaths in 2020 or 2021, did the flu and pneumonia just go away?

There are too many questions which you are seeming to ignore.

When I asked governor inslee's office, OSPI, and DOH why someone who has already had covid should get an experimental "vaccine," you know what the response was...? Essentially none of my questions were answered, the response was basically do it because I said so.

We the People need more information. Do NOT force this shot to further your politics. Answer the questions, use common sense, and stop issuing orders.

Yours Truly,

Emily M. Hansen,

Former public school music teacher who was wrongfully fired because I would not participate in this medical experiment. I blame you for the violations of my inalienable rights protected by our Constitutions.

In regards to children's Covid immunization; I'm writing as a healthcare provider , a Respiratory therapist at Providence, specializing in ICU care. It has been my experience that children are unaffected by covid, other than mild manageable symptoms. On the other hand the vaccine related risks are > 100 x's that which the virus imposes, including myocarditis, seizure, stroke, genital ulcers requiring reconstructive surgery; each of these is known by experience to myself and my colleagues. I'm asking that you leave the choice to the parents to make their own informed decision. It is well known that vaccination does not stop transmission, therefore mandating it to children would be unethical. Thank you for your time

This comment is for the January 12th meeting to discuss mandatory covid shots for public school children and child care.

As a parent of 2 children (ages 6 and 11) and a public high school teacher/coach of 17 years, I strongly believe that Covid shots should absolutely NOT be a requirement for our children. I want to remind you that these vaccines are still only in emergency use authorization (EUA). There is not enough research to prove that they are more beneficial to children than natural immunity. Besides that, there is not enough data to guarantee they will not cause harm now or in the future. I also want to remind you that children are at an extremely low risk for Covid. Thus, there is no need for a mandatory vaccine.

On top of that, if mandated vaccines happen, it could be detrimental to school districts like the one I work in as we will quite likely lose a huge number of students. You see, I work in a very small, rural district of less than 300 students, K-12. If that happens, we obviously lose funding and will probably lose good teachers, like myself who has been very dedicated to my job and the success of my students/athletes. I will continue to advocate for the best interests of my kids and students and I ask that you do the same, and vote no against mandated Covid vaccines.

Thank you for your time,
Kelsey Lennox

I object to the mandate of COVID shots for school aged children on these grounds!
1)They are 99.9999% unlikely to get the virus, 2). It is a proven fact that out of 100 children inoculated,99 will either die or have lifelong cardiac or immune deficient symptoms, AND 3) it is not only ILLEGAL but Against the Nuremberg Code to mandate an EXPERIMENTAL DRUG FOR ANY REASON!! STOP THIS MADNESS!!

My grandchildren currently attend the Mead School District in Spokane. It has come to my attention you are considering a mandate for children to be vaccinated with the Covid vaccine to continue to attend school I DO NOT agree with this, Vaccines should never be forced on anyone!! This is a medical decision regarding one's own body and should be left to each individual to decide without consequence either way. If this becomes a requirement I will do everything in my power to see that my grandchildren (all 4} be disenrolled from Mead district and find their education elsewhere.

Sincerely,

Monica Holt

To whom it may concern,

For the meeting on Friday January 7th, 2022 on covid vaccine.

The covid vaccine should not be required for children who are low at risk. Any daycares or schools have no authority to require a vaccine upon our kids.

The covid vaccine does not stop the spread of the virus. The vaccine is an emergency use and not legally allowed to mandate it in any state.

My daughter does not need to be forced to put a vaccine in her body that has no benefits to her health.

It is our human and American right to have privacy and it will not be forced.

Thank you,

Chantel Stecher

I am against mandating any vaccine requirement for children to attend public school. Children are at extremely low risk for Covid. However, there are serious and life-threatening risks with the vaccines, some of which include pericarditis, myocarditis, blood clotting disorders, severe allergic reactions, and nerve disorders. The vaccines are still only EUA (emergency use authorization).

I strongly urge you to consider the ramifications and impact of these untested vaccines and their risks for the future health of our children. Mandating these experimental and unproven vaccines in order to satisfy some unknown and unproven benefit would be a great tragedy for the most vulnerable of our community.

Sincerely,

Tracy Holt

I urge you to vote NO on mandating the covid 19vaccine for children in order for them to go to school. This vaccine has not been studied enough and not for any length of time to determine any long term effects on children. It has just recently been released and now the government is pushing it like it has been out for years. when you look at the numbers, the hospitalization rate and death rate are very low in children. This vaccine, or flu shot is not a one and done that will eradicate covid 19, but a shot that you need to keep getting every 5 to 6 months to keep it effective. Please do not subject our children to this.

Please see my comments related to the upcoming board meeting regarding mandating COVID-19 vaccinations for students:

First, I would like it to be known that I am not against vaccines for people in general. The vaccines that have been required for children to enroll in school have been tested for many years prior to being approved. That is not the case with COVID-19 and it is reckless to mandate something that we as a country know little about as far as long-term outcomes and consequences.

More and more information is being learned about the negative outcomes from the COVID-19 vaccine and the results of studies are being released showing horrifying results. I am personally uncomfortable as an adult with being vaccinated for COVID-19 and I certainly do not advocate for this for my son.

As a parent and a taxpaying member of society, I find it intrusive and inappropriate for government entities to mandate something like this. America is a free country and we should be able to make these types of decisions on our own. It is morally wrong for the government or any entity in a position of power to mandate what to put in my body or the body of my child. This should be a choice and it should be up to the parents and guardians to decide what they feel comfortable doing.

Should you choose to mandate this, without an option for an exemption, I would likely remove my son from this school district. I know that I am not alone and there are multitudes of other parents and guardians who would do the same. This potentially could create even more emotional and psychological issues for our children. Children having to partake in on-line schooling and unable to see their friends or participate in sports has really had a negative impact on them. A mandate like this will likely lead to many parents removing their children from the various school districts, worsening the emotional and psychological impacts. <https://www.kff.org/coronavirus-covid-19/issue-brief/mental-health-and-substance-use-considerations-among-children-during-the-covid-19-pandemic/>,

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.kff.org%2Fcoronavirus-covid-19%2Fissue-brief%2Fmental-health-and-substance-use-considerations-among-children-during-the-covid-19-pandemic%2F%2C&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C24719b0988b64dbdda7308d9d005129https://www.cdc.gov/mentalhealth/stress-coping/parental-resources/index.html,<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fmentalhealth%2Fstress-coping%2Fparental-resources%2Findex.html%2C&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C24719b0988b64dbdda7308https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7444649/,<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ncbi.nlm.nih.gov%2Fpmc%2F7444649/>>

<https://www.healthychildren.org/English/health-issues/conditions/COVID-19/Pages/Signs-your-Teen-May-Need-More-Support.aspx>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.healthychildren.org%2FEnglish/health-issues%2Fconditions%2FCOVID-19%2FPages%2FSigns-your-Teen-May-Need-More-Support.aspx&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C24719b0988b64dbdda7308d9d0051292%7>

I find it frustrating that quite a few people believe that the vaccine is the, "magic bullet" that will end the pandemic and that make those who are vaccinated immune from getting COVID-19. There are numerous news stories and articles, as well as personal experiences that demonstrate how people who were vaccinated contracted COVID-19 and spread it to others. The most recent example of this that I can think of happened with the NFL. <https://www.nytimes.com/2021/12/14/sports/football/nfl-covid-vaccine-booster-shots.html>

My son was born with a serious medical condition but has been fortunate to have not had any complications with it growing up. Administering the COVID-19 vaccine could very well exploit this serious medical condition and cause complications with his heart leading to death. There are absolutely no guarantees this will not happen and I am not willing to take that chance especially when he is healthy overall and has over a 90% percent chance of recovering should he contract COVID-19. <https://childrenshealthdefense.org/>,
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2F%2Fchildrenshealthdefense.org/defender/vaers-cdc-adverse-events-deaths-5-year-old-died-pfizer-vaccine/>

Perhaps 20 years from now I will feel differently about a mandate of this kind. As it stands now, we don't know the long-term side effects or consequences of the vaccine and I absolutely feel strongly that it is reckless and inappropriate for any government entity to mandate something like this not only for adults but for our children.

As a parent, I must protect my son and be his voice.

Sincerely,

Sheena Hargrave

WSHB, as a concern parent I ask that you uphold common law, freedom of choice and use common sense for any potential Covid-19 vaccine immunization requirements for children in school. MY CHILD IS NOT AN EXPERIMENT . We need to protect our children. There simply has not been enough time for the proper research/clinical trials to be completed and the data is not available. This is why the FDA approved Covid vaccines are not available and the ones being administered are still under emergency use. I challenge you to do your research. MY CHILD WILL NOT BE AN EXPERIMENT AND WILL NOT BE ATTENDING ANY SCHOOL THAT WILL CARELESSLY REQUIRE A COVID -19 VACCINE. Thanks for your time.

Concerned Parent,
Leonard Fluetsch

To whom it may concern,

I am writing in response to the upcoming decision to require covid vaccines for school admission. I am strongly opposed to such requirements as numerous data has shown the benefits for school aged children do not outweigh the risks. Children are also less likely to show significant symptoms or be hospitalized after contracting the Covid 19 virus; Children have greater than a 99+% survival rate. Schools have been in session for months with no major outbreaks, hospitalization, or deaths. Furthermore, there is no data on the long-term negative effects of this EXPERIMENTAL VACCINE on children. Many parents, including myself, will pull their children from the public school system if this vaccine becomes a requirement. This will not only impact school funding but also have both social and educational impacts on student development, two key elements to adolescent growth already heavily impacted by the earlier lockdowns and remote education. No greater good can come from supporting and enacting this requirement.

Sincerely,

Sarah Dailey

External Email

Dear Washington State Board of Health,

I am against this.

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets vaccine, one group gets placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccine adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA

technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time.

Children do NOT need the Covid-19 vaccine! The vaccine includes a viral gene which forces a child's body to make toxic spike proteins. These proteins can cause permanent brain and nervous system damage. They can cause heart problems, blood clots and blood vessel problems. These can damage their reproductive systems! The vaccine can also trigger fundamental changes to their immune systems. None of these things are irreversible once the damage is caused. They do NOT need this vaccine and do not pose any potential danger to others if unvaccinated. Actually the opposite. Their immunity, if tested positive for covid, is critical and could actually save people from this virus. It has not been adequately tested! There is simply no benefit for the children or their families to be vaccinated. The risk/benefit analysis isn't even close. I do NOT support this part of the agenda!

I honestly cannot believe we are even thinking about injecting our children with this experimental vaccine. Yes it is experimental. The comirnaty vaccine that has been accepted by the fda is not being distributed in the USA. Furthermore we do not know the long term health effects this will have on anyone. Pfizer does not want us to see what is in it or the clinical trials they have done for 75 years. Why is that? My guess is because they know it is dangerous. We have now seen, through the freedom of information suit against Pfizer, that they have had many deaths and serious health issues in children and adults, some long term and permanent. You should also take into consideration how many children will be pulled from public schools to protect them from the harm this vaccine can cause. We also know that the vaccine does not work. The majority of King county is vaccinated and the unvaccinated are being discriminated against for mandates that aren't legal. King county also has a very high amount of covid cases right now. Therefore, proving that face mask a and vaccines do not work. Anthony Fauci has also been on the news recently stating that the majority of children hospitalized are not hospitalized for covid but something else and were tested upon arrival. Which means these children are either asymptomatic or having very mild symptoms. I sincerely hope you will think of our children and not let your own fear put our children in peril by injecting them with a vaccine that can kill them. I personally don't know anyone who has died from covid. I do know 6 people who have died from the injecting and one who got bells palsy from the injection. With that being said I do realize it is real and of concern and that people have died. My question to you is it worth it to play Russian roulette with our children's lives?

Sincerely
Christina Swartz

Hello Members of the Board of Health,

This email is in regards to the proposal to add the vaccine for SARS-CoV-2 to the 2022-2023 school vaccine schedule.

At this time, I vehemently oppose any and all efforts to mass vaccinate the younger members of our society to a virus. The current vaccines have not had nearly enough time to undergo high-quality random control studies to truly determine the long-term safety and effectiveness of these vaccines in our children. (As you are all aware, vaccine development is generally a decade plus, not mere months.) The concerns of myocarditis in children (particularly male children) has not been alleviated. There is still plenty of legitimate concern about the currently available vaccines and their potential long-term effects on fertility, the immune system, and autoimmune disorders. The sample size used during testing was abysmal to anyone with even the slightest bit of knowledge about research methodology. The lack of data and transparency from the vaccine manufacturer is appalling (and should be a red flag to anyone).

This virus is not deadly to healthy children. The CDC's own data shows less than 1000 deaths to children from 0-19 since the beginning of this pandemic. While those deaths are absolutely tragic it must not be forgotten that the vast majority of those children had other comorbidities and were medically fragile. The CDC also fails to differentiate between those deaths from Covid and those with Covid.

Mass vaccinations fail to take into account immunity stemming from prior infection. While there is some debate amongst scientists how long natural immunity lasts, most support a minimum of 6 months strong immune response following infection. I will remind you that natural immunity provides the person who has survived infection with T cells, B cells, NK cells, and immune cells in the mucosal tissue (to stop reinfection and to prevent further spread during reinfection). As much as we would like to say that the vaccine also provides this protection, we can't because it does not give the recipient the entire virus. At this time the vaccines available are focused solely on the spike protein.

I realize that during the case counts are currently skyrocketing. If the current variant of the month was one of the earlier variants, I, too, would be very concerned for everyone, but we are talking about Omicron. This variant is for most of its sufferers a common cold in severity. It is not deadly. Hospitalizations are not surging, not even among Children according to today's report from Seattle Children's Hospital. The only thing surging is the fear driven narrative. My point in mentioning this is what happens if Omicron is a gift, and through all this suffering we actually achieve herd immunity (isn't that what you've been trying to sell us on the last 22 months?). Please, just wait and see.

Finally, let me remind you that covid cases in children are generally very mild and go away without any medical intervention. So, while Covid can be life threatening to the older members of society, our children should not incur risks that are not their own without the very best, sound scientific evidence (that is free from politicization or greed). And that evidence is going to take years, not months.

In summation, please consider the absolute risk and benefit of this vaccine and our kids.

This is a decision that cannot be made lightly, but at this time there is just not the evidence to support a mass vaccination requirement for any human, not to mention children. Please oppose any efforts to add this to the school vaccine schedule.

Thank you for your time and consideration.

Kindly,

Dionne Miller

Subject: please deliver this information to the TAG considering COVID-19 for inclusion in chapter 246-105 WAC

External Email

Happy new year, Samantha and Hannah,

Will you please deliver the following message to the members of the Technical Advisory Group that is considering COVID-19 for inclusion in chapter 246-105 WAC. May I ask that you reply to this message to confirm that you have done so? Thank you.

Dear TAG members,

To assist your deliberations regarding including COVID-19 in 246-105 WAC, Informed Choice Washington respectfully requests that you view The Canadian Covid Care Alliance's 39-minute video "The Pfizer Inoculations for COVID-19: More Harm Than Good <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.canadiancovidcarealliance.org>>." It sets forth facts regarding the hierarchy of evidence; absolute versus relative risk; Pfizer's poor trial designs, missing data, and the mischaracterization of their results; adverse events; misleading post-marketing surveillance reports; conflicts of interest; governments' indemnification of this drug maker; and recommended reading.

The accompanying PDF document at the above site includes citations for your reference.

Thank you for your time and effort in reviewing this critical information. During your public orientation meeting on Wednesday, Drs. Pendergrass and Kwan-Gett advised you to keep an open mind. We join the doctors in this exhortation, because in order to properly carry out your duties, it is necessary to examine evidence being provided by those who are opposed to requiring these pharmaceutical products for Washington State children.

Feel free to contact me for additional information.

Sincerely,

Lisa Templeton

Executive Secretary to the Board

Informed Choice Washington

I am making a comment on the boards upcoming desision on the Immunization Criteria for Child Care and School Entry. (making Covid shots mandatory for child care and school admission).

I absolutely think this is ridiculous since children are at a very low risk of getting serious covid symptoms. We all know this is experimental and does not have a long enough period or any long term study, we have now seen this does not stop transmission. This should definitely be up to the children's Dr. and parents whether they wish to be part of this experiment. It seems hazardous of you to take on the liability for this health mandate as different people have different health concerns.

Thank you in advance for taking the time to read this and hope you will do the right thing.

I am writing to express my deep-felt contempt and disagreement to the proposal by WSBOH to recommend the Covid vaccine requirement to school-aged children on January 12.

WSBOH should not require any vaccine, specifically an Emergency Use Authorization (EUA) vaccine to be administered to children as a condition of accessing public education that is paid for by the taxpayers. Additionally, WSBOH should not require COVID testing as an alternative method to accessing public education. The data is clear and COVID has a 99.8% survivability rate and therefore is not an emergency, a pandemic, or a threat to U.S. children. On the contrary, the massive numbers of adverse events being reported to the Vaccine Adverse Event Reporting System (VAERS) makes it clear that this vaccine should absolutely never be required for any reason. The vaccine is widely available and at a low or no-cost to all who seek it. Therefore, it should not be a requirement for our children to access public education.

Once the vaccine (which it is not a true vaccine) is added to the childhood immunization schedule, the National Childhood Vaccine Injury Act of 1986 (H.R. 5546) takes effect on the vaccine. This act "Provides that no vaccine manufacturer shall be liable in a civil action for damages arising from a vaccine-related injury or death : (1) resulting from unavoidable side effects; or (2) solely due to the manufacturer's failure to provide direct warnings. Provides that a manufacturer may be held liable where (1) such manufacturer engaged in the fraudulent or intentional withholding of information; or (2) such manufacturer failed to exercise due care." The manufacturers are certainly intentionally withholding safety information, as evidenced by their request to take over 50 years to release the safety data gathered prior to releasing this vaccine. Also, the amount of blatant censorship around this vaccine is proof that the information is not being given to citizens, specifically PARENTS, so that they can make an informed decision on whether or not to take the vaccine.

Vaccine manufacturers cannot market this vaccine to the public unless they have the liability immunity that is provided by H.R. 5546, which is only put in place once the vaccine has been placed on the immunization schedule. Pfizer tested the vaccine on only 1300 children. One child, Maddy Gary, had extreme reactions and is now in a wheelchair for life and needs a feeding tube to eat. Pfizer officially reported her injury to the FDA as a stomachache. This is absolutely unacceptable.

The sole reason that the manufacturers want to add this vaccine to the childhood immunization schedule is to maintain their ZERO LIABILITY safety net that they currently enjoy via the EUA status. Once EUA status goes away, their liability protection goes away UNLESS it is added to the childhood schedule. This is their true motive for pushing the addition to the immunization schedule and is completely evil and despicable. I hope you will not be complicit in committing this grievous attack on our precious children, who are the future of not only the state of Washington, but humanity.

This is absolutely wrong, unjust, immoral and should be discarded immediately. In the United States, every citizen (this includes CHILDREN) has certain unalienable rights given to us by OUR CREATOR, and NO ENTITY has the power to deprive us of these rights. These rights absolutely include sovereignty over our bodies and completely protects us from unwanted medical procedures. The American people wholeheartedly REJECT medical tyranny and WSBOH and all other federal, state, and local government entities must cease and desist this gross violation of our God-given human rights. To make this vaccine a requirement for anyone, but specifically our children, is nothing less than evil and should not be allowed to pass. We will not sacrifice our children to pharmaceutical companies under the guise of public health.

Michelle, Melanie, Christy, Stuart, Samantha, Kaitlyn, Caitlin, Lindsay, Tracy, Hannah, Kelie, Nathaniel - are any of you parents? If you are, have any of you done any research outside of the official narrative? Health professionals all over the country are speaking out against this vaccine but are being censored. The public is waking up to the truth, and we will not stand for the government attempting to sacrifice our children any longer. I encourage you all to read the extensive work for Robert Kennedy, Jr. at the Children's Health Network who tirelessly fights for the rights of our children. Please look within your hearts and ask yourself if making this recommendation is the morally right thing to do.

Sincerely,

A concerned citizen and mother of three

I heard that the Board will be discussing the issue of requiring Covid vaccines for children at the meeting on January 12th. I am writing to strongly urge you to NOT require Covid vaccinations for children. Children have a very low risk for severe disease from Covid unless there are underlying health issues. The risk of adverse reactions to the vaccine greatly outweighs the benefits.

Sincerely,

Laurie Hatakeda

Subject: Please vote "no" for mandatory vaccines for school children

External Email

Dear Washington State Board of Health Member,

We do not know the long term effects of this vaccine, which is still under-going testing and has had even less testing in children. Please vote "no" and allow scientists to confirm this inoculation is indeed safe for children before we mandate it in our schools.

Local schools are already struggling with attendance at RECORD LOWS due to parents removing children over mandatory masking. Local home school groups are bursting at the seams with new homeschooling families, who don't want to be told how to keep their children safe and would rather educate them on their own than subject their children to current local requirements on a daily basis.

Mandating this vaccine will cause addition departures of students from local public school rosters, causing added financial burdens to our community schools.

Children are NOT at risk for Covid-19 and as such it should remain the task of each parent to determine if this relatively new vaccine is appropriate for their child.

Thank you for protecting our freedoms,

Sincerely
Alissa Helton

Hello,
I'm responding in regards to an attempt to mandate covid shots for children. Simply put, no. My children are not guinea pigs, little to no risk and shots provide defense for a short period of time. Any mandated vaccine must be approved through the right channels to allow accountability and as of now, there is none. If my son or daughter get ill from a side effect it all falls on me. In the end you will lose more students and push parents away from your education system. Stand up for what's right in this world, we need leaders not dictators.

Thank you,

Dear WSBOH,

The United States 5th Circuit Court had ruled that you can not mandate the Covid vaccine and if you do, it is coercion, which is a felony. You will be liable for each and every child that has an adverse reaction to this experimental Covid vaccine you mandate.

Children are not at a high risk category to contract Covid.
These experimental Covid vaccines have a much higher risk of giving children life altering conditions or death.

See the 5th Circuit Court ruling below and know that you will be prosecuted if you mandate and cause injury to children under your care.

Dear Board,

I believe it to be unwise to make COVID vaccines mandatory for children in childcare and school admission. Children have low risk of getting COVID. All the children I know who have gotten COVID had mild symptoms. Also the COVID vaccine is still only authorized as a vaccine under Emergency Use. A few minors have had mild to severe side effects from the COVID vaccine. If the vaccine is made a requirement, then you force parents to risk their children's health safety - under pressure - of your new immunization requirement. A parent needs to decide what's best for their child, weighing the risks. Their decision should not be pressured by the Board. Is the Board willing to take responsibility for any ill affects on children due to parents' compliance to the Board's requirement? I think you would be wise to hold off on requiring the EUA COVID vaccine for school and childcare admissions.

To Whom It May Concern:

I am writing to request that the COVID-19 vaccine not be added to the list of required vaccines for children and students. It is way too early in this vaccine's history and development to require them. As time goes on and studies are completed, a more sound decision can be reached. Do not rush into adding it to the list for our most vulnerable citizens. Thank you.

Subject: Parent Letter Re: Child Vaccine Requirements

External Email

Jan. 5, 2022

Dear Michelle Davis,

I am a parent to 3 young children (under 12) in the White River School District (Pierce County). I appreciate the need to keep our children safe in the school environment. There are many, many safety concerns to consider. But after 2 years of very difficult rules and regulations for our young children regarding COVID. I don't believe that this should any longer be the number #1 concern regarding our children. I think we need to find a way to carry on with "normal" life cautiously.

Our children can not carry on wearing masks to school indefinitely. It has caused interruption to learning for my 2nd grader. She was learning to read just as schools closed in 2020. Through all the zoom, partial open schools and irregular teaching lessons. She did not learn to read as she should have as a 1st grader. If the student can not see

the teachers mouth to hear her pronounce and sound out words, learning to read is going to be extremely difficult. These youngest students are losing learning that they will never get back! Now she is a year behind in reading and I am doing everything I can to catch her up, because this affects all her other learning subjects too! I even hired a private tutor because I was so concerned about her falling behind. I am lucky that I have the means to pay for a tutor. But many parents do not, therefore their kids will just stay a grade behind. There is no clear evidence that masks are affective in the school environment. I don't know if you have been in a school lately... but you should really go and spend time in these classrooms. You will see that the kids are not even wearing their masks appropriately and the job of the teachers should not be "the mask police". They should just be able to freely teach their students.

I believe that requiring the Covid Vaccine for young children is NOT NECESSARY! I am not opposed to the vaccine, I actually received it myself. I am not opposed to vaccinations for children. All of my children have received all their regular vaccines. But Covid is not killing nor hospitalizing children! My entire family was sick with Covid over Christmas break (my husband and I are vaccinated) and it was no more than a minor cold/flu. Now that we have had Covid studies show that natural immunity is much more powerful and longer lasting than the vaccine. So why do my children need to be vaccinated? I feel the possible long term affects to this very new vaccine could be far more damaging than very minisule possibility of death to covid. I would like to see another year at least of testing on this vaccine before it is administered to every child. I can see in the future it may be like receiving an annual flu shot and I think that is great! I do not believe in making it a requirement to attend school. I should have the choice as a parent if my child receives the vaccine and it should not be a vaccine or education choice!

Thank you for hearing my concerns and I trust that you will consider these as you make choices for the families and communities you represent.

Sincerely,

Amy Molen

Hello,

Upon hearing that hearing that there was a meeting held with almost no public notice, and that a conclusion was made to mandate all public/private school children to be vaccinated I would like to oppose this decision. Vaccination or any sort of medical choice should never be mandated! It is a personal choice and parents are the ones who should decided what goes into their child's body. This is a country that was founded upon freedom, not oppression and manipulation; no matter the circumstance! I strongly disagree and oppose your decision to go behind the backs of parents to perform medical procedures on children who are not even your own. You should be ashamed of yourselves and not go any further with this ridiculous and disgusting decision of yours.

Thank you,

Bogdana

Good morning to the board members,

I am emailing to express my extreme concern for mandating covid shots for children to attend school. The shot is only approved under an emergency order, and I do not believe that we should be forcing children and families to choose between attending school or getting a vaccine. Covid shots should absolutely NOT be requirement for children to attend school!

I am a parent of a public school 3rd grader.

I write today to request that the covid immunization not be added to the required immunizations for public school.

Covid is not showing to be a large risk to children and is still under emergency use authorization.

I am concerned and torn about my son's future if this trial vaccine becomes required as my son thrives in the public school environment but I can't with good conscience give him an immunization that is so new, no long term studies and for a virus that has been proven to not cause significant damage to the younger ages.

I will be forced to home school if this immunization becomes required. Washington state has already lost 55,000 enrolled public school children this school year. I am active and involved in multiple mothers groups in my community and the large majority are in the same situation, I fear if you make the immunization a requirement you will loose many many more thousand enrolled students, which will drastically decrease federal funding and cause voters to no longer approve bonds and levies; therefore, impacting the children still in the public school system.

I fear that the communities of color will be the hardest hit by the loss of these funding sources, as statistics and history have proven those communities do not have resources to home school, they will have no choice but to immunize their children to continue attending public school which will be struggling due to the loss of federal funding and the inevitable loss of bonds and levys.

Please consider my words and look at the big picture when you vote on the immunization requirements for this next school year.

Thanks for your time
Donna Cook

To whom it may concern;

I would like to officially comment on the matter of requiring mandatory COVID-19 vaccines for children in order to attend school or daycare.

I feel this requirement is a significantly inappropriate overstep by the government to impede on our rights of choice as written in the U.S. Constitution. Not only would this measure take away the parental rights of health choices for each individual family- but it would also be infringing on our right to access equal education.

I, personally, am outraged at the actions of the American government during this pandemic. I feel that power has been abused under the facade of "emergency". While COVID-19 is a real virus- I do not feel that it is anymore urgent than the flu. As a person who has been infected, and recovered from COVID without medical intervention- I feel confident in my opinion that the political push surrounding this pandemic and vaccination is inappropriate and out of line.

The United States of America was built on the idea of FREEDOM of CHOICE. It was written into the constitution. There were safeguards put into place to prevent the abuse of power. During this pandemic, it has been clear that loopholes need to be addressed as it appears those in office feel that there are no limits in a "state of emergency". If this measure is allowed to pass, where does this abuse of power end? What other freedoms will be slowly stripped away from the people of the United States of America?!

Blocking people from basic needs and services because they choose not to do what the government has decided for their health is WRONG! It is a manipulative abuse of power, and it needs to stop NOW!

I refuse to allow my family to be vaccinated with the COVID-19 vaccine. We will not participate in this political vaccine push.

Sincerely,

Aundrayah Egleston

To whom it concerns,

I would like to express my concern of mandatory COVID shots for children. It should NOT be mandatory for a child to get a COVID shot in order to attend school or child care. Here is why the shot does not stop you from transmitting or being infected by the virus, it only reduces symptoms or sever illness. Most all children present withe mild to no symptoms and are not at high risk of sever illness or death from COIVD. With that being said common sense should prevail and the shot should not be mandatory. Let's leave it up to children's parents to decide if their child is at risk or need to receive the COIVD shot, not government official that have no idea of someone's medical history or beliefs. So let's stop thinking the COVD19 vaccine is a one size fits all solutions because its not. The vaccine is great for certain at risk populations and children are not one of them. Please let's stop this non sense and let parents make a decision for their families. Please no mandatory shots for children. Thank you.

Hello, I am a VERY concerned mother of a young child. I would like for your panel to actually listen to the parents of the children in our state. Please stop ignoring how we feel about topics that effect our families and children! I beg that you do NOT add the experimental covid shot to the required shots for kids to attend school!! Not enough is known about this shot and the long term effects to our children. My child has a disability and I am terrified that the shot could make it worse!! We truly don't know how this will effect each child. Let it be the individual choice of each family, stop taking away the rights of parents who know what is best for THEIR children. PLEASE LISTEN TO THE PARENTS AND LET THIS SHOT CONTINUE TO BE THE CHOICE OF EACH INDIVIDUAL FAMILY!!

Sincerely, Kareena Corrow

Please vote no on the vaccine mandate. This vaccine is not one size fits all. We can't say for sure what the effect will be on the future if our children! How can anyone take this responsibility? It will send many families into private& home school and that'll cost the state in funding. Vote against this vaccine!

Please do not require mandatory vaccinations for children. This is not in the best interest of our children or parents. This is a personal/family decision. This is a gross overreach, not to mention it is politically charged. The flu kills thousands and thousands of people each year and the vaccine does little to help that and that is a vaccine that has been studied for long-term issues. I have taken the flu vaccine and then I stopped because I saw no difference. The COVID-19 vaccine has no long-term data. It is only approved for emergency use. Who is liable for the damages and deaths caused by this vaccine because it was rushed onto the market?

I know numerous people, including friends and family, that have died or been injured by this vaccine. One had a heart attack when there was no heart malady prior to the vaccine. One may have nerve damage from where the vaccine was injected in the arm. One had severe blood clots in her lungs and was hospitalized and nearly died after vaccination. All these are vaccine reactions. I don't fear COVID-19 as much as I fear swelling of the heart/sac around the heart, blood clots, and heart attacks. Parents should have the right to chose. These are our children, not yours to make this decision for. We have more of a vested interest in keeping them safe than you do.

I ask you to do the right thing and let the parents decide. If parents wish to subject their children to this vaccine, it is on their own conscience.

Covid vaccines should not be mandatory in order to get an education in Washington. The long term safety for children is unknown and Covid is not a serious health threat for this demographic. There is little public health benefit, since we now know the vaccines don't prevent transmission of the virus. Vaccine mandates will never stop Covid and are causing more harm than benefit to society.

Afternoon all,
I am writing to express my belief that our state health officials should not mandate COVID vaccinations for our public school children in order for them to attend public school.
It appears to not be a " children " virus so gambling with a child's health is not warranted.
Thank you, Dave McDonald

I am writing to voice my opposition to the proposed requirement for children to have the Covid vaccine to participate in education. Children continue to be at extremely low risk, the current vaccines are proving to be ineffective against the virus and there are too many unknown long term risks. The presence of cardiac injury is much more troubling than a virus that presents with cold/ flu symptoms in young people.

Students are struggling so much academically and emotionally already. It's time to get our schools back on track teaching core academics, personal responsibility and resilience in the face of challenges. Let's focus on good hygiene, healthy lifestyle choices, daily exercise and social connections.

Thank you,
Laura Ferrel

WA State Board of Health,

I strongly oppose the discussion of covid-19 vaccine mandate for our children. Clearly this vaccine does not do its job as you see the up tick in cases in fully vaccinated individuals. The long term effects of this are unknown and until the full data comes out and time has passed this should not be required it should be a choice.

This is not okay. Let the parents decide what is best for their child. God trusted each parent with their child and they have the right to decide.

Mandy

This is my emphatic resistance to our public school system overreaching their scope of authority over the bodies of our children and future generation.

Mandating understudied AND unapproved human vaccines - especially on the children who have less than 1% of 1% death rate is criminal on EVERY LEVEL!

I acknowledge those of you who are in the position to try to make this stick truly believe you are doing the right thing & what's best for the greater good, but you are following the tyrannical agenda of the "follow the science" narrative that has done nothing but prove to be ever-changing at best, but more realistically - fatally flawed.

This will end badly for all. Parents who comply will be putting their children (who have little to no risk of serious I'll was or death) in danger, and the VERY LARGE group of parents that will not comply will pull our children from the already economically hurting public school system.

Please DO NOT consider passing this mandate. It would be the nail in so many coffins - figuratively & literally.

Re: EUA Covid 19 vaccine mandate for school age children

To the Washington State Board of Health,

It has come to my attention that the Washington State Board of Health is taking comments on the potential mandate for school children to be vaccinated for Covid 19. I strongly protest this move until long-term studies are done. If the Board of Health proceeds it will cause more distrust of our current health officials, a reduction in public school attendance by forcing parents to home school their children and potential life-long harm to our children. I am not anti-vax, as an adult, I am vaccinated for most well studied vaccines and Moderna's

Covid 19 vaccine. I have spent 39 years in healthcare as a dentist in Pierce County. I know how to read the science and you will be making a big mistake if you proceed with mandated vaccines for Covid 19.

Please use some common sense on this issue. If parents want to get their child vaccinated for a vaccine with only an Experimental Use Authorization, that is their choice. Do not force parents to choose between public education and home schooling because they are concerned about their children's health. Think about it, why has Pfizer's Comirnaty vaccine not been released in the US? The FDA has authorized only one vaccine for use outside of the EUA. Here is a link to the ages it is authorized for and the side effects.

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.drugs.com%2Fcomirnaty.htm>

As I hope you know, Comirnaty isn't even authorized for those kids under age 16. Now nearly 5 months has passed and Pfizer has not released Comirnaty for use in the US. You need to ask yourself why. If this is the same vaccine and we're in a pandemic, why haven't they released it for use in the US?

I believe it is short-sighted and unwise to mandate a vaccine for our children that is not even authorized by the FDA. Please, wait for the science. Weigh the pros and cons of waiting for further science. If you don't mandate it, what is the potential harm? Who is at risk? Children with high BMI's, diabetes, heart disease are the kids who could be at risk. Why not spend our dollars and your time, targeting the population

at risk? There are just too many unknowns the vaccine could cause for children that are not at risk.

My children are grown and starting their own families. They are now struggling with the potential

mandate for this vaccine for Covid 19 to allow their kids to go to school. Our kids our vaccinated and

most of our grandkids are too - for the FDA approved vaccines. Our family will not comply with this mandate.

Finally, think about how you'll feel if your child or grandchild is harmed by the EUA vaccine that

you voted to mandate. Would you want that on your conscience? Again, educate families on getting

the vaccine if their children are at risk. Please do not mandate the EUA vaccines for all school age children.

Respectfully,

Alan Altman, DDS, PC

Please consider the risk for children is extremely low. These vaccines are still under Emergency Use Authorization; they are not even fully FDA approved. By taking this action, you will certainly decrease student enrollment and cause great financial distress to the school system as well as countless families who will move towards homeschooling or private schooling. The VAERS reporting system clearly indicates that these vaccines are NOT safe & effective. Sadly, more and more of our children are victims of adverse events that they could have avoided. Please be on the right side of history! Protect our children by allowing this to be up to each individual family. These are guiding principles of our great nation.

Hello,

Me and my family and parents and my sister oppose mandatory vaccination for all kids!

There is not enough evidence of this vaccine working for kids, plus there is a lot of side effects, and bad reporting of them! Kids survived in a lot of case please save our kids!

We strongly oppose this mandate in any way, shape or form!

We parents know what is best for our kids!

Stop this madness!

It is not appropriate to mandate any vaccine NOT approved by the working advisory committee. The committee advised NOT to use the vaccination for children.

Mandates are probably illegal. I am not an attorney, but giving a vaccine to children against the advice of the advisory committee seems very reckless, especially for a vaccine only trialed on about 1300 children and, I think, produced one death.

Children are NOT little adults. Given the limited trial period, would we expect one child out of every 1300 to die?

Thank you,

Deanna Hodson

I do not support our children being vaccinated. It should definitely not be mandatory for our children to be enrolled in school. I like many others will fight this and remove my children from the school district if this were to take place.
Thank you.

I vote no against taking away parental medical rights over our children's education. I strongly stand against this proposal. Mandatory Covid vaccination for a public education. I am a nurse. Here's your education: the vaccine will NOT protect anyone from getting Covid. Especially as it mutates and new variant s come out. Crystal Campbell, Tumwater, WA Sent from Yahoo Mail on Android

To the committee:

As many of us have seen the latest variant is not affected by vaccine causing many people to get it. However it seems very mild, similar to a common cold. Our current vaccines are not effective against many the variants we have seen which begs the question why should we make it mandatory to attend school. Children have only recently been added to the list allowed to receive the vaccine don't you think we need more data then just a few months to show us that it works and doesn't cause any harm long term. By making the decision to require the vaccine you will see 1,000s of children pull out of school. Drastically reducing your funding. Why not wait a few years and do what is best for our children. Protecting them is not allowing something so new to be required. This does not stop people from getting the vaccine. Parents who are comfortable can still get their children the vaccine but still allowing a vast majority of parents the time they need to assess the data and effectiveness. This allows for time for other vaccines to become available that will be more effective. Examples: the Novavax vaccine. Why not wait. You may think you are saving lives but ultimately you are also hurting children with horrible side affects that affect their heart! This is something that should allow adequate time to review that it is indeed safe. One year is not enough. These are our children!

Thank you for your time,

Jaime Schreiner

Hello,

I'm writing with a heavy heart about new mandates which want to implement.

We are asking you , please do not make it a as a mandate for all children.

Everyone can get it who decided for their children.

Thank you .

I am writing in opposition to any mandate for children in the state. Data shows that the health risk to children is de minimis. Also, the current dominant variant is much less virulent than the prior ones as evidenced by a recent NY Times morning briefing discussing the less severe nature of Omnicron, both in terms of hospitalization and death.

Furthermore, there are risks from taking the treatment. Families should be the judge of what to do to promote their children's health.

Please do the right thing and not mandate this vaccine for our state's children.

Sincerely,
Ron Crawford

Hello -

This is my public comment for the upcoming meeting on adding the Covid Vaccine to the line of up required vaccines for K-12 education.

According to the Board of Health's own criteria, a vaccine must be fully FDA approved in order to make it mandatory for school attendance. The current Pfizer vaccine in use for children in this country is still an Emergency Use Authorization only vaccine, so I do not see how this meets the Board of Health requirements. I recommend against mandating for school until the vaccine proves immunity to stop transmission like other common vaccines do, which was the requirement under consideration in the 1905 Jacobson vs. Massachusetts SCOTUS case in which it stated mandates could only be considered which "prevent the spread of contagious disease." So far, it is evident that this vaccine does not stop transmission and, therefore, should NOT be added to the list of vaccines needed.

More and more parents are pulling their children from public school due to the mandates and vaccine requirements. I know I'm just one person but what goes in my body and my children's body is my choice. I'm sure you wouldn't like being forced to take Heroin or Meth even if just once. Please consider our children and that they determine our future. Vaccine mandates will lead to unhealthy children who don't make it out of high school.

Thank you for your time.

Hello,

I am writing this to urge you against mandating this vaccine for our children. I say that as a parent of a fully vaccinated 6 year old.

I feel at this time, until we have the long term effects and more accurate data of the vaccine in Children and more data that it's actually necessary, that we allow parents to choose for their children.

Just as it should be a choice for us adults it is not the job of the government to mandate me to put a foreign substance in my ore my child's body when there is no recourse if something goes wrong.

NO Covid mandates for school kids. Why is the FDA wanting to keep data silent for public inquiry over the next 55 years! Why not promote known therapies? Leave it up to the parents! Will you allow law suits when down the road this experimental process shows a lot more long-term problems? And by the way, I am fully vaccinated.

Dear board of health member,

I am strongly opposed to mandating an experimental vaccine to children which have a very low chance of dying or getting deathly ill from COVID-19. The Omicron variant is proving to be very contagious but far less deadly for both adults and children.

Vaccinating now is pure insanity. Forced injections for children would be a pure fascist move and is against the Nuremberg code and fully stand against them.

Below are some stats to support my basis for my resistance to these vaccines for children. This is beyond the fact that it is purely unconstitutional, and corrupt to use our children in this mass experiment! Can you confidently say what the long term effects are? No! So, are you willing to put their future health at risk without clear long term results in kids like myocarditis? We know how COVID behaves in children, and it is not deadly, these vaccines are a huge unknown. Do what is right, or be held responsible!

JUST THE FACTS!

In 1976, US regulators pulled the swine flu vaccine after it was linked to 25 deaths. In contrast, between December 14, 2020 and October 1, 2021, American doctors and bereaved families have reported more than 16,000 deaths and a total of 778,685 injuries to the Vaccine Adverse Event Reporting System (VAERS) following COVID vaccination. The Europeans' surveillance sites tallied 40,000 deaths and 2.2 million adverse reactions. Due to chronic undercounting by VAERS and its European sister system, those numbers are almost certainly only a fraction of the true injuries. To illustrate how unprecedented this harm and death is, look at this "hockey stick" effect in CDC's own graph of the 30-year history of deaths reported to VAERS from all vaccines.

Hello there,

I am writing as a former public school teacher of 10 years, a wife of a physician, and a mother of 3.

Under no circumstance would I send my children to a school where the SARS-CoV-2 vaccine is mandated. There is absolutely no data to support that a healthy child will benefit enough from this vaccine to mandate it. I hope it is made very clear that there are many families who would pull their children from public school and seek education elsewhere, myself included. Mandating this vaccine would be extremely detrimental to our public schools. Please don't force us to leave our schools. We will.

External Email

Jan. 5, 2022

Dear Caitlin Lang,

I am a parent to 3 young children (under 12) in the White River School District (Pierce County). I appreciate the need to keep our children safe in the school environment. There are many, many safety concerns to consider. But after 2 years of very difficult rules and regulations for our young children regarding COVID. I don't believe that this should any longer be the number #1 concern regarding our children. I think we need to find a way to carry on with "normal" life cautiously.

Our children can not carry on wearing masks to school indefinitely. It has caused interruption to learning for my 2nd grader. She was learning to read just as schools closed in 2020. Through all the zoom, partial open schools and irregular teaching lessons. She did not learn to read as she should have as a 1st grader. If the student can not see the teachers mouth to hear her pronounce and sound out words, learning to read is going to be extremely difficult. These youngest students are losing learning that they will never get back! Now she is a year behind in reading and I am doing everything I can to catch her up, because this affects all her other learning subjects too! I even hired a private tutor because I was so concerned about her falling behind. I am lucky that I have the means to pay for a tutor. But many parents do not, therefore their kids will just stay a grade behind. There is no clear evidence that masks are affective in the school environment. I don't know if you have been in a school lately... but you should really go and spend time in these classrooms. You will see that the kids are not even wearing their masks appropriately and the job of the teachers should not be "the mask police". They should just be able to freely teach their students.

I believe that requiring the Covid Vaccine for young children is NOT NECESSARY! I am not opposed to the vaccine, I actually received it myself. I am not opposed to vaccinations for children. All of my children have received all their regular vaccines. But Covid is not killing nor hospitalizing children! My entire family was sick with Covid over Christmas break (my husband and I are vaccinated) and it was no more than a minor cold/flu. Now that we have had Covid studies show that natural immunity is much more

powerful and longer lasting than the vaccine. So why do my children need to be vaccinated? I feel the possible long term affects to this very new vaccine could be far more damaging than very minisule possibility of death to covid. I would like to see another year at least of testing on this vaccine before it is administered to every child. I can see in the future it may be like receiving an annual flu shot and I think that is great! I do not believe in making it a requirement to attend school. I should have the choice as a parent if my child receives the vaccine and it should not be a vaccine or education choice!

Thank you for hearing my concerns and I trust that you will consider these as you make choices for the families and communities you represent.

Sincerely,

Amy Molen

I am commenting on the proposed talk to vaccinate children to attend school. This vaccine has not been used on school aged children for even 1 full year yet! I understand there is science and have had the other required vaccinations given to my child. I myself was given the shots at school age. I am now 37. There is not enough testing to prove to me that this doesn't have long term effects on our children's well being in the future. The 11 other vaccines that are required have been around for decades and have proven to be necessary but have had many many years of research to show whether there are side effects. My 8 year daughter is in 3rd grade and knows about the vaccine is legitimately terrified! I would ask yourselves...can you imagine your little girl or boy who is so afraid to get this and you yourself (me) do not believe this is right...holding your child down and watching that needle go into their poor helpless arm as they scream and cry and plead to not have to get the shot?!! Please I encourage you to stop and think how scared these kids are. Haven't they been through enough? They are already suffocating everyday wearing a mask. Please do not punish them anymore. You all need to stop for one second and remember you were all in school once. Put yourselves in that position. Let them be kids they just want to go to school and get an education just like we did and not have to worry about these politics!

Sincerely,
Aundria Swan-Roberts

Dear Washington State Board of Health,

I wanted to voice my concerns before your January 12th meeting regarding the possible inclusion of the COVID-19 vaccine for children in their vaccinations in order to attend public schools. As someone who was a career molecular biologist and hold a M.S. degree in biological sciences as well as a B.S. in Microbiology, I have done a lot of research on the mRNA vaccines that have Emergency Use Authorization for COVID-19. I have several points to make:

Vaccines have taken the form of religious zealotry, ignoring scientific evidence as a way to end the pandemic. We all want to believe something will get us through this and that we will end up unscathed. Vaccines serve this role as the government-anointed solution to the pandemic, hell or high water that's the narrative. These mRNA vaccines have been rushed through in less than a year, when typically it takes 5-10 years

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcoronavirus.jhu.edu%2Fvaccines%2Fvaccine-approval> to fully approve a vaccine. We are seeing the consequences of this with a vaccine that:

* Works in an unconventional manner not seen by previous vaccines that have proven safety and efficacy records like polio and measles vaccines. This is because a typical vaccine will be comprised of a dead or attenuated virus. mRNA vaccines work by delivering a genetic message that gets inside your cells and instructs your own cells to produce the insidious viral "Spike Protein". There are several fundamental problems with this strategy. One is that when your cells produce a foreign protein, your immune system can aggressively act to destroy those cells, much like they do against cancer cells. This is why there are so many adverse events

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fopenvaers.com%2Fcovid-data&data=04%7C01%7Cwsboh%40sbh.wa.gov%7Cb2ab1ab1e081492eb19108d9d00833ab%7C11d0e2>
from this vaccine compared to others. We all know people that felt sick after getting the COVID-19 vaccine. More deaths have been reported that are associated with the COVID-19 vaccines than all other vaccines combined for the past 30 years. We have no idea what the long-term effects of this vaccine are, but we know the spike protein it makes inside us is toxic

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Feuropepmc.org%2Farticle%2FMED>
because of this immune response, and also because it damages vascular endothelium
(the inner lining of blood cells), and can inhibit DNA damage repair in cells

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ncbi.nlm.nih.gov%2Fpmc%2Farticle/pii/S0950268821007000&cid=7d9e3f3c-404d-4100-a000-000000000000>, which is important in innate immunity responses. It is common knowledge now that the vaccines lead to increased risk of myocarditis

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F%2F10.1101%2F2021.04.26.2110.04626>, especially in young men. Myocarditis is not a trivial disease and can be fatal several years down the road.

* Does not prevent the spread of COVID-19!

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fbrownstone.org%2Farticles%2F16-studies-on-vaccine-efficacy%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cb2ab1ab1e081492eb19108d9d00833ab%7C>

Repeat, does not prevent the spread of COVID-19!!! Some countries like the U.K. that are transparent with their vaccinated case data are actually showing negative vaccine efficacy against the spread of COVID in most adult age ranges. Because they don't stop the spread of the virus, they would better be defined as an experimental prophylactic gene therapy, not vaccines in the first place.

* There is no correlation between increased vaccination rates and lowered prevalence of COVID-19

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.scribd.com%2Fdocument%2F45819488-in-COVID-19-are-unrelated-to-levels-of-vaccination-across-68-countries-and-2947-counties-in-the-United-States%23from_embed&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cb2ab1ab1e081492eb19108d9d00

. You could make a case for a correlation between increases in vaccination rates and higher COVID-19 cases, there are dozens of examples of U.S. states and European countries that look like this (the orange line is the percentage of adults that are vaccinated):

* There is a positive correlation between countries with high vaccination rates and increased vaccine-resistance mutations

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Farxiv.org%2Fpdf%2F2110.04626>, causing potential wide-spread vaccine resistance. This is hardly surprising, prominent vaccine scientists like Geert Vanden Bosshe

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.voiceforscienceandsolidarity> have warned against vaccinating with a "leaky" vaccine that doesn't stop the spread in the middle of a pandemic will give rise to these mutants, which have a danger of becoming even more virulent than the original Alpha COVID-19 variant.

* We are lucky that the Omicron variant is less lethal than others, so far it has caused very few recorded deaths, but according to the CDC, 80 percent of cases in the United States are vaccinated. Creating a vaccine to only one protein on the virus will lead to these Spike Protein Mutants which will be resistant to the vaccines. This is akin to Antibiotic-resistant Staph Aureus infections which are endemic to hospitals because so many antibiotics are circulating there. Nature finds a way to select for organisms that adapt to their environment. Because of this, vaccines should be saved as a tool to protect the elderly and vulnerable against serious symptoms and death, while younger, healthier people that are extremely low risk should be best left alone. As you get older, the vaccine should be a risk/reward calculation best determined by you and your doctor, not a nationwide or statewide blanket mandate.

* For all the reasons above, vaccines are a general failure to prevent the spread of COVID which explains why you need a booster, and countries like Israel and the U.K. are advocating for a fourth shot, not to mention re-boosting every three months. How much spike protein do you want to inject into your bodies each year? If Omicron is resistant to the vaccine, why would you get yet another booster??? That's the definition of insanity!

* Vaccine companies don't care about you, they care about making money. That's a fact. In my own experience, Eli Lilly kept a promising drug that could treat Diabetic Kidney Disease on the shelf because their bean counters determined it would not make them any money. Pfizer was fined 2.3 Billion dollars

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nbcnews.com%2Fid%2Fwb>
for illegal drug promotions in 2009, the same company that has negotiated immunity
from civil liability for it's Emergency Use Authorization vaccine. The FDA has slow-rolled a
Freedom of Information Act request for Pfizer's vaccine clinical trial data and will release
it in 75 years

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Faaronsiri.substack.com%2Fp%2F>
doubles-down-asks-federal-
judge&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cb2ab1ab1e081492eb19108d9d00833ab%7C11d0e2
! If you want get people to take the vaccine, building trust is a key component of that
process.

* Vaccines do not reduce all cause mortality, meaning your chances of death do not
go down by getting the vaccine. This was shown by Pfizer's 6 month follow up study on
their clinical trial, where the placebo group had 17 deaths, while the vaccinated group
had 21 deaths

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F15173>
(see page 23). This shows that COVID-19 does not have a high mortality rate, and that
hidden adverse effects may have contributed to some deaths in the vaccinated group.

You can also see this on the CDC's excess death page

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fnchs%2Fnvss%2F>
.

The vaccines have been shown to help keep the previously uninfected from developing
serious symptoms, hospitalization and death compared to unvaccinated, un-immune
individuals. Since the vaccine does not stop the spread, it is not a public health issue to
get people to take it, because there is no benefit of developing community herd immunity
like a sterilizing vaccine such as measles or polio, or protecting others from infection. It
becomes a personal choice of whether you believe you are better off taking the vaccine
to keep you out of the hospital. Children are at extreme low risk of hospitalization for
COVID-19, and this decision should be left between a parent and the child's doctor, not
the State Government.

I strongly oppose mandatory COVID-19 vaccinations for my children (who currently have
all the other shots needed to attend school, I know the value of an effective vaccine) to
attend school. My children have all had COVID-19, had mild symptoms and recovered.
Now they have natural immunity and don't need a vaccine. To deny natural immunity is a
denial of basic immunology. Much more long-term safety data needs to be gathered
before making these vaccines mandatory. Thanks for taking the time to read my
concerns.

-Robert Anderberg

I would like to address the Technical Advisory Group regarding vaccinations for school children.

This group is not made up of professional doctors that I am aware of. They should not be advising schools of anything regarding the heat of the students. Requiring our children get vaccinated is not there job and it is a parent's decision not some arbitrary board

STOP attempting to push and mandate Covid shots on our children. Children are at extremely low risk and it is obvious the vaccines do not work on adults and can actually be harmful. Look at the data and use critical thinking skills. Childrens' bodies are not fully developed and no vaccines which are not fully tested should ever be forced on them. Let parents be in charge of their children. NO forced Covid shots on children.

We live 2 blocks from a good school and everyone in our neighborhood is 100% opposed to forced covid shots for kids to attend school. These are 'leaky' experimental gene therapy injections that carry a greater risk to our kids than covid by far and certainly cannot stop covid infection or spread. Case in point: Everyone I know is vaccinated and most have covid right now or have had it. We also have several in our family that are injured from taking these shots, one, a young healthy woman who had a major stroke 10 days after her Pfizer shot and is now paralyzed and in a wheelchair! Our kids have a far better chance with natural immunity than an experimental shot that is and has been causing injuries at an alarming rate! NO!!!!

Please do not pass any agenda to give children Covid shots!! Children are much less likely to get the virus and the show are not proven to help. Children are already over immunized and their bodies don't need chemicals that haven't got due process behind it. Masks should be unmandated since they have been proven not to work.

Our children need their education and interaction with others for an environment that promotes learning. Do you care more about your agenda or what is needed for the children?

We need our economy working and mandated shots have shut down too many businesses!! Mandating shots for children will shut down the schools. Then nobody wins.

Sincerely,

Shirley Jagelski

To Whom It May Concern,

I am vehemently against the mandating of the Covid-19 vaccination in order to attend public or private school in the state of Washington.

Children are shown to have very low risk for deleterious effects from Covid-19. The vaccine is also not fully FDA approved and there are no long term studies performed on this new technology vaccine at this time. The risks of the vaccine outweigh the risks of the virus at this point. Not to mention that those who are vaccinated are still catching it and transmitting it at a high rate. Lastly, the risk of myocarditis from the vaccine in normally healthy teen boys has been documented and again, this risk outweighs the benefit of the vaccine for young, healthy boys.

Please reconsider your stance or there will be a mass exodus of students from the state of Washington (my family included).

Sincerely,
Jennifer Goldsworthy

Subject: Opposition to mandatory vaccines for K-12 Schools

External Email

Good afternoon,

I am writing to voice my opposition to mandatory CoVid vaccines for K-12. The WHO has stated that the vaccine is not necessary for healthy children. Both of my sons have had CoVid this year and had very mild symptoms and recovered quickly in two days. They are both males so the occurrence of myocarditis is higher for them. While I understand it is a small risk it's not one we are willing to risk. Medicine should never be a one size fits all approach especially in this case. We are now seeing that you can get CoVid even fully vaccinated so the reasoning to protect others isn't solid either. I appreciate your time and hope that you will take my concerns as well as the concerns of other parents to heart.

Sincerely,
Abby Kucera

If the vaccines work, why are people who are vaccinated still getting sick? Why would you ever enforce an experimental shot on anyone. (By Pfizers own provided data Comirnaty is not even being offered in the US - we are being used as guinea pigs) I am so overwhelmed with sadness as I watch our beloved County go down the drain. Businesses will close, schools will go bankrupt if you mandate this injection. There will be utter devastation to the wonderful people of this region. Please, please think about the consequences before you move forward with a decision. Remember, the liability lands on someone at the end of the day. Keep that in mind and look at ALL the data Pfizer was ordered by Judge to provide. Did you know the CDC no longer recommends PCR testing due to faulty results (false positives because it is unable to determine Covid 19 from other influenzas)? I wonder how many positive cases were misdiagnosed? Please think. Think about the children who just want to go to school. The parents who need to work to provide. The families that depend on their businesses to survive. This board has the ability to cause utter chaos or provide a secure future for our county. What will you do?

Board Members:

In regards to the agenda item regarding children in PreK- 12 and child care centers, in my opinion and as demonstrated daily by the health departments own data and current statistics, there is NO evidence of the necessity in adding C-19 jabs as a requirement for attending any school or care center, private or public.

The facts of the matter are that the current Covid jabs being produced by the pharmaceutical companies do NOT prevent catching the virus and are therefore not eligible for inclusion in the list of vaccine preventable diseases. The current C-19 jabs and the astronomical "breakthrough" cases in those who have had single, double and then received booster doses proves that the touted vaccines and their supposed cure all, do NOT prevent or stop transmission Nor developing illness. It may, for some, reduce the severity of the illness, although there are still going to be deaths in those who are immunocompromised or otherwise unhealthy and as such are naturally more susceptible to death from an array of illnesses and diseases.

Looking at the list of other illnesses that have a vaccine, like chickenpox, et all, there is no prior outbreaks of "breakthrough" cases which renders the COVID jabs itself a non-vaccine preventable illness.

For the last two years, the average child suffers similar symptoms to the common cold and the normal seasonal flu, the long term effects are unknown and will not be known until well into adulthood, this fact far outweighs the benefits for most. The seasonal flu is a similar illness with similar outcomes for the general population, with children catching and spreading the illness. There is and has never been a mandate for the flu shot in our children, there is no logical or science based reasoning to treat Covid any differently.

As a parent of children within the WA State public school system, I object to being forced to subject my children to a "vaccine" that does not prevent them from getting ill, prevent transmission of any illness and of which there is ZERO known understanding of the long term effects this will have on my child and their future. The subjection of children to a experimental chemical being introduced to their bodies remains the sole decision of the parent of each and every child within this state.

If this is passed by the Board, I will withdraw my children from attending public schools and thus withholding funding from the school district system the depends upon enrollment for funding.

I respectfully request the board to reject this matter wholly and exclude Covid from WAC 24-105-030.

Regards,

Erin Thornton

A very concerned parent.

Hello

Covid vaccine mandates for children is wrong. These are still experimental emergency use only vaccines. No, Pfizer's is not official yet. It needs more testing and has a different name if and when it is approved.

Children are the least likely to get very sick from covid and we do not know the longterm complications yet and won't for years.

This should be a parental choice and not forced on the public as a mandate. I do not want to pay taxes to schools that are forcing experimental drugs on children.

Thank you for your consideration and please vote against any such mandate for Washington State public schools.

I am addressing the issue of forcing our children to receive covid shot to have an education. Working as a school nurses assistant on the past, we have never forced our children to have vaccines. They have always had an option to be exempt for religious or personal or medical reasons. We are talking MMR, Polio or chicken pox. And these children have not been kicked out of education because their family made a personal choice for their own reason. Some people no matter what the mandate, can not receive the covid shot, because of a medical. Our schools have protocol and are running fine. Let our children be.

Thank you

I am opposed to mandating the COVID19 vaccine for children in schools. The risk of children dying from COVID19 is so very low. The vaccines available haven't been proven to be effective or safe. In fact, children have a much higher risk of injury or death from the vaccine than from the disease. Pharmaceutical companies cannot be sued for injuries or deaths caused by the vaccines, but schools that mandate them can be. It would not be in the best interest of the school to mandate the vaccine in light of this. The other factor that seems to be lost amidst the fear of a disease that has 99% recovery rate is the loss of freedom of choice. Parents should have the final say when it comes to their children's health. Basically, if you want the vaccine, you should be able to get it. But if you don't want the vaccine (because you've made an informed decision), you shouldn't be forced to. It's unethical, it's coercion, and in my opinion should be illegal. Thank you.

I do not agree with requiring Covid vaccines for children to attend school. Children are rarely affected by this virus and at way less severity if they are. The numbers are so drastically low for this age group that requiring a vaccine for it would be asinine. I stand for choice and what is best for individuals and families.

This email is being sent to strongly oppose mandating the Covid "vaccine" for children to be able to attend school and/or preschool and/or daycare.

There are too many unknowns regarding the long term affects of this "vaccine".

Children are not at serious risk if they do catch Covid...and the "variants" appear to be getting weaker with each new variant.

Children may be at more risk from the "vaccine" than they are from Covid per the Vaers report (which is under reported). This could create liability for your organization should children be harmed by mandated experimental "vaccines" (the approved "vaccine is not available).

Sincerely,
Terisa Rivera

How can you legally force an experimental jab? If you don't realize that there has been zero FDA approved COVID-19 jabs, you all need to do some research. Haven't you already abused these kids enough? Now you want to be charged with murder in the upcoming Nuremberg trials? You are not exempt from being responsible for children's death and injuries from this EXPERIMENTAL VACCINE!!!
May God have mercy on your souls!!!

Mimi of 7!!

Subject: Proposed Policies

External Email

Dear Michelle, Melanie, Christy, Stuart, Samantha, Kaitlyn, Caitlin, Lindsay, Tracy, Hannah, Kelie, Nathaniel,

The following proposed policies are very disturbing and makes my blood run cold.

PROPOSED POLICIES: Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040)

This country is "The land of the free and the home of the brave." These proposed policies are completely contradictory to what this country was founded on and why it was found. People fled totalitarianism. Please consider that we live the United States of America.

We do not need these kind of laws and regulations, this is just simply going too too far. This makes me think about the Nazi's in Germany "detain" "refusal to voluntarily comply" "isolated in a quarantine facility". None of this belongs in America. America fought to liberate individuals being treated in this manner.

Sincerely,
Marlena Slatick

Subject: Pandemic response or Panic response?

External Email

□

Thank you for hearing my input regarding the rules and regulations you are considering for mandatory covid-19 vaccinations for school age children. These actions look like panic responses, not rational, reasoned responses.

I am vaccinated, but that is my own voluntary decision. The vaccine is too new, and the lethality of the disease in youth too low for us to even be considering mandatory vaccinations of our youth. Please be calm and rational as you look into this issue, and DO NOT increase the panic with draconian forced vaccines on an unwilling public.

As is common in viruses, the mutations are becoming less lethal. The death rate for the Omicron variant is nearly non-existent. Omicron may be a blessing in disguise, providing natural immunity that may be much more robust than the vaccines, while hardly causing more than a mild, cold-like experience.

I know we WANT to help solve the problems, but be aware of the higher omicron infection rate in the vaccinated, be aware of the serious incidence of heart complications in vaccinated young athletes, and be aware, there are always unintended consequences of every action. Yes, there can also be consequences of inaction, but weighing the information available to us at this time makes it clear; it is WRONG to be considering vaccine mandates and forced compliance.

I would like to submit my strong disapproval and disagreement with a covid vaccine requirement for school aged children. We have known from the beginning of this pandemic that children are not at any significant risk for either contracting or passing Covid. Furthermore, according to Dr. Fauci in an ABC interview two weeks ago, of the 2 million reported cases of covid for children, less than 200 have died. That's a mortality rate of .005%. It's insane to mandate a shot, and continue to give in to so much fear, for such a statistically insignificant risk. I implore you to refrain from mandating the covid shot for school-aged children. Thank you for your consideration.

Regarding your discussion in your upcoming meeting about Immunization Criteria for Childcare and School Entry:

This discussion should not even be on the table. Children are at an extremely low risk for Covid, therefore the risks completely outweigh the benefit, given the injuries that have happened so far with these injections. Why would we choose to experiment on our own children rather than take the necessary precautions of animal experimentation first when the virus has a death percentage that is statistically zero amongst that population?

I urge you to proceed with caution on behalf of our kids.

Jill

External Email

Good morning,

I am writing to ask the Board not to issue a mandate requiring children under the age of 16 to be required to be vaccinated for COVID-19 as a requirement for entry to a day care, preschool, or K-12 school. While other required vaccinations for enrollment, such as Hepatitis B and MMR, have a considerable amount of safety data, both short and long term, the COVID-19 vaccination does not. The long term effects of this vaccination are not known for adults or children due to the short time the vaccination has been available, and the health and safety benefits to children under 16yrs who contract the COVID-19 virus or any of its variants is extremely low. The proposed benefits for children receiving the vaccination don't outweigh the unknowns for this new medical preventative. Long term effects for fertility or other health factors (growth and development) are not known or understood as of yet, and until they are, the vaccination should be offered only on a voluntary basis with the known risks and benefits clearly communicated to parents seeking to have their children vaccinated. Furthermore, early data for effectiveness of the COVID-19 vaccine on preventing the latest Omicron variant seems to indicate that it is lacking in protection, with fully vaccinated individuals still contracting and succumbing to the virus and disease.

Again, until proper vetting of the vaccination has been completed, as is typical for any new vaccine, this vaccine should not be required.

Thank you for your consideration and continued work toward maintaining community health and safety.

Regards,

Cheryl L Richards

Hello!

I want to express my thoughts on mandating the Covid-19 for children.

1. The vaccine is still experimental, in emergency use.
2. The vaccine is not proving to stop the transmission of Covid or of getting Covid.
3. Public education should not have hoops to jump through for kids to get an education.
This is not a highly deadly disease.
4. Fear has hurt our children more than Covid-19.
5. The Covid-19 vaccine has created seclusion which is fought so hard to be rid of and yet the government keeps bringing it back it different ways.
6. Long term side effects are still not known.

Have a great day!

Subject: Proposed policies for Jan 12th meeting

External Email

To whom it may concern,

I am writing to express my concern over all of your proposed policies.

People should have the right to make their own medical decisions. It is not up to the government to decide if a person chooses current medical practices or not. This is a direct violation of many religious entities, which are protected by the United States constitution.

The Washington school systems have already lost a significant amount of enrolments due to current rules. I fear that instilling an additional mandate for COVID 19 vaccination will cause even more to remove their children from public school, which could eventually cripple that system.

Best regards,

Rachel

Regarding any proposal to require any child in this state to receive one of the three covid vaccines, let me say: requiring this is a terrible idea. Covid does not affect children in any significant way. The vaccines are not FDA approved. Their long term safety has not been established.

If I still has kids in the schools, I would pull them out over such a mandate. It would also push me even closer to leaving this state for another, freer state with a more common sense public policy.

Do the right thing. Leave the kids alone.

Subject: Please No Shot Mandates for kids

External Email

All,

I worked everyday as a substitute bus driver for the last 4 years and all thru Covid. Not once was there an issue with a massive amounts of sickness. Kids playing with masks off and on, crammed on a bus, you would think there would be more cases.

2 years of Covid, without kids getting it, why would we now need to give them a shot for it? Ludicrous.

Even the districts' stats showed less then 0.1% cases. Survival rate is over 99%.

The public schools have already bred 3 generations of kids that can't think and are just cookie cutters and too many weak male characters. Some teenage girls told me they like the mask so they can hide behind them. There is some real self-confidence!

I actually homeschooled my kids for 20 years because I grew up in the system that is flawed.

Please provide data that proves all this masking, jabbing is necessary.

WSBOH,

I am submitting this comment with regard to the possible Covid-19 vaccine requirement for children to attend school and day care. Many Covid-19 studies have shown this virus is not a threat to children with a statistically insignificant chance of serious illness developing. A child has a higher chance of serious harm on the way to school or playing sports than from Covid-19. This vaccine is still experimental and not comparable to other required vaccines for children. This decision must be left up to parents and their doctors, not the state. Please don't damage children further with policies that are worse for them than the virus itself.

Thank you,

Rich Fisher

Subject: Opposition to vaccine mandate for children

External Email

Department of Health:

I strongly oppose vaccination mandates for everyone, but particularly for children in order to attend school. Scientific data has shown repeatedly across the world that children are at low risk of substantial illness or death from Covid 19. Studies have also shown they are not super-spreaders of Covid nor do they substantially contribute to transmitting Covid to adults. We should have a choice in the US and in particular in WA whether to vaccinate our children for a virus that does not carry a high risk of illness or death for this demographic.

Additionally, testing positive for Covid and acquiring natural immunity against the virus should be considered as an alternative to the vaccine. The following study demonstrates that children develop robust and sustained natural immunity following SARS-CoV-2 infection.

The science from numerous studies regarding Covid around the world show what we have learned so far during this pandemic. Data from these studies should be considered in shaping policy decisions WA. This especially applies in regard to vaccine mandates.

I firmly believe that having the covid vaccine should not be a requirement for children to go to school in person. Do not continue to hurt the mental stability of all the children who are not able to or the choice of the parent is to not get it

Please do not make getting a vaccine mandatory for children in order to attend school. Children are at very low risk of dying from covid. More children die of the flu each year than have died from covid. The vaccine for children is under an emergency approval by the FDA.

Thank you for considering my input.

Sincerely,
Julie Bolt

Subject: opposition to mandated vaccines for children, and new Kaiser Permanente study results link

External Email

The vaccines have a place and have been useful in preventing severe disease among higher risk groups, BUT they should especially not be required for children, this should be a decision made by the parents in consultation with a pediatrician.
We now know for certain that the vaccines do not prevent infection or transmission of Covid 19, but do have a benefit in preventing severe disease among higher risk people.

The latest data from a Kaiser Permanente study dated 12/27/21 (see below) from Dr Katie Sharff (et al) from Portland shows an increased risk of myopericarditis among young males than the CDC has previously reported.
In light of this new and reliable data, in addition to the low risk for children (especially with the Omicron variant, which typically presents as 'cold like'): the decision to get this vaccine (or any vaccine or therapeutic) should be made via a risk/benefit analysis on an individual basis, through consultation with a physician, specific to the patient.
Forcing a child who has recently recovered from a mild case of Omicron to start receiving a series of mRNA vaccines is ridiculous, but a higher risk child who has been advised by their pediatrician to start taking 'the jab' makes perfect sense.

thank you.

James Christensen

Dear Washington State Board of Health:

I don't believe that children should be mandated to get the antiCOVID19 injections to attend school for the reasons listed below:

Children are less likely to catch COVID19; and if they do, they usually get a less severe case.

It is still possible to catch or transmit COVID after getting one or more shots.

There have been sudden deaths in children due to myocarditis shortly after receiving the injections.

Some children have developed severe reactions from the injections according to the CDC's VAERS website.

We don't yet know what long-term side effects may come from the shots or how it may affect future fertility.

Thank you for your consideration.

Sincerely,

Diane Thom

State Board of Health – Washington

Re: Public School Vaccine Mandate

Dear Sir or Madam,

I am writing this letter to you in regards to your upcoming discussion you will be having on the vaccine mandate for WA students at the public meeting convening on January 12.

As much as there are concerned parents about Covid and the way public schools are handling the pandemic, there are equally, if not more, parents who have felt silenced and our hands tied in what we feel is best for our children and their education in the public school system here in Washington State. Issues revolving mandates for teachers and staff, the curriculum, and testing endlessly are some of the matters the come to the forefront of my mind. We are stealing moments from our kids' experiences in school and decreasing individualism, creative thinking, human relationships and trust in others.

I am sure many parents have been citing resources to you about the science. New studies have found that even those vaccinated with the Covid-19 shot will not resist getting sick again due to only having the one of the five properties, the spike protein. Those with natural immunity actually will resist all sorts of variants, due to carrying all five types of defense properties, and this for sure needs to be evaluated and considered in any decisions. Below you will see some links of articles for your review and reading.

- https://www.theepochtimes.com/is-natural-immunity-more-effective-than-the-covid-shot_4188524.html
- <https://www.westernjournal.com/johns-hopkins-doc-says-natural-immunity-27-times-effective-vaccine/>
- <https://www.theatlantic.com/health/archive/2022/01/covid-test-shortage/621149/>

My family recently moved to Washington in the past three years. The beauty of this State and the weather is quite enjoyable! What I have found however, is that there are so many RULES. WOW...it's crazy to think how many things you can and can't do here! Governing a family unit is a microcosm of governing a body of community and State. What we have found in parenting our four children is, that the more rules you have, the more rules are going to be broken. Treating each person as a valued member of our family and learning how each person ticks is essential. Making compromises and having expectations is ok, and the respect is then earned back as well. By the State not respecting people's own health decisions when it comes to something with a 99% survival rate is a horrible idea, and so disrespectful of your patrons.

Promise after promise has been made, and then retracted. By doing this, you are devaluing a person's word, and quite honestly, encouraging mistrust in others. At some point, each State needs to look at their reflection in the mirror and truly see what is working, and what is not. Why does Washington State have a higher homeless population? Why is Washington State one of the top 10 States that have teen marijuana use? All of this starts with these students' environments, at home and at school.

Character, loyalty, integrity, empathy, hardworking, and respect for others are all attributes that we want to teach our kids so that they can be contributing patrons of a community as they grow into adults. Morality and ethics are part of these teachings, and is imperative to have these characteristics in individuals to have a strong community, to have a strong America. I think we should all be able to agree on that?

I firmly reject the idea of mandating a vaccine at the age levels we are discussing here. Teaching people how to eat and exercise is SO VITAL to living a healthy life. Please do what is right, and don't impose rules that will cause even more unnecessary distractions.

Sincerely,

Kelli Gardner

Subject: Covid concerns for Webinar 1/7/21

External Email

I am emailing to express my EXTREME feelings on the upcoming webinar to discuss Covid 19 policies suggesting possibilities of mandatory vaccines for school, as well as isolation in a quarantine facility for refusal. This is not only immoral and far overreaching of governmental control but also will create further hate and division within our society!

Why are we even considering this possibility for a virus that is 99% survivable - ESPECIALLY for children??!!

I would like it noted that I am completely against any of the Covid policies proposed in WAC: 246-100-070, 246-100-045, 246-100-040, 246-100 & 246-105

I would like to point out a very important quote in your mission statement "We strive to help people make choices that allow everyone in Washington live a long, healthy life, regardless of income, education, or ethnic background. " please keep in mind that having CHOICES remains to be something that needs to be revered & upheld!

Thank you~

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. Kids are hardly at risk
2. the total death rate is still less than one percent. If we mandate shots for anything with a less than one percent chance of death, then we should enforce shots for alcohol, sun tanning, and diarrhea.
3. what happened to "my body, my choice"
4. this "vaccine" is still an experiment with no long term studies
5. It doesn't stop anyone from getting it or spreading it. Notice the "breakthrough cases" term is not being tossed around anymore
6. If it's so safe then why are the pharmaceutical companies exempt from any liability.
7. If it's so safe then why have there been almost 900,000 reports to VAERS regarding the vaccine. These include almost 20,000 deaths and almost 130,000 "serious injuries" and that was as of november 2021.

<https://www.medalerts.org/vaersdb/findfield.php?TABLE=ON&GROUP1=CAT&EVENTS=ON&VAX=COVID19>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medalerts.org%2Fvaersdb%2F>

8. How about you try and focus on learning instead of pushing agendas.
9. How about you focus on learning instead of playing doctor.
10. If you wanted to listen to "The Science" , we all would have been back to work after we stayed home for 15 days. Then Dr. Fauci said ""I do not recommend that you wear a mask, particularly since you are going to a very low risk location".

<https://www.msn.com/en-us/news/us/fauci-said-masks-not-really-effective-in-keeping-out-virus-email-reveals/ar-AAKCZ0c>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.msn.com%2Fen-us%2Fnews%2Fus%2Ffauci-said-masks-not-really-effective-in-keeping-out-virus-email-reveals%2Far-AAKCZ0c&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C94729c2bc2da49c2acc208d9d165fefe%7C11d0>

After that, "The Science" said to wear 2 or 3 masks. Then "The Science" said to get a vaccine, then two, then a booster, then multiple boosters. "The Science" is bull#%\$&! It's just a term they are using to keep moving the carrot and see where the breaking point is. IT'S HERE!

11. IF it's so safe, why are losing record numbers of medical staff for not following the mandates. The same with police, sheriff, fire, and military personnel.

12. If it's so safe then why did DR. Robert Malone (the guy who invented the MRNA technology) get taken off of social platforms for speaking out against the vaccine mandate.

13. If it's so safe, why has the J&J vaccine been taken off the market twice, temporarily.

14. The death rate has not increased or been reduced by any of the tactics that have been implemented. The death rate was less than one percent before vaccines and it's still less than one percent since they have been forced on people.

15. If the vaccine was the best thing since sliced bread, why does it need to be forced on people? Pretty sure sliced bread was not a tough sell to people.

16. Why was president Biden against taking the vaccine prior to him "winning the election"? <https://townhall.com/tipsheet/rebeccadowns/2021/09/09/flashback-biden-was-against-vaccine-mandates-when-he-was-running-for-president-n2595631>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ftownhall.com%2Ftipsheet%2Freb-biden-was-against-vaccine-mandates-when-he-was-running-for-president-n2595631&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C94729c2bc2da49c2acc208d9d165fefe%7C11d0>

17. Why has this become such a political divide? It is assumed that, if you don't want the vaccine then you must love Trump. TRUMP WAS THE ONE WHO PUSHED THE VACCINE THROUGH SO FAST!!! Wake the f&%\$ up! It's about control and making the rich richer. While ma and pa shops were forced to close, the big box stores flourished.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

It is against our right as US citizens to have the freedom of choice to make informed medical decisions for ourselves and our children... so far I don not feel that we have adequate information to make a safe informed decision. Please consider the following:

- * Children are at extremely low risk for Covid
- * The vaccines are still only EUA (emergency use authorized)
- * There are no long-term studies to document any history of safety
- * Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- * The vaccine apparently does not stop the spread of the disease

Also, a vaccine mandate would go against thousands of parents and end in a massive exodus of children out of the public school system in favor of other alternative education resulting in funds being taken from public schools. Not a good trickle down effect.

Don't violate our rights. Don't mandate the covid vaccine for children

Sincerely,
Jason and Denise Perkins

Subject: Covid vaccination requirements for children

External Email

Dear WA State Board of Health Members,

I'm writing this email to urge you not to approve the requirement of the covid vaccine on children in order to attend school. This vaccine is still under emergency use authorization and requiring it for children would be an abuse of power. These experimental vaccines are unnecessary for children who have a survival rate of 99.998% to this virus. I hope you have done enough research on this subject to make an informed and moral decision.

Sincerely,
Tracee Gorman

Subject: Comments on Proposed Inclusion of COVID Vaccination Requirements Within the Washington Administrative Codes for Enforcement Under Revised Codes of Washington (RCW).

External Email

As a legally documented resident and registered voter residing within Washington State, I am respectfully providing my comments regarding the discussions being held by WA State Board of Health in consideration of including COVID-19 vaccination requirements within the Washington Administrative Codes for lawful enforcement under the Revised Code of Washington (RCW). I have also attached a PDF file of the comments if that is helpful.

My comments follow in order of personal priority with references provided to proposed topics of discussion by the State Board of Health.

1.0 WAC 246-100-070, WAC 246-100-045, WAC-246-100-040 in regard to detaining, isolating or quarantining a person or group of persons (families) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling and vaccination.

1.1 I object to any amendment or modification of WAC 246-100-070 which would permit law enforcement to detain, isolate, or quarantine a person or group of persons; including

families, who are themselves; or the minor dependent, of a legally registered citizen of the United States of America, following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling or vaccination for any disease. I encourage the members of the Washington State of Health to disregard this proposed amendment which I believe tramples the fundamental provisions of the United States Constitution and the rights of legal citizens granted by the Bill of Rights.

2.0 WAC 24-105-030."Discussions to add Covid-19 to the list of child immunizations required for school attendance.

2.1 In principle, mandated treatments including this proposed action represents an egregious over-reach by the State and potentially tramples parental rights to administer their family's health decisions with full and factual "Informed Consent".

2.2 Further, consideration of any proposed amendments to the WAC for including Covid should provision "Parental Informed Consent" and reasonable exceptions, (i.e.; natural immunity, alternate treatments including emerging oral drugs, religious beliefs, medical, and private/home education).

2.2.1 In my view there is a complete lack of evidence of the necessity of inclusion of a COVID vaccination requirement in WAC 246-105. Quoting from 246-105-010: "The purpose of this rule is to protect children and the public against certain vaccine-preventable diseases. Under the authority of the board of health, this rule describes the immunization requirements of children attending schools and child care centers." The facts are the current COVID vaccines do not prevent catching the disease or any of its variants, and therefore are ineligible for inclusion in the list of "vaccine-preventable" diseases. The current COVID "vaccines", as is demonstrated by the vast number of "breakthrough" cases, are not able to prevent COVID to a comparable level as actually effective vaccines for the section 030 listed diseases, but merely amount to a pre-treatment for the disease that may generally reduce the severity or death.

2.2.2 Compare and contrast the number of COVID breakthrough cases (and rates) to breakthroughs for those vaccinated against the diseases listed in 246-105-030. Who has heard of multiple breakthrough cases of chickenpox? Diphtheria? Rubella? Measles? Mumps? Pertussis? And the rest of the list, for that matter. The simple fact is, the number of "breakthrough" cases associated with currently listed diseases is so small they are considered negligible - it would be major local news of an outbreak of Measles or Mumps in our local schools, yet these are all but unheard of. Yet the number of COVID cases that breakthrough the current vaccines is significant. Therefore, as a matter of definition, COVID is not a vaccine preventable disease.

2.2.3 Considering that the best available evidence and international focus of treatment the COVID vaccine was to treat the elder community with comorbidities that increase their risk of hospitalization and potentially death. As of this writing reported data indicates that on average, children suffer no worse from COVID than the normal seasonal flu, and considering the unknown potential long term side effects of the current COVID vaccines as an emergency treatment, the risk-reward profile indicates negligible benefit to the children of Washington, while imposing unquantified potential risk upon them.

2.2.4 In your discussions of amending the WAC to include a vaccine mandate please compare the current policy for seasonal flu: Flu is an equal, if not a greater risk to children yet there is no mandate to vaccinate children for the seasonal flu. Yet, this Board is considering mandating a vaccine for a disease, COVID, that is equal or lower risk to children AND has a vaccine with an unknown long term risk profile? That seems illogical and would indicate other non-fact-based motivations for such a mandate. I respectfully urge the board to not add COVID to the list of diseases in WAC 24-105-030.

SUBJECT: Comments on Proposed Inclusion of COVID Vaccination Requirements Within the Washington Administrative Codes for Enforcement Under Revised Codes of Washington (RCW).

As a legally documented resident and registered voter residing within Washington State, I am respectfully providing my comments regarding the discussions being held by WA State Board of Health in consideration of including COVID-19 vaccination requirements within the Washington Administrative Codes for lawful enforcement under the Revised Code of **Washington** (RCW).

My comments follow in order of personal priority with references provided to proposed topics of discussion by the State Board of Health.

1.0 WAC 246-100-070, WAC 246-100-045, WAC-246-100-040 in regard to detaining, isolating or quarantining a person or group of persons (families) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling and vaccination.

1.1 I object to any amendment or modification of WAC 246-100-070 which would permit law enforcement to detain, isolate, or quarantine a person or group of persons; including families, who are themselves; or the minor dependent, of a legally registered citizen of the United States of America, following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling or vaccination for any disease. I encourage the members of the Washington State of Health to disregard this proposed amendment which I believe tramples the fundamental provisions of the United States Constitution and the rights of legal citizens granted by the Bill of Rights.

2.0 WAC 24-105-030."Discussions to add Covid-19 to the list of child immunizations required for school attendance.

- 2.1** In principle, mandated treatments including this proposed action represents an egregious over-reach by the State and potentially tramples parental rights to administer their family's health decisions with full and factual "Informed Consent".
- 2.2** Further, consideration of any proposed amendments to the WAC for including Covid should provision "Parental Informed Consent" and reasonable exceptions, (i.e.; natural immunity, alternate treatments including emerging oral drugs, religious beliefs, medical, and private/home education).
- 2.2.1** In my view there is a complete lack of evidence of the necessity of inclusion of a COVID vaccination requirement in WAC 246-105. Quoting from 246-105-010: "The purpose of this rule is to protect children and the public against certain vaccine-preventable diseases. Under the authority of the board of health, this rule describes the immunization requirements of children attending schools and child care centers." The facts are the current COVID vaccines do not prevent catching the disease or any of its variants, and therefore are ineligible for inclusion in the list of "vaccine-preventable" diseases. The current COVID "vaccines", as is demonstrated by the vast number of "breakthrough" cases, are not able to prevent COVID to a comparable level as actually effective vaccines for the section 030 listed diseases, but merely amount to a pre-treatment for the disease that may generally reduce the severity or death.
- 2.2.2** Compare and contrast the number of COVID breakthrough cases (and rates) to breakthroughs for those vaccinated against the diseases listed in 246-105-030. Who has heard of multiple breakthrough cases of chickenpox? Diphtheria? Rubella? Measles? Mumps? Pertussis? And the rest of the list, for that matter. The simple fact is, the number of "breakthrough" cases associated with currently listed diseases is so small they are considered negligible - it would be major local news of an outbreak of Measles or Mumps in our local schools, yet these are all but unheard of. Yet the number of COVID cases that breakthrough the current vaccines is significant. Therefore, as a matter of definition, COVID is not a vaccine preventable disease.
- 2.2.3** Considering that the best available evidence and international focus of treatment the COVID vaccine was to treat the elder community with comorbidities that increase their risk of hospitalization and potentially death. As of this writing reported data indicates that on average, children suffer no worse from COVID than the normal seasonal flu, and considering the unknown potential long term side effects of the current COVID vaccines as an emergency treatment, the risk-reward profile indicates negligible benefit to the children of Washington, while imposing unquantified potential risk upon them.
- 2.2.4** In your discussions of amending the WAC to include a vaccine mandate please compare the current policy for seasonal flu: Flu is an equal, if not a greater risk to children yet there is no mandate to vaccinate children for the seasonal flu. Yet, this Board is considering mandating a vaccine for a disease,

COVID, that is equal or lower risk to children AND has a vaccine with an unknown long term risk profile? That seems illogical and would indicate other non-fact-based motivations for such a mandate. I respectfully urge the board to not add COVID to the list of diseases in WAC 24-105-030.

All,

It has come to my attention that that there is yet another potential new over stepping of power from the state in the veil of covid safety.

I am against allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from (WAC 246-100). If health officers hold this much power, this power should be coming from the people not the position. It is bad enough the governor will not let go of his emergency powers as the state enters a third year of an emergency while most other states have returned to living without all the hubbub of the virus.

I am against including the Covid-19 injections as part of school immunization requirements using (WAC 246-105.). Kids are already least effected group from covid, all this shot is going to do is increase and speed up deterioration of their bodies, create a hardship for the families who will then have to take care of the kid because of the vaccine immunity with no thanks to HR 5546 (see below) protecting the pharmaceutical companies over the safety of the children.

This virus does not go after children as it goes after the older adults with comorbidities. The children who have fallen ill are ones who are already compromised or have been injected with this untested shot in the name of health. Especially when children have a less then .5% chance of dying from this!!

This entire procedure is yet another overstep of those who were elected and making sure those who they appointed pushes forward an agenda that is not in the best interest of the people or the children.

Do the right thing and not pass these proposed WACs

How Do We Know the COVID-19 Vaccine Won't Have Long-Term Side Effects? - MU Health

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.muhealth.org%2Four-stories%2Fhow-do-we-know-covid-19-vaccine-wont-have-long-term-side-effects&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cd5e1cfce498c406ac55e08d9d162383a%7C11d0e2>

One of the reasons some people haven't signed up to receive the COVID-19 vaccine is that they're worried there might be unknown side effects that will show up months or years later. Although it's true there are still a lot of things we're learning about the vaccines — like how effective they are against variants and how long their protection lasts — there are plenty of things we do ...

www.muhealth.org

H.R. 5546:

Passed House amended (10/14/1986)

(Measure passed House, amended)

National Childhood Vaccine Injury Act of 1986 - Title I: Vaccines - Subtitle 1: National Vaccine Program - Amends the Public Health Service Act to establish in the Department of Health and Human Services a National Vaccine Program to: (1) direct vaccine research and development within the Federal Government; (2) ensure the production and procurement of safe and effective vaccines; (3) direct the distribution and use of

vaccines; and (4) coordinate governmental and nongovernmental activities. Requires the Director of the Program to report to specified congressional committees.

Establishes the National Vaccine Advisory Committee to recommend: (1) ways to encourage the availability of an adequate supply of vaccines; and (2) research priorities.

Authorizes appropriations for FY 1987 through 1991.

Subtitle 2: National Vaccine Injury Compensation Program - Part A: Program Requirements - Establishes the National Vaccine Injury Compensation Program as an alternative remedy to judicial action for specified vaccine-related injuries.

Prescribes the contents of any petition for compensation.

Grants U.S. district courts authority to determine eligibility and compensation. Requires the district court in which the petition is filed to designate a special master to serve as an adjunct to the court. Sets forth the responsibilities of the court.

Lists factors to be considered when determining the amount of a compensation award. Sets forth a table of injuries deemed vaccine-related for compensation purposes. Permits the Secretary of Health and Human Services to: (1) promulgate regulations to revise such table; and (2) recommend changes to the vaccines covered by the table.

Provides that compensation awarded under the Program shall be paid out of the National Vaccine Injury Compensation Trust Fund. Limits awards for actual and projected pain and suffering and emotional distress to \$250,000. Prohibits awards for punitive damages.

Establishes the Advisory Commission on Childhood Vaccines to: (1) advise the Secretary on the implementation of the Program; (2) recommend changes to the Vaccine Injury Table; and (3) recommend research priorities.

Part B: Additional Remedies - Sets forth procedures under which the person who filed a petition for compensation under the program may elect to file a civil action for damages.

Provides that no vaccine manufacturer shall be liable in a civil action for damages arising from a vaccine-related injury or death: (1) resulting from unavoidable side effects; or (2) solely due to the manufacturer's failure to provide direct warnings. Provides that a manufacturer may be held liable where: (1) such manufacturer engaged in the fraudulent or intentional withholding of information; or (2) such manufacturer failed to exercise due care. Permits punitive damages in such civil actions under certain circumstances.

Part C: Assuring a Safer Childhood Vaccination Program in the United States - Requires each health care provider who administers a vaccine listed in the Vaccine Injury Table to record certain information with respect to each such vaccine. Requires each health care provider and vaccine manufacturer to report certain information to the Secretary.

Requires the Secretary to develop certain vaccine information materials for distribution to the legal representatives of any child receiving a vaccine listed in the Vaccine Injury Table.

Directs the Secretary to promote the development of safer childhood vaccines.

Sets forth recordkeeping and reporting requirements for vaccine manufacturers. Imposes civil and criminal penalties for destroying, altering, or concealing any such report or record.

Part D: General Provisions - Allows any person to commence a civil action against the Secretary where the Secretary allegedly has failed to perform a duty under this Act.

Provides for judicial review of the Secretary's regulatory actions in a court of appeals of the United States.

Allows the Secretary to provide licensing for unpatented vaccines for naturally occurring human infectious diseases under certain circumstances.

Requires the Secretary to conduct studies on pertussis, rubella, and radiculoneuritis vaccines and publish the results of such studies.

Directs the Secretary to study the risks to children associated with each vaccine listed in the Vaccine Injury Table and establish guidelines respecting the administration of such vaccines. Directs the Secretary to periodically review and revise such guidelines.

Directs the Secretary to review the warnings, use instructions, and precautionary information presently used by manufacturers of vaccines listed in the Vaccine Injury Table. Directs the Secretary to require manufacturers to revise and reissue any warning, instruction, or information found inadequate.

Grants the Secretary recall authority with respect to any licensed virus, serum, toxin, antitoxin, vaccine, blood, blood component or derivative, allergenic product, or other licensed product which presents a danger to public health. Establishes civil penalties for recall violations.

Directs the Secretary to make annual reports to specified congressional committees on the impact this Act has on the supply of vaccines.

Title II: Miscellaneous - Provides that certain Federal provisions designed to reduce paperwork shall not apply to information required to carry out this Act.

Hi WSBOH,

I'm writing in to let you know as a community member, father, and teacher, I am vehemently opposed to any form of COVID-19 vaccination mandate for children, specifically including, but not limited to adding any Emergency Use Authorized (EUA) product or any licensed product that lacks completed Phase 3 trial studies to the school required list at any time.

If there are any other avenues to have my voice heard please let me know.

Thanks,
Jesse Ratcliff

I am *very* supportive of making Covid-19 shots mandatory for school admission. This is the only way we will defeat this virus.

With Covid-19 rates increasing faster than ever with the Omicron variant, this is really the only way to keep schools open safely!

The vaccine has been shown to be VERY SAFE as more than half the population of the world has been vaccinated already.

Many, many other vaccines are already mandatory. There is no reason Covid-19 should be any different. In fact, given how much more dangerous this virus is than other viruses, this is all the more reason why the vaccine should be mandatory!

Those against making Covid-19 shots mandatory do not understand the science. Their movement is purely political.

Please mandate the Covid-19 vaccine so that our schools, our teachers, and our society at large, can stay safe!!!!

Thank you for your consideration.

Good afternoon,

It has been brought to my attention that you are having a meeting on January 12th to discuss making the covid 19 vaccination part of the requirements to attend school. As a mother and aunt of several children, I am highly against this requirement. I am fully aware that over 55,000 children have unenrolled from public school this last year in Washington state. Trust me when I tell you it's not out of fear of the virus. The only virus that is plaguing our children is your gross overreach and indoctrination. Making it a requirement will be detrimental to the school system.

I want to say I oppose this requirement the maker of the mRNA who you canceled is already giving dire warnings but you guys just double down and want to force people's hands. Go figure we are not stupid not anti-vax but just concerned that this is being foisted on our youth and you will have blood on your hands if you do. I do not say this with animosity but as an observation. You all are in my prayers.

Subject: COVID vaccine mandate for school children

External Email

I'm writing to OPPOSE the proposed mandate for the COVID vaccine for school children.
First, kids are not a high risk for COVID.
Second, we don't need more vaccine mandates than we already have.
Third, the vaccine is still young and we don't know the long term side effects of the vaccine that could affect our kids for years to come. Please do NOT pass this rule.
Finally, this should be brought to the Legislature for a vote so that we the people can hold someone accountable for such a major decision affecting nearly every family in our state.

Sincerely,
Sarah Stewart

Washington State Board of Health,

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. Statistics by the CDC show that children are at a very extremely low risk for Covid and the death rates amongst children are close to Zero related to Covid. We have to distinguish for children those who died with Covid and as such other underlying health conditions vs. those that died because of Covid.
2. The Vaccines are still only Emergency use authorized.
3. There are no long term studies that document safety. We need years before we can determine the effects on children and their futures.
4. Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore, The vaccine apparently does not stop the spread of the disease.

We cannot use our children as human shields against Covid they are least susceptible and also recover the fastest, building their own natural immunities. Covid is not like MMR or Polio. We simply need more and more information.

I am opposed to making Covid-19 shots mandatory for school admission

As a parent of a young daughter, I am concerned about the exaggerated potential risk that covid is claimed to present to young children, and the equally exaggerated need for vaccination. The risk of severe disease or death from COVID is many times lower than the risk of severe injury and death from the vaccines (1/1300 from the Pfizer clinical trials). Considering that the vaccines don't prevent infection and the possibility of spreading the disease to others, I strongly feel that the risk to benefit ratio is highly in favor of leaving children vaccine free. Mandating such a risky medical treatment is unconscionable. Let our children live, naturally. The long term effects of the vaccines remain unknown. Our children are not guinea pigs, but rather our future.

Subject: Covid Vaccine Mandate in Schools

External Email

Hello,

My name is Amber Leavitt and I am a mother to three fully vaccinated children, one in primary school, one in middle school, and one in high school. I am also a Registered Nurse. I recently spent 4.5 years working for Battle Ground Public Schools as a School Nurse, so I have first hand knowledge on the importance of vaccinations in keeping children healthy and in the classroom.

Now that the Pfizer Covid vaccine has been approved for children as young as five, why is it even a question that this should be a required immunization for school attendance? A disease that has killed over 831 thousand Americans, including over 1000 children, and has a vaccine available yet we are questioning whether it should be required. This is nonsense! The impacts this pandemic causes continues to wreak havoc despite kids being "in school." The sports teams in our district continue to shut down events as the virus spreads through teams. The social events of high school are few and far between. Our children are being denied the important experiences of childhood. A vaccine requirement would improve this.

Battle Ground and surrounding areas are notorious for having a low vaccination rate and without a school vaccine mandate that will not change. But here's the thing, the state always allows a religious or personal exemption. I cannot tell you the amount of falsified religious exemptions I would receive for the regular vaccines (MMR, TDap, Polio, etc) and the school districts are too afraid to fight back against these dishonest parents. The only exemption should be a medical exemption and those are so rare they should also be under scrutiny when received.

I'm tired of those of us that are making the right medical decision, backed by science, suffering for the sake of those that think it's their right to not comply. No one is forcing you to vaccinate your child. Just keep them out of the schools. My child's education should not continue to be at risk for shutting down due to the selfish choices of other parents. It's time Washington state shows once again that we are a progressive state and does the right thing in requiring the covid vaccine for school entry.

Thank You,

Amber Leavitt

Subject: COVID vaccination recommendation for WA students

External Email

Good morning,

As the child of two lifelong WA public school teachers, and the parent of two current WA public school students, I am writing to express my concern over the possibility of imposing a COVID vaccine requirement to attend public school in our state.

Where there is risk, there must be choice.

1. US research from 2021 medical data provides that boys aged 12-15, with no underlying medical conditions, are FOUR to SIX times more likely to be diagnosed with vaccine-related myocarditis than ending up in the hospital with COVID.
2. As of July 2021, the COVID-19 mortality rate for ages 0-19 was 0.0027%, which is a 99.9973% survival rate. Children have the lowest rates of hospitalization and deaths.
3. Why are we debating a vaccine mandate for a "vaccine" that does not stop the spread of a virus? The efficacy of COVID-19 vaccines is less than compelling, and constantly waning.
4. How can the department of health dictate that healthy children take an Emergency Use injection that is not FDA approved? This is unethical government overreach. We are the experiment, and we will not know the true side effects for years to come. The COVID vaccine should not be lumped into the same school-required vaccine list as vaccines that have been clinically tested and FDA approved for decades.
5. Imposing more mandates breeds discrimination and segregation. How will schools handle students with vaccine exemptions? Will they be treated different than those who are vaccinated? We are already seeing this play out with regard to close contact quarantine and testing protocols. This is discriminatory. Parents who rely on public school services will be forced to comply, leaving zero option for discernment. This is coercion.

Experimental vaccine mandates have no place in a free society. Vaccine mandates leave little to no option for personal, philosophical and even religious exemptions. Medical exemptions are often hard to come by depending on the doctor's opinion and influence. Parents should not have to co-parent with the government. This feels criminal and unconstitutional.

I ask you to research vaccine injury data from multiple sources, including VAERS. I ask you to question efficacy and analyze the infection rate of populations that are highly vaccinated, like Israel. The narrative doesn't match up if you're willing to look at all sides. Do the work. Lead without fear, propaganda or media bias. The future of WA public school students (and staff) leans on your decision.

Sincerely,

Brynn Wilson

Subject: Covid vaccination of children

External Email

Covid is not a risk factor for children. Covid deaths on children under age 18 since the beginning of the pandemic stands at a little over 700 deaths out of the 700,000 deaths total in the U.S.! ie .07 %! The ability to treat Covid infections is better every day. DO NOT FORCE COVID VACCINATIONS ON OUR CHILDREN! Please follow the science! Don't politicize our children!

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:
It's against our personal rights and freedom. Also our constitutional rights. Most parents will probably keep them home.

Subject: Covid vaccination mandate for school children

External Email

I am writing to express my STRONG opinion that school children should not be required to be vaccinated. I think that it is wonderful that we have vaccinations for Covid that do lessen the symptoms of Covid and I agree that for many people getting vaccinated is the correct decision. However, it is important to look at the risk-return tradeoffs in all scenarios, especially for our youth.

Pro of Mandating Vaccination of School Children

* Probably only 1.6 fewer school age deaths in WA: According to the CDC, from January 2020 to December 25, 2021, 558 school aged children (4-18) have died with (not necessarily due to) Covid in the whole country. There are 55.63mm children (4-18 and under) in the US so that is an annual death rate of 0.0010502%. In 2019 the US influenza/pneumonia death rate among the same age group was 0.000349% (194 deaths). According to the CDC, on an annualized basis, there have been an additional 85 deaths due to Covid among 4-18 year-olds. This means that the incremental death rate among school age children as a result of Covid is only 0.000153%? There are 1,074,464 K-12 school children in Washington state...that means that you could expect an additional 1.6 covid deaths in the ENTIRE STATE of WASHINGTON for one year!

Con of a Vaccine Mandate for School Children

* The vaccinations are not without their own risks: the CDC reports there have been 4,274 serious medical events related to vaccinations among 3-17 year-olds

* 36 Deaths (WA is 2.3% of the US population so this might equate to an additional 0.8 deaths in WA)

* 293 Life Threatening (6.7 children in WA)

* 142 Permanent Disability (3.3 children in WA)

* 1,457 Hospitalized (33.5 children in WA)

If you net out the expected 85 additional deaths from Covid with the 36 deaths from vaccinations, you only have a net 49 deaths in the WHOLE COUNTRY. In order to potentially "save" these 45 lives, you are not only taking away the right of citizens to decide what to do with their own body, but you are also putting 1,457 children in the hospital, exposing 293 to life threatening situations, giving 142 children permanent disabilities, and who knows how many other problems for other children.

It is also helpful to look back at history. A mumps vaccine was first developed in the late

1940s and was not recommended for children over 12 until 1977. It did not become mandatory for children until even later. We had decades of data to look at before mandating the vaccine for all children. These vaccines were rushed thru, with emergency approval, with the drug companies being granted no liability for any resulting problems, and the FDA is asking for a 55 year exemption from FOIA requests from the public. Does this sound like something we should have 100% confidence in???

When looking at the Risk-Return tradeoffs of mandating that our school children get vaccinated for Covid, I do not see how anyone can come to the conclusion that it is clearly the right thing to do. Please make sure that all families have access to the full set of information regarding the pros and cons of vaccinations, and then let the families decide what is right for them given their own unique situations.

Thank you,

Michael King

concerned father of 4

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

It isn't effective against children.

It isn't really FDA approved, not that FDA approval means anything anymore.

It is just one more regulation to add to the endless regulations for zero to negative net gain. Why are you handicapping yourselves in this way?

Sincerely,

Jamie Johnson

Subject: Covid 19 vaccine for school

External Email

To Whom it May Concern,

I received information that the Board of Health in Washington is considering imposing a Covid-19 vaccine on children as a requirement for attending school.

The vaccines are still experimental, children are largely unaffected by the virus, and the efficacy of the vaccine has severely diminished as new variants have come into play. You need to ask a pediatric cardiologist how many children they have treated post vaccine for myocarditis vs how many have been in danger from the virus. We have no understanding of the long term side effects of this experiment. That will not be known for years. It may be very little....or it may be devastating. No one can know that.

Our son will be pulled from public school if it becomes a requirement take the Covid vaccine to attend school

Sincerely,
Meg Krikawa

Subject: Covid Vaccine for children

External Email

To Whom it may concern;

I am a constituent, community member and resident of Washington State and have three children in the public school system. I am writing to let you know that I DO NOT agree that children should be required to have the Covid vaccine in order to attend school. I implore the Washington State Board of Health to reject any such mandates and/or requirements. Due to the following reason:

1. Covid Vaccines remain under Emergency Use Authorization(EUA), the FDA is amending the EUA to include children - Coronavirus (COVID-19) Update: FDA Takes Multiple Actions to Expand Use of Pfizer-BioNTech COVID-19 Vaccine | FDA
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fnews-events%2Fpress-announcements%2Fcoronavirus-covid-19-update-fda-takes-multiple-actions-expand-use-pfizer-biontech-covid-19-vaccine&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1a50d2a7bdd249eb0f0008d9d149620c%7C11d0e>>

2. Children under the age of 18 have a survival rate of 99.995% from Covid infection

3. Children have a higher chance of death or adverse reaction to the Covid vaccine than Covid-19

If a vaccine mandate is forced upon children attending tax funded public schools, it will leave me no choice but to pull my children from school and home school. It's heartbreaking to even have to think like this. My children love school but with the side effects this drug has on children and the lack of knowledge on the long-term effects, I do not feel the vaccine is safe for my family. I thought we lived in the country of the free but all these mandates that are being imposed on the people makes it feel much more like a dictatorship. Washington State has been under a state of emergency for the last two years. The mandates are unconstitutional, we the people have had enough. If the vaccine is so great and it's what we must do to protect the people, why are our elected officials exempt from Biden's Vaccine Mandate? Why is the postal service exempt? The needs of the few should not outweigh the needs and wants of the many. What about natural immunity, why is that not being taken into consideration? I am concerned, just as you should be, that the vaccine doesn't even work. As many vaccinated people I know are now getting sick with the latest variant. People that are considered "fully vaccinated" plus have the booster shot are getting sick, clearly the vaccine is not the answer. Judges across the country are ruling that the mandates are unconstitutional and I truly hope that you make the right decision when deciding if the Covid Vaccine should be forced upon our children, the future of the world.

Kindly,

Kimberley Duncan

Subject: Considering COVID-19 Vaccine Mandate in Schools

External Email

I am a physician in the community and a parent of two school age children, 8 and 5. Based on the medical community's current knowledge concerning COVID-19 in children and limited understanding of the short- and long-term effects of COVID-19 vaccination, I am strongly opposed to a COVID-19 vaccine mandate for school age children. Currently, there is no data to support vaccinating healthy children against a disease which poses negligible risk of severe illness or death. It is irresponsible to compare the COVID-19 vaccine to our well understood, routine vaccines such as MMR or DtAP which provide long standing immunity against devastating diseases in children. We simply do not know enough about COVID-19 vaccines nor do we have data that shows a clear benefit to vaccinating children against COVID-19.

Pfizer's initial trial in children ages 5-11 was significantly underpowered, only 1,517 children were vaccinated during the initial trial. A sample size this small means that serious adverse events could go undetected. Pfizer even admits this in their published results stating that the long-term immune response, efficacy and safety of their vaccine is unknown and that they did not have a large enough sample size to detect potential rare side effects.

In addition to having an inadequate sample size, the trial length was remarkably short compared to standard vaccine trials in the US, which can take 5-10 years, with Phase 2/3 testing combined, the trial was completed in 2.3 months. This is inadequate time to ascertain any identifiable long-term risk.

All of this means, we do not have the data to claim these vaccines are unquestionably safe in kids. This trial did not prove a clinical benefit to vaccinating kids ie: less severe disease or death, the endpoint of the trial was purely the efficacy of preventing infection by COVID-19 over a two-month period. As has been clearly demonstrated in the COVID vaccines administered to adults, efficacy diminishes overtime and does not provide long lasting immunity, it would be reasonable to expect vaccination in kids to have waning protection as well. We know these vaccines can cause harm including myocarditis and other documented adverse events, long term effects are entirely unknown, and we currently have no data showing that COVID-19 vaccination benefits kids in terms of overall outcome. The benefit to risk ratio of vaccinating all children against COVID-19 is clear, it is all risk and no benefit which is why as a parent and physician I am adamantly opposed to mandating this vaccine for children.

Subject: Comments for upcoming BOH meeting

External Email

Hello,

My name is Lesley Nelson, I live in Kitsap County and have a elementary age child. I am reaching out to share my comments to the BOH. I strongly OPPOSE Agenda Item #8, the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose COVID-19 shot mandates, period! I am for medical freedom that allows people to choose what is best for them based on medical, philosophical and religious reasons. I am also writing in SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Thank you for your time and consideration on these matters.

I am writing to urge you to stand against mandating the covid-19 vaccine for children in any capacity, but specifically to attend school.

It is clear that there are still a lot of questions about the efficacy and safety of the covid-19 vaccine in general, and clearly in children.

We are seeing evidence that transmission even when fully vaccinated does not stop the transmission of covid-19, this was exemplified in the recent cruise ship outbreaks where passengers and crew were all vaccinated.

There are no covid-19 vaccines that have been fully FDA approved available in the United States.

There is clear data showing that the covid-19 vaccines can cause harm in children, the CDC website states:

What You Need to Know

* Cases of myocarditis reported to the Vaccine Adverse Event Reporting System (VAERS)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fvaers.hhs.gov%2Findex.html&data=...>
have occurred:

* After mRNA COVID-19 vaccination (Pfizer-BioNTech or Moderna), especially in male adolescents and young adults

* More often after the second dose

* Usually within a week of vaccination

* Most patients with myocarditis or pericarditis who received care responded well to medicine and rest and felt better quickly.

* Patients can usually return to their normal daily activities after their symptoms improve. Those who have been diagnosed with myocarditis should consult with their cardiologist (heart doctor) about return to exercise or sports. More information will be shared as it becomes available.

Both myocarditis and pericarditis have the following symptoms:

* Chest pain

* Shortness of breath

* Feelings of having a fast-beating, fluttering, or pounding heart

Seek medical care if you or your child have any of the specific or general symptoms of myocarditis or pericarditis especially if it's within a week after COVID-19 vaccination.

Please do not mandate these vaccines for children, let the decision be left up to families to do as they see fit for their child.

Thank you,

Alison Handsaker

Both of my kids already had covid. It impacted them little. Vaccines however have harmed them both very much! These should NOT be forced. The VACCINE is far more terrifying than the COVID. VARES reports only gets 5% of vaccine damages reported yet shows the COVID Vaccine to be far more harmful than all vaccine injuries combined for the last decade! THIS IS ONLY PUSHED BECAUSE LAWSUITS IN AMERICA AGAINST COVID VACCINES ARE NOT ADMISSIBLE. This is pure evil and greed. Sincerely, Diane W

Subject: Fwd: Consider mandating experimental vaccines?

External Email

To whom it may concern:

The COVID vaccines remain experimental. And I'm asking you to respect personal choices in whether or not someone chooses to get it or chooses to have their children get it. These are unprecedented times, and I respectfully ask you to consider the information I'm sharing.

I appeal to your common sense, your faith in your fellow humans, and the need to become your own expert and reject fear-based propaganda. The experts are driven by an agenda that has everything to do with control and nothing to do with our health. Simply note the focus on waiting for vaccines rather than early treatments to see that reality.

As a public official, you work for the PEOPLE who you govern, not the governments who put you in place. As such, it is your responsibility to become the expert, read opinions both similar and dissenting to your own. Do not be a cog in the big machine that seeks to strip individuals of our freedoms.

The easy lie is that you're doing what you're doing for the common good. Taking away people's freedoms to "protect" them, and using coercion to take a medical product against one's will, are NEVER for the common good.

It is easy to lie to ourselves and project only good motives on our actions. But take a good hard look at every decision and action you made in the last 2 years. If you made that decision out of a sense of fear, then you made the wrong decision. If you don't have any faith in your fellow citizens, that is your real problem with your decision making.

Love and respect your fellow citizens enough to make their own risk calculus. Demonizing the "other" is exactly what the Nazis did. Do not fall into their trap. Know the difference between propaganda and truth and don't accept the easy lie.

Act with integrity and make conscious choices based on your own knowledge rather than following experts. If you don't have time for that, you don't deserve your position of trust.

You can start by reviewing this 30 minute video prepared by Canadian doctors using Pfizer's own data taken from a Freedom of Information request that shows the harms, especially to children: <https://www.canadiancovidcarealliance.org/media-resources/the-pfizer-inoculations-for-covid-19-more-harm-than-good-2/>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.canadiancovidcarealliance.org/media-resources%2Fthe-pfizer-inoculations-for-covid-19-more-harm-than-good-2%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cdc1fac36b0854a22951608d9d0c403bc%7C11d0e2>>
.

I also ask that you look into what our own FDA says and the VAERS numbers.

Subject: Concerns about freedoms that are being considered to be removed

External Email

I am a concerned citizen, and a nurse and I have serious concerns regarding the agenda of the 1/12/22 meeting by the DOH. I must ask why it is necessary to make changes to our Washington regulations concerning Covid and the failure to coerce citizens to "comply" with health recommendations.

We are a republic, not a dictatorship. Why are the rights and the sovereignty of our person being questioned? This also includes our right to decide medical decisions we choose to have done. This seems like a rather radical move of this government body. Why are we moving towards an Australian way of public control, and why you are trying to implement a crack down "US" the citizens of Washington State.

Placing free citizens into concentration camps for non compliance of Imposed recommendations seems like a rather drastic measure. To what end is this coming to??? Why is it necessary to takeover our constitution and strip us of our individual freedoms??? You are are "elected" to represent us, not "rule" over us. This does not follow any type of science.

Why is natural immunity not being recognized as protection from this virus. Why are immunizations being forced onto the citizens when the people who are vaccinated and boosted are not protected from getting Covid. If the vaccine works, and protects us, why do we still need to wear masks , and social distance??? Immunity by vaccine and naturally acquired, are the standard for all immunology and illnesses. Why is it not good enough for this virus?? Why is that??

This current variant is mild and survivable by the majority of the people. We are naturally acquiring immunity on a large scale and will soon have herd immunity. This will make vaccines unnecessary. We are monitoring the wrong numbers. We are Making decision without all the data, and silencing anyone who has another opinion or evidence of a different way to look at what's going on. Why are we not finding treatments to prevent serious affect? Why are we stopping scientists from studying all the facts???

This is dividing our country and is discriminatory against people for no reason other then hate and fear. Isolation of people by vaccine status is wrong and no better then what was done to the Jewish citizens of Germany.

Nothing is scientific about any of this. The science of immunology is not being followed. I have heard this hearing is to put laws into place to incarcerate non compliant citizens in quarantine facilities. You really think that taking the right for free people to make medical decision for their bodies that don't go against our religious beliefs is a good thing???

If this is the purpose of this meeting and forum, to take away freedoms and make changes to our regulations, this is very concerning to me and others I know. I would respectfully ask and pray that this is not your agenda, and that someone is able to help stop this tyranny.

To: Lang, Caitlin M (SBOH) <Caitlin.Lang@sboh.wa.gov>
Subject: Covid Vaccine Requirement for kids

External Email

Dear Ms. Lang,

I am writing to voice my concern regarding the consideration of covid vaccine requirements for school-aged children beginning next Fall.

Our four children span elementary to high school. They have all had covid, and thankfully, all had mild symptoms and recovered quickly with no long-haul symptoms. We are aware and acknowledge that some children are not as fortunate and that MISC is a risk factor for infection.

Having worked as an inpatient physical therapist at Seattle Children's Hospital, I recall young patients coming onto my unit who suffered similar complications (MISC, others with Guillan-Barre syndrome) that resulted from initial infection with flu or other illness. These were always regarded as RARE and unfortunate effects of otherwise non-life threatening viruses. Not once did I ever hear suggestion among medical or social work staff for a blanket requirement to flu vaccine as a solution. In fact, some of my patients who came in with Guillan Barre syndrome had received the flu vaccine that same year.

While mainstream media and CDC continues to promote covid vaccines and boosters, their efforts cannot negate tens of thousands of parents' personal experiences and direct word-of-mouth testimonies that covid is, for the vast majority of school-aged children, NOT a life-threatening illness, and NOT a significant, measurable, traceable cause of severe spread or threat to the larger community.

It is destructive to our state and tone-deaf to think that parents who do not want the vaccine for their children will reverse course simply because it's required or recommended. As time goes on, studies continue to show actual risk to children associated with the vaccine. A primary argument from health officials is that these risks are also associated with covid; however, they refuse to acknowledge that millions of children have HAD covid and did not experience any lasting or dangerous side effects or complications, and that any subsequent infection from a virus almost always results in milder symptoms.

Attempting to require the covid vaccine for school entry in the fall WILL result in a mass exodus of students from our state's schools. Increased requirements to crack down on homeschooling or private school communities WILL result in a mass exodus of families and citizens from our state period.

We, born and raised here, have always had a strong desire to raise our kids in this beautiful place, but when freedom of choice and trust in our parenting is available to us in so many other states, the decision to leave has begun to hinge on decisions like these.

Please consider listening.

Thank you for all you are doing to serve,

Kathy Day

To Whom It May Concern

I am writing as a mother of two in the public school system of Washington State. I am very concerned with Sate Superintendent Chris Reykdal and State Secretary of Health Umair A. Shah motive this coming week. I feel they will be wanting to mandate all Washington State school age children to be vaccinated to attend public school. This mandate goes against our constitutional rights. Please do not let this happen.

I will have no choice but to pull my kids out of the public school system if this should happen and possible out of Washington State. This saddens me to no end, both my husband and I are 5th and 6th generations of Washington State and the public schools.

I hope for the best, no one wants to be controlled or wishes for others to be controlled for their own beliefs.

Thank you
Kim

Hello,

In regards to your upcoming meeting on January 12, 2022, I would like to comment on agenda #11 regarding immunization and children. I am deeply opposed to making COVID vaccinations a requirement with school-aged children and do not support this measure. Not only does COVID pose a zero-to-low risk for children, but the vaccine testing data are starting to show moderate to significant risk to some children. I believe it would be unethical and irresponsible to mandate COVID vaccinations of children.

Please do not endanger our vulnerable next generation.

Thank you for your time,

Lisa Eastman

Please don't make it a requirement for our school aged children to receive the covid-19 vax. State-wide our school districts already have seen a decline in enrollment and state funding. If this covid-19 vax is required, you will lose more students from public schools. Have you surveyed families in our state?

If they are required what does the exemption process look like? What about those with religious beliefs?

Let's give our families a choice!

Subject: Covid 19 Vaccine Consideration for 5-12 yo

External Email

Dear Unelected Person assigned by the WA B of H to Evaluate this Vaccine:

As you consider the Covid Vaxx mandate for school age children in WA this Friday, please consider:

Mandating an Experimental vaccine goes against the Nuremberg Code, Federal and State Statutes.

There IS NO APPROVED vaccine AVAILABLE within the US. Mandating this vaccine is therefore breaking laws at all levels, including international. This can then qualify as crime against humanity. Individuals are therefore liable for their own decisions within this matter; legally, "just doing my job" is not a defense.

Have you ever heard of Thalidomide? It may be before your time. Look it up. THAT WAS AN APPROVED medication. There are people still alive living with the detrimental results of that approved medication. This experimental gene modification therapy is not.

More Children have ALREADY died from this vaccine than EVER died since the first lockdown, per VAERS--which is notorious for drastically suffering under-reported adverse events.

The PCR test, per Kary Mullis (the inventor of the PCR test); was never to have been used to diagnose ANYTHING. Flu and colds virtually disappeared the past 2 years. WHY? The CDC no longer recommends the PCR test and admits it gave far too many false positives, which have been the justification for all of this medical tyranny. Using these numbers to REQUIRE an EXPERIMENTAL 'vaccine' is ethically wrong on all levels.

I implore you to DO THE RIGHT THING. STAND for LAW. STAND for FREEDOM and our liberty--while there is still some left. DO YOUR JOBS.

Subject: Covid Vaccinations for Youth and Children

External Email

Hello,

I am a grandparent with elementary grade grandsons, two amazing boys that my wife and I often care for since they reside only 1/2 mile from us. Knowing that the Washington State Board of Health is currently considering Covid vaccination requirements for school age children, I wanted to express my concern not only for my two grandsons, but also for all the school age kids throughout Washington State.

I understand the public health need for school age children to receive vaccinations to prevent the outbreak of infectious diseases that represent a serious threat to their health. For that reason, we've historically vaccinated children against polio, smallpox, measles, etc., diseases that are a significant health threat to these children. But these vaccinations were years and even decades in testing to determine their efficacy and safety for the children before they were widely used. So, I have supported vaccinations for school age children for decades after knowing they were necessary, safe and effective.

These Corona virus vaccines are another story entirely: Covid does not represent anywhere near the threat to children's health like smallpox and measles. Current Covid vaccines have not undergone years of testing to determine their safety and their efficacy has not yet been adequately proven. There is a growing body of evidence that there are health and safety concerns that may outweigh the benefits of the vaccines. I truly believe that we need a lot more time to study and monitor the safety of the Covid vaccines before they are universally required.

We all know the statistics: elementary age school children are at a very minimal to no risk for severe covid-related illnesses. We can all afford to hold off on requiring any vaccine until we know that it is absolutely safe and effective.

Bottom line: I oppose any mandate that requires school age children, or young adults for that matter, to receive Covid vaccines until our medical communities have patiently exhausted all avenues of research to determine their safety and efficacy.

Sincerely,

Darrell Bredehoeft

Good afternoon,

It has been brought to my attention that you are having a meeting on January 12th to discuss making the covid 19 vaccination part of the requirements to attend school. As a mother and aunt of several children, I am highly against this requirement. I am fully aware that over 55,000 children have unenrolled from public school this last year in Washington state. Trust me when I tell you it's not out of fear of the virus. The only virus that is plaguing our children is your gross overreach and indoctrination. Making it a requirement will be detrimental to the school system.

Subject: Concerned Parent Regarding Vaccine Mandates for Children

External Email

Greetings to the Washington State Board of Health,

I am writing as a concerned parent opposing the Covid-19 vaccine mandate for school-aged children. As someone who has immersed myself in the available data and literature from medical journals, pharmacological reporting, and reports regarding the Covid-19 virus and vaccines via foreign and domestic institutions as well as journalism, there is simply no justification for mandating this vaccine for children (or any adult under the age of 45). Instead, all citizens should be free to make this medical decision for themselves and their children.

I am pro-vaccine, and am not in any way a Covid-denier. In the beginning of this pandemic, institutions were clamoring for data to inform behavior regarding the massive and conflicting interests of public health, economy, mental health, and public policy. But the data began to reveal the low and continually decreasing IFR (infection fatality rate) of Covid-19 and subsequent variants, the highly infectious nature of this virus, and those who are truly at risk for serious illness and death. Not all public and private institutions responded rationally and, instead, implemented debilitating rules and mandates that were aimed at stopping the spread, but were ultimately ineffective as seen by record case counts in the last 30 days. Moreover, much of what the public has been told and coerced into by threat or force about the SARS-CoV-2 virus and available vaccines has been either augmented or fully reversed in public statements from the CDC, White House, FDA, DOH, WHO, and NIH and other public health figures just in the past few weeks alone:

1) Vaccines do not prevent infection or spread. Source: CDC director on CNN

9) There is no federal solution for the pandemic. Source: Biden - White House
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.washingtontimes.com%2Fnews%2Fjoe-biden-declares-no-federal-solution-u%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cdf7444f3636c46ab9bec08d9d1712cc3%7C11d0e21720>

These facts are well established at this time by our public health institutions/experts and to ignore them is to embody the very definition of a "science denier", the phrase that has been weaponized against skeptics, advocates of personal health management and therapeutic treatment plans, and even foremost top medical experts throughout this pandemic. It is, therefore, not only morally wrong but a violation of the individual rights to medical freedom, informed consent, constitutional liberties, and basic common sense to force parents and children into an irreversible medical decision especially when the full impacts of negative events are still outstanding but, even as yet, are trending toward something that has a risk of being permanently dangerous for children. It is tempting to assign malicious intent and moral culpability to those who have participated in the seemingly coordinated effort to silence, shame, gaslight, ostracize, and demonize those who wish to make their medical decisions with caution and discernment, only to have the bureaucratic and political messaging shift out of convenience after lives are destroyed, but that attitude helps no one move forward in conciliation as we reach the endemic stages of this pandemic. I only insist that you not be so foolish with our children.

Respectfully,

Erica Kelley, King County Resident

I am wholeheartedly against a mandate that requires children to get a covid vaccine. No one really knows if the vaccine is effective. They are still required to wear a mask, so how is the vaccine preventing the virus? We don't know if there are long-term side effects. that could affect an entire generation. I don't hear much about the folks that have died from the vaccine, or those that are showing long-term damage due to receiving the vaccine. In my conversations with people that have been vaccinated I have heard these things. I can imagine you feel a lot of political and possibly financial pressure on making this decision. I am assuming you all have an education in medicine. Does this really seem right to you? This often feels more like an agenda than a health crisis. Let's not use this generation as guinea pigs.

Sincerely,
D Trivelas

External Email

Dear Ms. Hoff,

I am writing to voice my concern regarding the consideration of covid vaccine requirements for school-aged children beginning next Fall.

Our four children span elementary to high school. They have all had covid, and thankfully, all had mild symptoms and recovered quickly with no long-haul symptoms. We are aware and acknowledge that some children are not as fortunate and that MISC is a risk factor for infection.

Having worked as an inpatient physical therapist at Seattle Children's Hospital, I recall young patients coming onto my unit who suffered similar complications (MISC, others with Guillan-Barre syndrome) that resulted from initial infection with flu or other illness. These were always regarded as RARE and unfortunate effects of otherwise non-life threatening viruses. Not once did I ever hear suggestion among medical or social work staff for a blanket requirement to flu vaccine as a solution. In fact, some of my patients who came in with Guillan Barre syndrome had received the flu vaccine that same year.

While mainstream media and CDC continues to promote covid vaccines and boosters, their efforts cannot negate tens of thousands of parents' personal experiences and direct word-of-mouth testimonies that covid is, for the vast majority of school-aged children, NOT a life-threatening illness, and NOT a significant, measurable, traceable cause of severe spread or threat to the larger community.

It is destructive to our state and tone-deaf to think that parents who do not want the vaccine for their children will reverse course simply because it's required or recommended. As time goes on, studies continue to show actual risk to children associated with the vaccine. A primary argument from health officials is that these risks are also associated with covid; however, they refuse to acknowledge that millions of children have HAD covid and did not experience any lasting or dangerous side effects or complications, and that any subsequent infection from a virus almost always results in milder symptoms.

Attempting to require the covid vaccine for school entry in the fall WILL result in a mass exodus of students from our state's schools. Increased requirements to crack down on homeschooling or private school communities WILL result in a mass exodus of families and citizens from our state period.

We, born and raised here, have always had a strong desire to raise our kids in this beautiful place, but when freedom of choice and trust in our parenting is available to us in so many other states, the decision to leave has begun to hinge on decisions like these.

Please consider listening.

Thank you for all you are doing to serve,

Kathy Day

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

The longterm health effects and or side effects from any of these covid vaccines have not been studied, and that is my number one concern. What we have seen though is that these vaccines have not done anything to stop or even slow the spread. I am strongly against the requirement for covid vaccines, especially in children.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following reasons:

There are no long-term effects data or studies on this vaccine.
The children are not at any high risk of dying from this and are more likely to die of drowning than die of covid.
Even adult survival is 99.7%, so there's no need to require vaccines for this illness.
Adverse events and risks are well known at this point for this vaccine.
Anything with risk will always require informed consent and not be forced.

I oppose mandatory vaccines and medical interventions of any kind as I support bodily autonomy and personal freedom of health decisions. I have zero tolerance for any medical intervention without full informed consent and choice. It is bodily rape to force any person to be injected against their will and I will take any and all legal actions against the state and the schools should this be proposed.

It goes against best medical practices and best medical advice to ever coerce or strong-arm, detain anyone into any medical procedure or intervention against their will.

Subject: Covid concerns

External Email

Sirs and madams, I am writing as a very concerned parent and American.

I am writing in regards to the upcoming January 12, 2022 meeting.

It is time to stop the hysteria. From masks, to forced vaccines (threatening people with job loss is not a choice, it's extortion.). and now the covid camps.

WAC 246-100-070 is a gross overstepping of the government and breaks civil rights.

We are only 80 years post WWII and the hoocaust. Have we learned nothing? How can the voices of millions of people be silenced when the data shows Covid is not the mass death threat it was toted as.

Ignoring natural immunity, and suppressing side effect data is irresponsible.

Omicron is 40% less dangerous than the original strand and yet the hysteria by the media and government is still being spilled out.

Please vote AGAINST mandatory covid vaccines for school, jobs, and absolutely against the covid camps.

Subject: 1/12/22 Comments Against Proposed Covid19 Policy Changes

External Email

Dear Board of Health Members,

I am writing to ask you to NOT implement ANY policies that utilize tyrannical actions (involuntary quarantines, testing, treatment, counseling, and vaccinations) in what will be a failed attempt to "contain" Covid19. This virus will never be contained, it is a part of our ecosystem now. The only defenses against it are REDUCING CO-MORBIDITIES. Have you as a board, recommended spending any public service announcement resources on telling people to live a healthy lifestyle as the best defense??? If people are healthy, YOU KNOW THEY ARE AT MASSIVELY REDUCED RISK OF LONG TERM EFFECTS FROM THIS DISEASE.

We also know that the vaccines are ONLY GOOD FOR SHORT TERM PERSONAL PROTECTION from significant symptoms, but do not stop transmission or infection. My taking a vaccine DOES NOT save anybody else from Covid19, so forcing vaccines on people becomes nothing more than a form of medical authoritarianism, not health care. If WA's health care systems are stressed due to COVID patients, it is ONLY because hundreds of qualified health care professionals were unnecessarily terminated from their jobs (many with natural immunity), and due to that there are not enough people to provide care.

Please DO NOT implement any actions that will only hurt/divide/anger your fellow citizens and DO NOTHING to reduce the spread of this disease. HAVE COURAGE AND PLEASE TAKE A STAND AGAINST TYRANNY.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

These mandates are violating Congressional approval requirements.

Children are at-risk developmentally, and these vaccines have not been studied long term; side-effects and long-term affects are unknown and can possibly cause health problems for future generations.

The Omicron variety is currently the culprit and the evidence has proven that present Covid-19 injections are absolutely innaffective against this strain, making immunizing moot at this time.

I do not cite CDC and WHO at this time because this information is currently in the news and presented by these organizations, as well as from other countries. Currently, at least six physicians have worked together to write a letter to President Biden regarding the inneficacy of fighting this virus with immunization rather than affective medications and other remedies at our disposal.

I am vehemently against requiring children to be vaccinated with these yet-experimental drugs, unless by parental decision.

Thank you for including this, my professional and personal opinion, during your consideration of whether to accept or decline mandatory vaccinations for schools.

Respectfully,

Subject: Covid Shot

External Email

Hi,
I'm writing to voice my opposition to mandating the Covid shot as a requirement for my kids to attend school! This shot is dangerous and has caused serious health issues in people, including death. Most people that I know who have taken the shots have gotten covid afterwards, so it doesn't even prevent someone from getting covid. A vaccine is supposed to prevent a disease. By all definitions the covid shot is not a vaccine, which is why the definition has been changed! This shot should never be required for our children. I believe there will be many parents taking their kids out of school if this happens! What goes into my children's bodies is not up to the government or anyone else! There will be alot of opposition to this. And the fact that families aren't being made aware of this is unacceptable! Why is this not being made public far and wide!!? Do the right thing and do not require this shot!

To whom it may concern,

And absolutely no way should this should this mandate for school children go through! This so called vaccine is still an EUAIs and children are at low risk to even get covid 19! Please stop this madness as you're overreach Is not going to be tolerated! LEAVE OUR CHILDREN ALONE!

Subject: Covid Vaccine Requirement for kids

External Email

Dear Ms. Haag,

I am writing to voice my concern regarding the consideration of covid vaccine requirements for school-aged children beginning next Fall.

Our four children span elementary to high school. They have all had covid, and thankfully, all had mild symptoms and recovered quickly with no long-haul symptoms. We are aware and acknowledge that some children are not as fortunate and that MISC is a risk factor for infection.

Having worked as an inpatient physical therapist at Seattle Children's Hospital, I recall young patients coming onto my unit who suffered similar complications (MISC, others with Guillan-Barre syndrome) that resulted from initial infection with flu or other illness. These were always regarded as RARE and unfortunate effects of otherwise non-life threatening viruses. Not once did I ever hear suggestion among medical or social work staff for a blanket requirement to flu vaccine as a solution. In fact, some of my patients who came in with Guillan Barre syndrome had received the flu vaccine that same year.

While mainstream media and CDC continues to promote covid vaccines and boosters, their efforts cannot negate tens of thousands of parents' personal experiences and direct word-of-mouth testimonies that covid is, for the vast majority of school-aged children, NOT a life-threatening illness, and NOT a significant, measurable, traceable cause of severe spread or threat to the larger community.

It is destructive to our state and tone-deaf to think that parents who do not want the vaccine for their children will reverse course simply because it's required or recommended. As time goes on, studies continue to show actual risk to children associated with the vaccine. A primary argument from health officials is that these risks are also associated with covid; however, they refuse to acknowledge that millions of children have HAD covid and did not experience any lasting or dangerous side effects or complications, and that any subsequent infection from a virus almost always results in milder symptoms.

Attempting to require the covid vaccine for school entry in the fall WILL result in a mass exodus of students from our state's schools. Increased requirements to crack down on homeschooling or private school communities WILL result in a mass exodus of families and citizens from our state period.

We, born and raised here, have always had a strong desire to raise our kids in this beautiful place, but when freedom of choice and trust in our parenting is available to us in so many other states, the decision to leave has begun to hinge on decisions like these.

Please consider listening.

Thank you for all you are doing to serve,

Kathy Day

Subject: covid vaccine requirements in school

External Email

To whom it may concern,

I'm a mother of two healthy and happy girls who are currently in district 81 in Spokane Both my children are and always have been up to date on needed vaccines to attend school.

That being said, those vaccines have been out for many years and have been tested on millions.

I do have a concern like millions of others over the new covid -19 vaccine and dont feel we have enough research to make this mandatory on young children. This should be a choice made by the parents/guardians not government, school boards or local health officials. I do understand side effects are rare and data for now is showing it to be mostly safe, my major concern is the long term effects this vaccine could have. I'm asking you to please take in consideration the parents who feel this way and let the vaccine BE A CHOICE AND NOT A REQUIREMENT.

Thank you,

Jamie MacDonald

A concerned mother in Washington.

On Wed, Jan 5, 2022 at 3:47 PM Michelle Cruz <michellecruz.654@gmail.com>
<<mailto:michellecruz.654@gmail.com>> > wrote:

I am a parent. I am a mom. I am a wife. I am a employee. I am a friend. I am a daughter. I am a niece. I am many many more things than these things. I am my own person. I believe in the United States of America. I believe in our rights as an America. I also believe it is my decision on what I get to put into my child's body.

I got the COVID vaccination because I wanted to see my parents who I had not seen since the start of COVID. I missed out on so much throughout the pandemic, and yet this vaccine was suppose to be the end to having to wear mask. At least that is what Governor Inslee said. Get the vaccine and you can quit wearing a mask. Well, that was shortly lived. I am vaccinated and yet, I still have to wear a mask when I go into places. I still have to show my vaccination card to eat anywhere in King County.

I have heard so many different things about the vaccines and kids. These things are about the myocarditis that kids are getting. Not all of them, not half of them, but some of them. As a parent, I do not want to do anything that could cause any heart condition in my child. Her dad has heart issues and this vaccine has me on edge for her. She is 13. I have heard things from people who work at Valley Multicare. People who have seen teenagers come in with side effects from the vaccine, that they didn't have before. Healthy kids. I have heard stories from nurses who refuse to get the vaccine for their kids as well. Because of the people they have seen come into the ER/hospital with problems from the vaccination. I have also read once about not knowing if this will cause fertility issues in our kids. I know that was a long time ago that I read that, but you can't

honestly tell me that you know for a fact that this vaccine WILL NOT cause any issues in my kids fertilization when she decide to have kids. I am 41 years old. I am done having kids. If it messed with my fertility, so be it. But I refuse to get a vaccine for my kid who the long term side effects are not know.

I do not believe that this should be a requirement for children to be able to attend schools. What baffles me is this:

You get COVID you can spread COVID.
You get the vaccine, you can STILL spread COVID.

So, why should YOU choose for my kid a vaccination that us parents are not comfortable with? Especially since they can spread COVID with or without the vaccine. Let us parents deal with our decision to vaccinate or not to vaccinate. When my child turns 18, I will definitely let her make her own decisions about her body, but until then, I feel like it is my and her father's decisions on what goes in her body and what doesn't. We have talked to her about the vaccine as well and right now she does not want to get it.

I really hope you listen to US parents. We know what is best for our kids, even if you think our decision is not the best. I grew this child in my body. I delivered her and together with her father we have raised an incredible young lady. I do not want to put something into her body that doesn't have enough studies showing what long term side effects will be.

Below are just some articles I found and some research that I have found about some of my concerns. Yes, these numbers have limited number of students, but with her father's history with heart conditions, this scares me to death!

Thank you for listening and please do what is right and DO NOT require the vaccination for COVID to be a requirement at school.

Thank you!
Michelle Cruz

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets vaccine, one group gets placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccines adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time.
Michelle Cruz - Federal Way Washington

Subject: Covid vaccine for school/daycare kids

External Email

Hello,

As a life long citizen of WA, and a parent of two young school age children, I'm writing this email asking that you please oppose or vote against any covid vaccine requirements for school/daycare age children. There have been FAR TO MANY adverse reactions to force this gene editing operating system on our children. Especially kiddos like mine who are already suffering from vaccine injuries....

Even if the VAERS data is 100% of all reported reactions (its not), aren't those numbers to high? How can anyone in good conscience say the benefits of this vaccine outweigh the risks after looking at the vaers data? Have you looked at that data?

Why has the flu vaccine never been mandated? I'm absolutely not advocating for that, just making a point.

Why is the school lunch program stuffing kids full of sugar & processed food? Do you realize how many school age kids are obese and how much that breaks down their immune systems? It's about health right?

I'd also ask that mask mandates be dropped for school/daycare age kids as well. They simply do not work.

Again, I'm asking that you please oppose/vote NO on requiring the covid vaccine for school/daycare age kids.

Respectfully,
Leah Barkhuff

Pfizer to Study 3rd Dose of COVID Vaccine for Toddlers . . . But Why?

The push to inject children with a genetic experiment may be one of the worst public health offenses perpetrated on a population of people who are unable to speak for themselves, do not have a legal voice and depend on adults to protect them.

” creation, testing and manufacture of this shot anything but implausible.

Historically, vaccines have been pulled after reported damage

At no other time in history have “vaccines” been created and distributed with such impunity.

The closest scenario occurred in 1976 when one young soldier died from a new form of flu that triggered fear and the subsequent development of a flu vaccine

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.smithsonianmag.com%2Fsmithsonianmag%2Flong-shadow-1976-swine-flu-vaccine-fiasco-180961994%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C660102967f07487743e108d9d15f74e7%7C11d0e2172>

who died from the vaccine.

The rush to produce the newest vaccine iteration ostensibly began in early 2020 after the WHO announced SARS-CoV-2 would produce a worldwide pandemic

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ncbi.nlm.nih.gov%2Fpubmed%2F32179638&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C660102967f07487743e108d9d15f74e7%7C11d0e2172>

and an early, flawed mathematical model

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cato.org%2Fblog%2Fhow-one-model-simulated-22-million-us-deaths-covid-19&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C660102967f07487743e108d9d15f74e7%7C11d0e2172>

one-model-simulated-22-million-us-deaths-covid-19&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C660102967f07487743e108d9d15f74e7%7C11d0e2172

predicted millions of deaths in America. Yet, this was not a medical product that fit the definition of a “vaccine.”

It was something never heard of before in vaccinology, based on an experimental mRNA technology that triggers your body to produce a spike protein

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdeaths-after-covid-vaccine-spike-protein-travels-from-injection-site-organ-damage%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C660102967f07487743e108d9d15f74e7%7C11d0e2172>

vaccine-spike-protein-travels-from-injection-site-organ-damage%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C660102967f07487743e108d9d15f74e7%7C11d0e2172

. It was so new, in fact, that the CDC decided the definition of “vaccine” had to be changed

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.citizensjournal.us%2Fthe-cdc-suddenly-changes-the-definition-of-vaccine-and->

cdc-suddenly-changes-the-definition-of-vaccine-and-

vaccination%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C660102967f07487743e108d9d15f74e7%
and scientists were unsure of how the body would react to the genetic therapy injection.

While the swine flu injection was pulled after 45 million shots were given when 53 people died

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.foxnews.com%2Fopinion%2Fcarlson-how-many-americans-have-died-after-taking-the-covid-vaccine&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C660102967f07487743e108d9d15f74e7%7C11d0e>, the COVID-19 injection will have a different history.

According to data from the Vaccine Adverse Events Reporting System (VAERS), collected by the CDC and U.S. Food and Drug Administration (FDA), there have been 21,002 deaths recorded

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fcdc-covid-vaccine-injuries-fda-pfizer-booster-kids%2F&data=04%7C01%7Cwsboh%40sbh.wa.gov%7C660102967f07487743e108d9d15f74e7%7C11d0>
in conjunction with the COVID jabs as of Dec. 24, 2021

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fopenvaers.com%2Fcovid-data&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C660102967f07487743e108d9d15f74e7%7C11d0e21>, 12 months after the first shot

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.washingtonpost.com%2Fna-covid-vaccines-new-york%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C660102967f07487743e108d9d15f74e7%7C11d>
was given in the U.S.

According to Bloomberg

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.bloomberg.com%2Fgraphics%2Fvaccine-tracker-global-distribution%2F&data=04%7C01%7Cwsboh%40sbh.wa.gov%7C660102967f07487743e108d9d15f74e7%](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.bloomberg.com%2Fgraphics%2Fvaccine-tracker-global-distribution%2F&data=04%7C01%7Cwsboh%40sbh.wa.gov%7C660102967f07487743e108d9d15f74e7%3A), as of Dec. 23, 2021, there have been 499 million doses given in America.

It is difficult to compare these numbers since two of the three available COVID shots require a double shot, so there haven't been 497 million people vaccinated. Yet, the adverse events and deaths are also occurring after just one shot.

Taken at face value, the U.S. shut down the vaccination program in 1976 after 0.000117% of people died, while the VAERS estimate is that 0.00407% of people have died after a COVID injection (using Bloomberg's Dec. 21 dose numbers of 497 million).

In other words, based on the percentage of people who have died, 3,378% more died after the COVID injection than from the swine flu injection. There have been 965,841 adverse events reported, including permanent disabilities and heart attacks in young people

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdemoderna-pfizer-covid-vaccine-teens-mycarditis%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C660102967f07487743e108d9d15f74e7%7C>. And yet, stakeholders in the shot insist the next generation of Americans must take it.

Pfizer announced youngest kids not responding to the shot

Pfizer has been working on a clinical trial

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fclinicaltrials.gov%2Fct2%2Fshow%2Fstudy%2F00001897&cid=6e0c8d3e-3f30-4131-a340-5d0880806400&ad=US&lang=en>

to evaluate the safety of the mRNA jab in healthy children, intending to create a dose for children 6 months and older. Endpoints reports

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fendpts.com%2Fpfizer-plans-to-trial-a-third-shot-for-its-covid-19-vaccine-in-the-youngest-kids-pushing-back-its-timeline->

farther%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C660102967f07487743e108d9d15f74e7%7C11

Pfizer recently announced "non-inferiority was not met for children between the ages of 2 and 5 when compared to older teenagers in the current trial."

Originally, the company hoped to apply for an emergency use authorization (EUA) for the youngest by the end of December 2021. However, since the data have not proven successful, they hope to submit for the EUA "in the first half of 2022

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fendpts.com%2Fpfizer-plans-to-trial-a-third-shot-for-its-covid-19-vaccine-in-the-youngest-kids-pushing-back-its-timeline->

farther%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C660102967f07487743e108d9d15f74e7%7C1
," one short year after starting the experiment.

The company said

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.pfizer.com%2Fnews%2Fpress-release%2Fpress-release-detail%2Fpfizer-and-biontech-provide-update-ongoing-studies-covid->

19&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C660102967f07487743e108d9d15f74e7%7C11d0e2172

it has made a shift to giving three doses in smaller amounts to raise the immune response. They explain the decision this way:

"Compared to the 16- to 25-year-old population in which high efficacy was demonstrated, non-inferiority was met for the 6- to 24-month-old population but not for the 2- to under 5-year-old population in this analysis ...

"The decision to evaluate a third dose of 3 µg for children 6 months to under 5 years of age reflects the companies' commitment to carefully select the right dose to maximize the risk-benefit profile ...

“Pfizer and BioNTech also plan to evaluate a third dose of the 10 µg formulation in children 5 to under 12 years of age.”

If the two-dose regimen makes the changes to the immune system in the 6- to 24-months group and 5- to 12-year age groups that the company is looking for, why move to a three-dose regimen for them if not for financial gain?

Pfizer pushing the envelope with a phase 1-2-3 trial

It is important to note that the trial is listed in Clinical Trials

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fclinicaltrials.gov%2Fct2%2Fshow%2Fstudy/NCT03896742](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fclinicaltrials.gov%2Fct2%2Fshow%2Fstudy/NCT03896742&cid=7d8e8c4f-404d-4102-a601-f07c4559cf6a)
as a phase 1-2-3 study. Phase 1 trials are generally concerned

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmed.uc.edu%2Fdepart%2Fpsychiatry%2Fresearch%2Fcrim%2Ftrial-phases-1-2-3->

defined&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C660102967f07487743e108d9d15f74e7%7C11d0e with establishing drug safety and dose range in a small number of healthy volunteers. Phase 2 trials determine the effectiveness of the drug using approximately 100 to 300 volunteers and often last from several months to two years.

Phase 3 studies are the final evaluation performed over multiple centers with up to several thousand patients to test the drug safety and efficacy. A search of the Clinical Trials database shows only one study

2- <https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fclinicaltrials.gov%2Fct2%2FResult>

in several hundred thousand studies listed that are simultaneously in Phase 1, 2 and 3.

But not all parents and scientists are appalled by the experimentation on 6-month-old babies in the face of massive adverse events and permanent damage to adults.

One mother and epidemiologist, Katelyn Jetelina, wrote

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fyourlocalepidemiologist.substack.com/did-the-pfizer-young-kids-trial&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C660102967f07487743e108d9d15f74e7%7C11d0e217>>
she finds comfort that the clinical trial found errors and was surprised when it failed. She wrote
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fyourlocalepidemiologist.substack.com/did-the-pfizer-young-kids-trial&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C660102967f07487743e108d9d15f74e7%7C11d0e217>>
:

"As a mom, I was shocked and heartbroken. My girls were so close to getting their shot. We've waited so long and really needed a win."

Children are not at risk from COVID

Despite low rates of infection and death, the American Academy of Pediatrics calls "vaccines our best hope to end the COVID-19 pandemic

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fhealthychildren.org%2FEnglish%2Ftools%2Fask-the-pediatrician%2FPages%2Fwhen-can-children-get-the-COVID-19-vaccine.aspx&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C660102967f07487743e108d9d15f74e7%7C11d0e217>>
." However, we do know that the risk to children birth to 17 years is so small as to be inconsequential.

The CDC reports

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fncchs%2Fnvss%2F2020%2Fdata%2Ftable%2F011010%2Ftable_011010.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C660102967f07487743e108d9d15f74e7%7C11d0e217>
a total number of deaths in 2020 and 2021 from COVID-19 in this age group as 668 as of Dec. 23, 2021. One study
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.researchsquare.com%2Farticle%2Frsos.2106896v1&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C660102967f07487743e108d9d15f74e7%7C11d0e217>>
689684%2Fv1&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C660102967f07487743e108d9d15f74e7%7C11d0e217
posted July 7, 2021, looked at deaths in the U.K. during the first 12 months of the pandemic and found that 99.995% of children survived.

Between March 2020 and February 2021 only 25 children under the age of 18 had died in the U.K. as a direct result of the infection. The researchers found there were 61 children with positive test results, but 36 deaths were attributed to other causes. This is a 2-in-1 million

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.researchsquare.com%2Farticle%2Frsos.2106896v1&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C660102967f07487743e108d9d15f74e7%7C11d0e217>>

ending Dec. 10, 2021, we can estimate there are likely 39,599,481 adverse events and
830,004 deaths caused by the injection.

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fncchs%2Fnvss%2F2013%2F2013-nvss-008.html>, is 807,787. This means the shot possibly has killed more children and adults than the virus, and in less time.

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fnchs%2Fnvss/>, you note that there were 36,931 more deaths recorded in 2021 after the release of the vaccine than in 2020 when the illness first emerged from Wuhan.

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.livescience.com%2Ffirst-us-covid-19-death-january-2020.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C660102967f07487743e108d9d15f74e7%7C11>
deaths before that, finding the first from COVID happened Jan. 9, 2020.

dangerous%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C660102967f07487743e108d9d15f74e7%7
:

"In short, public health leaders say, parents must 'vaccinate the young to protect the old.' Given the federal government's estimate that one vaccine injury results from every 39 vaccines administered, it seems clear that officials expect children to shoulder 100% of the risks of COVID vaccination in exchange for zero benefit."

An opinion piece in The BMJ

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fblogs.bmj.com%2Fbmj%2F2021%2F07-19-vaccines-for-children-hypothetical-benefits-to-adults-do-not-outweigh-risks-to-children%2F&data=04%7C01%7Cwsboh%40sbob.wa.gov%7C660102967f07487743e108d9d15f74e7%7C>
by Peter Doshi, Elia Abi-Jaoude and Claudina Michal-Teitelbaum highlight why we must
not force children to take the COVID shot simply because it might help vulnerable adults.
They write

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fblogs.bmj.com%2Fbmj%2F2021%2F09%2Fvaccines-for-children-hypothetical-benefits-to-adults-do-not-outweigh-risks-to-children%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C660102967f07487743e108d9d15f74e7%7C15705629-487D-4B42-B0E8-34DF095F0D00>

“Even if we were to assume this protection does exist, the number of children that would need to be vaccinated to protect just one adult from a bout of severe covid-19 — considering the low transmission rates, the high proportion of children already being post-covid, and most adults being vaccinated or post-covid — would be extraordinarily high.

"Moreover, this number would likely compare unfavorably to the number of children that would be harmed, including for rare serious events. A separate, but crucial question is one of ethics. Should society be considering vaccinating children, subjecting them to any risk, not for the purpose of benefiting them but in order to protect adults? We believe the onus is on adults to protect themselves."

Doshi was even more blunt in his June 10, 2021, public comment

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.youtube.com%2Fwatch%3F>
to the FDA's Vaccines and Related Biological Products Advisory Committee. There, he
pointed out that the FDA can only authorize the use of a medical product in a population
if the benefit outweighs the risk in that same population.

This means that even if adults were to benefit, the COVID shots cannot be authorized for children unless children will actually benefit from it themselves. In the case of COVID-19 injections, children cannot benefit, seeing how they only have a 0.005% risk of death in the first place.

Healthy children have died shortly after the jabs and dozens of cases of heart inflammation have been reported.

Since when, in the history of public health, have children been sacrificed to protect the sick and elderly? Public health authorities have completely reversed the conventional risk/reward analysis

Hello,

I am asking you to please not add the covid vaccine to the list of required vaccines. It has no long term studies. If you require the vaccine I will be pulling my 4 kids out of public school.

Thanks, Stephanie

Hello,

I do not look to you as a Board as the Authoritarian ruler over my children and their health needs. I and my God will provide and do what is needed for my children. I and my God will make those decisions as we see fit. Not what YOU see fit or my neighbor. Forced vaccines come out of a place of fear among the old people. Fear cannot be trusted. God can be trusted. My children have a 99.8% chance of surviving covid. They are healthy and have no underlying health conditions. I do not need forced vaccines on my children. Look at the cases of myocarditis in young boys. More than 11,000 reports alone in 2021 of children diagnosed with myocarditis have been reported. IT IS NOT NORMAL FOR CHILDREN TO HAVE HEART PROBLEMS WHO HAVE BEEN HEALTHY ALL ALONG. The idea of forcing vaccination on our children comes from an area of fear. Fear of the "older people" afraid they will get Covid. I will not shoot up my children with an experimental, at best, drug to appease your "safety first" narrative. The "You wear a lifejacket in the water, so I don't drown" mentality is ridiculous.

Proof of myocarditis:

Myo/Pericarditis (openvaers.com)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fopenvaers.com%2F covid-data%2Fmyo-pericarditis&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cbaa7cfe6c43f4d8498d308d9d16b3b41%7C11>>

I do not give you permission to operate in an authoritarian way nor do I approve of you attempting to use broad rule making powers to force the Covid-19 shots that are NOT, THEY ARE NOT currently approved by the FDA. The only shot approved is the Comirnaty and it is not available in the USA. The current Pfizer-BioNTech Vaccine is the one given in the U.S., but it is still under EUA, not authorized."

Proof:

<https://labeling.pfizer.com/ShowLabeling.aspx?id=14471>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Flabeling.pfizer.com%2FShowLabeling.aspx?id=14471>>

EUA approval letter from FDA also includes Authorization for Comirnaty:

<https://www.fda.gov/media/151710/download>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F15171>
:

Pfizer/BioNTech and "Comirnaty are NOT, are NOT the same. They are legally not to be represented as such. Legal names and legal approvals for drugs in the U.S. are supposed to follow specific procedures, clinical trials and they hold important legal obligations.

Proof:

<https://crsreports.congress.gov/product/pdf/R/R46913>

The declarations put into place in 2020 by the former Secretary, Alex M. Azar II, are all based upon projections at the time and not actual deaths. The first case to enter the U.S. was shared as Jan. 23, 2020, and although by the date of the first declaration of "public health emergency" (Jan, 31 2020) there were at least 10 cases.

Proof:

https://covid.cdc.gov/covid-data-tracker/#trends_dailycases
<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcovid.cdc.gov%2Fcovid-data-tracker%2F%23trends_dailycases&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cbaa7cfe6c43f4d8498d308d9d16b3b41%7C

<https://crsreports.congress.gov/product/pdf/LSB/LSB10443/7>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcrsreports.congress.gov%2Fproduct/pdf/LSB/LSB10443/7>

We are told by you to trust the science yet, declarations of emergency were declared with less than 10 cases in the U.S. on a new virus and the first death didn't happen until Feb. 27, 2020. The mistrust we are experiencing is due to EXTREME measures that have been taken against the people and the very HEAVY-HANDED measures that have not been supported by actual data.

Please provide me with the data you are using to support your reasonings? Where are your websites and facts?

I would also encourage you to review Pfizer's 6-month-data. The document is attached along with the link under "breaking news" called "More Harm Than Good". Great information however it is out of Canada context but they are using the same vaccines as the U.S.

<https://www.canadiancovidcarealliance.org/>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.canadiancovidcarealliance.org/>

Ever since Washington has achieved a 68.1% fully vaccinated status and in general people have complied nothing has changed in the safety of not being infected with Covid 19. This vaccine has destroyed people's jobs, careers, lives, families and has destroyed our freedoms as a simple dinner out with friends or getting a coffee. The people of Washington have been more than compliant for the past 670+ days of the Governor's emergency powers and yet the masks, shots, lockdowns and proof of vaccination cards have not stopped the virus from spreading between vaccinated people, causing death, or causing vaccine injuries among those that chose to be a part of the vaccine trial.

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC8342008/>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ncbi.nlm.nih.gov%2Fpmc%2Farticles%2FPMC8342008/>

Please be aware of the data in the VAERS reporting system:

<https://openvaers.com/>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fopenvaers.com%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cbaa7cfe6c43f4d8498d308d9d16b3b41%7C11d0e210-0001&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cbaa7cfe6c43f4d8498d308d9d16b3b41%7C11d0e210-0001>

Also consider what People think about the mandates by OSHA as authorized by Biden. There over 119,830 comments, stating how unhappy they are about the mandates and yet there is not one ounce of facts or proof this has stopped the spread, stopped the transmission, nor stopped the hospitalization as was acclaimed when these vaccines were rolled out.

<https://www.regulations.gov/document/OSHA-2021-0007-0001>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.regulations.gov%2Fdocument%2FOSHA-2021-0007-0001&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cbaa7cfe6c43f4d8498d308d9d16b3b41%7C11d0e210-0001&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cbaa7cfe6c43f4d8498d308d9d16b3b41%7C11d0e210-0001>

Please consider the points, data and research that has been shared with you in this email when you are deciding to FORCE with a HEAVY-HAND the vaccine on my children. In a real world not everything is good for everyone. Do not be driven by fear or money or Godlessness. Decide with integrity, thoughtfulness, actual science, and prayer. You are deciding a fate you have no business being a part of. But since you are, I implore you to vote "NO" on the vaccine mandate for school aged children.

Sincerely,

Nancy Grossi

I am opposed to making COVID-19 shots mandatory for school admission or childcare in WA State for the following reasons:

Children are at extremely low risk for Covid. My kids both had the actual virus and it was more mild than the flu. Neither of them were seriously ill, they both recovered with no remaining long term side effects. It is more risky for them to take the vaccine due to the large number of potential side effects. They have natural immunity.

The vaccines are still only EUA (emergency use authorized). These drugs are not FDA approved (they are experimental) and mandating them is in violation of the Nuremberg code.

There are no long-term studies to document any history of safety. However, there have been serious upticks in health problems directly related to vaccinating our children. The higher rate of myo and pericarditis in young males is troubling. The higher rate of reproductive problems in young females is troubling. This is all after these vaccines have had mass uptake, it is not coincidence.

Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore the vaccine apparently does not stop the spread of the disease. The only protection I see for the vaccines is in the older population or those with comorbidity such as obesity, diabetes, COPD, lung disease, etc. Children are not in this demographic.

Given all of the above, It is unnecessary and dangerous to force kids to be vaccinated against their will to attend school.

Thank you,
Tyler Loudon

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

* Government should not be making decisions that are parent's moral and legal decisions to make.

- There is no clear or long term study to show the benefits or harm that could be done to children (or people in general).

* It's unconstitutional and more important . . . immoral.

- These actions are dividing our nation further . . . the government works for the people, not the government telling the people what to do or think.

- This is a war against our children who are loved and cherished by their Creator, Jesus Christ.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

These are EUA vaccines and are not showing to be effective against COVID variants unless multiple boosters next place and even then?

Children are at very low risk for the COVID virus. They recover quickly when they get the virus. Those who are at higher risk may choose to get the vaccine but making a broad sweep mandate for all children is not a good decision.

With young children, they have a longer span of life than older at-risk adults. If children develop unknown side effects from the vaccine, these children have to live longer with these potentially devastating effects.

Please reconsider your decision to mandate these ineffective, unnecessary treatments in children. They have robust immune systems that have worked for years against colds and flu.

Respectfully,
Kristin Calabrese

Subject: Covid 19 Vaccine Mandates

External Email

I am writing in regards to the upcoming decision on making the Covid 19 vaccine to be required for school children in Washington state.

I would like to understand why this vaccine would be required when we now know that this vaccine only protects the vaccinated, it does not prevent the spread of the virus. We are also talking about school children ages 5-18, 3 years and up if you consider this requirement of preschool children as well, of these ages they are more likely to die in a car accident than from Covid or die of the seasonal flu. Are we also going to mandate all children also have the flu vaccine?

What are we doing to this generation of children? Haven't we subjected them to enough by taking away school for far too long, making them wear masks for years and now eating lunch outside in the winter months at some schools. Now in King county children can not go to certain activities with their families, like go to the movies, go to dinner, or go to the gym or participate in their preferred sports without a vaccine passport and now school next year? Why?

Show me the proof that this vaccine works the way it is supposed to, show me the proof that this vaccine has studies showing it is safe for children, show me that these booster shots that are now available to children are safe.....when will it be enough....at what point will you say they are fully vaccinated, after one, two, three, four shots and at what cost to our children and their health.

This comes as we are seeing the mental health of our children decline rapidly. We have seen more deaths from drug overdoses and suicides than covid deaths in our youth. What is Washington state doing to help prevent these drug overdoses and suicides? Anything at all? No, just more mandates on our children that are not backed by science, or at least the new science that says vaccines do not prevent the spread of this disease or prevent the person vaccinated from getting the disease which now by this point for a healthy American is just a bad cold. And now proof that masks do not work the way that we have been told they work especially with this new variant.

This mandate will do nothing but farther divide our state and disrupt all of the school children in within it and will bring forward a mass movement of people from this tyrannical state.

Thank you for your time,

Amy Gagnon

To whom it may concern,

We are very much opposed to having the COVID vaccine be made mandatory for our children to attend public school. We do not have a problem with anyone who has gotten or wants to get the COVID vaccine, but do not think it should be mandated. Children are the least affected by the virus. The vaccine does not prevent you from getting COVID or passing it on to others. It effects people differently and can cause worse side effects. My boys enjoy going to school, but if this vaccine becomes a requirement for them to attend school, we will be pulling them from the public school system.

Thank you

I strongly oppose COVID-19 vaccinations for children. It has been shown that COVID-19 vaccines cause myocarditis in male children and other serious side effects up to death. COVID-19 vaccination have shown to be in effective in the prevention of COVID-19 or the spread of it. There is no benefit and the potential for harm is too great to use an emergency use authorization vaccine and mandate it.

I am FULLY SUPPORTIVE of making Covid-19 shots mandatory for school admission.

This is the only way we will defeat this virus!

With Covid-19 rates increasing faster than ever with the Omicron variant, this is really the only way to keep schools open safely!

The vaccine has been shown to be VERY SAFE as more than half the population of the world has been vaccinated already.

Many, many other vaccines are already mandatory. There is no reason Covid-19 should be any different. In fact, given how much more dangerous this virus is than other viruses, this is all the more reason why the vaccine should be mandatory!

Those against making Covid-19 shots mandatory do not understand the science. Their movement is purely political.

PLEASE, PLEASE mandate the Covid-19 vaccine so that our schools, our teachers, and our society at large, can stay safe!!!!

Thank you for your consideration.

I am opposed to making COVID-19 injections mandatory for school admission or childcare in our State for the following Reasons:

1. Children under the age of 17 are not at risk for hospitalization, long term adverse affects, or death due to COVID. More children in this age group die from seasonal influenza.
2. None of the COVID injectables have undergone long-term studies. To date, no one knows how they will affect children's health in the future. There is evidence that these injectables have negative impacts on fertility, heart inflammation, micro-clotting, and a host of other adverse effects, including death as indicated in the VAERS database.
3. It is not known whether these injections may cause birth defects or whether they may be teratogens.
4. Children should not be used to protect the health of adults. Each adult has the option of protecting themselves by a number of means.
5. All individuals have a God given right to authority over their bodies. In the case of children, parents exercise authority here. The government should not be involved with these decisions.
6. Experimental drug testing on children should never be undertaken, and certainly not under the conditions outlined above.

Thanks for not making these injections mandatory for school K-12 admission or for childcare in our State. Also please bear in mind, this agency does not have legal authority for making this decision in the first place. Any such mandate would be against our State and Federal constitution.

PLEASE DO NOT REQUIRE THE COVID VACCINE AS A REQUIREMENT FOR OUR PUBLIC SCHOOLS! There has been evidence to suggest it could affect fertility. They won't know for years what the long term affects are. PLEASE DONT ALLOW OUR NEXT GENERATION to be Guinea pigs.

Sincerely, registered voter for WA state, Clark County Michelle Simpson

Hi,

I want to briefly speak that I am opposed to making COVID-19 shots mandatory for school admission or childcare in the state of Washington.

This is still only for EUA and there have been no long term studies on the effects for adults, let alone the children who are at extremely low risk. Along with any short studies that have been done, they are not considering that the vaccinated are spreading just as much as the unvaccinated which brings us back to the focus of this not being studied long enough and still under emergency use authorization.

I also want to remind everyone that when cases are reported, these are cases and not deaths. People are recovering from the virus and building immunity. Which in turn is not being accepted instead of the shots. We must consider the natural immunities and the antibodies that our bodies build up as part of fighting any battle against a virus.

We have not found a solution, vaccination that prevents the common cold or flu. Each year a new flu shot is brought out because a virus mutates. That is what a virus is supposed to do, mutate. Allowing natural immunity for our bodies to have then helps strengthen our bodies.

Our children are not our guinea pigs for study and if people want to participate, then they have the right to, but to force a shot on those who do not want to participate is against people's rights. On top of these are children and no government should take the place of a parent's decision. Parents choose to have children and therefore it is the parent's choice to make decisions based on what is the best for their child. They know the child's medical history best. A government making a blanket decision does not take into consideration each person's individual health situation.

This is not a decision for the government to make.

Thank you,
Betsy Cermak

Subject: Covid Vaccine Requirement for kids

External Email

Dear Mr. Glasoe,

I am writing to voice my concern regarding the consideration of covid vaccine requirements for school-aged children beginning next Fall.

Our four children span elementary to high school. They have all had covid, and thankfully, all had mild symptoms and recovered quickly with no long-haul symptoms. We are aware and acknowledge that some children are not as fortunate and that MISC is a risk factor for infection.

Having worked as an inpatient physical therapist at Seattle Children's Hospital, I recall young patients coming onto my unit who suffered similar complications (MISC, others with Guillan-Barre syndrome) that resulted from initial infection with flu or other illness. These were always regarded as RARE and unfortunate effects of otherwise non-life threatening viruses. Not once did I ever hear suggestion among medical or social work staff for a blanket requirement to flu vaccine as a solution. In fact, some of my patients who came in with Guillan Barre syndrome had received the flu vaccine that same year.

While mainstream media and CDC continues to promote covid vaccines and boosters, their efforts cannot negate tens of thousands of parents' personal experiences and direct word-of-mouth testimonies that covid is, for the vast majority of school-aged children, NOT a life-threatening illness, and NOT a significant, measurable, traceable cause of severe spread or threat to the larger community.

It is destructive to our state and tone-deaf to think that parents who do not want the vaccine for their children will reverse course simply because it's required or recommended. As time goes on, studies continue to show actual risk to children associated with the vaccine. A primary argument from health officials is that these risks are also associated with covid; however, they refuse to acknowledge that millions of

children have HAD covid and did not experience any lasting or dangerous side effects or complications, and that any subsequent infection from a virus almost always results in milder symptoms.

Attempting to require the covid vaccine for school entry in the fall WILL result in a mass exodus of students from our state's schools. Increased requirements to crack down on homeschooling or private school communities WILL result in a mass exodus of families and citizens from our state period.

We, born and raised here, have always had a strong desire to raise our kids in this beautiful place, but when freedom of choice and trust in our parenting is available to us in so many other states, the decision to leave has begun to hinge on decisions like these.

Please consider listening.

Thank you for all you are doing to serve,

Kathy Day

To whom it may concern:

I want to join the countless other parents who object to a vaccine mandate for our kids. There are many reasons why these vaccines should be a family decision rather than a mandated requirement. I'll briefly list a few of these reasons:

- 1 The vaccines are not without severe risk. Those risks have to be weighed against the potential benefits. For kids, the data clearly says the virus risks are low for kids and they appear to be getting even lower with new viral strains.
- 2 Many kids already have natural immunity which is proving to be incredibly resilient. Adding vaccines on top of that is both unnecessary and comes with risks.
- 3 Many families have suffered from vaccine-induced illnesses including, but not limited to anaphylaxis, vaccine-induced thrombotic thrombocytopenia, myopericarditis, and Guillain-Barré syndrome. Forcing families to vaccinate their kids after seeing those symptoms is a perverse form of torture in violation of the Nuremberg Code.
- 4 Our public schools are not popular right now and private school enrollment has dramatically increased. Vaccine mandates will only further force families into alternative options like homeschooling.
- 5 The current vaccines don't solve the transmission problem as we've seen with fully vaccinated environments like cruise ships.
- 6 We don't have long-term studies of these therapies.
- 7 Data suggests transmission in schools is very low.
- 8 The decision to vaccinate should be between a family and their doctor, not a one-size-fits-all state requirement.
- 9 Milder, but contagious strains like omicron will increase natural immunity which continues to be the most resilient defense.

Thank you

--

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. There are no long term studies for safety
2. Children are at negligible risk from the virus and should not be subject to experimental procedures unless the risk is appropriate
3. There is no legal precedent for enforcing untested medical procedures.

This does not mean I do not support people being vaccinated, I am myself, but a mandate is unquestionably a poor decision especially for children who are not at an elevated risk. Given the dogmatic approach to vaccination and the censorship issues arising I believe mandating vaccines will be a decision looked back at with regret and shame if it is enforced this year. After longitudinal studies and the disease is better understood and not a politicized matter I would support a review of mandating vaccines for school admission and healthcare but at this time I am firmly against mandating them for children at the very least.

I hope the board considers this opinion and others in their decision.

Respectfully,
Lane Schinnell

Subject: COVID policy proposals in WA state

External Email

I am writing in response to the proposals you are considering implementing in WA state.

What you are suggesting is unconstitutional and criminal.

If you think that WA residents are going to stand by and allow you to RAPE our rights as citizens, you are sadly mistaken.

COVID VACCINE MANDATES are all FINANCIALLY MOTIVATED and this is nothing new to any of us who have read and understand the law and the process. And the numbers of people who are coming to understand this process clearly is growing exponentially.

Do you value your job and position and do you rely on your income?? What are you willing to sacrifice for you family and loved ones to be safe and how would you feel, if something was being proposed that you simply did not agree with but you were suddenly being FORCED to comply??

I think it is well beyond the time that you asked these questions of yourself and then look at your children and others that you care and love and figure out whether you believe it is okay for someone else to make these decisions for you.

Please reconsider because I can tell you that we know who you are and to put your fellow citizens, mothers, fathers, daughters, brothers, sisters, sons etc in such a position is CRIMINAL and it will NOT BE FORGOTTEN.

Thank you.

To whom it may concern;

I'm writing to express my firm stand AGAINST mandatory Covid-19 shots for students in WA State. Not only are children at an extremely low risk (the lowest) for contracting or spreading Covid, but that shot is still basically experimental and under EAU only. All American children have an equal right to a public education despite race, financial status or anything medical. It's the parents sole responsibility to make medical decisions for their children, not the government.

SAY NO TO MANDATORY COVID-19 SHOTS FOR DAYCARE AND STUDENTS!

Regards,
April Bakula

Subject: Covid 19 mandate

External Email

To whom it may concern,
I have been made aware that the Washington Board of Health is asking for parental input of making the Covid 19 vaccine mandated for all school age children. This is unacceptable to mandate. I want to first say I am not against vaccines; all my children are vaccinated. I am against this particular "vaccine" as it is not a vaccine. A vaccine is to protect people from getting sick from actual viral or bacterial sicknesses. The Covid shot has proven over and over again it does not actually prevent anyone from catching it or spreading it. I know people who are fully vaccinated and still caught Covid 19. In fact states and countries who have the highest vaccination of people also have the highest Covid 19 cases. There are also hundreds of thousands of reported cases from the states and around the world of children developing serious heart complications after receiving the Covid 19 shot. You do NOT have the right to play "Doctor" with my children's health or safety nor using them as Lab Rats for some sick political gain. Considering the fact that children are not the ones being seriously affected by this virus. This is about parental choice. We the parents and only the parents should have that choice for what is best for our children. This would be a gross over reach on your part and it will not be accepted. This is an attack on parental rights. I am begging you to please reconsider and NOT make this Covid 19 vaccine mandated for our children. If you do in fact care the welfare of our children please do not put them in harms way you will end up doing more harm than good. Thank you.

Subject: Covid 19 injections on immunization schedule

External Email

January 5, 2022

Dear WA State Board of Health, employees and associates and TAP:

We now know that the covid 19 injections not only do not prevent infection, transmission, hospitalization and death of covid 19, but they are also a considerable health risk. Why would anyone conceive of including such on a childhood (or any) vaccination schedule? Have you not done your due diligence in researching the data and facts around this hastily rolled out injection? To date, there is not even possibility of long term or phase 3 trials being completed. The risk of a child dying from covid 19, is less than .01 percent. This vaccine has already proven to be more dangerous to children than covid 19 itself.

It is your duty to search out these facts away from vested and conflicts of interests and learn for yourselves. Thousands of highly esteemed doctors and scientists are speaking out about what the data and science is showing and they are voicing their objections to, and abhorrence for, these forced injections. These doctors and scientists speaking facts and truth against a narrative are being censored from social and main stream media and academia. Why is that?

Are you aware of the VAERS? How many deaths from this forced injection are acceptable for you? I say not even 1 is acceptable, especially for a virus with a 99.9 + % recovery rate in children! Why won't Pfizer release all their data on these injections? Are you willing to take personal responsibility for the lives of children and adults you will maim and destroy by facilitating approval for this atrocity? Are you willing to break state and federal laws, US codes and constitutional protections to push this agenda? You will also be living in the state and country you chose to destroy personal protections from the real danger of an overreaching government in.

When presented with reality and all of the facts, the only conclusion one can reach for

anyone supporting this agenda is:

1. They are either ignorant to facts, science and truth because of censorship and personally held distorted beliefs.
2. They are mentally ill, compromised or unstable.
3. They know what they are doing and are benefiting in some degenerative way from pushing this agenda.

In any case, those will not escape this horrific machine being fed and will not be immune to the consequences of their actions and madness.

We know the vaccine industry is pushing this injection for it's own reasons. We also know, based on wording in the current law, an approval on the childhood vaccine schedule would mean securing the vaccine industry additional liability protection.

To all of you in positions of importance regarding this matter: We are watching you, and many more of us are becoming aware by the hour. All of the money on Earth will never supersede truth, you cannot stop or silence it. You will either be held accountable for your actions or you will reap untold reward. Get on the right side of history and do the right thing.

Sincerely,

The majority

I would like you to share these two videos with the Health Board, before your meeting on Wednesday January 12. I will mail you a packet in the mail you can put on public record so the public can look it up, print it out and share. These jabs should not be part of the school shot list. They are not vaccines. David Martin explains why they are not vaccines. They don't prevent COVID or from spreading it. These email of Brighteon .com videos will explain to the health board what is illegal and against our constitution. You can't say you didn't know! This email is notice, too, to put on public record.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for all of the following listed below.

The fact that we have to even have this conversation in America is absolutely crazy.

Let's start with the FACT that, per the CDC website as of today, there have been 694 deaths nationwide "involving" covid in all sexes ages 0-17 in 2020 & 2021 combined. Per the CDC, the 2019-2020 flu season had 486 deaths for that same age group. That was one year of the flu in comparison to two years of covid. In 2018 there were 372 flu deaths in that age group. Adding 2018 + 2019 together we get 858 deaths due to the flu, ages 0-17. That is 164 more than covid for a similar two-year period. One death is too many. However, we need to look at the big picture, be honest with ourselves, along with everyone else, and realize that covid is no more deadly to children than the flu. Based on the numbers above, covid is actually less lethal to children than the flu. This is not made-up information. These are facts directly from the CDC. Have we ever, even one time, shut down schools, businesses, or life as we know it, for the flu? Absolutely not. The flu has been around our entire lives and we have learned to live with it. That is the reality with covid as well. It is a virus that will probably be with us for the remainder of our lives and we can either learn to live with it or hide in our basements in fear. We are born with free will and the freedom of choice. There is no "mandate" or requirement for everyone to get the flu shot. Schools have never shut down or required kids to wear masks due to the flu. Why not? Because it is something we have to live with. We stay home when we don't feel well and take care of ourselves until we are better. Get your flu shot if you CHOOSE to do so but, just as with the covid 'vaccines', the flu shot will not stop you from getting, or transmitting, the flu.

Additionally, notice the verbiage the CDC uses for covid. The deaths counted are not "from" covid, they are "involving" covid. Even Fauci has come out this week and said the following:

"If you look at the children that are hospitalized, many of them are hospitalized WITH covid as opposed to BECAUSE of covid. And what we mean by that, if a child goes in the hospital, they automatically get tested for covid, and they are getting counted as a covid hospitalized individual. But, in fact, they may go in for a broken leg, or appendicitis, or something like that. So, it's over-counting the number of children who are 'hospitalized' WITH covid as opposed to BECAUSE of covid."

Interesting that he specifically mentions "hospitalizations" and not death. You can argue that cases are up considerably – that is what the data tells us. It is also what should be

expected when the government is pushing so hard for everyone, even those that are not sick, to get tested. Why in the world would you all but force tests on people that are perfectly healthy? Of course numbers (cases) have gone up. It has also been proven that asymptomatic people cannot spread covid. So someone that is asymptomatic gets tested and tests positive, but they are not a threat to anyone spreading it based on what we know at this time. However, the vaccinated are absolutely getting and transmitting covid to others yet you encourage more people to get the 'vaccines'? Further, why has the focus shifted from severe illness or death to cases? Because deaths have dropped dramatically and the numbers no longer support the narrative. You wouldn't be able to scare people into submission with the number of deaths, but if you tell them there are millions of 'cases' then you can continue your fear tactics and still be effective.

There also needs to be an honest conversation about two EXTREMELY important items when it comes to any conversation regarding these shots. Efficacy and risk. There is no debate that the 'vaccine' efficacy is waning, and waning considerably. If that was not the case then 'boosters' would not be needed. Do you see anyone contracting (and spreading to others) polio or measles? Of course not because those vaccines actually work. This has been proven with years and years of data and success. It is FACT that the covid 'vaccines' do not prevent someone from getting covid and they also do not prevent someone from spreading covid. So what exactly do they do? The definition of vaccine is "a substance used to stimulate the production of antibodies and provide immunity against one or several diseases..." If these 'vaccines' do not provide immunity, and we know for a fact they do not, then why are they even being called vaccines? I am sure that everyone reading this knows at least one person, if not many, that have contracted covid even though they are 'double-jabbed' and boosted. So, if the vaccines that you want to 'mandate' are so effective, then why aren't they working???

Another key piece to all of this is the risk associated with getting this 'vaccine'. It is undeniable there have been significant side effects for hundreds of thousands of people, with one of the significant side effects being death. Through December 24, 2021, VAERS has 1,859,633 reports of adverse events due to covid vaccines. Of those, there have been 21,002 covid vaccine reported deaths and 30,250 total reported deaths. This is through VAERS only. There are other studies that have been done (see the recent study published by Columbia University) that estimate vaccine-related deaths near 400,000 in the United States alone. Many will argue that information because it isn't coming from the government or mainstream media but I would consider Columbia University a very credible and reliable source of information.

There is also zero data that shows the long-term effects of these 'vaccines'. Is the state of WA, or are you personally, willing to accept full responsibility, both financially and criminally, if a child has an adverse reaction to a shot that leads to a permanent disability or death? Unless you are personally willing to put yourself, your job and your family's well-being on the line and take 100% responsibility for any and all adverse reactions a child may have from the 'vaccine', then I think you have your answer right there. Ask yourself – if these 'vaccines' are so safe, why are there so many adverse reactions? If they are so safe, why would I (you), or any elected official or branch of the government, not be willing to accept full responsibility? Even the vaccine manufacturers themselves are completely exempt from any liability. Nothing says "trust me, I am safe and effective" better than being completely exempt from any current or future liability. Your response to these questions probably give you all the answers you need. I can assure you, if you 'force-jab' my child and they have any adverse reaction – whether immediate or long term – you will wish you had never even thought of the idea of forcing this poison

on children.

The other component that it seems nobody wants to openly talk about, or address, is natural immunity. Based on all the science that we know about covid at this point, it has been determined that you cannot get covid twice. If a child has already had covid, and I can assure you that most school age children have already had it, then why in the world would we even think about subjecting them to a potentially harmful shot when they already have equal, or greater, coverage from their natural immunity?

These 'vaccines' are not a fix-all for covid. That has been scientifically and statistically proven for well over a year. Rather than take the approach that a potentially harmful shot will fix everything (which clearly has not worked) why have you not looked at many of the underlying issues that are huge contributors to covid deaths? Per the CDC, 78% of all covid patients hospitalized in the US were overweight or obese. That is a huge number – so big that I can't believe you have chosen to completely ignore this fact. How about you promote healthy lifestyles – afterall, you are the 'Board of Health'. How many lives could have been saved if you had historically taken the stance to actively improve the overall health of WA and work on decreasing obesity? Over 300,000 per year die from obesity in the United States but you continue to allow McDonalds and other companies that have zero redeeming health benefits to not only remain open but to thrive. Have you ever considered shutting them down for the health of all WA residents? Of course you haven't. That would probably be seen as ridiculous. But it is no more ridiculous than proposing an ineffective shot to a demographic (our children) that have almost no risk from covid. You will never get it to zero risk. Life doesn't work that way. For example, per the NHTSA, over 38,000 Americans die in automobile crashes per year. An additional 3 million are injured or disabled each year. Do we stop driving our cars? Nope. I am sure you yourself drive every day. There is a risk, albeit extremely small, every time we get behind the wheel of a car. Wearing a seatbelt doesn't prevent people from getting injured or dying while on the road, just as this 'vaccine' doesn't prevent people from getting, transmitting, becoming seriously ill or dying from covid (or dying from the vaccine itself). Despite seatbelt laws in WA, there were still 519 deaths from vehicle accidents in 2019. That is more people lost annually to car accidents in WA alone in one year than the number of deaths involving covid for the demographic you are proposing to force-jab (ages 0-17) in a two-year span. Why has the Board of Health not stepped in and mandated that everyone stop driving immediately due to this number of deaths??? Ridiculous, right? But that is the same logic you are using when suggesting a questionable, and potentially harmful, shot for our children.

It seems so glaringly obvious. The risks associated with these 'vaccines' FAR outweigh any potential reward, especially for school-age children. The fact that you are even contemplating this is appalling and I can promise you will be met with more resistance than you could ever fathom. What you are proposing is so mind-numbing ridiculous and completely unnecessary. What do you expect to accomplish? Poison children, potentially giving them immediate or long-term health problems, for a virus that is typically nothing more than a cold or mild flu for just about everyone in the 0-17 age group. That is undisputable FACT. The governor has said from the beginning we are "following the science". It is about time you look at the actual facts and start following the science that confirms our children are more at risk from adverse effects of the vaccine than they are from covid itself.

Thank you,

Good afternoon,

It has been brought to my attention that you are having a meeting on January 12th to discuss making the covid 19 vaccination part of the requirements to attend school. As a mother and aunt of several children, I am highly against this requirement. I am fully aware that over 55,000 children have unenrolled from public school this last year in Washington state. Trust me when I tell you it's not out of fear of the virus. The only virus that is plaguing our children is your gross overreach and indoctrination. Making it a requirement will be detrimental to the school system.

There are more studies coming out which affirm that spread between vaxxed and unvaxxed is not statistically different. They spread equally. Deaths have gone down, the vaccine is still EUA, and children are not at risk unless there are underlying issues. Those children and adults could consider a vaccine or other measures to protect themselves. It is totally unnecessary to vaccinate children with this vaccine. It should remain a free choice whether or not to vaccinate. Forcing vaccines by mandating them for entry into school or other venues does not make scientific sense.

Peak viral load is no different in vaxxed or unvaxxed according to the Lancet October 29, 2021.

Thank you for working at reducing the stigma for those with HIV. Please do not turn around and stigmatize those who choose not to vaccinate.

External Email

To Whom It May Concern,

I am writing to you today to tell you that I fully oppose the COVID 19 immunization requirement for schools in Washington state and will remove my kids if this is added to the required immunizations. This product is under Emergency Authorization use and there are no long term safety data or complete clinical trails. Please do the right thing and do NOT mandate this immunization for children.

Thank you,
Kayla McNeel

Attn: Board Members

I wish to make comments on the January 12, 2022 agenda and the immunization requirements of school-aged children. First of all, we are NOT anti-vaccinators and certainly not "group-thinkers" – WE ARE critical thinkers. So, where is the discussions on the LONG TERM effects on children and WHY are we even considering such requirement on our children, in light of the side-effects on many in this age-group? Why are we not considering natural immunity vs. immunization? The division this issue is creating among Americans is exactly what Satan has in mind. Go ahead, put the "lepers" in the back of the bus – isolate those who choose to take their health in their own hands. This is no longer a pandemic.....it is control over the people. I encourage you to think outside the box. True Leaders do not FOLLOW THE PACK they forge new paths.

Respectfully submitted,

Glenn & Carol Black

Subject: Concerned parent regarding vaccine mandate for students

External Email

Hello All,

First I want to thank you for taking the time to read my email and take into consideration my thoughts and concerns as a parent prior to handing down mandates that affect our future. I know your job is not an easy one and I thank you for taking the time to make sound decisions. I believe that the choice of if, when and how a child is to be vaccinated needs to remain between a family and their doctor. Where there is a risk of injury or death, no matter how small the perceived risk may be, there must be a choice. To mandate a medical procedure with known risks is medically unethical.

I will be blunt, I oppose any covid vaccine requirement for our school aged children, I also oppose that it is being mandated in the private sector and healthcare/responders. We have seen the effects of those mandates, our constitutional rights are being stripped. Public servants having to leave their jobs causing our roads to not be maintained, our nurses, doctors, police, fire etc. leaving causing quite the disturbance to our community. Now imagine what will happen if you require our children to have this experimental "vaccine". I can assure you that many will be pulled from the public school system including my child. The mandate violates a parent's right to informed consent: Vaccines are chemically synthesized biopharmaceuticals with known and documented side effects that include permanent injury and death. Forcing a medical procedure on a non-consenting individual that carries the risk of injury or death, no matter how small that chance may be, is medically unethical according to the American Medical Association's code of ethics, is inhumane and is a violation of our basic human right to possess autonomy over one's own body. Also with waiving our rights when getting the vaccine no one is liable for any premature injury or death.

Now more than ever we can see that the effectiveness of this so-called vaccine is plummeting, how can it be a vaccine if it does not STOP the virus? How can it be required if it doesn't work? It is nothing more than a shot, just like the flu shot that is optional and offered for those who have made personal sound decisions for their families. Also, how can we require that this drug be put into our children's bodies that has been only emergency authorized? There have been reactions, deaths and we do not know the long term effects this will have to our children or any person! Furthermore it has been shown that children are not at risk nor do they pose a significant risk to others when it comes to the Covid virus.

In conclusion, when the government makes decisions to take away parental rights relative to the health of their children it must only do so when all can agree it is in the best interests of every single child. Opinion 8.08 of the American Medical Association (AMA) states, "The physician has an ethical obligation to help the patient make choices from among the therapeutic alternatives consistent with good medical practice. Informed consent is a basic policy both in ethics and law that physicians must honor..."

This proposed vaccine mandate ignores and eliminates the fundamental American value of choice as well as a doctor's ethical obligation to provide their patients informed consent. If we are not free to make informed, voluntary decisions about which pharmaceutical products we are willing to take, then we are not free in any sense of the word. If the vaccine becomes a requirement it will set a very dangerous precedent and there will be no limit on which individual freedoms the State can remove in the name of the greater good.

For these reasons and many more, I urge you to view this mandate as inhumane and medically unethical.

Thank you,

Katrina Nugent

Subject: Comments for the Immunizations Technical Advisory Group

External Email

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are at very low risk for infection and statistically have a very strong recovery rate.

Children who are given the vaccine are at risk of injury, including evidence of lifelong heart issues, anaphylactic reactions and blood clots.

The vaccine research is limited and has not faced the rigorous testing that prior vaccines have had to undergo.

Emergency Use vaccines by law, are only given by consent. It is against the constitution to mandate vaccines that have proven harmful. See CDC Vaccine Adverse Events Reporting System of over 800,000 self reported injuries.

LAWSUITS WILL BE HOLDING LAWMAKERS ACCOUNTABLE.

Subject: Concern over WAC codes for COVID 19

External Email

Hello,

My name is Dalton, and I am emailing you my comments of concern about the possible change in codes concerning infectious disease protocol and COVID 19.

As someone who was working in a lab up until last year when I separated myself from my job to have twin girls in August, I tested for and worked with patients who were positive for Covid 19.

With a survival rate that rivals the flu, I find it extremely concerning that you are thinking of including COVID 19 in the updates to the infectious disease WAC codes. Where is the line drawn? The omicron strain has been proven time and time again as of late that it is more infectious, but much less detrimental to the health of the people.

I was a high risk twin pregnancy in 2021, and actually ended up with a COVID 19 infection shortly before having my twins at 39 weeks. I came through it with no issues DESPITE my high risk status, and currently still test positive for antibodies that I am passing on to my twins via breastfeeding.

The lines are so beyond blurred when it comes to this virus. Firing unvaccinated medical staff but allowing COVID positive vaccinated staff to come to work is ludicrous and the opposite of what the health department has been trying to do. Which is lessen this rarely problematic virus from spreading. But I digress.

It has been shown that vaccinated people are spreading and contracting this virus quite easily, so trying to detain the people if they are positive for this virus is absolute insanity.

Ebola? That can have a mortality rate of 40%-90% depending on the strain. THAT is a possibly monstrous pandemic that requires detainment. Not COVID.

Do not add COVID to the WAC codes, you would be wasting state money, resources, and would cause people to move from the state en mass. Which we all know would be detrimental to the states funding of needed construction, employees, etc.

I would end this email with "best regards", but I am seriously disappointed in how the state is going, and do not believe your department (among others) deserves that respect.

-Dalton

I am writing to urge you to stand against mandating the covid-19 vaccine for children in any capacity, but specifically to attend school.

It is clear that there are still a lot of questions about the efficacy and safety of the covid-19 vaccine in general, and clearly in children.

We are seeing evidence that transmission even when fully vaccinated does not stop the transmission of covid-19, this was exemplified in the recent cruise ship outbreaks where passengers and crew were all vaccinated.

There are no covid-19 vaccines that have been fully FDA approved available in the United States.

There is clear data showing that the covid-19 vaccines can cause harm in children, the CDC website states:

What You Need to Know

* Cases of myocarditis reported to the Vaccine Adverse Event Reporting System (VAERS)
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fvaers.hhs.gov%2Findex.html&data=04&nav=VAERS%2Findex.html>>
have occurred:

* After mRNA COVID-19 vaccination (Pfizer-BioNTech or Moderna), especially in male adolescents and young adults

* More often after the second dose

* Usually within a week of vaccination

* Most patients with myocarditis or pericarditis who received care responded well to medicine and rest and felt better quickly.

* Patients can usually return to their normal daily activities after their symptoms improve. Those who have been diagnosed with myocarditis should consult with their cardiologist (heart doctor) about return to exercise or sports. More information will be shared as it becomes available.

Both myocarditis and pericarditis have the following symptoms:

* Chest pain

- * Shortness of breath
- * Feelings of having a fast-beating, fluttering, or pounding heart

Seek medical care if you or your child have any of the specific or general symptoms of myocarditis or pericarditis especially if it's within a week after COVID-19 vaccination.

Please do not mandate these vaccines for children, let the decision be left up to families to do as they see fit for their child.

Thank you,

Alison Handsaker

To whom it may concern:

I strongly oppose making it mandatory for our children to get the covid-19 "vaccine" for many reasons. One reason in particular is that it is still an experimental drug and is only approved under the EUA. Aside from that I am very concerned about the adverse side-effects being caused by the shot. The covid-19 "vaccine" should be optional just like the influenza shot. It should not be classified as a vaccine because the covid virus mutates and we will never truly eradicate it. In turn this makes the "vaccine" not completely effective just like the flu shot is not completely effective. The current covid "vaccine" is still from the first strain so how is it even effective for the mutated strains? If our children can still get it and spread it how is the "vaccine" effective?

I want to ensure all parents have medical freedom of choice for their children. They are the innocent ones here and we should not be putting an experimental drug into our kids. I DO NOT CONSENT.

Sincerely,

Amber Smelser

Subject: Covid Vaccine in Schools

External Email

Good Evening,

My name is Connor Paysse and I along with my wife are concerned parents regarding the potential to make the Covid 19 vaccine mandatory for our children. As a father of two (2.5 years and 8 months) I have some very strong concerns with making this vaccine required in schools for our children.

Covid-19 as shown in studies has little to no effect on children. In most cases they are shown to not even transmit the virus. With the vaccine being such a rushed option in fighting this "pandemic" I do not believe we need to be injecting our children with an experimental vaccine which is exactly what this is.

There have been numerous documented side effects in young people regarding this vaccine. While it does not seem to effect the elderly in the same way, the younger generation is having a lot more issues. I will not sit back and watch my children become a lab rat for an experimental vaccine.

I strongly oppose this requirement and urge you to reconsider and vote no to this becoming mandatory for schools. I can tell you right now if it is mandatory my children will not be attending public school and will be going to a private school. I know many parents who feel the same way. I went through the public school system and have turned out just fine but where you're wanting to take this now is the line I will draw in the sand and stand up for all children and say no. Do not make the vaccine a requirement for school.

Thank you for your time.

Connor Paysse

Subject: Re: Covid Vaccine Requirement

External Email

Attention Board of Health,

I will start by saying that I am a young mother of 4 children with many friends with other school aged kids. To think that there would be a possibility that my children would be required by the Board of Health to get a vaccine in order to participate in their education is completely preposterous and very disturbing. Education should be accessible to all children and families even those families that cannot be vaccinated or simply choose not to be vaccinated. Vaccination status should not be a topic of discussion. Vaccinations should be a private and personal decision between a doctor and a patient.

I absolutely, 100 percent am against forced vaccinations. Please for the love of all of the children, do NOT allow this to happen.

Regards,
Catherine Hunt

Subject: Covid Vaccine Mandates

External Email

Dear Washington Board of Health,

I am writing because I am very concerned about the vaccine mandate that is being proposed in order for children to attend school.

Children are NOT at high risk for Covid-19. There ARE risks associated with vaccination. Where there is risk there must be choice. Are you truly considering segregating and denying a public education to those practicing bodily autonomy?

Schools would be in violation of 21 US Code, 360bbb-3 which states "No EMERGENCY AUTHORIZED MEDICAL PRODUCT CAN BE MANDATED." Section e 1 A ii III gives me and my family "the option to accept or refuse administration of the product." This includes masks, the PCR test and the Covid vaccine for children which are all Emergency Authorized.

Regardless of authorization:

Help me understand how we can teach children that their "No" should be respected when we force medical products on them?

Help me understand how it is not discrimination to refuse a public education to a child based on the fact that they are choosing not to inject an experimental medical product?

Help me understand how an institution the Washington Board of Health that dedicates itself to diversity, inclusion and belonging (as implied in your nondiscrimination policy) would turn a child away from school?

You are overstepping your bounds when you step in to tell families that they are not able to make these decisions for themselves. Coercing children to be jabbed for an education is criminal.

Sincerely,

Celina Green

A WA state citizen who WILL fight when you come after my children & a mother who has a child injured by childhood vaccines.

Subject: Covid 19 as part of school immunization WAC 246

External Email

As a parent I'm deeply concerned, disturbed and horrified that anyone would consider mandating the covid vaccine for any living being especially children. This injection has caused more harm and DEATH than all other vaccines combined over the past 30 years. Children have strong immune systems and do NOT need this vaccine. They have a 99.9% chance of survival.

The latest news out is from an insurance company stating there's a 40% increase in deaths from ages 18 to 64. Hint, it's not the virus. The vaccine does not work. 80% of new covid cases are in the vaccinated. Just look at studies and reports from Vermont, Denmark, Israel and other places around the world.

What are you thinking? Who is paying you? May any child or person injured by this haunt you forever. God will judge you in the end.

Children are at extremely low risk for Covid and that the vaccines are still only EUA (emergency use authorization).

There's many articles and studies if you just look. Dr McCullough has been outspoken regarding the issue of myocarditis in youths. Maybe you should listen to one of the most published cardiologists in the world. I believe he is more intelligent than any of you. Do what is morally and ethically right, NO MANDATES.

Sincerely
D. StLawrence

I am appalled that you would consider requiring an untested and unproven shot to be given to the children of Washington State! Children are reported to be getting myocarditis and suffering from other issues worse than contracting the actual sickness! Yet, I think you know this and that is why you all waived the REQUIRED 30 day comment period before making changes. There is no emergency! Children have no need to get this experimental shot. What you are doing is wrong on so many levels! I, for one, will hold you people personally responsible for the health problems that develop as a result of this sneaky and foolish policy change! Bring on the Nuremberg style tribunals!

Hello,

I am writing to inform you that I do NOT support COVID-19 shot mandates for any one. Please put a stop to medical apartheid. This means I oppose the Board's formation of a Technical Advisory Group to review information about mandating COVID shots. This is unconstitutional and a threat to our democracy, freedom and health. Please do not consider these dangerous mandates.

I also SUPPORT Informed Choice Washingtons Petition for Rulemaking, item 11 on the agenda.

Please stand up for democracy, freedom, critical thinking and our constitution.

Dear Advisory Board for the Washington State Board of Health:

I am writing to protest against recommending a vaccine for Covid for school aged children who attend school in Washington State. I am a 36-year veteran teacher. I am against imposing this vaccine on our children. I believe this to be a horrible abuse of power.

The available Covid vaccines are still of an experimental nature and have not been tested to prove their value and lack of long-term consequences. Never have we been forced to inject our children with a vaccine that has not undergone years of safety trials. Never have we forced children to receive a vaccine for a disease that primarily poses a risk for adults with comorbidities or are elderly.

School aged children have a 99.9998% survival rate from Covid. The vaccines do not provide protection against getting Covid as is seen by the number of "breakthrough" cases of those already vaccinated and boosted. Why require it?

The vaccines currently available are still only EUAs. Congress permitted the FDA to grant Experimental Use Authorization (EUAs) so that any American in a personal emergency can choose whether to explore potentially lifesaving treatments that have not gone through the full testing regime. In other words, the legal basis for EUAs is a matter of the individual right to access experimental treatments, not of government right to compel such treatments.

It is irresponsible to impose covid vaccines on children when there are side effects as grave as myocarditis already being reported and no long-term tests have been done. Parents must be able to make this decision for their children. You must honor their right

to choose what is best. You must not marginalize parents' rights to take care of their children.

I live in Spokane, and I believe my side of the state is certainly underrepresented on this panel. Please look long and hard at what long term consequences of this kind of recommendation could have on our children, our school system and our communities.

Sincerely,

Barbara Miller

This was sent to us from one of our members, after she received the email sent earlier today "Time Sensitive: Speak Out". Selina gave me permission to share this with you.

Leslie

Just filled it out. My father in law is a medical doctor in Berlin, who vaccinates his immunocompromised patients. He highly recommends against getting the vaccine for his grandchildren. The actual study the FDA used to approve this is for an older age group, a group that has hit puberty. In the younger children, they do not have the heart protecting estrogen, and the girls will be shown to have as many heart issues as the boys. It is also showing in Germany... Through autopsy, the heart inflammation from the vaccine is actually an autoimmune disease of the heart. Very scary. The rest of the world is watching and waiting as we inject our children with this, so they have real statistics to make informed decisions.

Yours, Selina Shearer

Subject: Covid Vaccine Requirement for kids

External Email

Dear Mr. Thai,

I am writing to voice my concern regarding the consideration of covid vaccine requirements for school-aged children beginning next Fall.

Our four children span elementary to high school. They have all had covid, and thankfully, all had mild symptoms and recovered quickly with no long-haul symptoms. We are aware and acknowledge that some children are not as fortunate and that MISC is a risk factor for infection.

Having worked as an inpatient physical therapist at Seattle Children's Hospital, I recall young patients coming onto my unit who suffered similar complications (MISC, others with Guillan-Barre syndrome) that resulted from initial infection with flu or other illness. These were always regarded as RARE and unfortunate effects of otherwise non-life threatening viruses. Not once did I ever hear suggestion among medical or social work staff for a blanket requirement to flu vaccine as a solution. In fact, some of my patients who came in with Guillan Barre syndrome had received the flu vaccine that same year.

While mainstream media and CDC continues to promote covid vaccines and boosters, their efforts cannot negate tens of thousands of parents' personal experiences and direct word-of-mouth testimonies that covid is, for the vast majority of school-aged children, NOT a life-threatening illness, and NOT a significant, measurable, traceable cause of severe spread or threat to the larger community.

It is destructive to our state and tone-deaf to think that parents who do not want the vaccine for their children will reverse course simply because it's required or recommended. As time goes on, studies continue to show actual risk to children associated with the vaccine. A primary argument from health officials is that these risks are also associated with covid; however, they refuse to acknowledge that millions of children have HAD covid and did not experience any lasting or dangerous side effects or complications, and that any subsequent infection from a virus almost always results in milder symptoms.

Attempting to require the covid vaccine for school entry in the fall WILL result in a mass exodus of students from our state's schools. Increased requirements to crack down on homeschooling or private school communities WILL result in a mass exodus of families and citizens from our state period.

We, born and raised here, have always had a strong desire to raise our kids in this beautiful place, but when freedom of choice and trust in our parenting is available to us in so many other states, the decision to leave has begun to hinge on decisions like these.

Please consider listening.

Thank you for all you are doing to serve,

Kathy Day

Subject: Comments for the Immunizations Technical Advisory Group

External Email

Please accept this as my absolute opposition to making COVID-19 shots mandatory for children for school admission or for childcare in WA State.

There is ample evidence to support that we should hesitate, and not be rushing, to expose children to unnecessary medical treatments / pharmaceuticals because it is already well-known and established:

- * Children are at extremely low risk for Covid
- * The "vaccines" are only EUA (emergency use authorized)
- * There are no long-term studies to document any history of safety
- * Studies do now document that "vaccinated" and normal people can both transmit coronavirus, and
- * The "vaccine" does not stop the spread of the disease

Therefore, please postpone, delay and/or wait, to impose any requirement for any mandatory shots on children until appropriate long-term studies are completed, and effects can be studied. It is entirely inappropriate to utilize citizens' funds and resources to impose this type of medical treatment on vulnerable children for school and childcare, and against their parents/guardians wishes. Leave this decision up to parents/guardians where it belongs.

Thank you.

Subject: Covid 19 Vaccine Mandates

External Email

To the Washington State Board of Health,

I strongly oppose mandating the Covid 19 vaccine for our children. . Please do not use your position of authority on our most vulnerable, our children. They are young and have strong immune systems that shouldn't be compromised through a vaccine that is still under an emergency use authorization. We don't know the repercussions of this vaccine on our youth; Covid has impacted them in ways that can't be fixed by a vaccine (lockdowns, virtual learning, masks, have all caused loneliness and depression). This is an extreme overreach!

Please protect them from this vaccine and don't make this a mandate.

Respectfully,

Valerie Gentzler

Hello,

In regards to your upcoming meeting on January 12, 2022, I would like to comment on agenda #11 regarding immunization and children. I am deeply opposed to making COVID vaccinations a requirement with school-aged children and do not support this measure. Not only does COVID pose a zero-to-low risk for children, but the vaccine testing data are starting to show moderate to significant risk to some children. I believe it would be unethical and irresponsible to mandate COVID vaccinations of children.

Please do not endanger our vulnerable next generation.

Thank you for your time,

Lisa Eastman

External Email

Good afternoon,

It has been brought to my attention that you are having a meeting on January 12th to discuss making the covid 19 vaccination part of the requirements to attend school. As a mother and aunt of several children, I am highly against this requirement. I am fully aware that over 55,000 children have unenrolled from public school this last year in Washington state. Trust me when I tell you it's not out of fear of the virus. The only virus that is plaguing our children is your gross overreach and indoctrination. Making it a requirement will be detrimental to the school system.

Subject: Covid Vaccine for children

External Email

To Whom it may concern;

I am a constituent, community member and resident of Washington State and have three children in the public school system. I am writing to let you know that I DO NOT agree that children should be required to have the Covid vaccine in order to attend school. I implore the Washington State Board of Health to reject any such mandates and/or requirements. Due to the following reason:

1. Covid Vaccines remain under Emergency Use Authorization(EUA), the FDA is amending the EUA to include children - Coronavirus (COVID-19) Update: FDA Takes Multiple Actions to Expand Use of Pfizer-BioNTech COVID-19 Vaccine | FDA
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fnews-events%2Fpress-announcements%2Fcoronavirus-covid-19-update-fda-takes-multiple-actions-expand-use-pfizer-biontech-covid-19-vaccine&data=04%7C01%7CNathaniel.Thai%40sboh.wa.gov%7Cf66994ac33044ceaa1f908d9d14bc9c7%7>>

2. Children under the age of 18 have a survival rate of 99.995% from Covid infection

3. Children have a higher chance of death or adverse reaction to the Covid vaccine than Covid-19

If a vaccine mandate is forced upon children attending tax funded public schools, it will leave me no choice but to pull my children from school and home school. It's heartbreaking to even have to think like this. My children love school but with the side effects this drug has on children and the lack of knowledge on the long-term effects, I do not feel the vaccine is safe for my family. I thought we lived in the country of the free but all these mandates that are being imposed on the people makes it feel much more like a dictatorship. Washington State has been under a state of emergency for the last two years. The mandates are unconstitutional, we the people have had enough. If the vaccine is so great and it's what we must do to protect the people, why are our elected officials exempt from Biden's Vaccine Mandate? Why is the postal service exempt? The needs of the few should not outweigh the needs and wants of the many. What about natural immunity, why is that not being taken into consideration? I am concerned, just as you should be, that the vaccine doesn't even work. As many vaccinated people I know are now getting sick with the latest variant. People that are considered "fully vaccinated" plus have the booster shot are getting sick, clearly the vaccine is not the answer. Judges across the country are ruling that the mandates are unconstitutional and I truly hope that you make the right decision when deciding if the Covid Vaccine should be forced upon our children, the future of the world.

Kindly,

Richard Duncan

a majority of unvaccinated infections without symptoms go unreported, and because the COVID-19 infections have become more virulent and less deadly as time goes on – as happens with all respiratory viruses. The measurement errors in these studies haven't even been identified, much less quantified.

The deaths associated with COVID-19 have followed Farr's Law

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.trillianthealth.com%2Finsight-law-its->

[happening&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C7a400bf6a5054c62d3b208d9d1715d97%7C11](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.trillianthealth.com%2Finsight-law-its-happening&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C7a400bf6a5054c62d3b208d9d1715d97%7C11)

(3) no matter where the analysis has been applied. States with vaccine, mask and social gathering mandates have shown no deviation from Farr's Law compared to states with no such mandates. The vaccine and preventive measure mandates are ineffective with regards to COVID-19 outcomes and are deleterious to the physical and mental health of citizens in many other ways that have yet to be studied or quantified.

The vaccine should not be considered a primary treatment for COVID-19. COVID-19 has adequate and effective active and prophylactic treatments which negate the need for vaccines. The National Library of Medicine

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fpubmed.ncbi.nlm.nih.gov%2F332>

(4) reports that vitamin D insufficiency may account for almost nine of ten COVID-19 deaths. It has been known for decades that anyone living north of the 35th Parallel suffers from some level of vitamin D deficiency. This is most severe in winter months where there's little sunlight, and among dark-skinned ethnic groups, who produce less vitamin D in response to light stimulus. Instead of enacting a dangerous and untested vaccine requirement for schoolchildren, it would be cheaper, safer, and more effective to ensure that each child was administered 10,000 units of Vitamin D orally at the beginning of each school day.

For the clinically ill COVID patient, safe and effective treatments are available. Many doctors have reported excellent outcomes with critical patients who have been administered Hydroxychloroquine or Ivermectin. The government and CDC propaganda discouraging these treatments borders on criminal, and is indicative that the pharmaceutical industry is spending huge amounts of money to push the vaccine narrative:

1) Hydroxychloroquine is a well-known and well-understood anti-malarial drug. It's not dangerous when administered or prescribed under a doctor's care. In countries where malaria is endemic, it's been sold as an over-the-counter preventive medication for decades. Preliminary studies show it has been effective in reducing or eliminating COVID-19 symptoms, yet doctors risk losing their medical license for prescribing a safe and potentially effective drug.

2) Ivermectin won the Nobel Prize for Medicine in 2015, hailed as a wonder drug, with many applications. It, too, is safe when administered or prescribed under a doctor's care and has been shown to be effective when treating COVID-19 patients. To withhold this drug from a critically ill COVID-19 victim is medical malpractice forced on our doctors by a government that cares more about the profits of deep-pocket pharmaceuticals than about the health of Americans.

3) There is no medical precedent for prohibiting doctors from prescribing Hydroxychloroquine or Ivermectin. Off-label drug prescriptions are a common medical practice and may account for as much as 21% of overall use for 160 commonly prescribed drugs in the United States, and more than 99% of prescriptions for some drugs like quinine sulfate (99.5% of total prescriptions), followed by gabapentin (99.2%), and clonazepam (96.2%) (Radley DC, et al. Off-label prescribing among office-based physicians. Arch Intern Med 2006;166:1021-1026.). The prosecution – nay, persecution – of doctors for prescribing Hydroxychloroquine or Ivermectin to COVID-19 patients borders on the criminal.

Authorizing the use of law enforcement to involuntarily enforce vaccination and quarantine mandates is totalitarian, prejudicial, and un-American. It specifically targets and makes second-class citizens of typically conservative and liberty-minded citizens who have a well-earned distrust of government and who are known to vote in opposition to the government in Olympia. This authorization will effectively criminalize the very American act of disagreeing with the government. This demographic has been pushed hard in recent years, and some may consider this to be a hill they're willing to die on. Passing such an authorization may lead to violence and unnecessary criminal prosecutions for a made-up crime. It will certainly lead to an exodus of citizens from Washington State to states where tyranny is not the rule of the day.

The fact that such an action is even being considered is very disturbing. This is not the Washington I grew up in and love. These measures – and all the unnecessary measures taken by the Washington State government to date – have had and will have no effect on the progression of the disease among the population, will not save lives, and will continue to unnecessarily disrupt our society for years to come. The sad fact that all citizens need to come to terms with is that the government cannot and never could protect them, that it's the individual's responsibility to take whatever measures that person deems prudent to protect themselves.

Yours respectfully,

Sean Emerson

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. Children are not high risk
2. My kids have had covid and recovered with only mild symptoms, as have I...twice
3. I know several people who have been double to quadruple jabbed who caught covid despite
4. I know of 2 people within my corporate circle who died from the vaccine
5. I know several people who have micro clotting in their lungs from the vaccine and were infected with covid despite being vaccinated.
6. It is unconstitutional
7. The proper research of side effects has not been nor will be completed until 2025 or later
8. This is an endemic disease that will mutate over and over and the vaccine's efficacy will decrease.
9. The vaccine's efficacy has already proved to be terrible. I know from real life experiences not just the hundreds of studies that have shown this to be true.
10. The way the vaccine is made and substances it is made with go against my religious beliefs
11. I suspect big pharma, big government and big money to be behind the mandates
12. We have natural immunity which many studies have shown to be superior to vaccine based immunity. Vaccines only attack the spike protein where as T cells and B cells remember the entire virus. Therefore, the risk of vaccine side effects are higher than the effects of any future infection.
13. The lockdowns have not worked, masks have not worked, the vaccines have not worked, and therapeutics that DO work have been suppressed by big pharma and the government.
14. If WA State decides to mandate children being vaccinated for the education we have already paid for, we will have no choice but to leave. We are business owners and do not wish to take our business elsewhere but will if these unlawful mandates are implemented

Subject: Covid Vaccine Mandates for School Age Children

External Email

I understand you will be having a meeting and making a decision regarding Covid vaccine mandates for school age children.

Statistics have shown that children have virtually no risk from Covid 19. While the Covid 19 vaccine is still in the trial phase until 2023, openvaers.com

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fopenvaers.com%2F&data=04%7C>>
has had thousands of deaths reported (presumed to be a very low number), and many more severe injuries. Myocarditis and heart related complications have been widely reported, and the younger population are at a greater risk of these complications.

As per the CDC, the Covid vaccine does not prevent infection, nor does it prevent the spread of the disease. Given the low risk to children, it seems reckless to make this a mandatory vaccine as a requirement to attend public school. I am concerned also, as I believe mandating this would cause a huge backlash of parents pulling their children from the school, causing a huge financial crisis for districts all over the state.

I urge you to vote NO. Thank you for your time.

Please oppose or put a halt to this requirement for students that attend public schools. This is such a new vaccine that have limited time on their safety data that we have no clue what the long terms affects are and should not be using our children as an experiment. The science has been constantly changing and I'm not comfortable as well as other parents to putting this into our children. We should have a choice with what happens to our children and it is not up to the government to decide what we or our children do with our bodies. Why is " my body my choice" only allowed in certain situations but not what happens with ourselves or our children. Please take a look at a parents perspective on this. This is so important that we halt this and take time to think clearly on something that could later on be harmful to our children no matter what the government is pushing on us. We've already been doing what we were told we needed to do to stay safe and that's as force our children to mask 8+ hours a day. Now what? Do the masks not work because covid is still around and even though 78% of Washington is fully vaxxed covid is still here and affects vaccinated. This will never end vaccination or no vaccination. Please give us a choice.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. The kids are at low risk.
2. We don't know long term side effects of this emergency use only experimental vaccine.
3. It's against my personal religious belief.
4. It should be the physician and parents' decision, not the state.
5. In the past, our state has had waivers available for parents to sign for no vaccine.
6. I thought this was a free country.

Thanks.

Subject: Covid Vaccine Mandate

External Email

Hello,

I hope this email finds you all healthy and well. I am emailing you today in regards to some information that you may all be talking about mandating the covid vaccine(if you call it that) for school attendance for the 22/23 school year. I am 100% against a mandate for a vaccine that is not working for our general public. I am not an anti-vaxxer, however this is not a vaccine. Through science we have discovered that the vaccine does not prevent transmission nor does it protect you from getting covid. Please do not use our children as an experiment.

Thank you for your time and consideration in this manner,

Autumn Christian

The covid vaccine should absolutely not be mandatory for our children. Children are very low risk for the virus. And the vaccine is still in emergency use for them. I do not want my children to be part of this experiment. There are statistics that show this vaccine can cause more harm than good for our children. There is also no understanding of the damage this could do to them in the future.
Please hear us.

Subject: Covid vaccine requirement for schools

External Email

Dear Washington State Board of Health,

I am writing to voice my concern regarding the consideration of covid vaccine requirements for school-aged children beginning next Fall.

Our four children span elementary to high school. They have all had covid, and thankfully, all had mild symptoms and recovered quickly with no long-haul symptoms. We are aware and acknowledge that some children are not as fortunate and that MISC is a risk factor for infection.

Having worked as an inpatient physical therapist at Seattle Children's Hospital, I recall young patients coming onto my unit who suffered similar complications (MISC, others with Guillan-Barre syndrome) that resulted from initial infection with flu or other illness. These were always regarded as RARE and unfortunate effects of otherwise non-life threatening viruses. Not once did I ever hear suggestion among medical or social work staff for a blanket requirement to flu vaccine as a solution. In fact, some of my patients who came in with Guillan Barre syndrome had received the flu vaccine that same year.

While mainstream media and CDC continues to promote covid vaccines and boosters, their efforts cannot negate tens of thousands of parents' personal experiences and direct word-of-mouth testimonies that covid is, for the vast majority of school-aged children, NOT a life-threatening illness, and NOT a significant, measurable, traceable cause of severe spread or threat to the larger community.

It is destructive to our state and tone-deaf to think that parents who do not want the vaccine for their children will reverse course simply because it's required or recommended. As time goes on, studies continue to show actual risk to children associated with the vaccine. A primary argument from health officials is that these risks are also associated with covid; however, they refuse to acknowledge that millions of children have HAD covid and did not experience any lasting or dangerous side effects or complications, and that any subsequent infection from a virus almost always results in milder symptoms.

Attempting to require the covid vaccine for school entry in the fall WILL result in a mass exodus of students from our state's schools. Increased requirements to crack down on homeschooling or private school communities WILL result in a mass exodus of families and citizens from our state period.

We, born and raised here, have always had a strong desire to raise our kids in this beautiful place, but when freedom of choice and trust in our parenting is available to us in so many other states, the decision to leave has begun to hinge on decisions like these.

Please consider listening.

Thank you for all you are doing to serve,

Kathy Day

External Email

Dear Members of the Washington State Board of Health,

I am writing in regards to your upcoming meeting on January 12 and the proposed policies that you will be discussing.

The proposed policies are as follows:

1. Allow local health officers to use law enforcement to force an emergency order to involuntarily detain a person or group of persons to be isolated in a quarantine facility following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination.
2. Include the Covid-19 injections as part of school immunization requirements.

Proposal 1 is extremely concerning on almost every level. We live in a country that has always encouraged and valued informed medical consent. It is imperative that people are given all pertinent information and still allowed to have choice in their medical decisions. The "vaccine" does not prevent one from catching or spreading the virus; and therefore, there should be absolutely no discussion about forced vaccinations.

In addition to mandating vaccines, forced quarantine goes even farther in the removal of a person's constitutionally protected freedoms. It is disturbing that the board is even considering something so heavy-handed. The last time people were rounded up for being "medically dirty" was in Nazi Germany. Have you learned nothing from history?

There is plenty of data that confirms Covid is mostly survivable, unless one has multiple comorbidities. Forcing quarantine and medical compliance on anyone is draconian and the very opposite of free. In addition, all of the mandates – masking, quarantine, etc. – have been highly unsuccessful. The definition of insanity is continuing to do the same thing over and over while expecting different results. Every single person (and there are a lot) that I know with Covid right now are fully vaxxed and some are boosted. While you may be able to twist the data to meet your agenda, most people see or are starting to see through it. Perhaps instead of forced quarantine for Covid, you should be encouraging obese people to lose weight, or eat less sugar, or push vitamins and an

active lifestyle. None of your current guidance stresses any of these important measures. There also has been no acknowledgement of natural immunity, as there are dozens of studies that have shown its effectiveness and importance in ending Covid.

Although unrelated to Proposal 1, I would like to also point out your reluctance to allow early treatment for Covid. There are several proven and effective treatments that have been used worldwide, including Ivermectin, Hydroxychloriquine, antibiotics, and steroids, yet your board has basically prohibited doctors from using a combined and effective approach by intimidation and threatening their medical careers. It is incredibly disturbing. The data is there. The research is there. Yet you still will not allow doctors to help people.

As a continuance of my thoughts on Proposal 1, Proposal 2 is equally disturbing and draconian. Children have basically a statistical chance of ZERO of dying from Covid and a very low risk of even being hospitalized. Those children who have died have had severe comorbidities. Trying to force a shot with a lot of known side effects (pericarditis, myocarditis, menstrual issues, seizures, strokes, blood clots, etc.) on a population that has no risk is irresponsible at best and criminal at worst. Adults have been given the opportunity to "protect" themselves with the vaccine. It is not the job of children to protect the vulnerable. In fact, that is your job (if you would allow effective treatment).

If you institute the mandatory vaccinations into schools, parents will continue to remove their children. In fact, the data shows that the most underprivileged kids will be affected the most. Minorities and immigrants are historically vaccine hesitant for good reason. The mental health of all children has already been challenged enough. Kids are being abused, kids are starving, and kids are sliding academically. This proposal would simply ruin the future of our country.

Please do not take these decisions lightly, as they have great ramifications. You have already done enough to ruin and divide our state. Do not ruin our children, too.

Sincerely,

Brynn Ward

Subject: Covid vaccine requirements in children

External Email

To whom this may concern,

Upon hearing the Washington State Board of Health's consideration of the addition of the Covid vaccination to school aged children's requirement to attend school, I must protest this idea wholeheartedly. This vaccine is, in fact, still in the experimental phase, and the ingredients of said vaccine are not made public knowledge. I am strongly opposed to administering an experimental vaccine into our most vulnerable members of society. We don't have the information about ingredients OR thorough studies of the effects of the vaccine on people, including children.

In addition to the untested and unknown ingredients to this vaccine, you are trying to vaccinate children against a virus that has LESS than a 1% mortality rate in adults, and an even smaller mortality rate in children.

These two points combined make a required vaccination both irresponsible and downright dangerous to impose on our children.

In addition, I strongly support Informed Choice Washington's petition to prohibit the addition of Emergency Use Authorization products or any product that lacks completed phase 3 trials to the required school list.

Thank you for taking the time to read this and I strongly urge you to take my words, and the words of others into heavy consideration.

I am very alarmed that this item is being considered in our state. Covid shots are medical experiments and non-FDA approved. As such, the Nuremburg Code written after WWII atrocities protects citizens from being coerced to participate in medical experiments or to receive medical treatment against their will, including medical testing with a swab that enters a sensitive cavity near the brain.

That "quarantine facilities" are being prepared for citizens who are unwilling to participate in this experiment is again, alarming. Detaining citizens who refuse this medical experiment goes against Nuremburg and Amendment IV of the US Constitution, which prohibits unlawful search and seizure. As you are aware, the US Constitution and Nuremburg Code supercede any unconstitutional state law that may be enacted. I suspect any legislator willing to sign this egregious violation of human rights into law will be held accountable for the harm that comes from it.

I am writing to urge you to stand against mandating the covid-19 vaccine for children in any capacity, but specifically to attend school.

It is clear that there are still a lot of questions about the efficacy and safety of the covid-19 vaccine in general, and clearly in children.

We are seeing evidence that transmission even when fully vaccinated does not stop the transmission of covid-19, this was exemplified in the recent cruise ship outbreaks where passengers and crew were all vaccinated.

There are no covid-19 vaccines that have been fully FDA approved available in the United States.

There is clear data showing that the covid-19 vaccines can cause harm in children, the CDC website states:

What You Need to Know

* Cases of myocarditis reported to the Vaccine Adverse Event Reporting System (VAERS)external icon
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fvaers.hhs.gov%2Findex.html&data=...>>
have occurred:

* After mRNA COVID-19 vaccination (Pfizer-BioNTech or Moderna), especially in male adolescents and young adults

* More often after the second dose

* Usually within a week of vaccination

* Most patients with myocarditis or pericarditis who received care responded well to medicine and rest and felt better quickly.

* Patients can usually return to their normal daily activities after their symptoms improve. Those who have been diagnosed with myocarditis should consult with their cardiologist (heart doctor) about return to exercise or sports. More information will be shared as it becomes available.

Both myocarditis and pericarditis have the following symptoms:

* Chest pain

- * Shortness of breath
- * Feelings of having a fast-beating, fluttering, or pounding heart

Seek medical care if you or your child have any of the specific or general symptoms of myocarditis or pericarditis especially if it's within a week after COVID-19 vaccination.

Please do not mandate these vaccines for children, let the decision be left up to families to do as they see fit for their child.

Thank you,

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

These vaccines have shown not to be effective against the various strains not to mention the adverse side effects. This is a clear violation of our Constitutional rights and these so-called vaccines are EUA only. Our children are not the ones dying from this CCP created pandemic. How many vaccines, endless booster shots are going to be needed, (Obviously they do not work period). Herd immunity is showing to be far more effective along with other medical drugs already approved years ago. But of course your corrupt WSBOH is blind and closed to the truth. I think there needs to be Nuremberg trials over the actions of Health Boards, Dr Fauci, WHO, and others over outright lies, cover ups and the misinformation put on the public.

I am writing to you today to personally stated my opposition to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- 1). The current shots being administered for the Covid 19 virus are experimental and are authorized for emergency use without proper and adequate long term effect an use evaluation. From adverse effects data compiled through VEARS, permanent damage as well as deaths occurring directly after using the experimental drugs should give rise to immediate caution and/or immediate curtailment of these experimental drugs on children as well as all age groups.
- 2). Children are the lowest risk group of all ages.
- 3). It is being bourne out that the Covid 19 "vaccines" are not preventing the person who has received the initial shot or subsequent "booster" shots from getting the virus or from transmitting it to others. These shots do very little when you evaluate the risk value against the risk of even one permanent long term disability or death of a child.
- 4). This mandate would take away the parents right to self determination regarding its family health. Any mandate forcing anyone to take experimental drugs is a crime against the individual and society.

Please, at all costs, personal and professionally, do not consider further making these experimental shots required for children or for any of the citizens of Washington. The unknown long term health consequences is not worth the risk to our children's future, which is our future also. Please strongly oppose any consideration for supporting any mandate for vaccine shots for Covid 19, it variants or for any other inoculations.

Respectfully,

Ken Rowan
Father of 7 and grand father of 15

I oppose the the proposed Covid policies that are unconstitutional. I stand against these proposed WAC's:
WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 245-105.

Here are just some of the reasons why:

Children are at extremely low risk for Covid
The vaccines are still only EUA (emergency use authorized)
There are no long-term studies to document any history of safety
Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
The vaccine apparently does not stop the spread of the disease

Subject: Comments for the Immunizations Technical Advisory Group

External Email

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

I am a WA State public school teacher, currently teaching at far, far over the recommended number of students recommended to keep safe social distance. I should be at 17 max students but somehow I have 26. I have been at or above this number all year, despite pleading with my union, principal and district. I also lost my brother, a chief engineer on one of the WA State Ferry boats, to "Covid pneumonia" in late September.

Though I believe adults, teens and children should have the option to get any vaccination they choose, government specifically does not have the legal right to force vaccinations. This is because it violates the Nuremberg Code, which specifically states that you must have the informed consent of person who will be vaccinated without fear or coercion. To hold a person's livelihood or, in this case, education hostage unless they inject something into their bodies that they don't want, no matter how well-intentioned, is coercion. Everyone who goes along with this is violating the same code that was used to determine which Nazi officers were guilty of performing unnecessary, cruel experiments on unwilling Jewish patients following WWII. Many of these officers were eventually tried and put to death for these crimes against humanity. The "I was just following orders" defense was ruled against as a valid legal argument because officers also have a duty to not follow orders they know to be wrong.

Additionally, the current studies from Pfizer show "fully vaccinated" people have only 30% protection from Omicron. Even when boosted, these studies show protection tops out at only 48%. So even best case scenario, you still have a better than 50/50 shot at getting infected with Omicron variant when exposed.

Furthermore, children are at incredibly low risk of hospitalization or death. To date, no children have yet died of Omicron. Yet, in the Pfizer trial on children, one of the 1200 young people had a terrible reaction which has left her wheelchair-bound for life and almost killed her. Her name is Maddie De Garay and she was 12. She must be tube-fed as well, for the rest of her life! Pfizer lied about this to the FDA, reporting that one person had a "stomach ache", in order to get their Emergency Use Authorization approved. If one child out of every 1,200 has a reaction like this, then of the current 1,051,694 WA State students, we should expect to see around 877 students dead or maimed for life. All of this to prevent a variant which has killed just one person in the entire United States (a man from Texas). Does this make any logical sense to you?

Worse, the more we vaccinate into the face of a new variant, the more it will continue to mutate to escape the vaccine. Omicron exists because of this. We put mutational pressure on the Alpha and Delta variants and this drove a new variant that current vaccines only slightly work against. This same scientific phenomenon can be seen with insects developing immunity to insecticide. If you spray a field with 10,000 bugs in it, you'll kill 99,900. But the 100 who live will pass on their resistance to the insecticide to their offspring and within one or two generations the insecticide no longer works at all.

Viruses mutate far faster than DNA because they are made of RNA. There is

approximately one mutation every 10,000 replications with RNA. When multiplied by the billions of people who have gotten Covid, and the millions of copies of the virus inside each person, this will ostensibly give rise to variants and the ones which will survive will be those that can spread faster, infect more people, and avoid the epithelial attachment points and avoid detection by the body's antibodies which were taught by the old Pfizer, Moderna and J&J vaccines. Omicron no longer "looks like" what the body's antibodies are trained to look for when injected with the vaccines from the original strain. It's like having a picture of a bad guy posted by your front door. But the picture is two years old and the bad guy who ends up knocking at the door looks totally different. This leads the body to not be able to mount as effective of an immune response compared to if the body had been allowed to fight it without ever having been injected.

Simply put, the more we vaccinate people with these two-year old vaccines, the more we are putting mutational pressure on Omicron to morph into yet another version which our current vaccines will not be able to fight at all.

And even if a new vaccine came out that gave 95% protection against Omicron, by the time it was injected, the five percent that have breakthrough cases would be end up fueling the next major variant and that vaccine would cease to work. We cannot keep vaccinating the entire world every six months. We haven't even vaccinated half the world in the last year and by the time everyone is, the virus will have already mutated again. We're chasing our tails trying this method and it's clearly not working based on states like NY which have 90% of the people vaccinated but which are currently experiencing j-shaped, exponential growth of Omicron. Vaccinations are not the answer, it's obvious for you everyone to see.

To recap - forcing vaccines violates the Nuremberg Code, the current vaccines don't work, there are documented serious health risks for young people from current vaccines, while continuing to vaccinate with "leaky vaccines" will continue driving new variants.

Further salient points:

- * Children are at extremely low risk for Covid
- * The vaccines are still only EUA (emergency use authorized)
- * There are no long-term studies to document any history of safety
- * Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- * The vaccine apparently does not stop the spread of the disease

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1- the Covid shot does not prevent the individual from contracting or spreading the virus!

2- there is no research and data available to determine its safety to my child!

3- it is against my religious convictions to use any drug or vaccine which utilizes aborted fetal tissue in its product or while researching this product!

4- this is a civil rights violation!!!

5- we need full disclosure and transparency but instead those who are asking questions are being silenced and strong armed into getting the vaccine for fear of losing our jobs or in Washington's case potentially being put into "Quarantine camps"!

6- the government is supposed to work for the people, not control the people! Yet our current government is hell bent on dividing and destroying this amazing country! Pitting neighbor against neighbor!!! All for more power and control! These mandates have nothing to do with the health of the nation, it's ALL about power, and Gov Inslee is one of the worst offenders!

NO VACCINE MANDATES PERIOD!!!!!!

Sincerely, Rhonda Burcham

Hello,

These two policies are UNCONSTITUTIONAL .

It is a parent's choice as to whether their child should get the shot or not.

Forced isolation and quarantine is so wrong on many levels, the world is trying to move away from the era of Adolf Hitler. Please allow people to exercise their God given freedom.

Thank you,

Serah N

Subject: Covid Vaccine Approval for school

External Email

Dear DOH,

I do not believe this should be on the table, The reason being is that there is NO approved covid vaccine available in the USA for one, the one they say is approved is also on the EUA and is not available until 2023 after the trials are over. You can not have both, it can not be approved and be on the EUA list.

Two, we do not know the long term side effects that it will have but we do know that there are already issues with teenagers coming down with heart issues, blood clots, death, and many more problems after getting these shots. We have athletes dying on the field after receiving the shot.

The states that have a high vaccination rate are also the one with high hospitalization. This can not be a coincidence!

They have manipulated the deaths, saying you are not considered to be fully vaccinated unless you have taken both shots and it is two weeks after the second shot. They are also saying someone died a couple days after the vaccine they were unvaccinated, If you were to have a side effect this would be the time frame you would have it, but it is being brushed under the table.

There is a CEO from a major Life Insurance company that has come out saying that there is a 40% increase in deaths since the vaccine came out. These are all things that show you should not even be thinking about giving this to our children.

This is not safe or effective. All this is, is propaganda. It is effective until you get the two shots then it is no longer effective and needs a third shot. This is not how immunity works.

Finally, this is an overreach of authority. You have no right to poison or sterilize our children.

Please remember that when this is done and the deaths from this are counted everyone that helped or was complicit will be held accountable. There is no such thing as I was just doing my job, and there will be new Nuremberg trials here in America.

PS: you might want to rethink the decision on the Covid PCR test for athletes. Parents know that there is Eo on this and it is considered a cancer causing agent and the state will be held responsible. Also the CDC took it off the EUA because it was unreliable.

Thank you for reading. If you have any questions don't hesitate to email or call.

Subject: Covid mandates in schools

External Email

Hello,

I'm sending you this email because I hear a vote will be casted, to implement a mandate for all children to be vaccinated against Covid, to attend school. As a parent, I do not agree with such a law, and nor do many families I have spoken with. While vaccination is right for some it is not right for all. To take away people's freedom to choose is unethical, and goes against the constitution. I believe each person has the right to their own body autonomy. Furthermore, healthcare should be a private matter that is between a person and their doctor. Government has no place in this area, and the precedent that this would set is very troubling. For all those reasons, I implore you to vote no on mandating a Covid vaccine to attend school.

Thank you,
Natalie

Subject: Considerable confusion Items 9 and 11

External Email

Dear State BOH members,

I had previously emailed you to express my concern that there is considerable confusion on social media and in the public domain about agenda items 9 and 11 and that I could not find sufficient clarification on the BOH website for exactly what will be discussed on January 12th.

In addition to my previous comments, I would like to add that, as the mother of a school-age child, I am wholeheartedly AGAINST mandating covid vaccinations for school-age children. the most current estimates I could find state that about 20% of children age 5 to 11 have gotten their first dose of the covid vaccine. If you require covid vaccines for school attendance, you are going to lose the enrollment of the vast majority of school-age children in this state to homeschooling. We will pull our children out of your schools . Many of us already have.

I'm also unclear on whether item number 11 is with regard to changes in the rules regarding HIV notification and reporting or whether it is extending the current requirements of WAC 246-101-017.

I am wholeheartedly disappointed that you have made it SO DIFFICULT for a common citizen to figure out what the heck you're talking about with item 11.

The buzz on social media is that item 11 is with regard to extending emergency rules in order to enable covid-19 to be deemed as a notifiable condition subject to the rules regarding forced detainment and quarantine at the order of LHJs & to be enforced by local LE. If that is indeed what you are going to be discussing, I am firmly and wholeheartedly AGAINST.

Thank you for your time, and I very much look forward to watching the meeting to gain a further understanding of what this is all about.

Subject: Covid Vaccine Requirement in Schools

External Email

To Whom this May Concern,

I am strongly opposing a mandate to add the covid vaccine to the list of vaccine requirements. It is my god given and constitutional right to chose what is best for MY family! I hope you are ready to step into the role as an educator in a classroom if you chose to go along with this insanity, because you WILL lose more educators! I urge you to take a good look at yourselves and think about the one thing you wouldn't want for your family especially your children....would you put down your guard and go along with being FORCED to do the #1 thing you wouldn't ever want to do because the government told you to?? I highly doubt it and if for a second you think you would I know you are lying! Please chose to oppose this mandate and give back our rights!

300+ Members of Boston College Community Demand COVID Booster Mandate Policy Recognize Natural Immunity

More than 300 Boston College parents, students, alumni, faculty and staff this week signed a petition to the college's president, Fr. William Leahy, opposing the college's recently instituted one-size-fits-all COVID-19 booster mandate because it fails to recognize natural immunity.

. It's free.

A group of more than 300 Boston College parents, students, alumni, faculty and staff this week signed a petition

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.petitions.net%2Fboston_college-petition

to the college's president, Fr. William Leahy, opposing the administration's recently instituted one-size-fits-all COVID-19

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdemand-covid-19-booster-mandate>

booster mandate.

The petition requests the college create rational "off ramps" to the policy to protect individuals with "hybrid immunity

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.news-medical.net%2Fnews%2F20211202%2FHybrid-immunity-provides-the-highest-and-most-durable-immunity-against-SARS-CoV-2-infection.aspx&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cf25668b8236240e43c9b08d9d170a65e%7C11d0e2>

" and those with serologically verifiable evidence of robust COVID-19 antibody immunity.

This is the first community uprising at one of America's elite universities against unsafe

and unnecessary booster mandates

This new mandate was issued even though more than 97% of that campus is already fully vaccinated by mandate — and despite the fact that the Centers for Disease Control and Prevention (CDC) has not changed

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fthehill.com%2Fpolicy%2Fhealthcare%2Fwhite-house-no-plans-to-change-definition-of-fully-vaccinated&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cf25668b8236240e43c9b08d9d170a65e%7C11>>
the definition of “fully vaccinated” to include a booster shot.

The biggest problem with this irrational and unsafe booster mandate is that it does not take into consideration the fact that many already vaccinated students, faculty and staff at BC also had a natural infection.

These individuals carry what Dr. Anthony Fauci

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.amazon.com%2FReal-Anthony-Fauci-Democracy-Childrens%2Fdp%2F1510766804&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cf25668b8236240e43c9b08d9d170a65e%7C11>>
himself labeled robust “hybrid immunity.” Many in the public health arena and in the Biden administration have described this type of immunity as being “bulletproof.”

Still, Boston College’s University Health Services, and administration led by sports medicine physician, Dr. Douglas Comaeu, are rigidly mandating these individuals undergo a mandated booster shot.

With the Omicron variant

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fde-surges-fda-vaccine-strategy-question%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cf25668b8236240e43c9b08d9d170a65e%7C11>>
raging through the nation since Thanksgiving, many members of the college community and elsewhere were recently infected, despite being already “fully vaccinated.”

These persons are also being subjected to BC’s draconian booster mandate even though they, too, now have hybrid immunity.

But perhaps most concerning is that BC is electing to continue its dangerous booster vaccine policy despite severe warnings

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fnoorchashm.medium.com%2Fan-urgent-safety-warning-to-dr-97503baddf46&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cf25668b8236240e43c9b08d9d170a65e%7C11>>
.

Commenting on the Boston College vaccine mandate, Robert F. Kennedy Jr., chairman and chief legal counsel at Children’s Health Defense, said:

“I am impressed by the courage of the several hundred parents, students and alumni of Boston College, who are rising in dissent against the irrational and dangerous one-size-fits-all approach that the college’s administration has adopted in mandating COVID-19 booster shots.

“I’m inspired that these courageous Boston College community members are trying to bring reason to a harsh and perilous administrative edict that cannot be defended by reason, science or medical necessity. What a terrible offense to the cherished American concept of human rights.”

To date, the college officials have not responded to the petition and the rigid booster mandate remains in place at Boston College.

Good afternoon,

It has been brought to my attention that you are having a meeting on January 12th to discuss making the covid 19 vaccination part of the requirements to attend school. As a mother and aunt of several children, I am highly against this requirement. I am fully aware that over 55,000 children have unenrolled from public school this last year in Washington state. Trust me when I tell you it's not out of fear of the virus. The only virus that is plaguing our children is your gross overreach and indoctrination. Making it a requirement will be detrimental to the school system.

I am writing to inform you that my children will be permanently withdrawn if covid vaccines are required for public school. My children's grandmother had an immediate severe adverse reaction to her 2nd moderna vaccine in April 2020, leaving her with permanent neurological damage. Despite her vaccination status, she is currently battling covid-19 infection. These vaccines come with risk, and when there is risk, there must be choice. Additionally, these vaccines have failed to stop the spread of covid. I worked as a research biologist for the NIH and my husband currently works for a local public health department in Washington and we both strongly reject vaccine mandates based on science.

Subject: Covid

External Email

Good day,

I am unvaccinated and I had Covid in August. My adult children and my grandkids also are unvaccinated and had Covid in August and September. No hospitalizations. The kids had mild symptoms.

My vaccinated son-n-law also had it and he had cold and flu symptoms. Again no hospitalizations.

My family doesn't want or need a Covid shot. We will home school our kids and move out of Washington state before we take a Covid shot. We have natural immunity and do not fear Covid.

My 78 year old dad survived Covid. He was hospitalized in September 2020. But has been unvaccinated and Covid free since then.

My 80 year old mother and her husband chose to get vaccinated and were around my daughter and stepbrother who had Covid. They are fine. Kids need to get Covid so they can build immunity. They do not deserve an experimental vaccine. The vaccine is more risky than Covid. We know people are getting injured from the shot. Blood clots, heart issues, leg pains, death, and other problems. Please stop harming families with mask and vaccine requirements.

My three adult children have lived in this state their entire life. They have all overcome much and worked hard to start careers, get married, buy homes and start families. Now because of the mandates we are faced with leaving, moving and uprooting children from family members and their community. We have all had Covid.

Subject: Comments to SBOH on WAC 246-105-030 & Covid-19 Vaccine

External Email

Dear Members of the State Board of Health,

I am the grandparent of five elementary age children. I have received the Covid-19 vaccine and booster per my own choice. Recently I learned that the State Board of Health was considering adding a Covid-19 vaccine mandate for school children by adding it to WAC 246-105-030. I am appalled! This vaccine isn't anything like those already included in the WAC.

Before making that recommendation, please consider the following:

* K-12 students have proven to be minimally affected by infection with the Covid-19 virus & its variants.

* The Covid-19 vaccines were developed at "warp speed" for emergency purposes and did not go through the standard medically accepted process used for all other vaccines listed in WAC 246-105-030.

* There is not enough long-term medical data on the Covid-19 vaccines citing possible vaccination side effects in the growing & developing bodies of children 0-18 years of age.

* The Covid-19 vaccines have been pushed through the approval process within the federal bureaucracy of the FDA, and then mandated via presidential and gubernatorial emergency powers thereby forcing some adults to comply or lose their job. Exemptions were often denied to those who applied for them.

* With vaccines readily available, vaccination rates for children in Spokane County (srhd.org) are as follows: 40% of children age 12-17 are vaccinated and only 20% of children 5-11 are vaccinated...parents are making a conscious decision with regards to the best health choices for their children and choosing to wait on the Covid-19 vaccine.

* Adults, including those who are most vulnerable, have all been vaccinated if they chose to do so. Therefore, their health is not in jeopardy by children not receiving a Covid-19 vaccine.

* Unfortunately, some persons who have been fully vaccinated and boosted are still getting ill with the Covid-19 virus or one of its variants raising the question of how effective the vaccine really is.

* No determination has been made yet as to how often a vaccine/booster will be needed to protect one from this virus and it is likely it will be more like the annual flu shot than an actual one-time vaccination.

* There are thousands of flu deaths every year in the U.S. and yet no mandate has ever been considered for adults or children to get the flu shot (nor should there be one); it is an individual's personal health choice.

Based on this information it simply makes no sense for the BOH to pursue the recommendation to include the Covid-19 vaccine with the other vaccines in WAC 246-105-030. The Covid-19 vaccine has not even met half of the nine criteria used by the board in evaluating antigens. Based on a King 5 survey of 650 Washington residents, 54% in Eastern Washington opposed a Covid-19 vaccine mandate for children. Therefore, it is nowhere near acceptable to the public as required by Nine Criteria to Consider in Evaluating Antigens, III Implementation of the Criteria #7. It is also likely that public comments to the Board of Health on this topic for the January 12, 2022 meeting will also confirm it is not acceptable to the public.

Please carefully consider the impact your decision will have on students and parents. This is a decision that needs to be left to parents, not the government.

I have not even touched on the reaction you will receive from parents across the state especially those who will not comply and simply remove their children from schools. Already over 55,000 public school students have left school this academic year.

Lastly, if you do go ahead with this, I implore you to maintain exemptions for the Covid-19 vaccine for medical, religious, and especially personal/philosophical reasons.

Sincerely,
Gayle Corativo

Subject: Comments regarding Covid vaccination for Children

External Email

To whom it may concern,

When I heard about potential mandates for the Covid vaccination, my heart dropped. I am a mother to three, fully vaccinated children, but I strongly believe these vaccinations should NOT be mandated.

One of the main reasons I believe they should not be mandated is that there is no longitudinal studies for how the vaccine may impact a child in the years to come.

I respect parents who vaccinate their children against Covid. I ask that you too respect a parent's right to choose whether their child should or should not be vaccinated, especially since the data regarding this vaccine and the long term results it has on children is unknown.

Most Sincerely,

Stacie

Please don't require the covid vaccine for children to attend school. Just a few days ago Dr. Fauci said that children very seldom get seriously ill or die from covid so please don't mandate the vaccine. Since the protection from the vaccine wears off after a time it does not seem necessary as the children can receive the vaccine when the time comes that it is dangerous for them to get covid. Thank you. Norna Groff, Tonasket, WA

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: The vaccine is still in an experimental stage and who knows what the long range results will be. It is a proven fact that the vaccine does not prevent a person from getting Covid.

I and my family are definitely against vaccinating children of any age If it does not prevent them from getting the disease

Good afternoon,

It has been brought to my attention that you are having a meeting on January 12th to discuss making the covid 19 vaccination part of the requirements to attend school. As a mother and aunt of several children, I am highly against this requirement. I am fully aware that over 55,000 children have unenrolled from public school this last year in Washington state. Trust me when I tell you it's not out of fear of the virus. The only virus that is plaguing our children is your gross overreach and indoctrination. Making it a requirement will be detrimental to the school system.

Subject: Comments for upcoming meeting on vaccine mandate in schools

External Email

Hello,

I read that you have any upcoming meeting to discuss a covid vaccine mandate for Washington schools. I currently have a 1st grader attending school in this state. I am vaccinated and believed in getting the vaccine for myself. My 6 year old though has almost no risk of having a bad outcome he was to contract covid. I am much more concerned of him suffering heart damage from the vaccine. I have consulted my brother who is a physician and he sees no reason why anyone would vaccinate a healthy 6 year old.

My child is up to date on all of his traditional vaccines. These vaccines stop him from getting things like polio or the measles. The covid vaccine does not stop anyone from contracting covid. At best it may lessen the severity of covid. So where is the benefit to my child that would warrant any risk?

If the decision is made to mandate the covid vaccine to attend school in this state I will remove my child from the public school system. I will always do my best to protect my child.

Thank you,

Ari McDonald

☐ Assist you, I am resubmitting my comments with specific details of what I am positing, to save you from having to look it up.

☐ It is my understanding that you are contemplating requiring a mandatory Covid Vaccine for children to go to public school.

1) You are considering mandating an Experimental "Vaccine" that required the FDA to change the definition of what a vaccine is in order for it to qualify as a vaccine.

2) You are considering mandating an Experimental "Vaccine" that has had to date over 1,000,000 adverse reactions reported worldwide including the CDC's Vaccine Adverse Reaction database. That includes 10,000's of deaths including many children.

3) you are considering forcing (coercing) parents and children to take an experimental drug, which is in strict violation of the Nuremberg code, and is a Crime Against Humanity.

4) You are considering forcing an experimental vaccine into children, an experimental vaccine which at this point in time is proving to not work. The substantial number of "new Covid" cases taking place around the world are more amongst the vaccinated, not the unvaccinated. This in itself is an indication that the experimental vaccine does not provide adequate or long lasting protection, which would make sense since there are no long term studies that show these vaccines to be useful, in fact, they are showing now them to be deadly.

5) You are considering forcing an experimental vaccine into children, which, after a quick review of the CDC's VAERs database would allow you to see the significant number of adverse reactions reported among children under the age of 17. Those adverse reactions include myocarditis, peritonitis, seizures, heart attacks and death, to name a few.

Over the last two years, your mandates for masks, "vaccinations", social distancing, and "essential" businesses have done nothing to "stop" the virus. They have only accomplished forcing 1000's of small businesses to close, forced many of us to tap into our life savings and retirement funds to survive our businesses being shutdown, our lives uprooted, our rights being infringed and pitting neighbor against neighbor.

Let me also mention, my education is in microbiology and immunology, and I have both brought real vaccines to market, and commercially produced millions of doses of vaccines, so I have a background in this discipline.

What you have done, continue to do, and are considering doing is wrong, is not supported at all by "the science", and you should be put on trial for the damage you have and continue to cause.

If you force our children to be jabbed with a shot that could very well kill them, you will be held accountable. My child would be removed from the public school system were a Covid vaccine be required.

You cannot use a vaccine to stop a virus such as a Coronavirus which mutates quickly, and can be passed between different animal species. Your push to "vaccinate, vaccinate, vaccinate" with an experimental and potentially deadly vaccine while ignoring therapeutic solutions such as the anti-parasitic drugs Hydroxychloroquine and Ivermectin with decades of approved use (there is now more than adequate peer-reviewed studies that show the effectiveness of these drugs in stopping the virus) including studies published by the National Institute of Health) is responsible for significant harm.

It's time for you to stop making things worse.

Best,

Jesse Bornfreund

The safety of our children should be of the highest priority.

I respectfully ask that you read the attached letter regarding mandating the Covid Vaccine for children.

Thank you for your consideration,

Sincerely,

Erik Alsin, MBA, CPA

Washington State Board of Health,

Everyone involved in anyway with Healthcare should follow the guiding principle of

"FIRST, DO NO HARM"

Regarding Covid Vaccinations, most people understand that VAERS, Vaccine Adverse Event Reporting System, dramatically understates the actual deaths and adverse injuries from vaccination.

A recent study from Columbia University has determined that based on VAERS, the actual deaths from Covid Vaccinations is at least 400,000 deaths in just over one year.
about equal to almost SEVEN VIETNAM WARS .

The FDA shut down the Swine Flu trial with only about 50 deaths.
Something is drastically wrong!!!

The Covid Vaccination death toll obviously screams that the risk to benefit ratio is
NOT WORTH THE RISK, especially to children who have essentially NO RISK from Covid.

In addition to an increased death risk from the covid vaccination, children are at an increased risk of myocarditis and pericarditis which is permanent heart damage if they survive the covid vaccine.

Why take the risk in a healthy child with no risk from Covid???

"FIRST, DO NO HARM"

Do you know that in order to offset the risk of myocarditis and pericarditis after giving children the covid vaccine, that Pfizer has added an adult heart attack drug, Tromethamine, to the covid vaccine?
No child needs Tromethamine! Except if they take the Covid Vaccine.

"FIRST, DO NO HARM"

The uncontroverted medical consensus is that existing Covid-19 injections do not prevent infection or transmission of the coronavirus; i.e., they do not create immunity in the recipients. This is admitted openly today:

CDC Director stated on CNN:

"What the vaccines can't do anymore is prevent transmission."

Dr. Anthony Fauci to NPR:

"We know now as a fact that [vaccinated people with Covid-19] are capable of transmitting the infection to someone else."

WHO Chief Scientist Dr. Soumya Swaminathan:

"At the moment I don't believe we have the evidence of any of the vaccines to be confident that it's going to prevent people from actually getting the infection and therefore being able to pass it on."

Chief Medical Officer of Moderna Dr. Tal Zaks:

"There's no hard evidence that it stops [the Covid-19 vaccinated] from carrying the virus transiently and potentially infecting others who haven't been vaccinated."

Surgeon General of the State of Florida, Dr. Joseph Ladapo, MD, PhD:

"... the infections can still happen whether people are vaccinated or not. That's very obvious."

Professor Sir Andrew Pollard who led the Oxford vaccine team:

"We don't have anything that will stop transmission, so I think we are in a situation where herd immunity is not a possibility and I suspect the virus will throw up a new variant that is even better at infecting vaccinated individuals."

Dr. Jay Bhattacharya, MD, PhD, Professor of Health Policy, Stanford University:

"Based on my analysis of the existing medical and scientific literature, any exemption policy that does not recognize natural immunity is irrational, arbitrary, and counterproductive to community health."

2008 **Nobel Prize winner** in Medicine Dr. Luc Montagnier (also winner of the French National Order of Merit and 20 other major international awards):

"The covid **vaccines don't stop the virus, they do the opposite – they 'feed the virus,'** and facilitate its development into stronger and more transmissible variants... You see it in each country, it's the same: the curve of vaccination is followed by the curve of deaths ... the vaccines Pfizer, Moderna, Astra Zeneca do not prevent the transmission of the virus person-to-person and the vaccinated are just as transmissible as the unvaccinated."

Dr. Martin Kulldorff, Professor of Medicine at Harvard Medical School:

"The bottom line is that these vaccines do not prevent transmission."

Dr. Sunetra Gupta, Infectious Disease Epidemiologist and Professor of Theoretical Epidemiology at the University of Oxford:

"It is really not logical to use these vaccines to protect other people ... I don't think they should be forced...because this vaccine does not prevent transmission. So if you just think of the logic of it, what is the point of requiring a vaccine to protect others if that vaccine does not durably prevent onward transmission of a virus?"

There are a multitude of news reports of outbreaks on fully "vaccinated" sports teams and cruise ships, not to mention in the fully "vaccinated" White House. There is simply no question that **the Covid-19 injections do not create immunity.**

The risk of adverse events of giving the Covid Vaccination to a healthy child is not worth getting.... no benefit.

"FIRST, DO NO HARM"

Please don't risk harm to our children by mandating the Covid Vaccine.

Sincerely,

Erik Alsin, MBA, CPA

My name is Judy Gores and I live in Spokane, WA. I had 3 daughters go through Spokane public school in Spokane. I now have a son in Kindergarten and I pulled him from Public school because I could not imagine any benefit to keeping a Kindergartner in a mask all day. Now, the thought that an UNAPPROVED Vaccine, with NO LONG TERM testing would even be considered for children is HORRIFYING!! This vaccine was not even developed for the Omicron variant that we are now dealing with. PLEASE, DO NOT FORCE THIS SHOT ON OUR CHILDREN!

Sincerely,

Judy Gores

To Whom It May Concern:

I do not believe the Covid-19 vaccine should be added to the required list of immunizations for kids to attend school. I currently have two children enrolled in Tonasket School District and will have a 3rd child enrolled by next Fall. We will pull all of our children immediately if this was to happen. We will be forced to not support public education. This vaccine has not been studied long enough and no one is aware of the long term effects this could have on our children. It has been proven that children are not the epi-centers of Covid and to force a vaccine on them in order to get education from public school is completely unacceptable. We need our schools and extracurricular activities for proper development of these kids. Please consider not enforcing it to be mandatory. If parents choose to vaccinate their kids, that is the freedom they have, but we should have that freedom to not as well. We should not have to choose between public schooling and our children's potential future health (there is no scientific way to prove this will not have adverse issues in the future, the vaccine has not been around enough years to do so).

I appreciate your time and consideration on this topic.

Thank you,
Cortney Goodrich

Subject: Against ANY NEW Covid Shot Regulations for the State - Kids & Adults

External Email

External Email

All,

It has come to my attention that that there is yet another potential new over stepping of power from the state in the veil of covid safety.

I am against allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families)

to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from (WAC 246-100). If health officers hold this much power, this power should be coming from the people not the position. It is bad enough the governor will not let go of his emergency powers as the state enters a third year of an emergency while most other states have returned to living without all the hubbub of the virus.

I am against including the Covid-19 injections as part of school immunization requirements using (WAC 246-105.). Kids are already least effected group from covid, all this shot is going to do is increase and speed up deterioration of their bodies, create a hardship for the families who will then have to take care of the kid because of the vaccine immunity with no thanks to HR 5546 (see below) protecting the pharmaceutical companies over the safety of the children.

This virus does not go after children as it goes after the older adults with comorbidities. The children who have fallen ill are ones who are already compromised or have been injected with this untested shot in the name of health. Especially when children have a less then .5% chance of dying from this!!

This entire procedure is yet another overstep of those who were elected and making sure those who they appointed pushes forward an agenda that is not in the best interest of the people or the children.

Do the right thing and not pass these proposed WACs

☐

How Do We Know the COVID-19 Vaccine Won't Have Long-Term Side Effects? - MU Health

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.muhealth.org%2Four-stories%2Fhow-do-we-know-covid-19-vaccine-wont-have-long-term-side-effects&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C6c4f259976ae48b7a60408d9d16a07a2%7C11>

One of the reasons some people haven't signed up to receive the COVID-19 vaccine is that they're worried there might be unknown side effects that will show up months or years later. Although it's true there are still a lot of things we're learning about the vaccines — like how effective they are against variants and how long their protection lasts — there are plenty of things we do ...

www.muhealth.org

H.R. 5546:

Passed House amended (10/14/1986)

(Measure passed House, amended)

National Childhood Vaccine Injury Act of 1986 - Title I: Vaccines - Subtitle 1: National Vaccine Program - Amends the Public Health Service Act to establish in the Department of Health and Human Services a National Vaccine Program to: (1) direct vaccine research and development within the Federal Government; (2) ensure the production and procurement of safe and effective vaccines; (3) direct the distribution and use of vaccines; and (4) coordinate governmental and nongovernmental activities. Requires the Director of the Program to report to specified congressional committees.

Establishes the National Vaccine Advisory Committee to recommend: (1) ways to encourage the availability of an adequate supply of vaccines; and (2) research priorities.

Authorizes appropriations for FY 1987 through 1991.

Subtitle 2: National Vaccine Injury Compensation Program - Part A: Program Requirements - Establishes the National Vaccine Injury Compensation Program as an alternative remedy to judicial action for specified vaccine-related injuries.

Prescribes the contents of any petition for compensation.

Grants U.S. district courts authority to determine eligibility and compensation. Requires

the district court in which the petition is filed to designate a special master to serve as an adjunct to the court. Sets forth the responsibilities of the court.

Lists factors to be considered when determining the amount of a compensation award. Sets forth a table of injuries deemed vaccine-related for compensation purposes. Permits the Secretary of Health and Human Services to: (1) promulgate regulations to revise such table; and (2) recommend changes to the vaccines covered by the table.

Provides that compensation awarded under the Program shall be paid out of the National Vaccine Injury Compensation Trust Fund. Limits awards for actual and projected pain and suffering and emotional distress to \$250,000. Prohibits awards for punitive damages.

Establishes the Advisory Commission on Childhood Vaccines to: (1) advise the Secretary on the implementation of the Program; (2) recommend changes to the Vaccine Injury Table; and (3) recommend research priorities.

Part B: Additional Remedies - Sets forth procedures under which the person who filed a petition for compensation under the program may elect to file a civil action for damages.

Provides that no vaccine manufacturer shall be liable in a civil action for damages arising from a vaccine-related injury or death: (1) resulting from unavoidable side effects; or (2) solely due to the manufacturer's failure to provide direct warnings. Provides that a manufacturer may be held liable where: (1) such manufacturer engaged in the fraudulent or intentional withholding of information; or (2) such manufacturer failed to exercise due care. Permits punitive damages in such civil actions under certain circumstances.

Part C: Assuring a Safer Childhood Vaccination Program in the United States - Requires each health care provider who administers a vaccine listed in the Vaccine Injury Table to record certain information with respect to each such vaccine. Requires each health care provider and vaccine manufacturer to report certain information to the Secretary.

Requires the Secretary to develop certain vaccine information materials for distribution to the legal representatives of any child receiving a vaccine listed in the Vaccine Injury Table.

Directs the Secretary to promote the development of safer childhood vaccines.

Sets forth recordkeeping and reporting requirements for vaccine manufacturers. Imposes civil and criminal penalties for destroying, altering, or concealing any such report or record.

Part D: General Provisions - Allows any person to commence a civil action against the Secretary where the Secretary allegedly has failed to perform a duty under this Act. Provides for judicial review of the Secretary's regulatory actions in a court of appeals of the United States.

Allows the Secretary to provide licensing for unpatented vaccines for naturally occurring human infectious diseases under certain circumstances.

Requires the Secretary to conduct studies on pertussis, rubella, and radiculoneuritis vaccines and publish the results of such studies.

Directs the Secretary to study the risks to children associated with each vaccine listed in the Vaccine Injury Table and establish guidelines respecting the administration of such vaccines. Directs the Secretary to periodically review and revise such guidelines.

Directs the Secretary to review the warnings, use instructions, and precautionary information presently used by manufacturers of vaccines listed in the Vaccine Injury

Table. Directs the Secretary to require manufacturers to revise and reissue any warning, instruction, or information found inadequate.

Grants the Secretary recall authority with respect to any licensed virus, serum, toxin, antitoxin, vaccine, blood, blood component or derivative, allergenic product, or other licensed product which presents a danger to public health. Establishes civil penalties for recall violations.

Directs the Secretary to make annual reports to specified congressional committees on the impact this Act has on the supply of vaccines.

Title II: Miscellaneous - Provides that certain Federal provisions designed to reduce paperwork shall not apply to information required to carry out this Act.

Subject: Covid 19 injections on vaccine schedule

External Email

January 5, 2022

Dear WA State Board of Health, employees and associates and TAP:

We now know that the covid 19 injections not only do not prevent infection, transmission, hospitalization and death of covid 19, but they are also a considerable health risk. Why would anyone conceive of including such on a childhood (or any) vaccination schedule? Have you not done your due diligence in researching the data and facts around this hastily rolled out injection? To date, there is not even possibility of long term or phase 3 trials being completed. The risk of a child dying from covid 19, is less than .01 percent. This vaccine has already proven to be more dangerous to children than covid 19 itself.

It is your duty to search out these facts away from vested and conflicts of interests and learn for yourselves. Thousands of highly esteemed doctors and scientists are speaking out about what the data and science is showing and they are voicing their objections to, and abhorrence for, these forced injections. These doctors and scientists speaking facts and truth against a narrative are being censored from social and main stream media and academia. Why is that?

Are you aware of the VAERS? How many deaths from this forced injection are acceptable for you? I say not even 1 is acceptable, especially for a virus with a 99.9 + % recovery rate in children! Why won't Pfizer release all their data on these injections? Are you willing to take personal responsibility for the lives of children and adults you will maim and destroy by facilitating approval for this atrocity? Are you willing to break state and federal laws, US codes and constitutional protections to push this agenda? You will also be living in the state and country you chose to destroy personal protections from the real danger of an overreaching government in.

When presented with reality and all of the facts, the only conclusion one can reach for anyone supporting this agenda is:

1. They are either ignorant to facts, science and truth because of censorship and personally held distorted beliefs.
2. They are mentally ill, compromised or unstable.
3. They know what they are doing and are benefiting in some degenerative way from pushing this agenda.

In any case, those will not escape this horrific machine being fed and will not be immune to the consequences of their actions and madness.

We know the vaccine industry is pushing this injection for it's own reasons. We also know, based on wording in the current law, an approval on the childhood vaccine schedule would mean securing the vaccine industry additional liability protection.

To all of you in positions of importance regarding this matter: We are watching you, and many more of us are becoming aware by the hour. All of the money on Earth will never supersede truth, you cannot stop or silence it. You will either be held accountable for your actions or you will reap untold reward. Get on the right side of history and do the right thing.

Sincerely,

The majority

Subject: COMMENTS ON PROPOSED ACTION - CHAPTER 246-100 WAC

External Email

Good morning.

I am writing to urge the Washington State Board of Health to forego any attempt to utilize WAC 246-100-040 in response to COVID-19 concerns. Far too much power is yielded to the State in depriving citizens of their inalienable, God-given, Constitutional rights to life, liberty, and pursuit of happiness. We are free people, subject to God alone. The government has abandoned its responsibility to rule with justice and instead increasingly elevates itself to oppress and subjugate people using fear and intimidation to force its will upon us. The government is not God. Caesar is not Lord. We are far past the old debates of mask and "vaccine" efficacy, and are now faced with the imposition of tyrannical rule. This is no longer a conspiracy theory, but a blatant effort to violate personal, bodily integrity with no regard for personal choices related to medical treatment or religious objections. Dissenting voices are being silenced across all social media platforms. The mainstream media continually parrots lies and deception. We are not Australia. We are not Austria. We are not Canada, or any other nation throughout the world where we now witness what happens when government operates unrestrained. The Constitution of the State of Washington, deriving its authority from the Constitution of the United States, reads "All political power is inherent in the people, and governments derive their just powers from the consent of the governed, and are established to protect and maintain individual rights" (Article I, Section 1). We the people of Washington State DO NOT CONSENT to the proposed actions. We call upon the Washington State Board of Health to PROTECT AND MAINTAIN INDIVIDUAL RIGHTS.

Thank you.

Bob Reiher
Bremerton WA

Subject: Concerns & Mandates

External Email

Board Members,

First off, I'd like to start my email with your authority is not absolute and "We the People" do not consent to your heavy-handed approach to our health.

We do not give you the authority to force any medical procedures on our children, our elderly, or on any human being that does not choose of their own free will your offerings of "public health" in a vaccine trial.

Our bodies are not owned by our government and on the contrary, our bodies according to the Bible are a temple of the Holy Spirit.

" Or do you not know that your body is the temple of the Holy Spirit who is in you, whom you have from God, and you are not your own? For you were bought at a price; therefore glorify God in your body and in your spirit, which are God's." - 1 Corinthians 6:19-20

We do not give you permission to operate in an authoritarian way nor do we approve of you attempting to use broad rule making powers to force the Covid-19 shots that are NOT currently FDA approved on anyone. Only "Comirnaty" is approved and yet it is not offered in the USA at this time. The current Pfizer-BioNTech Vaccine is the one given in the US, but it is still under "EUA", not "Authorized." (See leaflets given by pharmacists - attached to this email or this link)

Labeling of Pfizer Vaccines:

<https://labeling.pfizer.com/ShowLabeling.aspx?id=14471>

EUA approval letter from FDA also includes Authorization for Comirnaty:

<https://www.fda.gov/media/151710/download>

>> Congress Using the wrong information:

They are making it sound like "Pfizer/ BioNTech" and "Comirnaty" are the same. They are legally not and should not be represented as such. Technically Pfizer and BioNTech are manufacturers, but they have one legal name for an FDA approved vaccine "Comirnaty" and one that is only under EUA. There is a misconception that this is about semantics, but it is not - legal names and legal approvals for drugs in the US are supposed to follow specific procedures, clinical trials, and they hold important legal obligations and regulations.

<https://lynnwoodtimes.com/2021/12/07/federaljudge-rejects-interchangeability-comirnaty/>

PREP Act

Based upon the projected numbers of Covid-19, "on January 21, 2020 the former Secretary, Alex M. Azar II, declared a public health emergency pursuant to section 319 of

the PHS Act, 42 U.S.C. 247d, effective January 27, 2020, for the entire United States to aid in the response of the nation's health care community to the COVID-19 outbreak. Pursuant to section 319 of the PHS Act, the Secretary renewed that declaration effective on April 26, 2020, July 25, 2020, October 23, 2020, and January 21, 2021." "On March 10, 2020, former Secretary Azar issued a Declaration under the PREP Act for medical countermeasures against COVID-19 (85 FR 15198, Mar. 17, 2020) (the Declaration). On April 10, the former Secretary amended the Declaration under the PREP Act to extend liability immunity to covered countermeasures authorized under the CARES Act (85 FR 21012, Apr. 15, 2020)."

This declaration is all based upon projections as the time and not actual deaths. The first case to enter the US was shared as January 23, 2020, and although by the date of the first declaration of "public health emergency" (January 31, 2020) there were less than 10 cases. (Please see the attached graphs of cases and deaths with the oldest at the bottom of the list) We are told to trust the "science" yet, declarations of emergency were declared with less than 10 cases in the US on a new virus and the first death didn't even happen until February 27, 2020. The mistrust the public is experiencing is due to the extreme measures that have been taken against the people and the very heavy handed measures that have not been supported by the actual data.

https://covid.cdc.gov/covid-data-tracker/#trends_dailycases
<https://crsreports.congress.gov/product/pdf/LSB/LSB10443/7>

Please also review Pfizer's 6 month data. I've attached the document along with the link under "breaking news" called "More Harm Than Good." Although this is from Canada, we share lots of information, because we are all using the same vaccines.
<https://www.canadiancovidcarealliance.org/>

We have more strains, since the shots have been administered than we did prior to the shots being administered. The year of 2021 alone had "Mu", "Delta" and "Omicron" that were highly publicized and now "IHU" detected in France (January 2022.) Yet the first variant publicized was the "Gamma" in November 2021 in Brazil, but still not of concern until January 2022. The people of Washington have been more than compliant for the past 670+ days of our governor's emergency powers and yet the masks, shots, and lockdowns have not stopped the virus from spreading between vaccinated individuals, causing death, or causing vaccine injuries amount those that chose to be apart of the vaccine trial.

Please review some of the stories of the vaccine injured as their lives matter as well.
<https://www.covidvaccinevictims.com/>
<https://www.habingfamily.com/obituary/michael-mike-granata>
<https://www.realnotrare.com/realstories>

Understanding the VAERS reporting system:
<https://openvaers.com/>

You need to see what people think of the mandates by OSHA that President Biden issued. With over 119,830 comments, people are very unhappy that medical procedures are being mandated and yet have not proven to stop the spread, stop transmission, nor stop hospitalization as was touted in the beginning of rolling out these vaccines.
<https://www.regulations.gov/document/OSHA-2021-0007-0001>

Also, another interesting point is that since Covid has entered the scene, the CDC shows that essentially the seasonal flu has mostly not impacted any children. That seems very untrustworthy and is causing many people to mistrust those in our public health.
<https://www.cdc.gov/flu/weekly>

Right now, you are facing a big decision to "force" medical procedures upon people that do not freely choose to participate in this trial. One day soon, you may be against

something (politically, ethically, morally, or otherwise), and you may have already given up your freedoms to choose, because you didn't take this opportunity to speak up against "force" being perpetuated on those you serve.

We are asking you to consider the repercussions of force, mandates, and new laws that hurt the freedoms afforded us by our Creator; God or the ones supported by the US Constitution. Our children are our most treasured gem and it is our job given to us by God that we must protect them from any and all harm.

Please consider the points, data, and research I've shared when you consider a heavy-handed approach to mandates and forced medical procedures. In real life, not everyone can wear size 7 shoes, yet with all these mandates - we essentially are attempting to force everyone to have the same medical procedures when not everybody is the same.

To Jay Inslee & Company,

I am a Washington state resident. I want my voice heard loud and clear.

I am against these so called COVID-19 policy changes, to force new (so called laws) to that will rule and rain down more state government control over my kids and my own free will to choose what is best for me and my family related to health care choices.

This is not freedom. This is over reach by state and federal government. This is wrong. We the people, should be voting on these major issues. You, Mr. Inslee and Company should NOT be allowed to pass into law in the middle of the night these UNLAWFUL acts!! Also, look up the Nuremberg code, you are breaking that as well!

You, Mr. Inslee and Company should be willing to listen to good and well educated doctors, outside of your local group of doctors. If you, Mr. Inslee and Company are truly for safety and stopping Covid, you would have absolutely no problem listening to Dr. Peter McCullough and Dr. Robert Malone and Dr. David Martin. I think you should call these doctors and invite them to a meeting to discuss these concerns.

However, I would be surprised, to see you, Mr. Inslee, and Company step up to the plate and have a sit down meeting a real discussion with these doctors and reevaluate your plans in your thinking towards COVID-19.

You, Mr. Inslee and Company are breaking the laws and the constitution and are out of bounds!

I am not against vaccines. I am against being a guinea pig for experimental testing.

Why push a vaccine???? The vaccine doesn't stop me from getting covid or transmitting COVID.

The vaccine has not been thoroughly tested and studied.

There has been so many horrible vaccine injuries and deaths. Why push this stuff??? Why??? Why don't you want to know the truth??? Or, do you know the truth and just don't care. Which one is it?? Something doesn't smell right with this covid 19 stuff!! Just saying!!

It's time to stop this nonsense and answer will question, with real doctors.

My expectation is to hear back from you people. The reality is I probably won't hear back from you people! I don't think you have the intestinal fortitude or courage or strength to do what is right. God is real and God is watching. You all aren't fooling God! You maybe fooling some people but not God! Watch out!

My name is Dan Sizer and I approve this message.

Good afternoon,

It has been brought to my attention that you are having a meeting on January 12th to discuss making the covid 19 vaccination part of the requirements to attend school. As a mother and aunt of several children, I am highly against this requirement. I am fully aware that over 55,000 children have unenrolled from public school this last year in Washington state. Trust me when I tell you it's not out of fear of the virus. The only virus that is plaguing our children is your gross overreach and indoctrination. Making it a requirement will be detrimental to the school system.

Subject: COVID vaccination for children

External Email

I am writing to request that you NOT require COVID vaccinations for children to be able to participate in school/day care. These vaccines are still under an EUA and are as yet unproven to be safe long term. As such to mandate anyone take them is contrary to the Nuremburg Code

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.cirp.org%2Flibrary%2Fethics>>
and is unethical at best. To force children who do not have legal authority over their own decisions/body to take these vaccines is wrong. PLEASE think about the future of our nation. When we force children to take a vaccine that is still under emergency use authorization (and is not approved through standard means), we are putting our future at risk in both their health as well as their ability to participate in society and in education.

Thank you for your time and consideration.

Subject: Concern about vaccine mandates

External Email

Greetings. As a concerned citizen I wish to voice that it is extremely important to me that there NOT be mandates for school children to receive the Covid 19 vaccine. These shots are still under emergency use authorization, and children remain very low risk for Covid. Encouraging health, well being and safety measures is one thing that I can support... mandating is quite another. I trust there will be consideration given to all those concerned parents. Thank you very much,
Katy

Subject: Comments for the Immunizations Technical Advisory Group

External Email

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- 1.) There's no substantiated and truthful scientific evidence to date that any vaccines protect or eradicate Covid and all its variants.
- 2.) Dr. Fauci and the CDC have been caught in lies and misinformation before Congressional investigation panels (e.g. Rand Paul Senate Covid and Oversight Committee Investigation). Why would anyone, especially the Washington State Board of Health, put much confidence in the NIH, the WHO, the CDC and Dr. Fauci when they have been publicly complicit and proven false or suspect in what they're stating and recommending?
- 3.) It has been scientifically documented by many reputable health and medical institutions that school-age children do not need any Covid or variants immunizations, because they do not spread it to other children and only have very mild symptoms if they have it , and they have a very high 99.7xx% recovery rate (according to many highly respected health research institutions who have publicly documented and provided this for anyone to see and confirm). Why hasn't the Immunizations Technical Advisory Group seen or received this critical health data and information to be accurately and truthfully advised of a matter of this magnitude and significance before they give advice and recommendations to Washington State and whoever is concerned?
- 4.) As a Washington State resident and a Constitutional U.S Citizen I am extremely suspicious of and highly question any vaccine mandates for our state's school-aged children based on all the abundant, solid and reputable information available and that has been amply disclosed that is against vaccinating our children.

Thank you for my input and voice. I strongly urge you to consider my comments above.

Subject: Covid Vaccine Requirement for kids

External Email

Dear Ms. Schreiber,

I am writing to voice my concern regarding the consideration of covid vaccine requirements for school-aged children beginning next Fall.

Our four children span elementary to high school. They have all had covid, and thankfully, all had mild symptoms and recovered quickly with no long-haul symptoms. We are aware and acknowledge that some children are not as fortunate and that MISC is a risk factor for infection.

Having worked as an inpatient physical therapist at Seattle Children's Hospital, I recall young patients coming onto my unit who suffered similar complications (MISC, others with Guillan-Barre syndrome) that resulted from initial infection with flu or other illness. These were always regarded as RARE and unfortunate effects of otherwise non-life threatening viruses. Not once did I ever hear suggestion among medical or social work staff for a blanket requirement to flu vaccine as a solution. In fact, some of my patients who came in with Guillan Barre syndrome had received the flu vaccine that same year.

While mainstream media and CDC continues to promote covid vaccines and boosters, their efforts cannot negate tens of thousands of parents' personal experiences and direct word-of-mouth testimonies that covid is, for the vast majority of school-aged children, NOT a life-threatening illness, and NOT a significant, measurable, traceable cause of severe spread or threat to the larger community.

It is destructive to our state and tone-deaf to think that parents who do not want the vaccine for their children will reverse course simply because it's required or recommended. As time goes on, studies continue to show actual risk to children associated with the vaccine. A primary argument from health officials is that these risks are also associated with covid; however, they refuse to acknowledge that millions of

children have HAD covid and did not experience any lasting or dangerous side effects or complications, and that any subsequent infection from a virus almost always results in milder symptoms.

Attempting to require the covid vaccine for school entry in the fall WILL result in a mass exodus of students from our state's schools. Increased requirements to crack down on homeschooling or private school communities WILL result in a mass exodus of families and citizens from our state period.

We, born and raised here, have always had a strong desire to raise our kids in this beautiful place, but when freedom of choice and trust in our parenting is available to us in so many other states, the decision to leave has begun to hinge on decisions like these.

Please consider listening.

Thank you for all you are doing to serve,

Kathy Day

Subject: COVID vaccine for children

External Email

WSBOH,

I would like to ask you to take into consideration that the COVID vaccine is still in its early stages of testing and use, and not much is known about its long term affect on children at this time. Please don't use our youth as test subjects for the COVID vaccine. I consider the ultimate low is to prey on children, and giving them a controversial shot, not knowing the long term implications is no different. Please say no to mandatory vaccination for covid for children to be able to attend our schools. I believe in the right to be able to choose what is best for ourselves and our families. If I have to, I will pull my kids from public school to protect them, but unfortunately some parents don't have that option.

Thank you,

Lindsay Cox

I strongly oppose COVID-19 vaccinations for children. It has been shown that COVID-19 vaccines cause myocarditis in male children and other serious side effects up to death. COVID-19 vaccination have shown to be in effective in the prevention of COVID-19 or the spread of it. There is no benefit and the potential for harm is too great to use an emergency use authorization vaccine and mandate it.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

It's against the law! 21-US code 360-bbb-3: Emergency Use Authorized items such as a vaccine CANNOT be mandated. An the only "authorized" Covid "vaccine" is NOT available. Please go try to get it from your Dr. It's not available. The only Vaccines available are EUA, and that is illegal!

The vaccines are experimental and violate the Nuremberg Code of 1947. This is a landmark document on medical ethics after human experimentation associated with the horrors of WWII! How dare you suggest to repeat those atrocities. This means, " the person involved should have the capacity to give consent, exercise the power of free choice without the intervention of any element of force, fraud, deceit, duress, overreach, or other ulterior form of constraint or coercion; informed of all inconveniences and hazards reasonably explained, and the effects that may come of this experiment."

The duty and responsibility for ascertaining the quality of the consent rests upon each individual who INITIATES, DIRECTS, or ENGAGES in the experiment. It is a personal duty and responsibility which MAY NOT be delegated to another with impunity.

Therefore, any harm that comes to a child after taking your "mandatory" vaccine, it's directly incumbent upon you. Are you prepared for that??

Sincerely,
Heather Hand

External Email

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

These experimental injections are NOT vaccines, they do not prevent subjects from getting covid, spreading covid, or getting seriously ill or dying from covid.

These experimental injections have had the most adverse effects than any other vaccine in history, which going off the VAERS report numbers is bad enough, but the New York Times research into VAERS reporting estimated that the numbers reported are grossly under actual numbers and the figure should be multiplied by a factor of 10.

You have no right or legal grounds to force everyone to take an experimental treatment, because it is not a vaccine, and it is not FDA approved and is still being issued under an extended EUA. Administration of anything under an EUA is bound by the requirements of informed consent, with the option to decline said treatment. Forcing against their will, or not informing people of effects is a crime against humanity and is punishable under the Nuremberg Code.

Parents are the only ones who have a say in what their children will or will not have done to them medically.

This injection/vaccine is a personal choice for everyone to make and no one has the right to force people to take it against their will, against medical conditions, or against their firmly held religious objections.

Subject: Citizen Comments Re.: Proposed Policies

External Email

Re.: PROPOSED POLICIES:

1. Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
2. Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Too many questions are yet unanswered.

The CDC openly acknowledges that for 30 years since creation of the VAERS reporting system, reporting of adverse vaccine DEATH reports remained very low and constant. However, beginning in December 2020 with the first COVID19 vaccines hitting the open market, and escalating every day since, the adverse event DEATH reports have skyrocketed to levels never before seen in 30-years of vaccine adverse event reporting.

These questions must be answered (with peer-reviewed science) before mass-enforcing an experimental injection, especially on children:

1. The CDC admits there are no peer-reviewed studies, yet it's okay to take injections, deemed "safe and effective." But by what standard?
2. Just what's in these injections? We know that the mRNA Moderna experiment injection contains SM-102 designated "for research use only, not for human or veterinary use" (See: Cayman Chemical Safety Data Sheet acc: OSHA HCS. Trade Name: SM-102.) What else is in these injections, and why pump them into humans (especially children)?
3. Salk researchers confirmed that the main damage from Covid is caused by the clot-generating spike protein, not the virus. It's unclear how long these potentially lethal proteins remain trapped in the lining of the blood vessels, or what damage they might eventually do, so why inject people with a substance that teaches their cells to make spike proteins?
4. Why the Covid surge (which, on a per-capita basis, was higher than the surge that devastated India) in 4 out of 5 of the most vaccinated countries (Forbes)?
5. Why did more people die in 2021 (January through August) despite the rollout of COVID shots in December 2020?
6. Cardiovascular, neurological and immunological adverse events are all being reported at rates never even remotely seen before. Why the magnitude of side effects compared to other vaccination programs? Shouldn't this concern us?
7. A local ABC News Station posted a request on Facebook for people to share their stories. In five days, over 200K people posted comments, all of which addressed vaccinated loved ones who died shortly after being injected, or who are permanently disabled. Shouldn't this at the very least be looked into?
8. Researchers noted: "Overall, our data provide strong evidence that SARS-CoV-2 infection in humans robustly establishes the two arms of humoral immune memory: long-lived B cells and memory B cells." This is perhaps the best available evidence of long-lasting immunity. Yet natural immunity is downplayed in the media narrative. Why?
9. To encourage pharmaceutical companies to manufacture ground-breaking new

medicine, governments use no-fault indemnity against lawsuits. Where's the protection for individuals injured from the vaccine? Check it out: According to the CDC, Myocarditis, a rare condition, is occurring at a higher than expected rate in vaccinated individuals. The Informed Consent Action Network (ICAN) reported that a study showed that the actual number of anaphylaxis is 50 to 120 times higher than claimed by the CDC.

Researchers used data from the Vaccine

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.theepochtimes.com%2Ft-vaccine&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ce0eb1461b43a483ad99508d9d15f0d97%7C11d0>

Safety Datalink, run by the CDC, to find 21 potential cases, 11 of which were confirmed, of Guillain-Barré syndrome (GBS) in people who got the shot. Autoimmunity and the opposing condition, metabolic syndrome, are well known adverse events caused by vaccines. The Covid injection is also paired with Creutzfeldt-Jakob (prion) disease.

Shouldn't the public be fully informed? And what about one's right to informed consent?

10. Are we ready for the reality that life for the vaccinated will "be about the maintenance of one's vaccination status"?

Washington State Board of Health;

Re: Adding COVID-19 Vaccines to the list of required childhood vaccinations.

The Technical Advisory Group held an orientation meeting on December 29th in which they began discussions of including COVID-19 in the list of Vaccine-preventable diseases per WAC 246-105-030. I appreciate the effort to build this decision upon science and sound medical evidence. When I use the word science, I mean provable, repeatable facts. Evidence that would stand in a court of law.

The first critical question in this process; Is the vaccine being administered under Emergency Use Authorization? If so, where does the liability rest for adverse effects? And if it is FDA approved, was the same historical approval process used for this vaccine as previous vaccines? Please provide the research along with the list of adverse effects.

What is the evidence of the efficacy of the vaccine, particularly for children under 18? My understanding is the age group being considered are least likely to have severe or life threatening symptoms from COVID-19.

And since the definition for 'fully vaccinated' continues to change, what benefits are you proposing over natural immunity? Please provide evidence.

Dr. Robert W. Malone, credited as the inventor of mRNA technology, has expressed concerns regarding the use of this technology in vaccines. Shouldn't his information be considered in this process?

During the meeting, a quote from John Stuart Mill was given as the "Board Critical Framework". It reads, "The only purpose for which power can be rightfully exercised over any member of a civilized community, against his (or her) will, is to prevent harm to others. His own good, either physical or moral, is not a sufficient warrant."

Please explain how this is not a blatant violation of our Constitutional right to personal liberty? The state and federal constitution both declare our inalienable right for our person. Yet the framework being used to guide this decision supports forced compliance against a person's moral or physical good. Justified by a philosophy that believes the good of the community is above the rights of the individual.

This is following the utilitarianism philosophy of John Stuart Mill. How is forcing this philosophy upon the public, different from forcing any other belief system upon the public, based upon the justification that it is for the good of everyone?

As you consider this decision, please look critically at the science. And think about any

course of action as to how it conforms to, or violates the liberty of the individual, per the intention of our Constitution. There are many lawsuits currently making their way through the courts concerning the forced compliance to this vaccine. Certainly, these cases should be considered as well, since any decision to mandate COVID-19 treatments will need to withstand legal challenges.

Regards,

Steve McCoy

Subject: Covid vaccine requirements for K-12

External Email

I am writing to plead with you to NOT make the Covid "vaccine" mandatory for children to attend school. There are many reasons not to move forward with this. First of all, children ARE NOT at risk from Covid and the current panick driving variant, Omicron varies from basically no symptoms to a very mild flu. For most it seems to be like a head cold. So, should we also require vaccines for the common cold? Or allergy shots? The emergency situation is and has been grossly exaggerated, particularly for children. There is no emergency situation for children outside of the policies which are destroying their childhoods. They are absolutely at more risk from these shots than from Covid. Even if you go by the official data, you will see that the numbers do back up this statement.

Another reason not to force injections on children, is that adults can all get it if they want it and that has been the case for some time now. This is actually the same reason to force it on nobody, regardless of age. If these shots work then anyone who thinks they need them can get them and should be protected. If they don't work then nobody should get them quite frankly. To argue that children should get these shots to protect adults who already have chosen to get injected themselves is NOT scientific and is contrary to even minimal common sense. Which brings me to my next point, these shots are NOT working, clearly. First, they said 99% effective, then 95%, then it was in the 80s, then 70s... Eventually, a booster was announced as essential. Now, they are saying that a fourth shot will probably be necessary. Talk of a booster anywhere from every 9 months all the way down to every 2 months is getting tossed around. CLEARLY these shots don't work as a vaccine should. So, what sense does it make to mandate them.

Next point, these are experimental and not all information on them is available. You cannot force experimental injections and you cannot force injections without FULLY INFORMED CONSENT. We do not have all information available still on these shots. That CAN'T be denied under any stretch of the truth. Tell me? What are all the ingredients? What are the long term effects? Bet you can't answer either. Before you go off on the Pfizer FDA approval narrative, stop. Comirnaty, the FDA approved version isn't available in the US and isn't being given. The emergency use version is still being given. I'm going to go out on a limb and say this is because Pfizer has legal protection under the EUA.

Another point, the officials involved have been caught blatantly lying and contradicting themselves about safety and efficacy of the vaccine and the severity of Covid over and over again. So, we are supposed to use this as the basis of whether to give families the choice of an education for their child or bodily autonomy?

Listen Now

[illegible]

On Tuesday December 22nd the UK Medicine Regulator (MHRA) gave emergency use authorisation

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.gov.uk%2Fgovernment%2Fregulator-approves-use-of-pfizerbiontech-vaccine-in-5-to-11-year-olds&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cf84da1c0041b4ca5d6e008d9cbb8ef28%7C11d0e> for the Pfizer / BioNTech Covid-19 injection to be administered to all children between the ages of 5 and 11.

Then within minutes, the Joint Committee on Vaccination and Immunisation (JCVI) advised the UK Government to roll the jab out to all children

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.gov.uk%2Fgovernment%2Fissues-new-vaccination-advice-for-children-and-young-people&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cf84da1c0041b4ca5d6e008d9cbb8ef28%7C11d> deemed to be in a clinical risk group, or who are a household contact of someone who is immunosuppressed.

Professor Wei Shen Lim, Chair of the JCVI said:

"The majority of children aged 5 to 11 are at very low risk of serious illness due to COVID-19. However, some 5 to 11 year olds have underlying health conditions that put them at higher risk, and we advise these children to be vaccinated in the first instance."

With the alleged Omicron variant about to become the dominant strain in the UK it makes very little sense to give the Pfizer injection to children due to the fact that it only targets the S protein of the virus, which is heavily mutated in Omicron.

But that is not the only reason why children as young as 5 should not be given the Covid-

19 injection.

For a parent to be competent enough to make the decision to consent to their child having the Pfizer Covid-19 vaccine, they should be made aware of all the facts before they reach their decision. So we've compiled 13 factual reasons why 5 to 11-year-old children should not be given the Covid-19 vaccine...

Reason No. 1

86% of 12-15-year old Children suffered an Adverse Reaction to the Pfizer Covid-19 Vaccine in the Clinical Trial

The information is publicly available and contained within a US Food & Drug Administration (FDA) fact sheet which can be viewed here

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F14441>
(see page 25, table 5 on-wards).

That fact sheet contains two tables that detail the alarming rate of side effects and damage experienced by 12 – 15- year-old children who were given at least one dose of the Pfizer mRNA injection.

The tables shows that 1,127 children were given one dose of the mRNA jab, but only 1,097 children received the second dose. This fact in itself raises questions as to why 30 children did not receive a second dose of the Pfizer jab.

Of the 1,127 children who received a first dose of the jab 86% experienced an adverse reaction

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdailyexpose.uk%2F2021%2F05%2F86-of-children-suffered-an-adverse-reaction-to-the-pfizer-covid-vaccine-in-clinical-trial%2F&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cf84da1c0041b4ca5d6e008d9cbb8ef28%7C1>
. Of the 1,097 children who received a second dose of the jab 78.9% experienced an adverse reaction.

<<https://i0.wp.com/dailyexpose.uk/wp-content/uploads/2021/05/image-190.png?resize=600%2C449&ssl=1>>

Reason No. 2

1 in 9 Children suffered a Severe Adverse Reaction leaving them unable to perform daily activities in the Pfizer Clinical Trial

For children 12 to 15 years of age, the Pfizer Covid-19 vaccine clinical trial found the overall incidence of severe adverse events which left them unable to perform daily activities, during the two-month observation period to be 10.7%, or 1 in 9, in the vaccinated group and 1.9% in the unvaccinated group.

Consequently, children who received the vaccine had nearly six times the risk of a severe adverse event occurring in the two-month observation period compared to children who did not receive the vaccine. In addition, the incidence of Covid-19 in the unvaccinated group was 1.6%, therefore, there were almost seven times more severe adverse events observed in the vaccinated group than there were Covid-19 cases in the unvaccinated group.

This information is all freely available to see in official Food and Drug Administration (FDA) documents

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F14441>

<<https://i0.wp.com/dailyexpose.uk/wp-content/uploads/2021/09/image-64.png?resize=639%2C167&ssl=1>>

The study also found that 16 of the 25 children who sadly died had two or more comorbidities with 8 children suffering pre-existing neurological and respiratory problems, 3 children suffering pre-existing neurological and cardiology problems, and 3 children suffering respiratory and cardiology problems.

<<https://i0.wp.com/dailyexpose.uk/wp-content/uploads/2021/09/image-66.png?resize=639%2C284&ssl=1>>

Reason No. 4

The risk of Children developing serious illness due to Covid-19 is extremely low

A study (found here

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F>
) led by Professor Russell Viner of UCL Great Ormond Street Institute of Child Health, published on the medRxiv server, found that 251 young people aged under 18 in England were admitted to intensive care with Covid-19 during the first year of the pandemic (until the end of February 2021).

The results of the study found that there were 5,830 admissions associated with Covid-19 among children up to 17 years of age during the pandemic year, this represents just 1.3% of secondary care admissions among children.

The lead author of the study said: "These new studies show that the risks of severe illness or death from SARS-CoV-2 are extremely low in children and young people".

<<https://i0.wp.com/dailyexpose.uk/wp-content/uploads/2021/09/image-111.png?resize=639%2C313&ssl=1>>

Reason No. 5

The Pfizer Covid-19 Vaccine is experimental and still in Clinical Trials

The Pfizer mRNA Covid-19 injection is in fact only temporarily authorised

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fassets.publishing.service.gov.uk%>
(see official MHRA document here

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fassets.publishing.service.gov.uk%>
) for emergency use only. In October the government made changes to the Human Medicines Regulations 2012 to allow the MHRA to grant temporary authorisation of a Covid-19 vaccine without needing to wait for the EMA.

A temporary use authorisation is valid for one year only and requires the pharmaceutical companies to complete specific obligations, such as ongoing or new studies. Once comprehensive data on the product have been obtained, standard marketing authorisation can be granted. This means that the manufacturer of the vaccine cannot be held liable for any injury or death that occurs due to their vaccine, unless it was due to a quality control issue.

<<https://i0.wp.com/dailyexpose.uk/wp-content/uploads/2021/09/image-112.png?resize=512%2C384&ssl=1>>

The reason the Pfizer mRNA Covid-19 injection has only been granted temporary authorisation is because it is still in clinical trials that are not set to conclude until May

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fclinicaltrials.gov%2Fct2%2Fshow%2Fstudy%2F00000976&data=04&contextmenu=link&format=html>

This is the first time mRNA injections have ever been authorised for use in humans (see [here](#))

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fpapers.ssrn.com%2Fsol3%2Fpapers.c%2F678942&cid=678942>) examined 900 hospital staff members in Vietnam who had been vaccinated with the Oxford / AstraZeneca viral vector injection between March and April 2021. The entire hospital staff tested negative for the Covid-19 virus in mid May 2021 however, the first case among the vaccinated staff members was discovered on June 11th.

All 900 hospital staff were then retested for the Covid-19 virus and 52 additional cases were identified immediately, forcing the hospital into lockdown. Over the next two weeks, 16 additional cases were identified.

The study found that 76% of the Covid-19 positive staff developed respiratory symptoms, with 3 staff members developing pneumonia and one staff member requiring three days of oxygen therapy. Peak viral loads among the fully vaccinated infected group were found to be 251 times higher than peak viral loads found among the staff in March – April 2020 when they were not vaccinated.

UK Department of Health & Social Care Study

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F>

The UK Department of Health & Social Care study (found [here](#))

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F>

) is an analysis of ongoing population wide SARS-CoV-2 monitoring in the UK and includes measures of viral load among the population.

The study found that viral loads among the vaccinated and unvaccinated population are virtually the same, and much higher than had been recorded prior to the Covid-19 injection roll-out. The study also found that the majority of cases among the vaccinated population were presenting with symptoms when they became positive.

The authors of the study conclude that the Pfizer and Oxford / AstraZeneca injection have lost efficacy against what they claim to be the Delta Covid-19 variant.

Reason No. 7

Public Health England Data shows the majority of Covid-19 Deaths are among the Vaccinated and suggests that the Vaccines worsen disease

Various UK Health Security Agency Vaccine Surveillance reports

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fassets.publishing.service.gov.uk/_week_49.pdf&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cf84da1c0041b4ca5d6e008d9cbb8ef28%](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fassets.publishing.service.gov.uk/_week_49.pdf&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cf84da1c0041b4ca5d6e008d9cbb8ef28%3A)

detail the number of Covid-19 cases by vaccination status in England. The following chart shows hospitalisations by vaccination status over a period of 16 weeks from 16 Aug 21 to 05 Dec 21.

<https://i0.wp.com/dailyexpose.uk/wp-content/uploads/2021/12/image-279.png?resize=639%2C523&ssl=1>

The chart shows that between August and early September, the fully vaccinated population accounted for the majority of Covid-19 cases. However, between the middle of September and early October this switched to the not-vaccinated population accounting for the majority of cases. This is most likely due to children returning to school in September and being “encouraged” to test on a regular basis.
