~ Optional ~

Please consider completing this optional section, which will give the Board a sense of why this review has been requested.

NOTE: When conducting a health impact review, the Washington State Board of Health will consider various ways that a proposal might exacerbate or ameliorate health disparities. Completing this section will give the Board a head start by helping it understand the reasons why a review is being requested.

Briefly describe how you think the proposal might impact health disparities and whether you believe the impact will be in a positive or negative direction.

This proposal should improve health disparities, as it is shown that comprehensive sexual health education reduces the rates of STIs and unintended pregnancy. Consent-based education is also shown to have a positive impact on intimate partner violence and rates of sexual assault and harassment.

Are there specific organizations or community groups you would like the Board to contact as part of this review if time allows?

Planned Parenthood.
